- An additional 5% aid percentage, up to the ceiling set by the RSAM, is granted for investment plans in Industrial Entrepreneurship Zones and Innovation Zones. Benefits are also granted up to the ceiling set by the RSAM, by enterprise size and up to 50% of the eligible expenditure, for investment plans on islands and regional units of islands that belong administratively to the regions of the mainland.

- The new law sets a ceiling for each aid (EUR 10 million to 15 million in principle, but graduated according to various criteria).

- The period for filing the application (April and October, with the exception of large investment projects) and the conditions for approval are further specified.

- The law specifies the conditions and evaluation criteria for each investment project and determines, in general, the procedure for evaluation, approval, and monitoring of implementation of investment projects (further specification by ministerial decisions).

- The mode of payment of each type of aid is further determined. Especially for the aid of tax exemption, the law stipulates that the amount of tax exemption aid is annually formed with the following restrictions:

  - The enterprise is entitled to the use benefit of the incentive from the fiscal year in which the decision on the completion and beginning of the productive operation of the investment has been published. In this fiscal year, the ceiling of tax exemption to be used is set at \( \frac{1}{3} \) of the approved amount of the tax exemption aid.

  - In the following fiscal year, the ceiling of tax exemption to be used, including the aid for the first fiscal year, is set at \( \frac{2}{3} \) of the approved amount of the tax exemption aid.

  - The remaining amount of the approved tax exemption aid may be covered within ten fiscal years for new enterprises and within eight fiscal years for existing enterprises following the fiscal year in which the decision on the completion and beginning of the productive operation of the investment has been published.
• The amount of the tax exemption aid shall be shown as a tax-free reserve in a special account in the enterprise’s accounting books and shall consist of the income tax on the net profits reported in the initial timely income tax return, which shall not be paid based on the tax exemption granted.

• Where the equipment is acquired through leasing, the tax exemption to which the enterprise is entitled in each fiscal year is calculated on the part of the purchase price of the equipment that is included in the rents already paid by the end of this fiscal year.

• The law stipulates that the amounts of subsidies and leasing subsidies as well as of tax exemption shall be shown as tax-free reserves in special accounts. Said reserves may not be distributed or capitalised and shall be returned in case of dissolution of the enterprise. In case of distribution or capitalisation, certain penalties shall be imposed.

• The law stipulates that any aid to be paid is exempt from any tax, stamp duty, right, and any other charge in favour of the state or any third party.

• Finally, the new law specifies the obligations of the beneficiary enterprises and penalties in case of non-compliance.

The above rules are very detailed, and analytical and careful advice needs to be sought before making any decision in respect thereof.

**Withholding taxes**

Profits distributed by Greek SAs or LLCs (and also some associations) in the form of dividends, Board and Directors fees, profits distributed to personnel, as well as interim dividend payments made to individuals or legal entities, Greek or foreign, and independent of whether the payments are made in cash or in kind (shares), are subject to 25% WHT. For dividends approved by the competent body from 1 January 2014 onwards, said WHT rate is reduced to 10%.

Tax is withheld by Greek SAs, LLCs, and associations with exhaustion of tax liability of the beneficiaries. An exception is provided with regard to individuals that are taxed on their total income at a tax rate lower than the WHT rate, in which case, income derived from dividends or the aforementioned participations shall be taxed based on the general provisions with a credit on the tax withheld.

WHT shall not be imposed on dividends paid to a legal entity established in another member state of the European Union, subject to the conditions of L.2578/1998 (Parent-Subsidiary Directive).

25% WHT (to be reduced to 10%) shall also be applicable on the distribution of profits remitted or credited by a PE of a foreign legal entity in Greece to its registered seat or to another PE located abroad.

Said WHT applies to distribution of profits made by partnerships maintaining double entry accounting books.

The dividend WHT is equally applicable for distributed or capitalised profits of previous fiscal years.

The following table provides a summary of the WHTs applicable under the respective DTTs entered into by Greece:

### Notes

1. The 25% WHT applies to distribution of dividends by Greek SAs and Greek LLCs. For dividend distributions approved by the competent body from 1 January 2014 onwards, the dividend WHT rate is reduced to 10%.
2. Interest earned on deposits with banks operating in Greece, as well as on any kind of bonds, is subject to WHT at the rate of 15% withheld at source. WHT on interest payable to non-Greek residents is 33%.
3. Payments of royalties and service fees to foreign residents are subject to a WHT at the rate of 25%.
4. It should be taken into account that such rates are based on the DTT applicable as of 1 January 2011, whilst other rates have been applicable in the past.
5. The rate of 5% will apply if the beneficial owner is a company that holds directly at least 25% of the voting power of the company paying the dividends.
6. The rate of 5% applies in case the beneficiary is a company (excluding a partnership) and directly holds at least 25% of the capital of the paying company.
7. The rate of 5% is applicable only for the right to use cinematograph films.
8. Rate of 5% applies to loans not incorporated into negotiable instruments and granted by banks.
9. A rate of 5% is applicable to shareholders of 25% and above.
10. The rate is 5% applies if the royalties consist of payments of any kind received as a consideration for the use of or the right to use any copyright of literary, artistic, or scientific work, including cinematograph films.
11. Exemption ('0' rate) applies to payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work including cinematograph films and films or tapes for television or radio broadcasting.
12. Interest (on bonds, securities, notes, debentures, or on any other form of indebtedness) received from sources within Greece by a resident or corporation of the United States (US) not engaged in trade or business in Greece through a PE therein, shall be exempt from Greek tax but only to the extent that such interest does not exceed 9% per annum; but such exemption shall not apply to such interest paid by a Greek corporation to a US corporation controlling, directly or indirectly, more than 50% of the entire voting power in the paying corporation.
13. The 5% rate is applicable if the royalties consist of payments of any kind received as a consideration for the use of industrial, commercial, or scientific equipment, and the 10% rate is applicable for all the other cases.
14. The 8% rate is applicable when the beneficiary of the interests is a bank or a financial institution, 10% rate is applicable for all the other cases.
15. Exemption ('0' rate) applies to copyright royalties and other like payments in respect of the production or reproduction of any cultural or artistic work (but not including royalties in respect of motion picture films nor royalties in respect of works on films or videotapes or other means of reproduction for use in connection with television broadcasting).

In general, it should be noted that certain DTTs may include specific clauses in specific cases that are not all captured in the table; therefore, a careful review of each DTT is highly advisable.
**Tax administration**

**Taxable period**
The taxable period is the financial year, which can end either on 30 June or 31 December.

**Tax returns**
CIT returns of Greek SAs, LLCs, and branches of foreign companies are filed on a special form within four months and ten days from the end of their financial year. By a decision of the Minister of Finance, the filing date for SAs may be extended a few days, depending on the last digit (figure) of their tax registration number (known in Greece as the arithmos phorologikou metroou or AFM). Branches and subsidiaries (at least 50% participation) of foreign companies may follow the financial year of the parent company. A Greek company that is at least 50% held by another Greek company that is in turn a subsidiary of a foreign company that has participation with the same or higher percentage may also follow the financial year of the foreign parent company. The CIT return constitutes the basis for assessment.

Tax returns are required to be submitted electronically.

**Payment of tax**
CIT and tax prepayment (80% [100% for banks operating in Greece] of the current year’s CIT less tax withheld at source) based on the tax return are paid in eight equal monthly instalments, the first of which should be paid upon filing. Therefore, for companies whose financial year ends on 31 December, the final instalment is payable in December. For newly established companies, the pre-payment is reduced to 50% for the first three years of their operating. A deduction of 1.5% is granted in case of a lump sum payment of CIT liability.

**Tax audit process**

**Tax audit procedures**
The tax audit commences with the issuance of an audit order for tax open years, usually not more than five. The order concerns the audit of all tax issues (CIT, VAT, WHT, capital gain tax, etc.). The duration of the audit may vary from a few weeks to a few months, in certain cases.

A regular or temporary audit may also be conducted from the office of the audit authority. Such audit from the office is based on the data of the file, the sheets of information, the audit reports of the Financial Crime Prosecution Unit and other authorities of the Ministry of Finance, the books and records that the taxpayer may be required to submit, the data and information of the entities stipulated in article 17 of L. 3842/2010, and the data accruing from the electronic data processing at the General Secretariat for Information-Security Systems. The possibility of issuing from the office an act of partial tax determination for one, or more, fiscal years, without auditing all the books and records and without requiring the audit of other taxes, also applies, in case where it is derived from other data at the disposal of the audit authority (i.e. information sheets, reports of the Financial Crime Prosecution Unit, electronically processed data of the General Secretariat for Information-Security Systems) that the liable entity omitted to declare, or inaccurately declared taxable income, or even miscalculated the percentages, or deductions.
However, the ability of conducting an audit at the registered seat of the legal entity, specifically with regard to cases that are explicitly stipulated in the law, is in parallel applicable.

Law 4038/2011, as amended by Law 4079/2012, introduces the option of determining the financial results of an entrepreneur with the use of specific indirect audit techniques set out in the relevant provisions.

Following the audit and the notification of tax audit findings, the company may in turn:

- Negotiate with the tax authorities with a view to reducing the tax burden and achieve an ‘out of court settlement’. The out-of court settlement offers the possibility to reduce additional taxes (not the principal amount of tax) at the rates provided now under the provisions of L.2238/94 (reduction of the additional tax to 3/5 or 1/3 depending on the case). The conclusion of such a settlement presupposes that the company accepts the findings of the audit (e.g. of expenses) for the audited years and is likely to face the same issues in the following years as well.
- Take the case to court (filing of a recourse), which necessitates an advance payment (50% of the taxes and penalties assessed). The first decision normally takes two to three years and another six to eight years until a decision by the Court of Appeal and Supreme Court is issued. There are several measures being currently implemented in an attempt to reduce this time.
- There is also a possibility to take the case to a Fiscal Arbitration Body, competent to arbitrate over dispute resolution arising from tax assessments exceeding EUR 150,000, by filing an application and subject to the consent by the Minister of Finance. The commencement of operation of the Fiscal Arbitration Body is to be determined by a Presidential Decree to be issued following the suggestion of the Ministers of Finance and Justice; to date (May 2012), such Presidential Decree has not been issued.

Criminal sanctions are also imposed on the company’s representative under certain conditions, which are waived in the case of settlement on the amount of taxes assessed.

**Audit Authority for Taxpayers with Great Wealth**
The special audit authority ‘Audit Authority for Taxpayers with Great Wealth’, competent for the whole Greek territory, performs provisional, temporary, and ordinary tax audits, as well as the audit of real estate property and of the annual expenses of individuals. The audit of foreign real estate companies not disclosing their ultimate beneficiary individuals and of Greek real estate companies in which a foreign legal entity participates without disclosing the ultimate beneficiary individuals are also assigned to the Audit Authority for Taxpayers with Great Wealth. Moreover, the Audit Authority for Taxpayers with Great Wealth is also competent for the certification and enforced collection of revenue of taxpayers with great wealth.

**Audit Authority for Large Enterprises**
The ‘Audit Authority for Large Enterprises’ is responsible for the performance of ordinary audits of taxpayers with annual gross income exceeding EUR 25 million, affiliated enterprises irrespective of gross income, parent companies of affiliated enterprises drafting consolidated financial statements irrespective of the accounting period and the amount of gross income, enterprises resulting from restructurings, as well said enterprises prior to the restructurings. The Audit Authority for Large Enterprises is also competent for the enforced collection of revenue of large enterprises located in the whole Greek territory.
The above newly established audit authorities commenced their operations from 5 May 2013 onwards.

**Tax auditors’ practice**
The complexity of the Greek tax legislation and the vagueness of its requirements enable the tax auditors to dispute either the company’s results reflected in its accounting records or to disallow expenses. This is true in all tax audits and, in spite of companies’ endeavours to comply with the tax requirements, tax audits always result in assessment of additional taxes and penalties.

The amount of additional taxes depends mainly on the following:

- Company’s vulnerability because of nature of business and transactions.
- Taxes already paid on the basis of the company’s income tax returns.
- Profits declared by competitors.
- Weaknesses and shortcomings that the tax auditors might reveal, if a full audit is carried out.

The amount of additional taxes is capped and cannot exceed:

- 60% for the submission of a delayed tax return and
- 120% for the submission of an inaccurate submission or non-submission of a tax return.

In respect of deductible expenses, the legislation prescribes, among other requirements, that such expenses must be of a ‘business’ nature, without defining what a business expense is. Consequently, the tax auditors dispute the deductibility of various items arguing that, in their opinion, they are not contributing to the company’s business.

In a worst-case scenario, if serious violations are detected that make the audit verifications impossible, then the validity of the accounting books may be contested, resulting in the deemed (out-of-books) profit calculation and the imposition of heavy penalties and additional taxes.

Greek SAs and LLCs whose annual financial statements are subject to a statutory audit by individual Certified Auditors and audit firms are required to obtain an ‘annual tax certificate’ from their certified auditors upon the completion of a tax audit conducted, confirming compliance with Greek tax legislation. The tax audit is conducted on specific tax areas as defined by a special audit program issued by the Ministry of Finance in cooperation with the Committee of Accounting Standardization and Auditing (ELTE). The audit program will be updated annually and is in accordance with the provisions of International Standard on Non-Audit Assurance Engagements 3000.

**Statute of limitations**
The right of the Greek state to seek to collect unpaid taxes is normally five years starting from the end of the year in which the relevant tax return should be filed. For example for taxes due in 2012, the clearance VAT return should be filed in 2013 and the statute of limitation expires on 31 December 2018. However, in the case where a return is not filed, then the statute of limitation is extended to ten years. Furthermore, it should be noted that the statutes of limitation may be extended by law. This has happened many times in the past.
Greece

The state’s right to issue tax assessment sheets for cases imminently subject to prescription and for which an audit order has already been issued is extended for two more years.

**Other issues**

**Choice of business entity**

The main differences between a subsidiary (i.e. SA or LLC) and a branch of a company from the law/establishment perspective are as follows:

- A subsidiary is a separate legal entity from its parent company, whereas a branch does not form a separate legal entity, does not have its own shareholders, and consequently the funds needed for its operation are transferred from the overseas parent company.
- The parent company of a branch must be either the equivalent of a Greek SA or an LLC, whereas there is no such restriction for subsidiaries.
- The day-to-day management of a branch is exercised by the legal representative, a person appointed by the parent company, whereas an SA is represented by its BoD and an LLC is administered and directed by the administrator(s).
- No minimum capital is required for the establishment of a branch; nevertheless the share capital of the parent company should be at least EUR 24,000 if it is an SA and EUR 2,400 if it is an LLC.
- An SA appears to be a more prestigious type of company than a branch and an LLC. This has a mainly psychological effect. Certain investors still tend to opt for the establishment of an SA company, particularly if they would like to participate in public tenders, etc.

The main legal differences between an SA and an LLC in Greece from a company law/establishment perspective are as follows:

- An SA is managed by a BoD consisting of at least three members, whereas an LLC can be managed by only one individual, the administrator (legal entities are permitted to be appointed as BoD members or administrators). Both BoD members and administrators have to acquire a Greek tax registration number and a Greek residence permit before the establishment of the companies. Obtaining a residence permit for non-EU citizens is a time consuming procedure.
- The shareholders of an SA are not required to be registered with the Greek tax authorities, whereas the partners of an LLC have to be registered with the Greek tax authorities and this may prove to be a time consuming procedure.
- An SA is established by virtue of registration or approval (in case the company’s share capital is higher than EUR 3 million as well as in special cases) of the notarial deed that embodies the company’s Articles of Association (AoA). The announcement of the Ministry of Development, containing a summary of the AoA, must be published in the ‘Bulletin of Societes Anonymes and Limited Liability Companies’ of the Government Gazette. Generally, the registration of a SA requires approximately one to two working days after submission of relevant documentation. However, the time period may be extended to ten working days, in the case that a special approval by the Ministry of Development is required. Whereas an LLC is established by a notarial deed, which incorporates the company’s AoA, filed with the relevant authority (Registry with the Court of First Instance). A summary of the AoA must be published in the ‘Bulletin of Societes Anonymes and Limited Liability Companies’ of the Government Gazette. Such registration usually takes three to five working days after the signature of the notarial deed.
• An SA company is supervised by the Greek Ministry of Development (Prefecture), which necessitates certain filings to be performed (e.g. minutes of BoD, general announcements, financial statements). Whereas, at least at this stage, no supervising authority exists for an LLC and thus its filing requirements are less restrictive.

New corporate form: the ‘Private Company’ (PC)

• The PC constitutes a legal entity and is commercial in nature, even if its object is not per se commercial. The PC should have a capital of at least EUR 1, whilst its partners participate in the PC by means of capital, non-capital, and guarantee contributions.
• The participation in the PC presupposes the acquisition of one or more capital parts. The capital parts should have a nominal value of at least EUR 1. The PC is not entitled to acquire, either directly or indirectly, its own capital parts.
• The PC has its registered seat in the municipality referred to in its AoA, while the transfer of the registered seat of the PC in another country of the European Economic Area (EEA) does not necessarily result in the dissolution of the PC, provided that the recipient country recognises the transfer and the continuity of legal personality. The PC is not obligated to have its actual seat in Greece, whilst the PC is capable of establishing various types of secondary establishments either in Greece or abroad.
• The term of the PC is definite; if not otherwise stipulated in the AoA of the PC, the PC has a term of 12 years following its establishment.
• The PC is administered and represented by one or more administrators.
• The administrator represents the PC and conducts in its name all actions pertaining to the administration of the PC, the management of its assets, and, in general, the pursuit of its objects. Actions of the administrator, even if falling outside the corporate objects, bind the PC vis-à-vis third parties, unless the PC proves that the third party knew or ought to have known the violation of the company's objects.
• The provisions of One Stop Shop Authority are accordingly applied to the establishment of the PC. The establishment of the PC is effected by means of registering the PC with the General Electronic Commercial Registry (GEMI).
• The PC drafts: (i) the balance sheet, (ii) the profit and loss account, (iii) the appropriation account, and (iv) the appendix incorporating all required information for the comprehension of the financial statements, as well as the report of the administrator in relation to the corporate activity for the ending fiscal year.
• The PC is dissolved: (i) at any time following a resolution of the partners, (ii) when its definite term has expired, unless the term of the PC is extended by virtue of a resolution of the partners, (iii) if the PC defaults, and (iv) in all other circumstances contemplated by the law or the AoA.
• As the PC was only introduced in April 2012, no practical experience is yet available as to its implementation and use.

Significant developments
There have been no significant corporate tax developments in Guatemala during the past year.

Taxes on corporate income
The tax system of Guatemala is a unitary system, whereby income of all kinds, other than capital gains, is lumped together and subject to a single tax. The components of gross income subject to tax are usually business income, interest, dividends, rent, salaries, and services. Companies are subject to income tax only on their Guatemala-source income. Dividends and other income payable abroad are taxed separately by way of withholding taxes (WHTs).

For income tax purposes, there are two main systems that taxpayers may subscribe to: the system on earnings from lucrative activities and the simplified optional system on income from lucrative activities. The taxpayer chooses what system the company is registered at. Once a system is chosen, it cannot be modified until the next tax period. The request for the modification must be requested before the tax authorities at least one month prior to the new tax period.

These systems are explained below.

System on earnings from lucrative activities
Under the system on earnings from lucrative activities, the tax is determined and paid at the end of each quarter, without prejudicing the end-of-period final tax liquidation. The tax rate is 31% on net income for 2013, 28% for 2014, and 25% for 2015.

This system allows taxpayers to deduct costs and expenses incurred during the period, according to requirements established by law.

Simplified optional system on income from lucrative activities
Under the simplified optional system on income from lucrative activities, the tax is payable under flat tax withholdings (the tax is to be retained by either the customer or the recipient of services) or by direct remittances to the tax office made monthly within the first ten working days of the month following the invoice date. The tax rate for 2013 is 5% on gross income that ranges from 0.01 Guatemalan quetzales (GTQ) to GTQ 30,000 and 6% on the excess. For 2014, 7% applies on the excess.
**Local income taxes**
There are no specific state or provincial government taxes on income other than the two systems previously described.

**Corporate residence**
The place of incorporation determines corporate residence. Entities incorporated under Guatemalan laws are required to have their fiscal and corporate residence in Guatemalan territory.

**Permanent establishment (PE)**
As of 1 January 2013, Decree No. 10-2012 includes PE, i.e. activities conducted in the country in a continuous manner, either in a fixed business place or facilities conducting work of any kind, except for insurance and refinancing activities, brokers, independent agents, etc. acting in the normal turn of events.

**Other taxes**

**Value-added tax (VAT)**
A 12% VAT is levied on the sale or transfer of merchandise and on non-personal services rendered or effected in Guatemala. The tax is payable to the government by way of the invoice method, whereby the tax charged to the customers is offset by the VAT paid over purchases, and the government collects the net resulting amount. The issuance and circulation of credit titles is VAT-exempt.

**Sale of goods**
The taxable amount on the sale of goods includes the sales price, less any discounts provided under sound commercial practices, plus other charges shown on the invoice.

**Services**
The taxable amount of services includes the price of the service, less any discounts provided under sound commercial practices, plus financial charges and products used to render the services.

**Imports and leases**
The tax base for imports is the value declared for import duties computation purposes.

The tax base for leases of movable or immovable property is the value of the lease.

**Exempted sales and services**
The following items are exempt from VAT:

- Importations made by:
  - cooperatives legally constituted as registered on imported machinery, equipment, and other goods relating to the activity or service of the cooperative
  - individuals and juridical entities under temporary importation regulations, and
  - diplomatic and consular missions accredited before the Guatemalan government.
- Banking institution services and their agents.
- The issuance, circulation, and transfer of credit bonds, value bonds, and stocks of any kind.
- Interest accrued by credit bonds and other obligations issued by mercantile partnerships, negotiated through an authorised stock exchange.
Guatemala

- Exports of goods and services.
- Contributions and donations to educational, cultural, assistance, or security service partnerships, constituted as not-for-profit entities.

**VAT return**
The amount payable to the Superintendencia de Administración Tributaria (SAT), Guatemala’s tax authority, is the difference between the debits and credits accrued during the tax period (one month) and is paid monthly by filing a tax return in the following calendar month at the end of each tax period.

**Refunds of VAT**
The VAT credit can be claimed on monthly, quarterly, or semiannual tax periods. The refund of VAT credit corresponds to exporter taxpayers who cannot offset the VAT credit with VAT debts.

In addition, the VAT credit can be claimed by those taxpayers who have a high percentage of sales to entities exempt from VAT.

**Import duties**
The Customs Duties on Imports (DAI) are contained in the Central American Tariff System (SAC), which contains the tax rates applicable to goods imported into the Guatemalan Territory, ranging from 0% to 20%.

The import duties apply to the customs value declared by the importer.

**Excise taxes**
Excise taxes are applicable to specific activities, such as Fuel Distribution Tax, Alcohol & Beverages Distribution Tax, and Tobacco Distribution Tax.

**Real estate tax**
Real estate taxes are assessed annually at GTQ 2 per thousand on declared property values of from GTQ 2,000 to GTQ 20,000, at GTQ 6 per thousand on values from GTQ 20,000 to GTQ 70,000, and at GTQ 9 per thousand on values in excess of GTQ 70,000 (e.g. property valued at GTQ 1 million will pay real estate taxes of GTQ 9,000).

**Transfer of property**
VAT is payable on the first sale of real estate, and subsequent sales are taxed under the stamp tax regime.

**Stamp taxes**
Other than sales invoices, contracts, and documents subject to VAT, and other minor exemptions, a stamp tax must be paid on all documents covering commercial and legal transactions (e.g. collection of dividends), either by preparing the document on papel sellado, which is special stamped paper, or by affixing stamps on the documents. This tax is also assessed on documents issued abroad, other than drafts or promissory notes and commercial invoices from foreign suppliers. Letters of credit and acceptances involving international transfers of funds are generally exempt from stamp taxes.

The normal tax rate is 3% and is calculated on the face value of the documents or on the gross value of the related transaction.

It should be noted that as of 1 January 2013, the stamp tax on dividend payments or credits has been repealed, since on that date, book I of Decree No. 10-2012 entered
into force, which states that a 5% income tax should be paid on dividend payments or credits in account equity.

**Solidarity tax (Impuesto de Solidaridad or ISO)**
The ISO tax rate of 1% is assessed on the net assets of a corporation, or on the gross income of a corporation, whichever is higher, and there is no limit on the amount to be paid. Tax paid may be credited against the corporation’s income tax. If the ISO exceeds the income tax, no reimbursement is possible.

The tax is to be paid quarterly on the basis of the corporation’s opening balance sheet for each fiscal period.

**Social security contributions**
Corporations contribute 12.67% of their monthly payroll and employees contribute 4.83% of their monthly salary to social security.

**Branch income**
In Guatemala, branches are taxed as any other legal entity. There are no specific taxes for branches.

**Income determination**

**Inventory valuation**
For tax purposes, taxpayers are authorised to use any of the following methods for valuing stocks (i.e. inventory), provided they technically fit the taxpayers’ business and are consistently applied:

- Cost of production.
- First in first out (FIFO).
- Weighted average.
- Historical price of assets.
- Estimated cost at a fixed price (additional for livestock activities).

**Capital gains**
Under the provisions of Decree No. 10-2012, the regime of capital income, capital gains, and capital losses is established with the following tax rates:

- Real estate equity income: 10%.
- Income from trading movables: 10%.
- Capital gains and losses: 10%.
- Incomes from lotteries and raffles: 10%.

Capital losses can be netted only against capital gains, up to a maximum of two years.

**Dividend income**
According to the provisions of Decree No. 10-2012, dividends earnings and profits are subject to a 5% income tax.

**Interest income**
Pursuant to Decree No. 10-2012, all interest income is subject to a 10% income tax.
Guatemala

Foreign income
Foreign-source income received by a domestic corporation is generally exempt from Guatemalan income tax, provided that it does not relate to a service or activity rendered in Guatemalan territory.

Deductions
Taxpayers under the system on earnings from lucrative activities may deduct costs and expenses from gross income, including the following.

Depreciation
Depreciation is calculated annually using the straight-line method. The tax authority may authorise a different method on request of the taxpayer. The annual maximum rates allowed as deductible expenses are the following:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Building and improvements</td>
<td>5</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>20</td>
</tr>
<tr>
<td>Furniture and fixtures</td>
<td>20</td>
</tr>
<tr>
<td>Vehicles</td>
<td>20</td>
</tr>
<tr>
<td>Tools</td>
<td>25</td>
</tr>
<tr>
<td>Tree and vegetable species</td>
<td>15</td>
</tr>
<tr>
<td>Computer equipment and software</td>
<td>33.33</td>
</tr>
<tr>
<td>Any other depreciable asset</td>
<td>10</td>
</tr>
</tbody>
</table>

Goodwill
Intangible assets, such as goodwill, trademarks, manufacturing processes, patents, etc., may be deductible under the straight-line method of amortisation over a period that depends on the conditions of the acquisition or creation of the intangible asset concerned, and cannot be less than five years.

Start-up expenses
Start-up expenses are deductible.

Interest expense
The deduction of interest expense is limited to the maximum interest rate used by the National Bank annually (to date approximately 12% to 13%). This limitation is not applicable for banks, financial entities, or cooperatives.

Uncollectible accounts
Uncollectible accounts arising in normal business operations can be deducted individually or, alternatively, via an allowance for doubtful accounts, which shall not exceed 3% of the debit balances of accounts and notes receivable.

Charitable contributions
Duly proven donations made to the government, the municipalities, and their agencies, as well as to duly authorised not-for-profit welfare, social service, and scientific associations and foundations, universities, political parties, and guild entities are deductible. The maximum deductible amount for income tax purposes of each period shall not exceed 5% of the donor’s net income, up to a maximum of GTQ 500,000 per year.
**Employee pension/retirement funds**
The deduction of provisions to establish or increase employee pension and retirement funds or reserves is allowed, provided the government approves the related plans.

**Severance compensation payments**
Severance compensation payments are allowed as deductible expenses as well as limited allocations (not to exceed 8.33% of total annual salaries and wages) to a reserve for severance compensation. Provisions pertaining to actual liability for severance compensation per year are also allowed, provided the related plans, based on collective bargaining agreements, are approved by the employer and employees.

**Fines and penalties**
Charges, penalties, and interest charged by any government institutions are not deductible.

**Taxes**
All taxes are deductible, except income tax and VAT when these are not considered as a cost.

**Net operating losses**
Operating losses may not be carried forward for deduction from otherwise taxable profits. Guatemalan laws also do not permit carryback of losses.

**Payments to foreign affiliates**
Deduction for royalties will be allowed, up to 5% of gross income. Pursuant to Decree No. 10-2012, the deductible expenses for technical services rendered from abroad shall not exceed 5% of gross income.

Expenses incurred abroad by non-residents in connection with income earned from Guatemalan sources cannot be deducted for income tax purposes by merely having the supporting receipts, as the regulations to the law do not permit such a deduction for these purposes, unless these expenses are related with the Guatemalan company operations and these expenses are needed for generating taxable income.

**Group taxation**
No consolidation for tax purposes is permitted, as each group entity is treated as an independent taxpayer that shall file its own tax return.

**Transfer pricing**
Under the provisions of Decree No. 10-2012, rules regarding transfer pricing were introduced.

From a Guatemalan transfer pricing perspective, the scope of application of the rules of valuation of transactions between related parties reaches any operation that has been carried out between a person living in Guatemala with a resident abroad.

According to the Decree mentioned above, local legislation allows the selection of traditional methods and profit-based methods consistent with the Organisation for Economic Co-operation and Development (OECD) guidelines as well as a sixth method applicable to imports and exports.
Guatemala

Advance pricing agreements (APAs) are permitted, and it is also stated that the tax authority can reclassify activities according to its true nature in accordance with Tax Code statements.

**Thin capitalisation**

Thin capitalisation applies regarding deductible expenses for interest paid.

On this matter, Decree No. 10-2012 states that without prejudice to other rules on deduction of interest, the deductible amount for such costs may not exceed the value of multiplying the annual maximum simple interest rate determined by the Guatemalan Monetary Board for tax purposes by three times the amount of average total net assets submitted by the taxpayer in the annual income tax return.

In addition, the Decree mentioned above defines average total net assets as the sum of total net assets of the previous year with total net assets at the end of the year in force, both values must correspond to the amounts filed in the annual income tax return of each period of final settlement, divided by two. Total net assets are defined by law to correspond to the book value of all goods that are actually the property of the taxpayer.

**Tax credits and incentives**

**Foreign tax credit**

Guatemala has no provisions or agreements signed to avoid international double taxation, and no foreign tax credit is allowed.

**Drawback industries (maquila)**

The Law of Promotion and Development of Exports Activities and Drawback Industries is known in Guatemala as *maquila*. This law seeks to promote, encourage, and develop the manufacture of products within areas controlled by the Customs Authority for export to countries outside the Central American region, as well as to regulate exporting and drawback activities.

The exporter may apply for authorisation to operate under any of the following three systems provided by the law:

- Export under a temporary admission system.
- Export under the reimbursement of duties system.
- Export under the total added national component system.

Tax incentives and benefits of the law include the following:

- Exemption of taxes, import duties, and other charges on imports of machinery and equipment, including VAT.
- Discontinuance of VAT payments on temporary raw material imports.
- Exemption of income tax for ten years on profits obtained under this law.

**Free Trade Zones Law**

The Free Trade Zones Law seeks to encourage and regulate the establishment of free trade zones that promote domestic development by activities carried out within certain zones, particularly those that tend to strengthen export activities, generate employment, and transfer technology.
Tax incentives and benefits of the law include the following:

- Import duties exemption.
- Income tax exemption as follows:
  - Ten-year period for the administrative agency.
  - Ten-year period for industrial & service permit holders.
  - Five-year period for commercial permit holders.
  - Exemption of real estate taxes for a five-year period.
  - Exemption of tax stamps on the conveyance of title over properties.
  - Dividends or profits distributed by the administrative agency and permit holders shall also be considered tax-exempted income.
  - Exemption of custom duties and any other charges on import and consumption of fuel oil, bunker, butane, and propane gas used exclusively in the free trade zone.
- Foreigners working in the free trade zone are subject to the provisions of the immigration law and the Labour Code.

### Withholding taxes

For 2013 and onwards, the following WHT rates apply on payments to non-resident corporations or individuals:

<table>
<thead>
<tr>
<th>Payment</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends, international freight, telecommunications (1), electric energy</td>
<td>5</td>
</tr>
<tr>
<td>Interest (2)</td>
<td>10</td>
</tr>
<tr>
<td>Royalties; salaries; commissions; professional fees; professional, technical, economic, or financial assessment</td>
<td>15</td>
</tr>
<tr>
<td>Other</td>
<td>25</td>
</tr>
</tbody>
</table>

Notes

1. For international news transmission supplied from abroad to local entities, the rate is 3%.
2. Interests will not be taxed (i.e. no withholding applies) when:
   - These interests are paid to a multilateral bank.
   - The interests are paid to the Guatemalan branch.

Decree No. 10-2012, in force from 1 January 2013, introduces the tax residence figure, which states that non-residents can operate in Guatemala with or without PE; accordingly, income tax treatment depends of the circumstance as follows:

- Non-residents with PE will be subject to income tax, choosing one of the two methods of payment established for residents.
- Non-residents without PE will be subject to WHT, applying specific rates according to the nature of the services rendered.

### Tax treaties

Guatemala has no tax treaties in force.
Tax administration

Taxable period

System on earnings from lucrative activities
Under the system on earnings from lucrative activities, the annual final tax liquidation period begins on 1 January and ends on 31 December of each year.

Simplified optional system on income from lucrative activities
Under the simplified optional system on income from lucrative activities, taxes are paid on a monthly basis.

Tax returns

System on earnings from lucrative activities
Under the system on earnings from lucrative activities, returns are due after the end of the fiscal period (31 December) but no later than 31 March of each year.

The income tax return shall be accompanied by the documents required by the regulations, which might include a:

- balance sheet
- statement of results of operations
- statement of cash flows, and
- statement of cost of production.

Documents must be duly certified by a professional or an independent accounting firm. The financial statements that accompany the return shall agree with both those recorded in the financial statements ledger and those destined for publication.

Both the income tax return and exhibits thereto shall be signed by the taxpayers, their agent, or their legal representative or by any other responsible persons so determined by this law and the tax code.

Simplified optional system on income from lucrative activities
Under the simplified optional system on income from lucrative activities, there is an obligation to file an annual informative tax return, which is due on 31 March of each year.

Payment of tax

System on earnings from lucrative activities
Under the system on earnings from lucrative activities, taxpayers are required to prepay their estimated annual income tax liability in quarterly instalments. The balance is due upon filing the return.

Taxpayers may choose one of the following procedures for computing estimated quarterly tax liability:

- Tax on income shown by partial closure of accounts or computation of presumed liquidation of operations at the end of each quarter.
- Tax on 5% of overall gross income earned during the corresponding quarter of the preceding year (5% of the 30% income tax rate equals 1.5%).
- Tax equivalent to one-fourth of the tax paid for the immediately preceding tax year.
Simplified optional system on income from lucrative activities
Under the simplified optional system on income from lucrative activities, tax is payable via flat tax withholdings (the tax is to be retained by either the customer or the recipient of services) or by direct remittances to the tax office made monthly within the first ten working days of the month following the invoice date.

Taxes on income are governed by the income tax law, Ley de Actualización Tributaria, and its related regulations. Administration of the law is vested with the SAT.

Taxpayers registered before the tax administration under this system will settle and pay the tax through the withholding system. Persons or entities obligated to withhold are those taxpayers who pay or credit into account for the acquisition of goods and services to the taxpayers registered under this system.

Tax audit process
The tax authorities can request specific information at any moment. If necessary, a tax audit can be carried out. The tax authorities must formally notify the taxpayer of any specific adjustments, and the taxpayer has 30 working days to file a response. After filing the response, the taxpayer will be again be notified by the tax authorities if the adjustments are confirmed or overturned.

Statute of limitations
The right of the tax administration to checks, adjustments, corrections, or determinations of tax liabilities; settle and enforce interest and penalties; and enforce payment of taxpayers must be brought within four years. In the same period, taxpayers must exercise their right of recourse for overpaid or unduly charged taxes, interest, penalties, and fines.

Topics of focus for tax authorities
The tax authorities normally focus on the following:

- Deductible expenses.
- VAT credits.
- WHT.
- Capital gains.

Other issues
Accurate and current information regarding taxation in Guatemala is often difficult to obtain as the country lacks reporting services such as those available in other countries. It is also difficult to determine how the tax laws will be applied in practice in complex situations. The laws and regulations are limited and ordinarily cover only the most common situations. The system of legal precedent resulting from court decisions is narrowly used, and each issue is resolved by reference to the respective codes.

Guatemala has shown little interest in tax planning, but it is possible to have informal consultations with the tax authorities and to obtain authoritative rulings in many cases. Discrepancies between government and management criteria are commonly brought to judgment by the Constitutional Court, whose binding sentences generally abrogate the laws in dispute.

---

**Significant developments**

Guernsey operates a ‘zero/ten’ regime. A rate of income tax of 0% applies for trading companies, 10% for certain banking activities, and 20% for income derived from Guernsey property and utility companies.

Guernsey’s income tax regime was recently reviewed by the European Union (EU) Code of Conduct Group (EUCCG). As a consequence of this review, Guernsey was informed that the deemed distribution provisions contained within the Guernsey income tax legislation were harmful and outside of the spirit of the Code of Conduct. These provisions have been abolished with effect from 1 January 2013.

The 10% rate has been extended, with effect from 1 January 2013, to licensed fiduciaries (with regulated activities), licensed insurers (in respect of domestic business), licensed insurance intermediaries, and licensed insurance managers.

Guernsey has tax information exchange agreements (TIEAs) with 38 jurisdictions and full double taxation agreements (DTAs) with Jersey, Malta, and the United Kingdom (UK). Full DTAs have been signed with the Isle of Man, Qatar, and Singapore but have yet to come into force.

---

**Taxes on corporate income**

Resident corporations are liable to tax on their worldwide income. Non-resident corporations are subject to Guernsey tax on the Guernsey-source income.

Companies pay income tax at the current standard rate of 0% on taxable income.

Income derived from a banking business is taxable at 10%. ‘Banking business’ is broadly defined as income that arises as a result of the provision of credit facilities by any type of company and the utilisation of customer deposits. Income derived from licensed fiduciaries (with regulated activities), licensed insurers (in respect of domestic business), licensed insurance intermediaries, and licensed insurance managers is also taxable at 10%, with effect from 1 January 2013. Relief is available for eligible expenses that are allocated against different streams of income.

Any income derived from the exploitation of property located in Guernsey or received by a publicly regulated utility company is subject to tax at the higher rate of 20%.
Exempt companies
Some collective investment schemes (CISs) and unit trusts may qualify for exempt status, which will place them completely outside the Guernsey tax regime. For each year for which exempt status is sought, a charge of 600 pounds sterling (GBP) is levied.

One of the following conditions, among others, must be met for the company to be considered exempt:

- The company is beneficially owned outside of Guernsey.
- No Guernsey-resident individual or company has a beneficial interest in the company (with the exception of shareholders, loan creditors, or nominees/trustees).

A significant development to the Guernsey tax regime during 2012 was the widening of the scope of exempt entities. With effect from 30 May 2012, The Income Tax (Exempt Bodies) (Guernsey) ordinance, 1989 was further amended. In general, any body that forms part of, or contributes to, the overall structure of a CIS may claim exempt company status. This removes doubt in relation to the entities that are involved in the management or support of a CIS qualifying for exempt status.

Loans to participators
If a company makes loans with preferential terms to an individual or entity connected with the company, this will be deemed to be income in the hands of the debtor, and the creditor company will be required to account for, withhold, and pay the tax. Certain exemptions apply.

Local income taxes
Guernsey does not operate any local government taxes.

Corporate residence
All Guernsey-registered companies are regarded as tax resident on the island unless granted exempt company status. In addition, a company will be treated as a resident in Guernsey (regardless of where it is incorporated) if shareholder control is exercised by persons resident on the island.

Permanent establishment (PE)
The Income Tax (Guernsey) Law, 1975 defines PE as including:

- a branch
- a factory, shop, workshop, quarry or building site, or
- a place of management.

Note that the fact that a body's directors regularly meet at a particular place does not, in itself, make that place a PE of that body.

Other taxes
Value-added tax (VAT)
Guernsey does not operate a VAT or goods and services tax (GST).
Guernsey, Channel Islands

Customs and excise duties
In accordance with the European Community (EC) Customs Code and the Implementing Regulation, Customs Import Duty is liable on all goods arriving in the Customs territory of the Community. The rates of duty are set by the European Community and are the same in all countries of the European Community.

The rates vary according to the commodity. Some may be as high as 22% while for other goods the rate may be free.

The Channel Islands are not within the fiscal territory of the European Union, and, as such, the Community Regulations that concern excise duties do not apply. Excise duty is classed as an internal tax.

The rates are reviewed annually by the States of Guernsey and set at budget time, which is usually in November. These cover Guernsey and Alderney, while Sark has its own rates set by the Chief Pleas.

An additional 15% rate of duty is applicable on some goods originating in the United States (US).

Property taxes
Income from Guernsey land and buildings is subject to Guernsey income tax at 20%, no other property taxes apply.

Transfer taxes
Guernsey does not levy transfer taxes.

Stamp taxes
Guernsey does not levy any stamp duties.

Social security contributions
An employer, for the purposes of Social Insurance, is anyone who has employees. An employee is anyone who is gainfully occupied in employment under a contract of service in Guernsey or Alderney.

In general, contributions are required from both employer and employee in respect of any employed person who is over school-leaving age and under 65. Employer social security contributions are levied on the gross employment income of the employee at 6.5%.

Employer social security contributions for 2013 are calculated on a monthly lower earnings limit of GBP 541, which is the level of earnings at which an employer becomes liable for the payment of contributions. The upper limit for 2013, which is the highest level of earnings on which contributions are calculated, is GBP 10,816 per month.

Branch income
Branch income is taxed in the same manner as companies, at the appropriate rate according to the activity being undertaken.

No further tax is withheld on the transfer of profits abroad to group companies, provided no Guernsey-resident individual has an interest in the company.
Guernsey, Channel Islands

**Income determination**

**Inventory valuation**
Inventory is valued at the lower of historical cost or net realisable value. Use of last in first out (LIFO) is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

**Capital gains**
Capital gains are not subject to tax in Guernsey.

**Dividend income**
All dividends paid by a standard tax-paying company (0%) are deemed to have been paid from income arising after 31 December 2007 (i.e. after the introduction of the new zero/10 tax regime), unless the company elects to have them treated otherwise.

**Stock dividends**
Stock dividends may be treated as income.

**Interest income**
Interest income received by a standard tax-paying company is taxable at 0%.

*Please refer to the Taxes on corporate income section for further information on companies liable to tax at the company intermediate rate (10%).*

**Foreign income**
Resident corporations are liable to tax on their worldwide income. Income tax is levied on foreign branch income when earned, and on investment income from foreign dividends, interest, rents, and royalties. Double taxation is mitigated either through unilateral relief (by giving credit for foreign taxation of up to three-quarters of the effective Guernsey rate) or by treaty relief.

**Deductions**
Normally, business deductions are allowed if they are incurred wholly and exclusively for the purpose of trade.

**Depreciation**
Annual allowances are granted for income tax purposes in respect of the following:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Basis</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Stone, brick, concrete or other substantial structures</td>
<td>Reducing-balance</td>
<td>1.25</td>
</tr>
<tr>
<td>Buildings of a less substantial construction</td>
<td>Reducing-balance</td>
<td>5</td>
</tr>
<tr>
<td>Farm Buildings</td>
<td>Straight-line</td>
<td>5 or 10 (depending on material utilised)</td>
</tr>
<tr>
<td>Machinery and plant</td>
<td>Reducing-balance</td>
<td>20</td>
</tr>
<tr>
<td>Glasshouses:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Expenditure in respect of initial allowance*</td>
<td>Straight-line</td>
<td>10</td>
</tr>
<tr>
<td>Other expenditure</td>
<td>Straight-line</td>
<td>5</td>
</tr>
</tbody>
</table>

*Section 123 (3) of the Law defines expenditure and circumstances on which initial allowances can be claimed in respect of glasshouses.
Guernsey, Channel Islands

**Goodwill**
The amortisation of goodwill is not a deductible expense in Guernsey.

**Start-up expenses**
Pre-trading expenditure incurred within the 12 months prior to the commencement of trade, which would have been allowable had it occurred on the first day of trading, may be allowed as a deduction in computing the profits of the first accounting period.

**Interest expenses**
Interest is a deductible expense where it is incurred wholly and exclusively for the purposes of trade.

**Bad debt**
Bad and doubtful debts discovered in the accounting period to have become bad or irrecoverable may be deducted from taxable profits, but the deduction may not exceed the amount written off as such in the books of the business.

**Charitable contributions**
Charitable donations by companies are not deductible for Guernsey tax purposes.

**Fines and penalties**
Fines or penalties incurred are not deductible for Guernsey income tax purposes.

**Taxes**
Income tax paid is not deductible in computing taxable income.

**Net operating losses**
Losses from one class of income may be used to offset the profits from another class of income if both classes are subject to tax at the same rate. Unrelieved trading losses may be carried forward to offset future trading income.

Upon cessation of trade, operating losses arising from balancing allowances may be carried back to the previous two years of charge to be relieved against past trading profits.

**Payments to foreign affiliates**
Guernsey-source royalties and long-term interest are subject to taxation at source. Relief is obtained by the retention of the tax deducted. Short-term interest, unless owed to an authorised bank, is not deductible, unless the advance in respect of which it is paid is used wholly and exclusively for the purposes of trade. Other fees must be paid on an arm’s-length basis.

**Group taxation**
Group loss relief may be claimed when both companies are members of the same group and the companies are either carrying on business in Guernsey through a PE or incorporated in Guernsey. Loss relief is available only against income taxed at the same rate.

A claim for group loss relief must be made by the claimant company within two years after the end of the calendar year in which the relevant accounting period ended, and the claim must be accompanied by a declaration by the surrendering company that it consents to the surrender.
**Transfer pricing**
Guernsey does not currently have specific transfer pricing legislation in place. However, the general anti-avoidance provisions do apply.

**Thin capitalisation**
Guernsey does not currently have specific thin capitalisation legislation in place. However, the general anti-avoidance provisions do apply.

**Tax credits and incentives**
In view of the low rate of tax, no special incentives are available to local businesses in Guernsey.

**Foreign tax credit**
Guernsey has full DTAs in place with Jersey, Malta, and the United Kingdom and TIEAs with 38 other jurisdictions. Full DTAs have been signed with the Isle of Man, Qatar, and Singapore but have yet to come into force.

If no bilateral agreement exists, relief available to Guernsey-resident companies is the lesser of the other territory’s effective rate or three quarters of the Guernsey effective rate.

**Withholding taxes**

**Deemed distributions**
Guernsey’s income tax regime was recently reviewed by the EUCCG. As a consequence of this review, Guernsey was informed that the deemed distribution provisions contained within the Guernsey income tax legislation were harmful and outside of the spirit of the Code of Conduct. Subsequently, a law was approved that abolished these provisions with effect from 1 January 2013.

Prior to 1 January 2013, a company was required to withhold tax on any distributions made to or in reference to any Guernsey-resident individual shareholders. The rate at which withholding taxes (WHTs) applied (0%, 10%, or 20%) was dependent upon the rate at which the company was subject to Guernsey tax (i.e. if the company was subject to Guernsey tax at 0%, then tax would be withheld on distributions at 20%; if the company was subject to Guernsey tax at 10%, then tax would be withheld on distributions at 10%; and if the company was subject to Guernsey tax at 20%, then no tax would be withheld on distributions).

Furthermore, following certain trigger events (e.g. the sale of shares, death of the beneficial member), the company was deemed to have distributed the Guernsey-resident shareholder’s entire share of the company’s undistributed profits accumulated since 1 January 2008. All investment income was deemed to be distributed as it arose.

Although the liability to tax was the shareholder’s, the company was obligated to account for, withhold, and pay tax to the Income Tax Office and could then claim this back from the shareholder.

**Agency**
A company also is required to withhold tax when it is acting as an agent and making payments to a non-resident liable to Guernsey tax.
Guernsey, Channel Islands

Guernsey does not levy any other forms of WHT.

**Tax administration**

**Taxable period**
The tax year runs from 1 January to 31 December, although companies can adopt a year-end of their choice.

**Tax returns**
Companies are required to file their income tax return on 30 November following the calendar year in which the accounting period ends. Should a company meet the conditions below, a simplified return may be filed without either a computation or financial statements.

In order to qualify for a simplified return, a company must have none of the following:

- Guernsey employees (other than directors).
- Guernsey-resident individual beneficial owners.
- Income from utilities (e.g. Guernsey water or electricity companies).
- Income from Guernsey properties.
- Income from a banking business.
- Loans to Guernsey participators.
- Distributions made to Guernsey-resident individuals.

Should a company have Guernsey-resident individual beneficial members and/or make loans to participators, it will be required to submit quarterly returns accounting for distributions, deemed distributions, and loans advanced.

**Payment of tax**
In Guernsey, tax is payable in two instalments, on 30 June and 31 December in the year of charge (calendar year). If liabilities have not been determined, this may necessitate initially raising estimated assessments based on prior year figures and raising a final assessment when the figures are agreed. Once the Income Tax Office has received the company's income tax return, they will issue an assessment detailing the final balancing income tax payment due. This amount will be due to be paid within 30 days of the issuing of the final assessment.

**Tax audit process**
The Income Tax Office will assess each company tax return as and when it is received, and the turnaround time from submission of a return to the issue of a final assessment varies dependent upon the workloads of the Income Tax Office but is generally dealt with in around three months.

**Statute of limitations**
The Director can raise an assessment in respect of any income that has not been assessed at any time no later than six years after the end of the year of charge in which the income arose.

**Topics of focus for tax authorities**
There are no current areas that the Guernsey Income Tax Office is particularly focusing on in regards to corporate taxpayer compliance.
Significant developments

There have been no significant corporate tax developments in Guyana during the past year.

Taxes on corporate income

Resident companies are liable to tax on their worldwide income. Non-resident companies that carry on a trade or business in Guyana are subject to tax on the income that is derived from Guyana.

The current rates of corporate tax are as follows:

<table>
<thead>
<tr>
<th>Type of company</th>
<th>Corporate tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Telephone companies</td>
<td>45</td>
</tr>
<tr>
<td>Commercial companies *</td>
<td>40</td>
</tr>
<tr>
<td>Other companies (non commercial)</td>
<td>30</td>
</tr>
</tbody>
</table>

* A commercial company is one that derives at least 75% of its gross income from goods not manufactured by it or if it is engaged in telecommunication, banking, or insurance (other than long-term insurance).

Minimum Corporation Tax (MCT)

Commercial companies (other than insurance companies) are subject to tax at the rate of 40% of chargeable profits or 2% MCT of turnover, whichever is higher. Any excess MCT over tax at the normal rate is carried forward for setoff against corporation tax payable in subsequent years, provided that in no year is the tax payable reduced to less than 2% of turnover.

Local income taxes

There are no additional income taxes imposed on companies.

Corporate residence

Corporate residence is determined by reference to the location of the central management and control of the business of a company. There are no specific provisions within the law, and, as such, common law principles established by the courts are generally applied in determining residence. The place of incorporation is regarded as merely one of the factors to be taken into account in determining where central management and control are located.
Guyana

**Permanent establishment (PE)**
There are no specific provisions in the legislation dealing with PE, so common law principles are applied.

**Other taxes**

**Valued-added tax (VAT)**
VAT is charged at the rates of 16% or 0% on the taxable supply of goods and services within Guyana by a registered person.

Zero-rated supplies include goods for export, electricity supplied by Guyana Power and Light, water supplied by Guyana Water Incorporated, and international travel. Exempt supplies include educational services, residential rent, and financial services.

**Customs duties**
Customs duty is paid on all goods imported into Guyana. The rates of duty vary between 5% and 150%, depending on the classification of the item in question. Rates of duty are highest on ‘luxury items’, which include perfumes.

**Excise taxes**
Excise tax is imposed on specific imported or home-produced products. These products include alcoholic beverages, tobacco products, petroleum products, and motor vehicles.

**Property taxes**
Property tax is an annual tax charged on the net property of a person at the end of each year. ‘Property’ for the purpose of this tax refers to movable or immovable rights of any kind and effects of any kind. Net property is the amount by which the total value of the property exceeds the total value of all debt owned by the person at that time.

The tax is payable on 30 April at the following rates:

<table>
<thead>
<tr>
<th>Net property of a company (GYD *)</th>
<th>Property tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>On the first 1.5 million</td>
<td>0</td>
</tr>
<tr>
<td>On every dollar of the next 5 million</td>
<td>½</td>
</tr>
<tr>
<td>On every dollar of the remainder</td>
<td>¾</td>
</tr>
</tbody>
</table>

* Guyanese dollars.

**Stamp taxes**
Stamp duty is levied at various rates on several instruments, including affidavits, statutory declarations, deeds of conveyance, mortgages, share transfers, awards of arbitrator, powers of attorney, agreements, bills of exchange, receipts, and policies of insurance.

**Branch income**
A branch is subject to tax in Guyana on all income directly or indirectly accruing in or derived from its operations in Guyana. The tax rates applicable on branch profits are the same as on corporate profits. In addition, branch profits, after deduction of corporate tax and reinvestments, are subject to withholding tax (WHT) at the rate
of 20%. The position noted may be varied by the provisions of any applicable double tax treaties (DTTs).

**Income determination**

**Inventory valuation**
Inventory is valued at the lower of cost and net realisable value. Cost is generally determined using the average cost method for accounting and tax purposes, but the first in first out (FIFO) method is also acceptable.

**Capital gains**
Capital gains tax is imposed at the rate of 20% on the net chargeable gains derived from the disposal of capital assets. Gains derived from the disposal of an asset within 12 months of its acquisition are treated as ordinary income and subject to corporate tax at the applicable rates. Gains derived from the disposal of assets held for more than 25 years are exempt from tax.

**Dividend income**
Corporate tax is payable on dividends received by resident companies from non-resident companies. However, dividends paid by resident companies to other resident companies are exempt from tax.

**Interest income**
Interest income is taxed at the applicable rate of corporate tax.

**Foreign income**
Income earned by a non-resident company in Guyana is subject to tax in the year the income was earned. There is no deferral regime in Guyana.

**Deductions**
All revenue expenses wholly and exclusively incurred in the production of income are generally deductible.

**Depreciation**
Tax depreciation rates (wear and tear allowances) apply to the following classes of assets, as follows:

<table>
<thead>
<tr>
<th>Class of assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aircraft</td>
<td>33 1/3</td>
</tr>
<tr>
<td>Boats</td>
<td>10</td>
</tr>
<tr>
<td>Buildings (housing and industrial)</td>
<td>5</td>
</tr>
<tr>
<td>Furniture and fittings</td>
<td>10</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>20</td>
</tr>
<tr>
<td>Office equipment, including computers and computer software</td>
<td>50</td>
</tr>
<tr>
<td>Other</td>
<td>15</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>20</td>
</tr>
</tbody>
</table>
Building that house machinery are depreciated using the straight-line method. Other assets may be depreciated using the declining-balance or straight-line methods.

**Goodwill**

Goodwill expense is generally not allowable in arriving at chargeable income.

**Start-up expenses**

No specific rules exist in respect of start-up expenses, but such expenses are generally not deductible.

**Interest expenses**

Interest expense incurred in the production of income is deductible. There is no restriction to the deductibility of this expense.

**Bad debt**

A bad debt is deductible where it has been incurred in the trade in which the company is engaged and has been respectively estimated to the satisfaction of the tax authority to have become bad in the year of income when the claim is made.

**Charitable contributions**

Charitable donations are not deductible unless they are made under a deed of covenant.

**Fines and penalties**

Fines and penalties are not generally deductible.

**Taxes**

Taxes are not generally deductible in arriving at taxable profit.

**Net operating losses**

Companies may carry forward losses for an unlimited number of years, but the losses may not reduce the taxable income in any year by more than 50%. Loss carrybacks are not permitted.

**Payments to foreign affiliates**

A corporation engaged in business in Guyana may claim a deduction for royalties and interest charges paid to foreign affiliates, provided the appropriate WHT is deducted and properly accounted for. Deductions for administrative, technical, professional, or other management services fees paid to a non-resident company or branch, referred to as 'head office expenses', are restricted to 1% of the annual turnover.

**Group taxation**

There is no provision under the legislation for group taxation in Guyana. All companies are taxed separately.

**Transfer pricing**

There is no transfer pricing legislation or rules in Guyana, although the issue has been discussed and is expected to be more formally considered in the future. However, the current Act contains a general anti-avoidance provision, and the tax authority monitors multinationals to ensure that their transactions are conducted at arm’s length and in conformance with the applicable tax legislation.
**Thin capitalisation**
There are no thin capitalisation rules in Guyana.

**Tax credits and incentives**
Various tax incentives are available, depending on the nature of the industry that the companies are engaged in, including the following:

- Customs duty and VAT exemption on most plant, machinery, and equipment.
- Customs duty and VAT exemption on raw materials and packaging materials used in the production of goods by manufacturers and small businesses.
- Unlimited carryover of losses from previous years.
- Accelerated depreciation on plant and equipment.
- Full and unrestricted repatriation of capital, profits, and dividends.
- Tax deduction for scientific research expenses.
- Initial and annual allowances.
- Tax holidays.

Tax holidays are granted in respect of pioneering activities, that is, to companies whose trade or business are wholly of a developmental and risk-bearing nature and likely to be instrumental to the development of the resources of and beneficial to Guyana.

This does not include trade or business carried on by a gold or diamond mining company or a company carrying on petroleum operations.

Tax holidays are granted for a period of up to ten years.

**Foreign tax credit**
Foreign tax relief is available under DTTs with Canada, the United Kingdom, and Caribbean Common Market (CARICOM) countries.

Unilateral relief is also available for foreign taxes paid in non-treaty countries with tax systems and legislation similar to those in Guyana. For British Commonwealth countries, the relief is 50% of the relief that would be available if the foreign country were a treaty country. For other countries, the relief is 25% of such available relief. The available relief is the lower of the tax rate in Guyana and the tax rate in the other country.

**Withholding taxes**
WHT is chargeable on gross payments to non-residents and must be remitted to the tax authority within 30 days of making the payment. In cases where the treaty rate is higher than the statutory rate, the lower statutory rate applies. The rates of WHT for various payments are shown in the table below.

<table>
<thead>
<tr>

Guyana

**Tax administration**

**Taxable period**
The tax year is the calendar year. Tax is assessed during a tax year on income earned during the year of assessment, which is generally the calendar year preceding the tax year. Companies with an accounting year other than a calendar year may, however, be allowed to account for taxes by adopting their accounting year as their income year.

**Tax returns**
Tax returns must be filed by 30 April of the tax year.

**Payment of tax**
Corporate tax is payable in advance quarterly instalments on the preceding year’s tax liability. Advance tax payments are due on 15 March, 15 June, 15 September, and 15 December of the calendar year prior to the tax year. However, the Commissioner of Inland Revenue may require the company to calculate the payments based on estimated income for the current year.

Any balance of tax due must be paid by 30 April of the tax year.

**Penalties**
Failure to file a tax return and pay the balance due by 30 April of the tax year incurs a further charge of 45% on the outstanding tax for the first year and 50% thereafter.

**Tax audit process**
Companies are generally selected at random for audits, and the frequency is usually every three years. Companies are generally required to provide financial information and supporting documentation to the tax personnel.

The tax authority is the Guyana Revenue Authority.

**Statute of limitations**
A company carrying on business in Guyana is required to keep proper accounts and records and is required to retain these accounts for a period of at least eight years after the completion of the transactions, acts, or operations to which they relate.

The Commissioner is empowered to raise an assessment for tax or additional tax within seven years after the expiration of the year of assessment.

**Topics of focus for tax authorities**
The following issues are currently being focused on by the tax authorities:

- Tax evasion and corruption.
- Strengthening tax administration.
- Creation of tax policies and forecasting analysis capability.
- Business registrations and compliance.
Other issues

Foreign investment restrictions
There are no restrictions on the repatriation of capital and investment income, and residents and non-residents have unlimited access to foreign exchange markets and to repatriate funds.

Exchange controls
There are no exchange control rules in place in Guyana.

Choice of business entity
Businesses operating in Guyana may establish a local company or register an external company. Additionally, companies may operate through a joint venture.

---

**Significant developments**

Effective 18 July 2012, the Call Centre and Business Processing Operations (BPO) Promotion Law grants the following benefits:

- Tax holiday on import of tools, parts, accessories, furniture and office equipment, and all goods involved with the company's active business.
- Income tax holiday on revenue from all the business activities carried out within the Free Trade Zones (FTZs).

Effective 20 July 2012:

- The tax authority is empowered to withhold 3% on cost, insurance, and freight (CIF) from import operations for commercial purposes as an advance payment to income tax to those companies or individuals not duly registered with the tax authority, not complying with corporate income tax (CIT) filing, or in liquid arrears for any tax administered by the Dirección Ejecutiva de Ingresos (DEI). There are some exceptions to the rule.
- A law created in response to tax evasion and fraud establishes payment of an income tax of 1% on gross income equal or greater than 100 million Honduran lempiras (HNL) for all taxpayers who report losses for two years in a row or two out of five. The 1% tax paid will be considered as a credit in the resulting income tax, surtax, or net asset payable in the annual returns. There are some exemptions to the rule.

Effective 29 October 2012, there is a reform on the statute of limitation for the rights and obligations applicable to taxpayers and the tax authority (see the Tax administration section).

Effective 4 December 2012, withholding tax (WHT) rates applicable to non-residents changed (see the Withholding taxes section).

---

**Taxes on corporate income**

Honduran resident companies are taxed on their worldwide income. Non-resident companies are subject to CIT only on income derived from Honduran sources.

The CIT rate for a resident company is 25% of its net taxable income.

**Temporary Solidarity Contribution**

The Temporary Solidarity Contribution is a non-deductible surcharge levied on all companies on taxable income over HNL 1 million. The Temporary Solidarity Contribution tax rate is 5% for 2013, 4% for 2014, and 0% for 2015.
Income tax anti-evasion measures
A law created in response to tax evasion and fraud establishes payment of an income tax of 1% on gross income equal or greater than HNL 100 million for all taxpayers who report losses for two years in a row or two out of five. The 1% tax paid will be considered as a credit in the resulting income tax, surtax, or net asset payable in the annual returns. There are some exemptions to the rule.

Municipal income taxes
Industry, commerce, and services tax
Companies doing business in Honduras are levied the following municipal tax on annual gross income:

<table>
<thead>
<tr>
<th>From (HNL)</th>
<th>To (HNL)</th>
<th>Range (HNL)</th>
<th>Tax per '000</th>
</tr>
</thead>
<tbody>
<tr>

<td>0.2</td>
</tr>
<tr>
<td>30,000,001</td>
<td>And over</td>
<td>And over</td>
<td>0.15</td>
</tr>
</tbody>
</table>

Corporate residence
The place of incorporation is regarded by Honduran authorities as the corporate residence. Non-resident companies are companies incorporated/registered outside of Honduras.

Permanent establishment (PE)
There is a provision in the transfer pricing rules that provides the following definition of PE:

“Permanent establishment is a fixed place of business where a natural or juridical person resident or domiciled in another state performs part or all of its activities in Honduras. Likewise, a foreign resident will be considered to have a permanent establishment in Honduras when it acts in the national territory through an independent agent that is not acting under the regular framework of its activity.”

There are some exceptions to the rule.

There is no treaty definition of PE since, at the present time, Honduras is not a signatory of any double taxation treaty (DTT) with another jurisdiction in the world.

Other taxes
Sales tax
Sales tax is charged on all sale and purchase transactions of goods and services made in Honduran territory.

The general tax rate is 12%. It applies to most goods and services, with the exception of machinery and equipment, basic grains, pharmaceutical products, raw materials for the
Honduras

production of non-taxable goods, petroleum products, school supplies, and insecticides, among others.

The import and sale of beer, other alcoholic beverages, cigarettes, and other tobacco products are subject to 15% sales tax.

There is a 15% sales tax applicable to some PCS, cellular, internet broad band, cable TV, and energy services, depending on the amount of consumption billed by the supplier.

There is an 18% sales tax levied on first class and business class air tickets.

**Customs duties**
The duty assessed by the Honduran government at the time of customs clearance ranges between 0% and 15% for most items.

Honduras is a member of the Central American Common Market (CACM), which also includes Costa Rica, El Salvador, Guatemala, and Nicaragua. Honduras’ rates on most goods from outside CACM are currently within the 0% to 15% range. Under the Dominican Republic-Central America Free Trade Agreement (CAFTA-DR) with the United States (US), about 80% of US industrial and commercial goods can now enter the region duty-free, with the remaining tariffs to be phased out over ten years. Nearly all textile and apparel goods that meet the Agreement’s rules of origin are now duty-free and quota-free, promoting new opportunities for US and regional fibre, yarn, fabric, and apparel manufacturing (the Agreement’s tariff treatment for textile and apparel goods was made retroactive to 1 January 2004).

It is necessary to first obtain the appropriate Harmonized System (HS) classification number for determining when a particular product can enter the CAFTA-DR region duty-free. With this number, it is then possible to check the country and product-specific tariff elimination schedule.

*Ad valorem* import taxes can be as high as 20%. In addition, imports are subject to the sales tax of 12% or 15% that applies to the sum of the CIF value, the *ad valorem* duty, and the customs fees.

**Excise taxes**
There is an excise tax levied on the production and importation of cigarettes, sodas, beer, and alcoholic beverages.

Cigarettes are levied at HNL 350 per unit.

Excise tax on sodas, beer, and alcoholic beverages are levied according to the following table:

<table>
<thead>
<tr>
<th>Description</th>
<th>Tax rate per litre (HNL)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Soda/other prepared drink</td>
<td>0.61</td>
</tr>
<tr>
<td>Beer</td>
<td>4.34</td>
</tr>
<tr>
<td>Wine</td>
<td>5.45</td>
</tr>
<tr>
<td>Brandy, cognac, vermouth</td>
<td>29.43</td>
</tr>
<tr>
<td>Whisky</td>
<td>29.43</td>
</tr>
<tr>
<td>Rum 40°</td>
<td>17.92</td>
</tr>
<tr>
<td>Rum 38°</td>
<td>17.02</td>
</tr>
</tbody>
</table>
**Net assets tax**

The net assets tax is an annual 1% tax on the net asset value of the company. It applies to the gross value of assets less reserve for accounts payable and any accumulated depreciation allowed under the income tax law and other deductions allowed by law. The law also allows a special deduction of HNL 3 million.

The net assets tax is in lieu of CIT when CIT is less than the amount due for net asset tax. Resident companies during their preoperative period (i.e. the period in which the company started operations but has not issued its first invoice) and companies operating in FTZs, among others, are exempt from the net assets tax.

Non-resident companies are not liable for the net assets tax.

**Transfer taxes**

Transfer taxes are levied on real estate transactions at HNL 1.5 per every HNL 1,000.

**Stamp taxes**

There are no provisions for stamp taxes in Honduras.

**Capital gains tax**

In general, a 10% tax is applied on capital gains, regardless of the person’s residence status. Under the Zolitur law territory, a special regime, the tax rate is a 4% flat tax on capital gains.

The payment of capital gains tax must be made within ten business days after the agreed amount of the transaction has been determined.

In instances where a transaction is subject to the capital gains tax and a non-resident is involved, the buyer has an obligation to withhold 2% of the transaction amount as an advance payment to this tax and must pay it to the government within ten business days of the date of the transaction.

**Payroll taxes and contributions**

Payroll taxes and contributions are paid by employers at the following rates:

- Social security: 7.2%, with a ceiling of HNL 4,800.
- **Instituto Nacional de Formación Profesional** (INFOP): 1%.
- Housing fund (‘Régimen de Aportaciones Privadas’ or RAP/’Fondo Social para la Vivienda’ or FOSOVI): 1.5%.

**Special temporary contributions**

For the term of five years:

<table>
<thead>
<tr>
<th>Description</th>
<th>Tax rate per litre (HNL)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rum 36°</td>
<td>16.13</td>

<td>6.32</td>
</tr>
</tbody>
</table>
Honduras

- Under the Special Temporary Security Contribution on Financial Transactions (Contribución Especial por Transacciones Financieras Proseguridad Poblicional), financial transactions are subject to 0.2% WHT, with some exceptions. This contribution started to be applied in April 2012.
- Companies providing mobile communication services will pay a Special Temporary Contribution of 1% on gross monthly income.
- Under the Special Temporary Contribution for the protection of the environment from the Mining Sector, there is a 2% contribution on the freight on board (FOB) value of the exports filed.
- Special Temporary Contribution from the food and beverages business under special tax regimes is 0.5% on gross monthly income.
- Cooperatives Special Contribution is 3.6% on annual net surplus.

Municipal taxes
Companies doing business in Honduras are also subject to the rules and regulations of the respective municipalities. Taxes and obligations are ruled by the 'Plan de Arbitrios'. Some of these tax obligations include the following:

- Industry, commerce, and service tax, which is based on gross income per year (see the Taxes on corporate income section).
- Public services fee, which is paid for services such as waste management.
- Real estate tax, which is a tax on urban and rural real estate.
- Sign tax, which is a tax on public advertising.

Branch income
Branch income is subject to income tax on income generated from Honduran source at the rates applicable for corporate income.

Income determination
Income is computed in accordance with generally accepted accounting and commercial principles, subject to certain adjustments required by the tax law.

Inventory valuation
Inventories are generally valued using the first in first out (FIFO), last in first out (LIFO), and weighted-average cost methods.

Capital gains
Capital gains are not generally subject to CIT, but may be subject to capital gains tax. See Capital gains tax in the Other taxes section for more information.

Dividend income
The income from dividends is considered ‘other income’, thus non-taxable under the general income tax rates. There is a 10% tax rate applicable on the dividends paid to non-residents.

Stock dividends
Stock dividends are also not taxable.
**Interest income**
Honduran Bank interests are subject to a 10% WHT at the moment the interest is given, when the sum is over HNL 50,000. Interests from abroad are considered as other income. For income tax reconciliation, interest income is considered non-taxable when subject to the 10% WHT.

**Royalty income**
Royalties are taxed in the same manner as general income if the recipient is a local company or branch. If the recipient is a non-resident, then the application of a WHT will apply.

**Foreign income**
Deferral and anti-deferral of foreign income are not regulated in Honduras.

**Deductions**
The net taxable income of an enterprise is determined by deducting all the ordinary and necessary expenses incurred in the generation of income, including amortisation and depreciation; municipal taxes; donations made in favour of the state, the central district, the municipalities, and legally recognised educational institutions, charities, and sporting facilities; mandatory employer-employee contributions to the social security system; and ‘reasonable’ charges for royalties and management services.

In general, all expenses incurred in the generation of taxable income are considered as deductible for income tax purposes. However, there are some ‘non-deductible’ expenses, even if incurred in the generation of income (e.g. interest paid to owners or shareholders, capital losses).

**Depreciation**
Depreciation may be computed using the straight-line method. Companies may also obtain authorisation from the tax authorities to use other depreciation methods. However, after a company selects a depreciation method, it must apply the method consistently thereafter. The following are the applicable straight-line method rates for some common assets.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>2.5 to 10</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>10</td>
</tr>
<tr>
<td>Vehicles</td>
<td>10 to 33</td>
</tr>
<tr>
<td>Furniture and office equipment</td>
<td>10</td>
</tr>
<tr>
<td>Tools</td>
<td>25</td>
</tr>
</tbody>
</table>

**Goodwill**
Goodwill can be amortised over a period of five years.

**Start-up expenses**
Organisation or reorganisation expenses are deductible for the total amount as long as they do not exceed 10% of the initial capital stock. These expenses can be amortised over five years.
Honduras

**Interest expenses**
Interest expenses are deductible as long as they are incurred in order to generate income. Interest paid to stockholders, owners, or spouses are not deductible.

**Bad debt**
Taxpayers can record a bad debt provision of 1% of the total credit sales, which will not exceed 10% of the accounts receivable balance.

**Charitable contributions**
Contributions to organisations legally recognised by the government are deductible.

**Capital losses**
Capital losses are not deductible to determine the net taxable income. Capital losses can only be netted against capital gains, which are subject to a tax rate of 10% (see Capital gains tax in the Other taxes section).

**Contingent liabilities**
Provisions for contingent liabilities, such as severance pay, are not deductible for tax purposes; actual payments during the fiscal period, for those liabilities, are considered to be deductible expenses.

**Fines and penalties**
Fines and penalties are not deductible.

**Taxes**
With the exception of the Temporary Solidarity Contribution, net asset taxes, CIT, and sales tax (i.e. if sales tax paid is used as a credit to net the sales tax payable to the government), taxes and contributions paid to district or municipalities are deductible expenses when determining taxable income.

**Net operating losses**
Companies engaged in agriculture, manufacturing, mining, and tourism may carry forward losses for three years. However, certain restrictions apply. Losses may not be carried back.

**Payments to foreign affiliates**
Payments to foreign affiliates are deductible as long as the service is effectively received.

**Group taxation**
No provisions exist for group taxation in Honduras.

**Transfer pricing**
The new Transfer Pricing Law for Honduras was published in the Diario Oficial La Gaceta in December 2011. This law establishes the transfer pricing regulations applicable in Honduras that will become effective January 2014. There is a period of one year to adopt the transfer pricing policies and to negotiate with the tax authority the corresponding advance pricing agreements (APAs).

**Thin capitalisation**
At the present time, there are no provisions for thin capitalisation in Honduras.
**Tax credits and incentives**

Companies operating under a special tax regime are exempted from CIT, sales tax, customs duties, and some municipal taxes. These special tax regimes are the following:

- FTZs.
- Industrial processing zone (‘Zona Industrial de Procesamiento’ or ZIP).
- Temporary import regime (‘Régimen de Importación Temporal’ or RIT).
- Tourism incentive law.
- Law of the Tourism Free Zone of the Bay Islands (‘Ley de la Zona Libre Turística de las Islas de la Bahía’).
- Law promoting the generation of electric energy with renewable resources (‘Ley de Promoción a la Generación de Energía Eléctrica con Recursos Renovables’), which provides tax exemptions for projects generating 50MW and over.
- Law for the Promotion and Protection of Investment (Ley para la Promoción y Protección de Inversiones), which provides special tax treatment (i.e. partial CIT rate reduction of up to 70%) for some types of investments and when some requirements are met.
- In the regulations for the FTZs there is a consideration for international service companies (the BPOs, call centres and contact centres, shared service centres) that will have the same tax exoneration provided by this regime.
- The Call Centre and Business Processing Operations (BPO) Promotion Law, which provides a tax holiday on import of tools, parts, accessories, furniture and office equipment, and all goods involved with the company’s active business as well as an income tax holiday on revenue from all the business activities carried out within the FTZs.

Companies must comply with some governmental requirements to operate under one of the above mentioned special regimes.

**Drawback industries**

Special benefits exist for industries that import semi-manufactured materials for assembly in Honduras and export finished products. Benefits consist of duty-free imports of raw materials for subsequent export as manufactured products. Machinery for these industries may also be imported duty-free.

**Foreign tax credit**

There are no provisions for foreign tax credits in Honduras.

**Withholding taxes**

**WHT for residents**

Distribution or payment of dividends or any other form of distribution of retained earnings or reserves to resident or domiciled individuals is taxed via WHT at 10%.

The tax authority is empowered to withhold 3% on CIF from import operations for commercial purposes as an advance payment to income tax to those companies or individuals not duly registered with the tax authority, not complying with CIT filing, or in liquid arrears for any tax administered by the DEI. There are some exceptions to the rule. This provision was approved in July 2012.
**Honduras**

**WHT for non-residents**
For non-residents in Honduras, any income derived from Honduran sources is taxable under the following table of the Income Tax Law:

<table>
<thead>
<tr>
<th>Income source</th>
<th>WHT (%)</th>
</tr>
</thead>

</table>

**Tax treaties**
Honduras has not signed any tax treaties with foreign jurisdictions.

**Tax administration**
The DEI is the tax authority in Honduras. It is responsible for the administration of the tax and customs system. Taxpayers may request approval from the DEI regarding direct or indirect taxes (e.g. accelerated depreciation methods on new assets acquired by corporations with monetary activities requiring constant technological update, higher installed production capacity and productive re-conversion processes in order to maintain and strengthen their competitive advantage).

**Taxable period**
The statutory tax year runs from 1 January through to 31 December. However, taxpayers may apply to use a special tax year by requesting an authorisation from the DEI.

**Tax returns**
Companies must file a CIT return on 30 April every year.

**Payment of tax**
Mandatory advance tax payments are payable each quarter, based on the income tax paid for the preceding tax year. Final tax is due with the CIT return on 30 April every year.

**Tax audit process**
The audit cycle can begin after (i) the date the tax return should have been filed or (ii) sometime after the taxpayer made a request before the tax authority (e.g. tax credit, loss carryforward).
**Statute of limitations**
Reforms to the Honduras Tax Code were published on 29 October 2012 and included the following modifications:

The statute of limitation for legal actions was reinstated, applicable for both taxpayers in order to challenge and request payment, and for the fiscal authority to review, notify, and request payment. Such limitation is established according to the following terms:

- Four years for those conducting operations in customs regime and five years for registered taxpayers.
- Ten years for those who have the obligation to be registered and currently are not.
- Ten years for those who have withheld information when declaring/filing.

Limitation of actions and powers of the fiscal authority will be interrupted according to the following:

- Determination of the tax by the fiscal authority counted from the day following notification of resolution.
- Notification of the resolution in which the fiscal authority confirms assessment, interests, penalties, or fines in liquid payable amounts, counted from the day following the resolution's notification.
- Legal appeal filed by the taxpayer, counted from the day following the filing of the appeal.
- Express acknowledgement from the debtor, counted from the day following the acknowledgement.
- Payment plans agreement granted to taxpayers according to law, counted from the day following the formal agreement.
- Exercise of the appropriate legal actions, counted from the day following their initiation.

Relapse in the lack of complete or partial payment from the taxpayer, as established in the Tax Code, will be considered as criminal tax fraud.
Significant developments

Developments in tax treaty network
Hong Kong’s treaty network has expanded at an unprecedented pace since March 2010. As of mid-May 2013, Hong Kong has entered into 29 treaties with different jurisdictions. The latest developments in this area include the signing of treaties with Guernsey, Italy, and Qatar in the first half of 2013 and the entry into force of the treaty with Malaysia on 28 December 2012 and the one with Mexico on 7 March 2013.

For more information about Hong Kong’s existing treaty network, please see the Withholding taxes section.

Developments in profits tax
In April 2012, an advance pricing arrangement (APA) program was officially launched in Hong Kong whereby any resident enterprise or non-resident enterprise with a permanent establishment (PE) in Hong Kong may apply for an APA in respect of its transactions with associated enterprises under a comprehensive double tax agreement (CTDA). At the initial stage of the program, only bilateral or multilateral APA applications will be accepted, although a unilateral APA may be considered in some limited exceptional circumstances. The Hong Kong Inland Revenue Department (HKIRD) had issued Departmental Interpretation and Practice Notes No. 48 ‘Advance Pricing Arrangement’ in March 2012 to provide details about the APA program.

Other developments
The capital duty levied on local companies has been abolished, effective as of 1 June 2012.

Taxes on corporate income
Hong Kong adopts a territorial basis of taxation. Profits tax is payable by every person (defined to include corporation, partnership, and sole proprietorship) carrying on a trade, profession, or business in Hong Kong on profits arising in or derived from Hong Kong from that trade, profession, or business. However, capital gains and receipts that are capital in nature are not subject to tax. Dividends from local companies chargeable to tax are exempt, whereas dividends from overseas companies are generally offshore in nature and not subject to tax in Hong Kong. The tax residence of a person is generally irrelevant for profits tax purposes. The tax treatments of public and private companies are the same.

Certain income that would not otherwise be subject to Hong Kong profits tax is deemed to arise in or be derived from Hong Kong from a trade, profession, or business carried
on in Hong Kong and thus becomes taxable in Hong Kong. This includes royalties received by a non-resident for the use of or right to use a patent, design, trademark, copyright material, secret process or formula, or other property of a similar nature in Hong Kong, or for the use of such intellectual properties (IPs) outside Hong Kong, but the royalties paid can be claimed as a deduction by a person for profits tax purposes.

The tax rates are 16.5% for corporations and 15% for unincorporated businesses.

There are special rules for determining the tax liabilities of certain industries, such as shipping, air services, and financial services.

Incomes from certain qualifying debt instruments (QDIs) are either tax exempt or subject to a concessionary tax rate (i.e. 50% of the regular profits tax rate). A specific anti-avoidance provision was recently introduced whereby the concessionary tax rate/tax exemption does not apply to incomes derived from QDIs by a person who is an associate of the issuer of the QDIs.

Offshore funds having Hong Kong fund managers and investment advisors with full discretionary powers are exempt from Hong Kong profits tax on profits derived in Hong Kong from six types of ‘specified transactions’ that are carried out or arranged by ‘specified persons’. However, there are also specific anti-avoidance provisions in the Inland Revenue Ordinance (IRO) deeming certain resident persons to be subject to profits tax on their share of the non-resident person’s tax-exempt profits.

**Corporate residence**

In general, for Hong Kong profits tax purposes, corporate residency is not important in determining taxability of an entity. The decisive factors for taxability are (i) whether a corporation is carrying on a trade, profession, or business in Hong Kong, and (ii) whether the profits are arising in or derived from Hong Kong.

However, where it is necessary to determine the corporate residence, such as for the purpose of a CDTA, companies incorporated in Hong Kong and companies that are normally managed or controlled/centrally managed and controlled (depending on the provisions of the relevant CDTA) in Hong Kong are generally considered as a Hong Kong tax resident.

**Permanent establishment (PE)**

For Hong Kong profits tax purposes, whether a foreign corporation is carrying on a trade, profession, or business in Hong Kong and the source of profits, rather than whether there is a PE in Hong Kong, are the decisive factors in determining taxability.

**Other taxes**

**Value-added tax (VAT)**
Hong Kong does not have a VAT, goods and services tax, or sales tax.

**Customs duties**
There is no tariff on general imports in Hong Kong.

Hong Kong

**Excise tax**
Duties are levied on limited categories of dutiable commodities (i.e. tobacco, liquor, methyl alcohol, and hydrocarbons), regardless of whether they are imported or locally manufactured.

**Property tax**
Property tax is charged annually to the owner of any land or buildings (except government and consular properties) in Hong Kong at the standard rate of 15% on the net assessable value of such land or buildings. Net assessable value of a property is the consideration payable to the owner for the right to use the land or buildings less rates paid by the owner and a 20% notional allowance.

Rental income derived by a company from a Hong Kong property is subject to profits tax. The company that is subject to profits tax may apply for an exemption from property tax in respect of the property. If no exemption is applied, the property tax paid can be used to offset against the profits tax payable by the company.

**Stamp duty**
Stamp duty is charged on transfer of Hong Kong stock by way of sale and purchase at 0.2% of the consideration (or the market value if it is higher) per transaction. Hong Kong stock is defined as stock the transfer of which must be registered in Hong Kong.

For conveyance on sale of immovable property in Hong Kong, the stamp duty payable depends on the property consideration and ranges from a flat rate of 100 Hong Kong dollars (HKD) (for property consideration of up to HKD 2 million) to the highest rate of 4.25% of the consideration of the property (for property consideration exceeding HKD 20 million), with marginal relief upon entry into each higher rate band.

For lease of immovable property in Hong Kong, stamp duty is calculated at a specified rate of the annual rental that varies with the term of the lease. Currently, the applicable rate ranges from 0.25% (for lease period of not more than one year) to 1% (for lease period of more than three years).

Exemption is available to certain transactions, such as transfer of shares between associated corporate bodies and certain stock borrowing and lending transactions, provided that the specified conditions for exemption are satisfied.

**Special Stamp Duty (SSD)**
There is an SSD on resale of residential property within 24 months from the date of acquisition. The SSD is imposed on top of the *ad valorem* stamp duty payable on conveyance on sale or agreement for sale of residential property, with a few exemptions. The SSD payable will be calculated based on the stated consideration or the market value (whichever is higher) of the resold property at the regressive rates indicated below:

- 15% for residential properties held for six months or less.
- 10% for residential properties held for more than six months but for 12 months or less.
- 5% for residential properties held for more than 12 months but for 24 months or less.

**Business registration fees**
Every person who carries on a business in Hong Kong is required to apply for business registration with a fee within one month from the date of commencement.
of the business. The business registration certificate has to be renewed either on an annual basis or every three years with a payment of a business registration (renewal) fee. Special registration and licence fees are applicable to banks and deposit-taking companies.

**Capital duty**
The capital duty has been abolished, effective as of 1 June 2012.

**Government rates and rent**
Rates are an indirect tax levied on properties in Hong Kong. Rates are charged at 5% of the rateable value, which is the estimated annual rental value of a property at the designated valuation reference date of 1 October.

Privately owned land in Hong Kong is normally held by way of a government lease under which rent is payable to the Hong Kong SAR Government in return for the right to hold and occupy the land for the term (i.e. duration) specified in the lease document. Currently, government rent is calculated at 3% of the rateable value of the property and is adjusted in step with any subsequent changes in the rateable value.

**Mandatory Provident Fund (MPF) contribution**
Under the MPF scheme, an employer is required to make a mandatory contribution for an employee in the amount equal to 5% of the monthly income of that employee. The maximum level of income for contribution purpose is HKD 25,000 per month. An employer may make voluntary contributions in addition to the mandatory contribution required.

---

**Branch income**
The tax rate for branches is the same as that for corporations. The Hong Kong profit of a foreign corporation with a branch in Hong Kong is determined according to the accounts maintained for the Hong Kong operation (or business). If the Hong Kong accounts do not disclose the true profits arising in or derived from Hong Kong attributable to the Hong Kong operation, the Hong Kong profit will be computed according to the ratio of turnover in Hong Kong to total turnover (or the proportion of Hong Kong assets over total assets) on the worldwide profits. Alternatively, the HKIRD tax assessor may estimate the profits of the Hong Kong branch. In certain situations, the profits of the Hong Kong branch can be estimated based on a fair percentage of the turnover in Hong Kong.

---

**Income determination**

**Inventory valuation**
Inventory may be stated at the lower of cost or market value. Last in first out (LIFO) may not be used for tax purposes. First in first out (FIFO) must be consistently applied.

The prevailing accounting standards require financial assets and liabilities held for trading purpose (e.g. shares and securities held as trading stock) to be carried at market value, with fluctuations in values of such assets and liabilities taken to the profit and loss accounts, irrespective of whether the profits or losses are realised. The HKIRD requires that this accounting treatment be followed in computing the assessable profits for tax purposes.
There are special tax provisions for valuation upon cessation of a business under which inventory is valued at market value, unless it is sold to a person carrying on business in Hong Kong, who may deduct a corresponding amount as the cost of the inventory in computing the assessable profits.

**Capital gains**
Gains from realisation of capital assets or receipts that are capital in nature are not taxed.

**Dividend income**
Dividends from local companies chargeable to tax are exempt, whereas dividends from overseas companies are generally offshore in nature and not subject to Hong Kong profits tax. Hong Kong corporations may declare bonus issues (i.e. stock dividends), which are not taxable in the hands of the recipients.

**Interest income**
Interest income received by or accrued to a corporation carrying on a trade or business in Hong Kong is subject to profits tax. Exemption is provided to interest income derived from any deposit placed in Hong Kong with a financial institution, unless the deposit secures a borrowing the interest expense of which is deductible. This exemption, however, does not apply to interest accruing to a financial institution.

Interest accruing to a bank or financial institution will be deemed to be sourced and taxable in Hong Kong if the interest arises through or from the carrying on of business in Hong Kong by the bank or financial institution.

**Royalties**
Royalties paid or accrued to a non-resident for the use of or right to use in Hong Kong or outside Hong Kong (if the royalties are deductible in ascertaining the assessable profits of a person for Hong Kong profits tax purposes) a trademark, patent, design, copyright material, secret process, or other property of a similar nature, or for the use in Hong Kong of cinema or television tape or any sound recording, are deemed to be taxable in Hong Kong.

A total of 30% of the sum receivable is deemed to constitute profits subject to tax in normal situations. Where such royalties are received by or accrued to an associated corporation, however, 100% of the sum is deemed to constitute profits under certain circumstances.

**Partnership income**
Partnership business is taxed as a single entity, although an individual partner can use its share of losses incurred by a partnership to offset against the assessable profits of its other business. In general, there is no special registration requirement other than business registration for a partnership. The assessable profits of a partnership are basically determined in the same way as those of a corporation, with certain special rules (e.g. salaries or other remunerations paid to a partner or a partner’s spouse are not deductible).

**Unrealised exchange gains/losses**
In general, unrealised exchange gains/losses are taxable/deductible if they are recognised in the profit and loss accounts in accordance with the generally accepted accounting principles (GAAP), provided that they are revenue in nature and with a Hong Kong source. The nature and source of exchange gains/losses are determined by the nature and source of the underlying transactions. Exchange gains/losses arising
from ordinary business transactions (e.g. trade receivables or payables) are taxable/deductible whereas exchange gains/losses arising from capital transactions (e.g. sale of capital assets) are non-taxable/non-deductible.

**Foreign income**

Hong Kong resident corporations are not taxed on their worldwide income. Foreign-sourced income, whether or not remitted to Hong Kong, is not taxed. As such, there is no specific tax provision dealing with deferral or non-remittance of foreign earnings. Nor does Hong Kong have any controlled foreign company (CFC) legislation.

**Deductions**

Expenses that are incurred for producing profits chargeable to tax and that are not capital in nature are generally tax deductible. In addition, special tax relief is available for certain capital expenditure. There are special rules for deduction of certain expenses (e.g. interest expenses).

Accounting treatments are usually followed in determining the assessable profits, except when there is an explicit rule in the IRO. Accrued expenses recognised in the profit and loss accounts in accordance with the GAAP are usually deductible if they are incurred for producing profits chargeable/subject to tax and are not capital in nature.

Expense items for which a tax adjustment is necessary in determining the amount of taxable profits from the accounting profits include: tax depreciation allowance vs. accounting depreciation, expenses that are capital in nature, general provisions that are non-deductible, and non-deductible interest expenses on borrowings used to finance non-income producing assets.

Set out below are the Hong Kong profits tax treatments of some common expense items.

**Tax depreciation of fixed assets**

Tax depreciation allowances/deductions are available for capital expenditure incurred on the construction of buildings or structures and in the provision of machinery and plant for trade or business purposes, as follows:

- **Industrial buildings and structures:** An initial allowance of 20%, in addition to an annual allowance of 4%, of the cost of construction or cost of purchase from a developer is granted for an industrial building or structure occupied for the purpose of a qualifying trade. Provision is made for balancing allowance or charge in the year of assessment in which the building is disposed of to adjust the written-down value of the building to the disposal price. Balancing charges are restricted to the total of initial and annual allowances previously given.
- **Commercial buildings and structures:** An annual allowance of 4% of the capital expenditure incurred on the construction is applicable. A balancing allowance or charge applies upon disposal. Balancing charges are restricted to the total annual allowances previously given.
- **Plant and machinery:** An initial allowance of 60% of the capital expenditure on plant and machinery is given for the year of assessment during the basis period in which the expenditure is incurred. An annual allowance is also given for depreciation at three prescribed rates on the reducing value of each of the three depreciation rate ‘pools’. The three prescribed rates are 10%, 20%, and 30%, and the reducing value of each of the three depreciation rate pools is original cost less initial and annual allowances and sales proceeds. Provision is made for balancing charges when plant
and machinery within one of the three depreciation rate pools is sold or disposed of and the reducing value of that pool is less than the sale price, which is capped at the original amount incurred in the pool. In addition, balancing allowances or charges may be applicable upon cessation of business. Otherwise, sales proceeds are deducted in calculating the reducing value on which the annual allowance is calculated.

Book depreciation is adjusted for tax purposes in accordance with the above depreciation allowances granted under the IRO.

**Goodwill**
Cost of acquisition of goodwill/amortisation of goodwill is not deductible as it is capital in nature.

**Organisational and start-up expenses**
In general, company formation/start-up expenses that are incurred before the commencement of a trade, profession, or business and that are for the establishment of the overall income producing structure are capital in nature and not tax deductible.

**Research & development (R&D)**
There is a specific provision allowing the deduction of expenditure incurred on R&D (including payments made to an approved research institute and in-house expenditure), provided that certain specified conditions are met.

**Interest expenses**
There is no thin capitalisation rule in Hong Kong. However, deduction of interest expense is subject to stringent and complicated rules that are designed to guard against loan arrangements with an intention to avoid Hong Kong profits taxes.

**Bad debt**
A bad or doubtful debt incurred in any trade, business, or profession, proved to the satisfaction of the HKIRD to have become bad during the basis period for a year of assessment, is deductible. The deduction is limited to debts that were included as a trading receipt in ascertaining the taxpayer's assessable profits or debts in respect of money lent in the ordinary course of a money-lending business in Hong Kong.

If any bad or doubtful debt that has previously been allowed as a deduction is ultimately recovered, it will be treated as taxable profits of the basis period in which it is recovered.

**Charitable contributions**
A deduction is allowed for cash donations to approved charities made in the basis period for a year of assessment if the aggregate of such donations is not less than HKD100. The deduction is limited to 35% of the assessable profits of the year of assessment.

**Pension expenses**
A deduction is allowed for regular/ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme made by an employer in respect of an employee to the extent that the contributions do not exceed 15% of the employee's total emoluments for the period to which the contributions relate.

Special payments, other than the ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme, are capital in nature but can be deducted evenly over a five-year period under a specific provision of the IRO.
There are also specific rules for deduction of provisions for contributions to a mandatory provident fund scheme or recognised occupational retirement scheme.

**Payments for directors**
Director fees or other remunerations paid by a corporation to its directors are generally deductible under the normal deduction rule. Nevertheless, no deduction is allowed on salaries or other remunerations paid to a sole proprietor or any partners or partners’ spouses of a partnership business.

**Contingent liabilities**
Generally speaking, general provisions for expenses are not deductible, whereas specific provisions are deductible if the HKIRD is satisfied that the amount has been incurred (i.e. the taxpayer has a legal/contractual obligation to pay such amount in future) and that the provision represents a reasonably accurate estimate of the future liability.

**Special deductions**
There are special deduction rules for expenditures incurred (i) for refurbishment of a building or structure, other than a domestic building or structure; (ii) on environmental protection installation and machinery; (iii) on environment-friendly vehicles; (iv) on machinery or plant used specifically and directly for any manufacturing process, computer hardware (other than that which is an integral part of machinery or plant), computer software, and computer systems (collectively known as prescribed fixed assets); (v) for registering trademarks, designs, or patents used in the production of taxable profits; and (vi) on the purchase of patent/know-how rights and specified IP rights (i.e. copyrights, registered trademarks, or registered designs), provided certain specified conditions are met.

**Fines and penalties**
Fines and penalties are generally not deductible, as the HKIRD does not consider them to be expenses incurred for producing profits chargeable/subject to tax.

**Taxes**
Taxes paid on corporate profits are generally not deductible for the purpose of calculating the assessable profits. However, the HKIRD generally accepts that a foreign tax that is an expense that must be borne regardless of whether or not a profit is derived (e.g. a foreign withholding tax [WHT] levied on the gross amount of interest or royalties received), as opposed to a charge on the profits themselves, is deductible under the general deduction provision. Where interest income or gains from the sale of a certificate of deposit or bill of exchange are deemed to be subject to profits tax, a deduction is allowed for foreign taxes of substantially the same nature of Hong Kong profits tax paid in respect of the same income, provided that the taxpayer is not eligible for double taxation relief under a CDTA.

**Net operating and capital losses**
Net operating losses incurred in an accounting year can be carried forward indefinitely to offset future profits of the business. A corporation carrying on more than one business may have losses in one business offset profits of the others, with any balance being carried forward. Net operating losses cannot be carried backward.

Capital losses are not tax deductible.

**Payments to foreign affiliates**
Royalties and service fees paid/payable by a Hong Kong corporation to foreign affiliates are deductible, provided they are incurred for the production of profits chargeable/
subject to tax. There is no special restriction on the deductibility of these payments. Interest payable to a foreign affiliate is not deductible if the recipient is not chargeable/subject to Hong Kong profits tax on the interest income received.

---

**Group taxation**

Hong Kong does not have a consolidated or group taxation regime.

**Transfer pricing**

Strictly speaking, there is no comprehensive transfer pricing legislation in Hong Kong. While a few existing provisions in the IRO may be employed by the tax authority to tackle non-arm’s-length transactions, such provisions are primarily aimed at transactions with closely connected non-residents or tax avoidance transactions rather than specific legislation on transfer pricing.

In 2009, the HKIRD issued two Departmental Interpretation and Practice Notes (DIPNs) to address the transfer pricing issues in Hong Kong. DIPN 45 focuses on the administrative/procedural issues involved in providing double tax relief in a treaty context, such as when such relief is available and what are the procedures for claiming such relief. DIPN 46 outlines the HKIRD’s view on the legislative framework for transfer pricing in Hong Kong (including the statutory provisions in the IRO and the articles in a CDTA that are relevant to transfer pricing) and provides guidance on numerous transfer pricing related issues, such as the application of the arm’s-length principle and the acceptable transfer pricing methodologies, which are largely in line with the Organisation for Co-operation and Development (OECD) transfer pricing guidelines. The DIPN also spells out the documentation that taxpayers should consider retaining to support their transfer pricing arrangements and explains the interaction between the transfer pricing and sourcing rules in Hong Kong.

In general, the HKIRD adopts the arm’s-length principle and will seek to apply the OECD transfer pricing guidelines except where they are incompatible with the express provisions in the IRO.

An APA program was launched in Hong Kong in April 2012. The objectives of the APA program are to help taxpayers obtain tax certainty on their complex or significant transfer pricing arrangements and reduce the risk of double taxation arising from related-party transactions. Resident enterprises or non-resident enterprises with a PE in Hong Kong may apply for an APA in respect of their transactions with associated enterprises under a CDTA, provided that certain conditions (including the threshold for an APA application) are met.

At the initial stage, the HKIRD is primarily focused on bilateral APA or multilateral APA applications in respect of cross-border related-party transactions involving countries that are CDTA partners with Hong Kong.

DIPN No. 48, which set out the details of the APA program, was issued by the HKIRD in late March 2012. DIPN 48 provides guidance on various aspects of the APA regime, such as the timeframe and threshold for an APA application, the various stages involved in the APA process, an audit involving years covered by a concluded APA, and possible rollback of the transfer pricing methodology agreed under an APA to prior years. The appendices of the DIPN include various sample documents for use in an APA application.
**Thin capitalisation**
Hong Kong does not have thin capitalisation rules.

**Controlled foreign companies (CFCs)**
Hong Kong does not have a CFC regime.

---

**Tax credits and incentives**

**Foreign tax credits**
Foreign tax credits are available if foreign taxes are payable/paid on income derived from a jurisdiction that has entered into a CDTA with Hong Kong and the same income is subject to tax in Hong Kong. See the Withholding taxes section for a list of jurisdictions that have entered into a CDTA with Hong Kong.

**Foreign investment incentives**
Hong Kong does not have any specific incentives for foreign investment, except that offshore funds may be exempt from profits tax under certain circumstances.

---

**Withholding taxes**

There is no WHT on dividends, interest, or royalties. However, the 4.95%/16.5% (for corporations) or 4.5%/15% (for unincorporated businesses) tax on royalties received by non-residents (see Royalties in the Income determination section) is, in effect, similar to a WHT.

Resident consignees are required to furnish quarterly returns to the HKIRD showing the gross proceeds from sales on behalf of their non-resident consignors and to pay to the HKIRD Commissioner a sum equal to 0.5% of such proceeds. The HKIRD normally accepts this as satisfying the Hong Kong tax obligations of the non-resident.

Hong Kong has so far entered into 29 treaties with different jurisdictions. The following table shows the applicable WHT rates for payments made from Hong Kong payers to non-treaty and treaty country corporate recipients. The rates shown in the table are the lower of the domestic and treaty rates. For WHT rates on payments received by Hong Kong recipients from treaty country payers, please refer to the summaries of the respective treaty countries.

## Tax administration

### Taxable period

A year of assessment (or tax year) begins on 1 April of a year and ends on 31 March of the following year. The period that is used to compute the taxable profits for a year of assessment is called the basis period, which is normally the financial year ended in the year of assessment.

### Tax returns

Tax returns are issued on the first working day of April each year. The filing deadline is usually within a month from the date of issue. However, corporations whose financial year ended after 30 November and are represented by a tax representative are normally granted an extension for filing their returns. The exact filing due date depends on the accounting year-end date of the taxpayer.
The basis of assessment is the accounting profits of the financial year ending within the year of assessment, with appropriate adjustments for tax purposes. A tax return is usually filed together with a tax computation showing the tax adjustments to the accounting profits in arriving at the taxable profits or allowable tax losses for a given year of assessment.

Corporate taxpayers are also required to attach their audited accounts as supporting documents when filing a profits tax return, unless they qualify as a small corporation as defined by the HKIRD (i.e. mainly those with gross income for a basis period of not exceeding HKD 2 million plus a few other conditions). Small corporations are not required to attach supporting documents with their profits tax returns but are still required to keep those documents and submit them upon request. A branch of a foreign corporation doing business in Hong Kong is required to file a profits tax return annually, and the HKIRD may require audited accounts of the foreign corporation to support the Hong Kong branch’s profits tax return.

Notice of assessment will be issued after the tax return has been examined by the HKIRD. Taxpayers may be subject to post-assessment investigation or field audit under the computerised random selection procedures of the HKIRD at a later date.

**Payment of tax**
The dates of payment of tax are determined by the HKIRD Commissioner and specified in the assessment notice. A system of provisional tax payments applies whereby estimated tax payments are made during the current year. The provisional profits tax payable is normally estimated based on the previous year’s profits tax liability. The provisional profits tax already paid is credited against the final profits tax assessed for a year of assessment, which is determined after filing of the return.

For companies with an accounting year-end date of 31 December, the provisional tax payments for a given tax year (to be paid in two instalments) are usually due in November of the current year and January of the next year, whereas the final tax payment for a given tax year is usually due in November of the year in which the return is issued.

**Tax audit process**
There is no specific tax audit cycle in Hong Kong. Tax audit targets are selected with reference to certain criteria determined by the HKIRD.

**Statute of limitations**
An additional assessment may be made by a HKIRD tax assessor if a taxpayer chargeable to tax has not been assessed to tax or has been assessed at less than the proper amount. The assessment must be made within the relevant year of assessment or within six years after the end of that year of assessment. The time limit for making additional assessments is extended when a taxpayer either has not been assessed, or is under-assessed, due to fraud or wilful evasion. In that case, an additional assessment may be made up to ten years after the end of the relevant assessment year.

A statement of loss is not an assessment, and the above six-year time limit does not apply to issue or revision of a statement of loss. A tax loss year remains technically open until the sixth year after the first year in which the taxpayer has an assessable profit after utilising all the tax losses brought forward.
Hong Kong

Topics of focus for tax authorities
Profits tax issues that are often subject to close scrutiny of the tax authority include offshore claim of profits, capital claims of income, transactions with related parties and closely connected non-residents, and deductibility of expenses (e.g. interest expenses, share-based payments, and intra-group management/service fees).

General anti-avoidance rules (GAAR)
The IRO includes a GAAR (i.e. section 61A) allowing the HKIRD to disregard a transaction or counteract the tax benefit conferred by a transaction if the sole or dominant purpose of entering into such a transaction is to obtain a tax benefit. Whether the sole or dominant purpose of entering into a transaction is for obtaining a tax benefit will be assessed according to a set of factors stipulated in section 61A. Another GAAR in the IRO is section 61, which empowers the HKIRD to disregard a transaction that reduces or would reduce the amount of tax payable by any person if that transaction is considered artificial or fictitious. Although both GAARs could be used, in practice, section 61A is more often invoked by the HKIRD in tackling tax avoidance schemes.

Specific anti-avoidance provision for related party transactions
In addition to the general anti-avoidance provisions described above, there is a specific anti-avoidance provision dealing with transactions with closely connected non-residents. Under the specific provision, if a resident person carries on a business with a closely connected non-resident person such that no profits or less than the ordinary profits are derived by the resident person in the course of such business, the non-resident person can be assessable and chargeable to tax in respect of profits derived from such business in the name of the resident person.

Other issues

Foreign investment restrictions
In general, Hong Kong does not impose restriction to foreign investors to make investments in Hong Kong, and wholly foreign owned companies are allowed. The only exception is the restriction on foreign ownership of Hong Kong’s licensed television/sound broadcasters, of which the collective foreign ownership ceiling is 49% of the voting power. In addition, an approval from the Broadcasting Authority must be obtained for holding, acquisition, or exercise of voting control by a foreign investor of more than 2% of a licensee.

Exchange controls
Hong Kong does not have any foreign exchange control. There is no restriction on entry or repatriation of capital or remittance of profits from investments. Funds can be freely remitted to persons outside Hong Kong by various means, such as dividends, interest, royalties, service fees, and branch profits, etc.

Choice of business entity
The principal forms through which a business can be conducted in Hong Kong are as follows:

- Company incorporated in Hong Kong (either private or public via listing on the Stock Exchange of Hong Kong).
- Branch of a foreign company.
- Representative or liaison office of a foreign company.
- Joint venture (can be set up either as a company or partnership).
• Partnership.
• Sole proprietorship.

Of the above, privately incorporated companies and branches of foreign companies are most commonly used by foreign investors, as limited liability is usually desirable.

**Intellectual property (IP) regulations**
The Intellectual Property Department is responsible for monitoring the IP regime and ensuring the protection and enforcement of IP rights in Hong Kong. The Department is also responsible for investigating complaints against infringements and has extensive powers of search and seizure. Registration and protection of patents, copyrights, trademarks, and registered designs are each governed by a separate ordinance.

**Merger and acquisition (M&A) activities**
There are no specific restrictions on M&A activities in Hong Kong. The following tax considerations are relevant in the M&A context:

• Dividends or other forms of distribution of profits (e.g. distribution of branch profits to the head office) are generally not taxable.
• Capital gains arising from an M&A transaction is not taxable in the hands of the transferor, whereas amortisation of the goodwill in the transferee’s accounts is not tax deductible due to its capital nature.
• For a share deal, stamp duty is payable on the transfer of Hong Kong shares at 0.2%, unless an exemption applies; for an asset deal, stamp duty is payable on conveyance of immovable property in Hong Kong at progressive rates of up to 4.25%.
• Gains derived from transfer of revenue items (e.g. trade receivables) in an asset deal will be subject to profits tax.
• There is no special tax concession/incentive relating to M&A transactions.
• Tax losses in the acquired company can generally be carried forward indefinitely to set off against future assessable profits. However, there are specific anti-avoidance provisions in the IRO that prevent the transfer of shares of a company with accumulated tax losses to owners of a profitable company for the sole or dominant purpose of utilising the tax losses (i.e. offsetting the tax losses against the profits generated from other trade, profession, or business of the transferee).

**Significant developments**

As of 1 January 2013, the following significant changes were introduced to the Hungarian tax system.

**Corporate income tax (CIT)**

- The intangible assets produced by the taxpayer can also be registered as ‘registered intangible assets’.
- Development tax incentive may be claimed on an investment project implemented in a Free Entrepreneurship Zone or an energy efficiency improvement project, if the net present value of the investment is at least 100 million Hungarian forint (HUF).
- A further clarification regarding controlled foreign companies (CFCs) has been provided.
- The energy suppliers’ special tax (or crises tax) rate has increased from 8% to 31%.
- New taxes have been introduced: telecommunication tax (introduced on 1 July 2012) and tax on financial transactions.

**Value-added tax (VAT)**

- VAT exemption on transfer of going concern has been introduced in the VAT Act, provided that the parties are taxable persons in Hungary.
- Regulation for electronic invoicing has changed significantly.
- A cash accounting scheme was introduced as an option for small companies.
- A new reporting obligation was introduced with the domestic recapitulative statement.

**Excise duty**

Excise duty rates of tobacco products increased as of 1 December 2012 and the rate of alcohol products increased as of 1 January 2013. The excise tax on liquefied gas used as fuel for motorised road vehicles will increase in two stages in 2013.

**Public health product tax**

The acquisition of goods from abroad is now subject to the public health product tax if the company acquiring the goods changes the pre-packed nature of the goods and uses them for the domestic manufacture of its own products, which it then sells in Hungary.

**Registration tax**

The registration tax for hybrid cars is set at HUF 76,000, irrespective of engine capacity (ccm) of their internal combustion engine.
**Taxes on corporate income**

Resident taxpayers are subject to all-inclusive or unlimited CIT liability. Non-residents are subject to CIT on their income from their Hungarian branch's business activities.

The CIT rate is 10% on the first HUF 500 million of a positive CIT base, without any further preconditions. The tax base above this limit is subject to 19% CIT.

**Minimum tax base**

If a company's CIT base or the pre-tax profit, whichever is higher, is less than 2% of its total revenues reduced by the cost of goods sold, the value of mediated services, and the income of the foreign permanent establishments (PE) (i.e. the 'minimum tax base'), the company can choose to file a declaration and pay CIT either according to the general provisions or on its minimum tax base.

As of 2013, the calculated minimum tax base must be increased by 50% of the increase in the liabilities to members, which will be based on a comparison of the liability balance at the end of the prior year to the average daily balance of the current year.

**Real estate holding companies**

A company and its related parties are defined as real estate holding companies if at least 75% of the market value of their assets is domestic real estate and if they have a foreign shareholder that is not resident in a country that has a double tax treaty (DTT) with Hungary or the treaty allows capital gains to be taxed in Hungary.

The tax base of real estate holding companies in cases of share transfers and share capital decreases is the positive amount of the consideration minus the acquisition price of the shares less the costs of acquisition and of administration. The tax rate is 19%.

Please note that the definition of the payer for CIT purposes is very different from the definition used for stamp duty purposes.

**Special taxes**

The sector-specific crises taxes (payable by retailers, telecommunications service providers, and energy suppliers) were abolished from 1 January 2013.

As of 1 January 2013, the energy suppliers' income tax rate increased from 8% to 31%. Public utility service providers, including water utilities and communal waste management providers, are also subject to the crises tax (previously, only energy suppliers had to pay it). The scope of the definition of ‘energy suppliers’ is also extended as of 2013; universal suppliers and authorised distributors under the relevant acts on the supply of electricity and natural gas also qualify as energy suppliers.

If the energy supplier entity possesses a development tax incentive (see the Tax credits and incentives section), then, as of 1 January 2013, it is possible to claim this tax incentive for up to 50% of the energy suppliers’ income tax liability as well.

**Local business taxes (LBTs)**

All municipalities are entitled to LBTs. LBTs are deductible for Hungarian CIT purposes and are not normally treated as ‘income tax’ in the application of the tax treaties.

The LBT base is the net sales revenue reduced by the cost of goods sold, subcontractors’ work, the costs of materials, mediated services, and research and development (R&D) costs. However, as of 2013, taxpayers are only allowed to deduct from the LBT base...
Hungary

part of the cost of goods sold and part of the value of mediated services as calculated based on brackets determined in relation to their annual sales revenues. General service fees, depreciation, and labour costs are typically not deductible for LBT purposes. 100% of royalty, interest, or dividend income and the LBT base of a foreign PE of a Hungarian company are exempt from LBT. The LBT rate may differ from municipality to municipality but is capped at 2% by law.

A special tax base allocation method is applicable for companies in the telecommunications sector. The allocation is based on the net revenues a company realises in the municipalities where its clients’ billing addresses are located.

**Innovation contribution**
Companies defined as such in the Accounting Act, except for small and medium-sized enterprises and branches, are also subject to an innovation contribution. The tax base of the innovation contribution is the same as the LBT base. The tax rate is 0.3%.

**Corporate residence**
Corporations are residents for CIT purposes if they are incorporated in Hungary, although foreign corporations may also be deemed to be Hungarian residents for CIT purposes if their place of effective management is in Hungary.

Foreign entities may carry out business through resident corporations or through PEs (branches). Commercial representative offices may be opened for auxiliary activities that do not create a taxable presence.

**Permanent establishment (PE)**
Hungary treats PEs as separate and distinct entities, and profit is attributed to a PE based on the principles set out in the Organisation for Economic Co-operation and Development (OECD) guidelines.

In the Corporate Income Tax Act, a PE is defined as fixed business premises (machinery or equipment) through which the entrepreneurial activity of an enterprise is partly or wholly carried on, regardless of the title of the taxpayer to those premises. A PE may consist of any of the following: a place of management; offices, including representative offices registered in Hungary; factories and workshops; and mines, crude oil or natural gas wells, quarries, or other places from which natural resources are extracted.

Construction sites (including assembly) and related supervisory activities constitute a PE if they last, in the aggregate, for at least three months in a calendar year. All activities carried out at the same construction site qualify together as a single PE, regardless of whether they are based on separate contracts or were ordered by different persons. Construction sites are defined as sites that represent a unit for economic, business, and geographical purposes.

PEs are also created by the direct utilisation of natural resources by a foreign person. A foreign person is deemed to have a PE in Hungary if it utilises natural resources or immovable property for consideration, including the alienation of any rights related to the immovable property or natural resources.

A non-resident enterprise is considered to have a PE with respect to activities undertaken on its behalf by another person if its agent is authorised to conclude contracts in Hungary on behalf of the non-resident entity and the agent regularly
exercises this right or maintains a stock of goods and products from which it regularly makes deliveries in the name of the non-resident entity.

The insurance of risks occurring in Hungary and insured on behalf of the non-resident person by another person constitutes a PE of the foreign insurer, except for reinsurance activities.

Furthermore, as mentioned above, a foreign taxpayer must also be treated as having a PE if it has a Hungarian branch.

The definition of a PE does not include the following:

- Establishments used solely for the purpose of storing and presenting the goods or products of a non-resident person.
- The stockpiling of goods and products solely for the purpose of storing, presenting, or processing by another person.
- Establishments used for collecting information, or purchasing goods and products, exclusively for the non-resident person.
- Establishments used for other activities of a preparatory or auxiliary nature.
- Activities of independent agents, provided they are acting in their ordinary course of business.

Note that a different definition of a PE is applicable for LBTs, and no definition is available for special taxes.

Other taxes

Value-added tax (VAT)

VAT is payable on sales of goods and the supply of services. VAT is also payable on the importation of goods, on the intra-Community acquisitions of goods, and on the purchase of certain services provided to Hungarian taxable persons by foreign taxable persons.

VAT rates

The general VAT rate is 27%.

A reduced VAT rate of 18% is applicable for some products (e.g. milk, certain dairy products, products made from cereals, flour, and starch). The 18% VAT rate is also applicable to commercial accommodation services and to services that grant admission to musical and dancing events.

A reduced VAT rate of 5% is available for certain pharmaceutical products, audio books, printed books, newspapers, district heating services, and certain live performance activities.

Exempted, out of scope transactions

Certain services are exempt from VAT, including, but not limited to, medical, cultural, sporting, and educational services provided as public services. VAT exemption is also available for financial and insurance services. The intra-Community supplies of goods, services, and exports are also treated as exempt transactions.

Generally, the supply of a building or parts of a building, the land on which it stands, and the rental of real estate are VAT exempted. An option is available to apply VAT on...
the supply or rental of this real estate. VAT exemption cannot be applied to the supply of building plots.

There are some special transactions that may be out of scope of the Hungarian VAT, provided that special conditions are met. These include the acquisition of any contributions in kind, the acquisition of any assets by way of succession, and the transfer of going concern.

**Reverse charge mechanism**
A domestic reverse charge applies between Hungarian taxable persons for the following activities:

- Services related to immovable property (e.g. construction, maintenance).
- Sales of waste materials.
- Sales of carbon quotas.
- Sales of real estate and land if the application of VAT was chosen.
- Sales of certain agricultural products (e.g. maize, wheat, barley, rye).

**VAT recovery**
VAT deduction is available only for the business-related element of purchases that were made partially for non-business purposes.

If a taxpayer has a negative VAT balance in a VAT period, the amount can be recovered, provided that the VAT balance reaches or exceeds an absolute value of HUF 1 million for monthly filers, HUF 250,000 for quarterly filers, or HUF 50,000 for annual filers.

As a general rule, the deadline for remitting VAT reclaims is 75 days, irrespective of the amount concerned. However, if all incoming invoices, regarding which the VAT was deducted in the VAT return, are settled (paid fully to the suppliers) until the due date of the related VAT return, a 45-day deadline can be applied.

**Directive for refunds of foreign taxable persons**
Taxable persons with their establishment in an EU country, other than Hungary, or in Switzerland or Lichtenstein can recover local VAT. The refund applications have to be submitted electronically. Reclaim requests should be submitted to the tax authority of the country where the EU-registered taxable person is established.

**Reporting obligations**
All types of intra-Community transactions have to be reported in the periodic European Community (EC) List in Hungary.

As of 1 January 2013, taxpayers registered in Hungary have to submit domestic recapitulative statements about those transactions where the VAT amount reaches or exceeds HUF 2 million together with the basic data of the related business partner. In respect of the incoming invoices, those cases also have to be considered and included where the sum of the VAT on all transactions carried out by the same partner in a given VAT period reaches or exceeds HUF 2 million. If a domestic recapitulative statement has to be prepared (i.e. there are transactions with a VAT amount higher than the referred threshold), the VAT return can only be submitted in electronic form.

**Group taxation**
The VAT Act allows all companies that have established business presences in Hungary and qualify as related enterprises to form a VAT group. The essence of a VAT group is
that its members act under a single VAT number in their transactions (i.e. they issue
invoices under a shared VAT number and submit a single, joint tax return) and the
supplies of products and services between the members do not qualify as business
transactions from a VAT perspective.

**Customs duties**
Hungarian customs legislation and policies have been fully harmonised with
EU legislation.

The EU customs legislation is comprised of the following main regulations:

- Council Regulation 2913/92/EEC establishing the Community Customs Code.
- Council Regulation 2454/93/EEC laying down provisions for the implementation of
  Council Regulation 2913/92/EEC establishing the Community Customs Code.
- Council Regulation 1186/2009/EEC setting up a Community system of reliefs from
customs duty.
- Council Regulation 2658/87/EEC on the tariff and statistical nomenclature and on
  the Common Customs Tariff.

**Excise taxes**
The following goods are subject to excise duty:

- Mineral oils.
- Alcohol and alcoholic beverages. Any product with an alcohol content of 1.2% or
  more by volume qualifies as an alcohol product.
- Beers.
- Wines.
- Sparkling wines.
- Intermediate alcoholic products.
- Tobacco products.

As of 1 January 2013, the excise duty rates are as follows:

- Petroleum products: HUF 110,350 to HUF 124,200 per thousand litres or
  HUF 4,425 to HUF 116,000 per thousand kilograms, depending on the type of
  petroleum product.
- Alcohol products: HUF 333,385 to HUF 476,270 per hectolitre of pure alcohol.
- Beer: HUF 1,620 per alcohol degree and per hectolitre, HUF 735 per alcohol degree
  and per hectolitre for beer produced in a micro-brewery.
- Wines: HUF 0 for grape wines; HUF 9,870 per hectolitre for wines made from other
  types of fruit.
- Sparkling wines: HUF 16,460 per hectolitre.
- Intermediate alcoholic products: HUF 25,520 per hectolitre.
- Cigarettes: HUF 12,500 per thousand cigarettes plus 31% of the retail sale price, but
  a minimum of HUF 24,920 per thousand cigarettes. The tax base per cigarette also
  depends on the length of the cigarette (without filter). It is double if the length of the
  cigarette is 8 cm to 11 cm, triple if the length is 11 cm to 14 cm, and so on.
- Cigars and cigarillos: 28.5% of the retail price.
- Fine-cut tobacco: 52% of the retail price, but a minimum of HUF 12,460 per
  kilogram.
- Other tobacco: 32.5% of the retail price, but a minimum of HUF 12,460 per kilogram.
Hungary

The Customs Body of the National Tax and Customs Authority is responsible for excise duty. The European Union’s excise duty rules apply in Hungary.

**Property and land taxes**
Hungarian municipalities have the right to levy property tax and land tax at their own discretion until the below caps are reached.

**Property tax**
The owner of a building is subject to property tax liability annually on the first day of the calendar year.

The local government can determine the tax base in either of the following ways:

- The net floor space of the building expressed in square metres, with a maximum tax rate of HUF 1,100/m².
- The adjusted market value of the building, with a maximum tax rate of 3.6% of the adjusted market value.

**Land tax**
The owner of land is subject to land tax liability annually on the first day of the calendar year. Undeveloped plots of land situated within the area of jurisdiction of a local government, including peripheries, are subject to this tax. The local government can determine the tax base in either of the following ways:

- The actual area of the plot expressed in square metres, with a maximum tax rate of HUF 200/m².
- The adjusted market value of the plot, with a maximum tax rate of 3% of the adjusted market value.

**Stamp duties**
The most common types of stamp duty are gift duty and duty on transfers of property for consideration. Stamp duty is levied on movable and immovable property and property rights if they were acquired in Hungary, unless an international agreement rules otherwise.

**Gift duty**
Gift duty arises on the date when a contract concerning a gift is concluded.

Transfers of movable property, immovable property, and property rights without consideration are subject to gift duty. In these cases, however, gift duty is only incurred if the transaction was formally documented; except for immovable property with a market value of more than HUF 150,000, where gift duty must be paid in any event.

The base of gift duty is the net value of the gift, which is the market value minus any liabilities related to the gift. The general duty rates vary, depending on the type of property: 9% on residential property and 18% on other assets.

Transfers of movable assets without consideration and acquisitions of claims without consideration including waivers of claims and assumptions of debts are exempt from gift duty, provided that the recipient is a company.

**Duty on transfer of property for consideration**
The obligation to pay duty on the transfer of movable and immovable property for consideration arises on the date when the contract is concluded.
For acquisitions of real estate, the stamp duty is 4% of the market value of the property. For acquisitions of direct or indirect participations (stocks, shares, co-operative shares, investor shares, converted investor shares) of at least 75% in a company that owns real estate, the duty base is the part of the market value of the company’s properties held that represents the percentage of the participation, except when the transaction is between related parties. The stamp duty for real estate company sales is 4% up to HUF 1 billion and 2% of the amount exceeding HUF 1 billion up to a maximum of HUF 200 million.

There are special rules for real estate trading companies and financial leasing service providers. Under certain circumstances, exemptions are available more generally.

Stamp duties are also levied on certain court procedures (e.g. Court of Registration) and on submissions to certain authorities (e.g. appeals to the Tax Authority). Stamp duty is, for instance, levied in an amount of:

- HUF 100,000 on the registration of a private stock company or a limited liability company
- HUF 600,000 on the registration of a public stock company or a European Company
- HUF 100,000 on the registration of any other entity with legal personality (except from public stock companies)
- HUF 50,000 on the registration of a branch office, and
- HUF 50,000 on the registration of a representative office.

**Registration tax**

Registration tax is charged on passenger cars, motor homes, and motorcycles before they can be registered and put into service in Hungary. The registration tax is also payable by fleet operators. The duty is payable with the first domestic registration or in the case of a conversion.

The registration tax rate from 1 January 2013 is applied as follows:

- Passenger cars: HUF 45,000 to HUF 4.8 million, depending on the technical features of vehicles (cc, engine type) and environmental classification.
- Hybrid cars: HUF 76,000.
- Electrical cars: HUF 0.
- Motorcycles: HUF 20,000 to HUF 230,000, depending on technical features of the motorcycles (cc).

The registration tax is levied by the Customs Body of the National Tax and Customs Authority.

**Public health product tax**

The first domestic distributor of certain products, as well as the acquirer of goods that are brought from abroad and used for the domestic manufacture of own products that will be sold in Hungary, are liable to pay a product tax. The duty rates from 1 January 2013 are as follows:

- Beverages (depending on sugar content and tariff number): HUF 7 or for syrups and concentrates HUF 200 per litre.
- Energy drink (depending on tariff number, methyl-xanthine, and taurine content): HUF 40 or HUF 250 per litre.
- Cocoa powder with added sugar (depending on tariff number, sugar and cocoa content): HUF 70 per kilogram.
Environmental protection product fee

The following products are subject to the environmental protection product fee: other crude oil products, tyres, packaging materials, batteries, commercial printing paper, and electrical and electronic products (based on customs tariff numbers applicable on 1 January 2010).

The following entities are liable to pay the product fee:

- The first domestic distributor or user for own purposes.
- In the case of domestically manufactured other crude oil products, the first buyer from the first domestic distributor.
- In the case of toll manufacturing, the party that orders the toll manufacturing.

Product fee rates from 1 January 2013 are as follows:

- Tyres: HUF 52 per kilogram.
- Packaging materials: HUF 17 to HUF 50 per kilogram.
- Commercial packaging materials (packaging of beverages, plastic shopping bags): HUF 17 to HUF 1,800 per kilogram.
- Oil: HUF 112 per kilogram.
- Batteries: HUF 60 or HUF 80 per kilogram.
- Paper-based advertisement materials: HUF 64 per kilogram.
- Electrical and electronic products: HUF 50 to HUF 500 per kilogram.

The Tax Body of the National Tax and Customs Authority controls the payment and reporting of the product fee and carries out product fee inspections from 1 January 2013. The product fee is self-assessed. The product fee returns for the period from 1 January 2013 must be submitted quarterly to the tax authority via its electronic system. An advancement payment is payable for the fourth quarter.

The product fee penalty is generally 100% of the product fee shortfall in cases of non-payment or underpayment.

Environmental load charges

Environmental pollution charges were introduced to protect the natural environment, to reduce its impairment, to encourage the users of the environment to engage in activities aimed at the preservation of the natural environment, and to provide funding from the central budget for environmental protection and nature preservation.

Emitting entities liable to pay charges include those who operate point-source emitters subject to registration, pursue activities subject to a water right permit, or who do not use available public drainage systems and dispose of their sewage under a water right permit or a permit from the local water management authorities.
Qualifying materials include sulphur dioxide, nitrogen oxides, mercury, phosphorous, cyanides, and others.

The load charge is calculated on the basis of the quantity of emitted materials multiplied by the fee rate. Basically, the amount of the fee payable depends on the hazard level of the emitted material, e.g. HUF 50 per kilogram for sulphur dioxide and HUF 220,000 per kilogram for mercury.

**Energy tax**
Goods are subject to energy tax at the following rates:

- Electricity: HUF 295 per megawatt hour.
- Coal: HUF 2,390 per thousand kilograms.
- Natural gas: HUF 88.5 per gigajoule.

The following entities are subject to energy tax:

- Energy traders.
- End-users.
- Producers.

The tax is self-assessed, except in the case of imports, and the Tax Body of the National Tax and Customs Authority is responsible for the related administration procedures from 1 January 2013.

**Food chain supervision fee**
The purpose of the new food chain supervision fee is to raise revenue for the operation of a regulatory body tasked with the official supervision of the food chain.

The supervision fee is payable by the following natural persons or economic operators:

- Persons who place animals on the market that are kept for food production, breeding, or experimental purposes.
- Persons who place food or fodder crops, seeds, plant products, and planting material on the market.
- Food businesses.
- Registered or authorised feed businesses.
- Persons who manufacture or place on the market veterinary medicines or veterinary medicinal products.
- Persons who manufacture or place on the market ‘EEC fertiliser’ or other products subject to authorisation.
- Persons involved in the handling, use, further processing, and transport of animal by-products or placing derived products on the market.
- Businesses engaged in the transport of live animals.
- Persons operating facilities for the cleaning and disinfection of vehicles used for transport of live animals, isolation facilities for receiving animals from different stocks, livestock loading ramps, assembly centres, trading sites, feeding and watering stations, rest stations and livestock fairs.
- Persons manufacturing and storing plant propagation material.
- Persons operating a registered or authorised laboratory.
- Persons placing devices on the market that are used for marking animals.
The fee is 0.1% of the net sales revenue (excluding excise duty and the public health product tax) derived in the preceding year from these activities.

The taxpayers concerned will have to comply with their reporting obligation by 31 May. The annual supervision fee is payable in two equal instalments: the first instalment by 31 July, and the second by 31 January.

**Telecommunication tax**
The new telecommunication tax was introduced on 1 July 2012 and applies to telecommunications service providers. The tax rate is HUF 2 per minute for calls made and HUF 2 per message sent. The monthly ceiling is HUF 700 per number for private individuals and HUF 2,500 per number for companies.

**Tax on financial transactions**
The scope of the tax on financial transactions includes payment service providers with a registered address or branch office in Hungary, credit institutions entitled to provide foreign currency services, and special services intermediaries entitled to provide intermediated foreign currency services.

As of 1 January 2013, the financial transaction tax applies to the following payment services:

- Bank transfers.
- Direct debits.
- Postal cash payments.
- Cash payments from payment accounts (including cash withdrawals using a credit card).
- Cash transfers.
- Bank card payments.
- Letters of credit.
- Cashing cheques.
- Foreign currency exchanges.
- Debt repayments.
- Commissions and banking fees.
- Other transactions in which the amount of the transaction is deducted from the payment account credit balance.

As of 1 January 2014, a wider range of transactions, such as securities transactions, including derivative securities transactions, might be subject to the financial transactions tax.

No tax will be payable for the following transactions if certain conditions are fulfilled:

- Technical transfers between accounts held at the same bank (under the new regulations, the tax exemption will also apply to joint accounts).
- For investment services, transfers between the payment account and the client account, if the investment service provider is a related party of the financial service provider (until 31 December 2013).
- Payments from limited purpose accounts (long-term investment accounts, voluntary pension accounts, subsidised accounts for minors [START account], and custodial accounts).
- Cash pool related payment transactions within the same financial service provider.
- Transactions between financial service providers (including among others financial institutions, investment companies, etc.).
• Payment transactions from social security and family allowance administrative accounts.
• Unapproved (or approved but incorrectly made) payment transactions and their corrections.

The tax base is the amount of the transaction (debit amount, amount paid, amount of currency sold, etc.). The tax rate has changed considerably compared to the earlier rate of 0.1%. In most cases, the amount payable will be 0.2% of the amount of the transaction but may not be more than HUF 6,000 per transaction. This cap will not apply to transactions in which the duty is payable by the State Treasury, or Magyar Posta Zrt. Under the new regulations, all forms of cash withdrawal will be subject to a 0.3% tax rate. According to the provisions that will come into effect from 2014, securities transactions will be subject to a 0.1% and derivatives transactions with securities will be subject to a 0.01% transaction tax.

**Bank tax**
In Hungary, the bank tax is levied on financial institutions. The rates, among others, are 0.15% on the adjusted balance sheet totals of up to HUF 50 billion, and 0.53% on adjusted balance sheet totals of HUF 50 billion and above. Financial institutions are also subject to 30% tax on their profit before taxation; however, this tax liability is deductible from the bank tax calculated on the balance sheet totals.

**Insurance premium tax**
On 1 January 2013, insurance premium tax on voluntary vehicle liability insurance policies (CASCO) and on property and casualty insurance policies was introduced in Hungary.

The insurance tax should be paid by the insurance companies after the gross insurance premium received on insurance policies insuring risks located in Hungary. Insurance companies subject to the tax include:

• Insurance companies headquartered in Hungary.
• Foreign insurance companies’ Hungarian branches.
• Insurance companies providing cross-border insurance services if these entities, which are headquartered abroad, render taxable insurance services in Hungary.

The above mentioned entities should apply two different tax rates. In case of voluntary vehicle liability insurance policies, the rate of the tax is 15%. For property and casualty insurance, the rate is 10%.

We note that this tax should be paid neither after the mandatory vehicle liability insurance, nor after life and health insurance.

**Accident tax**
Accident tax was introduced on 30 November 2011. The base of the accident tax is the yearly fee of compulsory motor vehicle liability insurance. The tax rate is 30%.

**Employment-related tax and social security contributions payable by employers**
Social tax replaced the social security contributions payable by the employer. The tax base is the gross income paid to the employee. The tax rate is 27%.

The rate of training fund contribution on employment income is 1.5%. The tax base is the gross income paid to the employee.
Hungary

**Branch income**

Foreign companies may establish branch offices in Hungary. A branch office is an organisational unit of a foreign company without legal personality, vested with financial autonomy, and registered in the Hungarian companies register as a branch office of the foreign company. The provisions of the Hungarian Accounting Act apply to branch offices, which must prepare reports using double-entry bookkeeping. Statutory audits are obligatory, except for the branches of corporations whose registered office address is in the European Union.

A branch office is regarded as established when it has been entered into the companies register. A branch office may start operating once the application for registering the branch office has been submitted to the Court of registration, provided that it indicates 'under registration' on its corporate correspondence. Until a branch has been registered, it cannot carry out any activities that are subject to official permission. A branch office is considered dissolved upon its removal from the companies register.

Branch offices are treated as PEs for taxation purposes. They must determine their tax base according to the general rules applicable to Hungarian companies. The profit for the year (calculated on the basis of the Hungarian accounting system and adjusted by specific provisions of the Corporate Tax and Dividend Tax Act or CDTA) is subject to CIT of 10% on the first HUF 500 million of the positive CIT base. The tax base above this limit is subject to 19% CIT. The definition of PE is similar to that in the tax treaties but somewhat broader. For treaty countries, the respective treaty definition applies.

A foreign company’s CIT base is determined for all its domestic PEs (except for branches) collectively and for its branches separately. A branch should account for costs and revenues as if it were independent from its foreign parent company.

For a Hungarian PE, earnings before taxes are reduced by cumulated administrative costs incurred proportionately at the headquarters and any of its PEs, with the maximum proportion defined as the revenues of the PE compared to all revenues of the foreign company.

However, if there is a treaty between Hungary and the other country, the provisions of the treaty have priority over domestic law. Therefore, the provisions of the treaty have to be followed in the first instance, and all costs related to the activity of the branch have to be allocated to the branch, without the above restrictions in domestic law, and all profit realised with respect to the branch must also be allocated to the branch. The allocation method must be consistent from year to year, unless there is a good reason for changing it.

The foreign parent must continuously provide the assets and funds required for the operation of the branch office and the settlement of its liabilities. The employees of a branch office are in a legal relationship with the foreign company, and the foreign parent exercises employer’s rights. A branch is considered to be related to its parent company/headquarters. Therefore, the prices used in inter-company transactions have to be at arm’s length, and transfer pricing documentation has to be prepared.

**Income determination**

The CIT base should be calculated by modifying the accounting pre-tax profit by adjustments and deductions as provided by the CDTA.
Inventory valuation
Inventories are generally valued at their historical cost unless their fair market value is significantly lower than their book value, in which case the fair market value should be recorded. Cost may be determined on the basis of first in first out (FIFO) or average cost.

Capital gains
Capital gains (losses) are treated as ordinary income (losses) for tax purposes. The gain on the sale of depreciable assets equals the sales revenue reduced by the net value of the asset for CIT purposes.

If a participation (of at least 30%) or an intangible asset is registered within 60 days of acquisition and held continuously for at least one year, capital gains from the sale or contribution in kind of the participation is exempt from CIT in general. Any additional acquisitions in the case of a registered participation may also be registered, provided that the 30% participation was already registered.

Stock transactions
Shareholders of a real estate holding company are also subject to CIT on their income from the alienation of the shares in the real estate holding company. Transfers of direct or indirect participations in companies that own real estate may be subject to CIT.

Dividend income
Except in the case of CFCs (see the Group taxation section), dividends received and accounted for as income in the given tax year are tax-free.

Interest income
No specific provision exists in Hungary for interest income; consequently, interest income is taxable for CIT purposes.

Royalty income
50% of royalty income is deductible for CIT purposes, up to 50% of pre-tax profit. Royalties as revenues are derived from (i) permission for the exploitation of patents, from the industrial design of assets under industrial law, and from know-how; (ii) permission to use trademarks, business names, and business secrets; (iii) permission to use copyrights and similar rights attached to protected work; and (iv) transfers of the property described above (except for trademarks, business names, and business secrets).

Unrealised exchange gains/losses
Tax deferral may be chosen for unrealised exchange gains/losses.

Foreign income
Taxpayers resident in Hungary and foreign entrepreneurs must calculate their CIT base exclusive of any income that is subject to taxation abroad if so prescribed by an international treaty. In any other case, a foreign tax credit is available for income taxes paid abroad (see Foreign tax credit in the Tax credits and incentives section for more information).

In Hungary, there are no provisions under which income earned abroad may be tax deferred.
Deductions

In general, costs and expenses incurred in relation to the taxpayer’s income-generating business activity are deductible for CIT purposes.

Accrued expenses are recognised for taxation purposes in the tax year they affect.

Depreciation and amortisation

Accounting depreciation that is accounted as expenditure, and thus included in the accounting profit, should be added to the CIT base. Tax depreciation calculated according to the CDTA reduces the tax base, even if the tax depreciation is higher than the accounting depreciation. The tax depreciation of tangible assets should be calculated using the straight-line method on the basis of the historical value from the time when the asset was first used for business purposes.

Examples of tax depreciation rates include the following:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computers and other high-tech machinery</td>
<td>33 or 50</td>
</tr>
<tr>
<td>Vehicles</td>
<td>20</td>
</tr>
<tr>
<td>Other tangible assets</td>
<td>14.5</td>
</tr>
<tr>
<td>Buildings (long-life structure)</td>
<td>2</td>
</tr>
<tr>
<td>Rented buildings</td>
<td>5</td>
</tr>
</tbody>
</table>

Assets newly acquired since 2003 can be depreciated at 50% annually; these instruments include, among other items, machinery and intellectual property (IP).

There is no prescribed amortisation rate for intangibles. The historical value, the residual value, and the useful life should be considered.

Additionally, goodwill cannot be amortised either for accounting or tax purposes if it does not lose its value during its use. However, if extraordinary amortisation is accounted on goodwill, the extraordinary amortisation will also be recognised for CIT purposes. In the case of transformations, specific amortisation rules apply.

Organisational and start-up expenses

Companies are not obligated to capitalise the costs of formation/reorganisation. The capitalisation of these costs is at the company’s discretion, but the company should comply with its accounting policy. Furthermore, only the direct costs of formation/reorganisation that are not classified as investments or renovations and are likely to be recovered ultimately can be capitalised.

Interest expenses

Interest expenses are deductible if the following conditions are met:

- Interest incurs in relation to the company’s profit generating activity.
- Thin capitalisation rules are fulfilled (see Thin capitalisation in the Group taxation section).
- Interest is not paid to a CFC.
Bad debt
Under the Accounting Act, bad debts are only deductible for CIT purposes if they are supported by legally valid third-party documents that the receivable cannot be collected. Expenses claimed that cannot be enforced in court and expired claims are not deductible for CIT purposes.

In addition to the above, 20% of eligible bad debts are deductible from the CIT base if the debt was not settled within 365 days from the due date.

Charitable contributions
Grants made or assets that are transferred without consideration, as well as liabilities assumed or services provided free of charge, will qualify as business expenses if the taxpayer has a declaration from the recipient stating that the recipient’s profit will not be negative without the income received.

Grants will always qualify as non-business expenses if they are provided to a foreign person or foreign resident company.

In the case of film and sports (football, basketball, handball, ice-hockey, and water polo) sponsorship grants, the amount of support is deductible both from the CIT base (as an expense) and from the CIT amount, provided that an official sponsorship certificate is available.

Development reserve
50% of pre-tax profit may be assigned as development reserve. The maximum value of the reserve is HUF 500 million; however, it has increased from four years to six years for development reserves included in the 2008 financial statement. For other development reserves, the period remains four years.

Intellectual property (IP) reserve
Further, there is a possibility to create an IP reserve, from income from sales of intangible assets that generate royalty income, deeming that income non-taxable. The IP reserve should be shown as part of the tied-up reserve in the companies' books. The IP reserve may be used to buy intangible assets that generate royalty income at the company within three years from its creation; otherwise, CIT and late payment penalty should be paid on the amount.

Tax base allowance regarding R&D
A tax base allowance is only applicable for R&D activities if the taxpayer carries out basic research, applied research, or experimental research activities for its own purposes. The direct cost of the basic research, the applied research, and the experimental research, or the amount of depreciation on the research activity (if the cost of R&D activity is capitalised), is deductible from the tax base.

300% of the direct costs of research activity (up to a maximum of HUF 50 million) are deductible from the tax base if the research activity is carried out jointly with a higher education institution, the Hungarian Academy of Sciences, or a research institute established by them.

As of 2013, a cooperation agreement may be concluded with a research institution operating either as a central budgetary organ or as a majority state-owned business organisation.
Employee benefit expenses
Employee benefits and the fringe benefit tax payable on them are tax-deductible.

Bribes, ‘kickbacks’, other illegal payments
Bribes, ‘kickbacks’, and illegal payments are not recognised as business costs for CIT purposes and are non-deductible from the tax base.

Fines and penalties
Fines and penalties are not deductible for CIT purposes.

Taxes
Taxes are usually deductible for CIT purposes, except for CIT, recoverable VAT, and the income tax of energy suppliers and public utility service providers.

Net operating losses
Losses can be carried forward indefinitely, and the tax authority’s approval is not required. However, the tax authority may later audit whether a company has exercised its rights in accordance with the intended purpose of these rights when carrying losses forward.

The company’s tax losses carried forward cannot be utilised if:

• the majority of the company’s shares is directly/indirectly acquired by an independent entity (an entity who was not one of the company’s owners in the preceding two financial years)
• the activity of the company changes significantly in the two years following the transformation, or
• the successor company does not generate any revenue from at least one activity of the predecessor.

Losses carried forward may only be used to offset up to 50% of the tax base calculated without losses carried forward.

Note that earlier tax losses must be used first (FIFO principle), and the losses of predecessors are also deductible from the successor company’s CIT base.

Losses cannot be carried back (except for agricultural companies, who may account deferred losses by self-revision or by correcting the amount of tax paid in the previous two tax years).

Payments to foreign affiliates
There is no general restriction on the deductibility of a consideration due to a foreign entity, provided the payment is a justifiable business cost. General anti-avoidance provisions (abuse of law, substance-over-form) may also result in non-deductibility. If the parties are considered to be related parties under the definition of the CDTA, the Hungarian tax office is entitled to adjust the Hungarian party’s tax base to reflect the market price (arm’s-length price) if the parties did not make the adjustment themselves.

Considerations due for services are only deductible if the actual performance of the services is supported and the Hungarian taxpayer can prove that it benefits from the service.

Thin capitalisation rules may apply to interest on any non-banking debt in excess of three times the equity (see Thin capitalisation in the Group taxation section).
The consideration paid to a CFC is not deductible for CIT purposes unless the taxpayer is able to prove and keeps documentation that it serves the purposes of business operations. For further details on the CFC rules, see the Group taxation section.

**Group taxation**

Group taxation is not available for CIT purposes in Hungary. See Value-added tax in the Other taxes section for a description of group taxation for VAT purposes.

**Transfer pricing**

If parties qualify as related parties (as defined in the Hungarian CDTA) and the price applied differs from the arm’s-length price, the CIT base should be modified by a proper transfer pricing adjustment. In addition, the foreign PEs of a Hungarian company and the Hungarian head office also qualify as related entities and are subject to transfer pricing regulations.

Taxpayers are obligated to prepare transfer pricing documentation on intra-group transactions. The documentation has to be prepared for every contract between related parties (including in-kind contributions made at the time of establishment).

Transfer pricing documentation is not required to be prepared for transactions between a resident taxpayer’s PE and a related company if the resident taxpayer under the provisions of an international treaty adjusts the corporate tax base ensuring that it does not include the foreign taxable income.

When determining the transfer prices applied between related companies, in addition to the traditional methods (comparable uncontrolled price, resale-minus, and cost-plus methods), it is also possible to use the transactional net margin method and the profit-split method. In addition to these methods, companies may continue to use other methods if the traditional methods are inadequate.

Taxpayers are allowed to prepare two types of documentation: country-specific documentation or consolidated transfer pricing documentation. Taxpayers may prepare consolidated transfer pricing documentation if this does not jeopardise comparability, and the contracts:

- have the same subject matter and all their terms and conditions are identical or only slightly different or
- closely relate to each other.

Taxpayers are required to make a declaration in their CIT returns as to which type of documentation they choose.

In summary, the requirements of the country-specific documentation have not changed as of 2013 compared to previous documentation requirements. This type of documentation must include, for example, the following:

- A functional analysis.
- Industry and company analyses.
- An economic analysis.
- A financial analysis.
- An account of the process of selecting the transfer pricing methodology.
Hungary

Consolidated transfer pricing documentation must consist of two main parts:

- The core documentation, which includes the standard data for each company within the group that is resident in any EU member state.
- Country-specific documentation, which describes the agreements between the taxpayer and its related parties.

The documentation has to be available no later than the filing deadline for the CIT return in any given year; otherwise, the tax authority may assess a default penalty of up to HUF 2 million for each case of missing or deficient documentation. In the case of a repeat offence, it is up to HUF 4 million for each missing or deficient documentation. For the repeated lack or deficiency of the same documentation, the penalty may go up to four times the original penalty levied. Note, however, that this documentation only has to be prepared and kept in the company’s files, rather than being filed with the tax authority.

**Thin capitalisation**

Thin capitalisation rules may apply to interest on any non-banking debt in excess of three times the equity. Where debt means the average daily balance of outstanding loans, outstanding debt securities offered privately and bills payable (with the exception of bills payable on account of suppliers’ debts), and any other liability other than loans, debt securities, and bills payable shown in the balance sheet that entails the payment of interest from the taxpayer’s profit (with the exception of debts of credit institutions and financial companies incurred in connection with and for the purposes of financial service activities); and equity means the average daily balance of subscribed capital, capital reserve, retained earnings, and tied-up reserves (or own funds of the like). Debt includes non-interest bearing loans as well.

Back-to-back arrangements are exempted from the thin capitalisation calculation.

**Controlled foreign companies (CFCs)**

CFCs are foreign persons or entities established abroad and/or foreign resident entities if, among other conditions, they are owned by a resident private individual/entity who is deemed to be the beneficial owner (i.e. has a certain ownership share or voting ratio or dominant influence in the enterprise) or if the majority of their income derives from Hungarian sources and, in both cases, the effective tax rate of the persons/entities is lower than 10%. If a foreign company’s tax base is negative or zero and a multi-rate corporate tax system is in place in the given country, the lowest tax rate must be no less than 10% in order for an entity not to qualify as a CFC.

Certain exceptions may be available (for companies in EU member states, OECD member states, and treaty countries, if a real economic presence can be proved). It is the taxpayer’s obligation to provide proof on the (lack of) CFC status.

**Tax credits and incentives**

**Foreign tax credit**

Foreign tax credit is available for income taxes paid abroad, up to the Hungarian tax payable on the creditable income (at a maximum of 90% of income tax paid abroad).
The foreign income has to be classified by country of origin and revenue type. The deducted tax may not exceed the lesser of either the applicable foreign tax or the applicable tax based on the taxation treaty between Hungary and the given country.

If there is no taxation treaty, 90% of the tax payable abroad is credited against the tax liability, up to a hypothetical tax liability calculated by using the average Hungarian tax rate. Full tax credit is applicable if so described by a tax treaty. The average tax rate is the CIT rate, reduced by the applicable tax allowances, divided by the tax base. Indirect costs should be allocated in proportion to the revenue of the branch office to the total revenue of the whole company.

**Development tax incentive**

Each development tax incentive may be claimed for a ten-year period (beginning on the completion of the development) on the CIT returns over a maximum period of 14 years from the original application for the incentive. In any given tax year, the tax incentive is available for up to 80% of the tax payable but in total up to the state aid intensity ceiling. Applications for the tax incentive only have to be submitted to the Ministry for National Economics if the aggregated eligible costs of the investment exceed HUF 100 million. If the investment is below this threshold, taxpayers only need to notify the Ministry for National Economics before starting the investment. Tax incentives are available for investments if:

- the current value of the investment is at least HUF 3 billion or
- the current value of the investment is at least HUF 1 billion in certain designated areas and provided that:
  - the investment results in the creation of new facilities or the extension of existing facilities, or
  - the investment results in substantially changed products or production processes (excluding investments in basic research, applied research, and experimental development), and
  - in the four years following the year in which the tax incentive is first used against the tax base:
    - the annual average number of employees has increased by at least 150 compared with either the year before the investment was made or the average number of employees for the three years preceding the investment (by 75 in certain designated areas) or
    - the annual wage costs have increased by 600 times the minimum wage effective on the first day of the tax year (by a multiple of 300 in certain designated areas) compared with either the annual wage costs of the year before the investment was commenced or the average annual wage cost for the three years preceding the investment.

Provided that the investment results in the creation of new facilities or the extension of existing facilities, or substantially changed products or production processes, the Ministry may also grant incentives to companies that invest:

- at least HUF 100 million in equipment for zoogenic food production
- at least HUF 100 million in environmental protection projects
- at least HUF 100 million in broadband internet services
- at least HUF 100 million in the production of films and videos
- at least HUF 100 million in basic research, applied research, and experimental development projects
- at least HUF 100 million in projects financed by an issue of stock market-quoted shares, if (i) the project is started before the last day of the third calendar year...
Hungary

following the date of issue, (ii) the total nominal value of the shares issued by the fifth year following the start of the project continuously reaches 50% of the value of the registered shares, (iii) the total issue price reaches 50% of the eligible costs, and (iv) at the date of the application for the incentive the company has at least 25 shareholders or at least 25% of the issued shares are owned by shareholders where each of them does not have more than 5% of the issued shares’ nominal value, and

• at least HUF 500 million in projects initiated by small and medium-sized enterprises, if certain criteria are met.

Tax incentives may also be granted for projects that create new jobs. The restrictions prescribed in the CDTA regarding the headcount of staff and the percentage of new entrants to the labour market that may be claimed for such investments have been abolished, although the conditions prescribed in the relevant decree must still be met.

A new type of tax allowance may be claimed on an investment project implemented in a free entrepreneurship zone or an energy efficiency improvement project if the net present value of the investment is at least HUF 100 million.

In addition, the law stipulates that a taxpayer will be required to submit a request for tax allowance to the minister in charge of fiscal policy before commencement of the investment project, and the date of completion of the project must be reported 90 days after completion of the investment project.

Free entrepreneurship zone
The free entrepreneurship zone means a region designated by the government and coordinated by the regional business development agency that is comprised of individual regions, separated by public administration, borders, and topographical lot numbers, that are treated jointly for regional development purposes.

Tax holidays
Tax holidays may be granted in relation to film and theatre subsidies, developments, and small and medium-sized entities (SMEs).

Other tax incentives
Film production companies that receive a state subsidy for their activity may deduct the amount of the subsidy from their CIT base.

A tax incentive is available for SMEs (basically, those with a maximum of 250 employees; annual net revenue of a maximum of 50 million euros [EUR]; or a maximum annual balance sheet total of EUR 43 million). SMEs that take a loan from a financial institution for the acquisition or production of tangible assets may deduct 40% of the interest paid on the loan from their tax due, up to a maximum deduction of HUF 6 million. However, taxpayers engaged in certain business sectors cannot use this tax incentive (e.g. transportation, agricultural activity).

In order to be eligible for the above tax incentives, the wages and salaries need to be kept at a certain required level, according to relevant regulations.

In addition, a new type of tax allowance may be used in the future to support team sports (football, basketball, handball, ice-hockey, and water polo). The relevant government decree provides detailed rules on the application of this tax incentive.
**Withholding taxes**

Under the domestic rules, there is no withholding tax (WHT) on dividends, interest, or royalties.

Foreign organisations are not subject to WHT on interest, royalties, and service fees received from Hungarian resident companies.

**Tax administration**

**Taxable period**

CIT must be calculated by reference to the accounting year, which is either the calendar year or, for group companies, the group’s accounting year.

**Tax returns**

Returns must be lodged by the last day of the fifth month following the last day of the accounting year (31 May for a calendar year taxpayer). The tax payable is determined by self-assessment.

Tax returns may be submitted either electronically or in paper format. However, those who are legally obligated to submit monthly tax and contribution returns (e.g. employers and payers) may only submit tax returns electronically.

**Payment of tax**

CIT instalments must generally be reported and paid quarterly or monthly (above HUF 5 million tax payable). The final (‘top-up’) payment is due by the last day of the fifth month following the last day of the accounting year (31 May for a calendar year taxpayer). In the case of taxpayers with net sales revenues of over HUF 100 million, 100% of the expected final payment is due by the 20th day of the last month of the accounting year. However, a late payment penalty is only levied if the company fails to pay at least 90% of the expected final payment by the above deadline. The late payment penalty is 20% of the difference between the tax advances paid (including the top-up payment) and 90% of the actual CIT liability.

**Tax audit process**

Generally, the tax authority selects the taxpayers subject to tax audit based on certain criteria, which are communicated to the public, and an elaborate risk assessment model. Tax audits can vary in the following ways: the tax authority can (i) re-audit tax returns, (ii) monitor the redemption of government guarantees, (iii) audit the fulfilment of certain tax obligations, (iv) gather data and information, (v) monitor compliance with duty payment obligations, or (vi) re-audit previously audited tax periods.

A tax audit period can cover any years that are not lapsed (five years after the last day of the calendar year in which the taxes should have been declared or reported, or paid in the absence of a tax return or declaration) or not closed by a re-audit of tax returns. The tax audit starts when a company receives the notice of audit and finishes when that company receives the report containing the tax authority’s findings. The deadline for the completion of the tax audit is between 30 and 90 days, although, in special cases (e.g. related tax audit, request for assistance from foreign tax authorities), it can last over a year.
Once the tax authority has completed the audit process, it issues its minutes. The minutes detail all the findings of facts of the audit and serves as the background of the tax assessment, and the basis on which the tax authority will pass its first-instance resolution. Upon receipt of the minutes, the taxpayer has the opportunity to submit its remarks to the minutes and raise any disagreement with the findings of the audit.

In case of a dispute, the tax assessment of the tax authority may be appealed and challenged before the second-instance tax authority, which has the right to annul the first-instance resolution and decide on the merits of the case, or to instruct the first-instance tax authority to carry out a new audit if the facts and circumstances have not been appropriately and fully developed.

The decision of the second-instance tax authority is final and binding. Following the receipt of this decision, the company may appeal to the court. The court may uphold, amend, or annul the Resolution of Second Instance and, if it is necessary, may order a new process in relation to the tax audit.

The superior tax authority or the minister in charge of taxation (minister appointed for the supervision of the tax authority, i.e. Minister of Ministry for National Economy in Hungary) may take regulatory action on request by the taxpayer. The superior tax authority or the minister can also amend or annul the unlawful resolution, and, if it is necessary, a new procedure can be ordered.

Statute of limitations
In general, the statute of limitations is five years from the end of the calendar year in which the tax return should be filed. Self-revision interrupts the term of limitation.

Topics of focus for tax authorities
The tax authority will take more stringent measures against ‘aggressive tax planning’ (tax planning that takes advantage of unintended administrative or legal loopholes) using its international experience and cooperation agreements.

Generally, the following categories of taxpayers may expect to be scheduled for tax audits:

- Taxpayers whose records show frequent changes in registered address or ownership.
- Businesses that have operated for several years with substantial loans from their shareholders.
- Taxpayers that declared significant amounts of payable and deductible VAT during their pre-company period.
- Taxpayers that have been in continuous operation despite continuing losses.
- Taxpayers that spend a significant portion of their sales revenues on services.
- Taxpayers that have significant tax base decreasing items, tax allowances, and subsidies related to investments.
- Taxpayers that deduct R&D expenses.

The tax authority will also pay more attention to the actual content of transactions conducted between related parties and to the methods companies use to determine the arm’s-length price.
Other issues

Principal forms of doing business

- Branch.
- Partnership.
- Limited liability company.
- Private company limited by shares.
- Public company limited by shares.

Mergers and acquisitions (M&A) from a business and tax perspective

Mergers in Hungary are tax-free transformations if they qualify under the definition of preferential transformation. Preferential transformation means that a company, without going into liquidation, transfers all its assets and liabilities to another company in exchange for the issue to its shareholders of securities representing the capital of that other company, and a cash payment not exceeding 10% of the nominal value, or, in the absence of a nominal value, of the accounting par value of those securities.

In a preferential transformation, the predecessor company does not have to amend its tax base by the difference between the adjusted book value and the book value. The adjusted book value means the historical value of assets less any depreciation deducted from the tax base plus the readjusted amount of extraordinary depreciation. Furthermore, for shareholders, the income accounted in excess of the historical value of the shares they acquire in the preferential transformation is also not taxable for CIT purposes for as long as the shareholder holds its participation.

In any other case, if two companies merge, the difference between the market value and the book value of the assets and liabilities is taxable for the successor company. Furthermore, the predecessor company may decrease its tax base by the amount of the difference between the adjusted book value of its assets and their book value if the adjusted book value is the higher of the two. The company will increase its tax base if the book value is higher than the adjusted book value.

International Financial Reporting Standards (IFRS) adoption

Companies defined in Section 4 of Decision no. 1606/2002/EC (mainly companies listed on the stock exchange) have to prepare their consolidated annual reports according to the IFRS. However, non-listed subsidiaries of EU-listed entities are exempt from the preparation of IFRS consolidated financial statements. If a company chooses IFRS, Hungarian Accounting Rules (HAR) financial statements must also be prepared and filed with the Court of Registration.

**Significant developments**

**Additional bank tax**
Financial services permitted to operate as banks and savings banks are subject to 0.041% tax on total debt at year-end.

In 2013, an additional special 0.0875% tax will be collected from financial services permitted to operate as banks and savings banks.

**A temporary addition to the Financial Activities Tax (FAT)**
In assessment year 2013, an addition of 6% to FAT will be collected on total salary payments that exceed 1 billion Icelandic krónur (ISK). This tax is paid by the same entities that are subject to the general FAT (see the Other taxes section for more information).

**Forgiveness of debt**
Temporary rules stating that forgiveness of debt is not implicitly to be treated as taxable income were introduced. The rules also include a possibility to distribute a part of forgiven debt over the period of 2015 to 2019.

**Taxes on corporate income**
Resident corporations pay tax on their worldwide income less operating expenses. Deductible operating expenses are comprised of all the expenses and costs needed to provide, insure, and maintain income.

Corporate income tax (CIT) for limited liability companies and limited partnership companies is assessed at a rate of 20%.

CIT for other types of legal entities (e.g. partnerships) is assessed at a rate of 36%.

Non-resident corporations receiving payments for services or business operations carried out in Iceland, as well as corporations operating a permanent establishment (PE) in Iceland or receiving a profit from such establishments, are subject to CIT for their Icelandic income at the same rate as applies to resident corporations.

**Corporate residence**
In general, all corporations incorporated and registered in Iceland are considered to be tax residents in Iceland. The same applies to corporations that have their home address in Iceland according to their articles of association or if the management of the company is carried out in Iceland.
Foreign corporations are regarded as Icelandic tax residents if the effective management is carried out in Iceland.

The Internal Revenue Directorate can decide with a ruling whether a corporation’s residence is in Iceland. The ruling can be appealed to a court of law.

**Permanent establishment (PE)**
Apart from the above mentioned, when defining whether a business activity in Iceland constitutes a PE, definitions in tax treaties are taken into consideration as well as commentaries to the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

---

**Other taxes**

**Value-added tax (VAT)**
VAT is a consumption tax levied on all stages of domestic business transactions. VAT is levied on all goods and services, as well as on the imports of goods and services, unless specific exemptions apply.

**VAT rates**
The general VAT rate is 25.5%.

The following goods and services are subject to a reduced VAT rate of 7%:

- Rental of hotel and guest rooms and other accommodation (from 1 January 2013 to 30 August 2013).
- Subscription to radio and television.
- Newspapers, periodicals, and magazines.
- Books, both Icelandic and translated, musical notation as well as their audio recordings. Same applies to compact discs and other similar media as well as electronic media.
- Geothermal hot water, electricity, and fuel oils used for heating houses and swimming pools.
- Food and other consumables for people as detailed in an addendum to the VAT Act.
- Access to roads and other transport related constructions.
- Compact discs, records, audio cassettes, and other equivalent mediums for music only and not videos. Same applies to electronically published music without video.

Effective 1 September 2013, a reduced VAT rate of 14% is applicable to the rental of hotel and guest rooms and other accommodation.

Certain services and goods are zero-rated, which means that there is, in fact, no VAT charge. Zero-rated VAT mainly applies to exported goods and services provided abroad.

**VAT entities**
Businesses engaged in the trade of taxable goods and services for business purposes must register and collect VAT.

**Services exempt from VAT**
The VAT Act details certain services that are exempt from the tax, such as healthcare services, social services, the operation of schools, various education services, cultural activities, athletic activities, passenger transportation, postal services, sale of real estate (not including the rental of hotel and guest accommodation), rental of car workshops,
Iceland

insurance activity, services of financial banks as well as securities trading, lotteries and betting pools, artistic activities, services of travel agencies, funeral services, and all services of ministers of the church.

Those selling taxable goods and services totalling less than ISK 1 million per year are also exempt from paying VAT.

Agents for non-resident parties
Non-residents who are engaged in taxable transactions in Iceland but are neither domiciled nor have permanent residence in Iceland must appoint VAT agents with residence in Iceland to report on their behalf. Both parties are liable for the VAT payments (responsible for ensuring remittance of VAT). If a non-resident does not appoint a VAT agent, the purchaser of the services/goods is responsible for paying the VAT (reverse charge).

VAT accounting periods and due dates
VAT is generally filed and paid on a bi-monthly basis. The due date for payment of VAT is one month and five days after the end of the settlement period. For example, the due date for the January and February payments is 5 April.

If the VAT is not paid on the due date, a 1% penalty charge is added for every day up to a total of 10%. Late penalty interests also apply.

VAT reimbursement
Foreign enterprises, which are neither residents of Iceland nor have a PE here, may obtain reimbursement of VAT paid on goods and taxable services that have been purchased or imported for the commercial purposes of such enterprises in Iceland.

Such reimbursement can be effected to foreign enterprises that would be subject to registration in Iceland according to Article 5 and Article 6 of the VAT Act if the enterprises in question were engaged in such business in Iceland. This means that such enterprises as travel agencies, insurance companies, banks, and other financial institutions cannot obtain such reimbursement.

Another prerequisite shall be that the enterprise shall have sold neither goods nor taxable services in Iceland during the period to which the application refers.

Parties domiciled abroad can get partial VAT reimbursement on goods they have bought in Iceland if they take them abroad with them within three months from the date of purchase. They then must provide the goods, along with any necessary documents, to the appropriate reimbursement company or to the customs authorities on the date of departure, and the purchase price must amount to at least ISK 4,000.

Customs duties
The Directorate of Customs controls import, transit, and export and also collects duties, taxes, and various state revenue. The general rule is that import duties are to be paid on imported goods (customs, excise duties, VAT, and various other charges) unless otherwise stated in the law. For import of some products, other conditions, such as an import licence, may need to be submitted.

Iceland, Liechtenstein, Norway, and Switzerland are members of the European Free Trade Association (EFTA). The EFTA Convention established a free trade area among its member states. In addition, the EFTA states have jointly concluded free trade agreements with a number of countries in Central and Eastern Europe as well as in the
Mediterranean region, Mexico, and Singapore. Also the EFTA states entered into the Agreement on the European Economic Area (EEA) in 1992. The current contracting parties are, in addition to the three EFTA states, the European Community (EC) and the 15 EC member states. Iceland also has a bilateral agreement with its two neighbouring countries, Greenland and Faeroe Islands.

**Excise taxes**

An excise duty is levied on a variety of goods specified in the Icelandic Excise Tax Act. They include goods, new and second-hand, that are imported from abroad or manufactured, processed, or packed in Iceland. There is no excise duty on exports.

The excise duty is either a quantity-based or a price-based charge. The quantity charge is based on each kilogram or litre of the relevant goods. The price charge is based on the duty-added import price for imported goods or on the factory price of goods produced in Iceland. Several rate brackets apply to each, but the system has been greatly simplified in recent years.

The excise tax based on quantity ranges from ISK 16 to ISK 800 per kg or litre. The excise tax based on manufacturing price is, in general, 15%, 20%, or 25%.

**Property taxes**

A municipal property tax is applied annually on the assessed value of real estate in Iceland.

**Stamp taxes**

Stamp duty is levied on the execution of various documents at rates ranging from 0.4% to 2%.

A stamp duty of 0.5% is levied on the nominal value of all new share certificates issued to shareholders in a public limited liability company. Private limited companies are not required to issue share certificates and, therefore, are not subject to stamp duty.

The endorsement of documents is generally not subject to stamp duty.

When issuing deeds and purchase agreements of real estate and land, a 0.4% stamp duty is levied on the officially registered value of the real estate. The same applies to the deeds and purchase agreements of ships. Lease agreements are subject to a 2% stamp duty of the rental price.

**Turnover taxes**

There is an agricultural charge of 1.2% of agricultural turnover.

**Payroll taxes**

Employers are responsible for social security contribution. The general rate is 7.69%. An additional social security contribution for fishermen is 0.65%. The social security contribution for taxpayers who have submitted the E-101 form is 0.675%.

The minimum contribution by employers into their employees' pension funds is 8% of each employee’s salary. An employer’s additional contribution into private pension funds is 2% against a contribution from the employee.
Iceland

Taxes on natural resources

Carbon tax
A carbon tax for liquid fossil fuels is paid to the treasury. Liquid fossil fuels are gas and diesel oils, petrol, aircraft and jet fuels, and fuel oils. All importers of fossil fuels are liable for the carbon tax regardless of whether it is for retail or personal use. The tax rate is:

- ISK 5.75 per litre of gas and diesel oils.
- ISK 5 per litre of petrol.
- ISK 6.30 per kilo of mineral oil gas and other carbohydrate gases.
- ISK 7.10 per kilo of fuel oil.

Tax on electricity/hot water
A special tax is collected from parties that sell electricity and/or hot water to end users.

Carbohydrate tax
Corporations licensed for carbohydrate research, and/or processing, as well as anyone who directly or indirectly participates in the processing or distribution of carbohydrates, must pay a processing tax, which is independent of processing performance, and a carbohydrate tax on profits.

Bank tax and an additional bank tax
Financial services permitted to operate as banks and savings banks are subject to 0.041% tax on total debt at year-end.

In 2013, an additional special 0.0875% tax will be collected from financial services permitted to operate as banks and savings banks.

Financial Activities Tax (FAT)
A 6.75% tax will be levied on all salary payments made by financial institutions, including insurance companies. The tax will be collected monthly.

A temporary addition to FAT
In assessment year 2013, an addition of 6% to FAT will be levied and collected on total salary payments that exceed ISK 1 billion. This tax is paid by the same entities that are subject to the general FAT.

Accommodation tax
Those who sell accommodation that is subject to VAT are liable to collect and return a tax of ISK 100 for each sold night.

National Broadcasting Fee
There is a National Broadcasting Fee of ISK 18,800 per year.

Branch income
A branch is treated as an extension of a trading activity of the overseas parent company incorporated in another jurisdiction and is not a separate legal entity.

Due to the fact that a branch acts in the name of the overseas parent company, a branch’s income is taxable in accordance with the parent company (i.e. if the parent company is a limited liability company, the branch is subject to a CIT rate of 20%).
Tax treaties may allow Icelandic CIT as a credit against foreign income tax imposed on the parent company.

There is no branch profits remittance tax on the repatriation of profits to the parent company.

**Income determination**

**Inventory valuation**
The valuation method of raw materials and finished goods is on a first in first out (FIFO) basis or via the average cost method. When computing the value of produced goods, both direct and indirect production cost must be taken into account. For tax purposes, inventories can be further written down at a rate of 5% of calculated value.

Last in first out (LIFO) is not permitted.

**Capital gains**
Capital gains are treated as taxable income in the year that transfer of ownership occurs and, as such, taxed as part of the general corporate income. Capital gains are generally not subject to withholding tax (WHT). There are rules that allow full deduction of net capital gains from the sale of shares, so, in general, corporations are not subject to taxation on capital gains from sale of shares.

**Dividend income**
Dividend income is treated as taxable income and taxed as a part of corporate income. There are extensive rules that allow full deduction of the dividend, so, in general, corporations are not subject to taxation on dividends. Dividends are subject to WHT (currently 20%), which is a temporary payment towards the final tax assessment.

**Interest income**
Interest income derived from bank deposits, mutual and investment funds, bonds, or other financial deeds; any kind of exchange rate profit; and any other income from monetary assets are subject to 20% tax.

Interest income of foreign parties is subject to 10% WHT in Iceland.

**Foreign income**
Income earned abroad is generally taxed as a part of corporate income since a resident company is subject to CIT on its worldwide income.

Controlled foreign company (CFC) rules stipulate that profits of companies in low-tax jurisdictions must pay income tax of such a profit in direct proportion to shares, regardless of distribution. A low tax jurisdiction is defined as a jurisdiction where the CIT rate is less than two-third of the Iceland’s tax rate (i.e. 13.3%, being two-thirds of 20%). See Controlled foreign companies (CFCs) in the Group taxation section for more information.

Double taxation of foreign income is avoided either through tax treaties or domestic tax provisions.
Iceland

Deductions
Deductible operating expenses are comprised of all the expenses and costs needed to provide, insure, and maintain income (e.g. interest expense, employee expense, travel expense, insurance expense).

Depreciation

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>

</tr>
<tr>
<td>Purchased goodwill</td>
<td>10 to 20</td>
</tr>
</tbody>
</table>

* The depreciation base for these assets is their purchase value less earlier depreciations (book value).

The method used to calculate depreciation is the straight-line method.

Goodwill
Purchased goodwill can be written down at 10% to 20% per year.

Start-up expenses
Purchased fishing rights (quotas) cannot be depreciated.

Start-up costs for agricultural production rights can be depreciated without revaluation over five consecutive years. The following assets can be depreciated in full in the year they are initiated or paid with steady payments over five years:

- Start-up costs, such as enterprise registration and obtaining operation licences.
- Cost of research, developments, marketing, obtaining patents and trademarks. If the use of individual assets does not fall into the same depreciation category, the depreciation base will be dependent on how much of it is used, so that if an asset is used for three-quarters or more for the same operation, the whole asset will have the same depreciation percentage.

Interest expenses
Interest expenses are deductible, provided that the loan was taken for business purposes.

Bad debt
As a general rule, 5% of bad debt can be written off. Certain conditions must be met in order to write off a higher percentage of bad debts.
Temporary provisions in Icelandic tax law allow corporations to make a credit entry for only 50% of debt write-off totalling ISK 50 million and 75% of debt write-off for amounts over ISK 50 million in income years 2009 through 2012. The requirement for the provision is that the debt is business-related and operating loss and transferable loss has been offset.

The debt write-off can be carried forward from the income year 2010 to the income year 2014. The transferrable amount that can be carried forward on a yearly basis is the amount that exceeds the transferable operating losses and the possible operating loss, tax depreciation, and write-down each year. All assets that can be depreciated have to be depreciated and all possible write-downs on receivables and stock have to be done to fulfil the requirements of the provisions. No dividend can be distributed for the income years 2010 through 2014, and the company can also not be merged, wound up, or be jointly taxed with another company during the period. At the end of this five year period (i.e. at the end of the income year 2014), it will be possible to transfer any debt write-off that exceeds ISK 500 million as profit with an equal amount each year from the income year 2015 to the income year 2019. If the write-off does not exceed ISK 500 million, the amount will not be subject to taxation.

**Charitable contributions**
Charitable contributions up to 0.5% of total income are deductible.

**Pension expenses**
Payments to obligatory pension funds for employees at a minimum of 8% of wages are deductible.

**Bribes, kickbacks, and illegal payments**
Bribes, kickbacks, and other illegal payments are not deductible.

**Fines and penalties**
Fines and penalties are not deductible.

**Taxes**
Taxes levied on business profit are not considered to be deductible; consequently, CIT is not deductible. However, social security contributions and other labour taxes are deductible.

**Net operating losses**
Operating losses may be deducted from income from business and independent economic activity. Tax losses can be carried forward ten years and utilised over ten years from the year that the loss was incurred.

No carryback of losses is allowed.

**Payments to foreign affiliates**
An Icelandic corporation can claim a deduction for royalties, management fees, and similar payments made to foreign affiliates, provided that such amounts are made on an arm’s-length basis and reflect services received. Interest at normal commercial rates paid to foreign affiliates generally will be allowed as a deduction on the condition that the loan terms are comparable to those that would have been agreed upon by unrelated parties.
Group taxation

Companies may opt for consolidated taxation if a company owns at least a 90% share in another company. Consolidated taxation means, among other things, that losses of one company can be offset against profits of other companies. Consolidated taxation cannot be extended to non-resident companies or PEs of foreign companies.

Transfer pricing

The statutory authority for addressing transfer pricing issues is found in the application of general legal concepts, such as the anti-avoidance rule.

Article 57 of the Icelandic Income Tax Act No. 90/2003 (originally included in the tax code in 1971) includes a general anti-avoidance rule that states that business transactions between all parties should be based on the arm’s-length principle. With reference to the general concept of this Article, tax authorities can, in cases where transfer prices are not at arm’s length, adjust the taxpayer’s revenues and expenses in order to reflect market value. These adjustments can be performed only within the domestic statute of limitation period, i.e. six years. Authorities have thus based their transfer pricing conclusions on Article 57.

The Income Tax Act includes several separate rules that can be identified as transfer pricing rules, but those rules generally concern transactions between individuals and not companies, including a rule that obligates employees who receive their wages in kind to account for them on their tax return based on market value.

Thin capitalisation

There are no specific rules regarding thin capitalisation in Iceland, but anti-avoidance principles can be applied (see Transfer pricing above).

Controlled foreign companies (CFCs)

Any individual who either directly or indirectly owns a share in any kind of a company, fund, or organisation domiciled in a low-tax jurisdiction must pay income tax on the profit of such corporations in direct proportion to one’s own share, regardless of distribution.

The same applies to taxpayers chairing companies, funds, organisations, or associations in a low-tax jurisdiction from which they receive direct or indirect benefits. In order for the above to apply, the foreign party must be domiciled in the low-tax jurisdiction, half the ownership of the foreign party must be directly or indirectly in the hands of Icelandic taxpayers, or they must have effective management and executive control during the income year.

CFC regulations do not apply if a fund or an organisation is protected by a double taxation treaty (DTT) between Iceland and the low-tax country or if such entities are registered in another EEA member country where they have legitimate business operations and the countries have assigned a DTT between them.

Tax credits and incentives

Foreign tax credit

The Income Tax Act offers a foreign tax credit to mitigate the potential for double taxation. The credit applies only to taxes of a nature similar to the tax being reduced...
by the credit (i.e. taxes based on income). This credit is limited to the amount of tax attributable to foreign-source income.

**Temporary Reimbursements in Respect of Filmmaking in Iceland**

On account of Act No. 43/1999 on Temporary Reimbursement in Respect of Filmmaking in Iceland, it is possible to have 20% of production expenses incurred in the production of films or television material in Iceland reimbursed. When more than 80% of the total production cost of a motion picture or television programme is incurred in Iceland, the reimbursement shall be calculated from the total production cost incurred within the EEA. Production costs refer to all costs incurred in Iceland deductible from the revenues of enterprises pursuant to the provisions of the Act on Income Tax. Payments pertaining to employees and contractors are only to be included in production costs if they are verifiably taxable in Iceland.

Application for reimbursement of production costs shall be submitted to the Ministry of Industry. The application, with supporting documentation, shall be submitted before production commences in Iceland.

In assessing whether a proportion of the production costs of a motion picture or television programme shall be reimbursed, the following conditions must be fulfilled:

- The production shall be suitable for promoting Icelandic culture and the history and nature of Iceland.
- The production shall be suitable for enhancing the experience, knowledge, and artistic ambition of the parties involved. A specific company shall be established in Iceland for the production; an Icelandic branch or agency of a company registered in another member state of the EEA shall be considered a specific company.
- Information about the subject of the production or programme shall be made available.
- An itemised estimate of the production costs and sources of funding shall be made available, together with confirmation by the funding parties and a declaration by the applicant to the effect that the production conforms to the aims of the Act.
- Information about the content of the proposed production of a motion picture or a television programme shall be made available, such as a script and information about filming locations.
- A statement shall be made available to the effect that the material to be produced is intended for general distribution to cinemas or television stations.
- The subject matter of the film or television programming should not violate the provisions of law relating to film inspection and the ban on violent films, nor the provisions of the General Penal Code concerning pornography.
- A confirmation that all taxes and debts in Iceland have been paid.

Act No. 43/1999 on Temporary Reimbursements in Respect of Filmmaking in Iceland expires at year end 2016. All projects approved by that date will be reimbursed in accordance with the law.

**Research and development (R&D)**

Innovative companies are entitled to a special deduction from CIT amounting to 20% of expenses incurred on the projects, provided certain conditions are met.

The maximum amount on which the deduction is calculated within each company shall not exceed ISK 100 million for each operating year. In the case of purchased R&D services, maximum expenses shall not exceed ISK 150 million.
Iceland

**Withholding taxes**

Dividends paid to a resident company are subject to 20% WHT. Dividends paid to a non-resident company are subject to 18% WHT. The final taxation of dividends paid to a company within the EEA is nil, as WHT will be reimbursed in the year following payment upon filing a tax return.

Interest paid to resident company is subject to 20% WHT, and interest paid to non-resident company is subject to 10% WHT.

Gross royalties paid to a non-resident are taxable at the standard 20% CIT rate and subject to withholding.

Notes

1. The lower rate applies to corporate shareholders with a minimum ownership of 10%.
2. The lower rate applies to corporate shareholders with a minimum ownership of 25%.
3. The lower rate applies to copyright royalties (except films, etc.) and royalties for computer software or patent, or for information concerning industrial, commercial, or scientific experience (except information provided in connection with a rental or franchise agreement).
4. The lower rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
5. The lower rate applies to the right to use computer software or patent concerning industrial, commercial, or scientific experience.
6. The lower rate applies to corporate shareholders with a minimum ownership of 10%, and which has been held for a period of at least 12 months preceding the date the dividends were declared.
7. The lower rate applies to Russian corporate shareholders with a minimum ownership of 25% of capital in the Icelandic company and the foreign capital invested exceeds 100,000 United States dollars (USD).
8. The higher rate applies to royalties for the use of trademarks, know-how in relation to a trademark, and films, etc.

Tax administration

Taxable period
The tax year is the calendar year. However, in certain circumstances and upon application, the Internal Revenue Directorate can allow a different fiscal year from the calendar year.

Tax returns
At the beginning of every year, the Internal Revenue Directorate determines the time limit for taxpayers to submit their tax returns and supporting documentation. The deadline for receipt of tax returns from corporations is generally 31 May each year. This deadline is extended upon application. Those who have their tax returns prepared by professional services can generally have the deadline extended until 10 September each year.

The final assessment must be completed no later than ten months after the end of the income year. Tax assessments for corporations will be available at the end of October.

Payment of tax
Advance tax payments are due on the first day of every month, except January and October. Corporations pay income tax in advance, which is in turn deducted from the final tax assessment in October each year. The advance tax is collected in the months of February to September and amounts to 8.5% of the income tax on each due date. In total, the advance tax payments amount to 68% of the income tax. Any deficit remaining when final tax is assessed must be paid in equal instalments in November and December.

Income tax payments on dividends and interest income are due every quarter. Due dates in 2013 are 20 April, 20 July, 20 October, and 20 January (2014), and the final deadline for payment is 15 days later.
Iceland

**Tax audit process**
The Icelandic tax authorities select returns for examination using a variety of methods. Some returns are selected based on electronic selection; some are selected based on a formal supervisory plan. A tax audit can also be traced to information obtained by the tax authorities through efforts to identify participants of tax avoidance transactions.

The examination generally takes place by formal, written communication. The rules of the procedure are very strict, and the process can take from a few weeks to a year/years.

Appeal rights involve two administrative levels and also two judiciary levels.

**Statute of limitations**
Tax authorities in Iceland have the right to reassess tax returns for CIT six years prior to the year of the assessment (i.e. the statutory period of limitation is six years). The statutory period only reaches a maximum of two years in time if tax returns have been filled out properly and all necessary information presented for tax authorities to establish a correct assessment. This means that in the year 2013, tax authorities can, in theory, reassess the company’s tax back to income year 2007.

**Topics of focus for tax authorities**
The topic of focus for tax authorities in Iceland is tax avoidance in general.

---

**Other issues**

**Foreign currency financial statements/Accounting in foreign currencies**
Companies can apply to the Registry of Annual Accounts for an authorisation to keep their books and prepare their annual accounts in a foreign currency. An application must be filed no later than two months before the beginning of the company’s fiscal year. The authorisation is valid for five years, and the Registry of Annual Accounts is responsible for ensuring that the authorised companies continue to fulfil one or more of the following necessary conditions:

- The company's main business operations take place abroad or the company is a part of a foreign company group.
- The company owns foreign subsidiaries or shares in foreign companies, and its main business transactions are with those companies.
- The company's main place of business is Iceland, while a considerable number of their transactions are in foreign currencies.
- A considerable portion of the company's investments and related debts are in foreign currencies.

If the company deems that it no longer fulfils the conditions, it must notify the Registry of Annual Accounts. The Registry can postpone its decision of the authorisation’s discontinuance for two fiscal years if the situation that is causing the fact that the company does not continue to fulfil the necessary conditions is deemed to be temporary.

The average exchange rate for the fiscal year must be used when converting income and expenses, depreciations included, into Icelandic króna. The exchange rate at the end of the fiscal year must be used when converting assets, debts, and capital. Exchange rate differences that may arise do not affect income on profit and loss accounts.
Rules on foreign exchange
In 2008, the Central Bank of Iceland issued rules on foreign exchange in order to restrict or temporarily prevent certain types of cross-border capital movements or foreign exchange transactions related thereto, which, according to the Central Bank of Iceland, can cause serious and considerable instabilities in exchange rates and financial matters.

The Act on Foreign Exchange defines capital movements as:

- The issue, sale, or purchase of shares, debt instruments, drafts, unit shares in mutual funds, and other long-term and short-term securities.
- Deposits in and withdrawals from accounts with depository institutions.
- Lending, borrowing, and the issue of securities not related to international transactions with goods and services.
- The import and export of share certificates and domestic and foreign currencies.
- Forward contracts, options, currency and interest-rate swaps, and other related foreign exchange transactions in which the Icelandic króna is one of the denominated currencies.
- Presents, grants, or other transactions equivalent to the ones detailed above.

Capital movements of foreign currencies
All capital movements of foreign currencies between countries are prohibited, with the exception of payments for the purchase of goods and services or other capital movements specifically exempt from the regulations, according to Rules No. 370/2010 on Foreign Exchange, issued by the Central Bank of Iceland.

Capital movements of domestic currencies
Capital movements between countries in domestic currencies are also prohibited. There are several exceptions to this rule.

Capital movements specifically exempt from the above regulations are as follows:

- Capital movements in relation to the purchase or sale of goods and services (not including lending, borrowing, and the issue of securities not related to international transactions with goods and services) and payments in cash or by withdrawals from an account the buyer has in an Icelandic depositary institution.
- Capital movements in relation to real estate purchases in Iceland or business transactions with securities issued in the domestic currency and payments by withdrawals from an account the buyer has in an Icelandic depositary institution.
- Capital movements in relation to claims from a liquidated company and payments of contractual debts according to composition agreements, according to Act No. 21/1991.
**Significant developments**

**Surcharge on income tax**
Surcharge at 5% is levied on the income tax for a domestic company (2% in the case of a foreign company) if its income exceeds 10 million Indian rupees (INR) in a year through tax year 2012/13.

The surcharge rates from tax year 2013/14 are as follows:

<table>

**General Anti Avoidance Rules (GAAR)**
Provisions relating to GAAR were proposed in the Budget 2012. They were based on the recommendations of Dr. Parthasarathi Shome’s Committee. The Budget 2012 has considered most of this committee’s recommendations and has extended the date from which they will take effect to 1 April 2016. The provisions empower the tax department to declare an ‘arrangement’ entered into by an assessee to be an ‘Impermissible Avoidance Agreement’ (IAA). The consequence of which will be denial of tax benefit either under the provisions of the Act or under the tax treaty. The provisions can be invoked for any step in or part of any arrangement entered and that arrangement or step may be declared as an IAA. The provisions would attract only where the main purpose is to obtain tax benefit. Recently, the Central Government filed a review petition before the Supreme Court in the context of an Andhra Pradesh High Court decision (Sanofi Pasteur Holdings), requesting it to constitute a seven-member bench and revisit the very concept of tax avoidance and tax planning, as laid down in three of its earlier decisions (McDowell & Co, Azadi Bachao Andolan and Vodafone Holdings). If this does come to pass, such a decision may materially affect the GAAR provisions as proposed.

**Tax Residency Certificate (TRC)**
For the purpose of obtaining tax treaty benefit, it will be necessary for a non-resident assessee to furnish a certificate of its being resident of that country, obtained by the assessee from the government of that country. The government had prescribed the particulars to be contained in the TRC. However, the requirement of obtaining a TRC containing prescribed particulars has been removed with effect from tax year 2012/13. The Budget 2013 has amended the provisions to provide that the TRC produced by a
resident of a contracting state will be accepted as evidence that one is a resident of that contracting state.

**Tax on buyback of shares**
An additional tax is payable on transaction involving buyback of shares by unlisted companies from its shareholders. A tax at 20% is payable by the company on the difference between consideration paid on buyback and the issue price of shares. The buyback consideration received will be tax exempt in the hands of the receiver. No tax credit will be allowed in case of such taxes paid either to the company or to the shareholder.

**Investment allowance**
An investment allowance benefit is allowed for companies engaged in the business of manufacturing articles or things. *For further details, please see Investment allowance in the Deductions section.*

**Tax on royalty or fees for technical services**
Income in the nature of royalty or fees for technical services received by a non-resident is taxable at 25% of the gross receipt.

**Withholding tax (WHT) on transfer of immovable properties**
Any transfer of immovable property (any land, building, or part of a building) by a resident, from 1 June 2013, will attract WHT at 1% of the agreed consideration if the transfer value exceeds INR 5 million. The WHT provisions will not apply in cases of transfer of agricultural land. The requirement of obtaining Tax Deduction Account Number has been waived for those required to withhold tax under this new provision.

**Social Security agreements**
India has, so far, entered into social security agreements with the following 17 countries: Austria, Belgium, Canada, the Czech Republic, Denmark, Finland, France, Germany, Hungary, Japan, the Republic of Korea, Luxembourg, the Netherlands, Norway, Poland, Sweden, and Switzerland. However, only agreements with Belgium, Denmark, France, Germany, the Republic of Korea, Luxembourg, the Netherlands, and Switzerland are currently notified to be operational.

**Taxes on corporate income**
A resident company is taxed on its worldwide income. A non-resident company is taxed only on income that is received in India, or that accrues or arises, or is deemed to accrue or arise, in India.

The corporate income tax (CIT) rate applicable to an Indian company for the tax year 2013/14 is 30% (plus surcharge, education cess, and secondary and higher education cess). Resident companies are liable to pay surcharge at 5% on the amount of CIT if the total income exceeds INR 10 million and at 10% if income exceeds INR 100 million.

Foreign companies operating in India are taxed at 40% (plus surcharge, education cess, and secondary and higher education cess). For tax year 2013/14, surcharge for foreign companies is 2% if income exceeds INR 10 million and 10% if income exceeds INR 100 million.

The education cess is 2%, and the secondary and higher education cess is 1%.
India

Minimum alternative tax (MAT)
Resident companies are liable to pay MAT on their adjusted book profits (not on income from life insurance business) where the tax liability for the year is less than 20.961%/20.008% of the adjusted book profits for the tax year 2013/14 (20.008% for tax year 2012/13). In such cases, the tax liability is fixed at 20.961%/20.008% of the adjusted book profits of the company.

</tr>
</tbody>
</table>

Non-resident companies are liable to pay MAT on their adjusted book profits from India-sourced income where the tax liability for the year is less than 19.44% of the adjusted book profits from India-sourced income for tax year 2012/13 (18.91% for tax year 2011/12). In such cases, the tax liability is fixed at 19.44% of the adjusted book profits of the company from India-sourced income.

Surcharge is payable only where total taxable income exceeds INR 10 million.

Sick companies (companies whose losses have wiped out their net worth and that are doubtful of being revived and nursed back to profitability) are not subject to MAT.

Companies are allowed to take the benefit of carrying forward the credit of tax paid under MAT for ten years.

A Special Economic Zone (SEZ) developer and a unit in an SEZ are liable to pay MAT.

Tonnage tax scheme
The tonnage tax scheme can be elected by an Indian company that has a place of effective management in India, owns at least one qualifying ship, and whose main object is to carry on the business of operating qualifying ships. The tonnage tax scheme is in place of CIT and is levied on the basis of tonnage of vessels owned, operated, or chartered by it instead of net income generated by commercial operations.

In relation to non-resident shipping companies that have regular/occasional shipping income, presumptive tax provisions are applicable. Under the tonnage tax scheme, deemed income shall be assessed at a rate of 7.5% of the amount paid or payable (whether in or out of India) for carriage of passengers, livestock, mail, or goods shipped at any port in India, and the amount received or deemed to be received in India on account of carriage of passengers, livestock, mail, or goods shipped at any port outside India shall be treated as profits and gains of the business or profession.

Tax rates applicable to a non-resident should take into consideration any treaty provisions.
Under a presumptive tax system, taxpayers can opt to be taxed on their income at a pre-designated tax rate.

A government company, or a public company, formed and registered in India with the main object of operating ships is eligible for a deduction not exceeding 50% of the profits to the extent that it is transferred to a special reserve created for the purpose, which is utilised in accordance with the provisions of the Income Tax Act, 1961.

**Direct taxes code**
A new direct taxes code replacing the existing Income Tax Act, 1961 is proposed by the government. The effective date of the direct taxes code is not yet available as the direct taxes code needs to be first tabled in Parliament.

**Local income taxes**
There are no local, state, or provincial taxes on income in India at present.

**Corporate residence**
A company is treated as a resident of India if:

- it is an Indian company or
- during the tax year, the control or management of its affairs is situated wholly in India.

A company that does not fulfil either of these conditions is treated as a non-resident.

A partnership firm or a limited liability partnership (LLP) is treated as a resident in India if any portion of its control and management is in India. A partnership firm or an LLP is a non-resident if its control and management is situated wholly outside India.

**Permanent establishment (PE)**
A PE is defined in India as a fixed place of business through which the business of an enterprise is wholly or partly carried on.

**Other taxes**

**Value-added tax (VAT)/Central sales tax (CST)**
The sale of movable goods in India is chargeable to tax at the central or state level. The Indian Constitution grants powers to state legislatures to levy tax on goods sold within that state. Such sales are, therefore, chargeable to VAT at the rates specified under the VAT laws of the relevant state. The state VAT is charged at different rates varying from 4% to 15%, with a few exceptions where the VAT is charged at a lower or higher rate. The rate of VAT depends on the nature of the goods involved and varies from state to state. All goods sold in the course of inter-state trade are subject to CST.

Where goods are bought and sold by registered dealers, on an inter-state basis for trading or for use as in the manufacture of other goods or specified activities (such as mining or telecommunication networks), the rate of sales tax is 2%, provided Form ‘C’ is issued by the purchasing dealer. In the absence of Form ‘C’, the applicable rate would be the rate of VAT on such goods in the originating state. Inter-state procurement, on which CST is charged by the originating state, is not eligible for input tax credit in the destination state and hence is a cost to the buyer.
Under the VAT regime, the VAT paid on goods purchased within the state is eligible for VAT credit. The input VAT credit can be utilised against the VAT/CST payable on the sale of goods. It is, thus, ensured that the cascading effect of taxes is avoided and only the value addition is taxed.

Currently, there is no VAT on imports into India. Exports are zero-rated. This means that while exports are not charged to VAT, VAT charged on components purchased and used in the manufacture of export goods or goods purchased for export is available to the purchaser as a refund based on the state VAT legislations.

A turnover threshold is prescribed so as to exclude small traders from the ambit of VAT. A tax under composition scheme, at a lower rate, may be levied on small traders within a specified turnover limit in lieu of VAT.

**Entry tax/Octroi duty**

‘Entry tax’ is a tax on the entry of specified goods into the state from outside the state for use, consumption, or sale therein. Entry tax continues to exist under the VAT regime. However, in certain states, it has been made VATable and can be offset against the output VAT liability in the state. Where entry taxes have been imposed in lieu of octroi, there is no offset available, and hence they are a cost. Typically, the rate of entry tax ranges from 0.5% to 15%, depending upon the state.

The levy of entry tax has been considered unconstitutional by the High Courts in many states. The state governments have filed petitions before the Supreme Court to challenge the decisions of the High Courts, and, at present, the matter is pending final adjudication before the Supreme Court.

Octroi is a municipal levy that is levied at the time of entry of specified goods into the limits of the relevant municipal corporation. Thus, octroi is leviable, if there is movement of goods from one city to another in the same state, in the event that the cities fall under the jurisdiction of two different municipal corporations.

**Customs duty**

Customs duty is levied by the Central Government on goods imported into, and exported from, India. The rate of customs duty applicable to a product imported or exported depends upon its classification under the Customs Tariff Act, 1975. With regard to exports from India, customs duty is levied only on a very limited list of goods.

The Customs Tariff is aligned with the internationally recognised Harmonised System of Nomenclature (HSN) provided by the World Customs Organization.

Customs duty is levied on the transaction value of the imported or exported goods. The concept of transaction value is the sole basis for valuation for the purpose of import and export of goods. While the general principles adopted for valuation of goods in India are in conformity with the World Trade Organization (WTO) agreement on customs valuation, the Central Government has passed independent Customs Valuation Rules that apply to the export and import of goods.

The customs duty applicable to any product is composed of a number of components, which are as follows.

- The Basic Customs Duty (BCD) is the basic component of customs duty levied at the effective rate under the First Schedule to the Customs Tariff Act (CTA) and applied
to the landed value of the goods (i.e. the cost, insurance, and freight [CIF] value of the goods plus landing charges). The peak rate of BCD is 10%.

- The additional customs duty in lieu of excise duty (commonly known as Countervailing Duty [CVD]) is equivalent to, and is charged in lieu of, the excise duty applicable on similar goods manufactured or produced in India. CVD is calculated on the sum of the landed value of the goods and the applicable BCD. However, the CVD on specific consumer goods intended for retail sale in India is calculated on the basis of the maximum retail price (MRP) less the specified abatement printed on their packs. The present rate of excise duty is 12%, and, consequently, the rate of CVD is also 12%.

- Education cess at 2% and secondary and higher education cess at 1% are also levied on the aggregate of the customs duties (except in cases of safeguard duty, countervailing duty, and anti-dumping duty).

- An additional duty of customs (ADC) to countervail state taxes and VAT of 4% is charged in addition to the above duties on imports, subject to certain exceptions. ADC is calculated on the aggregate of the assessable value of the imported goods, the total customs duties (i.e. BCD and CVD), and the applicable education cess and secondary and higher education cess.

BCD, education cess, and secondary and higher education cess levied on the aggregate of duties of customs are a cost of any import transaction. The duty incidence arising on account of the CVD and ADC may be set off or refunded, subject to prescribed conditions. Where goods are imported for purposes of manufacture, the Indian manufacturer may take a credit of the CVD and ADC paid at the time of import for offset against the output excise duty. In the case of service providers, only the credit of the CVD is available. Similarly, the Central Government provides exemption from payment of ADC on import of certain specified goods. The Central Government has also prescribed a refund mechanism in relation to ADC paid on goods imported for the purpose of trading in India, subject to fulfilment of the conditions prescribed under the governing notifications and circulars issued in this regard.

**CENVAT (Excise duty)**

Central Value Added Tax (CENVAT) is an excise duty levied by the Central Government on the manufacture or production of movable and marketable goods in India.

The rate at which excise duty is levied on the goods depends on the classification of the goods under the Excise Tariff Act, 1985. The excise tariff is primarily based on the eight digit HSN classification adopted so as to achieve conformity with the customs tariff.

The excise duty on most consumer goods that are intended for retail sale is chargeable on the basis of the MRP printed on the package of the goods. However, abatements are admissible at rates ranging from 15% to 55% of the MRP. Goods, other than those covered by MRP based assessments, are generally chargeable to duty on the ‘transaction value’ of the goods sold to an independent buyer. In addition, the Central Government has the power to fix tariff values for imposing ad valorem duties on the goods.

Presently, the excise duty rate is 12% with a few exceptions of lower or higher rates. However, there is also a partial or complete exemption for specified goods from payment of excise duties available. Education cess at 2% and secondary and higher education cess at 1% are applicable on the aggregate of excise duties. Thus, the effective rate of excise duty is 12.36%.
The central excise duty is a modified VAT wherein a manufacturer is allowed credit of the excise duty paid on locally sourced goods and the CVD and ADC paid on imported goods. The CENVAT credit can be utilised for payment of excise duty on the clearance of dutiable final products manufactured in India. Manufacturers of dutiable final products are also eligible to take advantage of the CENVAT credit of the service taxes paid on input services used in or in relation to the manufacture of final products and clearances of final products from the place of removal, subject to the fulfilment of certain conditions.

**Service tax**
The India Budget 2012 has introduced a new system for taxation of services, popularly known as the ‘negative list’. The new system is a paradigm shift from the prior system, where only services of specified descriptions were subjected to tax. Pursuant to it, service tax is levied on all services provided or agreed to be provided in a taxable territory, except the following:

- Services on the negative list.
- Services specifically exempted by notification.

The rate of service tax is 12%. In addition, education cess at 2% and secondary and higher education cess at 1% are also levied on the taxable services. Thus, the effective rate of service tax is 12.36%.

Typically, the onus of payment of service tax lies with the provider of services. However, for certain services, the onus of paying the service tax lies either fully or partially with the service recipient.

**Goods and services tax (GST)**
The Central Government took a major step towards the transition to a national integrated GST in 2006. In this regard, a Joint Working Group (JWG) was constituted by the Empowered Committee (EC) to study global GST models and identify suitable models for introduction in India.

The EC released its First Discussion Paper on the proposed GST in India on 10 November 2009. In the discussion paper, the government indicated that the GST shall have two components; one levied by the centre (Central GST or CGST) and the other levied by the states (State GST or SGST). The CGST and the SGST would be applicable on all transactions of goods and services made for a consideration except for exempted goods and services, goods that are outside the purview of the GST, and transactions that are below the prescribed threshold limits. The exact date of implementation of the GST is not yet decided. Details of taxes that would be subsumed into the dual GST are as follows.

The following taxes will be subsumed into the CGST:

- Excise duty.
- CVD/ADC.
- Service tax.

The following taxes will be subsumed into the SGST:

- VAT.
- Entertainment tax.
• Luxury tax.
• Lottery taxes.
• State cesses and surcharges.
• Entry tax not in lieu of octroi.

It is likely that the CST will be phased out in the GST regime.

One of the key industry expectations from the Budget 2013 was that the Finance Minister will lay down a clear roadmap for implementing GST. However, no announcement either on the likely date of introduction or a roadmap for its introduction has been made under the Budget 2013. Nonetheless, the Finance Minister was optimistic that the draft bill on constitutional amendment and on GST may be introduced in the Parliament in a few months time.

**Advance ruling for customs, excise, and service tax**

In order to enable foreign investors to ascertain their indirect tax liabilities arising from proposed business ventures in India, the Central Government has constituted the Authority for Advance Rulings (AAR) as a high level quasi-judicial body. The functions of the AAR consist of giving advance rulings on a specific set of facts relating to specified matters under customs, central excise, and service tax.

Advance rulings may be sought by any non-resident investor entering into a joint venture in India in collaboration with another non-resident, or a resident of India, or by a resident setting up a joint venture in India in collaboration with a non-resident. Through the Finance Act 2005, this facility has also been made available to existing joint ventures in India. The Central Government is also empowered to include any other class or category of persons as eligible for the benefit of an advance ruling. Under the customs law, the Central Government allows a ‘resident public limited company’ to be eligible for an advance ruling. The relevant notification(s) issued by the Central Government during the Budget 2013 has also allowed a ‘resident public limited company’ to apply for advance ruling under central excise and service tax law in relation to the proposed new line of business.

Further, the definition of ‘activity’ has also been expanded under the customs and excise law, which enables the existing importer/exporter or manufacturer, as the case may be, to seek advance ruling for a proposed new line of business. In addition, the advance ruling can now be sought on the issue of admissibility of credit of service tax paid or deemed to have been paid on ‘input services’ used in or in relation to manufacture of excisable goods. Earlier, it was only limited to the ‘inputs’ used in or in relation to manufacture of excisable goods.

**Property taxes**

Municipal tax on a property is levied on the basis of the municipal law prevalent in each city. The rate of tax levied varies from city to city in India, and is generally related to the prevailing market prices for property in each locality.

**Transfer taxes**

Transfers of shares have to be stamped under the Indian Stamp Act. Transfer of other movable property is chargeable to stamp duty under the respective State Acts, or under the Indian Stamp Act, in case a state has not passed its own Stamp Act. See also discussion under Stamp duties below.

Immovable property or rights in it can be transferred by way of sale, lease, licence, or easement. Sale of immovable property requires a conveyance deed on which stamp duty
is payable, and must be registered with the Registrar of Assurances of the state under the Registration Act 1908. A lease agreement also needs to be stamped and registered compulsorily. A licence is defined in Section 52 of the Indian Easements Act (IEA), as a grant of a right to do something in or upon the property that would be unlawful but for such grant, which is not an easement or interest in the property. Easement is defined in Section 4 of the IEA as the right given to an owner or occupier of a land, to continue enjoyment of which one can do or prevent something from being done on land that is not one's own, An easement agreement also needs to be registered. Other non-tax laws governing transfers of immovable property include the Transfer of Property Act, 1882 and the Benami Transactions Prohibition Act. There are also some state-level Acts, like, for example, the Maharashtra Ownership Flats Act. The last-mentioned Act prohibits, on pain of confiscation, purchase and registration of property in the names of persons who are not the true beneficial owners, which has been used as a way of hiding undisclosed wealth.

**Stamp duties**

In India, stamp duty is charged on certain documents (not the transaction). No document on which stamp duty has not been paid can be introduced as evidence in any court proceedings. Improperly stamped documents can be impounded by any public officer. The Bombay Stamp Act also provides for imprisonment and fine for executing improperly stamped documents. The Registrar of Assurances can also refuse to register any document that the Registrar feels is improperly stamped. Stamp duty is charged at both central and state levels. State level stamp duties vary from state to state, and on document type.

The Indian Stamp Act, 1899 applies to the whole of India except to those states that have enacted their own Acts. Five states have so far enacted their own stamp law (Maharashtra, Gujarat, Rajasthan, Karnataka, and Kerala), while some states have adopted Schedule I of the Indian Stamp Act, with or without modification. Even in states that have enacted their own Acts, stamp duty on certain instruments, such as transfer of shares, is always leviable under the Indian Stamp Act because, under the Constitution of India, duty on certain instruments can only be levied by the Union of India, whereas, in respect of all other instruments or documents, either the state or the Union can levy duty.

An important source of revenue for state governments is the stamp duty charged on transfer of immovable properties, where rates are prescribed by each state in respect of transfer of property within their jurisdiction. Interestingly, the stamp laws do not define what immovable property is; the definition is imported either from Section 3 of the Transfer of Property Act, 1882 or from the General Clauses Act, 1897. Payment of stamp duty is mandatory for immovable property transfers, whereas for other transactions involving movable assets other than actionable claims, stamp duty is not payable if there is delivery of possession without executing a conveyance.

Buyers of newly constructed properties are also required to pay service tax and VAT calculated as percentages of the total consideration, and are also obligated to withhold tax from the seller. The cumulative cash flow impact of these three tax requirements, in addition to stamp duty and registration charges, have increased transaction costs of buying immovable property in India to very high levels.

**Dividend distribution tax (DDT)**

Indian companies distributing or declaring dividends are liable to pay DDT at 15% (plus surcharge, education cess, and secondary and higher education cess). This tax
is payable on declaration, distribution, or payment, whichever is earlier, and it is in addition to the CIT payable on business profits.

SEZ developers and units in a SEZ are liable to pay DDT at 15% (plus applicable surcharge, education cess, and secondary and higher education cess) with effect from 1 June 2011.

A holding company does not have to pay DDT on dividends paid to its shareholders to the extent that it has received dividends from its Indian or foreign subsidiary company on which DDT has been paid by the respective subsidiary. However, the benefit will not be available if the holding company is itself a subsidiary of another company.

**Securities transaction tax (STT)**

STT is applicable to transactions involving the purchase/sale of equity shares, derivatives, units of equity-oriented funds through a recognised stock exchange, or the purchase/sale of a unit of an equity-oriented fund to any mutual fund. The STT leviable for such transactions varies for each kind of instrument, whether delivery based or non-delivery based.

**Wealth tax**

All companies are liable to pay wealth tax assessed at 1% of the value of specified net assets if the value of net wealth exceeds INR 3 million. Valuation of assets is in terms of specific rules notified by the government.

**Payroll taxes and Social Security payments**

For all employees in India working in an establishment covered under the Employees’ Provident Fund and Miscellaneous Provisions Act, 1952, a part of contribution representing 8.33% of the employees’ pay is remitted by the employer to the Employees’ Pension Fund within 15 days of the close of every month. ‘Foreign workers’ holding a passport of a country with which India has signed a Social Security agreement are required to contribute to the Social Security system 12% of one’s salary. However, foreign workers can detach themselves from the scheme under a special provision on obtaining a ‘detachment/coverage certificate’ issued by an appropriate social security institution indicating the period of employment in India being less than the maximum period of detachment agreed in the agreement.

**Branch income**

Branches of foreign companies are taxed on income that is received in India, or which accrues or arises in India, at the rates applicable to foreign companies. There is no WHT on remittance of profits to the company’s head office.

**Income determination**

**Inventory valuation**

Inventories are generally valued at cost or net realisable value, whichever is lower. Generally, there is conformity between book and tax reporting. The first in first out (FIFO) and average cost methods are acceptable, provided that they are consistently applied.
Capital gains
Capital gains refer to the gains made on the transfer of a capital asset, including extinguishment of the rights in an asset. Capital assets are classified into short-term capital assets and long-term capital assets. Long-term capital gains are eligible for concessional rate of tax.

Short-term capital assets are capital assets held for a period of less than 36 months. In the case of shares, listed securities, or units of specified mutual funds or zero-coupon bonds, the short-term holding period is less than 12 months. Capital assets that do not qualify as short-term capital assets are considered as long-term capital assets.

Normally, long-term capital gains are determined after increasing the cost by prescribed inflation factors. In the case of foreign companies, capital gains on the transfer of shares or debentures in Indian companies are computed in the foreign currency in which the shares or debentures were acquired, and the capital gains are reconverted into Indian currency.

Capital gains are taxed as follows:

- Long-term capital gains on the transfer of shares in a company, or units of an equity-oriented fund, that are subject to STT are exempt from taxation. However, such gains are taxable under MAT provisions.
- Other long-term capital gains are subject to taxation at 20% (plus the surcharge, education cess, and secondary and higher secondary education cess). However, long-term capital gains arising from the transfer of listed securities, units, or zero-coupon bonds are taxed at 10% (without adjusting the cost for inflation) or at 20% (after adjusting the cost for inflation), whichever is more beneficial to the taxpayer. These rates exclude surcharge, education cess, and secondary and higher education cess.
- Long-term capital gains arising to a non-resident (not being a company) or a foreign company from transfer of unlisted securities, shares, debentures, etc. are taxable at 10% without any indexation benefit.
- Short-term capital gains on the transfer of shares in a company or units of an equity-oriented fund that are subject to STT are taxed at 15% (plus the surcharge, education cess, and secondary and higher education cess).
- Other short-term capital gains are subject to taxation at the normal CIT rates applicable to a company.

In the case of certain overseas financial organisations (e.g. off-shore funds and foreign institutional investors), long-term capital gains arising on the transfer of units purchased in foreign currency are taxable at 10% (plus the surcharge, education cess, and secondary and higher education cess) on the gross amount.

Long-term capital gains earned by non-residents on the transfer of bonds relating to Indian companies (issued abroad in accordance with government guidelines or approved schemes and acquired in foreign currency) are taxable at 10% (plus surcharge, education cess, and secondary and higher education cess) on the gross amount of gains.

The rules of carryforward and offset of loss for capital gains are as follows:

- Capital losses arising from the transfer of a short-term capital asset can be offset against capital gains arising from any other asset. However, capital losses arising
from the transfer of a long-term capital asset can be offset only against capital gains arising from the transfer of any other long-term capital asset.

- Capital losses that cannot be offset can be carried forward and offset against the future capital gains. Losses can be carried forward for offset for a period of eight years after the year of loss.

- Gains and losses arising on the sale of depreciable assets are classified as short-term capital gains or losses, and the gains are taxed at the same rate as business income.

The transfer of unlisted (not tradable and not listed on any stock exchanges) shares of a company to a firm or a company without consideration or for inadequate consideration is taxable as income in the hands of the recipient firm or company.

**Taxability of shares issued at premium in excess of fair market value of shares**

Where a closely held company (other than a venture capital undertaking receiving receiving from a venture capital fund/company or from any other notified person to be notified by the Central Government) issues shares at premium to a resident for an amount in excess of the fair market value of the shares, then the excess will be deemed to be the income of the company. This is effective from 1 April 2013.

**Share premium in excess of fair market value to be treated as income**

Any amount received towards share application money, share premium, or share capital by any closely held company will be considered as income if the explanation offered by such company in relation to the source and nature of the amount so received is not satisfactory in the opinion of the tax officer. This is effective from 1 April 2013.

**Dividend income**

Dividend income received from Indian companies is not taxable in the hands of all the shareholders. This applies to resident as well as non-resident shareholders.

Income received by overseas financial organisations (offshore funds) from units of specified mutual funds, or from the Unit Trust of India, that is purchased in foreign currency, as well as interest received by non-residents on bonds issued abroad by Indian companies following in terms of government guidelines and acquired in foreign currency, are taxable at 10% on the gross amount of income. Dividends (other than those received from Indian companies) and interest earned by foreign financial institutions from investment in the Indian capital market are taxable at 20% on the gross amount.

Income received from units of specified mutual funds is not taxable in the hands of the recipient. The distributing mutual fund is liable to pay a distribution tax of 25% or 30% (plus surcharge, education cess, and secondary and higher education cess). The above tax is not chargeable in respect of income distributed by an equity-oriented fund in respect of distribution under such scheme.

Stock dividends (bonus shares) distributed are not taxed at the time of receipt in the hands of the recipient shareholders, but capital gains provisions are applicable to the sale of these stock dividends.

**Buyback of shares**

An additional tax is payable on transaction involving buyback of shares by unlisted companies from its shareholders. A tax at 20% is payable by the company on the difference of consideration paid on buyback and the issue price of shares. The buyback
India

consideration received will be tax exempt in the hands of the receiver. No tax credit will be allowed in case of such taxes paid either to the company or to the shareholder.

**Interest income**
Interest income received by a resident company is taxable at normal CIT rates. Interest income received by a non-resident company is taxed at a concessional rate of withholding at 20%, subject to conditions.

**Partnership/LLP income**
A partnership firm and an LLP are taxed as a separate legal entity. The share of income of partners from a partnership firm or an LLP is exempt from tax. The partnership and LLP is taxed at the rate of 30% (plus education cess and secondary and higher education cess).

The interest payment to the partner on the capital or current account is allowed as a tax deductible expenditure; however, the maximum interest allowable for tax purposes is 12% per annum. A working partner can be paid salary, bonus, commission, or remuneration. The maximum permissible deduction in respect of remuneration payable collectively to all working partners would be based on the book profit at a specified percentage for different quantum slabs of the book profit.

**Unrealised exchange gains/losses**
There are no specific rules under the tax law for determining the nature of unrealised foreign exchange gains or losses. However, there are various judicial precedents available that lay down certain principles for classification of foreign exchange gains or losses.

- Profit/loss is considered to be trading profit/loss if foreign currency is held on revenue account, as trading assets, or as a part of circulating capital invested in the business.
- Profit/loss is considered to be of a capital nature if a foreign currency loan is taken for a capital asset or fixed asset.

**Foreign income**
A resident company is taxed on its worldwide income. A non-resident company is taxed only on income that is received in India, or that accrues or arises, or is deemed to accrue or arise, in India. This income is subject to any favourable tax treaty provisions.

Double taxation of foreign income for residents is avoided through treaties that generally provide for the deduction of the lower of foreign tax, or Indian tax, on the doubly taxed income from tax payable in India. Similar relief is allowed unilaterally where no treaty exists, in which case a resident would be taxed at the rate that would be the lower of the Indian tax rates or the rate of the other country in which income is already taxed.

**Deductions**
Expenditures that are revenue in nature are, by and large, allowed as a deduction to businesses and professionals if they are:

- incurred wholly and exclusively for the purpose of the business
- not in the nature of a personal expense, and
- not in the nature of a capital expense.
Depreciation
Depreciable assets are grouped in blocks, and each block is eligible for depreciation at a prescribed rate (usually 15% to 100% for machinery, 5% to 100% for buildings, 10% for furniture, 15% for windmills, and 25% for intangible assets) on the opening value (net of depreciation charged in preceding years), plus cost of acquisition, less deletions, during the year. A deletion is the reduction by way of sale, discarding, demolition, or destruction of the assets and the amount realised is reduced.

Depreciation is restricted to 50% of the prescribed rate if the asset acquired is used for less than 180 days during the year of acquisition. If money receivable on the transfer exceeds the opening written-down value plus acquisitions of the block concerned, the excess is taxed as a short-term capital gain at the same tax rates as that applicable to business income.

Additional depreciation of 20% on the cost of new plant and machinery (other than ships or aircraft) is allowable in the year of commissioning for manufacture. This benefit is extended to power generating and distributing business. Power-generating or power-distributing companies have the option either to apply the reducing-balance method provided under the normal schedule or to charge depreciation on a straight-line basis. The straight-line rates are aligned to the power companies' book depreciation rates.

Know-how, patents, licences, franchises, and similar intangible assets form part of the block of depreciable assets, provided that they are owned and put to use in the course of their business and are eligible for depreciation at the prescribed rate, which is 25%.

Tax depreciation is not required to conform to book depreciation. However, an Accounting Standard requires companies to reconcile both and provide for deferred tax assets, liabilities, expenses, and incomes.

Investment allowance
An investment allowance benefit is allowed for companies engaged in the business of manufacturing articles or things. The benefit of deduction is allowed for investment made in ‘new’ plant and machinery acquired and installed during tax years 2013/14 and 2014/15. The aggregate investment during these years should be more than INR 1 billion. A deduction of 15% of the value of the investment made is allowed to the taxpayer. The assets have to be held for more than five years, and if the asset is sold before the period, the investment benefit claimed will be reversed in the year of sale.

Investment in new plant and machinery will not include assets like plant or machinery used earlier in or outside India, any plant or machinery installed in any office premises or in residential accommodation (or guest house), any office appliances (including computers or computer software), vehicle, ship, or aircraft.

Goodwill
The Indian Supreme Court has held recently that goodwill and commercial brand equity that are acquired in the course of amalgamation are intangible assets and entitled to depreciation.

Start-up expenses
Certain expenses are incurred by taxpayers either before the start-up of a business or after start-up of business, in connection with extension of the industrial undertaking, or in connection with setting-up a new unit. One fifth of such expenditure is allowed as a deduction each year, over a period of five years.
India

**Interest expenses**
Any interest paid by an assessee (taxpayer) on capital borrowed for the purposes of their business or profession is a tax-deductible expense. If the capital is borrowed for acquiring a capital asset for the purpose of extension of an existing business or profession, then interest liability pertaining to the period, until the time the asset is put to use, cannot be allowed as a tax-deductible expense and will have to be added back to the cost of such asset.

**Bad debts**
The amount of any bad debt, or part thereof, that has been written off as irrecoverable in the accounts of the assessee (taxpayer) for the year is allowed as a tax-deductible write-off.

**Charitable contributions**
Any charitable contribution made by a company to any charity is allowed as a tax-deductible expense. This is subject to certain conditions. The tax deductibility ranges from 50% to 100% of the charitable contribution, depending upon the nature of charity. The tax deductibility of charitable contributions is restricted to 10% of the total taxable income.

**Expenses allowable on actual payment basis**
Certain expenses, such as, but not limited to, employees’ provident fund dues (i.e. retirement benefit funds), bonus to employees, and interest payable to financial institutions and banks are allowed as tax deductible expenses only on actual payment. Tax disallowances are attracted if certain payments are delayed beyond their due dates under the respective laws.

**Bribes, kickbacks, illegal payments**
Expenditures incurred by a taxpayer that are illegal are deemed not to have been incurred for the purposes of the business or profession, and no deduction of such expenditure will be allowed.

**Fines and penalties**
Under the tax law, there are various procedural compliances (viz. audit of books of accounts, submission of tax returns, disclosure of particulars of income, etc.) that need to be complied with by taxpayers by the respective due dates prescribed therein. Non-compliance/delayed compliances of these procedures entitles interest and penal consequences. There are prosecution provisions as well for certain offences. Penalties and fines paid under the Income Tax Act are not deductible as business expenditure.

**Taxes**
All taxes (tax, duty, cess, or fees by whatever name called) relating to business (other than income tax and wealth tax) incurred during the tax year are deductible in that year, provided they are paid by the following 30 September. Otherwise, they are deductible in the year of payment.

**Net operating losses**
Losses can be carried forward and offset against income from subsequent year(s) for periods set out in the following table:

<table>
<thead>
<tr>
<th>Types of losses</th>
<th>Time limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unabsorbed depreciation</td>
<td>Perpetually</td>
</tr>
<tr>
<td>Other business losses (other than speculation business losses)</td>
<td>8 years</td>
</tr>
</tbody>
</table>
There are no provisions in India for carrying losses back.

**Payments to foreign affiliates**
Indian companies can claim deduction for payment of royalties, and for interest and fees for technical or management service provided by foreign affiliates, as long as they are not capital in nature, are incurred wholly and exclusively for the purpose of the business, and requisite tax is withheld from such payment. However, if the requisite tax is not withheld from such payment, or is not paid into the government treasury after withholding, a tax deduction of the payment is available in the year of payment of tax into the government treasury.

**Group taxation**
Group taxation is not permitted under the Indian tax law.

**Transfer pricing**
The Indian transfer pricing regulations stipulate that income arising from ‘international transactions’ between ‘associated enterprises’ should be computed at ‘arm’s-length price’. Furthermore, any allowance for expenses or interest arising from any international transaction is also to be determined at arm’s-length price. There is no concept of an arm’s-length range.

The expressions ‘international transactions’ and ‘associated enterprises’ have been defined in the Indian transfer pricing regulations. Various (presently five) methods for computation of arm’s-length price have been specified under the Indian transfer pricing regulations, which are broadly in line with the Organisation for Economic Co-operation and Development (OECD) Guidelines, and taxpayers are required to adopt the most appropriate method. Taxpayers are also required to maintain a comprehensive set of prescribed information and documents relating to international transactions that are undertaken between associated enterprises, on an annual basis, within the prescribed timelines (due date of filing the income tax return). Further, taxpayers are required to obtain an Accountant’s Report (in prescribed Form 3CEB) from an independent accountant certifying the nature and amount of international transactions. The certificate needs to be filed along with the income tax return. The burden of proving the arm’s-length character of the transaction is primarily on the taxpayer.

The Indian transfer pricing regulations adopt an arithmetic mean of comparable prices as the arm’s-length price, with a flexibility of the percentage that is notified by the Central Government as +/- 1% for wholesalers and +/- 3% for others. The term ‘wholesaler’ has not been clearly defined and is likely to cause some amount of litigation unless clarified.

Where the transfer pricing officer is of the opinion that the arm’s-length price was not applied, the officer may re-compute the taxable income after giving the taxpayer an opportunity to be heard. Stringent penalties are prescribed in cases of failure to comply with the provisions of the Indian transfer pricing regulations.
India

**Domestic transfer pricing**
Transfer pricing provisions also apply to specified domestic transactions effective from 1 April 2012 whereby any allowance or expenditure or interest on allocation of any cost or expense or any income in relation to any specified domestic transaction shall be computed having regard to the arm's-length price.

Only those cases where the aggregate of such transactions entered into by the assessee in the previous year exceeds a sum of INR 50 million are covered.

**Advance pricing agreements (APAs)**
The APA is an arrangement between the taxpayer and the tax authority covering future transactions, with a view to solve the potential transfer pricing disputes in a cooperative manner. APA provisions were introduced in India with effect from 1 July 2012 by the Finance Minister in the Union Budget 2012. The CBDT, by notification in the official gazette, has introduced detailed rules providing the procedures and necessary forms for application/administration of APAs.

The rules provide for constitution of an APA team (team), which shall consist of income tax authority and experts from economics, statistics, law, and other necessary fields. APAs can be applied for existing as well as proposed transactions.

In line with expectations, the rules have provided for both unilateral as well as bilateral/multilateral APAs. This is a welcome step since a unilateral APA may not be able to assure relief from double taxation to multinational enterprises (MNEs).

The government has shown an inclination towards bilateral APAs by questioning the taxpayer on reasons for filing a unilateral APA application in cases where double taxation agreements (DTAs) exist. However, in cases where a bilateral APA negotiated between competent authorities is not acceptable to the taxpayer, the taxpayer may, at its option, continue with the process of entering into a unilateral APA without benefit of a mutual agreement process.

While clarification on certain aspects will be required, the government has provided constructive rules primarily in line with the mature jurisdictions that will surely encourage MNEs to opt for the APA process.

The salient features of the procedure laid down for APAs are pre-filing consultation, application for APA, withdrawal of APA, defective application, procedure, compliances post APA, cancellations of APA, and revisions and renewal of APA.

**Thin capitalisation**
No prescribed debt-to-equity ratios or thin capitalisation rules exist under India taxation law.

**Controlled foreign companies (CFCs)**
India currently has no CFC rules, so there will be no India tax on foreign profits that remain unremitted from offshore subsidiaries.

**Tax credits and incentives**
Tax incentive provisions normally have conditions applicable for the period within which the preferred activity should be undertaken and the period for which the tax incentive is available. It may also be necessary to fulfil certain other conditions such as ‘forming’ of a ‘new’ undertaking.
**Tax incentives for undertakings other than infrastructure development undertakings**

New industrial undertakings located in specified ‘backward’ states and districts are entitled to full tax exemption of profits for the first three or five years of operation, followed by a partial tax exemption of 30% of profits for the next five years. The list of backward districts has been streamlined into category A and category B districts, depending upon the current level of infrastructure development in those areas. The initial tax holiday period is five years in the case of category A districts and three years in the case of category B districts. A similar incentive is also applicable for hotels satisfying prescribed conditions.

If certain conditions are met, a tax holiday is permitted on the profits of an undertaking engaged in any of the following:

- Integrated business of handling, storage, and transportation of food grains.
- Developing and building of housing project.
- Scientific research.
- Commercial production or refining of mineral oils.
- Setting up and operating a cold chain for agricultural produce.
- Processing, preservation, and packaging of fruits or vegetables.
- Operating and maintaining a hospital in a rural area.

The tax holiday periods range from five to ten years, and the percentage of the rebate is 30%, 50%, or 100% in initial years and 30% in the later years. The number of years constituting ‘initial’ and ‘later’ years varies from sector to sector.

**Tax incentives for infrastructure development undertakings**

Enterprises engaged in the business of power generation, transmission, or distribution; developing or operating and maintaining a notified infrastructure facility, industrial park, or SEZ; or in substantially renovating and modernising the existing network of transmission or distribution lines (between specified periods); or in laying and operating a cross-country natural gas distribution network are eligible for a tax exemption of 100% of profits for any ten consecutive years falling within the first 15 years of operation (20 years in the case of infrastructure projects, except for ports, airports, inland waterways, water supply projects, and navigational channels to the sea).

‘Infrastructure facility’ means roads, including toll roads, bridges, rail systems, highway projects, water supply projects, water treatment systems, irrigation projects, sanitation and sewerage systems or solid waste management systems, ports, airports, inland waterways, inland ports, or navigational channels to the sea.

**Tax incentives for exports**

The export profits from a new industrial undertaking satisfying prescribed conditions established in a Free Trade Zone (FTZ), Software Technology Park (STP), or Electronic Hardware Technology Park (EHTP), or a 100% export-oriented undertaking (EOU) or a unit in a SEZ are exempt from income tax for ten years, commencing from the first year of manufacture. However, this exemption is available only if the manufacturing activity commenced before the end of the tax year 2010/11.

The export profits from a new industrial undertaking satisfying the prescribed conditions established in an SEZ is eligible for tax exemption of 100% of profits for the first five years, from the year of commencement of manufacturing, followed by a partial tax exemption of 50% of profits for the next five years. A further tax exemption of 50%
of the profits for five years is also available after that, subject to an equal amount of profit being retained and transferred to a special reserve in the books of account.

**Tax incentives for units in the North Eastern Region of India**

Measures are in place to facilitate the development of the North Eastern Region of India and of the state of Sikkim. Undertakings located in these states that (i) begin to manufacture or produce any eligible article, (ii) undertake substantial expansion, or (iii) commence an eligible business between 1 April 2007 and 1 April 2017 are eligible for a 100% deduction of profits for ten consecutive years.

A list of eligible businesses has been provided by the Indian government. The eligible businesses include hotels (not below two-star category), adventure and leisure sports including ropeways, the provision of medical and health services in nursing homes with a minimum capacity of 25 beds, operating a vocational training institute for hotel management, catering and food crafts, entrepreneurship development, nursing and para-medical training, civil aviation related training, fashion design and industrial training, running an information technology related training centre, manufacturing of information technology hardware, and bio-technology. Businesses other than the above listed eligible businesses are not entitled to claim the tax holiday.

**Tax incentives for hotels/convention centres located in specified districts**

A tax holiday of five years is provided to hotels (two, three, or four star) and convention centres located in the National Capital Territory of Delhi and the districts of Faridabad, Gurgaon, Gautam Budh Nagar, and Ghaziabad, provided the date the hotel began functioning or construction of convention centre was completed was by 31 July 2010. Hotels located in a specified district having a World Heritage Site, if such a hotel is constructed and has started functioning at any time during the period 1 April 2008 to 31 March 2013, are eligible for a tax holiday for a period of five years.

**Tax incentives for certain income relating to offshore banking units and international financial services centre**

A scheduled bank, or any bank incorporated by or under the laws of a country outside India, that has an offshore banking unit in an SEZ or an international financial services centre with a specified income that is subject to prescribed conditions is eligible for a tax exemption of 100% of the specified income for five consecutive years beginning from the year in which the permission under the Indian Banking Regulation Act, 1949 was obtained and for 50% of the specified income for five consecutive years.

**Tax incentive of capital expenditure on certain specified businesses**

Capital expenditure is allowed at 100% in respect of the following specified businesses:

- Setting up and operating cold chain facilities.
- Setting up and operating warehousing facilities for storage of agriculture produce.
- Setting up and operating an inland container depot, freight station, or warehousing facility for storage of sugar and beekeeping and honey and beeswax produce.
- Laying and operating a cross-country natural gas or crude or petroleum oil pipeline network for distribution, including storage facilities being an integral part of such a network.
- Building and operating a hotel of two-star or above category in India.
- Building and operating a hospital with at least 100 beds.
- Developing and building a housing project under a scheme for slum redevelopment or rehabilitation framed by the government.
• Developing and building specified housing projects under an affordable scheme of the central/state government.
• Investing in a new plant or newly installed capacity in an existing plant for production of fertiliser.

In case of certain specified businesses (commencing operations on or after 1 April 2012), such as cold chain facility, warehousing for agriculture produce, hospital with at least 100 beds, notified affordable housing projects and production of fertilizer, the deduction is 150% of capital expenditure incurred on or after 1 April 2012.

The following characteristics and conditions may be noted:

• Any sum received or receivable in cash or in kind on transfer, etc. of the capital asset shall be considered as business income if expenditure on such an asset has been allowed as a deduction under this section.
• Any loss computed in respect of the above specified businesses shall be allowed to be offset or carried forward and offset only against the profits and gains of specified businesses.
• The specified business should:
  • not be set up by splitting up or reconstruction of a business already in existence
  • not be set up by transfer of used machinery or plant exceeding 20% of the total value of the machinery or plant used in such business, and
  • have been approved by the prescribed authority (i.e. the government).

**Research and development (R&D) expenditure**
The weighted deduction available in respect of expenditure incurred on scientific research in an in-house R&D facility approved by the prescribed authority has been increased from 150% to 200% for companies engaged in specified businesses.

A payment made to an approved research association undertaking research in social science or statistical research or to an Indian company to be used by it for scientific research is now eligible for a weighted deduction of 125% of the payment made.

Contributions made to the National Laboratory, approved scientific research associations, universities, and the Indian Institute of Technology are 200% deductible.

**Foreign tax credit**
See Foreign income in the Income determination section for a description of the foreign tax credit regime.

**Withholding taxes**
There is an obligation on the payer (either resident or non-resident) of income to withhold tax when certain specified payments are credited and/or paid. Some of the expenses that require tax withholding are as follows.

**Payments by resident companies**

<table>
<thead>
<tr>
<th>Nature of payment</th>
<th>Payment threshold for WHT (INR)</th>
<th>WHT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Specified type of interest</td>
<td>None</td>
<td>10</td>
</tr>
<tr>
<td>Non-specified type of interest</td>
<td>5,000 (2)</td>
<td>20</td>
</tr>
</tbody>
</table>
## India

<td></td>
</tr>
<tr>
<td>Royalty or fees for technical services</td>
<td>30,000</td>
<td>10</td>
</tr>
</tbody>
</table>

### Notes

1. Payments have different threshold limits. The payer is only required to withhold tax if the payment is above the limit.
2. The threshold limit for WHT for non-specified type of interest is INR 5,000, except in the case of interest received from a bank, co-operative society, or deposit with post office, for which it is INR 10,000.

If the Permanent Account Number (PAN) of the deductee is not quoted, the rate of WHT will be the rate specified in relevant provisions of the Income Tax Act, the rates in force, or the rate of 20%, whichever is higher.

The definition of ‘royalty’ also includes consideration for use of or right to use computer software. Transfer of all or any rights in respect of any right, property, or information includes transfer of all or any right to use computer software (including granting of a licence), irrespective of the medium through which such a right is transferred.

Hence, while applying WHT on such payments in the nature of royalty, one will need to consider the definition of royalty as amended by the Budget 2012 with retrospective effect from 1 June 1976.

### Payment to non-resident companies

### Notes

- Percentage to be increased by a surcharge, education cess, and secondary and higher education cess to compute the effective rate of tax withholding.
- Income from units of specified mutual funds is exempt from tax in the hands of the unit-holders.
- Dividends received from Indian companies are tax-free in the hands of the shareholder.
India

- Short-term capital gains on transfer of shares of a company or units of an equity-oriented fund would be taxable at 15% if they have been subjected to STT.
- Long-term capital gains on transfer of shares (through stock exchange) in listed companies or units of an equity-oriented fund are exempt from tax if they have been subjected to STT.
- There is no threshold applicable for payment to non-residents companies up to which no tax is required to be withheld.
- If the PAN of the deductee is not quoted, the rate of WHT will be the rate specified in relevant provisions of the Income Tax Act, the rates in force, or the rate of 20%, whichever is higher.

**Treaty rates**

Some tax treaties provide for lower WHT rates from certain types of income, as follows:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>Dividend (1)</th>
<th>Interest</th>
<th>Royalty (12)</th>
<th>Fee for technical services (12)</th>

The treaty tax rates on dividends are not relevant since, under the current Indian tax legislation, most dividend income from Indian companies that is subject to DDT is exempt from income tax in the hands of the recipient.

10% for equipment rental and ancillary services:
- for other cases in the first five years: 15% if government or specified organisation is the payer and 20% for other payers.
- for subsequent years: 15% in all cases (income of government organisations is exempt from taxation in the country of source).

If at least 10% of capital is owned by the beneficial owner (company) of the company paying the dividend or interest.

If at least 20% of capital is owned by the beneficial owner (company) of the company paying dividend or interest.

In absence of specific provision, it may be treated as business profits or independent personal services under respective treaties, whichever is applicable.

The ‘most favoured nation’ clause is applicable. The protocol to the treaty limits the scope and rate of taxation to that specified in similar articles in treaties signed by India with an OECD or another country.

If royalty relates to copyrights of literary, artistic, or scientific work.

If the company paying the dividend is engaged in an industrial undertaking.

If at least 25% of capital is owned by the beneficial owner (company) of the company paying the dividend.

If interest is received by a financial institution.

The tax rate for royalties and fees for technical services, under the domestic tax laws, is 10%. This rate is to be increased by a surcharge at 2.5% on the income tax and education cess at 2% and secondary and higher secondary education cess at 1% on the income tax including surcharge. As a consequence, the effective tax rate is 10.558%. This rate applies for payments made under an agreement entered into on or after 1 June 2005. Accordingly, a tax resident can either use the treaty rate or domestic tax rate, whichever is more beneficial.

If interest payments arise from the use or right to use trademarks.

### List of limited agreements between India and other countries

A list of the countries with which India has entered into limited agreements for double taxation relief with respect to income of airlines/merchant shipping, is given here.

</table>

**Tax administration**

**Taxable period**

For India, the tax year ends on 31 March. Taxpayers can follow any accounting year, provided they file a set of audited results approved by its Board for the tax year ending 31 March.

**Tax returns**

Accounts for tax purposes must be made up to 31 March. The electronic return of income is required to be filed by 30 September of the succeeding tax year.

**Quarterly withholding tax returns**

Quarterly statement of taxes withheld are to be filed electronically with the tax authorities on or before 15 July, 15 October, and 15 January for the first three calendar quarters of the tax year and on or before 15 May following the last calendar quarter of the tax year.

**Obligation to submit tax return for assets located outside India**

A resident taxpayer having any asset (including financial interest in any entity) located outside India or signing authority in any account located outside India is mandatorily required to furnish a tax return.
In cases where taxpayers have assets outside India, the extant time limits of four and six years for reopening tax assessment (where income has escaped assessment) has been increased to 16 years. In case of a person who is treated as an agent of a non-resident, the time limit for issuing reassessment notice has been extended from two years to six years.

**General Anti Avoidance Rule (GAAR)**
The provisions relating to GAAR were proposed in Budget 2012. They were based on the recommendations of Dr. Parthasarathi Shome's Committee. The Budget 2012 has considered most of this committee's recommendations and has extended the applicability of GAAR provisions to be effective from 1 April 2016. The provisions empower the tax department to declare an 'arrangement' entered into by an assessee to be an 'Impermissible Avoidance Agreement' (IAA). The consequence of which will be denial of tax benefit either under the provisions of the Act or under the tax treaty. The provisions can be invoked for any step in or part of any arrangement entered and that arrangement or step may be declared as an IAA. The provisions would attract only where the main purpose is to obtain tax benefit. Recently, the Central Government filed a review petition before the Supreme Court in the context of an Andhra Pradesh High Court decision (Sanofi Pasteur Holdings), requesting it to constitute a seven-member bench and revisit the very concept of tax avoidance and tax planning, as laid down in three of its earlier decisions ( McDowell & Co, Azadi Bachao Andolan and Vodafone Holdings). If this does come to pass, such a decision may materially affect the GAAR provisions as proposed.

**Payment of tax**
Tax is payable in advance (if tax for the year exceeds INR 10,000) in specified instalments for every quarter, before the 15th day of the succeeding month, during the tax year (April to March) in respect of the income of the tax year ending 31 March. Any balance of tax due on the basis of the return must be paid on a self-assessment basis before the return is filed. A tax return will be treated as defective if the tax liability along with interest is not paid on or before the date of submission of the tax return.

**Tax audit process**

**Audit for income tax purposes**
Persons carrying on business are required to get their books of account audited for income tax purposes where the turnover is INR 10 million. For persons carrying on a profession, the turnover threshold is INR 2.5 million. The penalty for non-compliance with this audit requirement is INR 0.15 million, subject to 1% of total turnover/gross receipts.

**Special audit**
Tax authorities, at any stage of proceedings, having regard to nature, complexity, and volume of accounts or doubts on correctness of accounts or other reasons, may, after taking necessary approval of Chief Commissioner, direct the assessee to get one’s accounts audited and to furnish the report.

**Statute of limitations**
The statute of limitations under the Income Tax Act, 1961 in the case of submission of returns, assessment of returns, and reassessment of returns is four years from the end of the relevant tax year.
India

**Topics of focus for tax authorities**
WHT provisions and their applicability to cross-border deals are a topic of great current interest to tax authorities. Transfer pricing is another area that is witnessing increased attention by tax authorities in recent years.

**Other issues**

**Mergers and acquisitions**
The expression ‘merger’ has not been defined in the Income Tax Act but has been covered as part of the definition of the term ‘amalgamation’. Amalgamation is defined as a merger of one or more companies with another, or the merger of two or more companies to form a new company, in such a way that all the assets and liabilities of the amalgamating company or companies become the assets and liabilities of the amalgamated company, and held by the amalgamated company for a minimum period of five years, and shareholders holding not less than 75% in value of the shares in the amalgamating company or companies become shareholders of the amalgamated company.

**Capital gains**
No capital gains tax is levied on the transfer of capital assets by an amalgamating company to the amalgamated company, provided the amalgamated company is an Indian company. Similar is the position in case of a demerger by a demerged company to a resulting company.

In cases where shares of an Indian company are transferred by a foreign company or a demerged foreign company to any another foreign company or resulting foreign company, there is no tax payable, provided it satisfies certain specified conditions. Furthermore, the shareholder of the amalgamating company or demerged company is not liable to pay capital gains tax on the exchange of shares with that of the amalgamating company or the resulting company under the scheme of amalgamation.

**Carryforward of accumulated losses of amalgamating company**
The losses and unabsorbed depreciation of the amalgamating company are deemed to be those of the amalgamated company in the year in which the amalgamation takes place, provided it satisfies certain specified conditions.

In the case of amalgamation of a company owning an industrial undertaking, the amalgamated company shall achieve the level of production of at least 50% of the installed capacity of the undertaking before the end of four years from the date of amalgamation and continue to maintain the minimum level of production till the end of five years from the date of amalgamation. If these conditions are violated, the benefit claimed will be taxed in the hands of the amalgamated company in the year of default.

In case of demerger of a company, the accumulated losses or unabsorbed depreciation of the demerged company directly relatable to the undertaking or the division transferred is allowed to be carried forward and offset in the hands of the resulting company.
Significant developments

The Minister of Finance (MoF) issued a regulation in September 2012 to provide more clarity and detailed procedures in applying for the tax facilities (see the Tax credits and incentives section for more information).

The Indonesian government is still committed to continuing the reform of the tax administration, with the aim of increasing taxpayer compliance through efficiency and effectiveness measures at the Indonesian Tax Office (ITO) and improving good governance in the tax administration by strengthening transparency and accountability. In this regard, over the past 12 months the government has issued several regulations that include, among others, amendments to tax administration regulations, more clarification on the application of income tax concessions, improvement in the value-added tax (VAT) compliance system, and preferential import duty rates under free trade agreements.

In 2013, Indonesia also increased the number of its double taxation agreements (DTAs) through the enforcement of tax treaties with Hong Kong, Croatia, and Morocco.

Since Indonesia is largely a self-assessment tax environment, enforcement remains a priority of the tax authorities; consequently, the ITO continues its efforts in combating abuse by targeting tax audits on certain industries and high-wealth individuals, while transfer pricing audits are also on the increase and a primary area of concern for multi-nationals.

Taxes on corporate income

Taxable business profits are calculated on the basis of normal accounting principles as modified by certain tax adjustments. Generally, a deduction is allowed for all expenditures incurred to obtain, collect, and maintain taxable business profits. A timing difference may arise if an expenditure recorded as an expense for accounting cannot be immediately claimed as a deduction for tax (see the Deductions section).

Resident corporations are taxed based on worldwide income. A foreign company carrying out business activities through a permanent establishment (PE) in Indonesia will generally be required to assume the same tax obligations as a resident taxpayer.

Resident taxpayers and Indonesian PEs of foreign companies have to settle their tax liabilities either by direct payments, third party withholdings, or a combination of both. Foreign companies without a PE in Indonesia have to settle their tax liabilities for their Indonesian-sourced income through withholding of the tax by the Indonesian party paying the income.
Corporation income tax (CIT) rates
A flat CIT rate of 25% applies to net taxable income.

Public company discount
Public companies that satisfy a minimum listing requirement of 40% and certain other conditions are entitled to a tax discount of 5% off the standard rate, providing an effective tax rate of 20%.

Small company discount
Small enterprises (i.e. corporate taxpayers with an annual turnover of not more than 50 billion Indonesian rupiah [IDR]) are entitled to a 50% tax discount of the standard rate, which is imposed proportionally on taxable income on the part of gross turnover up to IDR 4.8 billion.

Final income tax
Certain types of income are subject to a final income tax at a specified percentage of the gross amount of income, without regard to any attributable expenses.

Resident companies, PEs, representatives of foreign companies, organisations, and appointed individuals are required to withhold the above final tax from the gross payments to resident taxpayers and PEs.

Special industries and activities
Companies engaged in upstream oil and gas and geothermal industries typically have to calculate CIT in accordance with their production sharing contracts (PSCs). Certain companies engaged in metal, mineral, and coal mining are governed by a contract of work (CoW) for the income tax calculation. Different provisions may apply to them, pertaining to corporate tax rates, deductible expenses, and how to calculate taxable income.

Note that such contractual-based concessions are no longer available to new mining projects since the enactment of the Mining Law in 2009. The Mining Law stipulates that general prevailing tax laws/regulations apply to mining projects; consequently, any tax facilities should be provided accordingly, except as otherwise stated in a particular mining licence.
Local income taxes
There are no local taxes on income in Indonesia. For a list of other local taxes, see Regional taxes in the Other taxes section.

Corporate residence
A company is treated as a resident of Indonesia for tax purposes by virtue of having its establishment or its place of management in Indonesia.

Permanent establishment (PE)
Under the Income Tax Law, a non-resident company may be treated as having a taxable presence if it runs a business or conducts activities in Indonesia, which can be in the form of:

• a place of management
• a branch of the company
• a representative office
• an office building
• a factory
• a workshop
• a warehouse
• a room for promotion and selling
• a mining and extraction of natural resources
• a mining working area for oil and natural gas
• a fishery, animal husbandry, agriculture, plantation, or forestry location
• a project of construction, installation, or assembly
• the furnishing of services in whatever form by employees or other person, insofar conducted not more than 60 days within a 12-month period
• a person or corporation acting as a dependent agent
• an agent or employee of an insurance company that is not established and domiciled in Indonesia that receives insurance premiums or insures risk in Indonesia, and
• the computers, electronic agent, or automated equipment owned, leased, or used by an electronic transactions provider to conduct business via the internet.

Where the non-resident company is resident in a country that has a tax treaty with Indonesia, the rules on a PE creation may be changed; usually there is a longer ‘time test’ for certain activities performed in Indonesia.

Other taxes

Value-added tax (VAT)
With a few exceptions, VAT is applicable on deliveries (sales) of goods and services within Indonesia at a rate of 10%. VAT on export of goods is zero-rated while the import of goods is subject to VAT at a rate of 10%. Zero-rated VAT is also applicable on exported services, but subject to a MoF limitation. Currently, only certain exported services, including toll manufacturing services, are subject to the 0% VAT rate. Services performed within the Customs Area for customers outside of the Customs Area are considered as locally delivered and are therefore subject to the regular VAT rate of 10%. Inbound use or consumption of foreign services or intangible goods, with a few exceptions, is also subject to a self-assessed VAT at a rate of 10%.
Indonesia

The VAT law allows the government to change the VAT rate within the range of 5% to 15%. However, since the enactment of the VAT law in 1984, the government has never changed the VAT rate.

In general, VAT collection is based on the accrual principle, whereby VAT must be collected at the time of delivery of taxable goods or services. The term delivery, in this case, is defined as the time when risk and ownership of goods have been transferred or when income from a service delivery can be reliably estimated or measured. In the accrual system, income or receivables are acknowledged when a transaction takes place, regardless of whether the transaction has been paid for or not. The recognition of revenue or receivables is indicated by the issue of a commercial invoice, which is a source document for this recognition and a basis for recording it.

VAT filing is done on a monthly basis, with payment and filing being due no later than the last day of the month following the taxable delivery.

**Luxury-goods sales tax (LST)**

In addition to VAT, some goods (e.g., certain household appliances, sport equipment, motor vehicles, luxury residences, alcoholic beverages) are subject to LST upon import or delivery by the manufacturer to another party at rates currently ranging from 10% to 75%.

**Import duty**

Import duty is payable at rates from 0% to 150% on the customs value of imported goods. Customs value is calculated on the cost, insurance, and freight (CIF) level.

As a commitment to liberalising trade, the Indonesian government is progressively lowering import duty rates on most products. Higher duty rates remain to protect certain industries and goods regarded as sensitive for security or social and cultural reasons.

**Duty relief/exemption/deferral**

The Indonesian government offers duty relief, duty exemption, and duty deferral concessions to foreign and domestic investors in order to promote the development of local and export industries. Such concessions include the **Badan Koordinasi Penanaman Modal** (BKPM) Masterlist, Bonded Zone, Bonded Warehouse, import duty exemption and drawback for exports, Free Trade Zone (FTZ) in Batam, Bintan, and Karimun,
Association of Southeast Asian Nations (ASEAN) duty rates, Free Trade Area (FTA) agreement duty rates, and MITA (main partners) lanes.

**Land and building tax**

Land and buildings tax (Pajak Bumi dan Bangunan or PBB) has been historically governed under PBB Law as a national tax. However, PBB has been made a part of regional taxes, which are governed under Regional Taxes and Retribution (Pajak Daerah dan Retribusi Daerah or PDRD) Law. As a transition, PBB Law is still applicable until 31 December 2013 as long as no replacement regional government regulation (Peraturan Daerah or PERDA) is issued. In the case a PERDA has been issued, the tax rates applicable are the rates stipulated by the PERDA. As of today, most of the regional governments in Indonesia have issued a PERDA regarding PBB.

The scope of PBB under PDRD Law covers all land and building except for forestry, plantation, and mining areas, which are governed by separate regulations.

Under PBB Law, the PBB rate is specified at 0.5%. The actual tax due on a particular object is calculated by applying the tax rate to the taxable sale value (Nilai Jual Kena Pajak or NJKP) of the object. NJKP is a predetermined proportion of the sale value of the tax object (Nilai Jual Objek Pajak or NJOP) of a particular land and building. NJKP is currently stipulated to be either 20% (for NJOP up to IDR 1 billion) or 40% (for NJOP above IDR 1 billion). The government can increase the NJKP rate by up to 100% of the NJOP. As a result, the effective PBB at present is either 0.1% or 0.2% of the NJOP. Each taxpayer is entitled to a non-taxable NJOP, which at present is set at a maximum of IDR 24 million.

Under PDRD Law, the PBB rate is maximum 0.3% and the tax due is calculated by applying the tax rate on NJOP deducted by non-taxable NJOP. The non-taxable NJOP is set at minimum of IDR 10 million. Any changes are to be made by issuing a PERDA.

**Tax on land and building transfer**

A transfer of land and building will cause income tax on the deemed gain on the transfer/sale to be charged to the transferor/seller. The tax is set at 5% of the gross transfer value or the government-determined value, whichever is greater (see *Final income tax in the Taxes on corporate income section*).

**Duty on the acquisition of land and building rights**

In a land and building transfer, the acquirer is liable for duty on the acquisition of land and building rights (Bea Pengalihan Hak atas Tanah dan Bangunan or BPHTB) at a maximum of 5% of the greater of the transaction value or the government-determined value. Similar to PBB, BPHTB has been made a part of regional taxes; consequently, regional governments are required to issue a PERDA accordingly. As of today, all regional governments in Indonesia have administered the collection of BPHTB through the issue of relevant PERDAs.

**Stamp duty**

Stamp duty is nominal and payable as a fixed amount of either IDR 6,000 or IDR 3,000 on certain documents.

**Regional taxes**

A corporate taxpayer may be liable for a number of regional taxes and retributions. The rates range from 1.5% to 35% of a wide number of reference values determined by the relevant regional governments. The following are regional taxes, other than PBB and BPHTB, that may apply:
Indonesia

- Motor vehicle tax.
- Motor vehicle ownership transfer fee.
- Motor vehicle fuel tax.
- Surface water tax.
- Cigarette tax.
- Hotel tax.
- Restaurant tax.
- Entertainment tax.
- Advertisement tax.
- Road illumination tax.
- Non-metal and rock minerals tax.
- Parking tax.
- Ground water tax.
- Swallow-nest tax.

**Jamsostek**

Employers are held responsible for ascertaining that their employees are covered by *Jamsostek* (workers social security program), which provides compensation in the event of working accidents, deaths, and old age (55 years) as well as sickness or hospitalisation. The program calls for premium contributions from both the employers and the employees. Employees’ contributions are collected through payroll deductions. The premium contributions are calculated as a percentage of regular salaries/wages, ranging from 0.24% to 3%.

**Branch income**

Branch profits are subject to the ordinary CIT rate of 25%. The after-tax profits are subject to a withholding tax (WHT) (i.e. branch profits tax or BPT) at 20%, regardless of whether the profits are remitted to the home country. However, a concessional WHT rate may be applicable where a tax treaty is in force (see the Withholding taxes section for more information). The BPT may be exempt if the profits are entirely reinvested in Indonesia (see the Tax credits and incentives section for more information).

**Income determination**

**Inventory valuation**

Inventories must be measured at cost by using either the average or first in first out (FIFO) method. Once a costing method is adopted, it must be applied consistently.

**Capital gains**

Capital gains are generally assessable together with ordinary income and subject to tax at the standard CIT rate. However, gains from the transfer of land and buildings are not subject to regular CIT but rather are subject to final income tax at a rate of 5% of the transaction value or the government-determined value, whichever is higher.

The proceeds from sales of shares listed on the Indonesian stock exchange are not subject to normal CIT. Instead, the proceeds are subject only to a final WHT of 0.1% of the gross sales consideration. An additional tax of 0.5% applies to the share value of founder shares at the time an initial public offering takes place, irrespective of whether the shares are held or sold. Shareholders may elect not to pay this tax, in which case the actual gain will be subject to normal tax at the time the shares are sold.
**Dividend income**
In principle, dividend income received by a resident taxpayer from a limited liability company (generally referred to as a *Perseroan Terbatas* or PT) is taxable as ordinary income for the taxpayer receiving the dividend. However, if the dividend recipient is a PT with a minimum shareholding of 25% in the company paying the dividend and the dividend is paid out of retained earnings, it is exempt from CIT.

Where the recipient is not resident in Indonesia, a WHT rate of 20% applies, subject to variation by tax treaties (see the Withholding taxes section for more information).

The same rules apply to stock dividends (bonus shares), including dividends paid out of share premium (agio).

**Interest income**
Interest income on time or saving deposits and on Bank of Indonesia Certificates (SBIs) received by a resident company or a PE is taxed at a final tax rate of 20%.

**Exchange gains and losses**
Gains and losses arising from currency fluctuations are generally recognised on an accrual basis in accordance with the prevailing Indonesian Accounting Standards, which resemble International Accounting Standards in most respects.

**Foreign income**
Foreign branch income of an Indonesian company must be accounted for as Indonesian taxable income under the controlled foreign companies (CFCs) regulation. These rules apply to Indonesian tax residents owning at least 50% of the paid-up capital (shares) in a CFC. The rules make no reference to such terms as tax avoidance or tax evasion and therefore apply even if the CFC is domiciled in a non-tax haven country. The only situation in which the rules do not apply is when the CFC’s shares are listed on a recognised stock exchange. In very broad terms, under the CFC rules, the Indonesian shareholder of the CFC is deemed to receive a dividend with respect to the CFC profits based on a shareholding proportional calculation.

**Deductions**
In general, expenses incurred in the ordinary course of business (to obtain, collect, and maintain taxable income) are deductible, subject to the requirements for documentary support.

Note that expenses relating to gross income subject to final income tax are not deductible for CIT purposes.

**Depreciation, amortisation, and depletion**
Depreciable/amortisable assets include both tangible and intangible property or costs, including the cost of extending building use rights, rights for business use, rights for use, and goodwill, with a useful life of more than one year, except land that is owned and used in business. Depreciation and amortisation may be calculated under the straight-line method or the declining-balance method on an individual asset basis. Once a method is chosen, it should be applied consistently. In calculating depreciation, depreciable assets are divided into the following classes:
Depreciation/amortisation rate (%)

<table>
<thead>
<tr>
<th>Class</th>
<th>Straight-line method</th>
<th>Declining-balance method</th>
</tr>
</thead>
<tbody>
<tr>
<td>Property</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Useful life of four years</td>
<td>25</td>
<td>50</td>
</tr>
<tr>
<td>Useful life of eight years</td>
<td>12.5</td>
<td>25</td>
</tr>
<tr>
<td>Useful life of 16 years</td>
<td>6.25</td>
<td>12.5</td>
</tr>
<tr>
<td>Useful life of 20 years</td>
<td>5</td>
<td>10</td>
</tr>
<tr>
<td>Buildings</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Permanent</td>
<td>5</td>
<td>-</td>
</tr>
<tr>
<td>Non-permanent</td>
<td>10</td>
<td>-</td>
</tr>
</tbody>
</table>

Special rules apply for assets used in certain business fields and/or certain areas. Tax depreciation need not conform to book depreciation.

The costs incurred for acquiring rights, with a beneficial life of more than one year, for mining, oil, and natural gas concessions; forest concessions; and other rights to exploit natural resources should be amortised by the production-unit method. Except for the right to acquire oil and natural gas concessions, the depletion rate used should not exceed 20% per annum.

**Organisational and start-up expenses**

The costs of incorporation and expansion of the capital of an enterprise are claimed in full in the year in which the expenditure is incurred or are amortised using either the declining-balance or straight-line method at the above rates.

Costs incurred before the commencement of commercial operations with a useful life of longer than one year are capitalised and amortised according to the above rates.

**Interest expense**

Interest incurred in the ordinary course of business is deductible as long as the related loan is used for business purposes.

Interest on loans relating to time deposits (which income is subject to a final tax) is not deductible.

Interest on loans used to buy shares where dividends to be received are not subject to income tax is also not deductible.

**Bad debts**

Uncollectible debts are deductible for tax purposes, with the following conditions:

- The creditor has recognised the amount of uncollectible receivables as expenses in the commercial income statement.
- The taxpayer must submit a list of uncollectible account receivables to the Directorate General of Tax.
- A legal case to enforce collection has been brought to a District Court or government agency that handles state receivables, there is a written agreement on cancellation of receivables/debt release and discharge between the concerned creditor and debtor, it has been publicised in a general or a special publication, or the debtor has otherwise acknowledged that his/her debts have been cancelled.
Charitable contributions
Donations for national disasters, education facilities, sport development, and social infrastructures, with certain conditions, may be deductible in the fiscal year when the donations are provided.

Benefits in kind
Most benefits received in kind by employees, such as free housing, are not tax-deductible to the entity providing the benefit. Free motor vehicle and telephone expenses, including depreciation, are tax-deductible but only for 50% of the total expenses incurred. Expenses for meals and transportation made available to all staff are tax-deductible. Apart from these, certain benefits in kind (e.g. housing provided in remote areas as designated by the MoF, Integrated Economic Development Areas as designated by Presidential Decree) can also be claimed as tax-deductible expenses.

Fines and penalties
Fines, penalties, and interest on underpayment of taxes are not deductible.

Taxes
Land and buildings tax and regional taxes may be deducted from taxable income. With several exceptions, input VAT is also deductible against taxable income as long as it is not claimed as a credit against output VAT.

Net operating losses
Losses may be carried forward for a maximum period of five years. Carrying back of losses is not permitted. Offsetting losses within a corporate group is not permitted.

Payments to foreign affiliates
WHT is applied as a final tax on the recipient for payments of royalties, interest, and service fees to foreign non-resident companies. Excessive and non-arm’s-length payments to related parties are disallowed as deductions. The tax law denies deductions for all payments from a branch to its head office for royalties, interest, and services provided by the head office (exceptions apply for loans between bank branches and their head offices).

Group taxation
Consolidated returns are not allowed in Indonesia.

Transfer pricing
Transactions between related parties must be consistent with the arm’s-length principle. If the arm’s-length principle is not followed, the Director General of Tax (DGT) is authorised to recalculate the taxable income or deductible costs arising from such transactions applying the arm’s-length principle.

Under the General Tax Provisions Law, the government requires specific transfer pricing documentation to prove the arm’s-length nature of related-party transactions.

Detailed transfer pricing disclosures are required in the CIT return, which include the following:

• The nature and value of transactions with related parties.
• The transfer pricing methods applied to those transactions and the rationale for selecting the methods.
Indonesia

- Whether the company has prepared transfer pricing documentation.

Transfer pricing disputes may be resolved through the domestic objection and appeal process, or, where the dispute involves a transaction with a related party in a country that is one of Indonesia's tax treaty partners, the parties may request double tax relief under the Mutual Agreement Procedures (MAP) article of the relevant tax treaty. Taxpayers may apply for a MAP and continue the domestic dispute resolution process at the same time. A MAP application shall be discontinued if an appeal decision is declared by the Tax Court prior to the finalisation of the MAP.

The tax law authorises the DGT to enter into Advance Pricing Agreements (APAs) with taxpayers and/or another tax country's tax authority on the future application of the arm's-length principle to transactions between related parties. The process may or may not involve cooperation with foreign tax authorities. Once agreed, an APA will typically be valid for a maximum of three tax years after the tax year in which the APA is agreed. The APA can also be applied to tax years before it was agreed if certain conditions are met, such as the tax year has not been audited and there is no indication of tax crime. However, the rollback of an APA to prior years is not automatic and will be subject to agreement between the taxpayer and the DGT.

**Increase in transfer pricing focused investigations**

The number of tax audits with transfer pricing as the key focus area has significantly increased following the issuance of new regulations relating to transfer pricing. Transactions under particularly close scrutiny include payments of royalties and technical or management services fees, inter-company services, royalty and financing transactions, and exports to related parties.

Where a taxpayer has no documentation available to substantiate these transactions, there is a high risk that deductions for the payments will be denied in full. In this regard, the 30-day time limit within which a taxpayer must produce any documentation requested by the ITO during an audit is being strictly enforced. Any documentation provided after the 30-day time limit is being disregarded by the ITO in its decision making process.

Several transfer pricing specific audits have been conducted by the ITO for the past year. The ITO will identify high priority targets for transfer pricing specific audits based on:

- profit performance of the company (companies that have incurred consistent losses will be the highest priority, but there is also a risk of being selected for companies with profits below industry norms) and
- materiality of the company's related party transactions.

In addition to transfer pricing audit activity, the ITO has also issued questionnaires to several taxpayers who are not under an audit that focus primarily on transfer pricing issues. It is possible that the information gathered by the ITO from these questionnaires will lead to follow-up investigations or audits in some cases.

**Thin capitalisation**

The MoF is authorised to make a determination on an appropriate ratio of debt to equity. Under the law, debt between related parties may be re-characterised as equity, thus giving rise to the disallowance of a tax deduction for related costs. However, the MoF has not yet issued a ruling on these matters.
Controlled foreign companies (CFCs)
See Foreign income in the Income determination section for a description of the CFC regime.

Tax credits and incentives

Foreign tax credit
Tax paid or payable in foreign countries upon income from abroad received or obtained by a resident taxpayer may be credited against tax payable in Indonesia in the same fiscal year.

The amount of tax credit is the same amount as income tax paid or payable abroad, but shall not exceed tax payable calculated according to the Indonesian tax law.

Tax holiday
Several companies have recently been granted tax facilities by the government in the form of a CIT exemption or reduction for a period of five to ten years from the start of commercial production. After the end of the CIT exemption, the company will receive a 50% CIT reduction for two years. These facilities are provided to firms in pioneer industries that have a wide range of connections, provide additional value and high externalities, introduce new technologies, and have strategic value for the national economy. Currently, five business sectors may enjoy the tax holiday: base metals, oil refinery and/or base organic chemicals sourced from oil and gas, renewable energy, machinery, and telecommunication.

To be eligible for the above facilities, taxpayers should be newly incorporated in Indonesia no earlier than 14 August 2010, should have a legalised new capital investment plan of a minimum IDR 1 trillion, should deposit a minimum of 10% of their planned investment value in banks located in Indonesia, and should not withdraw the deposit prior to the realisation of the investment plan.

An application must be submitted to the Minister of Industry (MoI) or to the BKPM Chairman. A proposal for the MoF’s approval will be made by the MoI or the BKPM Chairman after carrying out research on the applicant. Tax holiday proposals must be submitted to the MoF by 15 August 2014.

If the facilities are granted, taxpayers should submit periodic reports on the realisation of their investment plans and the use of their funds deposited in the Indonesian bank or banks. Failure to realise the investment plan and to submit the above periodic reports will result in the termination of the tax facilities.

Inbound investment incentives
The DGT, on behalf of the MoF and based on the recommendation of the BKPM Chairman, may provide the following tax concessions to PT companies following their investment in certain designated business areas and/or in certain designated regions with a high priority on the national scale:

- A reduction in net income of up to 30% of the amount invested (generally amount spent on assets), prorated at 5% for six years from commercial production date, provided that the assets invested are not transferred out within six years.
- Acceleration of fiscal depreciation deductions.
- Extension of tax loss carryforwards for up to ten years.
- A reduction of the WHT rate on dividends paid to non-residents to 10%.
Indonesia

The tax facilities will be provided for investment in the form of tangible fixed assets, including land to be used for conducting the business.

The tax facilities can be used in the tax year when the taxpayer has realised at least 80% of their investment plan and after a decision letter on the realisation is issued by the DGT. The decision letter can only be issued after the DGT has performed a field audit.

After the tax facilities are granted, the eligible taxpayers must submit to the DGT certain regular reports (e.g. investment realisation reports). Taxpayers must also maintain separate records for assets eligible to receive the facilities and for those that are not, and enclose audited financial statements when submitting their CIT return.

Interested investors should consider the following timeline in applying for the tax facilities:

- During the period of one year after the date of investment approval that is issued after 3 September 2012.
- Up to 3 September 2013 for investment approval issued after 22 December 2011 up to 3 September 2012.
- Up to 3 September 2013 for investment approval issued prior 22 December 2011 if they meet the following criteria:
  - Have a new investment plan of a minimum of IRD 1 trillion (approximately 104 million United States dollars [USD]).
  - Have not entered into commercial production by 22 December 2011.

The list of investments eligible for the tax facilities covers 129 types of investment, which include 52 types of investment in particular sectors and 77 types of investment in particular sectors and regions.

Taxpayers who have enjoyed the income tax facilities above cannot enjoy the tax holiday facility, and vice versa.

The same tax facilities may be granted by the DGT to companies conducting business in an Integrated Economic Development Area (Kawasan Pengembangan Ekonomi Terpadu or KAPET). Specific approval must be obtained from the DGT for these tax facilities. If the company has bonded zone (Kawasan Berikat or KB) status, the tax facilities will also include those typically enjoyed by a KB company, for example:

- Non-collection of VAT and sales tax on certain luxury goods transactions.
- Exemption from prepaid income tax on the importation of capital goods and other equipment directly relating to production activities.
- Postponement of import duty on capital goods and equipment and goods and materials for processing.
- Exemption from import duty for four years on machinery and certain spare parts.

The designation of an area as a KAPET is set out in a specific presidential decree. Currently, there are approximately 25 areas designated as KAPETs.

**Reinvestment of branch profits**

PEs that reinvest their after-tax profits in Indonesia within the same year or no later than the following year are exempt from branch profit tax on these profits. The reinvestment should be one of the following forms:
• As a founder or a participant founder in a newly established Indonesian company through capital participation.
• As a shareholder of an established Indonesian company through capital participation.
• Acquisition of a fixed asset used by the PE to conduct its business or activities in Indonesia.
• Investment in the form of an intangible asset used by the PE to conduct its business or activities in Indonesia.

Shares in a newly established company shall not be transferred until, at a minimum, two years from the date that the company commences commercial production. With regard to the investment in an established Indonesian company, acquisition of a fixed asset, or investment of an intangible asset, the investment shall not be transferred until, at a minimum, three years after the investment.

**Other incentives**
Income earned by venture capital companies in the form of profit sharing from their investments in Indonesia is exempt from tax, provided that the following conditions are met:

• Entities are small or medium-scale businesses in one of the sectors designated by the Indonesian government.
• Investments are not listed on the Indonesian stock exchange.

**Withholding taxes**
Indonesian income tax is collected mainly through a system of WHTs. Where a particular income item is subject to WHT, the payer is generally held responsible for withholding or collecting the tax. These WHTs are commonly referred to using the relevant article of the Income Tax (Pajak Penghasilan or PPh) Law, as follows.

**Article 23/26 Income Tax (PPh 23/26)**
PPh 23/26 is levied on a variety of payments to corporations and individuals, resident and non-resident, at the following rates:

<table>

Domestic Article 23 WHT is also payable at the rate of 2% for most types of services where the recipient of the payment is an Indonesian resident.

**Notes**

1. Service fees, including for technical, management, and consulting services, rendered in Indonesia are subject to WHT at rates of 5% for Switzerland, 7.5% for Germany, 10% for Luxembourg, Papua New Guinea, Venezuela, and Zimbabwe, and 15% for Pakistan.
2. VAT is reciprocally exempt from the income earned on the operation of ships or aircraft in international lanes.
3. The treaty is silent concerning branch profit tax rate. The ITO interprets this to mean that the tax rate under Indonesian Tax Law (20%) should apply.
4. Labuan offshore companies (under the Labuan Offshore Business Activity Tax Act 1990) are not entitled to the tax treaty benefits.
5. In the case of dividends received by a resident shareholder, ‘portfolio shareholding’ refers to share ownership of less than 25% of the paid-up capital. In this respect, the dividend tax withheld by the payer constitutes a prepayment of the income tax liability of the shareholder. ‘Substantial shareholding’ refers to the share ownership of 25% of the paid-up capital or more.
6. Ratified but not yet effective, pending the exchange of ratification documents. Expected effective date is 1 January 2014.
7. Entered into force with the effective dates of 1 January 2013 for Indonesia and 1 April 2013 for Hong Kong.
8. Interest:
   - Lower rate or exemption if received by a financial institution.
   - Exempt if paid to the government.
   - Lower rate or exemption if paid by an approved industrial undertaking.
   - Exempt if paid by a bank and received by a bank.
   - Exempt if paid to a bank but linked to a government loan agreement or paid to specific financial institutions/banks.
9. Royalties:
   - Lower rate for payments in connection with literary or artistic copyrights, including film royalties.
   - Lower rate for payments in connection with industrial, commercial, or scientific equipment.
   - Lower rate for payments in connection with patents, designs, secret formulas/processes, or industrial, commercial, or scientific equipment/experience.
10. Branch profits:
• PEs that reinvest their after-tax profits in Indonesia within the same year or no later than the following year are exempt from branch profit tax on these profits (see the Tax credits and incentives section).

The issue of beneficial ownership has come under tax office scrutiny. For treaty WHT rates to apply to passive income such as interests, dividends, and royalties, the recipient of such income must be the beneficial owner. The recipient must also provide a Certificate of Domicile (CoD) in the form required by the ITO and certified by their home country tax authority that the recipient is a tax resident of that country. The CoD in the form prepared by the other country’s tax authority may only be used in limited circumstances. Further, the CoD form also requires a number of declarations to be made by the recipient that acknowledges that the use of the treaty jurisdiction was not merely for obtaining the benefit of the treaty. These declarations place onerous obligations on both the Indonesian payer and the recipient entity. Without a certified CoD, a WHT at a rate of 20% will apply. These aspects need to be considered when paying income of this nature.

**Article 22 Income Tax (PPh 22)**
PPh 22 is typically applicable to the following:

<table>
<thead>
<tr>
<th>Event</th>

<td>0.45</td>
<td>Selling prices</td>
</tr>
</tbody>
</table>
18. The purchase of materials by manufacturers or exporters in forestry, plantation, agriculture, cattle breeding, and fishery from wholesalers (3) ................................................................................................................. 0.25 Selling prices

19. The purchase of very luxurious goods ................................................................................................................. 5 Selling prices

Notes

1. In events 5 and 6, the PPh 22 collectors (State Treasury, BUMN, etc.) must withhold PPh 22 from the amount payable to a particular vendor, except payments for the use of oil fuel, gas fuel, lubricants, postal products, water, and electricity. There is also an exemption for the purchase of goods with a value of up to IDR 2 million and IDR 10 million for events 5 and 6, respectively. In the other events, the importer or the buyer of the designated goods must pay PPh 22 in addition to the amounts payable for the goods imported or purchased.

2. Vendors of goods in events 12 to 15 now can collect PPh 22 from buyers without being appointed by the DGT to undertake this, particularly on their sales to local distributors.

3. Manufacturers or exporters in event 18 can collect PPh 22 from wholesalers without being appointed by the DGT to undertake this.

4. PPh 22 constitutes a pre-payment of corporate/individual income tax liabilities, except for the purchase of oil fuel, gas fuel, and lubricants by distributors/agents, which is categorised as final tax.

The tax does not apply, either automatically or with an Exemption Certificate issued by the DGT, on the following types of imports:

- Import/purchase of goods not subject to income tax.
- Import of goods exempted from import duties and/or VAT or subject to 0% import duty.
- Goods that have been temporarily imported (i.e. goods for re-export).
- Goods for re-importing (i.e. exported and re-imported in the same quality or to be repaired/tested for subsequent re-exporting).

The PPh 22 exemption also applies to the importing/purchase of gold bars for the production of jewellery for re-export and related to the use of the government school operations subsidy (Bantuan Operasional Sekolah or BOS) fund.

**Tax administration**

**Payments of tax and tax returns filing**

Tax liabilities for a particular period or year must typically be paid to the State Treasury through a designated tax-payment bank (bank persepsi) and then accounted for at the DGT office through the filing of the relevant tax returns. The tax payments and tax return filing for a particular tax must be undertaken monthly or annually, depending upon the tax obligation in question.

Corporate tax liabilities may be settled either by direct payments, third party withholdings, or a combination of both. Monthly tax instalments constitute the first part of tax payments to be made by taxpayers as a prepayment of their current year CIT liability. A monthly tax instalment is generally calculated using the most recent CIT return. The tax withheld by third parties on certain income or tax to be paid in advance on certain transactions (i.e. imports) also constitute prepayments for the current year corporate tax liability of the income recipient or the party conducting the import. If the total amounts of tax paid in advance through the year are less than the total CIT due, the company concerned has to settle the shortfall before filing its CIT return. Returns for transaction taxes, such as WHT, must be filed on a monthly basis.
A summary of these tax obligations is as follows:

**Monthly tax obligations**

<table>
<thead>
<tr>
<th>Type of tax</th>
<th>Tax payment deadline</th>
<th>Tax return filing deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>Article 21/26 (Payroll) WHT</td>
<td>The 10th of the following month</td>
<td>The 20th of the following month</td>
</tr>
<tr>
<td>Article 23/26 Income Tax</td>
<td>The 10th of the following month</td>
<td>The 20th of the following month</td>
</tr>
<tr>
<td>Article 25 Income Tax Instalment</td>
<td>The 15th of the following month</td>
<td>The 20th of the following month</td>
</tr>
<tr>
<td>Article 22 Income Tax on imports / payments to Tax Collectors</td>
<td>The 10th of the following month</td>
<td>The 20th of the following month</td>
</tr>
<tr>
<td>Article 4(2) Final Income Tax</td>
<td>The 10th of the following month</td>
<td>The 20th of the following month</td>
</tr>
<tr>
<td>VAT and LST</td>
<td>Prior to the tax return filing deadline</td>
<td>The end of the following month</td>
</tr>
</tbody>
</table>

**Annual tax obligations**

<table>
<thead>
<tr>
<th>Type of tax</th>
<th>Tax payment deadline</th>
<th>Tax return filing deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>Corporate Income Tax</td>
<td>The end of the fourth month after the book year end before filing the tax return</td>
<td>The end of the fourth month after the book year end</td>
</tr>
<tr>
<td>Land and Building Tax (PBB)</td>
<td>Six months after the receipt of a Tax Due Notification Letter from the ITO</td>
<td>N/A</td>
</tr>
</tbody>
</table>

**Penalties**

Late payments of the above taxes incur interest penalties at 2% per month, with a maximum of 48%. Part of a month, for example a single day, is considered a full month.

Late filing of a tax return or failure to file a tax return incurs an administrative penalty at the following amounts:

<table>
<thead>
<tr>
<th>Type of tax return</th>
<th>IDR</th>
</tr>
</thead>
<tbody>
<tr>
<td>VAT return</td>
<td>500,000</td>
</tr>
<tr>
<td>Other monthly tax returns</td>
<td>100,000</td>
</tr>
<tr>
<td>CIT return</td>
<td>1,000,000</td>
</tr>
</tbody>
</table>

**Tax assessments**

Indonesia uses a self-assessment system under which taxpayers are trusted to calculate, pay, and report their own taxes in accordance with prevailing tax laws and regulations. However, the DGT may issue tax assessment letters to a particular taxpayer if it finds that, based on a tax audit or on other information, the taxpayer has not fully paid all tax liabilities. A tax assessment letter may also be issued by the DGT to a taxpayer who ignores a warning letter to file a tax return within a specified period. Failure to maintain books in accordance with the prescribed standards is another condition that may lead the DGT to issue an official tax assessment.

**Tax audit process**

The tax audit of a company may cover only a particular tax or all taxes for a particular tax period (a tax month) or tax year. It may be conducted at the company’s premises, at the DGT offices, or at both.
Conditions triggering a tax audit
A tax refund request will always trigger a tax audit. Due to the requirement for the DGT to decide on a refund request within 12 months, a tax audit will typically begin from a few weeks to several months from the refund request date. A corporate tax refund request will normally trigger a complete tax audit covering all taxes. A refund request of any other tax will normally trigger a tax audit covering only one particular tax. The DGT will likely broaden the tax audit scope to include other taxes.

Other events that may trigger a tax audit include the following:

• A tax return in an overpayment position (not necessarily accompanied by a refund request).
• An annual income tax return presenting/claiming a tax loss.
• The taxpayer has changed its fiscal year or bookkeeping method or performed fixed assets revaluation.
• A tax return not filed within the prescribed time or filed after the deadline stated in a warning letter, which has been selected to be audited based on a risk analysis.
• A tax return meeting certain (undisclosed) DGT criteria.

Statute of limitations
Under the current Tax Administration Law, the DGT can issue an underpaid tax assessment letter for the years up to 2007 only within ten years after the incurrence of a tax liability, the end of a tax period (month), or the end of (part of) a tax year, but no later than 2013. For years from 2008 onwards, the time spans for the issuing of underpaid tax assessment letters is reduced to five years.

Industry-based profitability benchmarking
The DGT has developed a new benchmarking methodology in reviewing taxpayers’ compliance, named the Benchmark Behavioral Model (BBM). Previously, the DGT used the Total Benchmarking Ratio (TBR) as its benchmarking methodology. Most of the financial ratios used in TBR are also adopted in BBM (e.g. Gross Profit Margin and Corporate Tax to Turnover Ratio). Data used for BBM is updated on a semi-annual basis.

BBM is intended to be used only as a supporting tool in assessing the tax compliance level of a taxpayer, and a discrepancy in respect of any particular ratio does not in itself prove non-compliance by a taxpayer. The discrepancy may prompt a follow up from the account representative for further explanation. If the review of the discrepancy reveals non-compliance with the tax law, the account representative may request an amendment of the tax return or recommend that the taxpayer be subject to a tax audit.

Other issues
Business combinations and splits
Transfers of assets in business mergers, consolidations, or business splits must generally be dealt with at market value. Gains resulting from this kind of restructuring are assessable, while losses are generally claimable as a deduction from income.

However, a tax-neutral merger or consolidation, under which assets are transferred at book value, can be conducted but are subject to the approval of the DGT. To obtain this approval, the merger or consolidation plan in question must pass a business-purpose test. Tax-driven arrangements are prohibited, and tax losses from the combining companies may not be passed to the surviving company.
Subject to a similar, specific DGT approval, the same concession is also available for business splits that constitute part of an initial public offering (IPO) plan. In this case, within one year of the DGT’s approval being given, the company concerned must have made an effective declaration regarding registration for an IPO with the Financial Services Authority (Otoritas Jasa Keuangan or OJK). In the event of complications beyond the company’s control, the period may be extended by the DGT for up to four years.

**Significant developments**
There have been no significant corporate tax developments in Iraq during the past year.

**Taxes on corporate income**
All income derived from Iraq is subject to tax in Iraq, regardless of the residence of the recipient.

The effective corporate income tax (CIT) system presented in Iraq for juristic persons (except partnerships) is based on a statutory CIT rate of 15% at all income levels, with no progressive tax rate scale.

**Foreign oil company income tax**
The income realised in Iraq from contracts concluded with foreign oil companies, their branches or offices, and subcontractors working in Iraq in the oil and gas production sector and related industries is taxed at a rate of 35%.

**Corporate residence**
One of the key issues in determining when a company becomes taxable in Iraq is whether the foreign company is considered to be doing business ‘in Iraq’ or ‘with Iraq’. In 2009, with Instructions No. 2/2008, the Iraqi tax administration provided a clearer distinction between business ‘in Iraq’ and business ‘with Iraq’.

Once the determination has been made that the company is trading ‘in Iraq’, the company should legally register in Iraq and then register with the General Commission for Taxes (GCT). A company that is registered with the GCT will be subject to CIT and will be required to file a CIT return.

**Permanent establishment (PE)**
It is important to note that the current Iraq income tax law does not clearly define a PE; consequently, it is important to monitor commercial activity being performed in the country to ensure compliance with the registration requirements and tax law. The company should consult with their internal tax department and external advisers if they have signed a contract to provide any type of services inside Iraq to determine if the company should have a legal registration and begin to file CIT returns.
Other taxes

Sales tax
A sales tax of 10% of the value of services is imposed on services rendered by deluxe and first class restaurants and hotels in Iraq. There are no other sales taxes in Iraq.

Custom duty
The customs duty system and procedures in Iraq are currently evolving. As of 1 June 2012, customs duties are levied based on percentages set in the custom tariff and agricultural agenda that is annexed to the Custom Tariff Law. For the purposes of the Custom Tariff Law, the custom tariff and agricultural agenda refers to the schedule comprised of itemised and codified sections and notes based on the international harmonised system adopted by the World Customs Organization (WCO).

Excise taxes
There is no tax provision in the Iraqi Tax Law addressing excise taxes.

Property taxes
A basic tax of 10% is assessed on the annual revenue for all real estate and is collected from the real estate owner or the long-term lessee (five years). In cases where the owner or long-term lessee cannot be located, the person occupying the real estate will be assessed. Note that the annual revenue for each real estate is discounted by 10% for expenses and maintenance before assessing the tax on that real estate.

Transfer taxes
There are no restrictions or taxes on transferring funds into or out of Iraq.

Stamp duty
All direct and indirect contracts related to credit facilities and other bank’s activities (e.g. letter of credit contracts) are subject to stamp fees at a rate of 0.2% of the contract value.

Branch income
The tax treatment for a branch is similar to a local Iraqi corporation. In general, CIT is imposed on corporate entities and foreign branches with respect to taxable profit from all sources arising or deemed to arise in Iraq. However, certain limitations apply to head office expenses.

Income determination
A corporation has to determine its profit/loss according to its income statement for a tax period as established under the Unified Accounting System (Iraqi Generally Accepted Accounting Principles [GAAP]). However, to reach the taxable income, positive or negative adjustments have to be made to the profit/loss as determined according to GAAP.

Inventory valuation
There is no tax provision in the Iraqi Tax Law addressing inventory valuation.
Capital gains
Capital gains on sales of depreciable assets are taxed at the normal CIT rate. To the best of our knowledge and legal practice, gains derived from the sale of shares and bonds not in the course of a trading activity are exempt from tax. Capital gains derived from the sale of shares and bonds in the course of a trading activity are taxable at the normal CIT rate.

Dividend income
Under the tax law, dividends paid out of profits that have been subject to tax are not taxed again in the hands of the shareholder.

Interest income
Interest income deemed to arise in Iraq is taxed at the normal CIT rate.

Rent/royalty income
Rent and royalty income deemed to arise in Iraq are taxed at the normal CIT rate.

Foreign income
There is no tax provision in the Iraqi Tax Law addressing foreign income.

Deductions
In general, all expenses incurred by the taxpayer in order to produce income during the year are deducted from income, provided that such expenses are confirmed by acceptable documents, with some exceptions.

Depreciation
The Iraqi Depreciation Committee sets the maximum depreciation rates for various types of fixed assets (please contact us for additional information regarding the specific rates). If the rates used for accounting purposes are greater than the prescribed rates, the excess is disallowed.

The depreciation method is either a straight-line method or declining-balance method.

Goodwill
Iraqi tax law does not contain a provision that covers the deductibility of goodwill.

Start-up expenses
Iraqi tax law does not contain a provision that covers the deductibility of start-up expenses.

Interest expenses
Iraqi tax law does not contain a provision that covers the deductibility of interest expenses.

Bad debt
Bad debt is deductible if it was included in earlier income and there is proof of the unsuccessful steps to collect it.

Charitable contributions
Charitable contributions to the Government and Socialist Sector departments and to scientific, cultural, educational, charitable, and spiritual organisations, which are
Iraq

legally recognised (provided that the Minister of Finance has issued a list containing the names of these organisations), are deductible.

**Bribes and illegal payments**
Bribes and illegal payments are not allowed or deductible.

**Fines and penalties**
Broadly speaking, fines and penalties are not deductible items.

**Taxes**
Broadly speaking, taxes are not deductible items.

**Net operating losses**
Under the tax law, losses of a taxpayer from some sources of income arising in Iraq, substantiated by legally accepted documents, are generally deducted from profits arising from other sources.

Losses that cannot be settled in this manner shall be carried forward and deducted from the income of the taxpayer over five consecutive years, provided that losses may not offset more than half of the taxable income of each of the five years and the loss is from the same source of income from which it has arisen.

Losses cannot be carried back.

**Payments to foreign affiliates**
Iraqi tax law does not contain a provision that covers the deductibility of payments to foreign affiliates.

**Group taxation**
Iraqi tax law does not contain any provisions for filing consolidated returns or for relieving losses within a group of companies.

**Transfer pricing**
The precise meaning of transfer pricing under the effective Iraqi tax system is rather unclear from a tax and legal perspective.

We note that while having no specific transfer pricing legislation, Iraq does have a ‘third party’ arm’s-length provision contained within its tax legislation; whereby, if a non-resident taxpayer is engaged in business with a resident and it appears to the tax authority that due to the connection existing between the resident and the non-resident, and the substantial control of one over the other, that the business relationship is arranged in a manner that leaves no profits to the resident, or the profits left are much less than what is normally earned, the tax shall be assessed on the actual profits of the non-resident and charged to the resident as if the resident is the business agent for the non-resident.

**Thin capitalisation**
Iraqi tax law does not contain a provision that covers thin capitalisation.
**Tax credits and incentives**

In accordance with the Iraqi Investment Law, approved industrial projects are given certain custom duty and tax incentives; however, oil and gas is not one of the sectors that is normally granted investment promotion exemptions incentives.

The tax incentives may include corporate tax, individual tax, and others; however, the tax incentives vary from one project to another.

The Board of Investment Promotion has the authority to add any sector or specific project to the list of sectors or projects that benefit from the investment promotion law incentives.

**Foreign tax credit**

Income tax paid to a foreign country on income earned in that country may be credited against tax paid to Iraq. The amount of the credit may not exceed the amount of tax assessed in Iraq.

**Withholding taxes**

Under the tax law, the amount due from any residing taxpayers to a non-resident, whether the payment is made in cash or credited to the account, is subject to withholding tax (WHT) at the rate of 15% if such amounts are related to interest on debentures, mortgages, loans, deposits and advances, as well as annual allowances, pension salaries, or other yearly payments. Dividends are not subject to WHT since dividends paid out of profits that have been subject to tax are not taxed again in the hands of the shareholder.

**Tax administration**

**Taxable period**

The taxable year in Iraq is the calendar year.

**Tax returns**

The statutory time line for filing tax returns is the first day of June of the year of assessment. If the self-assessment of tax is not accepted by the tax authorities, tax is assessed on the income of the taxpayer based on the information available to the tax authorities.

Failure to file a tax return may lead to an estimate of income and assessment of tax by the tax authorities; however, such an assessment does not relieve the taxpayer from responsibility for non-submission of the return within the statutory time line stipulated by law.

**Payment of taxes**

Payment of the tax liability has to occur within 21 days from the assessment date by the tax authority. There is no requirement of quarterly payments during the taxable year.

**Tax audit process**

Tax inspection is mandatory in Iraq, as the tax authority will scrutinise the financial statements of the taxpayer to determine the tax liability and, accordingly, issue a tax clearance.
Iraq

Statute of limitations
The statute of limitations is five years. However, the tax authority has the right to go back beyond five years in certain instances.

Topics of focus for tax authority
Obtaining a tax clearance from a tax audit/inspection is becoming increasingly important for importation and government bidding purposes, as well as for other areas that affect the continuation of operations.

Iraqi GAAP
The Iraqi tax law requires all taxpayers to maintain books and records in accordance with Iraq's local unified accounting system (Iraqi GAAP).

These books shall constitute tax books/accounts. This accounting treatment will determine when income is accrued and costs are incurred for computing taxable profits.
**Significant developments**

**Transfer pricing**

The Irish tax authorities have recently released an ebrief that outlines details of a new Transfer Pricing Compliance Review (TPCR) programme under which they will monitor the degree of compliance with Ireland’s transfer pricing rules.

The publication of the ebrief follows the lodgement in September 2012 of the first batch of corporate tax returns in Ireland for which the new Irish transfer pricing rules may apply, and provides the first official guidelines to companies in Ireland of the nature of the review programme and the approach that will be followed by the tax authority in monitoring compliance with Ireland’s transfer pricing rules.

The approach adopted by the Irish tax authorities is that companies will be notified to undergo a self-review of their compliance with the Irish transfer pricing rules. Companies selected will be requested to provide a report to the tax authority within three months. The report will be for a specific accounting period, most likely 31 December 2011 given that this is the fiscal year end for which the corresponding corporate tax returns were filed in September 2012.

In order to minimise compliance costs, the Irish tax authorities have explicitly stated that existing studies elsewhere in the multinational group that cover the related party dealings of the Irish operations will be sufficient, provided they contain the necessary information as set out in the briefing.

The Irish tax authorities have clarified that the TPCR programme is not a formal audit, so this allows for voluntary disclosures to be made at any time during the process. The outcome of a TPCR will be a Revenue letter indicating either (i) no further enquiries or (ii) issues that need to be further addressed within the TPCR process. However, in some instances, a case selected for TPCR may be escalated to an audit (e.g. in cases where a company declines to complete a self-review or where the output from the review indicates that the company’s transfer pricing policies may not be in accordance with the arm’s-length standard).

**Research and development (R&D) tax credit**

Tax incentives for companies undertaking in-house R&D activities are at the forefront of Ireland’s attractiveness as a knowledge economy. Recent changes introduced in Finance Act 2013 continue to enhance the attraction of Ireland as an R&D location.

**Use of R&D tax credit to reward ‘key employees’**

Finance Act 2013 reduced the threshold required to qualify as a key employee for the purpose of the R&D tax credit regime. Prior to Finance Act 2013, an employee had to spend at least 75% of their time on qualifying R&D activities in order to qualify as a
Ireland

‘key employee’, which was extremely hard to satisfy in practical terms. This threshold was reduced to 50% in Finance Act 2013, which provides more flexibility in using the R&D tax credit to attract and retain key talent. In effect, a company may surrender a portion of their R&D credit that could otherwise have been used to reduce corporation tax against key employees’ income. Essentially, this measure can reduce an employee’s effective rate of tax to 23% (the average effective tax rate for such employees would typically be in excess of 40% in the absence of such an R&D credit).

**Extended volume basis for calculating the R&D tax credit**
Finance Act 2013 expanded the limited volume-based approach for the purposes of calculating the R&D tax credit. Going forward, the first 200,000 euros (EUR) of qualifying R&D expenditure will now benefit from the 25% R&D tax credit on a volume basis (thus ignoring the 2003 base year spend), meaning that companies engaging in qualifying R&D activities are guaranteed a credit of EUR 50,000 in respect of their first EUR 200,000 of qualifying R&D expenditure.

**Intangible allowances regime**
Finance Act 2013 continued to enhance the attractiveness of Ireland as a location for holding intellectual property (IP). The legislation now provides that a claw back of intangible allowances will not occur where the asset is disposed of or ceased to be used more than five years after it was first provided. Prior to the recent Finance Act, the claw back period was ten years.

**Exemption for new start-up companies**
The Finance Act 2013 further extends the relief for start-up companies. The Finance Act 2013 now allows unused relief arising in the first three years of trading (due to insufficiency of profits) to be carried forward for use in subsequent years.

This provision applies to accounting periods ending on or after 1 January 2013.

**Additional tax credit on foreign dividends**
Finance Act 2013 provides for an additional tax credit on certain dividends received by an Irish Holdco from a European Union (EU)/European Economic Area (EEA) subsidiary.

The Finance Act 2013 provision addresses the recent Court of Justice of the EU judgment in the FII GLO case and the discriminatory nature of the tax exemption on domestic dividends received by an Irish company in contrast to the taxable nature of EU/EEA dividends received by an Irish company.

The provision allows for an additional tax credit at the lower of the Irish and foreign nominal rates of tax less the credit already permitted in the original foreign tax credit calculation.

In essence, the additional tax credit will provide for a credit up to the amount of Irish tax if the Irish nominal rate is lower than the nominal rate of tax on the underlying profits in the country where the profits are sourced.

**Value-added tax (VAT)**
Ireland introduced new VAT legislation to implement the provisions of the E-Invoicing Directive from 1 January 2013. The Directive was adopted by the Council of the EU on 19 July 2010. The aim is to increase the use of electronic invoicing and to reduce the associated regulatory burden on businesses. It simplifies and modernises the VAT invoicing rules and, moreover, removes some of the current barriers to e-Invoicing by,
for example, treating paper and electronic invoices equally. See the Other taxes section for more information.

Foreign Account Tax Compliance Act (FATCA)
In December 2012, the Chargé d’affaires at the United States (US) Embassy in Ireland and the Minister for Finance of Ireland signed an intergovernmental agreement (the US-Ireland IGA) for which enabling provisions were enacted into Irish tax legislation in Finance Act 2013.

The IGA changes the way in which FATCA affects Irish financial institutions. Its effect is to give Irish laws and regulations precedence in governing FATCA compliance for Irish entities, and it provides that reporting will be carried out to the Irish Revenue Commissioners rather than to the US Internal Revenue Service (IRS). The reporting requirements will apply to all Irish financial institutions, as defined, regardless of whether the entity has US account holders or US assets.

Real Estate Investment Trusts (REITs)
REITs were introduced by Finance Act 2013 with a view to boosting the real estate industry in Ireland. The REIT will be exempt from tax on income and capital gains, provided certain conditions are met, notably the requirement to distribute at least 85% of property income annually and that at least 75% of the aggregate income of the REIT must derive from carrying on property rental business. There are also requirements regarding the number of properties held and the financing arrangements. Distributions made by the REIT will be subject to withholding tax (WHT) of 20%, with exemption/reduced rates available for eligible investors. The REIT must be incorporated and resident in Ireland and listed in an EU jurisdiction. This vehicle provides access to market for smaller investors and facilitates capital injections into the Irish property market without an additional layer of taxation.

Taxes on corporate income
Corporation tax is chargeable as follows on income and capital gains:

<table>
<thead>
<tr>
<th></th>
<th>Standard rate on income ('trading rate')</th>
<th>Higher rate on income ('passive rate')</th>
<th>Capital gains rate</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>12.5%</td>
<td>25%</td>
<td>33%</td>
</tr>
</tbody>
</table>

Resident companies are taxable in Ireland on their worldwide profits (including gains). Non-resident companies are subject to Irish corporation tax only on the trading profits of an Irish branch or agency and to Irish income tax (generally by way of withholding) on certain Irish-source income.

Non-trading (passive) income includes dividends from companies resident outside Ireland (with some exceptions), interest, rents, and royalties. Legislation provides that certain dividend income (e.g. income from foreign trades) is taxed at 12.5% (see the Income determination section). The higher rate (i.e. 25%) also applies to income from a business carried on wholly outside Ireland and to income from land dealing, mining, and petroleum extraction operations.

An additional 'profit resource rent' tax applies to certain petroleum activities. Depending on the profit yield of a site, the tax rate applicable can range from 25% to 40%.
Ireland

Close companies (see the Income determination section) may be subject to additional corporate taxes on undistributed investment income (including Irish dividends) and on undistributed income from professional services. Examples of professional services include professions such as solicitor, accountant, doctor, and engineer.

**Local income taxes**
Ireland does not levy local or regional taxes on income.

---

**Corporate residence**

A company that is incorporated, or has its place of central management and control, in Ireland will be regarded as resident in Ireland for the purposes of corporation tax and capital gains tax. This is subject to the following two exceptions where a company incorporated in Ireland is not considered a tax resident.

A treaty exception applies if the Irish incorporated company is, by virtue of an Irish double tax treaty (DTT), considered to be tax resident in the treaty partner country and not resident in Ireland.

An active trading exception applies if the Irish incorporated company or its 50% affiliate carries on a trade in Ireland and the company has qualifying ownership. A 50% affiliate is essentially a company where:

- one company is a 50% subsidiary of the other or both companies are 50% subsidiaries of a third company
- there is an entitlement to at least 50% of the profits available for distribution, and
- there is an entitlement to at least 50% of the assets available in the case of a winding up of the other company.

Qualifying ownership requires that the Irish incorporated company or a 50% or more affiliate/parent is listed on a stock exchange in an EU member state or a territory that has a tax treaty with Ireland or, in the absence of such a listing, that the ultimate control (more than 50%) of the Irish incorporated company rests with persons who are tax resident in EU or treaty countries.

**Permanent establishment (PE)**
Non-resident companies are subject to Irish corporation tax only on the trading profits attributable to an Irish branch or agency, plus Irish income tax (generally by way of withholding, though this is not the case with Irish-source rental profits) on certain Irish-source income.

For non-resident companies, the liability to corporation tax depends on the existence of any kind of branch or agency through which a trade is carried on. The meaning of branch or agency for Irish tax purposes is set out in statute. The corporation tax liability of a non-resident company will be reduced by a DTT if the company does not have a PE in Ireland.

Subject to the terms of the relevant DTT, a non-resident company will have a PE in Ireland if:

- it has a fixed place of business in Ireland through which the business of the company is wholly or partly carried on or
• an agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in Ireland.

A fixed place of business includes (but is not limited to) a place of management, a branch, an office, a factory, a workshop, an installation or structure for the exploration of natural resources, a mine, oil or gas well, quarry, or other place of extraction of natural resources, or a building or construction or installation project. A company is not, however, regarded as having an Irish PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

**Other taxes**

**Value-added tax (VAT)**

VAT is charged at 23% on the supply of most goods and services in the course or furtherance of business.

There are currently two reduced rates of VAT. A 13.5% rate applies, inter alia, to most building services, labour intensive services, domestic fuel and power, and other reduced rate supplies. A 9% VAT rate applies to certain supplies in the tourism sector. These include restaurant and catering services, hotel and holiday accommodation, and various entertainment services, such as admissions to cinemas, theatres, museums, sporting facilities, etc. Under current legislation, this rate will apply until 31 December 2013.

A 4.8% rate applies to the supply of livestock, live greyhounds, and the hiring of horses.

Exports, most basic food items, oral medicines, books, and children's clothing and footwear are zero-rated.

Some supplies are exempt from VAT. The main exempt categories are most banking services, insurance services, medical services, passenger transport, education and training, and letting of immovable goods (although an ‘option to tax’ may be possible in certain circumstances).

Zero rating is preferable to exemption because most VAT costs incurred in making a zero-rated supply can be recovered, while those incurred in making an exempt supply generally cannot.

If a business is fully engaged in a VATable business (irrespective of the rate), it will be entitled to reclaim VAT incurred, subject to the normal rules of deductibility. Businesses engaged in exempt supplies will not be in a position to reclaim VAT; consequently, VAT will be a real cost. Any business engaged in both VATable and exempt supplies will be required to apportion the VAT incurred appropriately.

**E-invoicing Directive 2010/45/EU - Electronic Invoicing**

Ireland introduced new VAT legislation to implement the provisions of the E-Invoicing Directive from 1 January 2013. The Directive was adopted by the Council of the EU on 19 July 2010. The aim is to increase the use of electronic invoicing and to reduce the associated regulatory burden on businesses. It simplifies and modernises the VAT invoicing rules and, moreover, removes some of the current barriers to e-Invoicing by, for example, treating paper and electronic invoices equally. The key points are as follows:
Ireland

- Clarity in relation to the rules on the issuance of invoices in respect of cross-border transactions.
- Equality of treatment between paper invoices and e-Invoices.
- Freedom to choose technology and process in relation to e-Invoicing.
- The storage of, and third party access to, e-Invoices.

**Customs duties**
Many goods imported into Ireland from outside the European Union are subject to customs duties. The rates of duty are provided by the EU’s Common Customs Tariff.

**Excise duties**
Excise duties are chargeable on most hydrocarbon oil products, electricity supply, alcoholic drinks, and tobacco products imported into or produced in Ireland.

**Stamp duty**
Stamp duty is a tax on instruments. It is payable on transfers of land and on other assets whose legal title cannot be passed by delivery. It is chargeable on instruments of transfer executed in Ireland and on instruments, wherever executed, that relate to Irish property or relate to matters to be done in Ireland. Stamp duty on the transfer of assets between associated companies may be fully relieved from stamp duty, provided the following key conditions are met:

- The companies have a 90% relationship (that is, one company is, directly or indirectly, the beneficial owner of at least 90% of the ordinary share capital of the other and is entitled to at least 90% of the profits available for distribution and at least 90% of the assets in the case of a winding-up of the other company, or a third company has these rights, directly or indirectly, in respect of both companies).
- This relationship is maintained for a period of at least two years after the transfer of the assets (to avoid the relief being clawed back).

There is an exemption for transfers of IP, and the categories of IP qualifying for this exemption are the exact same as those for which IP capital allowances are available (see Intellectual property [IP] regime in the Tax credits and incentives section).

Stamp duty is payable based on the higher of the consideration paid for the transfer or the market value of the assets transferring. Rates of 1% to 2% apply for transfers of residential property, 2% for transfers of non-residential property (commercial/industrial land and buildings but also business assets such as goodwill, debtors, contracts, etc.) and a rate of 1% is levied on transfers of shares.

**Capital duty on share capital**
Ireland does not levy capital duty on share capital of companies.

**Capital taxes**
Ireland does not levy tax on the net worth of companies.

**Social security contributions**
Employed persons are compulsorily insured under a state-administered scheme of pay-related social insurance (PRS). Contributions are made by both the employer and the employee. The employer is responsible for making PRSI contributions up to a rate of 10.75%, and these are an allowable deduction for corporation tax purposes.
**Insurance premium tax (IPT)**

A levy of 3% of gross premiums received applies in relation to non-life insurance policies relating to risks located in Ireland. This levy is payable four times per annum, within 25 days of the end of each quarter (i.e. within 25 days from quarters ending 31 March, 30 June, 30 September, and 31 December).

A levy of 1% of gross premiums received applies in relation to certain classes of life insurance policies relating to risks located in Ireland. This levy is payable four times per annum, within 25 days of the end of each quarter (i.e. within 25 days from quarters ending 31 March, 30 June, 30 September, and 31 December).

An additional contribution of 2% to the Insurance Compensation Fund applies to premiums received in relation to non-life insurance policies. Similar to the 3% non-life insurance levy, the contribution applies where premiums are received in respect of risks located in Ireland. The contribution is also payable four times per annum in conjunction with the non-life insurance levy on premiums.

Reinsurance business is excluded from the levy.

**Emissions allowances**

Legislation was introduced in relation to the tax treatment of emission allowances under the EU Emissions Trading Scheme. The legislation distinguishes between allowances acquired free of charge from the Environment Protection Agency under the EU Scheme and those that are purchased.

**Environmental taxes**

In Ireland, a levy (currently 22 cent per bag) is imposed upon consumers provided with a plastic bag when purchasing goods in supermarkets and other retail outlets. Under the applicable legislation, retailers are obligated to collect 22 cent in respect of every plastic bag or bag containing plastic, regardless of size, unless specifically exempted, that is provided to customers and remit all plastic bag levies collected to Irish Revenue. As a result of the levy, most non-supermarket retailers provide paper carrier bags, and many retailers provide ‘bags for life’, which are made from non-plastic material and, therefore, not subject to the environmental levy.

**Carbon tax**

A carbon tax has been introduced on mineral oils (e.g. auto fuels, kerosene) that are supplied in Ireland. The rates of carbon tax on oil and gas broadly equate to EUR 20 per tonne of CO2 emitted. Relief applies where mineral oils are supplied to an Emissions Trading Scheme (ETS) installation or for electricity generation. Pure biofuels are exempt from carbon tax. There is full relief for the biofuel component of the fuel. Where biofuel has been mixed or blended with any other mineral oil, the relief from carbon taxes shall apply to the biofuel content of the mixture or blend, regardless of the percentage.

A carbon tax has also been introduced on natural gas and solid fuel where supplied for combustion. Again, reliefs apply where these fuels are supplied to ETS installations or used in electricity generation, chemical reduction, or in the electrolytical or metallurgical processes.

**Local taxes**

Local taxes known as ‘rates’ are not based on income but rather are levied on the occupiers of business property by reference to a deemed rental value of the property.
Ireland

concerned. The level of rates levied can depend on the region in which the property is located. Rates are an allowable deduction for corporation tax purposes.

Local authorities are also empowered to levy charges on all occupiers for specific services (e.g. water supply). These charges are also deductible for corporation tax purposes.

**Branch income**

Irish branches of foreign companies are liable to corporation tax at the rates that apply to Irish resident companies. No tax is withheld on repatriation of branch profits to the head office.

**Income determination**

Irish trading profits are computed in accordance with Irish Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS), subject to any adjustment required by law. Prior-year adjustments may arise on the first-time adoption of IFRS, which may result in double counting of income or expenses or of income falling out of the charge to tax. Generally speaking, in order to avoid such an outcome, transitional adjustments exist whereby amounts of income or expenses that could be double-counted or that would fall out of the charge to tax are identified and the amounts concerned are taxed or deducted as appropriate over a five year period.

**Inventory valuation**

Each item of inventory is valued for tax purposes at cost or market value, whichever is lower, and this will normally accord with the accounting treatment. The method used in arriving at cost or market value of inventory generally must be consistent and must not be in conflict with tax law. The first in first out (FIFO) method is an acceptable method of calculation for tax purposes. The base-stock method has been held to be an inappropriate method for tax purposes, as has the last in first out (LIFO) method.

**Capital gains**

Companies are subject to capital gains tax in respect of gains arising on the disposal of capital assets. The taxable gain is arrived at by deducting from the sales proceeds the cost incurred on acquiring the asset (as indexed to reflect inflation only up to 31 December 2002). The resulting gain is taxable at 33%. In cases of disposals of interests in offshore funds and foreign life assurance policies, indexation relief does not apply; while a tax rate of 33% applies to non-corporate shareholders in respect of funds or policies located in EU/EEA/DTT countries, and a rate of 33% or 40% applies to funds or policies located in all other jurisdictions. A reduced rate of 25% exit tax applies to Irish corporate shareholders investing in Irish funds. Special rules apply to gains (and losses) from the disposal of development land in Ireland.

Companies that are tax resident in Ireland (i.e. are managed and controlled in Ireland or incorporated in Ireland and not qualifying for exclusion from Irish residence by virtue of incorporation) are taxable on worldwide gains. Non-resident companies are subject to capital gains tax on capital gains arising on the disposal of Irish land, buildings, mineral rights, and exploration rights on the Irish continental shelf, together with shares in unquoted (unlisted) companies, whose value substantially (greater than 50%) is derived from these assets. Non-resident companies also are subject to capital
gains tax from the realisation of assets used for the purposes of a business carried on in Ireland.

Losses arising on the disposal of capital assets may be offset against capital gains in the accounting period or carried forward for offset against future capital gains. No carryback of capital losses is permitted. There is no facility to offset capital losses against business income or to surrender capital losses within a tax group.

Irish capital gains tax legislation facilitates corporate reorganisations on a tax-free basis in situations where there is a share for share exchange. Assets can be transferred within certain company groups without capital gains tax applying (see the Group taxation section for further information).

**Participation exemption from capital gains**

A participation exemption is available to Irish resident companies on the disposal of a shareholding interest if:

- a minimum of 5% of the shares (including the right to profits and assets on winding up) is held for a continuous 12-month period
- the share sale takes place during the period for which the minimum 5% holding is held
- the sale takes place within two years after meeting the holding requirement, to take account of gradual dispositions over time
- the company whose shares are sold is resident in an EU member state (including Ireland) or in a country with which Ireland has a DTT at the time of the disposal (this includes tax treaties that have been signed but not yet ratified), and
- a trading condition is met at the time of the disposal whereby either: (i) the business of the company whose shares are disposed of consists wholly or mainly of the carrying on of one or more trades or (ii) taken together, the businesses of the Irish holding company and all companies in which it has a direct or indirect 5% or more ownership interest consist wholly or mainly of the carrying on of one or more trades.

If the Irish holding company is unable to meet the minimum holding requirement but is a member of a group (that is, a parent company and its 51% worldwide subsidiaries), the gain arising on the disposal still will be exempt if the holding requirement can be met by including holdings of other members of the group. Thus, the Irish company may be exempt from capital gains tax on a disposal of shares even if it does not directly hold a significant shareholding. The exemption also applies to a disposal of assets related to shares, such as options and convertible debt. However, it does not apply to a sale of either shares or related assets that derive the greater part of their value (more than 50%) from Irish real property, minerals, mining rights, and exploration and exploitation rights in a designated area. Shares deriving their value from non-Irish real property, minerals, and mining rights qualify for exemption if the other conditions are met.

Capital losses arising on the disposal of a shareholding where a gain on disposal would be exempt under the participation exemption are not deductible.

**Dividend income**

Dividends from Irish companies are exempt from corporation tax. Dividends paid out of the trading profits of a company resident in an EU member state or a country with which Ireland has a DTT (or a country with which Ireland has ratified the Convention on Mutual Assistance in Tax Matters) may be taxed at the 12.5% rate, provided a claim is made. The 12.5% corporate tax rate applies to the same type of dividends received
Ireland

from companies resident in non-treaty countries, that is, where the company that paid
the dividend is a listed company or is part of a 75% listed group the principal class of
the shares of which are substantially and regularly traded on the Irish Stock Exchange, a
recognised Stock Exchange in an EU member state or a country with which Ireland has
a DTT, or on such other Stock Exchange as is approved by the Minister for Finance for
the purposes of this relief from double taxation.

Finance Act 2012 extends the 12.5% corporate tax rate to foreign dividends paid out
of trading profits of a company resident in a country that has ratified the Convention
on Mutual Assistance in Tax Matters. Such countries include Azerbaijan and Ukraine.
Please note that Argentina, Brazil, and Indonesia have signed, but have not yet ratified,
the Convention.

Foreign dividends received by an Irish company where it holds 5% or less of the
share capital and voting rights in that foreign company are exempt from corporation
tax where the Irish company would otherwise be taxed on this dividend income as
trading income.

Dividends from Irish resident companies are not liable to further tax, other than a
surcharge on close companies if the dividend is not redistributed. Broadly speaking,
a close company is a company that is under the control of five or fewer ‘participators’.
Participators can include individual shareholders, corporate shareholders, loan
creditors, any person with a right to receive distributions from the company, etc. Where
not less than 35% of the shares of a company (including the voting power) are listed, a
company will not be regarded as a close company.

A close company surcharge of 20% is payable on certain non-trading income (for
example, rental income, certain dividend income, and interest income) if it is not
distributed to shareholders within 18 months of the accounting period in which
the income was earned. A close company making a distribution and the close
company receiving a distribution have the option jointly to elect to have the dividend
disregarded for surcharge purposes. This can give close companies the option of moving
‘trading income’ up to a holding company without incurring a surcharge. Generally
speaking, close companies avoid the surcharge through the payment of dividends
within the prescribed period. Capital gains accruing to a non-resident company that
would be close if it were resident can be attributed to Irish resident participants in
certain instances.

Stock dividends
Stock dividends taken in lieu of cash are taxed to the shareholder on an amount
equivalent to the amount that would have been received if the option to take stock
dividends had not been exercised. If the recipient is an Irish resident company and it
receives the stock dividend from a quoted (listed) Irish company, then there will be no
tax. For a quoted (listed) company paying the stock dividend, dividend WHT with the
appropriate exemptions and exclusions applies. Other stock dividends (bonus issues)
are generally non-taxable.

Interest income
Interest income earned by Irish companies generally is taxable at the rate of tax for
passive income of 25% (interest may be regarded as a trading receipt for certain
financial trader companies). It is possible to offset current year trading losses against
passive interest income arising in the same year on a ‘value basis’. It is not possible to
offset prior year trading losses against current year interest income unless that interest
constitutes a trading receipt of the particular company.
Foreign income
Resident companies are liable to Irish tax on worldwide income. Accordingly, in
the case of an Irish resident company, foreign income and capital gains are, broadly
speaking, subject, in full, to corporation tax. This applies to income of a foreign branch
of an Irish company as well as to dividend income arising abroad.

In general, income of foreign subsidiaries of Irish companies is not taxed until remitted
to Ireland, although there are special rules that seek to tax certain undistributed capital
gains of non-resident close companies (see Dividend income above for further information
in relation to close companies).

Foreign taxes borne by an Irish resident company (or Irish branch of an EEA resident
company), whether imposed directly or by way of withholding, may be creditable in
Ireland (see Foreign tax credit in the Tax credits and incentives section).

Deductions
In general, expenses incurred wholly and exclusively for the purposes of the trade are
tax-deductible.

General accruals and provisions are not tax-deductible.

Depreciation
Book depreciation is not deductible for tax purposes (except in the case of IP assets).
Instead, tax depreciation (known as capital allowances) is permitted on a straight-line
basis in respect of expenditure incurred on assets that have been put into use by the
company. The following rates are applicable:

<table>
<thead>
<tr>
<th>Asset type</th>
<th>Tax depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plant and machinery</td>
<td>12.5</td>
</tr>
<tr>
<td>Industrial buildings used for manufacturing</td>
<td>4</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>12.5</td>
</tr>
<tr>
<td>IP assets</td>
<td>Book depreciation or 7</td>
</tr>
</tbody>
</table>

The allowances are calculated on the cost after deduction of grants, except for plant
and machinery used in the course of the manufacture of processed food for human
consumption. In this case, the allowances are calculated on the gross cost. Allowances
on cars are restricted to a capital cost of EUR 24,000 and may be restricted further (to
50% or zero), depending on the level of carbon emissions of the vehicle.

Accelerated capital allowances
A 100% first-year capital allowance is available in respect of expenditures incurred on
certain approved energy-efficient equipment up to 31 December 2014. The categories of
equipment that may be eligible for inclusion are:

- Information and communications technology.
- Heating and electricity provision.
- Electric and alternative fuel vehicles.
- Heating, ventilation, and air conditioning (HVAC) control systems.
- Lighting.
- Motors and drives.
Ireland

- Building energy management systems.
- Refrigeration and cooling systems.
- Electro-mechanical systems.
- Catering and hospitality equipment.

**Leasing**

Ireland operates an eight-year tax depreciation life on most assets. A beneficial tax treatment applies to finance leases and operating leases of certain assets. For short life assets (i.e. those with a life of less than eight years), Ireland allows such lessors to follow the accounting treatment of the transaction that provides a faster write-off of the capital cost of an asset rather than relying on tax depreciation over eight years. This effectively allows the lessors to write-off their capital for tax purposes in line with the economic recovery on the asset.

**Goodwill**

The amortisation of goodwill is generally not allowable as a deduction. However, a tax deduction may be available for capital expenditure on the acquisition of certain goodwill (see Intellectual property (IP) regime in the Tax credits and incentives section).

**Start-up expenses**

A deduction may be allowed in respect of pre-trading expenses that are incurred for the purposes of a trade and within three years of the commencement of the trade. Such expenses may be offset against the income of that same trade.

**Interest expenses**

A deduction for interest is allowed only to the extent that borrowings are used for the purpose of a trade or acquisition of certain non-trading assets.

**Research and development (R&D) expenses**

Expenditure on scientific R&D and payments for the acquisition of know-how in general are allowable deductions, as are the costs of obtaining or extending patents and obtaining and renewing trademarks.

**Bad debts**

A deduction is available for bad debts written off in the accounts of a company as irrecoverable. Specific bad debt provisions may also be deductible once they satisfy Irish GAAP or IFRS accounting standards. The creation of a general bad debt provision is not a deductible expense.

**Charitable contributions**

Companies are entitled to a deduction, as a trading expense, for qualifying donations to approved charities, educational institutions, schools, churches, research foundations, sports bodies, and other approved organisations that satisfy certain conditions. To qualify for a tax deduction, the donation(s) to an organisation in a 12-month accounting period must amount to at least EUR 250.

**Meals and entertainment**

Costs incurred for third-party entertainment are not tax-deductible. Entertainment includes the provision of accommodation, food, drink, and any other form of hospitality, including the provision of gifts. Expenditure on bona fide staff entertainment is allowable as a deduction, provided its provision is not incidental to the provision of entertainment to third parties. Certain promotional costs are tax-deductible if they are incurred wholly and exclusively for the purposes of the trade.
Pension expenses
Contributions to certain employee pension schemes and the cost of setting up such schemes are deductible. Pension contributions are allowable as a deduction for employers in the year in which they are paid.

Fines and penalties
Fines and penalties imposed for breaking the law, civil penalties, interest, and late filing surcharges imposed by the Revenue Commissioners are generally not deductible.

Taxes
Taxes that are deductible in computing profits for corporation tax include VAT not recovered, the employer’s share of PRSI contributions, and local taxes (i.e. rates levied on commercial property and local authority charges).

Net operating losses
Losses are computed for tax purposes in the same way as business profits. Trading losses can be offset against other income of any nature, either in the current or preceding accounting period (of equal length). The amount of losses required to shelter the income is dependent on the tax rate that would have been applied to the income in the absence of the loss relief. Any excess losses can be carried forward indefinitely against future trading income. Certain changes in ownership may prevent the carryforward of losses to future periods. Terminal losses that arise within 12 months of the date a company ceases to trade may be carried back three years.

Payments to foreign affiliates
Generally, deductions can be claimed for royalties, management service charges, and most interest charges paid to foreign affiliates, provided the amounts do not exceed what would be paid to unrelated entities. Depending on the circumstances, certain elections may be required. Ireland does not have any thin capitalisation rules.

Group taxation
The concept of 'fiscal unity' or consolidated group tax does not exist in Ireland. However, trading losses as computed for tax purposes may be offset on a current period basis against taxable profits of another group company. As with loss relief in a single company, the amount of losses required to shelter the income is dependent on the tax rate that would have been applied to the income in the absence of the loss relief.

A group consists of a parent company and all of its 75% subsidiaries, with all group members being tax resident in Ireland, in another member state of the EEA or in a country with which Ireland has a DTT. It is also possible to trace through companies quoted on certain recognised stock exchanges (or 75% subsidiaries of companies so quoted). Non-Irish members may only surrender losses from activities that would, if profitable, be subject to Irish tax.

Capital losses cannot be surrendered within a group.

Relief from capital gains tax is available on intra-group transfers of capital assets. Where a capital asset is transferred from a resident company to another resident company in a 75% group, no capital gains tax charge arises. A group, for capital gains tax purposes, consists of a principal company and its 75% subsidiary companies. A 75% subsidiary is defined by reference to the beneficial ownership of ordinary share capital,
Ireland

owned either directly or indirectly. A capital gains tax group can include EEA resident companies for the purpose of analysing the beneficial ownership of a company.

It also is possible for an Irish resident company and an Irish branch of an EEA company in the same group to transfer capital assets without crystallising a capital gains charge, provided the asset transferred remains within the scope of the charge to Irish capital gains tax.

Subsequent to an intra-group transfer, a charge to capital gains tax will arise when either:

- the asset is sold outside the group, in which case the tax is calculated by reference to the original cost and acquisition date of the asset when first acquired within the group or
- a company owns an asset that was transferred by a group company and subsequently leaves the group within a ten-year period of the intra-group transfer. The gain on this intra-group transfer crystallises and becomes payable at this point.

**Cash pooling**
The corporate treasury sector sought changes to facilitate international cash pooling operations, and certain relevant changes were brought about in Finance Act 2012. Under a typical cashpool arrangement, interest payments by the Irish cashpool leader typically would constitute ‘short’ interest for tax purposes because of the overnight/short term nature of these arrangements. Prior to the introduction of Finance Act 2012, an interest payment by an Irish cashpool leader to a ‘group’ company (75% or more direct or indirect relationship) resident outside the European Union in a country with which Ireland does not have a DTT may have been regarded as a dividend for tax purposes. There were two tax consequences of this. Firstly, this interest was not deductible for corporation tax purposes, giving rise to an Irish tax cost of 12.5%. Secondly, dividend WHT at a rate of 20% may have applied, although there are a number of exemptions from dividend WHT that may be relevant, depending on the specific circumstances.

Finance Act 2012 has introduced a relieving provision effective for accounting periods ending on or after 1 January 2012 in respect of ‘short’ interest. Short interest is generally regarded as interest on a loan/deposit where the term is less than a year. Essentially, the Irish company will be entitled to a tax deduction for the interest payable to any group company resident outside the European Union in a non-treaty country, provided the recipient country taxes foreign interest income at a rate equal to or greater than the Irish corporate rate. If the recipient country exempts foreign interest, then no relief will be available in Ireland. It should be noted that this will affect not only cash-pooling operations but all forms of short-term lending (i.e. less than one year).

This may create additional borrowing opportunities for Irish treasury companies.

**Transfer pricing**
In April 2010, Ireland enacted broad based transfer pricing legislation. The legislation endorses the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations and adopts the arm’s-length principle. The introduction of general transfer pricing legislation in Ireland was widely anticipated and brings the Irish tax regime into line with international norms in this area. The new regime applies to domestic as well
as international related party arrangements and is effective for accounting periods commencing on or after 1 January 2011 in relation to certain arrangements entered into on or after 1 July 2010.

The new transfer pricing rules apply to arrangements entered into between associated persons, involving the supply or acquisition of goods, services, money, or intangible assets and relating to trading activities within the charge to Irish tax at the trading rate of 12.5%. The rules confer a power on the Irish tax authorities to re-compute the taxable profit or loss of a taxpayer where income has been understated or where expenditure has been overstated as a result of certain non-arm’s-length arrangements. The adjustment will be made to the Irish taxable profits to reflect the arrangement had it been entered into by independent parties dealing at arm’s length.

The legislation also places an obligation on a taxpayer to provide documentation ‘as may reasonably be required’ to support the arm’s-length nature of the related party arrangements and that documentation will need to be prepared ‘on a timely basis’. Guidance notes issued by the Irish tax authorities on transfer pricing documentation support the legislative basis and indicate that a company is required to have transfer pricing documentation available for inspection if requested by the Irish tax authorities. Notably, the guidance notes state that “it is best practice that the documentation is prepared at the time the terms of the transaction are agreed”. Additionally, the guidance notes state that in order “for a company to be in a position to make a correct and complete tax return, appropriate transfer pricing documentation should exist at the time the tax return is filed”. It is worth noting that the taxpayer can maintain documentation in the form ‘of its choosing’. Additionally, where documentation exists in another territory that supports the Irish arrangement, this will also be sufficient from an Irish transfer pricing perspective, provided that the documentation is in English. The Irish tax authorities have also confirmed that they will accept documentation that has been prepared in accordance with either the OECD Transfer Pricing Guidelines or the code of conduct adopted by the EU Council under the title ‘EU Transfer Pricing Documentation’.

Note that arrangements entered into between related parties prior to 1 July 2010 are ‘grandfathered’ and thereby excluded from the scope of the new transfer pricing rules. There is also an exemption from the new rules for small and medium-sized enterprises. Broadly speaking, small and medium-sized enterprises include enterprises employing less than 250 people and that have either a turnover of less than EUR 50 million or assets of less than EUR 43 million.

The Irish tax authorities intend to monitor compliance with the new transfer pricing rules through the Transfer Pricing Compliance Review (TPCR) programme. Under this programme, companies selected will be notified to undergo a self-review of their compliance with the Irish transfer pricing rules. Companies selected will be requested to provide a report to the tax authorities within three months.

Thin capitalisation
Ireland does not have any thin capitalisation rules.

Controlled foreign companies (CFCs)
Ireland does not have CFC rules.
Ireland

**Tax credits and incentives**

The main tax incentives in Ireland are:

- 12.5% corporation tax rate on active business income.
- A 25% credit on incremental R&D spending over the base year of 2003; total effective tax deduction of 37.5%.
- Ability to exploit IP at favourable tax rates.
- Accelerated tax depreciation allowances for approved energy efficient equipment.
- Ability to carry out investment management activities for non-Irish investment funds without creating a taxable presence in Ireland for such funds.
- An effective legal, regulatory, and tax framework to allow for the efficient redomiciliation of investment funds from traditional offshore centres to Ireland.

**R&D credit**

A tax credit of 25% is available on incremental R&D expenditure (i.e. current year qualifying expenditure over qualifying expenditure incurred in a base year fixed at 2003) incurred by a company. This credit is in addition to the normal 12.5% revenue deduction available for the R&D expenditure that gives rise to an effective corporation tax deduction of 37.5%. A limited volume-based approach applies for the purposes of calculating the tax credit so that the first EUR 200,000 of qualifying R&D expenditure will benefit from the 25% R&D tax credit without reference to the base year (i.e. 2003) spend. This means that companies engaging in R&D are guaranteed a credit of EUR 50,000 in respect of their first EUR 200,000 of expenditure.

A separate R&D tax credit is available in respect of expenditure incurred on the construction or refurbishment of a qualifying R&D building. In order to qualify, 35% of the building must be used for qualifying R&D activities, and this threshold is measured over a four-year period. This is of particular assistance where R&D is carried on in a manufacturing environment. The credit available is equal to 25% of the expenditure incurred on the construction or refurbishment of a qualifying building, and the qualifying amount is restricted according to the R&D use. The incremental basis does not apply for expenditure incurred on qualifying R&D buildings.

The R&D tax credit is available for offset against the current year corporation tax liability of the company in the first instance. Any excess can be carried back for offset against the prior year corporation tax liability to generate a tax refund, and any further excess can be monetised over a three-year cycle. The amount that can be monetised is limited to the greater of the corporation tax payable by the company in the preceding ten years or the payroll tax liabilities of the company for both the period in which the R&D expenditure is incurred and the prior year (subject to an adjustment dependent upon previous claims).

In addition, companies may account for the R&D tax credit through their profit and loss account or income statement in arriving at the pre-tax profit or loss. This immediately impacts the unit cost of R&D, which is the key measurement used by multi-national corporations (MNCs) when considering the locations of R&D projects. Companies that are in receipt of an R&D tax credit have the option, in certain instances, to reward key employees through an alternative use of that credit. In effect, the company may surrender a portion of their R&D credit (that could otherwise have been used to reduce corporation tax) to 'key employees' to reduce their effective rate of tax to 23% (the average effective rate of tax for such employees would typically be in excess of 40% in the absence of such R&D tax credit.) In order to qualify as a 'key employee',
the individual must perform 50% or more of their employment duties on qualifying R&D activities.

The R&D regime caters to pre-trading expenditure incurred on qualifying R&D activities. Where a company incurs R&D expenditure but has not yet commenced to trade, an R&D claim in this regard must be made within 12 months from the end of the accounting period in which the company first commences to trade.

It should be noted that expenditure incurred on the acquisition of intangible assets that qualify for capital allowances under the IP regime and expenditure incurred in registering/applying for legal protection for intangible assets that are developed as a result of R&D activities do not qualify for the R&D credit.

**Intellectual property (IP) regime**

Legislation provides for a tax deduction for capital expenditure incurred by a company, which is carrying on a trade, on the acquisition of qualifying IP assets. The definition of IP assets is widely drafted and includes the acquisition of, or the licence to use, the following:

- Patents and registered designs.
- Trademarks and brand names.
- Know-how (broadly in line with the OECD model tax treaty definition of know-how).
- Domain names, copyrights, service marks, and publishing titles.
- Authorisation to sell medicines, a product of any design, formula, process, or invention (and rights derived from research into same).
- Applications for legal protection (for example, applications for the grant or registration of brands, trademarks, patents, copyright, etc.).
- Expenditure on computer software acquired for commercial exploitation.
- Goodwill, to the extent that it relates directly to the assets outlined above.

Capital allowances will be available at the same rate as the depreciation/amortisation charge for financial accounting purposes. Alternatively, the company may elect to claim allowances over a period of 15 years.

Tax deductions (e.g. financing costs, IP capital allowances) are available for offset against income generated from exploiting qualifying IP assets, up to a maximum deduction of 80% of the relevant IP profits. The remaining 20% is taxable at the 12.5% corporation tax rate on the basis that the company is carrying on a trade. There is no clawback, provided the IP is held for five years.

A shorter write-off period of eight years has also been retained for acquired software rights under the existing capital allowances regime where the rights are not acquired for commercial exploitation (i.e. were acquired for end use by the company).

**Exemption for new start-up companies**

A corporation tax holiday applies to certain start-up companies that commence to trade during 2012, 2013, and 2014. The relief applies for three years where the total amount of corporation tax payable does not exceed EUR 40,000 in each year. Marginal relief is available where corporation tax payable is between EUR 40,000 and EUR 60,000. The relief available is now linked to the amount of employer’s PRSI paid by a company in an accounting period and is intended to target the relief at companies generating employment.
Ireland

The Finance Act 2013 now allows unused relief arising in the first three years of trading (due to insufficiency of profits) to be carried forward for use in subsequent years.

Section 110 company
Ireland has a favourable tax regime for entities known as Section 110 companies. A Section 110 company is an Irish resident special purpose company that holds and/or manages ‘qualifying assets’ and provides for an onshore investment platform with access to Ireland’s treaty network where the Irish company is the beneficial owner of the income flow. The Section 110 regime has been in existence since 1991 and, with appropriate structuring, can provide for an effective corporate tax rate of close to 0%, provided a number of conditions are satisfied. The regime is widely used by international banks, asset managers, hedge funds, private equity firms, and investment funds in the context of securitisations, investment platforms, collateralised debt obligations (CDOs), acquisition of distressed loan portfolios, big ticket leasing, and capital markets bond issuances.

Recent legislative changes have expanded the range of assets that a Section 110 company can invest in. Section 110 companies are permitted to invest in financial assets, commodities, and plant and machinery.

The term ‘financial asset’ is widely defined and includes both mainstream financial assets such as shares, loans, leases, lease portfolios, bonds, debt, and derivatives, as well as assets such as greenhouse gas emissions allowances and carbon offsets.

In addition, the extension of the Section 110 regime in 2011 to include plant and machinery has increased the attractiveness of Ireland as the preferred destination for aircraft financing and leasing activities.

Grants
Cash grants may be available for capital expenditures on machinery and equipment and industrial premises, training of employees, creation of employment, rent subsidies, R&D, manufacturing and exporting products, providing services to customers overseas, etc. The level of grant aid depends on a number of factors and is specific to each project. Rates depend on the location of the new industry.

Foreign tax credit
Foreign taxes borne by an Irish resident company (or Irish branch of an EEA resident company), whether imposed directly or by way of withholding, may be creditable in Ireland. The calculation of the credit depends on the nature of the income item, but for income sources other than dividends and some related party interest, the credit is limited to the Irish tax referable to the particular item of income. A system of onshore pooling of excess foreign tax credits applies to dividends from 5% or greater corporate shareholdings, and excess credits in the dividend pool can be carried forward indefinitely. A similar pooling system applies to some related party interest and also to foreign branch income.

An Irish resident company with a branch or branches outside Ireland is generally taxable in Ireland on the foreign branch profits with a credit for foreign taxes paid on those profits. A unilateral form of credit relief for foreign taxes paid by foreign branches operating in countries with which Ireland does not have a tax treaty is available also. To the extent that there were foreign taxes on branch profits that were not utilised in the relevant period (that is, where credit for foreign tax exceeds the Irish tax payable), these unused credits can be carried forward indefinitely and credited against corporation tax on foreign branch profits in future accounting periods.
Finance Act 2012 introduced a number of beneficial changes to the computational rules that provide relief for foreign tax on royalties. In effect, the changes provide for a form of pooling of tax deductions in relation to foreign tax on royalties where the royalty income is taken into account in computing the trading income of a trade carried on by the company.

More recently, Finance Act 2013 introduced an additional tax credit on certain dividends received by an Irish Holdco from an EU/EEA subsidiary that is subject to either the 12.5% or 25% rate of Irish tax.

The additional tax credit will provide for a credit up to the amount of Irish tax in instances where the Irish nominal rate is lower than nominal rate of tax on the underlying profits in the country where the profits are sourced.

---

**Withholding taxes**

Irish resident companies are required to withhold tax on certain types of payments as set out below (see sub-sections below for WHT exemptions and table at end of this section for WHT rate reductions).

**Dividend WHT**

Dividend WHT applies at 20% to dividends and other distributions. However, an exemption may be available where the recipient of the dividend is either an Irish company or a non-Irish company eligible for the Parent-Subsidiary Directive (which in Ireland requires a 5% or greater shareholding).

Exemptions from dividend WHT also are available where the recipient of the distribution falls into one of the categories listed below and provided an appropriate declaration is made to the company paying the distribution in advance of the distribution. In a move to significantly ease the administrative burden in applying for exemption for dividend WHT, this declaration is now self-assessed and valid for up to six years.

- Irish tax resident companies (a declaration is not required for Irish tax resident companies that hold a 51% or greater shareholding of the company).
- Non-resident companies, which are resident in a country with which Ireland has a tax treaty or in another EU member state, where the company is not controlled by Irish residents.
- Non-resident companies that ultimately are controlled by residents of a tax treaty country or another EU member state.
- Non-resident companies whose principal class of shares is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minster for Finance (or if recipient of the dividend is a 75% subsidiary of such a listed company).
Ireland

- Non-resident companies that are wholly owned by two or more companies the principal class of shares of each of which is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minister for Finance.
- Individuals who are resident in a tax treaty country or in another EU member state.
- Certain pension funds, retirement funds, sports bodies, collective investment funds, and employee share ownership trusts.

Companies that make a dividend distribution are required, within 14 days of the end of the month in which the distribution is made, to make a return to the tax authorities containing details of the recipient of the dividend, the reason for any exemption from dividend WHT, and to pay over any tax withheld.

**Interest WHT**

Financial institutions operating in Ireland are obligated to withhold tax (deposit interest retention tax or DIRT) at 33% out of interest paid or credited on deposit accounts in the beneficial ownership of resident companies, unless the financial institution is authorised to pay the interest gross. There is no DIRT on interest paid to non-residents where a written declaration of non-residence is completed. Certain annual interest payments are subject to WHT at 20%. Interest payments by companies to companies resident in other EU member states or in treaty countries are generally not subject to WHT. The EU Interest and Royalties Directive may also provide an exemption from WHT for payments between associated companies.

**Royalties WHT**

Royalties, other than patents, are not generally subject to WHT under domestic law. Documentation and reporting may be required to access lower treaty withholding rates in other cases. The EU Interest and Royalties Directive may also provide an exemption from WHT for payments between associated companies. Associated companies, for the purpose of this directive, are companies where one can directly control at least 25% of the voting power of the other or at least 25% of the voting power of both companies is directly controlled by a third company. In all cases, all companies must be resident in a member state of the European Union.

**WHT on capital gains**

Where any of the following assets is disposed of, the person by whom or through whom the consideration is paid (i.e. the purchaser) must deduct capital gains tax at 15% from the payment:

1. Land or minerals in Ireland or exploration rights in the Irish continental shelf.
2. Unquoted (unlisted) shares deriving their value or the greater part of their value (more than 50%) from assets described in (1).
3. Unquoted (unlisted) shares issued in exchange for shares deriving their value or the greater part of their value from assets as described in (1).
4. Goodwill of a trade carried on in Ireland.

The requirement to withhold tax is not required where the consideration does not exceed EUR 500,000 or where the person disposing of the asset produces a certificate from the Revenue Commissioners authorising payment in full. A clearance certificate may be obtained by making application on Form CG50 to the Revenue Commissioners supported by a copy of the agreement or contract for sale. The certificate may be obtained on the grounds that the vendor is Irish resident or that no capital gains tax is due in respect of the disposal or that the capital gains tax has been paid. WHT
is creditable against the capital gains tax liability of the vendor, and any excess is refundable.

To avoid the requirement to withhold, clearance must be obtained before the consideration is paid. There is no exemption from the withholding procedure where the asset is held as trading stock or where the transaction is intra-group and a capital gains tax liability does not arise. Failure to obtain the certificate will lead to the purchaser being assessed to capital gains tax for an amount of 15% of the consideration.

**Professional services withholding tax (PSWT)**
Individual income tax at the standard rate (currently 20%) is deducted from payments for professional services by government departments, state bodies, and local authorities. Credit is granted for any PSWT withheld against the corporation tax (or income tax for an individual) liability of the accounting period in which tax is withheld.

**Relevant contracts tax (RCT)**
There are special WHT rules (with exemptions available) relating to payments made by principal contractors to sub-contractors in respect of relevant contracts in the construction, forestry, and meat processing industries. Where relevant operations under a relevant contract are carried out in Ireland, the RCT system applies regardless of whether or not parties to the contract are non-resident in Ireland, parties to the contract are not liable to tax in Ireland in respect of those operations, the contract is executed outside Ireland, or payments under the contract are made outside Ireland. It is important to note that principal contractors, liable to RCT, may not operate in the above industries. In the case of construction in particular, relevant contracts may be entered into by a variety of entity types. For example, electricity generation, oil and gas, and telecommunications undertakings are all classed as principal contractors. Relevant operations are broadly defined and include repairs to buildings and structures; ground works; installation, alteration, and repairs to various systems in buildings, such as electrical, ventilation, water supply, and telecommunications; mining and exploration works; and certain haulage contracts.

The principal contractor must deduct tax at rates of 20% or 35% from such payments and remit this to the Revenue. The rate that is applied to a sub-contractor will principally depend on the sub-contractor’s tax compliance record. The 20% rate will apply to sub-contractors who are registered with Revenue and have a good tax compliance record, including foreign tax compliance in the case of foreign companies. A zero rate of RCT applies where the sub-contractor makes an application to the Revenue and provides evidence that there is a bone fide business and is substantially tax compliant. Principals must notify each payment on Revenue’s online system and obtain an authorised rate before making any payment, otherwise penalties may apply. The gross amount receivable under the contract is included in the computation of the profit of the sub-contractor, and the sub-contractor is entitled to credit for, or offset of, the tax suffered.

**WHT rate reductions and exemptions**
Exemptions and rate reductions apply under domestic law and under tax treaties. Where an exemption from WHT is not available (please see sections above for domestic law exemptions), a reduced rate of WHT may apply under an applicable tax treaty. The table below sets out the reduced rates of WHT that may be available to payments from Ireland of dividends, interest, and royalties under an applicable tax treaty.

Legislation recently has been amended to allow for favourable treatment in situations where a DTT has been signed but not yet ratified.

* These treaties are currently under renegotiation.

** Awaiting ratification.

Notes

1. See Dividend WHT sub-section above for domestic WHT exemptions.
2. See Interest WHT sub-section above for domestic WHT exemptions.
3. See Royalties WHT sub-section above for domestic WHT exemptions.
4. Where the beneficial owner of the dividends is a resident of a contracting state and is a company that directly holds at least 25% of the capital of the company paying the dividends.
5. Refer to Ireland/Pakistan DTT.
6. Where the beneficial owner of the dividends is a resident of the contracting state and is a company that controls, directly or indirectly, 10% or more of the voting power in the company paying the dividends.
7. Where the beneficial owner of the dividends is a resident of the contracting state and is a company that directly controls 10% or more of the voting power in the company paying the dividends.
8. For loans from banks and for some territories sales on credit of equipment.
9. Where the beneficial owner of the dividends is a resident of the contracting state and controls, directly or indirectly, at least 10% of the voting power in the company paying the dividend and has invested more than EUR 100,000 in the capital of the company paying the dividend.
10. Where the beneficial owner of the dividends is a resident of a contracting state and is a company that directly holds at least 70% of the voting power of the company paying the dividends.
11. Refer to DTT.
12. New treaty will come into effect from 1 January 2014.
13. Where the beneficial owner of the dividends is a resident of a contracting state and is a company that directly controls at least 20% of the voting power of the company paying the dividends.
Ireland

14. Where the beneficial owner of the dividends is a resident of a contracting state and is a company that directly holds at least 25% of the voting power of the company paying the dividends.
15. Where the beneficial owner of the dividends is a resident of a contracting state and is a company that directly holds at least 10% of the capital of the company paying the dividends.
16. Where the beneficial owner of the dividends is a resident of a contracting state and is a company that controls, directly or indirectly, at least 25% of the voting power of the company paying the dividends.
17. Where the beneficial owner of the dividends is a resident of a contracting state and is a company that holds, directly or indirectly, at least 10% of the capital of the company paying the dividends.

Ireland is currently negotiating treaties with the following countries

- Argentina
- Azerbaijan
- Jordan
- Thailand
- Tunisia

---

Tax administration

Taxable period
The tax accounting period normally coincides with a company’s financial accounting period, except where the latter period exceeds 12 months.

Tax returns
Corporation tax returns must be submitted within nine months (and no later than the 23rd day of the ninth month) after the end of the tax accounting period in order to avoid a surcharge (maximum of EUR 63,485) or a restriction of 50% of losses claimed, to a maximum of EUR 158,715.

Payment of tax
Corporation tax payment dates are different for ‘large’ and ‘small’ companies. A small company is one whose corporation tax liability in the preceding period was less than EUR 200,000. Interest on late payments or underpayments is applied at approximately 10% per year.

Large companies
For large companies, the first instalment of preliminary tax totalling 45% of the expected final tax liability, or 50% of the prior period liability, is due six months from the start of the tax accounting period (but no later than the 23rd day of the month).

The second instalment of preliminary tax is due 31 days before the end of the tax accounting period (but no later than the 23rd day of the month). This payment must bring the total paid up to 90% of the estimated liability for the period.

The balance of tax is due when the corporation tax return for the period is filed (that is, within nine months of the end of the tax accounting period, but no later than the 23rd day of the month in which that period of nine months ends).

Small companies
Small companies are only required to pay one instalment of preliminary tax. This is due 31 days before the end of the tax accounting period (but no later than the 23rd day of the month).

The company can choose to pay an amount of preliminary tax equal to 100% of the corporation tax liability for its immediately preceding period or 90% of the estimated...
liability for the current period. As is the case for large companies, the final instalment is due when the corporation tax return is filed.

**Tax audit process**
A system of self-assessment and Irish Revenue audits is in operation in Ireland.

**Statute of limitations**
Irish Revenue may undertake an audit of a company’s tax return within a period of four years from the end of the accounting period in which the return is submitted.

**Topics of focus for tax authorities**
The Irish tax authorities intend to monitor compliance with the new transfer pricing rules through the TPCR programme. Under this programme, companies selected will be notified to undergo a self-review of their compliance with the Irish transfer pricing rules. Companies selected will be requested to provide a report to the tax authorities within three months.

**Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA)**
The US-Ireland IGA defined the types of Irish financial institutions that are in scope for FATCA as a custodial institution, a depository institution, an investment entity, or a specified insurance company. Specific definitions are attached to each type of entity.

The US-Ireland IGA also defines the types of institutions that are either exempt from the scope of FATCA or that can qualify as ‘Deemed-Compliant Financial Institutions’. Entities qualifying under the ‘Deemed Compliant’ status will benefit from a reduced compliance burden under FATCA.

Under the IGA and its enabling Irish provisions, reporting Irish financial institutions will not be required to sign an agreement with the US IRS, as envisaged by the FATCA regulations. Instead, relevant entities must report account holder information annually to Irish Revenue Commissioners. The Irish Revenue Commissioners will then collate and exchange this information with the US IRS.

Under the US-Ireland IGA, reporting Irish financial institutions are considered to be compliant with local regulations, and, as a result, those entities should not suffer 30% FATCA WHT on US-source income or gross proceeds. Similarly, reporting Irish financial institutions should not be obligated to operate 30% FATCA WHT on such payments made to recalcitrant account holders or investors, provided the requirements of the IGA are met. This is a very positive feature of the US-Ireland IGA, and means that the task of developing complex WHT systems to identify and withhold on payments to certain account holders is avoided in most cases.

**Other issues**

**Asset management**
Irish tax legislation contains provisions aimed at promoting Ireland as a leading location for the management of both Undertakings for Collective Investment in Transferable Securities (UCITS) and non-UCITS funds. UCITS IV brought about fundamental changes to both the management and structuring of UCITS. One of the reforms introduced permits UCITS management companies located in one EU jurisdiction to manage UCITS domiciled in another EU jurisdiction. One of the areas of concern is whether the activities of the management company could bring a foreign
Ireland

UCITS within the charge to tax in the management company's home jurisdiction (e.g. by creating a branch or agency or causing the fund to be regarded as tax resident there). Irish legislation provides that an Irish management company managing a non-Irish UCITS will not be regarded as a branch or agency of the non-Irish UCITS and will not bring the profits of the foreign UCITS within the charge to Irish tax or treat the foreign UCITS as an Irish regulated fund.

Following the US and OECD review of offshore domiciles, which has resulted in increased regulation and tax obligations, fund managers are being forced to consider possible alternative onshore jurisdictions for their investment fund products. Because of the international reputation of its asset management industry and the favourable corporate tax regime, Ireland is seeing a significant trend in investment managers moving their investment platforms to Ireland from the traditional offshore jurisdictions. Recent company law changes also allow corporate funds to migrate to Ireland through a re-registration process, whereby the fund company would benefit from its continued existence, including the ability to retain the fund’s performance track record post migration and avoid potential adverse tax consequences and costs that typically arise from a merger of an offshore fund with a new onshore fund. The Irish Central Bank has introduced a coordinated authorisation process to facilitate speed to market, which at present is a key advantage in comparison to delays being experienced in other EU domiciles.

International funds sector
Recent legislation has introduced a number of provisions designed to support and enhance the international funds sector in Ireland, as set out in further detail below:

Funds re-domiciling to Ireland
Finance Act 2012 provided that where the Central Bank has authorised an investment fund that has re-domiciled to Ireland from certain offshore centres, a declaration can be made by the fund stating that the unitholders are non-Irish resident, to ensure that no Irish tax charge arises in respect of such non-residents, thereby clarifying the tax exemption applying to payments made by Irish funds to non-resident investors. To the extent that there are any Irish resident unitholders, these need to be identified in the declaration and tax accounted for, where appropriate, on any payments made to such unitholders.

Cross-border fund mergers involving Irish funds
Measures have been introduced confirming that mergers (both inbound and outbound) involving an Irish fund with a fund located in a member state of the European Union, European Economic Area, or an OECD country with which Ireland has entered into a DTT will not give rise to a charge to tax in respect of Irish resident investors. Effectively, the charge to tax is deferred until the ultimate disposal of the replacement units. The calculation of any future gain on such units is calculated by reference to the cost of the original units.

Finance Act 2012 also confirmed that no charge to Irish tax shall arise on the transfer of units in the formation of certain master/feeder structures.

Finance Act 2012 also included a number of significant stamp duty exemptions available for collective investment vehicles.
Real Estate Investment Trusts (REITs)

REITs were introduced by Finance Act 2013 with a view to boosting the real estate industry in Ireland. The REIT will be exempt from tax on income and capital gains, provided certain conditions are met, notably the requirement to distribute at least 85% of property income annually and that at least 75% of the aggregate income of the REIT must derive from carrying on property rental business. There are also requirements regarding the number of properties held and the financing arrangements. Distributions made by the REIT will be subject to WHT of 20%, with exemption/reduced rates available for eligible investors. The REIT must be incorporated and resident in Ireland and listed in an EU jurisdiction. This vehicle provides access to market for smaller investors and facilitates capital injections into the Irish property market without an additional layer of taxation.

Irish corporate structure for investment funds

The Irish funds industry continues to work with the Irish government to explore new products that could enhance the competitiveness of Ireland's fund offering on the global stage.

The Irish Minister for Finance has committed to the introduction of a corporate structure for regulated investment funds.

Currently, investment funds in Ireland structured as companies are incorporated as public limited companies ('plc') under the Irish Companies Acts. The new corporate structure will be specifically designed for investment funds and will not be subject to the legislation governing other types of companies, thereby removing the need to comply with certain requirements under the Companies Acts. The legislation will also increase the range of structures open to investment managers and promoters establishing funds in Ireland.

One of the main advantages of the new corporate structure will be the ability of this structure to 'check-the-box' (an election to be regarded as tax transparent) for US tax purposes, whereas an Irish plc cannot avail of this election. This is seen as a very positive development in the funds industry, particularly in the context of investment funds seeking to re-domicile from traditional tax haven jurisdictions to a regulated jurisdiction like Ireland.

It is intended that the new corporate fund will qualify for the tax exemptions that apply to Irish regulated funds.

Islamic finance

Through a combination of pre-existing tax legislation and specific amendments to tax legislation introduced in 2011, Irish tax law facilitates most Islamic finance transactions, including *ijara* (leasing), *takaful* (insurance), *re-takaful* (reinsurance), *murabaha* and diminishing *musharaka* (credit arrangements), *mudaraba* and *wakala* (deposit arrangements), and *sukuk*. While there is no specific reference in the legislation to Islamic Finance, rather the reference is to Specified Financial Transactions, overall, the premise of the legislation in Ireland is to ensure that Islamic finance transactions are treated in the same favourable manner as conventional financing transactions.

The legislation also facilitates the favourable taxation (and tax impact) of UCITS management companies. The UCITS structure is one of the most commonly used structures for many different types of Islamic funds, such as retail Islamic equity funds,
Ireland

Shariah-compliant money market funds, Shariah-compliant exchange traded funds (ETFs), etc. This demonstrates the desire of Irish government and Irish tax authorities to enhance the attractiveness of Ireland as a location for Islamic finance transactions by extending to this form of financing the relieving provisions that currently apply to conventional financing. Since the introduction of the facilitating legislation in Ireland in 2011, subsequent Finance Acts have seen the introduction of more minor or technical changes, all intended to facilitate the development of the industry in Ireland.

Islamic insurance
The Irish Revenue recently provided guidance in respect of the Irish tax treatment of general takaful (non-life), re-takaful (reinsurance), and family (life) takaful arrangements. Legislative changes are not currently required to facilitate Islamic insurance in Ireland.

Choice of legal entity
Foreign investors tend to operate either through an Irish legal entity or as a branch of a foreign entity. Both are equally valid means of doing business in Ireland, and the choice will normally depend on the commercial fact pattern and individual circumstances of the investor parent company.

Mandatory disclosure
In a move to promote transparency between taxpayers, practitioners, and tax authorities, provisions relating to the disclosure of tax schemes are applicable. These require promoters of such schemes to provide information to the tax authorities within a specified time of having made the scheme available. A transaction that comes within the new law and must therefore be reported to Revenue is not necessarily a tax avoidance transaction for the purposes of existing legislation. The rules are wide reaching and essentially cover all tax heads, including corporation tax, income tax, capital gains tax, stamp duty, VAT, customs duties, and excise duties.
**Isle of Man**

**Significant developments**

**Tax treaties**

Since January 2013, the Isle of Man has signed double tax agreements (DTAs) with the Seychelles, Jersey, and Guernsey. In addition, the Isle of Man signed a tax information exchange agreement (TIEA) with Argentina in December 2012, its first with a South American country.

These latest agreements mean that the Isle of Man has now signed ten DTAs and 27 TIEAs. All of these agreements, with the exception of the United Kingdom (UK) DTA, meet the Organisation for Economic Co-operation and Development (OECD) international standard on tax co-operation and transparency.

The DTA with Belgium, signed in July 2009, is still awaiting ratification.

**Extension of the 10% rate band to corporate retailers**

In the 2013 budget, the Treasury introduced an extension to the 10% income tax rate band to include corporate taxpayers who carry on a retail business in the Isle of Man and who have taxable profits of more than the ‘small company limit’ of 500,000 Isle of Man pounds (IMP) from such business. All other corporate retailers will continue to be chargeable at the standard 0% rate of income tax. The new rate applies with effect from 6 April 2013.

**Corporate residence**

With effect from 14 December 2012, the legislation relating to company residence has been amended so that a company that is incorporated in the Isle of Man will not be resident if it can prove to the satisfaction of the Assessor that:

- its business is centrally managed and controlled in another country
- it is resident for tax purposes under the other country’s law
- either it is resident for tax purposes under the other country’s law under a DTA in which a tie breaker clause applies or the highest rate at which any company may be charged to tax on any part of its profits in that other country is 20% or higher, and
- there is a bona fide commercial reason for its residence status in the other country, which is not motivated by a desire to reduce Isle of Man tax.

**Income attributed to shareholders**

For accounting periods ending prior to 5 April 2012, legislation existed that attributed the profits of an Isle of Man resident company to any Manx resident shareholders as if that profit had been distributed to them. Although any resulting tax charge fell on the shareholder, the legislation placed reporting and filing obligations on the Isle of Man resident company in respect of profits realised and distributions made.
Isle of Man

This legislation was abolished in the 2011 budget and no longer applies for accounting periods commencing after 6 April 2012.

---

**Taxes on corporate income**

Companies resident in the Isle of Man are taxed on their worldwide income and are required to file an annual income tax return reporting worldwide taxable profits calculated in line with local legislation and practice.

A non-resident company incorporated outside the Isle of Man but having a place of business or a permanent establishment (PE) on the Isle of Man will be taxed on the profit attributable to the Isle of Man establishment.

The majority of companies pay income tax at 0% in the Isle of Man.

A 10% rate of tax applies to income received by a company from any of the following sources:

- Banking business.
- Land and property in the Isle of Man (including property development, residential and commercial rental or property letting, and mining and quarrying, but excluding farming).
- Retail business in the Isle of Man where the taxable profits are over the ‘small company limit’ of IMP 500,000.

The general rules for the calculation of taxable income are the same whether a company is liable to tax at 0%, 10%, or a combination of both rates. Both resident and non-resident companies are taxed on their income at the same rates.

Unilateral relief from double taxation in respect of foreign-source income is given by way of tax credit.

**Local income taxes**

There are no profit based taxes levied by local government in the Isle of Man. However, commercial business rates are payable. Premises are assessed and given a ‘rateable value’ that forms the basis of the annual rates charge levied.

**Corporate residence**

A company incorporated in the Isle of Man is automatically resident for tax purposes and must therefore file an annual income tax return whether it pays tax at 0% or 10%.

A company that is incorporated elsewhere will be considered resident in the Isle of Man if it is ‘managed and controlled’ in the Isle of Man, and will be taxed on their worldwide income accordingly. ‘Managed and controlled’ is generally interpreted as being the place where the board of directors meets, although this is not always conclusive.

In cases where a company is resident in a country with which the Isle of Man has a tax treaty, then a tie-breaker may operate to determine residence.
With effect from 14 December 2012, the legislation relating to company residence has been amended so that a company that is incorporated in the Isle of Man will not be resident if it can prove to the satisfaction of the Assessor that:

- its business is centrally managed and controlled in another country
- it is resident for tax purposes under the other country’s law
- either it is resident for tax purposes under the other country’s law under a DTA in which a tie breaker clause applies or the highest rate at which any company may be charged to tax on any part of its profits in that other country is 20% or higher, and
- there is a bona fide commercial reason for its residence status in the other country, which is not motivated by a desire to reduce Isle of Man tax.

**Permanent establishment (PE)**
A place of business includes a PE, such as a branch office or shop, factory, workshop, or mine. The definition of a PE is not set out in statute, and, in cases where the company is resident in a country with which the Isle of Man has a DTA, the terms of the agreement would determine the company’s residence.

**Other taxes**

**Value-added tax (VAT)**
VAT is a transaction-based tax applied on the domestic supply of most goods and services and is currently charged at a standard rate of 20%. VAT is designed to be a tax borne by the final consumer, and there is a mechanism for businesses to recover VAT incurred in a supply chain, subject to meeting certain conditions.

For VAT purposes, the Isle of Man forms a single VAT jurisdiction with the United Kingdom, and the VAT rules are broadly identical. This means that VAT is charged on supplies between Isle of Man and UK businesses as if they were domestic supplies. The Isle of Man has its own tax authorities who work in conjunction with the UK tax authorities.

Some supplies are charged at 0%, including food, books and publications, and public transport, and there is also a 5% rate applied to domestic property repairs, amongst others. Finally, some supplies are exempt from VAT, including insurance and financial services, betting and gaming, education, and health.

**Customs and excise duties**
In addition to VAT, the Isle of Man forms a common jurisdiction for customs and excise duties with the United Kingdom, and, again, the rules are broadly identical. Customs duties are levied on most goods imported from outside the European Union (EU) into the Isle of Man, and there are various rates of duty that apply. Excise duties apply to such things as alcohol, tobacco, and fuels, and there are various rates of duty that apply. There is also a levy on commercial passenger flights known as Air Passenger Duty.

**Property taxes**
There are no property-related taxes for companies other than income tax payable at a rate of 10% on their profits from the rental or development of land or property situated in the Isle of Man, and business rates as detailed in the Taxes on corporate income section.

**Transfer taxes**
There are no capital transfer taxes in the Isle of Man.
Isle of Man

**Stamp taxes**
There is no stamp duty payable in the Isle of Man.

**Betting duty**
There are no other transaction taxes in the Isle of Man other than betting duty on gaming transactions, which is levied at differing rates of up to 15%, depending on the nature of the gaming transaction and whether it is online or land-based.

**National Insurance contributions**
In addition to deducting ‘National Insurance’ contributions from their employees earnings, employers in the Isle of Man are required to make a ‘secondary’ National Insurance contribution in respect of each of their employees, depending on the individual’s circumstances.

The standard rate of secondary contribution is 12.8% on earnings over IMP 117 per week, but reduced rates apply in certain circumstances where the employee is a member of a pension scheme.

From 6 April 2012, in order to reduce the costs of taking on additional employees, employers have been able to apply for an exemption from paying the secondary contribution where certain conditions are met. This concession will be in force until 5 April 2015.

**Branch income**
The income of branches is taxed in the same way as other corporate income in the Isle of Man. Foreign companies with branches in the Isle of Man will be taxed at the appropriate rate on the profits attributable to the Isle of Man establishment.

**Income determination**
The general rules for the calculation of taxable income are the same whether a company is liable to tax at 0%, 10%, or a combination of both rates.

**Inventory valuation**
Inventories are generally stated at the lower of cost or market value. Any method of valuation that accords with sound commercial principles is acceptable for tax purposes, provided it is adopted consistently at the beginning and end of the accounting period and does not conflict with tax law. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base stock method or the last in first out (LIFO) method.

In general, the book and tax methods of inventory valuation must conform.

**Capital gains**
There is no capital gains tax in the Isle of Man.

**Dividend income**
Dividends are taxed at the standard rate of 0%. Dividends received from Isle of Man companies will not have suffered withholding tax (WHT).
**Banking income**
Licensed banks are taxed at 10% on income from deposit taking, and any related activities, and interest earned from the investment of regulatory reserves only.

Income earned on capital and reserves in excess of the regulatory capital, group funded lending, fiduciary deposits, assurance, insurance, custody, trust, and corporate services are not banking business and are therefore taxed at 0%.

General expenses are allocated against 0% and 10% income streams on a pro rata basis.

**Rental income**
Companies with profits arising on rental income in respect of land or property situated in the Isle of Man are charged to income tax at a rate of 10%. This applies whether or not the company is resident in the Isle of Man.

**Foreign income**
Resident corporations are liable to tax on their worldwide income (albeit the relevant rate of tax is often 0%). UK tax is relieved under the treaty with the United Kingdom by way of tax credits. However, the treaty does not cover dividends or debenture interest. Where a liability to tax at 10% arises, the Isle of Man grants unilateral relief from double taxation in respect of all foreign-source income arising outside the United Kingdom by way of tax credit.

**Deductions**
Relief is given in calculating the taxable profit of a company if the expense is incurred in the normal course of the business and is incurred wholly and exclusively for business purposes. However, certain expenses that are deductible in the computation of profits are not allowable for tax purposes. These include depreciation, unpaid but accrued pension and bonus payments, certain lease payments, and interest paid to non-Manx resident lenders.

**Depreciation**
Depreciation charged in accounts is not allowable for tax purposes. Instead, relief for depreciation is given using ‘capital allowances’ based on a reducing-balance method. Plant and machinery, tourist premises, industrial buildings, commercial buildings within a designated area, fish processing buildings, and agricultural buildings and works have an initial allowance of 100%. There are restrictions on allowances for expensive motorcars.

Isle of Man government grants are not taken into account in determining the amount of expenditure on which allowances may be given.

Tax depreciation is not required to conform to book depreciation.

Upon disposal, allowances will be reclaimed on the resale value, restricted to cost.

**Goodwill**
No relief is given against trading profits for the purchase of goodwill.

**Start-up expenses**
Start-up expenses incurred in the three years prior to the commencement of trading, which would have been deductible as a trading expense if incurred after the
commencement of trading, are treated as a loss arising in the year trading commenced, and relief for these losses can be claimed subject to the normal loss-relief rules.

**Interest expenses**
Interest paid to lenders subject to Isle of Man tax is allowable in full. Interest paid to lenders not subject to Isle of Man taxation is allowable if it is incurred in the normal course of the business and is wholly and exclusively for business purposes. Only interest charged at a reasonable commercial rate will be allowed as a deduction.

**Bad debt**
Relief against trading profits is only available in respect of specific bad debts. General provisions are not allowable.

**Charitable contributions**
Broadly, trading companies are able to claim a deduction for donations made to charities, subject to a maximum of IMP 15,000 or 1% of their taxable income, whichever is greater.

**Fines and penalties**
No relief is available for any payments made in respect of fines or penalties, whether related to income tax compliance or otherwise.

**Taxes**
Local income taxes paid are not deductible when calculating net taxable profit.

**Net operating losses**
Losses can be carried forward indefinitely against future profits from the same trade.

Trading losses incurred may be carried back against preceding year profits. There are additional rules that apply in the opening years of trade. Terminal losses in the last year of trade can be carried back against profits for the previous three years of trading.

**Payments to foreign affiliates**
There is no transfer pricing regime in the Isle of Man. If, however, the Assessor of Taxes is of the opinion that the main purpose, or one of the main purposes, of any transaction is the avoidance or reduction of tax liability, assessments may be made to counteract that avoidance or reduction of tax liability.

*For details of WHTs, please see the Withholding taxes section.*

**Group taxation**
Trading losses and excess capital allowances may be surrendered (subject to certain restrictions) between 75% affiliates resident in the Isle of Man. Similar concessions are available to members of a consortium, but only a fraction of the loss or excess may be set-off, that fraction being equal to the members’ share in the consortium in the relevant year of assessment.

**Transfer pricing**
There is no transfer pricing regime in the Isle of Man. If, however, the Assessor of Taxes is of the opinion that the main purpose, or one of the main purposes, of any transaction is the avoidance or reduction of tax liability, assessments may be made to counteract that avoidance or reduction of tax liability.
**Thin capitalisation**
There is no specific thin capitalisation rule in the Isle of Man.

**Controlled foreign companies (CFCs)**
There is no CFC regime in the Isle of Man.

**Tax credits and incentives**
In view of the low rate of income tax in the Isle of Man, there are no special tax incentives available.

**Foreign tax credit**
See Foreign income in the Income determination section for a description of foreign tax credits.

**Withholding taxes**
WHT should be deducted from certain payments made to non-residents by Isle of Man resident companies as follows:

- Rent from Manx land and property: 10% if paid to a company, 20% if paid to an individual.
- Dividends: WHT is not required.
- Loan interest and royalties: WHT is generally not required, but there are certain exceptions that may apply.
- Other: The Assessor of Income Tax in the Isle of Man has the power to require WHT, at a rate determined by the Assessor (typically 20%), on payments of taxable income made to a non-resident (e.g. payments made to non-resident sub-contractors).

**Tax administration**

**Taxable period**
An accounting period for tax filing purposes can be no more than 12 months.

**Tax returns**
All companies are required to submit income tax returns on an accounting-period basis, whether they are liable to tax at 0% or at 10%. The tax return is due for submission one year and one day following the end of an accounting period. Where the financial statements cover more than 12 months, two (or more) returns may be required.

Fixed rate penalties apply if returns are filed late. The Assessor of Taxes also has the powers to raise a default assessment where a tax return has not been filed.

**Payment of tax**
Payment of tax is due within one year and one day of an accounting period end. Interest is charged on tax paid late.

**Tax audit process**
Companies are subject to an audit of their accounts on an annual basis unless they qualify for exemption under the regulatory codes and guidelines issued by the Isle of Man General Registry.
Isle of Man

Where a company qualifies for exemption from the audit requirement, it must make an election during the course of the relevant financial period.

All Isle of Man registered companies are required to file an annual return to the Isle of Man Companies Registry.

**Statute of limitations**
Generally, the Assessor of Taxes may make an enquiry into a tax return no later than 12 months from the date that the tax return is delivered to the Assessor.

If, however, the Assessor discovers that income tax has not been assessed that should have been assessed, the Assessor is able to make an assessment of that tax within a period of for years from the end of the relevant accounting period.

The Assessor also has powers to require the production of documents.

**Topics of focus for tax authorities**
The Isle of Man government is focussed on delivering openness and transparency across all areas of Isle of Man taxation. The government and the tax authorities work closely with international bodies such as the EU Code of Conduct group and the EU’s Economic and Financial Affairs Council to ensure that the Island is fully compliant with international standards in areas such as tax transparency and exchange of information. The Island is already recognised on the OECD White List as being in the top tier of countries for transparency and information exchange.

In addition to maintaining its international position, the tax authorities are keen to engage taxpayers on important issues through consultation on key areas. It is also striving to maintain and improve its services and levels of efficiency through the continued expansion of its range of services available online.

**Other issues**

**Tax treaties**
Since January 2013, the Isle of Man has signed DTAs with the Seychelles, Jersey, and Guernsey. In addition, the Isle of Man signed a TIEA with Argentina in December 2012, its first with a South American country.

These latest agreements mean that the Isle of Man has now signed ten DTAs and 27 TIEAs. All of these agreements, with the exception of the UK DTA, meet the OECD international standard on tax co-operation and transparency.

The DTA with Belgium, signed in July 2009, is still awaiting ratification.

**Choice of business entity**
There are several different entities through which businesses may operate in the Isle of Man. These include companies, limited liability companies, partnerships, limited partnerships, and protected cell companies.
Significant developments

As of 2 June 2013, the standard value-added tax (VAT) rate will increase from 17% to 18%. As of 1 September 2012, the standard VAT rate increased from 16% to 17%.

Taxes on corporate income

Israel-incorporated companies and foreign companies that have a branch presence in Israel are both subject to Israeli corporate tax. An Israeli-resident entity is subject to Israeli corporate tax on worldwide income while a non-resident entity is subject to Israeli corporate tax only on income accrued or derived in Israel. Income sourcing rules determine when income is to be considered from an Israeli source.

As of January 2013, the corporate tax rate is 25%.

Approved enterprises are subject to reduced rates of tax depending upon the level of foreign ownership and location (see the Tax credits and incentives section).

Local income taxes

Israel does not impose local taxes on corporate income.

Corporate residence

The following are considered to be resident in Israel:

- A company incorporated in Israel.
- A company whose business is managed and controlled from Israel.

In the absence of a definition of the term ‘management and control’ either in Israeli legislation or a direct discussion of this term by the Israeli courts, it may be difficult to determine whether a company that is incorporated outside of Israel shall be viewed as managed and controlled from Israel. This is a complex subject that needs to be addressed on a case-by-case basis. When an entity is both an Israeli tax resident and a resident of a foreign jurisdiction that is party to an income tax treaty with Israel, most treaties provide a tiebreaker test in the determination of an entity’s tax residency.

Permanent establishment (PE)

Foreign resident entities might be exempt from corporate tax to the extent that its activities do not constitute a PE under the tax treaty applicable between Israel and the foreign resident’s country of residency.
Whether a non-resident has a taxable presence under Israeli domestic tax law is far less clear than the definition of PE under a relevant tax treaty. There is no detailed legislation or Israeli court decisions that directly address this issue.

**Other taxes**

**Value-added tax (VAT)**
The current rate of VAT is 17%. As of 2 June 2013, the VAT rate will increase to 18%.

Exports of goods and certain services and various other transactions are zero-rated, and certain transactions are exempt. Banks and other financial institutions pay VAT-equivalent taxes at the rate of 17% based on their total payroll and on profits. Not-for-profit organisations pay VAT (wage tax) at the rate of 7.5% of their total payroll.

**Customs duties**
Customs duty is imposed on certain products imported into Israel. The rates of duty depend upon their classification according to the Harmonised Customs Tariff and the country of origin. Israel has concluded free-trade agreements with the United States, Canada, Mexico, the European Union (EU), and the European Free Trade Association (EFTA).

**Excise taxes**
The government imposes excise taxes on a variety of goods (e.g. fuel, tobacco). The excise taxes are levied item-by-item.

**Municipal tax**
Municipal tax is levied annually on buildings by local municipalities based on the size, location, and purpose of the property.

**Real estate - capital gains**
Capital gains on real estate are subject to the Land Appreciation Tax Law. The law relates to any real estate in Israel, including houses, buildings, and anything permanently fixed to land; real estate rights; and leases for 25 years or more. Tax calculations closely follow the calculation of company tax on capital gains (see Capital gains in the Income determination section).

The tax rate on the real gain is the applicable corporate tax rate (25% in 2013).

A special tax rate may apply with respect to real estate acquired prior to 1960.

**Transfer tax**
The purchaser of real estate is generally subject to acquisition tax at rates of 0.5% up to a maximum of 5%.

**Stamp taxes**
There are no stamp taxes imposed in Israel.

**Employer’s national insurance contributions**
Employers are obligated to pay national insurance contributions based on a percentage of each employee’s income on a monthly basis. Employers are responsible for withholding employees’ contributions from wages and remitting these together with the employer’s own contributions. The employer’s contribution rates (current as of March 2013) for Israeli-resident employees are 3.45% up to monthly income of 5,297 Israeli
shekels (ILS) and 6.5% on the difference between ILS 5,298 and the maximum monthly income of ILS 42,435.

For non-resident employees, the employer rates are significantly lower and are 0.49% up to monthly income of ILS 5,297 and 0.87% on the difference between ILS 5,298 and the maximum monthly income of ILS 42,435. The minimal National Insurance payments for non-resident employees do not provide any retirement benefit for the non-resident but generally provides a certain element of work accident coverage.

When an irregular salary payment in excess of one quarter of the usual salary is made, special provisions apply to the computation of social charges by which the application of this payment is equally attributed to the current month and to the past 11 months.

Israel has social security totalisation agreements with 14 countries that may allow for an exemption from Israeli National Insurance throughout the employment period of the employee in Israel.

**Branch income**

A branch is liable for tax at the standard corporate rate on Israel-source income. No tax is withheld on transfers of profits to the foreign head office unless the branch is an approved enterprise (see the Tax credits and incentives section).

**Income determination**

In general, the annual results (i.e. the excess of income over expenses or vice versa) of an Israeli company or branch, as detailed in the taxpayer’s financial statements, form the basis for computing the taxable income of the business.

The base amount is then adjusted pursuant to the provisions of the tax law to arrive at ‘taxable income’.

**Inventory valuation**

Inventories are generally valued at the lower of cost or market value (i.e. net realisable value). Conformity is required between book and tax reporting of inventory. The first in first out (FIFO) or weighted-average basis of valuation is acceptable; the last in first out (LIFO) method is not accepted.

**Capital gains**

Capital gains tax is generally payable on capital gains by residents of Israel on the sale of assets (irrespective of the location of the assets) and by non-residents on the sale of the following:

- Assets located in Israel.
- Assets located abroad that are essentially a direct or indirect right to an asset or to inventory, or that are an indirect right to a real estate right or to an asset in a real estate association, located in Israel. Taxation applies only in respect of that part of the consideration that stems from the above property located in Israel.
- Assets that are a share or the right to a share in an Israeli entity.
- Assets that are a right in a foreign resident entity that is essentially a direct or indirect right to property located in Israel. Taxation applies only with respect to that part of the consideration that stems from the property located in Israel.
The cashless transfer of rights and assets arising from certain mergers, spin-offs, and asset transfers may be exempt from tax upon meeting various requirements.

**Determination of the capital gain - Computation of real gain and inflationary components**

Company tax on capital gains is imposed on the disposal of fixed and intangible assets where the disposal price is in excess of the depreciated cost.

For tax purposes, the capital gain is generally calculated in local currency, and there are provisions for segregating the taxable gain into its real and inflationary components. The inflationary amount is the original cost of the asset, less depreciation (where applicable), multiplied by the percentage increase in the Israeli consumer price index (CPI) from the date of acquisition of the asset to the date of its sale. The inflationary amount component is exempt to the extent it accrued after 1 January 1994 and is generally subject to tax at the rate of 10% if it accrued before that date.

The real gain component, if any, is taxed at the rates set out further below.

A non-resident that invests in capital assets with foreign currency may elect to calculate the inflationary amount in that foreign currency. Under this option, in the event of a sale of shares in an Israeli company, the inflationary amount attributable to exchange differences on the investment is always exempt from Israeli tax.

**Sale of assets (including publicly and non-publicly traded shares)**

The real gain is generally subject to tax at the corporate tax rate applicable in the year of the gain (25% in 2013). Special exemptions may apply for non-residents (see further below).

**Special rule for retained profits upon sale of shares**

In the case of a disposal by corporations of: (i) non-traded shares and (ii) traded shares when the seller generally directly or indirectly holds at least 10% of the sold Israeli company during the 12-month period preceding the sale, special provisions apply to such part of the real gain that is attributed to the seller's share of retained profits. The share of retained profits is the amount of gain equal to the proportional part of the retained profits of the company that the seller of the shares would have rights to by virtue of those shares. Detailed rules apply in determining this profit component.

Generally, the seller's proportionate part of the company's retained profits is taxed as if this amount had been received as dividends immediately before the sale (i.e. at a tax rate of 0% in the case of an Israeli-resident corporate shareholder or at a tax rate of 30% when the seller is a non-Israeli resident corporate shareholder that generally holds 10% or more in the rights of the Israeli company, subject to a reduced rate in accordance with the provisions of an applicable tax treaty). The part of the retained profits that is attributed to the period ending on 31 December 2002 is subject to tax at the rate of 10%.

**Special exemptions for non-residents**

**Publicly traded Israeli shares**

Non-residents corporations not having a PE in Israel are exempt from tax on capital gains from the sale of shares of an Israeli company traded on the Israeli stock exchange or on a foreign stock exchange.
Where the shares were purchased by the non-resident prior to being publicly traded, capital gains tax applies for the portion of the gain that was generated up to the day of the share’s public listing but not to exceed the capital gain actually arising upon the sale of the share and provided that the value on the day of public listing was more than their value on the date of purchase and that the proceeds upon sale exceeded the value on the date of purchase.

**Non-publicly traded shares**
For purchases after 1 January 2009, an exemption exists under domestic law for non-residents, regardless of their percentage holding in an Israeli company, from gains derived from the sale of securities not traded on a stock exchange, provided the following conditions are met:

- The investment is not in a company the majority of whose assets are real estate assets in Israel.
- The capital gains were not derived by the seller’s PE in Israel.
- The shares were not purchased from a relative (as defined in the Income Tax Ordinance [ITO]) or by means of a tax-free reorganisation.

For shares purchased between 1 July 2005 and 1 January 2009, more restrictive conditions apply in order to be eligible for the exemption. Detailed rules apply.

**Treaty exemption**
Non-residents may qualify for a tax treaty capital gain exemption, depending upon the particular circumstances and the provisions of the applicable tax treaty (e.g. in some tax treaties, no capital gains exemption is allowed where the holding in the sold Israeli company exceeds a certain percentage).

When assets are attributable to an Israeli PE or are real estate rights (including rights in a real estate association), a treaty exemption will generally not be available.

The Israel Tax Authority (ITA) is very sensitive to treaty shopping, and it will be necessary to demonstrate to the ITA that the foreign holding entity has business substance in its country of residence and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes.

**Capital losses**
Capital losses may offset all capital gains (including gains from Israeli or foreign securities) and gains from the sale of property (whether Israeli or foreign source).

Where the capital loss is from a non-Israeli asset (including when carried forward into future years), the loss must first be offset against foreign source capital gains.

Capital losses derived from the sale of securities may also be offset against interest and dividend income generated from the sold security and also against interest and dividend income received from other securities (where the income was not subject to tax of more than 25%).

Capital losses from the sale of shares are generally reduced by any dividends received by the selling corporation during the 24 months preceding the sale, where tax on the dividends of at least 15% was paid.

Capital losses can generally be carried forward indefinitely and set-off only against capital gains.
Exit tax
When an Israeli tax resident, including a company, ceases to be an Israeli resident for tax purposes, its assets are deemed to have been sold one day before it ceased being an Israeli resident. Although exit tax is primarily applicable to individuals, this might also apply to corporations incorporated outside of Israel whose management and control is transferred from Israel to another jurisdiction at a particular time.

Any gain attributable to the deemed sale of assets may be paid on the day the residency ceased or it may be postponed until the date the assets are actually realised. When the tax event is deferred to the sale date of the assets, the amount of the Israeli capital gain portion is determined by taking the real capital gain at the time of realisation, multiplied by the period of ownership from the day on which it acquired the asset until the day it ceased being an Israeli resident, divided by the entire period from the day of the asset’s acquisition until the day of realisation. The Minister of Finance is authorised to prescribe provisions for the implementation of the exit tax including provisions for the prevention of double taxation and the submission of tax reports, but no provisions have yet been issued.

Dividend income

Received by an Israeli-resident company
Dividends received by an Israel-resident company from another Israeli-resident company that originate from income accrued or derived in Israel are exempt from corporate tax, except for dividends paid from income of an approved enterprise (see the Tax credits and incentives section). This affords the opportunity to transfer after tax profits within an Israeli group of companies for further investment.

Dividends received by an Israeli-resident company from a non-resident company, as well as dividends received from an Israeli company that arise from foreign source income of the distributing company, are generally taxable for the receiving company at the rate of 25%. Under certain circumstances, the receiving company may elect to be taxed on such dividends at the corporate tax rate, in which case it will also be entitled to a foreign tax credit with respect to corporate taxes paid by the company distributing the dividend (i.e. an ‘underlying’ tax credit).

Received by a non-resident shareholder
Dividends received by a non-resident shareholder from an Israeli company are generally subject to tax at the rate of 25% (30% if paid to a 10% or more shareholder), subject to a reduced rate of tax under an applicable tax treaty.

Several of Israel’s tax treaties have very beneficial withholding tax (WHT) rates for dividends being paid from Israel. The ITA is very sensitive to treaty shopping, and it will be necessary to demonstrate to the ITA that the foreign holding entity has business substance in its country of residence and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes. Furthermore, many of the treaties contain a beneficial ownership clause as a condition to enjoying the treaty WHT rates.

Interest income

Received by an Israeli-resident company
Interest income received by an Israeli-resident company is subject to the regular corporate tax rate (25% in 2013).
Received by a non-resident
Interest income received by a non-resident company is generally subject to tax at the rate of 20% or subject to a reduced rate of tax under an applicable tax treaty.

Interest received by a non-resident from deposits of foreign currency with an Israeli bank is exempt from tax, subject to certain conditions.

Rent/royalties income
Rent and royalty income, less allowable deductions for tax purposes, is subject to tax at the regular corporate tax rate (25% in 2013).

Partnership income
From an Israeli tax perspective, a partnership is, in principle, a fiscally transparent vehicle. Accordingly, Israeli tax law does not tax partnerships as such; however, generally, each partner is taxed in respect of its share of the partnership income, with the taxable income allocated to a corporate partner taxed at the regular company tax rate. Consequently, the actual distribution of partnership income to a partner is a non-taxable event.

Foreign income
An Israeli-resident company is liable for tax on its worldwide income. Double taxation is avoided by way of a foreign tax credit mechanism that also applies unilaterally in the absence of an applicable double taxation treaty (DTT) (see the Tax credits and incentives section).

Under the CFC regime in Israeli tax law, an Israeli company or individual may be taxed on a proportion of the undistributed profits of certain Israeli-controlled non-resident companies in which the Israeli shareholder has a controlling interest (10% or more of any of the CFC's 'means of control'). See Controlled foreign companies (CFCs) in the Group taxation section for more information.

There is no deferral regime in Israel.

Deductions
Costs incurred by a branch or a company are deductible as a business expense for tax purposes where they are incurred ‘wholly and exclusively in the production of income’. The amount of the deduction may be limited or disallowed further to other ITO provisions and income tax regulations.

Depreciation
The ITO and tax regulations prescribe standard annual rates of tax depreciation for assets serving in the production of taxable income. Depreciation is generally on a straight-line basis for industrial and other enterprises based on the specific asset types as set out in the tax regulations.

Accelerated rates of depreciation may be available in regard to certain activities (such as industrial) where there is unusual wear and tear due to additional shifts of equipment use. Detailed rules apply.

Depreciation is not permitted on land.
Goodwill
In general, under Israeli tax regulations, goodwill purchased after 1 July 2003 may be amortisable by the purchaser over a ten-year period (10% annually).

Organisational and start-up expenses
Organisational and start-up expenses are generally not immediately deductible but, rather, are to be capitalised for tax purposes.

Interest expenses
Interest expenses incurred in the production of taxable income are generally deductible. Since there are no thin capitalisation rules in Israel, there are no specific debt-to-equity ratio requirements and there is no limit to the amount of debt that may be used in establishing a branch or local company operation in Israel. Interest and linkage payments arising from late tax payments are generally not deductible for tax purposes. Interest charges between related parties must be set based on transfer pricing principles. Detailed rules apply.

Bad debt
Provisions for bad debts are deductible in the year in which it is evident that the debt has become irrecoverable. Detailed rules apply for making this determination.

Charitable contributions
Charitable contributions do not constitute a regular business expense. However, a tax credit may be available (see Tax credit for donations in the Tax credits and incentives section).

Research and development (R&D) costs
Special tax relief is provided under the ITO for R&D costs incurred (see the Tax credits and incentives section).

Pension expense
Pension fund contributions made to recognised funds are generally deductible for the employer, provided inter alia the contributions do not exceed a prescribed level and are effected on a regular basis.

Directors’ fees
Payments for commercially justifiable director fees should generally be deductible.

Accrued expenses
Payments are generally deductible on an accrual basis for commercially justifiable expenses representing arm’s-length consideration. However, when payments made to foreign residents attract WHT, the deduction will generally be allowed, provided the payment is effected within the tax year. Alternatively, such payments may be deductible in a tax year if the applicable WHT is deducted within three months after the tax year-end and remitted to the tax authorities within seven days of the deduction, together with index linkage differences and interest accrued since the year-end.

However, accrued expenses for severance pay, vacation pay, recreation pay, holiday allowances, and sick pay are not deductible, even if there is an obligation to make these payments. They are only deductible in the year in which they are actually paid to the beneficiary or to a recognised fund.
**Contingent liabilities**

Based on Israeli court decisions, contingent liabilities may be deductible for tax purposes upon satisfying the following criterion: (i) according to accepted accounting principles, the taxpayer must include in its balance sheet a suitable provision for the potential liability; otherwise, its income will be considered to have been incorrectly reported; (ii) the circumstances of the case and the technical means according to accepted accounting practice must be provided, enabling a determination of the amount of the liability; and (iii) there is a high probability that the potential debt with respect to which the provision was made will become an absolute debt.

**Excess (disallowed) expenses**

Israeli tax law disallows the partial deduction of certain employee-related expenses incurred by a company doing business in Israel. These include so-called ‘excess expenses’. Examples of these are (i) payments for business, travel, and meals that exceed allowable deductions; (ii) expenses incurred in respect of a benefit granted by an employer to its employees but that cannot be attributed to a particular employee; and (iii) certain vehicle maintenance expenses (all expenses relating to a company owned vehicle that was also designated for use of an employee are generally tax deductible).

A company is obligated to pay a monthly advance on excess expenses in the amount of 45% of the excess expense. The amount paid as an advance in respect of excess expenses is deemed a payment on account of the regular tax advances and payments that the company must pay for corporate income tax and is offset against them, but it is not refundable (i.e. when a taxpayer’s tax liability in a given year is lower than the excess expense advances paid, the unutilised amount shall be carried forward to future tax years). Detailed rules apply.

**Fines and penalties**

Payment of fines and penalties are generally not deductible.

**Taxes**

Municipality taxes incurred in the production of taxable income are generally deductible.

**Net operating losses**

Business losses can be offset against income from any source in the same year. Loss carrybacks are not allowed. Losses may be carried forward and set-off without time limit against income from any trade or business or capital gains arising in the business, but not against income from any other source.

**Payments to foreign affiliates**

Payments of interest, royalties, and management fees to foreign affiliates are deductible if based on normal commercial terms and practices and evidenced by an inter-company agreement and transfer pricing documentation. Where such payments attract WHT, the deduction will only be allowed where such tax has been withheld and paid in accordance with certain requirements. All cross-border payments to foreign affiliates for goods and services have to comply with arm’s-length pricing standards (see Transfer pricing in the Group taxation section).
Group taxation

As a general rule, a parent company and its subsidiaries may not submit consolidated tax returns. Only groups of industrial companies in the same line of business, as well as parent companies that control industrial companies in the same line of business and have at least 80% of their assets invested in industrial companies, are eligible to file consolidated tax returns.

Transfer pricing

The ITO and its accompanying regulations contain elaborate transfer pricing provisions, including the arm’s-length principle, that apply to any international transaction in which there is a special relationship between the parties to the transaction and for which a price was settled on for property, a right, a service, or credit. In general, the regulations are based upon internationally recognised transfer pricing principles (i.e. United States tax regulations or Organisation for Economic Co-operation and Development [OECD] rules). These regulations generally require the taxpayer to support the pricing of international transactions with a transfer pricing study, inter-company agreements, and other documentation. In accordance to Israeli High Court Rulings, the terms of transaction conducted between related parties should be set in written contracts.

Since transfer pricing is a subject that receives considerable attention from the ITA in its examination of related inter-company transactions, transfer pricing principles and documentation requirements should be carefully adhered to.

A taxpayer is required to include in its annual corporate tax return a special form entitled ‘Declaration of International Transactions’ providing details for every cross-border transaction conducted with related parties. The taxpayer must sign the form, which includes a declaration that the transactions with related parties abroad were in accordance with the arm’s-length principle, as defined in the Israeli transfer pricing regulations promulgated under the ITO. As a result of this form and declaration, the importance of appropriate transfer pricing documentation has increased.

Thin capitalisation

Israel has no statutory or regulatory provisions or other rules concerning thin capitalisation for tax purposes as exist in certain other jurisdictions. Since there are no thin capitalisation rules and Israel has no specific debt-to-equity ratio requirements, a company may be financed with minimum capital, and there is no limit to the amount of debt that may be used. Transfer pricing principles shall generally apply with regards to interest charges.

Controlled foreign companies (CFCs)

Under the CFC regime in Israeli tax law, an Israeli company or individual may be taxed on a proportion of certain undistributed profits of certain Israeli-controlled non-resident companies in which the Israeli shareholder has a controlling interest (10% or more of any of the CFC’s ‘means of control’). A CFC is a company to which a number of cumulative conditions apply, including that most of its income or profits in the tax year were derived from passive sources (e.g. capital gains, interest, rental, dividend, royalties) and such passive income has been subject to an effective tax rate that does not exceed 20%. 
Tax credits and incentives

Foreign tax credit
Double taxation is avoided by way of a foreign tax credit mechanism that also applies unilaterally in the absence of an applicable DTT. The foreign tax credit is limited to the Israeli corporate tax payable with respect to the same income. Foreign-sourced income is divided into ‘baskets’ (i.e. categories) on the basis of the income source (e.g. dividends, business income), and a particular credit limitation applies to each basket. Excess uncredited foreign income can be carried forward for the subsequent five tax years.

Approved enterprises (AEs)
AE status, which provides for cash and tax benefits, may be granted under the Law for the Encouragement of Capital Investments (the Law) to enterprises that increase the productive capacity of the economy, improve the balance of payments, or provide new employment opportunities.

The Law differentiates between three geographical regions (A, B, and C). Area A enjoys the most incentives, while Area C (generally the central area of the country) enjoys the least amount of incentives.

New AE programmes and expansion of prior existing AE programmes are governed by the Law, which underwent a major amendment on 29 March 2005 (2005 Amended Law) and also on 29 December 2010 (2011 Amended Law), effective for 2011 and thereafter.

AE programmes that commenced their period of benefits generally prior to 2005 may still be subject to the Law’s provisions prior to these amendments.

The 2011 Amended Law is intended to simplify the manner of taxation that applies to income generated from an AE by applying a uniform tax rate for all AE-generated taxable income. Prior to these amendments, as summarised below, the corporate tax rate applicable to an AE depended upon many factors, including the tax route selected, the geographical area in which the industrial site is located, the level of foreign investment ownership, and attribution of taxable income between different tiers of AE plans further to complex formulas.

It should be noted that the 2011 Amended Law shall apply for income generated by an AE during 2011 and thereafter. Transition rules allow AE owners to elect to continue with the AE tax benefits allowed for under the Law prior to these amendments or to choose, in any tax year, to commence to apply the new provisions of the Law and to waive the remaining benefit period those AE benefits provided under the Law prior to its amendment. It should also be noted that once such an election is made by the taxpayer to implement the new provisions, it may not be altered in future tax years.

This general overview will address the Law as applicable prior to the 2011 Amended Law as well as setting forth the material tax law changes under the 2011 Amended Law.

We would caution that our comments in regard to the 2011 Amended Law should be regarded as preliminary in nature and they do not address all of the legislative changes. Further detailed rules apply and certain areas still await further legislation and clarifications as to the ITA’s interpretive positions.
Cash grants (also applicable under the 2011 Amended Law)
Approved enterprises located in development areas A and B are eligible for cash investment grants, which vary according to the geographic location of the enterprise. Under the 2011 Amended Law, only AEs that operate in Area A are eligible for grants. Grant amounts and conditions are subject to governmental change from time to time.

AE tax incentives prior to 2011 Amended Law

Reduced tax rates
In addition to financial incentives for the establishment or expansion of an AE, various tax incentives are available once a new AE or expansion thereof is operational.

The reduced tax rates generally apply for a seven-year benefit period (or a ten-year period in certain cases of local companies established in development area A or in the case of a foreign investor company, see below), commencing with the year in which the AE first generates taxable income.

Generally, this seven or ten-year period of benefits is limited to 12 years from the year of implementation. For AE plans governed prior to the 2005 amendment to the Law, the period of benefits cannot extend beyond 12 years from the year the enterprise commenced its operations or beyond 14 years from the year in which approval of status as an AE was granted, whichever is earlier.

Locally owned companies
Income derived by a company from an AE during the maximum seven-year period of benefits is generally subject to company tax at a rate of 25%.

A WHT rate of 15% (subject to a possible reduction under a tax treaty) applies to dividends paid from profits of an approved enterprise earned during the benefits period, if distributed either during the benefits period or during the subsequent 12 years. Note that dividends from non-approved enterprise profits that are paid to non-residents are generally subject to a maximum 25% WHT rate that may be further reduced under the terms of a relevant tax treaty.

Foreign investors’ companies (FICs)
A company that qualifies as a FIC is entitled to enhanced tax benefits on AE income. In general, a FIC is a company having more than 25% of its share capital (in terms of rights to shares, profits, voting, and the appointment of directors) and its combined share capital and investor loan capital owned by foreign residents. To qualify for FIC status, a foreign investor must make an investment in the company of at least ILS 5 million.

A FIC benefits from reduced company tax on the profits of an AE for a period of ten years (instead of seven years) commencing with the first year in which taxable income is generated. The total period of benefits is restricted as discussed above.

A FIC enjoys reduced company tax rates applicable to its AE income as shown below:

<table>
<thead>
<tr>
<th>Percentage of foreign ownership</th>
<th>Company tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over 25% but less than 49%</td>
<td>25</td>
</tr>
<tr>
<td>49% or more but less than 74%</td>
<td>20</td>
</tr>
<tr>
<td>74% or more but less than 90%</td>
<td>15</td>
</tr>
<tr>
<td>90% or more</td>
<td>10</td>
</tr>
</tbody>
</table>
The foreign ownership percentage is annually determined as the lowest level retained during the specific tax year.

Dividends paid by a FIC out of the profits of its AE are subject to tax in the hands of the recipient at the rate of 15%, without limitation as to their distribution date, provided the dividends are distributed out of AE profits derived during the benefits period.

**Alternative system of tax benefits for AEs (tax holiday)**

Companies with new or expanding AEs may elect to forego all government cash grants and receive instead a total exemption (i.e. tax holiday) from company tax on undistributed profits of the approved enterprise for ten years in development area A, for six years in development area B, and for two years in development area C. The area of incentive being the area in which the company's facilities are located.

The tax holiday provides an Israeli tax exemption so long as the AE profits generated in the exemption period are retained within the company. Should a subsequent distribution of such profits occur, company tax and dividend WHT is imposed on the income distributed, at the rates which would have been applicable if the tax holiday had not been elected (i.e. 25% or at a lower rate if the company is a FIC with a foreign ownership percentage of 49% or more during those years).

Under certain anti-avoidance provisions applicable to tax holidays, amounts paid or credited directly or indirectly by an approved enterprise to a relative, a major shareholder, or to a related entity controlled by either a relative or a major shareholder may be treated as a deemed taxable distribution of profits by the AE.

**Ireland track and strategic investment track**

For companies having an AE in development area A that seeks to distribute dividends while maintaining a low company and dividend tax burden, there is an 'Ireland track' under which the aggregate Israeli corporate and dividend WHT for a foreign resident shareholder is 15% and for an Israeli resident shareholder is 24.8%. This track is in contrast to the standard alternative benefit track discussed above, which provides a tax holiday, provided that profits remain undistributed.

Furthermore, a 'strategic investment track' allows for an exemption during the benefit period from company tax and dividend WHT for a company having (depending on its location within Area A of the country) very significant investment and revenue levels. This means that during the benefits period, a company eligible for benefits from income accrued under this track will have no tax liability whatsoever for its productive activity arising from such investment and for the distribution of profits. Detailed rules apply to these tracks.

**Qualifying for AE status**

**Minimal investment amount**

For entitlement of tax benefits under the alternative benefit track, there must be a certain minimal investment amount (‘Minimum qualifying investment’) towards purchasing productive assets (e.g. machinery and equipment, but not buildings) within three years.

In the case of a new factory, the minimum required investment is ILS 300,000.

For expansion of a factory, the amount of required investment is ILS 300,000 or the amount based on the formula shown below, whichever is higher:
Detailed rules apply in determining how to value the assets for purposes of these tests (including in regards to AEs operated by affiliated companies).

For AE plans governed by the Law prior to its amendment, a general condition for approval is that a minimum of 30% of the investment in fixed assets must be equity-financed.

For investors wanting to expand their current AE, a new requirement has been added to the Law that demands at least a two-year waiting period before an investor can obtain AE status for its new investments. Upon completion of these investment conditions, the taxpayer must file the election of the investments implementation year. Such election must generally be filed by the filing date of the relevant annual tax return but no later than 12 months from the end of that tax year.

**Automatic approval**

Where an investment project meets all of the eligibility criterion under one of the alternative tracks (standard alternative track, Ireland track, or strategic investment track) as set out in the Law and in regulations to be issued, a project will automatically qualify for the AE taxation benefits under the Law with no need for prior approval from the ITA (i.e. a ‘green lane’). The criteria that confer tax benefits in the alternative track of the Law are handled by the ITA. A mechanism is available that enables a company to apply for a pre-ruling from the ITA, where it desires to obtain certainty as to the taxation status of its investment under the Amended Law. The application to the ITA must be submitted no later than six months following the end of the investment’s implementation year (first year of potential benefits for the AE).

For AE plans governed by the Law prior to its 2005 amendment, the certification of a new or expanding approved enterprise status required interaction with the Israeli Investment Centre (IC), which had to approve the application for approved enterprise status and was responsible for issuing a final implementation approval following its determination that all requirements relating to investments in assets and minimum capital have been met.

**Interruption of entitlement to benefits**

Unlike the Law prior to its 2005 amendment, where an AE owner was generally required to continue to operate the AE for the entire benefit period, under the Law following its amendment in 2005, the examination as to whether an owner is entitled to enjoy AE benefits for a tax year is determined on a year-by-year basis. Consequently, if in any tax year during the benefit period a company does not meet any of the conditions required under the Law, then for that tax year it is not entitled to benefits. However, if the company again meets the conditions during the benefit period, the company is entitled to the benefits during the remainder of the benefit period.

**Mixed enterprises**

Special rules govern the allocation of taxable income of ‘mixed enterprises’. These are essentially entities that derive only part of their income from an AE or entities.
that operate under a number of approvals relating to separate investment projects. The company tax payable in respect of income from each part of a mixed enterprise is separately computed, and a composite WHT is applicable to dividends distributed by a mixed enterprise.

**Neutralisation of assets**

Assets used in the operation of an enterprise that are not part of an AE are regarded as non-approved assets. Consequently, turnover that is deemed to be generated from the non-approved assets will result in non-approved enterprise income that should be taxed at the regular Israeli corporate tax rate applicable for the relevant year.

For plans operating under the Law prior to its 2005 amendment, in some cases, upon request, the Investment Centre granted neutralisation of assets that were not part of the approved investment plan, so that they would have no negative impact on the tax benefits. Neutralised assets have a 'neutral' effect, as they are not considered part of the approved investment plan or part of a non-approved plan. For certain industrial equipment, neutralisation is not available. Assets that are of a non-productive nature may receive neutralisation.

In accordance with the 2005 Amended Law, this issue arises only in connection to assets purchased that had previous use in Israel.

**AE 2011 Amended Law overview**

Upon the AE owner’s election, the various reduced tax routes described above are cancelled and replaced with a new uniform tax rate based on the corporate tax rate applicable during the relevant year, as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Area A (%)</th>
<th>Rest of country (%)</th>
<th>Scheduled regular corporate tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2012 to 2014</td>
<td>7</td>
<td>12.5</td>
<td>25</td>
</tr>
<tr>
<td>2014 and thereafter</td>
<td>6</td>
<td>12</td>
<td>25</td>
</tr>
</tbody>
</table>

A modified Strategic Investment Track has been introduced, but it appears that its qualifying terms and conditions should make this track not particularly relevant for most investors.

The WHT rate applicable to dividends distributed to foreign shareholders remains 15% (subject to being reduced under the terms of an applicable tax treaty). Distributions to Israeli corporations shall not be subject to tax while distributions to Israeli individuals shall be subject to tax at a rate of 15%.

This is a major change in policy from the pre-2011 Amendment FIC route discussed above, which encouraged foreign investment in Israeli companies having AE programs by providing for increasingly reduced rates (e.g. 10% rate where 90% foreign owned). Further to the amendments, there will no longer be available any additional AE tax benefits specifically linked to foreign investment. Notwithstanding the cancellation of the tax holiday route, a distribution or deemed distribution of profits that were tax-exempted under the tax holiday route before the legislative change had taken effect shall continue to be subject to company tax at the applicable AE reduced rates in addition to the dividend WHT that will be imposed on the income distributed.
Although it would appear that the 2011 Amendments may result in an increased Israeli tax liability for many investors, depending on the particular circumstances, some investors may still benefit from the new changes. Consequently, each investor should examine the impact of such changes upon its financial results and prepare its action steps accordingly.

**Transition rules**

It should be noted that the 2011 Amended Law shall apply for income generated by an AE during 2011 and thereafter. Transition rules allow AE owners to elect to continue with the AE tax benefits allowed for under the Law prior to these amendments or to choose in any tax year to commence to apply the new provisions of the Law and to waive the remaining benefit period those AE benefits provided under the Law prior to its amendment. Once such an election is made by the taxpayer to implement the new provisions, it may not be altered in future tax years. According to the approach of the ITA, the election in regard to the application of the Amended Law must be filed by 31 May of the relevant tax year.

**Research and development (R&D) incentives**

Under special relief provided under the ITO, which was enacted for the purpose of encouraging taxpayers to invest in R&D activities, R&D costs can generally be deductible for tax purposes even when they represent capital costs.

The ITO provision generally distinguishes between two types of investors in R&D projects:

- The R&D project is conducted or sponsored by the owner of an enterprise in the fields of industry, agriculture, transportation, and energy, and it is intended to develop this enterprise.
- The R&D costs are borne by a taxpayer that is not the owner of an enterprise in the above mentioned fields or the taxpayer participates in R&D costs of another developer in consideration for a reasonable return, when such R&D projects also enjoy government grants.

In regard to the first group of taxpayers, the R&D expenses shall be deducted in the tax year incurred when such expense has been approved as an R&D expense by the relevant government department (the approval in regard to industrial related projects is generally granted by the Office of the Chief Scientist [OCS]). When such OCS approval is not obtained, the expense shall be deducted over three tax years.

The R&D expenses incurred by the second group of taxpayers shall generally be deducted over two tax years. The deductible expenses allowed to a participant in R&D costs of another developer generally may not exceed 40% of the taxable income of the investor in the year in which the expenses had been incurred.

For acquisitions between 1 January 2011 and 31 December 2015, an Israeli tax resident company that acquires a controlling interest in a private Israeli company that meets certain R&D activity levels shall be entitled to amortise its acquisition amount (i.e. consideration paid for shares less the purchased company's positive equity capital if any) from its taxable income equally over five years beginning with the tax year following the acquisition. Entitlement to this deduction is subject to the fulfilment of detailed qualifying conditions, which include *inter alia* that both companies have AE plans in the year of acquisition, meet certain R&D investment levels, employ a certain prescribed percentage of employees having academic degrees in certain qualifying fields, and for the first three years of the amortisation period the R&D expenses of the
acquired company are incurred for its own company or that of the purchasing company and at least 75% of such expenses are incurred in Israel. Detailed rules apply.

**Tax credit for donations**
A tax credit is granted in respect of donations to approved state and charitable institutions aggregating at least ILS 180 (for 2012) in a tax year. The donor is allowed a tax credit equal to the amount of the contribution times the corporate tax rate applicable during the year, provided the donations do not exceed the lower of the following: (i) 30% of the corporation's taxable income in that year or (ii) ILS 9,130,000 (in 2012). The above figures are adjusted each year according to the CPI. Excess unused tax credits may be carried forward for three years, subject to detailed rules.

**Incentive to promote foreign investment in Israeli corporate bonds**
In order to promote foreign investment in the Israeli corporate bonds market, there is an exemption from tax with respect to interest income received by foreign investors on their commercial investments in Israeli corporate bonds traded on the Tel Aviv stock exchange (TASE). The exemption is not granted to a foreign investor that has a PE in Israel or is related to, or holds 10% more of the means of control in, the investee company. In addition, in order for the exemption to apply to a foreign investor that has 'special relations' with the investee company, regularly sells products to or provides services to the investee company, or is employed by the investee company, the investor must prove that the interest rate on the corporate bond was determined in good faith.

**Withholding taxes**
Under Israeli domestic tax law, a 25% WHT on payments of Israeli-source income is generally deducted by an Israeli paying bank from all income remittances abroad, unless a tax certificate is obtained from the ITA authorising withholding-exempt remittances or a reduced rate of tax pursuant to an applicable tax treaty.

Set out below is a listing of WHT rates for dividends, interest, and royalties under domestic tax law and pursuant to tax treaties in force. Detailed rules apply under certain tax treaties for eligibility to the treaty-reduced rates (e.g. beneficial ownership, having no permanent establishment in Israel). The applicable tax treaty should be consulted to determine the relevant WHT rate and to examine detailed conditions that may apply for the specific circumstance.

**Notes**

* Some Israeli tax treaties provide for an exemption from WHT on interest involving governmental and quasi-governmental parties. Such exemptions are not separately indicated in the table above.
1. Dividends between Israeli resident companies are generally exempt from Israeli tax. Dividends paid from a foreign resident company received via an Israeli payer (e.g. bank) to an Israeli resident company are subject to WHT at the rate of 25% of the capital of the company paying the dividends.

2. 30% rate applies in the case of a 10% or more shareholder (detailed rules apply).

3. 10% where the beneficial owner holds directly at least 25% of the capital of the company paying the dividends.

4. At a rate that is 50% of the rate that would have been imposed but for this provision but not to exceed 12.5% and not less than 7.5%. A 10% rate applies where paid from profits generated by an enterprise entitled to special tax rates under the Encouragement of Investment Law.

5. 5% if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate applies in all other cases.

6. 5% if the beneficial owner is a company (other than a partnership) that holds directly at least 15% of the capital of the company paying the dividends; 15% rate in all other cases.

7. 0% if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 5% rate in all other cases.

8. 5% if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

9. 5% if the beneficial owner is a company (other than a partnership) that controls directly at least 10% of the voting power in the company paying the dividends; 15% rate in all other cases.

10. 5% if the beneficial owner is a company that holds directly or indirectly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that holds directly or indirectly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

11. At the domestic Israeli tax rate.

12. 5% if the recipient holds directly at least 10% of the capital of the company paying the dividends.

13. 10% if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.

14. 15% if the beneficial owner is a company (other than a partnership) that holds directly or indirectly at least 10% of the voting power of the company paying the dividends.

15. 5% if the beneficial owner is a company that holds directly at least 25% of the voting shares of the company paying the dividends during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.

16. 5% if the beneficial owner is a company that holds directly or indirectly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that holds 10% of the capital of the company paying the dividends and the dividends are paid out of profits that are subject to tax at a rate that is lower than the normal rate of the corporation tax; 15% rate in all other cases.

17. 5% if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends where the dividends are paid out of profits that by virtue of provisions in the Israeli Law of Encouragement of Investments in Israel are exempt from tax or subject to tax at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

18. 5% if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends where the dividends are paid out of profits that by virtue of provisions in the Israeli Law of Encouragement of Investments in Israel are exempt from tax or subject to tax at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

19. 5% if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

20. 5% if the beneficial owner is a company that holds directly or indirectly at least 10% of the capital of the company paying the dividends.

21. 5% if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.

22. With respect to dividends paid to a company that holds directly at least 25% of the capital of the company paying the dividends: (i) 10% where the dividends are paid out of profits that, by virtue of provisions in Israeli law for the encouragement of investment in Israel, are exempted from tax or subject to tax at a rate that is lower than the standard rate levied on the profits of a company resident in Israel; (ii) 5% where paid out of regularly taxed profits. A 15% rate applies in all other cases.

23. 10% if the beneficial owner is a company (excluding partnership) that holds directly at least 10% of the capital of the paying company.
24. 5% if the recipient holds directly at least 15% of the capital of the company paying dividends.
25. 5% if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
26. 5% if the beneficial owner holds directly at least 10% of the capital of the company paying the dividends.
27. 5% if the recipient holds directly or indirectly at least 10% of the capital of the company paying the dividends.
28. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that, by virtue of law of the state in which the payer is a resident, are exempt from company tax or subject to company tax at a rate that is lower than the normal rate in that state; 15% of the gross amount of the dividends in all other cases.
29. 5% if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
30. 10% if the recipient holds at least 25% of the capital of the company paying the dividends.
31. 5% if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends; 10% if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax.
32. 12.5% but only if (i) during the part of the paying corporation's taxable year that precedes the date of payment of the dividend and during the whole of its prior taxable year (if any), at least 10% of the outstanding shares of the paying corporation were owned by the recipient corporation, and (ii) not more than 25% of the gross income of the paying corporation for such prior taxable year (if any) consists of interest or dividends (other than interest derived from the conduct of a banking, insurance, or financing business and dividends or interest received from subsidiary corporations, 50% or more of the outstanding shares of the voting stock of which is owned by the paying corporation at the time such dividends or interest is received). A 15% rate applies for payments from income derived during any period for which the paying corporation is entitled to the reduced tax rate applicable to an approved enterprise under Israel's Encouragement of Capital Investments Law (1959). A 25% rate applies in all other cases.
33. Different rates ranging from 15% to 35% apply for certain types of instruments. Interest paid to a 10% or more shareholders is subject to tax at the highest marginal tax rate (48% in 2012). Detailed rules apply.
34. 5% for interest in connection with the sale on credit of any industrial, commercial, or scientific equipment or on any loan of whatever kind granted by a bank.
35. 5% for interest in the case of a bank or other financial institution.
36. 7% for interest received by any bank or financial institution.
37. 5% for interest paid on a loan granted by a bank.
38. 5% of interest paid on any loan of whatever kind granted by a bank.
39. 5% where in connection with the sale on credit of any industrial, commercial, or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank loans made by banks; 10% in all other cases. An election can be made to be taxed on the net amount of the interest as if such interest were business profits.
40. 5% for interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.
41. 7.5% for interest if received by any bank or financial institution.
42. 5% where paid on any loan of whatever kind granted by a bank.
43. 5% where paid on any loan of whatever kind granted by a bank.
44. 10% where paid to a bank or a financial institution.
45. 5% where paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.
46. 2% rate applies to government debt or government-assisted debt; 5% rate applies when paid to a financial institution; 10% rate applies in all other cases.
47. 5% rate in connection with the sale on credit of any industrial, commercial, or scientific equipment, or in connection with the sale on credit of any merchandise by one enterprise to another enterprise, or on any loan granted by a financial institution.
48. 5% rate for interest paid on any loan of whatever kind granted by a bank.
49. 7% rate for interest paid on any loan of whatever kind granted by a bank.
50. 10% rate for interest received by any financial institution (including an insurance company).
51. 5% rate for interest paid on any loan of whatever kind granted by a bank.
52. 10% for interest derived from a loan of whatever kind granted by a bank, savings institution, or insurance company or the like. 17.5% rate for other interest. An election may be made to be taxed on interest income as if that income were industrial and commercial profits.

53. 0% for literary, dramatic, musical, or artistic work copyright royalties (excluding in respect of motion picture films or films for use in connection with television).

54. 5% for copyright royalties for literary, artistic, or scientific work (excluding cinematograph films) or for the use of, or the right to use, industrial, commercial, or scientific equipment or road-transport vehicles.

55. 0% for copyright royalties for literary, dramatic, musical, artistic, or scientific work (excluding in respect of films for cinema or television).

56. 15% for trademark royalties.

57. The rate is 50% of the rate that would have been imposed but for the treaty provision but not to exceed 12.5% and not to be less than 7.5%.

58. 0% for copyright royalties for the production or reproduction of any literary, dramatic, musical, or artistic work (but not including royalties in respect of motion pictures).

59. For industrial, commercial, and scientific equipment royalties, the 10% rate applies to the adjusted amount of the royalties (70% of the gross amount of the royalties).

60. 0% for copyright royalties for literary, artistic or scientific work (excluding cinematograph films).

61. 0% for copyright royalties for literary, dramatic, musical, or artistic works.

62. 0% for copyright royalties for literary, artistic, or scientific work (excluding cinematograph films or tapes for television or broadcasting).

63. 2% for industrial, commercial, and scientific equipment royalties.

64. 5% for industrial, commercial, and scientific equipment royalties.

65. 10% for royalties for cinematograph films and films or video-tapes for radio or television broadcasting.

66. 5% for industrial, commercial, or scientific equipment royalties.

67. For royalties in respect of cinematograph or television films, the WHT rate shall not exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.

68. 5% for royalties for copyrights of literary, dramatic, musical, artistic work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.

69. The definition of royalties does not include any royalty or other amount paid in respect of (i) the operation of a mine or quarry or of any other extraction of natural resources or (ii) in respect of cinematograph including television films.

70. 5% for royalties for literary, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio, or television broadcasting.

71. For royalties in respect of cinematograph or television films, tax may be imposed in Israel, but not to exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.

72. 10% for copyright or film royalties.

73. 5% of the gross amount of the royalties where such royalties consist of payments of any kind received as a consideration for the use or the right to use any copyright of literary, artistic, or scientific work (excluding cinematograph films).

74. 5% for royalties for any patent, design or model, plan, secret formula, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience; 7.5% for technical fees; 15% for all other royalties.

**Tax administration**

**Taxable period**
The tax year is generally the calendar year. Certain entities may apply to have their tax year-end on different dates, specifically, mutual funds, government companies, quoted companies, and subsidiaries of foreign publicly listed companies.

**Tax returns**
The Israeli system is based on a combined form of assessment and self-assessment.

The statutory filing date is five months following the end of the tax year, which for a calendar year taxpayer would be 31 May. It is possible, however, to secure extensions of the filing date.

**Payment of tax**
Generally, 12 monthly advance payments are levied at a fixed ratio of the company's turnover. Alternatively, a company may be required to make ten monthly payments beginning in the second month of its tax year, each payment being a fixed percentage of the previous year's tax assessment.
Penalties
Penalties are imposed on overdue advance payments and on delays in the submission of tax returns. The balance of any taxes due is payable from the beginning of the following tax year and is linked to the CPI; it bears interest of 4% until paid.

Statute of limitations
The statute of limitation period for corporate tax is three years from the end of the tax year in which the relevant tax return is filed. The Commissioner of the ITA has the authority to extend this period to four years.

Other issues
Choice of business entities
Investments and business operations in Israel may be structured in a variety of ways. The following are the common types of business entities in Israel: (i) Israeli public or private company; (ii) foreign company in Israel (i.e. a branch); (iii) Israeli general or limited partnership; (iv) foreign general or limited partnership; (v) other entities such as cooperative societies; and (vi) other arrangements (e.g. contractual joint ventures).

Mergers and acquisitions
Israeli tax law allows for non-taxable reorganisations in situations in which the ownership and business enterprise of the original parties is continued after the reorganisation takes place, allowing for the deferral of the tax liability until the shares or assets transferred in such reorganisations are actually sold. Different qualifying requirements and conditions apply (e.g. obtaining a ruling from the ITA in certain cases), depending upon the tax residency of the parties and the type of transfer.
**Significant developments**

The major recent changes in the Italian tax rules that occurred in the last 12 months are the following:

- Increase in the yearly limit for tax credit off-setting.
- Increase of certain deductions from regional production tax (IRAP).
- Changes to value-added tax (VAT).
- Deduction of car expenses.

Please note that Italy tax updates are generally expected to occur between June and September in connection with the finance bill and approval of related laws. In this respect, we suggest visiting the Worldwide Tax Summaries website at www.pwc.com/taxsummaries after September each year in order to check whether or not relevant changes affect your business.

**Increase in the yearly limit for tax credit off-setting**
Starting from 2014, the yearly limit for tax credit off-setting is increased to 700,000 euros (EUR).

**Increase of certain deductions from IRAP taxable base**
As of 2014, an increase in the deductions related to employees with an open-ended contract, women, and young workers is provided for IRAP purposes.

**Introduction of the Financial Transaction Tax (FTT)**
As of 1 March 2013, the FTT is applicable on the transfer of property of shares and other equity instruments for transactions executed on regulated markets.

**VAT changes**

**Deduction of car expenses**
As of 2013, the corporate income tax (Imposta sul Reddito delle Società or IRES) deductibility of expenses related to companies’ cars has been reduced.

**Taxes on corporate income**

**Applicable rates**
Italian corporate entities are subject to a corporate income tax, known as *Imposta sul Reddito delle Società* (IRES), and to a regional production tax, known as *Imposta Regionale sulle Attività Produttive* (IRAP).
Italy

The standard rates are as follows:

- 27.5% for corporate income tax (IRES).
- 3.9% for regional production tax (IRAP).

A 6.5% increase (surtax) to the IRES rate is applied to companies operating in the areas of oil, gas (refining, production, or trade), and electrical energy (production or trade) whose turnover exceeded EUR 10 million and whose taxable income was EUR 1 million in the prior fiscal year. Limited from 2011 to the 2013 tax period, an additional increase of 4% is applicable (total surtax of 10.5%).

The following increased IRAP rates are applicable for certain entities:

- 4.20% for entities with a determined governmental exclusive right to provide services.
- 4.65% for banks and financial entities.
- 5.90% for insurance corporations.

Regions have the power to slightly increase or decrease IRAP rates.

**General rules**

**IRES**
The IRES taxable base is determined according to the worldwide taxation principle, which states that, regardless of the location/jurisdiction where the income is produced, to the extent that the income is legally attributable to an Italian resident entity, the income is taxed in Italy. IRES is charged on the total net income reported in the financial statements of the company as adjusted for specific tax rules. Non-resident companies are taxed only on Italian-source income.

**IRAP**
There are different methods of computation for the IRAP taxable base, depending on the nature of the business carried out by the taxpayer. Labour costs (with limited exceptions), provisions for liabilities and risks, and extraordinary items cannot be taken into account when determining the IRAP taxable base.

For sales and manufacturing companies, the IRAP taxable base is broadly represented by the company's gross margin in its financial statements. In addition to the non-deductible items mentioned above, interest income and expense and provisions for bad debts are excluded for the purposes of the IRAP taxable base.

For banks, the IRAP taxable base is broadly defined as follows:

- Intermediation margin reduced by 50% of dividends.
- 90% of amortisation costs relating to fixed tangible and intangible assets.
- 90% of other administrative expenses.

Special rules apply to financial institutions, other than banks.

IRAP is levied on a regional basis, and regions are allowed to increase or decrease the standard IRAP rate up to 0.9176%. Companies with facilities in different regions must allocate their overall taxable base to the different regions on the basis of the employment costs of personnel located at the various sites. Facilities become relevant to the calculation of IRAP if they have been established for more than three months.
Italian companies with permanent establishments (PEs) abroad, as well as shipping companies qualifying for the tonnage tax regime (see Tonnage tax below), are not subject to IRAP on the income earned through these PEs.

For fiscal year 2013, an increase in the IRAP rates equal to 0.15% is expected for the regions of Campania, Molise, and Calabria.

Companies are allowed to deduct from the IRAP taxable base the following items:

- The total amount of the social security and welfare contributions related to the open-ended contract employees.
- A fixed amount, on an annual basis, equal to EUR 4,600 for every employee working under an open-ended contract and equal to EUR 10,600 for women and employees under 35 years (higher amounts are foreseen for employees in Abruzzo, Basilicata, Calabria, Campania, Molise, Puglia, Sardegna, and Sicilia). The deductions cannot be used by companies operating in specific sectors (e.g. concession regimes in infrastructure, electric, water, transport).

As of 2014, the above-mentioned fixed deductions are increased to EUR 7,500 and to EUR 13,500, respectively.

**Substitutive tax on reorganisations (mergers, demergers, contributions in kind)**

Corporate restructurings, such as contributions in kind, (assets versus shares transactions) mergers, and demergers, are, in principle, tax neutral even if, for financial accounting purposes, the transaction results in the recognition of higher values of the assets or of goodwill. Companies may elect to obtain partial or full recognition for tax purposes of the step-up in the financial accounting values of assets or of the goodwill arising from the corporate restructurings, provided they pay a substitutive tax.

The substitutive tax is calculated on the step-up in tax basis and is based on progressive rates of 12% to 16%. The first EUR 5 million is taxed at 12%, the tranche above EUR 5 million but less than EUR 10 million is taxed at 14%, and the amount in excess of EUR 10 million is taxed at 16%. The substitutive tax may also be paid in three annual instalments of 30% in the year of election, 40% in year two, and 30% in year three plus interest at the rate of 2.5% per year on the deferred amounts. The substitutive tax is not deductible for the purposes of IRES or IRAP.

In addition, stepped-up values of goodwill and trademarks may be depreciated for tax purposes over ten tax years instead of the normally allowed 18 years by paying a substitutive tax of 16%. The higher tax depreciation arising from this election is effective from the tax period subsequent to the one in which the substitutive tax is paid. For example, if a merger transaction occurred in year one and the substitutive tax was paid in year two, the increased tax depreciation would begin in year three.

**Tonnage tax**

Italian tax resident shipping companies, as well as non-resident shipping companies operating in Italy through a PE, can qualify for and then elect to be subject to the Italian tonnage tax regime. The regime basically allows for the determination of presumptive income based on the net tonnage of the qualifying ships apportioned to the effective shipping days (tonnage income). The tonnage income is subject to IRES only.

To qualify for the tonnage tax, ships must: (i) have a net tonnage of more than 100 net tons (NT); (ii) be used for goods transportation, passenger transportation, salvage,
towing, and other services; and (iii) operate in international shipping as defined by the rules disciplining Italian International Registry. Ships chartered out on a bare boat charter are excluded. Chartered ships with crew are included in the tonnage tax regime if their global net tonnage is less than 50% of the total net tonnage.

Tonnage income is calculated on the basis of the ship's net tonnage. The daily income is determined according to the following rate system:

<table>
<thead>
<tr>
<th>Ship's net tonnage (NT)</th>
<th>Daily income in EUR per NT</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 1,000</td>
<td>0.0090</td>
</tr>
<tr>
<td>1,001 to 10,000</td>
<td>0.0070</td>
</tr>
<tr>
<td>10,001 to 25,000</td>
<td>0.0040</td>
</tr>
<tr>
<td>above 25,001</td>
<td>0.0020</td>
</tr>
</tbody>
</table>

No deductions are allowed from tonnage tax income.

Income and expenses from the following activities are all deemed to be covered by the tonnage income determined as previously discussed:

- Transport of goods.
- Transport of passengers.
- Salvage and towing.
- Other services that need to be performed on the high seas.
- Charges related to the above-mentioned activities (e.g. administrative and commercial expenses, insurances fees).
- Other operations performed in close connection with the transportation operations (e.g. loading and unloading).
- Other minor activities.

Capital gains or losses arising from the transfer of ships that have been acquired by a company while under the tonnage tax regime are also deemed to be included in tonnage tax income. Conversely, for capital gains arising from the transfer of a ship acquired prior to election for the tonnage tax regime, the difference between the sale price and the net tax cost as of the last tax period prior to the election for the tonnage tax regime is subject to the ordinary tax regime. Tax losses, in this latter case, are tax deductible.

An election for the tonnage tax regime should be made for all of a company's or group's qualifying vessels. So called 'cherry picking' is not allowed. Election for the tonnage tax regime is on a voluntary basis, but, once elected, it remains in effect for ten years. The election is renewable.

---

**Corporate residence**

Companies having their legal or administrative headquarters or their principal business activity within the Italian territory are considered to be resident companies and are taxable in Italy on their worldwide income.

A foreign company holding one or more Italian subsidiaries is deemed to be resident of Italy for tax purposes if at least one of the following conditions exists:
• The foreign company is, either directly or indirectly, held by Italian tax resident persons.
• The board of directors of the foreign company is made up mainly of Italian resident individuals.

Non-resident companies are subject to IRES and IRAP only on their Italian-source income. Specifically, Italian non-resident companies having a PE in Italy are subject to IRES and IRAP with respect of the taxable income generated from the PE in Italy.

**Permanent establishment (PE)**
The domestic definition of PE is substantially aligned with the Organisation for Economic Co-operation and Development (OECD) model.

**Corporate residence of a trust**
Trusts are considered as persons subject to corporate taxation.

Residence is defined on the basis of the location of the place of management and of the main object of the trust. In the first instance, trusts that operate through an appropriate structure are deemed to be tax resident in Italy if the said structure is located in Italy. In the absence of any such structure, trusts managed by a trustee will be deemed as tax resident in Italy if the trustee is tax resident in Italy. In addition, trusts that have the largest part of their assets located in Italy are deemed a tax resident in Italy.

Note that there are anti-avoidance rules for Italian non-resident trusts, setting out the specific conditions on which these trusts can become Italian tax resident.

**Other taxes**

**Value-added tax (VAT)**
Italian VAT (*Imposta sul Valore Aggiunto*) applies to the supply of goods and services carried out in Italy by entrepreneurs, professionals, or artists and on importations carried out by anyone. Intra-Community acquisitions are also subject to VAT taxation under certain situations.

The Italian standard VAT rate is 21%. Reduced rates are provided for specifically listed supplies of goods and services, such as 4% for listed food, drinks, and agricultural products and 10% for electric power supplies for listed uses and listed drugs. Intra-Community supplies and exports are exempt from VAT.

Specific supplies of goods and services expressly listed in the law are exempt from VAT (e.g. hospital and medical care, education, insurance services, specific financial services, supply, leasing of particular immovable property). Other specifically listed transactions are also out of the VAT application scope (e.g. transfer of money, transfer of going concern).

Input VAT on purchases of goods and services related to business activity generally is allowed for recovery. Special limitations apply in relation to specific items (e.g. cars, entertainment expenses) and to companies carrying out both exempt from VAT with no right to deduct and taxable transactions.

The filing deadline for VAT returns is 30 September.
Italy

Modification of VAT standard rate
An increase of the standard VAT rate, from 21% to 22%, is expected as of 1 July 2013. However, the government may decide to postpone this increase.

The reduced rates of 4% and 10% will remain unchanged.

Service supply rules
Generic services supplied by a taxable person to another taxable person (business-to-business or B2B) are in the scope of the Italian VAT if the services are supplied to Italian taxable persons or to PEs of an Italian non-resident entity.

The specific rules are as follows:

- For services related to immovable property, reference must be made to the place in which the immovable property is located.
- For the transportation of passengers, the place in which the transportation takes place must be identified, including the proportion of the distance covered.
- For catering and restaurant services, the place in which the activity will be physically carried out must be identified.
- For short term hiring, leasing, and similar means of obtaining transport services, the place in which the vehicle is used must be identified (use and enjoyment rule has been implemented on these services).

The general rule for services supplied by a taxable person to a non-taxable person (business-to-consumer or B2C) identifies the place of taxation with the country of residence of the supplier.

Several rules, in addition to the B2B general rules, exist for the following:

- Brokerage services.
- Goods transport services.
- Services related to movable goods and ancillary activities related to transports.
- Long term hiring/leasing of means of transport services.
- Electronic services supplied by extra-EU suppliers.
- Telecommunications and television/radio broadcast services.

In addition, special rules are provided for certain services rendered to final customers established outside the European Union.

In relation to the VAT treatment of cultural, artistic, sporting, scientific, educational, recreational, and similar services, VAT is due in the country where the activities were physically carried out for B2C activities and VAT is due in the country of the recipient for B2B activities other than admission. For B2B services in respect of admission, the place of supply is where the events take place.

Time of supply for certain services
For transactions carried out from 17 March 2012, the time of supply is the time of completion in case of:

- supply of services falling under the general rule (i.e. generic supply of services) rendered by EU and non-EU taxable persons to taxable persons established in Italy, and
- supply of services falling under the general rule rendered by taxable persons established in Italy to EU and non-EU taxable persons.
In case of periodic or continuous supply of services, the time of supply is the date of maturity of the consideration.

Moreover, the above supplies of services, if performed/received by taxable persons established in Italy continuously over a period longer than one year and if no payments are carried out, even partially, in the same period, shall be considered carried out at the end of each calendar year up to completion of the same supplies.

**Reporting obligation**
Transactions carried out with subjects resident in ‘black list’ countries (i.e. tax haven jurisdictions) must be disclosed in periodical communications to be electronically filed with the tax authorities. The transactions to be reported are those higher than EUR 500.

A taxable person must also communicate the total amount of the output transactions rendered towards each customer and input transactions received from each supplier. As regards the communication related to transactions for which there is no obligation to issue an invoice, the threshold for this fulfilment is EUR 3,600, VAT inclusive. Specific transactions are excluded from the communication (e.g. importations, exportations, and other transactions that have already been communicated to the tax authorities, such as black list, insurance, electricity supply, and telephone services contracts).

**Reverse-charge mechanism extension**
According to the reverse-charge mechanism, the obligations related to supply of goods and provision of services carried out in Italy by non-resident taxable persons towards taxable persons established in Italy are fulfilled by the latter. Due to the implementation of the EU Directive 45/2010, the recipient of goods and/or services has to integrate the invoice received by the EU supplier or has to issue a self-invoice in case of a non-EU supplier and record it in the VAT sales register and VAT purchase register within a defined timeline changed as of 1 January 2013.

The reverse-charge mechanism obligation has been extended to the supply of all goods and services in the scope of the Italian VAT carried out by non-resident entities to taxable persons resident in Italy. Non-resident entities (including those having an Italian VAT number through indirect or direct registration) cannot charge Italian VAT to an Italian established VAT person.

**VAT credit offset with other taxes**
To offset a VAT credit against other taxes for an amount higher than EUR 5,000, it is necessary to wait until the 16th day of the month following the filing of the yearly VAT return on which the credit is shown.

Furthermore, in order to avoid abuse, taxpayers intending to offset a VAT credit for an amount greater than EUR 15,000 are required to ask their tax advisors or auditors to affix their signature to the VAT return, which is known as the ‘conformity mark’.

**Registration tax**
Specific deeds and contracts must be filed with the local registration tax office either upon signature or if specific circumstances occur, and the relevant tax must be paid.

Depending on the nature of the contract and on the assets that are the object of the contract, as well as on the form of the contract, registration tax is levied as a fixed amount or as a percentage of the value of the goods and/or rights that are the object of the contract. As a general rule, no proportional registration tax is due in the case of transactions subject to VAT.
VAT and registration tax on lease of immovable properties
Leases of residential and commercial buildings, or portion thereof, generally are exempt from VAT with no right to deduction and subject to the registration tax at 2% or 1% rate.

Please refer to the table below for an overview of the tax regime applicable to the leases, including financial leases, of both residential and commercial buildings.

* In some specific cases of subsidised housing, carried by taxable persons, VAT is applicable at a 10% reduced rate in case the taxable persons have opted to tax.

Specific rules apply in case of financial leases of residential and commercial buildings from a registration tax perspective.

Customs duty
At the moment of the importation of goods into the EU territory, customs duties are applied. The amount of customs duties to pay depends on the value and nature of the goods imported. In particular, for each kind of good, the Common Customs Tariff provides a tax rate to be applied to the value of the goods imported.

The correct classification of the goods is one of the most important issues to consider when an economic operator introduces goods in Italy. A wrong classification can give rise to the application of higher customs duties, and the operator could face a tax burden not due, or to the application of lower customs duties, and this situation could lead to a Tax Assessment by Italian Customs Authority.
The value of the goods is represented by the transaction value, hence, the price actually paid or payable for the goods when sold for exportation to the customs territory of the EU, provided that:

- there are no restrictions as to the disposal or use of the goods by the buyer
- the sale or price is not subject to some condition or consideration for which a value cannot be determined with respect to the goods being valued
- part of the profits of any subsequent resale, disposal, or use of the goods by the buyer will not be accrued, directly or indirectly, to the seller, and
- the buyer and seller are not related, or, where the buyer and seller are related, that the transaction value is acceptable for customs purposes.

In determining whether the transaction value is acceptable, the fact that the buyer and the seller are related is not, in itself, sufficient for considering the transaction value as not acceptable. Where necessary, the circumstances surrounding the sale are examined, and the transaction value is accepted if the relationship did not influence the price.

The price actually paid or payable is the total transaction amount paid for the imported goods and includes all payments made as a condition of sale of the imported goods by the buyer to the seller or by the buyer to a third party to satisfy an obligation of the seller.

In determining the customs value, the following items shall be added to the price, to the extent that they are incurred by the buyer and are not included in the price (list not exhaustive):

- Commissions and brokerage.
- Royalties and licence fees related to the goods under assessment.
- The cost of transport and insurance of the imported goods.

At the same time, provided that they are shown separately from the price actually paid or payable, the following items shall not be included in to the customs value (list not exhaustive):

- Charges for the transport of goods after their arrival at the place of introduction into the customs territory of the European Union.
- Charges for construction, erection, assembly, maintenance, or technical assistance, undertaken after importation of imported goods such as industrial plant, machinery, or equipment.
- Buying commissions.

A reduced tax rate at importation can be applied when the goods imported have a preferential origin. The preferential origin depends on the existence of commercial agreements between the European Union and other non-EU states or by facilities provided by the European Union to non-EU states unilaterally.

The application of a reduced tax rate can even depend on the existence of preferential tariff treatment or on the existence of a particular exemption provided by law for some kind of goods.

Any person may appoint a representative in one’s dealings with the Customs Authority to perform the activities and formalities laid down by customs rules. Such representation may be direct, in which case the representative shall act in the name and
on behalf of another person, or indirect, in which case the representatives shall act in one’s own name but on behalf of another person.

For direct representation, a forwarding agent, holder of a particular licence, must be appointed.

The representative must be established within the European Union.

**Excise duty**

The following goods are subject to excise duties:

- Energetic products (e.g. petrol, gas oil, natural gas, coal).
- Alcohol and alcoholic drinks (e.g. wine, beer, ethyl alcohol).
- Processed tobaccos (e.g. cigars, cigarettes, tobacco).
- Electric power.

The subjection of a product to excise duties has to be verified on the basis of its customs combined nomenclature code.

The tax liability, depending on the products, arises:

- at the moment of importation or production (and the excise duties must be paid at the moment in which they are released for consumption in Italy)
- when the excisable goods are used for heating or as fuel, and
- when the excisable goods are released for consumption or used for own use.

As a general rule (with exception from natural gas and coal, coke, and lignite), with reference to excise goods released for consumption during a month, the payment of the relative excise duties has to be done within the 16th day of the following month.

With reference to excise goods imported, customs rules are applied as far as the procedure and terms of payment are concerned.

The production, processing, and holding of ‘excise goods’, except from natural gas, coal, coke, lignite, and electric power, are subject to a suspensive regime performed through a fiscal warehouse.

In order to manage a fiscal warehouse, it is necessary to acquire a licence issued by the Italian Customs Authority, and there are specific obligations for the owner of a fiscal warehouse (e.g. provide for a particular guarantee, keep a particular accounting system for the goods stored, be subject to controls performed by Italian Customs Authority, where requested).

The Italian legislation provides for many exemptions with regards to the use of ‘excise goods’.

Furthermore, under certain circumstances, a tax refund is granted to the operator who released for consumption, if, afterwards, the products are not consumed in Italy.

**Stamp duty taxes**

Stamp duty taxes (*Imposta di Bollo*) apply on a certain list of deeds or documents provided for by the relevant law provision (e.g. checks, bills of exchange, statements of account, certificates, books of account, deeds of transfer of quotas, and, in some cases, invoices).
According to the kind of deed, stamp duty tax is due at the moment of the deeds’ origin or in case of use (e.g. if the deed is filed to the Italian Registration Office). Moreover, it can be a fixed amount or as an amount proportional to the value of the deed or document.

Stamp duty tax can be paid:

• ordinarily, through a physical stamp attached on the document, or
• virtually, through electronic means (in this case, a specific authorisation from the Italian tax authorities and a specific process procedure are needed).

Stamp duty tax is usually alternative to VAT; however, in case of considerations partially subject to VAT and partially not subject to VAT, the invoice is subject to stamp duty tax if the total amount of the considerations not subject to VAT exceeds EUR 77.47. Moreover, some transactions are stamp duty tax exempted (e.g. inter-Community supply of goods). For transactions that are exempted from VAT (with restriction on VAT credit) and for transactions out of scope of VAT, exceeding EUR 77.47, an amount of EUR 1.81 is due as stamp duty tax for each issued invoice.

**Imposta Municipale Unica (IMU)**
IMU is the municipal tax on real estate. It is levied annually either on the owner or on the financial lessee of real estate (i.e. buildings, development land, and agricultural land). The standard tax rate is 0.76%. Depending on the municipality and on the status of the taxpayer, the tax rate can be increased or decreased.

The taxable basis generally is determined on the basis of the so called ‘cadastral value’ (i.e. capitalisation of the deemed standard income that is expected to be derived from the real estate).

**Financial Transaction Tax (FTT)**
The FTT is applicable on transactions carried out starting from 1 March 2013 (for derivatives, the starting date is 1 July 2013).

The FTT is applicable on the transfer of the property of:

• portfolio shares and other equity instruments issued by Italian resident companies
• instruments or securities representing shares, regardless of the residence of the issuer
• shares, due to convertible bonds, and
• derivative instruments whose underlying are securities issued by Italian resident companies (these are subject to a special tax scale, on the notional amount).

The FTT tax base is the net daily balance of transaction on the same financial instruments by the same person.

The applicable general rate is equal to 0.22% in 2013 and to 0.20% from 2014 on. The tax rate is reduced to 0.12% for transactions that are operated on regulated markets and multilateral trading systems (0.10% as from 2014 on).

**Branch income**
The tax regime for PEs is the same as for corporate Italian entities (e.g. joint-stock companies). Accordingly, a PE is subject to IRES as well as IRAP. Both taxes are
determined on the basis of the relevant financial statements related to the business activities carried out by the PE.

Transfer pricing principles apply to ‘transactions’ between the head office and its Italian PE.

---

**Income determination**

In principle, positive and negative components of a company’s income statement are, respectively, taxed or deducted on an accruals basis (under the accrual principle) for tax purposes. Additionally, in order to be taxed/deducted, income items have to be certain under a legal standpoint and either objectively determined or capable of objective determination as to their amount (under the certain and objective determination principle). Income statement items accrued in the statutory accounts not meeting the above criteria are not allowed for tax deduction nor taxed as income in the tax period. Deduction or taxation of income is correspondingly deferred to future tax periods when the criteria are met.

Expenses generally are deductible if they relate to activities generating revenues concurring to the company's taxable income (under the inherence to business principle) and provided they are included in the relevant statutory accounts (under the imputation principle). An exception to this general rule is made for those income statement items accrued in the statutory accounts relating to a tax period different from that in which they become relevant for tax purposes in accordance with the principles of certainty and objective determination as described above. These items are taken into account in determining taxable income in the tax period when the latter conditions are met.

For IRAP purposes, relevant income and expense are those reported in the financial statements.

Specific rules have been released for entities that have adopted International Financial Reporting Standards (IFRS) for Italian statutory financial reporting purposes. These provisions are aimed to align income determination rules with IFRS.

**Inventory valuation**

Italian tax law allows the application of all the most commonly used inventory valuation methods: last in first out (LIFO), first in first out (FIFO), average cost. For IRES only, the reference prices used to calculate the written down value of the inventory items cannot be lower than their market prices during the final month of the tax period.

Companies operating in the oil and gas sector are required to adopt either average cost or FIFO for tax purposes.

**Capital gains**

Capital gains are taxable in the tax period in which they are realised, as follows:

- Fixed assets: the gain realised on the sale of fixed assets is taxable for both IRES and IRAP purposes. Additionally, for IRES purposes, tax on capital gains can be spread over a maximum of five years. This treatment is allowed if the company owned the fixed assets for not less than three years.
• Financial Investments: a specific participation exemption regime (PEX) is applicable. Under this regime, capital gains realised by Italian companies on sales of shareholdings are 95% exempt from IRES.

PEX applies if all of the following conditions are met:

• The shareholding was held uninterruptedly for at least 12 months prior to the sale.
• The investment was classified under financial fixed assets in the financial statements relating to the first tax period of uninterrupted ownership.
• The subsidiary is actually carrying on a commercial activity (e.g. investments in companies mainly performing management of their own real estate are not entitled to PEX benefits).
• The majority of the subsidiary’s income is not generated in a tax haven country or one with a privileged tax regime.

The third and fourth conditions must be met both at the time of the sale of the investment and in the three preceding years. If these conditions are not met, the capital gain realised by the company is ordinarily taxed. Capital losses arising from the sale or write-down of shareholdings meeting PEX conditions are basically not tax deductible. Likewise, the capital losses realised on sales of non-PEX investments are tax deductible. Specific exemptions are provided for those entities adopting IFRS for Italian statutory accounts reporting purposes.

Specific anti-dividend washing rules provide that where capital losses arise from the disposal of shareholdings that are not eligible for PEX, such losses are deductible only for the part exceeding the tax exempt amount of dividends (see Dividend income discussion below) received from the shares in question in the 36 months prior to the disposal.

Capital gains on financial investments generally are excluded from the IRAP taxable base.

**Dividend income**
Dividends received by Italian resident companies from Italian companies or from companies resident in countries other than tax havens (i.e. not included in the ‘black list’) are excluded from the IRES taxable base for 95% of their amount. Conversely, no exemption applies to dividends paid by entities that are resident in tax haven jurisdictions (unless those dividends derive from profits that were already taxed under the Italian controlled foreign company [CFC] rules). There are specific rules for entities adopting IFRS for Italian statutory financial reporting purposes. For such entities, dividends from investments in shares and other financial instruments held for trading are fully taxable.

Dividends generally are excluded from the IRAP taxable base.

**Interest income**
Interest income is generally part of the taxable base.

**Foreign income**
An Italian resident corporation is taxable on all income whether produced in Italy or abroad. Profits earned by subsidiaries that are resident or located in countries or territories other than tax havens are taxed only on distribution of the relevant profits. Double taxation is, in principle, avoided by means of foreign tax credits.
Shell companies
Resident companies and PEs of non-resident companies can be qualified as non-operating entities if, alternatively, one of the following conditions is met:

- The entity is in a tax loss position for three consecutive tax periods.
- The average revenues recorded in the current fiscal year and in the prior two years are lower than the amount resulting by applying certain 'deemed return' percentages to the average balance sheet value of specific assets in the current fiscal year and the two previous years.

The main assets to be taken into consideration are shares and shareholdings, financial receivables, owned or leased real estate, and owned or leased tangible and intangible assets. The value of any assets acquired or sold during the fiscal year must be adjusted according to the ownership period.

These conditions must be checked every year. Therefore, it is possible for an entity to be 'non-operative' in one year and operative in the following year.

The shell company is assessed as having a minimum taxable income for both IRES and IRAP purposes.

For IRES purposes, the taxable income of a non-operative entity is determined as the sum of such values emerging from the application of specific percentages to the book values of the above-mentioned assets.

The current IRES standard rate for entities qualified as shell companies is 38%.

Tax losses generated in a tax period when the company was deemed to be non-operating cannot be carried forward.

For IRAP purposes, labour costs and other non-deductible items have to be added back to the deemed minimum IRES income as outlined above.

These rules are not applicable in the first year of a company's incorporation. Exemptions from these rules can be achieved:

- by means of an advance ruling from the Italian tax authorities aimed at assessing the specific circumstances that caused the company not to earn the minimum amount of income or
- by specific objective situations provided for by Italian law (e.g. company directly or indirectly held by listed companies).

Shell companies are also subject to limitations in their ability to recover VAT credits.

Deductions
The principles outlined in the section on Income determination also apply for deductible costs.

Depreciation and amortisation
All fixed assets that are used in the business of the company, except land, are depreciable for tax purposes (for both IRES and IRAP).
For IRES, the maximum depreciation rates for fixed tangible assets are set forth in a Ministerial Decree. Such depreciation rates are different, depending on the type of asset and on the economic sector in which the company operates. In the event that financial accounting depreciation exceeds the amounts allowed for tax purposes, temporary differences arise. Tax depreciation of fixed tangible assets is allowed from the tax period in which the asset is first used. In the first tax depreciation period, the depreciation rate cannot exceed one-half of the normal rates.

It is worth pointing out that a project aimed at achieving the grouping of the tax amortisation rates has been announced by the government. Timing for the implementation of such a project is still uncertain.

Land is not a depreciable asset. Amortisation of goodwill derived from an asset deal and amortisation of trademarks are deductible for an amount not exceeding one-eighteenth of the cost in any year.

Patents, know-how, and other intellectual property may be amortised over a two-year period.

Concession rights may be depreciated with reference to the utilisation period as determined either by law or in the relevant agreement.

For IRAP purposes only, depreciation and amortisation (other than as related to goodwill and trademarks) are deductible in accordance with the amounts reported in the financial statements, regardless of the limits outlined above.

**Interest expense**

Generally, interest expense is fully tax deductible up to the amount of interest income. Thereafter, excess interest expense is deductible at up to 30% of the gross operating margin (interest deduction capacity) as reported in the financial statements. Gross operating margin is defined as the difference between operating revenues and expenses excluding depreciation of tangible and intangible assets and charges for leased assets as stated in the profit and loss account for the year.

Net interest expense in excess of the yearly limitation is carried forward indefinitely. Hence, net interest expense not deducted in previous years can be deducted in any future fiscal year as long as total interest in that year does not exceed 30% of gross operating margin. If net interest expense is lower than the annual limit (i.e. 30% of gross operating margin), this difference can be carried over to increase the company's interest deduction capacity in future years.

Where an election is made for the domestic tax consolidation regime, *(as discussed in the Group taxation section)*, the net interest expense limitation applies to the consolidated tax group. As a consequence, if a company participating in a tax group has an excess interest deduction capacity, this excess may be used against the interest deduction deficit in another company belonging to the same tax consolidation group. Under specific conditions, non-resident subsidiaries can also be ‘virtually’ included in the tax consolidation for the sole purpose of transferring their excess capacity over 30% of gross operating margin in order to increase the overall interest deduction capacity of the Italian group.

The above-mentioned rules are not applicable for financial institutions, such as banks and insurance companies, where the deductibility of interest expense (for both IRES
and IRAP purposes) is limited to a fixed amount of 96% of the interest expense shown in the income statement of these entities.

**Allowance for Corporate Equity (ACE)**
The ACE is a deduction that corresponds to the net increase in the equity employed in the entity, multiplied by an index yearly determined by the Ministry of Finance, currently equal to 3%.

The relevant increase is determined by the equity contributions and by the retained earnings (except profits allocated to a non-disposable reserve) less the following items:

- Reductions of the net equity with assignment to shareholders, including, in particular, dividend distribution.
- Investments in controlled companies.
- Certain intra-group business acquisitions.

If the allowance for a year is higher than the net IRES taxable base, the difference will be carried forward to the next periods.

The reference equity is the amount disclosed in the financial statements for the fiscal year as at 31 December 2010, net of the profits for the same year.

**Bad debts**
Yearly provision for bad debts not guaranteed by third parties and relating to sales of goods and services is tax deductible at up to 0.5% of the receivables gross value. Deduction shall no longer be permitted when the total amount of the bad debts reserve exceeds 5% of the above-mentioned gross value of the receivables as of the end of the fiscal year.

Regardless of the above, losses on bad debts shall be deductible if supported by precise and objective elements or, in any case, if the debtor is subject to bankruptcy proceedings.

A loss on a bad debt can be deducted for IRES purposes when the following conditions jointly apply:

- The term for payment has elapsed by six months.
- The receivable has a determined threshold. In particular, the item is up to EUR 2,500 for small companies and up to EUR 5,000 for big corporations (with turnover over EUR 100 million).

Moreover, the loss is tax deductible, regardless of the amount, when the collection right is prescribed (generally after ten years).

**Charitable contributions**
Deduction of charitable contributions is allowed. The amounts allowed for deductions depend on the specific features of the recipient entity, and specific limitations are set by the law.

**Entertainment expenses**
For IRES purposes, expenses for gifts and entertainment that meet the requirements (both qualitative and quantitative) contained in the specific Ministerial Decree are fully deductible in the tax period in which they are incurred. Entertainment expenses that do not meet these requirements cannot be deducted.
Expenses related to gifts with a value of EUR 50 or less are entirely deductible.

**Travel expenses**
For IRES purposes, the deduction for travel expenses incurred within the municipality is limited to 75% of the amount incurred. However, the VAT related to such costs is fully recoverable.

**Car costs**
Starting from 2013, the IRES deductibility of expenses related to cars used by companies is changed as follows:

- From 40% to 20% for cars that are not assigned to employees or are granted to employees solely for business use.
- From 90% to 70% for cars granted to employees for both business and private purposes.

Car costs may be entirely deducted if (i) automobiles are absolutely necessary for the company's business or (ii) automobiles are an essential element in the company's activity (i.e. vehicles owned by a car rental company).

**Telephone expenses**
For IRES purposes, up to 80% of the total expenses related to both mobile and landline telephones are deductible.

**Fines and penalties**
Fines and penalties are generally not considered inherent costs and are, consequently, not deductible for tax purposes.

**Taxes**
The following IRAP items are deductible in determining the IRES taxable base:

- The 10% of IRAP paid during the year.
- An amount determined on the IRAP paid on the cost of employees, net of the relevant deductions.

IMU, municipal tax on real estate, is not deductible for either IRES or IRAP.

**Purchases from suppliers resident in tax haven jurisdictions**
The costs of goods and services purchased from entities that are resident in tax haven jurisdictions are deductible on the condition that the taxpayer can, upon request of the tax authorities, provide evidence that the foreign counterparts carry out a real business activity or that the transactions were carried out for good and sound economic reasons (e.g. better economic conditions, the foreign supplier is the sole distributor for that product).

An official list of tax haven jurisdictions (known as the ‘black list’) has been issued by the Ministry of Finance. A list of countries that are not considered to have a privileged tax regime (known as the ‘white list’) is expected, and countries not on this white list will be deemed tax havens. Specific disclosure is required in a company's income tax return for the expenses arising in tax haven jurisdictions.

**Net operating losses**
Tax losses can be carried forward for IRES purposes and used to offset income in the following tax periods without any time limitation.
Italy

Tax losses can only be offset with taxable income for an amount not exceeding 80% of the taxable income. Thus, corporations are required to pay IRES on at least 20% of taxable income.

Note that losses arising in the first three years of activity can be offset with 100% of taxable income.

For IRAP purposes, tax losses may not be carried forward.

Specific (tax anti-avoidance) rules limit the carryforward of tax losses in the event of:

- change of control and
- an effective change of the main activity (performed by the company carrying forward the losses).

The aforementioned changes must occur together in order for the limitations to be applicable. The change of the main activity is relevant for these purposes if it takes place in the tax period in which the change of control occurs or in the two subsequent or preceding periods.

Specific anti-abuse provisions are also applicable to net operating losses in cases of merger or demerger.

In Italy, tax losses may not be carried back.

**Payments to foreign affiliates**

Transactions with foreign affiliated companies should be at ‘fair market value’ and, generally, as defined by OECD guidelines. See Transfer pricing in the Group taxation section for more information.

---

**Group taxation**

**Domestic tax consolidation**

Companies belonging to the same group can elect domestic tax consolidation. This allows the determination of a single IRES taxable base comprised of the taxable income and losses of each of the participating entities. The tax consolidation does not operate for IRAP purposes.

Where an overall tax loss position arises, this can be carried forward and used against future consolidated taxable income. Conversely, tax losses arising in fiscal years preceding the domestic tax consolidation election can be carried forward and used only by the company to which these losses belong.

The taxable basis determined by each company participating in the tax consolidation arrangement is included in its entirety. No apportionment is made in relation to the percentage of control.

In order to validly elect the Italian domestic tax consolidation regime, the following conditions must be met:

- The consolidating entity must be an Italian tax resident company, and it must hold, directly or indirectly, more than the 50% of the share capital of the consolidated entities (so called ‘legal control’).
• This control must be in place from the beginning of the tax period for which the tax consolidation is applied for.
• All of the companies participating in the group must have the same year-end.

Provided that specific requirements are met, Italian PEs of foreign companies can also participate as controlling entities in a tax consolidation.

The consolidation arrangement operates on an elective basis. Taxpayers may select whether to be included or not, and it is not necessary for all the Italian group/sub-group companies to jointly elect for the tax consolidation.

Once the election is made, it cannot be revoked for three fiscal years.

**Worldwide tax consolidation group**

A worldwide tax consolidation group is available, allowing the consolidation of foreign subsidiaries.

In addition to the requirements set out for the domestic tax group system, the following conditions apply:

• The ultimate parent company must be either owned by individuals who are tax residents of Italy or listed on the Italian Stock Exchange.
• The option must be exercised for all foreign companies (under the ‘all in, all out’ principle).

Income for each company is apportioned in the tax consolidation based on the actual percentage of control exercised by the ultimate parent company that is an Italian tax resident.

A number of additional requirements need to be fulfilled in order for a worldwide tax consolidation to be operative, including a mandatory audit of the financial statements of all the foreign subsidiaries.

Once the election is made, it cannot be rescinded for five fiscal years.

**Transfer pricing**

Income derived from operations with non-resident corporations that directly or indirectly control the Italian entity, are controlled by the Italian entity, or are controlled by the same corporation controlling the Italian entity have to be valued on the basis of the normal value of the goods transferred, services rendered, and services and goods received if an increase in taxable income is derived there from. Possible reductions in taxable income as a result of the normal value rule are allowed only on the basis of mutual agreement procedures or the EU Arbitration Convention.

The normal value is the average price or consideration paid for goods and services of the same or similar type, carried on at free market conditions and at the same level of commerce, at the time and place in which the goods and services were purchased or performed. For the determination of the normal value, reference should be made, to the extent possible, to the price list of the provider of goods or services, and, in their absence, to the price lists issued by the chamber of commerce and to professional tariffs, taking into account usual discounts.
Italy

Penalty protection regime with transfer pricing documentation support
Transfer pricing rules provide for a penalty protection regime in case of transfer pricing audit, provided that the taxpayer has prepared proper documentation detailing the compliance of inter-company transaction to the arm's-length principle.

The regulation applies to transactions incurred between Italian entities and non-resident entities belonging to the same group (transfer pricing rule are not applicable to domestic transactions). No specific methods have been introduced to test the arm’s length of transactions; reference is made to the OECD guidelines.

On the base of the transfer pricing regulation, taxpayers can obtain penalty protection if they provide the Italian tax authorities with:

• Documentation to support the inter-company transactions drawn up in the specific format detailed in the Regulation issued by the Italian tax authorities and in the Italian language. The tax authority confirmed that information in annexes (inter-company contracts and transactions diagram) can be in the English language.
• Notification that documentation has been prepared and available by checking the box in the annual corporate income tax return.

The information required is based on the EU Code of Conduct for Transfer Pricing documentation.

Based on the group structure, a Master File and/or Country File have to be prepared.

Italian-based groups and Italian sub-groups owning non-Italian subsidiaries must produce both a Master File and a Country File. Italian subsidiaries of multinational groups need to produce a Country File only.

The sub-group provisions are onerous, especially so where they relate to branches. Where a foreign entity has an Italian branch but the company itself is also a holding company, a Master File is required for the foreign entity’s subgroup, even if there is no holding directly attributed to the branch.

Sub-holding companies based in Italy with at least one non-Italian subsidiary, which need to produce a Master File, may instead produce the Master File for the entire group in English. If it does not contain all the information in the Italian Regulation, they will need to supplement it.

Documentation must be signed by the legal representative of the company and provided to the authority upon request within ten days. Also, an electronic copy must be provided at authority request.

Small and medium companies (defined as those with an annual turnover of less than EUR 50 million) need to update the economic analysis only every three years, provided that no significant change in the business occurred. Otherwise, it is necessary to update the economic analysis each year.

As the documentation provisions provide a potential benefit for Italian taxpayers (by waiving the automatic tax geared penalties that would otherwise apply to a transfer pricing adjustment), taxpayers have been given the opportunity to take advantage of this penalty protection for all open years if they file a communication that they possess documentation in the required format before they receive notification of any tax audit.
International ruling procedures are available, to agree transfer pricing methodology with the tax authorities.

The agreement executed between the tax authorities and the taxpayer is binding for the fiscal year during which the agreement is executed and for the following two fiscal years, unless significant changes in the circumstances relevant for the conclusion of the agreement executed by the taxpayer take place.

**Thin capitalisation**

Italy no longer has thin capitalisation rules per se. Instead, net interest expense is deductible only up to an amount equal to 30% of gross operating margin (see Interest expense in the Deductions section for more information).

**Controlled foreign companies (CFCs)**

An Italian company that controls, either directly or indirectly, an entity located in a tax haven jurisdiction is required to consolidate the taxable income arising in proportion to the percentage of shareholding held, irrespective of whether the profits have been distributed or not.

Income from CFCs is taxed separately from the other taxable income of the business at the standard IRES rate (i.e. other tax losses cannot be used to offset CFC income). Foreign taxes paid by the CFCs are recoverable by way of a corresponding tax credit.

Dividends received by an Italian shareholder from a CFC are excluded from taxable income up to the amount of the taxable income attributed under the above CFC provisions. The excess of any dividends over income already included through the CFC regime is fully taxable in the hands of the shareholder.

Where companies are located in a tax haven, the CFC rules also apply for companies holding not less than the 20% of the company’s share capital or entitled to not less than 20% share of the company’s profits. In such instances, there are specific rules to determine the taxable income attributable to the Italian resident shareholder. The taxable income is determined by applying specific income ratios to the business assets of the CFC as they appear in the relevant accounts.

Exemption from these CFC rules can be achieved by means of an advance ruling from the Italian tax authorities. To obtain such a ruling, adequate evidence must be provided to demonstrate at least one of the following:

- The foreign company is mainly and effectively engaged in sales and/or industrial activities in the ‘market’ of the foreign host state or territory. Banks, other financial entities, and insurance companies must demonstrate that most of the financial resources and related proceeds are made in or the result of yields, respectively, from the market of the foreign host state or territory. However, this exemption cannot be requested where more than 50% of the income of the foreign subsidiaries is derived from ‘passive income’ (e.g. holding or investment in securities, receivables, or other financial assets, transfer or licence of intangible rights) or from intra-group services.
- No less than 75% of all the proceeds of the CFC have been taxed in jurisdictions that are not tax privileged countries (e.g. a company resident in Hong Kong has all of its operations in China mainland and it is subject to ordinary taxation there).

The CFC rules also extend to controlled companies that are located in a jurisdiction with a privileged tax regime that is not a tax haven, if the following conditions exist:
• The effective tax is less than 50% of the tax that would have been charged had the company been resident in Italy.
• More than 50% of revenue is derived from so-called ‘passive income’ or from intra-group services.

By means of an advance ruling, the Italian parent company is able to obtain an exemption from these rules if it is able to provide proper evidence that the establishment of the company in the privileged tax jurisdiction is not for tax avoidance purposes (unfair tax advantage).

---

**Tax credits and incentives**

**Foreign tax credit**
Where foreign-source income definitively is taxed abroad, a tax credit can be claimed for use against a company’s IRES liability. The amount of the tax credit that can be claimed is the lower of the foreign tax incurred and the proportion of the IRES liability related to the foreign-source income. For partially exempt income (e.g. dividends), the foreign tax credit is reduced in proportion to the amount of the income taxable in Italy.

If an Italian company receives foreign income from more than one country, this limitation is applied separately to each country.

Foreign taxes borne by the foreign PE of an Italian resident company are allowed to be offset against the overall consolidated tax liability (IRES).

Any excess of foreign tax credit over the maximum amount allowed for recovery in the same tax period can be carried back or carried forward for eight years and recovered if specific conditions are met (e.g. same source country of the income, occurring because of an excess of the IRES liability related to the foreign-source income).

**Inward investment, capital investment, and research and development (R&D) investment incentives**
A number of incentives have been established to attract new industry to southern Italy and certain depressed mountain areas in central and northern Italy.

Tax credits are given to companies that increase the number of their employees and that invest in R&D.

The possibility of taking advantage of these rules, however, depends on the taxpayer fulfilling specific conditions and on the actual availability of financial resources by the Italian state. These financial resources generally are set in the annual state budget.

**Tax regime for EU investments in Italy**
A special incentive has been introduced for the companies resident in other EU countries starting new economic activities in Italy and for their employees and staff. The possibility is to apply for three years the tax regime of EU countries in alternative to the Italian one.

The new activities need to be effectively performed in Italy.

The possibility to benefit from the new incentive needs to be agreed by means of an international ruling procedure with the Italian tax authorities.
The Ministry of Finance is expected to issue a decree regulating the relevant fulfilments for the practical application of this rule.

**Withholding taxes**

A 20% base standard withholding taxes (WHT) rate is applicable on the yields on loans and securities (bonds, shares, etc.) paid by Italian resident entities to both Italian and non-Italian resident investors.

The said standard WHT rate, however, does not affect the applicability of those rules allowing either the application of reduced WHT rates or the full exemption from the said withholdings (e.g. double tax treaties [DTTs], EU directives, special domestic tax rules).

Interest on Treasury bonds is subject to a 12.5% domestic WHT.

**WHT chart**

Domestic corporations paying certain types of income are required to withhold as shown on the following chart. The numbers in parentheses refer to the notes below.

Notes

1. The actual applicable rate depends on the features of the recipient. Applicable rates are as follows: 0% applies on loan agreements and ordinary notes when the recipient is a corporation; 20% rate in all other cases.
2. 0% is applicable on dividends received by shareholders holding no less than 20% of the share capital (2% in the case of listed entities), so called ‘qualified investments’. The rate applicable to ‘non-qualified investments’ is 20%.
3. The rate is applicable on 75% of the gross amount of the royalty paid.
4. Pursuant to the EU Directives and provided that the requirements set forth therein are met, payments of dividends, interest, and royalties made by an Italian company to an EU resident group company can be WHT exempt. Specifically for the dividends, the minimum shareholding requirement (to benefit from this exemption) is currently equal to 10%.
5. Should the full WHT exemption not apply, 1.375% is applicable on dividends paid to EU tax residents.
6. Pursuant to the 2004 Swiss EU tax agreement and provided that the requirements contained therein are met, payments of dividends, interest, and royalties, made by an Italian company to a Swiss tax resident group company can be WHT exempt.
7. Non-residents persons have the right to obtain reimbursement for up to one-fourth of the withholding effected, upon proof of the actual taxation of the dividends in the foreign country where the recipient is a resident.
8. Provided that all conditions are met, domestic tax legislation is applicable if more favourable for the taxpayer. In a number of circumstances, tax treaties may provide for particular tax rates mainly dependent on the nature of the instruments and on the profile of the recipients/payers. In such cases, the applicable WHT must be verified from an analysis of the relevant tax treaty.
9. The treaty enters into force as of 1 January 2014.
10. The treaty with the former USSR remains applicable with respect to Kyrgyzstan, Tajikistan, and Turkmenistan.
Italy

**Tax administration**

**Taxable period**
The ordinary taxable period is equal to 12 months. Conformity with the calendar year is not requested. In particular cases, the duration of the taxable period can be different from 12 months (e.g. newly established companies may be allowed to have taxable periods of up to 18 months; companies that are involved in extraordinary transactions [merger, de-mergers, etc.], as well as companies that are liquidated, may have taxable periods shorter than 12 months).

**Tax returns**
IRES and IRAP returns must be filed by the end of the ninth month following the tax year-end.

The ordinary filing deadline for WHT agent returns is 31 July for both the simplified WHT return and the ordinary WHT return.

**Payment of taxes**
For IRES and IRAP purposes, the tax law provides for both advance payments and settlement payments. The advance payments are equal to the net tax payable for the previous tax period and are due during the tax period to which they refer. Advance payments are split into two instalments:

- 40% by the 16th day of the sixth month following the tax year-end.
- 60% by the end of the 11th month following the tax year-end.

Settlement payments are due by the 16th day of the sixth month following the tax year-end to which they refer.

Tax payments should be performed through a specific form to be electronically filed to the tax authorities (i.e. F24 form).

**Offsetting of taxes**
Payables and receivables (not claimed for refund) resulting from a return regarding different taxes are allowed for off-setting within a yearly limit of EUR 516,457.90. Starting from 2014, such a limit is increased to EUR 700,000.

The mentioned offsetting is not allowed if taxes definitively assessed by the tax authorities and not paid within the deadlines by the taxpayer are higher than EUR 1,500. In case of breach of the above limit, the law provides for a penalty of up to 50% of the undue settled amount.

**Administrative penalties**
Failure to file a tax return results in a penalty ranging from 120% to 240% of the taxes due. Minimum penalties (ranging from EUR 258 to EUR 1,032) are applicable if no tax liability emerged in the return.

A tax return showing either a taxable income lower than the one assessed or a tax credit higher than those owed to the taxpayer (i.e. an untrue tax return) results in a penalty ranging from 100% to 200% of the higher taxes ultimately due.

Omitted and/or late payments of taxes of whichever kind and nature result in a penalty equal to 30% of the unpaid/late paid tax.
Special rules apply where similar violations are repeated over various years.

Self-disclosure of tax law breaches are allowed on payment of the higher taxes and of reduced penalties. Such self-disclosure is allowed on condition that no tax audit is in progress in relation to the tax period in which the breach took place. The reduced penalties are always computed on the floor of the applicable range of penalties. The actual reduction depends on the time elapsed between the occurring of the breach and the self-disclosure itself. In this respect, reduced penalties may range from 1/8 to 1/10.

**Software based tax controls (so-called ‘Studi di settore’)**
The Italian Tax law provides for special tax control procedures for those enterprises whose total turnover does not exceed EUR 7.5 million. The controls, so-called ‘Studi di Settore’, are based on standardised economic models of the different business fields and are aimed at assessing whether or not a specific subject’s taxable income is in line with its own standard model (on statistical basis).

A higher possibility of undergoing tax audit should be considered for entities not meeting the expected profitability and/or turnover resulting from these automated controls.

**Tax audit process**
For larger companies having a yearly turnover exceeding specific thresholds (that are in the process of being progressively decreased to EUR 100 million), administrative checks on tax returns may be carried out within the year following that in which the tax return has been filed.

Tax audit can take place at the taxpayer’s premises as well as in the tax authorities’ offices. The statute of limitations provides that tax auditors can stay at a taxpayer’s premises for not longer than 60 working days (30 days ordinary term plus 30 days of extension). At the end of this period, the audit must come to an end unless extraordinary issues arise. Tax auditors must take note of the observations and requests made by the taxpayer. At the end of their audit, the tax auditors must draw up a tax audit report whereby the outcome of the audit activity must be detailed and the findings (if any) must be illustrated and motivated. A copy of the report has to be filed with the tax office.

The tax office receiving the tax audit report examines the findings reported by the tax auditors and starts the assessment procedure, which may lead to the issuing of a tax assessment notice bearing the request for payment of higher taxes and/or penalties.

**Tax controversy and dispute resolutions**
Should the taxpayer accept all of the challenges raised by the tax authorities, it may take advantage of the application of reduced penalties. The reduced penalties may range from 1/6 to 1/3 of the minimum applicable penalties, depending on the status of the controversy.

In case the taxpayer decides not to accept the challenges by the tax authorities, a settlement procedure can be initiated. The favourable outcome of the settlement procedure brings forth (in addition to the agreed-upon reduction of challenged taxes) the reduction of penalties: ordinarily down to 1/3 of the minimum applicable penalties.
Italy

In case no settlement is either achieved or requested for, the taxpayer may start a tax dispute before the Court. The judicial proceedings are structured in three tiers:

- Provincial Tax Commission, in first instance.
- Regional Tax Commission, in second instance.
- Supreme Court of Cassation.

**Statute of limitations**
The Italian tax authorities are entitled to make an assessment in relation to direct taxes (IRES and IRAP), VAT, and WHT returns up to the end of the fourth calendar year following the year in which the tax return was filed. Under certain circumstances (e.g. no return filed or fraud giving rise to criminal law penalties), the above deadlines may be extended.

**Topics of focus for tax authorities**
Extraordinary transactions (such as mergers, de-mergers, etc.) continue to be a topic of focus for tax authorities due to the potential applicability of tax anti-abuse rules.

As a response to recent cases of carousel-frauds on VAT, cross-border transactions are being more heavily scrutinised.

Over the last few years, we experienced an increasing focus by the tax authorities on transfer pricing and PE related issues. That is, presumably, a result of the introduction in Italy of specific guidelines in relation to intra-group transactions (namely the penalty protection rules).

**Other issues**

**Adoption of IFRS and taxation**
The Italian tax law provides for two basic principles and some specific rules for taxation of a company adopting International Accounting Standards (IAS)/IFRS in the statutory financial statements:

- Derivation principle (‘Principio della Derivazione’): the taxable base of companies is determined starting from the net income arising from the profit and loss, increased or decreased by items directly booked to equity pursuant to the application of IAS/IFRS. To such income, the general tax adjustments set forth by the Corporate Income Tax Law apply. In this respect, as exception to the general tax criteria, the accrual principle, and the qualification and classification criteria stated by the IFRS are relevant for the calculation of the taxable base.
- Neutrality principle (‘Principio della Neutralità’): such principle aims to neutralise the effects deriving from the movement to IAS/IFRS (First Time Adoption or FTA). Conversely, such principle does not grant an equal treatment for companies adopting or not IAS/IFRS (in fact, specific rules are applicable only to IAS/IFRS adopters, e.g. taxation of dividend on held for trading securities, derivatives).

The following specific rules applicable to IAS adopters must be considered:

- Adjustments or recognitions of transactions made in equity and/or in the ‘other comprehensive income (OCI)’ are relevant for tax purposes, to the extent that such items are in compliance with general tax principles.
- For equity instruments, the legal classification is prevailing over the accounting one (debt vs. equity classification).
• Under certain conditions, unrealised profits and losses recognised in the profit and loss become taxable and deductible (e.g. fair value on securities other than shareholdings and on derivatives transactions).
• The tax treatment of transactions between IFRS adopters and non-IFRS adopters is based on the accounting principle adopted by each company (e.g. financial leasing transaction).
• Depreciation and amortisation are permitted within the rates provided by the tax rules and limited to the amount booked in the profit and loss statement. In this respect, the abolition of the imperative systematic depreciation of the goodwill and its substitution by the goodwill’s review for impairment does not affect the tax deduction of the goodwill amortisation that should be made solely for tax purposes.
• Negative components booked in the income statement as expenses for personnel settled with equity instrument under IFRS 2 are, in principle, deductible for IRES purposes (stock options).
• In order to identify financial instruments with hedging purposes, IFRS adopters are allowed to give relevance to the classification made in the financial statement. In particular, financial instruments designated in the financial statement as hedging instruments in compliance with IFRS principles are considered also as hedging instruments for fiscal purposes (hedging accounting approach including the fair value option [FVO]).
• Given the possibility, under the IAS 39 accounting principle, to reclassify financial securities in a different portfolio from that of the initial booking, the value at which the security is booked in the new portfolio is tax relevant.

Significant developments
In 2012, a new Investment Code was adopted, which includes a new set of tax incentives and the redesigned Centre for the Promotion of Investments (named CEPICI).

The CEPICI is still in charge of dealing with the applications for the tax incentive programs, but is also a specialised desk for use by all investors to help them accomplish the formalities pertaining to setting up business companies in a very limited amount of time. The company setup time, starting from the receipt of the file by the CEPICI, is now two days.

Taxes on corporate income
Tax on industrial and commercial profits in Côte d’Ivoire is levied at 25%, subject to a minimum tax.

Taxable corporate income in Côte d’Ivoire is based on worldwide income for resident companies (for exceptions, see Foreign income in the Income determination section). Non-resident entities are subject to withholding tax (WHT) at 20%, subject to existing double taxation agreements (DTAs), on their Côte d’Ivoire source income when they do not have a permanent establishment (PE). Non-residents with a PE are taxed in the same way as a resident.

Minimum tax
The minimum tax is based on total turnover and is calculated at the rate of 0.5% (0.15% for banking activities, 0.1% for oil companies), with a minimum tax of 3 million Communauté financière d’Afrique (Financial Community of Africa or CFA) francs (XOF) and a maximum tax of XOF 35 million.

Local income taxes
The income tax is levied at the national level. There is no local income tax.

Corporate residence
In Côte d’Ivoire, companies are considered resident in tax jurisdictions where they have a registered fixed establishment (e.g. subsidiaries, branches, representative offices).
**Permanent establishment (PE)**

A non-resident is considered as having a PE in Côte d’Ivoire when its activities involve a complete commercial cycle in Côte d’Ivoire or when it operates though a dependent agent in Côte d’Ivoire.

According to DTAs, a non-resident is considered as having a PE in Côte d’Ivoire when it has a registered establishment, including a subsidiary, a branch, a representative office, a mine or an oil well, a building site, a manufacture plant, or a trading establishment. Sometimes, a time threshold of six months is considered.

**Other taxes**

**Value-added tax (VAT)**

VAT is a non-cumulative tax levied on the sale of goods and services at the rate of 18%. Subject to certain restrictions, VAT is recoverable.

The rate is reduced to 9% for milk, pasta products that contain 100% durum wheat semolina, and equipment designed for the production of solar energy.

**Customs duties**

Customs duties rates range from 0% to 20%, depending on the classification of the imported goods according to the customs tariff.

Upon import, goods are also subject to the statistical duty (1%), to community levy (1%), and to VAT (18%).

Special taxes, depending on the nature of the imported goods, may apply, such as excise duties.

**Statistical duty**

The statistical duty is levied together with the customs duties during the customs clearance procedures of imported goods.

The rate of the statistical duty is 1% on the cost, insurance, and freight (CIF) value of the imported goods.

**Community levy**

The community levy is due together with the customs duties during the customs clearance procedures of imported goods.

The rate of the community levy is 1% on the CIF value of the imported goods.

The community levy does not apply to goods imported from member countries of the West African Economic and Monetary Union (UEMOA), which includes Côte d’Ivoire, Senegal, Burkina Faso, Mali, Benin, Togo, Niger, and Bissau Guinea.

**Excise duties**

Excise duties apply on cigarette imports, alcoholic or non-alcoholic beverages, and oil products.

**Real estate tax**

A real estate tax is imposed at the following rates:
Ivory Coast (Côte d’Ivoire)

- 1.5% for undeveloped lands.
- 4% on land revenue.
- 11% on developed land or 15% when the built property is used by the company itself. The rate is reduced to 4% for unoccupied buildings.

Property owners are required to withhold 15% of rentals, payable on the 15th day of each month to the tax authorities. This is an advance payment on the annual real estate tax by the owner of the estate property.

**Transfer taxes**

In the case of the transfer of property through a direct sale, taxes are assessed at the following rates:

- 10% for lease transfers.
- 7.5% or 10% for the sale of real estate. The 7.5% rate applies on estate properties used for business purpose. The 10% rate applies to the other transfers.
- 10% for the sale of businesses.

**Stamp duty**

A direct tax is paid for any document subject to a registration procedure, for an acknowledgment of a cash payment, and for bills of exchange.

**Special tax for equipment**

A special tax is paid by all taxpayers for the purpose of the equipment of the government. The tax is calculated on 0.1% of total turnover and is paid monthly.

**Business franchise tax**

The business franchise tax includes a turnover tax and a proportional tax. The turnover tax is calculated on turnover at the rate of 0.5%, with a minimum tax of XOF 300,000 and a maximum tax of XOF 3 million. The proportional tax rate is 18.5% and is based on the rental value of the professional office location (based on general office rents).

**Tax on banking operations**

A cumulative tax of 10% is levied on bank services rendered. Tax on banking operations charged by banks to companies is fully deductible from output VAT.

**Registration taxes**

Registration of capital contributions is taxed, whether the capital or increase in capital is made in cash or in kind. The rate is 0.3% for contributions up to XOF 5 billion and 0.1% for contributions over XOF 5 billion, with a minimum tax of XOF 18,000. Increases in capital by incorporation of reserves are taxed at 6%.

In the event of a capital increase through a merger, the increase in the share capital of the acquiring company is taxed at half the rates above.

**Tax on insurance premiums**

Insurance premiums are subject to tax as follows:

<table>
<thead>
<tr>
<th>Policy type</th>
<th>Tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Marine policies</td>
<td>7.0</td>
</tr>
<tr>
<td>Life policies</td>
<td>Exempted when contract’s duration is more than three years</td>
</tr>
<tr>
<td>Fire policies</td>
<td>25.0</td>
</tr>
</tbody>
</table>
Ivory Coast (Côte d’Ivoire)

<table>
<thead>
<tr>
<th>Policy type</th>
<th>Tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Health policies</td>
<td>8.0</td>
</tr>
<tr>
<td>Export credit insurance</td>
<td>0.1</td>
</tr>
<tr>
<td>Other (e.g. personal liability, transportation)</td>
<td>14.5</td>
</tr>
</tbody>
</table>

Premiums paid under commercial shipping insurance policies for maritime risks are exempt. The tax may be paid by the insurance company, its agent, or the subscriber, in cases where the subscriber had to pay the premium to a foreign insurance company.

**Tax on telecommunication services**
A specific tax of 3% is applicable on the turnover of mobile telecommunication companies.

**Payroll taxes**
Taxes are levied at the rates of 2.8% for local employees and 12% for expatriate employees on the total taxable remuneration, including salaries, benefits, and benefits in kind.

**Social security contributions**
Employers must contribute to the social security system (CNPS) at the following rates:

<table>
<thead>
<tr>
<th>Contribution</th>
<th>Contribution rate (%)</th>
<th>Monthly ceiling (XOF)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family allowance</td>
<td>5.75</td>
<td>70,000</td>
</tr>
<tr>
<td>Work injury</td>
<td>2.0 to 5.0</td>
<td>70,000</td>
</tr>
<tr>
<td>Retirement pension</td>
<td>7.7</td>
<td>1,647,315</td>
</tr>
</tbody>
</table>

**WHT on public contracts for services**
Any payment made by government bodies or public institutions to non-resident persons or companies for a contract for goods or services is subject to a 20% WHT, subject to DTAs (see Impôt sur les bénéfices non commerciaux in the Withholding taxes section).

Resident persons or companies are not subject to this WHT, except for individual service (or goods) providers registered under the standard tax regime for small companies (see below).

**WHT on small-size businesses**
A 7.5% WHT is applicable on the remunerations paid to individual service providers registered under the standard tax regime for small companies.

A 10% WHT is applicable on payments made by government bodies or public institutions for a contract for services (or goods).

**WHT on writers’ revenue**
A 7.5% WHT applies to occasional revenue paid to individuals or companies as royalties on books, scientific studies, and artistic productions.

**Branch income**
The tax rate for branch income is the same as that for corporate income. After-tax branch earnings are subject to a 12% tax (Impôt sur le revenu des valeurs mobilières)
Ivory Coast (Côte d’Ivoire)

or IRVM) calculated on 50% of the taxable profit. This is analogous to the WHT on dividends.

**Income determination**

**Inventory valuation**
Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) methods are permitted. Book and tax conformity is required.

**Capital gains**
Capital gains are normally taxed at full corporate rates. However, the tax on capital gains, exclusive of recaptured depreciation, can be deferred if the gain is reinvested within three years.

**Dividend income**
Dividends are brought into taxable income at 50% of the net amount earned by the company (after 12% WHT).

The exemption is increased to 95% for dividends received from a subsidiary if a parent company domiciled in Côte d’Ivoire owns 10% of the subsidiary.

**Stock dividends**
Stock dividends are unusual, but in the event they are declared, they are not taxable to the recipient.

**Interest income**
Interest from loans is brought into taxable income at 50% of the net amount earned by the company after 18% WHT.

**Foreign income**
Resident corporations are taxed on their worldwide income, except for profits derived from business conducted through a PE outside Côte d’Ivoire. Since income derived from business conducted outside Côte d’Ivoire is not taxable, no tax credit is allowed. Interest and dividends from foreign sources are entitled to certain deductions to alleviate instances of double taxation. Subject to provisions of tax treaties, no deductions or tax credits are allowed for revenue from royalties and services.

**Deductions**

**Depreciation and depletion**
Depreciation is generally computed on a straight-line basis over the useful life of the asset (e.g. 20 years for buildings, three years for automobiles). Accelerated depreciation is sometimes permitted for machinery. The following depreciation rates are generally accepted for tax purposes:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>5</td>
</tr>
<tr>
<td>Machinery, equipment (rate depending on equipment)</td>
<td>8/10/20</td>
</tr>
<tr>
<td>Office furniture</td>
<td>10</td>
</tr>
<tr>
<td>Office equipment</td>
<td>20</td>
</tr>
<tr>
<td>Vehicles</td>
<td>33.3</td>
</tr>
</tbody>
</table>
Ivory Coast (Côte d’Ivoire)

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computing equipment</td>
<td>20 to 50</td>
</tr>
</tbody>
</table>

A time coefficient is applied to the rate of depreciation to obtain the declining balance. Depreciation rates may be amended, but only after agreement with the tax authorities.

New plants and equipment may be depreciated at twice the normal rate in the first year of use, provided they are depreciated over at least six years. Under certain circumstances, buildings used for staff housing may be depreciated at 40% of cost in the first year. Annual depreciation must be booked to preserve tax deductibility. The whole or any part of the annual charge can then be deferred in annual accounts for fiscal years showing a tax loss. Recaptured depreciation is taxed at full rates. Tax and book conformity is obligatory.

Depletion allowances, as such, do not exist, but tax incentives are available for exploration to replace depleted natural reserves.

**Goodwill**

Goodwill (capital gain) deriving from the transfer of assets is included in taxable profit. The gain may be exempted from the income tax basis if the taxpayer commits to reinvest the purchase price of the transferred assets plus the goodwill in the three following years.

If the reinvestment is not completed in the three years, the gain will be subject to income taxation.

**Start-up expenses**

Start-up expenses (e.g. legal fees, registration duties on share capital subscription, the costs of any registration procedure, advertisement expenses) have to be amortised over a period from two to five years.

**Interest expenses**

Interest paid to shareholders may be deducted. The maximum interest rate allowed is related to the Banque Central des États de l’Afrique de l’Ouest (BCEAO) rate plus three points. The reimbursement of the loan must take place in the five years following the loan.

**Bad debt**

Provisions for bad debts are deductible, provided that a minimum set of collection procedures have been engaged.

Bad debts are deductible for income tax purposes unless the debt results from abnormal business decisions.

**Charitable contributions**

Charitable contributions to recognised sport and health associations are deductible.

Charitable contributions to individuals or non-recognised beneficiaries are not tax deductible.

**Fines and penalties**

Fines borne by corporations are not tax deductible.
Ivory Coast (Côte d’Ivoire)

**Taxes**
Regular taxes paid by corporations are deductible for income tax purposes.

Third party taxes (such as WHT on non-resident service providers) borne by corporations are not tax deductible.

**Other significant items**
In respect to legal reserves, 10% of net profit must be transferred to a reserve for legal fees until the reserve equals 5% of the paid-up share capital.

To be tax deductible, provisions must relate to existing liability or loss. General reserves are not deductible.

**Net operating losses**
Losses may be carried forward for five years.

Losses derived from depreciation can be carried forward indefinitely.

Losses cannot be carried back.

**Payments to foreign affiliates**
Reasonable royalties, interest, and management and service fees paid to foreign parent companies are tax deductible. However, the deductions should not exceed 5% of the turnover and 20% of the overhead. Otherwise, the portion exceeding the ceiling is not tax deductible. The onus is on the taxpayer to prove that expenses are justified and reflect real transactions.

**Group taxation**
Group taxation is not permitted in Côte d’Ivoire.

**Transfer pricing**
Profits directly or indirectly transferred to related non-resident companies are disallowed from the income tax basis.

The tax administration may inquire on transfer pricing when local subsidiaries having most of their transactions with non-resident group companies record losses.

Transfer price documentation is not generally requested.

**Thin capitalisation**
The deduction of the interest of loans granted on top of the share capital by related parties is subject to restrictions (see Interest expenses in the Deductions section).

When, because of losses, the equity of the company is less than 50% of the share capital, the company must be recapitalised in the two following years, unless the company is dissolved.
Tax credits and incentives

Foreign tax credit
Since income derived from business conducted outside Côte d’Ivoire is not taxable, no tax credit is allowed.

Investment zones
The investment zone regime was amended in 2012 by the new Investment Code, and new provisions have been enforced. The aim of the new Investment Code is to:

• help create companies in other regions than the economic capital city (Abidjan)
• help the employment of nationals
• help companies doing business in a sustainable manner
• develop the regions of the country, and
• favour the existence of local small and medium-sized enterprises (SME).

The new Investment Code regimes involve the creation of three zones (A, B, and C), depending on the location of the company:

• Zone A covers Abidjan District.
• Zone B covers any town in Côte d’Ivoire with more than 60,000 inhabitants.
• Zone C covers any town in Côte d’Ivoire with less than 60,000 inhabitants.

The duration for the granted tax benefit is:

• 5 years for Zone A.
• 8 years for Zone B.
• 15 years for Zone C.

The Investment Code includes two specific tax incentive regimes: the Investment Declaration Regime and the Investment Approval Regime. Both regimes apply to all economic activities, excluding finance and banking, non-industrial buildings builders, and commerce activities.

For the Investment Approval Regime, the minimum investment cost is XOF 200 million (VAT and working capital exclusive).

The benefit from the Investment Code is granted by the Centre for the Promotion of Investments (named CEPICI), after an application is filed by the requestor.

During the investment period, the beneficiary enjoys the following:

• Reduction of 50% of the customs duties on the equipments and materials included on the filed list together with the first spare parts, when the investment is less than XOF 1 billion.
• Reduction of 40% of the customs duties of the equipments and materials included on the filed list together with the first spare parts, when the investment is more than XOF 1 billion.
• Exemption from VAT on purchase of equipments, material, and first spare parts.

After the completion of the investment, the beneficiary enjoys the following exemptions during a period that depends on the Zone the company is located in:

• Exemption from corporate income tax (CIT).
Ivory Coast (Côte d’Ivoire)

- Exemption from business license tax.
- Exemption from estate property tax (only for Zone C in the Investment Declaration Regime).
- Exemption from registration duties on share increase (only for Zone C in the Investment Declaration Regime).
- Reduction of the payroll tax due on employee’s wages. The reduction is 80% for Zone B and 90% for Zone C in the Investment Declaration Regime and 50% for Zone A, 80% for Zone B, and 90% for Zone C in the Investment Approval Regime.

These incentives may not be combined with sector-specific investment programs, such as those for mining and hydrocarbons.

**Capital investment incentives**

With prior approval of the tax authorities and varying with geographical location, 35% to 40% of the total investment in fixed assets related to commercial, industrial, or agricultural activity may be deducted from taxable income. The deduction is limited to 50% of taxable profits. The balance of deduction of the first year may be carried forward over the three following years.

**Export incentives**

No VAT is levied on export sales.

Sales and provisions of services made to export companies, which process certain farm products (i.e. cocoa, coffee, banana, hevea, and palm tree oil) and realise at least 30% of their turnover from exports, are free from VAT. The exemption is granted for the purpose of avoiding new cases of VAT credits in this line of business.

The above measure has been extended to 31 December 2014.

It has also been extended to the following activities:

- The manufacturing and sale of natural and synthetic fibre bags.
- The sale of softwood lumber and timber products by enterprises benefiting from the export authorisation granted by the Department of Water and Forestry.

**Export incentives for the mining industry**

During the exploration phase, investments may be exempt from payroll tax; VAT on goods and services; additional tax (on the sale of goods) on imports and purchases; all import taxes and duties, including VAT on materials, machines, and equipment used in research activities; and half of the registration duties applicable to in-kind or cash share-capital contributions.

During the production phase, mining activities may have a five-year exemption from CIT and relief from all import duties, including VAT on recovered investments required for exploitation. In addition, they may be granted temporary admission of machines and equipment that facilitate research and exploitation. A tax on profit is levied as soon as investment funds are recovered. Mining enterprises may not combine these incentives with those of the Investment Code.

**Export incentives for petroleum service contractors**

A special and optional tax treatment applies to petroleum service contractors that meet established criteria. Corporate tax, distribution tax, payroll tax, income tax on salaries, and the tax on insurance premiums are calculated on the turnover of the contractor.

The total taxes represent 5.636% of turnover. Standard rates apply for business
franchise tax and social security contributions for local personnel. The exemption from customs duties and VAT for oil companies is extended to petroleum service contractors.

Withholding taxes

WHTs are levied as follows:

- **Impôt sur le revenu des valeurs mobilières (IRVM):** 12% or 18% on dividends and directors’ fees.
- **Impôt sur le revenu des créances (IRC):** 18% on interest payments, reduced to 13.5% (individuals) and 16.5% (businesses) on bank deposit interest. The revenue realised by individuals on Treasury Bonds is subject to 10% tax on terms of up to 12 months and to 5% tax when ranging from three years to five years. Foreign banks are subject to 18% tax on loan interest or 9% on equipment loans with minimum three-year terms.
- **Impôt sur les benefices non commerciaux (BNC):** 25% of 80% of revenues on royalties, licence fees, and management and service fees paid by Ivorian companies to foreign companies (effective rate: 20% of net amount paid). Treaties with Belgium, Canada, France, Germany, Italy, Norway, Switzerland, and the United Kingdom provide a maximum BNC rate of 10% on royalties and management fees. The tax treaty between the member states of the West African Economic and Monetary Union (UEMOA) provides a maximum BNC rate of 15% on royalties.
- Interest on certificates of deposit (**bons de caisse**): 25%.

Tax administration

**Taxable period**

Companies are required by law to have a 31 December fiscal year-end.

**Tax returns**

Financial statements are filed annually, according to local generally accepted accounting principles (GAAP). The deadline for the filing is 30 April for entities with more than XOF 1 billion turnover, 30 May for entities with less than XOF 1 billion turnover, and 30 June for entities under the standard tax regime for small companies.

**Payment of tax**

Payment of CIT is due on 20 April (1/3 of the due amount), 20 June (1/3 of the due amount), and 20 September (the last 1/3 of the due amount) following the end of the fiscal year.

Monthly tax returns, including the taxes withheld (on residents or non-residents), must be rendered to the tax authorities by the tenth, 15th, or the 20th day of the following month.

The tenth day of the following month is the due date for industrial companies, oil and mining companies registered with the Department of Large Taxpayers (DGE), and companies under a Real Tax Regime.

The Real Tax Regime applies to taxpayers whose annual turnover exceeds XOF 150 million for sellers or XOF 75 million for service providers. When the taxpayer’s annual turnover does not reach these limits, then it falls under the Real Simplified Tax Regime.
Ivory Coast (Côte d’Ivoire)

Under the Real Simplified Tax Regime, tax returns are filed on a quarterly basis.

The 20th day of the following month is the due date for service providers registered with the DGE.

The 15th day of the following month is the due date for all other taxpayers, mostly for taxpayers under the standard tax regime for small companies.

**Tax audit process**
Many types of tax audits are available to the tax administration, which may request any accounting-related document for the purpose of tax audit.

The most common is the general tax audit of the taxpayer’s situation, which covers the statute of limitation period. It is carried out with a notice at least five days before the beginning of the audit. The audit is carried out on the premises of the taxpayer for a maximum of 12 months, and a primary tax assessment is issued.

The taxpayer then has 30 days to agree or challenge the assessment, and the definitive assessment is issued within a maximum of three months following the primary tax assessment.

Further challenge of the definitive assessment is possible before the head of the tax administration and the court.

**Statute of limitations**
The statute of limitations covers the current year and the three prior years.

**Topics of focus for tax authorities**
The tax administration generally focuses on compliance with the CIT filing deadline and on the payment of the instalments.

For consistency of the tax return, the tax administration focuses on the filing of the additional records (Annual Financial Statements, Etat 301: Annual Salary Statement, Etat 302: Annual Fees Statement), records of the provisions, tax losses, and amortisations carried forward.

During tax audits, the focus is on transactions with non-resident related parties.

Significant developments

Tax Reform
In a White Paper tabled in Parliament on 15 November 2012, the government of Jamaica outlined the tax policy direction it intends to take to implement a comprehensive reform of the tax system. This tax reform programme is to be implemented over a four-year period.

In the context of the foregoing, a number of tax measures have been announced by the Minister of Finance and Planning over the last 12 months and include the following (which have been implemented):

General consumption tax (GCT)
The following amendments to the GCT regime became effective on 1 June 2012:

• The standard rate of GCT was reduced from 17.5% to 16.5%.
• The exemption from GCT was removed from a number of goods, including certain basic food items, agricultural inputs, and printed material.
• The GCT regime on electricity was amended to exempt all supplies of electricity to residential customers and to increase the rate of GCT from 10% to 16.5% on the supply of electricity to industrial and commercial customers. Previously, supplies of electricity to residential customers up to 200KwH per month were zero-rated for GCT purposes, while supplies of electricity to residential customers (in excess of 200KwH per month) and to commercial or industrial consumers were subject to GCT at the rate of 10%.

The Minister of Finance and Planning subsequently announced in his 2013/14 Budget Presentation in April 2013 that it was the government's intention to zero-rate supplies of electricity to residential customers with effect from 1 July 2013.

Corporate income tax (CIT)
The CIT rate was reduced from 33½% to 25% with effect from 1 January 2013 and is applicable to all companies other than regulated companies, building societies, and life assurance companies. Regulated companies include companies that are regulated by the Bank of Jamaica, Financial Services Commission, Office of Utilities Regulation, or the Ministry of Finance and Planning. The rates of CIT for building societies and life assurance companies remain unchanged (see the Taxes on corporate income section).

The income tax regime was subsequently amended to impose a new CIT of 30% on large unregulated companies with gross annual income of not less than 500 million Jamaican dollars (JMD), effective 1 April 2013.
Jamaica

Imposition of dividend withholding tax (WHT)
With effect from 1 June 2012, WHT at the rate of 5% was imposed on dividends received by Jamaican tax resident shareholders from Jamaican tax resident companies and represents the final tax on these dividends. Effective 1 April 2013, the rate of tax on such dividends was further increased to 15%. Provisions were also introduced to relieve from taxation dividends received by corporate shareholders from resident companies in which they own at least 25% of the voting rights. Furthermore, expenses incurred in earning dividend income are no longer deductible.

Prior to the above amendments, dividends paid to Jamaican residents (including companies) were liable to tax at the rate of 0%. Dividends paid to non-resident shareholders continue to be liable to WHT at rates of up to 33\(\frac{1}{3}\)%, subject to any tax treaty protection that may be available. Special rules continue to apply to the taxation of preference dividends.

Guest accommodation room tax (GART)
The 10% rate of GCT that applies to hotels and other tourism-related activities will remain unchanged; however, effective 1 September 2012, in addition to GCT, GART is levied at a specific rate on hotels and other tourist accommodation facilities based on room occupancy. GART is tiered depending on the number of rooms at the hotel or other tourism accommodation facility.

Telephone call tax
With effect from 1 June 2012, a new tax is imposed on telephone calls, including inbound calls terminating on fixed or mobile networks. The following rates of tax are imposed:

- JMD 0.05 per minute on calls originating and terminating on the local fixed network.
- JMD 0.40 per minute on all other calls (whether domestic or international) originating in Jamaica.
- 0.075 United States dollars (USD) per minute on international calls that terminate in Jamaica on a mobile network.

Asset tax
As of 1 December 2012, the asset tax regime was modified for deposit-taking institutions regulated by the Bank of Jamaica as well as securities dealers and insurance companies regulated by the Financial Services Commission. An ad valorem asset tax at the rate of 0.14% was imposed on the ‘taxable value’ of their assets as determined by the Asset Tax (Specified Bodies) Act. The taxable value of assets is broadly determined as the value of assets on the balance sheet with adjustments for certain items as defined, specific to each type of institution.

In addition, the regime was amended for other entities falling within the scope of the Act to impose a fee ranging from JMD 5,000 to JMD 100,000, payable on or before 15 March annually, depending on the aggregate value of assets. The minimum fee is payable where the aggregate value of the assets is less than JMD 50,000, and the maximum fee is payable where the aggregate value of the assets is greater than JMD 50 million.

Prior to 2012, the fees ranged from JMD 1,000 to JMD 35,000 annually, where the minimum fee was payable on the aggregate value of assets less than JMD 50,000, and the maximum fee was payable on the aggregate value of assets greater than JMD 100 million.
Transfer tax
The rate of tax payable on the transfer of any chargeable property was increased by 1% to 5% of the gross consideration payable. This was implemented on 1 April 2013 and is also applicable to any capital distributions made by any locally incorporated company.

Stamp duty
The tiered rates for stamp duty payable on conveyances (accumulating to a rate of 3%) have been removed and replaced with a flat rate of 4%, effective 1 April 2013.

Real estate tax
A new rate structure for property tax was introduced on 1 April 2013 and imposes a flat rate of JMD 1,000 on unimproved property values up to JMD 100,000, annually. Rates of 1.5% to 2% are applicable to property values exceeding this amount, in addition to the flat rate. Previously, a flat rate of JMD 600 was applicable to unimproved values of JMD 300,000 or less, and where property values exceeded this minimum, tax was payable at a rate of 0.75%, in addition to the flat rate.

Payroll taxes
With effect from 7 January 2013, employers’ annual contribution to the state-administered social security insurance scheme, National Insurance Scheme (NIS), in respect of employees' emoluments was increased from a maximum of JMD 25,000 (2.5% on maximum annual emoluments of JMD 1 million) to a maximum of JMD 37,500 (2.5% on maximum annual emoluments of JMD 1.5 million). Employees contribute equally to the scheme. Additionally, the rate of Education Tax payable in total by both employers and employees was increased from 5% to 5.75% of taxable emoluments. The increase was implemented on 1 April 2013. Employers are now liable for the tax at a rate of 3.5% of taxable emoluments while employees contribute at a rate of 2.25% of said emoluments. Previously, employers and employees contributed at rates of 3% and 2%, respectively.

Customs duties and levies
A number of amendments to the customs and excise regime have also been implemented with effect from 1 June 2012, including adjustments to special consumption tax (SCT) rates imposed on alcoholic beverages, tobacco products, and denatured ethanol, as well as an increase in customs duties on a range of consumer items. Additionally, a customs administration fee (CAF) was implemented on 1 April 2013, which replaced the user fees (CUF) and other processing fees payable at the ports.

Taxes on corporate income
A resident corporation is taxable on its worldwide income. Non-resident companies are subject to tax on Jamaican-sourced income. Tax is imposed on certain sources of income, such as interest, dividends, royalties, and fees by way of withholding at a rate of 33⅓% for corporations. Lower rates of withholding are possible, provided that the recipient is resident in a country that has concluded a double taxation treaty (DTT) with Jamaica.

Prior to 1 January 2013, CIT at a rate of 33⅓% was payable by most corporations, including Jamaican branches of foreign corporations. The regime has been subsequently modified as follows:
Jamaica

<table>
<thead>
<tr>
<th>Classification</th>
<th>Definition</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Regulated company</td>
<td>A company that is regulated by the Bank of Jamaica, Financial Services Commission, Office of Utilities Regulation, or the Ministry of Finance and Planning.</td>
<td>33⅓</td>
</tr>
<tr>
<td>Unregulated company</td>
<td>A company that is not a regulated company.</td>
<td>25</td>
</tr>
<tr>
<td>Large unregulated company</td>
<td>A company that is not a regulated company and has gross annual income of not less than JMD 500 million.</td>
<td>30</td>
</tr>
</tbody>
</table>

With effect from 1 January 2013:

It is our understanding that the 30% rate applicable to large unregulated companies will be imposed on their chargeable income. At the time of writing, however, the implementing legislation imposes the 30% rate on their income in excess of JMD 500 million. We anticipate that this matter will be addressed in due course.

Building societies (similar to Savings and Loans Associations) are taxed at the rate of 30% on their profits.

Life insurance companies are taxed at 15% on their ‘investment income’, net of ‘management expenses’, both terms of which are defined by the Income Tax Act. Additionally, ‘regionalised’ life insurance companies pay income tax on gross premiums (derived from life assurance, pensions, and annuity business) at the rate of 3% while others pay at the rate of 4%.

The income of certain organisations is specifically exempt from income tax. These include pension and superannuation funds and charitable organisations approved by the Commissioner General of Tax Administration Jamaica.

**Local income taxes**

Income tax is imposed at the national level. Income tax is not separately imposed at the local level.

**Corporate residence**

A corporation, wherever incorporated, is resident in Jamaica if the central management and control of its business is exercised in Jamaica. Normally, this is the case if meetings of directors and shareholders are held in Jamaica and major policy decisions of the corporation are made in Jamaica.

**Permanent establishment (PE)**

The term PE is not defined by local law. In the case of a treaty jurisdiction, the relevant treaty will prescribe the meaning of the term. Where a company’s activities create a PE, then it must be registered for tax purposes.

**Other taxes**

**General consumption tax (GCT)**

The GCT is a value-added tax (VAT), and the standard rate is currently 16.5% (prior to 1 June 2012, it was 17.5%). Higher or lower rates of GCT, however, are applicable to
certain goods and services. GCT at the rate of 25% applies to the provision of telephone services (including phone cards) and handsets, while the tax is imposed on hotels and other businesses in the tourism sector at an effective rate of approximately 10%. As of 1 June 2012, a rate of 16.5% applies to the supply of electricity to commercial or industrial customers, while supplies to residential customers are exempt from GCT. Previously, the supply of electricity to residential customers (in excess of 200 KwH per month) and to commercial or industrial consumers was subject to GCT at the rate of 10%.

GCT is also charged on imported services. Where services are imported from a supplier who is not resident in Jamaica, the recipient of those services is deemed to be the registered taxpayer and is liable to account for GCT on the service. This may be available as a credit in some cases against the tax payable by the recipient of the service.

The list of items and services exempt from GCT includes a range of basic food items, prescription drugs, medical supplies, and other items.

**Customs duties**

Customs duty is levied on the customs value of goods imported, which is determined in accordance with the World Trade Organization (WTO) rules on customs valuation. The rates are specified by a prescribed Customs Tariff, having regard (where appropriate) to the Common External Tariff agreed between Caribbean Community (CARICOM) member states.

In addition to normal customs duties, a customs administration fee (CAF) and an environmental levy of 0.5% are imposed on the value of imports. The CAF replaced the customs user fee (CUF) on 1 April 2013 and imposes a range of fees based on the nature of the service provided.

An additional 5% GCT is levied on the commercial importation of goods subject to GCT. However, certain categories of imports are excluded from this advance GCT charge. Other import levies apply in certain instances, including additional stamp duty (ASD) and a standard compliance fee.

**Special consumption tax (SCT)**

SCT, at various rates, is applicable to some goods, such as tobacco products, liquor, motor vehicles, and petroleum products.

**Property tax**

All land in Jamaica is valued for property tax purposes on the ‘site value’ or ‘unimproved value’. As of 1 April 2013, the property tax structure was modified and is applicable as follows:

<table>
<thead>
<tr>
<th>Unimproved property values (JMD)</th>
<th>Rate of tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not exceeding 100,000</td>
<td>JMD 1,000</td>
</tr>
<tr>
<td>100,000 to 1 million:</td>
<td></td>
</tr>
<tr>
<td>For the first 100,000</td>
<td>JMD 1,000</td>
</tr>
<tr>
<td>For every dollar thereafter</td>
<td>1.5%</td>
</tr>
<tr>
<td>Exceeding 1 million:</td>
<td></td>
</tr>
<tr>
<td>For the first 100,000</td>
<td>JMD 1,000</td>
</tr>
<tr>
<td>For the next 900,000</td>
<td>1.5%</td>
</tr>
<tr>
<td>For every dollar thereafter</td>
<td>2.0%</td>
</tr>
</tbody>
</table>
Previously, owners with properties valued at JMD 300,000 or less paid a flat rate of JMD 600 annually, and where the property exceeded this value, tax was payable at a rate of 0.75% in addition to the flat rate.

**Transfer tax**
There is a transfer tax of 5% on the market value of the asset transferred (limited to 37.5% of the capital gain derived, if any) on the transfer of land, buildings, securities, and shares. Effective 1 April 2013, the rate of tax was increased from 4%. Transactions on the Jamaica Stock Exchange (JSE) are exempt from transfer tax, as are the transfer of registered corporate bonds, whether or not the company is listed on the JSE.

**Stamp duty**
There is stamp duty of 1% payable on the transfer/disposal of shares and 3% for real property sold/transferred. Stamp duty applicable to the latter was increased by 1% with effect from 1 April 2013. Transfers of shares on the JSE are exempt from stamp duty, as are the transfer of registered corporate bonds, whether or not the company is listed on the JSE. Stamp duty is also imposed at a nominal rate of JMD 100 on instruments effecting a refinancing of an existing mortgage. Where, however, the mortgage is increased, the normal stamp duty rates shall apply to the amount by which the mortgage increased.

**Asset tax**
The asset tax regime was modified in December 2012 for deposit-taking institutions regulated by the Bank of Jamaica, as well as securities dealers and insurance companies regulated by the Financial Services Commission. An *ad valorem* asset tax at the rate of 0.14% was imposed on the ‘taxable value’ of their assets as determined by the Asset Tax (Specified Bodies) Act. The taxable value of assets is broadly determined as the value of assets on the balance sheet with adjustments for certain items specific to each type of institution.

In addition, the regime was amended for other entities falling within the scope of the Act to impose a fee ranging from JMD 5,000 to JMD 100,000, payable on or before 15 March annually, depending on the aggregate value of assets. The minimum fee is payable where the aggregate value of the assets is less than JMD 50,000, and the maximum fee is payable where the aggregate value of the assets is greater than JMD 50 million.

Previously, a fee ranging from JMD 1,000 to JMD 35,000 was payable on or before 1 September, depending on the aggregate value of the company’s assets. The minimum fee was payable where the aggregate value of the assets was less than JMD 50,000, and the maximum fee was payable where the aggregate value of the assets was greater than JMD 100 million.

**Contractors levy**
Payments to contractors (including sub-contractors) in respect of construction, haulage, and tillage operations are liable to a withholding of a contractors levy of 2% of the gross amount paid. This must be remitted to Tax Administration Jamaica (TAJ) within 14 days of the end of the month in which the payment is made. The levy paid is allowable as a credit against the income tax liability of the contractor in the year of assessment in which the levy is deducted.

**Guest accommodation room tax (GART)**
Effective 1 September 2012, in addition to GCT, GART is levied at a specific rate on hotels and other tourist accommodation facilities based on room occupancy. GART
is tiered depending on the number of rooms at the hotel or other tourism accommodation facility.

**Telephone call tax**

With effect from 1 June 2012, a new tax is imposed on telephone calls, including inbound calls terminating on fixed or mobile networks. The following rates of tax are imposed:

- JMD 0.05 per minute on calls originating and terminating on the local fixed network.
- JMD 0.40 per minute on all other calls (whether domestic or international) originating in Jamaica.
- USD 0.075 per minute on international calls that terminate in Jamaica on a mobile network.

On 1 March 2013, the telephone tax was included in the taxable base for the purpose of calculating GCT.

**Payroll taxes**

Payroll taxes are imposed at the national level on employees’ emoluments, including resident expatriates who undertake work for Jamaica. The taxes comprise Pay-As-You-Earn (PAYE) Income Tax for employees only, National Housing Trust (NHT), National Insurance Scheme (NIS) contributions, Education Tax, and Human Employment and Resource Training (HEART) contributions.

Employers are obligated to deduct and remit payroll taxes by the 14th day of the month following the month of deduction. Employers and employees contribute at the following rates:

<table>
<thead>
<tr>
<th>Payroll Tax</th>
<th>Basis</th>
<th>Employee rate (%)</th>
<th>Employer rate (%)</th>
</tr>
</thead>

<td>2.00</td>
<td>3.00</td>
</tr>
<tr>
<td>HEART contributions</td>
<td>Gross emoluments</td>
<td>0.00</td>
<td>3.00</td>
</tr>
</tbody>
</table>

**Branch income**

Branch income is taxed at the same rate as that of local corporations and on a similar basis. The transfer of profits to the head office is subject to a WHT of 33 1/3% or at a lower treaty rate, where applicable.

A branch operation, irrespective of the nature of its business activities, is subject to Jamaican tax on income derived from the island and elsewhere. In computing the income for tax purposes, expenses incurred, wholly and exclusively for the purpose of the branch’s trade, are deductible, including a reasonable proportion of head office expenses.

Transactions between the branch, its head office, and affiliates should be at arm’s-length values.
Jamaica

**Income determination**

**Inventory valuation**
Inventories are valued at the lower of cost or market value. The Commissioner General has made no pronouncement, but last in first out (LIFO) is not generally permitted.

Any method of valuation that accords with standard accounting practice is acceptable for tax purposes, provided it is consistently applied at the beginning and end of the accounting period and it is not in contravention of the Income Tax Act.

**Capital gains**
There is no tax on capital gains. There is, however, a transfer tax on the market value of certain assets transferred and stamp duty payable on the transfer/disposal of shares or real property. See the Other taxes section for more information.

**Dividend income**
As of 1 April 2013, ordinary dividends paid by Jamaican tax resident companies to Jamaican tax resident shareholders are liable to tax at the rate of 15%. The tax is to be deducted on payment by the distributing company and represents the final tax on such dividends. Provisions were also introduced to relieve from taxation dividends received by Jamaican tax resident corporate shareholders where they hold at least 25% of the voting rights of the distributing company. Additionally, the dividend income on which tax is payable may not be offset by tax losses, and expenses incurred to earn the dividend are no longer deductible in arriving at chargeable income. Previously, ordinary dividends and non-deductible preference dividends paid to Jamaican tax residents by resident companies (whether or not they are listed on the JSE) were taxed at a zero rate. A rate of 5% was applicable between 1 June 2012 and 31 March 2013.

Preference dividends that qualify as tax deductible expenses of the paying company (see below) continue to be liable to tax at a rate of 25% where the recipient is an individual and at the applicable CIT rate where paid to a company. Dividends paid to non-resident shareholders are subject to income tax thereon at the default rate of 33 1/3% in the case of a company and 25% in the case of an individual (subject to any treaty protection or incentive relief available).

Subject to certain conditions being met, a company may claim an income tax deduction in respect of preference dividends paid during the year of assessment. However, to the extent that these preference dividends do not qualify for this income tax deduction, they will be treated in the manner indicated above.

**Stock dividends**
Stocks issued by way of the capitalisation of retained earnings (referred to as ‘bonus issues’) do not create a taxable distribution in the hands of the shareholders.

**Interest income**
Interest income is included in chargeable income and is subject to tax when received. Where interest is paid by a prescribed person, tax is deducted at source at the rate of 25% (see the Withholding taxes section for more information). The interest payable on certain securities issued by the government of Jamaica has been designated as being exempt from tax.
**Foreign income**
Resident corporations are taxable in Jamaica on their worldwide gains or profits. This includes the income of a foreign branch of a Jamaican company, as well as dividends arising abroad.

Tax deferral is not permitted in Jamaica.

**Deductions**
Expenses are deductible to the extent that they were incurred wholly and exclusively to earn the income and are claimed in the year in which they were incurred.

**Depreciation**
Tax depreciation is generally computed on the reducing-balance basis over the anticipated normal working life of the asset at specified rates. An election may be made for machinery and equipment to be depreciated at higher rates on the straight-line basis.

In the year of expenditure, initial allowances are available at the rate of 20% on industrial buildings and structures and machinery and plant. Annual allowances available include the following:

<table>
<thead>
<tr>
<th>Asset type</th>
<th>Basis</th>
<th>Rate of allowance (%)</th>
</tr>
</thead>
<tbody>
<tr>

Generally, capital gains on depreciable property are not taxed. However, a recharge limited to the extent of the capital allowances (tax depreciation) allowed (balancing charge) is taxable. Tax depreciation may not conform to book depreciation.

**Investment allowance**
Investment allowances (ranging from 20% to 40%, depending on the type of industry) are available on certain plant, machinery, and buildings used in basic and qualifying industries. As investment allowances are not taken into account in calculating the tax written down value of the assets, the company effectively receives 120% or 140% of the asset’s cost as tax depreciation.

Qualifying industries include certain manufacturing activities, construction, electricity undertakings, warehousing/cold storage, dock operations, and agriculture.

**Accelerated depreciation**
New machinery and plant acquired by a ‘qualifying business’ may be fully depreciated in the year of purchase instead of over the anticipated normal working life of the asset. This allowance is given in lieu of all other capital allowances and is not available for certain business activities. A qualifying business is one so designated by the Minister of Industry, Investment, and Commerce (MIIC).
Provision also exists for increased depreciation on machinery and equipment used for more than one shift in certain qualifying industries.

**Goodwill**
The amortisation or write-off of goodwill is not an allowable deduction.

**Start-up expenses**
The costs of incorporation and other expenses incurred in connection with establishing a business are not deductible against income.

**Interest expenses**
A deduction is available for interest that is paid on capital employed in acquiring income. Additionally, where interest is paid to a non-resident, tax must be withheld and remitted to the tax authorities in order to secure a deduction.

**Bad debts**
A deduction is available in respect of specific debts that become bad during the year of assessment.

**Charitable contributions**
Approved donations (not exceeding 5% of taxable income) to certain qualified charities and educational institutions are deductible.

**Foreign exchange gains/losses**
Foreign exchange gains and losses arising from trading are included in or deducted from chargeable income when realised, regardless of whether they are converted to Jamaican dollars. Foreign exchange gains and losses arising on capital assets are not taxable or allowable for tax purposes; however, where they pertain to fixed assets, on realisation, they may become part of the underlying acquisition cost and tax depreciation computed thereon.

**Fines and penalties**
Fines, penalties, and interest arising from tax arrears are not deductible.

**Taxes**
Taxes on income are not deductible. Additionally, GCT, contractors’ levy, transfer tax and stamp duty incurred on capital assets, input tax credits for GCT purposes, as well as the asset tax (since 2012), are generally disregarded for income tax purposes. Other taxes, such as property tax, payroll taxes, and other business taxes, are deductible, to the extent that they were incurred to earn the income.

**Net operating losses**
Losses incurred may be carried forward indefinitely until fully utilised. There are provisions designed to disallow the deduction of such losses where the company that has accumulated them is sold under certain circumstances.

Tax losses are not available for carryback.

**Payments to foreign affiliates**
Royalties, management fees, and interest charges paid to foreign affiliates are deductible to the extent that these payments are made at arm’s-length rates. WHT should be paid in respect of such services, normally at 33½% where payment is to a company and 25% in the case of individuals, unless a lower rate is provided for under
Jamaica

a DTT. Furthermore, interest paid to non-residents is not deductible until the WHT is remitted.

**Group taxation**

Group taxation is not permitted in Jamaica.

**Transfer pricing**

There are no specific transfer pricing rules in Jamaica. Transactions between connected parties are accepted if they are conducted on an arm’s-length basis. The Commissioner General, however, has the power to restate the value of such transactions if a view is formed that they are conducted at artificially high/low consideration for the purpose of avoiding tax.

**Thin capitalisation**

There are no provisions for thin capitalisation in the tax laws of Jamaica.

**Controlled foreign companies (CFCs)**

There is no CFC regime in Jamaica.

**Tax credits and incentives**

A number of incentive laws grant approved persons relief from taxation for a specified number of years.

Specific incentives are set out under the following acts:

- The Export Industry (Encouragement) Act.
- The Industrial Incentives Act.
- The Industrial Incentives (Factory Construction) Act.
- The Jamaica Export Free Zones Act.
- The Hotels (Incentives) Act.
- The Resort Cottages Incentives Act.
- The International Finance Companies (Income Tax Relief) Act.
- The Income Tax Act (Agricultural & Venture Capital Incentives).
- The Urban Renewal (Tax Relief) Act.
- The Motion Picture Encouragement Act.
- The Shipping Act.

The incentives offered under the Industrial Incentives Act, the Export Industry (Encouragement) Act, and those available for the production of goods under the Jamaica Export Free Zones Act are to be phased out, given Jamaica’s commitments under the WTO agreement. This was expected to have been phased out by 1 January 2003. An extension of time has been granted for implementation until the end of 2013, with a two year phase-out period.

**The Export Industry (Encouragement) Act (EIEA)**

The incentives provided under The Export Industry (Encouragement) Act are available to companies incorporated in Jamaica whose products are exclusively for sale outside of Jamaica and CARICOM. The company must be declared an ‘approved export
manufacturer’ in relation to an ‘approved export product’ by the MIIC. The incentive is also available to companies that are designated as ‘partial exporters’.

Benefits available under the EIEA include relief from income tax on export profits and duty exemption on machinery and equipment, consumer goods, raw material, packaging material, and imports for the repair and maintenance of the factory. Although the benefits provided under the EIEA are initially allowed for a specified period, the MIIC has the authority to extend the incentive period by order.

**The Jamaica Export Free Zones Act**
The Jamaica Export Free Zones Act offers concessions to manufacturers who can operate within a designated free zone area as well as in stand-alone free zones approved by the MIIC. Exporters benefiting from this scheme obtain 100% relief from income tax and duty exemption on capital goods, consumer goods, raw material, or imports for the construction, extension, and repair of free-zone premises.

Companies approved to operate in one of Jamaica’s free zones must be registered or incorporated in Jamaica under the Companies Act. They must also obtain approval from the Jamaica Free Zone Council to undertake an approved activity.

**The Hotels (Incentives) Act**
The Hotels (Incentives) Act provides that an approved hotel enterprise or approved extension is entitled to relief in respect of profits or gains arising from an approved hotel enterprise or extension during the concession period, which is usually ten years. Approved hotel enterprises or extensions also benefit from exemption from customs duty and GCT on building material imported for the construction or repair of the approved hotel enterprise or approved extension, as well as certain equipment and supplies imported to outfit the hotel. An approved hotel enterprise or approved extension is so designated by the Minister of Tourism.

The Act also provides exemption from income tax on dividends to Jamaican-resident shareholders received from an approved hotel enterprise/extension as well as to non-resident shareholders who are not liable to income tax on the dividends in their country of residence.

**The Urban Renewal (Tax Relief) Act**
The Urban Renewal (Tax Relief) Act provides tax incentives to persons approved under the Act in connection with undertaking programmes of development in areas designated as special development areas, with a view to improving or restoring them. The tax incentive provides certain tax benefits, including relief from income tax on rental income and interest earned by an investor in an Urban Renewal Bond. There is also exemption from stamp duty and transfer tax on the transfers of property.

A tax credit of 33 1/3% of expenditure on capital improvement works in a designated special development area (e.g. Downtown Kingston) is also available. In addition, lessees of the improved properties, who satisfy certain criteria, are able to claim a tax deduction of double the rental paid.

**Non-resident deposits**
Non-residents who place deposits with Jamaican banks can earn interest free of Jamaican tax in certain circumstances. The deposits may be designated in foreign currency or Jamaican dollars.
Employee Share Ownership Plan (ESOP)
Certain tax benefits accrue to employees and employers in respect of contributions to an approved ESOP as well as the allocation of shares from such plans.

Foreign tax credit
The avoidance of double taxation is achieved by means of foreign tax credits available under most tax treaties or by means of deduction in the case of the CARICOM treaty. Under the provisions of the Income Tax Act, a foreign tax credit is also available to companies in Jamaica that have paid or are liable to Commonwealth Income Tax. Where recourse cannot be had through either of these methods, by convention, partial relief by way of expense deduction is granted against income for the foreign tax.

Withholding taxes
The Jamaican Income Tax Act refers to deduction at source and not to withholding. The following references are to deduction at source. If it is proved that this exceeds the tax actually payable, refunds are made.

‘Prescribed persons’, primarily financial institutions, are required to withhold tax at source at a rate of 25% on interest income earned on investment instruments (subject to any lower rate as prescribed in a DTT). The Income Tax Act has been amended to provide a wider definition of the term ‘interest’. ‘Prescribed persons’, as defined, include the Accountant General; banks operating under the Banking Act or the Bank of Jamaica Act; institutions operating under the Financial Institutions Act; building societies; societies registered under the Industrial and Provident Societies Act, unless certain conditions are met; the Ministry of Finance & Planning; life insurance companies; companies registered under the Companies Act in which the government or an agency of the government holds more than 50% of the ordinary shares and which issues interest bearing securities; issuers of commercial paper; unit trust management companies; and any person who is connected with any of the persons mentioned above (with the exception of the Accountant General).

As is indicated in the Income determination section, the Income Tax Act provides that with effect from 1 April 2013, there is a requirement to deduct tax at the rate of 15% (5% between 1 June 2012 and 31 March 2013) where dividends are paid to Jamaican tax resident shareholders, excluding corporate shareholders who hold 25% or more of the voting rights of the paying company. The tax deducted at source represents the final tax in respect of the dividends.

Generally, all WHTs, including taxes withheld from dividend, interest, royalties, and fees must be remitted to the Inland Revenue Department within 14 days of the end of the month in which the payment is made in order to avoid the imposition of interest and penalties.

### Notes

1. Substantial holdings refer to resident companies that hold 25% or more of the voting rights of the paying company.
2. Tax is withheld at the rate of 15% as of 1 April 2013 where a dividend is paid by a company resident in Jamaica to a resident individual shareholder, regardless of shareholding.
3. Tax is deducted from interest paid to Jamaican residents if payment is made by a prescribed person.
4. Rates apply only to specified member states.
5. The lower treaty rates do not apply if the recipient has a permanent establishment (PE) in the other territory that is ‘effectively connected’ with the company paying the dividend.
6. A rate of 15% applies to an individual regardless of shareholding.
7. Reduced to 10% if received by a bank recognised as a banking institution under the laws of that state.
8. A rate of 22.5% applies to an individual regardless of the shareholding.
9. Nil in the absence of a PE.

A WHT rate of 25% is required to be applied in respect of interest paid or credited by prescribed persons. However, certain categories of interest income earned on long-term savings accounts (LSAs) were made exempt from tax, including:

- Interest paid or credited in respect of investments or deposits made by individuals with prescribed persons if:
  - the deposit remains a minimum of five years without any withdrawal from the principal sum invested
  - the deposit or investment (other than interest accrued or credited) does not exceed JMD 1 million in any year
  - the account is not transferable, except on the death or bankruptcy of the depositor or investor, and
  - not more than 75% of the interest accrued in any year is withdrawn during the year.
• Benefits derived from investments in certain life insurance policies may also be exempt from income tax if specified criteria are satisfied.

**Tax administration**

Jamaica has established the following departments to handle tax administration:

• Tax Administration Jamaica (TAJ) integrates the functions that were previously undertaken by a number of different departments. These functions include compliance and tax collection, administrative and legal support, audit and assessment of income tax, general consumption tax, stamp duty, and transfer tax. The Commissioner General has responsibility for the direction, supervision, and administration of TAJ and is supported in undertaking this role by several Deputy Commissioner Generals. The powers of TAJ were enhanced in March 2013 when it was transformed into a semi-autonomous revenue authority.

• The former Taxpayer Appeals Department (TAD), which recently became a Revenue Appeals Division of the Ministry of Finance, processes appeals to decisions made by TAJ.

• Jamaica Customs administers taxes at the port of entry and was recently transitioned into an executive agency.

There is also a Financial Investigations Division in the Ministry of Finance, which investigates customs breaches and fraudulent acts in respect of tax legislation.

**Taxable period**

A corporation is subject to tax on its income for a calendar year. However, where the Commissioner General of TAJ is satisfied that a corporation normally prepares financial statements to a date other than 31 December, the company may be permitted to use the profits of its own financial year rather than the calendar year as the basis of assessment. The basis period should not exceed 12 months; however, a company wishing to file its income tax return for a period exceeding this period must obtain the approval of TAJ.

**Tax returns**

Income tax returns are due for filing by 15 March in the year following the year of assessment and are based on a system of self-assessment of the tax payable.

**Payment of tax**

Tax is payable in quarterly instalments on the 15th day of March, June, September, and December of each tax year. Quarterly instalments are based on an estimate of the year’s liability or the actual tax payable for the previous year. The balance of income tax payable for a taxation year, after deduction of the instalments of estimated tax, is due on 15 March of the following year. Interest is charged on unpaid tax at a rate of 20% per annum while the amount remains unpaid. A penalty of up to 50% may also be imposed if TAJ issues an assessment.

TAJ has implemented an electronic tax system that taxpayers may use to file various tax returns and remit taxes.

**Tax assessments and audits**

The Commissioner General is empowered to conduct audits on selected tax returns or to assess a taxpayer for additional tax at any time prior to the expiration of the statute of limitation, which is six years, except in certain cases. Tax audits can be carried out whether or not notices of assessment have been issued. Tax assessments may be raised
Jamaica

where the Commissioner General is of the opinion that a taxpayer has been assessed for less tax than the taxpayer ought to have been charged, or where the taxpayer failed to file a tax return.

**Topics of focus for tax authorities**

In support of the ongoing policy and legislative reform of the tax regime, the revenue authorities have been focusing on enhancing voluntary compliance and modernising their operations so as to increase revenue collection and efficiency. Within the overall aim of broadening the tax base, in particular, TAJ has intensified its focus on certain segments of taxpayers, such as large taxpayers, high-wealth individuals, professional groups, unregistered entities, and stop-filers. Compliance mechanisms include improving the resources of the Large Taxpayer Office (LTO) and the introduction of mandatory filing for PAYE professional employees on a phased basis. Legislation has also been passed to introduce a debt write-off policy for tax arrears.

1. Interest paid/received is dealt with on the cash basis, hence the adjustments for the amount receivable/payable.
2. Reserve for specific bad debts is allowed.
3. Recapture of excess tax depreciation is allowed.
4. Tax depreciation is granted in lieu of book depreciation.
Significant developments

2013 Tax Reform
The 2013 Tax Reform Bill passed on 29 March 2013 and became effective from 1 April 2013. The 2013 Tax Reform includes a number of tax incentives in order to stimulate domestic investment and to increase employment by corporations.

In addition, under the 2013 Tax Reform, existing research and development (R&D) incentives and employment promotion incentives are enhanced by relaxing requirements and increasing the associated tax benefits.

As a result of recent amendments to the Organisation for Economic Co-operation and Development (OECD) Guidelines, the Berry Ratio has become a specifically allowed method for transfer pricing purposes under the 2013 Tax Reform, in addition to the three traditional transactional methods (comparable uncontrolled price method, resell minus method, cost plus method) as well as other methods (i.e. profit split method and transactional net margin method [TNMM]).

New Protocol to the United States (US)-Japan Tax Treaty
The Ministry of Finance of Japan announced that a protocol to the US-Japan Tax Treaty was signed on 24 January 2013 (US time).

The protocol amends the existing tax treaty, which was first signed on 6 November 2003 and has been effective from 2004. Key aspects of the protocol include:

- The elimination of withholding tax (WHT) on certain interest and dividends.
- The introduction of a mandatory binding arbitration provision.
- Provisions for mutual assistance in enforcing tax laws, including revised information exchange provisions and procedures.

The protocol shall be subject to ratification and enter into force on the date of the exchange of instruments of ratification.

Consumption tax
According to recent amendments to the Consumption Tax Law, the consumption tax rate will be increased to an 8% rate on an interim basis (as of 1 April 2014) and finally to a 10% rate (as of 1 October 2015).

Pending legislation
Please note this information is current as of 1 June 2013. Typically, pending legislation is announced in June or July. Please visit the Worldwide Tax Summaries website at
www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2013.

**Taxes on corporate income**

A domestic corporation in Japan is taxed on its worldwide income. A foreign corporation is taxed only on its Japan-source income.

**Corporation tax**

The corporation tax rates are provided in the table below. While they were reduced, based on the December 2011 Tax Reform, for fiscal years beginning 1 April 2012, a temporary surtax of 10% is being charged, by the enactment of the Special Restoration Tax Law, to the taxpayer of corporation tax for three years from the first tax year that begins during the period between 1 April 2012 and 31 March 2015.

<table>
<thead>
<tr>
<th>Company size and income</th>
<th>Corporation tax rate (%)</th>
<th>Corporation surtax (2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paid-in capital of over 100 million Japanese yen (JPY)</td>
<td>25.5</td>
<td>10% of the corporation tax before certain tax credit etc.</td>
</tr>
<tr>
<td>Paid-in capital of JPY 100 million or less, except for a company wholly owned by a company that has paid-in capital of JPY 500 million or more:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>First JPY 8 million per annum</td>
<td>15.0 (1)</td>
<td></td>
</tr>
<tr>
<td>Over JPY 8 million per annum</td>
<td>25.5</td>
<td></td>
</tr>
</tbody>
</table>

Notes

1. This is a temporary rate, which, if not extended by legislation, will revert to a 19% rate during fiscal years beginning on or after 1 April 2012 but prior to 1 April 2015.
2. The surtax applies to the three year period from the first tax year that begins during the period between 1 April 2012 and 31 March 2015.

**Standard enterprise tax (and Special Local Corporate Tax)**

Enterprise tax is imposed on a corporation’s income allocated to each prefecture. This allocation is generally made on the basis of the number of employees and number of offices in each location.

The standard rates of enterprise tax, including a Special Local Corporate Tax, are shown below.

<table>
<thead>
<tr>
<th>Taxable base</th>
<th>Enterprise tax (%)</th>
<th>Special Local Corporate Tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>First JPY 4 million per annum</td>
<td>2.7</td>
<td>81% of the current enterprise tax (see the immediate left column)</td>
</tr>
<tr>
<td>Next JPY 4 million per annum</td>
<td>4.0</td>
<td></td>
</tr>
<tr>
<td>Over JPY 8 million per annum</td>
<td>5.3</td>
<td></td>
</tr>
</tbody>
</table>

If the paid-in capital of a corporation is JPY 10 million or more and the corporation has places of business in more than two prefectures, the graduated rates above are not applicable.
Japan

For utilities and insurance companies, the standard tax rate is shown as follows:

<table>
<thead>
<tr>
<th>Taxable base</th>
<th>Enterprise tax (%)</th>
<th>Special Local Corporate Tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net revenue (net utility charges or net insurance premiums)</td>
<td>0.7 (81% of the current enterprise tax)</td>
<td>81% (see the immediate left column)</td>
</tr>
</tbody>
</table>

**Size-based enterprise tax (and Special Local Corporate Tax)**

Instead of the above general enterprise tax, a ‘size-based’ enterprise tax (*Gaikai Hyojun Kazei*) is applied to a company whose paid-in capital is more than JPY 100 million as of the year end.

Factors such as the size of a corporation’s personnel costs and its capital (the amount of paid-in capital) will determine the additional amount of tax payable. The existing profit-based enterprise tax will also continue to apply at the tax rates indicated below. Therefore, a loss company in Japan may be required to pay tax based on value-added activities and the corporation’s paid-in capital. The applicable standard rates are shown as follows:

<table>
<thead>
<tr>
<th>Taxable base</th>
<th>Tax rate (%)</th>
<th>Special Local Corporate Tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Profit-based tax:</td>
<td></td>
<td>148% (see the immediate left column)</td>

<td></td>
</tr>
<tr>
<td>Additional value-based tax</td>
<td>0.48</td>
<td>N/A</td>
</tr>
<tr>
<td>Capital-based tax</td>
<td>0.2</td>
<td>N/A</td>
</tr>
</tbody>
</table>

**Inhabitant’s tax**

Inhabitant’s tax is imposed on a corporation’s income allocated to each prefecture and city (municipal borough). The allocation is generally made on the basis of the number of employees, in the same way as enterprise tax.

The standard tax rate is 5% as prefectoral tax and 12.3% as municipal tax. However, the tax rate may be increased up to 6% for prefectoral tax and 14.7% for municipal tax, depending upon the determination of each local government.

In addition to the above, inhabitant’s tax is imposed on a per capita basis, in the range from JPY 70,000 (in the case that the amount of paid-in capital is JPY 10 million or less, and the number of employees in each prefecture and city is 50 or less) to JPY 3.8 million (in the case that the amount of paid-in capital is over JPY 5 billion and the number of employees in each prefecture and city is over 50). The inhabitant’s tax amount is determined by the local government by the factors of paid-in capital and the number of employees.

**Effective tax rate**

The total corporate income tax burden (i.e. effective tax rate) is in the range of 40.69% to 42.05% (in the case of a corporation located in the Tokyo Metropolitan Area), depending upon the size of a company’s paid-in capital. Since enterprise tax is deductible, the effective tax rate is less than the total of the statutory rates of corporation tax, inhabitant’s tax, and enterprise tax.
In consequence of the permanent reduction of corporation tax rate and the introduction of temporary surtax mentioned above, the effective tax rate will be altered hereafter. The following is the summary of the effective applicable tax rate in the case of a large corporation operating in Tokyo (taking no thought of an additional-value-based tax and capital-based tax out of the enterprise tax above):

<table>
<thead>
<tr>
<th>Tax year</th>
<th>Effective corporation tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beginning between 1 April 2012 and 31 March 2015</td>
<td>SMEs 39.43 Large corporations 38.01</td>
</tr>
<tr>
<td>Beginning on or after 1 April 2015</td>
<td>SMEs 37.12 Large corporations 35.64</td>
</tr>
</tbody>
</table>

**Corporate residence**

**Domestic and foreign corporation**
A company that has its head office in Japan is a domestic corporation. The nationality of its shareholders or place of central management is not relevant.

A corporation other than a domestic corporation is regarded as a foreign corporation.

**Permanent establishment (PE)**
Under domestic tax law, the scope of Japan-source income in respect of which a foreign corporation is taxable depends upon the type of taxable presence that it has in Japan. The types of taxable presence that a foreign corporation may have in Japan include the following:

- Branch, factory and other fixed places in which business is conducted in Japan, mine, quarry, building for rent, etc. but exclude a specified place used only for the business of purchasing assets and for keeping them (Direct PE).
- Construction, installation, assembly project, or supervisory services related thereto for a period of greater than one year.
- Certain agents (Agent PE), as follows:
  - A person in Japan who has an authority to conclude contracts for a foreign corporation (excluding contracts to purchase assets) and exercises such authority continuously (Contracting Agent).
  - A person in Japan who keeps for a foreign corporation a certain quantity of assets sufficient to meet ordinary demand from the foreign corporation’s customers and delivers the said assets to the customers according to their requirements (Fills Order Agent).
  - A person in Japan who, solely or principally for or on behalf one foreign corporation, habitually performs an important part of solicitation of orders, negotiations, or other acts leading up to the conclusion of contracts with respect to the business of the foreign person (Secure Order Agent).

As a matter of law, the articles of Japan’s tax treaties have precedence over domestic tax law. In general, there are no significant differences between the definitions of PE under domestic tax law and Japan’s tax treaties. However, once a PE has been established for a foreign corporation under domestic law, all Japan-source income is taxable to the PE (as opposed to just income ‘attributable to’ the PE, as is the case under most treaties).
Japan

Other taxes

Consumption tax
Consumption tax (value-added tax or VAT) is levied when a business enterprise transfers goods, provides services, or imports goods into Japan. The applicable rate is 5%. Exports and certain services to non-residents are taxed at a zero rate. Specified transactions, such as sales or lease of land, sales of securities, and provision of public services, are not subject to taxation.

Consumption tax paid by the business enterprise shall be refundable by filing the consumption tax return to the extent that such transaction is recorded in the accounting book and relevant invoices are kept.

Note that according to recent amendments to the Consumption Tax Law, the consumption tax rate will be increased to an 8% rate on an interim basis (as of 1 April 2014) and finally to a 10% rate (as of 1 October 2015).

Customs duty
A customs duty is levied on imported goods based on the custom tariff table.

Excise taxes
Excise taxes were abolished by introduction of consumption tax.

Fixed assets tax
The annual fixed assets tax is levied by the local tax authorities on real property and depreciable fixed assets used for business purposes. Real property is taxed at 1.7% (standard rate including city planning tax) of the value appraised by the local tax authorities. The depreciable fixed assets tax is assessed at 1.4% of cost after statutory depreciation.

Stamp duty
A stamp duty is levied on certain documents prepared in Japan. The tax amount is generally determined based on the amount stated in the document.

Registration and licence tax
Registration and licence tax is levied where certain property is registered, at a rate from 0.15% to 2% of the taxable basis or at a fixed amount. The taxable basis depends upon the property being registered (e.g. the amount of paid-in capital registered by a company or the value of real estate as assessed by local tax authorities).

Labour and Social Insurance
There are four types of insurance systems in Japan that enterprises employing workers that meet certain conditions must enrol in. Workers’ accident compensation insurance is borne entirely by the employer. Employment insurance, health insurance/nursing care insurance, and employees’ pension insurance is born by both the employer and employee. The rates are provided under the relevant laws and regulations.

Family corporation tax
If an individual shareholder together with their family members own, either directly or indirectly, more than 50% of the total issued shares or voting rights of a Japanese corporation, the corporation is treated as a family corporation (with the exception of corporations with paid-in capital of JPY 100 million or less) and is subject to the family corporation tax in addition to corporation tax.
A family corporation is liable for an additional tax at the rates shown below on its undistributed current earnings in excess of specified limits.

<table>

</tr>
<tr>
<td>Over JPY 100 million per annum</td>
<td>20</td>
</tr>
</tbody>
</table>

**Business premises tax**

Business premises tax is levied and designated by each city in Japan, such as Tokyo, Osaka, Nagoya, Fukuoka, and other cities with a population of more than 300,000. A company that uses business premises in excess of 1,000 square metres and/or has more than 100 employees in a designated city is responsible to pay this tax based on the usage of the business (JPY 600 per square metre) and gross payroll (0.25% of gross payroll).

**Branch income**

Branch profits are taxed in the same manner as corporate profits. However, the family corporation tax does not apply to a branch of a foreign corporation. In addition, no WHT is imposed on the repatriation of branch profits to the home office.

**Income determination**

The taxable income of a corporation is the aggregate income from all sources. There is no specific requirement to differentiate between the types of income. In principle, accounting for tax purposes follows generally accepted accounting principles in Japan, and income of a corporation is determined on an accrual basis.

**Inventory valuation**

Inventory cost should be determined by applying one of the following methods accepted for corporate tax purposes: actual individual cost, first in first out (FIFO), weighted average, moving average, most recent retail, selling price reduction, and lower of cost or market.

**Capital gains**

Capital gains and losses are classified as ordinary income and losses respectively.

Under certain circumstances (e.g. qualified reinvestment, exchange property), taxes generally levied on capital gains may be deferred (i.e. provided rollover relief) as long as certain requirements are met. A special relief is available in the case of expropriation of real property by either the national or local government.

The recognition of capital gains or losses from the transfer of certain assets between group companies are to be deferred until the asset is transferred to another group company or a non-group company.

**Dividend income**

Dividends received from a Japanese corporation are excluded from taxable income for corporate income tax purposes, provided that the recipient corporation owns 25% or more of the outstanding shares in the dividend-paying corporation for a continuous
Period of six months or more, ending on the date on which the dividend is declared. If a corporation owns less than 25% of the shares in the dividend-paying corporation, 50% of the dividends received from the dividend-paying corporation are excluded from taxable income.

Interest expense that is allocable as an investment cost of the shares that generate the dividend income effectively reduces the amount of dividend income. Note that this rule is not applicable to dividends between 100% group companies.

95% of dividends received by a company from a foreign company in which it has held at least 25% of the outstanding shares for a continuous period of six months or more, ending on the date on which the dividend is declared, can be excluded from the company's taxable income.

If the foreign company is resident in a country with which Japan has concluded a tax treaty for the avoidance of double taxation, and such treaty provides for the allowance of an indirect foreign tax credit for taxes paid by the foreign company on the profits out of which the dividend is paid where the company holds a certain percentage of the foreign company's outstanding shares (e.g. 10% based on the tax treaty between the United States and Japan), that percentage will apply for the purpose of determining the availability of the above exemption to the extent that it is lower than 25%.

The WHT for dividends is applicable at a rate of 7% (15% on and after 1 January 2014) or 20% depending on the type of stock from which the dividends were received, and a tax credit may also be available for such WHT. The WHT is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.

**Interest income**

Interest received is included in taxable income. The WHT for interest is applicable at a rate of 20% (15% national tax and 5% local tax) and a tax credit may be available for such WHT. As with dividend income, the WHT is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037. Note that under the 2013 Tax Reform, only national tax will be withheld at source for interest income received on or after 1 January 2016 by a corporate recipient.

**Foreign income**

A Japanese corporation is subject to Japanese corporate income taxes on its worldwide income. However, to avoid double taxation of foreign-source income, Japanese corporations are allowed to claim a tax credit against corporation and inhabitant's taxes for foreign income taxes paid directly. See Foreign tax credit in the Tax credits and incentives section for more information.

Undistributed profits of a foreign subsidiary (i.e. controlled foreign company [CFC]) located in a tax haven are included in the Japanese parent company's taxable income under certain conditions. See Anti-tax haven (CFC) rules in the Group taxation section for more information.
Deductions

Depreciation and amortisation
Depreciation is deductible in the calculation of taxable income for corporation tax purposes. Depreciable assets include tangible property (e.g. buildings, attachments to buildings, structures, machinery and equipment). Certain intangible assets are also eligible for amortisation (e.g. goodwill, patents and trademarks).

With regard to depreciation methods, a taxpayer may adopt one of the allowable methods for each of the types of depreciable property. Tangible property is generally depreciated using either the straight-line method or the declining-balance method. Intangible property is generally amortised under the straight-line method.

Useful lives for assets are set forth on the table in detail. For reference, the following is the brief table of useful lives for typical assets.

<table>
<thead>
<tr>
<th>Types of assets</th>

</tr>
<tr>
<td>Software</td>
<td>3 or 5 (depending on uses)</td>
</tr>
</tbody>
</table>

Start-up expenses
Start-up expenses, such as corporation organisation costs and opening costs (i.e. costs to begin business after the corporation is established), are treated as deferred assets and allowed to be amortised on a voluntary basis.

Interest expenses
Interest expenses on borrowing are deductible in the calculation of taxable income in principle. However, the interest payment to related parties in the corporate group may be disallowed to be deducted to some extent in certain cases. See ‘Thin capitalisation’ and ‘Interest expense deduction limitation’ in the Group taxation section.

Reserves
Reserves recorded in the books of accounts, except for reserves for doubtful receivables and return of goods not sold, are not deductible for corporate tax purposes.

Reserve for doubtful receivables
The deductibility of a reserve for doubtful receivables is limited by the following two components: (i) an estimate of irrecoverable amounts from a debtor and (ii) a calculation of the limit in the aggregate based on either the actual historical bad debt percentage or statutory percentage (reduced for large corporations), excluding the irrecoverable amount of receivable in (i) above.
Japan

Per the December 2011 Tax Reform, the reserve for doubtful receivables is abolished, except for SMEs, banks, insurance companies, and other similar financial corporations. The abolishment is phased in over four years, as follows:

<table>
<thead>
<tr>
<th>Applicable tax years</th>
<th>% of the deductible amount (100% = deductible amount before 2011 Tax Reform)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beginning between 1 April 2012 and 31 March 2013</td>
<td>75</td>
</tr>
<tr>
<td>Beginning between 1 April 2013 and 31 March 2014</td>
<td>50</td>
</tr>
<tr>
<td>Beginning between 1 April 2014 and 31 March 2015</td>
<td>25</td>
</tr>
<tr>
<td>Beginning on or after 1 April 2015</td>
<td>0</td>
</tr>
</tbody>
</table>

**Reserve for return of goods not sold**
A deductible reserve for return of goods not sold is available to corporations such as publishers, wholesalers of books, and others, provided that the corporation sells the merchandise under an unconditional repurchase agreement.

**Charitable contributions**
Except for certain designated donations, the tax deduction for charitable contributions is limited to certain amounts, as follows:

<table>
<thead>
<tr>
<th>Donation</th>
<th>Deduction limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>General donation</td>
<td>((0.25% of capital plus capital surplus) + (2.5% of income)) x 1/4</td>
</tr>
<tr>
<td>Donation made to designated public purpose companies</td>
<td>((0.375% of capital plus capital surplus) + (6.25% of income)) x 1/2</td>
</tr>
</tbody>
</table>

Donations subject to this limitation include economic benefits considered to be given as a subsidy. Donations to foreign affiliates are not fully deductible.

In the case that a donation occurs between group companies (as defined), there will be no tax implications for either the donor or donee (i.e. no deduction for the donor and no taxation for the donee).

**Directors’ remuneration**
The remuneration paid to directors is deductible only in the following three cases:

- Fixed monthly payments.
- Fixed payments in accordance with an advance notice to the tax office.
- Performance bonuses paid in proportion to the company’s earnings to directors who engage in the operation of the company’s business, to the extent that certain requirements are met.

If the amount of remuneration is deemed unreasonable by the tax authority, only the reasonable amount is deductible for tax purposes.

**Entertainment expenses**
In principle, entertainment expenses are not deductible for tax purposes. However, an SME, defined as a company with paid-in capital of JPY 100 million or less (except for a company wholly owned by a company that has paid-in capital of JPY 500 million or more after the group taxation regime is effective) may take a tax deduction up to the smaller of 90% of the actual disbursement for the entertainment expense or JPY 5.4
million (90% of JPY 6 million). Under the 2013 Tax Reform, the deduction limitation for entertainment expenses is increased from the current JPY 5.4 million to JPY 8 million. With regard to expenses for eating and drinking, a company may deduct such expenses up to JPY 5,000 per person (excluding expenditures for internal purposes) for tax purposes.

**Fines and penalties**
Fines and penalties are not deductible.

**Taxes**
Enterprise tax and business premises tax are deductible in the calculation of the taxable income for corporation tax purposes on a cash basis. However, corporation tax and inhabitant’s tax are not deductible. Fixed assets tax and other taxes are deductible, when assessed. Foreign income taxes also may be deductible if the Japanese corporation does not elect to claim a foreign tax credit.

**Net operating losses**
For corporation tax and enterprise tax purposes (indirectly for inhabitant’s tax purposes), a tax loss can be carried forward to offset future income in the case that a taxpayer files a ‘blue form’ tax return (see Tax returns in the Tax administration section) or if the tax loss is incurred as a result of certain disaster events.

The use of carried forward net operating losses is limited to 80% of current taxable income, effective for tax years beginning on or after 1 April 2012. Such limitation does not apply to SMEs and certain ‘investment vehicle’ corporations. However, the period within which net operating losses can be carried forward is extended from seven years to nine years for the losses incurred in the tax year ending on or after 1 April 2012 on condition that taxpayers maintain their books and records in which net operating losses were recognised.

</tbody>
</table>

Where there is a change in ownership of a corporation followed by certain events, such as the cessation of business or a significant change in its business within a five-year period following a business acquisition, the utilisation of its tax loss is restricted.

Carryback of tax losses is generally available for one year for national corporation tax purposes. This carryback rule is suspended until the fiscal year ending 31 March 2014 (except in specified circumstances, e.g. year of liquidation).

No carryback of losses is allowed for enterprise tax and inhabitant’s tax.
Japan

**Payments to foreign affiliates**
In order to support a deduction in Japan for expenses incurred by a foreign affiliate and charged to a Japanese corporation, in general, it should be demonstrated that the service arrangement between the foreign affiliate and the Japanese corporation satisfies arm’s-length criteria for purposes of Japan’s transfer pricing laws and regulations.

Generally, fees that are paid by a Japanese subsidiary to a foreign affiliate should be deductible for Japanese tax purposes if the following conditions are met:

- The services should have the same character as services that take place between non-related companies or such services are essential to Japan's activities.
- There is a written service agreement.
- The services were requested by the Japanese corporation.
- The rendering of services is documented with evidence (e.g. requests for services from the Japanese subsidiary, regular invoices sent by the foreign affiliate).
- The service charges are reasonable.

**Group taxation**

**Consolidated tax regime**
Under the consolidated tax regime, a consolidated group can report and pay national corporate income tax on a consolidated basis. A consolidated group may be formed by a Japanese parent company and its 100% owned (directly or indirectly) Japanese subsidiaries. The taxpayer may file an application to elect a consolidated group filing for tax purposes, but the election must include all of the parent’s eligible subsidiaries. Once the election is made, the consolidated filing, in principle, cannot be revoked unless there is a specific event, such as an ownership change, that causes the qualifying conditions of a consolidated filing to fail or an application to discontinue the consolidated group has been approved by the Commissioner of the National Tax Agency (NTA).

The taxable income of the consolidated group is computed on a consolidated basis by aggregating the taxable income or losses of each member of the consolidated group followed by the consolidation adjustments. Profits from intra-group transactions, except for transfer of certain assets as defined, should be included in the aggregate taxable income. Gains or losses from the intra-group transfer of certain assets are deferred.

Pre-consolidation tax losses of a subsidiary can be carried forward into a consolidated tax group if certain conditions are met, but may only be offset against taxable income of the subsidiary for the calculation of a consolidation income.

The consolidated national corporate income tax liability is determined by applying the corporate income tax rate to the consolidated taxable income and adjusted for consolidated tax credits. The total tax liabilities are allocated back to each member company. The parent company files the consolidated return and pays the national corporate income tax for the group; however, each member company remains jointly and severally liable for the consolidated group’s total national corporate income tax liability.

Local corporate income taxes levied on member companies are paid on a separate company basis, but the amount of local tax payable may be affected because of the consolidated filing.
**Group taxation regime**

A group taxation regime is applicable to domestic companies that are wholly owned by a domestic company, foreign company, or individual (‘group companies’). Unlike the consolidated tax regime, the group taxation regime automatically applies to group companies.

The key points of this regime are summarised as follows:

- The recognition of capital gains or losses from the transfer of certain assets (including the transfer of assets as a result of a non-qualified or taxable merger) between group companies is deferred until the asset is transferred to another group company or a non-group company. The scope of assets is the same as that under the tax consolidation system (i.e. fixed assets, land, securities, monetary receivables, and deferred expenses [excluding securities for trading purposes and assets with a book value of less than JPY 10 million]).
- Where a donation occurs between group companies, there are no tax implications for either the donor or donee (i.e. no deduction for the donor and no taxation for the donee). Note that this treatment is not applied to a group company owned by an individual. This is consistent with the treatment of a donation between members of a consolidated tax group.
- A dividend received from a group company can be fully excluded from taxable income without any reduction for allocable interest expense. This is consistent with the treatment of dividends between members of a consolidated tax group.

A group company that would otherwise qualify as an SME on a stand-alone basis is not eligible for SME benefits (e.g. reduced corporate tax rate, preferable allowable ratios for deductible portion of bad debt provisions, partial deductibility of entertainment expenses, carryback of tax losses) if the SME is owned by a parent company or two or more parent companies of the group that has paid-in capital of JPY 500 million or more.

Where a corporation that is a member of a 100% group is in the process of liquidation and is expected to be dissolved, any loss from the impairment or devaluation of the shares of the liquidating corporation cannot be recognised by the parent company as a tax deductible expense.

**Transfer pricing**

If a corporation that is subject to corporation tax sells property to or buys property from a foreign-related person, or provides services or conducts other transactions with a foreign-related person, and consideration is received or paid by the corporation, the transaction is required to be carried out at an arm’s-length price for corporation tax purposes.

A foreign-related person is a foreign corporation that maintains certain special relationships with the subject corporation, such as parent-subsidiary, brother-sister, or substantial control relationship.

The arm’s-length price for the sales or purchase of inventory may be determined using one of the four following methods:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Other method.
Japan

The ‘most appropriate method’ should be applied in order to calculate the arm's-length price.

Note that as a result of recent amendments to the OECD Guidelines, the Berry Ratio has become a specifically allowed method under the 2013 Tax Reform, in addition to the three traditional transactional methods (comparable uncontrolled price method, resell minus method, cost plus method) as well as other methods (i.e. profit split method and transactional net margin method [TNMM]).

An advanced pricing agreement (APA) system is available to confirm the arm's-length pricing system proposed by a taxpayer. In general, corporations entering into an APA are advised to file a request for mutual agreement procedures (MAP) in order to obtain the agreement of the competent authorities of each country.

**Thin capitalisation**

Interest paid on debt to controlling foreign shareholders is disallowed to the extent the average balance of debt on which that interest is paid is more than three times the equity of controlling foreign shareholders.

**Interest expense deduction limitation**

Under the 2012 Tax Reform, the new rule regarding the restriction of deductibility of interest expense from a related party was introduced.

The deductible portion of a corporation's net interest expense to a related party will be restricted to 50% of the adjusted income. The net interest is calculated as interest expense to related parties less corresponding interest income. The adjusted income is defined as taxable income, adding back interest expense, depreciation expense, and exempted dividend income but excluding extraordinary income or loss.

This rule is applicable for tax years beginning on or after 1 April 2013.

**Anti-tax haven (controlled foreign company or CFC) rules**

Undistributed profits of a foreign subsidiary (i.e. CFC) located in a tax haven are included in the Japanese parent company's taxable income under certain conditions.

Tax havens are defined as certain countries or territories that do not impose corporate income tax or that tax the income of a foreign subsidiary at a rate of 20% or less. A Japanese corporation owning a 10% or more direct or indirect interest in a CFC is required to include its pro-rata share of the taxable retained earnings of the CFC in its gross income under certain circumstances.

A dividend paid by a CFC is not deductible when calculating its undistributed income.

**Tax credits and incentives**

**Foreign tax credit**

A Japanese corporation is subject to Japanese corporate income taxes on its worldwide income. However, to avoid double taxation of foreign-source income, Japanese corporations are allowed to claim a tax credit against corporation and inhabitant’s taxes for foreign income taxes paid directly.

Creditable foreign taxes are defined as taxes that (i) are incurred directly by the taxpayer; (ii) are levied by foreign governments and local authorities in accordance
with local tax laws; (iii) are levied on corporate income; and (iv) have the same characteristics as Japanese income tax, corporation tax, and local income-based taxes. A tax for which refund can be claimed optionally by the taxpayer after the tax payment, or a tax whose payment grace period can be decided by the taxpayer, are not regarded as foreign tax.

In order to prevent the credit from reducing corporation tax on Japan-source income, certain limitations are set on the amount of foreign tax that can actually be credited. The ceiling is 35% for the foreign tax paid in the tax years beginning on or after 1 April 2012.

A foreign tax credit is not applicable for enterprise tax purposes, although foreign branch income attributable to a business executed outside Japan is exempt from enterprise tax.

Generally speaking, the foreign tax credit system does not apply to the extent the dividend income from the foreign subsidiary is subject to the dividend exemption system.

**Tax credit for research and development (R&D) cost**

The tax credit for R&D cost is calculated based on gross R&D cost. Limitation of the credit is determined based on the corporation tax liability as follows:

- For tax years ending on or before 31 March 2012: 30% of the corporation tax liability.
- For tax years beginning on or after 1 April 2012: 20% of the corporation tax liability.

Note that under the 2013 Tax Reform, the R&D credit limitation is increased to 30% for tax years commencing on after 1 April 2013 through 31 March 2015.

In the case that the amount of the credit exceeds the limitations above, the excess amount can be carried forward for one year.

In addition to the R&D credit, for tax years beginning during the period 1 April 2008 to 31 March 2014, a taxpayer may claim an additional tax credit based on its incremental R&D expenditure or excess R&D cost over sales, as follows:

- 5% of the excess R&D costs over the annual average of R&D costs for the last three years.
- Excess R&D costs over 10% of the average sales amount multiplied by a tax credit ratio equal to ((R&D costs/average sales) - 10%) x 0.2).

The limitation of this additional tax credit is 10% of the corporation tax liability.

**Special tax treatment for investment in certain equipment**

SMEs filing ‘blue form’ tax returns may elect, under certain conditions, to claim accelerated depreciation of 30% of the base acquisition cost or a special tax credit equivalent to 7% of the base acquisition cost on designated equipment to the extent that it is acquired by 31 March 2014. The maximum tax credit is limited to 20% of the taxpayers’ corporate tax liability.

Under the 2013 Tax Reform, a new investment tax incentive is applicable to new domestic investments. The ‘Incentive for New Investment into Production Facilities’ is applicable to any industry that invests in new production facilities (30% special depreciation or 3% tax credit on acquisition cost, up to 20% of corporate tax liability,
Japan

etc., and subject to certain conditions). In addition, a new investment incentive applies to SMEs that invest in equipment and furnishings pursuant to certain facility remodeling (30% special depreciation or 7% tax credit on acquisition cost, up to 20% of corporate tax liability [one-year carryforward of any excess], and subject to certain conditions). The SME tax incentive is granted to an SME engaged in the distribution, retailing, service, and/or agriculture business.

For both incentives, only corporations filing a ‘blue form’ are eligible. In addition, the incentives are effective for tax years beginning on or after 1 April 1 2013 through 31 March 2015.

Special tax treatment for Designated International Strategic Area

Qualifying corporations doing business in certain designated metropolitan areas (‘Designated International Strategic Area’) will be granted the following tax incentives:

- If qualifying corporations are engaged in specified businesses in the Designated International Strategic Area, certain capital expenditures (JPY 20 million or more for machinery and equipment and JPY 100 million or more for building and construction) incurred for the specified businesses will be eligible for either (i) a deduction equal to 50% of the capital expenditures (building is limited to 25%) or (ii) a tax credit equal to 15% of the capital expenditures (building is limited to 8%), with the maximum credit amount in any given tax year being equal to 20% of the tax liability before the credit, with a one year carryforward.

- If qualifying corporations are engaged primarily in specified businesses in the Designated International Strategic Area, they will be entitled to an income exclusion of up to 20% for five years, provided they are incorporated in the Designated International Strategic Area and incur certain capital expenditures. If qualifying corporations claim the 20% income exclusion, they will not be entitled to the tax credit regime described above.

Qualifying corporations will be eligible for the tax credit regime described above with respect to capital expenditures incurred from the effective date of the law concerning this regime through 31 March 2014. Corporations will be eligible for the 20% income exclusion regime for five years once they are specified as qualifying corporations during a period from the effective date of the law concerning this regime through 31 March 2014.

Tax incentives for Asian headquarters

A qualifying corporation filing ‘blue form’ tax returns that will be primarily engaged in the operational management or R&D activities established by an international foreign corporation will be entitled to claim a 20% income exclusion over five years from the date it is specified (during the period from the effective date of the law concerning this regime through 31 March 2014) as a qualifying corporation pursuant to the relevant law.

Employment promotion taxation

If qualifying corporations increase the number of employees subject to employment insurance by 10% or more and by five people (two in the case of SMEs) or more from the end of the prior tax year, the qualifying corporations will be eligible for the tax credit equal to the increased number of the employees multiplied by JPY 200,000 (increased to JPY 400,000 under the 2013 Tax Reform) with the limitation of 10% (20% in the case of SMEs) of the tax liability before the credit, subject to certain conditions for the tax years that commence from 1 April 2011 (excluding years ending before 30 June 2011) to 31 March 2014.
Under the 2013 Tax Reform, a new tax incentive was introduced to allow an employer corporation to claim a tax credit based on increases in salary payments (tax credit equal to 10% of the increased salary amount with a limitation of 10% [20% in case of SME] of the tax liability, subject to certain conditions). The employer corporation is allowed to claim a credit by either increased employment incentive or employment promotion incentive as explained above. To take a credit, the employer corporation must be a ‘blue form’ filer. The credit is effective for tax years commencing from 1 April 2013 to 31 March 2016.

**Tohoku Earthquake and special tax legislation**

**Corporate tax refunds by loss carrybacks**
Under the current law, one year tax loss carrybacks are allowed for SMEs. Other corporations are allowed a one year tax loss carryback in the year of liquidation. In the Tohoku Legislation, corporations that incurred a specified disaster loss from the Tohoku Earthquake (the ‘Tohoku Earthquake Disaster Loss’) may carry back such loss for two years for national tax purposes. Such carryback may be elected either with the annual corporate tax return or an interim tax return based upon a full interim closing of the corporate books. For local tax purposes, the tax loss carryback is not applicable, although carryforward of all losses (including the Tohoku Earthquake Disaster Loss) is allowed over the normal nine year carryforward period.

**Special depreciation for newly acquired assets relating to the Tohoku Earthquake**
A corporation may claim a special depreciation of certain assets in the year of acquisition in addition to normal depreciation. The qualified assets should be acquired and placed in service between 11 March 2011 and 31 March 2016 and satisfy either (i) or (ii) below:

(i) Newly acquired assets to replace assets destroyed in the Tohoku Earthquake, including:
   - Buildings, structures, machinery, or equipment.
   - Registered vessels, aircraft, or vehicles.

(ii) Newly acquired assets placed in service in a business carried out at the affected area*, including buildings, structures, machinery, or equipment.

* Areas where destroyed buildings or structures were located and surrounding areas where machinery or equipment were installed.

**Rollover relief given to newly acquired assets to replace old assets**
Under the current statutes, up to 80% of the capital gain realised when a corporation acquires an asset to replace an old one may be deferred. Under the Tohoku Legislation,
for certain assets acquired between 11 March 2011 and 31 March 2016, the entire amount of capital gain may be deferred. Qualified replacement assets include the following:

- Real estate or depreciable assets located in Japan purchased to replace real estate (including buildings or structures fixed to the land) in the affected area that had been acquired prior to 11 March 2011.
- Real estate or depreciable assets purchased in the affected area to replace real estate, buildings, or structures located other than in the affected area.

When applying the rollover relief rules, the due date for acquiring replacement assets is extended for a further two years if it is difficult to acquire the replacement asset by the normal due date as a result of the Tohoku Earthquake.

**Additional special tax relief for restoration of the affected area**

The following additional tax incentives were introduced on 14 December 2011. Please note that a corporate taxpayer must choose one of (i), (ii), or (iii) below, where (ii) can be chosen only where 'employment promotion taxation' (see above) is not applied.

**i. Tax incentive for a newly established company doing business in designated areas**

A newly established company satisfying certain criterion is not subject to tax on income for the first five years of its existence. However, in effect, the tax holiday is more akin to a deferral since the income is offset by a special reserve that is reversed in later years.

The tax incentive applies to a company that acquires machinery, equipment, and building structures in a specified industrial concentration area that is organised by an approved local government and designated by 31 March 2016 by the local government as a company that contributes to providing opportunities for employment ('Designated Company') and newly established on or after the date when the designated restoration planning is approved.

If a Designated Company set up reserves for reinvestment in each of the tax years (including a day) within a designated period (five years from the date on which a company is designated), the amount of reserve (which may be set up to be 100% of taxable income) is deductible and may essentially defer tax for ten years.

In a tax year where a Designated Company reinvests in machinery or building in a specified industrial concentration area, a corporation is allowed to claim a deduction of the lesser of (i) special depreciation up to the balance of the reserve and (ii) special depreciation equal to the reversed reserve amount.

**ii. Special corporation tax credit**

A Designated Company is allowed to enjoy a tax credit for 10% of salary paid (but limited to 20% of corporation tax due) to employees within a specified industrial concentration area.

**iii. Special depreciation and special tax credit**

A Designated Company is allowed to enjoy special depreciation or a special tax credit for (i) machinery and equipment and (ii) buildings and structures acquired by 31 March 2016 in a specified industrial concentration area.

- Special depreciation: Depreciation rates applicable for machinery and equipment are 100% if acquired and used by 31 March 2014, and 50% if acquired and used on
or after 1 April 2014. The depreciation rate applicable for buildings and structures is 25%.

- Special tax credit: The rates of tax credit applicable for (i) machinery and equipment and (ii) building and structures are 15% and 8%, respectively, but limited to 20% of corporation tax due. Any tax credits in excess of this limitation can be carried forward for four years.

### Withholding taxes

#### Tax treaty network

As of 31 March 2013, Japan has entered into 56 tax treaties with 67 countries. Companies making certain payments are required to withhold income taxes using the following rates.

**Notes**

The applicable treaty rates are effective as of 31 March 2013.

1. The tax treaty rates apply only to corporate shareholders. The applicable treaty should be checked for conditions required to claim the reduced rate.
2. The applicable treaty should be reviewed because certain tax treaties exclude film royalties and/or gain from copyright transfer from taxable income.
3. For certain dividends received from 1 January 2004 through 31 December 2013, the reduced rate of 7% (for resident individuals, an additional 3% will be levied) is applied instead of 20%. Thus, the WHT rate for resident individuals is either 10% or 20%, whereas, the rate for corporations or resident
individuals in non-treaty countries is 7% or 20%. For residents in treaty countries, 7% or the treaty rate will be applied. As of 1 January 2014, 20% will be applied without exception.

4. Interest on bank deposits and/or certain designated financial instruments is subject to a 15% national WHT and 5% local inhabitants WHT (20% combined). Taxation of such interest is fully realised by tax withholding, so resident individuals are not required to aggregate such interest income with other income. Interest on loans made by resident individuals is not subject to WHT; instead, it is taxed in the aggregate with other income. Such WHT is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.

5. Dividends, interest, and royalties earned by non-resident individuals and/or foreign corporations are subject to a 20% national WHT under Japanese domestic tax laws in principle. An exception rate of 7% is applied to dividends from certain listed companies. An exceptional rate of 15% is applied to interest on bank deposits and certain designated financial instruments. Interest on loans, however, is taxed at a 20% rate. A special exemption from WHT applies to certain long-term corporate bonds issued to non-residents in foreign countries.

6. Tax treaties with many countries provide reduced tax rates, as indicated. Some treaties, however, provide higher tax rates (e.g. Brazil, Thailand) or do not provide rates (e.g. Egypt, New Zealand). In these instances, rates specified under Japanese domestic tax laws apply. Each treaty should be consulted to see if a reduced rate for dividends (in the case of substantial holdings) is applicable.

7. The tax treaty was concluded mainly for the purpose of information exchange.

8. The tax treaty with Brazil provides a 25% tax rate for certain royalties (trademark). However, the WHT rate cannot exceed 20% on any royalties to be received by a non-resident taxpayer of Japan under Japanese income tax law. Film royalties are taxed at 15%. Any other royalties are taxed at 12.5%.

9. The treaty with the former Czechoslovakia is applied to the Czech Republic and the Slovak Republic. It stipulates that cultural royalties are tax exempt.

10. Film royalties are taxed at 20%, and other royalties are taxed at 15%.

11. Cultural royalties are tax exempt.

12. The rate of 10% for royalties includes consideration for technical services.

13. The rate for royalties is reduced to 5% by Protocol.

14. Dividends received from subsidiaries, by parent companies that have met certain conditions, are exempt from WHT.

15. Dividends received from subsidiaries for which the parent company has over 50% shareholding are tax exempt. Interest received by government and other specific entities, or paid as a consequence of sale on credit of any equipment, merchandise, or service, is tax exempt.

16. A 5% rate is applied to a company that has over 50% shares with direct voting rights, and a rate of 7.5% is applied to a company that has over 25% shares with direct voting rights.

17. Film royalties are taxed at 15%. Any other royalties are taxed at 10%.

18. Cultural royalties are tax exempt.

19. Cultural royalties are taxed at 10%.

20. Royalties paid for the use of certain equipment are taxed at 5%.

21. Interest paid to financial institutions is tax exempt, as well as film and copyright royalties. Patent royalties are subject to a 10% rate.

22. If certain conditions for beneficial owners are met, dividends are taxable only in the contracting state of which the beneficial owner is a resident.

23. Dividends paid by a corporation that is engaged in industrial undertakings are taxed at 15%. Interest paid to financial institutions is taxed at 10%.

24. Interest paid to financial institutions is taxed at 10%.

25. The treaty with the former USSR is applied to Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. It stipulates that cultural royalties are tax exempt.

---------------------------------------------------------------

**Tax administration**

**Taxable period**

The tax year is the corporation's annual accounting period specified in its articles of incorporation. A Japan branch of a foreign corporation must use the same accounting period that is adopted by the corporation in its home country.

**Tax returns**

Corporate income tax returns (i.e. the national corporation tax return, enterprise tax return, and local inhabitants’ tax return) are self-assessment tax returns.

If a corporation meets certain conditions, such as keeping certain accounting books, and makes an application for it in advance, it is allowed to file a 'blue form' tax return. A blue form filing corporation may benefit from loss carryforward and other benefits.
A corporation (including a branch) is required to file the final tax return within two months after the end of its annual accounting period. If a corporation cannot file the final return because of specific reasons, the due date of final return may be extended for one month with the tax authority's approval.

**Payment of tax**
Income taxes payable on the final corporate income tax return should be paid on or before the filing due date of the final tax returns (usually two months after the end of the corporation's accounting period). If an extension of time for filing is granted, the taxes may be paid on or before the extended due date with interest accrued at a rate of 4.3% (for the year 2013) per annum for the period from the day following the original due date (i.e. two months after the end of an accounting period) to the date of the actual payment.

Provisional tax payments are required for a corporation that has a fiscal period longer than six months. Provisional taxes generally are computed as one-half of the tax liabilities for the previous year, but they may be reduced by the filing of interim tax returns that reflect semi-annual results of the operations. The provisional tax payment is required to be made within two months after the end of the sixth month of the corporation's accounting period.

**Penalties**
If the tax return is filed late, a late filing penalty is imposed at 15% to 20% of the tax balance due. In the case that a corporation voluntarily files the tax return after the due date, this penalty may be reduced to 5%.

An under-payment penalty is imposed at 10% to 15% of additional tax due. In the case that a corporation amends a tax return and tax liabilities voluntarily after the due date, this penalty may not be levied.

In addition, interest for the late payment of tax is levied at 4.3% (for the year 2013) per annum for the first two months and increases to 14.6% per annum thereafter.

**Consolidated taxation**
The parent company will file the consolidated tax return and pay national corporate income tax for the group. The consolidated tax return and payment due dates are the same as previously discussed; however, the due date of the final return may be extended for two months.

For local corporate income taxes, each member of the consolidated group must separately file the returns and pay the taxes.

**Tax audit process**
Generally speaking, corporate tax audit is performed in cycles of three to five years' duration. However, this period may be shortened in the case that some significant tax matters were pointed out in the prior audit and so on. If taxpayers request a downward correction, a tax audit will be performed to make sure of it.

With regard to tax audit procedures, tax laws have not clarified them thus far. As of 1 January 2013, prior to conducting a tax audit, in principle, tax agents are required to notify taxpayers, and, upon completion of tax audits, tax agents are required to provide to taxpayers a brief written summary of their findings, etc.
Statute of limitations
The statutory limitations to request a downward correction of prior year tax liabilities is five year (six years for transfer pricing) from when the original tax return was filed.

The statute of limitations with regard to upward corrections by the tax authorities is also five years (six years for transfer pricing).
Significant developments

There have been no significant corporate tax developments in Jersey during the past year.

Taxes on corporate income

Resident companies are generally taxed on their worldwide income. A permanent establishment (PE), e.g. a branch of a company, is taxed on profits attributable to the PE. Non-resident companies are taxable on Jersey real estate income.

Companies pay income tax at a rate of 0%, 10%, or 20% on taxable income. The general rate applicable is 0%; the 10% and 20% rates apply to certain companies/income streams as explained in this section. The tax rate applies to the company as a whole, the only exception being Jersey-source property income, which is taxed at 20% regardless of the classification of the property holding company.

Certain Collective Investment Funds and Securitisation Vehicles can elect to be exempt from tax on income, other than income from Jersey land or property, for an annual fee of 500 pounds sterling (GBP).

The 20% tax rate applies to Jersey-based utility companies, such as telephone, gas, and electricity companies. Additionally, income from Jersey real estate, including rental income, property development profits, and income from exploiting Jersey land (e.g. quarrying activities) is subject to tax at 20%. Companies involved in oil importation are also taxed at 20%.

The 10% rate applies to financial services companies. A company is defined as a financial services company if:

- it is registered under the 1998 financial services law to carry out investment business, trust company business, or fund services business as an administrator or custodian in relation to an unclassified or an unregulated fund
- it is registered under the 1991 banking business law, or
- it holds a permit under the collective investment funds law of 1988 as an administrator or custodian.

The 0% rate applies to all entities that are not exempt, financial services entities, or utility companies, including fund managers who do not hold any of the permits mentioned above.
Local income taxes
There are no local government taxes on income.

Corporate residence
A company is regarded as tax resident in Jersey if it is incorporated in Jersey or if it has its place of central management and control in Jersey. However, a Jersey incorporated company that is managed and controlled elsewhere will not be regarded as a Jersey resident, provided certain conditions are satisfied.

Permanent establishment (PE)
Under domestic legislation, a PE, in relation to a company, includes a branch of the company, a factory, shop, workshop, quarry or a building site, and a place of management of the company; however, the fact that the directors of a company regularly meet in Jersey shall not, of itself, make their meeting place a PE.

For a definition of PE contained in Jersey’s double tax agreements (DTAs), the relevant clause and agreement should be reviewed. In general, it may include a branch, management, or other fixed place of business, but not an agency, unless the agent has, and habitually exercises, a general authority to negotiate and conclude contracts or has a stock of merchandise from which the agent regularly fills orders.

Other taxes

Goods and services tax (GST)
The standard rate of GST is 5%.

Companies with taxable supplies of more than GBP 300,000 per annum are required to register for GST.

International service entity (ISE) status
To address the difficulty of irrecoverable input tax in the financial services sector, and to mitigate the administrative cost of GST for exporters in general, Jersey has introduced the concept of an ISE. Where an entity qualifies for this status:

- it will not be required to register for GST
- services to it will be zero-rated (i.e. treated as an export) where the supply exceeds GBP 1,000, and
- input tax on purchases less than GBP 1,000 may be reclaimed.

ISE status is automatically available to a wide variety of service providers and administered entities based in Jersey, upon application and payment of the relevant fee, including licensed banks, licensed trust service providers, licensed fund administrators, fund managers, and managed managers.

Other entities not automatically eligible under one of the categories above, including companies, partnerships, trusts, unrecognised funds, and special purpose vehicles, may still obtain ISE status if they fulfil certain criteria.

The ISE must be included on a list maintained by the Comptroller of Taxes. The list will refer either to the entity itself or (e.g. for administered entities) a class of entities as submitted by the administrator.
Jersey, Channel Islands

**Customs duties**
A common customs tariff is applicable on all goods imported from outside the European Union (EU). The amount is dependent on what the goods are and where they are imported from.

**Excise taxes**
An excise duty tax is payable on imported alcohol, tobacco, and fuel at varying rates.

**Property taxes**
There are no property taxes in Jersey apart from income tax on Jersey-source property income and stamp duty on Jersey real estate.

**Stamp duty**
Stamp duty is payable on the purchase or transfer of Jersey real estate, with rates ranging from 0% to 5%. Mortgages secured by a charge over Jersey real estate are subject to stamp duty at rates of up to 0.5% of the amount borrowed. No stamp duty is payable on the transfer of shares.

**Land transaction tax**
A land transaction tax applies when shares in companies are transferred and the ownership of which confers a right of occupation of residential real estate in Jersey. The amount of land transaction tax payable is equal to the stamp duty that would have been suffered if the real estate were held directly.

**Social security contributions**
Employers are responsible for paying employer social security contributions at a rate of 6.5% on each employee's gross earnings, up to the monthly standard earnings limit of GBP 3,834 for 2013 (annual limit GBP 46,008). Employer social security contributions of 2% apply to employees’ earnings above the standard earnings limit, up to an upper earnings limit (GBP 12,686 monthly/GBP 152,232 annual).

---

**Branch income**
Branch income is taxed at the rate applicable to the company. No further tax is withheld on the transfer of profits abroad.

---

**Income determination**

**Inventory valuation**
Inventory is valued at the lower of historical cost or net realisable value. The last in first out (LIFO) method is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

**Capital gains**
Capital gains are not subject to tax in Jersey.

**Dividend income**
There is no requirement to withhold tax at source when paying dividends. If a dividend is paid out of profits that have suffered tax at a 10% or 20% rate, then the net dividend will be accompanied by a tax credit at the applicable rate. Repayment of the tax credit can be claimed by Jersey investment companies and financial services companies.
Jersey, Channel Islands

receiving the dividends, subject to certain restrictions. However, trading companies subject to tax at 0% are not entitled to claim a repayment of any of the tax credit.

**Stock dividends**
Stock dividends are taxed as income.

**Interest income**
Interest income forms part of taxable income and is taxed at the rate applicable to the company.

**Foreign income**
Income tax is levied on foreign branch income when earned and on foreign dividends, interest, rents, and royalties. Double taxation is mitigated by either the granting of unilateral relief to the extent of taxing foreign income net of foreign taxes or by treaty relief, which gives credit for foreign tax. Concessional credit relief might be granted in certain limited circumstances upon application.

In addition to the long standing DTAs with the United Kingdom and Guernsey, Jersey now has DTAs with Australia, Denmark, Estonia, Faroes, Finland, France, Germany, Greenland, Hong Kong, Iceland, Malta, New Zealand, Norway, Poland, Qatar, and Sweden. The scope varies from agreement to agreement, but most are of limited scope.

**Deductions**

Normally, business deductions are allowed if they are incurred wholly and exclusively for trade purposes.

**Depreciation and depletion**
Capital allowances are available using the diminishing-balance method on machinery and equipment, including vehicles, at a rate of 25%. For this purpose, all such assets are pooled, and the allowance is calculated by reference to the value of the pool.

On disposal of an asset, the lower of cost and sale proceeds of the asset is deducted from the pool. A balancing charge is levied if the proceeds exceed the balance of the pool.

Motor vehicles costing more than GBP 21,000 and greenhouses are subject to special rules and are not pooled with other assets.

By concession, an alternative is to claim the full cost of replacement in the year of replacement.

Capital allowances are not applicable to buildings or the depletion of natural resources.

**Goodwill**
Goodwill expenditure is non-deductible for Jersey income tax purposes.

**Start-up expenses**
Once a company has commenced its trade, start-up expenditure will be allowable for tax purposes if it is not capital in nature and has been incurred wholly and exclusively for trade purposes.
Interest expenses
Interest expense will be allowable if it is incurred for the purposes of a trade or is paid in connection with a loan taken out for a qualifying purpose.

Bad debts
Trading bad debts are normally allowable for Jersey income tax purposes unless they relate to a general provision.

Charitable contributions
Charitable contributions are generally non-deductible for tax purposes, unless the contribution itself provides a benefit to the trade (i.e. marketing).

Fines and penalties
Fines and penalties are generally non-deductible for tax purposes.

Taxes
Local income tax paid is not deductible in computing taxable income. ISE fees paid are a tax-deductible expense.

Net operating losses
No distinction is drawn between different types of income or losses arising from different trades or sources, apart from Jersey property income, which is separately streamed.

Unrelieved losses may be carried forward and used to offset profits in future accounting periods. Alternatively, losses can be group relieved to group companies in the same income tax rate band.

There are now only very limited circumstances where a company can obtain relief for carrying back losses.

Payments to foreign affiliates
There are no withholding taxes (WHTs) on patent royalties paid by Jersey companies to non-residents.

Group taxation
Group taxation is not permitted in Jersey. However, there are provisions for group relief between group companies subject to the same rate of tax. It is not possible to relieve losses between two companies taxed at different rates. As of 2013, it is no longer possible for group companies to relieve losses from Jersey property rental income. Also, it is now only possible to relieve losses from Jersey property development profits and from quarrying activities against profits arising from the same activities.

Transfer pricing
There are no specific rules in relation to transfer pricing in Jersey. There is, however, a general anti-avoidance provision in Jersey tax law. It may be applied by the Comptroller of Taxes if a transaction or a combination or series of transactions is entered into for the avoidance or reduction of Jersey income tax.

Thin capitalisation
There are no specific rules in relation to thin capitalisation in Jersey.
Tax credits and incentives

There are generally no special incentives for locally owned businesses in view of the low rate of tax.

Foreign tax credit

There is no local foreign tax credit regime in Jersey. DTAs need to be considered as appropriate. Unilateral relief may be available under very limited specific circumstances.

Withholding taxes

There are no WHTs on dividends or interest paid by Jersey companies.

Tax administration

Taxable period
The tax year is the calendar year. Companies are assessed on income earned in respect of the financial year that ends within the applicable calendar year of assessment.

Tax returns
The system relies on the filing of a return of information with the Jersey tax authority, which then raises an assessment (in the case of companies taxed at 10% or 20% on all or part of their income). Companies taxed at 0% are required to submit a tax return but are not required to submit accounts and tax computations.

There is a filing deadline for the corporate return of 6pm on the last Friday in July and a late filing penalty of GBP 250.

Payment of tax
For companies, tax is payable in arrears during the calendar year following the year of assessment.

Under the law, tax is due the day after the assessment is made. In practice, an estimated assessment is made by the tax office in February/March, which is then appealed based on information at that time. A payment is suggested based on the appeal with the company making a top up payment (if necessary) prior to the surcharge deadline (the first Friday after the first Monday each December) or once a final computation has been produced and submitted.

Tax paid after a prescribed date (usually the first Friday in the December following the year of assessment) incurs a 10% surcharge.

Tax audit process
There is no formal tax audit process in Jersey. The Jersey tax office can enquire into a return that is under appeal.
Jersey, Channel Islands

**Statute of limitations**
There is no statutory limitation date, as such. If the Comptroller discovers profits have not been fully assessed, the Comptroller can issue an amended/additional assessment at any time not later than five years after the expiration of the year of assessment. If the error involves fraud, willful default, or neglect, then the assessment can be revised at any time.

**Topics of focus for tax authorities**
The Jersey authorities have entered into an inter-governmental agreement (IGA) with the United States to facilitate tax reporting under the Foreign Account Tax Compliance Act (FATCA) regime. The IGA has been initialled but is not yet in force. The Jersey authorities have also agreed, in principle, to enter into a similar IGA with the United Kingdom.

**Tax information exchange agreements (TIEAs)**
The Jersey tax authorities are committed to being tax transparent, with an increased emphasis on agreeing further DTAs and TIEAs. Jersey has signed TIEAs with 29 countries and are negotiating DTAs with several other jurisdictions (see Foreign income in the Income determination section for a description of DTAs that have been signed).
**Significant developments**

The temporary income tax law of 2009 and the amended sales tax law for the year 2009, which became effective as of 1 January 2010, are still in force. There have been several updates and developments, such as sales tax amendments on certain items (such as luxury items). Starting from June 2012, ordinary and smart mobile phones are subject to 8% general sales tax. Also starting from June 2012, money remittance services provided to natural persons outside of Jordan by licensed banks and financial institutions are subject to general sales tax.

The above temporary income tax law for the year 2009 is in force until the elected Parliament enacts the final income tax law.

There are resolutions that were released in 2011/12 with regard to the Jordan Investment Board, which include the Free Zone Law and Development Area Law that were merged together, but the related new instructions and regulations are not yet released. This has created unclear tax mechanism and reporting requirements.

**Taxes on corporate income**

The corporate tax rates in Jordan are applied based on the industry/business activities from which the taxpayer generates income. The corporate tax rates are as follows:

- 30% for banks.
- 24% for telecommunication, insurance, financial intermediation companies (including exchange and finance leasing companies).
- 14% for other companies.

Jordanian resident corporations are not subject to income tax on their worldwide income unless that income is raised from sources that originate and relate to Jordanian deposits and funds. However, for foreign branches of Jordanian resident corporations, 20% of the branch net income after taxes is subject to Jordanian corporate tax.

Non-resident corporations are taxed through withholding tax (WHT) *see the Withholding taxes section*.

**Local income taxes**

There are no local income taxes in Jordan.
Jordan

Corporate residence
An entity will be deemed to be resident in Jordan if it has been established and registered in accordance with the provisions of the Jordanian legislation in force and (i) has an office or branch practicing management and supervision of its work in Jordan, (ii) whose management head office or actual office is located in Jordan, or (iii) which the government or any official or public institutions own more than 50% of its capital.

Permanent establishment (PE)
There are no clear provisions in the Jordan income tax law to define PE.

Other taxes
Sales tax
A general sales tax similar in operation to a value-added tax (VAT) is imposed at the rate of 16% on the following transactions:

- Sales of goods or services, or both.
- Importing any service or goods from outside Jordan or from the free zone areas and markets inside Jordan.

Special tax rates are applied on certain items (see Excise taxes below).

A zero rate is applied to the export sales of goods and services outside Jordan or to the free zone areas and markets. A zero rate is also applied to sales inside Jordan of certain food items, books, magazines, manure, farm tractors, other agricultural tools, and salt.

Goods exempt from sales tax include fish, eggs, animals, bread, water packed in less than 5 litres, trees and plants, fruits, vegetable oils, honey, tea, sugar, gold, money, potash, emergency and fire vehicles, electricity, and pharmaceutical products.

Services exempt from sales tax include the following:

- Air transport.
- Education.
- Disposal of sewage and waste.
- Public health and similar activities.
- Activities of religious organisations.
- Activities of social organisations.

Custom duties
Certain goods imported to Jordan are subject to custom duties. Custom duties vary depending on the type and the origin of imported goods, as prescribed by the Customs Tariff. The Customs Tariff is based on the Harmonised Commodity Description and Coding System (HS Nomenclature).

Excise tax
Excise tax is the special sales tax that is imposed on certain goods and services, including cement, iron used in construction, tobacco products, wines, spirits, cars, beer, fuel, and lubricants.
Property taxes
There is a property tax in Jordan that is paid annually, and the tax rate is determined by the municipality depending on the location and size of the property and, in case of buildings, depending on annual rental value.

Transfer property taxes
Transfer of property is subject to tax at a rate of 9% (registration fee at a rate of 5% and sale of property tax at a rate of 4%).

Stamp duty
An ad valorem stamp duty of 0.3% or 0.6% is levied.

Payroll tax
A company should withhold payroll tax from monthly salaries and benefits at rates ranging from 7% to 14%.

Social security tax
A social security tax is imposed on the employer and the employee by rates of 12.25% and 6.5% respectively on the monthly salaries and certain allowances in kind. The employer should report and withhold these contributions on a monthly basis.

Branch income
Operating branches of non-resident companies registered in Jordan are taxed based on their activities/business being carried out in Jordan at the prevailing corporate income tax rates. Non-operating branches of non-resident companies registered in Jordan are generally prohibited from carrying on any commercial activity in Jordan.

Income determination
Any income incurred in or from Jordan, regardless of the place of payment, shall be subject to tax. This includes, but is not limited to, income from:

- Professional services or activities.
- Interest, commissions, discounts, currency differences, deposit profits, and profits from banks and other legal resident persons.
- Royalties.
- Selling goods produced in Jordan, whether sold in Jordan or exported.
- Selling or leasing of movable properties located in Jordan.
- Leasing immovable properties located in Jordan and the income from key money.
- Selling or leasing intangible assets in Jordan, including goodwill.
- Insurance premiums due according to insurance and re-insurance agreements for risk in Jordan.
- All forms of telecommunication services, including international telecommunications.
- Transportation between Jordan and any foreign country.
- Service compensation gained by a non-resident person from Jordan for a service provided to any person if the activity or the work related to this compensation was carried out or the output of this service was used in Jordan.
- Any contract in Jordan, such as construction contracting, commercial agencies profits, and any other similar entities, whether their source is inside or outside Jordan.
Jordan

- Any other employment or business activity, or investment, which has not been exempted according to the provisions of the law.

The following shall be exempted from tax:

- The King’s allocations.
- Income of public and official institutions and municipalities, excluding its income from rent and key money.
- Income of unions, professional commissions, cooperation societies, and other societies legally registered and licensed from non-profit activities.
- Income of any religious, charity, cultural, educational, sports, or health institutions with a public character, not aiming to achieve profit and the income of charity awqaf (public endowment), and income from the Orphans Development Fund investment.
- Income of exempted registered companies according to the companies’ law, which is incurred from activities undertaken outside Jordan, except income derived from income sources subject to tax according to the provision of the law.
- Profits from stocks and dividends distributed by a resident to another resident, except profits of mutual investment funds of banks and financial companies.
- Capital gains incurred inside Jordan, other than profits from assets subject to depreciation.
- Income derived from inside Jordan from trading in dividends and stocks, bonds, equity loan, treasury bonds, mutual investment funds, currencies, commodities in addition to futures and options contracts related to any of them, except that incurred by banks, financial companies, financial intermediation and insurance companies, and legal persons who undertake financial lease activities.
- Income from trading in immovable properties located in Jordan, except the following:
  - Income incurred from such trade by a legal person.
  - Income incurred from building and selling real estate.
- Income derived by non-Jordanian resident investors from sources outside Jordan that are initiated from their investments of their foreign capital, returns, profits, and proceeds from their investments’ liquidation, returns, or selling of their projects, shares, or stocks after transferring them outside Jordan in accordance to the enacted Investment Law or any other law that will replace it.
- Compensation paid by insurance entities, other than what is paid as reimbursement for the loss of income from business activity or employment.
- Any income generated by banks and financial companies not operating in Jordan from banks operating in Jordan, such as deposit interest, commissions, and deposit profits from investment in interest-free banks and financial companies.
- Profits gained by re-insurance companies from insurance contracts concluded with insurance companies operating in Jordan.
- Income covered by double-taxation agreements (DTAs) concluded with the government, to the extent of that which is covered under these agreements.
- The income of public or private pension funds and savings funds and any other funds approved by the Minister shall not be subject to tax if this income is derived from the employees and employers contributions.
- Certain types of local origin goods and services’ exports outside Jordan may be totally or partially exempted from tax as set forth in regulations issued for this purpose.

**Inventory valuation**

Inventory is generally valued in accordance to the International Financial Reporting Standards (IFRS) accounting framework.
**Capital gains**
Capital gains are not taxable in Jordan, except for capital gains that are generated from depreciable assets and goodwill.

**Dividend income**
Dividend income received from a resident juristic person is not taxable in Jordan. However, dividend income received from a non-resident juristic person is subject to income tax.

**Foreign income**
Jordanian resident corporations are not subjected to income tax on their foreign income, except for foreign branches of Jordanian resident corporations, whereby 20% of the branch net income after taxes is subject to Jordanian corporate tax.

**Deductions**

**Depreciation and amortisation**
Depreciation and amortisation of fixed assets are determined using the straight-line method, provided that the provisions, procedures, and rates shall be defined by the depreciation regime issued for this purpose. Assets with a cost of less than 100 Jordanian dinars (JOD) shall be totally deducted in the tax period in which they were acquired.

**Goodwill**
Purchased goodwill can be amortised using the straight-line method, provided that the provisions, procedures, and rates shall be defined by a regulation issued for this purpose.

**Start-up expenses**
There is no clear provision in the enacted temporary Jordan income tax law to define the treatment of start-up expenses; however, these expenses can be accepted at the establishment year.

**Interest expenses**
Interest and Murabaha (profit-sharing) paid by banks or financial institutions are deductible.

Interest and Murabaha that are paid by any taxpayer other than banks and financial institutions and finance leasing companies are deductible, provided that the deduction shall not exceed the rates that are determined in the thin capitalisation rules (see Thin capitalisation in the Group taxation section).

**Bad debt**
Bad debts are deductible.

**Charitable contributions**
A person may deduct any amount paid during the tax period as a donation to any of the governmental departments, public or official institutions, or municipalities from the gross income in the period in which the payment occurred.

Any person may deduct subscriptions and donations paid in Jordan without any personal benefit, for religious, charitable, humanitarian, scientific, environmental, cultural, sport, and professional purposes if the Council of Ministers approves its
character. The deductible amount according to the provisions of this paragraph shall not exceed 25% of the taxable income after deducting what is provided for in the first paragraph above and before making this deduction.

**Fines and penalties**
Fines and penalties are not acceptable expenses for income tax purposes.

**Taxes**
Taxes and fees paid on taxable activities are deductible.

Foreign income tax paid for income earned from sources outside Jordan that was subject to tax under the provisions of the tax law is deductible.

**Other significant items**
Approved expenses, including the following, are deductible:

- Insurance premiums.
- Maintenance expenses for assets that were spent within the tax period, provided that such expenses do not exceed 5% of their value.
- Amounts paid as civil compensation under contracts concluded by the taxpayer for the purpose of carrying out taxable activities.
- Amounts paid by the employer for employees to the Social Security Corporation.
- Hospitality and travel expenses incurred by the taxpayer.
- Expenditures for employees’ medical treatment, meals during duty, travel, transport, and life insurance against work injuries or death.
- Marketing, scientific research, development, and training expenses.
- Expenses of prior tax periods that were neither defined nor final.

**Net operating losses**
Losses may be carried forward indefinitely, but the carryback of losses is not permitted.

**Payments to foreign affiliates**
A resident generally may claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates taking into account the transfer pricing regime and the applicable WHT.

**Group taxation**
Group taxation is not permitted in Jordan.

**Transfer pricing**
Any disposition transaction which is not based on arm’s length, is with parties that have mutual interests, and leads to a decrease in the taxable income is ignored, and the real profits are estimated according to the regular market value of the transactions.

Any illusionary or fake disposition transactions are ignored and the tax due is estimated as if there were no transactions.

**Thin capitalisation**
Interest and Murabaha that are paid by any taxpayer other than banks and financial institutions and finance leasing companies shall be accepted as a deduction, provided that the deduction shall not exceed the following rates of relative value (i.e. total debt to the paid capital or average owners’ equity, whichever is higher):
### Tax credits and incentives

Jordan has had tax reductions for selective sectors categorised by development zones. Generally, these have required pre-approval.

**Foreign tax credit**

Foreign tax credit treatment is not available in Jordan.

### Withholding taxes

**Dividends paid**

Dividends are not taxable in Jordan.

**Non-resident WHT**

With respect to services performed by a non-resident juristic or natural person, under the income tax law, “Amounts received or earned by the non-resident person from the Kingdom, which are derived from services provided to any person if the work or service related has been performed in the Kingdom or if the outcome of such services has been used in the Kingdom as well, is subject to tax in Jordan”.

The current WHT rate on services performed by a non-resident juristic or natural person is 7% of the payment.

**Resident WHT**

Resident juristic or natural persons that perform any services in Jordan are subject to a WHT on the services performed. The applicable WHT rate is the rate prevailing at the time the service is performed. The current WHT rate on services performed by a local service provider is 5% of the payment.

Some services are excluded from the 5% WHT regulation, provided that the service provider has an income tax identification number, including the following services:

- Shipping services and related brokerage services.
- Road transport services and related brokerage services.
- Air transport services.
- Financing lease services.
- Hotels and restaurants services.
- Clearance services.
- Programming services provided by the company.
- Hospital services provided by hospitals.
- Advertising services.
- Cleaning services.
- Security services.
- Training services provided by the company.
- Insurance activities services.
- Banking services provided by banks.
Communication activities and services provided by primary telecom companies (defined in the tax law as being communications companies individually licensed in accordance with the provisions of the communications law in effect and regulations and instructions issued pursuant thereto).

- Transportation and distribution of electric power services provided by the Electricity Company Plc.
- Contracting services implemented under contractor certified by the Jordanian Contractors Association.
- Public safety services.
- Maintenance services that include value of materials and goods and labour wages.
- Food processing services, correspondence, and transport and laundry provided to hospitals.
- Loading and unloading services.
- Services that are executed by a juristic person, excluding civil companies, and have a tax number (income and sales).
- Any other service approved by the Minister upon the recommendation of the General Director.

**Tax treaties**

Jordan has entered into income tax treaties with Algeria, Azerbaijan, Bahrain, Bulgaria, Canada, Croatia, the Czech Republic, Egypt, France, India, Indonesia, Iran, Iraq, South Korea, Kuwait, Lebanon, Libya, Malaysia, Malta, Morocco, the Netherlands, Pakistan, Palestine, Poland, Qatar, Romania, Sudan, Syria, Tunisia, Turkey, Ukraine, the United Kingdom, and Yemen.

Jordan has transportation agreements with many countries and is negotiating treaties with more countries.

**Tax administration**

**Taxable period**

A taxpayer’s due tax shall be computed on a calendar year basis.

A taxpayer who closes one’s accounts on a date other than the end of the calendar year may calculate the due tax according to the fiscal year, provided that prior approval shall be obtained from the General Director of the income tax department.

A taxpayer who commences activity within the first half of the calendar year shall compute the due tax for the period from the establishment date until the end of the calendar year.

A taxpayer who commences activity within the second half of the calendar year may compute the due tax for the period from the establishment date until the end of the next calendar year.

**Tax returns**

Taxpayers are obligated to file tax returns before the end of the fourth month following the end of the tax period, including details related to income, expenses, exemptions, and tax due. Tax returns are submitted by any of the following means approved by the department according to terms and procedures to be determined by instructions:

- Registered mail.
- Banks.
• Any licensed company to undertake the tasks of public or private mail post approved by the Council of Ministries upon the recommendation of the Minister.
• Electronic means.

The date of filing is considered to be the earlier of the date of receipt by the department, post seal, or deposit receipt at a bank or licensed company. In the case of sending electronic mail, implementation instructions have not yet been introduced to determine the approved date of submitting the same.

**Payment of tax**
The tax balance is due before the end of the fourth month following the end of the tax period.

A taxpayer who is carrying out business activities and has gross income in the previous tax period exceeding JOD 500,000 from these activities is required to remit two advance payments on the accrued income tax from these activities using the rates determined for each tax period mentioned in the following schedule. The advance payments are calculated according to the income tax in the financial statements presented to the income tax department for the concerned period. In the absence of the financial statements for this period, the income tax included in the immediate preceding tax declaration will be used to calculate the advance payments.

<table>
<thead>
<tr>
<th>Tax period</th>
<th>Rate on accrued income tax (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2012 and following years</td>
<td>37.5</td>
</tr>
</tbody>
</table>

The first advance payment is due within a period not exceeding 30 days from the last day of the first half of that income tax period.

The second advance payment is due within a period not exceeding 30 days from the last day of the second half of that income tax period.

**Fines and penalties**
Failure to pay tax on the assigned dates according to the provisions of the tax law will result in a delay fine at a rate of 0.4% of the value of the tax due or any deductible amounts for each full or partial week of delay.

If a taxpayer submits a tax return and pays the declared tax in a timely manner, but the declared tax is less than the actual amount due, a shortage fee for such differences will be imposed, as follows:

• 15% of the shortage if the difference exceeds 20% but less than 50% of the tax due by law.
• 80% of the shortage if the difference exceeds 50% of the tax due by law.

**Tax audit process**
The tax audit is likely to take place within one year from the date of filing the return.

**Statute of limitations**
The tax auditor may not audit a tax return after four years from the date of filing the return.
Jordan

Topics of focus for tax authorities
The Council of Ministers seeks to make substantial changes to the income tax rates, with a focus on the principle of progressive tax. The Council of Ministers have sent a draft amended tax law to the Legislation and Opinion Bureau for their input before sending it to the Parliament.
Significant developments

From 1 January 2013, certain amendments were introduced into the tax terms regulating activities of special economic zones (SEZs). The Kazakhstan Tax Code provides for preferential taxation for organisations carrying out businesses in the territory of SEZs. In particular, exemption is provided with respect to corporate income tax (CIT), value-added tax (VAT), land tax, levy for the use of land plots, and property tax for entities that qualify for SEZ forms.

Another significant change that was introduced is that Singapore was excluded from the list of countries with privileged taxation (the so-called 'black list') with effect from 2012.

It is also worth mentioning that Kazakhstan companies and individuals transited to new unified individual identification numbers in 2013, which were introduced to replace previously existing taxpayers’ registration and social security identification numbers.

Taxes on corporate income

The tax rate for corporations is 20% and is based on a calendar year. All Kazakhstan legal entities and branches of foreign legal entities are subject to CIT. Taxable income is determined as the taxpayer’s aggregate annual income less allowable deductions.

Resident companies are taxable in Kazakhstan on their worldwide profits, while non-resident companies operating through a permanent establishment (PE) in Kazakhstan are subject to Kazakhstan CIT only on the profits attributable to that PE.

Non-residents without a PE in Kazakhstan that receive income from sources in Kazakhstan are generally subject to income tax withheld at source of payment on Kazakhstan-source income (please see the Withholding taxes section for more information).

Reduced CIT rates

A reduced CIT rate of 6% applies to the qualified agricultural income of legal entities producing agricultural products.

In addition, taxpayers operating in SEZs may enjoy full exemption from CIT, land tax, and property tax, if certain statutory requirements established for such benefits are met (see the Tax credits and incentives section for more information).
Kazakhstan

**Excess profit tax (EPT)**
EPT rates are progressive and range from 0% to 60%. The tax base is comprised of the portion of net income of subsurface users exceeding 25% of deductions for EPT purposes. Subsurface users may include asset acquisition costs, capital costs, and losses (with certain limitations) as deductions.

**Local income taxes**
There are no local income taxes in Kazakhstan.

**Corporate residence**
Generally, Kazakhstan incorporated companies or other legal entities that have their place of effective management located in Kazakhstan are treated as Kazakhstan tax residents.

**Permanent establishment (PE)**
Non-resident legal entities having business activities in Kazakhstan may create a PE in the following cases:

- **‘Fixed place PE’**: a non-resident enterprise carries on business activities in Kazakhstan through a fixed place, including, but not limited to, through a place of management.
- **‘Services PE’**: a non-resident enterprise renders services in Kazakhstan through employees or other personnel engaged by the non-resident for such purposes, provided that these activities continue for more than 183 days within any consecutive 12-month period for the same or connected projects.
- **‘Construction PE’**: a construction site, in particular a shop or an assembly facility, performance of projecting work, forms a PE, notwithstanding the timing of performing operations.
- **‘Agency PE’**: a non-resident enterprise carries on business activities in Kazakhstan through a dependent agent. A dependent agent is an individual or legal entity that meets all of the following criteria simultaneously:
  - Has the contractual authority to represent the non-resident’s interests in Kazakhstan and makes use of this authority by acting and signing (negotiating) contracts on behalf of the non-resident.
  - The business is carried on outside the activity of either a customs broker or professional participant of the securities market or other brokerage type of business (except for activity as an insurance broker).
  - Carries on activities that are not limited to those of a preparatory and auxiliary nature.

**Other taxes**

**Value-added tax (VAT)**
The current VAT rate is 12%. This tax is applicable to the sales value of products, works, and services, as well as imports. Exports of goods are taxed at 0%. There is a list of goods, works, and services exempt from VAT (e.g. financial services provided by financial institutions, financial leasing services, notary and advocacy services, operations with financial securities and investment gold).

Goods and services are subject to VAT if they are deemed to be supplied in Kazakhstan under the place of supply rules.
VAT refunds are generally available with respect to excess input VAT.

The VAT reporting period is the calendar quarter.

**Customs duties**

Customs duties apply to goods imported to the Customs Union countries from third countries. The customs duties rates are established either based on a percentage (in general ranging between 0% and 30%; higher rates exist for certain goods) of the customs value of goods or in absolute terms in euros.

Goods of the Customs Union countries should be generally exempt from Kazakhstan customs duties.

In addition to membership in the Customs Union, Kazakhstan concluded a number of bilateral and multilateral Free Trade Agreements with the Commonwealth of Independent States (CIS), which provides for exemption of goods circulated between the CIS member states from customs duties, if certain conditions are met.

Kazakhstan is not yet a World Trade Organization (WTO) member.

**Customs fees**

A customs processing fee is assessed at 60 euros (EUR) for the main page of a customs declaration plus EUR 25 for each supplemental page.

**Excise taxes**

Excise taxes apply to the sale and import of crude oil, gas condensate, petrol/gasoline (excluding aviation fuel), diesel fuel, spirits and alcoholic beverages, beer, tobacco, and passenger cars.

<table>

* Kazakhstani tenge

**Property tax**

Property tax is assessed annually at a general rate of 1.5% of the average net book value of immovable property.

**Land tax**

Entities and individuals that own land plots (or land share in cases of commonly shared ownership of land plots) must pay land tax annually. Land tax rates vary based on the purpose for which the land is used as well as the size and quality of the land.

**Transfer taxes**

There are no transfer taxes in Kazakhstan.

**Stamp taxes**

There are no stamp taxes in Kazakhstan.
Kazakhstan

**Vehicle tax**
The vehicle tax rate is based on monthly calculation indices and determined in accordance with the type of vehicle, engine volume, operation period of the vehicle (aircraft only), and other factors.

**Social tax**
Employers must pay social tax at the rate of 11% of gross remuneration (salaries and certain benefits provided) of all employees (local and expatriate). A deduction is available for obligatory pension contributions.

**Mineral extraction tax**
The mineral extraction tax applies to the monetary value of extracted volume of crude oil, gas condensate, natural gas, minerals, and groundwater.

The tax is calculated based on the value of the extracted content, which is computed by applying average global prices to the extracted volume (adjusted for content). The determination of average global prices is based on the list of publications that are considered official sources for computation of mineral production tax (Platts Crude Oil Marketwire and Crude Argus).

Currently, the tax rates for crude oil and gas condensate range from 5% to 18%, depending on the accumulated production volume for the calendar year. For hydrocarbons, rates can be reduced by 50% if they are supplied to domestic refineries on the basis of a sale/purchase agreement or tolling agreement.

The tax rate for natural gas is set at 10%. For domestic sales of natural gas, tax rates range from 0.5% to 1.5%.

Tax rates for minerals that have undergone initial processing (except for widespread minerals) and for coal vary between 0% and 22%.

**Branch income**
The net income of branches of foreign legal entities, after CIT at 20%, is subject to a branch profits tax at a rate of 15%, which may be reduced under an applicable double tax treaty (DTT). As such, the effective tax rate for the income of branches of foreign legal entities equals 32% if there is no reduction under a DTT.

**Income determination**
Kazakhstan legal entities are taxable on aggregate annual income earned worldwide. Non-resident legal entities, carrying out business activities through a PE in Kazakhstan, are taxable on income attributed to the activities of that PE. All taxpayers must apply the accrual method for recognition of income.

**Inventory valuation**
For tax purposes, inventory is valued in accordance with International Financial Reporting Standards (IFRS) and Kazakhstan financial accounting legislation. As such, permitted inventory valuation methods include first in first out (FIFO), weighted average, and specific identification methods.
Capital gains
Capital gains are subject to ordinary CIT rates. An exemption is available for capital gains realised from the sale of shares and participation interests in Kazakhstan legal entities or consortiums that are not engaged in subsurface activities.

Dividend income
Dividend income of a Kazakh resident company on inbound dividends is exempt from Kazakh taxation. Dividends from a Kazakhstan resident company to another Kazakhstan resident company are exempt from taxation, except for dividends paid by certain types of investment funds.

Interest income
Interest income should be included in the aggregate annual income of a taxpayer and taxed at the 20% CIT rate.

Foreign exchange gain
Foreign exchange gain should be determined in accordance with the provisions of IFRS and Kazakhstan financial accounting legislation. The excess of foreign exchange gain over foreign exchange loss should be included in the aggregate annual income of a taxpayer.

Foreign income
Foreign income is subject to ordinary CIT.

There are no provisions for tax deferrals in Kazakhstan.

For additional information, please refer to Controlled foreign companies (CFCs) in the Group Taxation section.

Deductions
Allowable deductions generally include expenses associated with activities designed to generate income, unless specifically restricted for deduction by tax legislation. All expenses require supporting documentation.

Depreciation and depletion
Tax depreciation is calculated using the declining-balance method at depreciation rates ranging from 10% to 40%, applied to the balances of four basic categories of assets:

- Buildings and facilities (except for oil and gas wells and transmission facilities): 10%.
- Machinery and equipment (except for machines and equipment for oil and gas production, and also computers and equipment for information processing): 25%.
- Computers and equipment for information processing: 40%.
- Fixed assets not included into other groups, including oil and gas wells, transmission equipment, oil and gas machinery and equipment: 15%.

Goodwill
There are no special provisions in the Kazakhstan Tax Code with respect to deductibility of goodwill expenses.
Kazakhstan

**Start-up expenses**
The Kazakhstan Tax Code does not specifically address deductibility of start-up expenses, but, generally, expenses incurred in relation to business activities and aimed at earning revenue occurring at start-up should be deductible.

**Interest expenses**
Interest paid to unrelated third parties and credit partnerships created in Kazakhstan are deducted in full. For information about taxation of interest paid to related parties, please refer to Thin capitalisation in the Group taxation section.

**Bad debt**
Amounts of receivables that were not paid within three years are to be recognised as bad debt expenses. Such expenses can be deducted in full by a taxpayer, provided that (i) these receivables are reflected in the books of a taxpayer and (ii) proper supporting documents are in place.

**Charitable contributions**
Charitable contributions are entitled to decrease taxable base but are capped at 3% of the company's annual taxable income.

**Foreign exchange loss**
Foreign exchange loss should be determined in accordance with the provisions of IFRS and Kazakhstan financial accounting legislation. The excess of foreign exchange loss over foreign exchange gain is allowed for deduction.

**Fines and penalties**
Generally, deductions are available for forfeits, fines, and penalties that are not payable to the state budget.

**Taxes**
Taxes remitted to the state treasury of Kazakhstan are deductible, except for the following:

- Taxes excluded prior to the calculation of the aggregate annual income.
- Income taxes paid in Kazakhstan and other countries.
- Taxes paid in preferential tax jurisdictions.
- Excess profit tax.

**Net operating losses**
Net operating losses may be carried forward for up to ten years. Loss carryback is not permitted under Kazakhstan tax legislation.

**Payments to foreign affiliates**
Payments to foreign affiliates are deductible for CIT purposes if the payments are intended to generate income, are supported by documentation, and comply with Kazakhstan transfer pricing law.

**Group taxation**
Kazakhstan tax law does not permit group taxation.
Transfer pricing
Under Kazakhstan transfer pricing law, both customs and tax authorities have the right to monitor and adjust prices used in cross-border and certain domestic transactions when prices are perceived to deviate from market prices, even if such transactions are with unrelated parties. If the authorities adjust prices, the re-assessed liability will include taxes, duties, penalty interest, and fines to the state budget.

Transfer pricing rules impact the following transactions:

- International commercial transactions.
- Domestic transactions that directly relate to international commercial operations where:
  - the sale relates to a subsurface use contract
  - one of the parties has tax preferences, or
  - one of the parties has losses for two years prior the year of the transaction.

Thin capitalisation
Deduction of interest paid to related parties, to unrelated parties under related parties warranties, or to parties registered in a country with privileged taxation depends on the borrower’s capital structure; such that deductible interest will be limited with reference to an ‘acceptable’ proportion of debt-to-equity (7:1 for financial institutions, 4:1 for all other entities). The list of jurisdictions with privileged taxation, the so called ‘black list’ established by the government, includes 61 jurisdictions (see the Kazakhstan summary at www.pwc.com/taxsummaries for a current list).

Controlled foreign companies (CFCs)
Under the CFC rules, if a Kazakhstan legal entity has 10% or more of direct or indirect ownership in the share capital or voting rights in a non-resident company, registered or located in a country with privileged taxation (see above), the legal entity is subject to Kazakhstan CIT on the portion of the undistributed profits from the non-resident company.

Tax credits and incentives
Foreign tax credit
In general, the Kazakhstan Tax Code allows taxpayers to credit the foreign income taxes paid against the income taxes payable in Kazakhstan, provided the documents confirming the payment of such taxes are available. However, a tax credit may not be granted in certain cases (e.g. for taxes paid in countries with privileged taxation).

Investment incentives
Investment incentives are available to certain Kazakhstan legal entities that fit certain criteria and possess objects (e.g. certain fixed assets), for which investment incentives may be applied. Generally, the investment incentives allow companies to fully deduct, for CIT purposes, the cost of the investment objects and the cost associated with their reconstruction and modernisation either at once or within the first three years of their use.

Based on the Investment Law, incentives are granted under an investment contract between the government and companies and focus on priority sectors of the economy, as determined by the government.
Special economic zones (SEZs)
Currently, the following SEZs have been established in Kazakhstan:

• ‘Astana, the New City’ in Astana (the expiry date is in 2027).
• ‘Aktau Sea Port’ in Aktau (the expiry date is on 1 January 2028).
• ‘Ontustik’ in Sairam district of South-Kazakhstan region (the expiry date is on 1 July 2030).
• ‘National Industrial Petrochemical Park’ in Atyrau region (the expiry date is on 31 December 2032).
• ‘Burabai’ in Akmola region (the expiry date is on 1 December 2017).
• ‘Park of Innovative Technologies’ (the expiry date is 1 January 2028).
• ‘Saryarka’ in Karaganda region (the expiry date is 1 December 2036).
• ‘Horgos - the eastern gates’ in Almaty region (the expiry date is 2035).
• ‘Pavlodar’ in Pavlodar (the expiry date is 1 December 2036).

In order to enjoy the incentives available in SEZs, a legal entity must meet the following requirements:

• It must be registered by the tax authorities in the territories of SEZs.
• It must have no structural subdivisions beyond the boundaries of the territories of the SEZs.
• 90% of aggregate annual income must constitute income earned from activities in the SEZ consistent with the objectives of the SEZ’s formation.

The general incentives available for legal entities in SEZs are:

• CIT: 100% reduction.
• Land tax: 0% rate.
• Property tax: 0% rate.

Withholding taxes
Kazakhstan-source income of non-residents and the proceeds from the sale of shares in subsurface users are subject to withholding tax (WHT) at the rates shown in the table below.

A non-resident legal entity is exempt from dividend WHT if:

• the holding period of shares or participation interest is greater than or equal to three years, and
• 50% or more of the charter capital value of the entity paying the dividends is not the property of a subsurface user.

<table>

Notes

1. 5% if the beneficial owner is a company owning, directly (or indirectly in case of Canada and the United Kingdom), at least 10% of the voting power of the company paying the dividends.

2. 5% (10% in case of Moldova) if the beneficial owner is a company that directly holds at least 25% of the capital of the paying company.

3. 10% if the beneficial owner is a company, directly or indirectly, holding at least 20% of the capital of the paying company.

4. 5% if the beneficial owner is a company (other than a partnership) that owns not less than 10% of the capital of the paying company.

5. 5% if the recipient is a company (other than a partnership) that directly owns not less than 20% of the capital of the paying company.

6. 10% if the actual owner is a legal entity that owns not less than 30% of the authorised capital of the legal entity paying the dividends.

7. 10% if the beneficial owner is a company that directly holds at least 30% of the capital of the company paying the dividends.

8. 0% if dividends are paid in consideration of an investment of at least 50 million United States dollars (USD) in the paying company.

9. 0% if the company receiving the dividends holds, directly or indirectly, at least 50% of the capital of the paying company and has made an investment in the company paying the dividends of at least USD 1 million, which investment is guaranteed in full or insured in full by the government of the first contracting state, the central bank of that state, or any agency or instrumentality (including a financial institution) owned or controlled by that government, and has been approved by the government of the other contracting state.

10. 5% (or 12.5% in case of Pakistan) if the beneficial owner is a company that directly owns (or indirectly in case of the Netherlands and Pakistan) at least 10% of the capital of paying company.

11. 5% if the beneficial owner is a company owning, directly or indirectly, for the period of six months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting power of the company paying the dividends.

12. 5% if the beneficial owner is a company (other than a partnership) that directly owns not less than 15% of the capital of the paying company.

Tax administration

Taxable period

The tax year in Kazakhstan is the calendar year.

Tax returns

Annual CIT declarations are due by 31 March of the year following the tax year-end. However, a taxpayer may be granted a 30 calendar-day extension of the deadline, upon request.

Certain taxpayers are required to submit their estimated calculation of monthly advance payments of CIT.
The deadline for other tax returns is the 15th calendar day of the second month following the reporting period. However, a taxpayer may be granted a 30 calendar-day extension of the deadline, upon request.

**Payment of tax**
For CIT, advance payments are due every 25th day of the month. Taxpayers with aggregate annual income during the tax period preceding the previous tax period of less than 325,000 times the amount of the monthly calculation index established for the relevant financial year (approximately USD 3.72 million) are exempt from the obligation to calculate and pay CIT advance payments. Payment of any outstanding CIT liabilities is required within ten calendar days following submission of the annual CIT declaration (i.e. 10 April).

Most other taxes are payable by the 25th day of the second month following the end of reporting period.

**Fines and interest penalties**
Interest penalties are assessed on late tax payments at 2.5 times the Kazakhstan National Bank refinancing rate. As of 6 August 2012, the National Bank refinancing rate was set at 5.5% per annum.

Substantial fines are imposed for understatement of tax liabilities. Generally, the fines amount to 50% of the understated tax.

For advance CIT payments, an administrative fine of 40% applies to understated advance tax payments compared with the final declared CIT, provided the understated amount is greater than 20% of the final declared amount.

If a taxpayer is deemed to have concealed taxable income, a fine of 150% of the concealed amount may be assessed.

**Tax audit process**
Kazakhstan tax authorities have the right to conduct regular tax audits (at least once a year). Generally, there are two types of audits:

- Planned tax audits. The list of entities that fall under tax audit is published semi-annually on the official website of the Kazakh government.
- Unplanned tax audits. Tax authorities may conduct unplanned tax audits. Information about misstatements in tax returns or any other discrepancy may trigger an unplanned tax audit.

**Statute of limitations**
The statute of limitations for tax purposes in Kazakhstan is five years. For taxpayers operating under subsurface use contracts, the tax authorities maintain the right to assess or revise the assessed amount of excess profit tax and other taxes and obligatory payments to the budget, where a methodology of calculation uses one of the following indices: internal rate of return (IRR) or internal revenue rate or R-factor (earning yield), during the effective period of a subsurface use contract and five years after the end of the effective period of a subsurface use contract.

**Topics of focus for tax authorities**
Tax audits may be comprehensive or thematic. Comprehensive tax audits cover all applicable taxes, while thematic tax audits may cover only some specific tax liabilities. As a rule, Kazakh tax authorities are form, rather than substance, driven during audits.
Kazakhstan

Other issues

Accounting system
Kazakhstan legal entities should maintain accounts and produce financial statements in accordance with IFRS or national accounting standards (depending on the size of the company and other factors). In most cases, tax treatment follows accounting treatment.
Significant developments

The Finance Act 2012 introduced a few amendments to the Income Tax Act and the Customs and Excise Act.

Excise duty on money transfer

The Finance Act 2012 extends the excise duty to money transfers and fees charged by financial institutions. Going forward, cellular phone service providers who offer money transfer services and other financial services providers are expected to charge excise duty on the fees charged for money transfer services.

New withholding tax (WHT) introduced in the oil & gas and mining sector

In Kenya, a new WHT on gross proceeds has been introduced based on “the amount or value of the consideration from the sale of property or shares in respect of oil companies, mining companies, or mineral prospecting companies”. The sale of property or shares “includes the assignment of rights, sale of companies and businesses, and takeovers or any other non inventory asset”.

The amendment seeks to tax the gross proceeds from the sale of property or shares without any deduction of attributable costs, which makes the incidence of the WHT more punitive than would have been the case were the amendment to be in the nature of a capital gains tax. A final WHT rate of 10% and 20% of the gross proceeds is chargeable on residents and non-residents, respectively.

This amendment is likely to impact negatively on this emerging sector, owing to the fact that:

- No costs are taken into account in computing the tax on the proceeds. This is not equitable and is indeed discriminatory if one compares companies in oil & gas and mining with other companies, which are not taxed because capital gains tax was suspended in 1985.
- It creates confusion, as a provision in the Income Tax Act that deals with the taxation of gains or profits of petroleum companies already exists.
- Given that Kenya is still in the exploratory phase of the extractive industry, the amendments may significantly reduce the number of transactions involving transfer of property and shares (which are intended to share the significant risks that oil & gas and mining companies are faced with) and may make investment in the extractive sector less attractive for Kenya.
- Kenya’s ability to attract the large extractive industry players and associated service providers will be reduced since the tax costs of effecting the transactions could be punitive.
Taxes on corporate income

Resident companies are taxable in Kenya on their worldwide profits, while non-resident companies are subject to Kenya corporate income tax (CIT) only on the trading profits attributable to a Kenyan permanent establishment (PE).

The normal rate of CIT for resident companies, including subsidiary companies of foreign parent companies, is 30%. The CIT rate for branches of foreign companies and PEs is 37.5%.

Industry-specific rates

There are special provisions for non-resident shipping companies and airlines; non-residents providing broadcast, internet, and messaging services; and non-resident petroleum industry subcontractors providing exploration and production services in Kenya.

</tr>
</tbody>
</table>

Local income taxes

There are no local or provincial taxes on income, as all taxes are collected by the central government.

Corporate residence

Kenya-incorporated companies are treated as Kenyan-tax resident. Additionally, companies incorporated overseas are also treated as Kenya resident if their “management and control is exercised in Kenya in a particular year of income under consideration”. A company may also be declared a tax resident in Kenya pursuant to a declaration in a legal notice by the Minister.

Permanent establishment (PE)

A business carried on in Kenya through a fixed place of business gives rise to a PE for branch purposes, as does a building site, or a construction or assembly project, that has existed for six months or more. Note that the definition of a PE may be modified by a double tax agreement (DTA).
Other taxes

Value-added tax (VAT)

VAT is levied on the supply of taxable goods and services in Kenya, as well as on the importation of taxable goods and services into Kenya.

The following VAT rates apply in Kenya:

<table>
<thead>
<tr>
<th>Activity</th>
<th>VAT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard rate on all goods and services that are neither exempt nor zero-rated</td>
<td>16</td>
</tr>
<tr>
<td>Electricity, diesel oil, and residual fuel oils</td>
<td>12</td>
</tr>
<tr>
<td>Export of goods and services, certain other goods and services</td>
<td>0</td>
</tr>
</tbody>
</table>

Certain goods and services are designated as exempt from VAT. Exempt supplies do not count towards the registration threshold (see below), and the related input VAT is not recoverable.

Zero rating applies to the export of goods or services. The supply of goods or services to certain designated persons and projects are also zero-rated.

The threshold for VAT registration is taxable supplies of 5 million Kenyan shillings (KES) per year. Registered persons must record their turnover using an approved electronic tax register or signature device. Only registered persons may recover input tax. An input tax credit is not available for several items, such as non-commercial vehicles, office furniture, and hospitality and entertainment services. An excess input tax credit may be carried forward or refunded, subject to certain conditions.

Import (customs) duty

Import duty is levied under the East African Community Customs Management Act. Imports of goods are generally subject to import duty of 0% for raw materials and capital goods, 10% for intermediate goods, and 25% for finished goods. Enterprises established in an EPZ are exempt from customs duty on machinery and inputs for exported products. Where raw materials that are not subject to 0% import duty are used to manufacture goods for export outside the East African Community, one may apply for remission under the import duty remission scheme. This is subject to a requirement for proof of export and execution of a bond.

Excise duty

Excise duty is imposed on the manufacture or importation of certain commodities and services, such as mobile phone services, bottled water, soft drinks, cigarettes, alcohol, perfumes, fuels, and motor vehicles, at varying rates. There are various classes for each category and commodity where different rates of duty apply.

</tr>
</tbody>
</table>

### Notes

1. Manufacturers who use plastic bags for packing their products will now be entitled to claim excise duty paid on their plastic bags from the Kenya Revenue Authority (KRA).

### Stamp Duty

Stamp duty is payable on transfer of properties, leases, and securities. For other properties, other rates of stamp duty apply as specified in the Schedule to the Stamp Duty Act. The rates of stamp duty are shown below:

<table>
<thead>
<tr>
<th>Activity</th>
<th>Stamp Duty Rate</th>

</tr>
<tr>
<td>Period over three years</td>
<td>2% of annual rent</td>
</tr>
</tbody>
</table>

* Transfer of quoted securities is exempt.
Land purchased for expansion and development of schools is exempt from stamp duty, provided the land does not revert to any other use and approval has been obtained from the relevant authorities.

Compensating tax
Where a company pays dividends out of profits that have not been subject to CIT, the company will be liable to pay a compensating tax. The compensating tax rate is 42.8%. The aim of this tax is to ensure that all dividends are paid out of profits that have suffered CIT.

Turnover tax for small business taxpayers
A resident taxpayer whose annual gross turnover does not exceed KES 5 million will be taxed at the rate of 3% per quarter of one’s turnover. In such a case, the taxpayer will not be required to register for VAT. Turnover tax does not apply to rental income, management or professional fees, training fees, income subject to WHT as a final tax, and income of incorporated companies. Loss making businesses are allowed to make an election to be exempted from turnover tax. A written application for exemption has to be made to the Commissioner, and there is a procedure to be followed.

Business permit
Every person who carries on a business in Kenya is required to apply for a business permit from the relevant local authority. The business permit is usually based on the size of one’s business and is renewable on an annual basis.

Catering levy
The catering levy is payable to Catering Levy Trustees by hotels and restaurants at a rate of 2% of turnover.

National industrial training levy
All employers are required to pay to the Directorate of Industrial Training a monthly levy of KES 50 per employee. The only exemption is for employers remitting the catering levy.

Advance tax on motor vehicles
Advance tax is payable at varying rates per year on commercial vehicles and is creditable against CIT for the year.

Fringe benefit tax (FBT)
The FBT is payable on interest-free or low-interest loans granted to employees. FBT is paid by the employer, whether exempted from tax or not, at the resident CIT rate of 30%. The benefit is the difference between actual interest charged and the interest computed using the Commissioner’s prescribed rate published quarterly. The directors and employees are not personally taxed on the benefit.

Employers’ national social security contributions
Employees are also obligated to contribute monthly to the National Social Security Fund (NSSF) a standard amount of KES 200, with an equal amount of contribution from the employer.

Local government rent and rates
Rent and rates are levied annually on properties in Kenya, and the rateable value that is payable to the local authority or central government shall vary in each county based on various forms of ratings, such as area rate, agricultural rental value, or site value.
Kenya

**Branch income**

The profit of a PE is taxed at the branch income tax rate of 37.5%, but there is no further taxation on the distribution of branch profits. However, there are certain restrictions with respect to costs paid to the head office.

**Income determination**

**Inventory valuation**

Inventory is stated at the lower of cost or net realisable value, with the exception of biological assets, whose value is prescribed by the Commissioner.

**Capital gains**

Taxation of capital gains was suspended in 1985.

**Dividend income**

Kenya-source dividends are taxable income in Kenya unless the recipient is a Kenya resident company holding 12.5% or more of voting power of the company paying the dividend. However, for companies holding less than 12.5% of the votes, and other resident taxpayers, the 5% WHT is the final tax. Dividends paid to non-residents and any overseas holding company attract 10% WHT. There are special provisions in relation to dividends received by financial institutions, including insurance companies.

**Stock dividends**

Stock dividends issued in a ratio not proportionate to shareholding of the existing equity are considered as taxable dividends to the extent of the disproportionate increase in the value of the ownership of the company.

**Interest income**

Interest income is generally included in the determination of taxable income.

**Foreign income**

In principle, Kenya tax profits on a worldwide basis, and profits received from non-Kenya branches are computed and taxed in the normal way for Kenya tax resident companies. However, Kenya tax liability will generally be reduced by credit for local direct taxes paid, either under a treaty or via the Kenya’s unilateral relief rules. Companies are not allowed to defer income until the income is repatriated or remitted to Kenya.

**Deductions**

The general principle in Kenya is that expenses are deductible if they are incurred wholly and exclusively to generate taxable income.

**Depreciation and depletion**

No deduction is allowed for accounting depreciation or impairment. However, capital allowances are permitted at varying rates (on a straight-line basis) for certain assets used for business purposes, including buildings and machinery used in manufacturing, industrial buildings and hotels, machinery and plant, agricultural works, and mining.

* Different percentages apply for previous years.

**Goodwill**
Cost acquisition of goodwill and amortisation of goodwill are not deductible since they are capital in nature.

**Start-up expenses**
There is a specific provision allowing the deduction of start-up expenses, provided that the required conditions have been met.

**Interest expenses**
A deduction for interest is allowed only to the extent that the borrowings are used for the purpose of trade. Where a non-resident person controls a company alone or with four or fewer other persons, interest restriction or ‘thin capitalisation’ rules apply (see Thin capitalisation in the Group taxation section).

**Bad debts**
Bad debts are deductible in the year in which it is evident that the debt has become irrecoverable. Detailed rules apply for making this determination.

**Charitable contributions**
Donations to charities and for certain public works are deductible, subject to certain conditions.
Fines and penalties
Generally, fines and penalties are not deductible as they are not considered to be expenses incurred for producing profits chargeable to tax.

Taxes
Kenyan income taxes are not deductible while computing income tax of a person. However, foreign income taxes incurred are generally deductible as an expense if tax credit relief is not available under a DTA.

Net operating losses
Losses calculated under the tax rules may be carried forward against income from the same source for a maximum of five years, including the year in which the losses arise. Losses cannot be carried back, except for petroleum companies, where losses can be carried back for three years from the year of income in which the petroleum company ceased permanently to produce petroleum.

Payments to foreign affiliates
Transfer pricing rules based on Organisation for Economic Co-operation and Development (OECD) principles apply to transactions with foreign affiliates (both companies and branches/PE). Additionally, there are restrictions on the deductibility of expenses incurred outside of Kenya by non-residents with a Kenyan PE. Transfer pricing is not limited to anti-avoidance.

Group taxation
Each company in a group is taxed as a separate entity in Kenya.

Transfer pricing
A company that has related party transactions is required to ensure such transactions are at arm's length. The company is therefore required to prepare a transfer pricing policy to justify the pricing arrangements. The Commissioner is allowed to adjust the prices if they do not conform to the arm's-length principle. The policy should be prepared and submitted to the KRA upon request. The 2012 Finance Act has amended the Transfer Pricing Rules to allow the Commissioner to specify conditions and procedures on the application of the methods for determining the arm's-length price.

Thin capitalisation
In Kenya, a company is thinly capitalised if all of the following occur:

- The company is in control of a non-resident person alone or together with four or fewer persons.
- The company is not a bank or financial institution.
- The highest amount of all loans held by the company at any time exceeds the sum of three times the revenue reserves (including accumulated losses) and the issued and paid up share capital of all classes of shares of the company.

A company that is thinly capitalised cannot claim a deduction on the interest expense incurred by the company on loans in excess of three times the sum of revenue reserves and issued and paid up capital of all classes of shares of the company. The company also cannot claim a deduction for any foreign exchange loss realised by the company with respect to any loans from its shareholders in the period that the company remains thinly capitalised.
Tax credits and incentives

Foreign tax credit
For business income, there is no relief for foreign tax paid except as provided for by a DTA (if applicable) between Kenya and the other country.

Investment deduction
Qualifying investments exceeding KES 200 million incurred outside Nairobi or the municipalities of Mombasa or Kisumu are allowed an investment deduction of 150%. All other qualifying investments are allowed a 100% investment deduction in the year the asset is put into service.

Export processing zone (EPZ)
Companies located in an approved EPZ, principally to export goods, are taxed at a 0% CIT rate for ten years from its commencement and at a rate of 25% for the next ten years.

Listed companies
Companies listed on the Nairobi Stock Exchange are entitled to reduced rates of income tax for a period depending on the proportion of share capital listed (see the Taxes on corporate income section for the rates).

Withholding taxes
WHT is levied at varying rates (3% to 30%) on a range of payments to residents and non-residents. Resident WHT is either a final tax or creditable against CIT. Non-resident WHT is a final tax.

Notes

1. Interest paid by the government and the Central Bank of Kenya is tax-exempt.
2. The rate is 12.5% for management and professional fees.
3. No Kenya tax is due if subject to tax in Zambia.
4. The rate is 17.5% for management and professional fees.
5. Management and professional fees subject to normal WHT rates.

Where the treaty rate is higher than the non-treaty rate, the lower rate applies.

**Tax administration**

**Taxable period**
A company has discretion to determine its corporate tax year, provided it is a 12-month period. However, any changes in corporate tax year-end must be approved by the Commissioner of the KRA.

**Tax returns**
Resident companies and PEs of non-resident companies must file a self-assessment tax return accompanied by audited or certified accounts annually. The return is due within six months following a company's year-end.
**Payment of tax**
Instalment tax payments must be made quarterly during the year based on the lower of 110% of the previous year’s liability or an estimate of the current year’s liability. Agricultural companies are required to pay estimated tax in two instalments of 75% and 25% during the year. Any balance of tax at the end of the year must be paid within four months of the financial year-end.

**Payment of agency taxes**
The tax withheld from payments must be paid by the 20th day of the month following the month in which the deduction is made.

**Penalties for non-compliance**
If a self-assessment tax return is not submitted by the due date, a penalty of 5% on the unpaid tax for the year may be imposed, subject to a minimum of KES 10,000. Failure or late submission of an EPZ company return will be subject to a penalty of KES 2,000 per day for as long as the failure continues.

A penalty of 20% and interest at 2% per month are imposed on underestimation and late payment of instalment tax and any balance of tax. Interest is charged only on the principal tax due.

Failure to make a deduction or to remit the WHT deducted attracts a penalty equal to 10% of the amount of tax involved (subject to a maximum of KES 1 million) and accrues interest at 2% per month.

**Tax audit process**
There is no prescribed audit process, as an audit can be triggered by any factor as determined by the revenue authority. Generally, tax audits should be carried out after every two to four years. The audit or inspection will commence with a request from the revenue authority for the taxpayer to make available any such records or information as may be required.

**Statute of limitations**
The tax authorities must commence an audit before the expiry of seven years after the end of a year of income. The revenue authorities may go back past seven years where fraud is suspected. There is no time limit for completing tax audits. However, they are normally completed within a reasonable time, especially if there are no major disputes.

**Topics of focus for tax authorities**
The issues that are often subject to close scrutiny by the tax authority include related-party transactions and transaction taxes (e.g. VAT).
Significant developments

The new government led by President Park Geun-hye since February 2013 is really centred around the following four pillars: (i) job creation, (ii) improving the quality of life, (iii) ensuring fairness; and (iv) exercising vigilant risk management in managing the economy. In this regard, incentives will be expanded for foreign direct investment resulting in the creation of jobs. From a tax perspective, the new government is focused on:

- Bringing Korean tax law more in-line with Organisation for Economic Co-operation and Development (OECD) guidelines and recognised international tax principles. For example, changes are made to the way transactions between a head office and its branch are treated and the introduction of transfer pricing methods to how guarantee fees are treated. Another example of where the Korean tax law has been changed to bring it more into line with OECD guidance is that a new arm’s-length standard has been introduced for guarantee fees paid by Korean residents and foreign related parties.
- Trying to stimulate investment in specific sectors such as research and development (R&D), small and medium sized enterprises (SME), and service industries. Existing tax credits to promote job-creating investment, SME investment, or SME start-ups will be extended to ‘creative industries’, such as software, film, game, tourism, consulting, health and medical care, and MICE (Meeting, Incentive, Conference, Events & Exhibition). R&D tax credits will also be available for creative industries.
- Attempting to increase tax revenues to fund its election pledges to increase government spending for welfare. While the focus will be taxing the underground economy, the pressure to collect tax could very well manifest in the most traditional form of tax compliance enforcement, namely audits.

Taxes on corporate income

The basic Korean corporate income tax (CIT) rates for fiscal year 2012 and thereafter are 10% on the first 200 million Korean won (KRW), 20% for the tax base between KRW 200 million and 20 billion, and 22% for the excess.

Resident corporations are taxed on their worldwide income, whereas non-resident corporations with a permanent establishment (PE) in Korea are taxed only to the extent of their Korean-sourced income. Non-resident corporations without a PE in Korea are generally taxed through a withholding tax (WHT) on each separate item of income.

Local income tax (resident tax surcharge)

A resident tax surcharge of 10% on CIT liability is assessed each year.
**Agriculture and fishery surtax**
When a corporate taxpayer claims certain tax credits or exemptions under the Special Tax Treatment Control Law (STTCL), a 20% agriculture and fishery surtax is levied on the reduced CIT liability.

**Minimum tax**
Corporate taxpayers are liable for the minimum tax, which is defined as the greater of 10% (to the tax base of up to KRW 10 billion, 12% on the excess up to KRW 100 billion, 16% on the excess above KRW 100 billion) of the taxable income before various deductions and exemptions pursuant to the STTCL applied to arrive at adjusted taxable income or the actual tax liability after various deductions and exemptions are applied.

For SMEs, the minimum tax is the greater of 7% of adjusted taxable income or actual tax liability.

**Corporate residence**
A corporation having its head office or principal office in Korea is a resident corporation. A corporation with a place of effective management in Korea is also treated as a resident corporation.

**Permanent establishment (PE)**
A non-resident corporation is generally deemed to have a tax presence (i.e. PE) in Korea if one of the following applies:

- It has any fixed place of business in Korea, where the business of the entity is wholly or partly carried on.
- It is represented by a dependent agent in Korea, who has the authority to conclude contracts on its behalf and who has repeatedly exercised that authority.
- Its employee(s) provides services in Korea for more than six months within 12 consecutive months.
- Its employee(s) continuously or repeatedly renders similar services in Korea for two or more years, even if each service visit is for less than six months within 12 consecutive months.

Exceptions to a PE in Korea for a non-resident corporation include fixed places of business used only for purchasing or storage of property at which no sales activities, advertising, publicity, collecting, or furnishing of information, or other activities that are preparatory or auxiliary to the conduct of business, occur.

**Other taxes**

**Value-added tax (VAT)**
VAT is levied at a rate of 10% on sales and transfers of goods and services, except zero-rated goods and services (e.g. goods for exportation, services rendered outside Korea, international transportation service by ships and aircraft, other goods and services supplied for foreign exchange earnings) and exempt goods and services (e.g. basic life necessities and services, such as unprocessed foodstuffs and agricultural products; medical and health service; finance and insurance services; duty-exempt goods).
Electronic VAT invoicing is a compulsory requirement. If a taxpayer fails to issue the electronic VAT invoice or report electronically to tax authorities, the relevant penalties shall be imposed.

**Customs duties**
Customs duties are generally assessed on imported goods. ‘Importation’ refers to the delivery of goods into Korea (in case of goods passing through a bonded area, delivery of such goods into Korea from such a bonded area) to be consumed or to be used in Korea.

**Excise taxes**
The individual consumption tax is imposed on specific luxury goods, high-priced durable consumer goods, goods subject to consumption restraints, and certain luxury activities for the purpose of supplementing the VAT single-rate scheme. Tax rates range from 2% to 20%; in certain circumstances, a fixed amount is levied (e.g. KRW 12,000 per person for golf course greens fees).

**Property taxes**
An annual tax ranging from 0.07% to 5% is charged on the statutory value of land, buildings, houses, vessels, and aircraft. Five times the property tax rate is applied to property that is newly constructed or expanded in the Seoul metropolitan area for five years from its relevant registration date.

**Securities transaction tax**
A securities transaction tax of 0.5% is imposed on the total value of securities at the time of transfer, but the government is authorised to adjust the tax rate in certain circumstances. The flexible tax rate prescribed by the Presidential Decree is 0.3% on transactions in both the Korea Stock Exchange and Korean Securities Dealers Automated Quotations (KOSDAQ).

**Acquisition taxes**
Acquisition tax is charged on the price of real estate, motor vehicles, construction equipment, golf membership, boats, etc. The minimum rate is 2%. A weighted rate is charged on acquisitions in the Seoul metropolitan area or on acquisition of luxury items, such as villas, golf courses, and yachts.

**Stamp taxes**
The stamp tax is levied on a person who prepares a document certifying establishment, transfer, or change of rights to property in Korea. The stamp tax ranges from KRW 100 to KRW 350,000, depending on the type of taxable document.

**Registration taxes**
Registration tax ranging from 0.1% to 5% is charged upon the registration of title or right and incorporation. Registration tax upon the registration of title or right and incorporation for corporations located in large cities may be subject to three times the rates otherwise applied.

**Social security contributions**
There are four types of social security contributions in Korea, namely national pension, national health insurance, employment insurance, and worker’s compensation insurance. Employers and employees are almost equally required to contribute an amount of 0.55% to 6.28% of salaries for the national pension, national health insurance, and employment insurance, respectively, while the worker’s compensation insurance is borne by employers only.
**Branch income**

In general, a branch office of a foreign corporation is taxed in the same manner as resident companies.

Remittance of retained earnings from a Korean branch to its head office is subject to reporting to a designated foreign exchange bank in Korea under the Foreign Exchange Transaction Act.

If the tax treaty between Korea and the country in which a foreign corporation is residing allows the imposition of a branch profits tax, the tax is imposed on the adjusted taxable income of the Korean branch.

Where applicable, the branch profit tax is levied in addition to the regular CIT, which is imposed at the rate of 20% (or at a reduced rate as provided in a treaty) of the adjusted taxable income of the Korean branch.

**Income determination**

Gross income consists of gains, profits, income from trade and commerce, dealings in property, rents, royalties, and income derived from any ordinary transactions carried on for gain or profit.

**Inventory valuation**

Inventories generally are stated at the lower of cost or market (LCM). Any one of seven inventory valuation methods, including LCM, specific identification, first in first out (FIFO), last in first out (LIFO), weighted-average, moving-average, and retail method can be elected for tax purposes. The method elected should be applied consistently each year unless an application for change has been submitted before three months from the year-end. Different valuation methods may be used for different categories (i.e. products and merchandise, semi-finished goods and goods in process, raw materials, goods in stock) and different business places.

For inventory costing under Korean International Financial Reporting Standards (K-IFRS), last in first out (LIFO) is not an acceptable accounting method. Consequently, taxable income arising from adjusting the inventory balance booked under LIFO using other acceptable costing methods (e.g. FIFO, weighted average) is allowed to be spread in its recognition over a five-year period since the first year adopting K-IFRS.

**Stock valuation**

The valuation of securities or bonds shall be made using the cost method. For the cost method, the weighted-average cost method or moving-average cost method shall be applied for the purpose of valuation of securities and the individual cost method may be used for valuation of bonds.

**Capital gains**

For the purposes of taxation, gross income does not include income derived from gains from capital transactions such as capital surplus; gains on reduction of paid-in capital; or gains from merger, divisions, comprehensive share transfer, or comprehensive share exchange. However, gains from treasury stock transactions are taxed, and losses are deductible from taxable income.
Korea, Republic of

Note that capital gains from the disposal of non-business purpose land or houses may be subject to additional capital gains tax at rates ranging from 10% to 40% after CIT.

**Dividend income**
All distributions to shareholders are taxed as dividend income, whether paid in cash or in stock.

However, a qualified domestic holding company that owns more than 80% (40% in case of listed subsidiary) share ownership in its domestic subsidiary will receive a 100% deduction for dividends while an 80% deduction is allowed for share ownership of 80% (40% in case of listed subsidiary) or less. A domestic corporation other than a qualified holding company will also receive a 100% deduction for share ownership of 100%, 50% for more than 50% (30% in case of listed subsidiary) share ownership, and 30% for share ownership of 50% (30% in case of listed subsidiary) or less.

**Interest income**
Except for certain cases, all interest income must be included in taxable income. Generally, interest income is included in taxable income as it is received.

**Rental income**
A company engaged in the business of the rental of real properties is also taxed on the deemed rental income calculated at the financial institutions’ interest rate on the lease security money as well as on the recognised rental income.

**Royalty income**
Royalties are considered to be taxable income when earned.

**Gains and losses on foreign currency translation**
Companies are allowed to recognise unrealised gains and losses on foreign currency translation of their monetary assets in a foreign currency. This recognition is also allowed with respect to currency forward transactions and swaps to hedge foreign exchange risks of such assets. In this regard, a taxpayer can choose whether to recognise unrealised gains and losses or not for tax purposes. Once elected, the same method must be consistently used.

**Foreign income**
Resident corporations are taxed on their worldwide income. A Korean company is taxed on its foreign-sourced income as earned at normal CIT rates. To avoid double taxation, taxes imposed by foreign governments on income recognised by a resident company are allowed as a credit against the income taxes to be paid in Korea or as deductible expenses in computing the taxable income. In general, foreign taxes will generally be applied as credit rather than as a deduction.

Income of foreign subsidiaries incorporated outside Korea is not included in the taxable income of a resident company. Income is recognised by a resident company only upon the declaration of dividends from a foreign subsidiary. Therefore, the Korean tax impact may be delayed through deferring the declaration of dividends unless the anti-tax haven rule under the Law for Coordination of International Tax Affairs (LCITA) is triggered.

Korean anti-tax haven rules state that accumulated earnings (distributable retained earnings) of a resident company’s subsidiary located in a low-tax jurisdiction (i.e. a tax haven where the effective tax rate on the taxable income for the past three years
averages 15% or less) are taxed as deemed dividends to the resident company, which has direct and indirect interest of 10% or more in such subsidiary.

The foreign tax paid by a qualifying subsidiary is eligible for foreign tax credit against the dividend income of a resident company regardless of whether there are tax treaties with the relevant foreign countries. In connection with percentage of shareholding for tax credits, a qualifying subsidiary is one in which a resident corporation owns 10% or more of its shares for more than or equal to six consecutive months after the date of dividend declaration. Unused foreign tax credits can be carried forward for five years.

**Deductions**

In general, expenses incurred in the ordinary course of business are deductible, subject to the requirements for documentary support.

A corporation’s disbursements of more than KRW 30,000 for goods or services provided are required to be supported by corroborating documents, such as credit card sales vouchers, cash receipts, tax invoices, and those vouchers and invoices stored in the company’s enterprise resource planning (ERP) system. The corporation is required to maintain these documents for five years. If the corporation fails to maintain proper evidences, a 2% penalty shall be levied on the amount of disbursement.

Accrued expenses are not deductible until the expenses are fixed or paid.

**Depreciation and amortisation**

With the exception of land, depreciation of all property, plant, and equipment (PP&E), which includes buildings, machinery, and auto-vehicles, used to generate income is allowed as a deduction for CIT. Generally, interest on debt acquired to purchase, manufacture, or construct PP&E must be capitalised until the PP&E is operational. This does not apply to the interest associated with the expansion or improvement of existing PP&E. A detailed list of fixed assets, gross values (including capitalised interest), the useful lives of the assets, and the current year’s depreciation charge must be submitted to the tax authorities when filing the annual CIT return.

The tax law allows the following methods for calculating depreciation:

- Straight-line or declining-balance method for tangible fixed assets, other than plant and buildings.
- Straight-line method for plant, buildings, and intangible assets.
- Service-output or straight-line method for mining rights.
- Service-output, declining-balance, or straight-line method for tangible fixed assets used in mining.

In determining depreciation using a straight-line method, salvage value of the assets is regarded as zero. However, where the declining-balance method is used, 5% salvage value is required. Changes in the depreciation method must be approved by the tax authorities in advance, and such approval may only be obtained in exceptional cases (i.e. merger between two corporations having different depreciation methods). Although the tax law specifies the useful lives of assets, the useful life of a fixed asset can be increased or decreased by 25% of the specified useful life at the taxpayer’s election. The selected depreciation method should be consistently applied.
The standard useful life and the scope of useful life for assets are provided in the following tables:

### Tangible fixed assets

Note that for used fixed assets (including assets acquired through mergers or spin-offs) that have been used for more than half of their useful lives, a new useful life may be filed with the tax authorities within the range of half of the original useful life and the original useful life filed for the first time of its utilisation.

According to CIT law, depreciation is allowed for tax deduction only when expensed for book purposes. However, in order to alleviate any dramatic increase in tax burden due to decreased depreciation expenses through the adoption of K-IFRS, additional expense deduction through tax adjustment may be allowed on a temporary basis. For tax purposes, depreciable assets acquired on or before 2013 may be depreciated at the rate equivalent to the average of three years before the adoption of K-IFRS. Depreciable assets acquired after 2014 may be depreciated using the tax useful lives.

**Goodwill**

Goodwill for tax purposes is defined as “value transferred with consideration, apart from transferred assets included in business transfer, valuated by taking into account business premium factors of the transferor such as permission/licence, legal privileges, geographical advantages, business secrets, credit, reputation, transaction partners, etc.”. Goodwill may be amortised over five years using the straight-line method for tax purposes.

1074 Korea, Republic of
**Start-up expenses**
Start-up expenses, such as incorporation expenses, founders’ salary, and registration fees and taxes, are deductible when the expenses are actually paid.

**Interest expenses**
Interest incurred in the ordinary course of business is deductible as long as the related loan is used for business purposes. There are, however, a number of exceptions to the general rule, as follows:

- If borrowings from a foreign shareholder, or from a third party under a payment guarantee by the foreign shareholder, exceed three times the equity of the relevant foreign shareholder, the paid interest and discount fee as to the relevant excessive portion will be treated as a dividend payment and not allowed as a deduction.
- Debenture for which the creditor is unknown.
- Bonds and securities on which recipient of interest is unknown.
- Construction loans and loans for the purchase of land and fixed assets up to the date on which the assets are acquired or completed must be capitalised as a part of the cost of the asset and depreciated over the life of the asset. Interest after the date of completion or acquisition is deductible as incurred.
- Interest on loans related to non-business purpose assets or funds loaned to related parties.

**Contingent liabilities**
In general, contingent liabilities are not deductible, except for reserves under the following items, which are counted as losses within the tax limit:

- Reserves for retirement allowance.
- Reserves for bad debts.
- Liability reserves and emergency reserves prescribed in the Insurance Business Law.
- Reserves for non-profit organisations.
- Reserves for the write-off of a compensation claim set aside by trust guarantee funds in each business year.

The amounts enumerated below are also counted as losses in calculating income for the business year:

- The amount of gains from insurance claims used to acquire the same kinds of fixed assets as the lost fixed assets, or to improve the damaged fixed assets within two years after the first day of the business year following the business year in which the gains fall.
- The amount of a beneficiary’s share of construction costs received by a domestic corporation engaged in the electricity or gas business, etc., used for the acquisition of fixed assets.
- The amount of the national treasury subsidies actually used for acquisition or improvement of fixed assets for business.

**Bad debt**
A doubtful accounts reserve is allowed for tax purposes of up to 1% (2% for certain financial institutions) or the previous year’s ratio of actual loss from bad debts to total balance of account receivables at year-end. Actual losses on bad debts are allowed when certain legal proceedings are satisfied or the statute of limitations has lapsed.

Although companies could set aside bad debt allowances based on reasonable estimates under the old generally accepted accounting principles (K-GAAP), the new GAAP
Korea, Republic of

for non-K-IFRS users and K-IFRS users requires objective evidence to recognise the allowance. This stricter rule is expected to create disproportionately higher taxable income in the first year of adoption.

In order to relieve K-IFRS users from any disproportionate burden for tax payment from book-tax difference due to the adoption of a new accounting method or treatment, the current tax law allows for deferral of taxable income recognition in various situations. One such situation is the taxable income created in accounting for bad debt allowance.

This deferral is currently effective to cover a wider scope of entities over an extended time period. For tax administration purposes, the scope of entities for deferral will cover a domestic place of business of a foreign corporation as well as domestic companies. Deferral will be available through 31 December 2013. The deferred income will be added back to taxable income of the fiscal year that begins after 1 January 2014. Please note that non-IFRS users will be excluded from the scope of eligible entities.

Charitable contributions
Donations to public interest entities, such as government authorities and social welfare organisations, as well as donations for academic research, technical development, etc., are classified as Bub-jung donations. Bub-jung donations are tax-deductible at up to 50% of the total taxable income for the concerned fiscal year after deduction of net operating loss (NOL). Ji-jung donations to public entities prescribed by CIT Law (CITL) are also tax-deductible at up to 10% of the total taxable income for the fiscal year after the deduction of deductible Bub-jung donations and NOL.

The amount in excess of such limit may be carried over for three or five years. Donations other than the statutory donations above will not be deductible for tax purposes.

Employee remuneration
There is no statutory limit for employee remuneration, which includes salaries, wages, stipends, bonuses, retirement payments, pensions, and meal and housing allowances, as well as all other kinds of subsidies, payments, and compensation. Remuneration of foreign employees is determined according to their engagement contracts.

Pension expense
For tax purposes, severance allowance may be deducted at up to 5% of the annual total amount of wages paid. However, the accumulated amount of the severance allowance reserve may not exceed 15% of the actual aggregate liability to employees for fiscal year 2013. This deduction limit will be reduced by 5% every year from 2013 to be phased out in 2016. If a corporation subscribes to severance insurance with an insurance company to cover future payments of retirement allowances, additional tax deductions beyond the limits described above are available.

Employers hiring five or more employees are required to set aside retirement pensions for their employees. Defined contribution (DC) and defined benefits (DB) are the two available schemes for the retirement pension system. Under the DC scheme, the premiums paid by the employer are deductible upon payment while the reserve under the DB scheme is deductible subject to a limit, similar to the severance insurance.

Payment for directors
Bonuses paid to directors in excess of the amount determined in the articles of incorporation or at a shareholders’ meeting, etc. are not deductible. Also, severance benefits paid to directors in excess of the amount prescribed in the tax law are not deductible.
Entertainment expenses
Entertainment expenses of more than KRW 10,000 on an event basis must be supported by corporate credit card vouchers, cash receipts, or tax invoices in order to be deductible. In addition, the entertainment expenses in excess of the tax limit are not deductible.

The deductible limit for entertainment expenses in a business year is computed as:

- an amount calculated by multiplying KRW 12 million (KRW 18 million for a SME) by the number of months in the respective business year divided by 12, plus
- an amount calculated by multiplying the amount of gross receipts for a business year by the rates listed in the following table (in the case of receipts from transactions between related parties, 10% of the amount calculated by multiplying the receipts by following rates shall be applied).

<table>
<thead>
<tr>
<th>Amount of gross receipts (KRW)</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 10 billion</td>
<td>0.2%</td>
</tr>
<tr>
<td>10 billion to 50 billion</td>
<td>KRW 20 million + 0.1% of the excess over KRW 10 billion</td>
</tr>
<tr>
<td>Greater than 50 billion</td>
<td>KRW 60 million + 0.03% of the excess over KRW 50 billion</td>
</tr>
</tbody>
</table>

Insurance premiums
Insurance premiums paid to an insurance company are deductible if the business enterprise is the listed beneficiary. Insurance premiums for which the beneficiary is the employee are also deductible; however, they are treated as salaries for the employees and are subject to WHT on earned income (this excludes the severance insurance premium or social security taxes that are borne by the corporations).

Fines and penalties
Fines, penalties, and interest on underpayment of taxes are not deductible.

Taxes
Income taxes are generally not deductible in determining income subject to CIT.

Net operating losses (NOLs)
In general, an NOL carryover is allowed for ten years for fiscal years commencing after 31 December 2008 (five years for the prior years). Along with the extension of the NOL carryforward period from five years to ten years, when a taxpayer uses the NOL incurred more than five years ago, the statute of limitations shall be one year from the filing due date of the fiscal year when the NOL is utilised.

Generally, loss carrybacks are not allowed. However, SMEs can carry back an NOL for one year.

Payments to foreign affiliates
With sufficient supporting documentation, interest, royalty, and management service fees paid to foreign affiliates are deductible for CIT purposes.

Under the LCITA, the following conditions must be met in order for a management service fee to be deductible:

- The services must be provided based on an agreement entered into by the service provider prior to the service transaction.
Korea, Republic of

- The provision of the service can be verified by a schedule of services, description of services, description of the company providing services and its employees, detailed explanation of expenses incurred, and other supporting documentation.
- A company must be able to anticipate the company’s additional profit or reduced expense through the services provided by a foreign affiliate.
- Payment for the provided services should be consistent with arm’s-length standards.

**Group taxation**

The consolidated corporate tax filing system can be adopted for a domestic corporation in cases where two or more wholly-owned subsidiaries exist. It is up to the election of the taxpayer, but it cannot be revoked for at least five years after the election of the consolidated tax filing.

**Transfer pricing**

The LCITA authorises the tax authorities to adjust the transfer price based on an arm’s-length price and to determine or recalculate a resident’s taxable income when the transfer price of a Korean company and its foreign counterpart is either below or above an arm’s-length price.

The LCITA lists the following methods for determining an arm’s-length price: the comparable uncontrolled price (CUP) method, the resale price method, and the cost-plus method. Furthermore, the Decree elaborates upon the profit-split method, the transactional net margin method (TNMM), and the Berry Ratio method as methods for determining an arm’s-length price based on profits arising from controlled transactions.

The method used and the reason for adopting that particular one for an arm’s-length price determination must be disclosed to the tax authorities by a taxpayer in a report submitted along with one’s annual tax return.

A new arm’s-length standard has been introduced for guarantee fees paid by Korean residents and foreign related parties under the amended LCITA. Effective 15 February 2013, the amended regulations state that that transfer pricing methods should be applied to guarantee fees and that they are only deductible to the extent they are at arm’s length. In applying transfer pricing principles to guarantee fees, certain approaches can be adopted:

- a risk based approach, based on the risks and costs borne by the guarantor.
- a benefit approach, based on the expected benefits that the debt holder enjoys as a result of the guarantee, or
- a hybrid approach, based on both the risks and costs assumed by the guarantor and the expected benefits obtained by the debt holder.

Before the amendment, there was no specific method of how the deductibility of such fees should be determined, and the National Tax Service (NTS) made assessments by applying its own formula.

**Thin capitalisation**

In cases where a Korean company borrows from its controlling shareholders overseas, an amount greater than three times (six times in the case of financial institutions) its equity interest payable on the excess portion of the borrowing is characterised as dividends to which the article on dividends in tax treaty applies and is treated as non-deductible in computing taxable income.
Anti-tax haven rules
In cases where a Korean company invests in a company located in a tax haven, which unreasonably has reserved profits in the controlled foreign company, the profits reserved therein shall be treated as dividends paid out to that Korean company (individual), despite the fact that the reserved profits are not actually distributed.

Anti-tax haven rules are intended to regulate a company that has made overseas investments of an abnormal nature. Thus, these anti-tax haven rules apply to those Korean companies that have invested in a company incorporated in a foreign country with an average effective tax rate of 15% or less on taxable income for the past three years.

However, if a company incorporated in such a tax haven country actively engages in business operations through an office, shop, or a factory, then the anti-tax haven rules will not apply.

Related party transactions
Under the provision of CITL, the tax authorities may recalculate the corporation’s taxable income when CIT is unreasonably reduced due to transactions with related parties. Generally, if the discrepancy between the transaction price and fair market value exceeds 5% of the fair market value or KRW 300 million, the transaction will be subject to this provision.

Tax credits and incentives
Foreign tax credit
Taxes imposed by foreign governments on income recognised by a resident taxpayer are allowed as a credit within the limit against the income taxes to be paid in Korea, or as deductible expenses in computing the taxable income. In general, foreign taxes will be applied as credit rather than as a deduction. The excess foreign tax credit can be carried forward five years.

Investment incentives
Tax credits are generally available for qualified investment in facilities for productivity enhancement, safety, job-creating investments, etc.

Tax credit for investment in facilities for productivity enhancement
If a resident makes an investment in facilities or equipment to increase productivity by no later than 31 December 2014, then 3% (7% in the case of SMEs) of such investment amount shall be deducted from CIT. The unused tax credit can be carried forward five years.

Tax credit for investment in facilities for safety
If a resident or a domestic corporation makes an investment in a facility (excluding any investment in used assets) for safety that is considered necessary for industrial purposes no later than 31 December 2014, then an amount of 3% of such investment shall be deducted from CIT. The unused tax credit can be carried forward five years.

Tax credit for job-creating investments
The tax credit for job-creating investments consists of a basic credit and an additional credit. Before the amendment, the basic credit was not available at all in the event of decreased employment by any one person. However, after the amendment, even if the employment decreases, SMEs may claim the basic credit after a certain amount (KRW
10 million per capita) is subtracted. The basic credit includes a 2% to 4% tax credit for a company maintaining a status quo employment and an additional 3% tax credit for new job-creating investments. The additional tax credit for job creation does not exceed the ceilings set at KRW 10 million (KRW 15 million per employee between the ages 15 and 29, KRW 20 million per specified occupational high school graduate employee) multiplied by the amount of new employment in net. The change is applicable to investments made from 1 January 2013.

Research and development (R&D) tax incentives
The STTCL provides various tax incentives to stimulate R&D activities. These include deduction of R&D reserve, tax credit for research, and manpower development expenses.

Reserves for development of technology and manpower
In cases where a corporation has set aside development of technology and manpower reserves for expenses on development of technology and manpower on or before 31 December 2013, those reserves are considered as deductible expenses at up to 3% of annual sales.

Tax credit for development of technology and manpower
Companies presently claim a tax credit in relation to qualifying R&D expenditure to the extent of either (i) 3% to 6% (25% for SMEs) of the current R&D expenses or (ii) 40% (50% for SMEs) of the incremental portion of the current R&D expenses over the average of the previous four years. However, under a recent amendment, the incremental method can be applied only when the R&D expenses for the current year increases from the R&D expenses for the previous year. The tax credit has been extended to include R&D in relation to core technologies as authorised by government ministries as well as pre-designated strategic growth industries until the end of December 2015, and, for these industries, the credit rate for the current R&D expenditure is 20% (30% for SMEs). The change is applicable from the fiscal year starting 1 January 2013.

Tax credit for investment in facilities for technology and human resources development
A corporation purchasing facilities no later than 31 December 2015 prescribed in the Presidential Decree with the purpose of R&D and job training is eligible for a tax credit of up to 10% of such investment. The unused tax credit can be carried forward five years.

Energy/environmental incentives

Tax credit for investment in energy-economising facilities
If a resident makes an investment (excluding any investment in used goods) not later than 31 December 2013 in energy-economising facilities, 10% of such investment shall be deducted from CIT. The unused tax credit can be carried forward five years.

Tax credit for investment in facilities for environmental protection
If a resident makes an investment (excluding any investment in used goods) in any facility for the purpose of environmental conservation no later than 31 December 2013, then 10% of the investment amount shall be deducted from CIT. The unused tax credit can be carried forward five years.
Inbound investment incentives
The Korean government provides various incentives and benefits for inducing foreign investment under the Foreign Investment Promotion Law.

Foreign invested companies that engage in certain qualified high-technology businesses can apply for 100% exemption from CIT for five years, beginning from the first year of profitable operations (from the fifth year, if not profitable until then) and a 50% reduction for the following two years in proportion to the foreign shareholding ratio. An exemption from WHT on dividends is available for foreign investors in the same manner as above during the same grace period. In addition, the taxpayer can apply for 100% exemption from local taxes, such as acquisition tax, registration tax, and property tax on assets acquired for their business for five years after the business commencement date and 50% reduction for the following two years. For local tax exemption, some local governments grant longer exemption periods (up to 15 years) in accordance with their local ordinances. Qualified foreign investment also can be eligible for exemption from customs duties, VAT, and special excise tax on imported capital goods for the first three years.

In addition, foreign investors satisfying specified criteria are provided with tax incentives and other benefits for investment in specially designated areas, including foreign investment zones (FIZs), free economic zones (FEZs), free trade zones (FTZs), and strategic industrial complexes exclusively developed for foreign invested companies. The tax incentives for qualifying foreign investors in FIZs are similar to those of the above foreign invested high-tech companies. Qualifying investors in FEZs, FTZs, and strategic industrial complexes may receive the 100% exemption from corporate or individual income tax as well as local taxes for the first three years and 50% reduction for the next two years. An exemption from WHT on dividends is granted to qualifying foreign investors in FEZs, FTZs, and such industrial complexes in the same manner as above during the same grace period. They also receive exemption from customs duties on imported goods for the first three years.

Foreign direct investment (FDI) incentive limitations
The FDI credit limits incentives granted to qualified FDIs. The ceiling has been set to encompass both investment amount and job-creation. In terms of investment amount, the level of incentives for FDI has been reduced to 70% of the aggregated FDI amount for companies benefiting from a seven-year incentive period (50% ceiling for companies enjoying a five-year incentive period). In terms of job-creation, the level of incentives for FDI has been reduced to the lower of either 20% of the aggregated FDI amount or KRW 10 million times the company’s net increase in employment.

Companies that have enjoyed tax benefits based on job-creation will be subject to tax assessment in cases where there is a net decrease in employment within the subsequent two years in comparison to the year that the relevant tax credit was obtained.

Withholding taxes
Foreign corporations with income derived from sources in Korea are subject to CIT on such income. If the foreign corporation has no ‘domestic place of business’ in Korea, it will be subject to tax on its Korean-source income on a withholding basis in accordance with the tax laws and the relevant tax treaty, if applicable. Any Korean-source income attributable to a domestic fixed place of business of a foreign corporation will be subject to Korean CIT.
Korea, Republic of

For residents of countries with a tax treaty with Korea, reduced WHT rates may apply. An application form must be submitted to the withholding agents in order to apply the treaty rate. If a beneficiary cannot be identified in the application form, the withholding agents should withhold the tax at the non-treaty rate.

For dividends, interest, and royalties, the WHT rates are limited as follows:

Notes

1. Dividends and interest paid to resident individuals by corporations generally are subject to a 14% WHT rate. In addition to this, there is a resident surtax of 10% on the CIT liability.
2. In addition to the indicated tax rate, a resident surtax is charged at a rate of 10% of the respective tax rate.
3. Lower rate applies in case of equity ownership of 10% or more.
4. 10% rate applies to royalties paid for the use of or the right associated with industrial activities.
5. 10% rate applies if the loan period extends to seven years or more, the recipient is a financial institution, and the loan is used for certain designated purposes.
6. 25% rate applies to royalties associated with the use of trademarks or trademark rights.
7. 5% rate applies in case of equity ownership of 15% or more.
8. Lower rate applies in case of equity ownership of 25% or more.
9. 10% rate applies if the term of loans exceeds three years.
10. 10% rate applies when a recipient of interest income is a bank and income is connected with a loan with a term in excess of seven years.
11. Lower rate applies in case of equity ownership of 20% or more.
12. 10% rate applies if a recipient is a bank.
13. 5% rate applies if a recipient holds 10% or more ownership in a paying corporation but, even in case of 10% or more ownership, 10% rate applies if the dividends are paid out of profits subject to tax at a lower rate than the normal corporate tax rate of a country where a payer resides. In other cases, 15% rate applies.
14. 7.5% rate applies when a recipient of interest income is a bank or a financial institution.
15. 5% rate applies to royalties paid for use of or the right to use industrial, commercial, or scientific equipment or information.
16. 10% rate applies if it is for the use of or the right to use industrial, commercial, and scientific equipment or information.
17. 15% rate applies if royalties are for use of or the right to use cinematography films or tapes for radio or television broadcasting or any copyright of literary or artistic work.
18. 0% rate applies in case of equity ownership of 10% or more.
19. 5% rate applies if a recipient is a bank.
20. 5% rate applies to royalties for use of copyrighted literature and music.
21. 10% rate applies if the term of the loans exceeds seven years.
22. Lower rate applies if it is for the use of or the right to use a patent, trademark, design, or secret formula, or industrial, commercial, and scientific equipment or information.
23. 10% rate applies in cases of equity ownership of 25% or more, or dividend paid by a resident company engaged in a preferred pioneer area and registered with the Board of Investment.
24. 10% rate applies in cases where the interest is paid in respect of public offering of bonds, debentures or similar obligations or interest paid by a company that is a resident of the Philippines, registered with the Board of Investment, and engaged in preferred pioneer areas of investment under the investment incentive laws.
25. 10% rate applies in case of royalties paid by a company that is a resident of the Philippines, registered with the Board of Investment, and engaged in preferred pioneer areas of investment under the investment incentive laws.
26. 5% rate applies if a recipient holds 30% or more of equity interest in the amount of at least 100,000 United States dollars (USD).
27. 10% rate applies if a beneficiary owner of the income is a financial institution (including insurance company) or resident of Thailand who is paid with respect to indebtedness arising as a consequence of a sale on credit by a resident of Thailand of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm’s length.
28. 10% rate applies if the term of the loan exceeds two years.
29. 10% rate applies to royalties for use of copyrighted literature, music, films, and television or radio broadcasts. Otherwise, 15% rate applies.
30. 10% rate applies if equity ownership is 10% or more and not more than 25% of the gross income of a paying corporation for a preceding tax year consists of interest or dividends.
31. 10% rate applies when a recipient of interest income is a bank or an insurance company.
32. 5% rate applies when a recipient holds 25% or more of equity interest, and 10%, when a recipient holds 10% or more of equity interest. In other cases, 15% rate applies.
33. 5% rate applies to royalties paid for the use of or the right associated with industrial, commercial, or scientific equipment.
34. 0% rate applies to royalties paid for the use of academic rights.
35. 5% rate applies to royalties paid for the use of or the right associated with any copyright of literary, artistic, or scientific work, including software, and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. 10% rate applies to royalties paid for the use of or the right to use a patent, trademark, design or model, plan, secret formula, or process. 15% rate applies to royalties paid for the use of or the right to use industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
36. 14% rate applies if interest arises from bonds issued by a Korean company or government bodies.
37. 0% rate applies if a recipient of interest income is government, central bank, etc.
38. 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
39. Fees arising from rental of industrial, commercial, scientific equipment, etc. are classified as rental income subject to 2% WHT.

If a foreign company is located in a foreign jurisdiction designated as a tax haven by the Minister of Strategy & Finance, any Korean-source income of such foreign company will be subject to the domestic withholding rate of 20% regardless of whether or not the foreign company is resident of a treaty country. Currently, only Labuan is designated as such a jurisdiction. The foreign company may claim a refund of any excess WHT paid
within three years, if it proves to the Korean Tax Office that it is entitled to the reduced treaty rates as the substantive and beneficial owner of the income. Alternatively, a foreign company may attempt to seek a pre-approval in order to have the treaty benefits apply upfront by making an application to the Commissioner of Taxation.

Payment for the use of equipment
Before a recent amendment, in cases where the payment for the use of equipment is classified as ship, etc. rental income under the Korean CITL and as royalties under the tax treaties, it was unclear whether such payment should be subject to the lower of the WHT rate on rental income (2%) or reduced WHT rates under tax treaties (0% to 15%) since tax treaties take precedence when it comes to income classification. The WHT rate for royalties under the Korean CIT is 20%. Under the amended law, if classified as royalties under the relevant tax treaty, payments for the use of industrial, commercial, or scientific equipment will be subject to the lower of the WHT rate on royalties under the Korean tax law (20%) or reduced tax rates on royalties under tax treaties (0% to 15%). This change is applicable to payments made from 1 January 2013.

Tax administration

Taxable period
In Korea, the taxable year is on a fiscal-year basis as elected by the taxpayer. However, it cannot exceed 12 months.

Tax returns
A corporation must file an interim tax return with due payment for the first six months of the fiscal year, and the filing/payment must be made within two months after the end of the interim six-month period.

A corporation must file an annual tax return with due payment for the fiscal year, and the filing/payment must be made within three months from the end of the fiscal year.

Payment of tax
Where the tax amount to be paid by a resident corporation is in excess of KRW 10 million, part of the tax amount to be paid may be paid in instalments within one month of the date of the expiration of the payment period (two months for SMEs).

Where the tax amount to be paid is KRW 20 million or less, the excess of KRW 10 million may be paid in instalments; and where the tax amount to be paid exceeds KRW 20 million, 50% or less of the tax amount may be paid in instalments.

Functional currency
In instances where the taxpayer adopts to use a foreign currency as its functional currency, there are three ways to calculate the CIT base: (i) calculate the tax base using the financial statements in functional currency and translate it into Korean won; (ii) prepare the financial statements in Korean won and calculate the tax base; or (iii) translate the financial statements into Korean won and calculate the tax base. Once elected, the same method must be consistently used.

Tax audit process
In January 2012, the NTS announced the ‘Plan for Tax Audits’, which is the criteria for selecting a tax audit target company.
Korea, Republic of

For large companies whose sales revenue is KRW 500 billion or more, the tax audit will be conducted every five years. Other companies are selected by certain standards, which were announced by NTS.

**Statute of limitations**
The statute of limitations is generally five years from the statutory filing due date of the annual CIT return. However, the statute of limitations is extended further in the following cases:

- Ten years if a taxpayer evades taxes by fraud or unjustifiable means.
- Seven years if a taxpayer does not file its tax base by the statutory due date.

Along with the extension of the NOL carryforward period from five years to ten years, when a taxpayer uses the NOL incurred more than five years ago, the statute of limitation shall be one year from the filing due date of the fiscal year when the NOL is utilised.

**Period of extinctive prescription for collection of national taxes**
The period of extinctive prescription for collection of national taxes is five years (ten years for national tax payable worth KRW 500 million or more) from the date on which the government’s right to collect a national tax becomes exercisable.

**Topics of focus for tax authorities**
The recent topics of focus for tax authorities are as follows:

- Increased scrutiny for the prevention of offshore tax evasion through aggressive tax planning.
- Denial of unfair transactions between related parties.
- Prevention of embezzlement through fictitious expenses or tax evasion using subcontractors.
- Deductibility of management service fees or allocated expenses incurred by foreign affiliates.
- International inter-company transactions and transfer pricing.

**Other issues**

**Exchange controls**
Most transactions involving foreign exchange generally do not require approval or reporting under the Foreign Exchange Transaction Act (FETA), with a few exceptions as prescribed by the FETA. Receipt of foreign exchange from outside Korea is freely permitted, and payments to foreign companies are not regulated. Most restrictions on Korean companies’ foreign currency transactions with foreigners have been removed. However, the government continues to monitor certain flows of foreign currency in an attempt to minimise incoming speculative currency and outgoing capital flight.

Ever since Korea’s currency crisis, most restrictions on short-term as well as mid and long-term borrowings from overseas by corporations have been removed. Most foreign currency loans are allowed and are subject to reporting to a foreign exchange bank. There are no specific regulations, except the reporting requirements, on borrowings from overseas by foreign investment companies in Korea.
Choice of business entity

The following types of commercial entities are permitted in Korea:

- Corporation (Hoesa): There are five classes of corporation, outlined as follows:
  - Limited corporation:
    - **Jusik Hoesa** (JH): A corporation incorporated by one or more promoters, with each shareholder’s liability limited to the amount of contributed capital. This type of entity is the most commonly used in Korea.
    - **Yuhan Hoesa** (YH): A corporation incorporated by one or more members, with each member’s liability limited to the amount of that member’s contribution to the corporation.
    - **Yuhan Chegim Hoesa** (a newly adopted form since 2012): A corporation incorporated by one or more members, with each member’s liability limited to the amount of that member’s capital contribution. With significantly fewer restrictions for establishment and operation, **Yuhan Chegim Hoesa** provides more flexibility and self-control than **YH**.
  - Unlimited corporation:
    - **Hapmyong Hoesa**: A corporation incorporated jointly by more than two members who are responsible for corporate obligations if the assets of the corporation are insufficient to fully satisfy those obligations.
    - **Hapja Hoesa**: A corporation composed of one or more partners who have unlimited liability and one or more partners with limited liability.
- Partnership: **Hapja Johap** is a legal form of partnership allowed under the Commercial Code.
- Joint venture: A joint venture is generally established as a domestically incorporated corporation whose shareholders have limited liability regarding the obligations of the corporation under the Commercial Code.
- Branch: A foreign corporation can perform its business operation in Korea by setting up a taxable presence in the form of a branch office.
- Liaison office: A foreign corporation can establish a liaison office, which is not allowed to execute income-generating business activities in Korea.
- Sole proprietorship: Sole proprietorships are not a legal form of entity in Korea.

New guidance on taxation of an off-shore partnership

Under the CITL, a foreign corporation is defined as a corporation that has a head office or principal office in a foreign country (only if the foreign corporation shall not have the place of effective management in Korea). However, there is no practical guidance to determine a foreign corporation. In the case of a US limited liability company (LLC), which constitutes a corporate entity under the domestic laws, a question arises whether an off-shore partnership treated as a conduit for tax purposes in its country of residence may be treated as a foreign corporation to which CIT applies. The Enforcement Decree is amended to make it clear whether an off-shore partnership should be regarded as a foreign corporation subject to CIT on Korean-source income.

Under the amendment, off-shore partnerships with a legal personality like corporate entities prescribed in the Korean Commercial Act, such as stock corporations (Chusik Hoesa), limited corporations (Yuhan Hoesa, Yuhan Chegim Hoesa), and unlimited corporations (Hapmyong Hoesa, Hapja Hoesa), will be treated as foreign corporations for Korean CIT purposes. Also, off-shore partnerships having the nature of limited corporations prescribed in the Korean Commercial Act, such as stock corporations (Chusik Hoesa) and limited corporations (Yuhan Hoesa, Yuhan Chegim Hoesa), will be treated as foreign corporations. The change is applicable from the fiscal year starting 1 January 2013.
Significant developments

Commercial developments
The Ministry of Commerce in Kuwait has issued the new Companies Law No. 25 of 2012 (Company Law), which replaced the Commercial Companies Law No. 15 of 1960. The new law has been drafted to encourage investment in Kuwait and introduces a raft of new concepts and principles set to shape the way commercial entities operate in Kuwait.

Tax developments
The Department of Inspections and Tax claims (DIT) have issued Circular No. 1 of 2013 (CR 1), which sets out new requirements for the submission of tax declarations and compliance process.

The Kuwaiti Tax Authority (KTA) now requires more disclosures, analysis, and information to be submitted along with the tax declaration.

Perhaps the most significant change in the compliance procedures is that, for the first time, the DIT now requires taxpayers filing on an actual basis to submit a report with the DIT applying the same adjustments to costs and revenue as those previously made by the DIT through the latest assessment within three months following the submission of the tax declaration.

Although the new guidelines may streamline the filing and assessment procedures, we expect these changes to increase the amount of coordination and effort required to comply with the new regulations and guidelines and to impact the way we handle disputes and the inspection process with the DIT. We further expect the above procedures to increase tax collection by the DIT and to reduce the KTA officials’ efforts throughout the compliance and inspection process.

This circular is applicable for all tax declarations to be submitted with the DIT as of 10 February 2013. However, CR 1 specifically states that the new regulations apply to companies that have not filed tax declarations for the years 2010 or 2011 (where a final tax assessment has been issued for 2009).

Value Added Tax (VAT) Law
The Ministry of Finance (MOF) in Kuwait is currently studying the implementation of the VAT Law in Kuwait. Substantial steps, studies, training sessions, and internal meetings within the MOF have been conducted. This Law is estimated to be introduced by the year 2014. However, nothing has been officially issued.
**Taxes on corporate income**

Kuwait does not impose income tax on companies wholly owned by the nationals of Kuwait or other Gulf Cooperation Council (GCC) countries, including Bahrain, Oman, Qatar, Saudi Arabia, and the United Arab Emirates. However, GCC companies with foreign ownership are subject to taxation to the extent of the foreign ownership. Income tax is imposed only on the profits and capital gains of foreign 'corporate bodies' conducting business or trade in Kuwait, directly or through an agent.

Income earned from activities in Kuwait shall be considered subject to tax in Kuwait. In cases where a contract involves the performance of work both inside and outside Kuwait, the entire revenue from the contract must be reported for tax in Kuwait, including the work carried out outside Kuwait. *Please refer to the Income determination section for more information on income that is subject to tax in Kuwait.*

The current tax rate in Kuwait is a flat rate of 15%.

Foreign companies carrying on trade or business in the offshore area of the partitioned neutral zone under the control and administration of Saudi Arabia are subject to tax in Kuwait on 50% of taxable profit under the law.

**Zakat**

Zakat is imposed on all publicly traded and closed Kuwaiti shareholding companies at a rate of 1% of the companies' net profits.

**Contribution to the Kuwait Foundation for the Advancement of Sciences (KFAS)**

All Kuwaiti shareholding companies are required to pay 1% of their net profits as per their financial statements, after their transfer to the statutory reserve and the offset of loss carryforwards, to the KFAS, which supports scientific progress.

**Corporate residence**

A foreign corporate body is any association formed and registered under the law of any country or state other than Kuwait that is registered as having a legal existence entirely separate from that of its individual members. No Kuwait-registered company is subject to income tax. However, any foreign corporate body that is a shareholder in a Kuwait-registered company undertaking business in Kuwait is subject to tax (see the Taxes on corporate income section). For the purposes of this law, GCC residents and entities wholly owned by GCC residents are treated in the same manner as Kuwaiti business entities.

**Permanent establishment (PE)**

The interpretation and application of the tax laws in Kuwait is usually not consistent with internationals standards, and the taxing provisions are usually subjected to the widest possible interpretation by the KTA to tax all income from Kuwaiti sources. An insignificant presence of employees or short-term visits to Kuwait by the representatives of a company may render the entire revenue from the transactions as taxable in Kuwait. Full value of the contract, including the value of work performed outside Kuwait, is subject to tax in Kuwait.

**Kuwait**

---

**Other taxes**

**Value-added tax (VAT)**
The Kuwait Tax Law does not currently provide for a VAT. However, we understand that the Ministry of Finance (MOF) is considering introducing a VAT in Kuwait by the year 2014.

**Customs tariffs**
The GCC states have approved a unified customs tariff of 5% on cost, insurance, and freight (CIF) invoice price, subject to certain exceptions. A higher tariff is imposed on imports of tobacco and its derivatives and other products as notified.

**Excise taxes**
There are no excise taxes in Kuwait.

**Property taxes**
There are no property taxes in Kuwait.

**Transfer taxes**
There are no transfer taxes (e.g. stamp duty, real estate) in Kuwait.

**National Labour Support Tax (NLST)**
The purpose of the NLST law is to encourage the national labour force to work in the private sector by closing the gap in salaries and benefits between public and private sectors.

As per the law, Kuwaiti companies listed in the Kuwait Stock Exchange (KSE) are required to pay an employment tax of 2.5% of the company’s net annual profits.

**Social security contributions**
There are no social security obligations for expatriate workers. However, for foreign employees, it is generally necessary to make terminal indemnity payments calculated at 15 days’ pay-per-year for the first three years of service and 2/3 month’s pay-per-year thereafter.

For Kuwaiti employees, contributions are payable monthly by both the employer and employee under the Social Security Law. The employer’s contribution is 11% and the employee’s is 7.5% of monthly salary, up to a ceiling of 2,500 Kuwaiti dinars (KWD) per month. Benefits provided include pensions on retirement and allowances for disability, sickness, and death.

---

**Branch income**

Tax rates on branch profits are the same as on corporate profits.

---

**Income determination**

Income tax is imposed on the profit of a business in Kuwait as calculated by the normal commercial criteria, using generally accepted accounting principles (GAAP), including the accrual basis. Note that provisions, as opposed to accruals, are not deductible for tax purposes. In addition, for contract accounting, revenue is recognised by applying the
percentage of completion method. Work-in-progress carried forward may not exceed 20% of work executed.

Article 2 of the amended tax law provides that income earned from the following activities in Kuwait shall be considered subject to tax in Kuwait:

- Any activities or business carried out either entirely or partially in Kuwait, whether the contract has been signed inside or outside Kuwait, as well as any income resulting from supply or sale of goods, or from providing services.
- The amounts collected from the sale, rent, or granting of a franchise to utilise any trademarks, design, patents, copyright, or other moral rights, or those related to intellectual property rights for use of rights to publish literary, arts, or scientific works of any form.
- Commission earned or resulting from agreements of representation or commercial mediation, whether such commissions are in cash or in kind.
- Having permanent office in Kuwait where the sale and purchase contracts are signed and/or where business activities are performed.
- Profits resulting from the following:
  - Any industrial or commercial activity in Kuwait.
  - Disposal of assets, either through the sale of the asset, part of the asset, the transfer of the asset’s ownership to others, or any other form of disposal, including the disposal of shares in a company whose assets mainly consist of non-movable capital existing in Kuwait.
  - Granting loans in Kuwait.
  - Purchase and sale of property, goods, or related rights in Kuwait, whether such rights are related to monetary assets or moral rights such as mortgage and franchise rights.
  - Lease of property used in Kuwait.
  - Providing services, including profits from management, technical, and consultancy services.
  - Carrying out trading activities in the KSE, whether directly or through portfolios or investment funds.

**Inventory valuation**

Inventory is normally valued at the lower of cost or net realisable value, on a first in first out (FIFO) or average basis.

**Capital gains**

Capital gains on the sale of assets and shares by foreign shareholders are treated as normal business profits and are subject to tax at a 15% rate. The tax law provides for a tax exemption for profits generated from dealing in securities on the KSE, whether directly or through investment portfolios.

**Dividend income**

Treatment of dividends is not specifically addressed in the amended tax law or in its bylaws. The bylaws to the amended tax law, however, require investment companies or banks that manage portfolios, funds, or act as custodians of shares for foreign entities to deduct corporate tax due from payments due to foreign investors. Tax payment should be made within 30 days from the date of the deduction of tax, together with a list showing names of the foreign entities and the amount withheld from each.

Under the original tax law, no tax was imposed on dividends paid to foreign shareholders by Kuwaiti companies.
Kuwait

**Interest income**
In principle, tax is levied on the foreign company’s share of the profits (whether or not distributed by the Kuwaiti company) plus any amounts receivable for any other income in Kuwait (e.g. interest, royalties, technical services, and management fees). However, the Kuwait tax law will still subject the interest received from a Kuwaiti source to tax in Kuwait, whether this interest is the only source of income for the foreign entity in Kuwait or the foreign entity has more sources of income in Kuwait than the interest income.

**Foreign currency exchange rates and related profits and losses**
The tax treatment for realised and unrealised losses and gains related to foreign currency transactions are as follows:

- Unrealised foreign exchange gains are required to be reported in the tax declaration. However, unrealised gains may be excluded from taxable income for calculating the tax due for the fiscal year.
- Realised foreign exchange gains are taxable in Kuwait and therefore added to calculate taxable profits.
- Unrealised losses are not considered as tax deductible costs and therefore excluded for calculating taxable profits.
- Realised losses may be claimed as tax deductible costs, provided such losses are supported by adequate supporting information and documents.

**Exempt income**
The following sources of income are exempt from tax in Kuwait:

- Kuwaiti merchants purchasing, transporting, and selling goods imported on their own account where the foreign supplier has not been involved in Kuwait operations.
- Profits of a corporate body generated from dealing in securities listed in the KSE, whether such activities are carried out directly or through investment portfolios or funds.

**Foreign income**
The Kuwait tax law does not clearly state the tax treatment of foreign income. Such income is currently treated on a case-by-case basis.

**Deductions**
For expenses to be deductible, they must be incurred in the generation of income in Kuwait. Such expenses must be supported by adequate documentary evidence.

**Depreciation**
Depreciation is taken on a straight-line basis at specified rates. However, within 90 days prior to submission of the tax declaration, the taxpayer may request that the tax department calculate the depreciation using a different method than the straight-line method. The tax department shall accept this request if it is based on a reasonable basis in accordance with the tax accounting principles and rules.

The principal depreciation rates are specified in the law, as follows:

<table>
<thead>
<tr>
<th>Type of fixed asset</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>4</td>
</tr>
<tr>
<td>Type of fixed asset</td>
<td>Depreciation rate (%)</td>
</tr>
<tr>
<td>--------------------------------------------------------</td>
<td>-----------------------</td>
</tr>
<tr>
<td>Pre-fabricated buildings, furniture, and office equipment</td>
<td>15</td>
</tr>
<tr>
<td>Electronics and electrical equipment</td>
<td>15</td>
</tr>
<tr>
<td>Transportation and freight vehicles (trucks)</td>
<td>15</td>
</tr>
<tr>
<td>Tools and equipment</td>
<td>20</td>
</tr>
<tr>
<td>Cars and buses</td>
<td>20</td>
</tr>
<tr>
<td>Drilling equipment</td>
<td>25</td>
</tr>
<tr>
<td>Software</td>
<td>25</td>
</tr>
<tr>
<td>Computer equipment and accessories</td>
<td>33.3</td>
</tr>
</tbody>
</table>

**Goodwill**

In accordance with Executive Rule No. 39, amortisation of incorporated body goodwill is not allowed as a tax deductible expense.

**Start-up expenses**

Expenses incurred prior to signing of the contract are not allowed as tax deductible costs.

**Interest expenses**

Interest expenses are deductible if they are related to operations in Kuwait and are paid to a local bank.

**Bad debt**

Bad debt is deductible if related to operations in Kuwait and final resolution from the court is available.

**Charitable contributions**

Grants, donations, and subsidies paid to licensed Kuwaiti public or private agencies are deductible.

**Fines and penalties**

Fines and penalties are not tax deductible.

**Taxes**

Taxes and fees, except income tax, are deductible in Kuwait.

**Net operating losses**

As per the amended tax law, losses may be carried forward for a maximum of three years, provided that the following situations do not arise in the fiscal period following the period in which the loss was recorded:

- The tax declaration does not include any revenue from the business activities of the taxpayer in Kuwait.
- Change in the legal structure of the taxpayer.
- Merger of the taxpayer with another entity.
- Liquidation or ceasing of the activities of the taxpayer in Kuwait.

Please note that losses cannot be carried back in Kuwait.
Head office expenses/payments to foreign affiliates

The deduction of head office expenses (the overhead or the indirect expenses) is limited to 1.5% of the company’s Kuwait revenue after deducting the subcontractors’ shares (if any).

The direct costs allocated by the head office (e.g. supply of goods, design and consultancy costs) are regulated as follows.

For goods costs incurred outside Kuwait:

<table>
<thead>
<tr>
<th>Work conducted by</th>
<th>Allowable costs as a percentage of revenue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Head office</td>
<td>85% to 90%</td>
</tr>
<tr>
<td>Affiliated companies</td>
<td>90% to 93.5%</td>
</tr>
<tr>
<td>Third parties</td>
<td>93.5% to 96.5%</td>
</tr>
</tbody>
</table>

For design costs incurred outside Kuwait:

<table>
<thead>
<tr>
<th>Work conducted by</th>
<th>Allowable costs as a percentage of revenue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Head office</td>
<td>75% to 80%</td>
</tr>
<tr>
<td>Affiliated companies</td>
<td>80% to 85%</td>
</tr>
<tr>
<td>Third parties</td>
<td>85% to 90%</td>
</tr>
</tbody>
</table>

For consultancy costs incurred outside Kuwait:

<table>
<thead>
<tr>
<th>Work conducted by</th>
<th>Allowable costs as a percentage of revenue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Head office</td>
<td>70% to 75%</td>
</tr>
<tr>
<td>Affiliated companies</td>
<td>75% to 80%</td>
</tr>
<tr>
<td>Third parties</td>
<td>80% to 85%</td>
</tr>
</tbody>
</table>

In case there is no separate revenue for the consultancy, design, or goods work, although the nature of the contract requires the existence of consultancy work, the following formula shall be applied:

Consultancy, design, or goods revenue = (consultancy, design, or goods costs / total direct costs) x contract revenue

Group taxation

If a foreign company conducts more than one business activity in Kuwait, one tax declaration aggregating the income from all activities is required to be submitted in Kuwait. In addition, in the case where two affiliates are involved in similar lines of business or work on the same project, their taxable results may be aggregated for the assessment of tax by the KTA.

Transfer pricing

Please refer to Head office expenses/payments to foreign affiliates in the Deductions section.
**Thin capitalisation**

Executive Rule No. 37 deals with the tax treatment of interest and letters of credit. Through this rule, the KTA will accept the interest paid by a company, provided it is fully supported, paid to a financial institution, and related to the Kuwait operations. However, the tax law provides the KTA the right to determine the proper tax treatment on a case-by-case basis (if required).

**Tax credits and incentives**

**Leasing and Investment Companies Law No. 12 of 1998**

Leasing and Investment Companies Law No. 12 of 1998 allows the formation of investment and leasing companies having their principal place of business in Kuwait, with Kuwaiti or foreign shareholders. The law grants a five-year tax holiday to non-Kuwaiti founders and shareholders of such companies, beginning on the date of establishment of the companies.

**Direct Foreign Capital Investment Law (DIFCL) No. 8 of 2001**

DIFCL aims to encourage foreign investment participation in Kuwait, allowing up to 100% of foreign ownership in Kuwaiti businesses. It also provides a tax holiday of up to ten years with respect to non-Kuwaiti shareholders' shares of the profits from qualifying projects. An additional tax holiday for a similar period is granted for further investment in an already approved project.

**Kuwait Free Trade Zone**

Businesses set up in the Kuwait Free Trade Zone for carrying on specified operations are exempt from taxes on operations conducted in the zone. Foreign entities can own 100% of such businesses.

**Build, operate, and transfer (BOT)**

Kuwait has begun to use the BOT method in respect of some large infrastructure projects. Tax and tariff concessions may be built into a BOT contract.

**Circular No. 50 of 2002**

As per Circular No. 50 of 2002 issued by the DIT regarding treatment of exempted companies under tax laws and/or other special laws and/or tax treaty, exempted companies shall comply with the provisions of submission of tax declaration, inspection, and assessment procedures like other companies in order to be eligible for exemption.

Some of the privileges under this law include:

- Exemption from income tax or any other taxes for a period of ten years from the commencing of the actual operations of the enterprise.
- Benefits under double taxation agreements.
- Benefits under investment encouragement and protection agreements.
- Total or partial exemption from custom duties on imports.
- Recruitment of required foreign labour.
- Allotment of land and real estate.

**Withholding taxes**

Apart from the withholding tax (WHT) on dividends arising from trading in the KSE, there are no other WHTs. However, all government bodies and private entities
Kuwait

are required to retain the final payment due to a contractor or subcontractor until presentation of a tax clearance certificate from the MOF confirming that the respective company has settled all of its tax liabilities. The final payment should not be less than 5% of the total contract value.

Tax treaties

Kuwait has entered into tax treaties with several countries for the avoidance of double taxation. Treaties with several other countries are at various stages of negotiation or ratification.

However, little experience has been gained in Kuwait regarding the application of tax treaties. As a result, disputes about the interpretation of various clauses in tax treaties between taxpayers and the DIT are not uncommon. Disputes with the DIT regarding tax treaties normally arise with respect to the following issues:

- Existence of a PE.
- Income attributable to a PE.
- Tax deductibility of costs incurred outside Kuwait.

The domestic tax law in Kuwait does not provide for WHTs. As a result, it is not yet known how the Kuwaiti government will apply the WHT procedures included in the treaties listed in the table below. The WHT rates listed in the table are for illustrative purposes only.

Notes

1. The rate is 0% for amounts paid to a company of which the government owns at least 20% of the equity.
2. The rate is 0% for interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for the interest paid to entities in which the government owns a specified percentage of the equity and for interest paid on loans guaranteed by the government.
3. The rate is 0% for dividends and interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for dividends paid to entities in which the government owns a specified percentage of the equity.
4. The rate is 10% for dividends paid to the government of Kuwait or any of the institutions or any intergovernmental entities. The rate is 15% for other dividends.
5. The 5% rate applies if the recipient of the dividends owns directly or indirectly at least 10% of the payer. The 15% rate applies to other dividends.
6. The rate is increased to 5% if the beneficial owner of the interest carries on business in the other contracting state through a PE and the debt on which the interest is paid is connected to such PE.
7. The rate is 0% for amounts paid to the government of the other contracting state and to entities of which the government owns at least 51% of the paid-up capital.
8. For dividends and interest, the rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is a resident of the other contracting state and is controlled by, or at least 49% of the capital is owned directly or indirectly by, the government or a governmental institution. A 0% rate also applies to interest arising on loans guaranteed by the government of the other contracting state or by a governmental institution or other governmental entity of the other contracting state.
9. A 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends.
10. The rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is resident of the other contracting state and is controlled by, or at least 25% of the capital is owned directly or indirectly by, the government or a governmental institution of the contracting state.
11. The rate is 0% if the beneficial owner of the interest is a resident in the other contracting state and the loan is secured or financed directly or indirectly by a financial entity or other local body wholly owned by the government of the other contracting state.
12. The 5% rate applies if the recipient of the dividends owns directly or indirectly at least 25% of the payer. The 10% rate applies to other dividends.
13. The rate is 5% if the beneficial owner of the dividends is a company that owns 10% or more of the issued and outstanding voting or 25% or more of the value of all of the issued and outstanding shares. The 15% rate applies to other dividends.
14. Dividends or interest paid by a company that is resident of a contracting state is not taxable in that contracting state if the beneficial owner of the dividends or interest is one of the following:
   • The government.
   • A political subdivision or a local authority of the other contracting state.
   • The Central Bank of the other contracting state.
   • Other governmental agencies or governmental financial institutions as may be specified and agreed to in an exchange of notes between the competent authorities of the contracting state.
In addition to the above existing tax treaties, Kuwait has signed the following tax treaties, but such treaties have not yet been ratified:

</table>

**Tax administration**

**Taxable period**

Tax is imposed on profits arising in a taxable period, which is defined as the accounting period of the taxpayer and further assumed to be the calendar year. However, the DIT may agree to a written request from the taxpayer to change the year-end to a date other than 31 December. Also, at the taxpayer's request, the DIT may agree to extend the accounting period, provided it does not exceed 18 months.

**Tax returns**

The taxpayer must submit a tax return, based on the taxpayer's books of account, within three months and 15 days of the end of the taxable period. A foreign entity can request an extension of up to 30 days for filing the tax declaration. The maximum extension in
time to be granted will be 60 days. If such an extension is granted, no tax payment is necessary until the tax declaration is filed, and payment must then be in one lump sum.

The taxpayer must keep in Kuwait certain accounting records, which are subject to inspection by the tax department’s officials. Accounting records may be in English and may be in a computerised system used to prepare financial statements, provided that the system includes the required records and the tax department is previously informed.

The tax return should be supported by the following:

- Audited balance sheet and profit-and-loss account for the period.
- Detailed list of fixed assets (e.g. additions, disposals).
- List of inventory (e.g. quantities and values).
- List of subcontractors and the latest payments to them.
- Copies of current contracts and a statement of income and expenditure for each.
- Trial balance, forming the basis of the accounts.
- Last payment certificate from the client.
- Insurance companies must attach to the Public Budget and the tax declaration a detailed statement with the reinsured documents and the related terms and conditions.

As a general rule, an assessment is finalised only after inspection of records by the tax department. As indicated above, proper documentation must be kept to support expenditure and to avoid disallowances at the time of tax inspection. If support is considered inadequate, the assessment is apt to be made on the basis of deemed profitability. This is computed as a percentage of turnover and is fixed arbitrarily, depending on the nature of the taxpayer’s business.

**Payment of tax**
Tax is payable in four equal instalments on the 15th day of the fourth, sixth, ninth, and 12th months following the end of the tax period. If an extension is approved by the DIT, all of the tax is payable upon the expiration date of the extension. Failure to file or pay the tax on time attracts a penalty of 1% of the tax liability for every 30 days of delay or part thereof.

**Objection process**
If a company disagrees with an assessment issued by the DIT, the company should submit an objection within 60 days from the date of the assessment. The DIT is required to resolve the objection within 90 days of the filing of the objection, after which a revised tax assessment is issued by the DIT. Upon issuance of a revised tax assessment, any additional tax is payable within 30 days. If the DIT issues no response within 90 days of filing the objection, this implies that the taxpayer’s objection has been rejected.

**Appeals process**
In case the objection is rejected or the taxpayer is still not satisfied with the revised tax assessment, the company may contest the matter further with the Tax Appeals Committee (TAC) by submitting a letter of appeal within 30 days from the date of the objection response or 30 days from the expiry of the 90 days following submission of an objection if no response is provided by the DIT.

The matter is then resolved through appeal hearings, and a final revised assessment is issued based on the decision of the TAC. Tax payable per the revised assessment must then be settled within 30 days from the date of issuance of the revised assessment.
Kuwait

Failure to do so results in a delay penalty of 1% of the amount of the tax due per the final assessment for each period of 30 days or part thereof of the delay.

**Statute of limitations**

Law No. 2 of 2008 introduced a statute of limitation period of five years into the tax law. The prior Kuwait tax law did not provide a statute of limitations for tax. However, under Article No. 441 of the Kuwait Civil Law, any claims for taxes due to Kuwait or applications for tax refunds may not be made after the lapse of five years from the date on which the taxpayer is notified that tax or a refund is due.

**Topics of focus for tax authorities**

The KTA has implemented an active approach to ensure the compliance of local companies with the tax retention mechanism, especially those who have franchise operations and agreement with foreign franchisors in Kuwait. In some cases, the KTA has asked the Kuwaiti companies to settle the 5% retention where the franchisors have failed to comply with the tax law requirements.

**Other issues**

**Offset program**

Kuwait has designed a counter-trade offset program to meet the objectives of its economic development plan. The offset program derives from the government’s concern that the long-term benefits from job creation and capital accumulation resulting from government contracts with foreign suppliers unfairly accrue to the suppliers, at the expense of Kuwaiti companies and citizens. The objective of the offset program is to remedy this problem by encouraging collaborative business ventures between foreign contractors and the Kuwaiti private sector. Accordingly, the offset program has been established with the following objectives:

- Promote sustainable economic development in Kuwait, by the assimilation of modern technology and know-how in the local economy.
- Support projects that generate high skilled jobs for Kuwaiti nationals.
- Attract foreign investment capital to facilitate economic development in Kuwait.

The following are significant aspects of the program:

- All civil contracts with a value of KWD 10 million and more, and defence contracts with a value of KWD 3 million and more, attract the offset obligations for contractors. The obligations become effective on the signing date of the contract.
- The contractors covered by the offset obligation are required to invest 35% of the value of the contract with Kuwaiti government bodies.
- Offset obligators have the following options for fulfilling their offset obligation:
  - Implement investment projects suggested by the offset program management.
  - Propose their own investment projects, and seek approval of the offset program management.
  - Purchase of commodities and services of Kuwaiti origin. The MOF is, however, still finalising detailed regulations in this regard.
- Contractors covered by the offset obligation must provide unconditional, irrevocable bank guarantees issued by Kuwaiti banks to the MOF equal to 6% of the contract price. The value of the bank guarantee submitted will be reduced gradually based on the actual execution of its work by the foreign contractor/supplier. The MOF has the right to cash in the bank guarantee if the offset obligor fails to respect their offset obligation.

Significant developments

During the past year, changes to the tax regime of taxpayers extracting and selling gold ore, gold concentrate, gold alloy, and refined gold were introduced. These changes entered into force starting from 1 January 2013 (see the Taxes on corporate income section for more information).

Starting from 1 January 2013, capital gain from disposal of participation interest is included into the aggregate annual income of the taxpayer subject to 10% profit tax.

Taxes on corporate income

Pursuant to the tax code, resident entities are subject to a corporate income tax, called the ‘profit tax’, on their aggregate annual income earned worldwide. Non-resident legal entities carrying out business activities through a permanent establishment (PE) in Kyrgyzstan are subject to profit tax on the income attributed to the activities of that PE.

Profit tax is calculated at a rate of 10% of aggregate annual income less allowed deductions.

Gold industry profit tax

Starting 1 January 2013, the profit tax rate for taxpayers extracting and selling gold ore, gold concentrate, gold alloy, and refined gold is set at 0%.

Additionally, a new tax (‘income tax’) has been introduced specifically for taxpayers extracting and selling gold ore, gold concentrate, gold alloy, and refined gold.

Income tax is calculated at a varying rate of 1% to 20% (depending on the world price of a troy ounce of gold) of revenues from selling gold alloy and refined gold or of the value of gold in the gold-bearing ore and gold concentrate calculated on the basis of world prices.

Local income taxes

There are no local income taxes in Kyrgyzstan.

Corporate residence

There is no concept of corporate residence in the Kyrgyzstan tax legislation.
Kyrgyzstan

Legal entities formed under the Kyrgyz law should be taxed in Kyrgyzstan on their worldwide income, whereas foreign legal entities should be taxed only in relation to Kyrgyzstan-sourced income.

**Permanent establishment (PE)**
Under Kyrgyzstan tax legislation, a PE is a permanent place of business through which a non-resident carries out business operations, including activities performed through an authorised person. A PE includes the following:

- Any place of management, department, office, factory, workshop, mining, oil and gas wells, land, construction site, or project.
- Any services rendered by non-residents by hiring personnel working in the territory of Kyrgyzstan for a duration of more than 183 calendar days within any consecutive 12-month period.

A PE is not created in Kyrgyzstan if a non-resident is limited to the following activities in Kyrgyzstan:

- Use of warehouses or buildings exclusively for storage or demonstration activities.
- Use of a fixed place of business exclusively for preparatory purposes.
- Performance of activities in Kyrgyzstan through an agent in cases where such agent usually performs such activities in the ordinary course of business.

Creation of a PE may be connected with the establishment of a branch or subsidiary. Both branches and subsidiaries are considered appropriate business vehicles for foreign investors, and the choice between them is determined by the business the investor is engaged in, along with various other factors.

**Other taxes**

**Value-added tax (VAT)**
In Kyrgyzstan, VAT is assessed on taxable supply and taxable imports. Input VAT assessed on purchases used for business purposes is generally offset against output VAT on taxable supplies. The VAT rate is 12%, except for certain zero-rated supplies and certain exempt turnover (see below).

All taxpayers registered for VAT purposes are required to charge VAT on their taxable supply and to calculate and report their VAT liabilities. Taxpayers are required to register for Kyrgyzstan VAT purposes if their taxable supply in the preceding 12 calendar months exceeds 4 million Kyrgyzstani som (KGS) (approximately 86,682 United States dollars [USD]). Even if an entity is not required to register for VAT purposes, it may still do so voluntarily by submitting an application to the appropriate tax committee.

**Place of supply of goods**
Goods and services are subject to VAT if they are deemed to be supplied in Kyrgyzstan under the place of supply rules. According to these rules, transactions are deemed to be made at the place where transport of the goods begins if the goods are transported by the supplier and at the place where the goods are transferred to the customer in all other cases. The rules regarding services are more complicated. Services that are not specifically mentioned are deemed to be supplied at the place where the service provider has established a place of business. Certain other services are deemed to be supplied at the place of the purchaser.
**Import of goods**
Generally, imports of goods are subject to VAT.

**Non-deductible input VAT**
The input VAT is not allowed for offset if it is subject to payment in connection with the receipt of goods, works, or services not related to entrepreneurial activity, or if it relates to inputs for VAT-exempt supplies.

**Zero-rated supplies**
Certain supplies are zero-rated for VAT purposes. These include exports (except for certain limited types of export), international transportation, and services connected with the service of transit air flights related with international transportation. Supply of goods, works, or services for official use of diplomatic and consular representations is taxable, but may be refunded, provided that certain conditions are met.

**Exempt supplies**
Certain supplies are VAT-exempt, including supplies and exports of gold and silver alloy and refined gold and silver, supplies of pharmaceuticals, land plots, residual buildings and construction, financial services, and export of works and services. When a taxpayer generates both taxable and exempt supplies, input VAT proportional to the ratio of the exempt supply to the total supply is disallowed for offset.

**VAT incentives**
Certain imports are VAT exempt, including imports of technological equipment, if used for one's own production purposes. Recently, a preferential offset method of VAT settlement in respect of certain fixed assets imported to Kyrgyzstan has been introduced, whereby the import VAT does not need to be paid to customs but is reflected simultaneously as input and output VAT in the VAT accounts.

**Reverse-charge VAT**
The current tax code does not have any provisions on reverse-charge VAT.

**VAT liability calculation and VAT offset carryforward**
In general, the VAT liability of a taxpayer is calculated as output VAT (i.e. VAT charged by a taxpayer) less input VAT (i.e. VAT paid by a taxpayer to its suppliers) in a reporting period. The excess of input VAT over output VAT may generally be carried forward against future VAT liabilities.

**VAT compliance**
The tax period for VAT is a calendar month. The submission of the VAT declaration is due by the 25th day of the month following the reporting period (except for major taxpayers, for which it is due by the end of the month following the reporting period). Payment of the VAT liability is due by the 25th day of the month following the reporting period.

**Sales tax**
Sales tax is assessed on Kyrgyz legal entities or foreign entities operating through a PE in Kyrgyzstan for any sales of goods or rendering of services. The sales tax mechanism differs from VAT, i.e. the sales tax is levied for the whole sales turnover and does not take into account the purchases (input turnover).
Sales tax rates are as follows:

- In case of the sale of goods, works, or services by VAT payers:
  - Trading activities: 1.5%.
  - Mobile communication activities: 5%.
  - Other activities: 2.5%.
- In case of the sale of goods, works, or services by non-VAT payers:
  - Trading activities: 2.5%.
  - Other activities: 3.5%.

The Kyrgyz Tax Code further defines trading activities as activities on sale of goods purchased for re-sale purposes.

The tax period of sales tax is a calendar month. Taxpayers have to submit tax returns and make payments of sales tax at the place of tax registration by the 20th day of the month following the reporting month.

**Customs duties and regimes**

According to the Customs Code, the customs value of goods imported to the customs territory of Kyrgyzstan is determined by applying the following methods:

- Transaction value of imported goods.
- Transaction value of identical goods.
- Transaction value of similar goods.
- Deductive method.
- Computed method.
- Provisional method.

Based on the Kyrgyzstan customs legislation, the rates of customs duties may be:

- *Ad valorem* - charged in percentage to customs value of the taxable goods.
- Specific - charged within established size for unit of the taxable goods.
- Combined - including both above mentioned types.

The rates in percentage range from 0% to 30%, however, the maximum rate of 35% may be charged if the country of origin is unknown.

**Import restrictions**

Generally, all entities or persons have equal rights to import and export or transfer goods into the Kyrgyzstan territory, including when carrying out foreign trade activity, except in special cases as stipulated by legislation and international treaties.

Import of certain goods (e.g. weapons, nuclear materials) is subject to licensing.

**Temporary import relief**

There is a temporary import regime under which foreign goods are used in Kyrgyzstan with full or partial conditional exemption from the payment of customs duties and taxes and without application of non-tariff regulatory measures. The term of the ‘temporary import’ customs regime may not exceed two years.

**Customs duties incentives**

Certain items are exempt from customs payments, including:
• Transportation vehicles used in the international conveyance of passengers and goods and items of material and technical supply in transit.
• Goods imported in the customs territory or imported from the customs territory for official and personal use by official state representatives of foreign states.

Kyrgyzstan provides preferential rates or exemptions on the importation (and export) of certain goods, including goods originating from the states that form free trade zones or a customs union with Kyrgyzstan and goods originating from developing countries, included on a special list provided by the government.

Documentation and procedures
Kyrgyzstan pays close attention to formalities/documentation, so it is necessary to furnish the customs authorities with a set of required documents. For import, such documents usually include cargo customs declaration, invoices, contracts, etc.

Warehousing and storage
There is a bonded warehouse customs regime in Kyrgyzstan. Under this regime, imports entering into Kyrgyzstan may be stored in special facilities or special areas that have the status of a customs warehouse under the customs legislation of Kyrgyzstan. This regime implies exemption from customs duties and taxes.

Generally, most goods (unless otherwise specifically provided for) can be placed under the bonded warehouse customs regime. The period for storage of goods at a bonded warehouse is determined by the person placing the goods into the customs warehouse but cannot exceed three years from the date when the goods were placed under the bonded warehouse customs regime.

Re-exports
The re-export regime is similar to that used in international practice. It is defined as a customs regime under which goods previously imported into Kyrgyzstan are exported without payment or with a refund of the paid amounts of import customs duties and taxes and without applying the non-tariff regulatory measures with respect to the goods in compliance with Kyrgyz legislation.

There are certain conditions under which goods can be re-exported. Customs duties and taxes are not charged for goods declared as goods intended for re-export. However, if the goods do not meet the re-export criteria, customs duties and taxes are paid in the amount that would be payable if the goods, at their importation, were declared for release for free circulation, as well as interest on them paid at the National Bank rates, as if deferment was provided with respect to the amounts at placement of the goods under the customs regime of re-export.

Excise tax
Certain goods manufactured in Kyrgyzstan or imported to Kyrgyzstan are subject to excise tax. These include certain alcohol and alcoholic drinks, fortified drinks, tobacco goods, and oil products.

The rates of excise tax are adopted annually by the Kyrgyzstan government and range from KGS 10 (approximately USD 0.2) for 1 litre of wine materials to KGS 3,000 for 1 ton of fuel (approximately USD 65). The rate for tobacco goods range from KGS 5 (approximately USD 0.1) to KGS 297 (approximately USD 6.4) based on the type of tobacco.
Kyrgyzstan

**Stamp taxes**
There are no stamp taxes in Kyrgyzstan.

**Subsurface use taxes**
The subsurface use taxes consist of separate bonus and royalty taxes on subsurface users, both Kyrgyz legal entities and branches of foreign legal entities. Under Kyrgyz legislation, subsurface users are legal entities and individuals who perform exploration and/or extraction of mineral resources.

The government, depending on the type of mineral resources, establishes the bonus rates.

The royalty rates are estimated either as a percentage of sales turnover (1% to 12%) or in absolute terms in Kyrgyzstani som, depending on the type of mineral resources.

**Payroll taxes**
The employer is obligated to withhold and transfer to the budget the income tax from its employees’ gross remuneration less allowable deductions. The income tax rate is 10%.

**Social contributions**
The social security system in Kyrgyzstan is comprised of the Pension Fund, Obligatory Medical Insurance Fund, and Employees Recovery Fund. The employer pays social contributions at 17.25% of employees’ gross remuneration from its own funds.

The employer is also required to withhold social contributions at 10% out of the salary that is payable by the employees to the Pension Fund and State Saving Fund.

**Local taxes**
There are two local taxes in Kyrgyzstan, property tax and land tax.

**Property tax**
Property tax is a local tax payable quarterly by legal entities owning transport vehicles and immovable property in Kyrgyzstan, including apartment houses, apartments, boarding houses, holiday inns, sanatoria, resorts, production, administrative, industrial, and other buildings or facilities. Certain real estate may not be subject to this tax according to special lists approved by the government.

In respect of immovable property, the tax rate is established by the city or local authorities at a rate not to exceed 0.8% of the estimated value of taxable objects, except for apartment houses and apartments designated solely for residence, for which the rate may not exceed 0.35% of the estimated value. The estimation can be performed by the state competent body and independent appraisers. For transport vehicles, the tax is computed in Kyrgyzstani som, depending on engine volume.

**Land tax**
Land tax is paid quarterly by legal entities on the area of owned land. The basic rates are provided in the tax code, depending on the location and purposes of the land. The basic rates may range from KGS 0.9 to KGS 2.9 per square metre (approximately USD 0.01 to USD 0.06).
**Branch income**

Branch income is subject to the profit tax. There is no special branch profits tax in addition to profit tax.

**Income determination**

Aggregate annual income is comprised of all types of income, including, but not limited to, the following, in addition to gross revenue from the sale of goods, works, or services:

- Interest income (except for income already subject to withholding tax [WHT]).
- Dividends.
- Royalties.
- Assets received free of charge.
- Rental income.
- Income from the reduction of liabilities.
- Foreign exchange gain.
- Write-off liability.

The tax code envisages some profit tax privileges aimed at developing certain areas of the business economy. Currently, these include privileges/preferences for:

- Charity organisations.
- Associations of invalids of I and II groups (i.e. persons with disability with different levels of physical disability), associations of blind and deaf persons.
- Agricultural organisations.
- Growing of berries, fruits, and vegetables.
- Credit unions.
- Companies that have been involved in the food industry for less than three years and included in the Kyrgyzstan government’s list of exempt companies.

Non-taxable revenues include, *inter alia*, the following:

- Property received as a charter capital contribution and income from realisation of shares of organisations.
- Property donated to special organisations using such property for development purposes under the government’s social culture plan. Despite being designated as property used for social culture purposes, such property may still be used for other purposes (i.e. citizen defence projects, mining equipment, water intakes, heat networks, roads, stations).

**Inventory valuation**

There are no special provisions on inventory valuation in the Kyrgyzstan Tax Code. Inventory valuation is conducted in accordance with the International Financial Reporting Standards (IFRS).

**Capital gains**

Capital gains are subject to the ordinary profit tax rate. There is an exemption available for capital gains from selling shares that occur on the date of a given sale in the official lists of the stock exchange in the top two categories of listing.
**Dividend income**
Dividends from participation in Kyrgyz legal entities are exempt from profit tax. All other dividends are subject to the ordinary profit tax rate.

**Interest income**
Interest income should be included into the aggregate annual income and taxed at the standard profit tax rate, provided the tax has not already been withheld at the source of payment in Kyrgyzstan at the 10% rate.

**Partnership income**
Simple partnerships are not taxpayers in their own right, and income and expenses flow through to the partners for tax reporting purposes. Kyrgyzstan limited liability partnerships are taxed as corporations.

**Foreign income**
Generally, Kyrgyz legal entities are taxable on income earned worldwide. Foreign income is subject to the ordinary profit tax rate.

There are no tax deferral provisions in Kyrgyzstan tax legislation.

---

**Deductions**

**Depreciation**
The tax code establishes a deduction for depreciation based on the declining-balance method. Depreciable fixed assets are divided into several groups, for which maximum depreciation rates range from 10% to 50%.

<table>
<thead>

</tbody>
</table>
Certain expenses are deductible within specified limits, including expenses on repairs, expenses on procuring and producing capital production assets, and certain other expenses.

**Goodwill**
Kyrgyzstan domestic tax legislation does not stipulate the allowance of a deduction for goodwill for profit tax purposes.

**Start-up expenses**
Kyrgyzstan domestic tax legislation does not stipulate the allowance of a deduction for start-up expenses for profit tax purposes.

**Interest expenses**
Deductions for interest actually paid on debts, where the loan proceeds were used to fund expenses incurred for the taxpayer's business activity, are allowed within limitations provided in the tax code, depending on methodology and nature of the debt. For example, interest on loans connected with the purchase of depreciable assets is not deducted, but increases their value.

**Bad debt**
As of 1 January 2013, bad debt amounts are deductible in Kyrgyzstan. The Tax Code defines a 'bad debt' as the amount the taxpayer is unable to fully receive as a result of the termination of an obligation by the court, bankruptcy, liquidation, or death of the debtor, or expiry of the limitation period provided by the civil legislation of Kyrgyzstan.

**Charitable contributions**
Deductions for donations of assets to charity and budget organisations are limited to 10% of taxable income.

**Fines and penalties**
Fines and interest penalties paid to the state budget are not deductible.

**Taxes**
The following taxes may be deducted:

- Land tax.
- Property tax.
- VAT not allowed for offset.
- Subsurface use taxes.

**Other significant items**
Generally, other expenses related to the earning of aggregate annual income are considered deductible for profit tax purposes, including:

- Business trip expenses that were actually incurred and supported by appropriate documentation (per diems during business trips are deductible only within the established statutory limits).
- Commissions on payroll expenses for labour.
- Material and social benefits provided to employees.
- Representational expenses connected with earning income (transportation, hotel, and translator services).
- Training and retraining of employees.
- Scientific development and exploration works (deductions are relevant for fixed assets).
Kyrgyzstan

- Any other costs related to earning income, which can be supported by appropriate documentation in terms of their nature and amount (e.g. invoices, payment orders, receipts).

The other categories of expenses that are not deductible include:

- Capital expenses and expenses connected with the purchase, production, and installation of equipment.
- Any expenses incurred on behalf of any other third persons, except in cases where documentation proves business needs for such expenses.
- Pricing losses caused by rates, understated below-market prices, and price incentives.
- Expenses connected with purchases of services in entertainment, vacations, and leisure.

**Net operating losses**
Net operating losses can be carried forward for up to five years. There are no provisions in Kyrgyz legislation allowing carryback of losses.

**Payments to foreign affiliates**
Payments to foreign affiliates are deductible for profit tax purposes if they are aimed at earning income and supported by documentation.

**Group taxation**
Group taxation is not permitted in Kyrgyzstan.

**Transfer pricing**
While there is no special law on transfer pricing in Kyrgyzstan, rules on transfer pricing are found in the tax code. The general transfer pricing provisions set in the tax code do not follow Organisation for Economic Co-operation and Development (OECD) guidelines (thus, no advance pricing agreement [APA] mechanism is provided). According to the Kyrgyz transfer pricing regulations, the tax authorities are empowered to determine the value of the following transactions:

- Transfers between related parties.
- Barter transactions.
- Cross-border transactions.

**Thin capitalisation**
There are no thin capitalisation limitations under the Kyrgyzstan tax code.

**Tax credits and incentives**

**Foreign tax credits**
There is no possibility to offset the amount of tax paid outside Kyrgyzstan against the Kyrgyz tax if there is no double tax treaty (DTT) with the country.

**Investment incentives**
There are no special tax preferences in the Kyrgyzstan Tax Code; however, Kyrgyz Law on Investments envisages that in case of changes in the tax and customs legislation, investors may apply terms that are more beneficial to them.
Special economic zones
There are four special economic zones in Kyrgyzstan: Naryn, Karakol, Bishkek, and Maimak. The special economic zones generally provide for a tax-neutral regime, exemption from customs duties, and a liberal currency control regime. However, there is a special fee for incentives, which varies from 0.1% to 2% of sales (depending on the region).

Park of Innovative Technologies
Activities of residents of the Park of Innovative Technologies are exempt from profits tax, sales tax, and VAT, providing they meet requirements of the Tax Code of Kyrgyzstan. The tax rate for employees of residents of the Park of Innovative Technologies and individual entrepreneurs is 5%.

Withholding taxes
Passive income from sources in Kyrgyzstan by a non-resident that is not connected with a PE is taxable at the source of payment, without deductions, at the following rates:

- Dividends and interest: 10%.
- Insurance premiums received under risk insurance or re-insurance agreements: 5%.
- Authorship fee and royalty: 10%.

Income obtained by a non-resident from performing activities and services in Kyrgyzstan, not connected with a PE, is taxable at the source of payment, without deductions (with the exception of VAT), at the following rates:

- Income from telecommunication or freight services in international communication and transportation between Kyrgyzstan and other countries: 5%.
- Income from management and consulting services: 10%.
- Other services and activities: 10%.

WHT applies to Kyrgyzstan-source income regardless of whether the payment is made within or outside of Kyrgyzstan.

The application of DTTS often effectively provides a reduction of WHT rates or, in the case of non-passive income, an income tax exemption. Note that the application of treaty privileges is not necessarily automatic, and taxpayers may need to comply with certain administrative procedures to secure relief.

Tax treaties
According to the tax code, the provisions of international tax agreements and other acts to which Kyrgyzstan is a party and ratified by the President or the Parliament (as appropriate) take precedence over the provisions of the tax code.

As of 1 January 2013, Kyrgyzstan has concluded DTTS with the countries listed in the following table, which shows the corresponding WHT rates:

<table>

Notes

1. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the paying company.
2. 5% if the beneficial owner is a company (other than a partnership) that owns not less than 10% of the capital of the paying company.
3. 5% if the beneficial recipient is a company that owns not less than 50% of the capital of the paying company.

Tax administration

Taxable period
The taxable period for profit tax is one calendar year.

Tax returns
The tax code stipulates that the Aggregate Annual Income Tax Declaration must be filed with the tax authorities by 1 March of the year following the reporting year.

Tax authorities may grant an extension for filing a tax return for up to one month upon application by the taxpayer. Such extension does not relieve or prolong the taxpayer’s obligation to pay the tax in a timely manner.

Payment of tax
Tax payments should be made as follows:

- Advance payments on profit tax: quarterly by the 20th day of the second month of the reporting quarter.
- Final payments on profit tax: 1 March of the year following the reporting year.
- Tax withheld at the source of payment by a tax agent: by the 20th day of the month following the month when income was recognised.
**Tax audit process**
The State Tax Inspectorate of the Ministry of Finance of Kyrgyzstan and its local tax authorities are the only state authorities that have the right to perform tax audits. The Kyrgyzstan tax service consists of relevant subdivisions of the revenue committee of the Ministry of Finance of Kyrgyzstan and its local authorities.

A tax audit is performed based on a written notification from the Head of the State Tax Inspectorate, which specifies the name of the company to audit, the scope of the audit, and the terms of the audit. Tax audits may be performed not more than once a year by one of the tax authorities (district, city, region, or the state tax authorities) and should not last more than 30 days. If necessary, however, a tax audit may be extended for ten additional days with written approval from the State Tax Inspectorate.

**Statute of limitations**
The period of limitation for tax liability is six years.

**Topics of focus for tax authorities**
Generally, the Kyrgyz tax authorities focus on the support for profit tax deductions, correctness of tax calculations, and WHT issues during the tax audits. Recently, we have also observed the rising interest of the tax authorities in transfer pricing issues.
**Significant developments**

New Tax Law 2011 was promulgated, which replaces Tax Law 2005. Under Tax Law 2005, taxes in Lao People’s Democratic Republic (PDR) were divided into two main groups: indirect taxes and direct taxes. Indirect taxes consisted of the (i) business turnover tax and value-added tax (VAT) and (ii) excise tax. Direct taxes consisted of the (i) profits tax (PT or corporate income tax), (ii) minimum tax (MT), and (iii) income tax (including personal income tax). Under the new Tax Law 2011, the business turnover tax and MT are abolished, and the environmental tax and lump-sum tax are introduced. The lump-sum tax is a tax imposed on small and medium business operators that are not registered in the VAT system. For small and medium business operators, the lump-sum tax is paid in lieu of the PT. Therefore, the lump-sum tax is regarded as a tax within the PT category.

Under the new Tax Law 2011, the rate of PT was reduced from 28% to 24%.

Note that even though it is stated in the new Tax Law 2011 that the Law is effective starting from 1 October 2012, in practice, some provisions of the new Tax Law 2011 are effective as of 1 January 2013 or when the relevant supporting regulations are issued. This means some provisions of Tax Law 2005 and its relevant regulations are still in force.

- The PT rate of 28% was effective through 31 December 2012. The new PT rate of 24% is effective as of 1 January 2013.
- MT was applicable through 31 December 2012. It is abolished as of 1 January 2013.
- Computation of PT by means of fixing (mandatory tax assessment) under Article 21 of Instruction No. 2137/MOF Implementation of Tax Law 2005 is still effective until the new relevant regulations are put in place.
- The rates of excise tax on vehicles under Tax Law 2005 are still applicable until the relevant supporting regulations of the Tax Law 2011 are issued.
- The Environmental Tax will not be applicable until the relevant regulations are issued.

**Taxes on corporate income**

**Profits tax (PT)**

All companies (including all forms of legal entities) that are registered under Lao PDR law are subject to PT on their worldwide income. Companies formed under foreign law, operating a business in Lao PDR, and conducting business in Lao PDR are subject to tax on their income derived in Lao PDR.

Effective 1 January 2013, the standard rate of PT for companies in Lao PDR has been lowered to 24% from 28%. The 24% rate applies to both domestic and foreign investors.
Tax holidays and reduced PT rates are applicable to companies whose investment activities qualify as promoted investment activities (see the Tax credits and incentives section for more information).

**Minimum tax (MT)**
Under the new Tax Law 2011, there is no MT as of 1 January 2013. Prior to 1 January 2013, companies that operated at a loss or had profits below a certain level were subject to MT unless the company’s loss or profit was certified by an independent auditing firm recognised by the government. MT rates were 0.25% of gross receipts for manufacturing companies and 1% of gross receipts for trade and service companies.

**Lump-sum tax**
The lump-sum tax is a new tax that was introduced under new Tax Law 2011. The lump-sum tax is a tax imposed on small and medium business operators that are not registered in the VAT system. The lump-sum tax is paid in lieu of the PT. Therefore, the lump-sum tax is regarded as a tax within the PT category.

**Local income taxes**
There are no provincial or local income taxes in Lao PDR.

**Corporate residence**
Like Tax Law 2005, there is no definition of residence or permanent establishment (PE) provided in the new Tax Law 2011 (which is currently in force). However, the concept of PE is provided in the existing Law on Value-Added Tax 2009 (Article 3(9)). This article states:

‘Permanent Business Establishment’ is referred to as an establishment where a taxpayer operates her/his business on a regular basis. Establishments considered to be permanent include administrative offices, branch offices, factories, mining/extraction sites, construction fields or sites, and any site where undertakings take place.

It is understood that the reason for having no PE definition in the law is because there is foreign contractor withholding tax (FCWHT) levied on foreign entities conducting their business activities in Laos. For more information about the FCWHT, please see the Withholding taxes section.

**Other taxes**

**Valued-added tax (VAT)**
VAT was introduced with the purpose of replacing the business turnover tax. However, the business turnover tax was applicable to business operators who were not (or were not qualified to be) registered in the VAT system until 1 October 2012, when the business turnover tax was abolished by the new Tax Law 2011.

The standard VAT rate is 10%.

VAT is imposed on the final consumer of goods and services. Goods and services used for production, trading, and consumption in Lao PDR, goods imported into Lao PDR, and services rendered by foreigners to Lao PDR customers are subject to VAT.
Lao People’s Democratic Republic

Certain goods and services are exempt from VAT. Exempted items include unprocessed agricultural products, seeds, fertilisers, textbooks, education services, medical services, banking services, and insurance.

Exported goods and services are zero-rated. The conventional credit method is used to calculate the VAT payable (i.e. output VAT less input VAT). Excess input VAT can be carried forward for six months (extendable). Input VAT for exports is refundable.

Business operators engaged in production or trading of taxable goods and services must register in the VAT system if their annual revenue is 400 million Lao kip (LAK) or more. Companies below this threshold may voluntarily register. Only registered VAT payers may claim VAT refunds.

One unique feature of Lao PDR VAT is that VAT is charged on withholding taxes (WHTs).

**Import duties**
All goods imported into Lao PDR are subject to import duty. Exemptions are available to enterprises operating promoted investment activities (see the Tax credits and incentives section for more information).

Lao PDR has adopted the General Agreement on Tariffs and Trade (GATT) valuation principles. Duty rates are based on the Association of Southeast Asian Nations (ASEAN) harmonised tariff nomenclature for imports from ASEAN member countries; otherwise, normal rates are applied. Duty rates range between 0% and 40% depending on whether the goods are ASEAN or other source.

**Excise taxes**
Excise tax applies to the import and sale of certain luxury products. Excisable goods include alcohol, beer, cigarettes, perfume, cosmetics, motor vehicles, soft drinks, mineral water, and many types of electrical equipment. Excise tax rates range from 5% to 150%.

Under the new Tax Law 2011, the excise tax rates on vehicles range from 25% to 150%. However, the rates under Tax Law 2005 are still applicable until the relevant supporting regulations of the new Tax Law 2011 are issued.

**Property taxes**
Land taxes vary depending on the location and the type of the land (e.g. land for construction, agriculture). The calculation of the land tax is based on both the location and the size of the land and is levied at annual rates per square meter. Land tax is payable in the first quarter of the relevant calendar year.

**Transfer taxes**
There are no transfer taxes in Lao PDR.

**Stamp taxes**
The stamp taxes in Lao PDR range from LAK 2,000 to LAK 20,000, depending on the types of documents.

**Administrative fees**
Under the Tax Law, government sectors can collect fees for issuing fiscal licences, business licences, permits, visas, advertisement boards, broadcasting rights, and other services. The charges and service fees are set periodically by Presidential Decree.
Social Security Scheme contributions
An enterprise with ten or more employees must register itself and its employees in the Social Security Scheme and make contribution to the scheme. Both the enterprise and its employees are obligated to contribute to the Social Security Scheme a combined 9.5% of the employees’ basic salaries or wages. The enterprise contributes 5% and each employee contributes 4.5%. At the moment, the basic amount for Social Security Scheme calculation is capped at LAK 2 million.

Branch income
Branches of foreign companies are taxable on their income from carrying on business in Lao PDR.

Income determination
The PT calculation is based on an entity’s actual accounting profits as adjusted for tax purposes. The Lao PDR tax regulations are silent on the treatment of a large number of items. Generally, in such cases, the tax treatment will follow the accounting treatment. Some of the more common differences are depreciation, entertainment expenses, and the non-deductibility of reserves and provisions (until actually paid).

Inventory valuation
Inventory valuation for tax purposes follows the method used for accounting purposes in Lao PDR.

Capital gains
There is no separate tax on capital gains in Lao PDR. However, profits from the sale of shares are subject to tax at a rate of 10%. The buyer of the shares is required to withhold and remit the tax.

Unlike the previous tax laws, PT on sales of real property is introduced under the new Tax Law 2011. Under this new law, the rate of PT on sale of real property is 5%.

Dividend income
Dividends received from another Lao PDR company or a foreign company are taxed at a flat rate of 10%.

Interest income
Interest income is taxable in Lao PDR, except for interest income derived from loans lent by commercial banks and interest income derived from money deposited with commercial banks. The rate of PT on interest income is 10%.

Rents/royalties income
Rents and royalties income are taxable in Lao PDR. The rate of PT on rental income is 10% (reduced from 15%), and the rate of PT on royalty income is 5%.

Unrealised exchange gains/losses
Unrealised exchange gains are not taxable and losses are not deductible in Lao PDR.

Foreign income
There is no controlled foreign company (CFC) or similar regime in Lao PDR. Profits of a foreign subsidiary are taxable when remitted as dividends.
**Deductions**

Accrued expenses are deductible in Lao PDR. Reserves and provisions are not deductible until actually settled.

**Depreciation**

Depreciation rates are prescribed in the tax law and may differ from financial accounting. Depreciation is on a straight-line basis over prescribed useful lives, as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings used for industrial purposes:</td>
<td></td>
</tr>
<tr>
<td>with useful life of 20 years or less</td>
<td>20</td>
</tr>
<tr>
<td>with useful life over 20 years</td>
<td>50</td>
</tr>
<tr>
<td>Buildings used for commercial and residential purposes:</td>
<td></td>
</tr>
<tr>
<td>Permanent structures</td>
<td>20</td>
</tr>
<tr>
<td>Semi-permanent structures</td>
<td>10</td>
</tr>
<tr>
<td>Machinery, equipment, vehicles</td>
<td>5</td>
</tr>
<tr>
<td>Software</td>
<td>2</td>
</tr>
<tr>
<td>Office equipment</td>
<td>5</td>
</tr>
<tr>
<td>Ships and passenger aircraft</td>
<td>20</td>
</tr>
</tbody>
</table>

**Goodwill**

There is no specific guidance on the deductibility of goodwill or amortisation in Lao PDR.

**Start-up expenses**

Start-up expenses are amortisable over two years in Lao PDR.

**Interest expenses**

Interest is deductible on an accrual basis following the accounting treatment. All interest payments must be supported by documents showing that the payments are commercially reasonable. Interest paid to a shareholder is not deductible.

**Bad debt**

Bad debt reserves are not deductible in Lao PDR. However, a deduction is allowed when debt is written off.

**Charitable contributions**

Charitable contributions in Lao PDR are limited to 0.30% of annual revenue.

**Entertainment expenses**

Entertainment expenses are capped at 0.40% of annual revenue.

**Pension expenses**

Pension expenses are deductible when paid in Lao PDR.

**Bribes, kickbacks, and illegal payments**

Bribes, kickbacks, and illegal payments are not deductible in Lao PDR.

**Fines and penalties**

Fines and penalties are not deductible in Lao PDR.
**Taxes**
PT and input VAT paid when purchasing fixed assets are not deductible.

**Net operating and capital losses**
Tax losses can be carried forward for three years, but no carryback is allowed. A change in control will not impact a company's loss carryforward. Capital losses are treated as ordinary losses.

**Payments to foreign affiliates**
Payments to foreign affiliates are deductible if in the ordinary course of business.

---

**Group taxation**
Consolidation or grouping is not permitted, and each entity must file on a separate basis in Lao PDR.

**Transfer pricing**
There are no specific transfer pricing rules in Lao PDR. However, inter-company transactions should be at arm's length.

**Thin capitalisation**
The ratio of debt to capital must not exceed 70% of the total capital for concession investment activities. There are no thin capitalisation rules for general investment activities in Lao PDR.

---

**Tax credits and incentives**

**Foreign tax credit**
There is no foreign tax credit regime in Lao tax law. However, certain tax treaties entered into by Lao PDR do have provisions for either deductibility of foreign tax or a credit.

**PT incentives**
PT incentives are provided under the Law on Investment Promotion 2009. This law divides investment areas into three zones, namely Zone 1, Zone 2, and Zone 3, and divides the investment activities into three different levels of promoted activities, namely Promoted Activity 1, Promoted Activity 2, and Promoted Activity 3. The PT exemptions are as follows:

<table>
<thead>
<tr>
<th>Zone</th>
<th>Areas</th>
<th>Promoted Activity 1 (years)</th>
<th>Promoted Activity 2 (years)</th>
<th>Promoted Activity 3 (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Mountainous, plain, and plateau zones with no economic infrastructure to facilitate investments.</td>
<td>10</td>
<td>6</td>
<td>4</td>
</tr>
<tr>
<td>2</td>
<td>Mountainous, plain, and plateau zones with a moderate level of economic infrastructure suitable to accommodate investments to some extent.</td>
<td>6</td>
<td>4</td>
<td>2</td>
</tr>
<tr>
<td>3</td>
<td>Mountainous, plain, and plateau zones with good infrastructure to support investments.</td>
<td>4</td>
<td>2</td>
<td>1</td>
</tr>
</tbody>
</table>

---

Lao People’s Democratic Republic
PT exemption starts from the date of the enterprise beginning its business operations. For activities producing new products, research, and new technology, the PT exemption commences from the date the enterprise starts making profit. After finishing the period of PT exemption as mentioned above, the enterprise shall pay PT in accordance to the Tax Law.

Mining and hydro power concession and tree plantation shall comply with concerned laws.

**Incentives related to customs duty and other taxes**
In addition to the incentives related to PT, investors shall also be entitled to the following customs duty and other tax incentives:

- Exemption from PT in the next accounting year for a business that spends its net profit to expand its business.
- Exemption from import duty on raw materials, equipments, spares parts, and vehicles that are directly used for production. As for import tax exemption of these items, one shall comply with specific regulations.
- Exemption from export duty for exporting general products. As for export of natural resources and products from natural resources, one shall comply with concerned laws and regulations. Importation of all types of fuel is not exempted from import duties and taxes.
- Investor can transfer the annual losses to the next following year to be deducted from profit within the period of three years; however, the losses shall be audited and certified by the tax officer. After this period, the remaining loss is not allowed to be deducted from profit anymore. In the case of the Special and Specific Economic Zones, the incentives related to customs duties and other taxes shall comply with the Decrees on the establishment and management of each zone.

**Specific promotion incentives**
Investment in hospitals, kindergartens, academic schools, vocational schools, colleges, universities, research centres, and some activities related to public utilities shall obtain an exemption of rental or land concession as follows:

- Zone 1: exemption of rental or land concession for 15 years.
- Zone 2: exemption of rental or land concession for ten years.
- Zone 3: exemption of rental or land concession for three years.

Investment in hospitals, kindergartens, academic schools, vocational schools, colleges, universities, research centres, and public utilities shall obtain an additional five year period of PT exemption.

**Withholding taxes**
WHT is applied to various types of payments made to domestic and foreign recipients.

</tbody>
</table>

* The rate stipulated under Lao PDR law is lower than the limit provided in the DTT.

**Foreign contractor withholding tax (FCWHT)**

A FCWHT on payments to foreign contractors applies where a Lao PDR contracting party contracts with a foreign party that does not have a licence to do business in Lao PDR (regardless of whether the services are provided in Lao PDR or outside Lao PDR). The FCWHT comprises both a PT and VAT element and is the final tax on the foreign company. The FCWHT withholding and filing obligation rests with the Lao PDR customer.

For foreign contractors, PT must be withheld at a deemed percentage of taxable turnover. The deemed rates are determined according to the nature of the contract or activity.

</tbody>
</table>

The above rates are under Article 21 of Instruction No. 2137/MOF on Implementation of the Tax Law 2005. According to the Tax Department, these rates are applicable until the relevant supporting regulations of the new Tax Law 2011 are issued.

These PT rates are then added to the VAT at 10% to determine the total FCWHT. For example, a foreign service charge of LAK 1,000 would result in LAK 70 of PT and LAK 100 of VAT for a total FCWHT of LAK 170.
Lao People’s Democratic Republic

**Tax administration**

**Taxable period**
PT is determined on a calendar year basis.

**Tax returns**
The tax return is due by 10 March of the subsequent year. Submission of the final tax return will be followed by an audit by the Tax Department.

**Payment of tax**
PT is payable quarterly in advance, with a final payment after year end. The first three payments are due 10 April, 10 July, and 10 October of the current tax year. The final payment is due with the submission of the final tax return on 10 March of the subsequent year. The quarterly payments are based on the prior year’s PT (or expected tax for the current year). Any excess PT payment can be carried forward to the subsequent year.

**Tax audit process**
Most large companies are audited annually in Lao PDR.

**Statute of limitations**
The statute of limitations is generally three years in Lao PDR.

**Topics of focus for tax authorities**
There are no areas of special focus in tax examinations in Lao PDR.
**Latvia**

**Significant developments**

**Corporate income tax (CIT) Act amendments effective from 2013 and 2014**

**New withholding tax (WHT) rules**
Significant amendments to the CIT Act provide WHT exemption on the following payments:

- Dividends paid to any non-resident company that does not reside in an offshore territory (effective from 1 January 2013).
- Interest payments to any non-resident company that does not reside in an offshore territory (effective from 1 January 2014).
- Royalty payments to any non-resident company that does not reside in an offshore territory (effective from 1 January 2014).

Interest and royalties paid to a related European Union (EU)/European Economic Area (EEA) company will not attract WHT from 1 July 2013 based on the transitional period of implementing Interest-Royalty Directive in Latvia.

**Capital gains**
From 1 January 2013, capital gains from trading in non-public shares, except offshore company shares, are not taxable and losses are not tax deductible. Capital gains from trading in other non-public securities are taxable and losses are tax deductible. Transactions with public EU/EEA securities remain tax neutral, capital gains are not taxable and losses are non-deductible. Capital gains from other public securities (except shares) are taxable and losses are non-deductible.

**Taxation of dividends**
Dividends received from companies in other countries, excluding companies registered in low tax jurisdictions or tax havens, should not be included in the taxable income of a Latvian company as of 1 January 2013.

**New value-added tax (VAT) Act**
The new VAT Act entered into effect as of 1 January 2013, and the main changes relate to:

- Procedure of issuing tax invoices.
- Optional provision on taxation of ‘unused’ real estate.
- Self billing possibility.
- Right to avoid making input tax adjustments for destroyed or stolen property as well as for low-value gifts and product samples given away in the course of business.
- Time limit for paying VAT to the State Revenue Service (SRS) (for reverse-charge supplies, a time limit for calculating and reporting VAT on the VAT return).
Latvia

Requirements for transfer pricing documentation
Amendments to the Latvian Taxes and Duties Act have been effective from 1 January 2013. The new provisions lay down requirements for transfer pricing documentation that Latvian taxpayers must prepare to substantiate that their related party transactions are at arm's length. Full transfer pricing documentation is mandatory for companies with turnover in excess of 1 million Latvian lats (LVL) (approximately 1.423 million euros [EUR]), and related-party transactions amounting to LVL 10,000 (approximately, EUR 14,230) or more. Nevertheless, it is also highly advisable to prepare the transfer pricing documentation for companies below the threshold set, as it may be of valuable support during tax audits.

Taxes on corporate income
The standard rate of CIT is 15%. The tax is assessed on a company's financial profit (loss) that has been adjusted by certain corrections required by law. There are no other taxes on corporate income stated either by the government of Latvia or by local municipalities.

Resident companies are taxed on their worldwide income.

Non-resident companies are taxed on their Latvia-source income through permanent establishment (PE) at the standard CIT rate. If no PE is created, non-residents may be taxed with 0% to 15% WHT for qualifying payments (e.g. royalties, management fees, interest).

Micro-business tax (MBT)
The Micro-business Tax Act gives existing and newly-formed businesses the opportunity of acquiring micro-business status and registering for MBT if they meet the following criteria:

- The shareholders are individuals who are also concurrently members of the board.
- The turnover does not exceed LVL 70,000 (approximately EUR 99,601) in a calendar year.
- The number of employees does not exceed five at any time. Absent employees or employees suspended from work are not included in the number of employees.

The standard MBT rate is 9% of a micro-business’s turnover and covers payroll taxes, business risk duties, and CIT. The standard rate may be increased in the following cases:

- If its quarterly staff count exceeds five, then 2% per extra employee will be added to the standard rate.
- If the turnover exceeds LVL 70,000 (approximately EUR 99,601) in a calendar year, the excess will attract a rate of 20%.
- If an employee’s net income exceeds LVL 500 (approximately EUR 711) a month, the excess will also attract a rate of 20%.

Corporate residence
A company is resident in Latvia if it is incorporated or had to be incorporated in Latvia.
Permanent establishment (PE)
Under the Latvian Taxes and Duties Act, a non-resident has a PE in Latvia if all three of the following conditions are met simultaneously:

- The non-resident uses a fixed place for activities in Latvia.
- The place for activities is permanently used or is established for the purpose of being used permanently.
- The place for activities is used for the performance of commercial activities.

In addition, it is considered that a non-resident has a PE in Latvia if the non-resident performs in Latvia at least one of the following activities:

- Uses a construction site or performs building or installation activities or supervision or consultative activities related to the construction site or aforementioned activities.
- Uses equipment or installations, drilling platforms and special ships intended for the research or extraction of natural resources, or carries out supervisory or consultative work related thereto.
- Within a time period, which together exceeds 30 days in any six-month period, provides services, including consulting, management, and technical services, utilising one’s employees or associated personnel.
- Uses the activity of an individual, legal, or other person for the benefit of one’s commercial activities, provided that this person is authorised to enter into contracts in the name of the foreign entity and the person regularly (more than once in a taxation period) exercises such an authority.

Note that the PE risk for entities located in treaty countries should be tested in accordance with the relevant double tax treaty (DTT).

Other taxes
Value-added tax (VAT)
The following VAT rates apply in Latvia:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
A number of services are exempt, including education, financial, medical, and insurance services; nursery fees; and the sale of used real estate, including land (except for building land, which is taxable).

**Customs duty**
Customs duty is levied on goods imported into Latvia. The rate of customs duty generally is between 0% and 20% of the value of imported goods, depending on the type and origin of such goods. Exports are generally exempt from customs tax.

**Excise duty**
An excise duty is levied on specific categories of goods, mostly as a fixed amount per unit. Excise duties are applied to the following goods, whether made in Latvia or imported:

<table>
<thead>
<tr>
<th>Product</th>
<th>Excise amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oil and oil products</td>
<td>Up to LVL 320 per 1,000 litres, depending on the type of the product.</td>

</tr>
<tr>
<td></td>
<td>LVL 70 per 1,000 m³ for use as fuel.</td>
</tr>
</tbody>
</table>

**Real estate tax**
The real estate tax is payable annually for:

- Business properties, such as land and buildings used for economic activities, as well as engineering structures, such as motorways, streets, roads, parking places, bridges, elevated highways, tunnels, pipelines, communication lines, and power lines.
- Buildings that form part of a private dwelling house development (also if owned by a company but not used for living purposes).

Statutory real estate tax rates are as follows:
• The standard rate of 1.5% on the cadastral value of land, buildings, and engineering structures.
• A progressive rate for dwelling houses, their parts, and any parts of a non-residential building that are functionally used for living and not used in trade or business:
  • 0.2% of cadastral values up to LVL 40,000.
  • 0.4% of cadastral values exceeding 40,000 but not exceeding LVL 75,000.
  • 0.6% of cadastral values exceeding LVL 75,000.
• Up to 3% for uncultivated land capable of agricultural use, unless it is up to one hectare in area or subject to statutory restrictions on agricultural activity. By law, uncultivated land capable of agricultural use is agricultural land that is not used for making or growing agricultural products (including harvesting, grazing, and keeping animals for agricultural purposes) or is not kept in good agricultural and environmental condition. Municipalities may also determine an additional rate 1.5% for uncultivated land, thus the total rate for this land may reach 4.5%.

A 3% rate can also be applied by municipalities if buildings may cause a threat to people because of their condition.

As of 1 January 2013, municipalities may determine the rate within the interval from 0.2% to 3%. If a municipality does not announce the rates until 1 November before the taxation period, then statutory rates apply.

Newly constructed or reconstructed buildings are exempt from real estate tax for one year after completion. Other reliefs are available under the Real Estate Tax Act or determined by municipalities.

**Stamp duty**

Stamp duties are levied on certain legal and other kinds of services, such as court trials, company formation and registration, licences for certain types of business activity, provision of information, notary services, operation of bills of exchange, and registration of real estate at the Land Registry (e.g. in case real estate is sold: 2% of the higher of deal value or cadastral value, capped at LVL 30,000 per property).

Stamp duty is not payable if re-registration of real estate in the Land Registry is necessary due to the reorganisation process. The maximum amount of stamp duty payable for re-registration of the title to immovable property in case of contribution in kind to a company’s capital is LVL 1,000.

**National social insurance contributions (NSIC)**

The company as an employer is liable to pay 24.09% NSIC calculated on employee’s gross salary.

**Natural resource tax**

Any natural resources acquired as a result of economic activities (e.g. surface and underground water, dolomite, and quartz sand), the collection of edible park snails, taking advantage of useful features of the bowels of the earth by pumping natural gas or greenhouse gases into geological structures, pollution (waste, emissions, and pollutants), products harmful to the environment (e.g. lubricating oil, electric batteries, oil filters, and tyres), electrical and electronic equipment and appliances, radioactive substances, packaging, disposable tableware, means of transport, the volume of emitted greenhouse gasses that is not included in the number of emission quotas surrendered, coal, coke and lignite are subject to a natural resource tax in Latvia. The rates are specific for each product and are based on weight, volume, or the amount of the product.
The taxpayer may reduce the natural resource tax by taking part in recycling programs for packaging, products harmful to the environment, electrical and electronic equipment and appliances, and means of transport. Taxpayers do not have an obligation to recycle, themselves, to be entitled to the relief; instead, they can conclude an agreement with the recycling company.

For some of the products, the taxpayer must also pay the disposal tax. The rates differ for a large variety of products.

**Vehicle taxes**
There are two vehicle taxes in Latvia, a vehicle usage tax and a light corporate vehicle tax. The first is payable for exploitation of trucks, and the second is payable for light vehicles held or owned by a company.

**Vehicle usage tax**
The vehicle usage (exploitation) tax amount depends on vehicle classification by vehicle features under statutory provisions. For example, the vehicle usage tax for trucks with gross weight up to 12,000 kg is payable in accordance with the gross weight of these trucks in the following amounts:

- Up to 1,500 kg: LVL 12.
- Between 1,501 kg and 1,800 kg: LVL 24.
- Between 1,801 kg and 2,100 kg: LVL 45.
- Between 2,101 kg and 2,600 kg: LVL 54.
- Between 2,601 kg and 3,500 kg: LVL 72.
- Between 3,501 kg and 12,000 kg: LVL 102.

The vehicle usage tax for trucks with gross weight above 12,000 kg shall be payable depending on the number of axles the truck has and the driving axle suspension type and can vary from LVL 120 to LVL 378.

The vehicle usage tax is payable on a yearly basis and it must be paid in full amount prior to the state technical inspection.

**Light corporate vehicle tax (LCVT)**
LCVT is paid for vehicle(s) owned or held (e.g. rented) by a business person, which is registered for the first time after 1 January 2005, and with information on the engine volume in the registration certificate. There is a fixed rate of LCVT calculated according to the engine volume, as follows:

- Up to 2,000 cc: LVL 19 per month.
- From 2,001 cc to 2,500 cc: LVL 30 per month.
- Over 2,500 cc: LVL 40 per month.

For vehicles not mentioned in the above criteria, the LCVT will be LVL 30 per month.

**Car and motorcycle duty**
Cars and motorcycles registered for the first time or after modification are subject to a car and motorcycle duty. This duty is payable by any individual or entity registered as the owner of a car or motorcycle.

The applicable tax rates for cars registered in foreign countries are calculated based on the carbon dioxide (CO2) on each kilometre constituted by the car. The rates range from LVL 0.3 to LVL 5 where the CO2 is from 120 grams to 350 grams for
each kilometre. The rate for newly registered motorcycles is LVL 0.10 for each cubic-centimetre of the engine’s capacity.

For other cars, rates range from LVL 75 to LVL 850, depending on age and capacity. The rate for motorcycles depends on age and is 25% of the rate for cars.

**Lottery and gambling tax**
A lottery and gambling tax is levied on licensed organisers of games or lotteries. Licence fees range from LVL 3,000 to LVL 300,000. Game organisers, gambling places, and gambling machines are subject to the gambling tax. The tax rates depend on the number and type of gambling machines or percentage of income for several gambling types.

**Electricity tax**
The electricity tax is levied on electricity supplied to final consumers or consumed by suppliers. The rate is LVL 0.71 per mega-watt-hour. Exemptions are available to producers of electricity and for electricity used by domestic public transport and households.

**Local duties**
Certain activities are subject to local duties (e.g. construction permits).

---

**Branch income**
As a general rule, branches and resident companies are taxed alike, with certain adjustments for payments to the head office. Branch income is subject to a 15% CIT.

---

**Income determination**

**Inventory valuation**
Dictated by the matching and prudence concepts, stock should be valued at the lower of cost or net realisable value. Cost must be computed on a first in first out (FIFO) basis. Cost can mean purchase price or production cost. Any unrealised losses from stock revaluation are non-deductible.

**Capital gains**
From 1 January 2013, capital gains from trading in non-public shares, except offshore company shares, are not taxable and losses are not tax deductible. Capital gains from trading in other non-public securities are taxable and losses are tax deductible. Transactions with public EU/EEA securities remain tax neutral, capital gains are not taxable and losses are non-deductible. Capital gains from other public securities (except shares) are taxable and losses are non-deductible.

Capital gain on the disposal of a capital asset is calculated as the difference between the sale proceeds and cost. This gain is subject to a 15% CIT as ordinary income. Unutilised losses arising on the sale of securities other than EU/EEA public securities before 2013 may be offset in chronological order against the company’s taxable income of future tax periods.
**Latvia**

**Dividend income**
From 1 January 2013, dividends received from any companies abroad or in Latvia are exempt from CIT, except for dividends from companies registered in blacklisted tax havens (a list of tax havens is provided by the Cabinet of Ministers).

**Stock dividends**
The distribution of new shares to a company's shareholders in proportion to their existing shareholdings (after a share capital increase by conversion of accrued capital) is not a taxable event for the shareholders.

**Interest income**
Interest income is taxed at the 15% CIT rate.

**Foreign income**
Resident companies are taxed on their worldwide income. Income is taxed for the given taxation period; there is no possibility to defer taxation until the profit is repatriated to Latvia. Income tax paid abroad included in the taxable base is allowed as a credit against the CIT charged for the year. However, the credit must not exceed the Latvian tax attributable to the income taxed abroad. Any unused tax credits may not be carried forward.

**Deductions**

**Depreciation and amortisation**
Fixed assets may be depreciated for tax purposes according to the reducing-balance method by applying the following rates to tax written-down values:

<table>
<thead>
<tr>
<th>Types of property</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings, structures, and perennial plantations</td>
<td>10</td>
</tr>
<tr>
<td>Technology and energy installations, fleet, railway</td>
<td>20</td>
</tr>
<tr>
<td>Computer hardware and software, information systems,</td>
<td>70</td>
</tr>
<tr>
<td>electronic equipment</td>
<td></td>
</tr>
<tr>
<td>Light passenger cars (except special purpose vehicles),</td>
<td>30</td>
</tr>
<tr>
<td>motorcycles, and air transport means</td>
<td></td>
</tr>
<tr>
<td>Oil rigs, oil exploration and extraction ships, sea and river</td>
<td>15</td>
</tr>
<tr>
<td>transport means</td>
<td></td>
</tr>
<tr>
<td>Other fixed assets</td>
<td>40</td>
</tr>
</tbody>
</table>

The value of new technological equipment is multiplied by a coefficient (1.5 from 2009 to 2013) before claiming capital allowances. The effect of applying a coefficient is reversed if the new technological equipment is disposed of within five years from acquisition.

Non-business assets are ineligible for capital allowances.

Intangible assets are eligible for capital allowances on a straight-line basis over the following recovery periods:

- Concessions: ten years
- Patents, licences, and trademarks: five years
- Research and development (R&D) expenses: one year
Any intangible assets not fitting into any of these categories (such as goodwill) are ineligible for capital allowances.

The cost of intangible investments is increased by a coefficient of 1.5 if such investments result in a trademark or patent being registered.

**Start-up expenses**

There is no specific treatment for start-up expenses. Generally, after registration of the company for tax purposes, expenses are deductible. Expenses accrued before registration of a company cannot be deducted for CIT purposes due to the lack of supporting documentation with company identifying information. However, input VAT on goods purchased or services received prior to registration for VAT purposes is recoverable if the goods purchased and services received or used will further be used for taxable transactions.

**Interest expenses**

The CIT Act imposes restrictions on deductibility of interest payable on loans or credits, factoring transactions, and finance leases under two methods. For further details, please see Thin capitalisation in the Group taxation section.

**Bad debts**

Bad debts may only be deducted for CIT purposes if certain conditions are met.

**Provision for doubtful debts**

Under certain conditions, taxpayers are allowed to defer payment of CIT on a provision for doubtful debts for three years. A special provision for doubtful debts in a tax period that is tax deductible must not exceed 20% of taxable income before provisions for bad debts. To take this relief, the following conditions must be met:

- The payment became due more than six months ago.
- The income associated with these debts is part of taxable income.
- The debtor is a legal entity resident in the EU/EEA or in a country that has an effective DTT with Latvia.
- The taxpayer and the debtor are not related parties.
- Dealings with the debtor were stopped at least six months ago and have not been resumed since.
- The taxpayer can prove that steps were taken to recover the doubtful debt.
- The taxpayer has given the debtor written notice by 31 December of the respective tax year that a provision for doubtful debts is made against its debt in line with this clause.

Unless the provision is cancelled or a bad debt is written off, the amount of doubtful debts covered by the special provision will have to be added back to the taxable income at the end of the three-year period.

The rules relating to the provision for doubtful debts apply from 2011 to 2013.

**Amounts unpaid by a debtor**

A taxpayer who has not paid for goods or services within six months after the due date for payment must not deduct the amount of the debt from taxable income if the creditor has notified them that the debt is classified as doubtful and covered by a special provision for doubtful debts. Taxable income can be reduced in the tax period the debt is paid.
Latvia

This rule applies to amounts payable for which the supplier has created provisions for
doubtful debts in 2011 to 2013 as described above.

Charitable contributions
Donations paid to charitable institutions, non-profit making foundations, churches
and monasteries, and various other welfare institutions are not tax deductible,
but may qualify for a tax relief if certain criteria are met (see the Tax credits and
incentives section).

Luxury vehicles
Luxury vehicles (i.e. light passenger cars with a value greater than LVL 25,424,
excluding VAT) are not eligible for capital allowances. A tax deduction is denied
for expenses incurred in using and maintaining luxury vehicles and for lease or
hire purchase payments associated with leasing such vehicles. These rules do not,
however, apply to special purpose vehicles (such as emergency vehicles and special
passenger vehicles).

Provisions
Any increase in general provisions and reserves for the tax period as compared with the
previous tax period is non-deductible. These provisions include accruals for accrued
benefits, bonuses and commissions, and other expenses.

Non-business expenses
A tax deduction is not allowed for any expense not directly related to business activities.
In fact, non-deductible expenses have to be multiplied by a coefficient of 1.5 (except
donations made to qualifying institutions). Effectively, such expenses are taxed at
22.5% (15% x 1.5).

Non-business expenses include costs that are not directly related to commercial
activities; all expenses incurred for the leisure and recreation of owners and employees;
entertainment trips taken by owners and employees in company vehicles; any
benefits, gifts, credits, and loans turned into gifts to owners and employees; and any
other disbursements in cash or in kind to owners or employees that are not part of
remuneration or that are not related to the taxpayer’s commercial activities.

Representation expenses
Under the Latvian CIT Act, representation expenses are costs that a company incurs in
developing and maintaining its prestige at a level acceptable to society. Representation
expenses include costs incurred in holding public conferences, receptions, and meals,
and the cost of producing items to represent the company (e.g. items bearing its
logo). 40% of representation expenses are deductible for CIT purposes.

Fines and penalties
Fines, contractual penalties, and statutory interest on arrears (including increase
in principal debt) levied under the Taxes and Duties Act and specific tax laws are
not deductible.

Taxes
Excise duties, employer's national social insurance contributions, natural resource
taxes, customs duties, and real estate taxes are deductible.
**Net operating losses**

Tax losses may be carried forward for an unlimited period of time if accrued since 2008. Tax losses accrued before 2008 may be carried forward eight years (*for more details, please see table below*).

<table>
<thead>
<tr>
<th>Year losses accrued</th>
<th>Last year losses can be used</th>
</tr>
</thead>
<tbody>
<tr>
<td>2005</td>
<td>2013</td>

<tr>
<td>2006</td>
<td>2014</td>
</tr>
<tr>
<td>2007</td>
<td>2015</td>
</tr>
<tr>
<td>2008 and after</td>
<td>Not limited</td>
</tr>
</tbody>
</table>

The carryback of losses is not permitted.

A company in which more than 50% of shares (a controlling interest) have changed hands may utilise its tax losses if it continues for five years the same business that it carried on during the two years prior to the change of control. When companies are reorganised by a merger or spin-off, it may be possible to utilise losses accrued.

**Payments to foreign affiliates**

In general, a Latvian company may deduct the full amount of royalties, service fees, and interest (subject to statutory limits) made to related parties to the extent that such payments are made at arm’s length. Such payments may be subject to a WHT (*see the Withholding taxes section*). However, if a taxpayer fails to deduct the WHT due, the amounts paid cease to be deductible for tax purposes.

**Group taxation**

Group consolidation is not permitted for tax purposes. However, the members of a group of Latvian companies, whose parent owns directly or indirectly 90% of the capital of its subsidiary or subsidiaries, may surrender their current-year tax losses to one another.

**Transfer pricing**

The Latvian Regulation governing the application of the CIT Act states that for transfer pricing calculation purposes, use may be made of the Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, a document issued by the Organisation for Economic Co-operation and Development (OECD).

Latvian law requires that related-party transactions be in compliance with the arm’s-length principle. Under the arm’s-length principle, the conditions made or imposed between two related enterprises in their commercial or financial relations must not differ from those that would be agreed between independent enterprises engaging in similar transactions under similar circumstances.

A tax audit may examine and adjust the price of a transaction in the following circumstances:

- The transaction is between related parties.
- Barters and set offs.
- A price deviation exceeds 20% of prices that the taxpayer has applied to similar goods or services over a short period.
- Exports and imports.
The transfer pricing requirements for the arm’s-length price of a related-party transaction primarily apply to transactions between two or more related companies. Also, Latvian legislation requires the taxpayer to adjust one’s taxable income for the difference between the price applied to a transaction and the arm’s-length value if the transaction involves:

- individuals related to the company
- related foreign companies
- companies exempt from CIT or enjoying CIT relief pursuant to other Latvian laws, or
- a Latvian-related company with which it forms a single tax group.

This provision may apply to any transaction, including purchases and sales of fixed assets and goods, supplies of services, loans and borrowings, and intellectual property (IP). It is possible to use corresponding adjustments and adjust taxable income if a related party has made adjustments of its income according to transfer pricing rules. It is possible only if the related party is registered in the European Union or a country that has an effective DTT with Latvia and documentary evidence from the respective tax authorities is received.

Obligatory transfer pricing documentation requirements in Latvia entered into force on 1 January 2013. According to the amendments in Latvian legislation, Latvian taxpayers who enter into transactions with any of the parties listed above and whose annual turnover exceeds LVL 1 million (approximately EUR 1.423 million), and related-party transactions amounting to LVL 10,000 (approximately EUR 14,230) or more, have to prepare transfer pricing documentation for those transactions exceeding statutory limits.

Within one month after receiving a request from the Latvian tax authorities, a taxpayer must submit full transfer pricing documentation containing the following information:

- Industry analysis giving a general overview of the industry in which the taxpayer operates.
- Company analysis.
- Functional analysis giving information on the related parties’ functions, risks, and assets.
- Economic analysis, including:
  - a description of how the transfer pricing method was selected and
  - a benchmarking study.

While the full transfer pricing documentation requirement applies to entities exceeding statutory limits in respect of turnover and the annual amount of related-party transactions, other entities will still be required to prove that their transfer pricing is at arm’s length. Normally, Latvian tax authorities expect taxpayers to be able to demonstrate which transfer pricing method is used and how it has been applied (i.e. a benchmarking study of third-party comparables showing that the prices applied by the taxpayer fall within the arm’s-length range).

**Thin capitalisation**

Thin capitalisation rules apply when claiming a tax deduction for interest payments on loans and leasing services.

Taxable income should be adjusted for either:
• interest paid in excess of interest calculated by applying to the liability 1.2 times the average short-term interest rate at Latvian banks as determined by the Central Statistical Office for the last month of the tax period or 
• interest in proportion to the excess of the average liability over an amount equal to four times shareholders’ equity at the beginning of the tax year less any revaluation reserve.

The higher of these calculations should be added to taxable income.

The following interest payments are fully deductible:

• Interest paid on borrowings from credit institutions resident in Latvia, EEA member states, or countries with which Latvia has an effective DTT.
• Interest paid on Latvian or EEA debt securities in public trading.
• Interest expenses incurred by credit institutions and insurance institutions, regardless of the lender.

Interest paid on borrowings from a financial institution is deductible up to the amount of interest calculated by applying to the liability 1.2 times the average short-term interest rate at Latvian banks as determined by the Central Statistical Office for the last month of the tax period. The qualifying financial institution must meet the following criteria:

• It is resident in Latvia, the EEA, or a country with which Latvia has an effective DTT.
• It provides lending services or finance lease and is monitored by the controlling institution that supervises credit institutions or the financial sector.

**Controlled foreign companies (CFCs)**

There is no CFC regime in Latvia.

**Tax credits and incentives**

**Foreign tax credit**

Tax paid abroad on income included in the taxable base is allowed as a credit against the CIT charged for the year. However, the credit must not exceed the Latvian tax attributable to the income taxed abroad and must be substantiated by confirmation from the foreign tax administration. Any unused tax credits may not be carried forward.

**Donations to public benefit organisations**

CIT charge may be reduced by 85% of amounts donated to qualifying state-funded institutions; Latvian-registered societies, establishments, and religious organisations; or to institutions qualifying as public-benefit organisations under the Public Benefit Organisations Act. Such a reduction may not exceed 20% of the total CIT charge. When making a donation, the donor is not permitted to impose an obligation on the recipient to carry out any acts that may be classified and treated as consideration.

Donation relief is also available for donations to EU/EEA entities that have statuses similar to public-benefit organisations in the country of residence.
Latvia

**Large investment relief**
CIT relief is available for investments over LVL 3 million in qualifying industries in new, unused fixed assets (buildings and structures classified as industrial buildings and new plant and technological equipment) used for business purposes. The available tax relief is 25% of the amount of investments made (15% for investments over LVL 35 million). Investment projects must be completed within five years after the tax relief is granted by the Cabinet of Ministers.

Investments have to enable a company to launch a new line of business or to modernise its existing production, which includes manufacturing new goods, a shift of business activity from producing one type of goods to producing another type of goods, or a complete overhaul of the manufacturing process.

**Incentives for shareholders to invest profits in companies**
Current provisions of the CIT Act encourage shareholders to invest profits in the development of their company rather than take them out as dividends. Businesses may reduce their taxable income by a notional amount of interest that a taxpayer would have to pay on a loan equal to one’s prior-year undistributed profit. This adjustment is calculated by multiplying the annual weighted-average rate of interest on loans issued to non-financial Latvian businesses as determined by the Bank of Latvia for the tax period by undistributed profits accrued since 31 December 2008.

**Free ports and special economic zones (SEZs)**
Companies operating in SEZs are entitled to CIT and real estate tax relief. These areas include the free ports of Ventspils and Riga and the SEZs of Rezekne and Liepaja.

The qualifying companies may apply CIT relief of 80%. The CIT must be calculated at a 15% rate, resulting in an effective CIT rate of 3%. The companies may also apply 80% WHT relief for dividends, management services, and payments for IP made to non-resident companies.

Real estate tax relief amounts to 80%, and the municipality may waive the remaining 20%. Therefore, when meeting certain criteria, qualifying companies may decrease real estate tax to zero.

The amount of total CIT and real estate tax relief that may be claimed by the company depends on the amount of qualifying investments made by the company in the free port or SEZ area. Depending on the size of the company, the total tax relief available ranges from 50% to 70% from the amount of investments made.

**Deferred tax on asset replacements**
Latvia will allow a deferred payment of tax on profits arising on the sale of a replaced asset in order to encourage manufacturing companies to replace inefficient and outdated plant and machinery.

If a company acquires a functionally similar asset within 12 months before or after the old equipment is disposed of, then any income (profit) on the disposal of the old equipment is ignored in this tax period (i.e. the profit is deductible from taxable income). Tax payment is deferred until the new equipment is sold and may be further postponed if the equipment is replaced.
**Withholding taxes**

The following types of payments to non-residents and, in some cases according to Latvian transfer pricing rules, to related Latvian companies using CIT reliefs are subject to WHT.

**Dividends**
As of 1 January 2013, dividends paid to any company, except residents of blacklisted low-tax countries and territories, are exempt from WHT.

**Interest**
Through 30 June 2013, Latvian companies will have to comply with transitional rules of the CIT Act, which provide a 5% WHT on interest payments to a related EU/EEA company that holds at least 25% of the share capital or voting power in that Latvian company and meets certain other statutory criteria (exempt from 1 July 2013).

However, after 1 January 2014, payments to any non-resident company will be tax exempt, excluding payments to blacklisted tax havens. In certain cases, for payments to tax havens, the company may obtain SRS confirmation that WHT does not apply, provided that the payment has not been made to reduce the taxable income.

**Royalties**
If the recipient of a payment for IP is an EU/EEA-related company that holds at least 25% of the share capital or voting power in that Latvian company and meets certain other statutory criteria, the applicable WHT rate for IP is 5% through 30 June 2013 and exempt from 1 July 2013 onwards.

CIT provision states that after 1 January 2014, every payment for IP to any non-resident company will be tax exempt, excluding payments to blacklisted tax havens. In certain cases, for payments to tax havens, the company may obtain SRS confirmation that WHT does not apply, provided that the payment has not been made to reduce the taxable income.

**Rentals of industrial, commercial, or scientific equipment and real estate**
Rental payments for property in Latvia are subject to a 5% WHT.

**Management fees**
Management and consulting fees are subject to a 10% WHT. The term ‘management and consulting’ means activities carried out by a non-resident directly or by outsourced personnel to ensure the management of a Latvian company or to provide necessary advice. DTTs may reduce the rate to 0%.

**Disposal of real estate**
A 2% WHT applies to proceeds from real estate disposals. This applies to income from disposed shares or other participation in a Latvian or foreign-registered company or other entity, if real estate in Latvia made up (in the period of disposal or the previous period, whether directly or indirectly, through shareholdings in one or more other entities established in Latvia or abroad) more than 50% of the asset value of the company being disposed of.
Double tax treaties (DTTs)
A Latvian company can rely on a DTT to reduce the rate of WHT on any payments previously mentioned. To this end, the Latvian company must obtain a valid residence certificate for each type of payment to each recipient prior to making the actual payment. A valid residence certificate is one approved by the foreign tax authority and the Latvian tax authority.

Please see the following table for WHT rates applicable to the payments described above:

## Latvia

### Taxable administration

#### Taxable period
The fiscal year may not exceed 12 months and is normally based on the calendar year. However, companies are permitted to choose alternative start and end dates for the tax year. The first year of trading may last up to 18 months.

Notes

1. No WHT from 1 January 2014, excluding companies in tax havens.
2. 15% applies to all payments to companies located in tax havens, with the following exceptions:
   - 5% for interest on deposits and current accounts paid by Latvian banks at their general rate.
   - Repayments of loan principal are exempt.
   - Goods originating in the tax haven are exempt.
Latvia

**Tax returns**
Tax returns are filed annually, together with annual accounts, within one month after they have been approved but not later than four months after the end of financial year. Thus, if the financial year ends on 31 December, the CIT return and annual accounts must be filed not later than by 1 May of the following year. Larger companies may file the CIT return and annual accounts not later than seven months after the end of financial year.

**Payment of tax**
CIT usually is paid monthly on or before the 15th day of each month, with a final adjustment when the annual tax return is filed. Monthly tax instalments are based on the tax liability in the previous fiscal year and adjusted by the consumer price index. A company may choose quarterly instalments if its monthly advances in the previous period were less than LVL 500. For a new company, advance payments are voluntary.

**Tax audit process**
The tax audit commences with an audit note for open tax years (not more than three years since the tax payment was due, and, from 2013, five years in case transfer prices are audited). The duration of the audit may vary from a few weeks to a few months, in certain cases, not exceeding 90 days. It can be extended to 150 days if information is requested from foreign tax authorities. In case a simultaneous tax audit with a foreign tax administration is initiated, the prolongation of such tax audit is not limited.

Tax authorities should inform a taxpayer of a tax audit no later than ten working days prior to the commencement of the audit with notification about documents the tax authorities may like to receive.

During a tax audit, the auditor notifies the taxpayer about irregularities of calculation of tax payments and any possible fines that could be charged. Prior to issuing the tax audit decision, the auditors invite the taxpayer to final negotiations to discuss the tax audit results.

Following the tax audit and the notification of tax audit findings, the company may in turn:

- Negotiate with the tax authorities with a view to reducing the tax burden and achieve an ‘out of court settlement’. The out of court settlement offers the possibility to reduce fines and late payment penalties calculated (not the additional principal amount of tax calculated) by 50% to 85%. The conclusion of such a settlement presupposes that the company accepts the findings of the audit for the audited years.
- Appeal the decision to the Director General of the SRS.
- Only after receiving the decision of the Director General of the SRS, may the taxpayer take the case to court. An advance payment of additional tax calculated and late payment penalties is required. The first decision normally takes up to two years and another two years until a decision by the Court of Appeal and Supreme Court is issued.

**Statute of limitations**
The right of the Latvian tax authorities to collect unpaid taxes is three years since the relevant tax payment was due. Transfer prices may be examined for five years from 2013 onwards.
Topics of focus for tax authorities

Topics of interest to the Latvian tax authorities include:

• Transfer pricing, non-arm's-length lending, and other arrangements with related parties.
• Non-business, marketing, and representation expenses.
• Payments to and from non-resident companies, including offshore companies.
• Obligation to register PE in Latvia.
• Unpaid payroll taxes or hidden employment relationships.
• Recoverability of input VAT.
Significant developments

The Ministry of Finance (MoF) is in the process of establishing new tax laws connected with the oil and gas sector in Lebanon. Our understanding is that the MoF will recommend a different treatment for such companies from the current tax law, whether related to the corporate income tax (CIT), value-added tax (VAT), or personal income tax (PIT). Therefore, this tax summary may not be applicable to oil and gas companies considering establishing in Lebanon.

Following the Council of Minister’s approval of the agenda for the Licensing Round during its session of 27 December 2012, the Ministry of Energy and Water (MoEW) issued, on 21 February 2013, Decree no. 9882 regarding the rules and procedures for launching of the Pre-Qualification Round for Oil Exploration in Lebanon.

Taxes on corporate income

Under the income tax law in Lebanon, tax is levied based on income type. Accordingly, the income tax law divides income into the following three categories:

- Chapter I-profits from industrial, commercial, and non-commercial professions.
- Chapter II-salaries and wages and pension salaries.
- Chapter III-revenues from moveable capital (Chapter III mainly covers all types of dividend income, board member appropriations from profits, and interest income, including interest on bonds and treasury bills).

The income tax law does not provide for a single tax on income. Accordingly, where a taxpayer has income from different sources, each type of income is taxed according to the tax chapter it falls under. The applicable rates are as follows:

- CIT: 15%.
- Capital gains tax: 10%.
- Dividend distribution withholding tax (WHT): 10% (may be reduced to 5% in certain cases).
- Non-resident WHT: 7.5% for services and 2.25% for other than services.
- Payroll tax: from 2% to 20%.
- Moveable capital WHT: 5% or 10%.

Not all businesses are taxed in the same manner. Depending on the relative size and structure of a business, the tax method applied is assessed depending on real (or actual) profits or deemed profits.
Real profit method
In Lebanon, tax is charged on the total income or profits derived in Lebanon. Based on the income tax law and the principle of territoriality, the main premise for considering a profit to have been realised in Lebanon is if it was generated through an effort or activity exerted in Lebanon.

The tax base (the determination of profits) and the tax rates differ between resident and non-resident taxpayers.

For resident corporate entities, CIT is computed at 15% based on the taxpayer’s accounting profits after adjustments resulting from tax rules through the schedule of accounting-to-tax calculation.

The use of the real profit method is mandatory for the following:

- Corporations (SAL).
- Limited liability companies (SARL).
- Companies of individuals.
- Branches of foreign companies.
- All entities employing more than four employees or importing goods.

Small entities may choose voluntarily to be subject to the real profit method; however, once they choose the real profit method, they cannot revert back to the deemed profit method.

Concerning tax on non-residents, WHT applies at 2.25% on payments for goods and 7.5% on payments for services.

Deemed profit method
A deemed profit method is imposed on insurance and savings institutions, taxable transport companies, oil refineries, and public work contractors.

Taxation is based on deemed profits and is levied at a flat rate of 15%.

The rate of deemed profit for public work contractors, as approved by the MoF, is currently set at either 10% or 15% of total amounts collected per year, based on the type of activity performed by the contractor.

For insurance companies, the deemed profit rate is 8% for all insurance activities.

Local income taxes
There are no local government taxes on income in Lebanon.

Corporate residence
Tax is levied on all corporeal/natural and incorporeal/artificial persons, resident in Lebanon or outside, on all profits that they generate in Lebanon. The main premise for considering profits to have been realised in Lebanon is when such profits have occurred from an effort exerted in Lebanon, irrespective of the identity of the taxpayer or place of residency.

Tax is levied on profits generated by two categories of taxpayers: resident taxpayers and non-resident taxpayers.
Lebanon

**Resident taxpayers**
A person, establishment, or company is considered resident for tax purposes, even if not physically resident in Lebanon, when any of the following two terms are satisfied:

- Have an office or a fixed place of business in their name in Lebanon, even when they are not undertaking their business in a normal and repetitive manner.
- Practising a profession or business activity in a normal or repetitive manner in Lebanon, even if they do not have a known registered place of business in Lebanon. This is because they are considered to have practised their profession from the place in which they contact their customers, even if such place is a hotel or a café.

**Non-resident taxpayers**
Non-resident taxpayers can consist of persons residing in Lebanon and persons residing outside Lebanon. A corporeal person residing in Lebanon is subject to the non-resident WHT (see the Withholding taxes section for more information) if neither of the following two terms are satisfied:

- Practise a certain trade in a normal and repetitive manner in Lebanon, irrespective of whether or not they have a known registered place of business.
- Have a known registered place of business in Lebanon.

A person residing outside Lebanon is subject to the non-resident WHT on the amounts, revenues, profits, or proceeds obtained from Lebanon as a result of undertaking an activity in whole or in part on Lebanese territory or as a result of exploiting rights in Lebanon.

**Permanent establishment (PE)**
There are no clear provisions in the Lebanese income tax law to define PE.

**Other taxes**

**Value-added tax (VAT)**
The standard VAT rate in Lebanon is 10%. Unless specifically exempt, VAT is levied on all commercial transactions undertaken by business entities. Export of goods and services and export-related services, international transport, and some of the intermediate operations are zero-rated. Banking, financial services, and insurance operations are exempt from VAT.

**Customs duties**
Modern, simple, and efficient assessment means are adopted by the customs authorities (e.g. electronic declarations, declaration in advance, applying international procedures in clearing the goods, selective inspection, auditing the goods after their release, and adopting the unique declaration).

Customs rates are imposed and modified according to decisions from the Lebanese customs authorities. These decisions are adopted based on the need of the Lebanese markets of some goods and the will to protect national production sectors.

Safeguard measures are provided for in relation to imported goods. The purpose behind such measures is to protect the domestic production sectors when an increase of imports is witnessed when compared to the same period during the previous year.
The rates are determined based on a specific schedule created in conformity with the Harmonised System of Nomenclature. This conformity with the unified system allows Lebanon to represent an ‘importer friendly’ environment for importers.

The normal rates are applied where there is no preferential agreement. When the origin of the good or part of the good is from a country with which Lebanon has a preferential customs treatment, preferential rates apply.

Customs rates in Lebanon are either determined in percentage or paid as a lump sum per unit of imported products.

**Excise taxes**
Excise taxes are mainly applicable in Lebanon on certain beverages and spirits, tobacco products, gasoline, and vehicles.

**Built property tax**
The built property tax is an annual progressive tax, ranging between 4% and 14%, on built property.

**Stamp duty**
Two kinds of stamp duties are levied. A proportionate stamp duty of 0.3% is levied on all deeds and contracts (written or implied) that mention specific payments or other sums of money. A fixed stamp duty ranging between a minimum of 100 Lebanese pounds (LBP) and a maximum of LBP 2 million is applicable on documents in accordance with schedules appended to the stamp duty law.

**Capital gains tax**
Under local legislation, companies are permitted to revalue their fixed assets every five years. Capital gains recognised from such a revaluation, as well as any profits that may be realised from the disposal of fixed assets, are subject to a capital gains tax of 10%.

Income from disposal of shares realised by a company is subject to 10% capital gains tax when the shares are classified as financial assets in the company's balance sheet.

Income from disposal of shares realised by a company whose main activity is the acquisition of investments is subject to 15% CIT.

**Registration taxes**
The estimated cost of establishing a company in Lebanon is around 7,500 United States dollars (USD). This includes lawyer’s fees and registration fees. The registration fees will increase if the company is established with capital exceeding the minimum requirement. However, the registration fees should not normally exceed 1% of the value of capital.

For branch offices and representative offices, establishment costs are lower and may be estimated at USD 5,000.

When transferring ownership of real estate, registration fees of approximately 6% are applicable.

**Payroll taxes**
Employers are responsible for withholding and declaring payroll taxes on behalf of their employees. Payroll tax is levied at progressive rates of 2% to 20%.
Branch income

Net income derived from a branch’s operations in Lebanon is subject to Lebanese CIT, levied under the real profit method at a rate of 15%. Taxable profits of foreign branch offices are deemed to be distributed on a yearly basis and are subject to a dividend distribution tax at the rate of 10%.

Representative offices

Representative offices do not pay CIT as long as they do not carry out commercial activities. Representative offices are required to submit annual tax declarations along with detailed company information that includes employee information, a balance sheet, an income statement, a non-resident tax schedule, and a schedule of payments to professionals. The declaration, with all relevant documentation, should be submitted as one single set. All the information included should be based on accounting records. The deadline for submitting the declaration depends on the legal form of the parent company (i.e. before 1 June of the following year for SAL or SARL companies and before 1 May of the following year for others).

Income determination

Inventory valuation

For tax purposes, inventory is valued using the weighted average cost method.

Capital gains

Capital gains are not generally subject to CIT, but may be subject to capital gains tax. See Capital gains tax in the Other taxes section for more information.

Note that income from disposal of shares realised by a company whose main activity is the acquisition of investments is subject to 15% CIT.

Dividend income

Dividends received as a result of a taxable person’s activity are deemed trading income and are subject to 15% CIT. Dividends received as passive income are subject to 10% tax in Lebanon. However, dividends received from Lebanese entities are exempt from CIT, as the dividend tax is withheld at source, but are not exempt from further tax upon distribution from the recipient entity.

Stock dividends

The Lebanese law is silent on the tax implications of stock dividends. However, when share capital is increased by reducing retained earnings, no tax is applicable.

Interest income

Interest earned by corporations is added to taxable income. Relief is given for the WHT suffered on bank accounts, treasury bills, and bonds issued to the extent of the CIT due.

Rental income

Rental income should be deducted from the accounting result to reach the taxable result. Moreover, expenses related to property that is rented out should be added back to the accounting result to reach the taxable result.

A built property tax is paid on rental income at progressive rates ranging between 4% and 14%.
Royalties income
Royalties received by a holding company from Lebanese companies for patents and the like are taxed at a rate of 10%. Royalties received by holding companies from abroad are exempt from tax.

Royalties received by other than holding companies are taxed as ordinary income at 15%.

Unrealised exchange gains/losses
Unrealised exchange gains and losses are not treated differently from any other gain or loss for tax purposes, i.e. unrealised exchange gains are subject to CIT at 15% and unrealised exchange losses are deductible for CIT purposes.

Foreign income
Resident corporations are not taxed on foreign-source income derived from activities carried out abroad through foreign branches.

Deductions

Depreciation
Depreciation of property, plant, and equipment (at rates fixed by ministerial decree) is deductible. The depreciation method to be used is the straight-line method. If a depreciation rate that is higher than the low rate is adopted, the MoF should be notified. The allowable depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Low rate (%)</th>
<th>High rate (%)</th>

</tbody>
</table>

Goodwill
Under Lebanese tax rules, goodwill cannot be amortised.

Organisation and start-up expenses
Organisation and start-up expenses are amortised over three to five years for tax purposes.

Interest expenses
Interest on business loans is deductible, under certain conditions. Interest paid on the taxpayer’s capital is not deductible.
**Bad debt**
Bad debts are deductible if all means for collection of the debt have been exhausted.

Provisions for bad debts are deductible if a debtor has been declared bankrupt. Surplus provisions are added to profits.

**Charitable contributions**
Charitable contributions are deductible if made to approved charitable, social, cultural, or sporting institutions, within certain limits.

**Gifts**
Gifts given by the company in cash are non-deductible.

Gifts given by the company in-kind to customers when the amount of each gift exceeds LBP 1 million per person per year and when the total amount of gifts in-kind exceeds 1% of the turnover are non-deductible.

**Fines and penalties**
Fines and penalties are not deductible in Lebanon.

**Taxes**
Taxes and duties incurred in the course of business (except CIT) are deductible.

Taxes due to foreign governments on income earned in Lebanon are non-deductible.

Exceptional taxes and fines are non-deductible.

**Other significant items**
Other deductible expenses include:

- Cost of goods sold.
- Cost of services rendered.
- Rent of business premises or, if the premises are owned by the taxpayer, their depreciation.
- Salaries, wages, and other employee benefits, including end-of-service indemnities.
- General business expenses, including insurance premiums.
- Reserves for severance payments, pensions, and disability payments. Surplus provisions are added to profits.
- Advertising and publicity expenses, within certain limits.
- Travel, telephone, and vehicle expenses, within certain limits.
- Entertainment expenses that are properly supported.
- Board remuneration against services performed.
- Accrued expenses as long as their occurrence is certain.
- Employees’ life insurance premiums are deductible as long as they are included in the employees’ benefits subject to payroll tax.

Other non-deductible expenses include:

- With the exception of normal maintenance expenses, costs that increase the value of the property, plant, or equipment (such costs should be capitalised and depreciated in accordance with the fiscal depreciation rates).
- Losses or share-in-costs resulting from enterprises, offices, and branches situated outside Lebanon.
• Representation allowances in excess of 10% of an employee’s basic salary, as well as unjustifiable and unreasonable salaries.
• Personal expenses, such as payments deducted by an employer or partner for the management of the business and for certain business expenses incurred by the employer or partner.
• Appropriations made to board members that do not comprise remuneration for work done.
• Provisions, other than those specifically allowed by law. Examples of non-deductible provisions include provisions for bad debts, provisions for slow moving items, and provisions for bonuses, contingencies, and charges.

**Net operating and capital losses**
Tax losses may be carried forward for up to three years after the year in which they were originally incurred. The carryback of losses is not available.

Capital losses may be used to offset taxable profits of the current year but may not be carried forward.

**Payments to foreign affiliates**
Payments to foreign affiliates are generally subject to WHT.

Based on guidance issued by the MoF, recharges from the head office located abroad (including advertising) are deductible up to a certain limit, calculated as follows:

\[
(\text{Assets of the branch in Lebanon}/\text{Consolidated assets}) \times \text{Central administrative expenses}
\]

However, a ceiling of 3% of the branch’s revenues is applied.

**Group taxation**
There is no group taxation in Lebanon.

**Transfer pricing**
In Lebanon, there are no clear and detailed transfer pricing or general anti-avoidance rules. However, even in the absence of clear transfer pricing rules, exchanges or transactions made between related parties should be done on an arm’s-length basis.

The tax administration has the right to reassess related-party transactions and adjust their value in order to reflect the taxable amount related to the period under study.

**Thin capitalisation**
In Lebanon, there are no clear or detailed thin capitalisation rules.

**Tax credits and incentives**

**Holding companies**
Lebanese holding companies are exempt from CIT and from WHT on dividends. However, they are subject to a tax on their paid-up capital and reserves. In any given tax year, total tax payments on paid-up capital and reserves are capped at LBP 5 million.

Interest, management fees, and royalties received by holding companies from abroad are exempt from tax in Lebanon.
Lebanon

Holding companies are subject to a 10% tax on interest received from loans granted for a period less than three years to companies operating in Lebanon. Management fees received by the holding company from companies operating in Lebanon are subject to a 5% tax. Capital gains on financial assets in Lebanese companies held for less than two years are subject to a 10% tax. Royalties received from Lebanese companies for patents and the like are taxed at a rate of 10%.

**Offshore companies**

Offshore companies are exempt from CIT and from the WHT on dividends, and are instead subject to a lump-sum annual tax of LBP 1 million. Contracts related to offshore activities outside Lebanon are exempt from Lebanese stamp duty.

Offshore companies are required to be registered as SAL companies and, with a few exceptions, are subject to the same regulations as a SAL company. The business objectives of an offshore company are limited.

**Permanent exemptions from CIT**

Companies and organisations that are granted an indefinite exemption from CIT include the following:

- Educational institutions.
- Hospitals, orphanages, asylums, and other shelters that admit patients free of charge.
- Shipping, sea, and air transport associations (subject to certain restrictions).
- Farmers, provided they do not display farm produce and cattle outlets or sell products and meat after conversion tax.
- Syndicates and other types of professional associations.
- Miscellaneous non-profit organisations and co-operatives.
- Holding companies and offshore companies.
- Public sector bodies that do not compete with private institutions.

**Reinvestment incentives**

Industrial companies using operating profit to finance certain capital investments are exempt from up to 50% of their CIT liabilities for a period of up to four years, provided that such exemptions do not exceed the original investments made. In areas designated ‘development zones’, 75% of a company's tax liabilities may be exempt.

In order to take advantage of this regulation, investments should consist of capital expenditures designed to increase a company's manufacturing capacity or of investments in housing facilities for the company's staff and other employees.

**Withholding taxes**

**WHT on interest**

The income, revenues, and interest earned from accounts opened at Lebanese banks and from treasury bonds are subject to a 5% WHT that is non-refundable and cannot be carried forward. This WHT is considered as an advance payment on the current CIT due to the extent of that amount and acts as a minimum tax in situations where the tax due is lower than the tax on interest paid.
Non-resident WHT
Revenues earned by non-residents in Lebanon are subject to an effective WHT of 2.25% on revenue from the sale of materials and equipment, and 7.5% on the revenue in the case of sale of services.

Movable capital WHT
A 10% WHT is levied on income derived from movable capital generated in Lebanon. Taxable income is comprised of the following:

- Distributed dividends, interest, and income from shares.
- Directors’ and shareholders’ fees.
- Distribution of reserves or profits.
- Interest from loans to corporations.

WHT on dividends
Tax is withheld from dividends paid to shareholders/partners at a rate of 10%. The dividend distribution tax rate may be reduced to 5% under specific conditions.

Double tax treaties (DTTs)
DTTs provide the following WHT benefits. Note that treaty rates do not override lower non-treaty rates. Treaty members may take advantage of the non-treaty rates.

**Notes**

1. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the equity capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.
2. Dividends, interest, or royalties arising in a contracting state and paid to a resident of the other contracting state shall be taxable only in that other state.
3. Shall not exceed:
   - 5% of the gross amount of royalties paid for the use of, or the right to use, any industrial, commercial, or scientific equipment.
   - 10% of the gross amount of royalties paid for the use of or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for radio or television broadcasting, any software, patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience.
4. Where the dividends are paid by a company that is:
   - A resident of Lebanon to a resident of Malta who is the beneficial owner thereof, the Lebanese tax so charged shall not exceed 5% of the gross amount of the dividends.
   - A resident of Malta to a resident of Lebanon who is the beneficial owner thereof, the Malta tax on the gross amount of the dividends shall not exceed that chargeable on the profits out of which the dividends are paid.
5. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the equity capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.
6. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the equity capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.
7. Shall not exceed:
   - 10% of the gross amount of royalties paid for the use of or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for radio or television broadcasting.
   - 5% of the gross amount of royalties paid in other cases.
8. Shall not exceed:
   - 10% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 15% of the equity capital of the company paying the dividends.
   - 15% of the gross amount of the dividends in all other cases.
9. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the equity capital of the company paying the dividends.
   - 15% of the gross amount of the dividends in all other cases.
10. Shall not exceed:
    - 5% of the gross amount of the dividends if the beneficial owner is a company that has owned at least 10% of the capital of the company paying the dividends for a period of at least 12 months preceding the date the dividends were declared.
    - 15% of the gross amount of the dividends in all other cases.
**Tax administration**

**Taxable period**
Lebanon’s fiscal year runs from January to December and is based on the Gregorian calendar. With the special approval of the local tax authorities, companies may, however, use their own accounting year.

**Tax returns**
Taxes on business income in any given year are based on the profits of the previous financial year.

Tax returns by artificial persons (entities) must be filed by 31 March of the year following the year of income. Tax returns by capital companies must be filed by 31 May of the year following the year of income.

Submission deadlines of annual declarations for institutions that are exempt from income tax (other than companies) are as follows:

- Before 1 February for institutions adopting the cash basis of accounting.
- Before 1 April for institutions adopting the accrual basis of accounting and for representative offices that represent non-corporate entities.
- Before 1 June for representative offices that represent corporations.

If taxpayers fail to submit a tax return, realisation penalties will be due.

**Payment of tax**
The same deadlines for tax returns apply for tax payments.

If taxpayers fail to make payment, late payment penalties will be due.

**Tax audit process**
The most common ways for the tax authorities to select companies for tax audits are the size of the company, the type of business, and certain risk assessment measures.

Tax audits typically cover a single type of tax.

In a typical situation, a tax audit is likely to take less than one year from first information request to substantive resolution.

**Statute of limitations**
The tax administration has four years to collect its rights. The period is calculated from the end of year that follows the current business year.

The taxable person may request the refund of excess tax within four years starting from the end of the year where the refund right was created.

The tax administration can exceed the statute of limitations in cases where a profit or revenue has been proven by a court order, arbitration, or inheritance clearance. The extension is limited till the end of the calendar year following the end of the year in which the tax administration was notified of such event.

Under the statute of limitations, a company should keep its accounting books and documentation for ten years.
Topics of focus for tax authorities
Lately, several topics have been of interest to the tax authorities in Lebanon, including transfer pricing, payments of royalties and management fees to non-resident parties, provisions, and employee compensation.

Other issues

Foreign ownership of real estate restrictions
- Up to 3,000 square metres does not require Council of Ministers approval.
- Exploitation and normal lease right extending for a period of more than ten years cannot be attained without obtaining approval.
- Real estate owned by foreigners, for which approval has been obtained, cannot exceed, over all of the Lebanese territory, 3% of the total area of Lebanon. In each province, the total area owned should not exceed 3% of its area. With respect to Beirut, the total area owned should not exceed 10% of its area.
- The approval is nullified if not acted upon during a period of one year.
- When approval is granted, the building on the real estate should be constructed within a period of five years (renewable once by the Council of Ministers).

Choice of business entity
Lebanon's commercial law provides for a range of business entities available to both local and foreign investors. These consist of the following:

- Sole proprietorships.
- General partnerships.
- Limited partnerships.
- Joint-stock companies (SAL).
- Limited liability companies (SARL).
- Holding companies.
- Offshore companies.
- Representative offices and branches of foreign companies.

Legal structures commonly used by foreigners in conducting business in Lebanon are SALs, SARLs, and branch offices.

Joint-stock companies (Société anonyme libanaise or SAL)
Lebanese joint-stock companies are permitted to engage in all kinds of business activity. Shareholders of a SAL have no liability beyond their actual capital subscriptions.

With a small number of exceptions (such as real estate companies and banks), there are no limits on the amount of capital that can be held by foreign investors.

The management of a SAL is entrusted to a board of directors with a minimum of three and a maximum of 12 members. The majority of board members must be Lebanese, but the chairman may be a foreign national.

- Certain types of businesses, such as banks and insurance companies, are required to incorporate as joint-stock corporations. Minimum capital: LBP 30 million.
- Taxation: the applicable CIT rate is 15% in addition to a WHT on dividends of 10%, reduced to 5% in certain cases, mainly if the shares are listed.
Limited liability companies (Société à responsabilité limitée or SARL)
Members of a limited liability company are partners, and the company's capital is divided into parts rather than shares. Partners are liable only to the extent of their parts, and individual partners' claims on the company's capital are fixed in the partnership deed.

All partners may be foreigners, with the exception of companies seeking to engage in commercial representation.

Limited liability companies may not be active in certain sectors of the economy, such as in insurance, banking, fund management, or air transportation.

The transfer of parts in a limited liability company is subject to the consent of partners representing at least three-quarters of the capital. Existing partners enjoy priority in the purchase of parts offered for transfer.

- A limited liability company is managed by one or several directors (managers) who may or may not be selected from among the partners. Minimum capital: LBP 5 million.
- Taxation: the applicable CIT rate is 15% in addition to a WHT on dividends of 10%.

**Intellectual property**
The law in Lebanon does not contain a clear definition of author’s rights. It protects all products of the human intellect whether written, pictorial, sculptural, scriptural, or oral, regardless of its value, importance, destination, or form of expression.

The law provides patent protection for inventions and plant varieties and a sui generis protection for layout designs of integrated circuits. Furthermore, the law provides protection for undisclosed information. According to an assessment conducted by the World Intellectual Property Organization (WIPO) in July 2002, the Patent law is in complete conformity with the WTO’s Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS). It was also pointed out that the provisions of the Plant Varieties exceed the minimum requirements of the TRIPS Agreement.

The law does not explicitly protect notorious trademarks and geographical indications. However, those are provided protection via Lebanon’s membership to the Paris Convention. Moreover, geographical indications are provided protection under the provisions of the new Law on Customs, the Law on Fraud Control, and the Criminal Law.

The copyright protection originally available to literary and artistic works is now extended to computer software, video films, and all kind of audio-visual works. The law provides stiffer penalties for offenders and better compensation to the persons whose rights have been infringed. The manner in which the copyright is breached has also been extended.

**Significant developments**

There have been no significant corporate tax developments in Libya during the past couple of years. Various suggestions for tax reforms are being considered but none have been implemented thus far.

**Taxes on corporate income**

For any Libyan registered entity, income arising both in Libya and abroad (i.e. worldwide) is assessable for corporate income tax (CIT) purposes in Libya.

CIT is imposed annually on the same basis for Libyan controlled corporate entities, foreign controlled corporate entities, and branches of foreign companies.

CIT is levied on taxable profits at a flat rate of 20%.

**Jehad Tax**

There is a flat rate of Jehad Tax assessed at 4% on taxable corporate profits.

Jehad Tax was established by Law 44 of 1970. The purpose of the tax is to further the Muslim cause, in a peaceful manner, throughout the world.

**Local income taxes**

Libya has no provincial income tax laws.

**Corporate residence**

Corporate residence is not specifically dealt with under the laws of Libya. The tax authorities will seek to assess any income derived from services provided in Libya.

**Permanent establishment (PE)**

Double tax treaties (DTTs) being signed introduce the concept of PE. However, general law requires that any foreign entity seeking to provide services in Libya should obtain a business licence, which necessitates it registering as a legal entity. Historically, unregistered foreign entities have provided services in Libya, but this is not in line with the law and it is becoming difficult to do so.

**Other taxes**

**Value-added tax (VAT)**

There is no VAT in Libya.
**Custom duties**
Customs duties were abolished in 2005, except for tobacco and tobacco products.

A service fee of 5% on the value on most imports also exists. There are various exemptions to this service fee, specifically under Investment Law and within the oil sector.

Other dues and taxes on importation are estimated at 0.5%. Initially, a temporary import licence is issued for six months that can be extended to a maximum of three years. A guarantee or a deposit can be provided by the importer to the Customs Department.

**Excise taxes**
Libya has no excise taxes.

**Property taxes**
Libya has no specific property taxes.

**Transfer taxes**
Libya has no transfer taxes.

**Stamp duty**
Stamp Duty Law levies a schedule of duties and rates on various documents and transactions. The most relevant to corporate entities is Schedule 28, which prescribes the rate of duties on contracts for the provision of services or supply. The duty on main contracts is 1% and on subcontracts is 0.1%. Note that there is a duty of 0.5% on all payments to the Tax Department as well.

**Branch income**
Tax rates on branch profits are the same as on corporate profits. However, the Income Tax Law allows the Tax Department to assess income tax on branches of foreign companies as a percentage of turnover via the ‘deemed profit’ basis of assessment. Tax is therefore payable even where tax losses are declared.

The level of deemed profit applied to turnover varies according to the branch’s type of business activity. This ranges from 10% to 15% for civil works and contracting (turnkey projects), 15% to 25% for oil service, and between 25% and 40% in the case of design/consulting engineers. A deemed profit of between 5% and 7% is also assessed on supply. The deemed profit percentage applied to any year will be higher than the profit percentage declared in the annual tax return since the deemed profit basis is applied during the course of a tax audit and is effectively a revenue generating exercise for the tax authorities. Historically, tax audits have not resulted in credits or reimbursements.

**Income determination**
No specific rules apply on income determination for the following categories:

- Interest income.
- Partnership income.
- Rent/royalties income.
- Foreign income.
Libya

The Income Tax Law allows entities to account on an accrual basis or on a cash basis.

**Inventory valuation**
The Commercial Code allows inventory to be valued at the lower of cost and net realisable value.

**Capital gains**
Any chargeable gains on the sale of capital assets are taxed as ordinary income. For entities assessed on a deemed profit basis, capital gains should be added to the deemed taxable income.

**Dividend income**
Historically, dividend income has not been subject to any additional taxes.

**Inter-company dividends**
Libyan taxation laws do not contain any special provisions regarding inter-company dividends.

**Stock dividends**
Stock dividends are not specifically dealt with in Libyan taxation laws. The current practice is for dividend distributions not to be taxed.

**Deductions**
Taxable income is determined after deducting all expenditure and costs incurred in the realisation of the gross income (for more details on the deemed profit basis of assessment on branches of foreign companies, see the Branch income section).

For any entity (not a foreign branch) seeking to be assessed on an add-back basis, it should ensure, in accordance with Stamp Duty Law, that the majority of its costs can be supported by tax-registered documents, i.e. declared payrolls and registered contracts and invoices.

**Depreciation**
Depreciation should be calculated in accordance with the Executive Regulations of the law.

</table>

**Goodwill**

Purchased goodwill can be amortised on a straight-line basis over five years.

**Organisation and start-up expenditure**

Organisational and start-up expenditure can be capitalised and amortised over five years on a straight-line basis.

**Interest expenses**

No specific rules apply for the deduction of interest expenses.

**Bad debt**

Bad debts are only recognised to the extent that they have been recognised as such legally.

**Charitable contributions**

Donations to charities recognised by the state are permitted at up to 2% of net income.

**Fines and penalties**

No specific rules apply for the deduction of fines and penalties.

**Taxes**

No specific rules apply for the deduction of taxes.

**Net operating losses**

Losses may be carried forward and deducted from future profits, for up to five years.
The Income Tax Law has no provision for the carryback of losses.

**Payments to foreign affiliates**

No specific rules apply for the deduction of payments to foreign affiliates.

**Group taxation**

There is no recognition of a group for taxation purposes.

**Transfer pricing**

No transfer pricing rules exist in the general law.
Libya

**Thin capitalisation**
No thin capitalisation rules exist in the general law.

---

**Tax credits and incentives**

**Foreign tax credit**
Under general tax law, no provision exists for allowing the deduction of foreign tax credits.

**CIT exemption**
Exemptions to CIT exist, most notably, under the Investment Law. General projects registered under the Investment Law are permitted a five-year CIT holiday with a possibility to extend for a further three years.

Exemptions also exist for strategic infrastructure projects. Such exemptions must be awarded by the legislative body, either by ratifying the relevant contract, which includes a tax exemption clause, or by the issuance of a separate law.

**Customs and stamp duties exemption**
The Investment Law also provides exemptions for customs duties and stamp duty. The exemptions that exist are bestowed on subcontractors to the relevant projects.

The Petroleum Law provides exemption to customs duties on oilfield-specific equipment and materials, which is also provided to oil service companies.

---

**Withholding taxes**

Libyan law has no withholding taxes (WHTs). Generally, for unregistered foreign entities seeking to register a contract with the tax authorities, CIT will be assessed (and must be settled) on a deemed profit basis at the time of registration. It may be possible to negotiate a WHT in preference to the aforementioned general procedure for a significant contract where there is greater uncertainty as to the estimated contract value.

---

**Tax administration**

**Taxable period**
The tax year is generally a calendar year, although assessments can be made on the basis of a company’s own year-end, provided permission is granted in advance from the Tax Department and the company then adheres consistently to the same date.

**Tax returns**
All corporate entities must make an annual filing within four months of its year-end or within one month of its audit report, whichever is earlier.

**Payment of tax**
CIT is payable on a quarterly basis (10 March, 10 June, 10 September, and 10 December) normally commencing the first quarter date after an assessment has been issued.
Late payment penalties
A late payment penalty is assessed on the tax due at the rate of 1% to a maximum of 12%. In addition, the remaining quarterly payments are due immediately for failing to make an instalment on time.

The law also imposes the following penalties:

• A fine of not less than three times the amount of unpaid tax due shall be applied to any person who fails to pay tax by the due date.
• Without prejudice to any harsher penalty, a fine of not less than four times the amount of tax due and unpaid will be applied to any person who, with intent to evade all or part of the tax, commits any of the following acts or abets, agrees, or aids a person who commits such an act:
  • The making of false statements in declarations submitted under this law.
  • The preparation of false accounts, books and records, reports, or budgets.
  • The use of fraudulent means to conceal or attempt to conceal taxable amounts due under this law.

Tax audit process
Tax audits typically occur every three or four years.

Statute of limitations
The statute of limitations for CIT purposes is seven years.

Other issues
Statutory Books
Business entities operating in Libya are required by Libyan Law to maintain a General Ledger and a General Journal (i.e. the Statutory Books).

Before use, these must be stamped as registered with the Revenue Authorities and the Commercial Court. It should be noted that a Ledger or Journal will not be registered if it already contains accounting entries (i.e. one cannot register existing books of account).

Similarly, transactions pre-dating the date the books are registered will be disallowed. In theory, transactions should be entered daily, but in practice, most companies write up their statutory records on the basis of monthly transactions summaries.

The Tax Inspector will always request production of the Statutory Books at the commencement of a tax audit. If these are not available, a perfunctory audit of the English (or other language) books of account will be made, and it is likely that there will be a punitive increase in taxable income as a consequence.

The new Commercial Code allows approved computer based ledgers to be used instead of the traditional manual ledgers.
**Changes in the Liechtenstein Tax Act**
On 24 April 2013, the Liechtenstein parliament accepted various changes in the Liechtenstein Tax Act. The most important developments impacting corporate taxpayers are as follows:

- Loss carryforward is limited to 70% of the taxable annual profit, while the other 30% can still be carried forward indefinitely. As a consequence, 30% of the taxable profit is subject to annual taxation even if corresponding losses from previous years exist.
- Losses due to the notional interest deduction (currently 4% of modified equity) are no longer accepted; consequently, a negative result due to this deduction does not generate loss carryforward.
- As approved by the European Free Trade Association (EFTA) Surveillance Authority (ESA), software and technical/scientific databases now explicitly qualify for the Liechtenstein intellectual property (IP) box.

The first two changes above are applicable for 2013 tax assessments. The extension of the Liechtenstein IP box to software and technical/scientific databases is applicable for the 2012 tax period.

**Tax treaties**
Liechtenstein recently concluded the following tax treaties:

- The double taxation treaty (DTT) between Germany and Liechtenstein entered into force on 19 December 2012.
- The DTT between the United Kingdom (UK) and Liechtenstein entered into force on 19 December 2012.
- The Japan-Liechtenstein tax information exchange agreement (TIEA) entered into force on 29 December 2012. The agreement generally applies from 1 January 2013.
- The DTT between Austria and Liechtenstein was revised and, particularly, includes a zero rate withholding tax (WHT) on dividend payments. It enters into force on 1 January 2014.
- During the first half-year of 2013, TIEAs have been signed with Canada, India, and Mexico.

**Taxes on corporate income**
In principle, all corporations, foundations, and establishments are subject to a profit tax at a flat rate of 12.5%. Resident companies are subject to unlimited tax liability on worldwide income. Non-resident companies are subject to limited tax liability on income from properties or branches within Liechtenstein.
**Minimum tax**

All legal entities are subject to an annual minimum tax of 1,200 Swiss francs (CHF). This tax can be fully credited to the profit tax.

The full tax amount is due even if the corporation is not resident in Liechtenstein for the whole tax period.

Under the lone exception, minimum tax is not due if the total assets of a legal entity did not exceed CHF 500,000 during the last three years.

**Corporate residence**

A company is considered to be resident in Liechtenstein if its registered seat (address) or place of effective management is within Liechtenstein.

Companies that have neither a domicile nor effective place of management in Liechtenstein, as well as special asset dedications without legal personality, are subject to limited tax liability for the following income:

- Corporate income from the cultivation of domestic real estate used for agriculture and forestry.
- Rental and lease income from real estate situated within Liechtenstein.
- Taxable net corporate income of permanent establishments (PEs) situated in Liechtenstein.

**Permanent establishment (PE)**

Please note that Liechtenstein has only a few DTTs (see the Withholding taxes section). However, Liechtenstein is in the process of negotiating various new DTTs and has included PE definitions according to the Organisation for Economic Co-operation and Development (OECD) model treaty.

**Other taxes**

**Value-added tax (VAT)**

Liechtenstein has adopted the VAT law of Switzerland, having its own administration in Vaduz.

The general VAT rate is 8%. A reduced rate of 2.5% is applicable to deliveries of food, drugs, newspapers, magazines, and books. Furthermore, lodging/accommodation is taxed at a reduced rate of 3.8% (limited until 31 December 2013). Note that various services are VAT-exempt (e.g. health, social security, education, banking, insurance).

Any person who, irrespective of legal form, carries on a business is liable for VAT. Any person liable for VAT that is involved in domestic entrepreneurial activity with a taxable turnover that is less than CHF 100,000 within a financial year can be exempted from taxation. Special regulations apply for non-profit institutions as well as for non-profit sport or cultures clubs. Reverse charge is applicable for services and certain deliveries from an entity domiciled abroad.

**Customs duties/import tariffs**

According to the customs union treaty of 1923 between Liechtenstein and Switzerland, Switzerland customs duties and import tariffs are applicable for Liechtenstein as well.
The tariffs and duties depend on various specific attributes of the products and are listed on comprehensive tariffs and duties lists. Therefore, the specific tariffs and duties must be checked for every case individually.

**Excise taxes**
Several excise taxes apply in Liechtenstein (e.g. petroleum tax, tobacco tax, car tax, CO2 tax, beer tax, salt tax, taxation of distilled spirits).

**Property taxes**
No property taxes are applicable in Liechtenstein.

**Stamp duty**
According to the customs union treaty of 1923 between Switzerland and Liechtenstein, the Swiss stamp duty tax law of 27 June 1927 is applicable in Liechtenstein. The stamp duty law includes the stamp duty tax and the security transfer tax.

**Stamp duty tax**
Upon the formation of legal entities whose capital is divided into shares (e.g. company limited by shares, limited liability company, establishment with capital divided into shares) the stamp duty amounts to 1% of the nominal value or the higher amount effectively paid (above par). The first CHF 1 million is tax exempt.

The same duty also becomes due when the capital is increased or when the shareholders make contributions without increasing the capital. On 1 March 2012, the stamp duty tax on bonds and money market certificates was abolished.

Various exemptions should also be considered.

**Security transfer tax**
Security transfer tax is due on all transactions of qualifying securities, if a security dealer is involved. The tax amounts to 0.15% for domestic securities (Switzerland and Liechtenstein) and 0.3% for foreign securities.

In particular, banks and financial intermediaries qualify as security dealers and are liable for the payment of the security transfer tax. Furthermore, legal entities with qualifying securities with a book value of more than CHF 10 million also qualify as security dealers and are also liable for the payment of the security transfer tax.

**Formation tax (Gründungsabgabe)**
Unless Swiss stamp duty law applies, a formation tax in the amount of 1% of the statutory nominal capital is levied upon the formation or relocation of legal companies in Liechtenstein (e.g. foundations) as well as for capital increases.

The general tax rate of 1% is reduced to 0.5% for amounts greater than CHF 5 million and to 0.3% for amounts greater than CHF 10 million. The first CHF 1 million is tax exempt.

Foundations are subject to the formation tax at a tax rate of 0.2%.

**Real estate profit tax**
Capital gains from the sale of real estate, or equivalent actions with the same result, are subject to a separately assessed real estate profit tax. The taxable gain is generally the difference between proceeds of the sale and the original purchase price of the property plus any capital expenditure incurred. The basic tax rate is between approximately
3% and 21%, depending on the amount of taxable real estate gain. The transfer of the economic ownership of real estate (e.g. via the sale of the majority of the shares in a real estate company) triggers real estate tax as well.

**Tax on insurance premiums**
Liechtenstein levies a tax on certain insurance premiums. The tax rate amounts to 5% of the cash premium (2.5% for life insurance). Cash premiums in foreign currency have to be converted to Swiss francs at the time the tax claims arise.

Various exemptions should also be considered.

**Branch income**

The principles applicable to corporations also apply for branch income, provided that transactions with the head office or other branches are at arm’s length. Liechtenstein taxation is imposed on the profit attributable to the branch. The minimum tax of CHF 1,200 is also applicable.

There is no WHT on profit transfer to the head office.

**Income determination**

The corporate profit tax is determined according to the taxable corporate net income, which is based on the financial statement under consideration of the following provisions.

**Inventory valuation**

Inventories must be stated at the lower of cost or market. Cost is generally determined by the first in first out (FIFO) or by the average cost method. The tax authorities permit a general reserve against stock contingencies of up to one-third of the inventory cost or market value at the balance sheet date without inquiry into its justification, provided a detailed record of inventory is available for review by the tax authorities. The need for a reserve in excess of this amount (e.g. for obsolescence, slow-moving-stocks) must be substantiated to the satisfaction of the tax authorities.

**Capital gains**

Capital gains derived from the sale of shares are tax-exempt. Capital gains from the sale of real estate are subject to a separately assessed real estate profit tax (see the Other taxes section for more information).

**Dividend income**

Dividend income and liquidation proceeds are tax-exempt.

**Interest income**

Interest income is taxable and must be at arm’s length if it is in respect to related parties (for safe harbour rates, see Interest expenses in the Deductions section).

**Foreign income**

Resident corporations operating locally are generally taxed on their worldwide income. However, income from foreign real estate and PEs situated abroad is exempt from taxation in Liechtenstein.
Deductions

Depreciation and amortisation

Depreciation of tangible fixed assets and amortisation of intangible assets is allowed if it is ‘commercially justified’. For tax purposes, either the straight-line (depreciation based on the acquisition value) or the declining-balance method (depreciation based on the book value) may be used. Depreciation and amortisation not recorded in statutory accounts are not deductible for tax purposes.

A special (higher) rate of depreciation may be allowed for assets used only for short periods or for assets for which a rapid decrease in value can be proved.

The depreciation/amortisation rate per annum of various property types are provided below. Note that these depreciation rates relate to write-downs on the book value. If the write-down is performed on the acquisition value, then the rates enumerated below should be reduced by half.

</tbody>
</table>

Start-up expenses

*Please see Formation tax (Gründungsabgabe) in the Other taxes section.*

In general, the expenses for a start-up are tax deductible as long as they are economically justified.

Interest expenses

Interest paid by a corporation to a third party is a deductible business expense. Interest paid to related parties (affiliates or shareholder) has to reflect the fair market rate and has to be at arm’s length.
With respect to related parties, the tax administration of Liechtenstein annually issues safe harbour interest rates to be used on loans denominated in Swiss francs on the one hand and in foreign currencies on the other hand. The corporation may deviate from these safe harbour rates as long as it can prove that the rates are at arm’s length and more appropriate in the present case.

**Safe harbour rates 2013**

**Equity interest deduction**

The equity interest deduction is a standardised deduction for interest on equity based on the multiplication of the ‘modified’ equity by the interest rate (according to the annual finance law). For 2013, the equity interest rate is 4%.

To determine the modified equity, the following terms have to be considered:

- Paid-in capital and open reserves plus taxed hidden reserves, such as:
  - Deduction of own shares.
  - Deduction of participations/shares.
  - Deduction of foreign real estate.
  - Deduction of assets belonging to foreign PEs.
  - Deduction of non-operating related assets.
- Equity increases and decreases, based on the capital at the beginning of the business year.

Liechtenstein

**Provisions**

**Bad debt provision**
It is admissible to set up an accounting provision for specific impaired debt; additionally, it is possible to account for a general bad debt provision of up to 10% on receivables from Liechtenstein and Switzerland and up to 15% on receivables from any other country if no specific provision has been accounted for the corresponding debt. These provisions are not accepted regarding receivables to corporations and institutions under public law, banks, or for inter-company receivables.

**Inventory provision**
*See Inventory valuation in the Income determination section for a description of the inventory provision regime.*

**Provisions on financial investments**
Provisions on financial investments are possible but must be proved by an established corporate evaluation method or other suitable documents.

**Other provisions**
Provisions at the expense of the profit and loss statement are admissible for obligations during the business year whose amount is not yet determined or for other immediately imminent losses during the business year.

**Charitable contributions**
Charitable contributions to legal persons and special asset dedications with domicile in Liechtenstein, in another country member of the European Economic Area (EEA), or in Switzerland, which are exempt from tax liability in light of exclusively and irrevocably common-benefit purposes, are deductible, up to the amount of 10% of the taxable corporate net income.

**Deduction for income from intellectual property (IP)**
A deduction of 80% is allowed on the net income from IP rights that was created or acquired after 1 January 2011. IP rights, in the sense of the tax law, consists of patents, supplementary protection certificates, utility models, trademarks, and designs, which must be protected by registration in a national, foreign, or international Register, as well as software and technical/scientific databases.

The Liechtenstein IP box has been approved by the EFTA Surveillance Authority (ESA).

**Fines and penalties**
Fines and penalties are generally not tax deductible.

**Taxes**
Taxes are not deductible in Liechtenstein.

**Net operating losses**
A loss can be carried forward and offset against the profits for future years. There is no time limitation of loss carryforwards as well as loss offsetting. Losses cannot be carried back.

For assessments as of 2013, the loss carryforward is limited to 70%. The other 30% can still be carried forward indefinitely. As a consequence, 30% of the taxable profit is subject to annual taxation even if corresponding losses from previous years exist.
Payments to foreign affiliates
Interest, royalties and licences, and other fees to foreign affiliates are allowed as
deductions to the extent that they meet the arm’s-length test (i.e. equivalent to charges
that would be made by an unrelated third party).

For interest payments between affiliated companies or between shareholders and
companies, Liechtenstein tax authorities publish safe harbour rules annually (i.e.
generally accepted interest).

Group taxation
Resident and non-resident corporations have the possibility to opt for group taxation
if they meet the legal requirements (such as more than 50% of capital and 50% of
voting rights). The ultimate group leader must either be a corporation domiciled in
Liechtenstein or with the effective place of management in Liechtenstein.

In order to form multi-level group structures, sub-groups may also be built. The
same rules are applicable for the group leader of the sup-group as for the primary
group leader.

The group leader can decide, for each company that fulfils the conditions, which
company will be included in the group or not.

Losses of group members can be offset against profits of the (sub) group leader within
the same year. The offsetting is only possible under the following conditions:

• Only losses incurred after the option for group taxation can be considered.
• Losses need to be calculated according to Liechtenstein profit calculation rules.

The losses are allocated to the (sub) group leader according to the direct participation
quota of the (sub) group leader to the group member whose losses should be offset. If
the losses cannot be used at the level of the (sub) group leader, they can be allocated to
other group members. However, the minimum tax is applicable for each group member.

Losses that have been attributed to the (sub) group leader must be adjusted in the
following cases:

• Losses can be offset against profits on the level of the group member.
• Exit of group member from the group.
• Reduction of participation quota of a group member.
• Depreciation is made on a participation due to losses.

The (sub) group leader must provide evidence annually that no adjustment needs to
be made.

Transfer pricing
Liechtenstein does not have specific transfer pricing rules apart from the rule that intra-
group transactions are carried out at arm’s-length terms.

Thin capitalisation
Liechtenstein does not have thin capitalisation rules.
Liechtenstein

**Tax credits and incentives**

As of 1 January 2011, tax privileges for certain legal structures, such as domiciliary and holding companies, have been abolished. Companies that benefited from such privileges will continue to be taxed accordingly through 2013, unless they opt for the ordinary taxation scheme. These companies also have to pay the minimum tax of CHF 1,200 annually.

The following tax incentives are applicable as of 1 January 2011:

- Profit tax exemption for corporations that have an irrevocable charitable, cultural, or ideal purpose without commercial activity.
- Profit tax exemption of dividend income and capital gains on shares/participations (especially interesting for holding companies).
- Notional interest deduction on equity.
- Private asset structure (PVS).
- Deduction for income from IP.

**Private asset structure (Privatvermögensstrukturen or PVS)**

Liechtenstein offers tax privileges for PVSs. A PVS has no economic activity. The purpose of a PVS is to acquire, hold, administrate, and sell financial instruments according to the assets management law as well as cash and bank accounts. Participations may only be held if it can be proved that the shareholders or beneficiaries have no influence on the administration of this company.

The articles of the PVS must contain a clause that the regulations for PVS are applicable. Exemptions of this rule are applicable for legal entities that existed before the introduction of the new tax law as of 1 January 2011.

The investors of a PVS must be individuals who administrate their own assets or structures acting in the interest of individuals.

The company or the audit company needs to confirm, upon formation or after major changes, that the conditions for the PVS structure are fulfilled. This is supervised by the tax authority or a neutral certified accountant.

A PVS only pays the minimum tax of CHF 1,200 annually.

This tax scheme was qualified as in conformity with the provisions on state aid set out in Article 61 of the Agreement on the European Economic Area by the ESA.

**Avoidance of double taxation**

Foreign taxes shall be allowable against domestic taxes (credit method) under circumstances where (i) the income is derived or wealth is owned in a country that has concluded an agreement for the avoidance of double taxation with Liechtenstein and such agreement provides for a tax credit or (ii) reciprocity is granted. Income or wealth shall be exempted from taxation in Liechtenstein (exemption method) if the agreement for the avoidance of double taxation provides tax exemption or if reciprocity is granted.
Withholding taxes

Coupon (withholding) tax
Until the end of 2010, Liechtenstein had a coupon tax of 4% on dividend payments and certain interest payments. The coupon tax was abolished as of the beginning of 2011. This means that no coupon tax is due on new reserves incurred after the end of 2010 or on interest payments. However, the coupon tax still applies with regard to old reserves (reserves existing on 1 January 2011). The tax base for calculation of the coupon tax on old reserves is the taxable capital dated 31 December 2010 (i.e. equity according to commercial balance sheet, adjusted with taxed hidden reserves). With regards to future distributions, old reserves have priority. This means the coupon tax of 4% will be due on every distribution up to the amount of the old reserves.

Tax treaties
Currently, a comprehensive DTT on income is in effect with Austria, Germany, Hong Kong, Luxembourg, San Marino, the United Kingdom, and Uruguay, as well as a limited one with Switzerland. An extension of the treaty with Switzerland is in negotiation.

Liechtenstein has concluded TIEAs with the following governments: Andorra, Antigua and Barbuda, Australia, Denmark, Germany, Faeroe Islands, Finland, France, Greenland, Iceland, Ireland, Japan, Monaco, Netherlands, Norway, St. Kitts and Nevis, St. Vincent and Grenadines, Sweden, the United Kingdom, and the United States. During the first half-year of 2013, TIEAs have been signed with Canada, India, and Mexico. A TIEA with Belgium was signed on 10 November 2009 but has not yet entered into force.

The governments of Liechtenstein and the United Kingdom signed a Memorandum of Understanding (MOU) relating to cooperation in tax matters, which includes the Liechtenstein disclosures facility (LDF). According to these regulations, financial intermediaries in Liechtenstein are required to show that their UK customers have been declaring their Liechtenstein investments to the tax authorities in the United Kingdom. In certain circumstances, even accounts or assets outside of Liechtenstein can be transferred in order to take advantage of the terms of the LDF.

Tax administration

Taxable period
The tax year corresponds with the business year. Therefore, the applicable accounting period, which may end at any date within the calendar year, is the basis for corporate taxation.

Tax returns
Corporations resident in Liechtenstein or with PEs in Liechtenstein must file a tax return by 1 July of the calendar year following the fiscal year-end.

Due to a substantiated written request, the tax authority may extend the submission deadline by six months. A deadline extension requires the payment of the provisional invoice. In especially justified cases, the submission deadline may be extended once again. Such a request must be made before expiry of the first deadline extension.

The tax assessment issued by the tax administration is based on the company’s tax return, including the attachments and the financial statements filed.
Liechtenstein

Payment of tax
Companies must pay tax within 30 days of receipt of the assessment. The defaults charge rate is 4%.

Tax audit process
Generally, the Liechtenstein tax system is based on self-assessment. In the past, the Liechtenstein tax authority assessed an entity based on the documents and information provided by the entity itself and additional documents or explanations requested by the tax authorities. In the future, it is intended that the Liechtenstein tax authority will carry out external tax audits in-house. However, at the moment it is unclear how the entities will be selected and how often a tax audit will take place.

Statute of limitations
The limitation of the right to assess a tax is five years, starting after the end of the tax year in terms of periodic tax and after the end of the year in which the taxable incidence had taken place in terms of non-periodic tax.

Topics of focus for tax authorities
The tax authority especially focuses on payments between affiliated companies (e.g. inter-company loans). Furthermore, all provisions and depreciations will be checked under the premise of economical necessity.

Other issues
Restructurings
Restructurings (e.g. change of corporate form, merger, spin-off) can be carried out tax neutrally, if certain conditions are met.

All restructurings have in common that they can only be carried out tax neutrally if they are performed at tax book value and if the assets remain taxable within Liechtenstein. Furthermore, specific/additional conditions must be met for each kind of restructuring.

**Significant developments**

The following recent amendments have been introduced into the Lithuanian tax legislation:

- Five free economic zones (in addition to two already operating free economic zones) were established in 2012 and are currently under development. Entities that invest in Lithuanian free economic zones are entitled to partial or complete corporate income tax (CIT) relief (depending on the investment amount), relief of tax on real estate, and 50% relief of land lease tax.
- Starting from 1 January 2013, double tax treaties (DTTs) with India and Mexico came into force.
- As of 1 January 2013, real estate tax rate ranges from 0.3% to 3% (previously, the rate ranged from 0.3% to 1%).
- Starting from 1 January 2013, land tax rate ranges from 0.01% to 4%, depending on local municipalities (previously, the rate of 1.5% was applied).

As of 1 January 2013, electronic value-added tax (VAT) invoicing became easier in Lithuania, as any business tools may be used to guarantee the authenticity of the invoice origin and the integrity of its contents.

**Taxes on corporate income**

The standard CIT rate is 15%. However, small companies and agricultural companies can apply a reduced CIT rate of 5%, if certain conditions are met.

Generally, CIT is applied on taxable income received by a Lithuanian tax resident from its local and worldwide activities. Taxable income is calculated by reducing general income of a certain tax period with deductible expenses and non-taxable income.

Income of a tax resident company is not subject to taxation in Lithuania if it was received from activities through a permanent establishment (PE) in a foreign country that is in the European Economic Area (EEA) or that has a DTT with Lithuania and if the income was subject to taxation there.

Furthermore, CIT may be reduced or even not applied if foreign-sourced income received not through a PE is taxed with a withholding tax (WHT) in a foreign country and this country has a DTT with Lithuania.

Non-resident companies are generally taxed on Lithuania-sourced income received through a local PE and reduced by deductible expenses or on income subject to WHT in Lithuania.
Lithuania

**Reduced CIT rate for small companies**
Entities with fewer than ten employees and less than 1 million Lithuanian litas (LTL) (approximately 290,000 euros [EUR]) in gross annual revenues can benefit from a reduced CIT rate of 5%.

**CIT regime for certain maritime activities**
The rate of CIT on certain maritime activities is 15%, with the base set by reference to the functional capacity of the ship. This fixed CIT may be applied to maritime entities that fulfil certain conditions indicated in the law. An election must be made to the tax authorities to apply this regime.

**Local income taxes**
There is no local or municipal CIT in Lithuania.

---

**Corporate residence**
A company is resident in Lithuania if it incorporates there or its activities create a PE for tax purposes.

**Permanent establishment (PE)**
According to local legislation, a foreign company is deemed to have a PE in Lithuania when:

- it permanently carries out commercial activities in Lithuania in whole or in part
- it carries out its activities through a dependent representative (agent)
- it uses a building site or construction, assembly, or equipment objects, or
- it uses equipment, including drilling installations and ships, for exploration or extraction of natural resources.

DTTs may establish different rules of PE recognition. According to domestic law, where there is a DTT, the provisions of the treaty take precedence.

A PE must be registered as a taxpayer with the tax authorities in the territory where its activities are carried out. Its profits are subject to CIT at the rate of 15%.

---

**Other taxes**

**Value-added tax (VAT)**
The standard VAT rate is 21%.

The reduced rate of 9% applies to:

- Books and non-periodical publications.
- Periodical publications meeting certain criteria.
- Public transport services performed on regular routes determined by the Ministry of Communications or municipalities.
- Supply of heating to residential premises and supply of hot water (applicable until 31 December 2013 but could be extended).

The reduced rate of 5% applies to:

- Technical aid devices and their repair services for the disabled.
• Pharmaceuticals and medical aid devices, when their acquisition cost is wholly or partly compensated following the provisions of the Law on Health Insurance (applicable until 31 December 2013 but could be extended).

The compensational rate for farmers is 6%.

In general, supplies of goods and services made by a taxable person performing its economic activity for a consideration within the territory of Lithuania, as well as imports of goods, are subject to VAT.

**Exempt with credit (zero-rated)**

Goods and services that are exempt with credit (zero-rated) include, but are not limited to, the following:

• Supply of goods exported outside of the European Union (EU).
• Goods acquired by non-EU resident passengers in Lithuania and carried out from the European Union.
• Goods and services for vessels and aircraft.
• Transportation and any directly linked ancillary services related to export of goods and any directly linked ancillary services related to the import of goods when the value of these services shall be included in the customs value of the goods.
• Transportation of imported goods carried to a VAT exemption warehouse or temporarily stored under customs’ supervision, placed in a free economic zone or free warehouse, put under customs warehousing procedure, processed under customs’ supervision, temporarily imported for processing without levying customs duties, temporarily imported without implicitly levying customs duties, or put under internal or external transit procedure.
• Issuance of International Road Transportation (TIR) and Admission Temporaire/Temporary Admission (ATA) transportation documents.
• Insurance and certain financial services directly related to export of goods from the European Union.
• Supply of goods to sponsorship or charity recipients registered in Lithuania and listed in the Lithuanian law on charity and sponsorship, if the goods are exported by the recipients as sponsorship or charity to non-EU organisations that may be recipients of sponsorship or charity under the law.
• Supply of maintenance and processing services for movable property supplied to non-taxable persons established outside Lithuania that have no fixed establishment within the country, provided that the property was temporarily imported for maintenance, repair, processing, etc. in the European Union and will be carried out from the European Union after supply of these services.
• Services of disclosed agents participating in certain transactions of supply of goods or services to local taxable and non-taxable persons where zero-rated VAT is applied and transactions of supply of goods or services where the supply of goods or services is considered carried out outside the European Union.
• Supply of goods to VAT payers registered in another EU member state when these goods are carried out from Lithuania to another EU member state.
• Supply of new means of transport supplied to any person when new vehicles are carried out from Lithuania to another EU member state.
• Supply of goods subject to excise duty when they are supplied to a company not registered for VAT purposes and the goods are carried out from Lithuania to another EU member state.
• Supply of goods in certain cases related to international trade.
Lithuania

In order to apply zero-rated VAT on goods carried out from Lithuania, VAT payers must hold supporting documents as evidence that these goods were actually exported from the European Union or carried out from Lithuania to another EU member state.

Exempt without credit
Goods and services that are exempt without credit include, but are not limited to, the following:

- Personal or public health care services, under certain conditions.
- Supply of human organs, blood, human milk, and dental prostheses supplied by dentists or dental technicians.
- Transportation of ill, wounded, or other persons requiring medical care by special means of transport.
- Social services supplied by institutions for children and young people, nursing homes for the elderly, and/or by care or guardianship institutions for disabled or by other non-profit entities.
- Education and training services.
- Cultural and sports services rendered by non-profit entities.
- Services provided by political parties, trade unions, and other non-profit membership based legal entities to their members when these services correspond to that set out in the articles of association and are provided free-of-charge, except for membership fees.
- Services provided by religious communities, other communities, and centres to their members if these services correspond to the purposes of these communities set out in their canons, statutes, and other documents and are provided free-of-charge, except for donations.
- Postal services and directly related goods supplied by government-listed universal postal services providers, except for individually negotiated postal services.
- Radio and TV broadcasting services provided by non-profit legal entities.
- All types of insurance and re-insurance services and related services rendered by insurance and re-insurance agents.
- Financial services meeting certain requirements.
- Lotteries and gambling.
- Postage stamps and other government-listed special signs available for sale against their nominal value (this provision shall be applied only to the postage stamps that can be used as a confirmation of payment for postal services in Lithuania).
- Letting of residential premises (except for accommodation services provided by hotels, motels, camping, and other accommodation services or letting of residential premises not indicated above when the letting period does not exceed two months).
- Letting or sale of immovable property, other than residential premises (certain exceptions apply).
- Supply of goods where the VAT payer has not deducted any proportion of the VAT on purchases and/or importation thereof (certain conditions apply).

Intra-Community acquisitions (i.e. acquisitions of goods from other EU member states) are VAT-exempt, provided that:

- the supply of such goods in Lithuania would be VAT-exempt or zero-rated or the import of such goods would be VAT-exempt
- the purchaser who is a foreign taxable person would be able to refund this VAT, and
- triangular transactions meet certain criteria.

Sale and contribution in kind of a business or part of a business is treated as being out of scope of VAT (under certain conditions).
Option to tax
Option to tax is applicable to:

- Lease of immovable property.
- Sale or other transfer of old immovable property (i.e. used for more than 24 months).
- Financial services meeting certain requirements.

Option to tax may be exercised only if the customer is a taxable person registered for VAT purposes. If a VAT payer decides to use the option to tax, it is valid for at least 24 months.

Customs duties
EU customs law is applicable in full.

EU customs law, also known as the Community Customs Code, compiles the rules, arrangements, and procedures applicable to goods traded between the European Community and non-member countries. The Community Customs Code indicates an obligation on a person to pay the amount of the import or export duties that apply to specific goods under the Community provisions in force. The application of the EU customs law means that:

- trade between Lithuania and other EU countries is customs-free
- imports from non-EU countries are subject to EU customs tariffs, and
- numerous free trade agreements concluded between EU and non-EU countries apply to Lithuania.

Excise taxes
Excise duty is imposed on the following goods produced in or imported into Lithuania: ethyl alcohol and alcoholic drinks, including beer and wine; processed tobacco, including cigarettes, cigars, cigarillos, and smoking tobacco; energy-related products, including petrol, kerosene, gasoline, fuel oil, natural gas, and their substitutes and additives; coal, coke, and lignite; and electricity. The tax rate depends on the type and quantity of goods.

Land tax
Lithuanian and foreign entities are subject to land tax collected by the municipalities for the land they own in Lithuania. Roads for general use and forestland are exempt. The assessment and payment terms are set forth by the municipalities, which are also entitled to grant land tax incentives.

As of 1 January 2013, the annual land tax rate ranges from 0.01% to 4%, depending on local municipalities (previously the rate of 1.5% was applied). There is a transitional period set for years 2013 to 2016 if the taxable value of land increases during this period. Please see the table below describing amendments to the land tax in force as of 1 January 2013:

**Land lease tax**
State-owned land that is leased for Lithuanian and foreign companies is subject to land lease tax at a rate established by the municipalities. The minimum tax rate set by the government is 0.1%, and the maximum rate is 4% of the value of the land.

**Real estate tax**
As of 1 January 2013, the real estate tax rate ranges from 0.3% to 3% (previously, the rate ranged from 0.3% to 1%). Tax is levied on the value of real estate owned by individuals and used for commercial purposes or owned by legal entities (with certain exemptions). Municipal councils establish a specific tax rate for real estate situated in their territories annually.

**State dues (stamp taxes)**
There are no stamp duties applied in Lithuania; however, minor fees for the services of state institutions, such as the issuance of documents having legal force and other deeds, may apply.

**Environmental tax**
Environmental tax is imposed on pollutants discharged into the environment, a few specified products (e.g. tyres, batteries), and certain types of packaging.

**Tax on natural resources**
A tax on natural resources is payable on the value of extracted natural resources.

**Social security contributions**
The rate of social security contributions ranges from 30.98% to 32.6% for employers and is 9% for employees. At present, there are no lower or upper limits set for social security contributions on employment related income.

**Contributions to the Guarantee Fund**
Contributions to the Lithuanian Guarantee Fund are calculated by employers at a rate of 0.2% on the gross salary payable to employees. The Guarantee Fund provides support to employees in case of employer’s bankruptcy.
Branch income

A branch of a foreign company is defined as a structural subunit of a foreign company, which has an establishment in Lithuania and is entitled to engage in commercial activities in Lithuania as well as conclude contracts and undertake obligations according to the power of attorney issued to the branch by its founder. A branch does not have the status of a legal person. It is taxed in the same manner as a PE (see the Taxes on corporate income section).

Income determination

Inventory valuation

Under domestic accounting legislation, stock used in the production and included in the cost of produced products is valued in the financial statements by the first in first out (FIFO) method. The last in first out (LIFO), weighted-average, progressive-average, actual-price, or another method that corresponds to the stocks’ movement can also be used. However, the method used must be disclosed in the notes to the annual accounts, and, among other things, the note must report the profit that would have been calculated if the FIFO method of valuation had been used. For CIT purposes, usage of another method than FIFO should be approved by the tax authorities.

Capital gains

Capital gains are taxed as part of the corporate profit of the enterprise.

Capital gains are treated as non-taxable income when they are derived from the transfer of shares in a company incorporated in the European Economic Area or in a country with which Lithuania has a valid DTT and that pays CIT or an equivalent tax. This holds true if the Lithuanian holding company holds more than 25% of voting shares for a continuous period of (i) at least two years or (ii) at least three years when the shares were transferred in one of the established forms of reorganisation. Certain restrictions apply.

Dividend income

The receiving company does not include the dividends received from other entities in its taxable income.

Interest income

Interest income is treated as general taxable income and is subject to 15% CIT.

Exemptions from taxable income

The following types of income are exempt from CIT:

- Insurance indemnity not in excess of the value of lost property or other losses or damages, the refunded part of insurance premiums in excess of the premiums deducted from income in accordance with the procedure established, and the part of insurance indemnity in excess of the premiums deducted from income in accordance with the procedure established.
- Proceeds of a bankrupt company received from sale of its property.
- The balance of the formation fund of an insurance company as prescribed by the law on insurance.
- Investment income of investment companies with variable capital and closed-end investment companies acting in accordance with the law on collective investment undertakings, except for dividends and other distributable profits.
• Income derived by health care institutions for their services that are financed from the funds of the Compulsory Health Insurance fund.
• Income derived from revaluation of fixed assets and liabilities as established by laws and regulations, except for income derived from the revaluation of derivative financial instruments acquired for hedging purposes.
• Default interest, except for that received from foreign companies registered or otherwise organised in blacklisted territories or residents of such territories (see Blacklisted territories in the Deductions section).
• All or part of the profit gained from legal entities of unlimited civil liability that are payers of CIT and with income that is subject to CIT under the law or to a similar tax under respective statutes of foreign countries, with certain exceptions.
• Fees collected by seaports and airports, charges for air traffic navigation services, and funds collected from the lease of seaport-owned land.
• Results arising from adjustments made for the previous tax periods as prescribed by the law on accounting.
• Indemnification for damages received by the company, with certain exceptions.
• Compensation received according to the Lithuanian programmes of the EU financial support relating to taking fishing ships for scrap.
• Life insurance payments received by insurance companies, provided the term of the life insurance policy is valid for not less than ten years or at the date of the receipt of the insurance benefit the recipient has reached the pension age in accordance with the additional law on pensions. Additionally, insurance investment income of insurance companies, except for dividends and other distributable profit, is exempt along with investment insurance income of insurance companies received according to the contracts of life insurance occupational pensions concluded in accordance with the law on accumulation of occupational pensions.
• Direct and other compensational allowances that are received by units performing agricultural activities to maintain their level of income, which meet the requirements established in the laws and other legal acts of Lithuania.

Foreign income
Income is not subject to taxation in Lithuania if it was received from activities through a PE in a foreign country that is in the European Economic Area or that has a DTT with Lithuania and if the income was subject to taxation there. Since such income is not subject to taxation in Lithuania, costs related to the income cannot be deducted from income that is subject to taxation in Lithuania.

Deductions
Allowable deductions include all the usual costs that an entity actually incurs for the purpose of earning income or receiving economic benefit unless the law on CIT provides otherwise.

Depreciation
Tangible and intangible assets may be depreciated using a directly proportional (straight-line) depreciation method, a production depreciation method, or a double-declining-balance depreciation method. Depreciation may not exceed maximum rates established by the law. For certain typical assets, depreciation rates relevant for tax purposes are shown in the chart below:
Goodwill
Goodwill can be amortised for tax purposes in a straight-line method over 15 years after a merger of a purchasing company and an acquired company, if certain conditions are met.

Start-up expenses
Generally, start-up expenses are deductible for tax purposes.

Interest expenses
Interest expenses are generally deductible for tax purposes. Interest expenses should be recognised as non-deductible for tax purposes if, after acquisition, a purchasing company and an acquired company are merged and debt used for acquisition of shares is pushed down to the acquired company and certain conditions are not met.

Interest paid to related parties may be non-deductible for tax purposes if thin capitalisation rules are infringed and the interest rate on a debt from related party does not correspond to a fair market interest rate (see Transfer pricing and Thin capitalisation in the Group taxation section).

Bad debts
Bad debts are deductible only if proved and specific criteria are met. Provisions are non-deductible.

Charitable contributions
Generally, double the amount of donation/sponsorship can be deducted for tax purposes (i.e. 200% deduction is available) but only if donation/sponsorship was provided to registered recipients and only up to a limit of 40% of taxable result before deduction of sponsorship and utilisation of tax losses carried forward.

Fines and penalties
Fines and penalties are generally non-deductible for tax purposes.

Taxes
All taxes, fees, and other compulsory payments to the state budget are deductible for CIT purposes, except VAT paid to the budget and CIT. Note that VAT can be treated as deductible for CIT purposes if it is input or paid import VAT that is non-refundable for VAT purposes and this input or paid import VAT is calculated on deductible expenses.

Other significant items
Limited deductible expenses also include the following:

Lithuania

- Maintenance, repair, and reconstruction expenses of tangible fixed assets: if the repair or reconstruction increase the service period and improve the qualities (useful characteristics of the fixed assets), the value of repair or reconstruction shall be added to the acquisition value of the tangible fixed assets.
- Business travel expenses: deductible with restrictions.
- Advertising and representation expenses: 75% of representation expenses are deductible.
- Natural losses: deduction limited to not more than 1% of turnover.
- Contributions and expenses for the benefit of employees: deductible with restrictions.
- Special provisions of credit institutions and insurance companies: calculated according to the methods established by the Bank of Lithuania and the Commission of Insurance Supervision.
- Sponsorship: the double amount deductible (i.e. 200% deduction is available) but only if provided to registered recipients and only up to 40% of taxable result before deduction of sponsorship and utilisation of tax losses carried forward.
- Membership fees, contributions, and premiums: deductible with restrictions.

Non-deductible expenses also include the following:

- Default interest (forfeit), fines, and late interest paid to the state budget as well as other sanctions imposed for violations of laws and regulations of Lithuania.
- Interest or any other indemnity paid due to non-performance of contractual obligations by related parties.
- Amount of the limited deductible expenses in excess of the established limits.
- Expenses attributed to allowable deductions more than 18 months past, although the payments for goods or services supplied by the entities registered or otherwise organised in blacklisted territories (see below) have not been made.
- Sponsorship and gifts that do not correspond to the requirements of CIT law.
- Payments to blacklisted territories (see below) if they are not verified and payments are not subject to WHT.
- Indemnification for damages inflicted by the entity.
- Dividends or otherwise distributed profits.
- Other expenses not related to the deriving of income and not attributed to operating activities of the entity as well as the expenses that are not considered allowable deductions under the law.
- Amounts resulting from adjustments and corrections of errors of previous tax periods.
- Expenses related to revaluation of fixed assets and securities.
- Deductible or limited deductible expenses attributed to non-taxable income.
- Expenses related to income from certain international maritime activities, if a maritime entity chose to apply a fixed CIT.

**Net operating losses**

Operating losses may be carried forward for an indefinite period, provided that certain requirements are met.

Current year operating losses incurred after 1 January 2010 can be transferred to another legal entity of the group if certain conditions are met.

Losses incurred due to the transfer of securities and/or derivative financial instruments may be carried forward for five years.

No carryback of losses is available in Lithuania.
Payments to foreign affiliates
Payments to foreign affiliates (e.g. interest, royalties, management fees, fees for other services) are deductible for tax purposes if the payment serves a business purpose, provides a benefit to the payer, is at arm’s length, and is substantiated by sufficient documentation. Payments to foreign affiliates may also be subject to various WHTs. Certain payments to affiliates located in tax haven (blacklisted) countries are subject to 15% WHT rate.

Blacklisted territories
A blacklisted territory is a foreign country or territory that is included on a list of offshore territories established by the Minister of Finance that meets at least two of the following criteria:

- Similar tax rate in such territory is below 75% of that set in the Lithuanian CIT law.
- In such territory, different rules for levying a similar tax are applied, depending on the country where the parent company (controlling entity) is registered or otherwise organised.
- In such territory, different rules for levying a similar tax are applied, depending on the country where the business is conducted.
- The company (the controlled taxable entity) has entered into agreement with the tax administrator of that territory with regard to the application of a tax rate or tax base.
- There is no effective exchange of information in such territory.
- There is no financial and administrative transparency in such territory, the tax administration rules are not quite clear, and the application thereof is not communicated to tax administrators of other countries.

A list of 58 offshore territories has been published. With certain exceptions specified in the law, all payments to offshore companies or their branches for any work or services, commodities, interest on funding, insurance premiums, guarantees, etc. are non-deductible for CIT purposes unless the Lithuanian entity provides evidence to the state tax authorities that:

- the payments are related to usual activities of the paying and the receiving business entities
- the receiving foreign business entity manages the property necessary to carry out such usual activities, and
- there is a connection between the payment and the economically grounded business operation.

Group taxation
Group taxation legislation and regimes are not available in Lithuania. Each Lithuanian entity is regarded as a separate taxpayer and may not deduct tax losses accumulated from previous tax periods at the level of any other group entity.

Transfer of current year operating tax losses incurred to an entity of the same group of companies is allowed if certain requirements are met.

Transfer pricing
All transactions between associated parties must be performed at arm’s length. The tax authorities have a right to adjust transaction prices if they do not conform to market prices.
Lithuania

The Lithuanian rules refer to the Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations established by Organisation for Economic Co-operation and Development (OECD) to the extent that they do not contradict with the domestic rules.

According to the Lithuanian transfer pricing regulations, companies may apply the following methods, although traditional methods should be given preference:

- Comparable uncontrolled price method.
- Resale price method.
- ‘Cost plus’ method.
- Profit split method.
- Transactional net margin method.

All entities with an annual revenue exceeding LTL 10 million (EUR 2.9 million), as well as all banks, insurance companies, and credit institutions are required to prepare transfer pricing documentation in a specifically prescribed form. The documentation may be in a foreign language, but upon request has to be translated to Lithuanian.

As of 1 January 2012, advance pricing agreements (APAs) and binding rulings were introduced in Lithuania. Taxpayers can apply for an APA or a binding ruling from the Lithuanian tax authority in respect of future transactions.

Decisions in the form of a binding ruling or APA will be issued by the Lithuanian tax authority regarding the application of tax legislation provisions and pricing principles. The above mentioned decisions will be particularly relevant to companies planning to undertake new transactions where the taxation principles of such transactions are not clearly defined in the tax legislation and to international companies planning to perform significant transactions with associated parties.

**Thin capitalisation**

The Lithuanian thin capitalisation rules apply in respect to borrowings from related parties as well as borrowings from third parties guaranteed by related parties. The debt-to-equity ratio is 4:1. The above provisions do not apply if a Lithuanian company can prove that the same loan under the same conditions would have been granted by a non-related entity.

---

**Tax credits and incentives**

**Foreign tax credit**

A company may reduce tax payable on certain foreign-sourced income in Lithuania by taxes paid on that income in a foreign country if that Lithuanian company has received appropriate notice from that foreign country. The tax credit may not exceed the CIT rate payable in Lithuania.

**Investment project incentive**

Entities involved in an investment project are able to reduce their taxable profits by up to 50% of the actually incurred acquisition costs of long-term assets meeting certain requirements. Please note that depreciation (amortisation) expenses of such assets shall be deducted in a common manner.

Taxable profits can be reduced by such costs incurred from 2009 to 2013. The possibility of extending the validity of this relief is currently being discussed by the government.
The costs exceeding the above mentioned 50% limit can be carried forward for four years.

There are certain criteria defining what could be considered an investment project. The project should be precisely described to meet the criteria allowing it to use the tax relief, and the tax authorities should be properly notified about the project.

**Tax relief for research and development (R&D)**

Expenses, except for fixed assets’ depreciation (amortisation) expenses, incurred for R&D purposes can be deducted three times in the tax period when they are incurred, provided that R&D works performed are related to ordinary business activities.

A company applying tax relief for R&D has to prepare R&D documentation. This documentation has to cover the performed project, substantiate conformity with certain tax requirements, and specify the amount of expenses for R&D activities.

**Free economic zones**

Entities that invest in Lithuanian free economic zones are entitled to partial or complete CIT relief (depending on the investment amount), relief of tax on real estate, and 50% relief of land lease tax. Two free economic zones (in Klaipėda and Kaunas) are currently operating and five more (in Kėdainiai, Panevėžys, Šiauliai, Akmenė, and Marijampolė) were established in 2012 and are currently under development.

**Withholding taxes**

**Domestic legislation**

Generally, income of a foreign entity in Lithuania not derived through a PE is deemed to be Lithuanian-source income and is subject to WHT at the following rates:

- Interest on any type of debt obligations, including securities: 10%.
- Proceeds from the sale, transfer (with title), or lease of immovable property located in Lithuania: 15%.
- Income derived from sports activities or performers’ activities: 15%.
- Income from distributed profits: 15%.
- Royalties: 10%.
- Annual payments (tantiems) to the members of the board or supervisory board: 15%.
- Indemnities received for the infringement of copyrights or neighbouring rights: 10%.

0% WHT is applied on royalties paid to related parties meeting requirements of the European Commission (EC) Interest and Royalty Directive.

Lithuanian WHT on interest paid to EU entities or DTT tax residents is 0%.

WHT is not applied on government securities issued on international financial markets, interest accumulated and paid on deposits, and interest on subordinated loans that meet the criteria established by legal acts adopted by the Bank of Lithuania.

Dividends distributed by a resident company to another resident company are subject to a 15% CIT, which is withheld by a distributing company.

The dividends distributed by a resident company are exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company.
Lithuania

for at least a 12-month period and the distributing entity is subject to 5% or 15% Lithuanian CIT rate. However, this relief is not applied if the foreign entity (recipient) is registered or otherwise organised in blacklist territories (see Blacklisted territories in the Deductions section), as specified by the Ministry of Finance. Please note that the requirement of the 12-month holding period does not necessarily have to be fulfilled on the day of dividend distribution.

The receiving company may reduce its payable CIT for that period when dividends were received by the amount of CIT withheld from the received dividends. Any excess credit may be offset with other taxes payable.

Dividends distributed by a foreign entity are subject to a 15% WHT that is to be paid by the receiving Lithuanian entity.

Dividends distributed by a foreign company to a Lithuanian company are exempt from WHT if the distributing foreign entity is established in the EEA and related profit is properly taxed in the domiciled country.

The dividends are also exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the receiving entity is subject to 5% or 15% Lithuanian CIT rate. This participation exemption satisfies the requirements of the EC Parent-Subsidiary Directive. The exemption also applies to dividends paid by non-EU foreign companies, except those registered or organised in blacklist territories.

**Tax treaties**

Where a treaty for the avoidance of double taxation and prevention of fiscal infringement with the country in question contradicts the local regulations, the treaty provisions prevail. Lithuania has now signed 50 DTTs with foreign countries; however, the one with Kirghizia is not yet enforced.

The following WHT rates apply to dividends, interest, and royalties paid to a recipient or beneficial owner resident in a tax treaty country. The lower of the domestic or the treaty rate is given.

Notes

1. Dividends are exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the distributing entity is subject to a 5% or 15% Lithuanian CIT rate. However, this relief is not applied if the foreign entity (recipient) is registered or otherwise organised in blacklisted territories (see Blacklisted territories in the Deductions section), as specified by the Ministry of Finance. If participation exemption criteria are not met, the standard WHT rate of 15% should be applied. However, some of the DTTs allow applying WHT at a reduced rate of 10%.

2. Under the domestic law, the rate is nil if interest is paid to a company established in a country that has a DTT with Lithuania or is a member of a European Economic Area. In other cases, except for Latvia where 0% WHT is established in the DTT, 10% WHT rate should be applied.
3. Under the domestic law, 0% WHT is applied on royalties paid to related parties meeting requirements of the EC Interest and Royalty Directive.

4. Royalties for the use of industrial, commercial, or scientific equipment: 5%; other royalties: 10%.

Reduction of, or exemption from, WHT under a DTT may be obtained if a special residence certificate (Form DAS-1) is completed and approved by the tax authorities before a taxable payment is transferred. If a payment that would have been subject to a tax treaty has already been made and WHT at the local rate was withheld, it is possible to obtain an appropriate refund (reduction) by completing a special claim for a refund of the Lithuanian tax withheld at source (Form DAS-2) and obtaining the approval of the tax authorities.

In addition, the tax authorities may require completion of a special certificate giving information about income received and taxes paid in Lithuania (Form DAS-3).

---

**Tax administration**

**Taxable period**
The Lithuanian tax year runs from 1 January to 31 December. However, a corporation may apply to adopt a substitute year of reporting (e.g. 1 July to 30 June).

**Tax returns**

**CIT**

CIT returns must be submitted by the first day of the sixth month of the following tax period (1 June for companies using the calendar year).

If CIT is calculated based on activity results for the previous year, the advance CIT return for the first nine months of the tax period is to be submitted by the last day of the first month (usually January) of the tax period. The return for the remaining months of the tax period is to be submitted by the last day of the tenth month (usually October) of the tax period. If the taxpayer has chosen to pay the advance amount based on the projected amount of CIT for the current year, the return must be submitted not later than the last day of the first month of the tax period.

**WHT on dividends**

A tax-withholding entity must submit to the tax authorities a special form of a return reporting the dividends paid and tax withheld within ten calendar days after the end of the month of the dividend payment.

**WHT on payments other than dividends**

A tax-withholding entity must submit to the tax authorities a special form of a return reporting the amounts of payments paid and taxes withheld during the calendar month no later than 15 days after the end of the month in which the amounts were paid.

**Payment of tax**

**CIT**

Based on the activity results for the previous year, the advance amount of CIT for the first nine months of the tax period is calculated based on the actual CIT amount for the tax period before the previous tax period. For example, the CIT for the first nine months of 2013 would be calculated based on the appropriate portion of the actual amount of CIT for 2011. The advance amount for the remainder of the tax period is based on the
actual amount of CIT for the previous period, for example, tax for the last three months of 2013 would be based on the appropriate portion of the actual amount of CIT for 2012. Thus, the advance CIT amount for each quarter would be equal to one-fourth of the actual tax amount calculated for the tax periods discussed.

The taxpayer may choose to pay the advance amount based on the projected amount of CIT calculated for the current year. The advance tax (one-fourth of the advance CIT) must be paid no later than the last day of the respective quarter, and for the last quarter by the 25th day of the last month of the quarter.

If the amount of tax indicated in the return exceeds the amount actually paid during the tax period, the taxpayer is obligated to transfer the additional amount no later than the return submission deadline. Overpaid tax can be offset with other tax dues or refunded in accordance with the law on tax administration.

WHT on dividends
WHT on dividends is to be calculated, withheld, and remitted by a Lithuanian company that pays dividends within ten calendar days after the end of the month of the payment.

WHT on payments other than dividends
WHT on payments other than dividends is to be calculated, withheld, and remitted by a Lithuanian company or a PE of a foreign company no later than the return submission deadline.

Tax audit process
The Lithuanian tax system for companies is based on self-assessment; however, the tax authorities undertake ongoing compliance activity to ensure corporations are meeting their tax obligations. The tax authorities take a risk-based and materiality approaches to compliance and audit activities, with efforts generally focused on taxpayers with a higher likelihood of non-compliance and/or material consequences of non-compliance. Compliance activities take various forms, including general risk reviews, questionnaires, reviews of specific issues, and tax audits.

Statute of limitations
Generally, the tax authorities may investigate current and five previous tax periods. However, the limit of ten previous tax periods applies where the tax authorities are of the opinion there has been fraud or tax evasion.

Topics of focus for tax authorities
The Lithuanian tax authorities are focusing on the following areas of corporate taxpayers’ compliance:

• Obligation to register PE in Lithuania (investigations of foreign companies that perform activities in Lithuania without registering as local taxpayers).
• Compliance with transfer pricing rules and thin capitalisation rules.
• Applications of tax reliefs (e.g. investment project incentive, relief for R&D).
• Proper recognition of costs for non-business related assets and expenses.

---

**Significant developments**

New measures, effective as of tax year 2013, have been adopted by the Luxembourg Parliament in the course of December 2012. These include a slight increase of the solidarity surtax rate, a slight decrease of the investment tax credit granted on additional investments, and changes to the minimum corporate income tax (CIT) regime.

Major changes over the past few years include the introduction of a favourable tax regime for intellectual property (IP) rights, an increase of the rates applicable to investment tax credits, and the implementation of a transfer pricing framework for intra-group financing activities.

The government continues its efforts in extending Luxembourg’s favourable tax treaty network and also revisiting existing treaties in the view of introducing the internationally agreed tax standards in terms of exchange of information.

---

**Taxes on corporate income**

Luxembourg taxes its corporate residents on their worldwide income and non-residents only on Luxembourg-source income.

Businesses with taxable income lower than 15,000 euros (EUR) are subject to CIT at a rate of 20%. The CIT rate is currently 21% for companies with taxable income in excess of EUR 15,000.

The CIT does not apply to tax transparent entities (e.g. general or limited partnerships or European Economic Interest Grouping).

**Minimum CIT**

Minimum CIT of EUR 3,000 (i.e. EUR 3,210 taking into account the solidarity surtax) is applicable to all corporate entities having their statutory seat or central administration in Luxembourg that own fixed financial assets, transferable securities, and cash at bank (including receivables due by affiliated companies) exceeding 90% of their total assets.

Also as of tax year 2013, a new minimum CIT, ranging from EUR 500 to EUR 20,000 (increased by the solidarity surtax), depending on a company’s total assets, is to be applicable to all other corporations having their statutory seat or central administration in Luxembourg (i.e. it will apply to all corporations not falling within the scope of the EUR 3,000 minimum CIT noted above), as follows:
### Total assets (EUR) *

<table>

<td>21,400</td>
</tr>
</tbody>
</table>

* Total assets of the company as shown in its accounting balance sheet as at the end of the fiscal year

** Including solidarity surtax

The minimum CIT is to be considered as an advance tax payment of any present or future CIT that will be due by the corporation. As an exception to general Luxembourg tax principles, this minimum CIT will not be reimbursed to the taxpayer.

The tax credits for investments provided by the Luxembourg Income Tax Law (LITL) for the recruitment of unemployed persons, for expenses related to further professional education, and for venture-capital investments are creditable only against the amount of CIT in excess of the amount of minimum CIT as determined above.

For tax-consolidated entities, the head of the tax unity will bear the aggregate amount of minimum CIT that would have been borne by each member of the tax unity had these not been consolidated, capped at EUR 20,000 (increased by the solidarity surtax).

**Solidarity surtax**

As of tax year 2013, a 7% solidarity surtax is also imposed on the CIT amount (5% previously).

Taking into account the solidarity surtax, the aggregate CIT rate is 22.47% for companies with taxable income in excess of EUR 15,000.

**Municipal business tax on income**

Municipal business tax is levied by the communes and varies from municipality to municipality. The municipal business tax for Luxembourg City is 6.75%.

The effective combined CIT rate (i.e. CIT, solidarity surtax, and municipal business tax) for Luxembourg City is 29.22%.

**Corporate residence**

Based on domestic law, a company is considered to be resident in Luxembourg if either its registered office or place of central administration is located in Luxembourg. The registered office is designated as such in the company’s articles of incorporation.

The place of central administration is generally understood to mean the place where the company is managed and controlled. While this term is not legally defined, the location of the company’s major establishment is determined by facts and circumstances, including the following:

- The place where meetings of the board of directors are held.
- The place where shareholders meetings are held.
Luxembourg

- The place where the company's officers make their decisions.
- The place where the company's books and records are kept.
- The place where other, similar factors evidencing management control occur.

**Permanent establishment (PE)**

The provisions on PEs included in the tax treaties concluded by Luxembourg generally follow the wording of the Organisation for Economic Co-operation and Development (OECD) model.

Under Luxembourg domestic tax law, a similar PE concept exists but is defined in a broader way and is to be understood as every fixed piece of equipment or place that serves for the operation of an established business.

---

**Other taxes**

**Value-added tax (VAT)**

Proceeds of sales and services, which are deemed to take place in Luxembourg, are subject to VAT at the standard rate of 15% (lowest standard VAT rate in the European Union [EU]) or, on certain transactions, at 12% (e.g. wine, advertising pamphlets), 6% (e.g. supply of gas or electricity), or 3% (e.g. food [except alcohol beverages], pharmaceutical products, books [including e-books], radio and television broadcasting services [except adult entertainment]). Some transactions, such as export and related transport, are zero-rated.

Taxpayers whose activities are subject to VAT are entitled to offset against their VAT payable the amount of such tax charged to them by their suppliers or reverse charged (i.e. self-accounted) by them on import or acquisitions of goods or services from abroad.

Banking, financial, insurance, and reinsurance transactions generally are exempt activities. The VAT paid on costs made for these transactions cannot be recovered except when related to services performed for persons established outside the European Union. VAT on expenses made in the context of ‘passive’ holding activities, which are considered as outside the scope of VAT, are not recoverable.

A Standard Audit File for Tax (SAF-T), containing reliable accounting data, has been implemented by the VAT authorities. This specific file is used by taxable persons to make information available to Luxembourg VAT authorities during a VAT audit. Only specific taxable persons (subject to the Luxembourg Standard Chart of Accounts) having a certain minimum number of transactions (+/- 500) and registered under a ‘normal filing regime’ with a turnover exceeding EUR 112,000 are firstly concerned.

On the other hand, some entities, notably those subject to the supervision of the Commission de Surveillance du Secteur Financier (CSSF) and insurance/reinsurance companies, are not yet subject to these SAF-T obligations.

**Customs duties/import tariffs**

Based on a European Regulation, goods entering within the territory of the European Union may be subject to customs duties/import tariffs. Applicable rates are based on the nature and on the quantity of the products.

**Excise duties**

In addition to VAT, some products are subject to specific excise duties. In Luxembourg, these products are electricity, mineral oils, manufactured tobacco, and alcohol.
Excise duties are not based on the sale price of the products but on the quantity. Excise duty becomes chargeable at the time, and in the EU member state, of release for consumption. Release for consumption occurs in any of the following instances:

- The departure of excise goods from a duty suspension arrangement.
- The holding of excise goods outside a duty suspension arrangement where excise duty has not been levied, pursuant to the applicable provisions of Community law and national legislation.
- The production of excise goods outside a duty suspension arrangement.
- The importation of excise goods, including irregular importation, unless the excise goods are placed, immediately upon importation, under a duty suspension arrangement.

**Stamp taxes**
There is no stamp duty in Luxembourg.

**Net wealth tax**
Both Luxembourg resident companies and Luxembourg branches of non-resident companies are subject to net wealth tax levied at a rate of 0.5% on their net wealth, based on prescribed valuation methods. In general, assets are taken into account at market value (except for real estate, which is subject to a special regime). Shareholdings qualifying for the participation exemption (see Dividend income in the Income determination section) generally are exempt from net wealth tax.

Resident companies and Luxembourg branches of non-resident companies may claim a reduction of their net wealth tax liability by making an allocation to a special reserve before the closing of the tax year following the year for which the net wealth tax reduction is claimed. To this end, an amount corresponding to five times the net wealth tax that should have become payable must be kept in this special reserve for the five years following the year in which it was allocated. The reduction, however, may not exceed the amount of CIT in excess of the minimum CIT, before tax credits, due for that same year.

**Subscription tax**
Investment funds are subject to subscription tax (at various rates) on their total net assets evaluated at the last day of each quarter. Institutional funds and monetary funds are subject to an annual rate of 0.01% and the other funds to an annual rate of 0.05%. Funds of institutional funds and monetary institutional funds are exempt from subscription tax.

Exemptions from subscription tax are available for exchange traded funds, and an extension of exemption is available for funds dedicated to multi-employer pension vehicles or to several employers providing pension benefits to their employees.

Where a foreign Undertakings for Collective Investment (UCI) is managed by a Luxembourg-based management company (or where the UCI’s place of effective management is located in Luxembourg), the UCI will not be deemed to be domiciled in Luxembourg and therefore not be subject to any tax in Luxembourg.

**General registration taxes**
General registration taxes (inclusive of the transcription tax described below) are levied at 7% on the market value of real estate purchased or transferred (10% in the commune of Luxembourg City for some categories of properties) and 1% on mortgages on real estate. The taxes are deductible for CIT purposes.
Luxembourg

Note that a fixed registration duty of EUR 75 is levied on certain transactions involving Luxembourg entities (i.e. incorporation, amendment to the articles of association, and transfer of seat to Luxembourg).

For Luxembourg real estate assets, contribution made to a company remunerated by shares are subject to a proportional registration duty of 0.6% (0.9% for Luxembourg City for some categories of properties) and a transcription tax of 0.5%. Contribution remunerated by means other than shares remain subject to a proportional registration duty of 6% (9% for some categories of properties located in Luxembourg City) and a transcription tax of 1%. Transfers made within the framework of a corporate reorganisation may be exempt from any proportional registration duty under certain conditions.

Commune (municipalities) real estate tax
Communes (municipalities) levy an annual real estate tax, the basis of which is the unitary value of real estate, which represents its estimated value in 1941. The basic rate varies from 0.7% to 1% of the unitary value, according to the category of property, and is multiplied by a coefficient, which varies with communes and different types of property. For commercial properties, the coefficient in Luxembourg City is 750%, which should be applied to 1% of the unitary value. The real estate tax is deductible for CIT purposes.

Branch income
Branch income generally is taxed at CIT rates. However, the municipal business tax generally only applies if the branch is carrying on commercial activity within Luxembourg.

Income determination

Inventory valuation
 Inventories generally are valued at the lower of actual or market cost. There is no statutory specified method. In general, the first in first out (FIFO), the last in first out (LIFO), and the weighted-average costs methods of inventory valuation are acceptable for income tax purposes, provided the method is in accordance with the facts.

Dividend income
Dividends received by a Luxembourg resident company (or by a domestic PE of a non-resident company in certain cases) should, in principle, be subject to CIT.

Participation exemption regime
Dividends received may be tax exempt in Luxembourg, according to the so-called ‘participation exemption’ regime, if the conditions described below are satisfied:

- The distributing company is:
  - a collective entity falling within the scope of the EU Council ‘Parent Subsidiary Directive’
  - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed the LITL, or
  - a non-resident joint-stock company that is fully liable (in its state of residence) to a tax corresponding to the Luxembourg CIT (i.e. as a general rule, it is required
that the foreign tax is compulsorily levied at an effective rate of at least 10.5%, on a basis similar to the Luxembourg one).

• The beneficiary company is:
  • a Luxembourg resident collective entity, which is fully taxable and takes one of the forms listed in the LITL
  • a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the LITL
  • a domestic PE of a collective entity falling within the scope of the Parent Subsidiary Directive
  • a domestic PE of a joint-stock company that is resident in a country with which Luxembourg has concluded a double tax treaty (DTT), or
  • a domestic PE of a joint-stock company or of a cooperative society, which is a resident of a European Economic Area (EEA) member state (other than an EU member state).
• At the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly (or through a tax transparent entity, see Transparent entities below), for an uninterrupted period of at least 12 months, a participation in the share capital of the subsidiary of at least 10% or with an acquisition price of at least EUR 1.2 million.

**Capital gains**

Capital gains (and losses) generally are taxed as ordinary income (or losses). It is possible to defer the taxation of gains on certain fixed assets where the gain is used to acquire replacement items. Under certain conditions, exempted capital gains and hidden reserves may be unrealised in a merger or another form of reorganisation of resident companies or other EU companies.

In general, capital gains on the disposal of qualifying shareholdings held by entities eligible to the participation exemption regime are tax exempt, provided (i) the shareholding constitutes at least 10% of total ownership or an acquisition price of at least EUR 6 million and (ii) the disposing company has held or intends to hold the qualifying shareholding for at least 12 months.

A recapture system exists wherein the capital gain realised will become taxable up to the amount of the aggregate expenses and write-downs in relation to the participation deducted during the year of realisation of the exempt capital gain and in previous years.

The purpose of the system is to avoid a taxation vacuum, which could result if the deductibility of expenses and write-downs connected to the participation was allowed, while the income arising from the participation is tax exempt. This system should, in principle, remain tax neutral, as the company should have available carryforward losses for an equivalent amount (unless previously used to offset other taxable income).

**Taxation of non-resident corporate investors on gains upon disposal of shares**

In principle, should a non-resident corporate investor (non-treaty protected) derive income from the disposal of an important participation (i.e. representing at least 10% of the share capital) in a Luxembourg company within six months of its acquisition, said capital gain will be subject to CIT in Luxembourg unless a tax treaty provides otherwise.

Non-resident investors are not subject to the aforementioned capital gains tax upon disposal of shares in a Luxembourg Société d’Investissement à Capital Variable (SICAV), Société d’Investissement en Capital à Risque (SICAR), and Société de gestion de Patrimoine Familial (SPF).
Interest income
Under Luxembourg accounting and tax principles, interest income is recognised on an accrual basis and is fully subject to tax at the effective combined CIT rate of 29.22% (for Luxembourg City).

Transparent entities
From a Luxembourg tax perspective, a transparent entity is seen as having no legal personality distinct from that of its partners (those transparent entities are commonly referred to as ‘partnerships’) for CIT and net wealth tax purposes, although it may be regarded as a separate legal entity from a civil/corporate law point of view. Provided that the partnership carries out a commercial activity, however, it will be liable to municipal business tax on its own.

Foreign income
A Luxembourg tax resident company is liable for CIT on its worldwide income. Foreign-source income is therefore taxable in Luxembourg, unless a DTT provides for an exemption.

Dividends from foreign subsidiaries are taxed when received, except where exempt as mentioned above. Profits of a foreign branch that are not exempt by means of a DTT may, however, benefit from a foreign tax credit. Any foreign taxes paid in excess of the tax credit are deductible as expenses. Luxembourg is, however, using the exemption method in most of its DTTs.

Deferral of taxation for income earned abroad is not provided for under Luxembourg domestic tax law.

Deductions
Depreciation
Depreciation rates must be consistent with economic reality. The depreciation must be calculated on the total acquisition cost, bearing in mind the normal life of the asset and the estimated residual value.

Depreciation normally is calculated using the straight-line method. However, the declining-balance method is permitted for fixed assets, other than buildings and intangible assets. The depreciation rate may not, however, exceed three times the rate applicable according to the straight-line method, or 30% (four times the applicable rate in the case of assets used exclusively for scientific and technical research, or 40%).

It is permissible to change from the declining-balance method to the straight-line method, but the converse is not allowed. Tax depreciation must be reflected in the financial accounts prepared for commercial purposes.

In the event of a sale of a depreciated asset, the net book value at the moment of the disposal must be compared with the sale price of that asset. If this comparison indicates a profit, corresponding income tax may be due unless the sale price is reinvested in eligible assets. Capital losses are deductible.

Under certain conditions, fixed assets with a value of less than EUR 870 or an economic life that is not in excess of one year can be expensed fully in the year of acquisition. Special accelerated depreciation on 80% of the cost of fixed assets is available for
assets that protect the national environment, save energy in Luxembourg, or permit the development of workplaces for handicapped workers, under certain conditions.

**Goodwill**
Goodwill is generally amortised over a five-year maximum period. It can, however, be amortised for a period longer than five years if this period does not exceed the useful economic life of this asset. The Luxembourg tax treatment will follow the applicable accounting treatment.

**Start-up expenses**
Formation expenses can either be directly charged to the profit and loss account of the year in which they are incurred or depreciated on a straight-line basis over a five-year maximum period. The accounting treatment is followed for Luxembourg tax purposes.

**Interest payments**
Interest payments are, in principle, deductible to the extent they comply with the arm’s-length principle (see Transfer pricing in the Group taxation section).

Non-deductibility of the interest payments may arise in case they depend on the profits realised by the company or are derived from loans structured in the form of bonds or similar securities. Also, the deductibility will be limited in case the company is considered as being thinly capitalised (see Thin capitalisation in the Group taxation section).

**Bad debt**
Provisions for bad debts are generally tax deductible.

**Charitable contributions**
Gifts for scientific, charitable, or public purposes and to institutions in the general interest are deductible, subject to a maximum of 20% of the net income or up to an amount of EUR 1 million (the minimum being EUR 120) with a possibility to spread the deduction over two years.

**Shareholdings**
Expenses linked to a shareholding qualifying for the participation exemption, including write-downs in the value of the shareholding booked as a consequence of a dividend distribution, are not deductible up to the amount of the exempt dividend. Recapture rules may apply in the event of disposal of the shareholding. Basically, the effect of this rule is that capital gains realised will become taxable up to the amount of the aggregate expenses and write-downs in relation to the participation deducted during the year of disposal and the previous years. The qualifying shareholding is exempt from net wealth tax.

**Severance payouts or ‘golden handshakes’**
Severance payouts or ‘golden handshakes’ are deductible for CIT and municipal business tax purposes, up to EUR 300,000.

**Fines and penalties**
Fines and penalties suffered by the taxpayer are not to be considered as operating expenses and are therefore not tax deductible.

**Taxes**
Several taxes are deductible in determining income subject to CIT, including the registration duties and real estate tax. Also, certain taxes are credited against the
Luxembourg

computed amount of income tax owed, including taxes withheld from Luxembourg dividend income, tax withheld abroad from dividend and interest income received by a Luxembourg corporation (subject to limitations), and investment tax credits (see the Tax credits and incentives section).

The main non-deductible taxes are CIT, municipal business tax, and net wealth tax, as well as interest and penalties for late payment of said taxes.

Net operating losses
Net operating losses can be carried forward for an unlimited period but cannot be carried back.

Payments to foreign affiliates
Royalties, management service fees, and interest charges paid to foreign affiliates by a Luxembourg company are deductible items, provided they are equal to what the company would pay an unrelated entity for comparable services.

Group taxation
Luxembourg permits tax unity. Generally, the conditions to qualify for tax unity include that:

- each company is a fully taxable company that is resident in Luxembourg (the top entity may be a Luxembourg PE of a fully taxable non-resident company)
- at least 95% of each subsidiary's capital is directly or indirectly held by the parent company
- each company's fiscal year starts and ends on the same date, and
- tax unity is requested jointly by the top company and each subsidiary that becomes a member of the group.

Tax unity lasts for a five-year period, and taxable income/loss is computed on the consolidated result. Tax losses that occurred before the consolidation period may be offset only against tax profits of the company that incurred the loss. Tax losses that are sustained by a group member during the consolidation period are offset against the tax profits of the other group members. Tax losses arising during the consolidation period that exist after the consolidation period are attributed to the parent company.

Transfer pricing
Luxembourg largely follows the transfer pricing guidelines issued by the OECD in the absence of detailed transfer pricing regulations in Luxembourg. The general transfer pricing provisions in the LITL require that transactions between related parties are carried out in line with the arm’s-length principle. Where there is a transfer of profit possibly due to the fact that a Luxembourg taxpayer has a special economic relationship with a non-resident taxpayer, then the tax authorities may determine the financial result regardless of the reported profit. The concept of a special economic relationship can be described as any economic relationship that differs from a regular/commercial economic relationship between two parties. The special economic relationship goes beyond the related party definition as stated in the OECD Model Convention.

Furthermore, the LITL characterises certain transactions as a hidden distribution of profits where a direct or indirect shareholder receives an advantage from a company that said shareholder would not have received if there had not been a shareholding relationship. The hidden distribution of profits in Luxembourg is included in the profit
of the taxpayer and subject to tax at the prevailing statutory rate of corporation tax. In addition, it may be subject to 15% withholding tax (WHT) on the gross amount received, except in case a reduced rate applies under the provisions of the relevant DTT or the European Commission (EC) Parent Subsidiary Directive.

Transfer pricing documentation is prepared based on OECD transfer pricing guidelines and EU transfer pricing documentation guidelines. Transfer pricing documentation is neither required at the time of the transaction nor at the filing of the tax return. During the course of a tax assessment, the tax authorities may request documentation from the taxpayer to evidence the reasonableness of an intra-group pricing arrangement. There are no transfer pricing methods prescribed for determining the arm’s-length standard, and the taxpayers and the tax authorities largely follow the transfer pricing methods prescribed in the OECD transfer pricing guidelines.

In terms of the burden of proof, the tax authorities have to prove that there is an erosion of the taxable base in Luxembourg, whereas the taxpayer has to prove that the inter-company transactions did not result in a reduction or cancellation of taxes. The statute of limitations is generally five years from the end of the year in which the tax liability arises. This period may be extended if a deferred payment is granted. In case of tax evasion or fraud, the statute of limitations can be extended up to ten years. There are no specific penalties in relation to transfer pricing in Luxembourg, but the penalty regime under the corporate tax will be applicable.

Although Luxembourg has no formal procedure for applying advance pricing arrangements (APAs), the income tax authorities are quite flexible in this area. There have been a few cases in Luxembourg where bilateral APAs have been concluded, although, in general, unilateral advanced tax agreements are obtained on an individual basis. Recently, the tax authorities have increased their focus on transfer pricing. As a result, two Circulars describing the tax treatment for intra-group financing transactions have been issued by the Luxembourg tax authorities.

According to the Circular of 28 January 2011 (L.I.R. n° 164/2), the internationally acceptable arm’s-length principle should be applied for the determination of the compensation for Luxembourg companies that are principally engaged in on-lending transactions. The remuneration of the related entities should be determined based on the functions performed, assets utilised, and risks borne by the Luxembourg company. A written confirmation from the tax authorities can be obtained if the Luxembourg company meets the substance and equity at risk requirements with regard to the on-lending activity. In respect of the equity at risk requirement, the Luxembourg company must be at risk for an amount equal to the lesser of 1% of the nominal value of the loan or EUR 2 million. In addition, the arm’s-length price has to be determined by way of a transfer pricing analysis.

On 8 April 2011, the Luxembourg tax authorities issued a second Circular (L.I.R. n°164/2bis) clarifying the application of Circular L.I.R 164/2 of 28 January 2011. This Circular explains that, as of 1 January 2012, the income tax authorities are no longer bound by confirmation obtained before 28 January 2011 in relation to existing intra-group lending activities financed with borrowings falling within the scope of Circular L.I.R. 164/2.

**Thin capitalisation**

No thin capitalisation ratio is specifically provided by the Luxembourg tax law.
In practice, the tax authorities apply an 85:15 debt-to-equity ratio for the intra-group financing of participations. Should the 85:15 ratio not be complied with by the taxpayer, the surplus of interest may be re-qualified by the tax authorities as a hidden distribution of profits that will be non-deductible and potentially subject to a 15% WHT.

**Tax credits and incentives**

**Foreign tax credit**

*See Foreign income in the Income determination section for a description of the foreign tax credit regime.*

**Inbound and capital investment incentives**

Luxembourg tax law provides for various incentives, with specific requirements, in the areas of risk capital, audiovisual activities, and environmental protection, as well as for research and development (R&D), professional training, and recruitment of unemployed persons.

The most commonly used incentives are the investment tax credits. Luxembourg tax law provides for two types of investment tax credits.

First, a tax credit is available that, as of tax year 2013, amounts to 12% of the increase in investment in tangible depreciable assets made during the tax year. The increase in investment over a given tax year is computed as the difference between the current value of all qualifying assets and the reference value allocated to the same type of assets.

Independently, the company may benefit from a 7% tax credit on the first EUR 150,000 of qualifying new investments, and, as of tax year 2013, a 2% tax credit on the amount of new investments exceeding EUR 150,000 in tangible depreciable assets as well as investments in sanitary and central heating installation in hotel buildings and investments in buildings used for social activities. The above 7% and 2% rates are increased to 8% and 4% for investments eligible for special depreciation (i.e. investments favouring the protection of the environment, the realisation of energy savings, or the creation of employment for handicapped workers). However, certain investments are excluded from the credit calculation, including investments in real property, intangible assets, and vehicles (unless specifically stated by the law).

Domestic law requires that investments be physically operated in Luxembourg in order to be eligible for the incentive, unless the investment consists in shipping vessels operating in international waters. In addition, the tax benefit of the tax credit is limited to investments that are made within a Luxembourg business establishment and that are intended to be used permanently in Luxembourg.

Further to the European Court of Justice’s decision dated 22 December 2010 (Tankredeerei, C-287/10), the Luxembourg Tax Authorities issued a Circular letter confirming that the investment tax credit must be granted to any investment used within the EU and EEA member states. Although Luxembourg domestic tax law has not yet been amended accordingly, the application of investment tax credit may be requested for the current tax year, as well as for tax years already assessed but still subject to the introduction of a claim.
**Intellectual property (IP) regime**

An IP regime is applicable to qualifying IP rights acquired or developed after 31 December 2007. This regime provides for an 80% tax exemption of the net income deriving from the use and the right to use qualifying IP rights, under certain conditions. Qualifying IP rights include patents, trademarks, design, domain names, models, and software copyrights.

An 80% deduction of net deemed income is also available under certain conditions for self-developed patents, which are used internally by the taxpayer.

The net capital gain realised upon disposal of the qualifying IP rights also benefits from the 80% exemption.

Finally, qualifying IP rights may be fully tax exempt for net wealth tax purposes under certain conditions.

**R&D incentives**

Luxembourg entities involved in innovative and R&D activities can benefit from financial support in addition to the specific IP tax regime and general tax incentives.

Innovation loans may be granted by the Société Nationale de Crédit et d’Investissement and may carry a fixed interest rate lower than the market rate. Financial support may also be granted in the form of cash grants or interest subsidies.

R&D projects or programmes receive financial support up to a maximum eligibility (percentage of costs eligible for the incentives) depending on the size of the beneficiary (private research companies or organisations) as follows:

- Large (25% to 100% depending on the investment).
- Mid-size (35% to 100%).
- Small (45% to 100%).

These incentives are available for:

- experimental development
- experimental development and cooperation
- industrial research
- industrial research and cooperation, or
- fundamental research.

Innovation in process and organisation and investment in innovation pools can benefit from financial support of between 15% and 35% (50% for public research companies).

Promotion and development of innovation pools can benefit from financial support of up to 50% for private organisations or 75% for public research companies.

Research regarding technical feasibility can benefit from financial support of up to 40% or 50% if prior to experimental development and up to 65% or 75% if prior to experimental research.
Other incentives by entity

Investment funds
Investment funds resident in Luxembourg generally are exempt from CIT, municipal business tax, and WHT on dividends. These investment funds are subject to the previously described subscription tax and to the general registration duty regime.

Financial participation company (Soparfi)
A Soparfi (Société de Participation Financière) is neither a specific type of company nor a special tax regime. It is rather used to refer to resident companies that hold and manage the shareholdings of subsidiaries. A Soparfi is subject to CIT, municipal business tax, and net wealth tax, but it does benefit from Luxembourg’s DTTs, EU Directives (e.g. Parent Subsidiary Directive), the domestic participation exemption on dividends received, and capital gains on qualifying participations.

Private wealth management company (Société de gestion du Patrimoine Familial or SPF)
The SPF has been tailored to enter the private sphere of individuals for the purpose of wealth management. Its corporate objective is restricted to the acquisition, holding, management, and disposal of financial assets, to the exclusion of any commercial activity. As a general rule, an SPF is exempt from Luxembourg taxation on income and wealth tax in Luxembourg. A yearly subscription tax of 0.25% is due on the basis of paid-up capital, share premium, and excessive debts. Subscription tax, however, is capped at EUR 125,000. No WHT applies on dividends distributed by an SPF. Non-resident investors are not taxed in Luxembourg on dividends paid by an SPF or on capital gains realised on shares in an SPF.

Securitisation companies (SCs)
An SC is a company that carries out securitisation activities or participates in securitisation transactions. SCs are subject to normal corporate taxation based on their net accounting profit (i.e. gross accounting profits minus expenses). However, the commitment to remunerate the security holders (both capital and debt) issued by the SC qualifies as interest on debt even if paid as return on equity. SCs are not subject to net wealth tax in Luxembourg.

Venture capital vehicle (Société d’Investissement en Capital à Risques or SICAR)
The SICAR benefits from an attractive tax regime. SICARs are notably exempt from net wealth tax. Incorporated under a corporate form, the SICAR is subject to income tax at the normal rate with the benefit of an exemption on income and gains (e.g. dividends, capital gains, liquidation proceeds, interest) from transferable securities qualifying as risk capital as well as income arising from investments in liquid assets pending their investment in risk capital for a maximum of 12 months. In addition, it can benefit from the European directives and DTTs. Under the form of a limited partnership, the SICAR is treated as a tax transparent entity, and investors are taxed according to the rules of their country of residence. SICARs treated as tax transparent entities do not benefit from the European directives and DTTs. The SICAR mainly targets qualified or informed investors (i.e. ‘professional’ investors).

Financial services companies
Banks, securities depositaries, insurance, and reinsurance companies, as well as other financial service companies, may benefit from preferential regulations when establishing their taxable basis for CIT (e.g. provision for the neutralisation of
unrealised exchange gains, general banking risk provision, provision for guarantee of deposits, mathematical reserves, and/or catastrophe reserves).

Shipping companies
Luxembourg-resident shipping companies are not subject to municipal business tax and can benefit from investment tax credits and accelerated depreciation (even for used assets).

**Withholding taxes**

Dividends paid by a Luxembourg fully taxable company to its ‘corporate’ shareholders resident in a treaty country, which hold or commit themselves to hold a participation of at least 10% in the Luxembourg company (or shares with an acquisition price of at least EUR 1.2 million) for an uninterrupted period of at least 12 months, may be exempt from WHT (see Note 1 below for more details).

The following taxes are withheld on payments made. The WHT due on dividends paid to residents of a treaty country cannot exceed the non-treaty rate.

</table>
Luxembourg

Notes

These notes are not extensive. The full text of the DTT should be checked for a comprehensive view on the conditions of application of reduced rates.

1. Under Luxembourg domestic law, no WHT is levied on dividends paid by a Luxembourg qualifying subsidiary to an entity that is:
   - a collective entity falling within the scope of the Parent/Subsidiary Directive
   - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the LITL
   - a PE of a collective entity falling under the previous categories
   - a collective entity that is resident in a country with which Luxembourg has concluded a DTT and is fully liable to a tax corresponding to the Luxembourg CIT, or a domestic PE of such an entity
   - a Swiss resident joint-stock company that is subject to Swiss CIT without benefitting from any exemption
   - a joint-stock company or a cooperative society that is resident in an EEA member state (other than an EU member state) and is fully liable to a tax corresponding to the Luxembourg CIT, or a PE of a joint-stock company or of a cooperative society that is resident in an EEA member state or in Luxembourg, and at the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly, for an uninterrupted period of at least 12 months, a participation of at least 10%, or with an acquisition price of at least EUR 1.2 million in the share capital of the income debtor.
   - a holding period requirement may have to be met as well (e.g. Spain, Switzerland).

2. Interest paid to non-residents is generally not subject to WHT in Luxembourg. However, interest that represents a right to profit participation on a bond may be assimilated to a dividend and subject to WHT. Further analysis should be made to determine the applicable reduced rate on the basis of the treaty (i.e. pursuant to dividend or interest clause).

3. Royalties paid to non-residents are not subject to WHT in Luxembourg, whether the companies are associated or not.

4. A WHT of 10% is withheld on defined interest income paid by a Luxembourg paying agent to resident individuals. Interest indirectly cashed through investment funds are out of the scope of this WHT.

5. DTTs have been concluded with Albania, Botswana, Brunei, Croatia, Cyprus, Guernsey, Isle of Man, Jersey, Kazakhstan, Kuwait, Kirghizstan, Laos, Macedonia, Oman, Saudi Arabia, Seychelles, Sri Lanka, Taiwan, Tajikistan, and Ukraine, but are not yet in force. A new DTT with Germany was signed on 23 April 2012, but domestic transposition procedures are still pending.

6. The recipient company holds at least 25% of the Luxembourg company's capital. In some rare cases, a holding period requirement may have to be met as well (e.g. Spain, Switzerland).

7. The recipient company owns at least 30% of the company's capital and the equivalent of an acquisition price of USD 300,000.

8. The recipient company owns a 25% investment or the equivalent of an acquisition price of EUR 6,197,338. The investments may be held by several Belgian companies, provided one owns at least 50% of the shares of each of the others. The investment must be held since the beginning of the financial year of the recipient of the dividends.

9. The recipient company holds at least 10% of the Luxembourg company's capital.

10. No WHT is levied if the recipient company holds at least 10% of the Luxembourg company's capital or a participation with an acquisition price of at least EUR 1.2 million.

11. The rate of 5% of WHT on the gross amount of the dividends applies where the effective recipient company owns directly or indirectly at least 50% of the share capital of the paying company or has contributed more than 10 million United States dollars (USD) or the equivalent in Luxembourg or in Vietnamese currency, in the capital of the company paying the dividends; the rate of 10% of WHT on the gross amount of the dividends applies where the beneficial owner is a company which holds directly or indirectly at least 25% but less than 50% of the capital of the company paying the dividends and has contributed not more than USD 10 million, or the equivalent in Luxembourg or Vietnamese currency, in the capital of the company paying the dividends.

12. The recipient company owns directly or indirectly 25% of the company's capital. Indirect participation includes the holding through several treaty resident companies located in the same country, provided one owns more than 50% of the shares of each of the others.

13. A 5% WHT is levied on dividend distributions where the beneficial owner is a company that holds at least 10% of the voting rights of the paying company. No WHT is levied when the US company has held, during an uninterrupted period of two years, a direct shareholding of at least 25% of the voting power of the paying company and certain conditions regarding the nature of activities performed by the distributing company are met.

14. The recipient company owns directly or indirectly 25% of the company's voting rights. Indirect participation includes the holding through several treaty resident companies located in the same country, provided one owns more than 50% of the voting rights of each of the others.

www.pwc.com/taxsummaries
15. The recipient company holds at least 25% of the Luxembourg company’s voting shares during the period of six months immediately before the end of the accounting period in which the distribution of profits takes place.

16. The dividends are taxable at a rate of 5% if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. No WHT is levied when the beneficiary company has held, during the 12 preceding months, a direct shareholding of at least 25% of the capital of the paying company. The holding period must be met before the date of distribution of the dividend. Furthermore, certain conditions regarding the nature of activities performed by the company must be met.

17. The recipient company holds at least 30% of the Luxembourg company’s capital and the acquisition price reaches at least EUR 75,000 (or equivalent).

18. The recipient company holds at least 10% of the Luxembourg company’s capital. Dividends paid to the government of Singapore are exempt.

19. The beneficial owner is a company (other than a partnership) that controls, directly or indirectly, at least 10% of the voting power in the company paying the dividends.

20. The recipient company holds at least 25% of the Luxembourg company’s voting shares (Germany/Luxembourg) or company’s voting power (Ireland/Luxembourg).

21. The rate of 5% of WHT on the gross amount of dividends applies where the recipient company holds at least 10% of the Luxembourg company’s capital.

22. The rate of WHT is 5% if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends and made an investment in the capital of the paying company of more than EUR 100,000 or the equivalent in Georgian currency. No WHT is levied when the beneficiary company directly holds at least 50% of the capital of the company paying the dividends and made an investment in the capital of the paying company of more than EUR 2 million or the equivalent in Georgian currency.

23. The recipient company holds at least 20% of the Luxembourg company’s capital.

24. No WHT is levied when the beneficial company holds at least 10% of the company paying the dividends. The rate of 5% of WHT on the gross amount of dividends applies where the beneficial owner is an individual who directly holds at least 10% of the company paying the dividends and was a resident of the other contracting state for the 48-month period immediately preceding the year in which the dividends are paid.

25. No WHT is levied when the beneficiary of the dividend is a joint stock company that has directly held a participation of at least 10% (or with an acquisition price of at least EUR 1.2 million) of the distributing company’s share capital for an uninterrupted period of at least 12 months. The rate of 5% of WHT applies if said participation has been held for less than 12 months.

26. No WHT is levied when the recipient company holds at least 10% of the Luxembourg company’s capital. A holding period requirement has to be met for Sweden and San Marino.

27. No WHT is levied when the beneficiary company holds at least 20% of the Luxembourg company’s capital.

28. A 5% WHT if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends. No WHT is levied if the beneficial owner is a company (other than a partnership) that is a resident of the other contracting state and that holds, directly for an uninterrupted period of two years preceding the date of payment of such dividends, at least 25% of the capital of the company paying the dividends. The provision applies only to dividends from the fraction of the holding that has been the uninterrupted property of the company that is beneficial owner during said period of two years.

---

**Tax administration**

**Taxable period**

The taxable period for Luxembourg fully taxable resident entities follows the financial year (i.e. accounting year) of the company.

Companies generally use the calendar year for accounting purposes but may, in practice, apply a different accounting year. The taxable period would, in such cases, correspond to this different accounting year.

**Tax returns**

Companies must file their tax returns by 31 May of each year following the calendar year during which the income was earned.

Assessments are issued after the end of the tax year and normally can be finalised within five years, although the delay may extend to ten years if the declaration is found...
to be incomplete or inexact, with or without the intention of fraud. Once issued, the tax assessment notice is, in principle, final (unless new facts come to light).

A self-assessment procedure applies to Luxembourg resident companies. Tax assessments are issued by the tax authorities immediately upon receipt of the tax return, based on the taxable profit reported by the company. The tax authorities may then reassess or request more information on the return within the period of five years that follows the reception of the tax return.

**Payment of tax**
Quarterly tax advances must be paid. These payments are fixed by the tax administration on the basis of the tax assessed for the preceding year or on the basis of the estimate for the first year. This estimate is given by the company pursuant to the request of the Luxembourg tax authorities.

Final payment of CIT must be paid by the end of the month that follows the month of reception by the company of its tax assessment.
**Significant developments**

**Tax incentives for the tax year 2013**

On 13 December 2012, the Legislative Assembly approved certain tax incentives proposed by the Chief Executive of Macau in the Budget for the financial year 2013. The key tax incentives include the following:

- The tax-free income threshold for complementary (corporate) tax will continue to be increased from 32,000 Macanese patacas (MOP) to MOP 200,000 for income derived in the tax year 2012. Taxable income between MOP 200,000 and MOP 300,000 is taxed at 9%, and taxable income over MOP 300,000 is taxed at 12%.
- The standard MOP 3,500 reduction in property tax liabilities will continue to be available in the tax year 2013 for both self-use and rental properties.
- Restaurants will continue to be exempt from tourism tax in the tax year 2013.
- Insurance policies written or renewed in the tax year 2013 and banking transactions in the tax year 2013 will continue to be exempt from stamp duty.
- Admission tickets for performances, exhibitions, and entertainment programs will continue to be exempt from stamp duty in the tax year 2013.
- Commercial and industrial operations will continue to be exempt from the annual industrial tax in the tax year 2013.

**Amendment to the Law on Special Stamp Duty (SSD) and introduction of Buyer Stamp Duty (BSD)**

On 24 October 2012, the Legislative Assembly approved an amendment to the scope of the Law on Special Stamp Duty and introduced a BSD. The enactment of the legislation is intended to further curb speculation activities in the real estate market. The relevant legislation was gazetted on 29 October 2012 and is effective from 30 October 2012.

After the amendment, the scope of the Law on Special Stamp Duty is expanded to include not only residential properties, but also commercial properties, offices, and car-parking spaces, such that the transferor of the aforementioned property or property under construction is subject to SSD of 20% on the value of the property if the property is resold within a year of its purchase. The SSD rate is reduced to 10% if the resale takes place between one and two years after the purchase. The SSD is also applicable to transfers of an 80% or more shareholding interest in a Macau company that has properties.

In addition, a BSD has been introduced such that a company, an entrepreneur, or a non-Macau resident acquiring a residential property in Macau will be subject to BSD at a flat rate of 10%, on top of the existing stamp duty and SSD, if applicable.
Tax information exchange agreements (TIEAs)
On 5 October 2012, the government of Macau signed a TIEA with Jamaica. Together with the five comprehensive tax arrangements/agreements that Macau has signed with the People’s Republic of China, Portugal, Mozambique, Belgium, and Cape Verde, Macau has enlarged the network of agreements to implement the internationally agreed standards on transparency and exchange of information for tax purposes through the signing of a total of 15 double taxation agreements (DTAs) or TIEAs to date.

The TIEA with Jamaica will become effective upon completion of the necessary ratification procedures by the respective jurisdictions.

Taxes on corporate income
Complementary tax is imposed on the worldwide income earned by Macau registered entities, irrespective of where their residence or headquarters are situated and irrespective of the nature of the income. The exception to the foregoing is rental income from leasing of immovable properties located in Macau, which is taxed separately under the property tax regime.

Generally, if a foreign entity is engaged in commercial/industrial activities and/or rendering services in Macau, the resultant gain from such commercial/industrial activities and/or services rendered will be subject to complementary tax.

According to the Macau Complementary Tax Law, complementary tax is imposed on a progressive rate scale ranging from 3% to 9% for taxable profits below or equal to MOP 300,000 and 12% for taxable profits over MOP 300,000. Taxable profits below MOP 32,000 are exempt from tax.

According to the Budget for the financial year 2013 approved by the Legislative Assembly (2013 Budget), the tax-free income threshold for complementary tax has been increased from MOP 32,000 to MOP 200,000 for income derived in the tax year 2012 (the next MOP 100,000 of taxable income is taxed at 9%, and taxable income in excess of MOP 300,000 is taxed at 12%). Such increase in the tax-free income threshold has been granted since the tax year 2007. While it is generally believed that the direction of the Macau government policy will remain stable at least for the medium term, the changes in tax-free income threshold and the tax brackets beyond the tax year 2012 are subject to approval by the Legislative Assembly on an annual basis, unless such amendments are written into the relevant tax laws.

Types of taxpayers and associated tax bases
Group A taxpayers
Taxpayer entities whose registered capital reached MOP 1 million, or whose average taxable profits reached MOP 500,000 per year in three consecutive years, will automatically become Group A taxpayers in the tax year following the year in which the relevant notification is issued by the Macau Finance Bureau (MFB). A taxpayer entity can also elect to become a Group A taxpayer by filing a Group A declaration form. Profits of Group A taxpayers are assessed based on the actual accounting income after making necessary tax adjustments.

Group B taxpayers
Group B taxpayers refer to any individual or any other form of companies not mentioned above and those taxpayers that do not keep detailed accounting records.
Profits of Group B taxpayers are assessed on a deemed basis if the reported income is below the internal parameters set by the MFB for taxpayers in similar industries.

**Corporate residence**

Corporate residence is generally determined by reference to the place of establishment. The exception to the foregoing is a Macau offshore company or a Macau offshore financial institution that is established under Law 58/99/M. Such a Macau offshore company or financial institution is not considered as a Macau tax resident in the context of the comprehensive tax arrangement/agreements entered into between Macau and its treaty partners.

**Permanent establishment (PE)**

There is no specific definition of PE in the Macau Complementary Tax Law. Technically speaking, there are two major criteria for determining whether a foreign entity should be subject to complementary tax, and the key phrases are 'engaging in commercial/industrial activities' and/or 'rendering services in Macau'. These phrases are also not defined. Generally, if a foreign entity is engaged in commercial/industrial activities and/or rendering services in Macau, the resultant gain from such commercial/industrial activities and/or services rendered will be subject to complementary tax.

**Other taxes**

**Value-added tax (VAT)**

There is no VAT regime in Macau.

**Customs duties/import tariffs**

Apart from consumption tax imposed on tobacco and spirits entering into Macau, there are no customs duties/import tariffs in Macau.

**Consumption tax (excise duty)**

Consumption tax is imposed only on tobacco and spirits entering into Macau. There are two methods for determining the amount of consumption tax payable, by quantity or by value. The former method of assessment is based on the weight or volume of goods and the latter is based on the price of the goods imported into Macau. The rate of consumption tax varies depending on the classification of the imported goods.

**Property tax**

Property tax is imposed annually on the owner of buildings situated in Macau. This is first payable after acquiring a property or upon the expiry of the property tax exemption period, if applicable. Different exemption periods are granted, depending on the location of the property. Additional exemption periods may apply in special cases.

For leased properties, property tax is charged at 10% on the actual rental income, and by application, a maximum deduction based on 10% of the rental income derived to cover repair and maintenance expenses incurred will be granted, if approved by the MFB.

For self-use properties, property tax is charged at 6% on the official ratable value as established by the appointed committee of the MFB. A deduction of 10% of the
official ratable value to cover repair and maintenance expenses will be automatically granted for self-use property. If the property is not occupied, the owner can apply for an exemption from property tax, the approval of which is entirely at the discretion of the MFB.

According to the 2013 Budget, there is a standard MOP 3,500 reduction in the property tax liabilities assessed in the tax year 2013 for both self-used and rental properties.

*Stamp duty*
Stamp duty is payable on certain types of documents and stampable transactions at a small fixed amount or at rates ranging from 0.1% to 10% on the value represented by the documents and transactions.

The charge to stamp duty has been extended to property transfers and the irrevocable transfer of certain assets. Stamp duty at progressive rates ranging from 1% to 3% is payable on transfer of immovable property with a surcharge of 5% on the duty payable, resulting in effective stamp duty rates of 1.05% to 3.15%. The irrevocable transfer of certain assets without consideration is subject to a 5% stamp duty.

Insurance policies, written or renewed, and banking transactions have been exempt from stamp duty since 2005. This exemption has been approved by the Legislative Assembly and will continue to be available in the tax year 2013.

Admission tickets for performances, exhibitions, and any kind of entertainment programmes is exempt from stamp tax for the tax year 2013, as approved by the Legislative Assembly. This exemption, if extended, will be published by the Macau government on an annual basis.

*Special Stamp Duty (SSD)*
The transferor of a residential property, commercial property, office, car-parking space, or property under construction is subject to SSD at 20% on the value of the property if the property is resold within a year of its purchase. The SSD rate is reduced to 10% if the resale takes place between one and two years after the purchase. The SSD is also applicable to transfers of an 80% or more shareholding interest in a Macau company that has properties.

*Buyer Stamp Duty (BSD)*
A company, an entrepreneur, or a non-Macau resident acquiring a residential property in Macau is subject to BSD at a flat rate of 10%, on top of the existing Stamp Duty and SSD, if applicable.

*Professional (Salaries) Tax*
Professional Tax is payable by anyone receiving income from employment services performed in Macau or from a Macau employment. In Macau, the Professional Tax reporting, withholding, and remittance obligations rest with the employer.

*Social security fund contribution*
Social security fund contribution in the total amount of MOP 45 per month is payable for resident employees. The employer contributes two-thirds of the amount (i.e. MOP 30) and the employee contributes one-third of the amount (i.e. MOP 15).

*Annual industrial tax*
The annual industrial tax has been exempted for the tax year 2013 and has been exempted on an annual basis by the Macau government since 2002.
Macau

Under the Industrial Tax Code, all commercial or industrial operations carried out in Macau are subject to industrial tax at the beginning of each year. The amount of the tax is dependent upon the nature of the business. The table below is an illustration of the tax amounts applicable to certain types of businesses in Macau.

<table>
<thead>
<tr>
<th>Type of business</th>
<th>Tax (MOP)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial banks</td>
<td>80,000</td>
</tr>
<tr>
<td>Construction companies</td>
<td>500</td>
</tr>
<tr>
<td>Hotels</td>
<td>500</td>
</tr>
<tr>
<td>Insurance companies</td>
<td>500</td>
</tr>
<tr>
<td>Textile companies</td>
<td>500</td>
</tr>
</tbody>
</table>

**Special gaming tax**

Special gaming tax is levied at 35% on the gross gaming revenue derived by gaming concessionaires authorised to carry on the operation of games of chance in Macau under Law 16/2001.

**Tourism tax**

Tourism tax is imposed at the rate of 5% on bill of services, excluding telecommunication and laundry services, and service charges of up to 10%, rendered in Macau by establishments such as hotels, guest houses, dancing halls, night clubs, massage/sauna parlours, gymnasium, karaoke, and the like. Such tax is generally borne by consumers.

Restaurants are exempt from tourism tax in the tax year 2013 and have been exempt, via an exemption published on an annual basis by the Macau government, since 2002.

**Motor vehicle tax**

Motor vehicle tax is imposed on the sale of new motor vehicles to consumers and the importation of new motor vehicles for self-use. Exemptions are available to certain persons and organisations and for certain specific usages. Generally, motor vehicle tax is levied based on the listed selling prices as registered with the MFB. The rate of motor vehicle tax varies depending on the type of motor vehicle and its value.

**Land rent**

According to the 2013 Budget, land rent below MOP 100 shall not be collected by the MFB in the tax year 2013. However, any such amount already collected shall not be refunded.

**Branch income**

Branch income is subject to tax at the same rate as that for corporations. The taxable income is ascertained based on branch accounts.

**Income determination**

The paragraphs below describe the tax acceptable treatments under the prevailing Complementary Tax Law and are for reference only.
**Inventory valuation**
Inventory should be stated at actual cost, and conformity between book and tax reporting is required. Market selling price or replacement cost is allowed only in special circumstances, and prior approval of the Director of the MFB is required for adoption of such inventory valuation methods. The write-down of inventory values is not permitted.

**Capital gains**
Gains or losses from the realisation of capital assets of a corporate taxpayer are treated as current revenue or expense items for complementary tax purposes.

**Dividend income**
Dividends from all sources are subject to complementary tax in the hands of a recipient incorporated in Macau unless the dividends were paid out of profits that have been taxed at the corporate level in Macau. Where dividends to shareholders are paid out of profits of a Macau entity that have not been taxed in Macau, complementary tax will technically be charged on the dividend distribution to the shareholders, except for distribution of tax exempt profits of approved offshore institutions, where complementary tax, in practice, has not been charged by the MFB to date.

**Interest income**
Interest income received by or accrued to a corporate taxpayer in Macau is subject to complementary tax.

**Foreign income**
Companies incorporated in Macau are subject to complementary tax on worldwide income, wherever received or credited. There are no provisions in the Macau Complementary Tax Law that allow foreign income to be deferred for tax purposes. Currently, double taxation relief is available under the respective DTAs that Macau has with the People’s Republic of China, Portugal, and Mozambique.

**Deductions**
Please note that the assessor is empowered to disallow any business expenses (e.g. entertainment, travelling) where the amount incurred is considered to be excessive.

**Depreciation**
An initial allowance of 20% is granted on buildings. The rates of tax depreciation are detailed in Decree-Law No.4/90/M, dated 5 March 1990. The Decree-Law prescribes the maximum annual tax depreciation rates and the number of years of asset life for different asset classes under the straight-line method. For illustration, the maximum depreciation rates and the maximum useful life currently applicable to the general types of assets are set out below:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Maximum annual percentage rate (%)</th>
<th>Maximum number of years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial buildings</td>
<td>4</td>
<td>50</td>
</tr>
<tr>
<td>Office and residential buildings</td>
<td>2</td>
<td>100</td>
</tr>
<tr>
<td>Machinery and installations, air conditioning, elevators, equipment</td>
<td>10 to 20</td>
<td>20 to 10</td>
</tr>
<tr>
<td>Tools</td>
<td>20 to 33.3</td>
<td>10 to 6</td>
</tr>
</tbody>
</table>
In the case of commercial and industrial buildings, depreciation is not allowed for the value attributable to the cost of the freehold land. Where the value of the freehold land cannot be determined from the total cost of land and buildings, a portion equal to 20% is deemed to be attributable to the land value for the purpose of determining the value of buildings to be depreciated.

Depreciation can be claimed either on a prorated basis in accordance with the prescribed annual rates for assets that are not acquired at the beginning of the financial year or on an annual basis.

The cost of repairs and maintenance exceeding 10% of the acquisition cost of the asset in a given year is deemed to be an expense of a capital nature and should be capitalised and depreciated over the remaining life of the asset.

**Goodwill**

Cost of acquisition of goodwill/amortisation of goodwill is generally deductible to the extent it is incurred in the generation of assessable profits.

**Interest expenses**

There is no thin capitalisation rule in Macau. However, the MFB may assess the reasonableness of the interest rate charged for interest expense paid to related parties.

**Bad debts**

The amount provided against doubtful trade receivables is an allowable tax deduction, but the provision cannot exceed 2% of the total receivables, except in the case of banks, where the minimum provisions required under the local banking regulations are fully tax-deductible.
Debts considered uncollectible may be written off only when adequate proof can be shown, usually by way of bankruptcy court proceedings.

**Charitable contributions**
A deduction of up to 0.2% of the company's turnover is allowable for donations to charitable organisations recognised by the tax authority.

**Pension expenses**
The employer's contribution to the staff provident fund legally registered in Macau is fully tax-deductible, up to 15% of the employees' basic salary.

**Fine and penalties**
Tax fines are not deductible.

**Taxes**
Taxes, except for complementary tax and taxes paid on corporate profits, are generally deductible to the extent they are incurred in the generation of assessable profits.

**Other significant items**

- An amount provided against stock obsolescence of up to 3% of the total stock value at year-end is allowed as a tax deduction.
- Losses arising from insurable risks are not allowable as a tax deduction.
- Staff social welfare expenses paid for the benefit of employees, for example canteens and libraries, are fully tax-deductible.

**Net operating losses**
Agreed tax losses can be carried forward for three consecutive years for Group A taxpayers. Group B taxpayers are not allowed to carry their tax losses forward to future years. Tax losses cannot be carried back in Macau.

**Payments to foreign affiliates**
The regulations make no specific mention of royalties and service fees paid to foreign affiliates. The MFB generally monitors the deductibility of such payments. Payments to foreign service providers for consulting services or construction-related services are not deductible if such consulting contracts are not properly registered in Macau.

**Group taxation**
There is no provision for group taxation in Macau.

**Transfer pricing**
There is no transfer pricing provision in the Macau tax regime.

**Thin capitalisation**
There is no thin capitalisation provision in the Macau tax regime.
Macau

**Tax credits and incentives**

**Foreign tax credit**
There is no foreign tax credit provision in the Macau Complementary Tax Law. Foreign tax credit is only available under the relevant provisions of the comprehensive tax arrangement/agreements that Macau has entered into with the People’s Republic of China, Portugal, Mozambique, and Cape Verde, respectively.

**Capital investment incentives**
A 50% reduction in complementary tax and stamp duty on certain transactions, as well as exemptions from annual industrial tax (currently exempt for all taxpayers) and property tax (up to periods prescribed by the MFB), are allowable for taxpayers in the manufacturing industry (as defined in the Decree-Law) whose capital investment is aimed at the introduction of new products or high technology, improvement of productivity, and increase in exports of goods to new markets.

Where profits are retained in reserves and reinvested in installation of new equipment within the following three financial years, the reinvested reserves can be deducted from taxable profits, provided that the reinvested reserves are attributable to profits earned from normal business operations and the investment is considered to be beneficial for the economic development of Macau.

**Offshore services business incentives**
Profits derived by approved offshore institutions from prescribed offshore service-related activities are exempt from all forms of taxes, such as complementary tax, annual industrial tax (currently exempt for all taxpayers), and stamp duties.

**Incentives for owners of touristic facilities**
Additional incentives, such as an extended property tax exemption period, exemption from annual industrial tax (currently exempt for all taxpayers), reduction in stamp duty, as well as acceleration of depreciation for complementary tax purposes, are available to owners of facilities that qualify as touristic facilities.

**Withholding taxes**
Currently, there is no provision in the Macau Complementary Tax Law for the withholding of taxes from payments made by domestic corporations to overseas companies.

**Tax administration**

**Taxable period**
The Macau tax year is on a calendar-year basis.

**Tax returns**
Assessments are made by the MFB upon review of the tax returns, which must be lodged before 31 March or 30 June of each year for Group B or Group A taxpayers, respectively.

**Payment of tax**
A provisional tax payment calculated based on the declared taxable profit for a Group A taxpayer or final assessed profit for a Group B taxpayer is payable in two equal
instalments, in September and November. However, if the amount is not greater than MOP 3,000, payment will be requested in one lump sum amount in September. For Group A taxpayers, a final tax assessment will be issued upon the completion of tax assessment by the MFB.

**Tax audit process**
There is no specific tax audit cycle in Macau. The MFB is empowered by the Macau Complementary Tax Law to carry out tax audit whenever the information provided by a taxpayer in its tax return is considered unclear or insufficient, and subsequent replies to the MFB’s queries, if any, are considered inadequate.

**Statute of limitations**
The statute of limitations period is five assessment years from the relevant year of assessment for both Group A and Group B taxpayers.

**Topics of focus for tax authorities**
The MFB generally focuses on the deductibility of expenses (e.g. staff costs, provisions, depreciation, management fees, payments made to overseas service providers, bad debts, donations).

**Exchange of information**
Law 20/2009 is the legislation that governs the exchange of information by Macau with other tax jurisdictions within the scope of bilateral tax treaties or arrangements. Its objective is to promote the transparency of the Macau tax administration and to demonstrate Macau’s willingness to cooperate with treaty partners in combating tax avoidance or tax evasion activities.

The information to be exchanged under Law 20/2009 is strictly confined to information collected for tax purposes only, and includes the following:

- Information collected within the jurisdiction of the MFB.
- Information collected by the MFB from financial institutions that are governed by the Macau Financial System Act and offshore institutions that are governed by the Macau Offshore Law (the Institutions).

So far, Macau has concluded TIEAS or DTAs that comply with the latest internationally agreed standards with 15 different tax jurisdictions. The following tables summarise the TIEAs and DTAs that Macau has signed, and the TIEAs and DTAs that are in negotiation:

**TIEAs have been signed by Macau with the following countries:**
- Australia
- Denmark
- Faroe Islands
- Finland
- Greenland
- Iceland
- India
- Jamaica
- Norway
- Sweden

**TIEAs are in negotiation with the following countries:**
- Argentina
- Germany
- Ireland
- Malta
- New Zealand
Macau

DTAs have been signed by Macau with the following countries:

<table>
<thead>
<tr>
<th>Treaty partners</th>
<th>Effective date</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Mainland of China</td>
<td>1 January 2004 (Note: The first protocol and the second protocol became effective on 15 September 2010 and 8 October 2011 respectively)</td>
</tr>
<tr>
<td>Mozambique</td>
<td>11 January 2011</td>
</tr>
<tr>
<td>Portugal</td>
<td>1 January 1999</td>
</tr>
<tr>
<td>Belgium</td>
<td>Not yet effective</td>
</tr>
<tr>
<td>Cape Verde</td>
<td>11 January 2011</td>
</tr>
</tbody>
</table>

DTAs are in negotiation with the following jurisdictions:

- Hong Kong
- Vietnam

It is believed that more comprehensive DTAs or TIEAs will be signed between Macau and other tax jurisdictions in the near future to demonstrate Macau's willingness to continue to cooperate with the Organisation for Economic Co-operation and Development (OECD) countries in combating tax avoidance or evasion activities.

As the information of a Macau taxpayer is becoming more transparent under comprehensive DTAs or TIEAs, it is important for Macau companies with cross-border transactions to perform periodic tax health checks to ensure that tax planning arrangements, if any, that have been put in place in the past, remain technically defensible. As Macau offshore companies continue to be a focus of investigations for many tax jurisdictions, it is important to ensure that such companies have adequate commercial substance in Macau and the companies' transfer pricing policies are supported by appropriate transfer pricing documentation and transfer pricing studies.

**Other issues**

**Choice of business entity**

A foreign company conducting business (except for short-term projects) in Macau is obligated to set up a legal establishment, which can be in the form of a company or a branch.

There are two types of Macau companies: companies limited by shares and companies limited by quotas. The capital and corporate governance requirements for a company limited by shares are higher than a company limited by quotas, and, in general, a company limited by quotas is used by investors that are not in regulated industries.

**Significant developments**

There have been no significant corporate tax developments in Macedonia during the past year.

**Taxes on corporate income**

Generally, all resident and non-resident legal entities operating through a permanent establishment (PE) are liable to pay corporate income tax (CIT) in Macedonia.

Macedonian resident entities are taxed on their worldwide income. Non-resident entities are taxed on their Macedonian-source income. Non-business organisations (including governmental bodies) are taxed on income from their business activities (if any).

The CIT rate is 10%.

There are two separate tax bases for CIT, which are subject to filing of two separate tax returns.

The first tax base is the sum of taxable expenses and understated revenues decreased by any available tax credits and tax reliefs. In this case, tax is payable on an annual basis regardless of whether the corporate taxpayer incurs profit or loss.

The second tax base is the amount of dividends or other type of profit distributions by the taxpayer in monetary or non-monetary form. Under recent amendments, the definition of ‘other type of profit distributions’ was extended to also cover the increase of registered capital as a result of asset revaluation as well as payments from profit to shareholders, members of managing bodies, and employees, based on the taxpayer's decision.

Distribution of profit to resident legal entities is exempt from CIT. Therefore, only distributed profit to individuals (foreign or domestic residents) or to non-resident legal entities is taxable.

Taxpayers are obligated to cover the losses from previous years’ prior profit distribution. The distributed amount is taxed at the moment of payment. Upon each profit distribution, a corporate taxpayer is obligated to submit a tax return containing information for the dividend beneficiary and the year from which the profit to be distributed arises. If the profit arose prior to 2009, CIT is not payable.
Undistributed profit is tax exempt. Undistributed profit is determined in accordance with the accounting regulations and standards decreased by the amount of CIT paid on taxable expenses and understated revenue.

**Simplified tax regime for companies**
Companies (except companies that provide banking, financial, and insurance services, as well as services in the field of games of chance and entertainment games) can choose to benefit from the simplified tax regime based on their overall annual income. Provided other criteria prescribed in the CIT Law are met, companies will qualify for the simplified tax regime if their overall annual income from all sources is between 3 million Macedonian denars (MKD) and MKD 6 million. These companies will pay 1% CIT on their overall income from all sources as stated in their income statement and financial statements for the respective calendar year.

Provided their overall annual income in the following three years is within the above range, companies under the simplified tax regime cannot request to be excluded from the simplified tax regime.

Under the simplified tax regime, exemption from tax is available for companies with an overall annual income from all sources of up to MKD 3 million.

**Local income taxes**
There are no local government taxes levied on corporate income.

---

**Corporate residence**
A company is resident in Macedonia for tax purposes if it is established or maintains its headquarters in the territory of Macedonia. Foreign legal entities with headquarters abroad are non-residents for tax purposes, but their Macedonian branches are liable for tax on any profit generated in the territory of Macedonia if they are considered as a PE for the foreign legal entity in Macedonia.

**Permanent establishment (PE)**
Generally, a PE is a fixed place of business through which the business of an enterprise is wholly or partly carried on, either directly or through a dependent agent.

More specifically, the domestic law provides that a PE may include a place of management, a branch office, an office, a factory, a workshop, mining activities, or any other place of extraction of natural resources.

A building site or construction or installation project, as well as related supervision activities, may constitute a PE if it lasts longer than six months.

Furthermore, the provision of services, including consulting services with regard to one or several related projects, is deemed to give rise to a PE if such activities last longer than 90 continuous days within any 12-month period. If one or several persons establish a PE as per above, any other non-related project on which they are working on becomes part of the PE, irrespective of its duration.

The PE should be registered as a corporate taxpayer at the beginning of its activity in the country for the purposes of obtaining a tax number.
Other taxes

Value-added tax (VAT)
In general, the VAT regulations are in line with the provisions of the sixth European Union (EU) VAT directive.

The standard VAT rate is 18%. This rate applies to overall turnover and imports of goods and services. A lower rate of 5% applies to supplies of certain goods and services, such as supply of food for human consumption; drinking water from public supply systems; computers and software; agricultural material and equipment; pharmaceutics and medical equipment; publications, such as books, pamphlets, newspapers, and other printed material, except for publications mainly used for advertising purposes; transport of passengers; and accommodation services, bed and breakfast services, as well as half-board and full-board services provided by hotelkeepers in the country.

All taxpayers whose total annual turnover exceeds MKD 2 million or whose total supplies, as projected at the beginning of the business activity, will exceed this amount, are liable to register for VAT purposes.

Residents that do not meet the criteria above may voluntarily register for VAT purposes at the beginning of each calendar year.

The standard VAT period is one calendar month. However, if the total turnover in the previous calendar year did not exceed MKD 25 million, the tax period is the calendar quarter. The tax period for voluntarily VAT registered taxpayers is the calendar year.

A taxpayer is obligated to submit a VAT return for each tax period within 25 days following the end of the relevant tax period.

Customs duties
Customs duties generally apply to most products imported into Macedonia. The customs rates under the most favoured nation treatment for agricultural products are up to 31%, whereas the customs rates for industrial products are below 23%.

Macedonia has signed trade agreements with Turkey, Ukraine, and European Free Trade Association (EFTA) member states. The country is a member state to the Central European Free Trade Agreement (CEFTA) and has signed a Stabilisation and Association Agreement with the European Community.

The import of industrial products with preferential origin is exempt from custom duty. In addition, the import of certain raw precious metals is exempt as of 14 March 2012.

According to the Stabilisation and Association Agreement 2001 between Macedonia and the European Union, generally, products with Macedonian origin can be exported into EU countries free of customs duties.

Excise duties
Excise duties are levied with respect to a limited number of goods produced or imported in Macedonia. Petroleum products, alcohol and alcoholic beverages, tobacco products, and passenger motor vehicles are subject to an excise duty at a flat or percentage rate. The excise period is one calendar month, and excise duty is payable within 15 days as of the end of the calendar month. The excise duty for alcohol beverages and tobacco goods is levied by way of purchasing excise stamps.
Macedonia

The excise duty for petroleum products is payable per kilo/litre and ranges between MKD 0.1 and MKD 24.

Alcohol and alcoholic beverages are taxable per litre/percentage of alcohol. Some categories of alcoholic beverages (e.g. wine) are subject to no excise duty. Maximum excise duty payable is up to MKD 300 per litre on pure alcohol.

The excise duty for tobacco products is combined and is calculated both per piece/kilo and as a percentage from the retail price as follows:

- MKD 1.35 per cigar and 0% from its retail price.
- MKD 0.10 per cigarette and 35% of from its retail price.
- MKD 1,350 per kilo smoking tobacco and 0% from its retail price.

The excise duty for passenger motor vehicles is calculated as a percentage of the market value or the custom value of the vehicle. It ranges from 0% for vehicles valued up to 3,000 euro (EUR) to 18% for vehicles valued above EUR 30,000.

**Property tax**

Property tax is paid annually on the ownership of real estate, including land (agricultural, construction, forest, and pastures) and buildings (residential buildings or flats, business buildings and business premises, administrative buildings and administrative premises, buildings and flats for rest and recreation, and other construction facilities, as well as installations constructed on the buildings or below and permanently attached to the buildings).

The person liable for property tax is the legal entity or the individual owner of the property. If the owner is not known or cannot be reached, the person liable for property tax is the user of the property. A property taxpayer may also be the taxpayer who usufructs the property; and if the property is owned by several persons, each of them is a property taxpayer proportionately for the portion owned. A property taxpayer is also the legal entity who uses real estate owned by the state and the municipality.

The property tax base is the market value of the real estate. The market value of the real estate is determined by a special municipal commission in accordance with the methodology prescribed by the government.

Property tax rates are proportional and range from 0.10% to 0.20%. The rates may be determined on the basis of the type of the property. As an exception, property tax rates on agricultural land not used for agricultural production may be increased outside the above range (i.e. from three to five times in relation to the basic rates).

The amount of the rates is decided by the Municipal Councils.

**Transfer tax**

The transfer of the right to ownership of real estate for or without compensation, as well as other means of acquiring real estate for or without compensation, between legal entities is subject to transfer tax.

The person liable for transfer tax is the seller of the real estate. As an exception, a taxpayer may also be the buyer of the real estate, if agreed in the sale and purchase agreement. When replacing real estate, the taxpayer is the party that replaces the real estate of greater value.
When selling real estate in bankruptcy and executive procedure, as well as when realising agreements on mortgage, the taxpayer may be the buyer of the real estate.

In the case of transfer of ownership of an ideal share in real estate, taxpayers are each of the owners separately.

The tax base is the market value of the real estate at the moment the tax liability arises.

When replacing real estate, the tax base is the difference between the market values of the real estate being replaced.

When selling real estate in bankruptcy and executive procedure, the tax base is the attained selling price.

The market value is determined by a special municipal commission in accordance to the methodology prescribed by the government.

Tax rates are proportional and range from 2% to 4%. The tax rates are determined by the municipal councils by way of decision.

There are certain exemptions from transfer taxes available for specifically determined cases (i.e. transfer of shares, sale of securities, the first sale of residential premises for the first five years from the end of their construction, etc.).

**Stamp taxes**
Stamp taxes are not payable in Macedonia.

**Garbage collection fee**
A garbage collection fee is payable for immovable property, depending on the type of property and on the surface area used. It is calculated on the basis of a tariff and is collected together with the bills for water usage.

Companies and individuals are liable for paying communal taxes for usage of certain rights and services (mainly for usage of the urban space in the municipalities, posting commercials, etc.).

**Branch income**
Branch offices are registered in the Trade Registry. Branches are subject to CIT in accordance with the general statutory provisions. The foreign parent company is fully liable for the obligations of its established branch office in Macedonia.

A foreign company that is entitled to carry out commercial activities pursuant to its national legislation may establish a commercial representative office in Macedonia. Representative offices are not legal entities and may not carry out any commercial activities. Representative offices are not subject to CIT.

**Income determination**
Capital gains, as well as income from dividends, interest, rent, and royalties are treated as ordinary income of the taxpayer and are included in its general taxable base in
Macedonia

accordance with accounting rules and standards. Since the accounting profits of a company are not taxable until distributed to individuals and non-resident legal entities, such income is not subject to CIT before that time.

**Inventory valuation**
There are no provisions in the tax legislation regarding inventory valuation.

**Deductions**

**Tax base on taxable expenses and understated revenues**
The CIT Law exhaustively lists the expenses that are not recognised for tax purposes and are part of the tax base on taxable expenses and understated revenues.

**Hidden profit distribution**
Hidden profit distributions are taxable as part of the tax base on taxable expenses and understated revenues. The following transactions with shareholders or their related parties are considered as hidden profit distribution subject to CIT:

- Sales of goods/services on terms below the market price.
- Purchase of goods/services on terms above the market price.
- Providing loans with an interest lower than the market one.
- Arrangements under which gains are realised by the shareholders or their related parties.

Unjustified shortages are also taxed as hidden profit distribution if not reimbursed from the salary of the authorised person.

Some of the transactions as per above may be regulated under the transfer pricing provisions in the CIT Law as well. It seems that the purpose of these provisions was to tax the non-fair transactions with shareholders and their related parties that do not fall under the ‘related-party’ definition as per the CIT Law.

**Non-business-related expenses**
Expenses that are not related to the business activity of the taxpayer are taxable.

**Depreciation**
Corporate taxpayers can apply depreciation methods and rates as well as perform impairment of their fixed assets under applicable accounting standards without any tax consequences.

**Goodwill**
There are no specific provisions in the tax legislation with regard to goodwill.

**Start-up expenses**
There are no specific provisions in the tax legislation with regard to start-up expenses.

**Interest expenses**
Interest paid on non-business related credits of the taxpayer, as well as interest on credits for purchase of passenger vehicles, furniture, carpets, works of art, and decorative objects, is a taxable expense. Interest on business-related credit is also taxable, provided it falls under the thin capitalisation or transfer pricing rules (see Thin capitalisation or Transfer pricing in the Group taxation section for more information).
Impairment and write-off of receivables
Impairment of receivables is not taxable for banks, saving institutions, and insurance companies if impaired in accordance to the methods prescribed by law. As to other corporate taxpayers, impairment of receivables is a taxable expense if not based on an effective court decision or reported and confirmed as debts in liquidation or bankruptcy procedure. The taxpayers are entitled to a tax credit for the tax paid on collected impaired receivables in the year of collection.

Write-off of receivables is a taxable expense for all corporate taxpayers.

Charitable contributions
Donations and sponsorships expenses are taxable if not pursuant to the manner, the conditions, and the procedure set forth in the Law on Donations and Sponsorships in Public Activities. If compliant with the law requirements as per above, donations are taxable if the annual amount borne by the taxpayer exceeds 5% of its overall revenue, whereas sponsorship expenses are taxable if above 3% of the overall revenue of the taxpayer.

Compensation expenses
Employees' related expenditures (e.g. organised transportation to/from work, organised food [cantine], business trip allowance, field allowance, family separation allowance, one-off severance payment, retirement allowance, annual holiday allowance, anniversary awards) are taxable if paid over the amount prescribed by law and collective agreement.

Voluntary pension insurance contributions are taxable if their annual amount per employee exceeds four average monthly gross salaries paid out in the previous calendar year.

The monthly allowances and expenses to the managing board members are tax-deductible, up to 50% of the average gross monthly salary paid out in the country in the previous year.

Insurance expenses
Personal insurance premiums paid for members of the management board and the employees (if not paid out of their salary) are taxable expenses. Only the collective insurance of the employees for work-related injuries is a non-taxable expense for corporate taxpayers.

Entertainment expenses
Expenses for gifts, business dinners, recreation, and entertainment are taxable, up to 90% of the annual amount borne by the taxpayer.

Scraping
Expenses for scrapping exceeding the standards for the particular industry are taxable if not caused by vis major or an uncontrollable event.

Fines, penalties, and taxes
Fines and tax penalties, penalty interest on unpaid public duties, and expenses for enforced payments, as well as withholding tax (WHT) borne by the taxpayer on behalf of third parties, are taxable.
Macedonia

**Net operating losses**  
Loss carryforwards are not specifically regulated in the Macedonian tax legislation. However, due to the concept of corporate income taxation of distributed profit, in essence, accounting losses could be carried forward indefinitely. This is because of the fact that profit can be distributed only if losses from previous years are covered.

Loss carrybacks are not allowed under the Macedonian tax legislation.

**Tax losses on taxable expenses and understated revenues**  
Tax losses arising from taxation of taxable expenses and understated revenues can be carried forward in the next consecutive five years. Such tax losses are recognised when the tax credit and reliefs exceed the amount of taxable expenses in the tax return on taxable expenses and understated revenues.

**Payments to foreign affiliates**  
There are no specific provisions in the tax legislation with regard to payments towards foreign affiliates.

**Group taxation**  
There are no tax consolidation provisions in Macedonia.

**Transfer pricing**  
The transfer pricing provisions are extended to cover not only the expenses but also the revenues resulting from related party transactions.

The difference between the market price and the transfer price is a taxable expense in the tax return on taxable expenses and understated revenues. The cost plus method, in addition to the comparable uncontrolled price method, are applicable. No reference is made to other methods accepted by the Organisation for Economic Co-operation and Development (OECD).

The part of the interest paid on loans to related parties that exceeds or is below the interest payable between unrelated parties is considered taxable.

Penalty interest imposed between related parties shall be considered as a taxable expense.

Transfer pricing rules do not apply on expenses for interest under credits and penalty interest paid to related parties that are banks or financial institutions.

Upon request by the Macedonian tax authorities, companies should provide enough documentation as evidence that the transactions with related parties were in line with the ‘arm’s-length principle’.

**Thin capitalisation**  
Part of the interest related to a loan received from a non-resident shareholder, who directly holds at least 25% of the capital in the company, that exceeds three times its share in the equity in the company will be taxable during a tax period. Thin capitalisation rules do not apply to loans received from banks or other financial organisations. Also, thin capitalisation rules do not apply for newly established companies within the first three years of operation.
Tax credits and incentives

Foreign tax credit
The taxpayer is allowed a tax credit for the tax paid on foreign income abroad, up to the amount of tax payable for that income in Macedonia. However, a tax credit for the WHT paid abroad is allowed only if a double tax treaty (DTT) is in place.

The WHT on dividends and CIT paid abroad can be credited against the corporate tax liability on profit distribution. The foreign WHT paid on other types of income, except dividends, can be credited against the corporate tax liability on taxable expenses and understated revenues.

Technological industrial development zones
A taxpayer that is a registered user within a technological industrial development zone is exempt from profit tax payment for a period of ten years from the commencement of the performance of the activity in the zone under terms and conditions and according to a procedure determined with the Law on Technological Industrial Development Zones.

Withholding taxes
All domestic legal entities and domestic physical persons that are registered for carrying out an activity, as well as foreign legal entities or physical persons that are non-residents but have a PE in Macedonia, are obligated to withhold tax when paying certain types of income to a foreign legal person and to pay the tax withheld to a respective suspense account simultaneously with the payment of the income.

The WHT rate is 10% and is applied on the following forms of incomes payable abroad:

• Dividends.
• Interest.
• Royalties.
• Income from entertainment or sporting activities in Macedonia.
• Income from management, consulting, financial services, or services related to research and development.
• Income from insurance or reinsurance premiums.
• Income from telecommunications services between Macedonia and a foreign country.
• Income from the lease of immovable property in Macedonia.

As an exception, WHT is not applicable to the following forms of income:

• The after-tax profit of a PE transferred to its foreign headquarters.
• Interest from bonds issued or guaranteed by the government.
• Interest on deposits in banks located in Macedonia.
• Income from transactions in state securities on the international financial markets.

If a DTT is in place, WHT shall be payable in accordance with the provisions from the DTT. Taxpayers are obligated to obtain approval from the Macedonian tax authorities prior to applying the tax rates from the DTT.
Macedonia has signed DTTs with the 43 countries listed in the chart below:

Notes

1. The lower rate applies to dividends paid out to a foreign company that controls at least 10% of the share capital of the payer of the dividends.
2. The lower rate applies to dividends paid out to a foreign company that controls at least 25% of the share capital of the payer of the dividends.
3. The zero rate applies to dividends paid out to pension funds.
4. These DTTs are still not in force.
5. The DTT with Federal Republic of Yugoslavia now applies both to Serbia and Montenegro.
6. The zero rate applies to dividends paid out to recognised pension funds and to foreign companies that continuously control at least 25% of the share capital of the payer of the dividends for 12 months before the dividends payment. The 5% rate applies to dividends paid out to foreign company that controls at least 10% of the share capital of the payer of the dividends. The 10% rate applies to dividends paid out in all other cases.
7. The tax rate of 10% for royalties payments applies only for utilisation or right to utilise cinematographic films and films or tapes for radio and television transmission. The 5% rate applies on all other cases.
8. The DTT concluded between the Socialist Federal Republic of Yugoslavia (SFRY) and Belgium is still applicable for Macedonia.
9. The zero rate applies to dividends paid out to pension schemes and to foreign companies that continuously control at least 25% of the share capital of the payer of the dividends for 12 months before the dividends payment. The 5% rate applies to dividends paid out to foreign company that controls at least 10% of the share capital of the payer of the dividends. The 15% rate applies to dividends paid out in all other cases.

-------------------------------------------

Tax administration

Taxable period
The taxable period for which CIT is determined covers one calendar year.

Tax returns
Taxpayers are obligated to calculate and pay CIT on taxable expenses and understated revenues on the basis of a tax return on taxable expenses and understated revenues, which must be submitted to the Public Revenue Office by the end of February of the following year.

Taxpayers who distribute profit are obligated to calculate and pay CIT on the basis of a tax return on profit distribution, which should be submitted to the tax authorities up to the date of profit distribution.

Small taxpayers who fall under the simplified tax regime are obligated to calculate and pay the tax due on the basis of a tax return on overall income, which should be submitted to the tax authorities by the end of February of the following year.

Payment of tax
Corporate taxpayers are obligated to pay monthly CIT advance payments during the year within 15 days of the end of each month.

Monthly CIT advance payments are calculated as one-twelfth of the tax obligation on taxable expenses and understated revenues for the previous calendar year, increased by the index of cumulative retail price growth as determined by the State Statistical Bureau.

The difference between the advance payments and the final CIT liability as determined in the tax return on taxable expenses and understated revenues should be paid within 30 days as of the deadline for submission of the tax return on taxable expenses and understated revenues. Daily penalty interest of 0.03% is due on late tax payments.
Macedonia

In case the sum of monthly advance payments exceeds the final tax liability in the tax return on taxable expenses and understated revenues, the taxpayer may request for a refund of overpaid tax. The tax should be refunded within 60 days as of the date of submitting the request. If the taxpayer does not ask for a tax refund, the overpaid amounts will be considered as advance payment for the following period.

**Tax audit process**
The tax audit may include one or more taxes, one or more fiscal periods, or only certain tax issues. The extent of the tax audit is determined solely by the tax authorities and is based on their estimation of risk in respect of the specific taxpayer. VAT audits are commonly conducted when VAT refund is requested by the taxpayer, and, in this case, the tax audit is usually limited in the area of VAT. The advance notice for tax audit for big taxpayers and concerns is four weeks, whereas the advance notice for all other taxpayers is two weeks. In cases where the tax authorities find that it would represent an obstacle for the tax audit, an advanced notice will not be given to the taxpayer.

**Statute of limitations**
The statute of limitations is five years as of the end of the calendar year in which the tax event occurred. In case of tax evasion, the statute of limitations is ten years as of the end of the calendar year in which the tax event occurred.

---

**Other issues**

**Choice of business entity**
The Macedonian Trade Companies Law provides for the following types of entities:

- General partnerships.
- Limited partnerships.
- Limited liability companies.
- Joint stock companies.
- Limited partnerships by shares.
- Foreign business entities may register a branch office or a representative office in Macedonia.
**Significant developments**

**Reduction of income tax rate**
Income tax rates, including corporate income tax (CIT), salary income tax, withholding tax (WHT) on capital interest, and capital gain on real estate, decreased from 21% to 20% in 2013.

**Suspension of bi-monthly income tax instalments**
Taxpayers can decide to suspend the payment of bi-monthly income tax instalments, but they must pay a penalty of 80% if the final tax due is more than the previous year’s income tax.

**Extension of tax reduction incentives for companies investing in tourism, industrial, civil work and construction, and transformation**
As of January 2013, the tax reduction for investments, which was only offered to companies investing in the production of renewable energies, was extended to companies investing in tourism, industrial, civil work and construction, and transformation. Such companies can now benefit from a tax reduction equal to the tax calculated on 50% of the amount of investment that they realised during the related tax year. The right to reduction that can be used during the tax year cannot exceed 50% of the tax actually due. The balance is carried forward, with the same limitation, to subsequent years, until clearance. The list of investments eligible will be published by order.

**Foreign service suppliers**
Foreign service suppliers that do not have a permanent establishment (PE) in Madagascar must appoint a tax representative in charge to file the list of its local subcontractors and payments thereof.

---

**Taxes on corporate income**

**Taxation of residents**
Resident corporate entities are subject to CIT based on realised worldwide income.

A corporate entity having an annual turnover of less than 20 million Malagasy ariary (MGA) is subject to CIT at a rate of 5% of 70% of turnover, with a minimum tax of MGA 16,000.

A corporate entity registered in Madagascar and having an annual turnover exceeding MGA 20 million is subject to CIT at a rate of 20%. Note that the CIT rate was 21% in 2012.
Madagascar

The tax payable cannot be less than 5/1,000 of turnover plus a fixed amount of MGA 100,000 for taxable persons carrying on agricultural, artisan, transportation, industrial, hotel, or mining activities. The minimum tax cannot be less than 5/1,000 of turnover plus MGA 320,000 for other activities.

**Taxation of non-residents**
Only Madagascar-source income is taxable for non-residents.

Revenue of foreign businesses that do not have a PE in Madagascar is subject to WHT at a rate of 10% of any income realised in Madagascar.

**Local income taxes**
No other local income taxes are applicable in Madagascar.

**Corporate residence**
Companies are considered resident in Madagascar if they are registered in Madagascar or have a legal existence in Madagascar.

**Permanent establishment (PE)**
While there is no definition of PE in the Madagascar tax law, companies usually are required to have a legal existence when they carry out business in Madagascar or have revenue from ownership of assets in Madagascar.

**Other taxes**

**Value-added tax (VAT)**
The VAT rate is 20%, and the VAT rate on export is 0%. VAT input is recoverable under certain conditions.

VAT is applicable to all transactions realised in Madagascar by a VAT vendor. Services are considered to be performed in Madagascar if such services are used in Madagascar or invoiced to a taxpayer established in Madagascar.

Transport companies are allowed to claim VAT input on gasoline used for land transportation. The objective is to reduce the impact of cost of oil and gas on transportation fees.

Any corporate entity or individual person who realises an annual turnover exceeding MGA 200 million is a VAT vendor. For a business realising annual revenue less than MGA 200 million, VAT vendor registration is an option.

A foreign company that has no PE in Madagascar but renders services to a Madagascar taxpayer must appoint a tax representative to collect and pay VAT on its behalf. Otherwise, the beneficiary of the services must collect and pay VAT on behalf of the foreign supplier.

All transactions made by a VAT vendor with a non-VAT vendor must be done via the banking system when the value of the transaction exceeds a threshold fixed by Decree.
**Custom and import tax**
The importation of goods is subject to payment of custom and import tax payable to the custom office.

In addition, Gasynet fee, corresponding to 0.5% of the cost, insurance, and freight (CIF) value of goods, is applicable on importation of goods.

**Excise duty**
Excise duty applies on a range of goods and services, such as tobacco, alcohol, lighters, and communication by mobile phones. Excise duty rate ranges from 7% to 325% or a fixed amount per litre or per unit.

**Real estate ownership tax**
Real estate ownership tax is imposed annually at the rate of 5% to 10% on the rental value of the property. Land ownership is also taxable at a rate depending on the nature of the land.

**Registration fees**
Registration fees are applicable to transfers of title ownership (e.g. sales, donations) of movable and immovable assets, to transfers of interests, to share capital increases, and to lease agreements.

Registration fee rates are 0.5% to 6%, depending on the nature of the transaction.

**Payroll tax**
Salary income taxes, called *Impôt sur les Revenus Salariaux et Assimilés* (IRSA), are levied at a rate of 20% on the total taxable remuneration of employees, including salaries, allowances, and benefits in kind. Employers are responsible for withholding and paying salary income taxes on behalf of employees.

**Social security contributions**
Employers must contribute to *Caisse Nationale de Prévoyance Sociale*, Madagascar’s national social security fund, which includes pensions and accident insurance. The contribution is capped at 13% of eight times the legal minimum salary per employee.

**Health contributions**
Employers must contribute to the health system assessment at a rate of 5% of the total amount of taxable remuneration of its employees. The contribution is capped at 5% of eight times the legal minimum salary per employee.

**Tax on insurance contracts**
All insurance or life annuity conventions concluded with a company, insurance firm, or with any other Malagasy or other insurer are subject to an annual tax on insurance contracts at a rate of 3% to 20% levied on the insurance premiums.

**Branch income**
The tax on branch income is the same as for corporate income. The branch income tax base is the income realised by the branch in Madagascar.
Income determination

Inventory valuation
There are no provisions for valuing inventories or determining inventory flows in Madagascar. The tax treatment will follow the accounting treatment.

Capital gains
There is no provision for capital gains in Madagascar, except for capital gains on the sale of real estate by an individual. Capital gains made by a company on the sale of assets and interests are considered as normal business income that is subject to CIT.

Dividend income
Dividends received by a company are considered as business income subject to CIT.

Stock dividends
Stock dividends are unusual, but they are considered as business income that is subject to CIT.

Interest income
Interest income received by a resident taxpayer from another entity established in Madagascar is subject to WHT at a rate of 20%. Revenue already subject to WHT is no longer taxable to CIT.

Foreign income
Foreign income earned by corporate bodies situated in Madagascar is considered as normal business income subject to CIT unless a tax treaty is established and indicates otherwise. There is no provision for tax deferral in Madagascar.

Deductions

Depreciation
The amount of deductible depreciation should not exceed the amount that is calculated according to the following rates of depreciation provided by the law:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial buildings</td>
<td>5</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>10</td>
</tr>
<tr>
<td>Mining exploration and development (licence)</td>
<td>33</td>
</tr>
<tr>
<td>Transportation (car)</td>
<td>20</td>
</tr>
<tr>
<td>Transportation (utility cars, vans, trucks)</td>
<td>25</td>
</tr>
<tr>
<td>Computers</td>
<td>25</td>
</tr>
<tr>
<td>Electricity generators</td>
<td>10</td>
</tr>
</tbody>
</table>

With the exception of buildings, it is also possible to practise a graduated depreciation. In this case, the annual depreciation corresponds to 30% of the net book value of the asset.

In case of loss, depreciation of assets can be deferred and carried forward to the next financial years until absorption.
Goodwill
There is no provision concerning deductibility of goodwill in the Madagascar tax code.

Start-up expenses
There is no specific tax provision on start-up expenses. Accounting rules are applicable for the profit and loss recognition.

Start-up and prospecting expenses for the installation of an overseas establishment, as well as the costs of running such a foreign establishment, for the first three years are tax deductible. However, the amounts deducted must be reported, in equal amounts, to the taxable income of the five consecutive years from the fifth year following the creation of the foreign establishment.

Interest expenses
Interest expenses are deductible. However, interests on inter-company loans are subject to thin capitalisation rules (see Thin capitalisation in the Group taxation section for more information).

Bad debt
To be tax-deductible, provisions for doubtful debt must be subject to justification of existence of amicable or judicial settlement.

Charitable contributions
Payments made for the benefit of educational, social, or cultural recognised public associations; accredited bodies for scientific research; or for the promotion and creation of businesses for achievement of planned economic and social development are deductible within the limits of 0.5% of annual turnover.

Gifts in kind or in cash granted in case of natural calamities and donations in cash granted to a corporation established by decree for the interest of the nation are also deductible.

Any other charitable contributions are not deductible.

Deductible wages
Salaries and wages that are not included in salary income taxes or not declared to Caisse Nationale de Prévoyance Sociale are not deductible.

Fines and penalties
Fines and penalties are not deductible for CIT purposes.

Taxes
Except for CIT, taxes in relation to business in Madagascar are deductible.

Third-party taxes borne by the company are not tax-deductible.

Net operating losses
Accumulated loss can be carried forward for the next five financial years following the period in which the loss occurs. Carryback of losses is not permitted in Madagascar.

Payments to foreign affiliates
For branches, the deductible amount of overhead that the head office can charge to the branch is limited to 1% of the turnover of the branch.
Madagascar

For interest on inter-company loans, only interest calculated on twice the amount of the share capital, at a rate practised by the Central Bank plus two points, is deductible.

**Group taxation**

There is no provision regarding group taxation in Madagascar.

**Transfer pricing**

There is a provision in the tax law allowing the tax authority to claim a tax adjustment in cases where the transactions between a Madagascar entity and a foreign entity controlling or controlled by the Madagascar entity are not concluded on an arm’s-length basis. However, there is no definition of arm’s-length bases under Malagasy law. In practice, deductibility of inter-company expenses is appreciated by the tax authority based on the following:

- The agreement must correspond to actual services.
- The amount invoiced must be reasonable compared to the market practice.
- The services rendered must be required for the exploitation.

**Thin capitalisation**

Under Malagasy tax law, deductible inter-company financial interest cannot exceed the interest calculated on twice the share capital at the rate of the Central Bank of Madagascar plus two points (the April 2013 rate of the Central Bank of Madagascar is 9.5%).

**Tax credits and incentives**

The following activities benefit from a special tax and/or customs regime:

**Microfinance activity**

Microfinance benefits are available for entities specialising in lending money on the basis of small or medium scale value. Entities duly licensed to practise microfinance activities are exempt from CIT during the first five years. After this period, the microfinance company is subject to CIT at a rate of 20%.

**Free zone (free trade zone)**

Free-zone law is available for industrial and other service providers that export all of their products. If eligible under the free-zone law, a CIT exemption is provided during the first two to five years and a reduced CIT of 10% is levied thereafter. Exemption from customs duties on importation is also provided.

**Companies investing in renewable energy, tourism, industrial, civil work and construction, and transformation**

Companies investing in renewable energy, tourism, industrial, civil work and construction, and transformation can benefit from a tax reduction equal to the tax calculated on 50% of the amount of investment that they realised during the related tax year. The right to reduction that can be used for the tax year cannot exceed 50% of tax actually due. The balance is carried forward with the same limitation to subsequent years, until clearance.
**Big investment mining**
A mining company committing to invest more than 50 million United States dollars (USD) is considered a big investment mining company. The big investment mining law provides a minimum income tax exemption, a reduced CIT rate for the transformation entity (i.e. the entity in charge of processing the extracted minerals), exemption from custom and importation duties, and VAT reimbursement on locally purchased equipment and investments.

**Petroleum code**
The petroleum code provides a custom and importation duties exemption for hydrocarbon research, exploration, and exploitation activities.

**Leasing law**
The leasing law provides that leasing activities can benefit from CIT exemption and reduction of tax rate during the first four years.

**Foreign tax credit**
Except under a tax treaty, there is no foreign tax credit rule under Malagasy tax law.

---

**Withholding taxes**
WHTs are levied as follows:

- *Impôt sur les revenus des capitaux mobiliers* (IRCM): WHT on interest of 20% is applicable on financial loan interest. However, interest paid to banks, financial institution, and foreign financial organisation is exempt.
- WHT of 20% is applicable on remuneration of a member of a board of directors or a single director.
- Income tax for non-resident entity: Management fees, royalties, technical and assistance fees, licence fees, equipment rental fees, and any income realised by foreign suppliers is subject to WHT at a rate of 10%.

Madagascar has signed two tax treaties.

<table>

**Tax administration**

**Taxable period**
The financial year may be spread over any period of 12 months. There is no need to obtain prior authorisation in order to close the financial year on a date other than 31 December or 30 June.
Madagascar

**Tax returns**
CIT returns are due before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and no later than the 15th day of the fourth month from the date of closing of the financial year for all other year-ends.

**Payment of tax**
CIT is payable bi-monthly in provisional instalments. The balance is payable before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and within four months from the date of closing of the financial year for all other year-ends.

Taxpayers can decide to suspend the payment of bi-monthly income tax instalments, but they must pay a penalty of 80% if the final tax due is more than the previous year’s income tax.

WHT on foreign services is payable to the tax authorities within one month of the date of payment.

WHT on interest and on payments to members of boards of directors are payable before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and no later than the 15th day of the fourth month from the date of closing of the financial year for all other year-ends.

**Tax audit process**
The tax authority carries out audits of a selection of tax returns, usually at the taxpayer’s place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations. After examination of available information, the tax authority issues a notice of assessment, and the taxpayer has 30 days after the date of reception of the notice of assessment to answer and submit its written objection to the tax authority. If the tax authority confirms its assessment, the taxpayer has two options:

(i) 15 days from the confirmation of assessment, the taxpayer may request the opinion of the Tax Administrative Appeal Commission (CFRA). One month from the CFRA opinion, the taxpayer may file a claim to the Director of Tax Audit and Litigation (DCFC). The decision of that body may be further appealed to the Court within 30 days.

(ii) 30 days from the confirmation of assessment, the taxpayer may file a claim to the DCFC. 15 days from a negative answer from the DCFC, the taxpayer may request the opinion of the CFRA. One month from the CFRA opinion, the taxpayer may file a claim to the Tax Director. The decision of that body may be further appealed to the Court within 30 days.

**Statute of limitations**
The tax limitation period is three years.
**Topics of focus for tax authorities**
Areas where tax authorities usually claim adjustment are:

- VAT reverse on foreign services.
- Completeness of VAT output on revenue.
- Sales without invoices.
- Expenses without invoices.
- Employees remuneration not subject to salary tax.
- Payment to non-registered suppliers.
Significant developments

As of 1 July 2012, the following developments have entered into effect:

• The minimum tax based on turnover has been abolished.
• Investment allowances for manufacturers have increased from 40% to 100% of the cost for new and unused plant and machinery and industrial buildings and from 20% to 40% for used assets.
• The rate of transport allowance for transportation of exports has increased from 15% of the cost to 25%.
• The rate of export allowances has increased from 15% to 25% of taxable income.
• The corporate tax rate for mobile phone operators has increased to 33%.
• 50% of social contributions towards construction of hospitals, schools, and sponsorship of school sports activities will be tax deductible.
• The deductibility of pension contributions by employers has increased from 9,000 Malawian kwachas (MWK) to 15% of the employee’s annual salary.
• The withholding tax (WHT) threshold for casual labour has increased from MWK 5,000 to MWK 15,000. Casual labour will be treated separately from services.
• Gains from the sale of shares traded on the Malawi Stock Exchange and held by the taxpayer for not less than a year will be exempted from tax.

Taxes on corporate income

Malawi does not have separate legislation for the determination of taxable income of different types of legal persons. Taxation of all income is included in the Taxation Act.

Section 11 of the Taxation Act defines income as the total amount in cash or otherwise, including any capital gain, received by or accrued to in any year or period of assessment from a source within or deemed to be within Malawi. The taxpayer’s assessable income excludes any amount exempt from tax under this act.

Income deemed to arise in Malawi

The liability for Malawi tax is based on the source of the income rather than residence of the person. Certain transactions may be deemed to be from a source within Malawi even if effected outside Malawi. Section 27 of the Taxation Act limits the income that may be deemed to have arisen in Malawi to the following:

• Remuneration for services rendered or work performed in Malawi.
• Remuneration for services rendered or work performed in or out of Malawi where the amount may be claimed as a tax-deductible expense by a permanent establishment (PE) in Malawi.
• Amounts incurred, claimed, or claimable in connection with a PE in Malawi.
• Realised exchange gains and losses arising in connection with a PE in Malawi or foreign exchange assets and liabilities held in Malawi.
• Capital gains and losses realised with respect to tangible property located in Malawi and interests in companies incorporated in Malawi.

</tbody>
</table>

Notes

1. In the case of a mining company, an additional resource rent tax of 10% is levied on profits after tax if the company’s rate of return exceeds 20%. The basis for calculating rate of return has not been defined.
2. Priority industries have not been defined.

Minimum tax

As of 1 July 2012, the minimum tax based on turnover has been removed.

From 1 July 2011 through 30 June 2012, companies were subject to minimum tax based on turnover, as follows: 1% of turnover for annual turnover of MWK 50 million or less; 2% of turnover for annual turnover of more than MWK 50 million.

Non-resident tax

Non-resident tax is payable on income due to a non-resident at the rate of 15% of the gross income.

Any income payable to a person who is not resident in Malawi (who has not been in Malawi for an aggregate period of 183 days) arising from a source within Malawi is liable to a final WHT of 15% of the gross of such income. Non-resident tax is applicable where the recipient of the income does not have a PE in Malawi from which the income emanated.

Non-resident tax should not be charged on income of residents of countries that have a standing double tax agreement (DTA) with Malawi. Currently, the following countries have a DTA with Malawi: Denmark, France, the Netherlands, Norway, South Africa, Sweden, Switzerland, and the United Kingdom.

Local income taxes

There are no local income taxes in Malawi.
Malawi

Corporate residence

A corporate entity is considered a resident for tax purposes in Malawi if it has a PE in Malawi.

Permanent establishment (PE)

The Taxation Act defines a PE as ‘an office or other fixed place of business through which business activity is carried on’. This short definition is wide in scope. Care must be exercised when considering this definition in situations that may be affected by a DTA. Each DTA contains a specific and far more detailed definition of what constitutes a PE.

Other taxes

Value-added tax (VAT)

VAT is applicable on taxable goods and services. There are three classes of supplies for VAT: taxable supplies (at the rate of 16.5%), zero-rated supplies, and exempt supplies.

A taxable person can claim input VAT on inputs used in making taxable supplies.

A taxable person should complete VAT returns and make VAT payment, where applicable, on a monthly basis within 25 days after the end of the month.

Zero-rated supplies include exercise books, fertilisers, motor vehicles for the transport of goods, and salt.

As of 1 July 2012, the following supplies are tax exempt: machinery, financial services, bread, newspapers, and internet services.

Customs duties

Customs duty is applicable on goods imported into Malawi. The basis for calculating duty is cost, insurance, and freight (CIF). There are three types of import duties: Customs duty, import excise, and import VAT. The rate of custom duty varies from product to product.

The following are the customs and excise measures effective as of 8 June 2012:

• Returning residents will have to clear, duty free, a motor vehicle owned for more than 12 months under CPC 430.
• Duty free on importation of diagnostic and laboratory reagent under CPC 405 by Health Institutions.
• Removal of VAT on imported goods on water supply.
• Removal of duty on imported electronic fiscal devices.
• Removal of taxes applicable on large buses with seating capacity of more than 45 passengers (including the driver).
• Reintroduction of the Industrial Rebate System. This is a major relief to the manufacturing sector; however, given the abuse of the scheme in the past and the Minister's intimation, it will be subject to serious monitoring by the Malawi Revenue Authority. Taxpayers will be required to register with the Malawi Revenue Authority.
• Other measures are in alignment with the Common Market for Eastern and South Africa (COMESA) and South African Development Community (SADC) tariff structures.
**Excise duties**
Domestic excise is chargeable on certain goods manufactured in Malawi and on certain services such as alcoholic drinks, tobacco, and cell phone airtime. The rate of excise varies depending on the goods and services.

**Tobacco levy**
Buyers of tobacco must pay a levy of 0.2% for every kilogram of tobacco bought.

**Property taxes**
There are no property taxes in Malawi.

**Transfer taxes**
There are no transfer taxes in Malawi.

**Stamp duties**
Stamp duties apply on certain documentation.

**Turnover tax**
Turnover tax is applicable for businesses with a turnover between MWK 2 million and MWK 6 million. The turnover tax rate is 2% of turnover.

**Resource rent tax for miners**
Miners pay resource rent tax of 10% on after-tax profits if the rate of return exceeds 20%. This kind of tax has been introduced recently and details of operation are not clear. For example, no formula has been provided for calculating the rate of return.

**Fringe benefits tax (FBT)**
A fringe benefit is defined as any asset, service, or other benefit in kind provided by or on behalf of an employer to an employee if such benefit includes an element of personal benefit to the employee. The employer providing such benefits is liable for payment of FBT. FBT is charged at the rate of 30% of the taxable figure.

Take note that a benefit need not be wholly for personal use in order to be considered for FBT.

Note as well that no benefit in cash, no matter what it is termed as, can be treated as a fringe benefit. All monies paid in cash (rather than in kind) should be considered for pay as you earn (PAYE) deduction.

However, subsistence allowances, given to employees working out of their duty station for instance, presumably to cater wholly, exclusively, and necessarily for the needs such as accommodation, meals, transport, etc. ought not be taxed. This applies also for reimbursement of expenses incurred in business.

Every employer shall register for FBT within the month in which one begins to provide fringe benefits.

The sums due as FBT shall be remitted to the Malawi Revenue Authority (MRA) in quarterly instalments not later than 14 days after the end of each quarter of a period of 12 months ending 30 June, and remittance should be accompanied with a duly completed FBT return in Form FBT 2.

Note that the value for FBT should not be included in the employee’s certificate of gross emoluments.
Malawi

Assessment of housing fringe benefits
The taxable value of a housing fringe benefit is the greatest of (i) 10% of salary where the house is unfurnished, (ii) 12% of salary if furnished, or (iii) the rental value.

Where the house occupied by the employee is owned by the employer, the taxable value is reduced by 50%.

Motor vehicles
FBT is applicable on motor vehicles allocated for use by members of staff and does not include pool cars or cars that are strictly commercial in nature.

The taxable value is 15% of the original cost of the vehicle.

School fees (for children/dependants)
50% of the cost to the employer for school fees is a taxable benefit, where payment is made directly to the educational institution. Education allowances payable to employees are not subject to FBT as the allowance is considered part of normal salary and taxable as such.

Utilities, household items, vacations, travel, and domestic services
The taxable value of utilities (e.g. electricity, water, and telephone expenses), household items, vacations, travel, and domestic services (e.g. gardener, cook, house boy, guard, nanny) is the entire cost to the employer. Except that for a house owned by the employer, the cost of gardener, security guard, and watchman shall not constitute a taxable benefit.

Interest free loans and loans given at interest lower than the commercial rate
Where an employer gives a loan to an employee that is interest free or bears interest that is lower than the predetermined commercial rate, the difference between the interest offered and the commercial rate is a taxable benefit.

Branch income
There is a 35% tax on taxable income of a branch of a foreign company, except for cell phone operations, who pay tax at the rate of 38%. Locally incorporated companies pay tax at the rate of 30%, except for cell phone operators, who pay tax at the rate of 33%.

No dividend WHT is applicable on repatriation of profits.

Income determination

Inventory valuation
Inventory is stated at cost for tax purposes.

Capital gains
The tax basis for capital gains is the cost of the asset adjusted by the applicable consumer price index (inflation index). Once determined, the taxable gain is subject to corporate tax at the rate applicable to the particular entity.

Capital gains arising from the disposal of personal and domestic assets not used in connection with trade are exempt from corporate tax.
As of 1 July 2012, capital gains arising from the sale of shares held for more than one year traded on the Malawi Stock Exchange are not taxable.

**Rollover relief**
If a business asset is sold and the taxpayer acquires a qualifying replacement asset, the taxpayer may claim rollover relief. This means that the taxpayer does not immediately pay the tax on the gain. Instead, the cost of the replacement asset is reduced by the amount of the gain. The taxpayer must declare this in the tax return.

A qualifying replacement asset is an asset similar to, or related in service or use to, the asset disposed of. The replacement asset must be acquired within 18 months of the disposal giving rise to the gain.

**Dividend income**
Dividend income is exempt from corporate tax; however, dividends received from Malawi sources are subject to a 10% dividend WHT, which is a final tax. Note that although the word ‘final’ has not been defined, it is applied as meaning that dividend WHT suffered may not be offset against an income tax liability.

**Interest income**
Interest is added to the other income categories and taxed at a rate applicable to the person that earns the income. There is a mandatory WHT on interest earned from financial institutions unless the earner is exempted.

**Foreign exchange gains and losses**
Foreign exchange gains realised on foreign currency assets or liabilities are taxable.

Foreign exchange losses realised on foreign currency assets or liabilities are tax deductible.

Unrealised gains and losses are carried forward until realised and then included in income or allowable expenditures. The maintenance of records that accurately track unrealised exchange rate adjustments from year to year is necessary to ensure correct tax computations.

**Tax-exempt income**
The following are common examples of other tax-exempt income:

- The income of agricultural, mining, and commercial institutions or societies not operating for private pecuniary profit or gain of the members.
- The income of clubs, societies, and associations formed, organised, and operated solely or principally for social welfare or civic improvement or other similar purpose, provided that the income of such bodies may not be divided among or used for the benefit of the members or shareholders.
- The income of ecclesiastical, charitable, and educational institutions of a public character.

**Foreign income**
Generally, income whose source is not Malawi is not taxable in Malawi.
Deductions

Taxable income is calculated by deducting allowable items from assessable income. Section 28 of the Taxation Act defines tax-allowable deductions as any expenditures and losses (not being of a capital nature) wholly, exclusively, and necessarily incurred by the taxpayer for the purpose of trade or in the production of income.

Capital allowances

Capital allowances (i.e. depreciation allowances) are applicable as stipulated in the Taxation Act at various rates.

Capital allowances, which are available to companies and individuals in business, are allowed as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Initial</th>
<th>Investment</th>
<th>Annual</th>
</tr>
</thead>

</table>

Notes

1. As of 1 July 2012, the 100% investment allowance is available only on new and unused qualifying assets as indicated above, belonging to and used by a manufacturer or farmer. The rate for used qualifying assets is 40%. The investment allowance is claimable only in the first year of use.
2. Where an investment allowance is claimed, the initial allowance is not allowed to be claimed on the same asset. The initial allowance is claimable only in the first year of use.
3. Annual allowances at the above rates are based on cost less investment and initial and annual allowances previously granted.
4. Investment allowance on plant and machinery excludes motor vehicles intended or adapted for use on roads.
5. A 20% annual allowance is standard, but the Commissioner General may vary the amount.
6. No initial allowance is granted on private motor vehicles. These include saloons, sedans, station wagons, and double cabin pickups. However, the restriction does not apply where the motor vehicle is used for hiring purposes.
7. The building must be newly constructed at a cost of no less than MWK 100 million.

On disposal, assets are subject to balancing charges (capital gains) or balancing allowances.

If an asset is subject to extensive use, such as machinery working double shifts, so that its expected economic life is reduced, the Commissioner General may agree to increase the rates of annual allowances.

Lease, patent, trademark, and copyright premium

The tax-deductible amount of a premium paid for the right of use or occupation of land or buildings, plant or machinery, patent design, trademark, copyright, or any other property of a similar nature is one of the following:

- The amount of premium or consideration divided by the number of years for which the right of occupation or use is granted.
• Where the period for which the right of occupation or use is granted exceeds 25 years, the deduction is one-twenty-fifth of the premium or consideration.

The premium is tax deductible only where the asset or right with respect to which the premium or consideration is paid is used for the generation of income. If a taxpayer acquires ownership of the asset or right, no further deduction of the premium or consideration is allowed from the date ownership is acquired.

**Goodwill**
The legislation does not prescribe treatment for goodwill. It has been the practice that goodwill is not deductible for tax purposes.

**Pre-operating expenditures**
A manufacturer may claim as a deduction any expenditure incurred in the course of establishing the business, provided that the following are true:

• The expenditure was incurred not more than 18 months before commencing business.
• The expenditure would have been allowed as a deduction if it had been incurred after commencing business.

**Interest expenses**
Interest that arises out of financing operations is allowable, while interest due to late payment of a debt is not allowable.

**Bad debt**
Specific bad debts are tax deductible and taxable in the following year. Bad debts written off are allowable and taxable upon eventual recovery.

**Charitable contributions**
Donations to approved charities and approved non-profit institutions formed for the purpose of social welfare, civic improvement, educational development, or other similar purposes are deductible. The minimum individual donation allowable is MWK 500. The minimum donation for other approved charities is MWK 250. In both cases, there is no maximum donation.

**Social contributions**
As of 1 July 2012, 50% of social contributions towards construction of hospitals, schools, and sponsorship of school sports activities are tax deductible.

**Research and development (R&D) expenditures**
Research expenditures are fully allowable as a deduction if they are for ‘experiments and research relating to trade’.

**Pension contributions**
The tax-allowable amount of ordinary pension contributions made by an employer to an approved pension fund is subject to limitations. The limit with respect to each employee is the lowest of one of the following per annum:

• The actual contribution.
• Up to 15% of employee’s annual salary.

**Fines and penalties**
Fines and penalties are not tax deductible in any way.
**Malawi**

**Taxes**
Taxes are not allowed as deductible expenses, except where they are local taxes.

**Net operating losses**
Current taxable income may be offset against net operating losses brought forward, and current operating losses may be increased by net unexhausted trading losses brought forward. Manufacturers and taxpayers in the agricultural industry may carry losses forward indefinitely, while other taxpayers may carry losses forward for only six years. Net operating losses may not be carried back.

**Payments to foreign affiliates**
A deduction is allowed for payments to foreign affiliates if such payments are expended wholly, exclusively, and necessarily for the production of income or for the purposes of trade, and it can be demonstrated that the transaction is at arm’s length.

**Group taxation**
Group taxation is not permitted in Malawi.

**Transfer pricing**
There are transfer pricing regulations in Malawi. There is also a tax anti-avoidance provision that is used to check transactions between related parties. If transactions between related parties result in profits that are lower than what would be expected if the company was trading with an independent party, then the tax authorities can challenge the transaction.

**Thin capitalisation**
There are no thin capitalisation rules in Malawi.

There are no restrictions on the level of external borrowings. If a Malawi company wants to borrow money from a foreign entity (whether or not a bank), it will require exchange control approval. In such instances, Reserve Bank does not consider the debt-to-equity ratio. It looks at the terms and conditions to see that they are what would be commonly available on the open market between unrelated parties. As you can see, this is an anti-transfer pricing measure.

If a new application is made for exchange control approval of foreign ownership (normally this is when there is a new business/investment into Malawi), Reserve Bank will look at the external debt to local equity ratio. There are no fixed rules, but Reserve Bank does not normally like external debt to be more than twice equity (i.e. 1:2 equity to external debt). It does give approval for external ownership where the proportion of external debt is higher than this as it looks at each proposal on its own merit. The applicant would have to justify the higher level of external debt in such a case.

**Controlled foreign companies (CFCs)**
There is no CFC regime in Malawi.

**Tax credits and incentives**

**Export allowances**
Exporters, including those manufacturing in bond, are entitled to claim additional tax allowances for non-traditional exports:
Malawi

• On the export of non-traditional products, there is a 25% tax allowance on taxable income derived from exports.
• There is a 25% transport tax allowance on international transport costs for non-traditional exports. Traditional exports are tea, coffee, cane sugar, and unmanufactured tobacco and tobacco refuse.

Export allowances may not be claimed in respect of exports from mining operations.

**Investment allowance**
There is a 100% investment allowance on new and unused industrial buildings, plant, and machinery for taxpayers in the manufacturing industry. A 40% investment allowance for used versions of the same items is also applicable.

**Farming operations**
Farming operations receive a 100% allowance with respect to expenditures incurred during any year of assessment on the following:

• Stumping, leveling, and clearing of land.
• Work in connection with the prevention of soil erosion.
• Boreholes.
• Wells.
• Aerial and geophysical surveys.
• Water control work, including any canal, channel, dyke, furrow, and any flood control structure, whether or not of a permanent nature.
• Water conservation work, meaning any reservoir, water dam, or embankment constructed for the impounding of water. In the case of water conservation work, the Taxation Act limits the amount deductible to amounts actually paid, where the farmer incurs a liability in terms of any law relating to natural resources.

Where a farmer derives taxable income from growing timber, the farmer may elect that the taxable income is determined in accordance with the following rules:

• Carryforward the cost of planting the timber until the timber reaches maturity.
• Add annually to the cost of planting the timber an amount calculated as 5% of the cost of planting the timber until the timber reaches maturity.
• When the timber is sold, a proportionate amount of the total of the carryforward cost and annual added cost is deducted from the proceeds.
• In each year of assessment, the annual added cost is treated as taxable income in the hands of the farmer.

A farmer may not deduct any expenditure that has been recovered through a subsidy or claim a capital allowance on any assets where the expenditure has been recovered through a subsidy.

**Mining operations**
Mining operations receive a 100% allowance with respect to mining expenditures incurred during any year of assessment. Mining expenditures are defined as capital expenditures incurred in Malawi by a person carrying on or about to carry on mining operations in Malawi:

• In searching for or in discovering and testing or in winning access to deposits of minerals.
• In the acquisition of or of rights in or over such deposits, other than the acquisition from a person who has carried on mining operations in relation to such deposits.
Malawi

- In the provision of plant and machinery and industrial buildings that would have little or no value to such person if the mine ceased to work.
- On the construction of any buildings or works that would have little or no value if the mine ceased to be worked.
- On development, general administration, and management prior to the commencement of mining operations.

Persons engaged in mining operations are not entitled to claim the export tax allowance on non-traditional exports or the 15% transport tax allowance on international transport costs for non-traditional exports.

**Withholding taxes**

**Dividend WHT**
Dividend WHT is a final tax and is charged at 10%. The dividend is not included in the taxpayer’s taxable income, and the WHT is not deducted from the taxpayer’s tax liability.

**WHT rates**

<table>

</table>
WHT exemption
There is WHT exemption for compliant taxpayers. A 'compliant taxpayer' is defined as one that has settled all their tax liabilities with the tax authorities, including customs and excise.

Tax administration

Taxable period
The taxable period for income tax is a 12-month period ending on 30 June of each year. For businesses whose year-end is 31 July and 31 August, the applicable tax year-end is the preceding 30 June, while all the years ending in the subsequent months have the following 30 June as a year-end.

Tax returns
Income tax returns are due within 180 days after the end of the financial year.

Payment of tax
Tax is payable in quarterly instalments within 25 days of the month following the end of the quarter, with the balance of the tax being paid upon submission of the return.

Penalties
A penalty for late submission of returns is MWK 200,000.

Tax audit process
The target for the tax authorities is to audit 30% of the taxpayers in any fiscal year. This translates to approximately three years per audit cycle.

Statute of limitations
There is no statute of limitations in Malawi, except for the mandatory seven-year period for keeping records.

Topics of focus for tax authorities
The tax authorities have recently focussed on transfer pricing and have consequently established a unit responsible for this. All multinationals are under scrutiny to check if they are dealing at arm’s length with related entities.

Commissioner General’s power to increase taxable income
The Commissioner General is empowered to increase the taxable income and liability of a taxpayer when of the opinion that the main purpose or one of the main purposes of a transaction was the avoidance or reduction of tax or where the main benefit that might have been expected to accrue from a transaction was the avoidance or reduction of tax.

Significant developments
Recent laws were enacted to provide for incentives mainly for petroleum operations in the marginal fields, which includes reducing the effective petroleum income tax rate to 25%. Please refer to the Taxes on corporate income section and the Tax credits and incentives section for details.

In addition, the Real Property Gains Tax (RPGT) rates have again been revised for real property disposals from 1 January 2013. Please refer to the Other taxes section for details.

Taxes on corporate income
For both resident and non-resident companies, corporate income tax (CIT) is imposed on income accruing in or derived from Malaysia. The current CIT rates are provided in the following table:

<table>
<thead>
<tr>
<th>Type of company</th>
<th>Chargeable income (MYR*)</th>

* Malaysian ringgit

Petroleum income tax
Petroleum income tax is imposed at the rate of 38% on income from petroleum operations in Malaysia. On 29 March 2013, a law was enacted to provide an effective petroleum income tax rate of 25% on income from petroleum operations in marginal fields with effect from 30 November 2010. No other taxes are imposed on income from petroleum operations.

Local income taxes
There are no other local, state, or provincial government taxes on income in Malaysia.
Corporate residence

A company is tax resident in Malaysia in a basis year (normally the financial year) if, at any time during the basis year, the management and control of its affairs are exercised in Malaysia. Generally, a company is regarded as resident in Malaysia if at any time during the basis period for a year of assessment, at least one meeting of the Board of Directors is held in Malaysia concerning the management and control of the company.

Permanent establishment (PE)

Generally, a non-resident entity is regarded as having a PE in Malaysia if it has a fixed place of business in Malaysia, where the business of the entity is wholly or partly carried on. A non-resident company may also be deemed to have a PE in Malaysia under certain circumstances, such as the following:

- It is represented by a dependent agent in Malaysia who has the authority to conclude contracts on its behalf and who has repeatedly exercised that authority.
- It carries on supervisory activities in Malaysia for six/nine months in connection with a construction, installation, or assembly project.

Other taxes

Sales tax

A single-stage ad valorem tax (sales tax), at rates ranging from 5% to 10%, is imposed on all goods imported into or manufactured in Malaysia, unless specifically exempted.

Service tax

Service tax is imposed at the rate of 6% on the value of taxable services sold or provided by taxable persons. A list of ‘taxable services’ and ‘taxable persons’ is found in the Service Tax Regulations 1975.

Goods and services tax (GST)

A GST of 4% was originally expected to be implemented in mid 2011, but its implementation is now delayed indefinitely. The reason reported for the delay is to allow the government more time to engage with the public in order to gather feedback on the implementation of the GST. When implemented, GST will replace the current sales tax and service tax.

Import duties

Import duties are levied on goods that are subject to import duties and imported into the country. Import duties are generally levied on an ad valorem basis but may also be imposed on a specific basis. The ad valorem rates of import duties range from 2% to 60%. Raw materials, machinery, essential foodstuffs, and pharmaceutical products are generally non-dutiable or subject to duties at lower rates.

Excise duties

Excise duties are imposed on a selected range of goods manufactured and imported into Malaysia. Goods that are subject to excise duty include beer/stout, cider and perry, rice wine, mead, un-denatured ethyl alcohol, brandy, whisky, rum and tafia, gin, cigarettes containing tobacco, motor vehicles, motorcycles, playing cards, and mahjong tiles.

The rate of excise duties vary from a composite rate of MYR 0.1 per litre and 15% of the value for certain types of spirituous beverages, to as much as 105% of the value of motorcars (depending on engine capacity).
Malaysia

**Property tax**
Property tax is levied on the gross annual value of property as determined by the local state authorities.

**Real property gains tax (RPGT)**
RPGT is charged upon gains from disposals of real property, which is defined as:

- any land situated in Malaysia, as well as any interest, option, or other right in or over such land, or
- shares in a real-property company (RPC), which is a controlled company holding real property or shares in another RPC or a combination of both, where the total defined value is not less than 75% of its total tangible assets.

Effective for disposals from 1 January 2013, RPGT is imposed as follows:

<table>
<thead>
<tr>
<th>Holding period from date of acquisition</th>
<th>RPGT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to two years</td>
<td>15</td>
</tr>
<tr>
<td>Exceeding two years and up to five years</td>
<td>10</td>
</tr>
<tr>
<td>Exceeding five years</td>
<td>0</td>
</tr>
</tbody>
</table>

**Stamp duty**
Malaysia imposes stamp duty, which is payable by the buyer/transferee, on chargeable instruments. Some examples are provided as follows:

<table>
<thead>
<tr>
<th>Transaction type</th>
<th>Value chargeable</th>
<th>Stamp duty rate (%)</th>
</tr>
</thead>
<tbody>

<td>Consideration paid or market value, whichever is higher</td>
<td>0.3</td>
</tr>
<tr>
<td>Service/loan agreements</td>
<td>Value of services/loans</td>
<td>0.5</td>
</tr>
</tbody>
</table>

**Windfall profit levy**
A levy is imposed on crude palm oil and crude palm kernel oil at a maximum of MYR 50 per ton where the price exceeds MYR 2,500 per ton in Peninsula Malaysia, and MYR 3,000 per ton in the states of Sabah and Sarawak.

**Contract levy**
A levy of 0.125% on contract works having a contract sum above MYR 500,000 is imposed on every registered contractor by the Construction Industry Development Board.

**Human resource development levy**
Employers engaged in the manufacturing and services sectors that employ more than a specified number of employees must contribute to the Human Resource Development Fund (HRDF). The levy required to be paid is at the rate of 1% of the employees' monthly wages on a monthly basis.
Branch income

Tax rates on branch profits of a company are the same as CIT rates. No tax is withheld on transfer of profits to a foreign head office.

Income determination

Inventory valuation

Inventories are generally stated at lower of cost or net realisable value. Cost may be determined using one of several methods (e.g. unit cost, average cost, or first in first out [FIFO]), as long as the basis used is consistent for each year.

Capital gains

Generally, gains on capital assets are not subject to tax, except for gains arising from the disposal of real property situated in Malaysia, which is subject to RPGT (see the Other taxes section for more information).

Dividend income

A single-tier system of taxation came into force on 1 January 2008, replacing the previous dividend imputation system. There is a six-year transitional period (until 31 December 2013) for all companies to migrate into the single-tier system.

Under the dividend imputation system, dividends received from Malaysian companies are taxed at gross value in the hands of shareholders, whether corporate or individuals. Companies distributing dividends are required to deduct tax at source at the prevailing corporate tax rate, from gross dividends payable, but the income tax deducted or deemed deducted is available as a credit against the income tax liability of the shareholder. If a dividend is paid by a company that is subject to the reduced CIT rate of 20%, tax is deducted or deemed deducted from the dividend at the normal 25% CIT rate.

Under the single-tier tax system, dividends are exempt in the hands of shareholders. Companies are not required to deduct tax from dividends paid to shareholders, and no tax credits will be available for offset against the recipient’s tax liability. Corporate shareholders receiving exempt single-tier dividends can, in turn, distribute such dividends to their own shareholders, who are also exempt on such receipts.

Stock dividends

A Malaysian corporation may distribute bonus shares tax-free to shareholders.

Interest income

Interest income accruing in or derived from Malaysia or received in Malaysia from outside Malaysia is subject to CIT. However, exemption is provided on interest income received in Malaysia from outside Malaysia. Other exemptions granted include interest income earned by a non-resident person from deposits placed in designated financial institutions in Malaysia.

Foreign income

Under the Income Tax Act 1967, a Malaysian tax-resident company and a unit trust are not taxed on their foreign-sourced income, regardless of whether such income is received in Malaysia. However, income of a resident company from the business of air/sea transport, banking, or insurance is assessable on a worldwide basis.
Taxation on a worldwide basis does not apply when income attributable to a Labuan business activity of a Labuan branch or subsidiary of a Malaysian bank is subject to tax under the Labuan Business Activity Tax Act 1990. This exception will not apply if the Labuan entity has made an irrevocable election to be taxed under the Income Tax Act 1967 in respect of its Labuan business activity.

In respect of Malaysian-owned banks, insurance companies, and takaful (Islamic insurance) companies, the profits of newly established branches abroad or remittances from new subsidiaries abroad are tax exempt for five years, provided that the applications to establish branches or subsidiaries abroad are received by the Central Bank of Malaysia no later than 31 December 2015.

Relief from double taxation is available by means of a bilateral credit if there is a governing tax treaty or unilateral relief where there is no treaty. The relief is restricted to the lower of Malaysian tax payable or foreign tax paid if there is a treaty, or one-half of the foreign tax paid if there is no treaty.

Undistributed income of foreign subsidiaries is not taxable.

## Deductions

### Capital allowance

Capital allowance (tax depreciation) on industrial buildings, plant, and machinery is available at prescribed rates for all types of businesses. Initial allowance is granted in the year the expenditure is incurred and the asset is in use for the purpose of the business. Annual allowance at the prescribed rates calculated on cost is given for every year during which the asset is in use at the end of the basis year for the purposes of the business. The following are examples of capital allowance rates currently available:

<table>
<thead>
<tr>
<th>Qualifying asset</th>
<th>Initial allowance (%)</th>
<th>Annual allowance (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial building, whether constructed or purchased</td>
<td>10</td>
<td>3</td>
</tr>
<tr>
<td>Heavy machinery</td>
<td>20</td>
<td>20</td>
</tr>
<tr>

<td>20</td>
<td>10</td>
</tr>
<tr>
<td>Office equipment</td>
<td>20</td>
<td>10</td>
</tr>
<tr>
<td>Motor vehicles*</td>
<td>20</td>
<td>20*</td>
</tr>
</tbody>
</table>

* Restrictions apply on maximum qualifying capital expenditure.

Accelerated capital allowance is available for certain types of industrial building, plant, and machinery, some of which includes buildings used as a warehouse, buildings used as a school or an educational institution, computers, information technology equipment, environmental protection equipment, waste recycling equipment, and plant and machinery used in specific industries.

### Goodwill

Cost of acquisition of goodwill/amortisation of goodwill is not deductible, as these expenses are capital in nature.
Start-up expenses
In general, start-up expenses incurred before the commencement of a trade, profession, or business are capital in nature, as they were expended to put the person in a position to earn income. However, there are specific deductions allowed, such as incorporation expenses and recruitment expenses (conditions apply).

Interest expenses
Interest expense is allowed as a deduction if the expense was incurred on any money borrowed and employed in the production of gross income or laid out on assets used or held for the production of gross income. Where a borrowing is partly used to finance non-business operations, the proportion of interest expense will be allowed against the non-business income.

Bad debt
Debts must be specifically identified and reasonably estimated to be irrecoverable to qualify for a tax deduction.

Donations to charitable institutions
A deduction is allowed for cash donations to approved institutions (defined) made in the basis period for a year of assessment. The deduction is limited to 10% of the aggregate income of that company for a year of assessment.

Fines and penalties
Fines and penalties are generally not deductible.

Taxes
Taxes on income are generally not deductible, whereas indirect taxes, such as sales tax and service tax, are deductible.

Net operating losses
The carryforward of business losses and capital allowances is not available for deduction in subsequent years of assessment if the company does not meet the conditions of a shareholders’ continuity test. However, per policy issued by the Ministry of Finance, these conditions currently apply only to dormant companies. Carryforward of business losses and capital allowances is unlimited in time for non-dormant companies.

Current-year business losses may be utilised against all sources of income. Utilisation of carried-forward losses is restricted to income from business sources only. Utilisation of capital allowance is also restricted to income from the same underlying business source.

Currently, there are no provisions to carry back losses to prior years of assessment.

Payments to foreign affiliates
A Malaysian company can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided that these are made at arm’s length and the relevant withholding taxes (WHTs), where applicable, have been paid.

Group taxation
A company that qualifies for group relief may surrender a maximum of 70% of its adjusted loss for a year of assessment to one or more related companies if the following conditions are met by both the claimant and surrendering companies:
Malaysia

- Both must be resident and incorporated in Malaysia.
- Each has paid-up capital of ordinary shares exceeding MYR 2.5 million at the beginning of the basis period.
- Both have the same (12-month) accounting period.
- They are ‘related’ throughout the basis period for a particular year of assessment as well as the 12 months preceding that basis period.
- Both are not currently enjoying specific stipulated incentives, such as pioneer status, investment tax allowance, reinvestment allowance, etc.

‘Related company’ is defined by the Income Tax Act 1967 and involves the application of a two-tier test. The companies are regarded as ‘related’ if:

- either company owns at least 70% of the ordinary share capital of the other company or a third company owns at least 70% of each of the companies, and
- the holders of ordinary shares are entitled to at least 70% of the distributable profits and assets of the company on winding up.

Companies that wish to avail themselves of group relief must make an irrevocable election to surrender or claim the tax loss in the return to be filed with the Inland Revenue Board for that year of assessment.

**Transfer pricing**

The Director General of Inland Revenue (DGIR) is empowered to make adjustments on transactions of goods and services if the DGIR is of the opinion that the transactions were not entered into on an arm’s-length basis.

To complement the above, two new rules were gazetted on 11 May 2012, and both are deemed to have come into operation on 1 January 2009. The transfer pricing rules that apply to controlled transactions (defined, including financial assistance) specify the methods to determine the arm’s-length price and the circumstances under which the DGIR may re-characterise transactions. The advance pricing arrangement rules that apply only to cross-border transactions outline the application procedures for unilateral, bilateral, or multilateral advance pricing arrangements. The DGIR also issued the revised Transfer Pricing Guidelines 2012 and new Advance Pricing Arrangement Guidelines 2012 on 20 July 2012.

**Thin capitalisation**

Effective as of 1 January 2009, a provision for thin capitalisation was introduced under which the portion of the interest charge that relates to the amount of financial assistance that is excessive is disallowed as a deduction. However, the implementation of specific rules relating to this provision has been further deferred to 31 December 2015.

**Tax credits and incentives**

Malaysia has a wide variety for incentives covering the major industry sectors. Tax incentives can be granted through income exemption or by way of allowances. Generally, when income is exempted, any dividends paid out of such exempt income are not taxable in the hands of the shareholders. Where incentives are given by way of allowances, any unutilised allowances generally may be carried forward indefinitely to be utilised against future statutory income. The following are the major types of incentives available in Malaysia.
Pioneer status (PS) and Investment tax allowance (ITA)

Companies in the manufacturing, agricultural, hotel, and tourism sectors, or any other industrial or commercial sector, that participate in a promoted activity or produce a promoted product may be eligible for either PS or ITA.

PS is given by way of exemption from CIT on 70% of the statutory income for five years and the remaining 30% is taxed at the prevailing CIT rate. ITA is granted on 60% qualifying capital expenditure incurred for a period of five years to be utilised against 70% of the statutory income, while the balance 30% is taxed at the prevailing CIT rate.

A company that intends to undertake reinvestment before expiration of its PS or ITA status may opt for reinvestment allowance, provided it surrenders its PS or ITA status.

The PS and ITA incentives are enhanced for the following types of projects:

<table>

2. Statutory income.
3. Qualifying capital expenditure.
Malaysia

**Special incentive schemes**

**Reinvestment allowance**
A resident company in operation for not less than 36 months that incurs capital expenditure to expand, modernise, automate, or diversify its existing manufacturing business or approved agricultural project is entitled to reinvestment allowance as follows:

- An allowance of 60% of QCE incurred to be utilised against 70% of statutory income. The remaining 30% is taxed as the prevailing CIT rate.
- The 70% restriction does not apply to projects that achieved the level of productivity as prescribed by the Minister of Finance.
- The allowance is given for 15 years from the first year of claim and will be withdrawn if the asset for which the allowance is granted is disposed of within five years.

**Approved service projects**
A resident company undertaking a project approved by the Minister of Finance in the transportation, communications, utilities, and services subsectors may enjoy the following incentives:

- Investment allowance of 60% of QCE incurred within five years to be utilised against 70% statutory income.
- Alternatively, income tax exemption of 70% of statutory income for a period of five years.
- Buildings used solely for the purposes of such projects qualify for an industrial building allowance.

**Export incentives**
A resident company engaged in manufacturing or agriculture that exports manufactured products, agricultural produce, or services is entitled to allowances between 10% and 100% of increased exports (subject to satisfying prescribed conditions), which is deductible at up to 70% of statutory income.

**Regional operations**

**Operational headquarters company (OHQ)**
A Malaysian incorporated company that provides qualifying services to its offices and related companies, within or outside Malaysia, may enjoy CIT exemption for a period of ten years. Income exempted includes business income, interest, royalties, and income from services (not exceeding 20% of total income of qualifying services) provided to related companies in Malaysia.

Expatriates working in an OHQ are taxed only on the portion of chargeable income attributable to the number of days they are in Malaysia. An OHQ is also granted special facilities (subject to minimal conditions), including:

- Approvals for expatriate posts.
- Ability to obtain credit facilities in foreign currency from licensed banks in Malaysia, without approval of the Central Bank of Malaysia.
- Ability to invest freely in foreign securities and lend to related companies outside Malaysia.
- Ability to open foreign currency accounts with licensed banks in Malaysia or banks in Labuan.
International procurement centre (IPC) and Regional distribution centre (RDC)
An IPC engaged in the procurement and sale of raw materials, components, and finished products to its related or unrelated companies within or outside Malaysia may, subject to conditions, enjoy income tax exemption for ten years on income from qualifying activities in respect of export sales.

An RDC operates similarly to an IPC, except an RDC is only allowed to deal with its own brand of goods. The RDC enjoys the same incentives as an IPC.

Other available non-fiscal incentives available to IPC/RDC include:

- Approval for expatriate posts.
- One or more foreign currency accounts for the retention of export proceeds with any licensed commercial bank, without any limit on account balances.
- Ability to enter into foreign exchange forward contracts with a licensed commercial bank to sell forward export proceeds based on projected export.
- Exemption from foreign equity ownership restrictions.

International trading company
International trading companies are exempt for five years on income equivalent to 20% of increased export value, up to a maximum of 70% of statutory income. To qualify for the incentive, the company must meet the following three conditions:

- Be incorporated in Malaysia, with 60% Malaysian ownership.
- Achieve minimum annual sales of MYR 10 million, not more than 20% of which may be derived from the trading of commodities.
- Use local services (banking, finance, and insurance) and infrastructure (local ports and airports) in its operations.

Financial services sector

Islamic securities
Tax deduction is allowed for expenses incurred in the issuance of Islamic securities, including Islamic Securities based on the Wakalah principle, approved by the Securities Commission or the Labuan Financial Services Authority, until year of assessment 2015 only.

Islamic banking and takaful business
Effective from year of assessment 2007 until year of assessment 2016, full income tax exemption for ten years is granted to:

- Islamic banks licensed under the Islamic Banking Act 1983, on income from Islamic banking business conducted in international currencies.
- Takaful (Islamic insurance) companies licensed under the Takaful Act 1984, on income from takaful business conducted in international currencies.

Islamic fund management
Full income tax exemption is available on statutory income on management fees received by resident fund management companies for managing funds of foreign and local investors established under Syariah principles (until year of assessment 2016). Such funds must be approved by the Securities Commission.
Malaysia

Special purpose vehicle (SPV) for Islamic financing
An SPV established solely for the purpose of issuance of Islamic securities under the Syariah principles (approved by the Securities Commission or established under the Labuan Companies Act 1990) is not subject to income tax and is not required to comply with administrative procedures under the income tax law. The company that establishes the approved SPV is deemed to be the recipient of the SPV’s income and will be taxed accordingly, but that company will be allowed a deduction for the cost of issuance of Islamic securities.

Islamic stock broking company
Establishment expenditure incurred prior to the commencement of an Islamic stock-brokering company is allowed as a deduction, provided the company commences business within two years from the date of approval. Applications must be received by the Securities Commission before 31 December 2015.

Agro-sukuk, retail sukuk, and retail bonds
A company that issues agro-sukuk, retail sukuk, and retail bonds approved by the Securities Commission or the Labuan Financial Services Authority is eligible for double deduction on certain expenses and stamp duty exemption, subject to meeting certain conditions. This incentive is available until year of assessment 2015.

Treasury management centre (TMC)
A locally incorporated company providing centralised treasury management services to its group of related companies (within or outside the country) in Malaysia may enjoy the following incentives (for applications until 31 December 2016):

- Income tax exemption of 70% of statutory income from qualifying treasury services rendered to related companies for five years.
- WHT exemption on interest payments on overseas borrowings from overseas used for qualifying activities.
- Stamp duty exemption on loan and service agreements for qualifying activities.
- Expatriates working in the TMC are taxed only on the portion of their chargeable income attributable to the number of days they are in Malaysia.

Tun Razak Exchange (TRX) (formerly known as Kuala Lumpur International Financial District)
The TRX is a joint property development comprising office towers for finance and banking, residences, and retail spaces in Kuala Lumpur. To accelerate the development of the TRX, the following incentives have been given:

- Stamp duty exemption on loan and service agreements for TRX Marquee status companies.
- Industrial building allowance and accelerated capital allowance for TRX Marquee status companies.
- Income tax exemption of 70% of statutory income for five years for property developers in TRX.
- Additional 50% tax deduction of rental payment incurred by TRX Marquee status companies for buildings used for business in TRX.
- Deduction of relocation cost incurred by TRX Marquee status companies to relocate to TRX.

It is also proposed that a full ten-year income tax exemption be given for TRX Marquee status companies.
Business Trust (BT)
BT is established under the Capital Market and Services Act 2007 and is a hybrid structure that combines elements of a company with elements of a unit trust. The BT is given income tax treatment similar to that of a company. The following incentives are given on a one-off basis at the initial stage of establishment of the BT:

- Stamp duty exemption on instruments of transfer of businesses, assets, or real properties acquired for instruments executed from 1 January 2013 but not later than 31 December 2017.
- The disposer of real properties or shares in RPCs to BT is given RPGT exemption for disposal of real properties or shares in RPCs from 1 January 2013 but not later than 31 December 2017.

Real estate investment trusts (REIT)/Property trust fund (PTF)
REIT/PTFs are vehicles that mobilise funds from unit holders comprising individuals and companies for investments in the property sector and related assets. REIT/PTFs are exempted from tax on all income, provided that at least 90% of their total income is distributed to unit holders. If the 90% distribution condition is not complied with, all income will be taxed at the prevailing income tax rate at the REIT/PTF level and tax credit will be claimed by the unit holders on distributions received from the REIT/PTF.

Unit holders are taxed as follows:

<table>
<thead>
<tr>
<th>Unit holders</th>
<th>WHT rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Individuals (whether resident or non-resident), body of persons, or other unincorporated persons</td>
<td>10% (until 31 December 2016)</td>
</tr>
<tr>
<td>Non-resident company</td>
<td>25%</td>
</tr>
<tr>
<td>Resident company</td>
<td>None (income to be included in annual tax return)</td>
</tr>
<tr>
<td>Institutional investor (pension fund, collective investment scheme, or other person approved by the Minister of Finance)</td>
<td>10% (until 31 December 2016)</td>
</tr>
</tbody>
</table>

Other incentives available are:

- Real property gains tax and stamp duty exemptions on disposal/transfer of real property to an REIT/PTF.
- Tax deduction given for consultancy, legal, and valuation service fees incurred on the establishment of an REIT.

Foreign fund management company
A foreign fund management company providing fund management services to foreign clients is taxed at a concessionary rate of 10% in respect of income derived from the management of foreign funds, while income arising from services rendered to clients in Malaysia is taxed at the prevailing CIT rate.

A foreign fund management company is a Malaysian incorporated company licensed under the Capital Markets and Services Act 2007. Its activities are regulated by the Securities Commission.

Export of financial services
Income tax exemption on statutory income for a period of five years is granted to Malaysian banks, insurance companies, and takaful companies on profits of newly established branches overseas or income remitted by new overseas subsidiaries.
Applications to establish new branches or subsidiaries overseas should be received by the Central Bank of Malaysia not later than 31 December 2015.

**Venture capital company (VCC)**
A VCC investing in a venture company (VC), which is not the VCC’s related company at the point of first investment, will be given a deduction on the value of investment made in a VC. Where the deduction is not claimed, the VCC is eligible for the following income tax exemption on income from all sources, other than interest income from savings or fixed deposits, and profits from Syariah-based deposits:

<table>
<thead>
<tr>
<th>Conditions</th>
<th>Exemption period</th>
</tr>
</thead>
<tbody>
<tr>
<td>• At least 70% of invested funds is invested in VC, or</td>
<td>10 years</td>
</tr>
<tr>
<td>• At least 50% of invested funds is invested in VC in the form of seed capital.</td>
<td></td>
</tr>
<tr>
<td>• At least 30% of invested funds is invested in VC in the form of seed capital, start-up, or early stage financing, and</td>
<td>5 years</td>
</tr>
<tr>
<td>• Applications received by Securities Commission until 31 December 2013</td>
<td></td>
</tr>
</tbody>
</table>

**Petroleum sector**
Recent laws were enacted, with effect from 30 November 2010, to provide the following incentives for petroleum operations:

- Accelerated capital allowance on qualifying capital expenditure incurred from year of assessment 2010 to 2024 for petroleum operations in marginal fields.
- Investment allowance of 60% of qualifying capital expenditure to be utilised against 70% statutory income for a period of ten years.
- Exemption for a portion of chargeable income from marginal fields resulting in a reduction of the effective tax rate from 38% to 25% for petroleum operations in marginal fields.

**Special economic regions**
The following special economic regions were launched as part of the Malaysian government’s plan for regional growth and development:

<table>
<thead>
<tr>
<th>Economic region</th>
<th>Location</th>
<th>Year of launch</th>
</tr>
</thead>
<tbody>
<tr>
<td>Iskandar Malaysia (formerly known as Iskandar Development Region [IDR]) <a href="http://www.iskandarmalaysia.com.my">www.iskandarmalaysia.com.my</a></td>
<td>Southern Johor</td>
<td>2006</td>
</tr>
<tr>
<td>East Coast Economic Region <a href="http://www.ecerd.com">www.ecerd.com</a></td>
<td>States of Kelantan, Terengganu, Pahang, and district of Mersing in Johor</td>
<td>2007</td>
</tr>
<tr>
<td>Sabah Development Corridor <a href="http://www.sedia.com.my">www.sedia.com.my</a></td>
<td>Western, central, and eastern regions of Sabah</td>
<td>2008</td>
</tr>
</tbody>
</table>

Special incentives, on top of the existing incentives given by the Malaysian government, will be customised for the purpose of each economic region. At present, special legislation has been enacted only in respect of Iskandar Malaysia (IM) to grant the following exemptions/incentives:
Entity | Incentive
--- | ---
IDR status company | 10 years income tax exemption on statutory income from the provision of qualifying services to a person situated within designated nodes in the IDR or outside Malaysia. Operations to commence before 31 December 2015.
Developer | Income tax exemption on statutory income from the disposal of rights over land in designated nodes (until year of assessment 2015).
 | Income tax exemption on rental or disposal of buildings in designated nodes (until year of assessment 2020).
Development manager | Income tax exemption on statutory income from the provision of management, supervisory, and marketing services to an approved developer (until year of assessment 2020).
Non-resident service provider | Income tax and WHT exemptions on income from technical fees, interest, or royalties received from approved developers in IDR designated nodes or IDR status companies.
Individuals working in IDR | A qualified knowledge worker is taxed at the rate of 15% on chargeable income from employment with a designated company engaged in a qualified activity (e.g. green technology, educational services, healthcare services, creative industries, financial advisory and consulting services, logistics services, tourism) in that specified region. Employment must commence between 24 October 2009 and 31 December 2015.

**Information and communication technology**

**MSC Malaysia**

MSC Malaysia is Malaysia’s initiative for the global information technology (IT) industry and is designed to be the research and development (R&D) centre for industries based on IT. It is an information communication technology hub equipped with high-capacity global telecommunications and logistics networks. MSC Malaysia is also supported by secure cyber laws, strategic policies, and a range of financial and non-financial incentives for investors. It is managed by the Multimedia Development Corporation (MDeC), a ‘one-stop shop’ that acts as the approving authority for companies applying for MSC Malaysia status.

MSC Malaysia status is awarded to both local and foreign companies that develop or use multimedia technologies to produce or enhance their products and services as well as for process development. MSC Malaysia companies are eligible for incentives, which include the following:

- PS (five + extendable by five years) of 100% on statutory income or ITA of 100% for five years for a new company or existing company on its additional income.
- Eligibility for R&D grants (for majority Malaysian-owned MSC Malaysia company).
- Exemption from indirect taxes on multimedia equipment.
- Unrestricted employment of local and foreign knowledge workers.
- Freedom to source funds globally for investments.
- Protection of intellectual property and cyber laws.
- No censorship of the internet.
- Globally competitive telecommunication tariffs and services guarantees, world-class physical and IT infrastructure, and excellent R&D facilities.

**Offshore trading through websites in Malaysia**

Income received by companies undertaking offshore trading (buying and selling of foreign goods to non-residents) via websites in Malaysia is taxed at a reduced rate of 10% for a period of five years. The approval of the Minister of Finance must be obtained.
Malaysia

**Green incentives**

**Green Building Index (GBI) certification**
A resident in Malaysia awarded a GBI certificate by the Board of Architects Malaysia from 24 October 2009 until 31 December 2014 is granted 100% allowance on qualifying expenditure incurred for the purpose of obtaining the GBI certificate, to be utilised against 100% of statutory income.

**Renewable energy source**
Companies engaged in generating energy from renewable sources (biomass, hydropower, or solar power) can enjoy the following incentives for applications received before 31 December 2015:

- Full income tax exemption on statutory income for ten years, or
- ITA of 100% QCE against 100% statutory income for five years.

**Energy conservation**
Companies undertaking contracting service activities to conserve usage of energy can enjoy the following incentives for applications received before 31 December 2015:

- Full income tax exemption on statutory income for ten years, or
- ITA of 100% QCE against 100% statutory income for five years.

**Biotechnology industry**
Companies undertaking biotechnology activity with approved bionexus status from Malaysian Biotechnology Corporation Sdn Bhd will be eligible for the following incentives:

- Full income tax exemption on statutory income for ten years from the first year in which the company derives statutory income or ITA of 100% on QCE incurred for a period of five years.
- Concessionary tax rate of 20% on statutory income from qualifying activities for ten years upon expiry of the tax exempt period.
- Accelerated industrial building allowance (over ten years) for buildings used solely purpose of its new business or expansion project.
- Exemption of import duty and sales tax on import of raw materials and machinery.

**Research and development (R&D)**

**Contract R&D company**
Companies that provide R&D services to third parties are eligible for:

- full exemption of their statutory income for a period of five years (extendable by five years), or
- ITA of 100% of QCE incurred within a period of ten (extendable by ten years) to be utilised against 70% of statutory income.

**R&D company**
The ITA incentive is also available to companies undertaking R&D services for their group and third parties.
In-house R&D
Companies undertaking in-house R&D projects are eligible for ITA at the rate of 50% of QCE incurred within a period of ten years.

Commercialisation of resource-based R&D findings
A company that invests for the sole purpose of financing a project on commercialisation of resource-based and non-resource based (for applications until 31 December 2017) R&D findings (which is wholly owned by a public research institute or public institute of higher learning in Malaysia) is given a deduction equivalent to the value of that investment.

The subsidiary undertaking the commercialisation of R&D findings is granted 100% tax exemption on statutory income for ten years.

Other incentives

Shipping
A tax-resident person (including a partnership) carrying on shipping business using Malaysian ships is exempt from tax on income. Effective from year of assessment 2014, this exemption is reduced from 100% to 70% of statutory income and determined on a per ship basis. The balance of 30% of statutory income is deemed to be total income chargeable to tax.

Healthcare service providers
A healthcare service provider providing healthcare services to foreign clients (foreign companies, partnership, and citizens) is given income tax exemption equivalent to 100% of the value of increased services to be utilised against 70% of statutory income (until year of assessment 2014).

Healthcare facilities
Qualifying private healthcare facilities are eligible for 100% tax exemption on statutory income for five years in respect of the construction of hospitals and expansion and refurbishment of existing ones (for applications until 31 December 2014).

Profit oriented private schools and international schools
The following incentives are given to profit oriented private schools and international schools (for application received by 31 December 2015):

- 70% income tax exemption for a period of five years, or
- ITA of 100% on qualifying capital expenditure incurred within five years to be offset against 70% of statutory income.

Foreign tax credit
See Foreign income in the Income determination section for a discussion of the foreign tax credit regime.

Withholding taxes
Corporations making payments of the following types of income are required to withhold tax at the rates shown in the table below. See Note 5 for other sources of income subject to WHT.

### Notes

* Treaties pending ratification

Restricted tax treaties dealing with taxation of specific transport operations in international traffic have also been signed with Argentina and the United States.

1. **Dividends:**
   - Malaysia has no WHT on dividends in addition to tax on the profits out of which the dividends are declared. Some treaties provide for a maximum WHT on dividends should Malaysia impose such a WHT in the future.

2. **Interest:**
   - Interest on loans given to or guaranteed by the Malaysian government is exempt from tax.
Malaysia

- Interest paid to a non-resident by a commercial or merchant bank operating in Malaysia is also exempt from tax.

3. Royalty:
   a. Approved royalty payments under certain treaty provisions are exempt from WHT.
   b. Royalty income received by non-resident franchisors under franchised education scheme programmes by the Ministry of Education is exempted from tax.
   c. Royalty does not include payments in respect of the operation of oil or gas wells, or the extraction of mineral deposits or other natural resources.
   d. Royalty does not include amount paid in respect of motion picture films or of tapes for radio or television broadcasting.
   e. Royalty does not include natural resource royalties.
   f. Royalty does not include royalty paid in respect of (literary or artistic copyrights - Norway only) or of motion picture films or of tapes for television (or radio - Thailand only) broadcasting, or of the operation of a mine, oil well, quarry, or any other place of extraction of natural resources or of timber or other forest produce.

4. Special classes of income:
   • Contract payments to non-resident contractors in respect of services under a contract project are subject to a 13% deduction of tax (10% on account of the contractors' tax liability and 3% on account of their employees' tax liability). This deduction of tax at source does not represent a final tax, which is determined upon the filing of the tax return.
   • Payments made to non-residents in respect of the provision of technical services performed in Malaysia and rental of movable properties are subject to a 10% WHT (unless exempted under statutory provisions for purpose of granting incentives).

5. Other income:
   • WHT is also applied in respect of income of a non-resident from sources other than the following: Sources shown in the preceding table.
   • A business source.
   • An employment source.
   • The rate of WHT on such income is 10%. This is applicable on payments made to residents of all the treaty partners listed, except for certain countries (including Germany, Turkmenistan, Bosnia & Herzegovina, Senegal, and Jordan) where the respective tax treaties have provided for such type of income to be taxed only in the contracting state in which the recipient is resident.

---

**Tax administration**

**Taxable period**
Assessment of income is on a current-year basis. A company is taxed on income from all sources (whether business or non-business) arising in its financial year ending in the calendar year that coincides with that particular year of assessment. For example, a company that closes its accounts on 30 June of each year is taxed on income earned during the financial year ending on 30 June 2013 for year of assessment 2013.

**Tax returns**
Under the self-assessment system, companies are required to submit a return of income within seven months from the date of closing of accounts. Particulars required to be specified in the return include the amount of chargeable income and tax payable by the company. The tax return is deemed to be a notice of assessment and is deemed served on the company upon the date the tax return is submitted.

‘E-filing’ or online filing of tax returns via the Internet is available. E-filing is encouraged by the Inland Revenue Board.

**Payment of tax**
Tax payable under an assessment upon submission of a tax return is due and payable by the last day of the seventh month from the date of closing of accounts.

Companies are required to furnish estimates of their tax payable for a year of assessment no later than 30 days before the beginning of the basis period (normally the financial year). However, a newly established company with paid-up capital of MYR 2.5 million or less that meets with certain specified conditions is exempted from this requirement for two years, beginning from the year of assessment in which the
company commences operation. A revised estimate can be submitted in the sixth and ninth months of the basis period for a year of assessment.

Companies are then required to pay tax by monthly instalments (based on the estimates submitted) commencing from the second month of the company’s basis period.

A company commencing operations in a year of assessment is not required to furnish estimates of tax payable or to make instalment payments if the basis period for the year of assessment in which the company commences operations is less than six months.

**Tax audit process**
The tax authorities have issued a Tax Audit Framework that outlines the rights and responsibilities of audit officers, taxpayers, and tax agents in respect of a tax audit. A tax audit may cover a period of one to three years of assessment determined in accordance with the audit focus. The years of assessment to be covered in a tax audit may, however, be extended depending on the issues identified during an audit.

**Statute of limitations**
Additional assessments can be made within six years after the expiration of the relevant year of assessment. This time limit is not applicable where fraud, wilful default, or negligence has been committed.

**Topics of focus for tax authorities**
Some issues that the tax authorities have focused on recently include:

- Deductibility of certain expenses (e.g. entertainment, provisions, management service fees, allocated expenses from foreign related counterparts).
- The correctness of tax incentive claims.
Malta

**Significant developments**

During the course of 2012 and the first months of 2013, there have been a number of changes to Maltese tax law. Some of the more salient changes included:

- The Maltese participation exemption has been extended to cover branch profits. This exemption applies to income as well as gains attributable to a non-Maltese permanent establishment (PE) or branch situated outside Malta and to gains derived from the transfer of such a PE.
- The possibility of income tax consolidation has been introduced in Maltese tax law. Rules covering the precise terms and conditions of such tax consolidation are to be issued.
- An enabling provision has also been introduced in the Maltese Value-added Tax (VAT) Act to allow for the possibility of VAT grouping. Rules regulating such VAT grouping are to be issued.
- The tax exemption on artistic royalties protected by copyrights and royalties derived from qualifying patents on inventions has been extended to also cover royalties from trademarks.
- It is now possible to obtain a ruling from the Commissioner of Inland Revenue for the purposes of granting an exemption, both in terms of Maltese income tax and stamp duty, in respect of any transaction(s) carried out in the course of a merger or division. Such exemption is subject to the satisfaction of a number of statutory conditions.
- Maltese law has been amended to extend the possibility of having a single member company.
- A number of new double taxation treaties (DTTs) have been concluded by Malta, including those with Switzerland (previously Malta had a restricted treaty on international air and shipping traffic) and Saudi Arabia.

**Taxes on corporate income**

Companies are subject to income tax at a flat rate of 35%. There is no corporate tax structure separate from income tax.

A company incorporated in Malta is considered as both domiciled and resident in Malta and is consequently taxable on a worldwide basis. A non-Maltese incorporated company that is resident in Malta through management and control is subject to Maltese tax on income arising in Malta and on income received in/remitted to Malta.

**Petroleum profits tax**

Petroleum profits tax is levied as income tax with similar deductions being allowed in respect of incurred expenditure. In the case of a Production Sharing Contract signed
after 1 January 1996, any petroleum profits are taxed at the standard corporate tax rate of 35%. However, all other petroleum profits are subject to a 50% tax rate.

**Insurance profits tax**
Insurance profits tax is levied as income tax and subject to the normal standard tax rate of 35% as other corporate profits; however, the manner in which such profits are ascertained is subject to a number of detailed rules that take into account the special nature of the insurance industry. In the case of non-resident companies, the computation is applied with reference only to business carried on in or from Malta.

**Shipping profits tax**
A beneficial tonnage tax regime is applicable under Maltese law. Such regime covers profits from shipping activities as defined under the applicable regulations that are derived by qualifying Maltese-flagged and European Union (EU)/European Economic Area (EEA) vessels as well as non-EU/EEA vessels satisfying certain additional rules. Furthermore, qualifying ship management activities are also entitled to the benefits of the tonnage tax regime. Profits qualifying under the tonnage tax regime may also be distributed tax-free. The related company shares are exempt from the provisions of the Duty on Documents and Transfers Act (stamp duties).

**Corporate residence**
All companies incorporated in Malta are considered to be both domiciled and resident in Malta. Other bodies of persons (including companies incorporated overseas) are considered to be resident in Malta when the control and management of their business are exercised in the country.

**Permanent establishment (PE)**
Although Maltese tax legislation contains a number of references to the term 'permanent establishment', the term is not defined by Maltese legislation. Indeed, in terms of Maltese domestic tax law, a non-resident is, in principle, subject to Maltese tax on income arising in Malta, irrespective of the existence or otherwise of a PE in Malta (naturally subject to any DTT provisions that would apply if in conflict with Maltese tax law).

In the event the Maltese Revenue is required to interpret such a term, reference would typically be made to the definition contained in the Organisation for Economic Co-operation and Development (OECD) Model Convention.

**Other taxes**
**Value-added tax (VAT)**
Supplies of goods and services in Malta are subject to VAT at the standard rate of 18% (7% on accommodation in hotels and licensed premises; 5% on supply of electricity, the importation of works of art, collector's items and antiques, certain confectionery, medical accessories, printed matter, and items for exclusive use by the disabled). Exports to countries outside the European Union, food, and certain other goods and services are exempt from VAT and provide a right to credit of VAT remitted.
Malta

**Customs duties**
Goods imported from outside the European Union may be subject to customs duties. A Customs Code provides for customs procedures and concepts, which are based on European Community requirements.

**Excise duties**
Excise duties are chargeable on certain energy products, certain alcoholic drinks, certain manufactured tobacco products, and mobile telephony services.

**Property taxes**
Maltese tax legislation does not contain any wealth taxes or other similar taxes on property, save for the property transfers tax outlined below.

**Property transfer taxes**
Transfers of immovable property situated in Malta are generally subject to a final withholding tax (WHT) of 12%, which is, in most cases, charged on the transfer value of the property. The term ‘transfer’ is attributed a very wide definition and encompasses any alienation of property under any title. There are, however, a number of instances where the transfer of immovable property is taxed under the normal taxing provisions, i.e. mainly the gain (not the transfer value) being chargeable at the corporate tax rate.

A reduced rate of WHT of 10% applies with respect to a transfer of immovable property that has been restored, subject to the satisfaction of certain conditions.

**Stamp duty**
Stamp duty is charged on, among other transactions, transfers of immovable property (5% for both residents and non-residents) and marketable securities (2%; 5% in the case of transfers of shares in property companies). Furthermore, in the event that the market value of shares held by a person is reduced following a change in the company’s issued share capital or voting rights and the value shifts onto the other shareholders, the transferor would be deemed to have transferred the said value to the transferee(s) and such value shifting may be subject to a stamp duty liability (although certain exceptions/exemptions may apply).

Maltese legislation also provides for the possibility of a stamp duty exemption in a number of instances, subject to the satisfaction of certain conditions. Some of the more commonly availed of exemptions include the acquisition or disposal of marketable securities by or in the following: (i) licensed collective investment schemes; (ii) licensed persons providing management, administration, safekeeping or investment advice to collective investment schemes; (iii) companies being owned as to more than 50% by non-Maltese residents and satisfying certain other conditions; and (iv) a company that carries on or intends to carry on more than 90% of its business outside of Malta.

**Employer’s social security contributions**
Employers are obligated to pay social security contributions at the rate of 10% of the individual employee’s salary and at fixed rates of 40.32 euros (EUR) per week for annual salaries exceeding EUR 20,964, provided the employee is born on or after 1 January 1962 (note that the employee is also required to pay an equivalent weekly amount).
Branch income

The tax rate on branch income is the same as that for resident companies. Other than the tax charged on a branch’s income, no tax is withheld on transfers of profits to the head office.

Income determination

Inventory valuation

Inventory valuations are generally made at the lower of cost or market value. In general, the book and tax methods of inventory valuation will conform. However, the last in first out (LIFO) method is not accepted for taxation purposes. Obsolescence is accepted where proven, but there are no provisions to take into account the effects of monetary inflation on the inventory valuation.

Capital gains

Tax is chargeable on capital gains realised on the transfer of immovable property (real estate), shares and other securities, business goodwill, business permits, copyrights, patents, trade names, trademarks, interests in a partnership, and beneficial interests in a trust. In the case of transfers of immovable property, a final WHT of 12% on the transfer value applies. Note that there are certain cases where the 12% final WHT on the transfer value may not apply, and the transfers will be subject to the normal tax on capital gains regime with the chargeable profit being taxed at the taxpayer’s applicable rate(s).

Furthermore, similarly to the stamp duty situation set out above, in the event that the market value of shares held by a person is reduced following a change in the company’s issued share capital or voting rights and the value shifts onto the other shareholders, the transferor will be deemed to have transferred the said value to the transferee(s) and such value shifting may be subject to a tax on capital gains (although certain exceptions/exemptions may apply).

No tax is levied on investments that yield a fixed rate of return. A tax exemption applies in certain instances and subject to the satisfaction of certain conditions on the capital gain arising on the transfer of shares in a company listed on a recognised stock exchange other than shares held in certain collective investment schemes. If the capital gain arising on the transfer of listed shares is subject to tax, then special rules apply with respect to the calculation of the gain and such gain will be subject to tax separately at the rate of 15%.

Subject to the satisfaction of certain conditions, if the asset is transferred between group companies, no loss or gain is deemed to arise from the transfer. Note that a provision exists that brings to charge the transfer of shares in property companies (as specifically defined) that were originally subject to intra-group tax deferral when the transferor and the transferee cease to be members of the original group within six years from the date of such intra-group transfer.

Gains realised from the transfer of other assets fall outside the scope of the tax. Gains arising outside Malta and derived by a company that is either not domiciled or not ordinarily resident in Malta are not subject to tax. There are also a number of exemptions provided in the law. For example, capital gains realised by non-residents on transfers of units in Maltese collective investment schemes, similar investments relating to linked long-term insurance business and shares, or securities in Maltese companies
Malta

(except for companies holding certain Maltese immovable property) are exempt from tax.

**Rollover relief**
Rollover relief is granted with respect to capital assets used in a business for a period of at least three years and which are transferred and replaced within one year by an asset used solely for similar business purposes (i.e. no tax is chargeable on the capital gain). In such instances, the cost of acquisition of the new asset is reduced by the gain on the transfer of the previous asset that would otherwise have been taxable.

Maltese tax law also provides for the surrendering and claiming of allowable losses between companies that form part of the same group ([see Group taxation for more information](#)) as well as for reorganisation relief, subject to certain specific conditions.

**Dividend income**
Dividends received by one resident company from another, whether or not a subsidiary, are taxable on the gross amount in the recipient's hands. If the distributed profits have been taxed, no further tax should be chargeable to the recipient company. However, for resident shareholders, if the corporate rate of tax in the year in which the profits are earned is lower than that in the year in which they are distributed, an amount equivalent to the difference in rates (topping up) is payable. If the distribution is made from untaxed income, the dividend will be tax-free in the hands of the recipient company.

Dividends and gains on disposal of shares received by a corporate investor from a non-resident company (or from a non-resident limited partnership), as well as profits from a foreign branch, may qualify for a participation exemption in Malta, subject to the satisfaction of certain statutory conditions.

The participation exemption may also apply to gains upon the disposal of equity holdings in Maltese-resident entities. Distributions of taxed income by Maltese-resident companies are not subject to further tax under the full imputation system.

**Stock dividends**
A Maltese company may distribute bonus shares from profits, whether of an income or capital nature, and from share premium and capital redemption reserves. When bonus shares represent a capitalisation of profits, they are deemed to be dividends for tax purposes. Such bonus shares are subject to tax in the recipients' hands, gross of any tax paid at the corporate level on the relative profits, but tax credits equivalent to the gross-up of tax are available to stockholders.

**Interest income**
Interest is chargeable to tax under the provisions of Article 4(1)(c) of the Income Tax Act and subject to the standard corporate tax rate. Nevertheless, in the event the receipt of interest falls within the definition of 'investment income' as established by Maltese tax legislation, a WHT of 15% may be generally applicable. Furthermore, in the case of interest income payable to non-Maltese residents, such interest should be exempt from Maltese tax, subject to the satisfaction of certain statutory conditions.

**Foreign income**
A company is taxable on its worldwide income when it is ordinarily resident and domiciled in Malta. A company that is either not ordinarily resident or not domiciled in Malta is taxable on its foreign income only insofar as such income is remitted to/received in Malta. Foreign tax is relieved by way of tax credits. This may occur under the
terms of a DTT. Where no treaty exists, the foreign tax can be relieved through a system of unilateral relief. Relief for underlying tax is also granted with respect to dividend income, either in terms of a DTT or as unilateral relief. Such relief may be available if, among other things, evidence of tax paid abroad is produced.

Profits of Malta resident companies are subdivided for Maltese tax purposes into five accounts: the Immovable Property Account, the Final Tax Account, the Maltese Taxed Account, the Untaxed Account, and the Foreign Income Account. The last of these includes, among other things, taxable profits of Maltese-resident companies resulting from foreign investments; profits of a foreign PE; and profits resulting from foreign investments, assets, or liabilities of an onshore bank licensed in Malta. Income allocated to the Foreign Income Account for which no evidence of tax paid abroad is available can qualify for a flat-rate foreign tax credit of 25%.

The Immovable Property Account includes profits and income derived directly or indirectly from immovable property situated in Malta. The Final Tax Account includes, among other items, profits that have been subject to a final tax at source or were exempt from tax and such exemption is extended to shareholders upon a distribution of such profits. The Maltese Taxed Account includes any other taxed profits while the Untaxed Account represents the difference between the distributable profits and the profits allocated to the other taxed accounts.

Under Malta’s system of taxation of dividends, shareholders receiving distributions from the Maltese Taxed Account and/or the Foreign Income Account may be entitled to a tax refund of part or the full tax paid by the distributing Maltese company on such profits being distributed. The tax refund may be either a six-sevenths refund, a five-sevenths refund, a two-thirds refund, or a full refund of the tax suffered by the Maltese distributing company on the distributed profits. The type of the tax refund depends on the nature of the income to be distributed.

**Deductions**

The basic condition for deductibility of expenses is that deductions are allowable only with respect to expenditures that are wholly and exclusively incurred in the production of income. However, the Maltese Income Tax Act also provides a number of exceptions whereby specific expenses of a capital nature may also be tax deductible, subject to the satisfaction of the statutory conditions applicable thereto. The following are some further comments on specific items of expenditure.

**Depreciation and depletion**

Tax depreciation is computed on the straight-line method. The rate of depreciation on plant and machinery varies according to the category of the plant and machinery in question.

Maltese tax law prescribes the minimum number of years over which items of plant and machinery are to be depreciated as follows:

<table>

</table>

The wear and tear rate on industrial buildings and structures (including hotels, and car parks as of 1 January 2012) may not exceed 2% per annum. New acquisitions of industrial buildings and structures are entitled to a concurrent extra 10% allowance in the year of acquisition. Tax depreciation is not required to conform to book depreciation.

The total allowances over the asset’s useful life may not exceed 100% of its cost. If a surplus arises on disposal of a tax-depreciated asset, it is either added to the year's income or utilised to reduce the cost of any replacement. If the asset has been under-depreciated, a balancing allowance is granted.

No deduction is available for the depletion of natural resources.

The rules on tax deductions for wear and tear of plant and machinery provide for certain specific treatment in particular situations, including, among other things, the following:

- To establish the cost of an asset when it is transferred between related companies, the lower of the actual cost of the asset or the tax written-down value adjusted by any balancing charge or allowance incurred by the transferring company should be applied.
- Deductions for wear and tear are allowed only where proper records and documentation have been kept that support the cost of the respective assets.
- A proportional deduction is allowed where an asset is used partly in the production of income and partly for other purposes.

**Goodwill**

In the event that goodwill were to fall within the purport of intellectual property (IP) for the purposes of the tax deductibility rules under Maltese tax law, then it may possibly be argued that an expenditure on goodwill may be tax deductible. However, this would need to be analysed on a case-by-case basis.
Start-up expenses
Certain pre-trading expenses (i.e. staff training, advertising, salaries/wages) are also allowed as a deduction, subject to the satisfaction of the following conditions:

(i) The expenditure is incurred not more than 18 months before the commencement of the trade or business.
(ii) The expenditure is not deductible in ascertaining the trading or business income of the person carrying on such trade or business but would have been so deductible under (i) above had it been incurred after that time.

In the event the above conditions are satisfied, such expenditure is treated as incurred on the day on which the trade or business is first carried on by the person.

Interest expenses
Interest on any borrowed money is an allowable deduction if it is paid on capital employed in acquiring income. The expense is allowable even though the borrowing would have been made for a capital purpose, but it is deductible only against the income derived in the same year from the employment of that capital. This special rule is in addition to the deduction for interest paid on money due on revenue account (such interest should be deductible under the general rule of deductibility), such as interest on trade debts or charged on normal business overdraft facilities. There is a restriction in respect of interest deductibility where the relevant advance is in connection with the financing of Maltese immovable property and subject to certain other conditions.

Bad debt
Bad debts incurred in any trade, business, profession, or vocation are allowed in the year they become bad if proved to the satisfaction of the tax authorities. No deduction is given for provisions for bad debts and for bad debts incurred in activities other than a trade, business, profession, or vocation. Any bad debt that is later recovered is deemed as income for the year in which it is received.

Charitable contributions
The general rule is that charitable contributions are not deductible for Maltese tax purposes unless expressly provided for by law.

Fines and penalties
The general rule is that fines and penalties are not deductible for Maltese tax purposes. Nevertheless, there is an exception to this general rule that provides that interest paid or payable by any person in terms of the Maltese Value Added Tax Act will be treated as expenses incurred in the production of the income of that person for income tax purposes.

Taxes
The typical interpretation is that taxes suffered are not deductible for Maltese tax purposes, although certain exceptions may possibly apply.

Other significant items
Capital expenditures on scientific research, patents, and IP rights are written off over a number of years. In the case of scientific research, a deduction may be granted at 150% of the expenditure.

The Income Tax (Deductions) Rules of 2001 provide for specific conditions on deductions with respect to the use of cars and the payment of employee compensation. The cost on which capital allowances on certain motor vehicles may be claimed is
Malta

Deductions for lease payments on cars are restricted in a manner that corresponds with the stated restriction of EUR 14,000 that applies to capital allowances on owned cars. With respect to payment of employee compensation, the Deduction Rules require that in order for employee compensation to be allowed as a deduction for tax purposes in the hands of the employing company, it must have been duly accounted for. In particular, the employee compensation must have been reported on the appropriate forms and within the statutory time limit to the Office of Inland Revenue. The rules also provide for restrictions on deductibility of emoluments with respect to the payment of certain fringe benefits to employees.

Net operating losses
Net operating losses may be carried forward indefinitely until absorbed. There is no carryback of losses, not even in terminal years. Unabsorbed capital allowances may be carried forward only against the same underlying source of income. Where the source ceases to exist, any remaining balance of unabsorbed capital allowances is lost.

Payments to foreign affiliates
There are no restrictions on the deductibility of royalties, interest (except for interest, discount, or premium that are in any manner connected to Maltese immovable property and subject to the satisfaction of certain other statutory conditions, in which case, the interest/discount/premium should not be tax deductible in Malta), and service fees paid to foreign affiliates as long as the particular expenses are considered to be incurred in the production of the particular income and satisfy the applicable statutory conditions. Interest, discount, premium, or royalties derived by non-residents are exempt from tax, subject to the applicable statutory requirements.

Group taxation
Two companies that for tax purposes are resident exclusively in Malta, where one company is a 50% plus subsidiary of the other or both are 50% plus subsidiaries of a third Malta-resident company, qualify as members of a group of companies. Allowable losses may be surrendered by a company to another company within the group where both companies have concurrent accounting periods and form part of such group throughout the entire basis year for which this relief is claimed; however, such surrendering of losses may not occur where the surrendering or claimant company is carrying on the business of insurance. The possibility of income tax consolidation has been introduced in Maltese tax law; however, rules covering the precise terms and conditions of such tax consolidation are still to be issued.

Transfer pricing
Malta does not operate a sophisticated transfer pricing regime. There are some general anti-avoidance provisions and brief references to transactions at arm’s length. However, the Maltese tax authorities will typically still consider it desirable that transactions between residents and non-residents broadly adhere to the arm’s-length principle, that is, prices that would have been concluded between independent enterprises. However, no specific rules are available on the manner in which an arm’s-length price is to be established.

Thin capitalisation
The Maltese tax regime does not contain thin capitalisation rules.

Controlled foreign companies (CFCs)
No anti-CFC rules or legislation are applicable in Malta.
Malta

---

**Tax credits and incentives**

**Foreign tax credit**
A credit for foreign taxes may be applied against the Maltese tax charge (see Foreign income in the Income determination section for more information).

**Inbound investment**
Investments by foreigners may be readily repatriated together with profits.

The Malta Enterprise Act and other related legislation provide a comprehensive package of incentives for inbound investment. These incentives are reserved for enterprises carrying on certain activities in Malta, mainly manufacturing activities. The focus is on high-value-added activities, and approval of a project’s eligibility for benefits by the Malta Enterprise may be required. In general, eligibility does not depend on whether the company produces for the local or for export markets. The main tax incentives include the following:

- Enterprises carrying out qualifying activities, which mainly include manufacturing activities, qualify for investment tax credits whereby a percentage of up to 30% (50% in the case of small-sized enterprises and 40% in the case of medium-sized enterprises) of qualifying expenditures are off-set against the tax charge (not against taxable income). Any unused credits are carried forward and added to the credits for subsequent years. The amount carried forward is increased by a percentage rate that is based on EU parameters as updated from time to time.
- Certain tax credits and special incentives may be available, subject to certain conditions. These tax credits are calculated on the basis of specific expenditures incurred by a company, while the special incentives grant tax exemptions on all or part of the chargeable income in specified circumstances.
- No further tax is charged on distributions from profits that had previously been taxed at a reduced rate. This benefit is also extended to amounts that were not subject to tax on account of the investment allowance, investment tax credits, and specific tax credits/special incentives.
- A 15.75% tax rate is applicable to profits reinvested in the enterprise, pursuant to a project approved by the Malta Enterprise.
- The combination of certain tax treaties and Maltese domestic law lowers the Maltese tax rate on certain companies receiving certain industrial assistance (i.e. mainly assistance in terms of the Malta Enterprise Act, Business Promotion Act, and Business Promotion Regulations) to 15%.

**Capital investment**
In the case of qualifying companies, an investment allowance of 50% on plant and machinery and of 20% on industrial buildings and structures may be available (subject to certain capping rules), bringing the total allowances granted during the lifetime of the assets up to 150% and 120%, respectively. Apart from the investment allowances, normal allowances for wear and tear are also available on such assets (see Depreciation and depletion in the Deductions section for more information).

**International business profits**
Tax benefits are available for shareholders with respect to distributions by such companies of specified types of income. A beneficial tax regime is also available in respect of collective investment schemes.

The Maltese fiscal implications relative to trusts vary, depending on a number of circumstances, including: (i) the particulars of the parties involved (e.g. domicile or
residence of the trustees or beneficiaries), (ii) the act or event under review (e.g. the settlement of property, transfers of beneficial interests, distributions of trust assets), and (iii) the nature of the trust assets. Furthermore, in certain circumstances, tax transparency provisions are set out in the law, particularly so as to allow, among other things, the application of tax exemptions that would have applied to beneficiaries if there was no trust relationship.

An option exists for a step-up in the cost of acquisition of assets situated outside Malta (including companies) effecting a change in domicile or residence or becoming Maltese companies as a result of cross-border mergers.

Any income derived from the ownership, use, or lease of aircraft when such aircraft is employed for international transport shall be deemed to arise outside Malta and hence outside the Maltese tax base, irrespective of the country of incorporation of the aircraft or whether the aircraft calls or operates from Malta.

**Witholding taxes**

Domestic corporations paying certain types of income are subject to deduction of tax-at-source obligations as follows:

<table>

Malta

### Notes

Treaties relating to international air and shipping traffic are in force with Switzerland and the United States.

The numbers in parentheses refer to the following notes:

1. No WHT is imposed on dividends distributed by Maltese companies (except for distributions of untaxed income to resident persons other than companies, refer to Note 5) because no additional tax is imposed on distributions other than the tax charged on the company with respect to the distributed profits. Malta makes no distinction between portfolio and substantial holdings. Under Maltese law, the dividend is grossed up by a figure representing the tax imposed on the company's profits when these were originally earned thereby. Under Malta's full-imputation system of taxation of dividends, the corporate tax is assimilated with the shareholder's personal income tax with respect to the dividend. In the shareholder's hands, the dividend is taxed at the gross amount, and the relevant amount of corporate tax offsets the shareholder's tax liability on income from all taxable sources with no further tax liability being imposed on the shareholder in respect of such dividends.

2. Withholding of tax may be required only where the interest is debenture interest or interest on any other loan advanced to a corporation for capital purposes. The WHT is, in effect, a prepayment of the recipient's final liability because a reassessment on income is made upon the submission of returns. Any resulting overpayment is refunded.

3. Interest and royalty income derived by non-residents is exempt from tax in Malta as long as certain conditions are complied with (e.g. they are not effectively connected to a PE of the recipient situated in Malta).

4. On the basis that Malta operates the full-imputation system of dividends, dividends are not subject to further tax when distributed by a company registered in Malta to a non-Maltese resident. Furthermore, if the rate provided under the Dividends Article in the respective treaty provides for a lower rate than the Maltese corporate tax rate incurred by the company on the respective profits (standard corporate tax rate of 35%), then this may result in a refund of Maltese tax in terms of Malta's full imputation system (such a refund situation may arise in the treaties with Austria, Bulgaria, Kuwait, Libya, and Romania). In a number of treaties, the rate of deduction and of tax is reduced to 15% in the case of companies enjoying certain tax incentives. See also Note 1 with respect to Malta's full-imputation system of taxation of dividends.

5. Distributions of dividends by a Maltese company where the dividend represents a distribution of untaxed income to a resident person other than a company or a non-resident person (including a non-resident company) who is owned and controlled, directly or indirectly, by, or who acts on behalf of, an individual who is ordinarily resident and domiciled in Malta will be subject to a 15% WHT.

---

**Tax administration**

### Taxable period

The year of assessment is a calendar year, but a company may obtain authorisation from the Maltese Revenue to have a different year end (i.e. other than 31 December).

### Tax returns

An income tax return for income earned during the previous year must be filed for every year of assessment. The tax return for a company must be submitted by the later of nine months following the end of the financial year or by 31 March following the year of assessment (however, in recent years the Commissioner of Inland Revenue has provided concessionary extensions to such statutory deadlines in the case where the tax return is submitted electronically). Penalties are incurred on late filing of returns. The tax return submitted by the company is a self-assessment, and the Commissioner of Inland Revenue will not raise an assessment unless there is not agreement with the self-assessment.
Payment of tax
Companies pay tax in the currency in which their share capital is denominated.

During the basis tax year, a company is generally required to make provisional tax (PT) payments every four months. In general, the PT payments are based on the last self-assessment filed by the company, and payments are divided into three instalments of 20%, 30%, and 50%, respectively. Any tax liability that is still due at the tax return date after deducting all tax credits must be settled immediately with the submission of the return. Interest at 0.75% per month is charged on any unpaid tax.

In certain instances, especially for companies with mostly international operations, PT may not be payable, and the tax payment is normally paid on the earlier of the date profits are distributed or 18 months after the end of the relative accounting period.

The employer is required to withhold income tax and social security contributions from employees’ salaries and pass on such tax/contributions to the Office of Inland Revenue. This system of WHT at source is referred to as the Final Settlement System (FSS), and the employer is legally required to operate such a system. The salary from which the withholding is to be effected should also include the value of any taxable fringe benefits. There are three main categories of fringe benefits: (i) use of motor vehicles, (ii) use of other assets including accommodation, and (iii) other benefits. The method of valuation in each case varies, and the employer is required to refer to the Fringe Benefits Regulations (and also to the fringe benefits guidelines) so as to calculate the correct value of any fringe benefits being provided to the employees and to deduct the right amount of tax accordingly.

Tax audit process
The Maltese Inland Revenue is entitled to raise an investigation and notify the taxpayer in writing that the department is initiating a tax enquiry. In such investigations, the taxpayer will typically be required to provide information and supporting documentation in respect of queries raised by the Revenue. The taxpayer has a right to appoint a representative on their behalf.

Statute of limitations
An assessment (as from year of assessment 1999) may be issued by the Maltese Revenue by not later than six years from the end of the respective tax year. In the event of non-full disclosure or wilful incorrect/misleading information, the aforesaid prescription period will not apply.

In respect of the payment of tax, additional tax, interest, or any penalty, an action may be taken during any time from the date on which it becomes due and payable up to eight years from that date or, where an assessment in respect thereof has been made, from the date on which that assessment becomes final and conclusive.

Topics of focus for tax authorities
We are not aware of any particular topics of focus by the Maltese tax authorities. One might say that typically the Maltese Revenue is particularly wary with respect to activities and transactions concerning immovable property situated in Malta.
Significant developments

Measures focusing on stimulating capital expenditure (e.g. 50% accelerated depreciation on acquisition of plant, machinery, and equipment) have been set in place (see Depreciation in the Deductions section).

Taxes on corporate income

A corporation resident in Mauritius is subject to tax on its worldwide income. A non-resident corporation is liable to tax on any Mauritius-source income, subject to any applicable tax treaty provisions. Corporations are liable to income tax on their net income, currently at a flat rate of 15%.

Mauritius has a credit system of taxation whereby foreign tax credit is given on any foreign-source income declared in Mauritius on which foreign tax of similar character to Mauritian tax has been imposed. All corporate bodies incorporated in Mauritius (except companies holding a Category 2 Global Business Licence and certain approved funds and associations) are subject to income tax. This applies to all associations and other registered bodies. Income derived by local partnerships is shared and taxed in the hands of the partners. Foreign corporations carrying on business, or having a place of business, in Mauritius are also liable to income tax on income derived from Mauritius.

Income tax is payable on total net income before distribution at the following rates:

<table>
<thead>
<tr>
<th>Entity</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Global Business Category 1 (GBC1) companies and offshore trusts (see below)</td>
<td>15</td>
</tr>
<tr>
<td>Freeport operators carrying on Freeport activities other than providing goods and services on local markets</td>
<td>Exempt</td>
</tr>
<tr>
<td>Private Freeport Developers</td>
<td>Exempt for income years up to and including year ending 31 December 2013; 15% thereafter</td>
</tr>
<tr>
<td>All other companies</td>
<td>15</td>
</tr>
</tbody>
</table>

Global Business Category 1 (GBC1) companies are liable to tax at the rate of 15%. However, they are entitled to a foreign tax credit equivalent to the higher of 80% of the Mauritius tax chargeable or the actual tax suffered abroad in respect of foreign-source income.
Global Business Category 2 (GBC2) companies incorporated under the laws of Mauritius are exempt from income tax and are not tax residents for treaty purposes. For more information, see the Tax credits and incentives section.

**Alternative minimum tax (AMT)**

Companies paying or declaring dividends must pay tax either under the normal rules or an AMT, whichever is higher.

AMT is calculated where the normal tax payable for an income year by a company is less than 7.5% of its book profit. The AMT is the lesser of 7.5% of its book profit or 10% of dividends declared in respect of that year.

Book profit is the profit computed in accordance with internationally accepted accounting practices, excluding:

- dividends received from resident companies
- profits or loss on disposal of fixed assets, and
- profits or gains or loss from sale of securities.

AMT does not apply to the following:

- Companies that have not declared any dividend.
- Companies that are exempt from payment of tax.
- GBC1 companies.
- Where the amount representing 10% of dividends declared does not exceed the normal tax payable.
- A manufacturing company or a company operating a hotel in respect of income derived for the period 1 January 2013 to 31 December 2014.

**Special levies**

**Banks**

All banks are required to pay a special levy calculated according to their book profit and their operating income derived during the preceding year. ‘Operating income’ means the sum of net interest income and other income before deducting non-interest expense.

The rates of the special levy on banks are as follows:

<table>
<thead>
<tr>
<th>Year of assessment commencing</th>
<th>Rates</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 January 2012</td>
<td>3.4% on book profit; 1.0% on operating income</td>
</tr>
<tr>
<td>1 January 2013</td>
<td>3.4% on book profit; 1.0% on operating income</td>
</tr>
<tr>
<td>1 January 2015 and every subsequent year</td>
<td>1.7% on book profit; 0.5% on operating income</td>
</tr>
</tbody>
</table>

**Telephony service providers**

Providers of public fixed or mobile telecommunication networks and services (including information and communication services, such as value added services and mobile internet) are liable to a solidarity levy. The solidarity levy is calculated according to the book profit and turnover for the preceding income year of the operator. The applicable rates are as follows:
Mauritius

Years of assessment commencing 1 January 2013 and 1 January 2014: 5% of the book profit and 1.5% of the turnover of the operator.

‘Book profit’ means the profit derived by an operator from all its activities and computed in accordance with International Financial Reporting Standards (IFRS).

**Corporate Social Responsibility (CSR) Fund**

Every year, a company has to set up a CSR Fund equivalent to 2% of its chargeable income of the preceding year to:

- implement an approved programme by the company
- implement an approved programme under the National Empowerment Foundation, or
- finance an approved non-governmental organisation (NGO).

Note that the following entities are not subject to the CSR regulations:

- A company holding a GBC1 Licence under the Financial Services Act.
- A bank holding a banking licence under the Banking Act, in respect of its income derived from its banking transactions with non-residents or with corporations holding a Global Business Licence under the Financial Services Act.
- An IRS company referred to in the Investment Promotion (Real Estate Development Scheme) Regulations 2007.
- A non-resident société, a trust, or a trustee of a unit trust scheme.

The CSR Fund is either disbursed by the company on approved projects/NGOs or remitted to the Mauritius Revenue Authority (MRA) if not expensed fully. The CSR Fund is managed by the government, and its specific objectives are to:

- encourage companies to manage their own programmes, impacting the intersection of economic with social and environmental development, and
- facilitate the contribution of companies to support existing Approved National Programmes implemented by companies, national agencies, or NGOs.

Please also note the following:

- Any amount underpaid (not exceeding 20% of the Fund provided) in respect of a year can be carried forward to the following year to form a part of the CSR Fund for that following year, and the remaining amount should be remitted to the MRA.
- Any amount overpaid compared to the amount provided can be carried forward (in an amount not exceeding 20% of the amount provided) and offset in equal instalments against any amount to be remitted in respect of the five succeeding years. The carryforward does not apply to any excess arising in respect of more than two consecutive years.
- The CSR Fund in respect of a year includes any amount brought forward to that year.

**Local income taxes**

Local income taxes levied by local administration, such as urban councils, do not exist in Mauritius.
**Corporate residence**

Under domestic law, a company is resident in Mauritius for tax purposes if it is incorporated in Mauritius or centrally managed or controlled in Mauritius.

A company not incorporated in Mauritius is resident in Mauritius only if it is centrally managed and controlled in Mauritius.

In the absence of a tax treaty, any income derived from the following is taxed in Mauritius:

- Any business carried on wholly or partly in Mauritius.
- Any contract wholly or partly performed in Mauritius.

A GBC2 company is not considered a resident in Mauritius for the purposes of double taxation treaties (DTTs).

Under a tax treaty, a company is considered a resident in Mauritius if it is incorporated in Mauritius or if its effective management is in Mauritius.

**Permanent establishment (PE)**

Generally, a PE is created under a tax treaty if one of the following criteria is met:

- Branch, office, factory, workshop, or installation used for extraction of natural resources.
- Building site, construction, installation, assembly, or supervisory services where the activity on the site lasts for a minimum of six months or 12 months, depending on the tax treaty.

**Other taxes**

**Value-added tax (VAT)**

VAT is charged by VAT-registered entities at the standard rate of 15% on all goods and services supplied by them in Mauritius (except those taxed at 0%), other than the following exempt supplies (not an exhaustive list):

- Rice, bread, butter.
- Medical, hospital, and dental services, including clinical laboratory services, services provided in a health institution, and veterinary services.
- Educational and training services provided by institutions approved by the Mauritius Qualification Authority.
- Construction of building for residential purpose, provided letter of intent relating to an Integrated Resort Scheme was issued prior to 1 October 2006.
- Sale or transfer of an immovable property, a building or part of a building, apartment, flat, or tenement.
- Banking services, except:
  - services provided to merchants accepting credit/debit card
  - services in respect of safe deposit locker, and issue and renewal of credit/debit cards
  - services for keeping and maintaining customer’s accounts, and
  - services supplied by a bank holding a banking licence under Banking Act 2004 in respect of its banking transactions with non-residents and corporations holding a Global Business Licence.
Mauritius

An entity should register for VAT if turnover exceeds 4 million Mauritian rupees (MUR) a year. However, certain service providers (e.g. accountants and auditors, attorneys and solicitors, consultants, surveyors, valuers) should register for VAT irrespective of their turnover.

**Customs duties**
Customs duty is levied on commodities imported into Mauritius. The rate of duty applicable is the rate in force under the Customs Tariff Act at the time the bill of entry is validated at the Customs.

A number of exemptions and concessions are available to industries, organisations, and persons under the Customs Tariff Act.

**Excise taxes**
An excise duty is levied at the time of importation on selected commodities, which includes spirits, vehicles, and petroleum products at corresponding prescribed rates. A levy is also chargeable on some specified excisable goods, whether the goods are for home consumption or not, at corresponding prescribed rates.

**Campement site tax**
Every owner of a campement site situated in a specified zone is subject to an annual tax known as the campement site tax, varying between MUR 2 to MUR 6 per square metre.

The tax shall be payable to the authorised officer on or before 31 July in every year.

**Land transfer tax**
Land transfer tax is levied on the transfer of land (excluding the value of any building thereon) and is payable by the transferor at the following rates.

- If the land was held by the transferor for a period of more than five years: 5% of the transfer value.
- If the land was held by the transferor for a period not exceeding five years: 10% of the transfer value.

Land transfer tax is also payable at the above rates by the transferor upon transfer of the shares of a company owning immovable properties, based on the value of shares or property, whichever is the lower.

**Leasehold tax**
Leasehold tax is levied on the registration of a deed of transfer of leasehold rights in state land. Both the lessor and the lessee are liable to leasehold tax (in equal proportion) at the rate of 20% on the open market value of the leasehold right at the time of transfer.

**Registration duty**
The Registration Duty Act provides for a duty at an effective rate of 5% (if the immovable property is held for more than ten years) or 10% (if the immovable property is held for less than ten years) on the value of transfer of any immovable property. The duty is payable by the transferee at the time of the transfer.

The transfer of shares of a company other than those listed on the Stock Exchange of Mauritius or traded on the secondary market is subject to registration duty if the company holds immovable property.
The following transactions are not subject to registration duty:

- A transfer of immovable property from ascendant to descendent (or vice versa).
- A transfer of property made to a company holding a letter of approval for the implementation of a project under the Real Estate Development Scheme, provided that the transferor holds shares in the company equivalent to at least the value of the land transferred.
- A transfer of immovable property or shares between companies forming part of a group of companies, as defined in the Companies Act 2001.
- A transfer of immovable property where such transfer takes place between companies having the same shareholders for the sole purpose of merging.

**Stamp duty**
Stamp duty is levied and paid to the Registrar General on every document at the time of registration, transcription, inscription, or erasure of inscription. Stamp duty varies from MUR 25 to MUR 1,000.

---

**Branch income**
Tax rates on branch income are the same as on corporate profits. No tax is withheld on the remittance of profits by way of dividend to a head office.

---

**Income determination**

**Inventory valuation**
Inventories should be valued at the lower of historical cost or net realisable value. The last in first out (LIFO) basis of valuation is not allowed for tax purposes.

Conformity is required between book and tax reporting. Where the revenue authority is not satisfied that the basis of valuation is acceptable (e.g. where the LIFO basis has been applied) it will make such adjustment as it believes is appropriate to determine the profits arising from the business carried on.

**Capital gains**
There is no tax on capital gains in Mauritius. However, certain transactions are taxed as ordinary business profit instead of capital gains. Where a transaction is in the nature of trade, the MRA may take the view that it is an ordinary trading transaction and assess the gains derived as income.

Any gains derived from the sale of shares held for less than six months are classified as trading income and are therefore taxed as ordinary income.

Gains realised from the sale of any property or interest in property acquired in the course of a business, as part of a profit-making undertaking or scheme, are taxable as ordinary income.

**Dividend income**
Companies, whether resident or not, are exempt from tax on dividends received from resident companies.
Mauritius

Dividend income received from abroad by a company resident in Mauritius (non-GBC1 company) is subject to tax at the rate of 15%. Credit for any foreign tax withheld is given, subject to documentary evidence provided to the MRA.

Dividend income received from abroad by a GBC1 company is subject to tax at an effective rate of 3%.

Stock dividends
A resident company can distribute stock dividends (bonus shares) proportionately to all of its shareholders. Stock dividends per se or convertible into cash are not taxable in the hands of the recipient. Dividends in kind (i.e. other than cash or shares) are treated as taxable benefits.

Interest income
Interest income received by resident companies (non-GBC1 companies) is liable to tax at the rate of 15%.

A GBC1 company receiving interest income from abroad is liable to tax at the effective rate of 3%.

Interest income received by non-residents is liable to withholding tax (WHT) at the rate of 15% (final tax).

Foreign income
Resident corporations are taxed on their worldwide income, but tax credit and treaty relief is generally available in order to avoid double taxation (see Foreign tax credits in the Tax credits and incentives section for more information).

Undistributed income of foreign subsidiaries is not subject to any special taxation as long as the income of the foreign subsidiary before distribution is not included in the accounts of the local parent company. Dividends paid by the foreign subsidiary to the local parent company will, however, be taxable to the latter, whether or not such dividends are actually received in Mauritius.

Deductions

Depreciation
Annual allowance rates vary between 5% and 100% of base value (unless stated otherwise), as per the following table:

<table>
<thead>
<tr>
<th>Capital expenditure incurred on</th>
<th>Rate of annual allowance</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Percentage of Base value</td>
</tr>
<tr>
<td>Industrial premises excluding hotels</td>

<td>15</td>
<td></td>
</tr>
<tr>
<td>Acquisition or improvement of any other item of a capital nature that is subject to depreciation under the normal accounting principles</td>
<td>5</td>
<td></td>
</tr>
</tbody>
</table>

Tax depreciation need not conform to book depreciation. Depreciation is generally recaptured on disposal or sale when balancing charges or allowances are computed.

**Goodwill**

Goodwill amortised under normal accounting principles is not allowed as an expense for tax purposes. However, the cost amount can be capitalised, and an annual allowance of 5% of cost can be claimed.

**Leasing agreements**

There has been a substantial increase in leasing activity over the last decade. Where an asset is transferred under a financial lease agreement, the lessee is entitled to capital allowances on the value of the asset, including finance charges, as if it was an outright sale by the lessor.

On the other hand, the lessor cannot capitalise the leased assets in its books, and no capital allowance is claimed on the assets leased. However, the lessor is taxable on the interest income derived from the assets leased.

There are no special rules for operating leases.

**Set-up costs**

Set-up costs are not allowed for tax purposes as they are considered as pre-operational expenses.
Interest expenses
Expenditure incurred on interest is deductible, provided it is incurred in respect of capital employed exclusively in the production of income.

A request can be made by the tax authorities to support any claim made in respect of interest expense by a certificate from a qualified auditor certifying that the amount of interest claimed has been incurred on capital employed exclusively in the production of gross income.

Interest paid by a GBC1 company to a non-resident is exempt from corporate tax.

Bad debt
A provision for bad or doubtful debt is generally not deductible unless a court ruling has been obtained against the debtor.

Charitable contributions
Donations/gifts, whether to charitable institutions or not, are not allowed for tax purposes.

Fines and penalties
Fines and penalties are not allowed for tax purposes as they are expenses not exclusively incurred for the production of gross income.

Taxes
Income taxes and foreign taxes paid are not normally deductible; however, some taxes (e.g. municipal taxes relating to buildings, land transfer tax, irrecoverable input VAT) are deductible.

Other significant items
A bank or an approved financial institution may claim as deductions any irrecoverable loans due by a company in liquidation in respect of which winding-up procedures have started or by a company in receivership.

Net operating losses
Losses made in an accounting year are carried forward for a maximum of five years.

A company may claim to carry forward to an income year any loss it incurred in any former income year, provided the company can demonstrate a 50% continuity of shareholding at the end of those income years. Losses resulting from capital allowances can be carried forward indefinitely. Loss carrybacks are not permitted.

Where a company takes over another company engaged in manufacturing activities, or two or more companies engaged in manufacturing activities merge into one company, any unrelieved loss of the acquiree may be transferred to the acquirer in the income year in which the takeover takes place, on such conditions relating to safeguard of employment as may be approved by the Minister of Finance.

Payments to foreign affiliates
Royalties, interest, and service fees payable to foreign affiliates are allowed as expenses, provided they correspond to actual expenses incurred, are reasonable, and do not exceed what would be paid under an arm’s-length agreement. There are certain limitations if the recipient of the interest is not liable to Mauritius tax. Royalties paid to non-residents by GBC1 companies, banks out of their foreign-source income as defined in the Income Tax Act, and trusts are tax-exempt.
**Group taxation**

There are no group taxation provisions in the Mauritius tax legislation other than the transfer of losses by tax incentive companies, sugar factory operators, subsidiaries located in the Island of Rodrigues, and manufacturing companies upon their take-over (see Net operating losses in the Deductions section for more information).

**Transfer pricing**

Mauritius does not have any specific transfer pricing legislation. However, it does contain an arm’s-length provision requiring transactions between related parties to reflect a commercially objective value, which would be the amount charged for the services were the parties not connected.

**Thin capitalisation**

Mauritius does not have specific thin capitalisation legislation; however, it does have other anti-avoidance provisions as described below:

If a company has issued debentures to each of its shareholders, subject to the number, the nominal value, or paid-up value of the shares in that company, any interest paid on debentures and claimed as a deductible expense may be disallowed and treated as dividend.

**Tax credits and incentives**

**Global Business Category 1 and 2 companies**

A GBC1 company can trade with a Mauritian resident as well as non-residents. Transactions made with a Mauritian resident are taxed at the rate of 15%, whereas transactions with non-residents are taxed at an effective tax rate of 3%.

The registration and application of GBC1 companies should be submitted to the Financial Services Commission (FSC) through a duly licensed Management Company on a prescribed form accompanied by the following:

- The certified supporting documents.
- The applicable processing fees and relevant fees.

A GBC1 company is tax resident in Mauritius and may apply for a Tax Residence Certificate (TRC) from the Director General of the MRA should this be required by the tax authorities in the jurisdiction in which the company is conducting its business.

Investors may benefit from an extensive network of double taxation agreements (DTAs). Entities holding a GBC1 Licence wishing to avail to the benefits of a tax treaty must obtain a TRC issued by the MRA.

A GBC1 company is encouraged to have more substance in Mauritius by ascertaining the following:

- It has at least two directors, resident in Mauritius, of sufficient calibre to exercise independence of mind and judgment.
- It maintains, at all times, its principal bank account in Mauritius.
- It keeps and maintains, at all times, its accounting records at its registered office in Mauritius.
Mauritius

• It prepares, or proposes to prepare, its statutory financial statements and causes or proposes to have such financial statements to be audited in Mauritius.

A GBC1 company can apply for a TRC to show substance in Mauritius. The TRC is generally issued within a period of seven days from the date of application, provided that the person has submitted the return required under the Income Tax Act 1995.

A GBC2 company is required to have, at all times, a registered agent in Mauritius. Only a management company shall act as the registered agent of a company holding a GBC2 Licence. A GBC2 company is defined as a resident corporation conducting business outside Mauritius and can engage in activities other than the following:

• Banking.
• Financial services.
• Holding, managing, or otherwise dealing with a collective investment fund or scheme as a professional functionary.
• Providing registered office facilities, nominee services, directorship services, secretarial services, or other services for corporations.
• Providing trusteeship services by way of business.

An applicant for a GBC2 Licence must submit the following forms/documents to the FSC through a management company:

• The application form, duly filled in and signed.
• The certified supporting documents.
• The applicable processing fees and relevant fees.

The fees payable to the FSC for registering a GBC1 and a GBC2 company are as follows:

<table>
<thead>
<tr>
<th>Fee</th>
<th>GBC1 (USD*)</th>
<th>GBC2 (USD)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Processing</td>
<td>500</td>
<td>100</td>
</tr>
<tr>
<td>Annual Licensing</td>
<td>1,750</td>
<td>235**</td>
</tr>
</tbody>
</table>

* United States dollars

** This amount excludes the annual registration fee of USD 65, or such other fee as the Registrar of Companies may determine, payable to the Registrar of Companies.

The TRC is renewable on an annual basis and issued in two formats, one specific to India and one general for any other country.

A GBC2 company is a limited liability company incorporated in Mauritius. However, GBC2 companies are exempt from Mauritius tax and are not required to file tax returns. GBC2 companies are therefore not able to access the tax treaty network of Mauritius.

Companies in the Freeport zone
The income of a Freeport operator derived from Freeport activities is exempt from income tax, except income that is derived from goods or services provided on the local market.
**Income tax exemption for vessel owners**
Owners of foreign vessels registered in Mauritius are exempt from income tax on income derived from such vessels. Owners of local vessels registered in Mauritius are also exempt to the extent that the income is derived from deep-sea international trade.

**Foreign tax credits**
Generally, double taxation is avoided by means of unilateral credit relief for foreign tax paid. The net amount of foreign income that has borne tax is grossed up at the foreign rate of tax, and the foreign tax paid is allowed as a credit against the Mauritius tax payable. However, the tax credit cannot exceed the Mauritius tax referable to the relevant foreign income. Unused credit is not refunded.

Regarding foreign income derived from countries with which Mauritius has treaties for the avoidance of double taxation, a tax credit is given for foreign tax in accordance with the treaties. There are clauses in the double taxation conventions that provide that income arising from certain specified foreign sources is to be exempt from Mauritius tax.

Mauritius has signed double taxation conventions with 37 countries, namely Bangladesh, Barbados, Belgium, Botswana, the People's Republic of China, Croatia, Cyprus, France, Germany, India, Italy, Kuwait, Lesotho, Luxembourg, Madagascar, Malaysia, Mozambique, Namibia, Nepal, Oman, Pakistan, Qatar, Senegal, Seychelles, Singapore, South Africa, Sri Lanka, Swaziland, Sweden, Thailand, Tunisia, Uganda, the United Kingdom, United Arab Emirates, Zambia, and Zimbabwe.

Five treaties await ratification: Congo, Egypt, Kenya, Nigeria, and Russia.

Three treaties await signature: Gabon, Ghana, and Monaco.

14 treaties are being negotiated with: Algeria, Burkina Faso, Canada, Czech Republic, Greece, Hong Kong, Malawi, Portugal, Republic of Iran, Saudi Arabia, St. Kitts and Nevis, Tanzania, Vietnam, and Yemen.

A GBC1 company may, in the absence of evidence of payment of foreign tax, claim as tax credit (presumed tax credit) an amount equal to 80% of the Mauritius tax chargeable on the foreign-source income. The presumed tax credit may also be claimed by a bank against the tax payable on income derived from banking transactions with non-residents and with GBC1 and GBC2 companies.

In the case of foreign dividends, the general tax credit includes foreign tax imposed on the profits out of which the dividends are paid (underlying tax), provided that the shareholding in the foreign company is at least 5%.

Mauritius also allows a tax-sparing credit under its local tax legislation.

**Withholding taxes**
There is no WHT in Mauritius for payments made by GBC companies to non-residents not carrying out any business in Mauritius. There is no WHT on dividends received from resident companies. The table below shows the rates of WHT applicable for the following payments:

---

Notes

1. Same rate as under domestic law.

**Tax administration**

**Taxable period**
Companies are assessed for a year beginning 1 January and ending 31 December on their income for the preceding year ending 31 December. Where a company closes its accounts at a date other than 31 December, it may elect to adopt as a basis year the accounting year ending in the 12-month period preceding the year of assessment.

**Tax returns**
Every company, both taxpayer and non-taxpayer, must file a return of its income on the basis of the income year preceding the year of assessment. The return must be filed within six months of the financial year-end.

**Payment of tax**
Any tax due should be paid when the return is filed and within the six months deadline.

**Advance Payment System (APS)**
Every company (except non-resident trusts and non-resident partnerships) having gross income exceeding MUR 4 million or that has taxable income is required to submit an APS statement and pay any tax for the quarter immediately following the end of the accounting year.

Tax under APS can be calculated based on the following:

- 25% of taxable income for the accounting year immediately preceding the commencement of that quarter or
- the actual taxable income of the current quarter.
Mauritius

The APS statement shall be filed and tax (if any) shall be payable within three months from the end of the quarter.

**Penalties**
If timely payment is not made, a penalty representing 5% of the amount of tax due is payable. In addition, interest at the rate of 1% of the tax unpaid for each month or part of a month is payable until the tax is paid. A penalty of MUR 2,000 for each month or part of a month is also prescribed for failure to file a return, subject to a maximum of MUR 20,000.

**Tax audit process**
Tax audits are carried out on a sample basis throughout the year. Generally, the audits are fairly detailed, but more protracted enquiries are carried out into cases where fraud is suspected.

**Statute of limitations**
While there is no statutory time limit for recovering tax already assessed, the Director General is barred from making an assessment for a period beyond four years preceding the current tax year.
**Mexico**

**Significant developments**
There have been no significant corporate tax developments in Mexico during the past year.

**Taxes on corporate income**

**Federal corporate income tax (CIT)**
CIT applies to Mexican resident taxpayers’ income from worldwide sources, as well as to foreign residents on the income attributed to their permanent establishments (PEs) located in Mexico.

According to the 2013 Mexican tax reform, the federal CIT rate for 2013 remains at 30%. Beginning in 2014, the rate will drop to 29% and then back to 28% (as was in force until 2009) in 2015.

All corporate entities, including associations of a civil nature, branches, etc., are subject to the tax rules applicable to Mexican corporations (unless specifically ruled out, such as not-for-profit organisations).

Taxpayers engaged exclusively in agriculture, livestock, fishing, and forestry activities are subject to a reduction of 30% of their tax liability (prior to 2013, the reduction was 25%).

Provisions to recognise the effects of inflation for tax purposes in the areas of monetary assets and liabilities (annual monetary adjustment) and depreciable assets are provided in the income tax law, even though recent inflation rates have been decreasing.

Once a corporation has paid its CIT, after-tax earnings (i.e. earnings arising from the after-tax earnings account, Cuenta de Utilidad Fiscal Neta or CUFIN) may be distributed to the shareholders with no tax charge at the corporate level and without income tax withholding, regardless of the tax residence of the recipient. Nonetheless, if a corporation makes a distribution out of earnings that for any reason have not been subject to CIT, such as distributions of book earnings (i.e. not yet recognised for tax purposes in Mexico), the corporation will be subject to CIT on the grossed-up distributed earnings (gross-up factors are: 1.4286 in 2013, 1.4085 in 2014, and 1.3889 as of 2015).

Tax paid on dividends distributed in excess of CUFIN can be credited against the CIT of the year or in the two fiscal years following the year in which the tax on the non-CUFIN
distributions was paid. The CUFIN of the tax years in which the credit is applied must be reduced by an amount equal to the grossed-up dividend distribution.

**Federal flat tax**
The flat tax applies to Mexican resident taxpayers' income from worldwide sources, as well as to foreign residents on the income attributed to their PEs located in Mexico. The current flat tax rate is 17.5% and is applied to the flat tax base.

In general, the flat tax base is the excess of income actually collected relating to: (i) the sale or disposal of property, (ii) the provision of independent services, and (iii) the granting of temporary use or enjoyment of assets (i.e. rental income and unrelated party royalty income) over amounts actually paid for: (i) the acquisition of assets, (ii) the receipt of independent services, and (iii) the temporary use or enjoyment of assets, as well as certain (iv) other cash expenses, with the exceptions noted below. Even though there are no tax losses for flat tax purposes, a tax credit (with similar results to the application of net operating losses) may be available where flat tax deductions exceed income in a fiscal year, provided certain conditions are met. This credit may be used against flat tax liabilities for the subsequent ten years.

Salaries and wages, employer contributions to the social security system, non-taxable employee benefits, most interest income, and royalties received from related parties for the temporary use or enjoyment of intangible assets are not included within taxable income under the flat tax legislation. Accordingly, payments in respect of these types of expenses are non-deductible items. Nevertheless, the employer can obtain a flat tax credit on ‘taxable’ wages paid and social security contributions made, which is generally equivalent to deducting these two items.

Certain taxpayers are exempt from flat tax.

The flat tax operates as a supplemental tax to CIT, to the extent the flat tax due is higher than the income tax due for the fiscal year. Hence, the initial flat tax triggered is reduced by a ‘credit’ for an amount equal to CIT of the fiscal year plus any CIT on distributions exceeding the balance of the after-tax earnings account (i.e. non-CUFIN distributions).

Flat tax is computed on a cash-flow basis (with certain exceptions) and determined per calendar year. Nevertheless, advanced monthly flat tax payments are made based on the year-to-date flat tax gross income, minus the authorised deductions in that same period.

Depreciation and amortisation are not deductible for flat tax purposes since the purchase price paid on the acquisition of fixed assets is a deductible item.

*Maquiladoras* (i.e. foreign-owned companies that process and/or assemble temporarily imported materials and parts for re-exporting) are subject to specific provisions that can significantly reduce their effective flat tax rate, to the extent certain conditions are satisfied. Financial sector entities are subject to flat tax on their financing intermediation margin, less certain cash expenses paid, pursuant to specific rules applicable to these entities in the flat tax law.

**Local income tax**
There are no state taxes on corporate net income.
Corporate residence

The federal tax code provides that corporations are deemed residents in Mexico if the principal centre of administration or the effective place of management is located in Mexico. A specific definition of ‘tax resident’ in any tax treaty overrides domestic law definitions, provided the taxpayer is eligible to apply the treaty.

When a company ceases to be a Mexican resident in terms of the Mexican federal tax code or any tax treaty, it is deemed to be liquidated for tax purposes. In such cases, a notification is required at least 15 days before the change, and the CIT return must be filed with the Mexican tax authorities within 15 working days following the date on which the change of tax residency takes place.

Permanent establishment (PE)

The income tax law considers a PE to be any place in Mexico where business activities or services are carried out or rendered by non-residents, such as agencies, offices, mining exploration sites, or any other place of exploration, extraction, or exploitation of natural resources, regardless of the length of time involved.

A foreign insurance company could also be considered as having a PE when it engages in activities consisting of insuring risk or collecting premiums (with the exception of reinsurance activities) in Mexico through a party other than an independent agent.

Sites used for display, storage, or purchasing facilities; inventories imported in-bond to be processed by a third party; short-term construction services; and offices to carry out auxiliary or preliminary activities and information gathering or scientific research are not considered to create a PE in Mexico. Non-residents may also keep merchandise in bonded warehouses (including merchandise delivered for importation into Mexico) without being considered as having a PE.

A non-resident is not considered to have a PE in Mexico as a result of the legal or economic relationships maintained with companies carrying out certain inventory processing activities (i.e. Maquiladoras) that process goods or merchandise maintained in Mexico by the non-resident by using assets provided by the non-resident or any related party, as long as certain requirements are met. The requirements include the conditions that the non-resident be resident in a tax treaty country and that the Maquiladora complies with the transfer pricing provisions provided in the Mexican income tax law.

Maquila operations are generally defined as those with the following characteristics:

- Raw materials are supplied by a foreign resident (with which a Maquila contract is in place) and are temporarily imported to be processed, transformed, or repaired and are subsequently exported, including, for these purposes, virtual import-export operations.
- The Maquila is also permitted to import goods in accordance with the permanent importation regime. Additionally, local purchases are allowed, as long as such goods are consumed in production and/or exported with the temporarily-imported inventory.
- The processing, transformation, or repair of goods must be performed with temporarily-imported machinery and equipment (M&E) that is the property of the foreign principal. In this regard, the foreign principal must own at least 30% of such M&E. It is important to mention that this M&E may not have been previously owned by the Maquila or by any other Mexican related party.
Mexico

The limits for M&E will not apply to companies that were operating under an IMMEX program (Maquiladoras/in-bond processing companies) prior to 31 December 2009, provided such companies have fulfilled all of their tax obligations, including those related to the transfer pricing safe harbour options under the income tax law.

Parties resident abroad and engaged in Maquila operations through shelter Maquila companies may not be considered as creating a PE in Mexico when certain requirements are met and certain information is provided to the Mexican Tax Administration in relation to the gross revenues earned and income taxes paid by its non-Mexican related party.

A definition of PE in any tax treaty overrides domestic law definitions where the taxpayer is eligible to apply the corresponding tax treaty.

Other taxes

Value-added tax (VAT)

VAT is payable at the general rate of 16% on sales of goods and services, as well as on lease payments and imports of goods and services, except in the border zones, where a 11% VAT rate generally applies (except on the sale of construction and developed real estate, which is subject to the general rate). The sale of medicines, as well as the sale of most food products, is zero-rated. The principal VAT-exempt transactions are the sale of land, credit instruments (including equity shares), residential construction, interest paid by banks, medical services, education, salaries and wages, rentals of residential property, and the sale of non-amortisable participation certificates on real estate investment trusts (REITs), provided specific requirements are satisfied.

The sale in Mexico of temporarily imported goods by non-residents to (i) other non-residents, (ii) Maquiladoras, or (iii) companies in the automotive industry is also VAT-exempt under certain circumstances.

The 0% VAT rate, which generally means that no VAT is payable, is applicable to a substantial number of transactions, including the sale of books, magazines, and newspapers published by the taxpayer, the exportation of goods and certain services (including some Maquiladora activities intended for exportation), the sale of certain basic foodstuffs, agricultural goods and services, sales and rentals of farm machinery and equipment, and other specified transactions.

Taxes paid by business enterprises on their purchases and expenses related to VATable activities (including activities subject to the 0% VAT rate) may usually be credited against their liability for VAT they collect from customers on their own sales, services rendered, etc. The input VAT credit on goods or services of a general nature, or those not specially identified with either taxable or exempt activities for VAT purposes, is computed based on a VAT ratio proportional to the VATable versus VAT activities (taxable and exempt) carried out by the taxpayer. Creditable VAT paid on purchases and expenses in excess of VAT collected from customers is recoverable via either a refund, offset against other Federal taxes, or a credit against subsequent VAT liabilities.

VAT is a ‘cash basis’ tax, with few exceptions (e.g. VAT on some types of interest must be paid on an accrued basis); consequently, only the receipt of payment for goods or services triggers the output VAT liability, and an input VAT credit may be claimed only when the taxpayer pays VAT to its providers of goods and services. VAT is calculated for
each calendar month as a final tax. In addition, VAT overpayments may be used to offset the tax liabilities arising from other federal taxes.

VAT must generally be withheld by Mexican residents acquiring or leasing tangible goods from non-residents if such foreign residents do not have a PE in the country to which income is attributed. Mexican business entities are required to withhold VAT on payments to individuals or entities for services consisting of ground transportation of goods. Mexican corporations must also withhold VAT on commissions paid to individuals, as well as on independent services rendered by Mexican individuals, and on tangible goods leased from individuals.

An information return related to the VATable activities carried out by the taxpayer must be filed on a monthly basis. Definitive monthly VAT payments are required by the 17th day of the immediately following month.

**Customs duties/import tariffs**
Mexico's commercial conditions provide an excellent business and investment opportunity. Mexico is a member of the World Trade Organization (WTO), the Asia-Pacific Economic Cooperation Mechanism (APEC), and the Organisation for Economic Co-operation and Development (OECD).

Mexico lies in a strategic geographical location for international trade, sharing borders with the United States (US), while facing Europe and Asia, and representing an easy entry to the rest of Latin America.

Mexico has signed 12 Free Trade Agreements (FTAs), which provide for preferential duty rates on foreign trade operations with 43 countries. FTAs signed by Mexico include the North American Free Trade Agreement (NAFTA) and agreements with Colombia; Costa Rica; Nicaragua; Chile; the European Union (EU); Israel; Honduras, Guatemala, and El Salvador (the Northern Triangle FTA); the European Free Trade Association; Uruguay; and Japan. Most FTAs provide 0% duty rates for almost 90% of the goods to be imported.

General Import Duty rates range from 0% to 35%, but most imports fall within the range of 3% to 20% (exceptionally, certain food products, shoes, and textiles pay higher duties).

In general, temporary imports are exempt from customs duties (except for fixed assets in certain transactions) and VAT payments.

**Excise tax**
The excise tax law (Impuesto Especial Sobre Producción y Servicios or IEPS) levies substantial federal excise rates on the importation and/or sale of certain taxable items, such as gasoline (% variable), beer (26.5%), wine (26.5% to 50%), spirits (53%), and cigarettes and other tobacco products (160% plus an additional quota), and on certain services related to these activities, such as commission, mediation, and distribution of excise taxable items, as well as services for raffles and gambling (30%). Excise tax is also applicable to certain telecommunications services (3%).

In general terms, goods are exempt from IEPS when exported. Consequently, the input IEPS paid by exporters on their purchases is not creditable, and that tax becomes an additional cost.
Mexico

IEPS is payable (output tax) and creditable (input tax) on a cash basis. It is payable on the date that the charge invoiced is collected from the client and can be credited when the respective payment is made to the supplier. On imports, IEPS is creditable when paid at the customs offices.

In certain cases, the IEPS legislation allows taxpayers that are not subject to this tax to credit IEPS paid on the acquisition and/or the importation of certain goods.

There is a specific procedure to calculate the tax for beer producers, bottlers, and importers; however, the tax can never be lower than 26.5%.

Among other obligations, IEPS taxpayers must file information regarding their 50 main clients and suppliers before the Mexican Tax Administration on a quarterly basis.

**Property taxes**
Annual taxes on real property are levied by the Federal District and all the states at widely varying rates applied to values shown in the property tax records. Assessed values have increased substantially recently in the Federal District and some other areas.

**Title transfer taxes**
The transfer of real estate is, almost without exception, subject to a variable transfer tax at rates averaging 3% to 4%. The tax is levied by most states and the Federal District.

**Stamp taxes**
There are no stamp taxes in Mexico.

**Compulsory profit sharing**
Although not a tax, every business unit with employees (irrespective of the type of organisation) is required to distribute a portion of its annual profits among all employees, except directors and general managers. The amount distributable to the employees in most cases is 10% of taxable income, adjusted to eliminate income or deductions that relate to the recognition of inflation and include dividend income. Special rules apply to a limited number of specific businesses.

No profit sharing is paid during the first year of operations. Also, special rules apply for personal service entities and for entities deriving their income from rental activities, both of which can limit their profit sharing payment to the equivalent of one month of regular salary.

The profit sharing amount paid out is a deductible item for CIT purposes, provided certain requirements are met.

**Vehicle taxes**
There is no federal tax on the ownership of vehicles; however, the states may impose a similar tax.

Tax is still levied on the acquisition of new vehicles. This tax is payable in addition to the VAT on the purchase. Note that some vehicles considered as ‘hybrid’ (e.g. battery assisted vehicles) are not subject to the new vehicle acquisition tax.
Tax on cash deposits (IDE)
IDE is applicable at 3% on monthly cash bank deposits exceeding 15,000 Mexican pesos (MXN) or its equivalent in foreign currency. This tax can be credited against certain taxes, including CIT.

Payroll taxes
Most Mexican States levy a relatively low tax on salaries and other income earned by employees, which is payable by the employer (e.g. Mexico City imposes a 2% payroll tax payable by the employer).

Social security contributions
Employers and employees are required to make contributions to the social security system. These contributions are based on the daily salary plus any other compensation paid to the employee.

Branch income
Mexican branches of foreign corporations (i.e. PEs) are generally subject to the same tax rules as Mexican corporations, with some exceptions. Such exceptions include that branches may deduct pro rata allocations of head office expenses, provided certain requirements are complied with (such as the existence of an applicable tax treaty and a comprehensive agreement for the exchange of tax information between the relevant territory and Mexico), but may not deduct remittances to their head offices, even when such remittances are classified as royalties, fees, commissions, services, or interest.

In general terms, profit distributions to the head office (other than those regarded as a return to the head office of the capital invested into the branch) either in cash or in kind from branches or other PEs are subject to the statutory corporate tax rate on the grossed-up distribution, unless the remittance is made from the CUFIN account balance (i.e. the after-tax earnings account).

Income determination

Recognition of income
Income is generally recognised on an accrual basis. However, the service revenues of civil entities that render professional services (e.g. law and accounting firms) are reported on a cash basis.

Inventory valuation
The costing system to be used will be the incurred cost system, based on historic costs or pre-determined costs. If the requirements provided in the regulations of the income tax law are met, the direct cost system (based on historical costs) may be used.

Inventory may be determined by any of the following methods:

- First in first out (FIFO).
- Last in first out (LIFO).
- Identifiable costs.
- Average cost.
- Retail.
Mexico

The FIFO and LIFO methods must be applied to each type of merchandise and each movement. The monetary FIFO and LIFO methods may not be used. Taxpayers selling goods that are identifiable by serial numbers, at a cost exceeding MXN 50,000, must determine their inventory by the identifiable cost method.

Once elected, a method is compulsory for five years and can be changed only if the requirements established in the regulations of the income tax law are fulfilled. The monetary results of the change in method are amortised over the following five years.

For accounting purposes, different methods and certain variations can be adopted. However, a record of the differences must be maintained, and such difference will not be taxable or deductible.

The cost of imported goods may be deducted (and included in the cost of goods sold) only if it can be supported that the goods were legally imported into the country.

**Capital gains**

Capital gains are taxed as follows.

**Securities**

Gains on securities are included in regular taxable income. There are two different procedures for computing the tax basis of a Mexican company’s shares, depending on the period for which the shares are held (i.e. whether less or more than 12 months).

The tax basis of shares of Mexican corporations sold may be increased by the inflation adjustment applicable for the holding period.

In the case of shares with a holding period of more than 12 months, there are certain items to be considered when computing the tax basis, such as: (i) the movement in the after-tax earnings account (CUFIN) of the issuing company (including the possible negative CUFIN effects), as adjusted for inflation, (ii) the unamortised prior years’ tax losses at the date of the sale, (iii) tax losses arising prior to the date on which the shares were acquired and amortised during the holding period, and (iv) any capital reductions of the issuing company.

When the sum of: (i) the CUFIN balance at the date of acquisition of the shares, (ii) the capital reductions paid, (iii) the unamortised prior years’ tax losses at the date of the sale, and (iv) the negative CUFIN balance of the issuing corporation is higher than the sum of: (i) the CUFIN balance at the date of the sale and (ii) the tax losses arising prior to the date on which the shares were acquired, and amortised during the shares’ holding period, the difference must be subtracted from the tax basis of the shares to be disposed of (potentially resulting in the shares’ tax basis being equal to zero).

When the aforementioned difference exceeds the tax basis of the shares disposed of, this excess (restated by inflation) must be subtracted from the tax basis of the shares in any subsequent share sale by the same taxpayer, even if the shares are issued by a different company.

The aforementioned procedure allows the average cost (tax basis) of the shares to be determined, which is then updated and considered as the acquisition cost for future sales.

A different but simpler procedure applies for computing the tax basis of shares held during a period of 12 months or less.
Deduction of losses arising from the sale of shares is limited to the value of gains from similar transactions in the same or the following ten fiscal years. Losses may not be deducted by non-residents selling shares.

A gain from the sale of shares is considered Mexican-source income when the transferred shares are issued by a Mexican resident or when more than 50% of their book value arises directly or indirectly from immovable property located in Mexico, including cases where the shareholding is structured in different levels.

In general terms, the sale by non-residents of shares issued by a Mexican company is subject to a 25% withholding tax (WHT) applicable to the gross amount of the transaction (i.e. without deductions). However, there may be the option for gains realised by non-residents on the sale of shares issued by a Mexican company to be taxed by applying the statutory 30% rate to the net gain (i.e. the value of the transfer less the tax basis of the shares). The tax rate for these purposes is the same as that applicable to corporate taxpayers in each year, as mentioned above. Hence, in 2014 the rate will be reduced to 29% and to 28% in 2015.

This net income election is available only if the foreign shareholder is resident of a country that is not considered a ‘preferred tax regime jurisdiction’ (tax haven) or a country with a territorial tax system. The non-resident seller must have previously appointed a representative in Mexico and have a public accountant assigned to issue a statutory tax audit report on the transfer of shares. The public accountant issuing the respective report must specify the accounting value of the shares sold and explain the factors used in determining the sales price and the market value of the shares if shares are sold between related parties.

The representative is jointly liable for the tax on the sale of shares, even when the statutory report is issued by a public accountant.

The tax authorities may authorise the deferral of taxes that would otherwise be triggered by the transfer of shares in a group reorganisation (the authorisation must be obtained prior to the share transfer). The price used on the transaction must be at arm’s length. The tax deferred, adjusted for inflation, is due upon the sale of the originally transferred shares outside the same interest group. An interest group consists of shareholders that have over 50% common voting stock of the companies.

In principle, authorisations for tax deferral are not granted if the party acquiring or selling the shares is resident in a tax haven or is a resident of a country that has not signed a comprehensive exchange of information agreement with Mexico. However, in the latter case, an authorisation may still be granted if the taxpayer provides documentation to the Mexican tax authorities stating that the taxpayer has authorised the foreign tax authorities to provide information to the Mexican authorities regarding the operation in question.

If the share sale qualifies as an exempt reorganisation under tax treaty rules, the non-resident must appoint a legal representative in Mexico prior to the sale and file a notice with the Mexican Tax Administration informing them of such appointment and the details of the reorganisation process intended to be carried out. Additionally, certain formal requirements are established in the regulations of the Mexican income tax law that must be satisfied when carrying out this type of transaction.

Tax treaty rules (optionally) override domestic law rules when the seller resides in a tax treaty country.
Shares sold through the stock market
In certain specific cases, the sale of shares is exempt from CIT when such shares are disposed of by individuals and residents abroad through authorised stock markets to the extent that certain requirements are met.

Real estate
In determining the taxable gain of real estate, the cost basis of land and buildings may be adjusted (i.e. increased) for tax purposes on the basis of the period of time for which the assets have been held. This adjustment is performed by applying inflation adjustment factors to the net undepreciated balance. Similar rules apply to non-residents electing to pay tax on net income by appointing a legal representative in Mexico. The rate of tax on the net gain is 30% (in 2014 the rate will be reduced to 29% and to 28% in 2015). Otherwise, the 25% final WHT on gross income applies to non-residents.

Machinery and equipment
Gains or losses from the disposal of machinery, equipment, and other fixed assets are also calculated after adjusting the basis in these assets, by applying inflation factors to the net undepreciated balance.

Inflationary gain or loss
Taxpayers are required to calculate an adjustment for inflation (resulting in additional taxable income or deductible expense) on an annual basis by applying the percentage increases in the National Consumer Price Index (NCPI) to the value of essentially all liabilities, reduced by monetary assets, including bank balances, investments (except in shares), and some debt and receivables.

Dividend income
Dividends received by Mexican corporations from other Mexican corporations need not be included in gross income. However, dividend income is subject to the 10% compulsory profit sharing and must be included within the recipient corporation’s CUFIN.

No further taxes apply on dividends distributed out of the CUFIN. However, non-CUFIN distributions (i.e. distributions that for any reason have not been subject to CIT) are generally subject to tax at the level of the distributing company at the general income tax rate on the grossed-up distribution.

Interest income
Interest received by Mexican corporations is generally subject to tax on an accrual basis and included in gross income (see also Inflationary gain or loss above).

Foreign income
A Mexican corporation is taxed on foreign-source income when earned. Double taxation is reduced, or possibly avoided, by means of foreign tax credits. However, the undistributed profits of a foreign subsidiary are not subject to Mexican tax until dividends are paid, with the exception of companies with investments in entities located in a tax haven (‘income subject to preferred tax regimes’), in which case income is generally taxable even if no distributions are received from those entities.

Investments in tax havens (income subject to preferred tax regime)
Investments in tax havens include those made directly or indirectly in entities, branches, real property, shares, bank accounts, or investment accounts, and any kind
of participation in entities, trusts, joint ventures, or investment funds, as well as in any other similar legal entities created or incorporated in accordance with foreign law and located in a tax haven, and including those that are carried out through an intermediary.

A business, entity, trust, or joint venture is considered to be located in a tax haven when it has a physical presence, an address, a post office box, or effective management in a tax haven, or when its bank account is held in or through financing entities located in a tax haven.

Unless it can be demonstrated that the taxpayer does not have management control of the foreign investments, the taxpayer must include the income generated through such entities or foreign vehicles in the proportion that corresponds to their direct or indirect participation in the capital of the entity or vehicle.

Income and profits subject to preferred tax regimes (PTRs) are taxed separately. This income cannot be combined with other taxable income or losses and it is not considered for purposes of making advance income tax payments. Tax applicable to this type of income is payable together with the annual CIT return.

The classification of a PTR is not based on the location of the investment but on the tax effectively paid on the income generated abroad. An investment is considered subject to a PTR if the income tax paid abroad is less than 75% of the income tax that would have been incurred and paid in Mexico if the income had been taxed under Mexican rules.

In general, interest income and the annual inflationary adjustment made to liabilities of the investment in the tax haven are included in taxable income without subtracting the annual inflationary adjustment on receivables. However, the annual inflationary adjustment on receivables may be subtracted from interest income earned, provided an information return is filed.

Tax on investments in a PTR is determined by applying the general CIT rate to taxable income. Additionally, net operating loss carryforwards associated with an investment in a PTR may be amortised against the tax profit of the following tax years arising from investments in a PTR, and tax deductions related to the investment may also be applied, as long as accounting records pertaining to those investments are available and the annual information return on the investments is filed on time.

Undistributed income from investments in entities located in a PTR need not be immediately included in taxable income (under the provisions discussed above) in certain particular cases (e.g. income arising from qualified active business activities in accordance with the applicable legislation and in the case of indirect investments in a tax haven when certain strict conditions are met).

Income earned in a PTR will be taxed until its distribution where the PTR income arises from a business activity. This treatment will not be applicable, however, if income such as interest, dividends, royalties, certain capital gains, and rents (i.e. passive income) represent more than 20% of the total income generated.

Other specific cases of income on which the tax may apply until distribution include the case of share transfers within the same group and for income derived from royalties and interest that do not represent a tax deduction for Mexican tax residents to the extent that certain specific requirements are fulfilled.
Maquiladoras
As discussed in the Corporate residence section, companies operating under an IMMEX program (Maquiladoras/in-bond processing companies) are considered to not have a PE in Mexico. This is the case for the non-resident principal that owns the M&E and inventory, to the extent it is a resident of a country that has a tax treaty in force with Mexico, complies with all the terms and requirements of the treaty, satisfies any mutual agreements between Mexico and its treaty partner, and complies with the transfer pricing provisions provided in the law. This relief applies only if the Maquiladora complies with any of the following options stated under the domestic law:

- Maintenance of documentation on transfer pricing in accordance with the applicable legislation, adding to the Maquila fee 1% of the net book value of the M&E owned by the foreign related company and used by the Maquiladora in its activities.
- Reporting of a taxable income margin of a minimum of the higher of:
  - 6.9% of the value of assets used in the Maquila activity (including the inventories and fixed assets owned by the foreign related party) or
  - 6.5% of the value of the operating costs and expenses of the Maquiladora.
- Maintenance of documentation on transfer pricing using the transactional net margin method (TNMM) and considering a return on the net book value of M&E owned by the foreign related company used by the Maquiladora in its activities, adjusted by financing terms.

Maquiladoras that apply the first or third option may request an advanced pricing agreement (APA) from the Mexican tax authorities. However, this APA is not mandatory in order to obtain the PE exemption.

Maquiladoras that apply any of the three options above are not required to file an annual information return on transactions with foreign related parties. This exemption is only available in respect of the Maquila activity.

If the Maquiladora renders services other than exported Maquila services (including domestic sales), specific transfer pricing requirements apply and potential PE issues must be evaluated.

In general terms, the Maquiladoras receive a significant reduction on their effective income tax and flat tax rates to the extent certain conditions are satisfied and several tax returns and notifications are filed.

Deductions
The applicable deduction requirements must be complied with no later than the last day of the tax year to which the deduction applies, although the invoice supporting the expense may be provided up to the date on which the tax return for the period in question is filed (or comes due). An expense invoice must contain a date within the year for which the deduction is claimed.

Deductions for certain business expenses are limited in the case of business meals and use of company owned cars.

Depreciation and amortisation
Straight-line depreciation is permitted at the rates specified in the law (i.e. estimated lives for assets are 20 years for buildings, 3.3 years for computers, 4 years for cars, 10
years for certain machinery and equipment, etc.), and the deduction may be increased by applying the percentage increases in the NCPI from the month in which the asset was originally acquired. When an asset is disposed of or becomes useless, the remaining undepreciated historical cost may also be deducted, after application of the appropriate inflation adjustment factor to the undepreciated historical cost.

Intangible assets for the exploitation of goods that are in the public domain, or for rendering public services under concession, are considered deferred assets (i.e. not deducted as incurred). Therefore, these assets are subject to amortisation for income tax purposes.

Specific annual depreciation rates are established for goods used in certain industries.

**Goodwill**
Goodwill is a non-deductible item for Mexican tax purposes, and the corresponding input VAT (if any) will not be creditable.

**Start-up expenses**
Start-up expenses incurred prior the commencement of operations may be amortised at the rate of 10% per year, after applying the adjustment factors. Taxpayers engaged in mining exploitation may also elect to deduct start-up expenses as incurred.

**Interest expenses**
In general terms, interest expenses are deductible items if, among others, the principal is invested in the main activity of the Mexican taxpayer, withholding obligations are complied with, informative returns disclosing information related to the loan and transactions carried out with related parties are filed, thin capitalisation rules (3:1 debt-to-equity ratio) are satisfied, the transaction is at arm’s length, and the interest does not fall into the deemed dividend criteria.

**Bad debts**
Bad debts may be deducted on the earlier of the date in which the debt prescribes or the date in which the taxpayer substantiates the practical impossibility of collection, as defined by the law, among other detailed rules.

**Charitable contributions**
The maximum amount for deductible donations is limited to 7% of the taxable income of the previous year.

**Fines and penalties**
In general terms, fines and penalties are non-deductible items for income tax purposes, except interest for underpayment of taxes.

**Taxes**
In general, all federal, state, and local taxes levied on a company (not including those required to be withheld from other parties) represent deductible expenses for CIT purposes, with the following exceptions:

- CIT.
- Flat tax.
- Federal VAT and excise tax when the company is entitled to credit the tax.
- Taxes on acquisitions of fixed assets and real estate, which must be capitalised and deducted as part of the total cost of such assets to be depreciated.
Mexico

**Net operating losses**
Subject to certain limitations, losses incurred in prior years by a business may be carried forward and deducted from income earned over a subsequent ten-year period. Net operating loss carrybacks are not allowed.

Losses carried forward may be increased by the percentage increase in the NCPI between the seventh and 12th months of the fiscal year in which they are incurred and thereafter up to the sixth month of the fiscal year in which they are applied.

Tax loss carryforwards are non-transferable; however, they can be used by the surviving entity in a merger, with certain restrictions. In the case of a spin-off, tax loss carryforwards can be divided between the surviving entity and the spun-off entities in proportion to the following:

- Inventories and accounts receivable transferred in the case of commercial entities.
- Fixed assets transferred, in all other cases.

Current tax legislation limits the utilisation of tax losses in changes in ownership, with certain exceptions and limitations.

**Payments to foreign affiliates**
Taxable income and authorised deductions must be determined on the basis of prices that would be agreed with independent parties in comparable transactions (arm’s-length values).

For this purpose, taxpayers must secure and maintain contemporaneous documentation supporting transactions with related parties residing abroad, demonstrating that income and deductions are based on market values. This documentation must be prepared per type of transaction and must include all operations carried out with related parties.

Domestic transactions must also be supported by the application of a recognised transfer pricing method selected in accordance with the preferred ordering methods determined in the legislation.

Payments made to residents of tax havens (or PTRs) are considered non-deductible unless it can be demonstrated that the price of the transaction is the same that would have been set between or among unrelated parties in comparable transactions. Unless the contrary is demonstrated, it is assumed that operations with companies, entities, or trusts resident in a PTR are carried out between or among related parties and that prices are not set as they would be in comparable operations between or among independent parties.

The sales price of shares (other than publicly traded shares) sold to a related party must be set at market value and the transaction must be supported by the corresponding contemporaneous transfer pricing documentation.

In order to be deductible, payments of technical assistance fees and for the transfer of technology or royalties must be made directly to companies with the required technical capabilities to provide the corresponding service and should correspond to services actually received.

Payments to non-residents of a prorated portion of expenses (i.e. allocations of expenses) are not deductible for Mexican corporations.
**Group taxation**

The income tax law contains a chapter that allows certain holding companies to file a consolidated income tax return with their majority-owned subsidiaries. Tax consolidation is applicable for CIT purposes but not for other taxes (e.g. flat tax and VAT) or compulsory employee profit sharing.

The principal requirements for a company to qualify as a holding company for fiscal consolidation are that it must be a Mexican tax resident with no more than 50% of its shares owned by other companies, regardless of their country of residence. Shares that qualify as placed among the general investing public and non-voting shares are not considered for this purpose.

Where more than 50% of the holding company’s shares are held by a foreign corporation, the above qualifying rule precludes the possibility of filing a consolidated return for a Mexican group, for companies that would otherwise qualify. However, there is an exception in cases where the foreign corporation that owns the shares of the Mexican holding company is a resident in a country that has executed a comprehensive agreement for the exchange of tax information with Mexico.

As of May 2013, Australia, Austria, Bahamas, Bahrain, Barbados, Belgium, Belize, Bermudas, Brazil, Canada, Cayman Islands, Chile, China, Cook Islands, Costa Rica, the Czech Republic, Denmark, Ecuador, Finland, France, Georgia, Germany, Greece, Guernsey, Hungary, Iceland, India, Isle of Man, Italy, Japan, Jersey, Lithuania, Luxembourg, Moldova, New Zealand, the Republic of Korea, the Netherlands, the Netherlands Antilles, Norway, Panama, Poland, Portugal, Romania, Russia, Samoa, Singapore, Slovak Republic, South Africa, Spain, Sweden, Switzerland, Ukraine, the United Kingdom, the United States, and Uruguay have agreements of this nature with Mexico, and other agreements or tax treaties that might contain such an agreement are awaiting ratification or being negotiated.

The Mexican Tax Administration must authorise the application of the consolidation regime, and financial statements and written consent of the legal representative must be filed before 15 August of the year prior to the first year of consolidation to request the proper authorisation. There is a minimum five-year period of fiscal consolidation, and special consolidated tax accounts should be prepared by the consolidated group.

There are some entities that are non-qualifying entities for inclusion in the consolidation regime, such as non-profit entities, credit institutions, insurance corporations, trusts, auxiliary credit institutions, stock exchange entities, foreign exchange houses and capital investment companies, non-resident companies, companies in liquidation, civil or social associations, and cooperatives.

In general terms, the consolidation regime allows certain benefits, such as:

- Individual company loss offset against profits of other companies in the same group during a deferral period.
- Deferral of tax on dividends in excess of the individual CUFIN, to the extent that the dividend flow remains within the consolidation group.
- Capital losses in the holding company from the sale of subsidiaries deducted as an ordinary loss in the year.

These deferral benefits are subject to recapture and may be triggered if:
Mexico

- A member leaves the consolidated group.
- The ownership percentage is reduced.
- The group is deconsolidated.
- Tax loss carryforward expires.

Even if the above does not occur, most of the consolidated benefits will be recaptured in five years, and the deferred income tax will be payable with the submission of the tax return starting from 'Year six', as follows:

- 25% in each of years six and seven.
- 20% in year eight.
- 15% in each of years nine and ten.

**Transfer pricing**

Mexican transfer pricing legislation has significantly developed as a result of Mexico’s admission to the Organisation for Economic Co-operation and Development (OECD) in 1994. This development has resulted in the implementation of transfer pricing guidelines that are in line with the global economy and market liberalisation.

In general terms, from a Mexican transfer pricing perspective, all related party transactions (including certain joint-venture relationships) must be reported at arm’s length.

Local legislation allows the selection of both traditional methods and profit-based methods consistent with the OECD guidelines. However, the legislation requires a strict ordering for the application of a method.

Mexican legislation is generally ‘form over substance’ oriented; consequently, contractual terms remain relevant when defining the economic substance of the transactions subject to the transfer pricing analysis.

Reliable financial information is not always publicly available for Mexican entities. Hence, reliance is often placed on foreign information, which is then adjusted to properly reflect local market conditions and render the transactions in question more comparable.

**Thin capitalisation**

Interest generated by excess debt lent by a related party is non-deductible for CIT purposes. Excess debt is defined as more than three times the value of shareholders’ equity (i.e. a 3:1 debt-to-equity ratio) as per the taxpayer’s Mexican generally accepted accounting principles (GAAP) balance sheet.

In principle, all liabilities are considered in determining the annual average liabilities for purposes of calculating the ratio and thereby the disallowed interest expense amount. However, certain liabilities incurred for construction, operation, or maintenance of the productive infrastructure associated with the strategic areas of Mexico may be excluded from this computation.

Taxpayers may also be able to obtain a ruling from the Mexican Tax Administration in order to apply a higher financial leverage (i.e. not the 3:1 debt-to-equity ratio), owing to the characteristics of their activities. Also, the thin capitalisation rules do not apply to the financial sector.
In addition, taxpayers are entitled to use the sum of the average balances of the capital contributions account (CUCA) and the CUFIN to determine the 3:1 debt-to-equity ratio instead of shareholders’ equity. Taxpayers that opt for this tax equity computation must continue to use it for at least five years. This alternative computation is mandatory for those taxpayers that do not account for capital following Mexican GAAP.

Specific provisions dealing with the disallowance of interest expenses for debt financing structured though back-to-back loans should also be closely observed.

**Tax credits and incentives**

**Foreign tax credit**
The income tax law allows Mexican corporations and individuals a foreign tax credit on income from foreign sources. The law provides that taxpayers may credit against their Mexican income tax liability the amount of income tax paid in foreign countries on their foreign-source income, as long as such income is subject to income tax in Mexico.

In general, credit is available in respect of foreign income taxes directly withheld from foreign-source income or paid with a tax return filed in the foreign country in the name of the Mexican resident or by a foreign branch of a Mexican corporation. However, in the case of dividends or distributions of profits received from corporations resident in a foreign country, when a Mexican corporation owns at least 10% of the capital of the foreign corporation for six months prior to the dividend, a deemed-paid credit can also be taken for the proportionate part of the underlying foreign CIT paid by that corporation, corresponding to the dividend or distribution of profits received. In calculating the amount of income subject to Mexican tax in these cases, the dividend or distribution must be grossed up to include the proportionate amount of tax paid by the foreign corporation. This credit is allowed also on tax paid on a second holding tier, provided certain requirements are met.

The foreign tax credit will be allowed up to the effective Mexican rate of tax on the taxable income (tax result) shown by the annual return under an ‘overall’ type limitation. Taxpayers who are not in a position to take full credit for the taxes paid to a foreign country on foreign-source income are allowed a ten-year carryforward of such excess foreign taxes, provided certain compliance requirements are met and the credit is limited to the corporate tax rate of 30%.

The Mexican tax authorities have internal criteria that they follow to determine whether or not a foreign tax is considered as an income tax for purposes of applying the tax credit.

**Duty-deferral programs**
A deferral program is an authorisation provided by the Mexican Ministry of Economy to those companies importing raw materials or fixed assets to manufacture finished products within Mexico.

In addition to the benefits described for CIT purposes in the Income determination section, *Maquiladoras* are entitled to the following customs benefits:

- No payment of import duties and VAT for temporarily imported raw materials, as long as they are exported.
- Sales of temporarily imported goods to other IMMEX companies at a 0% VAT rate, under certain circumstances.
- Temporary import of fixed assets without paying VAT.
Another program allowing preferential duty rates is the Sectorial Relief Program (known as PROSEC), which allows manufacturers to apply lower duty rates on the import of raw materials and machinery required for its productive processes, regardless of their country of origin and regardless of if they are for the Mexican market or for export. These programs were created by the federal government in order to establish competitive tariff conditions for Mexican manufacturers needing to import raw materials and fixed assets from non-NAFTA countries due to Article 303 of NAFTA coming into effect.

Companies in Mexico that carry out import operations with values of MXN 300 million per semester, or IMMEX companies, can take advantage of significant customs and administrative benefits if registered into the ‘Certified Company Registry’ (authorised by the Ministry of Finance). In addition, companies that comply with certain requirements regarding controls and security within their supply chain, regardless of the MXN 300 million obligation, can also obtain the Certified Company Registry; this specific type of registry is known as New Scheme of Certified Companies (NEEC for its acronym in Spanish).

In general terms, the main benefits provided by the Certified Company Registry allows simplified procedures to process imports and exports, including the reduction in time and number of reviews when clearing goods at customs facilities.

**Accelerated depreciation**
Investments in certain new fixed assets outside Mexico City, Guadalajara, and Monterrey are entitled to an accelerated depreciation deduction, considered a present value discounted rate of the future stream of depreciation. Some taxpayers may benefit from this deduction in the aforementioned cities if they can show that their business operations do not contribute to pollution and do not require the intensive use of water.

**Research and development (R&D) incentives**
An income tax incentive for taxpayers involved in certain technological R&D projects carried out during the year allows a cash subsidy to be yearly determined by the tax authorities, based on a budget to be approved by the Mexican Congress.

**Employment incentives**
An incentive offers a credit equivalent to 100% of the income tax corresponding to the salary paid to workers/employees with certain types of disabilities.

**Incentives for investments in movie production**
A limited credit is applicable for investments in movie production activities through an immediate tax credit, which is capped at 10% of the total income tax of the prior year, provided certain requirements are met.

**Incentives for investments in theatre production**
A limited credit is applicable for investments in theatre production activities through an immediate tax credit, which is capped at 10% of the total income tax of the prior year, provided certain requirements are met.

**Marginal scarcely inhabited zones**
Taxpayers investing in specific regions of Mexico considered to be ‘marginal scarcely inhabited zones’ (less than 50,000 inhabitants) can receive certain tax benefits, such as a 100% exemption on social security contributions to the extent certain requirements are met and financing benefits for the development of industrial facilities according to the guidelines and limitations provided by the Ministry of Economic Affairs in Mexico.
Real estate investment incentives
Several tax benefits exist for qualifying real estate investments (i.e. Mexican REITs such as FIBRAS, SIBRAS, etc.) in Mexico.

Capital investment
There are certain incentives to encourage risk capital investments in Mexico.

Other incentives
Certain other specific and limited tax incentives are available for taxpayers engaged in certain activities (e.g. those engaged in air or sea transportation of goods or passengers with respect to aircraft and ships with a federal government commercial concession or permit; in the agricultural and forestry sectors; and in-bond warehouses with respect to real property used for the storage, safeguarding, or conservation of goods or merchandise).

Withholding taxes

Payments to Mexican residents
Payments to resident corporations and PEs in Mexico are generally not subject to WHT.

Payments by resident corporations to resident individuals are subject to WHT as follows:

<table>
<thead>
<tr>
<th>Payment</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wages, salaries, and other remuneration</td>
<td>0 to 30</td>
</tr>
<tr>
<td>Fees: Members of boards of directors and advisory boards</td>
<td>30.0</td>
</tr>
<tr>
<td>Other professional fees</td>
<td>10.0</td>
</tr>
<tr>
<td>Lease payments on real property</td>
<td>10.0</td>
</tr>
<tr>
<td>Interest on securities (1)</td>
<td>0.6</td>
</tr>
<tr>
<td>Interest on non-qualified securities</td>
<td>20.0</td>
</tr>
<tr>
<td>Dividends</td>
<td>0.0</td>
</tr>
<tr>
<td>Miscellaneous types of income of individuals, usually sporadic payments</td>
<td>20.0</td>
</tr>
</tbody>
</table>

Note
1. WHT on interest paid by financial institutions to Mexican resident investors is generally set at 0.6% of the invested capital.

To simplify the calculation of interest income from loans entered into with financial institutions, a new procedure has been proposed based on cash flow, which would enter into force on 1 January 2014.

Through this procedure, financial services taxpayers would be relieved from the requirement to withhold the corresponding income tax on the principal of the loan. Income tax withheld would be considered as a final payment for individuals and an advance payment for corporations.

Payments to non-residents
Income tax must usually be withheld from payments to non-resident corporations and individuals. In the case of non-tax treaty countries, the statutory withholding rates are as noted below.
Income tax of 40%, with no deductions, must be withheld on most payments made to foreign related parties located in tax havens, in lieu of the tax provided in the domestic law for non-tax haven residents. This is not applicable in certain cases, such as on income not subject to Mexican taxation in accordance with the regular provisions for income earned by non-residents from a source of wealth located in Mexico, income from dividends, and certain types of interest, including interest payments made to foreign banks. In these cases, the regular provisions of the domestic law should be applied to determine the income tax withholding.

Additionally, revenues for intermediation services, including commissions for brokerage, agents, distribution, and assignment, and generally all income from the negotiation of third-party interests, are also subject to 40% WHT when paid to tax haven related residents. The 40% may be reduced if the beneficiary resides in a country with which Mexico has signed a comprehensive exchange of information agreement.

Non-residents’ wages and salaries are taxed on the basis of a 12-month earnings period at the following income tax withholding rates:

<table>
<thead>
<tr>
<th>Taxable income (MXN)</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>From 0 To 125,900</td>

</tr>
</tbody>
</table>

The above mentioned rates are also applicable to retirement fund payouts.

However, no tax arises on compensation (wages, salaries, or fees other than board fees) paid by a non-resident with no establishment in Mexico (even if not subject to tax) to which the services relate, provided the individual remains in Mexico for fewer than 183 days (consecutive or not) in any 12-month period.

The tax, when applicable, is withheld if the income is paid by a resident (or a non-resident with a PE in Mexico). Otherwise, the tax is generally payable within 15 working days of the associated payment, by the party earning the Mexican-sourced income.

Statutory withholding rates (not mentioned above) under local legislation are as follows:

</table>

Notes

1. The non-resident may elect to pay tax at a rate of 30% in 2013 (see Note 11 below for the rate applicable thereafter) on the net taxable profit in the case of (i) time-sharing services, (ii) share sales, (iii) sales of real property, (iv) activities of sportsmen/artists, and (v) derivative stock and debt transactions, provided that the non-resident recipient of the income has a legal representative resident in Mexico and to the extent that the following specific requirements are met:
   • The resident legal representative must keep the audited financial statements of the taxpayer available for inspection by the Mexican Tax Administration.
For share sales, a tax opinion issued by a registered public accountant is required. For shares and debt-for-equity swap transactions, this election is available only where the foreign taxpayer is not a resident of a country classified as a tax haven or a country with a territorial tax system. It should be noted that there is an option to defer Mexican income tax arising from the sale of shares within the same group due to a corporate reorganisation, provided certain conditions are met and that no legal representative is required for sales of real property by public deed.

2. The sale of shares through the Mexican Stock Exchange and government securities are exempt from income tax withholding, provided certain rules are satisfied.

3. The applicable WHT rate (based on the WHT rates for interest) for debt-derivative transactions is applied on a net basis, that is, gross income less authorised deductions. However, if the transaction is liquidated in kind, the applicable WHT rate (on the same net basis) is 10%.

4. Interest payments to non-residents are exempt from Mexican income tax when they are paid on the following:
   - Loans to the federal government or to the Bank of Mexico (Central Bank) or bonds issued by the latter organisation to be acquired and paid abroad.
   - Loans for three or more years granted or guaranteed by duly registered financial entities that promote exports through special financing.
   - Preferential loans granted or guaranteed by foreign financial entities to institutions authorised to receive tax-deductible donations in Mexico, provided these institutions are properly registered and use the funds for purposes consistent with their status.
   - Loans derived from bonds issued by the federal government or the Bank of Mexico placed on a recognised national stock exchange, to the extent the beneficial owner is a foreign resident.

5. In 2013, a 4.9% WHT rate (the rate has been extended for another year) is applicable when the interest is paid to registered banks resident in countries with which Mexico has signed a tax treaty.

6. The 4.9% WHT rate applies, provided the placement is handled through banks or brokerage firms resident in a country with which Mexico has signed a tax treaty if there is compliance with the information requirements established in the general rules issued by the Ministry of Finance. If there is failure to comply with these requirements, the 10% WHT rate applies. The 4.9% and 10% WHT rates mentioned in the preceding paragraphs do not apply, and instead a 30% WHT rate is applicable to interest, when the direct or indirect beneficiaries of the interest, either individually or jointly with related parties, receive more than 5% of the interest arising from the instrument in question, and are either (i) holders of more than 10% of the voting shares of the issuing company, either directly or indirectly, either individually or jointly with related parties, or (ii) business entities holding more than 20% of their shares, either directly or indirectly, either individually or jointly with parties related to the issuer.

7. The 4.9% WHT rate is applicable to interest payments made to foreign financial institutions in which the Mexican federal government or the Mexican Central Bank has equity participation.

8. The WHT rate is applied to the gross amount of the payment.

9. The non-resident taxpayer may elect to pay 30% (see Note 11 below for the rate applicable thereafter) tax on the net profit in 2013 if the taxpayer has a resident legal representative and so advises the customer, who then makes no withholding. When business activities last for more than 183 days, the foreign taxpayer is deemed to have a PE in Mexico for tax purposes and is taxed in the same manner as a local resident corporation or branch.

10. The 21% federal rate is applied only in the case of non-qualifying prizes (i.e. income derived from prizes that is subject to a state tax that exceeds a rate of 6%).

11. A 30% WHT rate is applicable for 2013. Beginning in 2014, the rate will be reduced to 29% and then back to 28% in 2015. The statutory WHT rates mentioned above may be reduced by applying tax treaty provisions. During the last decade, Mexico has embarked on a policy of negotiating a network of tax treaties with its principal trading and investment partners.

The treaties with the following countries are pending ratification while waiting for the completion of specific formalities by the respective governments in order to become effective, have not been published yet in the Official Gazette, or are under negotiation: Colombia, Estonia, Jamaica, Lebanon, Malaysia, Malta, Morocco, Nicaragua, Pakistan, Peru, Saudi Arabia, Slovenia, Thailand, Turkey, United Arab Emirates, and Venezuela. Note that the tax treaties in force with Belgium and Italy are being renegotiated.

As of May 2013, tax treaties with the countries listed in the following table have been published in the Official Gazette and are in force.

The WHT rates negotiated under the tax treaties are as follows:
## Dividends (%)

Notes

The applicable tax rates on dividends paid abroad in accordance with the tax treaties executed by Mexico are detailed below; however, no withholding is applied on dividend distributions under domestic law.

There are certain specific cases of interest paid to parties resident abroad that might be exempted by certain tax treaties (e.g. interest paid to a pension fund or paid by a bank, interest paid on certain loans granted or guaranteed by certain entities for exports under preferable conditions), which are not detailed in the information below.

1. This rate applies when the recipient corporation that is the beneficial owner of the dividend (except for civil partnerships) directly owns at least 10% of the capital of the distributing corporation. In the case of Barbados, Hungary, and South Africa, the specific exclusion of civil partnerships is not included.
2. This rate applies where the company that is the beneficial owner of the dividends directly or indirectly owns at least 25% of the capital of the distributing company.
3. This rate applies where the company that is the beneficial owner of the dividends (except for civil partnerships) directly owns at least 25% of the capital of the company distributing the dividends. In the case of Norway, taxation is limited to the country of residence of the party receiving the dividends, provided the aforementioned substantial holding rule is satisfied.
4. This rate applies where the recipient corporation that is the beneficial owner of the dividend owns at least 10% of the voting shares of the paying corporation. The Mexico-US tax treaty contains a most-favoured nation clause.
5. This rate applies where a company that is the beneficial owner of the dividends (except for civil partnerships, although limited liability partnerships are included) directly owns at least 10% of the voting shares of the company distributing the dividends.
6. This rate applies where a company that is the beneficial owner of the dividends owns at least 20% of the voting shares of the company paying the dividends.
7. This is the maximum WHT rate for dividends, with no distinction for substantial holdings. In the case of Ecuador and India, the tax payable on dividends paid to residents in Mexico must not exceed a limit established in the treaty.
8. The 5% rate applies when a company that is the beneficial owner of the dividends owns at least 25% of the voting shares of the company paying dividends during the six months prior to the end of the tax period in which dividends are paid. Under certain particular rules and provided this ownership requirement is complied with, dividend payments are only subject to tax in the country of residence of the recipient of the dividends.
9. No withholding applies when more than 50% of the shares of the recipient corporation are owned by residents of France or Mexico or when the beneficial owner of the dividend is a resident individual. Accordingly, the WHT applies to dividends when more than 50% of the recipient corporation's shares are owned by residents of other countries. However, the WHT must not exceed 5% when the party receiving the dividend is the effective beneficiary of said dividend. Dividends paid by a company resident in France to a resident of Mexico, other than a company that directly or indirectly holds at least 10% of the capital stock of the first-mentioned company, may also be taxed in France, in accordance with the law of France, but if the recipient of the dividends is the beneficial owner, the tax thus charged must not exceed 15% of the gross amount of the dividends.
10. The 5% rate applies where the company that is the beneficial owner of dividends directly or indirectly owns at least 10% of the capital of the company distributing the dividends. There is a 10% tax rate that applies when these same ownership requirements are complied with, but the company paying dividends is a resident of Israel (provided dividends are paid from earnings taxed in Israel at a tax rate lower than the regular corporate tax rate in Israel).
11. The applicable tax rate on the gross amount of the dividends when the recipient company (beneficial owner) (except for civil partnerships) directly holds at least 10% of the capital of the corporation paying the dividend must not exceed 5% in the case of Luxembourg and 8% in the case of Mexico. The protocol of the Mexico-Luxembourg tax treaty states that this rate might be reviewed in the future by the contracting states if the WHT is not fully creditable, and can be adjusted under the principle of avoiding double taxation, provided the adjusted WHT rate is not lower than 5%.
12. Dividends paid by a company resident in Mexico to a company resident in the Netherlands (which is the beneficiary of said dividends) are subject to a maximum tax of 5% on the gross amount of...
the dividends if the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the company paying said dividends. However, as long as a company resident in the Netherlands is not subject to Dutch income tax on dividends received from a company resident in Mexico under the terms of the Dutch income tax law and any future amendments thereto, the dividends mentioned in the preceding paragraph may only be taxed in the Netherlands (not in Mexico).

13. The Mexico-New Zealand tax treaty contains a most-favoured nation clause that may be applicable in the future.

14. The exemption on dividend WHT is not applicable in the case of deemed dividends.

15. To the extent certain requirements provided in the Protocol are met, the WHT may be reduced to 0%.

16. The 10% rate applies to loans from banks.

17. The 5% WHT rate is applicable to interest paid to banks.

18. The 5% rate applies to interest on loans from banks, insurance companies, and retirement and pension plans.

19. The 10% rate applies to interest on loans from banks, insurance companies, and securities regularly and substantially traded on a recognised national stock exchange.

20. The 4.9% rate applies to interest on loans from banks and insurance companies and to interest on securities regularly and substantially traded on a recognised national stock exchange.

21. In the case of the Netherlands, the 5% rate applies to interest on loans from banks and to interest on securities regularly and substantially traded on a recognised national stock exchange. In the case of Spain and the United Kingdom, the 5% rate extends to interest paid to insurance companies.

22. The 10% rate applies to interest paid by financial institutions and interest paid to the original seller of M&E.

23. The 10% rate on interest applies in the case of interest paid to the original seller of M&E and interest paid by banks.

24. The 10% rate applies to interest on loans from banks and to interest derived from bonds or securities that are regularly and substantially traded on a recognised securities market, as well as to interest paid by the purchaser of M&E to a beneficial owner that is the seller of the M&E.

25. The 10% rate applies to interest on loans from banks and insurance companies, to interest on securities regularly and substantially traded on a recognised national stock exchange, to interest paid to the original seller of M&E in a sale on credit, and to interest paid by banks.

26. The 5% rate is applicable to interest on loans granted by banks and insurance companies, securities traded on a recognised securities market, and the sale on credit of M&E.

27. It is understood that the definition of royalties applies to any type of payment received for the provision of technical assistance services. The 15% rate applies to royalties arising from the use of, or the right to use, trademarks.

28. The original rate is 15% but has been reduced to 10% as long as the Netherlands does not impose a WHT.

29. Reduced WHT rate results from the application of the most-favoured nation clause.

30. The 5% rate applies to industrial, commercial, and scientific equipment.

31. The 10% rate also applies to fees for technical assistance, which are payments of any kind, other than those mentioned in Articles 14 and 15 of the treaty as consideration for managerial or technical or consultancy services, including the provision of services of technical or other personnel.

32. This rate applies where the company that is the beneficial owner of the dividends directly owns at least 25% of the capital of the distributing company.

33. The treaty broadly defines royalties and includes payments related to certain software.

34. This rate applies where the company that is the beneficial owner of the dividends directly or indirectly owns at least 10% of the capital of the distributing company.

35. The 5% rate applies on the gross amount of the interest paid to, among others, banks and insurance institutions.

---

**Tax administration**

**Taxable period**

In general terms, the taxable period in Mexico is the calendar year.

**Tax returns**

Corporate taxpayers are required to file annual CIT and flat tax returns for the preceding calendar year by 31 March. Holding companies in the tax consolidation regime are required to file an annual consolidated tax return within four months of the end of the tax period (i.e. usually by 30 April).

Thereafter, the taxpayer is generally required to obtain a certification of tax compliance by an independent auditor and to file the related tax compliance opinion by the end of June. This certification process covers all federal taxes other than customs duties.
Business taxpayers meeting certain size criteria or belonging to a group that, as a whole, meets these criteria must also file a tax-compliance audit report on an annual basis with the Mexican Audit Administration. This report consists of audited financial statements and detailed schedules, together with a report by the auditor stating that no irregularities were observed in respect of the taxpayer’s compliance with its federal tax liabilities. These reports must be filled electronically, and the auditor must be an independent certified public accountant (CPA) registered with the Mexican Audit Administration. The amount of detailed information required to be filed, and the auditor’s responsibility in connection therewith, is significant. This obligation is now becoming elective for most companies and, for this, certain application rules will apply, provided also that certain additional information is submitted with their yearly tax return, in lieu of complying with the full certification process.

Employees’ profit sharing payments are generally due by 31 May of the year following that in which the corresponding profit was obtained.

Information returns must also be filed no later than 15 February each year, reporting on, amongst others, the following activities performed in the immediately preceding year:

- Payments made to parties resident abroad.
- Loans received from or guaranteed by non-residents.
- Transactions conducted through a business trust.
- Parties to which the taxpayer makes payments and withholds income tax.
- Parties to which the taxpayer has made donations.
- Parties to which the taxpayer has paid dividends, and the value of such payments.
- Transactions carried out with suppliers and clients, either local or overseas.

Taxpayers making salary payments are also required to file information returns reporting salaries paid and salary credit paid in the immediately preceding calendar year.

An annual information return must be filed on investments made or held in a tax haven. This must be filed in February of the immediately following year.

An information return on transactions carried out with non-resident related parties must be filed together with the annual CIT return (no later than March of the following year).

Annual information returns must also be filed disclosing items used in the flat tax computation.

Payment of tax

Corporate taxpayers are required to make estimated payments of CIT by the 17th day of each month based on their estimated taxable income at the end of the previous month and calculated principally by applying the profit factor to the cumulative monthly gross income. The profit factor is determined by dividing the taxable profit by gross income shown in the annual return for the preceding year, or, if no profit factor is to be found in that annual return, the factor appearing in the year preceding that and so on, up to five years, with certain adjustments. For this purpose, gross income includes nominal income, excluding inflationary adjustments. The balance of CIT for the year is due at the same time as the annual return.
Monthly flat tax advance payments are also required by the 17th day of the immediately following month. The balance of flat tax for the year is due at the same time as the annual return.

Special procedures are provided for computing advance CIT payments and for obtaining authorisation to reduce the amounts of monthly advances after the sixth month of the year. No advance payments or adjustments thereto are required in the first year of operations.

**Tax audit process**
In general terms, for taxpayers that are obligated or elected to file a tax-compliance audit report, the tax audit (tax inspection) may start with a review of the audit report prepared by the independent CPA. At this point, the tax authorities may finish the audit if they are satisfied with the information provided by the CPA; otherwise, tax authorities may initiate a direct review on the taxpayer either at the tax authority's offices or at the taxpayer's facilities. Tax authorities may request several documents from the taxpayer and third parties that carried out transactions with the audited taxpayer.

Tax audits should be concluded within the following 12 months after the audit was initiated. The period to conclude tax audits for taxpayers that are either part of the financial system or consolidated for tax purposes is 18 months. In cases where the Mexican tax authorities request information to tax authorities from foreign jurisdictions, the period to conclude the audit is two years. The above periods might be suspended under certain circumstances (e.g. a judicial recourse or appeal initiated by the taxpayer against the tax authorities). Upon conclusion of the audit, the tax authorities should issue either a notification explaining tax underpayments observed during the audit process or a notification of conclusion if no issues remain open at the end of the inspection.

Finally, tax authorities should issue a notification of assessment within the six months after the conclusion of the tax audit. At this point, all underpayments claimed by the tax authorities become due.

**Statute of limitations**
In general, the right of the tax authorities to collect taxes, review tax returns, or claim additional tax expires five years after the date the respective return is filed. However, in cases where the taxpayer has not secured a federal tax registration number, has no accounting records, has failed to keep accounting records for the required five-year period, or has not filed a tax return, the statute of limitations expires in ten years. Similarly, the period for claiming a refund of overpaid tax expires after five years.

**Topics of focus for tax authorities**
Although there are no formal written communications from the tax authorities dealing with their topics of focus, in recent years the tax authorities have focused audits on transactions with non-residents, inter-company transactions, transfer pricing, social security contributions, and customs duties, among other areas.

**Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA)**
FATCA was enacted in 2010 by the US Congress to target non-compliance by US taxpayers using foreign accounts. FATCA requires foreign financial institutions (FFIs) to report to the US Internal Revenue Service (IRS) information about financial accounts.
Mexico

held by US taxpayers or by foreign entities in which US taxpayers hold a substantial ownership interest.

Mexico signed an IGA with the US Treasury on 19 November 2012 under which Mexican financial institutions are required to report US-owned account information directly to the Mexican tax authority, rather than to the US IRS. The Mexican tax authority will then share that information with the US IRS.

The IGA provides that the United States will reciprocate with the sharing of information.

Mexican tax authorities are set to issue a set of administrative rules for banks to comply with the FATCA IGA.

**Other issues**

**International Financial Reporting Standards (IFRS) adoption**

All companies listed on the Mexican Stock Exchange are required to submit annual consolidated financial statements accompanied by the opinion of a Mexican independent CPA. Commencing in the year ending 31 December 2012, these financial statements must be prepared in conformity with IFRS and cover three years. Financial institutions and insurance companies must file audited financial statements with the appropriate regulatory agency.

The adoption of IFRS in Mexico presents companies with great challenges and opportunities. Changing from Mexican Financial Reporting Standards (MFRS) to IFRS requires companies to review their financial reporting procedures and criteria. Major changes in the requirements often have a ripple effect, impacting many aspects of a company’s information reporting organisation.

Nevertheless, the benefits to Mexican companies in reporting under IFRS are numerous. Among the greatest of these is the opening up of the Mexican Stock Market to overseas investors. By adopting IFRS, investors are able to compare two companies on different sides of the world with greater ease, and thus it is hoped that the change will encourage investment in Mexican companies.

Adoption of IFRS is not a straightforward process, and it will require time and effort on the part of the adopting entities to be able to ensure a smooth transition from MFRS to IFRS and ensure that the changes and benefits from this transition are duly implemented.

**Significant developments**

**Withholding taxes (WHTs)**  
As of 1 January 2013, the following tax treatment applies to royalty payments to:

- Residents practicing entrepreneurial activity: no WHT at source to be applied.  
- Resident individuals: a final WHT of 12% to be applied, without including such income in the gross income of individuals.

As of 4 February 2013, each payer of earnings should pay to the state budget a tax of:

- 18% of gambling earnings.
- 18% of promotional campaigns if the earned amount exceeds 10% of the personal allowance but does not exceed 50,000 Moldovan lei (MDL).  
- 25% of promotional campaigns if the earned amount equals or exceeds MDL 50,000.

Also, earnings from promotional campaigns and/or lottery earnings are considered non-taxable income sources if the value does not exceed 10% of the personal allowance.

In 2013, the WHT rate on interest paid to resident individuals remains unchanged (i.e. 15%).

**Value-added tax (VAT)**  
As of 1 January 2013, all legal entities registered as VAT payers are liable to submit tax returns using automated methods of electronic reporting.

As of 1 January 2013, the reduced VAT rate for natural gas and liquefied gases, imported and/or delivered within the country, increased from 6% to 8%.

As of 20 April 2013, agricultural and sugar producers pay to the budget only 40% of the amount of VAT computed at the standard rate (20%) for supplies from own production of phytotechnics and horticulture in natural form, zootechnical products in natural form, live and slaughtered, and from beetroot sugar. 60% of the amount of VAT collected from the above supplies remains at the disposal of the producer to be used exclusively for the purposes of expanding and developing its production capacity.

As of 1 January 2013, the VAT exemption for long-term assets contributed to an entity’s statutory capital was abolished. Also, new VAT refund provisions are applicable for capital investments in means of transport.

**Excise duties**  
As of 1 January 2013, new tariff headings are introduced in the list of goods subject to excise duties (i.e. tobacco and other manufactured tobacco substitutes, crude oil containing more than 1% sulphur by weight).
Moldova

As of 1 January 2013, the structure of excise duty rates for alcohol beverages was modified, from a combined to a fixed rate.

**Customs duties**
In 2012 and 2013, certain provisions in the customs regulations have been changed.

As of the 14 September 2012, the period for placing under temporary admission goods introduced under international leasing agreements was reduced.

As of 1 January 2013, the exemption of customs duties for tangible assets intended to be introduced in the statutory (social) capital of companies is excluded.

Also as of 1 January 2013, the age threshold/term of exploitation for purposes of import of cars and for vehicles for transportation of a maximum of 20 persons is increased from seven to ten years.

**Taxes on corporate income**

Resident companies generally must calculate their taxable base for corporate income tax (CIT) purposes on their worldwide income. Permanent establishments (PEs), unlike resident companies, are only required to calculate their taxable base for CIT purposes on income sourced in Moldova.

The CIT rate is 12%. If the Moldovan Tax Authority (MTA), applying indirect methods, re-assesses the income amount compared to the declared gross income, a 15% CIT rate may be applied to the excess amount.

Individual entrepreneurs are subject to progressive rates of 7% for annual income up to MDL 26,700 (approximately 1,660 euros [EUR]) and 18% for annual income exceeding MDL 26,700 (approximately EUR 1,660).

Farming enterprises are subject to a 7% CIT rate.

Small and medium companies that are not registered as VAT payers (i.e. registered operational revenue up to MDL 100,000 or approximately EUR 6,220 in the previous fiscal year) should apply a special CIT regime of 3% on their turnover. This special tax regime is optional for legal entities that are not VAT payers and that registered operational revenue between MDL 100,000 (approximately EUR 6,220) and MDL 600,000 (approximately EUR 37,320) during the previous year.

**Local income taxes**

There is no separate CIT at the local level. CIT is distributed between the national state budget and local budgets depending on the establishment of the entity in accordance with the existing rules.

**Corporate residence**

According to Moldovan tax law, a tax resident is a legal entity organised or managed in Moldova or that has its main place of business in Moldova. In practice, tax residency is determined by the place of incorporation.
**Permanent establishment (PE)**

Based on the Moldovan tax law, a PE is a fixed place of business through which a non-resident carries out, wholly or partly, either directly or through a dependent agent, entrepreneurial activity in the territory of Moldova (e.g. other services and activities, if the period during which such services/activities are carried out exceeds three months).

Due to the regulatory environment in Moldova, foreign enterprises operating through a PE in Moldova are not common.

---

**Other taxes**

**Value-added tax (VAT)**

The standard VAT rate in Moldova is currently 20%. It is generally applied to local supplies of goods and services as well as to goods subject to import and services subject to the reverse charge mechanism.

The reverse charge refers to services rendered by a non-resident supplier to a Moldovan company, which have a place of supply deemed to be in Moldova (e.g. consulting services, supply of information, supply of staff) and which do not fall under any specific VAT exemption.

Apart from the above, certain types of supplies are subject to reduced VAT rates. For instance, local supplies of bread, bakery products, milk, and dairy products; and the import and local supply of drugs and certain pharmaceutical products are subject to the reduced 8% VAT rate.

As of 20 April 2013, agricultural and sugar producers pay to the budget only 40% of the amount of VAT computed at the standard rate (20%) for supplies from own production of phytotechnics and horticulture in natural form, zootechnical products in natural form, live and slaughtered, and from beetroot sugar. 60% of the amount of VAT collected from the above supplies remains at the disposal of the producer to be used exclusively for the purposes of expanding and developing its production capacity.

A number of supplies are subject to the 0% VAT rate (i.e. VAT exempt with the right to exercise the input VAT deduction), including international transportation and exports of goods or services. Certain supplies are subject to VAT exemptions, including financial services and the sale or rental of dwellings and land.

As of 1 January 2013, VAT exemption does not apply for long-term assets intended to be included in the statutory (social) capital. Domestic goods previously exported and re-imported within three years will not be subject to VAT, provided the VAT related to the export of those goods was not refunded. Non-refund is confirmed by the certificate issued by the state tax inspectorate, as appropriate.

**Input VAT**

It should be mentioned that input VAT incurred on acquisitions of goods and/or services may be deducted, provided it is incurred by a VAT registered payer to perform VATable supplies within its business activity.

A company is required to register for VAT purposes if the total turnover within the last 12 consecutive months reached the threshold of MDL 600,000 (approximately EUR 37,320).
Moldova

If input VAT is incurred by a business not registered for VAT purposes, if input VAT relates to acquisitions used for supplying VAT exempt supplies, or if input VAT relates to purchases performed not for business purposes, such input VAT may not be deducted and shall be treated as a cost/expense.

If input VAT relates to acquisitions destined to perform mixed supplies (i.e. both VATable and VAT-exempt ones), the input VAT deduction right is exercised on a pro-rata basis.

Should a company register a deductible input VAT exceeding its output VAT, this balance can be partially refunded only if the company carries out a specific range of business activities (e.g. export supplies, international transportation services, production of bakery and dairy products, leasing activity). Otherwise, such VAT amount may be carried forward to the following months, offset against the company's future output VAT liabilities.

**VAT refunds**

Additionally, VAT payers performing capital investments in Moldova may be entitled to refund the recoverable VAT related to these kinds of capital investments. Note that specific conditions must be met, and there are few exceptions to this rule (e.g. buildings and specific transport items).

Legal entities not registered as VAT payers and, as of 1 January 2013, performing capital investments (expenses) related to vehicles for transportation of at least 22 people, except for the driver, will benefit from a refund of VAT related to these capital investments.

The possibility to refund the VAT against future obligations to the national public budget is also now available, at the request of taxpayers not having debts to the national public budget.

**VAT administration**

As of 1 January 2013, all companies registered as VAT payers are required to register their VAT invoices with a taxable basis exceeding MDL 50,000 (approximately EUR 3,110) in the general electronic register within specific established deadlines.

As of 14 September 2012, VAT payers are not entitled to a deduction of the amount of VAT paid to suppliers for material values, services purchased in Moldova, if the fiscal invoice is not registered in the register.

The fiscal period for VAT purposes is considered the calendar month.

Every VAT payer (sometimes also non-registered entities for VAT purposes) must submit VAT returns and must settle related payable VAT liabilities by the end of the month following the reporting one (except for VAT on services supplied by non-residents that are VATable in Moldova). VAT payers registered for VAT purposes in Balti, Chisinau, Comrat, and at the Main State Tax Inspectorate (MSTI) must submit electronic VAT returns.

Generally, VAT payers are required to issue VAT invoices for the VATable supplies performed, as well as to keep detailed records of their acquisitions and supplies in the correspondent VAT ledgers, according to a set of specific rules.

As of 1 January 2013, new provisions for electronic VAT reporting are applicable.
**Customs duties**
Moldova’s current customs framework is regulated by the Customs Code, Law on Customs Tariff, International Agreements concluded by Moldova to date, and by other legal acts.

Customs duties include customs procedural taxes, customs taxes, VAT, and excise duties. In general, any kind of goods and means of transport may enter and leave the territory of Moldova without any restriction. However, certain limitations specifically provided by the legislation are in force, which cover goods and means of transport crossing the border by breaching state security, public order, environment, etc.

Note that there are also some environmental pollution taxes related to specific packaging and goods that importers should pay.

**Customs regimes**
Definitive and suspensive customs regimes are provided under Moldovan law.

Definitive customs regimes refer to import and export, while suspensive customs regimes comprise: transit, bonded warehouse, inward processing relief (with suspension), processing under customs control, temporary admission, and outward processing relief.

**Customs valuation**
Under Moldovan customs legislation, the customs valuation is generally performed in accordance with the customs valuation principles in the General Agreement on Tariffs and Trade (GATT).

The customs value is determined based on one of the six provided valuation methods (i.e. transaction value, transaction value of identical goods, transaction value of similar goods, deductive value, computed value, and reserve method). If the first method is not applicable, then the second method should be applied and so forth.

**Preferential tariff treatment**
Moldova has concluded free trade arrangements (FTAs) to date with most of the Commonwealth of Independent States (CIS) countries and is also a Central European Free Trade Agreement (CEFTA) contracting state. A preferential tariff treatment is granted for specific categories of goods, depending on their origin and in accordance with the FTAs to which Moldova is a party.

Until 31 December 2015, Moldova benefits from Autonomous Trade Preferences (ATPs) from the European Union (EU), which allows unlimited duty-free access to the EU market for all products originating in Moldova, except for certain agricultural products. Such agricultural products are accepted for import into the European Union either with exemptions from customs duties within the limits of specific tariff quotas (e.g. fresh, chilled, and frozen meat of bovine animals, dairy products, common wheat, barley, maize, white sugar) or with exemption of the *ad valorem* component of the import duty (e.g. tomatoes, grapes, apples).

**Favourable tariff treatment**
A favourable tariff treatment presumes a reduction or an exemption from customs duty upon import of specific goods into Moldova, depending on their type or final destination, according to domestic customs law or international agreements to which Moldova is a party.
Moldova

Moldovan customs law provides the following exemptions, among others, from customs duty:

- Goods imported by individuals for personal use, not exceeding a specific threshold.
- Goods released in Moldova under transit, bonded warehouse, or inward processing relief regimes.
- Moldovan goods previously exported and released back within a three-year term in the same status, as well as compensatory products obtained under outward processing relief.
- Certain movable goods imported by legal entities carrying out leasing activities for the purpose of paying off their contractual liabilities derived from lease agreements concluded with Moldovan individuals or legal entities.
- Goods imported by legal entities for non-commercial purposes whose customs value does not exceed EUR 100.

**Customs administration**

Moldovan customs legislation provides for:

- the concepts and procedures of post clearance audit
- the obligation of individuals and companies to maintain the necessary documents for customs control for six years, and
- the obligation of individuals and companies that perform external trade transactions to maintain the related documents for the purposes of post clearance audit for five years.

Also in 2012, the Customs Service of Moldova approved procedures for issuing binding tariff and binding origin information.

As of 1 January 2013, simplified customs procedures are applicable in Moldova.

**Excise duties**

Excise duties apply to the production and import of cars, tobacco, alcohol, petrol and lubricants, and other goods. Special excise rates for each type of excisable goods are established in the tax code. The rates are widely variable and are based on multiple factors. The excise duty rates are generally indicated as a percentage applied to the value of goods (e.g. 30% for perfumes) or as a fixed amount for a certain quantity of excisable goods (e.g. MDL 1.85 [approximately EUR 0.11] applied to each litre of beer).

The following are liable for excise duties:

- Any individual or legal entity producing and/or processing excisable goods in the territory of Moldova.
- Any individual or legal entity importing excisable goods, unless there is no specific exemption provided.

Businesses or individuals that produce and/or process excisable goods in the territory of Moldova (or intend to do so) must possess excise duty certificates, which must be granted by the tax authorities before these operations are actually carried out. It is mandatory for individuals or businesses, upon submitting the relevant applications to the tax authorities, to attach the details of the excise premises.

Under certain circumstances, excise duty exemptions may apply. Some excise-liable goods are subject to mandatory excise stamp marking and labelling.
Recently, some major amendments were performed to the list of excisable goods as well as to the excise duty rates. For example, some types of goods were excluded from the list of goods subject to excise duties (e.g. wines and fermented or partially fermented grape musts; crystal objects; video, web, and photo cameras), while liquefied gas and inert gas (nitrogen and oxygen) became subject to excise duty.

Also, the excise duty rates have been increased for a series of excisable goods, for example:

- Wine from fresh grapes: increased from 10% of the goods’ value (but not less than MDL 1.69 [approximately EUR 0.10] per litre) to MDL 15 [approximately EUR 0.93] per litre plus 15% of goods’ value.
- Filter cigarettes: increased from MDL 10 [approximately EUR 0.62] for 1,000 units plus 18% of the goods’ value to MDL 20 [approximately EUR 1.24] for 1,000 units plus 24% of the goods’ value.
- Petroleum products: excise duties increased by approximately 5.6%.

As of 1 January 2013, the structure of excise duty rates for alcohol beverages was modified, from a combined to a fixed rate.

**Tax on immovable property**

Tax on immovable property is a local tax paid on real estate (i.e. land and/or construction on the land) by the proprietor or owner of material rights. Residents and non-residents owning real estate located in the territory of Moldova have similar obligations.

The 0.1% rate on immovable property used for entrepreneurial activity is applied either on the property’s estimated value (if such exists) or on its book value, while the maximum tax rate on property used for agricultural activities is 0.1% of the property’s book value.

Tax rates for real estate housing, including villages (communes) from Chisinau and Balti municipalities, have been increased.

As of 2012, separate rates have been introduced for agricultural land with construction buildings on it.

The actual tax rate on immovable property for a legal entity is established in monetary value (i.e. MDL), depending on its destination (e.g. land for agriculture usage) and location.

Tax on real estate housing, including villages (communes) from Chisinau and Balti municipalities, and agricultural land with constructions on them is paid in equal instalments on 15 August and 15 October for property owned before 1 July and is paid by 31 March for property acquired after 1 July. The respective tax shall be calculated based on the estimated value of the immovable property.

For the rest of immovable property, taxes have to be paid quarterly based on the book value.

Companies and individual entrepreneurs who own immovable property will be obligated to declare the immovable property tax by 1 July of the current fiscal period.
Moldova

In the event of an owner change during the fiscal year, the previous owner may request recalculation of the real estate tax in proportion to the period in which they were subject to taxation.

Transfer taxes
Transfer taxes may be applied for notary acts performed by authorised notaries and other persons empowered by law. Transfer taxes are applied upon authentication by a notary of sale-purchase agreements regarding plots of land; transfers of houses into private property; alienation agreements of houses, apartments, garages, and other constructions; vehicles; authentication of mortgage agreements; and other evaluative contracts.

Stamp taxes
According to the law on state tax, stamp tax (state duty) is the amount charged by specifically authorised state bodies from individuals and legal entities for the exercise of certain actions or issuance of legal documents of interest to them.

Stamp taxes may be applied for, but not limited to, the following:

- Claims submitted to courts of justice.
- Registration of civil status documents.
- Issuance of passports to Moldovan citizens and other related documentation.
- Residence registration.
- The redemption of goods from the state.
- The registration of mortgages, for issue of extracts from the Real Estate Register.
- Notary acts (i.e. for notarisation of sale-purchase agreements of immovable assets).
- Application of the apostil.

Local taxes
Local taxation in Moldova refers to the application of the following types of taxes and duties:

- Tax on the following natural resources:
  - Water.
  - Mineral exploration.
  - Geological exploration.
  - Mining operations.
  - Usage of underground areas for the construction of underground structures not related to mining operations.
  - Exploitation of underground structures within the performance of entrepreneurial activity, not related to mining operations.
  - Standing wood.
- Tax on immovable property.
- Duty for the right to perform local auctions and lotteries.
- Tax on advertising placement and tax on advertising devices.
- Fee for the right to use local symbols.
- Parking tax and parking fee.
- Hotel room occupancy tax.
- Resort fee.

Local authorities are authorised to establish the list and the levels of tax rates for local taxes.
Road taxes
Road taxes are fees collected for the use of roads and/or protection zones of the roads outside the locality limits.

The system of road taxes includes the following:

- Tax for the use of roads by vehicles registered in Moldova.
- Tax for the use of roads of Moldova by vehicles not registered in Moldova (vignette).
- Tax for the use of roads by the vehicles with total mass, axle loads, or dimensions exceeding the admitted limits.
- Tax for the use of road protection zones outside the localities for carrying out construction or installation works.
- Tax for the use of road protection zones outside the locality limits for placing outdoor advertisements.
- Tax for the use of road protection zones outside the locality limits for placing roadside service objects.

Depending on the type of road tax, the tax law establishes the taxable person, deadlines for payment of the road tax, tax rates, exemptions (e.g. a legal entity or an individual shall pay road tax on vehicles registered in Moldova (i) on the date of state registration of vehicle or (ii) on the date of the vehicle inspection/annual technical testing of the vehicle).

As of 1 January 2013, road tax rates have been increased to the following:

<table>

</tbody>
</table>

* For minibuses and buses, the number of seats was calculated without taking into account the driver’s seat.
Moldova

Also, a road tax for vehicles not registered in Moldova (vignette) was introduced on 1 November 2012. The fixed tax rates for vignette vary from EUR 4 to EUR 50, depending on the period the vehicle stays in the territory of Moldova.

**Branch income**

**Branches**
Moldovan law does not distinguish between branches of non-resident companies and local companies established by a foreign investor. As such, a non-resident’s branch is established and registered in Moldova as a legal enterprise fully owned by the foreign investor. As such, it is subject to the same tax regime as local incorporated companies.

On the other hand, the concept of a tax PE does exist in Moldova. Generally, the PE of a non-resident entity will be subject to CIT in Moldova on any profits attributable to that PE. While non-resident entities operating in Moldova without a locally established entity run the risk of creating a taxable PE, since there is no local concept of a legal branch that is not a legal entity, non-residents do not typically intentionally operate in Moldova through a taxable PE.

**Representative offices**
Representative offices are often established by non-resident entities as a first step to operating in Moldova. According to the tax law, a representative office can engage only in auxiliary or preparatory activities. A representative office can perform only a limited range of activities without being considered a PE of the non-resident.

All representative offices must submit by 31 March of the year following the reporting year the required Tax Reporting Statement on the activity conducted during the year concerned.

**Income determination**

Resident legal entities are taxed on their worldwide income, while non-resident entities are taxed on their Moldovan-source income. Taxable income is computed as accounting income adjusted in accordance with tax legislation.

**Inventory valuation**
Moldovan law provides for the following inventory valuation methods: standard cost method, retail method, weighted average cost, first in first out (FIFO), and last in first out (LIFO).

Assets are generally valued at their acquisition cost, production cost, or market value.

**Capital gains**
The capital gains rule applies to Moldovan companies selling capital assets on an occasional basis and whose ordinary activity does not include transactions with land, buildings, and shares. Shares and other investment assets (e.g. land, property) are treated under the tax law as capital assets (i.e. property not used in the ordinary course of business).

The income earned from the sale, exchange, or disposal of capital assets is deemed to be a capital gain in the amount of 50% of the difference between the purchase price (i.e. all costs related to the acquisition of capital assets) and the sale price. This capital gain
must be included in the total gross amount of income for the year in which the assets were sold. This amount is subject to CIT.

Capital gains may be decreased by capital losses registered in the current or previous year.

**Dividend income**
Starting with profits earned in 2012, dividends paid by Moldovan legal entities to other Moldovan legal entities are taxed with the applicable final 6% WHT, while the distribution of dividends from profit earned during the period between 2008 and 2011 remain subject to the previously applicable final WHT of 15%.

Dividends received by Moldovan legal entities from foreign legal entities are included in taxable income and taxed at the applicable 12% CIT rate. According to Moldovan legislation, the beneficiary of such dividends is entitled to a credit for the tax paid in the foreign country, within certain limits.

**Interest income**
Interest derived by legal entities on bank deposits with a period exceeding three years, as well as the interest derived from corporate securities issued in the form of bonds for a period exceeding three years, is tax exempted until 1 January 2015.

Interest derived from state bonds is also exempt until 1 January 2015.

**Exchange gains and losses**
Revenues obtained from foreign exchange differences are to be included in taxable income. Foreign exchange losses are CIT deductible in the period they are incurred.

In certain circumstances (e.g. high depreciation of the national currency), foreign exchange differences should be capitalised to the value of assets in relation to which the expenses were incurred.

**Non-taxable revenues**
Moldovan tax law provides for the following additional main types of non-taxable revenues:

- Contributions to the capital of an entity.
- Income earned while benefiting from an income tax exemption.
- Money received from special funds and which are used in accordance with fund destination.

The following elements have also been included in the list of non-taxable sources of income:

- Income arisen due to the transition from National Standards of Accounting to International Financial Reporting Standards (IFRS).
- Income resulting from revaluation of fixed assets and other assets.
- Dividends covering the fiscal periods up to 1 January 2008, payable to resident individuals.

**Foreign income**
Resident legal entities are taxed on their worldwide income, unless a double tax treaty (DTT) stipulates otherwise. The legal entities, under certain conditions, can benefit from tax credits provided under a DTT or can apply for unilateral tax credits.
against income tax paid in any foreign country, if this income is subject to taxation in Moldova. Such tax credit shall not exceed the amount that would have been estimated at the CIT rate applicable in the given tax period. Otherwise, there is no specific tax deferral regime.

**Deductions**

As a general rule, expenses incurred by a company are deductible for CIT purposes only if they are deemed as ordinary and necessary, aimed at deriving taxable income, and justified with adequate supporting documentation.

The rate of deductible expenses for business purposes (ordinary and necessary) that are not adequately supported by necessary documentation is 0.2%.

**Depreciation and amortisation**

Fixed assets are subject to CIT depreciation under the diminishing-balance method if their useful economic life exceeds one year and acquisition costs exceed MDL 6,000 (approximately EUR 373).

According to the fiscal law, fixed assets are divided into five categories. These categories are set out according to specific rules, mainly on the assets' useful life (i.e. the number of years during which the assets' utilisation generates economic advantages; the useful life for each type of depreciating asset is regulated by governmental decision). The depreciation rates vary as follows:

- First category: 5%.
- Second category: 8%.
- Third category: 12.5%.
- Fourth category: 20%.
- Fifth category: 30%.

Intangible assets are subject to CIT amortisation according to the straight-line method.

**Goodwill**

The Moldovan tax law does not provide any specific tax rules related to CIT deductibility of goodwill amortisation. According to financial accounting methods that are based on the provisions of the National Accounting Standards and can be used for tax purposes, the goodwill acquired in a business combination shall not be amortised.

**Start-up expenses**

Start-up expenses incurred by companies (e.g. stamp taxes paid upon company registration, drawing up of registration documents, manufacture of stamp) generally are considered as intangible assets and are deductible for CIT purposes through the straight-line amortisation method during the period of up to five years.

**Interest expenses**

Different CIT deductibility rules apply for interest on loans used for carrying out operational activities and for loans used for investment activities performed on an occasional basis.

As a general rule, deductions for interest and foreign exchange losses are allowed for CIT purposes, provided such expenses are deemed as ordinary and necessary for
carrying out the activities of the business. Expenses should also be incurred for the purposes of obtaining taxable income and justified by adequate backup documentation.

If the interest paid by a Moldovan company relates to its operational or day-to-day activities, the related expenses are deductible for CIT purposes. A few other provisions should also be considered, namely the following:

- Interest expenses incurred based on loan agreements, for the benefit of individuals and legal entities (except financial institutions and micro-financing organisations, and leasing companies), by businesses are deductible for CIT purposes, limited to the average weighted interest rate on credit loans offered by banks to legal entities for the period of up to 12 months and over 12 months.
- If the loan is obtained to acquire/build fixed assets, the related interest expense should be capitalised to the initial fiscal value of assets until they are commissioned. The deductibility of this expense is capped at the above limit. The excess difference is treated as a CIT non-deductible expense for that fiscal year.
- If interest relates to an investment activity, the interest expense is deductible for CIT purposes within the limit of the income derived from the investment.

**Bad debt**
Bad debts are deductible for CIT purposes, provided certain conditions are fulfilled and justifying documents are made available.

**Charitable contributions**
Charity and sponsorship expenses are deductible for CIT purposes if borne for the benefit of public authorities and public institutions financed from the state budget, as well as non-profit organisations within certain conditions, at up to 10% of taxable income.

**Fines and penalties**
Fines and penalties related to CIT, related to other taxes and due payments to the state budget, or for violations of legal acts are not deductible for CIT purposes.

**Taxes**
CIT is not deductible.

**Other significant items**
Among others, the following expenses are also generally deductible for CIT purposes:

- Research and development (R&D) expenses incurred during the fiscal year as current expenses, should certain conditions be met.
- Business trip expenses, protocol expenses, and expenses on insurance of business entities, within the limits approved by the government.
- Waste, spoilage, and perishability expenses, within the threshold approved by the company's manager.
- Leasing companies are allowed to deduct provisions to cover claims related to non-recovery of lease rates and interest rates up to 5% from the weighted average balance from the account receivables, provided certain conditions are met.

**Non-deductible expenses**
Among others, the following expenses are generally not deductible for CIT purposes:

- Expenses not adequately supported by necessary documentation, except the 0.2% rate as mentioned above.
Moldova

- Provisions, except for financial institutions, microfinance organisations, and leasing companies as mentioned above.
- Losses incurred from transactions between affiliated parties.

**Fiscal losses**
Fiscal losses may only be carried forward in three equal instalments for three consecutive years following the year the losses were incurred, provided the company records taxable income. If the company recorded fiscal losses for more than one year, such losses are carried forward in the order in which they arose. Fiscal losses are recorded on off-balance-sheet accounts.

Losses may not be carried back.

**Payments to foreign affiliates**
A Moldovan legal entity generally may deduct payments to foreign affiliates to the extent that these amounts were actually paid and are not in excess of what it would have paid to an unrelated entity (i.e. arm’s length). However, the payer is required to hold documentary evidence for the actually performed transactions. Still, certain types of expenses may follow general rules of deductibility that would limit their amount (e.g. interest expenses on loan agreements).

**Group taxation**
Moldovan tax law does not provide for group taxation.

**Transfer pricing**
Transfer pricing regulations are currently at the initial stage of development, as the law does not list any specific transfer pricing methods. Moreover, taking into account that Moldova is not currently an Organisation for Economic Co-operation and Development (OECD) member country, there is no possibility of enforcing the OECD Transfer Pricing Guidelines.

According to the law in force, transactions carried out between related parties should observe the arm’s-length principle. Transactions that do not follow this rule are disregarded for tax purposes.

In accordance with Moldovan tax law, a company is considered the taxpayer’s related party if it controls the taxpayer, is controlled by the taxpayer, or both the company and the taxpayer are under the common control of a third party.

From a tax perspective, control is the ownership (either directly or through one or more related parties) of 50% or more in value of the capital or voting power of one of the companies.

Losses incurred in dealings between related parties carried out directly or through intermediaries are treated as non-deductible for CIT purposes.

According to current Moldovan tax law, there are no formal transfer pricing documentation requirements. However, at the time of writing, there is a proposal that formal transfer pricing documentation requirements will be introduced in the Moldovan tax law starting in 2015.
**Thin capitalisation**
Moldovan tax law does not provide for a specific thin capitalisation regime.

*The deductibility of interest expenses follows the deductibility regime as described under Interest expenses in the Deductions section.*

---

**Tax credits and incentives**

**Foreign tax credit**
Income tax paid in any foreign country, if this income is subject to taxation in Moldova, is allowed for tax credit, provided that the taxpayer submits a document that justifies payment (withholding) of the income tax outside of Moldova, certified by the competent body of the respective foreign country, with its translation into the state language.

The amount of tax credit for any taxable year should not exceed the amount that would have been estimated at the rate applicable in Moldova with regard to this income.

A tax paid in a foreign country should be creditable for the year in which the income is taxable in Moldova.

**Free entrepreneurial zones (FEZs)**
FEZs are territories where domestic and foreign investors can carry out entrepreneurial activities on preferential terms (i.e. favourable tax, customs, visa, and other regimes). There are currently nine FEZs in Moldova.

The following types of activities may be carried out in a FEZ:

- Production of goods preferentially for export (i.e. supply of goods in the territory of Moldova does not exceed 30% of the total amount of goods and services supplied within one year).
- Sorting, packing, marking, and other similar operations of goods transiting the customs territory of Moldova.
- Other supportive activities.

**FEZ incentives**
For the 2013 year, the following CIT incentives for FEZ investors have been maintained:

- Entities that are established in the FEZ and export goods and services from FEZ outside the customs territory of Moldova or deliver the produced goods to other FEZ residents for goods to be exported are entitled to apply only 50% of applicable CIT rate on such gains. For other cases, the CIT rate is 75% of the established one.
- The income obtained from export of goods (services) originating from the FEZ outside the customs territory of Moldova or from supply of the produced goods to other FEZ residents for goods to be exported is CIT exempted for a period of three years, provided that the FEZ residents invested in the fixed assets of their enterprises and/or in development of the infrastructure of the FEZ capital equivalent to at least 1 million United States dollars (USD).
- The income obtained from export of goods (services) originating from the FEZ outside the customs territory of Moldova or from supply of the produced goods to other FEZ residents for goods to be exported is CIT exempted for a period of five years, provided that the FEZ residents invested in the fixed assets of their enterprises...
Moldova

and/or in development of the infrastructure of the FEZ capital equivalent to at least USD 5 million.

From a VAT standpoint, goods and services supplied in the FEZ from abroad, from the FEZ outside the customs territory of Moldova, in the FEZ from other areas of Moldova, and those supplied to residents of other FEZs are subject to 0% VAT.

According to the customs provisions, goods are introduced into the FEZ with no VAT or customs duty and are not subject to economic policy measures, according to specific criteria. However, certain taxes in specific situations might be incurred by residents of the FEZ. Investors in the FEZ are guaranteed and protected from changes in legislation for a general period of up to ten years, while under certain conditions this period may be extended to 20 years.

**Withholding taxes**

**Residents**

Resident legal entities making payments to individuals (other than salary payments) must withhold and pay WHT to the MTA at the following rates:

- 7% preliminary withholding of payments made for the benefit of resident individuals, unless such payments are tax exempt or are computed as employment salaries. The beneficiary deducts (i.e. recovers) the 7% WHT from annual income tax due.
- 10% final withholding of an individual's income derived from leasing, rent, usufruct of movable and immovable property, and advertising campaigns.
- 6% final withholding of dividends paid out to individuals, except for dividends for the profits received between 2008 and 2011, for which the WHT rate is 15%.
- 15% preliminary withholding from interests. The beneficiary deducts (i.e. recovers) the 15% WHT from annual income tax due.
- 15% from the amount withdrawn from the share capital related to the increase arisen from the distribution of net profit and/or other sources identified as equity among shareholders (associates) throughout the 2010 to 2011 fiscal period, in accordance with the share capital venture quota. The tax charged to residents under this paragraph is a final one and exempts the recipient of such income from including it into gross income, as well as from declaring it.

As of 1 January 2013, the following tax treatment applies to royalty payments to residents:

- practicing entrepreneurial activity: no WHT at source is applied
- resident individuals: a final WHT of 12% is applied, without including such income in the gross income of individuals.

As of 4 February 2013, each payer of earnings should pay to the state budget a tax of:

- 18% of gambling earnings.
- 18% of promotional campaigns if the earned amount exceeds 10% of the personal allowance but does not exceed MDL 50,000.
- 25% of promotional campaigns if the earned amount equals or exceeds MDL 50,000.

Also, earnings from promotional campaigns and/or lottery earnings are considered non-taxable income sources if the value does not exceed 10% of the personal allowance.
Non-residents
The following WHT rates apply upon payments to non-residents:

- 6% for dividend payouts, except for dividends for the profits received between 2008 and 2011, for which the WHT rate is 15%.
- 15% from the amount withdrawn from the share capital related to the increase arisen from the distribution of net profit and/or other sources identified as equity among shareholders (associates) throughout the 2010 to 2011 fiscal period, in accordance with the share capital venture quota.
- 12% for other revenues.

Double tax treaties (DTTs)
The DTTs in force between Moldova and other countries may provide for more favourable tax rates than those provided by the local provisions. For their application, the foreign beneficiary of such income should provide the paying entity with its fiscal residency certificate before the payments are actually made.

Operational DTTs to which Moldova is a party are outlined below:

### Notes

1. If multiple rates are listed, then the WHT is limited if the beneficial owner is a company (other than a partnership) that holds directly at least 50%, 25%, 20%, or 10% of the capital of the company paying the dividends, depending on the treaty.
2. 3% from payments related to the use of or right to use patent, computer software, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience; 7% in all other cases.
3. Exempted for the use of or right to use copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for radio or television broadcasting; 10% from payment related to the use of or right to use patent, trade mark, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
4. 10% from payment related to the use of or right to use patent, trade mark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience; 15% in all other cases.

### Tax administration

**Taxable period**

The tax year for CIT purposes is the calendar year. For new business entities, the fiscal year is considered the period beginning with the registration date until the end of the calendar year.

For WHT and VAT purposes, the fiscal period is the calendar month starting the first day of the month.

**Tax returns**

An annual CIT return must be submitted to the MTA by 31 March of the year following the reporting year.

WHT and VAT liabilities must be declared and settled monthly by the end of the month following the reporting month.

Farming enterprises with an annual average number of employees not exceeding three and not registered as VAT payers must submit a unified tax return, if certain conditions are met.
Adjusted tax returns
Taxpayers who discover that the tax return previously submitted contains an error are able to submit a revised tax return, provided that no written decision was issued by the tax authority in order to initiate a tax audit.

Late interest payments will not be applicable in amounts higher than the tax liability resulting from the revised tax return submitted, and no fines will be applicable if the tax duties are paid before the announcement of a tax audit.

Under amendments to tax legislation, the penalty will not apply in certain circumstances of fiscal violations specified by law, and if already established, it will be entirely cancelled, if no additional tax liabilities arise.

Companies that have miscalculated the taxes, and this was not detected in the previous tax audit, are absolved from fines and late interest payments for violations identified within the repeated tax audit.

Companies keeping the accounting records and preparing financial reports under IFRS will not be fined for violation of accounting and record keeping for tax purposes for a period of up to two years from the date of implementation (transition) to those standards.

Payment of tax
Taxpayers must declare and pay the applicable CIT by 31 March of the year following the reporting year. In 2013, taxpayers that receive income from sources other than employment income, interest, or royalties (from which residents withhold an income tax at source) are required to pay, no later than 31 March, 30 June, 30 September, and 31 December, amounts equal to 25% of either the total estimated value of the CIT due for the 2013 fiscal period or the total value of the calculated CIT for the 2012 fiscal period.

Fines and penalties
The MTA is entitled to apply a fine of 15% to the amount by which a taxpayer under-reported its taxable income for the period between 2008 and 2011 for CIT purposes. For the period starting with 2012, a fine of 30% of the diminished tax liabilities (including CIT ones) will be applied.

Under the tax law, the MTA is entitled to apply a fine in the amount of the undeclared tax if it is a result of tax evasion.

Taxpayers who settle amounts as assessed by the MTA within three business days and have no other outstanding liabilities may benefit from a 50% reduction of the fines applied by the tax authorities, provided the fines are paid within three business days from the date of handing the decision on their application.

In addition, certain special provisions regarding tax evasion apply. The term 'tax avoidance' is defined under Moldovan tax law as diminishing the tax liabilities by more than MDL 30,000 (approximately EUR 1,866) by means of including in accounting, tax, or financial documents deliberately distorted data on income or expenses or by hiding other objects of taxation. Should the amount of the tax due exceed MDL 30,000 (approximately EUR 1,866), the tax evasion is regarded as a criminal offence. According to the Moldovan Criminal Code, legal entities can be punished for tax evasion with a fine up to MDL 120,000 (approximately EUR 7,464) and preclusion from performing certain activities or winding-up.
Among the most important fines and sanctions for non-compliance with applicable tax law, the following are worth mentioning:

- The fine for the performance by the taxpayer of an economic activity with the issuance of a bill without using a cash register is MDL 10,000 (approximately EUR 622), while such repeated action is sanctioned with a fine of MDL 50,000 (approximately EUR 3,100).
- The fine for the failure to provide the VAT invoice in accordance with the tax law is MDL 3,600 (approximately EUR 224) for each VAT invoice but capped to MDL 108,000 (approximately EUR 6,718). The same fines are applicable for failure to register the fiscal invoice in the general electronic register managed by the tax authorities.
- The fine for hindering the execution of a tax audit by not providing access to production, storage, commercial, or other facilities is MDL 10,000 (approximately EUR 622).
- The fine for submitting a tax return containing unauthentic information is MDL 1,000 (approximately EUR 62) for each tax return, but being capped to MDL 10,000 (approximately EUR 622).

**Tax audit process**
Generally, the list of taxpayers to be audited by the tax authorities is published on the official web site of the MTA on a quarterly basis.

The rules governing the tax audit process are stated in the tax code. Generally, the tax audit duration and frequency depends on its type. For instance, a tax audit performed at the taxpayer premises should not exceed two months and should be performed no more than once per year for the same taxes and duties, except for specific circumstances provided by law.

Also, a tax audit can be performed on a more frequent basis within certain specific circumstances (e.g. refund of VAT and other taxes, reorganisation).

**Statute of limitations**
The statute of limitations for taxes is four years from the end of the fiscal period in which the tax return should be filed. The statute of limitations does not apply to circumstances when tax evasion crimes are identified.

**Topics of focus for tax authority**
There are no specific topics of focus for the tax authorities. Generally, it depends on the nature of the taxpayer and the specifics of the activity it performs. The main criterion for selection of a company to be subject to a tax audit is a risk based one.

**Rulings**
The law does not provide for the possibility of obtaining binding rulings. However, comfort letters can be obtained.

Taxpayers that inadequately computed tax liabilities due to incorrect written explanations issued by the MTA may not be subject to sanctions (i.e. fines and late-payment penalties). Tax liabilities may still be recomputed by the MTA. Written explanations are issued by the MTA free of charge and may remain valid for an indefinite period of time, unless cancelled by new legislation or other rulings. Such explanations are generally issued by the Moldovan competent authorities during a period of up to one month.
Other issues

The legislation and the approach of the state authorities in Moldova related to corporate taxation have been and are expected to be subject to significant changes.

Taxpayers should seek professional advice on specific issues, given that only limited interpretations have been issued by the MTA.
Significant developments

Cancellation of Mongolia’s Double Tax Treaties (DTTs) with Kuwait, Luxembourg, the Netherlands, and the United Arab Emirates

On 2 November 2012, the Parliament discussed and approved the cancellation of the DTTs between Mongolia and Kuwait, Luxembourg, the Netherlands, and the United Arab Emirates. On 26 December 2012, the Minister of Finance made an announcement confirming that the expiry dates of the DTTs are as follows:

- 1 January 2014 for the treaties with the Kingdom of the Netherlands and the Kingdom of Luxembourg.
- 1 January 2015 for the treaty with the United Arab Emirates.
- 1 April 2015 for the treaty with Kuwait.

Recent changes to value-added tax (VAT), customs duty, and immovable property tax (effective from 1 January 2013)

VAT and customs duty exemptions cancelled for companies in oil exploration and production industry

10% VAT and 5% customs duty will be imposed on imported equipment, materials and supplies, parts, and fuel by the companies operating under production sharing agreements in the oil exploration and production industry. Previously, these companies were exempt from the above two taxes. This amendment was enacted on 25 October 2012 by the Mongolian Parliament.

VAT and customs duty exemptions extended until 31 December 2013 for small and medium-sized entrepreneurs

Equipment and spare parts produced in the territory of Mongolia or imported for the production of small or medium-sized entrepreneurs are exempted from VAT and customs duty until 31 December 2013 (previously exempt until 31 December 2012). This amendment was enacted on 25 October 2012 by the Mongolian Parliament.

Immovable property tax rate will increase from 0.6% up to 1%, depending on the different zones of Ulaanbaatar city

The Citizens’ Representative Hural of Ulaanbaatar approved the adoption of different immovable property tax rates, depending on the location of the commercial buildings within Ulaanbaatar (i.e. 1% in Zone 1, 0.8% in Zones 2 and 3, and 0.6% in Zones 4 and 5). As a result, the tax will be increased from the previous 0.6% to 1% of the value of commercial buildings located in the centre of Ulaanbaatar (i.e. Zone 1).
Taxes on corporate income

Mongolian resident economic entities are taxable on aggregate annual income earned worldwide. Non-resident economic entities carrying out business activities in Mongolia are taxable only on the income earned in the territory of Mongolia.

Mongolian corporate income tax (CIT) is levied at the following rates, using a progressive-rate scale that ranges from 10% to 25%, as follows:

- 10% applies to the first 3 billion Mongolian tugriks (MNT) of annual taxable income.
- 25% applies to any excess of MNT 3 billion of annual taxable income.

However, the income described in the chart below is excluded when determining the annual taxable income and is taxed at different tax rates on a gross basis:

Local income taxes
There are no local corporate income taxes in Mongolia.

Corporate residence

A resident legal entity is an economic entity formed under the laws of Mongolia or a foreign economic entity that has its headquarter office in Mongolia. There has not been further development of this concept, so it cannot be assumed that the standard place of effective management or control test will apply.

A non-resident company is a foreign economic entity that conducts its business for Mongolian clients.

Permanent establishment (PE)
The concept of a PE is not well developed. Therefore, non-resident companies will suffer a 20% withholding tax (WHT) on a range of payments unless treaty protection is available.

Other taxes

Value-added tax (VAT)
A VAT at the rate of 10% is imposed on the supply of taxable goods and services in the territory of Mongolia and on imports into Mongolia.

VAT is specifically levied on the following:
Mongolia

- Goods sold in Mongolia.
- Work performed and services rendered in Mongolia.
- All goods imported into Mongolia to be sold or used.
- Goods exported from Mongolia for use or consumption outside Mongolia.

Effective from 1 January 2013, the VAT exemption has been cancelled for imported equipment, materials and supplies, parts, and fuel by the companies operating under production sharing agreements in the oil exploration and production industry.

Equipment and spare parts produced in the territory of Mongolia or imported for the production of small or medium-sized entrepreneurs is exempted from VAT until 31 December 2013 (previously exempted until 31 December 2012).

**Customs duty**

A flat customs tariff of 5% applies with respect to most goods imported into Mongolia, except for information technology and medical equipment and pure-bred livestock, which are zero rated.

Effective from 1 January 2013, the customs duty exemption has been cancelled for imported equipment, materials and supplies, parts, and fuel by the companies operating under production sharing agreements in the oil exploration and production industry.

Equipment and spare parts produced in the territory of Mongolia or imported for the production of small or medium-sized entrepreneurs is exempted from customs duty until 31 December 2013 (previously exempted until 31 December 2012).

Export duties apply to certain exported goods, such as unprocessed camel wool, wood, and wooden materials.

**Excise tax**

Excise tax is levied on goods manufactured in or imported into Mongolia, such as tobacco, alcohol, gasoline and diesel fuel, and passenger vehicles. Excise tax is also levied on the physical units of special-purpose technical devices and equipment used for betting games and gambling and on the activities of individuals and legal entities that conduct such activities. The excise tax rate on the goods varies between 0.30 United States dollars (USD) and USD 10, according to the origin and type.

Excise tax imposed on imported gasoline and diesel varies, depending on the port you import into and a decision of the Cabinet; but starting from 11 November 2011, up until now, there is no excise tax on imported gasoline and diesel.

If the gasoline and diesel is produced in Mongolia, the rates are:

- **Gasoline:**
  - USD 11 per tonne (up to 90 octane).
  - USD 12 per tonne (above 90 octane).
- Diesel: USD 15 per tonne.

**Immovable property tax**

Immovable property tax is an annual tax that varies from 0.6% to 1%, depending on the decisions made by the local representatives’ committee, on the value of the immovable property that is owned. For tax purposes, the value used is the value registered with the government registration authority. If the property is unregistered, the insured value
is used. In the absence of either a registered or insured value, the accounting value is used.

This tax does not apply to property owned by persons and financed through the state budget, to any dwelling houses, or to any buildings and construction for public use.

**Transfer taxes**
Transfer of rights is treated as sale of right in practice and taxed at 30% under CIT law.

In case of transfers of property, stamp duty will be applied. There is no other specific tax on transfers of property.

**Stamp duty**
Under the Law of Mongolia on State Stamp Duties, there are 43 types of activities subject to stamp duties, including the following:

- Settlement of a legal dispute by a court.
- Court involvement in arbitration.
- Notary services.
- Consulate services.
- State registration services for legal entities.
- Registration services for foreign invested economic entities and representative offices of foreign organisations.
- Other specific activities that need permissions and rights from the state authorities.

The amount of duty varies depending on the types of services or activities involved.

**Fees and taxes applicable to the extractive industry**
A range of fees and other taxes are payable for activities in the extractive industry. The primary ones include the following:

- Mining License Fee, which is agreed up front and stated in the mining licence.
- Royalties, which are paid on the sale of mining products. The rate depends on the product being mined and the level of processing being performed in Mongolia.
- Air Pollution Fees.
- Land Use Fee.

**Branch income**
The repatriation of profits from branches of foreign legal entities is subject to branch profits tax at a rate of 20%.

Please note that it appears it is no longer possible for foreign legal entities to establish a branch in Mongolia. However, the above provision remains in place for branches that were previously established in Mongolia.

**Income determination**

**Inventory valuation**
There is no specific provision in the tax law for inventory valuation.
Capital gains
Capital and ordinary transactions are treated the same for tax purposes (i.e. included in annual taxable income). An exception is provided for income from sales of immovable property, which is subject to tax of 2% on gross sales proceeds.

Taxation of capital gains of non-residents is not clear. Corporate income law could be interpreted in a way that the net gain from disposal of shares in a Mongolian company should be subject CIT. However, since there is no mechanism in practice for non-resident companies to declare income in Mongolia and show the basis for the taxable gain, only WHT (20% on the gross payment) charged at source of payment is available. No mechanism for taxation of capital gains currently exists if the transaction takes place between two non-residents that have no taxable presence in Mongolia.

Dividend income
Dividend income earned by a Mongolian resident entity is subject to WHT of 10%. Dividend income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

Interest income
Interest income is subject to a special income tax of 10%. Interest income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

Partnership income
There is no transparent partnership concept in Mongolia. Partnership income is treated as income of a legal entity, subject to CIT.

Rental income
Rental income is included in taxable income for tax determination.

Royalty income
Royalty income is taxed at a special rate of 10%. Royalty income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

Unrealised currency exchange gains/losses
Unrealised currency exchange gains are not considered as taxable income, and, at the same time, unrealised losses are not deductible from taxable income.

Foreign investment
Stability agreement
Tax stability is available for foreign investments of a certain level. In the event of a request by an investor intending to undertake an investment project of not less than USD 20 million or the equivalent amount in Mongolian tugrik in Mongolia, the member of the government in charge of taxation matters as permitted by the government of Mongolia may sign a stability agreement with such investor as a legal guarantee for a stable environment to conduct business. Moreover, if a start-up investment amount of a foreign investor is USD 20 million or the equivalent amount in tugrik, a stability agreement can be signed for ten years, and if the amount is over USD 50 million or its equivalent in tugrik, such agreement can be signed for 15 years.
Investment agreement
To provide a stable environment (including tax environment) for operations of a mining licence holder and at the licence holder’s request, an investment agreement may be concluded with a mining licence holder who undertakes to invest in Mongolia no less than USD 50 million during the first five years of its mining project.

If the amount of the investment over the first five years is not less than USD 50 million, the term of the agreement shall be ten years. If more than USD 100 million, the term of the agreement shall be 15 years. If more than USD 300 million, the term shall be 30 years.

Foreign income
Mongolian legal entities pay tax on their worldwide income. Unremitted earnings are taxed the same as ordinary earnings.

Credit relief is available with respect to foreign tax on income arising from countries that have DTTs with Mongolia, capped at the level of Mongolian tax that would have been due on the same income in Mongolia.

Deductions
Expenses mostly associated with generating aggregate annual income are deductible for CIT purposes (provided proper documentation is in place), and a list of these is provided in the legislation. Expenses not on this list are not deductible.

Accrued expenses
Accrued expenses are deductible.

Contingent liabilities
Contingent liabilities are not deductible.

Depreciation and amortisation
Depreciation of fixed assets and amortisation of intangibles are deductible within the limits provided in tax legislation. A straight-line method is used and the years of usage are determined for tax purposes.

Mongolia

**Goodwill**
There is no specific provision in the tax law regarding the deductibility of goodwill.

**Organisational and start-up expenses**
Organisational and start-up expenses are not deductible.

**Interest expenses**
Interest expenses are deductible. However, there are limits with respect to the deductibility of interest expense. See Thin capitalisation in the Group taxation section for more information.

**Bad debt**
Bad debt is not deductible.

**Charitable contributions**
Charitable contributions are not deductible, except for donations to the fund of vocational training.

**Pension expenses**
Compulsory pension insurance premiums paid to the Social Security Authority of Mongolia are deductible. Additional voluntary insurance premiums are deductible but shall not exceed 15% of taxable income. Pension provisions or internal pension fund expenses are not deductible.

**Payment for directors**
If a payment for directors is a salary payment on which social insurance and personal income tax is levied, it is considered as deductible.

**Bribes, kickbacks, and illegal payments**
Bribes, kickbacks, and illegal payments are not in the list of permitted deductions. Per anti-corruption law, monetary amounts involved with respect to such payments will be confiscated and criminal proceedings will be instituted.

**Fines and penalties**
Fines and penalties are not deductible for tax purposes.

**Taxes**
Taxes paid by a taxpayer, as well as social contributions of employers, are generally deductible for tax purposes.

**Net operating losses**
Net operating losses generally may be carried forward for up to two years. However, the annual amount of carried forward losses deductible from taxable income may not exceed 50% of the taxable income in the tax year.

Legal entities involved in the infrastructure and mining industries may carry forward 100% of their losses for up to four to eight years, depending on their investment period and based on government regulations.

There is no provision for the carryback of losses.

**Payments to foreign affiliates**
Deductibility of payments to foreign affiliates depends on the nature of the payment, as follows:
• Interest payments are deductible but with restrictions (i.e. thin capitalisation rule may apply, interest paid on loans for construction of buildings and installation of equipments needs to be capitalised during that period).
• Dividend payments are not deductible.
• Technical assistance service payments are deductible.
• Payments for other services are deductible.

**Group taxation**

There are no rules permitting grouping for tax purposes in Mongolia.

**Transfer pricing**

If the following relation is present with a taxpayer, it is considered as ‘a related party’:

• Holds 20% or more of the common stock.
• Has the right to receive 20% or more of the dividends or distributions.
• Has the right to appoint 20% or more of the management of the economic entity or is otherwise able to determine its policies.

If related parties have sold or transferred goods, performed work, or rendered services among themselves below or above fair market value, the tax authority shall determine gross taxable income of such goods, work, and services based on value involving transactions of similar goods, work, and services among non-related parties.

**Thin capitalisation**

A thin capitalisation rule (debt-to-equity ratio is 3:1) applies, and interest paid in excess of this ratio is not deductible and is treated as a dividend. This is applied on a shareholder-by-shareholder basis as opposed to the company as a whole; no restriction applies to interest that is not paid to a shareholder.

**Tax credits and incentives**

At present, the following types of incentives exist in Mongolia:

• Interest on government notes payable (bonds) is exempt from CIT.
• Income earned from the production and/or sale of equipment and spare parts intended for the activities of small or medium-sized production businesses in the territory of Mongolia is exempt from CIT.
• Tax losses incurred by a business entity involved in the infrastructure and mining sector in a given tax year shall be deducted from taxable income for four to eight consecutive years after such tax year. The period will depend on the size of the investment, as defined from time to time by the responsible government agency.
• In the event that a business entity or a citizen has been found to have made a donation of up to MNT 1 million to support non-governmental organisations founded by citizens having developmental disabilities, such amount shall be deducted from taxable income of such business entity or citizen for the given tax year.
• A 50% tax reduction is available from CIT for an economic entity that produces or grows the following products:
  • Cereal, potatoes, and vegetables.
  • Milk.
  • Fruits and berries.
  • Fodder plants.
Foreign tax credit
A foreign tax credit is available for foreign taxes paid up to the amount of the Mongolian tax liability that would have been due on the same amount under Mongolian legislation.

Withholding taxes
Dividends, interest, and royalties paid; goods sold; and work/services provided to non-residents are subject to WHT at a 20% rate.

Dividends, interest, and royalties paid to resident companies are all subject to WHT at 10%.

Dividends, interest, and royalties paid to resident individuals are subject to WHT at a 10% rate, but WHT on dividends and interest to individuals are only effective as of 1 January 2013.

#### Notes

1. 5% if the recipient is a company (excluding partnerships) and directly owns at least 10% of the company.
2. 5% if the beneficial owner is a company (excluding partnerships) and directly or indirectly holds at least 10% of the company.
3. 5% if the beneficial owner is a company that controls, directly or indirectly, at least 10% of the voting power in the company.
4. 5% if the beneficial owner is a company (excluding partnerships) and directly owns at least 10% of the company.
5. 5% if the beneficial owner is a company (excluding partnerships) and directly owns at least 25% of the company.
6. No tax if the beneficial owner of the dividends is a company that has held, for 12 months before the date of dividend payment, a direct interest of at least 25%. Does not apply to dividend investments or management of investment activities, unless exercised by a banking or insurance company.
7. No tax if the beneficial owner of the dividends is a company holding at least 10% of the company.
8. No tax if dividends paid to the government/certain public bodies.

#### Pending DTTs

Mongolia has pending DTTs with Egypt, Latvia, Romania, Thailand, and Uzbekistan.

### Tax administration

#### Taxable period

The tax year is the calendar year.

#### Tax returns

Companies must submit a quarterly return by the 20th day of the month following the end of each quarter.

A withholding must prepare and submit a quarterly return of the tax deducted by the 20th day of the first month of the following quarter and an annual return by 10 February after the end of the tax year.

#### Payment of tax

A taxpayer shall pay the taxes due in advance by the 25th day of each month in accordance with the payment schedule based on the previous year. Quarterly tax statements should be submitted to the corresponding tax authority by the 20th day of the first month of the following quarter, and an annual tax statement should be submitted by 10 February of the following year when the year-end settlement is made.

In practice, the Mongolian tax authorities allow concessions as follows:

Where total tax paid exceeds the tax liability, the excess may be credited against other taxes due or credited against future tax payments. The overpayment also may, theoretically, be refunded; however, the practice of refunding in Mongolia is not clear or consistent.
Mongolia

An economic entity or organisation that has withheld tax from a payment of dividends, royalties, sale of rights, or a payment of income to a taxpayer should transfer the WHT to the tax authorities within seven working days. Tax withheld relating to the sale of immovable property should be transferred to the tax authorities within ten working days.

**Tax audit process**
The tax audit cycle is not clearly stated in the tax laws. However, the regular cycle in Mongolia is three to five years in practice, and it is very common if the company requests a refund from tax authorities or liquidates its company. Moreover, a tax audit can come anytime if the tax authorities suspect some risk or misuse of the legislation or receive information from a trustworthy source about tax evasion.

**Statute of limitations**
The statute of limitations in Mongolia is five years for tax arrears, fines, and penalties. However, the dispute settlement timeframe shall not pertain to payment of tax, fine, and penalty debts.

**Topics of focus for tax authorities**
The tax authorities normally focus their attention on issues like understatement of income, overstatement of expenses, and withholding obligations of taxpayers.

Another hot topic in Mongolia right now is transfer pricing. The transfer pricing concept is at a very early stage of development. Currently there is very limited (if any) established practice or commonly understood methodology being applied by the tax authorities. Nevertheless, the basic principle governing Mongolian transfer pricing rules is that transactions between related parties should be undertaken at fair market value.

**Significant developments**

There have been no significant corporate tax developments in Montenegro during the past year.

**Taxes on corporate income**

Entities operating in Montenegro are subject to a 9% corporate profit tax (CPT).

Resident taxpayers are taxed on their worldwide profit. Non-resident taxpayers are taxed on their Montenegrin-sourced income or income attributed to their Montenegrin permanent establishment (PE). Non-residents are also subject to withholding tax (WHT) on income sourced in Montenegro. See the Withholding taxes section for more information.

**Local income taxes**

No local (i.e. municipality) corporate income taxes exist in Montenegro.

**Corporate residence**

A legal entity is considered to be a tax resident if it is incorporated in Montenegro. In addition, a foreign corporation may also be deemed a Montenegrin tax resident if the corporation has a place of effective management in Montenegro. No explicit rules exist for determination of effective management. In practice, it usually is the place where key managerial decisions are made or where the board of directors sits.

**Permanent establishment (PE)**

Montenegrin tax legislation contains very basic PE rules following, in main features, the guidelines set out in the Commentary to the Organisation for Economic Co-operation and Development (OECD) Model Tax Treaty. PE is defined as a fixed place of business through which a non-resident carries out business in Montenegro. PE is deemed to exist in case of a non-resident having one of the following in Montenegro: place of management, branch office, office, factory, workshop, mine, gas or oil site, stone pit, or any other place of natural resources exploitation in Montenegro. A construction site constitutes a PE only if construction activities last longer than six months.

PE is not deemed to exist in case of a non-resident having storage of inventory in Montenegro only for the purpose of delivery of goods or having operations in Montenegro that are of a preparatory or auxiliary nature.
Other taxes

Value-added tax (VAT)
The main principles of the Montenegrin VAT are in line with the European Union (EU) Sixth Directive guidelines. Taxable supplies are subject to a general 17% VAT rate; however, certain supplies are taxed at a reduced 7% rate (e.g. bread, milk, books, medicines, computers) and 0% rate (e.g. export of goods, supply of gasoline for vessels in international traffic).

In principle, the VAT base is comprised of consideration (in cash, goods, or services) received for supplies, including taxes, except VAT (e.g. customs, excise duty), and direct costs (e.g. commissions, cost of packing, transport). If the consideration is not paid in cash, or if an exchange of goods for services takes place, the tax base will be the market value of the goods or services received at the time of supply.

Registration for VAT in Montenegro may be either voluntary or mandatory. Voluntary VAT registration is possible for small taxpayers who have not realised turnover exceeding 18,000 euros (EUR) in the last 12-month period. Once registered, a company may not apply for deregistration for at least three years. VAT registration is mandatory for an entity that realises turnover exceeding the EUR 18,000 threshold in any 12-month period.

VAT is calculated and paid on a calendar-month basis (i.e. a VAT return must be submitted and VAT liability cleared monthly). VAT calculated on imports is paid along with customs duties.

Customs duty

Exports
There are no export duties in Montenegro, nor is it forbidden to export any goods. Exceptionally, the Montenegrin government can impose quantity limitation of exports only in case of critical shortage of certain goods or for the purpose of protection of non-renewable natural resources, under certain conditions.

Imports
Customs duties are paid on goods imported into the customs territory of Montenegro in accordance with the rates and tariffs set forth in the Customs Tariffs, which is in line with the harmonised system of tariff codes prescribed by the World Trade Organization (WTO). Customs duties can be levied in two manners, as ad valorem or specific duty per unit of goods.

For agricultural - alimentary products, a combined duty has been determined, that is, both ad valorem and specific duty are charged simultaneously.

Ad valorem duties are prescribed within the scope from 0% to 30%. Specific duties range from EUR 0.04 per 1 kg to EUR 1 per 1kg.

Customs rates stipulated by international agreements are only applied to goods of preferential origin from countries covered by such agreements. The most important free trade agreements that Montenegro signed are with the European Union, the European Free Trade Association (EFTA), the Central European Free Trade Agreement (CEFTA) states, Russia, Turkey, and Ukraine.
Excise duty
Legal entities that are importers or producers of the following products are subject to the excise duty:

- Alcohol and alcohol beverages.
- Tobacco products.
- Mineral oils, their derivatives, and substitutes.
- Coffee and coffee products.
- Mineralised water with sugar or aroma.

Excise duty can be prescribed as a fixed amount and/or as a certain percentage (ad valorem).

Property tax
Property tax is payable by legal entities who own or have user rights over real estate located in Montenegro. The annual tax is levied at proportional rates, ranging from 0.1% to 1% on the market value of assets as of 1 January of the current year. In case of acquisition of new property, the taxpayer is obligated to submit a tax return to the tax authorities within 30 days from the acquisition date (i.e. registration return for property tax) and to declare annual property tax by the submission of annual returns. Tax is payable in two instalments, based on decisions issued by the tax authorities.

Property transfer tax
Transfer tax of 3% is payable on the acquisition of ownership rights over immovable property.

The taxable base is the market value of the immovable property at the time of the acquisition. A taxpayer (i.e. the acquirer of immovable property) is obligated to submit a tax return within 15 days from the contract date. The liability is payable within 15 days from the receipt of the tax administration decision.

Stamp taxes
No stamp taxes are in place in Montenegro.

Payroll tax
Employment income includes all receipts paid or provided to an individual based on employment (salaries, pensions, benefits in kind, insurance premiums, benefits, and awards above the non-taxable thresholds). Income generated through other types of personal engagements similar to employment (e.g. temporary jobs) is also considered employment income.

While employees are the taxpayers, the employer is responsible for calculating and withholding personal income tax (PIT) on behalf of its employees.

Employment income is subject to WHT at a flat rate of 9%. As of February 2013, gross salary exceeding EUR 720 is subject to 15% PIT. The 15% rate applies to the part of the salary exceeding EUR 720, while the 9% rate applies to the part of the salary below (and including) EUR 720.

Social security contributions
Social security contributions for pension and disability insurance, health insurance, and unemployment insurance are calculated and withheld by an employer from the salary paid to an employee. Unlike the other two types of social security contributions, pension
Montenegro

and disability insurance contributions are subject to a specific annual cap (EUR 50,000 for 2012).

Social security contributions are payable by the employer and employee at different rates. The amount borne by the employer is treated as an operating cost while the portion payable by the employee is taken from the gross salary.

The rates paid by the employer are as follows:

- Pension and disability insurance 5.5%.
- Health insurance 3.8%.
- Unemployment insurance 0.5%.

The rates paid by the employee are as follows:

- Pension and disability insurance 15%.
- Health insurance 8.5%.
- Unemployment insurance 0.5%.

**Environmental charges**

Legal entities are subject to environmental charges for the following:

- Use of firing or electrical feed equipment with power greater than 1MW.
- Import of substances harmful to the atmosphere.
- Production or deposit of dangerous waste.
- Tax for use of road vehicles (vignettes).
- Charges for access to certain services that are of general interest (for use of mobile telephones, electricity, cable television connection, space denominated for consumers of tobacco products and acoustic devices).

**Branch income**

Non-residents carrying out business in Montenegro through a PE are taxed on their Montenegrin-source income at a rate of 9%. A branch is considered to be a PE.

**Income determination**

Taxable profit is calculated by adjusting the accounting profit (determined in accordance with International Financial Reporting Standards [IFRS] and accounting legislation) in accordance with the provisions of the CPT Law.

**Inventory valuation**

Inventory is valued by applying the average weighted cost method or the first in first out (FIFO) method. If another method is used for book purposes, an adjustment for tax purposes should be made.

**Capital gains**

Capital gains realised by the sale or transfer of real estate or other property rights, as well as shares and other securities, are subject to the 9% CPT rate.

Capital gains may be offset against capital losses occurring in the same period. A capital loss may be carried forward for five years.
Montenegro

**Dividend income**
Dividend income of the recipient is exempt from CPT in Montenegro if the distributor is a Montenegrin corporate taxpayer.

**Interest income**
Interest income is included in taxable profit and subject to 9% CPT.

**Foreign income**
A Montenegrin resident receiving foreign income is granted a tax credit in the amount of the tax paid abroad but limited to the amount that would be calculated using Montenegrin rates.

There are no provisions that provide for the possibility that taxation of income earned abroad may be deferred.

**Deductions**

**Depreciation**
Depreciable assets are tangible and intangible assets with a useful life of at least one year and an individual acquisition value of at least EUR 300.

Intangible and fixed assets are divided into five depreciation groups, with depreciation rates prescribed for each group (I - 5%, II - 15%, III - 20%, IV - 25%, and V - 30%). A straight-line depreciation method is prescribed for assets classified in the first group (real estate), while a declining-balance method is applicable for assets classified in the other groups.

**Goodwill**
Goodwill is determined according to IFRS and is subject to impairment. There are no other special provisions on goodwill.

**Start-up expenses**
There are no special provisions regarding treatment of start-up expenses. Therefore, they will be deductible if they are incurred for business purpose and properly documented under the general expense deductibility rule.

**Interest expenses**
Interest expenses are generally deductible if they are business related and properly documented. Also, interest and related cost of loans paid out to a creditor with the status of a related party are recognised as expenses only in the amount that does not exceed market interest rates between unrelated parties. The exceeding amount is not recognised as an expense, but it is included in the taxable profit and subject to 9% CPT.

Interest paid out to non-resident legal entities (unless it is revenue of a PE of a non-resident legal entity) is subject to WHT levied at 9%.

**Bad debt**
Write-offs and provisions for doubtful debts are considered deductible, provided that:

- written-off/provided receivables were previously included in the taxpayer’s revenues
- doubtful debts were written-off as uncollectible, and
- proof of unsuccessful collection of these debts exists.
Montenegro

Charitable contributions
Charitable contributions for healthcare, scientific, educational, humanitarian, religious, environmental protection, and sports-related purposes are recognised for CPT purposes, up to a threshold of 3.5% of total revenue.

Fines and penalties
Penalty interest for late payment of taxes is not CPT deductible.

Taxes
The basic deductibility rule is that business expenses incurred for business purposes are CPT deductible. Following that rule, CPT Law provides for full deductibility of taxes.

Other significant items
The following expenditures are also recognised for CPT purposes, up to the prescribed threshold:

- Entertaining expenses, up to 1% of total revenue.
- Membership fees paid to chambers of commerce and other associations (except political parties), up to 0.1% of gross revenue unless the amount of the fees has been determined by law.
- Provisions for redundancy payments and jubilee awards recognised as expenditures, up to the amount prescribed by the labour law.
- Provisions made by banks and insurance companies, in an amount not exceeding the amount prescribed by the legislation that regulates operation of these entities.
- Provisions for special risks of brokers and dealers, up to the amounts prescribed by the securities law.
- Provisions for renewable natural resources, warranties for the sale of goods and services (guarantee period), and the expected loss from court process (delicate agreements) if accounted for in accordance with the accounting legislation.

Net operating losses
The taxpayer is entitled to carry forward losses incurred in an accounting period over the following five years. Carryback of losses is not allowed.

Payments to foreign affiliates
Supplies of goods or services from a foreign group entity not established in Montenegro to a Montenegrin entity must be valued at arm’s length. Excess expenses recorded over market value are treated as non-deductible expenses.

With respect to payment of charges of a PE, CPT Law provides that administrative costs charged by the non-resident head office are non-deductible for CPT at the level of PE.

Group taxation
Tax consolidation is permitted for a group of companies in which all of the members are Montenegrin residents and the parent company directly or indirectly controls at least 75% of the shares in the other companies. Each company files its own tax return, and the parent company files a consolidated tax return for the entire group.

Each company is taxed based on its contribution to the consolidated taxable profit (or loss) of the group.

Tax consolidation is binding for at least five years.
Transfer pricing
The difference between the transfer price and arm’s-length price is included in the taxable profit and is taxed accordingly. Parties considered to be related are the parties between whom special relations exist, which could directly impact the conditions or economical results of the transaction between them.

Methods permitted in determining arm’s-length price are the comparable uncontrolled price (CUP) method (as the primary method), resale minus method, or cost plus method.

There are no other rules or guidelines introduced apart from the above rules in respect to transfer pricing.

Thin capitalisation
There are no thin capitalisation provisions in place in Montenegro.

Tax credits and incentives
The CPT Law provides only three tax incentives related to businesses: one for newly established businesses in non-developed municipalities, one for non-governmental organisations, and a foreign tax credit. The latest CPT amendments introduced the tax holiday for newly established business in underdeveloped municipalities.

Tax exemption for newly established business in underdeveloped municipalities
Newly established production companies located in underdeveloped municipalities are entitled to an eight year tax exemption.

The incentive is applicable to companies whose business units are established in underdeveloped regions. In that case, tax holiday is proportional to the amount of profit generated by such unit over the total profit for the period of eight years from establishment of the unit.

The tax incentive is not applicable to a taxpayer operating in the sector of primary production of agricultural products, transport, shipbuilding, fishery, and steel production.

Tax exemption for non-governmental organisations
Non-governmental organisations (NGOs) registered for business activity are permitted to decrease the corporate tax base by EUR 4,000, with the condition that this money is used for realisation of the main goals of an NGO.

Foreign tax credit
Resident taxpayers are entitled to a tax credit up to the amount of corporate tax paid in another country on income realised in that country. This tax credit is equal to the tax paid in another country but may not exceed the amount of the tax that would have been paid in Montenegro.

Withholding taxes
Montenegrin CPT Law imposes WHT on income realised from a Montenegrin source and distributed to a non-resident. The scope of the WHT applies to dividends and profit
Montenegro

distribution, capital gains, interest, royalties, intellectual property rights fees, and rental income, as well as fees for consulting, market research, and audit services.

Distributions of dividends and share of profits are also subject to WHT if the recipient is a Montenegrin resident (either an individual or legal entity).

The general WHT rate is 9%.

Application of a double tax treaty (DTT) may reduce or eliminate Montenegrin WHT. To qualify for the beneficial rates prescribed by the treaty, a non-resident must prove tax residency of a relevant treaty country and beneficial ownership over the income. In order to qualify for a preferential tax rate according to a DTT, a non-resident will need to provide the tax residency certificate filled out and stamped by the relevant authority of its country of residence.

Although Serbia is regarded as the legal successor of the Serbia and Montenegro State Union that ceased to exist in June 2006, the Republic of Montenegro, upon its Decision on Independence (dated 3 June 2006), continues to honour international treaties that were applicable in the State Union, including those executed by State Union's legal predecessors (Federal Republic of Yugoslavia and Socialist Federal Republic of Yugoslavia, i.e. former Yugoslavia). However, a quite low statutory WHT rate of 9%, which was enacted after the most of the treaties had been introduced, is usually more beneficial than treaty rates.

The list of the treaties is provided below:

### Notes

1. If the recipient company owns/controls at least 25% of the equity of the paying company, the lower of the two rates applies.
2. A new DTT was signed with Egypt in 2005, but it is not applicable yet. Meanwhile, the old treaty is still applicable.
3. Instruments of ratification have not been exchanged between the two countries.
4. A tax rate of 5% will be applicable to literary, scientific, and work of art, films and works created like films, or other sources of reproduction tone or picture. A tax rate of 10% will be applicable to patents, petty patents, brands, models and samples, technical innovations, secret formulas, or technical procedure.
5. Only in cases when dividends are to be paid to Montenegrin residents. If paid to Malaysian residents, they are taxable at 9% in Montenegro.
6. A 5% rate is applicable for intellectual property and 10% rate for industrial property.
7. A 0% rate is applicable in cases when the income recipient is the government or government-owned banks.

### Tax administration

#### Taxable period

The tax year in Montenegro is the calendar year.

#### Tax returns

Tax returns and supplementary documents (e.g. tax depreciation form) must be filed with the tax authorities by the end of March of the following year.

#### Payment of tax

CPT is paid by the end of March of the following year for the previous year. Alternatively, CPT may be paid in six annual instalments at the taxpayer’s request.

#### Tax audit process

There are no particular provisions regarding the audit cycle in Montenegro.
Statute of limitations
The right to assess taxes expires within five years after the end of the year in which the tax should have been assessed.

The right to collect taxes expires within three years after the end of the year in which tax has been determined.

Topic on focus for tax authorities
According to our best knowledge, the focus of the tax authorities is proper documenting of expenses and VAT. Apart from this, we are expecting that in the near future the focus of the tax authorities will be transfer pricing, following trends of the countries in the region.
Significant developments

Withholding tax (WHT) on dividends
Finance Law 2013 increased the domestic rate of WHT on dividends from 10% to 15%. This new rate is applicable to dividends paid or made available to beneficiaries starting 1 January 2013.

Social cohesion contribution
Finance Law 2013 provides for the application of a ‘social cohesion contribution’ levied on companies for which the accounting net income exceeds 15 million Moroccan dirhams (MAD) in a fiscal year for the three fiscal years starting from 1 January 2013.

This contribution is not tax deductible.

The applicable rates for the social cohesion contribution are as follows:

<table>
<thead>
<tr>
<th>Net profit (MAD)</th>
<th>Contribution rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Between 15 million and 25 million</td>
<td>0.5</td>
</tr>
<tr>
<td>Between 25 million and 50 million</td>
<td>1</td>
</tr>
<tr>
<td>Between 50 million and 100 million</td>
<td>1.5</td>
</tr>
<tr>
<td>More than 100 million</td>
<td>2</td>
</tr>
</tbody>
</table>

Reduced rate for small companies
Companies for which the net taxable income does not exceed MAD 300,000 benefit from a reduced rate of corporate income tax (CIT) of 10%.

Taxes on corporate income
In general, the Moroccan tax code considers that all revenues and capital gains generated in Morocco are subject to Moroccan taxation.

Companies are taxed on the difference between their trading income and expenditure. Business expenses incurred in the operation of the business are generally deductible unless specifically excluded.

The standard CIT rate is 30%. A higher rate of 37% applies to leasing companies and credit institutions.

A reduced rate of 10% applies to small companies realising taxable income equal to or less than MAD 300,000.
Morocco

Non-resident companies can, under certain conditions, opt for an alternative tax at the rate of 8% of the amount of their contract, whatever the taxable income is.

**Minimum contribution**
CIT cannot be lower than a minimum contribution of 0.5% (or 0.25% for specific products) levied on the turnover and other specific revenues. The minimum contribution is not due during the first 36 months following the beginning of activities.

The minimum contribution paid in case of loss or the portion of minimum contribution that exceeds the amount of CIT may be offset against the portion of CIT that exceeds the minimum contribution until the third year.

**Local income taxes**
There are no local taxes levied on income in Morocco.

**Corporate residence**
Companies, whether or not established in Morocco, are subject to CIT on all profits or income relating to property that they own, activities that they carry on, and profit-making transactions that they carry out in Morocco, even when these are of an occasional nature.

**Permanent establishment (PE)**
The notion of PE is not explicitly defined under Moroccan tax law.

However, the Moroccan tax authorities apply this concept for non-resident companies according to some determined criteria that are inspired from the various tax treaties that Morocco has signed with other countries.

Indeed, the question of whether an entity will be deemed to have a PE in Morocco is a question of fact, in particular, subject to having, in Morocco, any fixed place of business through which a foreign entity conducts industrial or commercial activity for an indefinite or substantial period of time.

The term fixed place of business includes, for instance, a place of management or operations, a branch, an agency, a premises used as a sales outlet, a construction of assembly project, or a purchasing office. Also, in some specific cases, a non-resident company may be deemed as having a PE if it operates in Morocco through a dependant agent.

**Other taxes**

**Valued-added tax (VAT)**
VAT is levied under the Moroccan Tax Code and is due on all industrial, commercial, and handicraft transactions taking place in Morocco, as well as on importation operations.

The standard rate of VAT is 20%. Lower rates of 7%, 10%, and 14% apply to specifically designated operations.

The sale of goods is considered as taking place in Morocco, and thus subject to VAT, if the goods sold are delivered in Morocco.
The sale of services is considered as taking place in Morocco, and thus subject to VAT, if the services sold are consumed or used in Morocco.

Two types of exemptions from VAT are provided. The first is an exemption with credit, equivalent to the zero tax concept. The second is an exemption without credit.

The zero-rated supplies include (but are not limited to) supplies of the following goods or services:

- Exported goods and services.
- Certain agricultural equipment supplied under prescribed circumstances.
- Investment goods recorded as fixed assets in the company accounting and acquired during the first 24 months following the beginning of activity.
- Offshore banks for certain specific operations, such as interest and commissions.
- Goods and services rendered to companies established in free trade zones (FTZs).
- Activities related to hydrocarbon exploration, etc.

Exempt supplies without deduction right include (but are not limited to) supplies of the following goods or services:

- Milk, sugar, bread, cereals.
- Fiscal stamps.
- Newspapers, books, documentaries.
- Interest on government loans.

**Customs duties**

Importation of goods in Morocco gives rise to payment of importation duties, the VAT on importation, and the special tax on importation called **Taxe Parafiscale à l’Importation** (TPI).

Customs duties are computed on the basis of the *ad valorem* value of the goods at the time of their entrance into Morocco.

Customs duties can be reduced if the imported products are covered by free trade agreements signed by Morocco or other specific regulatory dispositions.

Under Moroccan tax law, the importation operations are subject to VAT at the rate of 20%. Lower rates of 7%, 10%, and 14% apply to specifically designated importations.

The Moroccan tax law also offers some economical customs regimes that provide VAT exemptions with credit (equivalent to zero rate).

The TPI rate is 0.25% levied on the value of the imported goods.

**Excise taxes**

Excise taxes apply to specific products imported or produced in Morocco, such as tobacco, alcohol, and lubricants.

**Professional tax**

A professional tax is levied on individuals and enterprises that carry out a professional activity in Morocco.
Morocco

The tax consists of a tax on the rental value of business premises (rented or owned) and fixed assets. The tax rates range from 10% to 30%, with exemption for the five first years of activity.

The rental value is exempted for the portion of cost exceeding MAD 50 million.

**Registration duties**

Registration duties are due on all written or verbal conventions, such as property transfer of real estate, shares, or rights; company set up; equity increase; and goodwill transfer.

The rates of registration duties range from 1% to 6%. A flat rate of MAD 200 is also applicable to specific operations and conventions.

For information purpose, the company set up and the capital increase are subject to registration duties at the rate of 1%.

The transfer of non-listed shares is subject to registration duties at the rate of 3%. However, a 6% rate is applicable to the transfer of shares of real estate companies.

The applicable rate for the transfer of goodwill is 6%.

**Branch income**

Non-resident entities are subject to income tax at normal corporate rates derived from all profits or income relating to property that they own, activities that they carry on, and profit-making transactions that they carry out in Morocco.

The taxation is levied to the portion of income allocable to the branch located in Morocco.

In addition, a 10% ‘branch tax’ applies to a non-resident's after-tax profits. The rate at which the branch tax is levied may be reduced to the WHT rate on dividends prescribed in the relevant tax treaty.

For resident entities having branches in Morocco, the income is taxable in the hands of the head office at normal corporate rates.

**Income determination**

**Inventory valuation**

Cost of inventory must be determined in accordance with the first in first out (FIFO) or the average cost method. The last in first out (LIFO) method is prohibited.

**Capital gains**

Capital gains are taxable as a part of ordinary business income.

**Dividend income**

Dividends received by corporate shareholders from Moroccan-resident entities subject to CIT must be included in business profits of the recipient company, but the dividends are 100% deductible in the computation of taxable income.
The participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

**Interest income**
Interest income is subject to a WHT at the rate of 20%. The WHT is deductible from CIT.

**Rents/royalties income**
Rents and royalties income are taxable as a part of ordinary business income.

**Foreign income**
The income derived from activities carried out in a foreign country is not subject to taxation in Morocco unless the taxation is granted by treaty dispositions.

Note that the participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

**Deductions**

**Depreciation**
Fixed assets are normally depreciated according to their economical life duration according to the provision of the accounting regulation.

Depreciation is computed according to two methods: the straight-line method and the declining-balance method.

The tax regulation (through administrative guidelines) has provided indicative depreciation rates applicable when the company activity or the asset to be depreciated is specific or particular.

Indicative depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business premises and buildings</td>
<td>4 to 5</td>
</tr>
<tr>
<td>Lights constructions (metal frame constructions)</td>
<td>10</td>
</tr>
<tr>
<td>Production equipments, tools, and constructions fitting</td>
<td>10 to 15</td>
</tr>
<tr>
<td>Huge computer facilities</td>
<td>10 to 20</td>
</tr>
<tr>
<td>Computers and related items (printers) and programs, as well as vehicles</td>
<td>20 to 25</td>
</tr>
<tr>
<td>(cars, trucks, vans, lifters)</td>
<td></td>
</tr>
<tr>
<td>Office furniture and software</td>
<td>20</td>
</tr>
<tr>
<td>Non-significant tools</td>
<td>30</td>
</tr>
</tbody>
</table>

**Goodwill**
Under Moroccan tax law, goodwill cannot be subject to amortisation. However, a decrease of the value of goodwill is allowed to be recorded through provisions.

**Start-up expenses**
The development as well as incorporation expenses shall be capitalised and be tax depreciated over a period of five years.

The carryforward of any loss due to the above expenses is limited to a period of four years.
**Morocco**

**Interest expenses**
Interest on loans granted by direct shareholders is deductible if the capital is fully paid in. Also, the deductible interest is limited to (i) the portion of the loan that does not exceed the share capital equity and (ii) the interest rate provided, annually, by the Ministry of Finance (3.33% in 2012).

**Bad debt**
Bad debts that are definitively non-recoverable (after all recovery procedures have been undertaken) are treated, from a tax point of view, as deductible losses.

**Charitable contributions**
Charitable contributions made by companies are deductible only if they are granted to foundations and societies explicitly provided by law.

The contributions made to the community enterprise are deductible at up to 0.2% of the company turnover.

**Fines and penalties**
Fines and penalties are not tax deductible expenses if they relate to infringements to legal and regulatory dispositions.

Tax penalties provided under Moroccan law include penalties for late return submission as well as for late payment.

**Taxes**
Taxes constitute deductible expenses, except CIT itself and recoverable taxes.

**Net operating losses**
Tax losses may be carried forward for a period of four years from the end of the loss-making accounting period. However, the portion of a loss that relates to depreciation may be carried forward indefinitely.

A carryback mechanism is not allowed under Moroccan law.

**Payments to foreign affiliates**
Payments to foreign affiliates are allowed under Moroccan law. However, such payments should respect the arm’s-length principle and foreign exchange regulations.

**Group taxation**
Under Moroccan law, consolidation or group taxation is not allowed.

**Transfer pricing**
Morocco has a general provision within its tax legislation requiring transactions between related parties to be at arm’s length.

Where a Moroccan company is directly or indirectly connected with enterprises situated inside or outside Morocco, profits transferred indirectly to such enterprises, by means of increases or decreases in buying or selling prices or by any other means, must be included among taxable profits on the tax return.

In order to determine the amount to be included among taxable profits, Moroccan tax authorities will make comparisons with other similar companies carrying on normal...
business activities or by mean of direct assessment based on information available to the tax authorities.

**Thin capitalisation**
No specific thin capitalisation rules exist in Morocco.

However, the tax law restricts the interest rate on debts issued by shareholders and the basis of calculating deductible interests.

Interest incurred is tax deductible if the shareholder’s capital is fully paid. Additionally, the sum of the shareholder loans generating deductible interests should not exceed the equity capital subscribed, and the applicable interest rate should not exceed the official rate calculated annually on the basis of six months treasury bills.

**Tax credits and incentives**
The Moroccan tax law provides several tax incentives for specific sectors of activities.

**Export companies**
Export companies are exempt from CIT on their profits related to their export turnover during the first five years following their first export transaction. These companies benefit from a reduced CIT rate of 17.5% in subsequent years.

**Hotel companies**
Hotel companies are fully exempt from CIT on their profits relating to foreign currency turnover for the first five years following their first accommodation operation in foreign currency. They also benefit from a reduced CIT rate of 17.5% on such profits for subsequent years.

**Mining companies**
Exporting mining companies, including those that sell products to export companies, benefit from a reduced CIT rate of 17.5%.

**Agricultural enterprises**
Agricultural enterprises are exempt from all taxes until the year 2013.

**Capital risk companies**
Capital risk companies are exempt from CIT on profits derived within the scope of their activities (these are profits related to purchases of companies' shares that support such companies' development and the sales of such shares thereafter).

**Hydrocarbon companies**
Companies holding hydrocarbon exploration and exploitation permits are exempt from CIT for ten years from the beginning of hydrocarbon regular production.

**Banks and holding companies located in offshore zones**
Banks and holding companies located in offshore zones benefit from a reduction in CIT for the first 15 years of operation.

Banks may opt for a minimum CIT of 25,000 United States dollars (USD) or pay the tax at a reduced rate of 10%.

Holding companies pay a flat tax of USD 500 during the first 15 years.
Casablanca Finance City (CFC)
A law was enacted in 2010 for the setting up of a finance area in Casablanca, called, Casablanca Finance City.

The CFC statute may be granted to specific financial institutions as well as non-financial institutions that offer such services as auditing, fiscal, legal, financial, actuarial, and human resources management advisory.

The above statute may also be granted to regional and international headquarters.

Entities established in Casablanca Finance City are exempt, for their export turnover, from CIT during the first five years following the date they obtain the CFC statute. These companies benefit, for the export turnover, from a reduced rate of 8.75% in subsequent years.

Free trade zones (FTZs)
The activities that must be necessarily performed by the companies established in the FTZs are mainly the followings (the activities may vary for each FTZ):

- Food processing industries.
- Textile and leather industries.
- Metallurgic, mechanic, electric, and electronic industries.
- Chemical and special chemical industries.
- Services connected with the aforementioned activities.

Entities established in FTZs are exempt, for their export turnover, from CIT during the first five years. These companies benefit, for the export turnover, from a reduced CIT rate of 8.75% for the following 20 years.

Moreover, for entities established in FTZs, the dividends paid to non-residents relating to activities performed in the FTZ are totally exempted from the WHT on dividends.

Listed shares
Non-resident entities are exempt from capital gains derived from the sale of stocks listed on the Casablanca stock exchange, excluding the shares of real estate entities.

Foreign tax credit
Income tax paid on income earned from outside Morocco may be credited against CIT payable in Morocco if provided by treaty.

Withholding taxes

WHT on interests
The standard WHT on interest paid to non-resident entities is set at 10% as provided by the Moroccan law (unless reduced by treaty). However, the Moroccan law provides that interest on loans granted in foreign currency with a maturity exceeding ten years is exempt from WHT.

WHT on dividends
The standard WHT rate on dividends is set at 15% according to the Moroccan law (unless reduced by treaty).
WHT does not apply to dividends paid to Moroccan companies subject to Moroccan corporate tax, subject to the delivery of a property attestation.

A branch tax of 10% applies to the net income transferred by the Moroccan branch to foreign entities (may be reduced by the tax treaty).

**WHT on services paid to non-resident entities**

According to the Moroccan tax code, all payments of all kinds of services rendered by non-resident entities are subject to WHT at the rate of 10%.

However, it shall be noted that treaties dispositions limit the scope of application of WHT only to remunerations that constitute royalties. Such dispositions overrule the domestic tax law provided by the Moroccan law.

**Treaty WHT rates**

Payments to non-resident corporations and individuals are subject to WHT, as shown below.

### Notes

1. Some treaties provide for an exemption for certain types of interest (e.g. interest paid to public bodies and institutions). Such exemptions are not dealt with in this treaty chart.
2. Arab Maghreb Union, the member states of which are Algeria, Libya, Mauritania, Morocco, and Tunisia.
3. There is no limitation on WHT under the treaty.
4. The lower rate (i.e. 5%) usually applies to copyright royalties and other similar payments in respect of the production or reproduction of any literary, artistic, or dramatic work (excluding cinematographic and television films), while the 10% rate applies to other types of royalties.

### Tax administration

#### Taxable period
The taxable period corresponds to 12 months. The first taxable period can be less than one year but should never exceed it.

#### Tax returns
CIT returns must be filed within three months following the closing of the fiscal year.

#### Payment of tax
Payment of tax is made during the fiscal year by way of four instalments of 25% each based on the CIT of the previous year.

In case the CIT of the year exceeds the sum of the four instalments, the company should proceed to tax regularisation along with the submitting of the taxable income return after three months following the closing of the fiscal year (i.e. 31 March for fiscal year corresponding to the calendar year). Otherwise, the exceeding tax amount can be imputed on the four following instalments. Any remaining excess is reimbursed by the tax authorities.

#### Statute of limitations
The statute of limitations runs until the end of the following fourth year. This period may be extended in case of deficits or credits.
Topics of focus of tax authorities
The topics of focus of tax authorities depend on each specific situation (sector of activity, company size, etc.). However, it is very common to find the following points:

- Transfer pricing.
- Tax treatment of provisions.
- Taxation of indemnities and benefits granted to employees.

Other issues
Exchange controls
Foreign investors are allowed, following the accomplishment of some formalities, to freely transfer abroad the whole proceeds of their investments in Morocco (i.e. dividends, shares sale price, and liquidation income under the condition that the initial investment is realised in one of the foreign currencies listed by the Moroccan Central Bank).

However, some specific transfers of funds into and out of Morocco are subject to prior authorisations from the exchange control office.

Choice of business entity
The legal vehicles used by foreign companies for the purpose of setting up a business in Morocco are the branch and the subsidiary.

Under subsidiary form, the foreign entities generally opt for the corporation (SA) or the limited liability company (SARL).

The SARL is most adequate for companies with low investment capital while the SA is most appropriate for companies that are investing an important amount of capital. In general, the rules relating to the organisation and functioning of an SARL are more flexible than those required for an SA.

Significant developments

Mozambique introduced changes to the Corporate Income Tax (CIT) Code, which will be effective as of 1 January 2013 when enacted. With the changes in the tax law, capital gains from indirect transfers of participating interests of assets located in the country will be taxed. Further, the concept of ‘special relation’ in the transfer pricing regime will be introduced, and the scope of non-deductible costs for tax purposes will be extended.

Taxes on corporate income

CIT is payable on general corporate income at a tax rate of 32%. For tax years ending prior to 1 January 2016, income arising from agricultural or cattle breeding activities is subject to a reduced rate of 10%.

CIT is levied on taxable profits, defined as accounting profits adjusted to comply with tax law rules.

Corporate entities and other entities with headquarters or permanent establishment (PE) in Mozambique are subject to CIT based on their worldwide income. On the other hand, corporate entities and other entities without headquarters or PE in Mozambique (i.e. non-resident entities) are only subject to CIT on the income earned in Mozambique.

Local income taxes

See Municipality taxes in the Other taxes section.

Corporate residence

Corporate residence is determined on the basis of a company’s place of incorporation or effective management. Thus, all companies with headquarters in Mozambique, as well as any PE of non-resident entities, are considered tax residents and are liable for CIT on their worldwide income.

Permanent establishment (PE)

Under the relevant internal legislation, a non-resident entity is deemed to have a PE in Mozambique whenever any of the following circumstances exists:
• It has premises or other fixed places of business through which industrial, trading, agricultural, rendering of services, or similar activities are totally or partially carried out.
• It has an office, branch, plant, workshop, mines, quarries, oil or natural gas wells, or other places of extraction of natural resources.
• It has a construction, installation, or assembly site when the duration of works exceed six months, including the activities of coordination, inspection, and supervision connected to these sites.
• It has persons or hired personnel, acting and dealing in Mozambique, who are not independent agents in the terms of the law but rather acting on behalf of the company with legal capacity to conclude contracts on its behalf and its name within the scope of the company’s activities.

Other taxes

Value-added tax (VAT)
VAT is chargeable on the sale of most goods and services as well as on imports. The standard rate is 17%. Usually, VAT is recoverable by corporate entities, except for those engaged in special business activities (e.g. financial and insurance operations, leasing [exemption with restrictions], sale of immovable property, some exempt activities).

Customs duties
Custom duties are charged on importation of goods into Mozambique, and the applicable rates vary from 0% to 20%. Mozambique is part of the Southern African Development Community (SADC) protocol on commercial trade that exempts from customs duties some goods produced within the SADC region. However, in order to benefit from the exemption, the importer should provide proof of the origin of the said goods through the presentation of the certificate of origin of goods.

Mozambique also has signed agreements with the European Union (EU) based on which preferential rates are applicable on certain goods imported from such region.

Excise taxes
Excise duties are levied on certain goods manufactured locally or imported, which are identified in a specific table that is an integrant part of the Excise Duty Act and indicates the applicable rates. Amongst others, the said table includes goods such as tobacco, beer and other alcoholic beverages, vehicles, cosmetics, cloths, airplanes, boats, etc.

Examples of excise duty rates include the following:

• Alcoholic beverages: 40% (55% for wine of fresh grape).
• Tobacco: 75%.
• Air vehicle without engine: 35%.
• Boats and other recreational or sportive crafts: 35%.
• Cloths and respective accessories: 30%.

Property transfer taxes (SISA)
In Mozambique, a property transfer tax is charged on transfers of real estate, excluding the land, which is owned by the state. The rate of tax is 2% of the selling price of the building. When the beneficiaries live in a country with a privileged tax regime, the applicable rate is 10%.
Mozambique

**Stamp duties and service charges**
Various documents require the payment of stamp duties. Service charges are payable for the performance of certain services for official purposes, such as those rendered by public notaries. These duties have been recently amended and vary generally from 0.03% to 50% on the amount of the transaction supported by the document to be stamped. In some other cases, the stamp duty comprises fixed amounts, ranging from 0.50 Mozambican meticais (MZN) to MZN 5,000.

**Social security contributions**
Social security contributions are payable by employers and employees on monthly remuneration. The aggregate rate of contribution is 7%, with 4% paid by the employer and the remaining 3% by the employee.

**Municipality taxes**
Municipality taxes that should be considered for corporate purposes include the following:

**Municipality tax on real estate**
The municipality tax on real estate is levied annually on the value of immovable assets situated within the municipality and owned or possessed by corporate entities. Effective tax rates range from 0.2% to 1% of the building value, depending on the municipality.

**Municipality tax on economic activities**
The municipality tax on economic activities is levied on commercial or industrial activities carried out within a municipal territory. The tax depends on the activity being carried out, adjusted by coefficients, which are based on the zone and total area of the premises in square metres. In Maputo, this tax is calculated based on the following formula:

\[
\text{Maputo tax on economic activities} = \text{Basis rate} \times \text{Index of category} \times \text{Index of location} \times \text{Index of area occupied}
\]

Where the basis rate is the applicable maximum amount of the national minimum salary (currently MZN 6,171, approximately 200 United States dollars [USD]).

Where the index of the location varies from 1.3 to 1.5, depending on the location of the premises within the municipality.

Where the index of the area occupied varies from 1.2 to 1.5, depending on the nature of the activities and the space occupied by the premises.

**Municipal vehicles tax**
The municipal vehicle tax replaces the vehicles tax within the municipality and is levied on the use of specific vehicles (e.g. light and heavy vehicles less than 25 years old, motorcycles less than 15 years old, aeroplanes, and boats for private use). This tax is due by the owners who are residents of a municipality, regardless of the place of registration of the vehicle owned.

The rate varies, depending on specific criteria such as type of fuel, engine capacity, period of registration, and weight.

This tax must be paid between January and March or within 30 days after the acquisition of the vehicle.
**Branch income**

From a tax perspective, branches are liable for Mozambican CIT as a separate entity; consequently, the regime is the same that would apply to a Mozambican resident company. However, on the grounds that branches do not distribute dividends, the 20% withholding tax (WHT) does not apply to the after-tax profits arising in Mozambique.

**Income determination**

**Inventory valuation**

Special rules regarding valuation of inventories are still waiting for approval from the Minister of Finance. In the meantime, all inventory valuation methods generally accepted and according to international accounting principles are permitted for tax purposes, provided that the method is:

- used by the taxpayer consistently and
- based on arm's-length prices duly documented and effectively exercised.

Based on the above assumptions, last in first out (LIFO) and first in first out (FIFO) methods are allowed. Write-downs and depreciation of inventories are not allowed. Conformity between book and tax reporting is required.

In principle, large companies began adopting International Financial Reporting Standards (IFRS) in 2010.

**Capital gains**

Capital gains less any capital losses derived from the sale or disposal of tangible fixed assets, including insurance indemnities received in case of accident, are taxed as part of normal income. If a taxpayer reinvests the sale proceeds within three tax years following the year of sale, the gain may be deferred until the end of the third year. A four-year reinvestment period may be accepted, provided a prior application is submitted to the Minister of Finance. However, if the taxpayer does not realise the reinvestment, the CIT that was not assessed during the three-year period will be assessed, along with compensatory interest.

The Mozambique Parliament is currently studying the possibility of introducing changes to the CIT Code so that capital gains arising from indirect transfers of participating interests of assets located in the country will be subject to taxation. It is worth noting that this change has not yet been approved, but there is a strong possibility that this change will enter into force in 2013.

**Dividend income**

In the case of resident companies, income arising from dividends is excluded from taxable income, provided that the shares that a resident company holds in another resident company represents at least 20% of the total capital and are held for at least two consecutive years (or with an undertaking to hold the shares for this period). The same applies to income arising from risk capital companies and holding companies (Sociedade Gestora de Participações Sociais or SGPSs) or from subsidiaries as a result of the application of technical reserves in insurance companies. However, in the case of holdings, the percentage of share capital decreases to 10% and shares should be held for at least one year.
Mozambique

If the shareholding falls outside the parameters indicated above, the tax withheld (20%) constitutes a payment on account. A tax credit corresponding to 62.5% of the CIT is attributable to the gross-up dividend.

**Interest income**
Interest is subject to 20% WHT. In the case of foreign entities, the WHT is considered as a definitive tax. In the case of resident entities, it is considered as an advance of the final tax.

**Foreign income**
Mozambican resident companies are taxed on the total income earned on a worldwide basis. Please note that there is no provision on tax deferral in Mozambique in relation to income earned abroad. Double taxation treaties (DTTs) allow tax paid abroad to offset Mozambican CIT. Mozambique has signed DTTs with Botswana, India, Italy, Macau, Mauritius, Portugal, South Africa, the United Arab Emirates, and Vietnam.

---

**Deductions**

**Depreciation**
Depreciation is a deductible cost for CIT purposes, according to the regulations of the Corporate Income Tax Code, subject to restrictive and specific rules.

The main legal principles regarding depreciation are as follows:

- The establishment of the applicable rates falls under the competence of the Ministry of Finance.
- The calculation is carried out on a straight-line basis in accordance with the rates applicable.

The main depreciation rates are:

<table>

</tr>
</tbody>
</table>

#### Notes

1. Subject to certain conditions set forth by the tax authorities.
2. Depreciation is only allowed in cases of effective reduction of value within the limits regarded as reasonable by the tax authorities.

### Accelerated depreciation

New immovable assets, used for the furtherance of the business, may be depreciated by increasing to 50% the normal depreciation rates approved by law. This benefit is also granted to rehabilitated immovable assets, machinery, and equipment used in agro-industrial activities, provided there is an investment project duly approved by the government.

### Goodwill

Although goodwill is considered for accounting purposes in Mozambique, there is no provision for goodwill in the tax legislation. Consequently, goodwill should be regarded as an intangible asset for tax amortisation purposes.

### Interest expenses

A basic principle regarding acceptance of costs and expenditures requires that these are necessary for the company's/branch's activity, i.e. indispensable to generate the profits and gains obtained by the company. This concept includes, among others, interest and other financial costs that are, in principle, also deductible for tax purposes unless the tax authorities assume that the interest rate applicable in one transaction is higher than the applicable rate applicable in the market, with the exceeding amount being subject to taxation.

### Bad debt

In Mozambique, companies are able to create all the provisions necessary and relevant for the normal course of business. However, for tax purposes, only the provisions listed below can be deducted as a cost:

- Bad debts.
- Depreciation of stock.
- Ongoing judicial procedures.
- Credit institutions/Insurance companies.
- Reconstruction of mines.
- Rehabilitation of land.

Any other provisions reflected in the company's accounts will not be accepted as tax deductible costs.
Mozambique

With regards to provisions for bad debts, companies are only allowed to deduct 1.5% per year (and 6% accumulated) of the provisions created for bad debts.

**Charitable contributions**
Donations can be deducted as costs for tax purposes, provided specific requirements are met and the beneficiaries thereof are:

- Social and cultural organisations that, acting without lucrative intent, carry out actions in art, education, science, health, preservation and restoration of cultural patrimony, or social activities: Donations can be deducted up to the limit of 5% of the previous year’s taxable income.
- The Mozambican state: Donations can be fully deducted.

It is important to note that this deduction is not applicable automatically, as it is necessary to present proof that the donation was previously communicated to and approved by the Ministry of Finance.

**Fines and penalties**
Fines and other penalties paid due to any infringement, which do not have a contractual basis, including interest, are not accepted as tax deductible costs.

**Taxes**
Taxes paid in relation to the activities of a company are tax-deductible, excluding CIT itself.

**Net operating losses**
Carryback of losses is not allowed in Mozambique. On the other hand, losses may be carried forward for a period of five consecutive years.

**Payments to foreign affiliates**
Any payments to non-residents are allowed as deductible expenses, provided that the amount does not exceed normal rates and that the taxpayer is able to prove that a business transaction was carried out with the non-resident company. The tax authorities may redetermine taxable income if, due to a special relationship between the Mozambican and non-resident companies, certain conditions existed that allowed a calculation of profit that differed from the profit that would have been calculated without the existence of such relationship (i.e. the arm’s-length principle).

**Group taxation**
There are no group taxation provisions available in Mozambique. Each member of a group of companies preparing consolidated accounts for accounting purposes must file separate tax returns in order to be taxed on its profits on a stand-alone basis.

**Transfer pricing**
The tax authorities may proceed with the necessary corrections for assessing the profits for tax purposes whenever:

- by virtue of special relations between the taxpayer and other entity, different conditions from those that should be normally agreed upon between independent entities have been established, and
- in consequence of those conditions, the profits for accounts purposes are different from those that would have resulted had such special relations not existed.
The corrections above shall be equally applicable whenever the profits for accounts purposes regarding non-resident entities are different from those that should have resulted if the non-resident entity were a separate entity carrying out similar activities in similar conditions and with total independence.

The corrections referred above will also be applicable to entities that carry out activities simultaneously subject and not subject to the CIT Code, provided that similar evasion regarding such activities is verified.

Whenever these corrections are applicable to one taxpayer of CIT (Taxpayer 1) by virtue of special relations with another taxpayer of CIT or of individual income tax (Taxpayer 2), the adjustments reflecting the corrections made in the calculation of the profits for tax purposes of Taxpayer 1 shall be applicable in the assessment of the profits for tax purposes of Taxpayer 2.

Note that new legislation on transfer pricing is currently under discussion and expected to be approved in 2013.

**Thin capitalisation**

Where loans from related foreign corporations exceed twice the corresponding equity in the borrowing Mozambican corporation, the interest on the excess borrowing is not tax-deductible. Thin capitalisation rules are in force.

According to the Mozambican thin capitalisation rules, subsidiaries are considered and treated as thinly capitalised companies if and to the extent that, as at any date of the tax period, any of their relevant debt-to-equity ratios exceeds a factor of two.

A ‘specially related non-resident’, for these purposes, is an entity with special links with another, which includes any entity that:

- holds, either directly or indirectly, at least 25% of the share capital of the Mozambican company
- though holding less than 25%, has a significant influence on its management, or
- both taxpayer and non-resident entity are under control of the same entity, which has participation in their share capital, either directly or indirectly.

Under any of these circumstances, interest paid to such specially related non-residents is not allowed as a tax-deductible cost for the Mozambican company in the part that corresponds to the excessive indebtedness, unless the company can prove that it could have obtained the same level of indebtedness at comparable conditions from unrelated parties, taking into account the nature of its business, its sector of activity, dimension, and other relevant criteria.

**Tax credits and incentives**

**Foreign tax credit**

Resident companies are allowed to deduct a credit correspondent to a tax paid abroad. The tax credit to be deducted should be equal to the lower of the amount
of Mozambican corporate tax imputed to income obtained abroad or the amount of foreign tax effectively paid.

**Inbound investment incentives**
In addition to the guarantees of ownership and remittance of funds abroad, the Mozambican government also guarantees the concession of tax and customs incentives. The incentives vary depending on whether a company is starting a new venture or rehabilitating one and also on the nature of the project to be developed. The incentives discussed in this section are the generic benefits applicable to standard projects. Certain specific benefits also may be applicable, depending on the activities of the industry for the investment project (e.g. agriculture, tourism, science and technology).

**Exemption from import duties**
An exemption from customs duties and VAT applies upon the importation of capital equipment, listed in Section K of the Customs Tariff Schedule.

**Tax credit for investment**
Investments in new fixed tangible assets used in the operations of an enterprise within the Mozambican territory may benefit from an investment tax credit equal to 5% of the total investment realised, for a period of five years. This investment tax credit is offset against CIT, up to the total amount of the tax assessment. This incentive does not apply when the investment in tangible fixed assets is with respect to the construction, acquisition, restoration, or extension of buildings, passenger vehicles, furnishings, and articles of comfort and decoration, leisure equipment, advanced technology, or other assets not directly associated with the production activity carried out by the enterprise. When the project is located outside the city of Maputo, this tax credit is increased to up to 10%.

**Advanced technology incentive**
The amount invested in specialised equipment classified as advanced technology during the first five years from the date of commencement of activity may be deducted from taxable income for purposes of calculating CIT, up to a maximum of 10% of taxable income.

**Professional training incentive**
Investment expenditures for professional training of Mozambican workers shall, up to a maximum amount of 5% of the taxable income (10% in case of professional training related to new/high technology equipment), be deductible from taxable income for the purposes of calculating CIT during the first five years from the date of the commencement of such activities.

**Exploration incentives**
During a period of five years counting from the date of exploration (i.e. the date the implementing company starts the activities approved under the investment project terms of authorisation), the following expenditure may be treated as deductible expenditures for purposes of calculating CIT:

- In the case of undertakings carried out in the city of Maputo, 110% of the value of expenditures for the construction and rehabilitation of roads, railways, airports, telecommunications, water supply, electric energy, and other works of public utility is deductible for tax purposes.
- In the case of undertakings carried out in the rest of the provinces, an amount equal to 120% of the expenditures referred to in the paragraph above is deductible for tax purposes.
• In the case of expenditures for the acquisition for personal ownership of works of art and other objects that are representative of Mozambican culture, as well as activities that contribute to the development of such works, 50% of the expenditures are deductible for tax purposes.

**Withholding taxes**

Any non-resident entity carrying out economic activities in Mozambique, without being registered as a taxpayer, is liable to a final and definitive 20% WHT that is applied on all income earned. An exception exists for (i) telecommunications and international transport, as well as the respective installation and assembly of equipment made by those same entities, (ii) construction and rehabilitation of production, transport, and distribution of electricity infrastructures in the rural zones under the public projects of rural electrification; and (iii) maritime vessels freight for fishing and coasting activities, all of which are subject to a 10% WHT rate.

Both Mozambican resident and non-resident recipients are liable to tax on dividends at a tax rate of 20%.

**Tax treaties**

In accordance with Mozambique’s DTTs, the following tax rates are applicable to dividends, interest, and royalties:

<table>
<thead>
<tr>

Notes

1. The 8% rate applies if the recipient of the dividends is a company that has more than 25% of the share capital in the company that distributes the dividends.
2. The 10% rate applies if the recipient of the dividends is a company that has less than 25% of the share capital in the company that distributes the dividends.
3. The 15% rate applies in all other cases.
4. The 0% rate applies if the recipient of the dividends is a company that has more than 25% of the share capital in the company that distributes the dividends.
5. The 12% rate applies in all other cases.

**Tax administration**

**Taxable period**

The tax year is, as a general rule, the calendar year. A different tax year may be applied (if previously authorised by the Ministry of Finance) for companies that
Mozambique

carry out activities that justify a different year or non-resident companies with a PE in Mozambique.

**Tax returns**
CIT assessment must be prepared by the companies on annual returns, based on the accounting records and on adjustments prescribed by the tax regulations.

The submission of the annual tax return is due by the last working day of May for companies using the calendar year as their tax year. For companies with a tax year that is not coincident with the calendar year, the presentation of the tax return is due by the last day of the fifth month subsequent to the respective year-end.

**Payment of tax**
Mozambican companies and non-resident companies with a PE in Mozambique must pay CIT as follows:

- In three advance payments (based on 80% of the preceding tax year’s CIT), due in May, July, and September of the respective tax year; or, if the tax year chosen is not coincident with the calendar year, on the fifth, seventh, and ninth months of the respective tax year.
- In three special advance payments (based on 0.5% of the preceding year’s turnover less the advance payments made in previous years, which cannot be less than MZN 30,000 or more than MZN 100,000) due in June, August, and October of the respective tax year; or, if the tax year chosen is not coincident with the calendar year, on the sixth, eighth, and tenth months of the respective year.

Final tax should be paid by the last working day of May or the fifth month after the tax year-end in cases where a different tax year is adopted.

**Tax audit process**
The tax authorities may carry out an inspection whenever necessary. Normally, the inspection occurs after the taxpayer files a refund application or on a random basis.

**Statute of limitations**
The statute of limitations period is five years, but the company documents must be kept for ten years.

---

**Significant developments**

A new Foreign Investment Law (FIL) was approved by the Union Parliament and the President on 2 November 2012. The new FIL sets out land-use terms, legal structures, and incentives for foreign companies, such as a five-year tax holiday from the start of commercial operations, demonstrating the government’s commitment to attract long term foreign investors. See the Tax credits and incentives section for details.

---

**Taxes on corporate income**

Foreign investors may register their companies under the Myanmar Companies Act (CA) or in conjunction with the Union of Myanmar Foreign Investment Law (MFIL). The differences between companies registered under the CA and the MFIL are in relation to their eligibility for tax incentives and longer land use terms, as well as minimum foreign share capital requirements.

Generally, resident companies are taxed on a worldwide basis, and as such, income from sources outside Myanmar is taxable. MFIL companies, although treated as resident companies, are taxed only on income derived from sources within Myanmar.

Non-resident companies are taxed only on income derived from sources within Myanmar. Income received from any capital assets within Myanmar and from any source of income within Myanmar is deemed to be income received within Myanmar. The income is generally subject to tax under the normal rules for residents, except that different tax rates apply.

A company registered under the MFIL is entitled to enjoy certain exemptions and relief from taxes (see the Tax credits and incentives section for details).

</table>

---

**Corporate residence**

A resident company is a company as defined and formed under the Myanmar CA 1913 or any other existing law of Myanmar.
Myanmar

A non-resident company is one that is not formed under the Myanmar CA 1913 or any other existing law of Myanmar. Generally, foreign branches are deemed to be non-resident companies.

**Permanent establishment (PE)**
Currently, there is no definition of a PE under the Myanmar Income Tax Act. In current practice, the Myanmar tax authorities seek to collect taxes from a non-resident foreigner on its income received from Myanmar by way of a withholding tax (WHT) mechanism, regardless of whether the foreigner has a PE in Myanmar or not. The term ‘PE’ may be defined in the tax treaties that Myanmar has with other countries. Subject to the relevant tax treaty, a foreigner who is tax resident of the treaty country may not be subject to Myanmar taxes if it does not have a PE in Myanmar.

**Other taxes**

**Valued-added tax (VAT)**
There is no VAT in Myanmar.

**Customs duties**
Customs duty is levied under the Customs Tariff of Myanmar (2007) at rates of up to 40%.

Companies registered under the MFIL that have obtained permits from the Myanmar Investment Commission (MIC) may, at the discretion of the MIC, be given relief from customs duty on machinery, equipment, instruments, machinery components, spare parts and materials used during the period of construction or expansion, and on raw materials for the first three years of commercial production (see the Tax credits and incentives section for details).

**Excise duties**
Excise duty is levied on alcoholic drinks and is collected by the General Administration Department under the Ministry of Home Affairs.

**Property taxes**
Immovable property (land and buildings) situated within the Yangon development area is subject to property tax. However, as foreign ownership of land and immovable property is currently expressly prohibited, property tax is not relevant for foreign investors.

**Stamp duties**
Stamp duty is levied on various instruments. Some of the rates are given below:

- 5% of the amount or value of the consideration for conveyances, such as for the sale or transfer of immovable property, plus an additional 2% for immovable property situated in the Yangon development area.
- 0.3% or 1% of share value for the transfer of shares if the sales consideration is in local currency or foreign currency, respectively.
- 2% of the amount or value secured for bonds.
- 2% of the amount or value of the property settled for inheritances under an arrangement of settlement.
Capital gains taxes
Income tax is levied on gains from the sale, exchange, or transfer of capital assets (i.e. any land, building, vehicle, and any capital assets of an enterprise, which include shares, bonds, and similar instruments). Intangibles may fall within the definition of capital assets, and capital gains arising from such assets would also be taxable.

Capital gains from the sale, exchange, or transfer of capital assets in the oil and gas sector are taxed at different rates from those in other sectors.

Turnover taxes
Commercial tax, at rates ranging from 0% to 100%, is levied as a turnover tax on goods and services. The commercial tax that a business charges and collects is known as output tax, which has to be paid to the Myanmar tax authorities. Commercial tax incurred on business purchases and expenses are known as input tax. Businesses that are registered for commercial tax can claim if certain conditions are satisfied.

Commercial tax is imposed on a wide range of specified goods and services produced or rendered within the country, based on the sales proceeds, and on imported goods (see Custom duties above for details).

Services such as trading, transport, entertainment, insurance, and printing are subject to commercial tax at 5% of the total receipts. No commercial tax is imposed if the sales or receipts from services for a financial year are not more than 10 million Myanmar kyats (MMK).

Commercial tax is exempt on all exports, except for five natural resource items: natural gas, crude oil, jade, gem stones, and wood.

Companies registered under the MFIL that have obtained permits from the MIC may, at the discretion of the MIC, be granted exemption from commercial tax on goods that are manufactured for export (see the Tax credits and incentives section for details).

Registration taxes
There is a registration fee of MMK1 million payable to the Directorate of Investment and Company Administration for setting up a company or a branch in Myanmar.

Payroll taxes
An employer is responsible for deducting income tax due from salaries at the time of payment to employees and must pay the amount within seven days from the date of deduction. If the employer fails to deduct and pay the tax, the employer is deemed to be a defaulter and held responsible for such payment. In addition, the employer is also responsible for filing the statement of annual salary within three months after the end of the income year, and failure to file by the stipulated deadline may be result in a penalty of 10% of the amount of tax to be deducted on annual salaries.
Myanmar

Social security contributions
Myanmar recently introduced the Social Security Law 2012, and its rules and regulations are outstanding at the time of this summary. At present, both the employers and employees are required to follow the rules and regulations under the Social Security Act 1954. The rate of contribution and maximum contribution as outlined below is expected to increase upon the introduction of new rules and regulations of the Social Security Law 2012.

The Social Security Act 1954 requires an employer with more than five workers to provide Social Security Scheme benefits to those workers, such as general benefit insurance and insurance against employment-related injuries.

The rates of contribution by employees and employers are 1.5% and 2.5% of the total salaries and wages, respectively. The contribution may be in Myanmar kyats or in United States dollars (USD), depending on the currency in which the employee is paid.

The maximum contribution is limited to MMK 775 by the employer and MMK 465 by the employee in the case of salaries earned in Myanmar kyats and USD 5 by the employer and USD 3 by the employee in the case of salaries earned in US dollars.

Contributions are not deductible by the employee for tax purposes. The employer is obligated to withhold the employees’ contributions from their salaries.

Branch income
Generally, foreign branches are deemed to be non-resident companies. Non-resident companies are taxed only on income derived from sources within Myanmar. The income is generally subject to tax under the normal rules for residents, except that a branch is subject to a higher (i.e. 35%) corporate income tax rate.

Income determination
Income is categorised as income from a profession, business, property, capital gains, other sources, and undisclosed sources. Income from capital gains is assessed separately.

Interest income and income from movable property are treated as business income.

Tax is levied on total income, after the deduction of allowable expenditure and depreciation.

The Ministry of Finance and Revenue, with the approval of the government, may, by notification, prescribe, amend, and add assessable income and rates of income tax.

Inventory valuation
There are no prescribed inventory valuation methods for tax purposes.

Capital gains
Income from capital gains is assessed separately. See Capital gains tax in the Other taxes section for details.
**Dividend income**

Myanmar has a one-tier corporate tax system, under which share of profits received by a Myanmar taxpayer from an association of persons (i.e. partnerships, joint ventures, companies, etc.) are exempted from income tax.

**Partnership income**

A partnership is taxed as an entity and not on the individual profit share of the partners. Partnership income is not taxed in the hands of the partners.

**Foreign income**

Resident companies are taxed on a worldwide basis, and, as such, income from sources outside Myanmar is taxable in Myanmar.

MFIL companies and non-resident companies are not taxed on their foreign income.

There is no deferral regime available to foreign income in Myanmar.

**Deductions**

In respect of business income, deductions are allowed for expenditure incurred for the purpose of earning income.

Non-deductible items include capital expenditure, personal expenditure, expenditure that is not commensurate with the volume of business, payments made to any member of an association of persons other than a company or a cooperative society, and inappropriate expenditure.

**Depreciation and amortisation**

Income from movable property is considered as business income, and depreciation allowance for the cost of such movable property can be deducted. Income from immovable property is generally computed in the same way as business income, except that no depreciation allowance can be deducted.

Technically, a taxpayer entity is required to claim tax depreciation on the qualifying assets used for its business purposes based on rates prescribed under the Myanmar Income Tax Law, using a prescribed tax depreciation claim form. A taxpayer is entitled to full year tax depreciation in the year the asset is acquired. On the other hand, no tax depreciation is allowed in the year the asset is disposed of.

The tax depreciation rates of fixed assets as prescribed under the Myanmar Income Tax Law are as follows:

- Buildings: 1.5% to 10%.
- Furniture and fittings installed in buildings: 5% to 10%.
- Machinery and plant: 5% (generally) to 6.25% (items such as electrical appliances).
- Machinery equipment: 2.5% to 20%.
- Road transport vehicles: 12.5% to 20%.
- Miscellaneous: 10% to 20%.
- Other miscellaneous: 2.5% to 20%.
Net operating losses

Ordinary losses
Losses from any source may be set off against income accruing from any other sources in that year, except where the loss is from capital assets or a share of loss from an association of persons. Losses that are not fully deducted in a year can be carried forward and set off against profits in the next three consecutive years.

Capital losses
Capital losses and a share of loss from an association of persons cannot be set off against income from other sources or carried forward.

Payments to foreign affiliates
A Myanmar corporation can claim a deduction for royalties, management service fees, and interest charges paid to affiliates, provided that these payments are commensurate with the volume of business.

Group taxation
There is no group taxation regime in Myanmar.

Transfer pricing regime
There are currently no transfer pricing rules in Myanmar.

Thin capitalisation rules
Generally, there is currently no specific safe harbour with respect to a debt-to-equity ratio in Myanmar.

Controlled foreign company (CFC) regime
There are currently no CFC rules in Myanmar.

Tax credits and incentives

Union of Myanmar Foreign Investment Law (MFIL) incentives
Under the new MFIL, companies registered under the MFIL that have obtained permits from the MIC are entitled to the following special benefits and tax incentives, which are granted at the MIC's discretion:

1. Exemption from income tax for up to five consecutive years for an enterprise. The exemption may be extended for a further reasonable period, depending on the success of the enterprise.
2. Exemption or relief from income tax on profits of a business that are maintained in a reserve fund and subsequently re-invested in Myanmar.
3. The right to deduct depreciation of machinery, equipment, building, or other capital assets used in the business at rates prescribed by the MIC.
4. Relief from income tax for up to 50% of the profits accrued from the export of manufactured goods.
5. The right to pay income tax on the income of foreign employees at the rates applicable to citizens residing within the country.
6. The right to deduct from taxable income research and development costs that are necessary for the country.
7. The right to carry forward tax losses for up to three consecutive years, provided the losses are sustained within two years from the end of the tax exemption in (1) above.
8. Exemption or relief from custom duty and/or other internal taxes on imported machinery, equipment, instruments, machinery components, spare parts, and materials used in the business, which are required for use during the period of construction.
9. Exemption or relief from customs duty or other internal taxes on imported raw materials for the first three years of commercial production following the completion of construction.
10. If the investor increases the amount of investment and expands the business within the approved timeframe, it may enjoy exemption and/or relief from customs duty or other internal taxes on machinery, equipment, instruments, machinery components, spare parts, and materials that are imported for the expansion of business.
11. Exemption from commercial tax on goods that are manufactured for export.

**Special economic zones (SEZs)**

In addition to foreign investment under the MFIL, foreign investors may invest under the Myanmar Special Economic Zone Law of 2011 (Myanmar SEZ Law) and the Dawei Special Economic Zone Law of 2011 (Dawei SEZ Law).

The Myanmar SEZ Law is a basic law for any SEZ within Myanmar, whereas the Dawei SEZ Law applies only to the Dawei SEZ, which is located in the Tanintharyi Region in the south.

The Myanmar SEZ Law and Dawei SEZ Law contain, *inter alia*, provisions relating to developers and investors, exemptions and reliefs, restrictions, duties of developers or investors, land use, banks and finance management and insurance business, management and inspection of commodities by the customs department, quarantine, labour, and guarantee of non-nationalisation.

Tax exemptions or relief may be granted under the Dawei SEZ Law upon application by the investor. Under the Dawei SEZ Law, foreign investors may be allowed to exchange and remit their own foreign currency within the Dawei SEZ and abroad.

**Incentives under the Myanmar SEZ Law include:**

- Tax holidays for the first five years.
- 50% income tax relief on revenue from products sold overseas for the next five years.
- 50% income tax relief on reinvestment obtained from export sales for the following five years.
- Exemption of customs duty for certain goods (e.g. machinery and vehicles) for five years. A 50% exemption applies for the next five years.

Further details are expected once the rules and procedures relating to the Myanmar SEZ Law and Dawei SEZ Law are prescribed.

**Foreign tax credit**

There is no provision for unilateral relief. Relief may be available pursuant to a tax treaty, but the application of the tax treaties is at the sole discretion of the Ministry of Finance and Revenue.
Myanmar

**Withholding taxes**

Any person making the following payments is required to withhold income tax at the time of payment at the rates listed below. The tax withheld must be paid to the Inland Revenue Department (IRD) within seven days from the date of withholding.

Tax withheld from payments to residents will be set off against the tax due on their final assessments. Tax withheld from payments to non-resident companies is a final tax.

The application of the tax treaties is at the sole discretion of the Ministry of Finance and Revenue. In general, it is suggested by the Company Circle Tax Office (CCTO) under the IRD that enquiries be made with the CCTO before deducting WHT from payments made to non-resident companies from treaty countries listed below.

For payments for services rendered and for procurement made within the country, or under contracts or agreements or any other agreement made by a state organisation, local authorities, co-operatives, partnership companies, or entities formed under any existing laws, the WHT rates are 2% if the payment is made to a resident and 3.5% if it is made to a non-resident.

**Notes**

1. There is no WHT on dividends, branch profits, and share of profits of an association of persons that have been taxed.
2. Exempt if paid to the government.
3. Lower rate for payments in connection with patents, designs, secret formulas/processes, or industrial, commercial, or scientific equipment/experience.
4. Lower rate if received by a bank or a financial institution.
5. The 5% rate applies for payments in connection with copyrights of literary, artistic, or scientific work, and the 10% rate applies to payments for services of a managerial or consultancy nature, and for information concerning industrial, commercial, or scientific experience.
6. Exempt if the amount is fair and reasonable

**Tax administration**

**Taxable period**

The taxable period of a company is the same as its financial year (income year), which is from 1 April to 31 March. Income earned during the financial year is assessed to tax in the assessment year, which is the year following the financial year.
**Tax returns**
In general, income tax returns must be filed within three months from the end of the financial year, i.e. by 30 June of the financial year.

Tax returns for capital gains must be filed within one month from the date of disposal of the capital assets. The date of disposal refers to the date of execution of the deed of disposal or the date of delivery of the capital assets, whichever is earlier.

If a taxpayer discontinues one’s business, returns must be filed within one month from the date of discontinuance of business. The failure of a taxpayer to file income tax returns, knowing that assessable income has been obtained, is deemed to have ‘fraudulent intention’.

**Payment of tax**
Advance payments are made either in monthly or quarterly instalments throughout the income tax year based on the estimated total income for the year. The advance payments and any taxes withheld are creditable against the final tax liability. The date for settling the final tax liability is specified in the notice of demand issued by the IRD.

Capital gains tax payments are required to be made within one month from the date of disposal of the capital assets.

**Tax audit process**
Under the Income Tax Law, if it is found that there is a fraudulent intention to evade tax, the assessment or reassessment of income tax can be made at any time on the income that has escaped assessment of tax.

Failure by a taxpayer to file a return of income knowing that assessable income has been obtained, failure to comply with the notice of the IRD to submit accounts and documents, including the tax return and profit and loss accounts within the time prescribed, or submitting forged instruments and other documents are included within the meaning of fraudulent intention. If the tax authority in the course of investigation finds that a taxpayer has concealed income or particulars relating to income, the taxpayer may be permitted to fully disclose the facts within the specified time. In addition, the taxpayer must pay a penalty equal to 50% of the tax increased on account of the concealment. If the taxpayer fails to disclose the particulars within the specified time or discloses less than the income concealed, the taxpayer will also be subject to prosecution, in addition to paying the tax and penalty. If the taxpayer is found guilty, the taxpayer may be punishable with imprisonment for between three to ten years.

**Statute of limitations**
The statute of limitation to raise an assessment is three years after the financial year end. It does not apply in cases of fraudulent default. Mere filing of the income return and payment of advance tax in time does not constitute a final tax assessment.
Significant developments

2013 National Budget
Highlights of the 2013 National Budget that may impact corporate taxpayers include the following:

- The corporate tax rate was reduced from 34% to 33% for financial years ending 31 December 2013 for non-mining companies (as promulgated in the Government Gazette on 31 May 2013).
- A further reduction in the corporate tax rate to 32% in 2014 was proposed in order to boost investment and production.
- As of 1 January 2013, the withholding tax (WHT) payable when a Namibian company pays a royalty to a non-resident was reduced from 10.2% to 9.9%.
- The Minister of Finance will table the Export Levy Bill on raw materials and taxes on environmentally harmful products during this session in Parliament, as well as the carbon emission tax on motor vehicles.

Taxes on corporate income

Namibia has a source-based tax system, which means that income from a source within Namibia or deemed to be within Namibia will be subject to tax in Namibia, unless a specific exemption is available.

Income earned by foreign companies from a source within or deemed to be within Namibia will be subject to tax in Namibia. In such cases, the foreign entity must determine whether it is obligated to register a local entity or branch. A foreign company is required to register a local company (local subsidiary) or an external company (branch) if it has established a place of business in Namibia.

In the event that Namibia has entered into a double tax agreement (DTA) with the country where the foreign company resides, such entity will only be taxable in Namibia if it has established a permanent establishment (PE) in Namibia. If a PE exists, only the portion of income attributable to the PE will be subject to tax in Namibia.

Non-residents who do not have a place of business in Namibia may, however, be subject to WHT. See the Withholding taxes section for more information.
Calculation of taxable income

Gross income The total amount, in cash or otherwise, received by or accrued to any person from a source within, or deemed to be within, Namibia, excluding receipts of a capital nature (provisions for specific inclusions in gross income and amounts deemed to be from a Namibian source exist).

Less: Exemptions The Income Tax Act provides for certain amounts to be specifically exempt from tax.

Equals: Income

Less: Deductions Expenditures and losses actually incurred to generate income may be deducted, provided that these expenses are not of a capital nature. The Income Tax Act specifically provides for certain expenditures to be deductible and allows a deduction for capital allowances.

Only expenses incurred to generate 'income' may be deducted. Expenses incurred to generate income exempt from tax are not deductible. Apportionment should be considered when expenses are incurred to generate both income and exempt income.

Equals: Taxable income Taxable income is taxed at the corporate tax rate as set out under the tax rate section below.

Tax rates

The corporate tax rates are summarised below:

<table>
<thead>
<tr>

* Proposed; still to be enacted and published per the Government Gazette.

Local income taxes

Namibia does not levy income taxes at the local, state, or provincial levels.

Corporate residence

The Namibian tax system is based on source and not on residency. Income derived or deemed to be derived from sources within Namibia are subject to tax.
The source is determined as the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Namibia, the source of income is deemed to arise in Namibia, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Namibia may, in the hands of a domestic company, be deemed to arise in Namibia and be taxed as such. Examples are interest and certain copyright royalties arising outside Namibia.

**Permanent establishment (PE)**
The term ‘permanent establishment’ is not defined or recognised in the Income Tax Act, but it is included in all DTAs.

A PE includes, in most cases, a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered.

Except for the PE concept embodied in the tax treaties and WHT on service provisions, corporate residence is of little tax significance since transactions are taxed on a source basis.

---

**Other taxes**

**Value-added tax (VAT)**
VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions.

VAT is levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Namibia that involves the supply of goods or services for consideration.

VAT is payable on all imports for home consumption in Namibia, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state, goods of which the local supply is zero-rated).

Import VAT is payable on the greater of the free on board (FOB) value plus 10% or the market value. The payment may be deferred in terms of an import VAT account registered with the Directorate of Inland Revenue to the 20th day of the month following the month of importation. Penalties of 10% per month or part of a month and 20% interest on outstanding import VAT, according to the Customs Asycuda reports on import VAT account numbers, are levied by the Directorate of Inland Revenue.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard rated and zero-rated supplies) exceed 200,000 Namibian dollars (NAD) in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may be deducted only as input tax...
if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

VAT returns are due within 25 days following the month to which the VAT relates.

The Inland Revenue system automatically selects VAT periods for audits. An audit will focus on deposits made into bank statements and whether VAT was charged as required. It will also focus on whether tax invoices meet the criteria as set out in the VAT Act.

**Customs and excise duties**

Namibia is a member of the Southern African Customs Union (SACU), and customs duties are not levied on intra-SACU trade (i.e. between Botswana, Lesotho, Namibia, South Africa, and Swaziland).

Customs duties are payable according to the Common Customs Tariff of SACU on imports from outside SACU. Preferential duty rates apply on imports from Southern African Development Community (SADC) countries, while goods may be imported free of customs duties from Zimbabwe in terms of the Namibia-Zimbabwe Free Trade Agreement.

Excise duties are levied on local production of excisable products (e.g. cigarettes, liquor, fuel) and are included on most excisable products imported from another SACU country in terms of the duty at source procedures. Identical excise duty rates are applied throughout the SACU. Importation of excisable products from outside the SACU is subject to customs duties and specific customs duties.

Current specific excise/customs duty rates for the above-mentioned products are as follows:

- Cigarettes: NAD 5.46/10 cigarettes.
- Beer: NAD 63.81/litre absolute alcohol (AA).
- Spirits (whisky, rum, brandy, gin, vodka, etc): NAD 122.80/litre AA.
- Petrol: 3.909 cents/litre.
- Diesel and biodiesel: 3.817 cents/litre.

**Ad valorem** excise/customs duties are levied on certain products (e.g. motor vehicles, perfumes) in addition to the normal customs duties.

**Ad valorem** excise/customs duty rates are as follows for the above-mentioned goods:

- Motor vehicles: \((0.00003 \times A) - 0.75\)%, with a maximum of 25%, where 'A' is the recommended retail price, exclusive of VAT.
- Perfumes: 7%.

Fuel levies are payable on petrol, diesel, and illuminating kerosene and may be claimed back for certain non-road operations (e.g. mining, farming, and construction).

The current fuel levies are as follows:

- Petrol: NAD 0.12/litre.
- Diesel: NAD 0.10/litre.
- Illuminating kerosene (paraffin): NAD 0.47/litre.
Surety in the form of a provisional payment, bank, or insurance guarantee is required by Customs on all temporary importations to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs’ bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

Property taxes
Property taxes are levied by municipalities based on municipal valuations of properties.

Transfer duty
Transfer duty is payable at 12% of the acquisition value where property is acquired by non-natural persons (a sliding scale applies to property purchases by natural persons). While it is normally payable by the buyer, the agreement for the sale of the property may determine the person liable to pay these costs.

Amendments to the Transfer Duty Act to include transfer duty on the sales of shares/members interest in property/mining right-owning entities are expected to be tabled during 2013.

Stamp duty
Certain transactions may attract stamp duty. The amount of stamp duty payable differs and is based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

<table>
<thead>
<tr>
<th>Transaction</th>
<th>Stamp duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agreements or contracts (other than those where duty is specifically provided for in the Act)</td>
<td>NAD 5</td>
</tr>
<tr>
<td>Lease agreement or lease</td>
<td>The stamp duty will be based on lease payments, together with additional considerations specified in the lease agreement</td>
</tr>
<tr>
<td>Transfer or issue of marketable securities and other share transactions</td>
<td>NAD 2 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction</td>
</tr>
<tr>
<td>Transfer deed relating to immovable property purchased.</td>
<td>NAD 12 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction</td>
</tr>
</tbody>
</table>

Additional stamp duty of NAD 5 for every NAD 1,000 of debt secured is payable on the registration of a bond over immovable property.

Annual duty
Annual duty is levied in terms of the Companies Act at an amount of NAD 4 for every NAD 10,000 (or part thereof) of the issued share capital of a company, with a minimum duty of NAD 80 per annum. Issued share capital includes ordinary shares, share premium, and preference shares.

Since a branch does not issue share capital, the issued share capital of the head office will be used to calculate the annual duty payable in Namibia.
**Branch income**

Branch income that is received or accrued from a source within, or deemed to be within, Namibia is taxable in Namibia based on the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may, therefore, not deduct fees paid to its foreign head office (unless a tax treaty provides for such a deduction), as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

Transfer pricing rules apply to transactions between a branch and cross-border related parties.

**Income determination**

**Inventory valuation**

Inventory is valued at cost for tax purposes in Namibia.

The last in first out (LIFO) basis of valuation is only accepted if:

- written consent was obtained from the Minister of Finance before such taxpayer renders one’s income tax return for the first year of assessment for which the LIFO basis was adopted by the taxpayer, and
- various conditions are met by the taxpayer as determined by the Minister of Finance.

**Capital gains**

Other than profits on the sale of mining licences/rights, capital gains are not taxed in Namibia.

**Mining licences/rights**

Any sale/donation/expropriation cession, grant, or other alienation or transfer of ownership of a licence or right to mine minerals has been included in the definition of gross income. The definition also specifically includes a sale of shares in a company for a licence or right to mine minerals in Namibia.

**Dividend income**

Dividends received are exempt from tax. Non-resident shareholders tax (NRST) should be withheld on dividends declared to non-resident shareholders. *For more information on NRST, see the Withholding taxes section.*

**Interest income**

Namibian companies are taxed on interest received from a Namibian source. Persons other than Namibian companies are subject to a final WHT on interest from banks and unit trusts. *For more information, see the Withholding taxes section.*

**Partnership income**

The relevant partners of a partnership are regarded as the responsible taxpayers and not the partnership itself.

In practice, the assessment of a partnership is treated like that of a private business. The partnership is first treated as a business entity on its own in terms of income and expenditure. The profit or loss at the end of the year is then allocated to the individual
partners. If they derived a profit from the partnership, it is added to their other non-partnership income; or if the partnership made a loss, the partners have the right to deduct it from their non-partnership income.

**Rental income**
Companies are taxed on rental income received from a Namibian source.

**Royalty income**
Companies are taxed on royalty income received from a Namibian source.

**Foreign income**
Corporate tax in Namibia is determined on the source basis; consequently, only income from a Namibian source or deemed Namibian source is subject to corporate tax.

**Deductions**

**Capital allowances**
The cost (including finance charges) of machinery, equipment, and other articles used by the taxpayer to generate income is deductible in three equal annual allowances. No apportionment is allowed where an asset is held for less than 12 months.

Buildings used by the taxpayer to generate income qualify for an initial allowance of 20% of erection costs in the year they are first brought into use. Thereafter, an annual allowance of 4% is deductible for the 20 following years. Additions to existing buildings (not alterations, improvements, or repairs) qualify for the same 20% and 4% deductions. Note that the allowance is calculated on the cost of erection and not the cost of acquisition. The allowance is also only calculated for a period of 21 years from the date of erection.

Mining exploration and initial development expenditure incurred before commencement of mining production are deductible in full in the first year that income is generated from the mine. Subsequent developmental expenditures are written off in three equal annual allowances.

Capital allowances may also be deducted with respect to patents, trademarks, leasehold improvements, etc.

A recovery or recapture of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recaptured by way of disposal, withdrawal from trade for non-trade purposes, or removal from Namibia. The recapture is calculated at the market value of the asset.

**Goodwill**
The amortisation of goodwill is not deductible for tax purposes and should be excluded from calculating taxable income.

**Start-up expenses**

**Mining**
The Income Tax Act allows exploration and initial development expenditure to be deducted in full during the year in which the mine commences with production. All exploration expenses incurred before the commencement of mining is therefore deferred until such time that the mine commences production.
All other industries
The general deduction formula determines that only expenses incurred in the production of income that are not of a capital nature may be claimed for tax purposes. The Income Tax Act defines income as ‘income in any year or period of assessment’.

Interest expenses
A deduction is allowed in respect of financing expenditure incurred in respect of any financing agreement for the acquisition of fixed assets utilised in ordinary trade activities.

The general deduction formula determines that only expenses incurred in the production of taxable income that are not of a capital nature may be claimed for tax purposes. Therefore, where the interest can be argued to be incurred in the production of income, the interest expense will be deductible.

Thin capitalisation legislation may be applied to interest paid on related party loans (see Thin capitalisation in the Group taxation section).

Bad debt
The Income Tax Act allows a specific deduction for bad debts, provided that the amount written off was previously included in the taxpayer’s income.

Charitable contributions/donations
A specific deduction for donations is allowed, provided that it is made to a registered welfare organisation or an approved educational institution. It is a further requirement that a certificate should be issued by the welfare organisation/educational institution in respect of the donation and submitted with the entity’s tax return in order for it to qualify as a deduction.

Fines and penalties
In terms of practise applied by Inland Revenue, tax penalties and fines are not deductible for tax purposes.

Taxes
Taxes levied on income are not allowed as a deduction.

Net operating losses
Assessed tax losses may be carried forward indefinitely if the company continues the same trade. Tax laws do not allow losses to be transferred to other members of a group, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

If a company ceases to trade for a full fiscal year, its assessed losses are forfeited, regardless of subsequent activities. Assessed losses are also reduced in the event of a compromise agreement with creditors.

Namibian tax legislation does not provide for the carrying back of tax losses.

Payments to foreign affiliates
For information on payments to foreign affiliates, please refer to the Branch income section, Group taxation section, and Withholding taxes section.
Group taxation

No taxation of combined operations is allowed in Namibia where operations are conducted in a group.

Transfer pricing

Namibian transfer pricing legislation is aimed at enforcing the arm's-length principle in cross-border transactions carried out between connected persons. It is based on guidance set out by the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for multinational enterprises and tax administrations.

The objective of the transfer pricing legislation is to provide taxpayers with guidelines regarding the procedures to be followed in the determination of arm’s-length prices, taking into account the Namibian business environment. It also sets out the Minister of Finance's views on documentation and other practical issues that are relevant in setting and reviewing transfer pricing in international agreements.

The transfer pricing legislation is essentially aimed at ensuring that cross-border transactions between companies operating in a multinational group are fairly priced and that profits are not stripped out of Namibia and taxed in lower tax jurisdictions. The legislation achieves this by giving the Minister of Finance (who essentially delegates to the Directorate of Inland Revenue) the power to adjust any non-market related prices charged or paid by Namibian entities in cross-border transactions with related parties to arm’s-length prices and to tax the Namibian entity as if the transactions had been carried out at market-related prices.

In terms of the normal penalty provisions of the Income Tax Act, the Directorate of Inland Revenue may levy penalties of up to 200% on any amount of underpaid tax. Consequently, the Inland Revenue may invoke such provisions in the event that a taxpayer’s taxable income is understated as a result of prices that were charged in affected transactions, which were not carried out at arm’s length. Further, interest will be charged on the unpaid amounts at 20% per annum.

Thin capitalisation

The Minister of Finance may, if any amount of financial assistance provided by a foreign connected person is excessive in relation to a company's fixed capital (being share capital, share premium, accumulated profits, whether capital or not), disallow, for income tax purposes, the deduction of any interest or other charges payable by the Namibian person on the 'excessive portion' of the financial assistance provided by the foreigner.

There is no guidance that provides a definition for 'excessive'. Therefore, each case should be considered on the basis of the facts provided. The 3:1 ratio is applied by the Bank of Namibia for exchange control purposes, and this guideline is therefore deemed suitable until otherwise determined by Inland Revenue.

Tax credits and incentives

Foreign tax credit

A tax credit may be claimed in Namibia for foreign taxes paid on dividends, royalties, and similar income, limited to the amount of tax payable in Namibia. Proof of the taxes
paid in the foreign jurisdiction should be provided to Inland Revenue in order to claim the tax credit.

**Manufacturing**
The following is a high-level comparison of the different tax treatments for normal companies and registered manufacturing companies. This description does not consider the specific conditions that should be met in order for these incentives to be utilised.

Note that only the building allowance and preferential tax rate (as set out below) may create or increase a tax loss.

**Building allowance**
A building allowance is deductible with respect to buildings used for purposes of trade.

For normal companies, the allowance is calculated as 20% of the cost of construction in the year in which the building enters service and 4% during the 20 years that follow.

For registered manufacturing companies, the allowance is calculated as 20% of the cost of construction in the year in which the building enters service and 8% during the ten years that follow.

**Employee allowances**
For normal companies, expenditures for remuneration and training of employees are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of remuneration and training of employees that are directly engaged in the manufacturing process are deductible. However, this allowance may not create or increase a tax loss. Deductions sought for training should be approved by the government.

**Export expenditure allowance**
For normal companies, export expenditures incurred are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of costs incurred in an export country, in order to export Namibian manufactured goods to such country, may be deducted. However, this allowance may not create or increase a tax loss.

**Export allowance**
Any taxpayer (not required to be a registered manufacturer) that derives income from the export of goods manufactured in Namibia, excluding meat or fish, may deduct an export allowance equal to 80% of the taxable income derived from the export of manufactured goods.

Gross profit derived from the export of manufactured goods as a percentage of total gross profit should be used to determine the percentage of taxable income that is used to calculate the export allowance. However, this allowance may not create or increase a tax loss.

**Transport allowance**
For normal companies, land-based transport costs (i.e. transport by road or rail) are deductible for tax purposes.
Namibia, Republic of

For registered manufacturing companies, an additional allowance of 25% of land-based transport cost in respect of material and components used in the manufacturing process or equipment imported for direct use in the manufacturing process may be deducted. However, this allowance may not create or increase a tax loss.

**Preferential tax rate**

For normal companies with a financial year-end of or after 31 December 2013, the normal tax rate for companies other than mining companies or registered manufacturers is 33%.

The tax rate for a registered manufacturer for taxable income with respect to the manufacturing activity for which they are registered is 18%. This preferential rate is applicable for a period of ten years from registration as a manufacturer.

**Export Processing Zones (EPZs)**

In order to become an EPZ company, a particular entity must register with the EPZ governing body and obtain approval from Inland Revenue.

An EPZ company qualifies for the following benefits:

- The company is exempt from corporate tax.
- No VAT is payable on the sale of goods or services rendered in the zone.
- No VAT is payable on goods imported or manufactured in the zone.
- No customs or excise duty is payable on goods imported into the zone.
- No stamp duty or transfer duty is payable in relation to the transfer of movable or immovable property in the zone.
- A 75% refund of expenditures incurred in training Namibian citizens.
- Some of the provisions in the Labour Relations Act do not apply in the zone.

Enterprises must comply with the following requirements in order to qualify for EPZ status:

- Goods must be exported to countries other than countries in the SACU.
- Industrial employment must be created or increased.
- Namibia’s export earnings must be increased as a result of manufactured goods exported.

EPZ companies may not be involved in retail business operations.

**Withholding taxes**

WHTs are applicable where dividends and royalties, or similar payments, are declared or distributed to non-Namibian residents.

**Dividends**

Dividends declared by a Namibian company to a non-resident holding company are subject to NRST, a WHT. NRST is payable at the standard rate of 10% if at least 25% of shares are held in the Namibian company, unless DTA relief is available. Where less than 25% of shares are held in the Namibian company, the NRST payable is 20%, unless DTA relief is available.

NRST is payable within 30 days after declaration of a dividend.
Interest
A WHT of 10%, calculated on the gross amount of interest, is payable on interest accruing to any person, other than a Namibian company, from a registered Namibian banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Namibian companies, however, are taxed on interest at the corporate tax rate.

It is the obligation of the financial institution to withhold the tax and pay such tax to the revenue authorities.

No WHT on interest applies to interest paid on loan accounts to foreign entities.

Royalties or similar payments
WHT on royalties are payable when a Namibian company pays a royalty to a non-resident. As of 1 January 2013, WHT is levied at a rate of 9.9% (30% of the corporate tax rate of 33%) and is payable within 14 days after the end of the month during which the liability for payment is incurred.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula, or process, or any other property or right of a similar nature. A royalty also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Namibia. The nature of fees payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty.

Services
Any Namibian resident (i.e. a company incorporated or managed and controlled in Namibia, and natural persons ordinarily resident in Namibia) paying a management, consultancy, entertainment, or directors fee to a non-resident must withhold tax at 25%.

Management and consulting fees are specifically defined as: “any amount payable for administrative, managerial, technical, or consultative services or any similar services, whether such services are of a professional nature or not”.

The rate is subject to DTA relief, where applicable.

Summary of WHT payable
The WHT rates and treaty relief for Namibian DTAs can be summarised as follows. Note that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, interest, and royalties in the various treaties should also be considered.

**Notes**

1. Lower rate applies where at least 25% of shares are held in the Namibian company. Higher rate applies otherwise.
2. Namibian companies are taxed at the corporate tax rate on interest received.
3. Lower rate applies where at least 10% of shares are held in the Namibian company. Higher rate applies otherwise.
4. Rate depends on shareholding.
5. Lower rate applies where at least 25% of shares are held in the Namibian company and recipient directly invested at least 100,000 United States dollars (USD) in the equity capital of the company paying the dividend. Higher rate applies otherwise.
6. 5% where at least 50% of shares are held in the Namibian company. 10% where at least 25% of shares are held in the Namibian company. 15% otherwise.

**Mining royalties**

The Minerals (Prospecting and Mining) Act levies a royalty on minerals won or mined by a licence holder in Namibia, based on the table below:

**Tax administration**

**Taxable period**

The tax year for companies and close corporations is aligned with the financial year.

**Tax returns**

The income tax return is due within seven months after the financial year-end of the company and can be extended to five months after the seventh month due date, provided that no other prior year income tax returns are outstanding.
**Payment of tax**

The first provisional payment for income tax is due within six months from the commencement of the company’s financial year (at least 40% of tax payable at year-end is paid on first submission). The second provisional payment is due on/before the last day of the respective tax year (at least 80% of tax payable at year-end is paid on second submission). The final provisional payment is due within seven months after the financial year-end of the company.

WHT on dividends are due within 30 days after declaration of the dividend.

WHT on royalties or similar payments are due within 14 days after the end of the month during which the liability for payment of the royalty was incurred.

WHT on services is payable to Inland Revenue within 20 days after the end of the month during which the amount was deducted or withheld.

It is advised that if relief is available under the DTA, a nil form should still be submitted when payment is made to non-residents. The amount of DTA relief claimed should be disclosed on the form submitted.

**Penalties and interest**

The penalties and interest due for late submissions and payments can be summarised as follows:

<table>
<thead>
<tr>

**Anti-avoidance**

Note that the Income Tax Act, Act 24 of 1981, contains an anti-avoidance section, Section 95, which enables the Receiver of Revenue to disregard the implications of a transaction or scheme if it can be proven that:

- such transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Act
Namibia, Republic of

- such transaction or scheme was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation or scheme of the nature of the transaction, operation or scheme in question, or has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation or scheme of nature of the transaction, operation or scheme in question, and
- such transaction or scheme was entered into or carried out solely or mainly for the purposes of the avoidance or the postponement of liability for the payment of any tax duty or levy.

The Receiver of Revenue can, at its sole discretion, impose Section 95 on any transaction or scheme, which will place the onus on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

**Tax audit process**

The tax audit process is a discretionary process instituted by Inland Revenue. Inland Revenue will inspect the validity of invoices and whether such expenses are deductible for tax purposes.

Generally, income tax audits are initiated on amounts being refunded to taxpayers, with the focus being on high-value refunds.

Subsequent to an audit, a letter will be sent to the taxpayer indicating changes made to the return of income.

In the event that the taxpayer agrees with the outcome, an assessment is issued. Where the taxpayer is not satisfied with the outcome, an objection may be lodged within 90 days.

**Statute of limitations**

There is no statute of limitation in respect of claiming a refund for excess income tax paid. Debts to the state prescribe after 30 years.

**Topics of focus for tax authority**

Topics of focus for the tax authority include VAT, general compliance, the construction industry, and employee taxes.

**Significant developments**

The corporate tax system of the Netherlands contains a number of well-known features providing for an attractive investment climate, such as: the fiscal unity regime with tax consolidation for group companies, a full participation exemption for capital gains and dividends from qualifying participations, and several favourable tax regimes (e.g. for patent income, investment vehicles, and income from ocean shipping activities).

As of 1 January 2013, a number of amendments in the corporate income tax (CIT) law from the 2013 Dutch Tax Package have taken effect. For corporate taxpayers, a new provision limits the deduction of excess interest on debts that are deemed to be related to the financing of participations. As an accompanying measure, the thin capitalisation rules are abolished. Further, the tax liability of foreign resident corporate entities is extended to include remuneration for management activities performed for Dutch tax resident entities without being the statutory director. This amendment is of special relevance for management fees paid to Belgian entities.

To a certain extent, the fiscal measures are additional to the Budget Agreement for 2013, which was agreed upon in the spring of 2012 by a coalition of five political parties. This agreement included a number of fiscal measures aimed at reducing the Dutch European Monetary Union (EMU) gap to 3% in 2013. Based on the Budget Agreement 2013, the general value-added tax (VAT) rate increased from 19% to 21% as of 1 October 2012.

As of 1 January 2013, the additional research and development (R&D) deduction is calculated as 54% (previously 40%) of the costs (other than wage costs) and expenses directly related to R&D activities performed by the taxpayer.

The announced possible reduction of the standard CIT rate to 24% has not (yet) been implemented.

The Netherlands pursue an active tax treaty policy in order to maintain and extend its wide tax treaty network. Most Dutch bilateral tax treaties are based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention. In 2011, the Dutch Ministry of Finance published a Memorandum on the Dutch Tax Treaty Policy, expressing policy positions in regard of future treaty negotiations. With respect to the avoidance of double taxation on income and capital, the Netherlands has concluded bilateral tax treaties with about 90 other countries worldwide. In 2011 and 2012, the new (or revised) tax treaties with the United Kingdom, the United Arab Emirates, Saudi Arabia, Barbados, Slovakia, Hong Kong, Japan, Oman, Panama, and Switzerland have taken effect. On 12 April 2012, the Netherlands and Germany signed a new bilateral tax treaty. Expectations are that the treaty will become effective as of 2014.
Taxes on corporate income

In general, a Dutch resident company is subject to CIT on its worldwide income. However, certain income can be exempted or excluded from the tax base. Non-resident entities only have a limited tax liability with regard to income from Dutch sources.

Standard corporate income tax (CIT) rate

The standard CIT rate is 25%. There are two taxable income brackets. A lower rate of 20% applies to the first income bracket, for taxable income up to 200,000 euros (EUR).

Fiscal investment fund regime

In general terms, under the existing fiscal investment fund regime, the CIT rate for fiscal investment funds is 0%, provided that their profit is made available to the shareholders and holders of certificates of participation no later than eight months after year end.

Fiscal investment funds may also invest in real estate development (or redevelopment) activities, provided that these activities take place through a subsidiary subject to Dutch CIT and the development (or redevelopment) activities are exercised for the benefit of real estate that is (or will be) forming part of the fund's own portfolio, an affiliated fiscal investment fund's portfolio, the portfolio of a company in which the fund or the affiliated fund has a substantial interest, or for the benefit of the subsidiary's own portfolio.

Exempt investment fund regime

The exempt investment fund regime exists next to the fiscal investment fund regime described above. In accordance with the exempt investment fund regime, investment funds as defined in the Dutch Financial Supervision Act ('Wet op het financieel toezicht') that meet certain conditions can request an exemption from CIT. Apart from the exempt status for CIT purposes, the exempt investment fund is not obligated to withhold dividend withholding tax (WHT) with regard to profit distributions to its shareholders.

Innovation box regime

A special regime applies with respect to profits, including royalties, derived from a self-developed intangible asset (developed after 31 December 2006). In this so-called innovation box, the taxpayer may opt, under certain conditions, for the application of a lower effective rate on taxable profits derived from these intangible assets. The effective tax rate of the innovation box is 5%.

The innovation box is applicable if at least 30% of the profits have been originated by the patent. Companies that have incurred certain qualified R&D costs for the development of intellectual property for which no patent was granted are also entitled to the favourable effective tax rate. This is subject to the condition that these qualified R&D assets became part of the company's assets after 31 December 2007.

The lower effective tax rate of 5% only applies to positive income, allowing innovation losses to be taken into account in full. It is also possible to include profits from an intangible asset derived in the period between the patent application and the granting of the patent in the innovation box regime (not for R&D assets).

Tonnage tax regime

In order to stimulate entrepreneurs engaged in ocean shipping, a favourable regime (known as the Dutch tonnage tax regime) may be available to certain shipping companies. Under this regime, the taxable profit of a sea-going vessel is based on its registered net tonnage multiplied by a fixed amount of deemed profit per ton instead
of the actual profits from the exploitation. The regime only applies to the calculation of the profit related to the qualifying shipping activities. These activities include operating vessels in international traffic (including transportation for the purpose of the exploitation of natural resources at sea), cable and pipe-laying activities at the bottom of the sea, and towing and dredging and connected activities. The profits from the qualifying activities are taxed at a deemed tonnage profit according to a five bracket regressive scale system. The tonnage tax regime applies upon request and for a fixed period of ten years or multiples of the ten-year period.

Local income taxes
There are no provincial or municipal corporate income taxes in the Netherlands.

Corporate residence
In the Netherlands, corporate residence is determined by each corporation's facts and circumstances. Management and control are important factors in this respect. Companies incorporated under Dutch law are deemed to be residents of the Netherlands (although not with respect to certain provisions, such as the participation exemption and fiscal unity).

Permanent establishment (PE)
Non-resident companies that are neither incorporated nor effectively managed in the Netherlands are limited in their liability to tax in the Netherlands if they receive Dutch source income. This could be, for instance, business income derived from a Dutch PE or permanent representative. The definition of a PE for Dutch tax purposes is largely inspired by the OECD Model Convention definition and Commentary.

Other taxes
Value-added tax (VAT)
VAT, known in Dutch as the Belasting over de Toegevoegde Waarde or BTW, is payable on sales of goods and on services rendered in the Netherlands as well as on the importation of goods and on the ‘intra-European’ acquisition of goods. There are three VAT rates, which are 21%, 6%, and 0%.

The main VAT rate increased from 19% to 21% on 1 October 2012.

The reduced 6% VAT rate is applicable on certain prime necessities (and also on certain energy-saving insulation activities on houses).

The special 0% VAT rate is applicable mainly to intra-European Union (EU) supplies, exports, imports stored in bonded warehouses, services rendered in connection with the above, and certain other services.

The following are exempt from VAT:

- The supply of immovable property two years after putting it into use and lease. However, if the lessee’s use of the immovable property is 90% or more for input VAT-deductible purposes, the lessor and lessee may opt to be subject to VAT on rent, in which case the lessor may deduct the VAT charged in respect of the property.
- Medical, cultural, social, and educational services.
Netherlands

- Services provided by banks and other financial institutions in connection with payment transactions and the granting of credit facilities.
- Insurance transactions.
- Transactions in shares.

**Customs and excise tax**
Many goods imported to the Netherlands from outside the European Union are subject to customs and excise duties. The tariffs and rates that apply to the different goods vary widely and change regularly.

An excise tax is levied on certain consumer goods (e.g. cigarettes, cigars, mineral oils, alcoholic products). If the goods are used solely as raw materials, no excise tax is levied. The excise tax is refundable if the article is exported.

**Immovable property tax**
Municipalities impose an annual immovable property tax on the owners of immovable property. The rates depend on the municipality. The taxable basis is the market value of the immovable property. Please note that the (assessment of the) value is also of importance for CIT, as depreciation might be limited based on this value (see Limited depreciation of immovable property in the Deductions section).

**Transfer tax on immovable property**
Acquisition of economic or legal ownership of immovable property in the Netherlands is subject to a 6% transfer tax on market value. Some exemptions are available. Real estate transfer tax on dwellings is 2%.

**Transfer tax on acquisition of shares in a real estate entity**
The acquisition of shares in an entity that owns real estate may also be subject to transfer tax if that entity is characterised as a so-called real estate entity. The threshold for qualifying as a real estate entity is met if more than 50% of the assets of the entity consist of real estate and at least 30% consist of Dutch immovable property.

**Stamp duty**
There are no stamp duties in the Netherlands.

**Capital tax**
The Netherlands do not levy capital tax on capital transactions (e.g. issue or increase capital).

**Insurance tax**
An insurance tax is payable on insurance premiums if the insured is a resident of the Netherlands or if the insured object is in the Netherlands. The insurance tax rate is 21% as of 1 January 2013 (previously 9.7%). Several exemptions are available (e.g. insurances of ships and aircraft operated in international traffic are exempt from insurance tax). In certain situations, an insurer outside the European Union may be required to take on a tax representative in the Netherlands.

**Environmental charges on packaging**
Until 31 December 2012, producers or importers had to pay taxes on packaging. The tariff depended on the type and method of packaging. An exemption was granted to companies that brought less than 50,000 kilograms of packaging materials a year on the market. A refund of the packaging tax for indirect export also was available to foreign entrepreneurs. As of 1 January 2013, the environmental charge on packaging is replaced with a levy to cover the costs of recycling package materials. The new ‘waste
management contribution' (Afvalbeheersbijdrage) is, to a large extent, similar to the environmental charge on packaging, but with lower tariffs.

**Branch income**

Rates for Dutch branch profits are the same as for other corporate profits, but no tax is withheld on transfers of profits to the head office. The tax base is, in principle, calculated on the same rules as for Dutch-resident companies.

**Income determination**

**Inventory valuation**

In general, stock/inventory is stated at the lower of cost or market value. Cost may be determined on the basis of first in first out (FIFO), last in first out (LIFO), base stock, or average cost. The LIFO system may be used for commercial/financial and tax purposes.

There is no requirement of conformity between commercial/financial and tax reporting.

**Capital gains**

Capital gains are taxed as ordinary income. However, capital gains realised on disposal of shares qualifying for the participation exemption are tax exempt (see Dividend income below).

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired assets. Except in special circumstances, the reserve cannot be maintained for more than three consecutive years. If the reserve has not been fully applied after three years, the remainder will be liable to taxation.

Capital losses are deductible, unless attributable to the disposal of a shareholding qualifying for the participation exemption.

**Dividend income**

Subject to meeting the conditions for the participation exemption, a Dutch company or branch of a foreign company is exempt from Dutch tax on all benefits connected with a qualifying shareholding, including cash dividends, dividends in kind, bonus shares, hidden profit distributions, capital gains, and currency exchange results.

**Participation exemption**

The participation exemption will apply to a shareholding in a Dutch company if the holding is at least 5% of the investee’s capital, provided the conditions are met.

As a general rule, the participation exemption is applicable as long as the participation is not held as a portfolio investment. The intention of the parent company, which can be based on particular facts and circumstances, is decisive. Regardless of the company’s intention, the participation exemption also is applicable if the sufficient tax test (i.e. the income is subject to a real profit tax of at least 10%) or the asset test (i.e. the subsidiary's assets do not usually consist of more than 50% of portfolio investments) is met.

For portfolio investment participations not qualifying for the participation exemption, double taxation will be avoided by applying the tax credit method, unless the portfolio...
Netherlands

Investment shareholding effectively is not subject to tax at all. For EU shareholdings, it is optional to credit the actual underlying tax.

Dividends not qualifying under the participation exemption are taxable in full at the ordinary CIT rate.

Interests of 25% or more in a company of which the assets consist (nearly) exclusively of portfolio investments should be annually valued, as an asset, at the fair market value.

Costs related to the acquisition and disposal of a participation (e.g. legal fees, compensations, notary fees) are not deductible for corporate tax.

Losses arising from the liquidation of a (foreign) subsidiary are deductible for CIT, subject to certain conditions.

As of 1 January 2013, a new provision that limits the deduction of excess interest on debts that are deemed to be related to the financing of participations has entered into force (see Anti-abuse rules regarding interest and loans in the Deductions section).

Profits derived from a company that was created by converting a foreign PE only qualify for the participation exemption after they exceed the losses from the PE during the previous years insofar as those losses reduced the taxable profits in the Netherlands before 1 January 2012. Under certain circumstances, such as the alienation of (part of) the shares of the company, all non-recaptured losses will be added to the profits of the Dutch parent company at once. Note that the scope of these anti-abuse provisions has been extended by including situations in which a foreign intermediate holding company is interposed.

Stock dividends
Stock dividends are taxed as dividend income to the extent that they are paid out of earned surplus. They are not taxable if paid out of share premium (‘agio’), provided the share premium account was not created pursuant to a share-for-share merger, in which only Dutch companies were involved. In the case of a share-for-share merger, in which shares in foreign subsidiaries were contributed to a Dutch company, the Dutch company can distribute the difference between the fair market value and the paid-in capital of the subsidiaries being contributed as a stock dividend without triggering Dutch dividend WHT (step-up in basis), provided certain requirements are met.

Work in progress
Profits with regard to work in progress should be accounted before actual completion, to the extent that the work is completed. All project costs should be recognised in the year the costs occurred.

Foreign income
In general, a Dutch resident company is subject to CIT on its worldwide income. However, certain income can be exempted (e.g. due to the application of the participation exemption described above) or excluded from the tax base.

Certain foreign-sourced income (foreign branch income, real estate income, and other income) is ‘excluded’ from the Dutch taxable base. The so-called ‘object exemption’, a method to provide relief for international juridical double taxation in situations of Dutch companies with a PE abroad, is designed as a tax base adjustment instead of a real exemption. Consequently, losses of foreign PEs can no longer be offset against profits of the Dutch head office (except for final losses), but currency exchange results
are still included in the tax base. Also, if the foreign activities cease, any losses upon 'liquidation' can, in principle, be deducted. For certain low-taxed passive PEs, the object exemption is replaced by a credit system.

Prior to 1 January 2012, double taxation of certain foreign-source income, including foreign branch income, was avoided by reducing Dutch tax by the ratio of foreign income (subject to a foreign income tax and/or covered by certain tax treaty provisions) to total income, the so-called exemption method. Currency exchange profits or losses on the head office's investment in its foreign branch were not considered 'foreign income' for the purposes of these relief provisions. Unilateral relief from double taxation for income from foreign financing branches was provided by means of a credit of 17.5% of the passive financing income for foreign taxes deemed paid or the foreign tax actually paid. However, the exemption method applied only if the taxpayer could demonstrate that the foreign branch was actively engaged in intra-group financing activities.

Double taxation of foreign dividends, interest, and royalties is relieved by a tax credit provided by Dutch tax treaties or unilaterally if the payer of the income streams is a resident of a developing country designated by Ministerial Order. If no treaty or unilateral relief applies, a deduction of the foreign tax paid is allowed in computing the net taxable income.

However, relief by exemption is given for dividends from foreign investments qualifying for the participation exemption, as discussed above. In that case, there is no Dutch tax to credit against taxes withheld in the subsidiary's country of residence.

In most circumstances, the foreign dividend is exempt for Dutch CIT under the participation exemption, as previously discussed. As a consequence, foreign WHT cannot be credited, and the WHT constitutes a real cost for the companies concerned. A credit of the foreign WHT is granted against Dutch dividend WHT due on the distribution to foreign parents of the Dutch company. The credit amounts to a maximum of 3% of the gross dividend paid, to the extent that it can be paid out of foreign-source dividends received that have been subject to at least a 5% WHT and the foreign company is liable for CIT. This tax credit does not result in taxable income for CIT purposes.

**Deductions**

**Depreciation, amortisation, and depletion**

Generally, depreciation may be computed by a straight-line or a reducing-balance method or, in accordance with any other sound business practice, on the basis of historical cost. Depreciation is applied from the date the asset comes into use. Dutch tax law includes specific rules (see below) that potentially limit the depreciation of assets (e.g. immovable property, goodwill, and other fixed assets).

A depletion allowance for natural resources may be granted for tax purposes, when it conforms to sound business practice and is appropriate for accounting purposes.

**Limited depreciation of immovable property**

There are special provisions for depreciation of immovable property. A distinction is made between immovable property held for investment purposes and buildings used in a trade or business.
Netherlands

Investment property cannot be depreciated to an amount lower than the official property’s fair market value for tax purposes, which is known as WOZ-waarde. In other words, a property will not be subject to depreciation unless the carrying amount of the building and the land on which it is located is higher than its value for tax purposes. This value is determined by the municipal tax authorities annually. As this value is based on the assumption that the property is free of lease, the value for tax purposes of commercial real estate may be lower than fair market value.

Alternatively, the depreciation of buildings employed in a trade or business is limited to 50% of the property’s value for tax purposes. It should still be possible to value immovable property at fair market value if this is demonstrably lower than the current book value. In addition, anti-abuse measures apply to prevent the division of land and buildings into separate legal entities or to related individuals.

Note that maintenance costs continue to qualify for tax relief and any maintenance-related value increase does not lead to a compulsory upward revaluation of the property. Moreover, a property is not required to be revalued as its value increases due to market developments.

Depreciation of land is not permitted.

The sale of depreciated assets triggers tax on the difference between the sale price and the depreciated book value unless a reinvestment reserve is set up (see Capital gains in the Income determination section).

**Limited amortisation of goodwill and depreciation of fixed assets**

With regard to goodwill, the amortisation for tax purposes is limited to 10% of the purchase price per annum. Furthermore, the tax depreciation of other fixed assets (i.e. inventory, equipment) is limited to 20% of the purchase price or production costs per annum.

**Accelerated depreciation**

The law provides accelerated depreciation of several specific assets. Accelerated depreciation applies to investments in assets that are in the interest of the protection of the environment in the Netherlands and that appear on the so-called VAMIL (Vervroegde Afschrijving Milieu-investeringen) list. In 2011, 2012, and 2013, the accelerated depreciation facility for investments in environment-improving assets is temporary limited to 75% of the total (investment) costs. As of 1 January 2014, this percentage will be 100%.

Accelerated depreciation also is available for certain other designated assets, for example, investments of starting entrepreneurs.

Investment costs minus residual value of sea-vessels that are operated mainly from the Netherlands may be depreciated straight-line over five years. Instead of accelerated depreciation, these taxpayers may choose immediate taxation (see Tonnage tax regime in the Taxes on corporate income section).

**Anti-abuse rules regarding interest and loans**

Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides credible evidence of overriding commercial reasons for the transaction as well as the loan, or of taxation of the interest in the hands of the recipient at an effective tax rate that is considered adequate by Dutch standards, the interest may be deductible.
Furthermore, interest paid on certain profit participating loans will be qualified as a dividend and will not be tax deductible. Interest received upon these loans may meet the definitions for the participation exemption if the creditor also holds a qualifying participation in the debtor. Intra-group conduits may be denied a credit of foreign WHT with respect to royalties or interest received if no economic risk is deployed.

If the interest payment to a group company relates to a loan that is directly or indirectly granted by a group company in order to finance an acquisition or capital contribution, the interest will be deductible only if the loan and the underlying transaction are based predominantly on sound business considerations or if the interest received is effectively and sufficiently taxed by Dutch standards.

When the debt ultimately is financed externally (outside the group) and a direct relationship exists between the internal debt and the ultimate external financing, it can be substantiated that there are sound business reasons for the loan. Furthermore, the use of tax losses or similar relief claims by the recipient of the inter-company interest may adversely affect the deductibility of the interest paid. Also, the law states that the interest deduction related to indebted dividend distributions, paid back capital, and capital contributions is not only possible in case of sound business reasons but also if the interest is taxed in the hands of the creditor at an effective tax rate that is considered adequate by Dutch standards. The latter requirement means that the interest needs to be subject to an effective tax rate of at least 10% over taxable profits determined according to Dutch standards. For the determination of a taxable base according to Dutch tax standards, the tax base limitation for the innovation box is not taken into account.

If the taxpayer makes a reasonable case that the interest is taxable at an effective tax rate of at least 10%, the tax authorities, nevertheless, have the option to substantiate that either the liability or the corresponding transaction is not based on sound business reasons. The tax authorities also have the option to substantiate that the liability is incurred in order to compensate losses or other rights that were formed in that year or that will be formed shortly thereafter. This is also applicable to existing loans.

In addition, the deduction of interest (including costs and currency exchange results) on excess acquisition debt is restricted if the acquired company subsequently joins a Dutch fiscal unity with the taxpayer, with effect from 15 November 2012. The acquisition debt is considered excessive in so far as it exceeds 60% of the acquisition price. The interest expenses may only be deducted from the acquiring company's 'own profits', meaning that the profits of the target company that was added to the fiscal unity are not taken into consideration. The restriction is not applicable if the interest on the debt does not exceed EUR 1 million. Contrary to the other existing interest deduction restrictions illustrated above, this new measure also relates to interest on loans obtained from third parties.

Furthermore, a new provision that limits the deduction of excess interest on debts that are deemed to be related to the financing of participations has become effective as of 1 January 2013. Under this rule, the taxpayer is deemed to have debt relating to the financing of participations to the extent that the average cost price of its participations exceeds its average equity. This is a mathematical test. However, a few exceptions apply. For example, the cost prices of the participations that at the time of the initial acquisition led to an extension of the operational activities of the group are not taken into account for the purpose of the mathematical test. The 'participation debt' calculated may consist of both loans from affiliated and third parties. The interest on the deemed participation debt is not deductible to the extent the amount of the interest
Netherlands

exceeds EUR 750,000. The new provision for excessive participation interest also contains a number of specific anti-abuse measures.

**Provision for bad debt**
It is possible to make a provision for future expenses with a cause existing on the balance sheet of the tax year in question. Therefore, a provision may be made for bad debts.

**Charitable contributions**
Charitable contributions are deductible if certain conditions are met. The gift must be documented in writing and contributed to a qualifying charity (ANBI or SBBI). The deductible amount may not exceed 50% of the taxable profits, with a maximum of EUR 100,000.

**Limited deductibility of costs relating to remuneration by way of shares**
Any remunerations by way of shares, profit-sharing certificates, option rights on shares, or similar rights are not deductible. However, grandfathering rules exist for situations where option rights have been granted to employees before 24 May 2006.

Costs related to so-called stock appreciation rights for employees that earn an income that exceeds EUR 500,000 are not deductible.

**Fines and penalties**
Most criminal fines and tax penalties are not tax deductible. This applies, for instance, to fines imposed by a Dutch criminal judge, administrative fines, disciplinary fines, and penalties from a European institution.

**Taxes**
Certain taxes, such as the tax on insurance transactions, are deductible. Tax paid on the transfer of immovable property must be included in the cost price and taken into account in the course of normal depreciation. The CIT itself is not deductible.

**Other significant items**
Deduction of certain expenses (e.g. costs for food, drink, and entertainment) paid by employers for employees are not deductible, in part. These costs are often referred to as mixed costs. The non-deductable portion is 0.4% of the total taxable wages of all employees but never less than EUR 4,400 per year. Alternatively, the employer may choose to deduct only 73.5% of the actual expenses.

**Net operating losses**
Tax losses can be carried back one year and carried forward nine years. This also applies to start-up losses.

With regard to losses arising in the years 2009, 2010, and 2011, corporate taxpayers may opt for a temporary extension of the carryback period for losses from one to three years. This option, however, also means that the maximum period for loss carryforward will be limited to six years (instead of nine). Furthermore, the extended measure is limited to EUR 10 million loss carryback per extra year.

Complex rules may prohibit the utilisation of net operating losses after a change of 30% or more of the ultimate control in a company. Furthermore, limitations exist on loss utilisation for holding/finance companies. Based on these rules, losses incurred by a mere holding or group finance company can be offset only against holding or finance
income in preceding and following years, provided that certain strict conditions are met. These conditions are meant to counter tax planning, whereby the Dutch company concerned acquires (e.g. by way of equity contribution or exchange) other assets that enhance its income streams and its capacity to make use of the losses. Companies carrying out significant other activities (with 25 or more full-time employees) are, in principle, unaffected by these loss relief restrictions.

**Payments to foreign affiliates**
A Dutch corporation generally can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, to the extent that the amounts are not in excess of what it would pay an unrelated entity (i.e. arm's-length principle). Dutch companies are obligated to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third party prices.

**Group taxation**

**Fiscal unity regime**
A Dutch-resident parent company and its Dutch-resident subsidiaries (if the parent owns at least 95% of the shares) may, under certain conditions, file a tax return as one entity (fiscal unity). Group taxation is available for companies having their place of effective management in the Netherlands, both for Dutch tax and treaty purposes.

The main feature of the fiscal unity is that profits of one company can be offset against losses of another company forming part of that fiscal unity. Furthermore, inter-company transactions are eliminated.

In February 2010, the European Court of Justice (ECJ) decided that the Dutch fiscal unity regime does not violate EU law (the freedom of establishment), insofar as it disallows a cross-border fiscal unity. However, the ECJ has not yet explicitly dealt with the effects of the fiscal unity regime, other than cross-border loss utilisation, such as the transfer of assets between group companies without immediate taxation and the use of ‘final losses’. The Dutch Supreme Court will possibly deal with those issues at a later stage.

On 17 January 2013, the Amsterdam Tax Court of Appeals referred preliminary questions to the ECJ on the compatibility of the Dutch fiscal unity regime with the Treaty on the Functioning of the European Union (TFEU) to the extent it denies a fiscal unity between a Dutch parent company and its Dutch subsidiaries because of a non-Dutch resident, German intermediary holding company.

**Transfer pricing rules**
Based on a general transfer pricing provision in the corporation tax law, all transactions between related parties must be at arm's length. Furthermore, a specific transfer pricing provision exists with respect to the transactions of an interest and royalty conduit company. Dutch companies are obligated to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third party prices. If a transaction between related parties is not at arm’s length, the taxable income may be corrected by the tax authorities. Moreover, transactions that do not meet the arm’s-length test may constitute a contribution of informal capital or a hidden profit distribution.
Netherlands

On the basis of a decree of the State Secretary for Finance regarding transfer pricing, companies may request an advance tax ruling (ATR) and an advance pricing agreement (APA). An ATR may be requested on the classification of activities and an APA may be required on the classification of activities and the arm’s-length character of the transfer price.

**Thin capitalisation**

The thin capitalisation rules, which may limit the deductibility of interest paid on intra-group debts, will no longer apply with regard to fiscal years starting on or after 1 January 2013. There are no transitional provisions. Until that date, the thin capitalisation rules applied to all Dutch companies that were part of a domestic or international group of companies. The allowed debt-to-equity ratio was 3:1, based on the average of the tax equity at the beginning and at the end of the year. A higher ratio might have applied at the request of the taxpayer if the group to which the Dutch company belongs had, according to the financial statements, a higher, worldwide debt-to-equity ratio. Interest paid on loans exceeding the 3:1 ratio was disallowed only to the extent it exceeded inter-company interest received. The deduction of interest paid on genuine third party loans was not limited by the thin capitalisation rules.

**Tax credits and incentives**

**Foreign tax credit**
See Foreign income in the Income determination section for a description of the foreign tax credit regime.

**Small investments**

There is a system of deductions for small investments, the so-called small scale investment deduction. To calculate this annual deduction, investments of more than EUR 450 each are totalled to determine the percentage of the deduction.

<table>
<thead>
<tr>
<th>Total of investments (EUR)</th>
<th>Deduction</th>
</tr>
</thead>
<tbody>
<tr>

<td>No deduction</td>
</tr>
</tbody>
</table>

**Investments in energy-efficient assets**

For investments in energy-efficient assets, there is a deduction from corporate income of 41.5% of the value of the total annual amount of investments exceeding EUR 2,300, up to and including EUR 118 million.

**Investments in environmental assets**

For investments in certain new environmental improving assets exceeding EUR 2,300 per calendar year (with a maximum of EUR 25 million per taxpayer), a deduction from corporate income of 36%, 27%, or 13.5% exists (in 2011, 2012, and 2013), depending on the ministerial classification of the assets. Prior to 2011 and as of 2014, the deduction was/will be 40%, 30%, or 15%, depending on the type of investment.
**New technology**

**Wage costs**
Conducting certain R&D activities on applied new technology is subsidised by a reduction of wage tax to be paid on wages of employees engaged in R&D of technologically new products. The subsidy accrues to the employer when the employee is credited for the normal amount of wage tax. For the year 2013, the reduction of the payroll tax and social security contributions amounts to 42% of the first EUR 110,000 in R&D wage costs (first bracket) and 14% of the excess costs. The benefit for each employer (or group of companies) may not exceed EUR 14 million per year.

To obtain the relief under the R&D incentive programme, taxpayers must file an electronic/online application with the so-called Agentschap NL (NL Agency), a department of the Ministry of Economic Affairs. The taxpayer will receive an R&D declaration. The budget for this subsidy is fixed, so the amount of the subsidy is dependent on budget availability. Note that self-developed and utilised software falls within the scope of the R&D incentive under certain conditions.

**Other costs**
In addition to the existing R&D facilities, an additional R&D deduction is available.

For 2013, the additional R&D deduction amounts to 54% (previously 40%) of the costs (other than wage costs) and expenses directly related to R&D activities performed by the taxpayer. An expense equal to or greater than EUR 1 million will be taken into account over a period of five years, 20% each year.

To receive this additional deduction, taxpayers must file an electronic/online application with the so-called Agentschap NL. The request must be filled together with the application for the R&D declaration.

**Withholding taxes**
Dividends from Dutch corporations are generally subject to a 15% Dutch dividend WHT. In general, this does not apply to the Dutch cooperative (i.e. ‘co-op’) in a business driven structure, a widely used vehicle for holding and financing activities.

The Netherlands does not levy a WHT on interest and royalty payments.

Domestic corporations are required to withhold taxes as follows:

<table>

</table>
Netherlands

Notes

1. A 0% WHT rate applies to payments to a resident corporation when its shareholding qualifies for the participation exemption and the shares form part of a company whose activities are carried on in the Netherlands. However, dividend WHT may be levied on certain profit participating loans.

2. The lower rate applies if the foreign company directly owns at least 25% of the capital of the Dutch company.

3. The 5% rate is applicable if the foreign company directly owns 10% of capital of the Dutch company. The 0% rate is applicable if the dividend originates from ordinary taxed profits and the dividend is tax exempt in the hands of the recipient.

4. Based upon the treaty concluded with former Yugoslavia.

5. Negotiations on (revisions of) tax treaties are currently pending with Angola, Aruba Australia, Belgium, Brazil, Chile, China, Colombia, Costa Rica, Curaçao, France, Indonesia, Kenya, New Zealand, Poland, Saint Martin, Singapore, Slovak Republic, and Spain. The new or revised treaties with the Czech Republic, Ethiopia, and Germany are signed but not yet effective.

6. Indicates that this country is a member state of the European Union. The EU Parent/Subsidiary Directive applies from 1 January 1992. According to the Directive, dividends paid by a Dutch company (BV or NV) to a qualifying parent company resident in another EU member state must be exempt from Dutch WHT, provided certain conditions are met. Among other things, the EU parent company must hold at least 10% of the Dutch dividend-paying company's capital (or, in certain cases, voting rights) for a continuous period of at least one year. A provisional exemption from dividend WHT will apply from the start of the one-year holding period. The exemption will be cancelled retroactively if, following the dividend distribution, the one-year holding requirement is not actually met. The Dutch dividend-distributing company must provide to the Dutch tax authorities a satisfactory guarantee for the payment of dividend WHT that, but for the provisional exemption, would be due. The exemption is also applicable if the parent company is a resident of a EU member state and owns at least 10% of the (voting) shares in the Dutch company but only on the basis of reciprocity (Finland, Germany, Greece, Luxembourg, Spain, and United Kingdom). Should the WHT exemption not be available under the EU Parent/Subsidiary Directive, the treaty rate(s) set out in the right-hand side of the same column (following ‘or’) will apply.

7. The lower rate applies if the foreign company owns, directly or indirectly, at least 25% of the capital of the Dutch company.

8. The lower rate applies if the foreign company directly owns at least 10% of the capital of the Dutch company.

9. The 0% rate applies if the foreign company directly owns at least 50% of the capital of the Dutch company, or invested more than EUR 250,000 in the Dutch company or owns directly 25% of the capital of the Dutch company and has a statement indicating that the investment in Dutch capital is, directly or indirectly, guaranteed by the government of Belarus.

10. The 5% rate applies if the foreign company owns, directly or indirectly, at least 25% of the capital or at least 10% of the voting rights in the Dutch company.

11. The treaty is not applicable for Hong Kong and Taiwan.

12. The lower rate applies if the foreign company owns at least 25% of the voting shares of the Dutch company.

13. The lower rate applies if the foreign company owns at least 25% of the voting rights in the Dutch company.

14. The 5% rate is applicable if the Italian company owns at least 50% of the voting shares in the Dutch company for a continuous period of at least 12 months prior to the date chosen for distribution of a dividend. The 10% rate is applicable if the Italian company owns at least 10% of the voting shares in the Dutch company for the continuous period mentioned above. In other cases, the dividend WHT rate is 15%.

15. The 5% rate applies if the foreign company owns at least 10% of the voting shares of the Dutch company for a continuous period of at least six months immediately before the end of the book year to which the dividend distribution relates. No WHT is levied if the foreign company owns, directly or indirectly, at least 50% of the voting power in the Dutch company distributing the dividends for a period of six months. Also, no WHT is levied if the foreign company is a pension fund.

16. The lower rate applies if the foreign company owns, directly or indirectly, at least 10% of the capital of the Dutch company.

17. The 0% rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company or if it has invested more than 1 million United States dollars (USD) in the Dutch company, insofar as the government of Kazakhstan has guaranteed the investment; the 5% rate applies if the recipient company owns at least 10% of the capital of the paying company.

18. These rates do not apply to dividend payments to Luxembourg ‘1929’ holding companies.

19. The dividend article of the treaty is not applicable anymore. The national WHT rate is applicable.

20. The 0% rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company and invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company directly owns 25% or more of the capital of the Dutch company. The 15% rate is applicable on portfolio investments.

21. The rate is 15% unless the dividend is paid to a company holding at least 25% of the paid-up capital in the Dutch company. In this latter case, the WHT rate will be reduced to: (i) 5% if the dividends received are subject to a profits tax in the other state of at least 5.5% on the dividend or (ii) 7.5% if the profits tax is less than 5.5%. The combined CIT of the other state and Dutch dividend WHT for
participations of at least 25% must not exceed 8.3%. Depending on the tax percentage levied in the other state, the Dutch dividend WHT will be restituted accordingly.

22. The 5% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns 10% of the capital of the Dutch company. The 0% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% of the capital of the Dutch company.

23. The 5% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% in the capital of the Dutch company with a minimum investment of at least EUR 75,000.

24. The Netherlands applies the treaty with the former Soviet Union unilaterally to Kyrgyzstan, Tajikistan, and Turkmenistan.

25. The lower treaty rate applies if the Spanish company owns 50% or more of the capital of the Dutch company or if the Spanish company owns 25% or more of the capital of the Dutch company and another Spanish company also owns 25% or more of that capital.

26. The 0% rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company or invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company directly owns 20% or more of the capital of the Dutch company.

27. The lower rate applies if the foreign company directly owns at least 10% of the voting rights in the Dutch company. On 8 March 2004, the Netherlands and the United States signed a protocol amending the applicable tax treaty. Based on this protocol, the WHT on dividends will be reduced to 0% if the receiving company owns 80% or more of the voting power of the distributing company, provided that certain other conditions are also met. This reduction of the dividend WHT has taken effect as of 1 January 2005.

28. The 5% rate is applicable if the foreign company directly owns 25% or more of the capital of the Dutch company. The 0% rate is applicable if the dividend for that company qualifies for the participation exemption in the Netherlands. The 15% rate is applicable to portfolio dividends.

29. The 5% rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company or invested more than USD 10 million in the Dutch company. The 7% rate applies to the foreign company owning, directly or indirectly, at least 25% of the capital of the Dutch company.

30. No dividend WHT is due if the share in the participation is at least 50% and at least USD 250,000 capital is paid in, in the participation. A dividend WHT of 5% is due if the share in the participation is at least 25%.

31. A dividend WHT of 5% is due if the share in the participation is at least 10%. No dividend WHT is due if the share in the participation is at least 50% and at least USD 2 million capital is paid in, in the participation.

32. Based upon most-favoured nation principle.

33. The 0% rate applies if a company controls at least 10% of the voting power of the Dutch company paying the dividends. The 15% rate applies to dividends arising from income from immovable property, distributed by certain tax exempt real estate investment vehicles (e.g. REITs or FBIs).

34. In case a Thai company holds at least a 25% share in a Thai company, the Dutch dividend WHT rate is 5%.

35. If a share of at least 50% is held by a company, no dividend WHT is due. If the share the company holds is less than 50%, 5% dividend WHT is due.

36. As of 29 December 2004, Switzerland and the European Union concluded a treaty in light of the EU savings directive. The treaty, amongst others, contains a clause that no dividend tax is withheld if certain requirements are met. The main requirements are that a shareholding of at least 25% is held directly for a period of at least two years and both corporations are not subjected to a special tax regime. Please note that even though the treatment of dividend appears to be equal to the treatment on the basis of the EU-parent subsidiary directive, the directive is, in fact, not applicable to Switzerland.

37. The 0% rate applies if the foreign company directly owns at least 5% of the capital of the Dutch company.

38. The 5% rate applies if the foreign company directly owns at least 25% of the capital of the Dutch company with a minimum investment of at least EUR 200,000 in the Dutch company.

39. The 0% rate applies if the foreign company directly owns at least 7.5% of the capital of the Dutch company.

40. The WHT rates are based on the Dutch ‘Belastingregeling voor het Koninkrijk’.

41. The WHT rates for the Caribbean Netherlands are based on the Dutch ‘Belastingregeling voor het land Nederland’.

42. No WHT is levied if the foreign company (beneficial owner) receiving the dividends directly holds at least 10% (15% threshold for the Panama Treaty) of the shares of the Dutch company, provided that the shares of the foreign company are regularly traded on a recognised stock exchange or at least 50% of the shares of the foreign company is owned by residents of either contracting state or by companies the shares of which are regularly traded on a recognised stock exchange. Also, no WHT is levied if the foreign company is a bank or insurance company, a state or political subdivision, a headquarters owning at least 10% of the capital of the Dutch company, or a pension fund.

43. The 0% rate applies if the foreign company directly owns at least 10% of the capital of the Dutch company, is a pension fund, or, as far as Switzerland is concerned, the beneficial owner is a social security scheme.
Netherlands

**Tax administration**

**Taxable period**
Generally, the tax year is equal to the calendar year. However, corporate taxpayers may deviate from this by adopting a different financial year.

**Tax returns**
Tax returns must be filed either every calendar year or every financial year. The due date is generally five months after the end of the company’s fiscal year. This filing due date may be extended upon request by the taxpayer. The Dutch tax authorities generally make a provisional assessment before issuing the final assessment after a full examination of the return.

**Payment of tax**
The CIT assessed must be paid within two months of the date of the assessment. In addition, provisional assessments are issued for the current tax year on the basis of the prior year’s taxable income.

**Tax audit process**
Corporate taxpayers might be subject to regular audits by tax inspectors. This forms part of the so-called vertical monitoring tasks of the national tax authorities. In recent years, there has been a tendency towards a more enhanced co-operation between tax authorities and taxpayers in the Netherlands (see Horizontal Monitoring in this section below). Part of this trend is that there are to be less audits in retrospect.

**Statute of limitations**
Under certain conditions, the tax administration can impose an additional assessment within five years from the year in which the tax debt originated (if the filing due date was extended on request, this period is added). In case of income from abroad, the period for additional assessment is extended to 12 years.

**Advance pricing agreement (APA)/Advance tax ruling (ATR)**
Taxpayers are able to obtain (legal) certainty concerning their CIT positions. They may request the Dutch tax authorities to conclude an APA with respect to the transfer pricing of controlled transactions. Taxpayers may also request the Dutch tax authorities to provide an ATR with respect to the CIT implications of a (contemplated) set of transactions.

**Horizontal monitoring**
If the taxpayer is willing, the Dutch tax authorities, in certain cases, shift their method from vertical monitoring to horizontal monitoring. Emphasis is placed on cooperation and on the responsibilities of the parties involved, instead of retrospective control. Horizontal monitoring is based on mutual trust, understanding, and transparency between the taxpayers and the Dutch tax authorities. It aims at reducing administrative burdens and providing legal certainty in advance. Taxpayers need to have a solid Tax Control Framework.
Significant developments

Unsuccessful software costs
The Taxation (Annual Rates, Returns Filing, and Remedial Matters) Act 2012 introduces an upfront deduction for expenditure incurred on unsuccessful software development projects in the year that the development is abandoned. This amendment applies retrospectively from the 2007/08 and later income years.

Profit distribution plans
The Taxation (Annual Rates, Returns Filing, and Remedial Matters) Act 2012 introduces changes that treat shares issued under profit distribution plans (PDPs) as taxable dividends from 1 July 2012.

KiwiSaver
The Taxation (Annual Rates, Returns Filing, and Remedial Matters) Act 2012 raises the minimum employee and employer contribution rates for KiwiSaver from 2% to 3% of an employee’s gross salary or wages. The new rates apply from 1 April 2013.

Thin capitalisation
The Taxation (Annual Rates, Returns Filing, and Remedial Matters) Act 2012 increases the minimum equity threshold of a foreign held bank from 4% to 6% of the group’s risk-weighted exposures from 1 April 2012.

Goods and services tax (GST)
The Taxation (Annual Rates, Returns Filing, and Remedial Matters) Act 2012 amends the Goods and Services Tax Act 1985 to provide that late payment fees are subject to GST. This development will broaden the GST tax base to include fees that have never been subject to GST as they are not part of the price for the underlying goods and services.

Other changes to the GST rules include:

- A new rule precluding liquidators, receivers, and administrators from changing their GST accounting basis from payments to invoice basis to claim GST deductions.
- Confirmation that an assignment of a commercial lease can be zero-rated under the compulsory zero-rating (CZR) regime.
- Amendments to the nomination rules for non-land transactions to ensure a GST-registered contractual purchaser can claim a GST deduction even if the nominee is not GST-registered.
New Zealand

**Inland Revenue’s compliance management programme**
In August 2012, Inland Revenue published its annual compliance management programme. In 2012/13, Inland Revenue’s key areas of focus include structured and complex financing arrangements, loss generation and usage, transfer pricing, leasing, depreciation, and charities.

**Double tax agreements (DTAs)**

**Japan - New Zealand DTA**
Japan and New Zealand have signed a new DTA that will replace the 1963 treaty. The updated agreement will come into force once both countries have given legal effect to it. In New Zealand, this will occur through an Order in Council.

The withholding tax (WHT) rate on dividends will reduce from 15% to 0% for an investor who holds at least 10% of the voting power in the company paying the dividend (subject to certain conditions being met). The WHT rate on royalties will reduce from 15% to 5%, and the WHT rate on interest will reduce from 15% to 10%.

**Papua New Guinea - New Zealand DTA**
Papua New Guinea and New Zealand have signed a new DTA. The agreement will come into force once both countries have given legal effect to it. In New Zealand, this will occur through Order in Council.

The WHT rate on dividends will reduce to 15% and the WHT rate on interest and royalties will reduce to 10%.

**DTAs under negotiation**
New Zealand is currently negotiating DTAs with Luxembourg, the United Kingdom, and Vietnam.

New Zealand is also negotiating new protocols to amend existing treaties with Austria, Belgium, India, and the Netherlands.

**Taxes on corporate income**
New Zealand resident companies are taxed on their worldwide income, and non-resident companies (including branches) are taxed on New Zealand-sourced income.

The New Zealand corporate income tax (CIT) rate is 28%.

**Local income taxes**
There are no state or municipal income taxes in New Zealand.

**Corporate residence**
Residence is determined by place of incorporation, location of head office or centre of management, or by directors’ exercising control of the company in New Zealand.

**Permanent establishment (PE)**
Generally, DTAs to which New Zealand is a party define a PE by reference to a fixed place of business through which the company’s business is carried on. A PE can also
exist without a fixed place of business if the employees of the overseas company habitually exercise an authority to conclude contracts in New Zealand.

Other taxes

Goods and services tax (GST)
GST is a form of value-added tax (VAT) that applies to most supplies of goods and services. The narrow category of exempt supplies includes financial services. The rate applied to taxable supplies is currently 15% or 0%.

The 0% rate applies to a few supplies only, including exports and financial services supplied to other registered businesses. The 0% rate also applies to the sale of land between two registered parties if the purchaser acquires the land with the intention of using it to make taxable supplies and the land is not intended to be used as a principal place of residence for the purchaser or an associate.

There is also a ‘reverse charge’ mechanism that requires the self-assessment of GST on the value of certain services imported by GST registered persons.

Customs duties
Customs duty is levied on some imported goods at rates generally ranging from 1% to 10%.

Excise duty
Excise duty is levied, in addition to GST, on alcoholic beverages (e.g. wines, beers, spirits), tobacco products, and certain fuels (e.g. compressed natural gas, gasoline). The excise duties are levied item-by-item at rates that vary considerably.

Property taxes
Local authorities levy tax known as ‘rates’ on land within their territorial boundaries. Rates are levied on properties based on the properties’ rateable value.

Transfer taxes
There are no taxes on the transfer of property in New Zealand.

Stamp duty
Stamp duty has been abolished in respect of instruments executed after 20 May 1999.

Accident compensation levy
A statutory-based scheme of accident insurance is funded in part by premiums payable by employers and employees.

Premiums paid by employers (including the self-employed) fund insurance for work-related accidents. Employers are liable to pay a residual claims levy and an employer levy. The employer levy payable is determined according to the industry or risk classification of the employer and the level of earnings of employees.

Fringe benefit tax (FBT)
Employers are subject to a tax-deductible FBT on the value of non-cash fringe benefits provided to their employees. Employers can elect to pay FBT at flat rates (for the 2012/13 income year, 49.25% on attributed benefits and 42.86% on pool benefits, i.e. those benefits that cannot be attributed to a particular employee) applied against the
value of the benefit or can attribute fringe benefits to individual employees and pay FBT based on each employee’s marginal tax rate.

Under the attribution option, the applicable FBT rate depends on the net remuneration (including fringe benefits) paid to the employee. The attribution calculation treats the fringe benefit as if it was paid in cash and calculates FBT as the notional increase in income that otherwise would have arisen.

The multi rates for the 2012/13 income tax year are:

<table>
<thead>
<tr>
<th>Net remuneration (NZD*)</th>
<th>FBT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>12,530 or less</td>
<td>11.73</td>
</tr>
<tr>
<td>12,531 to 40,580</td>
<td>21.21</td>
</tr>
<tr>
<td>40,581 to 55,980</td>
<td>42.86</td>
</tr>
<tr>
<td>Greater than 55,981</td>
<td>49.25</td>
</tr>
</tbody>
</table>

* New Zealand dollars

Fringe benefits include motor vehicles available for private use, loans at below prescribed interest rates, contributions to medical insurance schemes, and employer contributions to superannuation schemes.

In relation to motor vehicles, employers can value a vehicle on an annual basis either using 20% of the cost price or market value (GST inclusive) of the vehicle (depending on whether the vehicle is owned or leased by the employer) or 36% of the vehicle’s tax written down value (GST inclusive). In each case, the FBT value must be reduced proportionately for whole days when the vehicle is not available for private use at any time.

FBT is also applicable to benefits received by an employee from a third party where there is an arrangement between the employer and the third party and where the benefit would be subject to FBT if it had been provided by the employer.

**Employer superannuation contribution tax (ESCT)**

Employers’ contributions to an approved superannuation fund (excluding foreign schemes) are subject to ESCT.

Employer contributions to KiwiSaver (or other qualifying registered superannuation schemes) are subject to ESCT at an employee’s marginal tax rate.

**Branch income**

A non-resident company is taxed on income generated by business wholly or partially carried on in New Zealand. Branch profits are subject to ordinary corporate rates of taxation, and there is no WHT on repatriated profits.

**Income determination**

**Inventory valuation**

Inventory must be valued by a cost-valuation method or, where market-selling value is lower than cost, may be valued at market-selling value. If the inventory is shares, it must
be valued at cost. Cost is determined under generally accepted accounting principles (GAAP). Acceptable cost flow methods are first in first out (FIFO) or weighted-average cost. Some valuation concessions are available to small taxpayers.

**Capital gains**
There is no separate capital gains tax. However, the income tax legislation specifically includes various forms of gain that would otherwise be considered a capital gain within the definition of ‘income’. Taxable income includes gains on the sale of real estate in certain circumstances and on personal property where the taxpayer acquired the property for resale or deals in such property or where a profit-making purpose or scheme can be deemed or imputed.

**Dividend income**
Dividends derived from resident companies are exempt where there is 100% common ownership.

**Dividends from a foreign company**
A dividend derived by a company resident in New Zealand from a foreign company is treated as exempt income unless it is:

- a dividend on a fixed rate share or a dividend for which the foreign company has received a tax deduction in its home jurisdiction, or
- a dividend from a portfolio foreign investment fund (FIF) (i.e. interests under 10%) that is exempt from FIF rules (e.g. an interest in an Australian listed company).

Dividends from foreign companies derived by taxpayers other than companies are taxable (generally with a credit for any foreign WHTs).

**Branch equivalent tax account (BETA)**
Previously, taxpayers who were subject to tax on attributed foreign income under the controlled foreign company (CFC) or FIF regimes and also taxed or liable to pay foreign dividend payments (FDPs) on dividends could elect to maintain a BETA. A BETA operates in a similar manner to an Imputation Credit Account and helps avoid the double taxation of attributed foreign income and foreign dividend income.

As most foreign dividends received by New Zealand companies are exempt from tax, most companies no longer need to maintain BETAs. The Taxation (International Investment and Remedial Matters) Act 2012 abolished BETAs from the income year beginning on or after 1 July 2012.

**Other**
Previously, the foreign investor tax credit (FITC) regime ensured that foreign investors were not taxed at more than the New Zealand corporate tax rate by effectively rebating the New Zealand WHT to the extent that the dividend was fully imputed. As non-resident withholding tax (NRWT) rates have been reduced to nil on most fully imputed dividends, FITC is generally no longer required.

The FITC regime applies only to fully imputed dividends paid to shareholders holding less than 10% of the shares in the company on NRWT rates of at least 15%.

Broadly therefore:
New Zealand

• only portfolio investors (i.e. those with less than 10% holdings) with NRWT rates of at least 15% and supplementary dividend holding companies will qualify for relief under the supplementary dividend rules, and
• a zero rate of NRWT applies to dividends paid to non-portfolio shareholders (i.e. shareholders with more than 10% holdings) and to any other dividends subject to lower tax rates, to the extent they are fully imputed.

The changes affect provisional tax calculations for taxpayers who take into account their anticipated FITC in calculating their provisional tax. Taxpayers should also consider the need to impute dividends where a tax treaty applies to reduce the NRWT rate.

The supplementary dividend regime will cease to apply to holding companies from the 2013/14 income tax year.

Stock dividends
Bonus issues can be taxable or non-taxable. With a taxable bonus issue, the amount capitalised becomes available for tax-free distribution upon a subsequent share cancellation. With a non-taxable bonus issue, the amount capitalised is not available for tax-free distribution upon a subsequent share cancellation.

The Taxation (Annual Rates, Returns Filing, and Remedial Matters) Act 2012 contained amendments that treat shares issued under profit distribution plans (PDPs) as taxable dividends.

Interest income
All interest derived by a company is income. The financial arrangement rules may require income for tax purposes to be recognised on an accrual basis. When this is not required (because the person is classified as a ‘cash basis’ person), interest income is recognised as and when it is received.

Other significant items
The taxation of debt and debt instruments is governed by the financial arrangements rules, a specific set of timing rules. Income or expenditure (including foreign exchange gains and losses) from financial arrangements must be recognised on an accrual basis (generally, yield to maturity or other commercially acceptable method). These rules do not apply to the income or expenditure of a non-resident if the financial arrangement does not relate to a business carried on in New Zealand.

Foreign income
A New Zealand corporation is taxed on foreign passive income as earned. Double taxation with respect to all types of taxable income, including interest, rents, and royalties, is avoided by the recognition of foreign tax credits. Dividends from foreign companies are subject to the FIF or CFC rules. Dividends from a foreign ‘active business’ are generally exempt from domestic tax.

New Zealand does not offer specific tax deferral rules.

Deductions

Depreciation and depletion
For tax purposes, depreciation of property can be computed under the diminishing-value method, the straight-line method, or a pooling method. The rates of depreciation depend on the following factors:
• Type of asset.
• Whether the asset is acquired new or second-hand (i.e. used).

Taxpayers must use the economic depreciation rates prescribed by Inland Revenue, together with a 20% uplift in the case of new assets (other than buildings and imported motor vehicles) purchased on or before 20 May 2010 (the 20% uplift has been removed for assets purchased after this date). Fixed-life intangible property (including the right to use land and resource consents) is depreciable on a straight-line basis over its legal life. Any depreciation recovered on the sale of an asset (up to its original cost) is taxable in the year of sale.

The double-declining-balance (accelerated) method applies to most plant and equipment. Under the double-declining-balance method, equipment with an estimated useful life of ten years results in diminishing value depreciation deductions of 20% per annum (i.e. double the straight-line rate of 10% over the equipment’s ten-year life). Buildings, certain motor vehicles, high-residual-value property, fixed-life intangible property, and property acquired prior to the introduction of the new rules cannot be depreciated under the double-declining-balance method.

The depreciation rate for buildings with an estimated useful life of 50 years or more is reduced to 0% as of the 2011/12 income year.

**Goodwill**

Goodwill is generally regarded as a capital asset, thus any payment for goodwill is non-deductible. There is a limited exception for payments made to preserve goodwill.

**Start-up expenses**

Expenses incurred by a company before the commencement of the business are generally regarded as outgoings of a capital nature and are therefore not deductible. However, certain expenditure on scientific research may be deductible, provided that it is incurred for the purpose of the company deriving assessable income.

**Research and development (R&D)**

R&D costs are tax deductible. Expenses written off as immaterial and not tested against certain asset-recognition criteria are not automatically deductible for tax purposes.

**Interest expense**

Generally, interest incurred by most companies is deductible, subject to thin capitalisation rules *(see the Group taxation section)*.

**Bad debt**

A company is allowed a deduction for bad debt in the income year in which the debt is physically written off by the company.

**Charitable contributions**

A company is allowed a deduction for charitable contributions it makes to listed donee organisations. The list of approved donee organisations is available on Inland Revenue’s website. The deduction available for charitable contributions is limited to the company’s net income for that income year.

**Entertainment expenditure**

Entertainment expenditure is generally only 50% deductible. However, entertainment expenditure incurred overseas is 100% deductible.
New Zealand

**Legal expenditure**
Legal expenditure is deductible if the expenditure is:

- incurred in deriving assessable or excluded income or
- incurred in the course of carrying on a business for the purpose of deriving assessable or excluded income.

However, the expenditure is not deductible if it is of a capital, private, or domestic nature.

Taxpayers with business-related legal expenditure of NZD 10,000 or less are able to deduct the full amount of the expenditure in the year it is incurred, whether or not it is capital in nature.

**Fines and penalties**
Generally, no deduction is available where a company has incurred expenditure on fines or penalties paid in breach of statute or regulation. Expenditure on other fines and penalties requires further evaluation before its deductibility can be determined.

**Taxes**
FBT is deductible, as is GST payable on the value of a fringe benefit.

**Net operating losses**
Losses may be carried forward indefinitely for offset against future profits, subject to the company maintaining 49% continuity of ownership. There is no loss carryback. A legislative amendment in 2002 ensures that losses of a subsidiary are preserved on a spinout (i.e. when shares in the subsidiary are transferred to shareholders of its parent company).

**Payments to foreign affiliates**
A New Zealand corporation can claim a deduction for royalties, management service fees, and interest charges paid to non-resident associates, provided the charges satisfy the ‘arm’s-length principle’, which forms the basis of New Zealand’s transfer pricing regime.

**Group taxation**
Companies that are 66% or more commonly owned constitute a ‘group’. Group companies are able to offset losses by election as well as by subvention payment. A subvention payment is a payment made by the profit company to the loss company and is equal to the amount of loss to be offset. The payment is deductible to the profit company and assessable to the loss company. Certain companies subject to special bases of assessment (e.g. mining companies other than petroleum extraction companies) are excluded from the grouping provisions. Branches of non-resident companies may be included, provided they continue to carry on business in New Zealand through a fixed establishment.

Groups of resident companies that have 100% common ownership may elect to be subject to the consolidated group regime. The group is effectively treated as a single company and transfers of assets, dividends, interest, and management fees among members of the group are generally disregarded for tax purposes. The group files a single return and is issued a single assessment. Group members are jointly and severally liable for tax purposes.
Losses incurred by a dual-resident company are not available for offset by election or subvention payment.

**Transfer pricing**
The transfer pricing rules are based on Organisation for Economic Co-operation and Development (OECD) principles and require taxpayers to value all cross-border transactions with associates on an arm’s-length basis.

The transfer pricing rules apply to arrangements for the acquisition or supply of goods, services, money, intangible property, and anything else (other than non-fixed rate shares) where the supplier and acquirer are associated persons. Similar rules apply to the apportionment of branch profits.

Various methods are available for determining the ‘arm’s-length consideration’. The taxpayer is required to use the method that produces the most reliable measure of the amount that independent parties would have paid or received in respect of the same or similar transactions. Inland Revenue has published guidelines that make it clear that documentation is required to support a taxpayer’s transfer prices.

**Thin capitalisation**
‘Inbound’ thin capitalisation rules apply to New Zealand taxpayers controlled by non-residents, including branches of non-residents. The aim of the rules is to ensure that New Zealand entities or branches do not deduct a disproportionately high amount of the worldwide group’s interest expense. This is achieved by deeming income in New Zealand when, and to the extent that, the New Zealand entities in the group are thinly capitalised (i.e. excessively debt funded).

The ‘outbound’ thin capitalisation rules are intended to operate as a base protection measure to prevent New Zealand residents with CFC investments from allocating an excessive portion of their interest cost against the New Zealand tax base.

To reduce taxpayer compliance costs, the outbound thin capitalisation rules do not apply when the New Zealand taxpayer has:

- 90% or more of their assets in New Zealand or
- less than NZD 250,000 of interest deductions.

Further concessions are available to taxpayers who do not fall below the above thresholds. If the taxpayer’s interest deduction and dividends paid for fixed rate shares (the finance cost) is below NZD 1 million, no apportionment of deductible interest is required. If the finance cost is above NZD 1 million, but below NZD 2 million, the apportionment is an adjustment.

An apportionment of deductible interest is required under the thin capitalisation rules when the debt percentage (calculated as the total group debt/total group assets of a New Zealand entity or group) exceeds both:

- 60% (for ‘inbound’ thin capitalisation) and
- 110% of the worldwide group’s debt percentage.

The use of the debt-to-asset ratio differs from most thin capitalisation models, which apply to an entity’s debt-to-equity ratio. All interest (both related and unrelated party) is subject to apportionment.
New Zealand

Foreign-owned banks operating in New Zealand are subject to specific thin capitalisation rules that deem income if the bank does not hold a level of equity equivalent to 6% of their New Zealand banking risk-weighted assets. In addition, banks are required to have sufficient equity to equity fund offshore investments that do not give rise to New Zealand taxable income in full.

**Controlled foreign companies (CFCs)**
The CFC regime imposes New Zealand tax on the notional share of income attributable to residents (companies, trusts, and individuals) with interests in certain CFCs.

Central to the regime is the definition of a CFC. When five or fewer New Zealand residents directly or indirectly control more than 50% of a foreign company, or when a single New Zealand resident directly or indirectly controls 40% or more of a foreign company (unless a non-associated non-resident has equal or greater control), that company is a CFC. For interests of less than 10%, the investment may be taxed under the FIF regime (see below).

For income years starting on or after 1 July 2009, new rules apply to the taxation of foreign companies controlled by New Zealand residents. Under the new rules, a person with an income interest of 10% or more in a CFC does not have attributed CFC income or losses if:

- the Australian exemption applies or
- the CFC passes an active business test.

If the exemptions do not apply, only the CFC’s passive (attributable) income is subject to tax on attribution (on an accrual basis).

**Active business test**
A CFC passes the active business test if it has passive (attributable) income that is less than 5% of its total income. For the purposes of the test, taxpayers measure passive and total income using either financial accounting (audited International Financial Reporting Standards [IFRS] or New Zealand GAAP accounts) or tax measures of income.

CFCs in the same country may be consolidated for calculating the 5% ratio, subject to certain conditions.

The active exemption test may also be available to investors with less than 10% interest income in a CFC if certain criteria are satisfied.

**Australian exemption**
A person with an income interest of 10% or more in a CFC does not have attributed CFC income or a loss if the CFC is a resident in, and subject to income tax in, Australia and meets certain other criteria.

**Passive (attributable) income**
Attributable, or passive, income is income that is highly mobile and not location-specific (i.e. income where there is a risk that it could easily be shifted out of the New Zealand tax base).

The broad categories of attributable income are as follows:
• Certain types of dividend that would be taxable if received by a New Zealand resident company.
• Certain interest.
• Certain royalties.
• Certain rents.
• Certain amounts for financial arrangements.
• Income from services performed in New Zealand.
• Income from offshore insurance business and life insurance policies.
• Personal services income.
• Income from the disposal of revenue account property.
• Certain income related to telecommunications services.

Taxpayers must disclose interests in CFCs in their annual tax returns. Failure to disclose CFC interests can result in the imposition of penalties.

**Foreign investment funds (FIFs)**
The FIF regime is an extension of the CFC regime, which subjects persons with interests in certain foreign entities (which are not CFCs) to New Zealand tax. It also applies when the investor does not have a sufficient interest in a CFC to be taxed under that regime.

Common examples of investments classified as FIFs include foreign companies, unit trusts, foreign superannuation schemes, and life insurance policies issued by foreign entities not subject to New Zealand tax.

The FIF rules can be split into two regimes:

- The portfolio FIF rules, which apply to interests of less than 10% in a FIF.
- The non-portfolio FIF rules, which apply to interests of 10% or more that are outside the CFC rules.

**Portfolio FIF rules**
The portfolio FIF rules apply to interests of less than 10% in foreign companies, foreign superannuation schemes, and foreign life insurance policies issued by non-resident life insurers (if the CFC rules do not apply). However, a New Zealand resident does not generally have FIF income when:

- the total cost of FIF interests held by the individual does not exceed NZD 50,000
- the income interest is less than 10% in certain Australian Stock Exchange (ASX) listed companies or certain Australian unit trusts, or
- the CFC rules apply.

There are also exemptions for interests in certain foreign employment-related superannuation schemes. These include interests held by returning residents and new migrants acquired before the person became a New Zealand resident or within the first five years of New Zealand residence.

When an interest is exempt from the FIF rules, distributions are subject to tax on a receipts basis in accordance with normal principles.

The taxable income of a New Zealand resident with an interest in a FIF that does not qualify for one of the exemptions is calculated using one of the following methods:

- Fair dividend rate (FDR).
- Comparative value.
New Zealand

- Cost.
- Deemed rate of return.

The nature of the interest held and the availability of information restrict the choice of method.

Taxpayers must disclose interests in certain FIFs in their annual tax returns. Failure to disclose can result in the imposition of penalties.

**Non-portfolio FIF rules**

The Taxation (International Investment and Remedial Matters) Act 2012 reformed the non-portfolio FIF rules significantly. The active income exemption (which applies for CFCs) has been extended to certain non-portfolio FIFs. If the FIF fails the active business test, passive income will be attributed to the New Zealand shareholders. The new rules also repeal the grey list exemption from the FIF rules and replaces it with an exemption for shareholders with a 10% or greater interest in a FIF that is resident and subject to tax in Australia.

When investors do not have sufficient information to perform the calculations required under the active business test (or choose not to apply the active business test), they will be able to use one of the attribution methods for portfolio FIF investments (see above). The accounting profits and branch equivalent methods, which were previously available to calculate FIF income, have also been repealed under the new rules for both non-portfolio and portfolio FIF interests.

---

**Tax credits and incentives**

**Foreign tax credits**

If a New Zealand resident company derives overseas income that is subject to New Zealand income tax, the company is generally allowed a credit for the foreign income tax paid in respect of that income. Generally, the credit is limited to the lesser of the actual overseas tax paid on the overseas income or the New Zealand tax applicable to the overseas income.

**Inbound investment incentives**

There are limited, specific tax incentives designed to encourage the flow of investment funds into New Zealand.

Legislation enacted in 2004 encourages foreign venture capital investment into unlisted New Zealand companies. Gains derived by certain non-residents from the sale of shares (held on revenue account and owned for at least 12 months) in New Zealand unlisted companies that do not have certain prohibited activities as their main activity are exempt from income tax. The rules apply to foreign investors who are resident in all of the countries with which New Zealand has a DTA (except Switzerland) and who invest into New Zealand venture capital opportunities.

**Capital investment incentives**

Investment allowances on fixed assets are not available.

**Trans-Tasman imputation**

Elective rules allow trans-Tasman groups of companies to attach both imputation credits (representing New Zealand tax paid) and franking credits (representing Australian tax paid) to dividends paid to shareholders.
**Withholding taxes**

Resident corporations paying certain types of income are required to withhold tax on gross income, as shown in the table below.

Notes

1. Resident WHT applies to both interest and dividends. Unless the recipient corporation holds an exemption certificate, and if the recipient provides a tax file number, the default rate of the interest WHT is 28%. Recipients can elect for the rate of interest withholding to be 30%. The rate of interest WHT is 30% where the recipient does not provide a tax file number.

2. The standard WHT rate on dividends reduces to 5% for an investor who holds at least a 10% shareholding in the company paying the dividend (subject to certain conditions being met). The WHT rate on royalties will reduce from 15% to 5%, and the WHT rate on interest will reduce from 15% to 10%.

3. New Zealand and Canada have signed a new DTA, which will come into force once both countries have given legal effect to it. The agreement will come into force once both countries have given legal effect to it. The WHT rate on dividends will reduce from 15% to a maximum of 5% for an investor who holds at least 10% of the shares in the company that pays the dividend. The WHT rate on royalties will reduce from 15% to 10% generally, with a further reduced rate of 5% for royalties relating to copyright, computer software, and others.

4. New Zealand and Japan have signed a Second Protocol in December 2009, which amends the 1981 DTA. Both sides are still working towards completing their procedures for entry into force. Negotiations for a Third Protocol to amend Article 25 (Exchange of Information) of the DTA are currently in progress.

5. The government has announced that it is re-negotiating New Zealand's DTA with the United Kingdom. New Zealand and Japan have signed a new DTA, which will come into force once both countries have given legal effect to it. In New Zealand, this will occur through an Order in Council. The withholding rate on dividends will reduce to 15% and the withholding rate on interest and royalties will reduce to 10%.

6. The government signed a Second Protocol in December 2009, which amends the 1981 DTA. Both sides are still working towards completing their procedures for entry into force. Negotiations for a Third Protocol to amend Article 25 (Exchange of Information) of the DTA are currently in progress.

7. The rate of WHT on dividends paid is 33%, but the tax is reduced by the aggregate imputation and withholding payment credits attached to the dividend or taxable bonus share. Interest and dividends paid between group companies and in certain other limited circumstances are exempt from the WHT.

8. The WHT rate on dividends will reduce from 15% to 0% for an investor who holds at least 10% of the shares in the company and meets other criteria; 15% in all other cases.

9. The WHT on dividends is reduced from 15% to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend. The rate reduces to 0% if the investing company holds 80% or more of the shares in the other company and meets other criteria. The WHT rate on interest is 10% but is reduced to 0% if it is payable to eligible financial institutions.

10. The standard WHT rate on dividends reduces to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend.

11. New Zealand and Canada have signed a new DTA, which will come into force once both countries have given legal effect to it. The WHT rate on dividends will reduce from 15% to a maximum of 5% for an investor who holds at least 10% of the shares in the company that pays the dividend. The WHT rate on royalties will reduce from 15% to 10% generally, with a further reduced rate of 5% for royalties relating to copyright, computer software, and others.

12. New Zealand and Canada have signed a new DTA, which will come into force once both countries have given legal effect to it. The WHT rate on dividends will reduce from 15% to a maximum of 5% for an investor who holds at least 10% of the shares in the company that pays the dividend. The WHT rate on royalties will reduce from 15% to 5%, and the WHT rate on interest will reduce from 15% to 10%.

13. New Zealand and Papua New Guinea have signed a new DTA. The agreement will come into force once both countries have given legal effect to it. In New Zealand, this will occur through an Order in Council. The withholding rate on dividends will reduce to 15% and the withholding rate on interest and royalties will reduce to 10%.

14. New Zealand and Papua New Guinea have signed a new DTA. The agreement will come into force once both countries have given legal effect to it. In New Zealand, this will occur through an Order in Council. The withholding rate on dividends will reduce to 15% and the withholding rate on interest and royalties will reduce to 10%.

15. New Zealand and Japan have signed a DTA, which will come into force once both countries have given legal effect to it. The WHT rate on dividends will reduce from 15% to 0% for an investor who holds at least 10% of the voting power in the company paying the dividend (subject to certain conditions being met). The WHT rate on royalties will reduce from 15% to 5%, and the WHT rate on interest will reduce from 15% to 10%.

16. New Zealand and Papua New Guinea have signed a new DTA. The agreement will come into force once both countries have given legal effect to it. In New Zealand, this will occur through an Order in Council. The withholding rate on dividends will reduce to 15% and the withholding rate on interest and royalties will reduce to 10%.

17. New Zealand and Japan have signed a DTA, which will come into force once both countries have given legal effect to it. The WHT rate on dividends will reduce from 15% to 0% for an investor who holds at least 10% of the voting power in the company paying the dividend.

18. New Zealand and Canada have signed a new DTA, which will come into force once both countries have given legal effect to it. The withholding rate on dividends will reduce to 15% and the withholding rate on interest and royalties will reduce to 10%.
19. The rate on interest is generally 10%, although it will drop to 0% for interest paid to lending or finance businesses, provided that the 2% approved issuer levy is paid on New Zealand-sourced interest.

**Tax administration**

**Taxable period**
Tax returns are based on the fiscal year ending 31 March, although other fiscal year-ends are possible if permission is obtained.

**Tax returns**
The system is one of self-assessment, under which the corporation files an income tax return each year. For those not linked to a tax agent, returns must be filed by 7 July for March balance dates, or by the seventh day of the fourth month following a substituted balance date. The terminal tax due date is extended by two months for taxpayers linked to a tax agent.

**Payment of tax**
The final assessed tax (terminal tax) is generally payable on the seventh day of the 11th month following the end of that income year or the 13th month following the end of that income year if the taxpayer has a tax agent with an ‘extension of time’ arrangement. For a standard (31 March) balance date, this means either 7 February or 7 April of the following year.

Provisional tax payments are generally due in three instalments: (1) 28th day of seventh month before balance date, (2) 28th day of third month before balance date, (3) 28th day of month following balance date.

**Calculating provisional tax**
For the 2013/14 income year (i.e. year ending 31 March 2014), provisional taxpayers have the following four options:

- Where the 2012/13 return of income has been filed, 2013/14 provisional tax can be based on 105% of the 2012/13 residual income tax.
- Where the 2012/13 return of income has not been filed, due to an extension of time for filing, 2013/14 provisional tax can be based on 110% of the 2011/12 residual income tax, but only for the first two instalments. The final instalment must be calculated based on the first option above.
- Provisional tax can be based on a fair and reasonable estimate of 2013/14 residual income tax.
- The GST ratio option.

The GST ratio option enables smaller taxpayers to align their provisional tax payments with their cash flow and reduce their exposure to use of money interest. The option is intended to benefit those taxpayers with declining, seasonal, or fluctuating income. This option calculates provisional tax by reference to the taxpayer’s GST taxable supplies in the relevant provisional tax instalment period.

Taxpayers can also make voluntary payments. Such payments can be made to minimise exposure to use of money interest. A taxpayer choosing to estimate residual income tax is required to take reasonable care when estimating.
New Zealand

When the taxpayer’s return of income for the year is furnished, the provisional tax paid for that year is credited against the tax assessed. This results in either a refund or further tax to pay by way of terminal tax.

Where provisional tax paid is less than the amount of income tax deemed due on that instalment date, interest is imposed. If provisional tax is overpaid, interest is payable to the taxpayer. Interest is deductible for tax purposes by business taxpayers, and interest earned on overpaid provisional tax is gross income for tax purposes. The interest rate for unpaid tax is 8.40%, while the rate for overpaid tax is 1.75%.

**Tax pooling**
Taxpayers are able to pool their provisional tax payments with those of other taxpayers through an arrangement with a commercial intermediary. Tax pooling allows underpayments to be offset by overpayments within the same pool and vice versa.

**Tax penalties**
An initial late payment penalty of 1% applies if a tax payment is not made on the due date. A further 4% late payment penalty applies if the payment is not made within seven days of the due date. An incremental late payment penalty of 1% is then imposed monthly until payment is made.

Inland Revenue is required to notify a taxpayer the first time their payment is late rather than imposing an immediate late payment penalty. If payment is not made by a certain date, a late payment penalty will be imposed. Taxpayers will be entitled to one notification every two years. After receiving a first warning, Inland Revenue will not send further notifications for two years, and an initial late payment penalty will be imposed in the normal manner.

**Shortfall penalties**
Shortfall penalties, calculated as a percentage of the tax shortfall resulting from the action or position taken by the taxpayer in a tax return, may also apply.

There is a 50% discount on certain penalties where the taxpayer has a past record of ‘good behaviour’ and, in certain circumstances, a cap of NZD 50,000 on shortfall penalties for not taking reasonable care or for taking an unacceptable tax position.

**Tax audit process**
Inland Revenue maintains an active audit programme across all tax types and taxpayer profiles and regularly publishes information about their compliance focus. Often, Inland Revenue audits are preceded by a risk review where Inland Revenue requests information in order to evaluate the risk of non-compliance. Where this review detects an issue that requires further inspection, Inland Revenue will then advise that an audit will be commenced.

**Statute of limitations**
The general rule is that Inland Revenue has four years from the end of the New Zealand income tax year (31 March) in which the return is filed to re-assess the return, unless the return is fraudulent, wilfully misleading, or omits income of a particular nature or source.
Other issues

International Financial Reporting Standards (IFRS)
The relationship between statutory accounting and taxable income is quasi-dependent. The year of final adoption for IFRS was 2007, and the impact on significant areas of tax law is as follows.

Comments on tax regime
New Zealand’s determination of taxable income starts with the statutory accounts’ accounting profit and then specific tax adjustments are made based on rules for revenue recognition and deductible expenditure in the tax legislation. Changes have been made to the tax treatment of ‘financial arrangements’ (a defined tax legislative term) to allow for the alignment to the accounting recognition of fair values on such arrangements in specific cases.

Year of adoption cash impact
Mandatory adoption of NZ IFRS accounting standards for most entities (except for small and medium enterprises) applied for balance dates beginning 1 January 2007. Depending on the specific IFRS adoption adjustment, the resulting income or expenditure is taken into taxable income based on the ordinary statutory tax provisions. The key areas, which were changed for tax under IFRS adoption, are the trading stock provisions (which align tax with accounting standards subject to some provisions) and the financial arrangement rules. These rules are very broad and deal with the tax treatment of accrual income or expenditure on debt instruments, debt type instruments, derivatives, etc.

Thin capitalisation
The thin capitalisation rules work on a debt over assets percentage. It relies mostly on the tax legislative definition for debt and the amount disclosed in the financial statements under generally accepted accounting practice as assets (although there are some other measurement alternatives).

Debt versus equity classifications
The classification of debt and equity instruments for tax is dependent on the tax legislative definitions for specific purposes (such as the spreading of any deductions or income where the financial arrangement rules apply, thin capitalisation, etc). Tax applies legal form and does not strictly rely upon the classification applied under IFRS.

Lease versus sale determinations
There are specific tax provisions dealing with finance leases.

Distributable reserves
The level of distributable reserves is based on the company law requirements of solvency and not specifically on the amounts shown as reserves in the financial statements.

Transfer pricing determination
There have been no specific comments released yet by the New Zealand Revenue Authority on the adoption of IFRS impact for transfer pricing.

Financial arrangements
Specific timing rules apply to the recognition for income tax purposes of income and expenditure in relation to financial arrangements, which apply to New Zealand residents or entities carrying on business in New Zealand.
New Zealand

A number of changes to the financial arrangements rules have been enacted to ensure that taxpayers who adopt IFRS can continue to use tax rules that rely on accounting practice. For other taxpayers, the existing tax spreading methodologies continue to apply but without the option of using the financial reporting method.

The new rules include a combination of compulsory methods and elective methods that are available subject to the taxpayer meeting certain qualification criteria. Two new methods (the expected value method and the equity-free fair value method) have been introduced to assist in reducing exposure to volatility that might otherwise arise under IFRS fair value accounting.

---

**Significant developments**

On 30 November 2012, the congress in Nicaragua approved a major tax reform that significantly changes the tax system of the country. This reform, effective as of 1 January 2013 and known as Law 822, introduces the following new regulations:

- Definition of tax resident.
- Permanent establishment (PE) regulations.
- A dual tax system, separating the taxation of personal incomes, economic activities, and capital gain or losses, including modification of the withholding tax (WHT) rates.
- Transfer pricing rules, effective as of 1 January 2016.
- The tax year-end was modified to a calendar fiscal year-end.
- The concept of self-retention, with regards to the application of indirect taxes.

---

**Taxes on corporate income**

Nicaragua has a territorial income tax system under which only income generated in, or that causes effects in, Nicaragua is generally subject to income tax. The corporate income tax (CIT) is imposed on a corporation’s profits, which consist of business/trading income, and passive income. Capital gains are subject to definitive WHT. General business expenses are allowed as a deduction in computing taxable income.

**Corporate income tax (CIT) rate**

CIT is levied only on domestic-sourced income at a flat rate of the higher of:

- 30% of net taxable income, which is scheduled to reduce by 1% each year from 2016 through 2021 (i.e. gross taxable income less allowed deductions) or
- a definitive minimum tax of 1% on gross income obtained during the fiscal year.

If the company does not have net income, 30% of net income will not be greater than 1% of gross income.

The law establishes the following exceptions to the 1% definitive minimum tax:

- First three fiscal periods of recently incorporated entities. For tax purposes, the beginning of business operations is when a company generates taxable income.
- Taxpayers whose sales prices are controlled by the government.
- Taxpayers that ceased operations on account of force majeure.
- Investments subject to a period of development. The Treasury Ministry must approve such period.
Nicaragua

**Local income taxes**  
*See Municipal sales and services tax in the Other taxes section.*

---

**Corporate residence**

Legal entities considered as a tax resident must comply with one of the following criteria:

- Registered according to the Laws of Nicaragua.
- Have their fiscal domicile in the territory of Nicaragua.
- Have their place of management located in the territory of Nicaragua.

The legal forms permitted in Nicaragua to constitute a corporation are stock corporations or limited liability companies, either as subsidiaries or branches.

**Permanent establishment (PE)**

Law 822 has incorporated a definition of PE into the Nicaraguan income tax regime. This term means a place through which a non-resident taxpayer wholly or partially carries on business, including, *inter alia*, the following: a place of management; a branch; an office or agent; a factory; a workshop; and a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources.

Such definition also includes a building site or construction or installation project or connected supervision activities, but only if its duration exceeds six months; and the performance of consultancy services, provided that they exceed six month within an annual period.

A PE may also be created where a person other than an agent of independent status acts on behalf of a non-resident taxpayer if:

- this person has in Nicaragua authority to habitually conclude contracts or undertake acts in the name of the non-resident taxpayer, or
- even though this person does not have such authority, this person habitually maintains in Nicaragua a warehouse of goods or merchandise from which this person regularly delivers goods or merchandise in the name of the non-resident taxpayer.

---

**Other taxes**

**Value-added tax (VAT)**

The following transactions are subject to VAT when performed within Nicaragua:

- Supplies of goods.
- Supplies of services.
- Importations of goods.
- Exports of goods and services.

VAT is imposed at a 15% rate on the sale of goods, rendering of services, grant of use of assets, and import of goods. Export of goods and services are subject to a 0% rate.
VAT exemptions are available for certain items, including medicine, real estate transfer, sale of used goods, basic food products, credit instruments, tuition, and textbooks and educational supplies.

Taxpayers may recover VAT paid for the purchase of goods and services used to generate other goods and services subject to VAT. This is known as VAT liquidation, which is determined by subtracting VAT credits paid on transactions needed to generate taxable income for VAT purposes from VAT collected on the sales of goods or the rendering of services. Note that VAT paid on transactions to generate non-taxable income for VAT purposes are not allowed as VAT credits.

The exemption with right to deduct input VAT applies when:

- the input VAT is necessary in the business activity process, for selling of goods or provision of services, and
- the tax is properly detailed, in the invoice of legal document.

VAT returns must be filed on a monthly basis, with payment due in full on the same day. Taxpayers registered as high taxpayers (with annual income greater than 60 million Nicaraguan córdobas [NIO]) must present an advanced bi-weekly VAT return in the first five business days after the 15th day of each month and a definite return in the first 15 days of the following month.

**Selective consumption tax**
A selective consumption tax is applied to goods that are considered to be non-essential. The tax base is the cost, insurance, and freight (CIF) price for imported items, and the tax is levied and paid only at that stage (based on the list of products published as an appendix to Law 822).

**Customs duties**
Customs duties relate to the importation of any good within the Nicaragua territory for commercial purposes. The following taxes apply to imports, depending on the product:

- Import Custom Duties (DAI), which are the local tariff liens in the importation of goods agreed to in the Central American Import Tariff.
- Excise Tax (ISC), which is an indirect tax levied on selective consumption of goods (e.g. tobacco cigarettes).
- VAT.

**Temporary Admission for Active Processing (TAP) regime**
Exporters can apply for the TAP regime, which is designed to allow the importation of goods without payment of duties, import taxes, or other taxes, on condition of being transformed (i.e. subject to any subsequent operation) to be re-exported or exonerated.

**Transfer taxes**
Nicaragua’s tax system does not impose transfer taxes.

**Stamp taxes**
Stamp duty is levied on certain types of documents issued in Nicaragua.

**Payroll taxes**
The employer is responsible to withhold and pay employee income tax on a monthly basis through withholding income tax return Form IR-122, according to progressive tax rates.
Nicaragua

Social security contributions
In principle, social charges apply to nationals and legal residents from the first day of employment on a monthly basis. Social security contributions are calculated upon the gross salary of the employee, as follows:

<table>
<thead>
<tr>
<th></th>
<th>Social Security rates (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Pension</td>
</tr>
<tr>
<td>Employer</td>
<td>7</td>
</tr>
<tr>
<td>Employee</td>
<td>4</td>
</tr>
</tbody>
</table>

The employer must also pay 2% of its payroll, on a monthly basis, for Training Tax (INATEC).

Municipal sales and services tax
A monthly 1% tax is levied on all sales of goods and rendering of services in each of the municipalities of the country.

Municipal registration tax
An annual 2% tax is levied by each municipality on the average of income received in the months of October, November, and December of the previous year. In the case of the incorporation of a new establishment or enterprise, the municipal registration tax is 1% of the capital invested.

Real estate municipal tax
The real estate municipal tax is an annual tax that is levied at a rate of 1% on 80% of cadastral value, as recorded by the government. If the cadastral value is not available, the cost or fiscal appraisal value may be used.

Branch income
Branch income received is subject to the general CIT. The repatriation of income from the branch to the head office in the form of dividends, profits, capital gains, or any other form that suggest the income repatriated is an economic benefit is considered taxable.

Income determination
Taxable income is determined by the sum of all income derived from Nicaraguan sources, less allowable deductions, which generally include all expenses necessary to generate taxable income. Taxable income is computed according to International Financial Reporting Standards (IFRS) and modified, as required, by Nicaraguan income tax law.

Inventory valuation
Last in first out (LIFO), first in first out (FIFO), and the average cost methods are accepted for inventory valuation purposes. Tax authorities must authorise the change of a valuation method.
**Capital gains and losses**

Capital income and capital gains and losses are subject to definitive WHT and are not treated as ordinary taxable corporate income. The general rule is that capital income and capital gains are subject to 10% WHT; however, the following exceptions apply:

- Capital gains derived from the sale or transfer of Nicaraguan shares that took place out of the territory of Nicaragua are subject to 5% WHT over the transaction value.
- Capital income derived from the lease of fixed assets and non-fixed assets are subject to 7% and 5% WHT, respectively.
- Capital gains derived from the transfer of assets subject to annotation in the public registry (e.g. real estate, vehicles) will be subject to a WHT based on the amount of the transaction, as follows:

<table>
<thead>
<tr>
<th>Good value (USD*)</th>
<th>WHT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>From 0.01 to 50,000.00</td>
<td>1</td>
</tr>
<tr>
<td>50,000.01 to 100,000.00</td>
<td>2</td>
</tr>
<tr>
<td>100,000.01 to 200,000.00</td>
<td>3</td>
</tr>
<tr>
<td>200,000.01 or more</td>
<td>4</td>
</tr>
</tbody>
</table>

* United States dollars

**Dividend income**

Stock dividends paid by Nicaraguan entities to resident or non-resident shareholders are subject to a 10% definitive WHT.

**Interest income**

Interest received from a Nicaraguan source by residents or non-residents of Nicaragua, as well as the interest gained by residents from deposits placed in the national financial system, is subject to a 10% WHT.

Interest earned on government bonds and securities is considered taxable income subject to a 10% WHT.

The WHT will not apply if the beneficiary of the interest payment is included in the list of exempt International Credit Institutions and Agencies or Foreign Governments Development Institutions, provided in the Ministerial Agreement 04-2011, which requires that the beneficiary should request the Finance and Public Credit Ministry for the corresponding exemption recognition.

**Foreign income**

Business enterprises are subject to CIT only on Nicaraguan-source income.

**Deductions**

**Depreciation**

Depreciation must be computed using the straight-line method. Depending on the type of construction and the estimated life of fixed assets, annual rates for depreciation are as follows:
Nicaragua

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>3/5/10</td>
</tr>
<tr>
<td>Vehicles</td>
<td>12/20/33</td>
</tr>
<tr>
<td>Plant and equipment</td>
<td>10/14/20</td>
</tr>
<tr>
<td>Other assets</td>
<td>10/20/50</td>
</tr>
</tbody>
</table>

**Alternative method of depreciation**
Taxpayers under the TAP regime *(see Customs duties in the Other taxes section)* may, at their convenience, request a different depreciation rate (i.e. accelerated depreciation) from tax authorities. Used fixed assets acquired abroad may also be subject to a different depreciation rate.

**Goodwill**
Goodwill, meaning the excess paid over book value in a transaction, can be deductible for CIT purposes if the capital gain is consider in the seller's CIT return. However, the tax authorities must authorise the tax periods in which the goodwill will be amortised.

**Start-up expenses**
Start-up expenses are amortised over a three-year period of time after the beginning of business operations.

**Interest expenses**
As a general rule, deduction of interest is allowed when derived from loans of financial institutions; however, the interest paid derived from loans of non-financial institutions will be deductible up to the amount resulting from applying the average lending rate of the national bank at the date of obtaining the loan, if fixed, or at the date of each payment, if variable.

In order for interest paid to a non-resident to be deductible, the corresponding 10% WHT must be withheld and paid.

**Bad debt**
Corporations are allowed a deduction for receivables as an allowance for doubtful accounts as long as there is supporting documentation of the credit, identification documents of the debtor and creditor, and administrative and judicial collection proof.

**Charitable contributions**
A deduction is allowed, up to 10% of the corporation’s income, for charitable contributions made to the government and its institutions, the Red Cross, and other organisations.

**Compensation**
A deduction is allowed for payments made to employees as bonuses or in addition to their salaries or wages.

**Life insurance**
A deduction is allowed for employee insurance payments made.

**Fines and penalties**
Penalties or charges made by tax, customs, social security, or municipal authorities are not deductible for CIT purposes.

**Taxes**
In principle, income tax expense is not deductible for CIT purposes. Municipal or local taxes (i.e. real estate tax, monthly sales and services tax, annual registration tax) are deductible from CIT.

**Net operating losses**
Losses may be carried forward and deducted from future profits, for up to three years. The carryback of losses is not allowed.

**Payments to foreign affiliates**
Payments made from affiliates to foreign related parties are deductible for CIT purposes, provided the following requirements are met:

- The expenses (i.e. royalties, interest, and services) are needed to generate taxable income.
- The expenses are duly supported (e.g. agreements, invoices, payment receipts).
- The expenses are incurred within the fiscal period.
- The WHT is applied and paid to the tax authorities.

**Group taxation**
Group taxation is permitted only when previously approved by the tax authorities. The economic group must submit a business case to the tax administration justifying the economic reason of their request.

**Transfer pricing**
The Nicaragua tax system recognises transfer pricing as a method of trading. Law 822 regulates transfer pricing rules based on the Organisation for Economic Co-operation and Development (OECD) regulations (including contemporaneous documentation requirements) and will become effective on 1 January 2016.

**Thin capitalisation**
The Nicaragua tax system does not impose any form of thin capitalisation rules.

**Tax credits and incentives**

**Foreign tax credit**
The Nicaragua tax system does not recognise any form of foreign tax credit.

**Tourism incentives**
Under present law, and on a case-by-case basis, new companies with tourist activities may request and the government may grant, during the facilities’ construction phase, total exemption of customs duties and partial or total CIT exemption for a maximum period of ten years.

**Renewable energy incentives**
The renewable energy sector is covered by a special law with tax benefits or exemptions in CIT, VAT, customs duties, and municipal tax.

**Free trade zones (FTZs)**
FTZ industries have a special law with tax benefits or exemptions in CIT, VAT, customs duties, and municipal tax.
An industrial export zone decree provides a 15-year exemption from CIT to those taxpayers located in certain FTZs. There is a 100% exemption for the first ten years and 60% exemption for the following five years. Additional requirements and provisions apply.

In accordance with the Agreement on Subsidies and Countervailing Measures issued by the World Trade Organization (WTO), all tax exemptions granted to FTZs shall be eliminated by the end of 2015. However, Nicaragua falls under the exception of section 27 of this agreement and qualifies as a country listed in Annex VII (for being a developing economy) as a country with per capita gross national product (GNP) of less than USD 1,000, based on World Bank estimates. Due to this exception, it is foreseen that the tax holiday will still apply to FTZ industries in Nicaragua past 2015.

**Withholding taxes**

**Payments to residents**
Dividend payments to resident shareholders (corporations or individuals) are subject to 10% WHT.

Payments of royalties to resident individuals or corporations are subject to 10% WHT.

Interest paid to a resident individual or legal entity is subject to 10% WHT.

Professional services provided by an individual are subject to 10% WHT.

Payments on the local acquisition of goods and services are subject to 2% WHT.

**Payments to non-residents**
Payments of royalties, interest, dividends, and service fees to non-resident corporations are subject to WHT, as follows:

<table>
<thead>
<tr>
<th>Payment</th>
<th>WHT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Royalties</td>
<td>10</td>
</tr>
<tr>
<td>Dividends</td>
<td>10</td>
</tr>
<tr>
<td>Services provided in general</td>
<td>15</td>
</tr>
<tr>
<td>Interest:</td>
<td></td>
</tr>
<tr>
<td>Non-financial companies</td>
<td>10</td>
</tr>
<tr>
<td>Financial companies</td>
<td>10</td>
</tr>
<tr>
<td>TV and Radio programming or subscription</td>
<td>10</td>
</tr>
</tbody>
</table>

Payments of any kind of income to non-resident individuals are subject to WHT of 20%.

In principle, Nicaragua has not signed any agreement or treaty with any country to avoid double taxation.

**Transactions with tax havens**
Expenses that are paid by Nicaraguan residents to an individual or entity that is a resident of a tax haven are subject to a 17% WHT. For this purpose, a tax haven may be:

- a foreign territory where the income tax is ‘substantially’ lower than the Nicaraguan income tax
Nicaragua

- a foreign country or territory that has been listed, for the corresponding taxable year, as an un-cooperative jurisdiction by the Global Forum on Transparency and Exchange on Information for Tax Purposes, or
- a foreign territory that is listed by the Nicaraguan Public Credit and Finance Ministry.

---

**Tax administration**

**Taxable period**
The standard tax year in Nicaragua is the calendar year (from 1 January to 31 December); however, companies can obtain authorisation from the tax authorities in order to change or have a different year-end: 31 March, 30 June, or 30 September.

**Tax returns**
Without exception, all corporations are required to file CIT returns for a fiscal year within the following three months after the fiscal year-end.

**Payment of tax**
Corporations shall pay fiscal-year income tax in monthly advance payments. The monthly payable amount is calculated as 1% of gross income.

Final CIT payment is due with the final CIT return (i.e. within the following three months after the fiscal year-end).

**Tax audit process**
The tax authority is entitled to conduct a tax audit of the taxpayer when considered necessary. The taxpayer has the obligation to submit before the tax auditor the corporate information and documents related to the generation of income.

**Statute of limitations**
The statute of limitation in Nicaragua is up to the last four fiscal ended periods.

**Topics of focus for tax authorities**
In Nicaragua, tax audits are determined randomly; however, high taxpayers or taxpayers who request reimbursement of tax credit are more likely to be audited. For corporate tax compliance, the tax authority normally seeks information in regards to taxpayer operations through the advance income tax returns.
Significant developments

The new transfer pricing regulations

In an attempt to combat perceived income shifting by foreign investors out of Nigeria and aggressive tax avoidance by local groups, the Federal Inland Revenue Service (FIRS) has published new transfer pricing rules. The effective date for the application of the rules is accounting periods commencing after 2 August 2012. For example, a company with an accounting year end date of 31 December 2012 will be required to have its transfer pricing documentation in place for the accounting year commencing 1 January 2013.

The rules are designed to provide guidelines on the application of the arm’s-length principle in the income tax legislation and to ensure that Nigeria is able to tax businesses on an appropriate basis corresponding to their economic activities carried out in the country, especially with respect to related party transactions.

The regulations are to be applied in a manner consistent with the United Nations (UN) and Organisation for Economic Co-operation and Development (OECD) model conventions, except where there are inconsistencies between the model conventions and the local legislation, in which case the provisions of the relevant local tax laws shall prevail.

The rules cover all transactions between ‘connected taxable persons’, which is broadly defined to include individuals, permanent establishments (PEs) created by head offices, subsidiaries, associates, partnerships, joint ventures, and trusts to the extent that they participate directly or indirectly in the management, control, or capital of another, or both of which have common control, management, or shareholders. Specifically, the rules will apply to the sale and purchase of goods; lease or sale of tangible assets; licensing, transfer, or use of intangible assets; provision of services; lending or borrowing of money; manufacturing arrangements; and any transaction that may affect profit and loss or any other incidental matter.

The rules are applicable to both domestic and cross-border related party transactions.

The redrafted petroleum industry bill

The long road to a new petroleum legislation in Nigeria continues. The bill, which has been undergoing legislative procedures for several years, was redrafted in the third quarter of 2012 by the executive arm of government. The bill was then passed on to the legislative arm as an Executive Bill for legislative consideration. The redrafting was necessitated by the confusion created by many versions of the bill in circulation and to address key concerns with some aspects of the original bill. These issues include increase in government take by way of tax, royalty, and levies; host community
relations; openness and transparency in the award of mineral blocks; and enhancement of local content in the Nigerian oil and gas industry.

It is difficult to tell how much longer it will take before the bill is enacted into law.

**Nigeria’s avoidance of double taxation treaty (DTT) model under review**

The FIRS has commenced the process to redraft the Nigerian model treaty on double taxation avoidance. Once concluded, the new model will form the basis of future treaty negotiations, which the FIRS plans to pursue aggressively in order to increase the country’s treaty network.

Some of the proposed changes include the replacement of ‘place of effective management’ with ‘place of management’ for PE determination and the inclusion of a new Article on ‘technical fees’.

**Information circular on the tax implications of adoption of International Financial Reporting Standards (IFRS)**

Listed and significant public entities are required to adopt IFRS with effect from their 2012 financial year. Other public interest entities and small and medium scale entities are to adopt IFRS in 2013 and 2014, respectively.

In order to address the possible tax issues that may arise from the new reporting standards, the FIRS released an Information Circular in the first quarter of 2013 on the tax implications of the adoption of IFRS to guide taxpayers and ensure consistency of treatment for similar items. Key highlights include treatment of transition adjustments and the possibility of granting an extension of time for filing returns for first time adopters.

**Taxes on corporate income**

The corporate income tax (CIT) rate is 30%, assessed on a preceding year basis (i.e. tax is charged on profits for the accounting year ending in the year preceding assessment).

Resident companies are liable for CIT on their worldwide income while non-residents are subject to CIT on their Nigeria-source income. Investment income paid by a Nigerian resident to a non-resident is sourced in Nigeria and subject to withholding tax (WHT) at source, which serves as the final tax.

In respect of business profits, a non-resident company that has a fixed base or a PE in Nigeria is taxable on the profits attributable to that fixed base. As such, it is required to register for CIT and file its tax returns. Any WHT deducted at source from its Nigeria-source income is available as offset against the CIT liability.

**Small company rates**

For small companies in the manufacturing industry and wholly export-oriented companies with turnover not exceeding 1 million Nigerian naira (NGN) (about 6,300 United States dollars [USD]), the CIT rate is reduced to 20% in the first five calendar years of operation.

**Petroleum profit tax (PPT)**

PPT is a tax on the income of companies engaged in upstream petroleum operations in lieu of CIT.
Nigeria

The PPT rates vary as follows:

- 50% for petroleum operations under production sharing contracts (PSC) with the Nigerian National Petroleum Corporation (NNPC).
- 65.75% for non-PSC operations, including joint ventures (JVs), in the first five years during which the company has not fully amortised all pre-production capitalised expenditure.
- 85% for non-PSC operations after the first five years.

**Education tax**
An education tax is levied on every Nigerian resident company at the rate of 2% of the assessable profit for each year of assessment. The tax is payable within two months of an assessment notice from the FIRS. In practice, many companies pay the tax on a self-assessment basis along with their CIT.

For companies subject to PPT, education tax is to be treated as an allowable deduction. For other companies, income/profit taxes are not deductible in arriving at taxable income. Non-resident companies and unincorporated entities are exempt from education tax.

**Minimum tax**
Minimum tax is payable by companies having no taxable profits for the year or where the tax on profits is below the minimum tax. However, companies in the first four calendar years of business, companies engaged in the agriculture business, or companies that have foreign equity capital of at least 25% are exempt from minimum tax.

Minimum tax payable is calculated as follows:

- Where the turnover of the company is NGN 500,000 or below, minimum tax is the highest of:
  - 0.5% of gross profits
  - 0.5% of net assets
  - 0.25% of paid-up capital, or
  - 0.25% of turnover of the company for the year.
- Where the turnover is higher than NGN 500,000, minimum tax is the highest of the calculations listed above plus 0.125% of turnover in excess of NGN 500,000.

**Alternative tax on distribution**
There is a tax on distribution where a company pays a dividend in excess of its taxable profit. Such a company will be charged tax on the dividend paid as if the dividend is the taxable profit of the company for that year of assessment.

**Alternative tax on deemed income**
Non-resident companies are subject to tax on the income or profit derived from Nigeria. The FIRS often assesses non-resident companies on a deemed income basis. This is done by applying 20% of turnover as deemed profit and then charging CIT at 30%, resulting in an effective tax rate of 6% on turnover.

**Local income taxes**
CIT is payable only to the federal government. State governments collect income taxes of individuals and unincorporated entities, while local governments are only allowed to collect levies and rates but not income tax.
Corporate residence

A company is considered resident in Nigeria if such a company is registered or incorporated under the Companies and Allied Matters Act. This means that a company formed outside Nigeria under the laws in force in the foreign territory will be considered as a non-resident company for tax purposes.

Permanent establishment (PE)

Fixed base is not defined but is generally considered to be a location with a degree of permanence. The following would generally not be considered to be a fixed base:

- The use of facilities solely for the purpose of storage or display of goods or merchandise.
- The use of facilities solely for the collection of information.

Other activities that could trigger a tax presence in Nigeria include a dependent agency arrangement, execution of a turnkey project, or artificial arrangements between related parties.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 5%, but there is a plan to increase the rate to 10%. A bill is currently being drafted that includes the proposed increase in VAT rate. Once finalised, the draft bill will be presented to Parliament for enactment into law. Zero-rated items include non-oil exports, goods and services purchased by diplomats, and goods and services purchased for use in humanitarian donor funded projects. Exempt items include plants and machinery for use in export processing zones or free trade zones, basic food items, medical products and services, pharmaceutical products, books and educational materials, and exported services.

Government agencies and oil and gas companies are required to deduct at source VAT charged by their suppliers and remit to the tax authority. All other organisations are required to collect VAT charged on their invoices from their customers for filing and payment to the tax authority.

Customs duties

Customs duties in Nigeria are levied only on imports. Rates vary for different items, typically from 5% to 35%, and are assessed with reference to the prevailing Harmonized Commodity and Coding System (HS code).

Excise duties

Excise duty is applicable on beer and stout, wines, spirits, cigarettes, and tobacco manufactured and sold in Nigeria at rates ranging from 5% to 20%.

Property taxes

Property taxes in Nigeria are usually levied annually by the state government with varying rates depending on the state and the location of the property within the state. The two major property taxes are governor’s consent fee and land registration fee. In Lagos (which is the economic hub of Nigeria), governor’s consent fee, land registration fees, and other levies payable to the state give rise to a total levy of 15% of the transfer value of the land. Also, Right of Occupancy fee and tenement rates are chargeable by state and local government authorities.
Nigeria

**Stamp duties**  
Under the Stamp Duty Act, stamp duty is payable on any agreement executed in Nigeria, or relating, whatsoever, to any property situated in or to any matter or thing done in Nigeria. Instruments that are required to be stamped under the Stamp Duties Act must be stamped within 40 days of first execution.

Stamp duty is chargeable either at fixed rates or ad valorem (i.e. in proportion to the value of the consideration), depending on the class of instrument. Stamp duty is imposed at the rate of 0.75% on the authorised share capital at incorporation of a company or on registration of new shares.

**Capital gains tax (CGT)**  
Gains accruing to a chargeable person (individual or company) on the disposal of chargeable assets shall be subject to tax under the Capital Gains Tax Act at the rate of 10%. There is no distinction between long-term and short-term gains and no inflation adjustment to cost for CGT purposes.

All forms of assets, including options, debts, goodwill, and foreign currency, other than those specifically exempt, are liable for CGT. The gains on the disposal of shares are exempt from CGT.

CGT is applicable on the chargeable gains received or brought into Nigeria in respect of assets situated outside Nigeria.

Capital losses are not allowed as an offset against chargeable gains accruing to a person from the disposal of any assets.

**Information technology levy**  
A company with an annual turnover of NGN 100 million or more is required to pay 1% of its profit before tax as information technology tax. This levy is tax deductible when paid (typically in the year of assessment following that in which the payment was made).

This tax is applicable to:

- Banking and other financial activities, including capital and money market operators, mortgage institutions, and micro-finance banks.
- Insurance activities, including brokerage.
- Pension fund administration, pension management, and related services.
- GSM services providers and telecommunication companies.
- Cyber and internet services providers.

**Levy on contracts awarded in the upstream oil and gas sector**  
The Nigerian Content Development Act was introduced to increase the level of Nigerian participation in the oil and gas industry. The Act introduces a levy of 1% on every contract awarded in the upstream oil and gas sector of the economy. Any violation of the Act is liable for a fine of 5% of the contract value and may result in outright cancellation of the contract.

**Payroll contribution**  
Under the Employee Compensation Act, all employers are required to contribute 1% of their payroll cost in the first two years of commencement of the Act. Subsequently, assessments will be issued by the Nigeria Social Insurance Trust Fund, the body empowered to administer and implement the Act.
**Branch income**

Except in rare circumstances, it is illegal for a non-resident company to operate through a branch in Nigeria. The Nigeria-source income of a non-resident company is taxable at the CIT rate of 30% or via the alternative tax on deemed income (see the Taxes on corporate income section for more information).

**Income determination**

The following income is subject to CIT in Nigeria:

- Profits accruing in, derived from, brought into, or received in Nigeria in respect of any trade or business.
- Dividends, interest, royalties, discounts, charges, or annuities.
- Rent or any premium arising from the right granted to any person for the use or occupation of any property, where applicable.
- Any source of annual profits or gain not falling within the preceding categories.
- Fees, dues, and allowances (wherever paid) for services rendered.
- Any amount of profits or gains arising from the acquisition or disposal of short-term money instruments like federal government securities, treasury bills, treasury or savings certificates, debenture certificates, and treasury bonds.

**Inventory valuation**

The first in first out (FIFO) valuation method is commonly used. Average and standard cost methods are also allowed, but last in first out (LIFO) is not permitted. Other than the accounting requirement in the local generally accepted accounting principles (GAAP), there are no special statutory provisions for inventory valuation.

**Capital gains**

Capital gains are not subject to CIT, but may be subject to CGT. See Capital gains tax in the Other taxes section for more information.

**Dividend income**

Dividends received by a Nigerian resident company from another Nigerian resident company are taxable at source (see the Withholding taxes section for more information) and not subject to further tax.

Dividends received from non-resident companies are taxable except if repatriated into Nigeria through government approved channels (i.e. any financial institution authorised by the Central Bank of Nigeria to deal in foreign currency transactions).

**Stock dividends**

Stock dividends (bonus shares) are not taxable at source or included in the taxable income of the recipient company.

**Interest income**

Interest payable to a non-resident investor is liable to WHT at 10%, which is the final tax. Recipients who are resident in a country with a DTT with Nigeria enjoy a reduced rate of 7.5%. Interest received by a Nigerian company is liable to tax at the CIT rate of 30% with tax withheld at 10% available as an offset against the final tax liability. Interest on government bonds is tax exempt.
Nigeria

**Foreign income**
A Nigerian resident company is taxable on its worldwide income. On the other hand, a non-resident company is subject to tax only on income derived from Nigeria.

Dividends, interest, rents, and royalties earned abroad and brought into Nigeria through government-approved channels are exempt from Nigerian tax; otherwise, the income is taxable at the CIT rate of 30% and education tax at 2%. Government-approved channels mean the Central Bank of Nigeria and any bank or financial institution authorised to carry out foreign exchange transactions.

Taxable foreign income earned by a Nigerian tax resident entity cannot be legally deferred.

**Deductions**
Expenses are deductible for tax purposes if they are wholly, reasonably, exclusively, and necessarily incurred for the business or trade.

**Depreciation**
Capital allowances are calculated on a straight-line basis. Capital allowances claimable in any year are restricted to two-thirds of assessable profits for all companies, except companies in the manufacturing and agricultural sectors, which are excluded from this restriction.

The following are the capital allowance rates on fixed assets (qualifying expenditures):

<table>
<thead>
<tr>
<th>Qualifying expenditure</th>
<th>Initial allowance (%)</th>
<th>Annual allowance (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Building (industrial and non-industrial)</td>
<td>15</td>
<td>10</td>
</tr>
<tr>
<td>Furniture and fittings</td>
<td>25</td>
<td>20</td>
</tr>
<tr>
<td>Plant expenditure (1)</td>
<td>50/95</td>
<td>0/25</td>
</tr>
<tr>
<td>Mining expenditure</td>
<td>95</td>
<td>0</td>
</tr>
<tr>
<td>Plantation equipment</td>
<td>95</td>
<td>0</td>
</tr>
<tr>
<td>Motor vehicle (2)</td>
<td>50/95</td>
<td>0/25</td>
</tr>
<tr>
<td>Ranching and plantation expenditure</td>
<td>30</td>
<td>50</td>
</tr>
<tr>
<td>Housing estate expenditure</td>
<td>50</td>
<td>25</td>
</tr>
<tr>
<td>Research and development</td>
<td>95</td>
<td>0</td>
</tr>
</tbody>
</table>

Notes

1. 95% initial allowance for plant used in agricultural production; others 50%.
2. 95% initial allowance is granted for motor vehicles used for public transportation if the company has a fleet of at least three buses; all other motor vehicles 50%.
