Welcome to the latest edition of *Worldwide Tax Summaries* (WWTS), one of the most comprehensive global tax guides available. This year’s edition provides detailed information on corporate tax rates and rules in 153 countries worldwide.

The country summaries, written by our local PwC tax specialists, include recent changes in tax legislation as well as key information about income taxes, residency, income determination, deductions, group taxation, credits and incentives, withholding taxes, indirect taxes, and tax administration. All information in this book, unless otherwise stated, is up to date as of 1 June 2013.

Our online version of the summaries is available at www.pwc.com/taxsummaries. The WWTS website is updated regularly and provides quick access to the latest tax information and changes. Some of the enhanced features available online include Quick Charts to compare rates across jurisdictions, and reference materials on OECD, EU, and WTO member countries, among other valuable information.

If you have any questions, or need more detailed advice on any aspect of tax, please get in touch with us. The PwC tax network has member firms throughout the world, and our specialist networks can provide both domestic and cross-border perspectives on today’s critical tax challenges. A list of some of our key network and industry specialists is located at the back of this book.

I hope you will find these summaries useful, and please don’t hesitate to contact any PwC specialist with comments or feedback on WWTS.

**Significant developments**

As of 24 January 2013, machinery and equipment imported exclusively to meet investment contracts worth 50 million Albanian lek (ALL) or more will be considered value-added tax (VAT)-exempt supplies. In addition, any machinery and equipment imported exclusively to meet investment contracts related to the active processing or agribusiness sector will be considered VAT-exempt supplies regardless of the value of investment.

The supply of iron and cement that are used exclusively as raw materials for the construction of hydropower plants are also VAT exempt as of 24 January 2013.

As of 1 October 2012, a new excise tax law has come into effect. The law provides significant changes to the prior law. Among other changes, the new law introduces more specific descriptions of products, as well as different excise tax rates for alcoholic drinks and oil by-products. Alcohol strength is another measure introduced in the new law for determining the excise tax on alcoholic drinks.

A double tax treaty (DTT) between the Republic of Albania and the State of Qatar came into force on 3 May 2012.

**Taxes on corporate income**

Albanian law applies the principle of worldwide taxation. Resident entities are taxed on all sources of income in and outside the territory of Albania, while non-resident entities are taxed on income generated only in the territory of Albania.

The corporate income tax (CIT) rate in Albania is 10%. CIT is assessed on the taxable profits calculated as taxable income less deductible expenses.

**Local income taxes**

Local taxes on income depend on a number of factors, such as type of activity, municipality where the business is located, and the annual turnover. Consequently, these taxes may vary from ALL 20,000 to ALL 143,000.

**Corporate residence**

Based on Albanian legislation, a legal entity is deemed to be resident in Albania if it has its head office or its place of effective management in Albania.
Albania

Permanent establishment (PE)
PE in Albania means a fixed place of business where an entity carries out, wholly or partly, its business activities, including, but not limited to, an administration office, a branch, a factory, a workshop, a mine, and a construction or installation site.

The determination of a PE, where applicable, is based on the provisions of the DTTs that Albania has entered into with a number of countries. When dealing with DTT provisions, the Albanian tax authorities refer to the Organisation for Economic Co-operation and Development (OECD) commentaries.

Other taxes

Value-added tax (VAT)
The standard VAT rate is 20%, and the standard VAT period is the calendar month.

Taxable transactions include goods and services supplied domestically as well as goods imported into Albania by a taxable person. The following transactions are also taxable:

- Transactions performed for no consideration or for a consideration less than market value.
- Barter transactions.
- The private use of taxable goods by a taxable person (self-supply).

Determination of VAT payers
Taxable persons are all physical persons and legal entities registered, or required to be registered, for VAT purposes.

The VAT registration threshold in Albania is annual turnover over ALL 5 million (37,000 euros [EUR]). Any person providing taxable supplies and whose annual turnover does not exceed ALL 5 million (EUR 37,000) is not required to register, although voluntary registration is possible.

Taxpayers who, in the course of their business activities, provide services in any of the following listed professions are required to register for VAT purposes in Albania, regardless of their annual turnover:

- Lawyer
- Engineer
- Attorney (notary)
- Laboratory technician
- Specialist doctor
- Designer
- Dentist
- Economist
- Specialist dentist
- Agronomist
- Pharmacist
- Certified Public Accountant
- Nurse
- Approved Accountant
- Midwife
- Property evaluator
- Veterinarian
- Hotelier business
- Architect

VAT obligations for non-resident entities
Foreign entities not registered with the Albanian tax authorities, carrying out business activities in Albania, are subject to 20% VAT in Albania when services rendered are related to immovable property located in Albania. This is applicable regardless of the value of the services supplied.
In this case, the foreign entity is obligated to register and pay VAT in Albania by nominating a VAT representative.

In cases where the foreign entity is in non-compliance with the above requirement, the tax liabilities and respective penalties derived from such non-compliance should be paid by the local beneficiary of the services.

**Reduced-rate goods and services**
The supply of drugs and health services provided by private or public institutions are subject to a reduced VAT rate of 10%.

**Zero-rated goods and services**
The following goods and services are subject to 0% VAT in Albania:

- Export of goods.
- The supply of goods related to the international transport of goods or passengers.
- The supply of goods and services in relation to trading and industrial activities at sea.
- Services related to transport of goods and passengers.
- Services related to international telecommunications.

**VAT-exempt goods and services**
The following are considered VAT exempt:

- The lease of land.
- The lease of buildings (only if the rental period is limited to two months), except in cases where there is a contract between parties in which the supply is deemed as taxable.
- Provision of services performed by Albanian subcontractors relevant to the processing of semi-finished goods intended for export.
- Financial services.
- Postal services (only if the post does not import or carry out other postal services and its annual turnover doesn't exceed ALL 5 million).
- Gambling, casino, and racetrack services.
- Written media and books.
- Advertising in electronic and written media.
- Interest payments on leasing transactions.
- Export of services.
- The sale of land and buildings, although the construction process itself is subject to VAT.
- The supplies made against a reduced payment by religious or philosophical organisations for the purpose of spiritual welfare.
- The supplies of packages and materials used for the manufacture and confection of drugs.
- Educational services.
- Hydrocarbon operations.
- Supply of free goods distributed for emergencies.

**VAT calculation**
The amount of VAT to be paid is calculated as the difference between the VAT applied to purchases (input VAT) and the VAT applied to sales (output VAT). If the input is higher than the output, then the difference is a VAT credit which can be carried forward to subsequent months. Otherwise, if the output VAT is higher than the input VAT, the difference represents VAT payable to the state.
Albania

Taxpayers who carry out taxable VAT activities, as well as VAT-exempt activities, can credit only that portion of their input VAT that corresponds to the VATable activities. To determine the amount of input VAT that can be claimed from the state, the taxpayer should estimate a VAT credit coefficient, being the rate of the taxable VAT activities over total activities.

Items of machinery and equipment imported by Albanian registered entities for their own use in the business activity (i.e. not for resale) are subject to a VAT deferral scheme under which the payment of VAT is postponed up to 12 months with a possibility of extension for an additional 12-month period.

VAT reimbursement
Taxable entities have the right to claim VAT reimbursement if the period in which VAT credits are carried forward exceeds three consecutive months and the total amount of accumulated VAT credit is equal to or above ALL 400,000 (EUR 2,965).

Following the request for VAT reimbursement, taxable entities have the right to obtain the reimbursement of VAT credit within 30 days after the request is submitted.

VAT returns
The submission of VAT returns and sales and purchase books must be done electronically by all taxpayers.

Electronic submission deadlines fall on the dates below:

- For VAT books, the deadline is the fifth day of the following month.
- For VAT returns and for the payment of the related VAT liability, the deadline is the 14th day of the following month.

VAT representatives are not subject to electronic submission of VAT books and returns. Instead, they are required to submit (by sending to the tax authorities through courier) only the VAT books and make the related VAT liability payment by the 14th day of the following month.

Customs duties
Albania uses the Harmonized Code System for tariff classification.

The custom duty rates range from 0% to 15%, depending on the type of goods.

Import of machineries and equipment for use in the taxpayer’s business activity are generally subject to custom duties at the zero rate.

Custom duties on imports of vehicles are 0%.

Excise duties
Any individual or legal entity (including their fiscal representatives) that either produces or imports into the territory of the Republic of Albania any commercial goods defined to be subject to excise tax, is subject to excise tax in Albania.

Albania levies excise tax on the following products:

- Beer: ALL 10/litre to ALL 30/litre, depending on the annual quantity in hectolitre.
- Wine: ALL 20/litre to ALL 35/litre, depending on the annual amount in hectolitre.
- Other alcoholic drinks: ALL 100/litre to ALL 400/litre.
Albania

- Tobacco and its by-products: ALL 1,500/kg to ALL 2,500/kg, and ALL 70/pack.
- Liquid by-products of petroleum: ALL 20/litre to ALL 50/litre.
- Solid by-products of petroleum: ALL 5/kg to ALL 40/kg.
- Fireworks: ALL 200/kg.
- Pneumatic tyres: ALL 20/kg to ALL 40/kg for new purchased tyres and ALL 100/kg for used tyres.
- Incandescent lamps: ALL 100/unit.
- Plastic, glass, and mixed packages: ALL 100/litre, ALL 10/litre, and ALL 20/litre respectively.

Reimbursement of excise tax can be obtained on:

- The excise tax paid on fuel used by entities engaged in the constitution of energy resources with installed capacities of not less than 5 MW for both its own needs and for sale.
- The excise tax paid on fuel used in green houses as well as in production of industrial and agricultural products.
- 50% of the excise tax paid for plastic, glass, and mixed packaging used as input in the local recycling industries of these materials.

**Real estate tax**
Entities that own real estate property in Albania are subject to real estate tax.

**Real estate tax on buildings**
Real estate tax on buildings is calculated based on the type of activity the business entity owning the building carries out.

<table>

</tr>
</tbody>
</table>

**Real estate tax on agricultural land**
Real estate tax on agricultural land is levied on each hectare and varies depending on the district where the agricultural land is located and on the land productivity categorisation.

**Stamp duties and notary taxes**
There are no stamp duties on the sale contract of land or other properties. There are, however, notary taxes that are, in nature, similar to stamp duties. The notary tax on sales contracts that relate to change in ownership of immovable properties is ALL 1,000. The notary tax on sales contracts that relate to change in ownership of movable properties is ALL 700.

Depending on the agreement reached between the seller and the buyer, the notary tax can be paid either by the seller, or by the buyer, or shared between both of them.
Albania

**Registration taxes**
The fee for the registration of a business entity is ALL 100.

**Payroll-related taxes**
Entities shall withhold 10% personal income tax from the gross salaries of their employees.

Employers shall pay social and health contributions (SHC) to the tax authorities at a rate of 15% and 1.7%, respectively. Such contributions are paid between the minimum and maximum gross salary for SHC purposes, which are ALL 18,295 and ALL 91,475, respectively.

**Branch income**
Branch offices in Albania are subject to the same taxes as all other forms of legal entities.

**Income determination**

**Inventory valuation**
Inventory is valued at the end of each tax period using the methods stipulated in the Accounting Law, which should be applied systematically. The methods stipulated in the National Accounting Standards for the valuation of inventory at year-end are the average cost and first in first out (FIFO) methods.

**Capital gains**
Capital gains are taxed at the same rate as the company's ordinary business income.

**Dividend income**
Dividends and other profit distributions received by a resident entity from another resident entity or from a non-resident entity are not subject to CIT for the resident beneficiary of such income. This applies despite the participation quote (in amounts or number of shares) of the entity distributing profits in the shareholder capital, voting rights, or its participation in initial capital of the beneficiary.

**Interest income**
Interest income is taxed at the same rate as the company's ordinary business income.

**Foreign income**
Albanian resident corporations are taxed on their worldwide income. If a DTT is in force, double taxation is avoided either through an exemption or by granting a tax credit up to the amount of the applicable Albanian CIT rate.

Albanian legislation does not contain any provisions under which income earned abroad may be tax deferred.

**Deductions**

**Depreciation and amortisation**
Allowed tax depreciation and amortisation rates and methods for each category of fixed assets are shown below:
<table>
<thead>
<tr>
<th>Asset category</th>

<td></td>
<td></td>
</tr>
</tbody>
</table>

Land, fine art, antiques, and jewellery are non-depreciable assets.

Depreciation and amortisation of fixed assets at amounts higher than those allowed for tax purposes is considered a non-deductible expense.

**Interest expenses**

Interest paid in excess of the average 12-month credit interest rate applied in the banking system, as determined by the Bank of Albania, is a non-deductible expense. The amount of deductible interest expense may also be limited by thin capitalisation rules (see Thin capitalisation in the Group taxation section).

**Bad debt**

Bad debts are only deductible if the following conditions are met simultaneously:

- An amount corresponding with the bad debt was included earlier in income.
- The bad debt is removed from the taxpayer’s accounting books.
- All possible legal action to recover the debt has been taken.

This applies to all entities except those operating in the financial sector.

**Charitable contributions**

There are no provisions in Albania regarding the tax treatment of charitable contributions. In general, contributions are considered as non-deductible expenses for CIT purposes.

**Fines and penalties**

Fines and other tax-related sanctions are non-deductible expenses.

**Taxes**

Income taxes, VAT, and excise duties are non-deductible expenses.

**Other significant items**

The Albanian legislation also defines the following specific costs as non-deductible:

- Expenses not supported with fiscal invoices.
- Expenses paid in cash of amounts exceeding ALL 300,000.
- Benefits in kind and gifts.
- Wages, bonuses, and any other form of income deriving from an employment relationship and paid to the employees in cash.
- Provisions and reserves (with some exemptions applicable to the financial sector).
- Expenses for technical services, consultancy, and management received from foreign entities that are not registered for tax purposes in Albania and for which no withholding tax (WHT) has been paid by 31 December, at the latest.
Albania

- Losses, damages, wastage incurred during production, transiting, or warehousing, exceeding the norms defined by laws and related instructions.
- Impairment losses on fixed assets.
- Representation and reception expenses exceeding 0.3% of annual turnover.
- Sponsorship expenses exceeding 3% of profit before tax and sponsorships of press and publications exceeding 5% of profit before tax.

The amounts allocated to special reserve accounts in banks and insurance companies are deductible, provided that they do not exceed the limits stated in the Bank of Albania regulations.

Employers’ contributions towards the life and health insurance of employees are deductible.

**Net operating fiscal losses**
Fiscal losses may be carried forward up to three consecutive years. However, losses may not be carried forward if more than 25% of direct or indirect ownership of the share capital or voting rights of the company is transferred during the tax year.

Albanian legislation does not allow losses to be carried back.

**Payments to foreign affiliates**
Payments to foreign affiliates are subject to WHT unless tax relief is requested in accordance with the local legislation or any DTT in place. These payments are tax deductible if they are properly documented and incurred for business purposes only.

Payments to foreign affiliates made for the purpose of profit transfer might be subject to price revaluation by the tax authorities. Any transactions/payments made to foreign affiliates shall be performed on an arm’s-length basis.

**Group taxation**
There is no group taxation in Albania.

**Transfer pricing**
Transfer pricing adjustments may be made if the conditions set in a transaction between related parties differ from those that would have been set if the parties were independent. In particular, the following are regarded as related parties:

- A legal entity and any person who owns, directly or indirectly, at least 50% of the shares or voting rights in that entity.
- Two or more legal entities if a third person owns, directly or indirectly, at least 50% of the shares or voting rights in each entity.

**Thin capitalisation**
The interest paid on outstanding loans and prepayments exceeding four times the amount of net assets are not deductible. This rule does not apply to banks and insurance companies.

**Controlled foreign companies (CFCs)**
There is no CFC regime in Albania.
**Tax credits and incentives**

The following entities are exempt from CIT:

- Legal entities that conduct religious, humanitarian, charitable, scientific, or educational activities.
- Trade unions or chambers of commerce, industry, or agriculture.
- International organisations, agencies for technical cooperation, and their representatives, the tax exemptions of which are established by specific agreements.
- Foundations or non-banking financial institutions established to support development policies of the government through credit activities.
- Film studios and cinematographic productions (among other types of entity/activity) that are licensed and funded by the National Cinematographic Centre.

**Foreign tax credit**

Albania does not apply foreign tax credits except in the case of DTTs (see Foreign income in the Income determination section).

**Withholding taxes**

The gross amount of interest, royalties, dividends, and shares of partnerships’ profits paid to non-resident companies is subject to a 10% WHT, unless a DTT provides for a lower rate.

The 10% WHT is levied on the gross amount of payments for technical, management, installation, assembly, or supervisory work, as well as payments to management and board members.

If a non-resident company does not create a PE in Albania, and a DTT exists between Albania and the home country of the non-resident company, the payment of WHT can be avoided.

**Double tax treaties (DTTs)**

Albania has signed 37 DTTs, of which 32 are in force.

WHT rates envisaged by applicable DTTs are provided in the following table:

**Notes**

1. If the recipient company owns, directly or indirectly, 50% of the capital of the paying company, 0% rate of the gross amount of the dividends applies. If the recipient company owns, directly or indirectly, 25% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 15% of the gross amount of the dividends applies in all other cases.

2. A tax rate of 5% of the gross amount of the interests applies in case of interests in a contracting state, which are paid to a loan granted by a bank or any other financial institution of the other contracting state, including investment banks and savings banks and insurance. A tax rate of 10% of the gross amount of the interests applies in all other cases.

3. If the recipient company or any other governmental body is resident of other contracting state, 0% rate of the gross amount of the dividends applies. If the recipient company (other than a partnership) owns, directly or indirectly, at least 10% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 10% of the gross amount of the dividends applies in all other cases.

4. If the recipient company (other than a partnership) owns, directly or indirectly, at least 75% of the capital of the paying company, 0% rate of the gross amount of the dividends applies. If the recipient company (other than a partnership) owns, directly or indirectly, at least 10% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 10% of the gross amount of the dividends applies in all other cases.

5. If the recipient company (other than a partnership) owns, directly or indirectly, at least 25% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 10% of the gross amount of the dividends applies in all other cases.

6. If the recipient company (other than a partnership) owns, directly or indirectly, at least 25% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 15% of the gross amount of the dividends applies in all other cases.

7. A tax rate of 10% of the gross amount of the royalties applies, unless it can be avoided.
**Tax administration**

**Taxable period**
The tax year is the calendar year.

**Tax returns**
The final CIT return is due by 31 March of the year following the tax year.

**Payment of tax**
Predetermined advance payments of CIT are due by the 15th day of each month. Advance payments of CIT payable by the small business category are payable on a quarterly basis.

According to the tax laws, CIT is paid during the year on a prepayment basis. The amount of monthly CIT prepayments is determined as follows:

<table>
<thead>
<tr>
<th>Years of activities</th>
<th>Period from January to April</th>
<th>Period from May to December</th>
</tr>
</thead>
<tbody>
<tr>
<td>Year 1</td>
<td>Taxpayer’s estimation</td>
<td>Taxpayer’s estimation</td>
</tr>
<tr>
<td>Year 2</td>
<td>Taxpayer’s estimation</td>
<td>CIT of Year 1 divided by months of activity in Year 1</td>
</tr>
<tr>
<td>Year 3</td>
<td>CIT of Year 1 divided by months of activity in Year 1</td>
<td>CIT of Year 2 less CIT prepaid during January to April in Year 2 divided by 8 months</td>
</tr>
</tbody>
</table>

Companies should decide on the use of their prior fiscal year after-tax profit within six months of the subsequent year and submit the decision to the tax authorities no later than 31 July. The decision should state the amount allocated as statutory reserve, the amount to be used for investments and/or for increase in share capital, and the amount to be distributed as dividends.

The final due date for the payment of the final CIT for a fiscal year is 31 March of the following year. Note that this payment is calculated as the total amount of CIT self-assessed from the taxpayer for that particular fiscal year less total CIT instalments paid related to that year.

Companies have the obligation to pay the tax on dividends to the tax authorities no later than 30 July of the year the financial results are approved, regardless of the fact of whether the dividend has been distributed or not to the shareholders.

**Tax audit process**
Generally, the Albanian tax system is based on self-assessment, which is under continuous audit by the tax authorities. Such audits include all types of taxes that the business is subject to. If any discrepancies result from the tax audit, the tax authorities issue an assessment notice, which the taxpayer might appeal within 30 calendar days.

**Statute of limitations**
With regard to Albania’s tax administration practices, the statute of limitations of a tax audit is five years. However, the statute of limitations can be extended by 30 calendar days in cases where:

- a new assessment is made as a result of an appeal against a previous tax assessment
Albania

- a tax assessment is made as a result of a tax audit or investigation of the taxpayer by the tax administration, or
- the taxpayer is subject to a penal case related to one’s tax liabilities.

Topics of focus for tax authorities
The tax authorities main focus during a tax audit are areas related to transfer pricing, which is becoming an increasing area of focus; WHT; and aspects affecting CIT, such as expense deductibility.
**Significant developments**

Under the ongoing tax reform, the Corporate Income Tax (CIT) Code changes expected to be released through the end of 2013 will come into force in 2014. Some of the expected changes include the reduction of the CIT rate to 30% and the introduction of new transfer pricing regulations.

**Taxes on corporate income**

The standard CIT rate of 35% is levied on the taxable income of the following CIT payer groups (although, in practice, the last two are not applicable in actual Angolan economic reality):

- **Group A** - Tax is levied on actual profits as shown in taxpayers’ accounting records (e.g. public and private companies, permanent establishments [PE] of foreign entities), adjusted accordingly with the provisions of the CIT code.
- **Group B** - Tax is levied on taxpayers’ presumable profit (taxpayers not included in groups A or C).
- **Group C** - Taxation is based on profits that taxpayers could normally earn/obtain (e.g. small family companies).

Resident entities are subject to CIT on worldwide income. Non-resident entities deemed to have a PE in Angola are subject to CIT on Angola-source income.

Special regimes, rules, and tax rates are provided for the oil and gas industry and the mining industry.

Exemptions from CIT are provided for:

- Agricultural companies (for up to ten years).
- Cooperatives.
- Culture associations.
- Non-resident shipping operators (as long as reciprocity exists).

**Investment income tax (IAC)**

Investment income tax (*Imposto sobre a Aplicação de Capitais* or IAC) is due on interest, dividends, royalties, and other income of a similar nature. In Angola, the IAC code divides such income into two taxable sections, as follows:

**Section A**

Section A investment income includes the following:
Angola

- Interest on credit facilities.
- Interest on loans.
- Income derived from deferred payments.

Tax is due at the moment that the interest or income is earned or at the moment when it is presumed to have been earned.

Note that a minimum annual interest rate of 6% is deemed on loan agreements and credit facilities, except if another rate is proven through a written contract.

**Section B**

Section B investment income includes the following:

- Dividends.
- Capital remunerations of members of ‘cooperatives’.
- Bond interest.
- Treasury bond interest.
- Interest on shareholders’ loans.
- Income derived from profits of non public interest entities not collected until the end of the year.
- Gambling income.
- Royalties.

For the purposes of this group of income, note that:

- The concept of royalties includes the remuneration of any kind attributed to the use of or consent to use copyrighted literature; arts or science works, including movies and films or recordings for radio or television transmissions; patents; brands; drawings or models of a plan; formulas; or secret processes. The concept of royalties also applies to the use of or the consent to use industrial, commercial, or scientific equipment and information related to an experience acquired on the industrial, commercial, or scientific sector.
- A minimum annual interest rate equal to the rate used by commercial banks on credit operations is deemed interest for shareholders’ loans.

Tax is due at the moment the effective attribution of income (dividends) is earned (interest) or paid (other income).

**Exemptions**

The following income is exempt from IAC:

- Interest on deferred payment of commercial transactions.
- Payment of dividends to Angolan CIT payers that hold a share higher than 25% for more than one year.
- Interest from financial products approved by the Ministry of Finance that intend to encourage savings, capped to capital invested of 500,000 Angola kwanza (AOA) for each person.
- Interest from housing saving accounts intended to encourage savings for main permanent dwelling.

**IAC rate**

The IAC rate is 15%, except for the following income, for which the rate is 10%:

- Dividends.
• Capital remuneration of members of ‘cooperatives’.
• Bond interest.
• Interest from treasury bonds (or 5% for interest of bonds with a maturity equal to or
greater than three years).
• Interest from shareholders’ loans.
• Royalties.

Tax is withheld by the payer on Section B income.

For Section A income, tax is assessed by the taxpayer through a tax return to be filed
in January of the following year. When the payment of that income is made to a non-
resident entity, Angolan law provides that the tax payment obligation shifts to the
Angolan resident entity paying the income.

Any IAC paid is regarded as a tax deductible cost and, in addition, 65% of that tax paid
is deducted up to the CIT liability. The only exception will be any investment income tax
paid on dividends exempted.

**Local income taxes**
There are no local taxes on income in Angola.

---

**Corporate residence**
Business entities with a head office or effective management in Angola are considered
resident entities and are taxed on worldwide income.

**Permanent establishment (PE)**
Angola has not signed any double tax treaties; consequently, its domestic tax provisions
apply with regards to PE.

The Angolan concept of tax PE is inspired in the United Nations (UN) Double Tax Treaty
Model. A foreign entity is deemed to create a PE in Angola if it:

• has a branch, an office, or place of management in Angola
• has a construction or installation site, or provides supervision over such site, only
  when such site or activities exceed a period of 90 days in any given 12-month
  period, or
• carries out services in Angola, including consulting, acting through employees or
  other personnel contracted for that end, when such services are provided for a
  period of at least 90 days in any given period of 12 months.

---

**Other taxes**

**Consumption tax**
There is no value-added tax (VAT) or sales tax in Angola. However, a consumption tax
exists, which is similar to that of an excise duty. For goods imported or produced locally,
the rates vary from 2% to 30%. For services, the following rates apply:

<table>
<thead>
<tr>
<th>Type of service</th>
<th>Consumption tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lease of areas designated for collection and parking of motor vehicles</td>
<td>5</td>
</tr>
</tbody>
</table>
Type of service | Consumption tax rate (%)
---|---
Leasing of machinery and other equipment, as well as work carried out in tangible assets | 10
Leasing of areas used for conferences, colloquiums, seminars, exhibitions, showrooms, advertising, or other events | 10
Consultancy services, namely legal, tax, financial, accounting, IT, engineering, architecture, economics, real estate, audit services, and legal services | 5
Photographic services, film processing and imaging, IT services, and construction of web sites | 5
Port, airport, and custom agent services | 5
Private security services | 5
Tourism and travel services promoted by travel agencies or equivalent tour operators | 10
Canteen, cafeteria, dormitory, real estate, and condominium management services | 5
Access to cultural, artistic, and sporting events | 5
Road, sea, train, and air transportation of cargo and containers, including the management of warehouses related to this transport, and passenger transportation, if provided in Angolan territory | 5

For all the services mentioned above, the tax compliance obligations are the responsibility of the Angolan service providers, who can then add the tax to the amount charged to the acquirers. However, if the service providers are non-resident entities in Angola, the obligation will revert to the resident entities acquiring the services, if they are liable to pay CIT.

**Customs duties**
Duties are levied on imports at ad valorem rates varying from 2% to 30%. The range of taxation for both consumption tax and import duties varies according to the type of goods. The rates are set out in the tariff book.

Listed equipment may be imported temporarily, if a bank guarantee is provided.

A 0.1% statistical fee and a 1% stamp duty is also due on importation plus custom fees (from 1% to 3%).

A special exemption regime applies for the oil industry for some listed equipment.

**Stamp tax**
Stamp tax is payable on a wide variety of transactions and documents, at specific amounts or at a percentage based on value.

Important examples include:

<table>
<thead>
<tr>
<th>Type of operations</th>
<th>Stamp tax rates</th>
</tr>
</thead>
<tbody>
<tr>
<td>On receipts</td>
<td>The rate of stamp tax for receipts is of 1%.</td>
</tr>
<tr>
<td>Stamp tax on receipts (in cash or in kind) is still applicable.</td>
<td>1%</td>
</tr>
</tbody>
</table>
Type of operations | Stamp tax rates
---|---
**Financial operations**<br>Stamp tax is applicable to financial operations, such as credit utilisation (and not only open credit accounts) and bond guarantees, interest and commission charged by financial institution, as well as foreign withdrawals, foreign public debt bonds, foreign notes, and coins.<br>As a general rule, stamp tax is due for the entity that provides the credit and charge for the interest and commissions being then charged to the borrower or the interest/commissions debtor.<br>Credit facilities are subject to stamp tax on the utilisation of such funds, and, depending on the period, the rates of stamp tax will vary from 0.3% to 0.5%.<br>For regular credit, bank overdrafts, or credit where the period is not determined, stamp tax applies at a rate of 0.001%.<br>Housing credits are subject to stamp tax at a rate 0.001%.<br>Financial leasing on real estate and financial and operational leasing of tangible assets (maintenance and technical assistance included) are now subject to stamp tax at a rate of 0.3% and 0.4%, respectively.<br><br>**Real estate operations**<br>Stamp tax is due on a paid acquisition of real estate by the acquirer.<br>Stamp tax is also due on letting and sub-letting, as well as on financial leasing of real estate, except when the leasing is for a permanent dwelling, which is exempt from stamp tax.<br>Stamp tax applies on the acquisition of real estate at a rate of 0.3%.<br>Stamp tax applies on the registration of letting and sub-letting contracts at a rate of 0.4%.<br><br>**Corporate operations**<br>Stamp tax is due on the initial or increase of share capital, whether made in cash or in kind.<br>On share capital and increase of share capital stamp tax applies at a rate of 0.1%.<br><br>**Insurance**<br>Insurance provided by national companies is subject to stamp tax, being the tax settled by the insurance company cost of insured person.<br>The stamp tax applies on the amount of premium paid, and rates may vary from 0.1% to 0.3%, depending on the policy’s nature.<br>Commissions for mediation are subject to stamp tax at a rate of 0.4%.<br><br>**Other operations**<br>In addition to the operations referred to above, the new table also refers the stamp tax applicable to written agreements, financial and operation leasing in tangible assets, custom operations, cheques, lending, civil deposits, gambling, licences, traders’ books, deeds, report, credit bonds, and transfer of business, among other acts.<br>The following other stamp taxes are applicable:<br>- Transfer of industrial or agricultural business: Stamp tax applies at a rate of 0.2%.<br>- Stamp tax of 1% on the import value.
Angola

The following exemptions apply:

- Credit granted for a period of up to a maximum of five days, micro-credit, credit related to young accounts and old age accounts, and others of a similar nature that does not exceed the amount of AOA 17,600 each month.
- Credit derived from credit card utilisation, when the reimbursement is made free of interest, according to the terms of the contract.
- Credits related with exportation, when duly documented with the respective custom clearance.
- Amounts due on the mortgage for the acquisition of a permanent dwelling.
- On interest and commissions charged on financial operations, such as young accounts, old age accounts, and credits related to export under the terms mentioned above.
- Interest from Treasury Bonds and Angolan Central Bank notes.
- Commissions charged for subscriptions, deposit and withdrawal from units of investment funds, as well as the charges from pension funds.
- Commission charged on the opening and utilisation of saving accounts.
- Credit operations (including interest) for periods not exceeding one year, provided these are obtained exclusively to cover treasury needs, when realised between shareholders and entities in which a direct capital shareholding not lower than 10% is held and which has remained in their ownership for a year (consecutively), or since the incorporation of the respective entity.
- Loans bearing the characteristics of shareholder loans, including the respective interest, made by shareholders to the company in respect of which an initial period not shorter than one year is stated and no reimbursement is occurred before the end of that period.
- Treasury management operations, carried out between companies within the same group.
- Insurance premiums and commissions related to life insurance, work accidents, health, and agriculture and livestock insurance products.

**Real estate income tax (IPU)**

IPU is levied on rental income earned by individuals or companies owning real estate assets. It is based on actual rental income when the assets are leased and on the assets' registered value when the assets are not leased.

**Leased assets**

IPU is levied on rental income at a 25% rate.

The rental income is automatically reduced by 40% of its value, as it is presumed to finance all real estate related expenses.

Therefore, in practice, IPU applies at an effective 15% rate on rental income (i.e. 25% multiplied by 60% of rental income), with a minimum amount of 1% of the asset registered value.

A real estate asset is registered at the higher of (i) its valuation (based on criteria and tables to be published, which will take into account the area [square metres] and the characteristics of the property) or (ii) the value of its latest transfer.
Assets that are not leased
IPU is levied as follows for assets that are not leased:

<table>
<thead>
<tr>
<th>Patrimonial value (AOA)</th>
<th>IPU rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 5 million</td>
<td>0</td>
</tr>
<tr>
<td>Over 5 million (on the excess)</td>
<td>0.5</td>
</tr>
</tbody>
</table>

Notes
1. An asset registered at AOA 35 million will pay IPU only on AOA 30 million, resulting in an IPU payable of AOA 150,000.

Exemptions
The only accepted exemptions of IPU are the following:

- State public institutions and associations that are granted with the public utility statute.
- Property of Embassies or Consulates of foreign countries, provided there is reciprocity.
- Religious temples.

Payment
Rents paid by Angolan entities (individuals or companies) that carry out commercial activity must withhold the 15% IPU from rents paid. The IPU so withheld must be paid over to the tax authorities by the end of the following month.

For any other cases, owners of real estate assets must pay the IPU in January and July of the following year. At the request (by July each year) of the IPU taxpayer, if approved, the IPU is payable over four instalments in January, April, July, and October of the following year.

Filing requirements
IPU Model 1 must be filed by IPU taxpayers each January, disclosing the rents effectively received in the preceding year, distinguishing the leases agreed and received.

Real estate transfer tax (SISA)
SISA is levied at a 2% rate for all acts that involve onerous permanent or temporary transmission of real estate. The value liable to tax is the higher of (i) the sale value or (2) the registered value.

Exemptions of SISA are only applicable to the following entities:

- State public institutions and associations that are granted with the public utility statute.
- Property of Embassies or Consulates of foreign countries, provided there is reciprocity.
- Religious temples.
- Real estate transferred for less than UCF 78,000 (currently UCF 1 = AOA 88) only when (i) at the first sale and (ii) for residential purposes.
Angola

**Branch income**
Branch taxable income is taxed on the same basis as separate legal entities. Income remitted by a branch to the head office is not subject to IAC.

**Income determination**

**Inventory valuation**
Inventory is valued at the historic acquisition cost. Any other method of valuation needs to be approved by the tax authorities.

**Capital gains**
Capital gains arising from the disposal of fixed assets are taxed as part of normal income.

Capital gains are determined by the difference between the sales proceeds and the acquisition value, deducted from tax deductible depreciation, adjusted by a devaluation coefficient.

**Dividend income**
Dividends received are exempt from CIT, provided that the share participation is owned for two consecutive years (or since the incorporation of the entity where the participation is held) and the share participation is not less than 25%.

Dividends from Angolan participations owned by insurance companies to fund their technical reserves are also exempt from CIT.

**Interest income**
Interest from public bonds is exempt from CIT.

**Rental income**
Rental income, as being liable to real estate income tax, is not liable to CIT. See the Other taxes section for more information.

**Royalty income**
Royalty income is taxed as normal income. Any IAC paid is regarded as a tax deductible cost and, in addition, 65% of that tax paid is deducted, up to the CIT liability.

**Foreign income**
An Angolan resident CIT payer is taxed on all its foreign income. Any income tax proved to be paid outside the country for activity carried on outside the country will be credited against the CIT liability.

No tax deferral provisions exist in Angola.

**Deductions**

**Depreciation**
Depreciation should be computed using the straight-line method; any other method must be approved by the tax authorities.
The tax depreciation rates should respect the limits imposed by Government Ruling 755/72, and, in absence of this Ruling, the tax authorities interpretation, as follows:

<table>
<thead>
<tr>
<th>Type of asset</th>
<th>Rate (%)</th>

Depreciation not accounted for at cost is not permitted as a deduction in the following years.

Further, depreciation of land and goodwill is not accepted for tax purposes.

30% of the increase on depreciation resulting from a legal revaluation of fixed assets is not accepted for tax purposes, as well as the total increase in depreciation resulting from free revaluation of the fixed assets.

**Interest expenses**
Interest costs are accepted as deductible for tax purposes.

**Bad debt**
Write-off of debts is considered as deductible only if the write-off resulted from a bankruptcy court process.

**Provisions**
The only provisions accepted as deductible for tax purposes are:

- Doubtful debts within an annual limit of 2% of the client’s current total account value and provided that a 6% accumulated provision limit is not exceeded.
- Inventory depreciation within limits that vary from 1% and 8% (annual and accumulated), depending on the nature of the company's activity.
- Those respecting the limits and rules imposed by the Insurance Supervision Institute for insurance companies, as well as the Central Bank for Financial Institutions.
- Provisions for possible losses resulting from a court process.

**Charitable contributions**
Donations are accepted as deductible, up to a limit of 2% of the taxable income, if the donations are granted to Angolan education, science, charity, and cultural institutes. If granted to Angolan government, central and local administration bodies, the donations are fully deductible.

**Fines and penalties**
Fines and penalties are not accepted for tax purposes.

**Taxes**
All taxes are deductible for CIT purposes, except the CIT itself or taxes supported on behalf of others (e.g. employment income tax supported on behalf of the employees).
Angola

**Net operating losses**
Tax losses are deductible from the taxable income of the following three years. Carryback of losses is not allowed.

**Payments to foreign affiliates**
Payments to foreign affiliates are accepted for tax purposes, although the arm’s-length principle should be respected.

---

**Group taxation**
There are no special rules for group taxation in Angola.

**Transfer pricing**
Despite the existence of the arm’s-length principle in Angolan corporate tax law, there are no detailed regulations on transfer pricing. Taxpayers should be aware that, in light of existing generic rules included in the corporate tax code, the tax authorities do have means to adjust inter-company charges.

**Thin capitalisation**
There are no thin capitalisation rules in Angola.

---

**Tax credits and incentives**

**Foreign tax credit**
Any income tax proved to be paid outside the country for activity carried out outside the country will be credit against the CIT liability.

**Investment incentives**
Profits retained and then reinvested by the company in new installations or equipment during the following three financial years may be deductible from taxable income during the following three years after the investment is finalised. Note that this benefit is not yet regulated.

Special regulations also provide tax and customs incentives for investment projects in strategic economic development areas and sectors. One such incentive can provide up to 15 years of CIT exemption.

---

**Withholding taxes**
Withholding tax (WHT) is applicable on payments for services provided to Angolan entities. For Angolan taxpayers, this is regarded as an advance payment of the CIT due at the year-end. For non-resident companies, this is a final tax.

The payments subject to this WHT are those related to:

- Construction, improvement, repair, or conservation of immovable property withheld at a rate of 3.5% on the gross payments (CIT rate of 35% applicable on a 10% deemed margin).
- Other services, namely technical assistance and management fees, withheld at a rate of 5.25% on the gross payments (CIT rate of 35% applicable on a 15% deemed margin).
Due to the IAC, Angola does not have a separate WHT for dividends, interest, and royalties (see the Taxes on corporate income section for more information).

**Tax administration**

**Taxable period**
The tax year follows the calendar year.

**Tax returns**
The annual corporate tax return must be submitted by the last business day of May of the year following the year to which the income relates.

**Payment of tax**
Tax is paid in four instalments. The first three correspond to advance payments based on the expected tax to be paid or, if unknown at that date, 75% of the taxable income computed on the previous year multiplied by the tax rate (35%). The instalments are paid in January, February, and March, and the final instalment is paid with the submission of the annual tax return on the last business day of May.

**Tax audit process**
There are no specific provisions related to the audit process in Angola.

**Statute of limitations**
The statute of limitations in Angola is five years.

**Topics of focus for tax authorities**
The main areas of focus of the tax authorities relate to compliance in respect of payment in due time of any WHTs due, as well as the 1% stamp tax on receivables. Further, they usually try to investigate the deductibility of costs according to their nature.

Significant developments

On 1 May 2013, specific reforms to the Social Security Act came into effect to ensure the viability and sustainability of the scheme. These include an increase in the overall contribution rate by 2% and an increase in the base on which the tax is assessed. This increase will be shared equally between employer and employee. The employer will now contribute 6% to the scheme on behalf of the employee while each employee will contribute 4%. In addition, the ceiling on insurable income will move from 4,500 East Caribbean dollars (XCD) to XCD 6,500 per month.

Taxes on corporate income

Companies incorporated in Antigua and Barbuda pay corporate income tax (CIT) on their worldwide income, with relief available under existing double taxation agreements (DTAs). Non-resident companies deriving income from Antigua and Barbuda are liable for CIT and should be registered if they have a physical presence in Antigua and Barbuda.

Antigua and Barbuda imposes a flat CIT rate of 25%.

Taxable income or chargeable income is ascertained by deducting from income all expenses that are wholly and exclusively incurred during the year in the production of the income. Chargeable income is normally arrived at by adjusting the net profit per the financial statements for non-taxable income, non-deductible expenses, and prior period losses of up to 50% of chargeable income.

Where a person resident in Antigua and Barbuda makes to another person not resident in Antigua and Barbuda a payment that the payor is entitled to deduct in arriving at chargeable income, then a withholding tax (WHT) must be deducted. In addition, if the income received by the non-resident person would have been subject to tax under the Income Tax Act, then WHT must be deducted by the payor.

Reduced CIT rate for certain financial institutions

Financial institutions licensed under the Banking Act that maintain, throughout the tax year, residential mortgage rates at or below 7% are subject to a reduced CIT rate of 22.5%.
**Corporate residence**

A corporation is deemed to be a resident if it is incorporated in Antigua, if it is registered as an external company doing business in Antigua, or if the central management and control of its business are exercised in Antigua.

**Permanent establishment (PE)**

A PE is not defined in the Income Tax Act; however, any company that would meet the general definition of a PE must be registered.

**Other taxes**

**Value-added tax (VAT)**

Antigua and Barbuda Sales Tax (ABST) is a VAT applicable to a wide range of goods and services. The standard rate is 15%, and hotel accommodation carries a transitional rate of 12.5%.

A number of services, including financial services, local transportation, sale of residential land, education, long-term accommodation (greater than 45 days), and medical and veterinary services, are exempt from ABST. Certain supplies are zero-rated, including exports, basic food items, water, electricity for residential use, sale of new residential property, construction of new residential premises, and fuel. Intergroup transactions are taxable.

A period in the ABST Act represent one month. The threshold for registration is XCD 300,000 in taxable activity per 12-month period.

**Customs duties**

All imports are subject to customs duties, ABST, Antigua and Barbuda Revenue Recovery Charge, and an environmental levy. In all instances, certain exemptions will apply.

Customs duty is levied on a wide range of imported goods at rates from 0% to 70% as specified in the Custom Duties Act. Customs duty is levied on goods based on the cost, insurance, and freight (CIF) values and rates determined by the Caribbean Community (CARICOM) Common External Tariff.

**Antigua and Barbuda Revenue Recovery Charge**

Antigua and Barbuda Revenue Recovery Charge is applied at a flat rate of 10% on the CIF value on all goods imported into or produced in Antigua and Barbuda. Exemptions will include entities with which the government has International Assistance Agreements, certain government entities, and most supplies or imports of fuel.

**Excise taxes**

There are no excise taxes in Antigua and Barbuda.

**Property taxes**

Property tax is levied annually at graduated rates on the basis of the market value of real property (as assessed by the Property Valuation Department) and its use (residential or commercial).

Property tax rates are as follows:
Antigua and Barbuda

- Agricultural land 0.10%.
- Residential land 0.20%.
- Residential building 0.30%.
- Buildings classified as other property 0.50%.
- Land classified as other property 0.40%.

Allowances and tax rebates are available as follows:

- 5% rebate for payment of tax on or before the due date.
- Between 25% and 100% tax rebate available for special development property and property for public use; 25% for hotels.

**Non-citizens undeveloped land tax**
Undeveloped land tax is levied on the basis of the value of land owned by non-citizens that has not been developed.

Rates of tax are as follows:

- Second year of ownership: 5%.
- Third year of ownership: 15%.
- Fourth and subsequent years of ownership: 20%.

**Stamp tax**
Stamp tax applies to a very wide range of transactions (e.g. bill of sale, leases, mortgages, contract, bill of lading). Stamp tax on transfer of real property and shares are specifically covered below.

**Transfer of real property**
Stamp tax is imposed on both the buyer and the seller and is levied on the consideration for the sale or the value of property as assessed by the Chief Valuation Officer, whichever is higher. The stamp tax for vendors is 7.5%, and the stamp tax for purchasers is 2.5%.

Non-citizens vendors are required to pay a land value appreciation tax at the rate of 5%, which is assessed on the difference between the value of property when purchased, plus improvements, and the value of property at the time of sale.

Non-citizens purchasers are also required to pay 5% of the value of property with reference to a non-citizens licence required to hold property in Antigua and Barbuda.

**Transfer of shares**
Stamp tax is imposed on both the buyer and the seller and is levied on the market value of the shares or book value of the shares, whichever is higher. The stamp tax for vendors is 5%, and the stamp tax for purchasers is 2.5%.

A non-citizen must obtain a licence (at a cost of XCD 400) to hold shares or be a director in a company that owns land or has a lease on land in excess of five acres for a period greater than five years.

**Environmental levy**
Environmental levy is calculated based on dollar value rates from XCD 0.25 to XCD 2,000 and is used to finance the cost of protecting and preserving the environment.
**Life insurance premium tax**
A premium tax of 3% is levied on the premium income (net of agent’s commission) of all life insurance companies, whether resident or non-resident.

**General insurance premium tax**
A premium tax of 3% is levied on the premium income, excluding motor business (net of agent’s commission), of all general insurance companies, whether resident or non-resident.

**Statutory payroll deductions**

**Social security contributions**
The employer portion of social security contributions is 6% of chargeable income of up to XCD 6,500 per month as of 1 May 2013 (previously 5% of chargeable income of up to XCD 4,500 per month).

**Medical benefits**
The employer portion of medical benefits payments is 3.5% of salary and wages of an employee who is between 16 and 60 years of age.

**Branch income**
Branch income is taxed on the same basis and at the same rate as that of corporations. A resident branch of a foreign company shall be regarded as a separate company and shall be taxed on the same basis as that of a locally registered corporation.

Recharges of expenses from head office to the branch are subject to WHT at a rate of 25%. The recharges have to be justifiable, consistent, and cannot just be based on a percentage allocation.

**Income determination**

**Inventory valuation**
Inventories are generally stated at the lower of cost or net realisable value. First in first out (FIFO) and average cost methods of valuation are generally used for book and tax purposes. However, the Commissioner of Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade concerned. Last in first out (LIFO) is not permitted for tax or book purposes.

**Capital gains**
Capital gains are not subject to tax in Antigua and Barbuda.

**Dividend income**
Dividends received by a company resident in Antigua from another company resident in Antigua are taxed at the CIT rate of 25%. Credit is given to the recipient for the tax already paid on the dividend in computing the tax liability.

**Stock dividends**
An Antiguan corporation may distribute a tax-free stock dividend proportionately to all shareholders.
Antigua and Barbuda

**Interest income**
Interest income received by a company registered in Antigua is taxed at the CIT rate of 25%. Interest earned on local and other CARICOM government securities are normally exempt from the payment of CIT.

**Foreign income**
An Antiguan corporation is taxed on foreign branch income as earned and on foreign dividends as received. Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom [UK] and CARICOM). There is also relief from British Commonwealth taxes. See Foreign tax credit in the Tax credits and incentives section for more information.

**Deductions**

**Depreciation**
Depreciation allowed for tax purposes is computed by the diminishing-balance method at prescribed rates (see table below). Initial allowances are granted on industrial buildings and on capital expenditures incurred on plant and machinery by a person carrying on a trade or undertaking, as defined. In addition, an annual allowance of 2% is granted on all buildings. Conformity between book and tax depreciation is not required.

Any gain on the sale of depreciated assets is taxable as ordinary income up to the amount of tax depreciation recaptured.

</tr>
</tbody>
</table>

**Goodwill**
Goodwill and trademarks are not depreciating assets, and amortisation is not allowed.

**Start-up expenses**
There are no specific provisions in relation to deductions for start-up expenses. However, certain start-up expenses, such as costs of incorporation and other initial start-up costs, may qualify for a five year straight-line write-off.

**Interest expenses**
No deduction is allowed for interest on loans owing to shareholders, directors, their spouses, children or relatives, or to any related parties. Only interest paid to banks and financial institutions licensed under the Financial Institutions (Non-Banking) Act on loans borrowed at commercial rates and terms is deductible.
**Bad debt**
General allowances made for bad debts are not deductible. For a bad debt claim to be deductible, it must be specific and the taxpayer must prove to the Inland Revenue Department (IRD) that the debt became bad during the year.

**Cultural and social contributions**
A deduction of 50% of all substantial contributions made by any person with respect to sport, education, or culture in Antigua and Barbuda is allowed against a person’s assessable income from trade, business, or profession. Contributions must be in excess of XCD 10,000 in any assessment year, and deductions during any assessment year will be limited to XCD 250,000.

**Restriction on rents paid**
Rents paid by a company to shareholders, directors, their spouses, children or relatives, or to any related parties in excess of 5% of the otherwise chargeable profits of the company may not be deducted.

**Restriction on compensation**
Salaries, wages, directors’ fees and other payments made for services rendered by the shareholders, directors, their spouses, children, or relatives in excess of 25% of otherwise chargeable profits may not be deducted.

**Fines and penalties**
Fines and penalties imposed under Antiguan tax law are not deductible expenses.

**Taxes**
There are no provisions in the Income Tax Act in relation to the deductibility of taxes paid by a company. However, in general, ABST, ABST input tax credits, and adjustments under the ABST Act are disregarded for income tax purposes. Other taxes, including property tax, transfer taxes, payroll taxes, and insurance premium taxes, except income tax and share transfer tax, are deductible to the extent they are incurred in producing chargeable income.

**Net operating losses**
Income tax losses may be carried forward for six years following the year in which the loss was incurred. However, the chargeable income of a company in any one income year may not be reduced by more than one half by losses brought forward. No carryback of losses is permitted.

**Payments to foreign affiliates**
An Antiguan corporation may claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided the payments are equal to or less than what the corporation would pay to an unrelated entity. The deductibility of any payments to a foreign affiliate will be subject to an arm’s-length test.

**Group taxation**
Group taxation is not permitted in Antigua and Barbuda.

**Transfer pricing**
There are no provisions for transfer pricing in the tax laws of Antigua and Barbuda.
Antigua and Barbuda

**Thin capitalisation**
There are no provisions for thin capitalisation in the tax laws of Antigua and Barbuda.

---

**Tax credits and incentives**

Tax incentives are currently available under the following legislation.

**Fiscal Incentives Ordinance (1975)**
The Fiscal Incentive Ordinance provides manufacturers of an ‘approved product’ with an exemption from taxes for varying periods, up to a maximum of 15 years. After the period of exemption, relief by way of tax credits of up to 50% of CIT paid on profits derived from certain export sales may be obtained. The net losses arising during the tax holiday period (i.e. the excess of accumulated tax losses over total profits) may be carried forward and relieved against profits following the expiration of the tax holiday in accordance with the normal rules for set-off of losses.

An IBC is an entity incorporated under the IBC Act for the purpose of carrying on international trade or business. The IBC structure allows for a comprehensive range of business opportunities, including international banking, trust business, insurance, manufacturing, and other international trade activities, to persons outside of Antigua and Barbuda within a tax-free environment. An IBC is exempt from the payment of CIT, ABST, and WHT.

**The Investment Authority Act (2006)**
The Investment Authority Act provides the framework for the promotion of investment opportunities in Antigua and Barbuda by introducing a system of registration of businesses, an investment code, and a range of incentives that are available to both resident and non-resident investors. The available incentives and concessions to which an investor may be entitled for consideration are as follows:

- Exemption from the payment of customs duty.
- Reduction of property tax.
- Exemption from CIT.
- Reduction of stamp duty.
- Exemption from WHT.

The amount of the incentives and concessions depend on the amount of the investment and the number of employees in the proposed business.

The investment categories are as follows:

- Capital investment of up to XCD 1 million or employs up to 26 persons: This investor may qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 10%, exemption from the payment of CIT and WHT for up to three years, and a reduction of stamp duty by up to 10% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 1 million, employs over 26 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 20%, exemption from the payment of CIT and WHT for up to five years, and a reduction of stamp duty by up to 20% on the sale of land and buildings used in the business operation.
• Capital investment of over XCD 10 million, employs over 51 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 30%, exemption from the payment of CIT and WHT for up to ten years, and a reduction of stamp duty by up to 30% on the sale of land and buildings used in the business operation.

• Capital investment of over XCD 25 million, employs over 75 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 40%, exemption from the payment of CIT and WHT for up to 12 years, and a reduction of stamp duty by up to 40% on the sale of land and buildings used in the business operation.

• Capital investment of over XCD 75 million, employs over 100 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 50%, exemption from the payment of CIT and WHT for up to 15 years, and a reduction of stamp duty by up to 50% on the sale of land and buildings used in the business operation.

• Capital investment of over XCD 100 million, employs over 150 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 75%, exemption from the payment of CIT and WHT for up to 20 years, and a reduction of stamp duty by up to 75% on the sale of land and buildings used in the business operation.

The Small Business Development Act (2007)
The Small Business Development Act provides the framework for the growth of the small business sector in Antigua and Barbuda by introducing a system of registration of small businesses and a range of concessions that are available to the business. The available concessions to any small business that would be entitled for consideration are as follows:

• Concession on customs duty of up to 100% (includes raw material, building material, equipment, vehicles, furniture, furnishings, appliances, fixtures and fittings, tools, spare parts, and machinery and equipment used in the construction and operation of the business).
• Property tax reduction of up to 75%.
• CIT exemption for a period not exceeding five years.
• CIT exemption after the initial five year period of up to 10%.
• WHT exemption for a period of up to three years.
• Stamp duty exemption on the registration of a mortgage.
• Stamp duty exemption on the transfer of property and any applicable non-citizen land holding licence.

A small business to which this Act applies must meet all of the following criteria:

• No more than 25 employees.
• Not a wholly owned or majority owned business or subsidiary of a larger company.
• Capital investment not exceeding XCD 3 million.
• Annual sales that do not exceed XCD 2 million.
• Majority owned by citizens of Antigua and Barbuda, or majority owned by non-citizens with all of the following restrictions:
  • Over 50% of the products must be exported.
  • Minimum investment of XCD 500,000.
Antigua and Barbuda

- At least 50% of the employees must be citizens of Antigua and Barbuda.
- At least 40% of the goods and services used in production must be acquired from businesses in Antigua.

**Foreign tax credit**

Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom and CARICOM). A foreign tax credit is also available to persons in Antigua and Barbuda who have paid or are liable to pay British Commonwealth income tax.

**Residents**

The relief available from tax in Antigua and Barbuda for a person resident in Antigua from tax paid in Antigua and Barbuda is the British Commonwealth income tax rate if that rate does not exceed one half the tax rate in Antigua and Barbuda. If the British Commonwealth income tax rate exceeds the Antigua and Barbuda tax rate, then the relief will be limited to one half the tax rate in Antigua and Barbuda.

**Non-residents**

The relief available from tax in Antigua and Barbuda for a person not resident in Antigua from tax paid in Antigua and Barbuda is one half the British Commonwealth income tax rate if that rate does not exceed one half the tax rate in Antigua and Barbuda. If the British Commonwealth income tax rate exceeds the Antigua and Barbuda tax rate, then the relief will be limited to the amount by which it exceeded one half the rate of British Commonwealth income tax.

No relief is available unless similar provisions exist in the laws of the relevant British Commonwealth country.

**Withholding taxes**

Tax is currently withheld from income as follows:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>Dividends</th>
<th>Dividends (preferred shares)</th>
<th>Interest and rentals</th>
<th>Management fees, royalties, and other payments to a non-resident</th>
<th>Interest on bank deposits</th>

<td>15</td>
<td>0</td>
</tr>
</tbody>
</table>

Note that interest payments on bank deposits made to non-resident individuals are not subject to WHT. Interest payments on bank deposits made to non-resident corporations are taxed at the rate of 25%.
Where a non-resident lends money at arm’s length for the purpose of promoting industrial, commercial, scientific, housing, or other development, the rate of WHT is 10%. Prior approval must be sought from the Commissioner of Inland Revenue, and it is recommended that Cabinet approval also be obtained.

WHT becomes due at the time of payment or accrual and must be paid within seven days thereof.

**Tax treaties**

There is a tax treaty with the United Kingdom and a DTA between member states of CARICOM.

The UK tax treaty provides that persons in either the United Kingdom or Antigua and Barbuda are entitled to relief from CIT and WHT. The treaty allows for the following relief:

- Where a UK resident is liable to pay income tax in the United Kingdom in respect of the same income that is taxable in Antigua and Barbuda, one will be entitled to relief at a rate that is equal to the amount by which the tax rate in Antigua and Barbuda exceeds one half the UK rate.
- If the tax rate in Antigua exceeds the UK tax rate, then one will be entitled only to relief at a rate equal to one half the UK tax rate.

**Tax administration**

**Taxable period**

Taxes are assessed on a fiscal-year basis.

**Tax returns**

The taxpayer must file a CIT return, which includes audited financial statements, within three months of the fiscal-year end. The authorities will subsequently raise an assessment.

If a return is not filed on a timely basis, the authorities have the power to issue estimated assessments. There is a 5% penalty for late filing (minimum of XCD 500). The taxpayer can object to assessments raised within 30 days and ask the Commissioner of Inland Revenue to review and revise. In the event that the objection is unsuccessful, the taxpayer may appeal to the Tax Appeal Board. The Commissioner of Inland Revenue has the power to enforce the collection of tax prior to the determination of any objection or appeal. The Commissioner also has the discretion to order a stay on the collection and payment of all or part of any assessed tax until such time as the objection or appeal is finalised if it would be unjust not to do so.

**Payment of tax**

Advance tax is payable in monthly instalments and is ordinarily based on the tax chargeable and assessed in the previous fiscal year. The standard amount of each instalment is determined as one-twelfth of the tax chargeable in the previous fiscal year. If the assessment for the prior year has not been finalised, the Commissioner of Inland Revenue can raise an assessment based on best judgment.
Antigua and Barbuda

The balance of tax due after deduction of advance tax, as notified in the assessment, is payable at the time of submitting the annual CIT return, which must not be later than three months after the financial year-end or one-month after service of the final assessment.

Tax is deemed to be in default if not paid within 30 days of the date on which it becomes due and payable. A penalty of 20% and interest of 1% per month is charged on unpaid taxes in default.

**Tax audit process**
The Antiguan tax system for companies is based on self-assessment; however, the IRD undertakes ongoing compliance activities to ensure that corporations are meeting their tax obligation. There is no specific approach used by the IRD in relation to compliance and audit activities. Compliance activities generally take the form of reviews of specific issues and audits.

**Statute of limitations**
The IRD can reassess CIT returns within a six-year period. In addition, the IRD can make additional assessments of tax, interest, or penalties.

**Topics of focus for tax authorities**
The IRD does not have any specific compliance program; however, when an audit is done, the focus is mainly on the detection of basic non-compliance, such as omission of income, inclusion of non-deductible expenses, and classification of items between expenses and capital items.

Significant developments

The Federal Tax Authority amended the frequency of the information report related to the transactions between Argentine residents and representatives of foreign individuals or entities. The information regime will have to be compiled on a monthly basis (previously, the obligation to report was every four months). This information regime must be compiled by individuals acting on behalf of foreign individuals or entities that take part in some transactions (stock exchange and open market transactions, donations deductible from the income tax, settlements to insurance brokers, private school fees, payment of expenses of private countries and buildings).

On June 2012, the Argentine government unilaterally terminated the application of the double tax treaties (DTTs) signed with Spain and Chile.

During 2012/13, Argentina signed several tax information exchange agreements (TIEAs) based on Organisation for Economic Co-operation and Development (OECD) regulations with Andorra, Azerbaijan, Costa Rica, India, Islas Caimán, Macedonia, and San Marino Bahamas, which are in force from 1 January 2013.

On 16 October 2012, the DTT signed by Argentina and Russia in 2001 entered into force and took effect from 1 January 2013.

On 11 March 2013, Argentina and Spain signed a new DTT, which covers a lack of treaty protection as a result of the unilateral termination by Argentina, in June 2012, of the 1992 DTT. The text of the new DDT does not differ substantially from the previous, as regards reduced rates of withholding on dividends, interest, and royalties. However, the new text does not include the benefit of no taxation in the Personal Property Tax for shareholdings in companies in Argentina by Spanish residents. Once the ratification and exchange of instruments process is concluded, the DTT will be applicable as of 1 January 2013, the date in which the former 1992 DTT ceased its effects.

The Argentina fiscal authority (AFIP) requires advance information and its authorisation in order to import goods, to pay imports of goods and services, to purchase foreign currency for travel and tourism, and for making payments abroad related to certain concepts, such as interests, dividends, and rentals. In that sense, since 2012 AFIP has implemented a new condition prior to importation of goods into the customs territory, where importers must submit to AFIP the Advance Import Sworn Statement (DJAI) prior to issuing the purchase order or the document used for setting up overseas purchase operations for all final import destinations for consumption. For the import of goods, it is necessary to get prior ‘conformity’ not only for paying the import of goods through the Single and Free Exchange Market (MULC) but also for importing goods for consumption.
Argentina

AFIP also requires some importers of services, depending on the nature of the service and the amount of the agreement, to complete an informative procedure for debts abroad, called the Advance Services Sworn Statement (DJAS). Importers are allowed to request access to the MULC once they have informed AFIP of the operation and it is at the exit status.

On 1 February 2013, AFIP established a new informative regimen called Advanced Statement of Payments Abroad (DAPE), which implies the filling of information referring to payments that individuals residing in the country make abroad related to (i) financial debts incurred when purchasing goods abroad and sold to third countries; (ii) interests; (iii) profits and dividends; (iv) courier operations; (v) some import regimes; and (vi) rental of machinery, tools, and other movable assets. As with the DJAS, importers are allowed to request access to the MULC once they have informed AFIP of the operation and it is at the exit status.

On 6 July 2012, the possibility to create the Formation of Residents’ External Assets was suspended. According to the rules of the Formation of Residents’ External Assets, Argentine residents were allowed to remit foreign currency abroad at up to a monthly limit of 2 million United States dollars (USD).

During 2012, the export of goods and services, which are subject to the inflow of the total collections, suffered reductions in their terms. Sales between related companies only have 30 calendar days from the shipment date. Notwithstanding the terms for each tariff code, when they are collected abroad, the funds must be brought into the MULC within 15 days. The inflow of services export receipts must be done within 15 days from its collection.

The payments for some import services made to related companies, or to bank accounts or companies located in countries with low taxation, require prior authorisation of the Argentine Central Bank when exceeding USD 100,000 annually.

Since April 2013, a new payment plan was established by AFIP in which taxpayers are allowed to pay off their tax debts, customs, and social security resources due until 28 February 2013 within 120 instalments at a low interest rate (1.35% monthly). Penalty interest and fiscal fines are not forgiven.

Taxes on corporate income

Profits tax
The rate of profits tax on net taxable business profits is 35%. Legal entities resident in Argentina are subject to tax on Argentine and foreign-source income. Resident legal entities are able to claim any similar taxes actually paid abroad on foreign-source income as a tax credit. The tax rate applies on net income determined on a worldwide basis.

Corporations, limited liability partnerships (LLPs), and branches, as well as other entities, are required to make a flat and final income tax withholding of 35% from dividend payments to resident or non-residents beneficiaries, to the extent that the amount of such dividends exceeds the net taxable income determined at a corporate level in accordance with the general tax rules.
Argentina-source income (e.g. royalties, interests) received by foreign entities is subject to withholding tax (WHT) in full and final settlement at source (see the Withholding taxes section).

**Tax on minimum notional income**
In addition to the profits tax, there is a tax on minimum notional income. The rate is 1% on the value of fixed and current assets. The presumed tax, imposed annually, is applied only in excess of the profits tax of the same fiscal year. In addition, payment of this presumed tax, not offset by the profits tax, will be treated as payment on account of profits tax chargeable during a maximum period of ten years.

Banking and insurance entities are only subject to this tax on 20% of the corresponding taxable assets.

**Local income taxes**
*See Turnover tax in the Other taxes section.*

---

**Corporate residence**
Corporate residence is determined on the basis of centres of activity, which may be the location of a company’s economic activity or management activity.

**Permanent establishment (PE)**
Centres of activity in Argentina of non-Argentine corporations are treated as PEs.

---

**Other taxes**

**Value-added tax (VAT)**
VAT is assessable on the sales value of products (e.g. raw materials, produce, finished, or partly finished merchandise) with few exemptions, most services (e.g. construction, utilities, professional and personal services not derived from employment, rental), and on import of goods and services. The VAT rate is 21%, although certain specific items are subject to a 27% or 10.5% rate. VAT is payable by filing monthly tax returns.

The increased rate of 27% applies to ‘utilities services’ (e.g. telecommunications, household gas, running water, sewerage, and energy) not rendered to dwelling-purposes real estate.

A reduced rate of 10.5% applies to certain transactions, including (but not limited to) the following:

- Construction of housing.
- Interest and other costs on personal loans granted to final consumers by financial institutions.
- Sales and imports of living bovine animals, supply of publicity and advertising in some specific cases.
- Any passenger transportation operating inside the country when the distance does not exceed 100 km.
- Medical assistance in some specific cases.
- Certain capital goods, depending on the Custom Duty Code.
VAT paid on purchases, final imports, and rental of automobiles not considered as inventory cannot be computed by the purchaser as a VAT credit. The same tax treatment applies to other services, such as those provided by restaurants, hotels, and garages.

**VAT exemptions**

Among others, the following transactions are exempt from VAT:

- Sales of books, ordinary natural water, common bread, milk, medicine, postage stamps, aircraft used in commercial activities and for defence or internal safety, and ships or boats acquired by the national government.
- Supply of certain services, such as services rendered by the government (national, provincial, or local) or by public institutions; school or university education provided by private institutions subject to public educational programmes; cultural services supplied by religious institutions; hospital and medical care and related activities; transportation services for sick or injured persons in vehicles specially designed for the purpose; tickets for theatre, cinema, musical shows, and sport events; the production and distribution of motion picture films; local transport of passengers (e.g. taxis, buses) up to 100 km; and international transportation.
- Rental of real estate for housing purposes.

**VAT exemption on importation**

The following import transactions are also exempted from VAT:

- Final importation of goods qualifying for exemption from customs duties under special regimes for tourists, scientists and technicians, diplomatic agents, etc.
- Final importation of samples and parcels exempted from customs duties.

**VAT export reimbursement regime**

Exports of goods and services are treated as zero-rated transactions. Nevertheless, input VAT related to these transactions can either be used as a credit against output VAT or refunded pursuant to a special procedure.

Services rendered within the country shall be deemed to be exports if they are effectively applied or economically utilised outside the country.

Exporters must file an export return with the tax authorities, reporting the VAT receivables related to their exports to be reimbursed on VAT paid in relation to the export operations. This return has to be filed within the following tax period in which the export took place. A report certified by a public accountant with respect to the value, registrations, and other characteristics related to the refund must be attached to the export return.

The tax credit related to exports and other taxable activities can only be refunded in proportion to the exports, and can be fully refunded to a cap of 21% of the freight on board (FOB) value of the exported products.

There is no specific method stated in the legislation for allocating the tax credit related to exports, but taxpayers are able to use any methods of calculation that would be suitable to their business model. This calculation has to be approved by the tax authorities.

Finally, it is important to highlight that the tax authorities have to approve the tax credit to be refunded.
Electronic invoicing

The electronic invoicing regime is mandatory only for specific businesses according to Appendix I of R.G. 2485 (i.e. software development, consulting, accounting and audit services, exporters, advertising, mobile telecommunications, supplied services to government, etc.), and it is optional for the rest of the taxpayers. In order to opt for applying this regime, an authorisation must be obtained from the tax authorities. As a result, the tax authorities will assign an Electronic Authorization Code (Código de Autorización Electrónico or CAE).

The fiscal authorities are also allowed to nominate taxpayers to apply this regime, even though their activities are not included in Appendix I of R.G. 2485. This notification will be duly made to such taxpayers.

It is important to highlight that the fiscal authorities are still expecting to make this regime mandatory for all the taxpayers in 2013.

Import and export duties

The levels of import duty currently range between 0% and 35%, except in cases where a specific minimum duty is applied or that involve merchandise with a specific treatment. These percentages were established considering the individual competitive conditions prevailing in different production sectors and the relative advantages of contributing to the introduction of equipment and technology for local industry. In general, merchandise originating from Latin America Integration Association (LAIA) countries is entitled to preferential duty.

In the case of export transactions, goods are valued based on the FOB clause and the approach is based on their theoretical value, rather than a positive basis as in the case of imports.

Definitive exports of all goods are subject to export duties. The rates vary from 5% to 45%, depending on the tariff code of the merchandise (while 5% is typical, higher rates are considered for exports of agricultural products or hydrocarbons).

Excise taxes

Excise tax is assessable on a wide variety of items sold in Argentina (not on exports), principally on tobacco, wines, soft drinks, spirits, gasoline, lubricants, insurance premiums, automobile tyres, mobiles services, perfumes, jewellery, and precious stones. The bases of the assessment and tax rate of some items are as follows:

<table>
<thead>
<tr>
<th>Products</th>
<th>Rates (%)</th>
<th>Nominal</th>
<th>Effective</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tobacco</td>
<td>16/20/60</td>
<td>19.05 to 28</td>

<td>4.17 to 8.70</td>
<td></td>
</tr>
<tr>
<td>Jewellery and precious stones</td>
<td>20</td>
<td>25</td>
<td></td>
</tr>
</tbody>
</table>

Stamp tax

Stamp tax is levied by each of the 24 jurisdictions, and applies principally to contracts and agreements, deeds, mortgages, and other obligations, agreements, and discharges of a civil, financial, or commercial nature of which there is written evidence or, in
certain instances, that are the subject of entries in books of account. The average tax rate is 1% applicable on the economic value of the contract.

In the city of Buenos Aires, the standard tax rate is 0.8% of the aggregate amount of the transactions, contracts, and deeds that are subject to the stamp tax. Special rates of 0.5%, 1%, and 2.5% are also established; and, in the case of transactions involving uncertain consideration, a fixed tax of 1,000 Argentine pesos (ARS) is applicable (on the fulfilment of certain conditions).

**Turnover tax (gross income tax)**
Each of the 24 jurisdictions into which Argentina is divided imposes a tax on gross revenues from the sale of goods and services. Exports of goods are exempt, and certain industries are subject to a reduced tax rate. Rates, rules, and assessment procedures are determined locally.

Information on tax rates of the economically largest jurisdictions is provided as follows:

<table>
<thead>
<tr>
<th>Jurisdiction</th>
<th>General rate (%)</th>
<th>Commerce (%)</th>
<th>Services (%)</th>
<th>Industry (%)</th>

**Tax on financial transactions - on credits and debits on bank accounts**
Bank account movements (deposits and withdrawals) are subject to a national tax on financial transactions at the following rates:

- 0.6% of deposits and withdrawals in bank accounts opened in local financial entities.
- 1.2% of any transactions made in a bank without using a bank account.

The 34% or 17% of the tax on financial transactions effectively paid on bank account deposit transactions (0.6%) and movement of funds (1.2%), respectively, is creditable against profits tax and minimum notional income tax and/or respective tax advances.

**Wealth tax**
An annual wealth tax is levied on the shares or holding in the capital of local companies owned by individuals or undivided estates domiciled in Argentina or abroad, and/or companies and/or any other type of legal person domiciled abroad. It shall be assessed and paid directly by the local company, as a full and final payment on behalf of the shareholders (the issuing company has the right to recover from the shareholder the tax paid).

The applicable tax rate is 0.5% on the value of the participation, which is generally calculated on the difference between assets and liabilities arising from the financial statements closed at 31 December or during the respective fiscal year.

**Payroll taxes**
Foreign and local nationals working for a local company must be included on the local payroll and will be considered as local employees for local labour, tax, and social
security purposes. Both the local company and the employees will be subject to the corresponding regulations.

All the compensation paid in Argentina or abroad for work performed for the local company will be considered as local compensation and should be reported to the tax and social security authorities, as the case may be, and included in the salary slips and recorded in the local labour books.

The local employer must withhold income tax on an actual and monthly basis and make the corresponding payments to the tax authorities through monthly WHT returns. Individual tax rates range from 9% to 35%, and personal deductions are available.

The local entity must issue salary slips every month for each employee included on its payroll, considering the total compensation mentioned above.

Employer social security contributions add between 23% and 27% to payroll costs. There is a compulsory 13th-month salary. There is no restriction regarding the employment of foreigners, provided they hold working visas.

Workers’ (Employees’) Compensation: Argentine labour regulations determine different forms of compensation for employees. These include, but are not limited to, the following:

- Vacation compensation.
- Compensation in a case of termination of employment contract with employee (prior notice of dismissal and to a severance payment, both based on seniority).

Main social taxes and contributions assessable on salaries are as follows:

<table>
<thead>
<tr>
<th>Social taxes and contributions</th>
<th>Percentage of gross monthly earnings (%) (including 13th month salary)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pension fund</td>
<td>Employer (2, 3) 17/21 Employee (1) 11</td>
</tr>
<tr>
<td>National unemployment fund</td>
<td>-</td>
</tr>
<tr>
<td>Family allowances fund</td>
<td>-</td>
</tr>
<tr>
<td>Social services institute for pensioner</td>
<td>-</td>
</tr>
<tr>
<td>Social health care plan</td>
<td>6</td>
</tr>
<tr>
<td>Total</td>
<td>23/27</td>
</tr>
</tbody>
</table>

Notes

1. Social security charges borne by employees are applicable up to a monthly salary cap, which currently amounts to ARS 24,473.92 (updated as of March 2013).
2. Contributions made by employers are applicable to total compensation without application of any cap.
3. Employers’ contributions to the national unemployment fund, family allowances fund, and social services institute for pensioners is paid at a unified rate of 17%. The rate is increased to 21% for companies whose main activity consists of rendering services or commerce, provided the amount of their average total annual sales for the last three years exceeds USD 9.9 million (at the current exchange rate of USD 1.00 = ARS 5.2, equivalent to ARS 51.5 million).
**Argentina**

---

**Branch income**

The rate of profits tax on net taxable profits from Argentine sources and from activities performed abroad by the branch is 35%. Branches are also subject to minimum notional income tax.

---

**Income determination**

**Inventory valuation**

Inventory valuation is based on the latest purchase. Thus, the last in first out (LIFO) method may not be elected for tax purposes. Conformity between book and tax reporting is not required.

**Capital gains/losses**

Capital gains and losses attract normal profits tax treatment, except that losses from the sale of shares and other equity interests may be offset only against the same type of income.

**Capital gains on equity**

Capital gains derived by foreign shareholders from the disposal of shares (either publicly or privately held) of Argentine companies (SAs) are currently tax exempt. Although, with certain risk, it may be argued that capital gains derived from the sale of quotas of the capital of Argentine limited liability companies (SRLs), or when the shares are sold by foreign ‘offshore’ entities, may also benefit from this tax exemption. Moreover, it’s important to highlight that there is no mechanism to pay the tax when the transaction is between foreign parties.

**Capital gains on debt**

Capital gains derived by foreign beneficiaries from the sale of either public or privately held securities (títulos valores), such as ‘obligaciones negociables’ (to the extent it is accepted that they are equivalent to securities), notes issued by financial trusts (títulos de deuda), or public bonds (i.e. government bonds) should be exempt from profits tax.

Any other capital gain derived from the sale of debt, not covered by the above exemption, should be subject to normal tax treatment (i.e. withholding of 17.5% of gross proceeds or withholding of 35% on the actual gain).

**Dividend income**

Dividends, including stock dividends, are not included in the tax base by the recipient if distributed by an Argentine company (see the Withholding taxes section for additional information). However, tax is levied if the dividends are distributed by a foreign company.

**Foreign exchange gains/losses**

The general rule is that foreign exchange results (gain or losses) have to be recognised on an accrual basis. However, in some cases, cash basis is applicable.

Foreign exchange losses can only be offset against foreign-source taxable income.

**Foreign income**

Foreign income received or held undistributed abroad (in case of investments in non-stock companies) by resident corporations is subject to tax. Argentina does not have a
controlled foreign company (CFC) regime. Tax losses from a foreign source can only be offset against income from a foreign source.

**Deductions**

Expenses necessary to generate, maintain, and preserve taxable income, and related to the company activity, are usually tax deductible, with a few exceptions, to the extent they are fair and reasonable.

**Depreciation and depletion**

Depreciation is generally computed on a straight-line basis over the technically estimated useful life of the assets or, alternatively, over the standard useful life (e.g. machinery and equipment: 10 years; furniture: 10 years). Depreciation of buildings and other construction of real estate is 2% per annum on cost (on a straight-line basis), unless it can be proved that useful life is less than 50 years.

Depreciation of automobiles whose original cost exceeds ARS 20,000 is not deductible. Related expenses (gasoline vouchers, insurance, rentals, repairs and maintenance, etc.) are deductible up to an amount of ARS 7,200 per automobile per year.

Conformity between book and tax depreciation is not required.

Profit or loss on the sale of depreciated property is determined with reference to cost less depreciation, restated for inflation as at March 1992, and is included in ordinary taxable income.

Percentage depletion is available for natural resources (mines, quarries, woods).

**Goodwill**

The amortisation of goodwill cannot be deducted for profits tax purposes. At the moment of sale, the taxable gain will be calculated by deducting the cost expenses (purchase price).

With regards to self-developed goodwill, at the moment of sale the cost will be the amount of expenses incurred in obtaining it, provided it was not deducted for profits tax purposes before.

**Research and development (R&D)**

R&D expenditures (for the development of intangible assets) may be deducted when they are incurred or amortised over not more than five years, at the option of the taxpayer. Expenditures for R&D in connection with the creation of fixed assets form part of the assets’ cost and are amortised over their useful lives.

The amortisation of brands and licences acquired can be deducted if they have a limited term of duration.

**Start-up expenses**

Start-up expenses may be deducted when incurred or amortised over not more than five years, at the option of the taxpayer.
Argentina

**Interest expenses**
The tax law establishes a restriction on the deductibility of interest arising from debts of a financial nature, contracted by taxpayers with controlling/related non-resident entities, for profits tax purposes (*see Thin capitalisation in the Group taxation section*).

**Bad debt**
The deduction of accounting bad debts is not allowed for tax purposes. However, if the debts fulfill certain characteristics (i.e. bankruptcy, prescription, among others), and with the corresponding supporting documentation, they can be deducted.

**Charitable contributions**
When made to societies and associations expressly exempt from assessment of profits tax, donations are admissible deductions at up to a maximum of 5% of the donor’s net taxable profits, provided certain requirements are fulfilled.

**Representation expenses**
If adequately documented, representation expenses are permissible deductions at up to 1.5% of the amount of salaries accrued during the fiscal year. According to the Regulatory Decree, representation expenses are payments made in order to represent the company in the market, to improve and maintain its relationship with suppliers and clients, etc.

**Directors’ fees**
Amounts up to the greater of 25% of after-tax profit or ARS 12,500 per individual are deductible in the financial year to which they apply, provided they are approved and available for the director before the due date of the tax return, or in a later year of payment.

**Fines and penalties**
In relation to deductibility of penalties to determine net taxable income, taxpayers are not allowed to deduct sums paid on their own account corresponding to penalties, litigation costs, penalty interest, and other costs derived from tax obligations; however, they are allowed to deduct income tax assessable on them and paid on behalf of third parties as long as it relates to the obtaining of taxable income.

**Taxes**
Except for profits tax and the tax on minimum notional income, all taxes are deductible.

**Net operating losses**
Net operating losses may be carried forward for five years. Loss carrybacks are not permitted. Furthermore, foreign-source losses must be offset against income from similar sources.

Losses on derivatives and hedging transactions can only be offset against income from the same transactions.

**Payments to foreign affiliates**
Transactions between related parties should be at arm’s length (*see Transfer pricing in the Group taxation section for more information*). This principle is extended to transactions with companies located in low or no tax jurisdictions. Payments to foreign affiliates or related parties and companies located in low or no tax jurisdictions that represent income of Argentine source are tax deductible, provided they are paid before the due date for filing the tax return and the corresponding withholding is paid to the
tax authorities. Otherwise, they would be deducted in the fiscal year in which they are paid.

Technical assistance and services that involve transfer of technology should be covered by agreements duly registered with the National Institute of Intellectual Property for information purposes. These transactions are governed by the Transfer of Technology Law.

**Group taxation**

Group taxation is not permitted in Argentina.

**Transfer pricing**

The transfer pricing regulations governing inter-company transactions adopt principles similar to those of the OECD, pursuant to which companies must comply with the arm's-length principle in order to determine the value of goods and services in their transactions with foreign-related companies.

The following taxpayers, among others, must generally file, together with their annual profits tax return, a supplementary return (transactions encompassed by regulations governing transfer prices) and transfer pricing study:

- Taxpayers carrying out transactions with related individuals or legal entities set up, domiciled, or located abroad. Two or more persons are considered to be related parties when one of them takes part, either directly or indirectly, in the administration, control, or capital of the other, or when a person or group of persons takes part, either directly or indirectly, in the administration, control, or capital of those persons.
- Taxpayers carrying out transactions with related individuals or legal entities set up, domiciled, or located in countries with low or no taxation, whether related or not.
- Argentine residents carrying out transactions with PEs located abroad and owned by them.
- Argentine residents, owners of PEs located abroad, for transactions carried out by the latter with persons or other type of related entities domiciled, set up, or located abroad.

The Regulatory Decree provides specific rules to determine the fairness of the transfer pricing methodology. These rules are similar to those set by the OECD and contemplate six methods, including the following:

- Comparable uncontrolled price (CUP).
- Resale price method (RPM).
- Cost plus.
- Profit split method (PSM).
- Transactional net margin method (TNMM).
- Special method for export of goods with prices quoted in transparent markets.

There is no specific hierarchy, as each particular transaction must be analysed based on the assets, functions, and risks involved and on information available. Regulations establish that the most appropriate method is that which reflects the economic reality of the transactions.
Argentina

**Thin capitalisation**

Thin capitalisation rules apply as a restriction on the deductibility of interest arising from debts of a financial nature that are contracted by taxpayers with controlling non-resident entities and can be summarised as follows:

- For interest subject to a 15.05% withholding (i.e. paid on loans granted by certain banking institutions), the portion of interest stemming from financial liabilities exceeding two times the shareholders’ equity is not deductible for tax purposes and is treated as dividends.
- Interest subject to a 35% WHT is fully deductible.

According to the Regulatory Decree of the Income Tax Law, the thin capitalisation rules are also applicable to any case where a lower withholding rate of 35% is applicable (for instance, interest payments to a controlling company resident of certain tax treaty countries).

**Controlled foreign companies (CFCs)**

Argentina does not have a CFC regime.

---

**Tax credits and incentives**

**Foreign tax credit**

National taxpayers are entitled to recognise a tax credit for any taxes actually paid in the countries where they have obtained foreign-source income, in respect of similar national taxes, up to a cap, which is the increase in their Argentine tax liability due to the inclusion of the foreign income. Any excess not offset in a given fiscal year may be carried forward to the next five fiscal years.

**Province of Tierra del Fuego Regime**

Companies set up in the province of Tierra del Fuego enjoy a general tax exemption and important benefits in customs matters. Tax exemption includes profits tax, tax on minimum notional income, tax on personal wealth, and excise tax. The VAT benefit consists of the release from payment of the technical balance of the tax (VAT debits less VAT credits). Also, a reduction of the prevailing rate for tax on financial transactions and the exemption from taxation on the transfer of fuels is contemplated.

**Mining activity**

An investment regime for mining activity is applicable to natural and legal persons. Mining ventures included within this regime enjoy fiscal stability (i.e. tax rates will remain basically the same) for a term of 30 years, except for VAT, which will adjust to the general regime. Furthermore, the regime grants incentives for profits tax, tax on assets, import duties, and any other tax for introduction of certain assets. Additionally, this mining investment law established an exploration recovery regime for the mining investors, which allows the reimbursement of the VAT credit balances originated in the mining exploration activity.

This regime allows the reimbursement of such VAT credits after a 12-month period since the expenditure was incurred, and only if it has been paid.

Through specifics regulations, the authorities established the requirements (e.g. filing a tax return, filing a report certified by a public accountant with respect to the VAT, a presentation to the Mining Secretary) to be followed by the taxpayers in order to apply for this benefit.
Argentina

**Forestry**
There is an investment regime for plantation, protection, and maintenance of forests. It contains rules similar to those for mining activity tax incentives:

- Fiscal stability for a period of 30 years. The period may be extended to 50 years.
- Refund of VAT resulting from the purchase or final importation of goods, leases, or services effectively for forestry investment projects in a period of less than 365 days.

**Export incentives**
Exports of goods and services are exempt from VAT and excise taxes. The temporary importation of raw materials and intermediate and packaging goods for the manufacture of products for export is free from duties with the obligation of offering sufficient guarantees for the import. A reimbursement regime is in place for VAT credits paid to suppliers in relation to the export activity.

**Oil and gas industry**
The Argentine government has granted attractive benefits to the oil and gas sector to encourage the exploration of the nation’s hydrocarbons reserves.

This legislation grants special incentives to investments in underdeveloped regions, speeding reimbursement of VAT (after a three-month period, inputs will be credited against other federal taxes or returned to the taxpayer), exemption from import duties, and offering an accelerated depreciation (over three years) for profits tax purposes.

In addition, a three-year relief from minimum notional income tax, which is levied at 1% rate on the company assets, is provided by the law.

The incentive package will be in effect for 15, 12, or ten years, depending on whether the activities are performed in areas identified as (i) continental platform, (ii) within the country other than continental platform, and (iii) currently in production, respectively.

The benefits noted above will apply to the exploration permits granted as of the enactment of the law (1 November 2006) and up to five years, for the cases mentioned in (i), four years, for those described in (ii), and three years in the latter cases.

There also exists a Promotion Regime, which grants similar benefits for the exploration of alternative sources of energy (e.g. wind energy).

**Biotechnology industry**
A promotional tax regime for development and production of modern biotechnology has been introduced. Pursuant to this law, the beneficiaries of the projects that qualify for this regime are entitled to the following benefits:

- Profits tax: accelerated depreciation of capital goods, special equipment, parts, or components of newly acquired goods destined for the promoted project.
- VAT: Early refund of the tax applicable to the assets acquired for the project.
- Social security contributions: the amount representing 50% of social security contributions actually paid on the payroll salaries involved in the project shall be converted into a tax credit bond that may be applied to payment of national taxes.

**Software industry**
Under a software promotion regime, taxpayers carrying out software-related activities as their main purpose may qualify for the following benefits:
Argentina

- Fiscal stability for a ten-year period covering national taxes.
- Reduction of social security charges (70% of these charges may be credited against certain national taxes).
- Profits tax relief (up to 60% of the applicable tax).

While most of the software-related activities qualify for the fiscal stability benefit, the remaining incentives only apply to software R&D, quality control procedures, and software exports.

Some changes were introduced in 2011, and the period of application was extended until 31 December 2019. The possibility of using a bond tax credit, given by an amount equal to 70% of contributions to the social security system paid by the employer, as an ‘advance payment’ of the income tax was provided. There is also an increase in the control mechanisms.

**Province incentives on local taxes**
Most of the provinces have legislation establishing incentives for the development of industries within their boundaries, especially industries that utilise or develop their natural resources and provide work for their residents. The incentives, in general, consist of exemptions from provincial and municipal taxes.

Various provinces have investment promotion regimes. Even when there are certain differences among these regimes, generally they include the following incentives:

- Exemption from provincial taxes, such as turnover tax, stamp duty, real estate tax.
- Reduced public utility rates.
- Support for infrastructure and equipment projects.
- Facilities for purchase, rental, or lease without charge of public property.

These regimes are not automatically applied, and a special procedure should be followed to be entitled to the respective benefits.

**Free trade zones**
The free trade zones offer exporters the possibility to import free from customs duties, statistics rate, and VAT all the necessary equipment for construction of a ‘turnkey plant’ within the zones. Furthermore, exporters manufacturing within the zones enjoy the benefit of buying supplies and raw materials from third countries, without having to pay duties or taxes that lead to increased prices.

Customs authority regulating these goods considers them as stored in a third country; consequently, incoming products are subject to inspection with the sole purpose of classifying quantity and type. In other words, goods enjoy a duty-free status until they enter the Argentine customs territory. Goods may remain in the free zone for a maximum period of five years.

**Withholding taxes**

**Equalisation corporate tax**
Corporations, LLPs, and certain other entities are required to make a flat and final income tax withholding of 35% from dividend payments or profit distributions to resident or non-resident payees, to the extent that the amount of such dividends or profit distributions exceeds the taxable income of the distributing company, determined by applying the general tax rules (i.e. without considering any exemptions, abatements,
and other adjustments arising from special promotional laws) included in their retained earnings at the end of the fiscal year, immediately preceding the date of payment or distribution.

Other payments
Other payments to residents and to non-residents are subject to WHT rates as follows:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>Interest (%) (1)</th>
<th>Royalties (%) (1, 2)</th>
</tr>
</thead>
<tbody>

Notes

1. Withholding from payments of interest and royalties to non-residents is based on a flat rate of 35% applied to an assumed percentage gross profit margin. This margin is not contestable, but the resultant rate may be limited by bilateral treaty. Under the 1998 tax reform, the general margin for interest paid for credits obtained abroad is 100%. However, a margin of 43% is applicable (i) if the debtor is a local bank; (ii) if the creditor is a foreign financial institution located in a country not considered as a low or no tax jurisdiction, or in countries that have signed an agreement with Argentina for exchange of information and have no bank secrecy laws, which are under the supervision of the respective central bank; (iii) if the interest is paid on a loan dedicated to the purchase of tangible assets other than cars; (iv) if the interest is paid on debt certificates (private bonds) issued by local companies and registered in certain countries that have signed an agreement with Argentina for the protection of investments; and (v) on interest paid on time deposits with local banks. ‘Royalties’ covers a variety of concepts. The rates given in this column relate specifically to services derived from agreements ruled by the Foreign Technology Law, as follows:
   • Technical assistance, technology, and engineering not obtainable in Argentina: 21% (35% on assumed profit of 60%).
   • Cessation of rights or licences for invention patents exploitation and technical assistance obtainable in Argentina: 28% (35% on assumed profit of 80%). On non-registered agreements, the rate is 31.5% (profit of 90% is assumed) or 35% (profit of 100% is assumed), depending on the case.

Several other concepts of ‘royalties’ are subject to rates that, in turn, may be limited by treaty. A broad sample of these concepts and the non-treaty effective rates are set forth in Note 2.
Argentina

2. Payments to non-residents (only) for ‘royalties’, rentals, fees, commissions, and so on, in respect of the following are subject to withholding at the rates given below on the basis of assumed gross profit margins (Note 1) unless limited by treaty. The treaty concerned should be consulted to determine any limitation in each case.

<table>

</tr>
</tbody>
</table>

3. The higher tax rate is applicable on non-registered taxpayers. On interest paid to corporations by financial entities or stock exchange/open market brokers, income tax must be withheld at 3% (10% if not registered); individuals are tax exempt.

4. Resident corporations and individuals who are registered for tax purposes are subject to 6% withholding (28% if not registered).

5. Interest is exempt if paid on credit sales of machinery or other equipment, specific bank loans at preferential rate or loans by public entities.

6. The treaty limits taxation of interest to 20% (registered).

7. The 10% rate is applicable to interest on credit sales of capital equipment, any bank loan, or any financing of public works; otherwise, 15%.

8. Interest paid on loans with guarantee of the Norwegian Institute for Credit Guarantees or paid in relation to imports of industrial equipment is tax exempt.

9. On 26 June 2012, the DTT with Chile was terminated.

10. Deduction of actual costs and expenses may be optionally exercised.

11. Gains on the sale of shares are exempt, except for companies, PEs, or other entities residing abroad whose main activity based on their statutes consists of investments to be made outside of their country of formation. These entities are subject to income tax withholding at the definite flat rate of 17.5%.

---

**Tax administration**

**Taxable period**
Tax is assessed on a fiscal-year, self-assessment basis.

**Tax returns**
The due date for filing the profits and the minimum notional income tax return is during the second week of the fifth month after the fiscal year end. Tax returns are filed electronically.

**Payment of tax**
Instalment payments on account of both profits tax and minimum notional income tax must be made in the course of the tax year. The instalment payments must be made on a monthly basis, beginning in the first month after the due date of filing of the tax returns.

**Penalties**
Penalties derived from tax infractions may be applied by tax authorities, as follows:
• Failing to file the tax return: Fines range between ARS 200 and ARS 400 (approximately USD 38 and USD 76).
• Tax omission or incorrect tax determination: Fines range from 50% to 100% of unpaid taxes or incorrect tax calculation.
• Tax avoidance: Fines range between two and ten times the avoided tax.
• Certain tax infractions may be penalised by closing the business premises for three to ten days. In addition, fines ranging between ARS 300 and ARS 30,000 (approximately USD 57 and USD 5,700) may be imposed.
• Simple evasion: Entities or individuals evading payment of social security contributions or withholdings, or both, payable to the tax authorities under the social security regime, through deceitful declarations, malicious concealment, or any fraudulent or deceitful procedure, either through action or omission, in excess of ARS 80,000 per fiscal period, shall be punished with two to six years' imprisonment. Such amount will be ARS 400,000 in the case of taxes, it being applied by tax and by fiscal year.
• If the infringement qualifies as aggravated evasion: Imprisonment could be extended from three years and six months to nine years in certain situations.

Interest on late payments
Late payment of taxes is subject to a monthly 3% interest rate. Interest will start accruing on the day after the filing due date.

Tax audit process
The tax authorities are entitled to audit taxpayers within the statute of limitations period. Audits consist of revising the calculation of any national or provincial tax based on formal requirements. Where any assessment is issued by the tax authorities, the taxpayer is entitled to either accept it or file a claim. Assessments can be done under a real or estimated basis, depending on the specific case and the information that the taxpayers have on their transactions. In the case that the taxpayers do not accept the assessment during the administrative period, they can claim against Tax Courts before any judicial process.

There are no specific provisions about e-auditing.

Statute of limitations
The actions and powers of the tax authorities to determine and require payment of federal taxes, and to implement and enforce fines and closures planned, prescribe:

• five years in the case of registered taxpayers, as well as in the case of unregistered taxpayers who are not legally required to register with AFIP; or that, having that obligation, had not fulfilled them and, spontaneously, regularise their situation, and
• ten years in the case of unregistered taxpayers.

Topics of focus for tax authorities
Topics of focus for tax authorities include the following:

• Increasing cooperation: tax information exchange.
• Tax treaty network still under review.
• Tax treaty benefits: substance over form principle.
• High penalties and tax criminal law.
• Transfer pricing (inter-company charges and export of commodities to international intermediaries).
• Wealth tax: applicability on branches and the use of Montevideo Agreement.
Argentina

- Possible tax modifications still under analysis: the initiative seeks to make substantial changes in the profits tax, with focus on financial income (taxability on securities sales), limitation of payments to tax havens, and the computation of tax losses.

**Other issues**

**Exchange control regime**
As a result of the devaluation of the Argentine peso at the beginning of 2002, several regulations were issued to limit the transfer of money abroad. They have been made more flexible and up-to-date.

Regulations referring to the entrance of funds to the country, the obligation of liquidation of foreign currency in the Exchange Market of payments of exports of goods and services, remain in force. The terms to comply with the liquidation obligation vary between 60 and 360 days.

There are no restrictions for the payment abroad of interest, dividends, profits, royalties, and other commercial payments duly supported by the corresponding documentation. Payment abroad for other concepts may be subject to further filing requirements.

In addition, it should be particularly highlighted that a rule issued by the central bank in mid-2005 requires a compulsory one-year temporary deposit equivalent to 30% of funds brought by non-residents to Argentina, which must be kept in a reserve (encaje) for the term of one year. This deposit is made in foreign currency and does not earn interest.

There are some exceptions; for instance, direct investments, such as interest in Argentine companies (minimum 10%) or real estate, are not subject to this rule, nor are funds that were borrowed for the acquisition of fixed assets and the re-payment term is longer than two years.

**Legal entities**
Foreign companies in Argentina, carrying out their business or activity in Argentina, must have a local legal vehicle, of which the most common legal entity types are the following:

- Branch.
- Corporation (Sociedad Anónima or SA).
- Local Limited Liability Company (Sociedad de Responsabilidad Limitada or SRL).

Argentine corporations and LLPs, as Argentine residents, are subject to the Argentine tax system. Branches of foreign companies, whatever the nature of their activities, are taxed under the same rules as those applicable to corporations and LLPs.

Several documents are required to register an entity with the relevant authorities. Some of said documentation must be filed in the original language, duly translated and certified with the Apostille issued pursuant to The Hague Convention or legalised by the Argentine Consulate of the company’s place of origin.
At present, the minimum capital requirement to incorporate an SA is ARS 12,000 (approximately USD 2,300). There are no special requirements regarding the minimum amount of capital for SRLs.

A branch does not require capital contributions unless it is engaged in certain specific activities (e.g. banking and financing). The branch must carry its financial statements separately from those of the foreign company.

The three legal types are subject to the same legal, tax, and accounting regulations.
Significant developments

The following amendments generally became effective in January 2013:

- The new Turnover tax came into force. Generally, this tax replaces the value-added tax (VAT) and (or) corporate income tax (CIT) obligations for small and medium enterprises. The implementation of the Turnover tax aims to reduce the amount of data to be filed by the taxpayers to the tax authorities. The tax rate is differentiated in accordance to the income type (see Turnover tax in the Other taxes section).
- Some companies are obligated to keep accounting records by accounting software with the technical capability to register book-keeping in accordance with the requirements defined by the government of Armenia. For companies with gross income exceeding 1 billion Armenian drams (AMD) for the previous year, the software must be applied as of 1 July 2013. For companies with gross income exceeding AMD 500 million for the previous year, the software must be applied as of 1 July 2014.

Taxes on corporate income

Armenian resident entities, and non-resident entities doing business in Armenia through a branch or a representative office, are liable for CIT. Armenia taxes residents on their worldwide income; non-residents are subject to CIT only on their Armenian-source income.

The standard CIT rate is 20%.

Taxable income is defined to be the difference between a taxpayer’s gross income and deductible expenses:

- Gross income encompasses all revenues received by a taxpayer from all economic activities, unless the revenues are expressly exempted under the law.
- Deductible expenses encompass all necessary and documented expenses that are directly related to conducting business or earning profit, unless a specific provision in the law restricts the deduction.

Taxpayers engaged in agricultural production are exempt from CIT on that income.

Note that resident entities, branches and representative offices of foreign entities, and individual entrepreneurs are required to withhold income tax at source on payments to non-residents not having a permanent establishment (PE) in Armenia (see the Withholding taxes section).
Investment funds pay CIT based on 0.01% of net assets.

As of 1 January 2013, the Turnover tax came into force, which generally replaces the CIT obligations for small and medium enterprises. The tax rate is differentiated in accordance to the income type (see Turnover tax in the Other taxes section).

**Presumptive tax system**

Taxpayers engaged in certain activities must use the presumptive tax system. Under this system, the taxpayer pays a fixed tax based on the location and area occupied by the business and will not be required to pay CIT or VAT. The rate of tax depends on the activity undertaken, as follows:

<table>
<thead>
<tr>
<th>Type of business</th>
<th>Base data</th>
<th>Adjustment ratio</th>
<th>Monthly presumptive tax payment (AMD)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Activity related to vehicles</td>
<td>For activities carried out by trucks: the lading in terms of tons</td>
<td>Depends on region: 1.1 to 1.9</td>
<td>2,000 times the product of the base data and the adjustment ratio(s)</td>
</tr>
<tr>
<td></td>
<td>For activities carried out by buses: the number of seats</td>
<td>Depends on region: 0.5 to 1.2</td>
<td></td>
</tr>
<tr>
<td>Gambling house (casinos) organisers</td>
<td>Number of game tables</td>
<td></td>
<td>5 million times the base data</td>
</tr>
<tr>
<td>Gambling machine exploiters</td>
<td>Area in square metres</td>
<td>18,750 times the base data</td>
<td></td>
</tr>
<tr>
<td>Lottery games organisers</td>
<td>Total value of lotteries sold during a month</td>
<td>25% of base data</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Number of computers for totalisators</td>
<td>75,000 times the base data in case of totalisators</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Number of websites provisioned for organising internet totalisator</td>
<td>1 million times the base data if connected to the global internet network</td>
<td></td>
</tr>
</tbody>
</table>

Activities connected with gambling house, gambling machine exploitation, and lottery games will be invalid from 1 January 2014.

**License payments**

Individuals (individual entrepreneurs) and legal entities engaged in certain activities should make license payments, which replace CIT and/or VAT. Under this system, the taxpayer pays a fixed tax based on the location and the business activity base data. License payment rates for some activities are mentioned below.

<table>
<thead>

| Technical maintenance and repairs of vehicles | Workplace | 15.0 | 12.0 | 12.0 | 6.0 | 3.0 |

**Local income taxes**
Armenia does not have any local government taxes on income.

**Corporate residence**
Resident entities are legal and business entities whose existence is established under Armenian law. Non-resident entities are those whose existence is established under foreign law.

**Permanent establishment (PE)**
The domestic definition for a PE essentially adopts the definition for PE found in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

**Other taxes**

**Value-added tax (VAT)**
Armenia’s current VAT law is based loosely on the principles of the European Union (EU) VAT Directive. Armenia operates the input-output model of VAT. VAT-registered persons may deduct the VAT paid on their inputs from the VAT charged on their sales and account for the difference to the tax authorities.

The standard rate of VAT on domestic sales of goods and services and the importation of goods is 20%. Exported goods and related services are zero-rated. Advertising, consulting, engineering, legal, accounting, translation, data processing, banking, financial, and insurance services provided to non-residents are zero-rated if the non-resident’s place of business is outside Armenia. Various supplies, including most financial and education services, are VAT-exempt.

Services supplied in Armenia by non-residents that are not registered in Armenia are subject to application of a VAT reverse charge.

The liability to account for VAT is based on taxable turnover for transactions implemented in the previous calendar year. If those revenues exceed AMD 58.35 million, the taxpayer must account for VAT on all sales. If the previous year’s revenues were less than AMD 58.35 million (e.g. the taxpayer is in the first year of operations), the taxpayer is obligated to account for VAT only on sales in the current year that exceed AMD 58.35 million. Taxpayers whose revenues are below the AMD 58.35 million threshold may voluntarily elect to account for VAT.

Businesses producing/importing excisable goods are required to account for VAT on their sales.
Generally, VAT payers should file VAT returns on a quarterly basis. However, taxpayers with sales (excluding VAT) in the previous calendar year exceeding AMD 100 million are required to file VAT returns monthly. VAT payments must be made and VAT returns filed within 20 days following the end of the reporting period.

As of 1 January 2013, the Turnover tax came into force, which generally replaces the VAT obligations for small and medium enterprises (see Turnover tax below for more information).

**Customs duties**
The Customs Code of Armenia regulates customs procedures in Armenia. The most frequently used customs regimes are import for free circulation, temporary import, temporary export, and export for free circulation.

Customs levies are payable by persons whose goods cross the customs border of Armenia. Customs levies consist of customs duties, taxes, duties, and other mandatory charges.

Generally, customs duty is imposed as an *ad valorem* duty, which means that the tax is calculated as a percentage of the customs value of the goods. Armenia uses only two *ad valorem* rates: 0% and 10%.

Customs duty is collected on the customs value of the imported goods. Importers must take into account specific rules (based on World Trade Organization [WTO] rules) to determine the customs value on which the import tax will be applied. The general rule is that the customs value will be the price actually paid or payable for the goods when sold for export to Armenia.

Customs fees are payable within three days from the provision of customs services, but not later than the release of goods from customs.

**Excise tax**
Excise tax is payable on alcoholic beverages, tobacco products, and petroleum products, whether imported or produced domestically, as follows:

<table>
<thead>
<tr>
<th>Goods</th>
<th>Unit of measure</th>
<th>Tax rate</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

* Note that this is valid as of 1 April 2013.

Taxpayers producing excisable goods in Armenia should submit a quarterly excise tax return and pay the tax liability by the 20th day of the month following the quarter.

### Land tax

Land tax is assessed and collected at the municipal level and is paid bi-annually by landowners and the permanent users of state-owned land. Tax on rented land is levied on the lessor. The land cadastre (valuation system) is used to determine the value of the land. Land tax for agricultural land is calculated at 15% of the net income determined by the cadastral evaluation. For non-agricultural land, the rate is 0.5% to 1.0% of the cadastral value of the land.

### Property tax

Property tax is assessed and collected at the municipal level on buildings, motor vehicles, and means of water transport. The tax rate on buildings is 0.3%, which is paid on the cadastral value.

Property tax for motor vehicles with up to ten seats is calculated as follows:

<table>
<thead>
<tr>
<th>Capacity (horsepower)</th>
<th>Tax rate (per horsepower)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 120</td>
<td>AMD 200</td>
</tr>
<tr>
<td>121 to 150</td>
<td>AMD 300</td>
</tr>
<tr>
<td>151 to 250</td>
<td>AMD 300 + AMD 1,000 per horsepower in excess of 150</td>
</tr>
<tr>
<td>251 and over</td>
<td>AMD 500 + AMD 1,000 per horsepower in excess of 150</td>
</tr>
</tbody>
</table>

Property tax for motor vehicles with more than ten seats is calculated as follows:

<table>
<thead>
<tr>
<th>Capacity (horsepower)</th>
<th>Tax rate (per horsepower)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 200</td>
<td>AMD 100</td>
</tr>
<tr>
<td>201 and over</td>
<td>AMD 200</td>
</tr>
</tbody>
</table>
The annual property tax on motorcycles is calculated at the rate of AMD 40 for each horsepower of tax base. The annual rate of property tax on watercraft is calculated at AMD 150 for each horsepower of tax base.

Beginning from the fourth year after the year of production, the tax base for motor vehicles and means of water transport is reduced by 10% per year, up to a maximum reduction of 50%.

Legal entities should calculate property tax and pay this to the municipal budget on a semi-annual basis. The semi-annual property tax calculations should be submitted to the local tax inspectorates not later than the 20th day following the reporting half-year.

**Transfer taxes**
Armenia does not have any transfer taxes.

**Stamp taxes**
Armenia does not have any stamp taxes.

**Turnover tax**
As of January 2013, the Turnover tax is payable by commercial organisations and individuals (individual entrepreneurs). The Turnover tax replaces VAT and (or) CIT obligations for small and medium enterprises. Mainly, the taxpayer cannot be charged the Turnover tax if the turnover from the transactions of the previous calendar year exceeds AMD 58.35 million. Note that there are also some other requirements to which the taxpayer should meet to become a Turnover taxpayer.

The Turnover tax is imposed on the reporting period income (revenue) as follows:

<table>
<thead>
<tr>
<th>Type of income</th>
<th>Tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trading activities</td>
<td>3.5</td>
</tr>
<tr>
<td>Production activities</td>
<td>3.5</td>
</tr>
<tr>
<td>Rental income, interest, royalties, and assets’ disposal (including estate property)</td>
<td>10.0</td>
</tr>
<tr>
<td>Income on notary activities</td>
<td>20.0</td>
</tr>
<tr>
<td>Income on other type of activities</td>
<td>5.0</td>
</tr>
</tbody>
</table>

Turnover taxpayers are required to submit tax calculation on a quarterly basis and make tax payment within 20 days following the end of the reporting period.

**Branch income**
When a non-resident company conducts business in Armenia through a subdivision (i.e. a branch or a representative office) and maintains separate accounting records for that subdivision, taxable income generally should be determined on the same basis as for resident entities. Note that a subdivision is taxable on dividends received from Armenian companies and may not carry forward losses, which differs from the treatment of resident entities (see the Deductions section for more information). However, the subdivision may be able to overcome these restrictions under a relevant tax treaty.

If it is not possible to determine taxable profit based on the direct method (i.e. taxable income less deductible expenses) for the subdivision of the foreign entity in Armenia, income is determined based on a method agreed upon between the taxpayer and the tax authorities.

Armenia
Armenia

and the tax authorities. The law explicitly recognises the allocation method (the taxpayer allocates a portion of its worldwide income and expenses to Armenia) as a possible approach.

Armenia has no special tax rules for non-commercial representative offices established to engage in liaison-type activities. Such offices are subject to the normal CIT, but an exemption from CIT may be available under a relevant tax treaty if the activities of the representative office are not sufficient to constitute a PE for the foreign entity.

See the Withholding taxes section for a list of countries with which Armenia has a tax treaty.

\textbf{Income determination}

Taxable profits are defined as a positive difference between a taxpayer’s gross income and deductible expenses. Gross income encompasses all revenues received by a taxpayer from all economic activities, unless the revenues are expressly exempt from inclusion under the law. Deductible expenses encompass all necessary and documented expenses that are directly related to conducting business or earning profit, unless a specific provision in the law restricts the deduction.

\textbf{Inventory valuation}

Inventories are generally stated at the lower of cost and net realisable value. First in first out (FIFO) and average cost methods of valuation are generally used for tax purposes.

\textbf{Capital gains}

Capital gains are included in taxable income. Non-residents are taxable on the realised capital gains from the increase of the value of the assets (including shares) located in Armenia.

\textbf{Dividend income}

Dividends derived by an Armenian entity from another Armenian entity are exempt from tax. Dividends derived by non-residents from Armenian entities are subject to 10% withholding tax (WHT), unless relief is available under a relevant tax treaty (see the Withholding taxes section).

\textbf{Interest income}

Interest income attracts normal CIT treatment.

\textbf{Foreign income}

Resident entities are liable to Armenian tax on their worldwide income. Foreign taxes should be available for credit against Armenian tax liabilities, up to the amount of Armenian tax payable on the foreign income.

There are no provisions in Armenian tax law allowing any tax deferral on income earned abroad.

\textbf{Deductions}

Expenses incurred in the furtherance of a taxpayer’s business activities generally are deductible, unless a specific provision in the law provides otherwise. Expenses that are not supported by relevant documentation are not deductible.
Depreciation and amortisation
Fixed assets are required to be depreciated using the straight-line method.

The maximum rates per annum for depreciating fixed assets are:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Maximum depreciation rate per annum (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Other industrial and commercial buildings, constructions and transmission devices</td>
<td>5</td>
</tr>
<tr>
<td>Hotels, resorts, rest houses, educational institutions</td>
<td>10</td>
</tr>
<tr>
<td>Robot equipment and assembly lines</td>
<td>33.3</td>
</tr>
<tr>
<td>Calculating devices and computers</td>
<td>100</td>
</tr>
<tr>
<td>Fixed assets with the value up to AMD 50,000</td>
<td>100</td>
</tr>
<tr>
<td>Industrial and commercial buildings, constructions and transmission devices located in a designated disaster area (currently Gyumri)</td>
<td>100</td>
</tr>
<tr>
<td>Other fixed assets</td>
<td>20</td>
</tr>
</tbody>
</table>

Land may not be depreciated.

Intangible assets may be amortised using the straight-line method over the lesser of the asset's useful economic life or ten years.

Goodwill
Payments with respect to goodwill and amortisation of goodwill are not deductible in Armenia.

Start-up expenses
Start-up expenses are fully deductible, provided they are properly documented.

Interest expenses
As a general rule, interest is deductible if the related debt is used to fund business activities of the taxpayer and the interest rate is not more than double the Central Bank of Armenia rate (currently, the deductible interest rate is capped at 24%).

In addition to the existing cap (twice of the Armenian Central Bank's settlement rate), the deductible interest expense payable within the tax year should not exceed:

- nine times the value of net assets of a taxpayer, if borrowings received from banks and credit organisations or
- twice the value of net assets of a taxpayer, if borrowing received from other entities.

The net assets are a positive difference between the taxpayer's assets and liabilities. The value of net assets should be considered based on results of the reporting year.

The restriction does not apply to the banks and credit organisations and to the funds borrowed from international organisations specified by the government. The restriction also does not apply to the interest payable on funds attracted from publicly placed debt instruments (securities).
Bad debt
A taxpayer is entitled to deduct bad debts if the taxpayer creates a reserve and allocates the amount of bad debt in the following proportions:

- Up to 90 days from the due date: 0%.
- From 91 to 180 days from the due date: 25%.
- From 181 to 270 days from the due date: 50%.
- From 271 to 365 days from the due date: 75%.

Beyond 365 days, bad debts of less than AMD 100,000 may be deducted. For larger debts, the company would need to have pursued the debt through the courts before a deduction may be taken.

Charitable contributions
Charitable donations and contributions to non-profit organisations are deductible in amounts of up to 0.25% of gross income.

Lease payments
Lease payments on operating leases are deductible. The lessor claims a deduction for depreciation of the leased assets. Financial leasing is treated for tax purposes as if a sale had been made. The lessee includes the value of the property in the relevant group of fixed assets and claims depreciation charges. The lessee also deducts the interest and commission elements of the lease payments in the period in which they are payable. Similarly, the lessor recognises taxable income for the total principal amount of the lease at the time when the asset is transferred and recognises the interest and commission element of the payments over the term of the lease.

Fines and penalties
Commercial fines and penalty expenses are deductible for CIT purposes. Fines and penalties paid to the state or municipal budgets are not deductible.

Taxes
Non-refundable (non-credited) taxes (e.g. property tax, land tax, expensed VAT), duties, and other obligatory payments are deductible for CIT purposes.

Other significant items
The deductibility of the following common items is limited for CIT purposes:

- Expenses incurred for advertising outside Armenia are limited to the greater of 3% of gross income or 20% of the value of services or goods exported from Armenia.
- Expenses for training of staff outside Armenia is limited to the lesser of 4% of the gross income of the reporting year or AMD 3 million per employee.
- Expenses for foreign trips are limited to 5% of the gross income of the reporting year.
- Representative expenses are limited to the lesser of 0.5% of the gross income of the reporting year or AMD 5 million.

Net operating losses
Companies are entitled to carry forward losses to the five subsequent income years. Armenian law does not allow the carryback of losses.

Payments to foreign affiliates
Payments to foreign affiliates are deductible if they meet the normal tests for deductibility.
**Group taxation**

There are no group taxation provisions available in Armenia.

**Transfer pricing**

Armenia does not have formal transfer pricing rules. The tax authorities may apply market prices in limited cases, but this does not happen very often.

**Thin capitalisation**

Armenia does not have thin capitalisation rules. However, there are certain limitations on deductibility of interest expenses (see Interest expenses in the Deductions section).

**Tax credits and incentives**

Taxpayers engaged in agricultural production are exempt from tax on that income.

Resident companies that listed on the Armenian Stock Exchange by 31 December 2012, with at least 20% of their shares publicly held by 100 or more shareholders, were entitled to a reduction in CIT during the 2009 to 2012 income years.

Provided such companies prepared and published their financial statements under International Financial Reporting Standards (IFRS), they were entitled to a 50% reduction in their CIT (up to a maximum of AMD 300 million per year). The incentive is repayable (plus penalties) if the company delists, liquidates (other than for bankruptcy), or reduces the public issue below 20% before 31 December 2015.

**Foreign tax credit**

Tax residents are allowed to credit foreign taxes paid on income received abroad against their Armenian tax liabilities. The amount of foreign tax credit is limited to the amount of Armenian tax that would arise from the equivalent income in Armenia.

**Withholding taxes**

Payments to non-residents are subject to the following WHT rates:

- Payments for insurance, reinsurance, and transportation are subject to WHT at the rate of 5%.
- Dividends, interests, royalty, income from the lease of property, and increase in the value of property are subject to WHT at the rate of 10%.
- Other income (from services) received from Armenian sources is subject to WHT at the rate of 20%.

WHT is required to be transferred to the budget not later than the 20th day of the month following the payment of income. A WHT return should be submitted by 20 February following the reporting year.

WHT rates for non-residents may be reduced under a relevant tax treaty.

11. The 0% rate applies to the interest that shall not be taxed by other contracting country in similar cases. The 5% rate applies in other cases.

12. The ownership threshold for the 10% rate is 30%. The 15% rate applies in other cases.

---

**Tax administration**

**Taxable period**

In Armenia, the taxable period is the calendar year.

**Tax returns**

The annual CIT return for resident entities must be filed by 15 April.

Presumptive payment payers should submit application on base data and adjustment ratios twice a year or by the 15th day of the following month (depending on the type of activities).

**Payment of tax**

The tax corresponding to the CIT return for resident entities is payable by 25 April.

Taxpayers are also required to make advance CIT payments by the 15th day of the last month of each quarter. Each advance payment is equal to 18.75% of the CIT paid for the previous year. For payments before the previous year’s tax is calculated (e.g. January to March), tax is paid based on the last filed tax return, and an adjustment is made in the first advance tax payment made after the previous year’s tax is calculated to correct the amount paid. If advance payments exceed the CIT liability for the year, the excess may be refunded.

Advance payments are not required if a taxpayer’s profit for the preceding year was less than AMD 500,000. Thus, newly established companies do not need to make advance payments until 25 April of the year following the start of operations.

Branches of foreign companies pay advance CIT biannually, but only if their CIT for the preceding year exceeded AMD 2 million. Each advance payment is equal to one-fourth of the CIT paid for the previous year. The annual tax return for branches is filed by 15 April. The corresponding tax is payable by 25 April.

Taxpayers are required to make presumptive tax payments within 15 days after the end of each month.
Armenia

**Tax audit process**

**Risk based audits**
For the purposes of planning audits, the authorities develop risk criteria that are approved by the Armenian government. Based on the risk criteria, entities are classified into the following three categories:

- High risk entities.
- Medium risk entities.
- Low risk entities.

The authorities should approve the audit plan (list of audit targets) for the following year before 1 December of the preceding year.

**Tax audits**
The tax authorities may carry out scheduled audits a maximum of once each year for high risk taxpayers, once each three years for medium risk taxpayers, and once each five years for low risk taxpayers.

Business entities must be notified of the audit in writing at least three days before the scheduled audit.

For normal business entities, the scheduled audit should be carried out within 15 business days, although the period may be extended by up to ten days. For companies whose annual revenue exceeds AMD 3 billion, the period may be extended by up to 75 business days.

The actual period of the inspection for normal business entities should not exceed 30 business days and 90 business days for large companies.

Before starting an audit, the tax inspector must present a written order to the taxpayer outlining the scope and period of the tax audit. The written order specifies the names of the officials who may participate in the audit.

**Statute of limitations**
The statute of limitations is three years.

**Topics of focus for tax authorities**
There are no specific topics of focus for the tax authorities. In practice, the tax authorities perform a comprehensive audit of the taxpayer’s books, covering all taxes and mandatory payments.
Significant developments

Tax reform
During the latter half of 2012, the government of Aruba and representatives of the employers and employees organisations have been discussing tax reform for Aruba. As a result of this so-called ‘social dialogue’, the aforementioned parties signed a protocol (on 9 November 2012) in which the different proposed amendments are outlined. In the protocol, a consensus is reached on the following topics pertaining to corporations:

- Tax reform.
- Improvement of the investment climate.

Participants to the social dialogue commit to the arrangements (as discussed below) of the protocol, provided that the final decision after internal decision-making within the organisation they represent has to be published within two weeks. After the arrangements are definite, it is assumed that the arrangements will enter the legislation process. Moreover, parties have concluded to establish, prior to June 2014, a committee aiming to advise on further tax reform for Aruba. For now, the parties to the social dialogue agreed on the following (pertaining to corporations).

Corporate income tax (CIT)

Introduction of a payment on return system
In 2013, the government of Aruba intends to introduce a so-called ‘payment on return system’ (voldoening op aangifte [VAS] system) for CIT (hereinafter ‘POR CIT system’). Currently, CIT is paid after the assessment is imposed by the tax authorities. Under the POR CIT system, the CIT due has to be paid together with the filing of the tax return, resulting in the advancing of the collection moment by the tax authorities.

Based on the advice of the tripartite working group advising on the tax reform bill, it appears that if the tax reform bill is passed in 2013, then the POR CIT system will effectively be implemented only as of 2014. Representatives of the employers organisation have expressed their concerns as to possible cash flow problems that could occur when (i) applying both the POR CIT system and the preliminary assessment system and (ii) an assessment is imposed in the future for a tax year in which the POR CIT system was not applicable. Based on statements in the abovementioned advice, it appears that it is not the intention that the preliminary assessment system will remain existent next to the new POR CIT system. The aforementioned representatives also expressed a concern as to the proposed three month filing/payment period of the POR CIT system.

The specific execution of the POR CIT system is not clear as yet; however, in the signed protocol, parties concluded that the remarks of the participants in the social dialogue
Aruba

will be taken into consideration as much as possible when the final draft of the bill is drawn up.

**Deduction of interest on acquisition of participation**
In order to stimulate investment/take-overs in Aruba, the government of Aruba proposes to introduce a temporised deduction of interest costs for the purchase of a local participation. The deduction could be claimed only after two years after the acquisition of the shares and for an (as it seems still to be determined) ‘x’ amount of years. Based on the current law, the aforementioned deduction is not allowed.

**Imputation payment company (IPC) reform**
The government of Aruba proposes to change the current IPC regime, considering that few companies are using the regime in its current form.

The following changes are proposed:

- The general CIT rate for the IPC would be 10%.
- The new IPC has an exemption for dividend withholding tax (WHT). This would imply that the current refund system would not apply anymore.
- Hotels are classified in four categories for the CIT. The applicable CIT rate would depend on the revenue per available room (Revpar). The four categories are:
  - Revpar 185 United States dollars (USD): the CIT rate is 10%.
  - Revpar USD 175: the CIT rate is 12%.
  - Revpar USD 160: the CIT rate is 15%.
  - Diamond status: the CIT rate is 12%.
- Additional requirements for the use of the IPC regime by hotels could possibly be further arranged between the government of Aruba and the Aruba Hotel and Tourism Association (AHATA).
- Abolish the condition for a special audit (the so-called ‘expert declaration’).
- Abolish the requirement that an individual, resident of Aruba (subject to income tax), is the director of the IPC.
- A transitional regime would apply for current IPCs.

**Introduction of environmental levy**
The government of Aruba proposes to introduce an environmental levy for the following business activities:

- Rental cars: USD 1 per day, per car. The levy is proposed to be implemented for ‘tours’ (which term is still to be defined) as of 1 November 2013.
- Regular hotels: USD 3 a night per occupied room. In September 2014, there would be an evaluation on the environmental tax for hotels.
- Timeshare resorts: The environmental levy amounts for the following categories would be:
  - USD 10 per studio per stay.
  - USD 15 for a one bedroom apartment per stay.
  - USD 25 per stay for other rooms.

In September 2014, there would be an evaluation on the environmental tax for the timeshare resorts.

The environmental levy will not be charged from cruise tourists. The government of Aruba will scrutinise, prior to mid 2013, the competitiveness of the cruise ships market in the area and will further analyse and evaluate whether it will implement the environmental levy for cruise tourists in 2014.
Taxation of timeshare resorts
The government of Aruba proposes to amend the (as we understand the CIT) law by which timeshare associations would be allowed to form a reinvestment reserve. The aforementioned reserve would be added back to taxable income after ten years if the investment did not take place.

Tourist levy for all inclusive hotels
The government of Aruba proposes to increase the taxation basis of the tourist levy for all inclusive hotels from 40% to 50% of the total price of the stay package.

Gaming tax
The Parliament of Aruba currently disposes of a bill in which the gaming tax law will be amended. The main amendment of the aforementioned bill is that the levy system for the gaming tax would change from 4% of the ‘drop’ to x% of the ‘win’. In the protocol, the government of Aruba declares that it will aim for the aforementioned bill to be treated in a general assembly, provided that the (x) percentage to be established is budget neutral based on the figures of 2011. In 2013, the government of Aruba will evaluate this further.

Excise duty on cigarettes
The government of Aruba proposes to increase the excise duty on cigarettes to 1.91 Aruban florins (AWG) per cigarette package (20 pieces).

Improvement of the investment climate
The government of Aruba is working on an amendment of the respective State Ordinances. Please find below a summary of the proposed changes based on the signed protocol of the Social Dialogue.

Economic zone in San Nicolas
The government of Aruba proposes to create a special taxation zone in San Nicolas (the so-called ‘economic zone’) in order to stimulate business in San Nicolas. Certain incentives will apply to stimulate certain business activities. The government of Aruba will assign a committee in order to introduce the economic zone.

Import duties for hotels
In order to improve the quality of the tourist product of Aruba, the government of Aruba proposes to reduce the import duties for furniture and fittings from 22% to 11%, if at least USD 10,000 is invested per (hotel) room.

Investment allowance
In order to further promote the synergy between private and public investments, the government of Aruba proposes to extend the investment allowance of 6% for the years 2013 and 2014. The condition that the investment must take place with an Aruban company or entrepreneur would still apply. We understand that the other conditions for the deduction would also apply. Moreover, the protocol states that the maximum of AWG 20 million would still apply; however, this statement is not clear considering that under the current regulation there is no maximum for the investment allowance.

Taxes on corporate income
Resident companies are taxed on their worldwide income. Non-resident companies are taxed on the following Aruba-source income:
Aruba

- Profits allocated to a permanent establishment (PE) or permanent representative in Aruba.
- Profits from real estate located in Aruba.
- Profits on loans secured by a mortgage on real estate located in Aruba.

Aruba has a flat CIT rate of 28%. Aruba also has special tax regimes (e.g. the imputation payment company, the Aruba exempt company, the fiscal transparent company, the free zone company, the so-called oil refinery or oil terminal regime), which are ultimately taxed at a lower tax rate. For a full discussion of these special tax regimes, see the Tax credits and incentives section.

CIT is levied on the income as reflected in the profit and loss statement less any allowable deductions based on Aruba tax and case law.

Corporate residence

The place of residency of a corporation, association, society, foundation, or body is determined based on the circumstances. If the aforementioned entities are managed and controlled in Aruba, they will, in principle, be deemed to be resident in Aruba. If the legal form of an entity is governed by the Aruban law, then its place of residency will be considered continuously to be in Aruba.

Permanent establishment (PE)

If a foreign entity carries on a business through a PE or a permanent representative in Aruba, it will be subject to CIT in Aruba. While Aruba does not have rules and regulation as to the definition and interpretation of the term ‘permanent establishment’, a PE is deemed to exist if the place of execution of a building site or construction, excavation, maintenance, cleaning, assembly, or installation activities surpasses a period of 30 days. The memorandum of explanation refers to the commentary on Article 5 of the Organisation for Economic Co-operation and Development (OECD) model convention for the definition and interpretation of the term ‘permanent establishment’.

Other taxes

Turnover tax

Aruba does not have a value-added tax (VAT) or sales tax, but it does have a business turnover tax. Turnover tax is levied at the rate of 1.5% on the delivery of goods or services rendered in Aruba. Goods that are imported into Aruba are not subject to turnover tax. A turnover tax exemption is applicable on exports. The exemption is applicable if the entrepreneur has asserted that the turnover is realised in connection with the delivery of goods to customers located outside of Aruba, where the goods in connection with the delivery are sent or transported to a destination outside Aruba.

Goods are all physical objects as well as electricity, gas, heating, cooling, and such. Services are all performances rendered against payment. A payment is defined as all proceeds in connection with the delivery of goods or services rendered. If a payment is not completely made via money, the fair market value of the compensation should be taken into account.
In the case of goods, the place of the taxable event is either where the transportation starts (if sold abroad) or at the physical location of the goods at the moment it is delivered. The place of the taxable event with regard to services is generally the place where the entrepreneur is established or from where one has a PE from which the service is rendered. As an exception to the aforementioned general rule, the place of the taxable event for certain services (e.g. services related to a real property) is the place where the actual services are rendered (e.g. the place where the real property is situated).

Some exemptions apply. For example, no turnover tax is levied on the sale of immovable property if it is also subject to transfer tax. Furthermore, exemptions also apply to interest received or payments for hotel rooms or leasing of apartments (insofar as room tax has been paid on the proceeds) and casino revenues (insofar as gambling duties are due on these revenues).

The turnover tax is due within 15 days of the calendar month following the calendar month over which the turnover tax is due. A turnover tax return must be submitted to the tax authorities together with payment of the amount due.

**Import duties**
Import duties are imposed by a tariff, which is set as a percentage of the cost, insurance, and freight (CIF) value of the product. A classification rule has been published that categorises various imported products into groups. A tariff ranging from 0% to 50% is levied on the various groups of products.

**Excise duties**
Excise duties are imposed on products such as spirits, cigarettes, mineral oil, and distillery. The taxable base of the excise duties is based on either the weight, volume, and/or the amount of the aforementioned products.

**Ground tax**
A person or entity that, as of 1 January of each year, owns real estate in Aruba or uses real estate based on property rights is subject to ground tax. The ground tax is levied on the registered value, which is determined once every five years by the tax authorities, and can only be protested in the first year of the aforementioned period (taking into account the two month objection period as of the date of the assessment). The rate amounts to 0.4% of the registered value of the real estate minus a general exemption of AWG 60,000. If the real estate is not used or is empty for more than six months in a year, a reduction in the ground tax due can be requested from the tax authorities.

**Real estate transfer tax**
If real estate situated in Aruba is transferred, the buyer of the real estate must pay transfer tax on the sales price of the real estate (unless the value registered at the tax authorities is higher, in which case the registered value is the basis for the levy). The rate for the transfer of the legal ownership of real estate with a value not exceeding AWG 250,000 is 3%. The rate for the transfer of the legal ownership of real estate with a value exceeding AWG 250,000 is 6% (due on the total amount).

If shares in a real estate company are sold, no transfer tax is due.

**Stamp taxes**
Stamp taxes are, in principle, due on all documents as indicated in the Stamp State Ordinance. In practice, it is usually only levied on the documents used in the course of a legal suit.
Aruba

**Registration taxes**
Aruba does not impose registration taxes.

**Foreign exchange commission (FEC)**
An FEC is due when residents make a payment abroad in connection with certain legal transactions. The FEC is calculated as 1.3% of the payment abroad. Based on the State Ordinance, a payment abroad is considered:

- a payment with local currency or a payment from a florin account, whether or not by electronic transfer
- a payment with foreign currency or a payment from a foreign currency account, whether or not by electronic transfer, or
- a payment from a foreign currency account held abroad or from an inter-company account held by a person or entity abroad, whether or not by electronic transfer.

FEC is due to the extent the abovementioned payment is a result of one or more of the following legal transactions:

- the purchase of foreign instruments of payments or foreign monetary instruments
- obtaining control over receivables in one or more foreign currencies, or
- the crediting of an account in name of a non-resident of Aruba held at a foreign exchange bank or an institution abroad.

Furthermore, FEC will be levied on the purchase of foreign currencies with Aruban florins.

According to the policy of the Central Bank of Aruba, an exemption for the FEC applies when cash is transferred to a foreign bank account of an Aruban resident. In order to apply for this exemption, certain formalities must be met. First, the foreign bank account of the Aruba resident must be registered at the Central Bank of Aruba. Secondly, the Central Bank of Aruba must grant a so-called exemption for requirements. In addition, certain overviews of transactions regarding the foreign bank account must be filed with the Central Bank of Aruba on a quarterly basis.

**Tourist levy**
The tourist levy rate is 9.5% of the compensation (including charges) that the tourist pays for the use of lodging or a hotel room.

The taxable base for the tourist levy on timeshare units is set at:

- AWG 179 per day for studio units.
- AWG 193.95 per day for one bedroom units.
- AWG 223.75 per day for other than the abovementioned units.

Abovementioned fixed fees are not applicable in the event the time-share unit is made available to other guests that are not time-share guests. In that case, 9.5% tourist levy is due per day on the compensation paid by other guests for the use of the unit.

With regard to all-inclusive packages, the taxable base is set on 40% of the price of the all-inclusive package with a minimum of AWG 162 per day, increased with charges (e.g. service charges and energy charges).

Local citizens registered in the Aruban municipal register are not subject to the tourist levy. The owner of a condominium is also exempted from the tourist levy.
**Wage tax**
Wage tax is an advance levy to the personal income tax for employees. Wage tax has to be withheld as soon as an employment exists, and the employer is, in principle, the withholding agent. If employment involves a foreign employer, this employer only has to withheld wage tax if the employer has a PE in Aruba. The tax authority may, however, appoint a foreign employer as a withholding agent even if there is no PE.

**Social security premiums**
In Aruba, the following social security premiums are levied in connection with the wage tax.

**Old Age Pension/Widow and Orphans Pension (AOV/AWW) premium**
The AOV/AWW premium, which is paid by the employer and employee, is 13.5%, up to a maximum of AWG 8,782 (USD 4,934). The premium paid by the employer is 9.5%, up to a maximum of AWG 6,180 (USD 3,472). The premium paid by the employee is 4%, up to a maximum of AWG 2,602 (USD 1,462). The aforementioned percentages are to be calculated over the premium income, which is maximised at AWG 65,052 (USD 36,546) and is only due until the employee reaches the age of 60.

**General health insurance (AZV) premium**
The AZV premium, which is paid by the employer and the employee, is 11.5%, up to a maximum of AWG 9,775 (USD 5,492). The premium paid by the employer is 8.9%, up to a maximum of AWG 7,565 (USD 4,250). The premium paid by the employee is 2.6%, up to a maximum of AWG 2,210 (USD 1,242). The aforementioned percentages are to be calculated over the premium income, which is maximised at AWG 85,000 (USD 47,753).

**Sickness, accident, and cessantia insurance premium**
The sickness, accident, and cessantia insurance premium, which is only paid by the employer, consists of three parts: 2.65% for sickness insurance, a flexible rate of 0.25% up to 2.5% for accident insurance, and an amount of AWG 40 (USD 23) per employee year for the cessantia insurance. The rate of the accident insurance is dependent on the risk of the work performed. The premium income for the sickness and accident insurance is maximised to a wage of AWG 54,600 (USD 30,675). The cessantia is, in principle, paid upon dismissal of the employee by the employer, unless the dismissal is due to acts of the employee.

**Branch income**
Branch income is, in principle, determined according to the separate entity approach. Branches of foreign insurance companies apply a specific profit determination method. Furthermore, the transfer of profits to the head office is not subject to taxation.

Branch profits are subject to the normal CIT rate of 28%.

**Income determination**

**Inventory valuation**
Inventories may generally be stated on a last in first out (LIFO) or first in first out (FIFO) basis, provided the method chosen conforms to sound business practices. Conformity of book and tax reporting is not required.
Aruba

**Capital gains**
Capital gains are taxed as ordinary income. However, capital gains realised on the disposal of a shareholding qualifying for the participation exemption are tax exempt.

The participation exemption applies, in general, if an Aruban company holds shares or participation certificates in companies, associations, or foundations that carry on a business. If shares or participation certificates are held in a foreign entity, the participation exemption only applies if they are not held as an investment and the foreign entity is subject to a tax on profits.

The capital gain realised on the disposal of assets may be carried over to a special tax deferral reinvestment reserve but must be deducted from the acquisition costs of the new asset. In principle, this reinvestment reserve cannot be maintained for more than four consecutive years. If the reserve has not been used after four years, the remainder will be subject to taxation.

Capital losses are tax-deductible unless these losses are incurred on shares to which the participation exemption is applicable.

**Dividend income**
Provided the conditions of the participation exemption are met (see the Capital gains section above), an Aruban company is exempt from taxation on all benefits from the participation, including inter-company (cash) dividends.

Costs made in connection with the ownership of the participation (i.e. administration costs, interest, management expenses) are not deductible from the taxable result of the Aruba parent company.

**Stock dividends**
Stock dividends are allowed and treated as regular dividend income. The stocks will be valued at market value for tax purposes.

**Foreign income**
A resident taxpayer is subject to CIT on its worldwide income. Double taxation of certain foreign-source income is avoided by means of the exemption method. If there is no legal possibility to exempt income and prevent double taxation, the foreign tax paid can be claimed as a deduction.

An Aruba corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Undistributed income of foreign subsidiaries is not taxable.

The profits of a PE in Curaçao, St. Maarten, or the Netherlands, including the Caribbean Netherlands, are tax exempt in Aruba based on the tax arrangement with the Kingdom of the Netherlands. In the case of a PE outside the Kingdom of the Netherlands (i.e. other than the Netherlands, Aruba, Curaçao, and St. Maarten), the income realised through the PE, after deduction of foreign taxes, is tax exempt.

**Deductions**

**Depreciation**
Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The tax authority has issued the following estimated depreciation table:
<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
<th>Residual value (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>2/2.5</td>
<td>10</td>
</tr>
<tr>
<td>Renovation</td>
<td>10</td>

</tr>
<tr>
<td>Goodwill</td>
<td>20</td>
<td>0</td>
</tr>
</tbody>
</table>

The basis for depreciation includes all costs incurred with the purchase of an asset less the residual value. The straight-line method is customary; however, the declining-balance method is also acceptable.

As of 1 June 2010, accelerated depreciation has been introduced on assets that are used in the course of an industrial business and whose acquisition or production costs are above AWG 90 million. Aforementioned assets may be depreciated in ten equal annual parts. Note that IPCs can't apply this facility.

**Charitable contributions**
The allowable gift deduction is AWG 50,000. The institution must be established in Aruba and serve one of the following interests:

- Religious.
- Charity.
- Cultural.
- Sportive.
- Scientific.
- Public interest.

**Taxes**
Taxes paid by the company, with the exception of CIT, are tax-deductible. Taxes paid by the company with respect to the purchase of an asset (e.g. real estate transfer tax paid while obtaining real estate) should be capitalised in the cost of the asset.

**Net operating losses**
A net operating loss may be carried forward to the five years following the tax year in which the loss was incurred. If the net operating loss has not been offset against profits within this period, the remaining net operating losses will expire. Net operating losses incurred by an IPC and companies operating an oil refinery or oil terminal as of 1 January 2010 may be carried forward indefinitely. Carrybacks of net operating losses are not permitted.

**Payments to foreign affiliates**
If interest or other payments (e.g. remunerations paid for the use of material and/or immaterial goods or services rendered) are made to entities, these payments should
Aruba

be made at arm’s length. If the transaction is not at arm’s length, only the arm’s-length payment may be deducted from the taxable income.

Even if the transaction is at arm’s length, the interest or other payments may still not be deductible from the taxable result of the Aruban company unless the Aruban company asserts that one of the following circumstances is applicable:

• The receiving company is not affiliated (see below) to the Aruban company.
• The receiving company is subject to an effective tax rate of at least 15%.
• The shares in the receiving company are all held directly or indirectly by a company whose shares (for at least 50% of the outstanding shares and representing at least 50% of the voting rights) are listed at a qualified stock exchange.

An affiliation with the taxpayer is deemed to exist in each of the following cases:

• The taxpayer has an interest of at least ⅓ in another entity.
• An individual or entity has an interest of at least ⅓ in the taxpayer.
• A third party has an interest of at least ⅓ in another entity, while this third party also has an interest of at least ⅓ in the taxpayer.

If an arm’s-length payment is made to an affiliated company that is subject to taxation but pays an effective tax rate of less than 15%, only 75% of the payment made is allowed as a deduction.

---

**Group taxation**

**Fiscal unity**

Based on a policy of the Aruban tax authorities, Aruban resident public limited companies (naamloze vennootschap or NV) with at least 99% of the shares in other Aruban resident NVs can file a consolidated tax return (i.e. fiscal unity). In order to apply for this facility, a request must be filed with the Aruban tax authorities. Certain conditions must be met for the application of this regime, for instance the companies in the fiscal unity must be of the same tax regime. Advantages of this facility are that the recognition of inter-company profits may be deferred and losses may be offset with profits of other companies within the fiscal unity.

**Transfer pricing**

The arm’s-length principle (ALP) rule is codified in the Aruban State Ordinance Profit Tax (SOPT). If a corporate entity or individual participates, directly or indirectly, in the management, supervision, or the capital of two or more corporate entities, the conditions related to all transactions between these affiliated parties should be at arm’s length. The ALP is applicable on all transfer pricing between affiliated companies with regard to all mutual legal relations (e.g. purchase prices, management fees, remunerations for services provided, royalty payments). The conditions should be business like, whereas the same conditions should apply as would have if the same transaction had taken place with a third party.

A documentation obligation is applicable in the SOPT. The explanatory notes on the bill state that for the meaning and application of the ALP and the documentation obligation, the OECD guidelines for Multinational Enterprises and Tax Administration should be considered. The documentation obligation is applicable at the moment that a transaction takes place.
Non-compliance to the documentation obligation leads to a reversed burden of proof to the taxpayer. From the explanatory notes of the profit tax return forms, it seems that the tax authorities require, as a minimum amount of documentation about the transfer pricing method used, the reason why the method was chosen and a substantiation of the manner of how the price was determined.

In light of the extensive OECD guidelines and considering the small-scale economy of Aruba, it is unclear to what extent the aforementioned requirements and the OECD guidelines should be followed. Up to this moment, the legislature has not provided detailed implementation guidelines on the documentation obligation.

**Thin capitalisation**
Aruba does not have thin capitalisation rules.

**Controlled foreign companies (CFCs)**
Aruba does not have CFC legislation.

**Tax credits and incentives**
Aruban CIT legislation no longer provides tax incentives. The legislation does, however, provide incentives for certain special tax regimes that can be used to reduce the overall tax liability, such as the IPC, the Aruba exempt company, the fiscal transparent company, the free zone company, and the so-called oil refinery and oil terminal regime.

**Temporary investment allowance**
A temporary investment allowance applied for the year 2011 and 2012. In order to further promote the synergy between private and public investments, the government of Aruba proposed to extend the investment allowance for the years 2013 and 2014 in its signed Social Dialogue protocol of 9 November 2012. However, extension of the investment allowance for the years 2013 and 2014 was not approved, in anticipation of the amendment of the respective State Ordinances, in the beneficial policy as per 1 January 2013. This implies that the temporary investment allowance is not applicable from 1 January 2013 until further amendments of the respective State Ordinances are passed in this regard.

The investment allowance amounts to 6% of the investment. The investment allowance is a deduction on the taxable profit of a company and is applicable on investments greater than AWG 5,000 that are made in a financial year. One of the conditions is that the investment must take place with an Aruban company or entrepreneur. An Aruban company or entrepreneur includes an individual or legal entity that is respectively established and carries out business in Aruba. PEs of foreign legal entities are also included in the definition of an Aruban company for investment allowance purposes. Legal entities that are incorporated for the sole purpose of making investments in the context of the investment allowance do not qualify as an Aruban company or entrepreneur for investment allowance purposes.

Certain investments do not qualify for the investment allowance (e.g. land, houses, and cars for personal use; stocks and shares; goodwill; animals; investments designated for the use by third parties or as part of the exploitation of an oil refinery or an oil terminal). Furthermore, there are also certain transactions that do not qualify for the investment allowance (e.g. certain inter-company transactions).
Aruba

The investment allowance does not apply to investments by oil refineries, free zone companies, and IPCs.

If an investment on which the investment allowance was claimed is sold within six years after the start of the calendar year in which the investment took place, a capital disposal charge of 6% of the sales price is due.

**The imputation payment company (IPC)**

The IPC is, in principle, an NV or a limited liability company (vennootschap met beperkte aansprakelijkheid or VBA) that pays the regular CIT rate of 28%. However, when certain stringent conditions are met, the shareholder of the IPC can request an imputation payment of 26/72 of the (formal) dividend distributed. Provided that the 0% dividend WHT is applicable, the effective tax rate can be lowered to 2%.

In order to qualify for the IPC status, the following requirements must be met:

- The IPC must perform qualifying activities (see below) in Aruba.
- An Aruba-resident individual must be a member of the board of managing directors of the IPC.
- The articles of association state that the shares of the IPC are registered and that the directors keep a shareholders registry in which all shareholders are registered.
- The articles of association state that the financial statements are drawn up according to internationally accepted principles (like IAS or GAAP) and an audit by a qualified (group of) independent certified public accountant(s) is necessary.
- The board of managing directors must notify the tax authorities within a restricted period, and after the dividend has been distributed, that the shareholder will claim the imputation payment.

An independent certified public accountant must provide a yearly opinion regarding the compliance of the abovementioned first three requirements for the IPC status.

The shareholder must also meet certain requirements before the imputation payment can be granted, including:

- The shareholder must hold the (economic and legal ownership of the) shares for an uninterrupted period of at least 12 months to be eligible for the imputation payment.
- The shareholder must file a request (with several enclosures) with the tax authorities to receive the imputation payment.

The activities of the IPC are limited. The IPC company is not allowed to conduct non-qualified activities, no matter how small. The following activities are regarded as qualified activities:

- Exploitation of quality hotels. A quality hotel exists when the average RevPar amounts to at least AWG 354 (USD 200), the hotel has a hotel licence, and is operated at its own risk and account. Note that the RevPar can be changed annually.
- Exploitation of shipping enterprises.
- Exploitation of aviation enterprises.
- Developing, acquiring, holding, maintaining, and licensing of intellectual and industrial ownership rights.
- Insuring special entrepreneurial risks (captive insurance).
- Holding of shares or other participation certificates. The IPC may not hold more than 5% of low taxed shares or other participation certificates in foreign companies. The aforementioned are low taxed if they are subject to a ‘profit’ tax rate of at least 14%.
• Active financing (not being a credit institution) of other enterprises or companies, whether or not intra-group.
• Investing of funds, except in real estate and funds that are put at the disposal of group companies.
• Exploitation of a company aimed at generating sustainable energy.

The Aruba exempt company (AVV)
The Aruba exempt company (Aruba Vrijgestelde Vennootschap or AVV) is a particular form of a NV and is often used for international tax planning purposes. The AVV is, in principle, subject to CIT against the normal CIT rate and the dividend WHT. However, the profit of the AVV may be exempted completely from CIT and dividend WHT if its activities are limited to one or more of the following qualified activities:

• Holding of shares or other participation certificates. The IPC may not hold more than 5% of low-taxed shares or other participation certificates in foreign companies. The aforementioned are low taxed if they are subject to a ‘profit’ tax rate of at least 14%.
• Financing (not being a credit institution) of other enterprises or companies, whether or not intra-group.
• Investing of funds, except in real estate.
• Licensing of intellectual and industrial ownership rights.

As mentioned below, the AVV may, if certain conditions are met, also opt for the fiscal transparency regime for which it will not be subject to CIT and dividend WHT. In this case, the AVV is not required to perform the abovementioned qualified activities in order to enjoy the fiscal transparency status.

Fiscal transparent company
An NV, VBA, or AVV may opt, if certain conditions are met, to be treated as a partnership (fiscal transparent company). The fiscal transparent company is not subject to CIT, unless the fiscal transparent company carries on a business in Aruba. In that case, the shareholder will be subject to CIT with regard to the business it carries through a PE.

Dividends distributed by the fiscal transparent company to its shareholder are not subject to dividend WHT, since due to its transparency, all income and asset and liabilities are deemed to be attributed to its shareholder. The main requirements for this status is that all the company’s shares must be registered, and a notification for the application for this status must be filed with the tax authorities within one month after the company has been incorporated.

The free zone company
The free zone is a specially designated area in Aruba where goods can be stored, processed, adapted, assembled, packaged, displayed, spread out, or subject to other treatments or where services can be provided.

Services include activities consisting of maintenance or repairs of goods of a non-Aruba enterprise, maintenance or repairs abroad of goods of a non-Aruba enterprise, or providing advice to or research on behalf of a non-Aruba enterprise/institution/private person. Financial services, however, are not allowed.

Conditions
A free zone company has to be a limited liability company that is incorporated according to the laws of Aruba. The free zone company is also only allowed to perform qualifying activities in the free zone (a designated area in Aruba). If activities are performed that are not allowed, the company may be banned from the free zone.
Taxation

• All profits generated from activities abroad are subject to 2% CIT. The free zone company must have a licence to perform activities for residents. All activities performed for residents are subject to the regular CIT rate of 28%. The free zone company is allowed to generate a maximum of 25% of its turnover with local consumers.

• No import duties are due if the products are imported, used in the activities in the free zone in Aruba, and exported abroad.

• No turnover tax is due by the free zone company on cross-border supply of goods and/or the rendering of services.

• The free zone company is subject to the dividend WHT, which implies an effective tax rate of the free zone company of 11.8% or 6.9% (equal to the IPC).

• On request, the free zone company can be exempted from 1.3% foreign exchange commission (subject to approval of the Central Bank of Aruba). Normally, this approval is a formality and no foreign exchange commission is due by the free zone company.

Other characteristics

The free zone company does not have to apply for a business licence or an establishment licence. Furthermore, a free zone company is subject to a so-called free zone facility charge of 1.1% of the sales over its turnover.

Oil refinery or oil terminal regime

In connection with the aim of the Aruba government to improve the investment climate for the exploitation of oil refineries or oil terminals, a so-called oil refinery or oil terminal regime was introduced as of 1 June 2010. The regime regards application, under certain conditions, of a lower CIT rate. Oil refineries or terminals whose shares are all held directly or indirectly by a company listed on a stock exchange recognised by the Minister are subject to a 7% CIT rate, while all other oil refineries or oil terminals are subject to a rate of 12%.

An unlimited carryforward loss compensation applies for companies operating an oil refinery or oil terminal, and a 0% dividend tax rate applies for distributions from profits from the operation of an oil refinery and oil terminal.

Foreign tax credit

A tax credit applies to income from abroad that has been subject to tax at source or to another tax on income. The tax credit is allowed for the income tax levied abroad, but shall not exceed the Aruba profit tax that is attributable to that foreign income.

Withholding taxes

Dividend WHT

A dividend WHT is levied on all (formal and non-formal) dividend distributions of Aruba-resident entities. The tax rate is:

• 10% of the dividend distribution.

• 5% of the dividend distribution, if the shares (at least 50% of the outstanding shares and representing at least 50% of the voting rights) of the distributing company are listed on a qualified stock exchange. The same tax rate applies if all the shares of the distributing entity are held directly or indirectly by a company whose shares are (at least 50% of the outstanding shares and representing at least 50% of the voting rights) listed on a qualified stock exchange.
• 0% if the participation exemption (see Capital gains in the Income determination section) is applicable to the receiving company.

Dividends distributed from Aruba to countries within the Dutch Kingdom are subject to the Regulation for the Dutch Kingdom (the Regulation).

In certain situations, the Regulation reduces the rate of the dividend WHT from 10% to 7.5% or even 5%. The dividend WHT can be reduced to:

• 7.5% if the parent company owns at least 25% of the paid-in capital of the distributing company.
• 5% if the parent company owns at least 25% of the paid-in capital of the distributing company and the dividend at the parent company level is subject to a profit tax of at least 5.5%.

If a company is incorporated under Aruba law and transfers its factual place of management to another country, all dividend distributions by this relocated company will remain subject to the Aruba dividend WHT.

Dividend distributions include, among others:

• Formal dividend distributions.
• Liquidation payment.
• Bonus shares.
• Paying back of share capital, unless strict conditions are met.
• Imputation payment.

**Formal requirements**

Within 15 days after a dividend becomes payable, a dividend WHT return must be filed together with payment of the amount due. A dividend is payable if it is at the disposal of the shareholder (i.e. the board of directors of the distributing company does not have to take any more action in order for the shareholder to claim the dividend). A dividend is also payable if the debt becomes interest bearing because of the distribution.

A statement of approval of the Central Bank of Aruba is required if dividends are distributed to a foreign shareholder. If the dividend exceeds AWG 750,000, a licence from the Central Bank of Aruba is required.

**Tax administration**

**Tax returns**

Once a CIT return is issued by the tax authorities, the taxpayer is obligated to file the tax return within two months after date of issuance. If, within six months after the tax year has ended, no tax return has been issued, the taxpayer is obligated to request a return within 15 days after the six months period. It may be argued that this obligation does not exist if a taxpayer is not subject to taxation.

If the final CIT return cannot be filed within the required two-month period, a request for an extension may be filed. The tax inspector may grant an extension for a maximum period of 12 months.
Aruba

Payment of tax
CIT is due upon receipt of an assessment. The amount of tax due should be paid within two months after the date of the assessment.

The dividend WHT is due within 15 days after the dividend has become payable. A dividend WHT return must be submitted to the tax authorities together with payment of the amount due.

Penalties
The State Ordinance on General Taxes stipulates in which cases a penalty can be imposed. The Aruban penalty system can be divided into the following two categories.

Omissions
The tax authorities can impose penalties in the event the taxpayer does not (timely) file a return and in the event the taxpayer does not or partially pay the amounts due (timely).

The maximum penalty that can be imposed for not filing an assessment tax return (on time) varies between AWG 500 (USD 280) and AWG 10,000 (USD 5,618), with a maximum of 5% of the tax due. The minimum penalty amounts to AWG 250 (USD 140).

The penalty for omissions in the filing of taxes on return, such as the wage tax and dividend WHT, by the due date amounts to AWG 500 (USD 280). The penalty for not paying the amounts due by the due date amounts up to a maximum of AWG 10,000 (USD 5,617).

If the withholding agent for wage tax purposes does not provide an employee with a wage tax card or fails to have the proper employee documentation on file, a penalty of up to a maximum of AWG 10,000 (USD 5,617) can be imposed.

Gross negligence or intent
Gross negligence is deemed present if the reprehensible behaviour of a taxpayer results in less taxes being paid or levied than otherwise would have been the case. The penalty amounts to 25% of the additional tax due.

Intent is defined as a wilful and knowing act resulting in less or no taxes being paid or levied (timely). Conditional intent is defined as wilfully and knowingly accepting the fair chance that a course of action or omission results in less or no tax being paid or levied (timely). The penalty amounts to 50% of the additional tax due.

A penalty of 100% of the additional tax due can be levied in case of repetition, fraud, or substantial amounts not being levied or paid.

Tax audit process
There is no specific cycle for audits. Depending on a desk review of the tax returns of the last couple of years, an audit may follow.

Statute of limitations
An additional assessment can be imposed, in general, until five years after the tax year. In cases where the taxpayer is considered to be in bad faith, this period can be extended up to ten years or, in some cases, up to 12 years (e.g. if the tax differences relate to a component that is being held in a foreign country) after the tax year.
Topics of focus for tax authorities
There are no specific topics of focus. In case an audit is started, each aspect may be investigated. Often, the audit will not only focus on the profit tax, but also the other tax obligations, such as turnover tax, wage tax, and social security premiums.
Significant developments

A loss carryback regime is proposed to apply to all companies for tax losses incurred from 1 July 2012 such that companies will be able to carry tax losses back to offset prior year taxable profits and obtain a refund of tax previously paid on those prior year profits through a tax offset mechanism. This measure is in the final stages of being enacted. See Net operating losses in the Deductions section for more information.

Australia’s transfer pricing rules are being reformed to ‘improve the integrity and efficiency of the tax system’. Phase one of this process has been completed and provides the Commissioner of Taxation with the power to issue transfer pricing assessments under the Associated Enterprises or Business Profits Articles of Australia’s double taxation agreements (DTAs) in addition to the Commissioner’s existing ability to raise transfer pricing assessments under domestic law. Phase two of the transfer pricing reforms, which involves modernising Australia’s transfer pricing regime in line with international best practice as set out by the Organisation for Economic Co-operation and Development (OECD), is in the final stages of being enacted and is expected to apply from 1 July 2013. See Transfer pricing in the Group taxation section for more information.

From an employer perspective, employers are required to contribute funds to a registered superannuation entity on behalf of an employee at a set minimum percentage of the employee’s earnings base (the ‘superannuation guarantee’ scheme), subject to limited exceptions. From 1 July 2013, the required superannuation guarantee percentage increases to 9.25% (up from 9%). See Superannuation guarantee levy in the Other taxes section.

Companies with annual Australian assessable income (including that of affiliates) of more than 20 billion Australian dollars (AUD) will no longer be entitled to the 40% research and development (R&D) tax credit for income years commencing on or after 1 July 2013 under measures currently proposed by the government. See R&D tax credit in the Tax credits and incentives section for more information.

Legislation is proposed to require certain large companies to pay instalments of tax on a monthly basis (instead of quarterly), commencing from 1 January 2014. This change will be phased in over three years, commencing with companies with turnover of AUD 1 billion or more. See Payment of tax in the Tax administration section for more information.
Taxes on corporate income

Companies are subject to federal tax on their taxable income at a flat rate of 30%.

Companies that are residents of Australia are subject to Australian income tax on their worldwide income. Generally, non-resident companies are subject to Australian income tax on Australian-sourced income only. However, where a company is resident in a country with which Australia has concluded a DTA, Australia’s right to tax business profits is generally limited to profits attributable to a permanent establishment (PE) in Australia.

Local income taxes

There are no state or municipal taxes on income in Australia.

Corporate residence

A company is a resident of Australia for income tax purposes if it is incorporated in Australia or, if not incorporated in Australia, it carries on business in Australia and either (i) its central management and control are in Australia or (ii) its voting power is controlled by shareholders who are residents of Australia.

Permanent establishment (PE)

The concept of a PE is established in both domestic law and various DTAs that have been concluded with Australia. Where a company is resident in a country with which Australia has a DTA, it is important to have regard to the definition of PE contained therein as this will generally apply in priority to the domestic law.

Broadly, under Australia’s domestic law, a PE is a place at or through which a person carries on any business, and includes:

- A place where the person is carrying on business through an agent (except where the agent does not have, or does not habitually exercise, a general authority to negotiate and conclude contracts on behalf of the person).
- A place where the person has, is using, or is installing substantial equipment or substantial machinery.
- A place where the person is engaged in a construction contract.
- Where the person is engaged in selling goods manufactured, assembled, processed, packed, or distributed by another person for, or at or to the order of, the first-mentioned person and either of those persons participates in the management, control, or capital of the other person or another person participates in the management, control, or capital of both of those persons, the place where the goods are manufactured, assembled, processed, packed, or distributed.

Most DTAs contain a definition of PE that is similar, though not identical, to the definition under domestic law.

Other taxes

Goods and services tax (GST)

The federal government levies GST at a rate of 10%, and distributes the revenue to state governments. The GST is a value-added tax (VAT) applied at each level in the
manufacturing and marketing chain and applies to most goods and services, with registered suppliers getting credits for GST on inputs acquired to make taxable supplies.

Food, with some significant exceptions; exports; most health, medical, and educational supplies; and some other supplies are ‘GST-free’ (the equivalent of ‘zero-rated’ in other VAT jurisdictions) and so not subject to GST. A registered supplier of a GST-free supply can recover relevant input tax credits, although the supply is not taxable.

Residential rents, the second or later supply of residential premises, most financial supplies, and some other supplies are ‘input-taxed’ (‘exempt’ in other VAT jurisdictions) and are not subject to GST. However, the supplier cannot recover relevant input tax credits, except that financial suppliers may obtain a reduced input tax credit of 75% of the GST on the acquisition of certain services.

Health insurance is GST-free. Life insurance is input-taxed. General insurance is taxed. Reverse charges may apply to services or rights supplied from offshore, where the recipient is registered or required to be registered, and uses the supply solely or partly for a non-creditable supply.

**Wine equalisation tax (WET)**
The federal government levies WET at the wholesale level at a rate of 29%, in addition to 10% GST, which is calculated on the price including the WET, and it applies to wine from grapes, fruit and certain vegetables, mead, and sake. Retailers do not receive an input tax credit for WET. A rebate is available to a wine producer of 29% of the wholesale price (excluding WET or GST) for wholesale sales, and of 29% of the notional wholesale selling price for retail sales and applications for own use (up to a maximum of AUD 500,000).

**Luxury car tax**
The luxury car tax is levied by the federal government at the rate of 33% of the value of the car that exceeds the luxury car tax threshold (AUD 59,133 for the 2012/13 financial year and AUD 60,316 for the 2013/14 financial year) and is payable on the GST-exclusive value above the threshold. No input tax credit is available for luxury car tax, regardless of whether the car is used for business or private purposes.

**Customs duties**
Imports into Australia are subject to duties under the Australian Customs Tariff. The top duty rate is 5%, other than for clothing and finished textiles, which are currently taxed at 10% (to be reduced to 5% in 2015). A textile, clothing, and footwear (TCF) strategic investment program will operate until 2015.

Australia currently has comprehensive free trade agreements with Chile, New Zealand, Singapore, Thailand, and the United States. In addition, a regional free trade agreement between Australia, New Zealand, and Southeast Asian nations commenced on 1 January 2010, which progressively eliminates all barriers to trade in goods, services, and investments.

**Excise duties**
Excise duties are imposed at high levels on beer, spirits, liqueurs, tobacco, cigarettes, and petroleum products. These excise rates are indexed bi-annually in February and August based on movements in the consumer price index (CPI). Some examples of current excise rates include:
• Beer not exceeding 3% by volume of alcohol packaged in an individual container not exceeding 48 litres: AUD 38.70 per litre of alcohol calculated on that alcohol content by which the percentage by volume of alcohol of the goods exceeds 1.15.
• Tobacco in stick form not exceeding in weight 0.8 grams per stick actual tobacco content: AUD 0.35447 per stick.
• Petroleum condensate, crude petroleum oil, and diesel: AUD 0.38143 per litre.
• Liquefied petroleum gas, other than liquefied petroleum gas exempted from excise duty: AUD 0.05 per litre.

A fuel tax credit system provides a credit for fuel tax (excise or customs duty) that is included in the price of taxable fuel. Broadly, credits are available to entities using fuel in their business and to households using fuel for domestic electricity generation and heating.

**Land tax**
All states and territories (except the Northern Territory) impose a tax based on the unimproved capital value of land. In general, the principal place of residence and land used for primary production is exempt from land tax.

**Stamp duty**
All states and territories impose a stamp duty on a wide variety of transactions at different rates. All jurisdictions impose a stamp duty on real estate conveyances, but most exempt conveyances of goods (not associated with other property) from stamp duty. The imposition of duty on share transfers involving unlisted entities differs from state to state. Corporate reconstruction exemptions are available. Advice from a stamp duty specialist should usually be obtained where substantial stamp duty may be imposed because the amount of duty may depend on the form of the transaction.

**Fringe benefits tax (FBT)**
The federal government currently levies FBT on employers at the rate of 46.5% on the ‘grossed-up value’ of non-salary and wages fringe benefits provided to employees (and/or the employee’s associates) by the employer or associates. The FBT rate is increasing to 47% with effect from 1 April 2014. The grossing-up of the value ensures tax neutrality between providing benefits and cash remuneration. FBT generally is deductible for income tax purposes. There are some exemptions from FBT, including some minor benefits, remote area housing in certain circumstances, and specified relocation costs. In addition, there are some concessional valuation rules, in particular for motor vehicles and living-away-from-home benefits (although this concession has been significantly scaled back from 1 October 2012, subject to certain transitional rules).

**Payroll tax**
States and territories impose a tax on employers’ payroll (broadly defined). The various jurisdictions have harmonised their payroll tax legislation, but some differences remain, particularly tax rates and the thresholds for exempting employers whose annual payroll is below a certain level, after taking into account grouping rules. For example, in New South Wales from 1 July 2012 the rate is 5.45% per annum with an annual exemption threshold of AUD 689,000 (to 30 June 2013). In Victoria, the rate is 4.9% from 1 July 2012, and the annual exemption threshold is AUD 550,000. A variety of rates and thresholds apply in other state and territory jurisdictions.

**Superannuation guarantee levy**
The federal government effectively requires employers to contribute 9% of an employee’s earnings base, subject to limited exceptions, to a registered superannuation
Australia

fund or retirement savings account on behalf of the employee. Failure to make these contributions will result in the employer being liable for a non-deductible superannuation guarantee charge.

The superannuation guarantee percentage is 9% until 30 June 2013, increasing to 9.25% from 1 July 2013 and progressively increasing up to 12% from 1 July 2019.

No level of Australian government imposes a social security levy.

**Insurance tax**
States impose taxes on insurance premiums, which may be substantial.

**Minerals Resource Rent Tax (MRRT)**
MRRT is a new tax effective from 1 July 2012 applied to the mining profit made from extracting iron ore, coal, anything produced from a process that results in iron ore or coal being consumed or destroyed without extraction, or coal seam gas extracted as a necessary incident of mining coal, before it undergoes any significant processing or value add.

The MRRT liability for each mining project interest in an MRRT year is calculated as follows:

\[
\text{MRRT liability} = (\text{Mining profit} - \text{MRRT allowances}) \times \text{MRRT rate}
\]

The effective MRRT rate is 22.5%, being the headline rate of 30% reduced by a 25% extraction allowance to recognise the miner’s employment of specialist skills.

MRRT allowances reduce the mining profit and include appropriate recognition for mining royalties paid under a Commonwealth, state, or territory law, mining losses, and recognition for the investment in assets relating to upstream mining operations from a mining project interest that exists at 1 July 2012.

A miner’s MRRT payable for an MRRT year is then calculated as follows:

\[
\text{MRRT payable} = \text{Sum of MRRT liabilities for each mining project interest} - \text{Low-profit offset (if applicable)} - \text{Rehabilitation tax offset}
\]

Small miners are subject to the MRRT but may be entitled to compliance concessions, including a low-profit offset that will ensure that a miner who (together with certain connected entities) has total mining profits for an MRRT year of AUD 75 million or less has no liability for MRRT. The offset is phased-out for profits between AUD 75 million and AUD 125 million.

Similar to income tax, MRRT is self assessed by the miner. The miner is, in most cases, required to give the Commissioner of Taxation an MRRT return for each MRRT year in which it has a mining project interest or pre-mining project interest. MRRT is generally payable by quarterly instalments.

MRRT applies in addition to normal income tax. MRRT payments (including quarterly instalments) are, however, deductible for income tax purposes.

**Petroleum Resource Rent Tax (PRRT)**
PRRT applies from 1 July 1986 to all petroleum projects in Australian offshore areas (or Commonwealth adjacent areas) other than production licences derived from the North
West Shelf project and the Joint Petroleum Development Area in the Timor Sea. From 1 July 2012, PRRT applies to all Australian onshore and offshore oil and gas projects, including the North West Shelf.

PRRT is applied to a ‘project’ or ‘production licence area’ at a rate of 40% of the taxable profits derived from the recovery of all petroleum in the project, including:

- crude oil
- condensate
- sales gas
- natural gas
- liquefied petroleum gas (LPG), and
- ethane.

The taxable profit of a project is calculated as follows:

\[
\text{Taxable profit} = \text{Assessable receipts} - \text{Deductible expenditure}
\]

Deductible expenditure broadly includes exploration expenditure, all project development, and operating expenditures.

PRRT is self assessed by the relevant taxpayer. The taxpayer is, in most cases, required to give the Commissioner of Taxation a PRRT return for each PRRT year. PRRT is generally payable by quarterly instalments.

PRRT applies in addition to normal income tax. PRRT payments (including instalments) are, however, deductible for income tax purposes.

**Local municipal taxes**
Local taxes, including water, sewerage, and drainage charges, are levied based on the unimproved capital value of land and include a charge for usage (e.g. water usage).

---

**Branch income**
Branch profits are subject to ordinary corporate rates of taxation, and there is no withholding on repatriated profits.

---

**Income determination**

**Inventory valuation**
Inventory generally may be valued at cost (full absorption cost), market selling value, or replacement price. Where, because of obsolescence or other special circumstances, inventory should be valued at a lower amount, the lower valuation generally may be chosen, provided it is a reasonable valuation. Special rules apply, however, regarding the valuation of trading stock for certain companies joining a consolidated group. Last in first out (LIFO) is not an acceptable basis of determining cost, nor is direct costing in respect of manufactured goods and work-in-progress.

Conformity is not required between book and tax reporting. For tax purposes, inventory may be valued at cost, market selling value, or replacement price, regardless of how inventory is valued for book purposes. Those who choose to come within the small-business entity measures (broadly defined as taxpayers who carry on business and who,
Australia

together with certain ‘connected’ entities, have an aggregated turnover of less than AUD 2 million for the year) may ignore the difference between the opening and closing value of inventory if, on a reasonable estimate, this is not more than AUD 5,000.

Capital gains
A capital gains tax (CGT) applies to assets acquired on or after 20 September 1985. Capital gains realised on the disposal of such assets are included in assessable income and are subject to tax at the corporate tax rate. In order to determine the quantum of any gain for any assets acquired before 21 September 1999, the cost base is indexed according to price movements since acquisition, as measured by the official CPI until 30 September 1999. There is no indexation of the cost base for price movements from 1 October 1999. Disposals of plant and equipment are subject to general rules rather than the CGT rules. Capital losses are allowable as deductions only against capital gains and cannot be offset against other income. In calculating capital losses, there is no indexation of the cost base.

Companies that are residents in Australia generally are liable for the tax on gains on the disposal of assets wherever situated, subject to relief from double taxation if the gain is derived and taxed in another country. However, the capital gain or capital loss incurred by a company from a CGT event in relation to shares in a foreign company is reduced by a percentage reflecting the degree to which the foreign company’s assets are used in an active business if the company holds a direct voting percentage of 10% or more in the foreign company for a certain period before the CGT event. Attributable income from CGT events happening to shares owned by a controlled foreign company (CFC) are reduced in the same way. Capital gains and capital losses made by a resident company in respect of CGT events happening in respect of ‘non-tainted’ assets used to produce foreign income in carrying on business through a PE in a foreign country are disregarded in certain circumstances.

Non-resident companies are subject to Australian CGT only where the assets are taxable Australian property (i.e. Australian real property, or the business assets of Australian branches of a non-resident). Australian CGT also applies to indirect Australian real property interests, being non-portfolio interests in interposed entities (including foreign interposed entities), where the value of such an interest is wholly or principally attributable to Australian real property. ‘Real property’ for these purposes is consistent with Australian treaty practice, extending to other Australian assets with a physical connection with Australia, such as mining rights and other interests related to Australian real property. A ‘non-portfolio interest’ is an interest held alone or with associates of 10% or more in the interposed entity.

Dividend income
A ‘gross-up and credit’ mechanism applies to franked dividends (dividends paid out of profits that have been subject to Australian tax) received by Australian companies. The corporate shareholdergrosses up the dividend received for tax paid by the paying company (i.e. franking credits attaching to the dividend) and is then entitled to a tax offset (i.e. a reduction of tax) equal to the gross-up amount. A company with an excess tax offset entitlement converts the excess into a carryforward tax loss using a special formula.

Dividends paid to another resident company that are unfranked (because they are paid out of profits not subject to Australian tax) are taxable, unless they are paid within a group that has chosen to be consolidated for tax purposes. Dividends paid between companies within a tax consolidated group are ignored for the purposes of determining the taxable income of the group.
Franked dividends paid to non-residents are exempt from dividend withholding tax (WHT).

An exemption from WHT is also available for dividends that are ‘unfranked’ under the dividend imputation rules and are declared to be conduit foreign income (CFI) received by non-resident shareholders (or unitholders) in an Australian corporate tax entity (CTE). These rules may also treat the CFI component of an unfranked dividend received by an Australian CTE from another Australian CTE as not taxable to the recipient, provided it is on-paid within a specified timeframe. Broadly, income will qualify as CFI if it is foreign income, including certain dividends, or foreign gains, which are not assessable for Australian income tax purposes or for which a foreign income tax offset has been claimed in Australia.

Foreign dividends are not assessable and are not eligible for a tax offset if received by an Australian resident company from a foreign affiliate where the recipient company has a voting power of at least 10% in the foreign affiliate. This exemption is subject to change proposed to take effect for income years commencing on or after 1 July 2014 so as to prevent dividends attached to legal form shares that are treated as debt interest for Australian tax purposes from being exempt.

Income of a non-resident entity in which Australian residents hold interests is not assessable when repatriated to Australia where the income has been previously attributed to those residents and taxed in Australia (see below).

**Stock dividends**

Stock dividends, or the issue of bonus shares, as they are known under Australian law, are, in general, not taxed as a dividend, and the tax treatment is the spreading of the cost base of the original shares across the original shares and the bonus shares. However, if a company credits its share capital account with profits when issuing bonus shares, this will taint the share capital account (if it is not already a tainted share capital account), causing the bonus share issue to be a dividend. Certain other rules may apply to bonus share issues, depending on the facts.

**Financial arrangements**

Special rules apply to the taxation of financial arrangements (TOFA). ‘Financial arrangement’ is widely defined to cover arrangements that involve a cash settleable legal or equitable right to receive, or obligation to provide, something of economic value in the future.

These measures provide six tax-timing methods for determining gains or losses in respect of financial arrangements, along with revenue account treatment of the resulting gains or losses to the extent that the gain or loss is made in earning assessable income or carrying on a business for that purpose. The default methods are the accruals method and the realisation method, one or other of which will apply depending on the relevant facts and circumstances of a particular financial arrangement. The accruals method will apply to spread an overall gain or loss over the life of the financial arrangement where there is sufficient certainty that the expected gain or loss will actually occur. A gain or loss that is not sufficiently certain is dealt with under the realisation method.

Alternatively, a taxpayer may irrevocably choose one of four elective methods (i.e. fair value, retranslation, financial reports, and hedging) to determine the tax treatment of financial arrangements covered by the election. Qualification criteria must be met before the elective methods may be used. Generally, these criteria require that the
taxpayer prepare a financial report in accordance with Australian (or comparable) accounting standards and be audited in accordance with Australian (or comparable) auditing standards.

Exemptions from this regime may be available having regard to the duration of the arrangement or the nature of the relevant taxpayer and the annual turnover or value of assets of that taxpayer. Certain types of financial arrangements are excluded from these rules, including leasing and hire purchase arrangements. Foreign residents are taxable on gains from financial arrangements under these measures to the extent that the gains have an Australian source.

**Foreign exchange gains and losses**

Foreign currency gains and losses are recognised when realised, regardless of whether there is a conversion into Australian dollars, and are included in or deducted from assessable income, subject to limited exceptions. There are exceptions to the timing and characterisation aspects of the realisation approach where the foreign currency gain or loss is closely linked to a capital asset. To reduce compliance costs with foreign currency denominated bank accounts, taxpayers may elect to disregard gains or losses on low balance transaction accounts that satisfy a *de minimis* exemption or may elect for retranslation by annually restating the balance of the account by reference to deposits, withdrawals, and the exchange rates at the beginning and end of each year (or by reference to amounts reported in accordance with applicable accounting standards).

For foreign exchange gains and losses associated with financial arrangements as defined, the compliance impact of the foreign exchange rules will be reduced for those taxpayers eligible to elect the retranslation or financial reports tax-timing methods under the TOFA measures (as discussed above).

Entities or parts of entities, satisfying certain requirements, are able to choose to account for their activities in a currency other than Australian dollars for income tax purposes as an intermediate step to translating the result into Australian dollars.

**Foreign income**

The current basis upon which the foreign income of corporations resident in Australia is taxed is set out below.

- Non-active income of foreign companies controlled by Australian residents (determined by reference to voting rights and dividend and capital entitlements) may be attributed to those residents under rules that distinguish between companies resident in 'listed countries' (e.g. Canada, France, Germany, Japan, New Zealand, the United Kingdom, and the United States) and in other 'unlisted' countries. In general, if the CFC is resident in an unlisted country and it fails the active income test (typically because it earns 5% or more of its income from passive or tainted sources), the CFC's tainted income (very broadly, passive income and gains, and sales and services income that has a connection with Australia) is attributable. If a CFC is resident in a listed country, a narrower range of tainted income is attributed even if the CFC fails the active income test.
- When income previously taxed on attribution is repatriated, it is not assessable for tax.
- Dividends received directly by a resident company from a foreign company are not assessable for tax where the resident company has a (non-portfolio) voting interest of at least 10% in the foreign affiliate and does not receive the dividend in its capacity as a trustee. With effect for income years commencing on or after 1 July
2014, the exemption will no longer apply to dividends paid on legal form shares that are treated as debt interests for Australian income tax purposes.

- Active foreign branch profits of a resident company from carrying on business through a PE in a foreign country and capital gains made by a resident company from the disposal of non-tainted assets used in deriving foreign branch income (except income and capital gains from the operation of ships or aircraft in international traffic) are not assessable for tax.

- Foreign income of Australian resident corporations, and income of such taxpayers that is subject to foreign income taxes that is not effectively exempt, is subject to tax; however, in most cases, an offset for foreign income tax paid is allowed to the extent of Australian tax payable on such income.

- Generally, limited partnerships are treated as companies for Australian tax purposes. In certain circumstances, foreign limited partnerships, foreign limited liability partnerships, United States (US) limited liability companies, and United Kingdom (UK) limited liability partnerships will be treated as partnerships (i.e. as a flow-through entity) rather than as a company for the purposes of Australia’s income tax laws.

On 17 February 2011, the government released exposure draft legislation for public comment setting out the legislative design of reforms to modernise the CFC rules and to implement new foreign accumulation fund (FAF) rules, which, broadly, are aimed at investments in non-CFCs and fixed trusts. The government announced in its 2013/14 Federal Budget that such reforms now will be reconsidered when the OECD has completed its work on base erosion and profit shifting.

---

**Deductions**

**Depreciation and depletion**

A capital allowances regime allows a deduction for the decline in value of depreciable assets held by a taxpayer. The holder of the asset is entitled to the deduction and may be the economic, rather than the legal, owner. A ‘depreciable asset’ is an asset that has a limited effective life and can reasonably be expected to decline in value over the time it is used, but does not include land, trading stock, or, subject to certain exceptions, intangible assets. Deductions are available for certain other capital expenditure.

Intangible assets that are depreciable assets (if they are not trading stock) are:

- Certain mining, quarrying, or prospecting rights and information.
- Items of intellectual property (IP).
- In-house software.
- Indefeasible rights to use an international telecommunications submarine cable system.
- Spectrum licences under radio communications legislation.
- Datacasting transmitter licences.
- Telecommunications site access rights.

Taxpayers that do not qualify as a small business must depreciate the asset over its useful life (known as ‘effective life’) using either straight-line (known as the ‘prime cost’ method) or diminishing-value method (straight-line rate multiplied by 200% for depreciating assets acquired on or after 10 May 2006).

Taxpayers may self-determine the effective life of a unit or plant or may choose the effective life contained in a published determination of the Commissioner of Taxation.
Australia

Non-small-business taxpayers are able to choose to write-off all items costing less than AUD 1,000 through a low-value pool at a diminishing-value rate of 37.5% per annum.

For those who satisfy the small business entity threshold (broadly defined as taxpayers who are carrying on business and who, together with certain connected entities, have an aggregated turnover of less than AUD 2 million for the year), a simplified depreciation system applies with more attractive depreciation rates, including (with effect from 1 July 2012) an immediate write off for depreciating assets with a cost of less than AUD 6,500.

‘Project pool’ rules allow expenditures that do not form part of a depreciating asset to be deductible over the life of a project that is carried on for a taxable purpose. Amongst other things, items that fall within the rules include the following:

- Amounts paid to create or upgrade community infrastructure for a community associated with the project.
- Site preparation costs for depreciating assets (except horticultural plants in certain circumstances).
- Amounts incurred for feasibility studies for a project.
- Environmental assessment costs applicable to the project.
- Amounts incurred to obtain information associated with the project.
- Amounts incurred in seeking to obtain a right to IP.
- Costs of ornamental trees or shrubs.

The so-called ‘blackhole’ expenditure provisions allow a five-year straight-line write-off for capital expenditure in relation to a past, present, or prospective business, to the extent that the business is, was, or is proposed to be carried on for a taxable purpose. The expenditure is deductible to the extent that it is not elsewhere taken into account (e.g. by inclusion in the cost base of an asset for CGT purposes) and that it is not denied deductibility for the purposes of the income tax law (e.g. by the rules against deducting entertainment expenditure).

Special rules apply for primary producer assets, such as horticultural plants, water and land care assets, and the treatment of expenditure on R&D (see the Tax credits and incentives section for more information) and expenditure on certain Australian films.

A luxury car cost limit applies for depreciating the cost of certain passenger motor vehicles (AUD 57,466 cost limit for the 2012/13 income year).

Expenditure on the development of in-house software may be allocated to a ‘software development pool’ and written off over three years, starting in the year after the expenditure was incurred (40% in year two, 40% in year three, and 20% in year four). Amounts spent on acquiring computer software or the right to use it (except where the acquisition is for developing in-house software) generally is treated as incurred on acquiring a depreciating asset, deductible over its effective life (taken to be four years) commencing in the first year it is first used or installed ready for use. ‘Shrink-wrapped’ software acquired or manufactured for sale generally will be treated as trading stock.

A loss arising on the sale of a depreciating asset (depreciated value of the asset less sale consideration) is generally an allowable deduction. A gain on the sale of a depreciating asset, to the extent of depreciation recaptured, generally is taxed as ordinary income. Gains exceeding the amount of depreciation recaptured are also taxed as ordinary income.
Subject to exceptions referred to below, capital expenditure incurred after 15 September 1987 in the construction or improvement of non-residential buildings used for producing assessable income is amortised over 40 years at an annual 2.5% rate. Capital expenditure on the construction of buildings used for short-term traveller accommodation (e.g. hotels, motels) and industrial buildings (typically factories) is amortised over 25 years at an annual 4% rate where construction commenced after 26 February 1992. The cost of eligible building construction that commenced after 21 August 1984 and before 16 September 1987 (or construction contracted before 16 September 1987) is amortised over 25 years at an annual 4% rate. There is no recapture of the amortised amount upon disposal of the building, except where the expenditure is incurred after 13 May 1997, in which case recapture will apply, subject to certain transitional rules.

Similar provisions apply in relation to income-producing residential buildings on which construction commenced after 17 July 1985.

The cost of income-producing structural improvements, the construction of which started after 26 February 1992 is eligible for write-off for tax purposes on the same basis as that of income-producing buildings, that is, at a rate of 2.5% per annum.

The cost of consumables may be either written off immediately, or as used.

The following expenditure attracts an immediate 100% deduction: environmental protection activities, dealing with pollution and waste; landcare operations; exploring or prospecting for minerals and exploration of geothermal energy sources (other than costs of mining rights and information acquired from a non-government third party that start to be held after 7.30pm [AEST] 14 May 2013, which will be deducted over the shorter of 15 years and the life of the asset); mine site rehabilitation; and certain expenditure in respect of the establishment of carbon sink forests.

Tax depreciation is not required to conform to book depreciation.

Percentage depletion based on gross income or other non-cost criteria is not available.

**Goodwill**

Goodwill and trademarks are not depreciating assets, and tax amortisation is not available.

**Start-up expenses**

There are no specific provisions in relation to deductions for start-up expenses. However, certain start-up expenses, such as costs of company incorporation or costs to raise equity, may qualify for a five-year straight-line write-off to the extent that it is capital expenditure in relation to a current or prospective business that is, or is proposed to be, carried on for a taxable purpose.

**Interest expenses**

Special rules classify financial arrangements as either debt or equity interests. These rules focus on economic substance rather than legal form and take into account related schemes, and extend beyond shares. In this situation, interest expense on non-share equity would be treated as a dividend, which is potentially frankable, and would be non-deductible for the paying company/group.

The government proposes to remove the ability for companies to claim a deduction for interest expenses incurred in relation to offshore investments that generate non-
assessable non-exempt dividend income. This measure is proposed to take effect in respect of income years commencing on or after 1 July 2014.

Thin capitalisation measures apply to the total debt of the Australian operations of multinational groups (including branches of those groups). See Thin capitalisation in the Group taxation section for more information.

**Bad debts**
A deduction may be available for bad debts written off as bad before the end of an income year. Generally, a deduction will only be available where the amount of the debt was previously included in assessable income, or the debt is in respect of money lent in the ordinary course of a money lending business. The ability to claim a deduction for a bad debt is also subject to other integrity measures. The government has announced that it will amend the law to deny a deduction for bad debts in respect of certain financing arrangements between related parties. These measures have yet to be enacted, but will apply from 7.30 pm (AEST) on 8 May 2012.

The amount of a commercial debt forgiven (other than an intra-group debt within a tax consolidated group) that is not otherwise assessable or does not otherwise reduce an allowable deduction is applied to reduce the debtor’s carryforward tax deductions for revenue tax losses, non-deducted capital losses, non-deducted capital expenditure, and other capital cost bases in a certain order. Any amount not so applied generally is not assessable to the debtor. Forgiveness includes the release, waiver, or extinguishment of a debt (other than by full payment in cash) and the lapsing of the creditor’s recovery right by reason of a statute of limitations.

**Charitable contributions**
Charitable contributions are generally deductible where they are made to entities that are specifically named in the tax law or endorsed by the Commissioner of Taxation as ‘deductible gift recipients’. However, deductions for such gifts cannot generate tax losses. That is, generally the deduction is limited to the amount of assessable income remaining after deducting from the assessable income for the year all other deductions.

**Entertainment**
Subject to limited exceptions, deductions are denied for expenditure on ‘entertainment’, which broadly is defined as entertainment by way of food, drink, or recreation, and accommodation or travel to do with providing such entertainment.

**Fines and penalties**
Fines and penalties imposed under any Australian and foreign law are generally not deductible. This includes fines and penalties imposed in relation to both civil and criminal matters.

The General Interest Charge (GIC) and Shortfall Interest Charge (SIC), which are imposed for failure to pay an outstanding tax debt within the required timeframe or where a tax shortfall arises under an amended assessment, are deductible for Australian tax purposes.

**Taxes**
In general, GST input tax credits, GST, and adjustments under the GST law are disregarded for income tax purposes. Other taxes, including property, payroll, MRRT, PRRT, and FBT, as well as other business taxes, excluding income tax, are deductible to the extent they are incurred in producing assessable income or necessarily incurred in carrying on a business for this purpose, and are not of a capital or private nature.
Other significant items
Where expenditure for services is incurred in advance, deductibility of that expenditure generally will be prorated over the period during which the services will be provided, up to a maximum of ten years.

General value shifting rules apply to shifts of value, direct or indirect, in respect of loan and equity interests in companies or trusts. Circumstances in which these rules may apply include where there is a direct value shift under a scheme involving equity or loan interests, or where value is shifted out of an asset by the creation of rights in respect of the asset, or where there is a transfer of assets or the provision of services for a consideration other than at market value. The value shifting rules may apply to the head company of a tax consolidated group or multiple entry consolidated (MEC) group for value shifts also involving entities outside the group, but not to value shifting between group members, which the tax consolidation rules address (see the Group taxation section for more information).

Net operating losses
Losses may be carried forward indefinitely, subject to compliance with tests of continuity of more than 50% of ultimate stock ownership or compliance with a same business test. For consolidated group companies, the ability to utilise these losses is determined by a modified version of these tests (see the Group taxation section for more information).

From 1 July 2012, a loss carryback regime will apply such that companies will be able to carry tax losses back to offset prior year taxable profits and obtain a refund of tax previously paid on those prior year profits through a tax offset mechanism. This measure is in the final stages of being enacted. The key features of the proposal include:

• an initial one year carryback period from the 2012/13 income year (i.e. 2012/13 tax losses can be carried back and offset against tax paid in 2011/12)
• a two year loss carryback period to apply from the 2013/14 income year
• an AUD 1 million cap on the amount of losses able to be carried back, and
• refunds will be limited to the balance of a company's franking account.

Payments to foreign affiliates
A corporation can deduct royalties, management service fees, and interest charges paid to non-residents, provided the amounts are commercially realistic and referable to activities aimed at producing assessable income.

Group taxation
A tax consolidation regime applies for income tax and CGT purposes for companies, partnerships, and trusts ultimately 100% owned by a single head company (or certain entities taxed like a company) resident in Australia. Australian resident companies that are 100% owned (either directly or indirectly) by the same foreign company and have no common Australian head company between them and the non-resident parent are also allowed to consolidate as a multiple entry consolidated (MEC) group. The group that is consolidated for income tax purposes may differ from the group that is consolidated for accounts or for GST purposes. Groups that choose to consolidate must include all 100%-owned entities under an all-in rule, and the choice to consolidate is irrevocable. However, eligible tier-1 companies (being Australian resident companies that have a non-resident shareholder) that are members of a potential MEC group are not all required to join an MEC group, when it forms, but may form two or more
separate MEC or consolidated groups, if they so choose, of which the same foreign top company is the 100% owner. If an eligible tier-1 company joins a particular MEC group, all 100% subsidiaries of the company must also join the group. While the rules for forming and joining MEC groups allow more flexibility than with consolidated groups, the ongoing rules for MEC groups are more complex, particularly for tax losses and on the disposal of interests in eligible tier-1 companies, which are subject to cost pooling rules, although for practical purposes these rules are relevant only if the non-resident is holding or disposing of an indirect Australian real property interest (see Capital gains in the Income determination section for more information). The Australian government is currently conducting a review of the MEC rules with a view to remove systemic tax advantages available to foreign-owned MEC groups that are not available to Australian-owned ordinary consolidated groups (any legislative changes will take effect from 1 July 2014).

A single entity rule applies to members of a consolidated or MEC group so that for income tax purposes the subsidiary members are taken to be part of the head company, while they continue to be members of the group and intra-group transactions are not recognised. In general, no group relief is available where related companies are not members of the same consolidated or MEC group. Rollover relief from CGT is available on the transfer of unrealised gains on assets, which are taxable Australian property between companies sharing 100% common ownership where the transfer is between non-resident companies, or between a non-resident company and a member of a consolidated group or MEC group, or between a non-resident company and a resident company that is not able to be a member of a consolidated group.

Consolidated groups file a single tax return and calculate their taxable income or loss ignoring all intra-group transactions.

When a consolidated group acquires 100% of an Australian resident entity, so that it becomes a subsidiary member, the cost base of certain assets (in general, those that are non-monetary) of the joining member are reset for all tax purposes, based on the purchase price plus the entity’s liabilities, subject to certain adjustments. In this way, an acquisition of 100% of an Australian resident entity by a consolidated group is broadly the tax equivalent of acquiring its assets. Subject to certain tests being passed, tax losses of the joining member may be transferred to the head company and may be utilised subject to a loss factor, which is broadly the market value of the joining member divided by the market value of the group (including the joining member). The value of the loss factor (referred to as ‘the available fraction’) that applies for transferred losses may be reduced by capital injections (or the equivalent) into the member before it joined, or into the group after the loss is transferred.

Franking credits and tax losses remain with the group when a member exits, and the cost base of shares in the exiting member is calculated based on the tax value of its assets at the time of exit, less liabilities subject to certain adjustments.

Generally, members of the group are jointly and severally liable for group income tax debts on the default of the head company, unless the group liability is covered by a tax sharing agreement (TSA) that satisfies certain legislative requirements. A member who enters into a TSA generally can achieve a clean exit from the group where a payment is made to the head company in accordance with the TSA.

**Transfer pricing**

Australia has a comprehensive transfer pricing regime aimed at protecting the tax base by ensuring that dealings between related, international parties are conducted at arm’s
length. The arm’s-length principle, which underpins the transfer pricing regime, uses the behaviour of independent parties as a benchmark for determining the allocation of income and expenses between international related parties.

Where the Commissioner of Taxation is satisfied that the arm’s-length principle has not been maintained, the Commissioner has the power to make transfer pricing adjustments.

On 1 November 2011, the government announced that it would reform Australia’s transfer pricing rules to ‘improve the integrity and efficiency of the tax system’. Phase one of this process has been completed, with legislation enacted in September 2012 to provide the Commissioner of Taxation with the power to issue transfer pricing assessments under the Associated Enterprises or Business Profits Articles of Australia’s DTAs in addition to the Commissioner’s existing ability to raise transfer pricing assessments under domestic law. This amendment has retrospective effect from 1 July 2004. Phase two of the transfer pricing reforms involves modernising Australia’s transfer pricing regime in line with international best practice as set out by the OECD. Under the proposed regime, which will effectively replace the phase one reforms, transfer pricing adjustments will operate on a self-assessment basis and apply in respect of certain cross-border dealings between entities and to the allocation of actual income and expenses of an entity between the entity and its PE, using the internationally accepted arm’s-length principle, which is to be determined consistently with the relevant OECD Guidance material (and applied to both treaty and non-treaty cases). Companies are required to have transfer pricing documentation in place to support their self-assessed positions before the lodgment of the tax return. The new law is in the final stages of being passed through Parliament and is expected to apply from 1 July 2013.

**Thin capitalisation**

Thin capitalisation measures apply to the total debt of the Australian operations of multinational groups (including branches of those groups). The measures cover investment into Australia of foreign multinationals and outward investment of Australian-based multinationals, and include a safe-harbour debt-to-equity ratio of 3:1. Interest deductions are denied to the extent that borrowing exceeds the safe-harbour ratio. Where borrowing exceeds the safe-harbour ratio, multinationals are not affected by the rules if they can satisfy the arm’s-length test (that the borrowing could have been borne by an independent entity). A further alternative test is available for outward investing entities based on 120% of their worldwide gearing.

As mentioned above, the thin capitalisation rules apply to inward investment into Australia. In particular, they will apply where a foreign entity carries on business through an Australian PE or to an Australian entity in which five or fewer non-residents have at least a 50% control interest, or a single non-resident has at least a 40% control interest, or the Australian entity is controlled by no more than five foreign entities. Separate rules apply to financial institutions. To facilitate their inclusion in the rules, branches are required to prepare financial accounts.

International Financial Reporting Standards (IFRS), equivalents of which currently apply in Australia, make it more difficult for some entities to satisfy thin capitalisation rules because of the removal of internally generated intangible assets from the balance sheets. Accordingly, thin capitalisation law allows departure from the Australian equivalents to IFRS in relation to certain intangible assets and excludes deferred tax assets and liabilities and surpluses and deficits in defined benefit superannuation funds from applicable calculations.
The Australian government proposes to reduce the safe-harbour debt-to-equity ratio from 3:1 to 1.5:1 and the worldwide gearing ratio to 100% for income years commencing on or after 1 July 2014.

**Tax credits and incentives**

**Foreign income tax offsets (FITOs)**
FITOs are available to avoid double taxation in respect of foreign tax paid on income that is assessable in Australia. Generally, a corporation will be entitled to claim a FITO where it has paid, or is deemed to have paid, an amount of foreign income tax and the income or gain on which the foreign income tax was paid is included in assessable income for Australian tax purposes.

The amount of the FITO available is limited to the greater of AUD 1,000 and the amount of the ‘FITO limit’. The FITO limit is broadly calculated as the difference between the corporation’s actual tax liability and its tax liability if certain foreign taxed and foreign-sourced income and related deductions were disregarded. Excess FITOs are not able to be carried forward and claimed in later income years.

**Inward investment incentives**
Depending on the nature and size of the investment project, state governments may give rebates from payroll, stamp, and land taxes on an *ad hoc* basis and for limited periods.

**Capital investment incentives**
Incentives for capital investment are as follows:

- **Accelerated deductions** are available for capital expenditures on the exploration for and extraction of petroleum, other minerals, and geothermal energy sources (other than mining rights and information acquired from a non-government third party that start to be held after 7.30pm [AEST] 14 May 2013, which will be claimed over the shorter of 15 years and the life of the asset), the rehabilitation of former mineral extraction sites, certain environmental protection activities, the establishment of certain ‘carbon sink’ forests, certain expenditure of primary producers, and for certain low cost depreciating assets held by small business entities.
- **There are a number of tax concessions aimed at encouraging investments in the venture capital sector.** Non-resident pension funds that are tax-exempt in their home jurisdiction, are residents of Canada, France, Germany, Japan, the United Kingdom, the United States, or another country prescribed by regulation, and satisfy certain Australian registration requirements, are exempt from income tax on the disposal of investments in certain Australian venture capital equity held at risk for at least 12 months. A similar exemption is extended to other tax-exempt non-resident investors, including managed funds and venture capital fund-of-funds vehicles and taxable non-residents holding less than 10% of a venture capital limited partnership. These investors are able to invest in eligible venture capital investments through an Australian resident venture capital limited partnership or through a non-resident venture capital limited partnership. Eligible venture capital investments are limited to specified interests in companies and trusts. Detailed rules in the legislation prescribe the nature of such investments and the characteristics, which such companies and trusts, and their investments, must possess.
- **There is a venture capital tax concession applicable to an ‘early stage venture capital limited partnership’ (ESVCLP).** The thresholds for qualification include requirements that, amongst other things, the committed capital of the ESVCLP must be at least
AUD 10 million (proposed to be lowered to AUD 5 million at a future time) but not exceed AUD 100 million, the investments made must fall within prescribed parameters as to size and proportion of total capital, and the ESVCLP must have an investment plan approved by Innovation Australia. Where the thresholds for their application are met, the ESVCLP provisions provide flow-through tax treatment to domestic and foreign partners, with the income and capital received by the partners being exempt from taxation. As the income will be tax exempt, the investor will not be able to deduct investment losses.

• The taxable income derived from pure offshore banking transactions by an authorised offshore banking unit in Australia is taxed at the rate of 10% (dealings with related parties will be ineligible for this concession for income years commencing on or after 1 July 2013).

• Refundable tax offsets are available to companies for certain expenditure incurred in Australia in producing specified classes of film or undertaking specified post, digital, or special effects production activities in respect of specified classes of films. The concessions are only available to a company that is either an Australian resident or a non-resident carrying on business through an Australian PE and which has been issued with an Australian Business Number (ABN). The availability of the offsets is subject to a number of conditions, including meeting registration and minimum spend requirements. The rate of the offset varies from 15% to 40%, depending upon the nature of the relevant film and activities undertaken.

**R&D tax credit**

For companies with an annual turnover of less than AUD 20 million, there is a 45% refundable R&D tax credit, equivalent to a 150% tax concession. This equates to a cash savings of 15% on every dollar of R&D spend and will be refundable where the company is in a tax loss position. Currently, companies with a turnover of greater than AUD 20 million have access to a non-refundable 40% tax credit, equivalent to a 133% tax concession. This equates to a cash savings of 10% on every dollar of R&D spend. However, it is proposed that companies with annual Australian assessable income (including that of affiliates) of more than AUD 20 billion will not be entitled to the R&D tax credit for income years commencing on or after 1 July 2013.

Generally, only genuine R&D activities undertaken in Australia qualify for the R&D tax incentive. However, R&D activities conducted overseas also qualify in limited circumstances where the activities cannot be undertaken in Australia. Special grant programmes also may be available to assist corporations in the conduct of certain R&D in Australia. These grants are awarded on a discretionary basis.

**Other incentives**

Cash grants for export-market development expenditure are available to eligible businesses seeking to export Australian-source goods and services.

**Withholding taxes**

Withholding tax (WHT) rates are shown in the following table.

Australia

Notes

1. Dividends paid to non-residents are exempt from dividend WHT except when paid out of profits of a company that have not borne Australian tax (i.e. unfranked dividends). Dividends include those stock dividends that are taxable. The rates shown apply to dividends on both portfolio investments and substantial holdings other than dividends paid in connection with an Australian PE of the non-resident. Unfranked dividends paid to non-residents are exempt from dividend WHT to the extent that the dividends are declared by the company to be conduit foreign income. There is also a deduction in certain cases to compensate for the company tax on inter-entity distributions where these are on-paid by holding companies to a 100% parent that is a non-resident (see Dividend Income in the Income determination section). Dividends paid to a non-resident in connection with an Australian PE are taxable to the non-resident on a net assessment basis (i.e. the dividend and associated deductions will need to be included in the determination of the non-resident’s taxable income, the dividend is not subject to dividend WHT), and a franking tax offset is allowable to the non-resident company for franked dividends received.

2. Australia’s interest WHT rate is limited to 10% of gross interest, although the treaty may allow for a higher maximum limit. An exemption from Australian WHT can be obtained for interest on certain public issues or widely held issues of debentures. Provisions exist to ensure that discounts and other pecuniary benefits derived by non-residents on various forms of financings are subject to interest WHT. Interest paid to non-residents by offshore banking units is exempt from interest WHT where offshore borrowings are used in offshore banking activities (including lending to non-residents). An offshore borrowing is defined as a borrowing from (i) an unrelated non-resident in any currency or (ii) a resident or a related person in a currency other than Australian currency. The interest WHT rates listed above for residents in a treaty country are those that generally apply. It is common for Australia’s tax treaties to include a reduced limit for interest derived by certain government entities and/or financial institutions. One should refer to the relevant treaty for these limits.

3. Royalties paid to non-residents (except in respect of a PE in Australia of a resident of a treaty country) are subject to 30% WHT (on the gross amount of the royalty), unless a DTA provides for a lesser rate. Tax is generally limited to the indicated percentage of the gross royalty.

4. For Australian-sourced dividends that are franked under Australia’s dividend imputation provisions and paid to a person who directly holds at least 10% of the voting power of the company, the limit is 10% (although note that Australia does not impose WHT on franked dividends). For Argentinean-sourced dividends paid to a person who holds at least 25% of the capital in the company, the limit is 10%. A 15% limit applies to other dividends. Source-country tax is limited to 10% of the gross amount of royalties in relation to copyright of literary, dramatic, musical, or other artistic work; the use of industrial or scientific equipment; the supply of scientific, technical, or industrial knowledge; assistance ancillary to the above; or certain forbearances in respect of the above. Source-country tax is limited to 15% of the net amount of royalties for certain technical assistance. In all other cases, it is limited to 15% of the gross amount of royalties.

5. The government announced on 4 February 2010 that negotiations to update Australia’s tax treaty with Austria would take place in March 2010. No further announcements have been made in relation to the progress of treaty negotiations.

6. A 5% dividend WHT rate applies to franked dividends paid by an Australian resident company and, in the case of dividends paid by a Canadian resident company (other than a non-resident owned investment corporation), to a company that directly holds at least 10% of the voting power in the dividend company (although note that Australia does not impose WHT on franked dividends).

7. Otherwise, the maximum WHT rate on dividends is 15%.

8. Australia and Chile signed a DTA on 10 March 2010. The agreement entered into force on 8 February 2013. The DTA takes effect in respect of Australian WHT on income derived on or after 1 April 2013, and in respect of other Australian tax, in respect of income years beginning on or after 1 July 2013.

9. A 5% dividend WHT rate applies to franked dividends paid by an Canadian resident company. In the case of dividends paid by a Canadian resident company (other than a non-resident owned investment corporation), to a company that directly holds at least 10% of the voting power in the dividend company (although note that Australia does not impose WHT on franked dividends). In the Czech Republic, a rate of 15% applies to the gross amount of dividends if the dividends are paid to a company that directly holds at least 20% of the capital of the company paying the dividend.

10. East Timor does not have a comprehensive DTA with Australia. However, the Timor Sea Treaty governs the taxation rights between the two countries for petroleum-related activities conducted in the Joint Petroleum Development Area of the Timor Sea by any person or entity, irrespective of the residency status of that person or entity. Where the Timor Sea Treaty applies to third-country resident payees, only 10% of the total gross interest, dividend, or royalty payment is subject to Australian WHT, as follows:

- Interest: 10% of total gross interest paid is subject to WHT at a rate of 10%.
- Dividends: 10% of total gross unfranked dividends paid are subject to WHT at a rate of 15%, or at the relevant DTA rate in the case of dividends paid to an Australian PE.
- Royalties: 10% of total gross royalties paid is subject to WHT at a rate of 10%, or at the relevant DTA rate of the recipient.

11. A zero WHT rate applies to inter-corporate dividends where the recipient directly holds 80% or more of the voting power of the company paying the dividend. A 5% rate limit applies on all other
inter-corporate dividends where the recipient directly holds 10% or more of the voting power of the company paying the dividend. A 15% rate applies to all other dividends. A rate limit of 10% applies to interest, except no tax is chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political or administrative subdivision or local authority or central bank of the other country. Amounts derived from equipment leasing (including certain container leasing) are excluded from the royalty definition and treated either as international transport operations or business profits.

12. The source country exempts inter-corporate non-portfolio (i.e. minimum 10% shareholding) dividends paid out of profits that have borne the normal rate of company tax. There is a 5% rate limit for all other non-portfolio dividends. A rate limit of 15% applies for all other dividends. A rate limit of 10% applies to interest, except no tax is chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political or administrative subdivision or local authority or central bank of the other country. Amounts derived from equipment leasing (including certain container leasing) are excluded from the royalty definition and treated either as international transport operations or business profits.

13. The source-country limit under the Indian agreement is 10% for royalties paid in respect of the use of or rights to use industrial, commercial, or scientific equipment or for the provision of consulting services related to such equipment. In other cases, the limit is 15%.

14. The source-country limit under the Indonesian agreement is 10% for royalties paid in respect of the use of or the right to use any industrial, commercial, or scientific equipment or for the supply of scientific, technical, industrial, or commercial knowledge or information, and it is 15% in other cases.

15. The source country exempts inter-corporate dividends where the recipient directly holds 80% or more of the voting power of the company paying the dividend and certain limitation of benefit thresholds are met. A 5% rate limit applies on all other inter-corporate dividends where the recipient directly holds 10% or more of the voting power of the company paying the dividend. A rate limit of 10% applies to other dividends. However, where the dividends are paid by a company that is a resident of Japan, which is entitled to a deduction for the dividends in Japan, the rate limit is 15% where more than 50% of the assets of the paying company consist, directly or indirectly, of real property situated in Japan and 10% in all other cases. Special rules apply to distributions to Japanese residents by real estate investment trusts (REITs). A rate limit of 10% applies to interest, except no tax is chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political subdivision or local authority or central bank or other specified entity of the other country. Amounts derived from equipment leasing (including certain container leasing) are excluded from the royalty definition and treated either as international transport operations or business profits.

16. A zero dividend WHT rate applies to franked dividends paid by an Australian resident company to an entity that directly holds at least 10% of the voting power in the dividend paying company; otherwise, a 15% WHT rate applies. In relation to dividends paid by a company resident of Malaysia, no WHT applies.

17. Source-country tax in Malta is limited to the tax chargeable on the profits out of which the dividends are paid.

18. A zero dividend WHT rate applies to franked dividends paid (in Mexico, those dividends that have been paid from the net profit account to a company that directly holds at least 10% of the voting power in the dividend paying company. In all other cases, a 15% WHT rate will apply to dividends. Source-country tax is limited to 10% when interest is paid to a bank or an insurance company, derived from bonds and securities that are regularly and substantially traded on a recognised securities market, paid by banks (except where the prior two criteria apply), or paid by the purchaser to the seller of machinery and equipment in connection with a sale on credit. It is 15% in all other cases.

19. A zero WHT rate applies in certain cases to inter-corporate dividends where the recipient directly holds at least 80% of the voting power in the dividend paying company. A rate of 5% applies on all other inter-corporate dividends where the recipient directly holds 10% or more of the voting power of the company paying the dividend. A general limit of 15% applies for all other dividends. Source-country tax on interest is limited to 10%. However, no tax is chargeable in the source country on interest derived by a government or a political subdivision or local authority of the other country (including a government investment fund or a bank performing central banking functions) or on interest derived by a financial institution that is unrelated to and dealing wholly independently of the payer (excluding interest paid as part of a back-to-back loan arrangement and, for New Zealand payers, where that person has not paid approved issuer levy).

20. A zero WHT rate applies in certain cases to inter-corporate dividends where the recipient directly holds at least 80% of the voting power in the dividend paying company for the 12-month period prior to payment. A rate of 5% applies to all other inter-corporate dividends where the recipient directly holds 10% or more of the voting power of the company paying the dividend. A general limit of 15% applies to all other dividends. A general rate limit of 10% applies to interest. However, no tax is chargeable in the source country on interest derived by a government of the other country (including its money institutions or a bank performing central banking functions) from the investment of official reserve assets and on interest derived by a financial institution resident in the other country (excluding interest paid as part of a back-to-back loan arrangement).

21. For Australian-source dividends, the limit is 15%. Where dividends are sourced in Papua New Guinea, the limit is 20%.

22. Source-country tax is limited to 15% where relief by way of rebate or credit is given to the beneficial owner of the dividend. In any other case, source-country tax is limited to 25%. Source-country tax
23. Source-country tax (Australia) is limited to 5% where a dividend is paid to a Romanian resident company that directly holds at least 10% of the capital of the Australian company paying the dividend to the extent that the dividend is fully franked. Source-country tax (Romania) is limited to 5% where a dividend is paid to an Australian resident company that directly holds at least 10% of the capital of the Romanian company paying the dividend if the dividend is paid out of profits that have been subject to Romanian profits tax. In other cases, it is limited to 10%.

24. Source-country tax generally is limited to 15%. However, a rate of 5% applies where the dividends have been fully taxed at the corporate level, the recipient is a company that has a minimum direct holding in the paying company, and the recipient has invested a minimum of AUD 700,000 or the Russian ruble equivalent in the paying company. Where the dividends are paid by a company that is a resident in Russia, the dividends are exempt from Australian tax.

25. A 5% rate limit applies on all inter-corporate dividends where the recipient directly holds 10% or more of the voting power of the company paying the dividend. A rate limit of 15% otherwise applies for dividends. A general rate limit of 10% applies to interest. However, no tax is chargeable in the source country on interest derived by a government of the other country (including a bank performing central banking functions) and on interest derived by a financial institution resident in the other country (excluding interest paid as part of a back-to-back loan arrangement).

26. Source-country tax (Taiwan) is limited to 10% of the gross amount of the dividends paid to a company that holds at least 25% of the capital of the company paying the dividends. A rate of 15% applies in all other cases. To the extent that dividends are franked because they are paid out of profits that have borne Australian tax, they are exempt from dividend WHT (See Note 1 above). The treaty allows Australia to impose a 10% WHT on the franked part of a dividend.

27. The source-country limit on dividends where the recipient has a minimum 25% direct holding in the paying company is 15% if the paying company engages in an industrial undertaking; 20% in other cases. The source-country limit on interest is 10% when interest is paid to a financial institution. It is 25% in all other cases.

28. On 29 April 2010, the Australian and Turkish governments signed a DTA. The DTA will enter into force when both countries advise that they have completed their domestic requirements. Once in force, the DTA will apply a 5% WHT rate to inter-corporate dividends where the recipient directly owns 10% of the voting power of an Australian resident company or directly owns 25% of the capital of a Turkish resident company where the profits out of which the dividend is paid has been subject to the full rate of corporation tax in Turkey. In all other cases, a 15% WHT rate will apply. Once in force, the DTA will apply a general limit of 10% WHT on interest. However, interest derived from the investment of official reserve assets by the either the Australian or Turkish government, the Australian or Turkish central bank, or a bank performing central banking functions in either Australia or Turkey shall be exempt from interest WHT.

29. On 28 October 2008, it was announced that the Australian and the United Kingdom governments would commence negotiations on a revised tax treaty. No further announcements have been made in relation to the progress of treaty negotiations.

30. Source-country tax on dividends is generally limited to 15%. However, an exemption applies for dividends paid to a listed company that satisfies certain public listing requirements and controls 80% or more of the voting power in the company paying the dividend, and a 5% limit applies to dividends paid to other companies with voting power of 10% or greater in the dividend paying company. Source-country tax on interest is generally limited to 10%. However, generally zero interest WHT is payable where interest is paid to a financial institution or a government body exercising governmental functions.

31. Source-country tax on dividends is generally limited to 15%. No source country tax is chargeable on dividends to a beneficially entitled company that satisfies certain public listing requirements and holds 80% or more of the voting power in the company paying the dividend. A 5% limit applies to dividends paid to other companies with voting power of 10% or greater in the dividend paying company. No limit applies to US tax on dividends paid on certain substantial holdings of Australian residents in US REITs. In practical terms, US tax on these dividends is increased from 15% to the current US domestic law rate of 30%. The 15% rate applies to REIT investments made by certain listed Australian property trusts subject to the underlying ownership requirements not exceeding certain levels. Investments in REITs by listed Australian property trusts acquired before 26 March 2001 are protected from the increased rate. Source-country tax on interest generally is limited to 10%. However, generally zero interest WHT is payable where interest is paid to a financial institution or a government body exercising governmental functions. Rules consistent with US tax treaty policy and practice will allow interest to be taxed at a higher 15% rate (the rate that generally applies to dividends) and for tax to be charged on intra-entity interest payments between a branch and its head office. Amounts derived from equipment leasing (including container leasing) are excluded from the royalty definition.

32. Source-country tax is limited to 15% (Australia) and 10% (Vietnam).

33. Where the recipient does not quote a Tax File Number (or Australian Business Number), the payer is obligated to withhold tax at the rate of 46.5% under the Pay-As-You-Go (PAYG) withholding regime. No withholding is required in relation to franked dividends.
Other payments
A PAYG withholding regime applies to require the deduction and remittance of taxes on behalf of foreign resident individuals and entities that are in receipt of the following types of payments:

<table>
<thead>
<tr>
<th>Type of payment</th>
<th>Rate of withholding (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Payments for promoting or organising casino gaming junket arrangements</td>
<td>3</td>
</tr>
<tr>
<td>Payments for performing artists and sportspersons, including payments to support staff such as art directors, bodyguards, coaches, hairdressers, and personal trainers:</td>
<td></td>
</tr>
<tr>
<td>if recipient is a company</td>
<td>30</td>
</tr>
<tr>
<td>if recipient is an individual</td>
<td>the applicable non-resident marginal tax rate</td>
</tr>
<tr>
<td>Payments under contracts entered into after 30 June 2004 for the construction, installation, and upgrading of buildings, plant, and fixtures, and for associated activities</td>
<td>5</td>
</tr>
</tbody>
</table>

Managed investment trust distributions
For managed investment trust fund payments to a non-resident investor, a WHT regime applies, with divergent outcomes, depending upon whether or not the recipient of such fund payments is resident of a country identified as being one with which Australia has an effective exchange of information (EEOI) arrangement and which is regulated as such for purposes of these rules. For a resident of a regulated EEOI country, a final WHT at a 15% rate applies for distributions relating to income years starting on or after 1 July 2012. For residents of non-EEOI regulated countries, a final WHT at a 30% rate applies.

From 1 July 2012, distributions from a managed investment trust that holds only certified ‘clean buildings' will be eligible for a reduced rate of WHT of 10% where the recipient of the fund payment is a resident of a regulated EEOI country. The 30% rate will continue to apply to distributions to residents in non-EEOI regulated countries.

EEOI countries that have been identified by regulation are Anguilla, Antigua & Barbuda, Aruba, the Bahamas, Belize, Bermuda, the British Virgin Islands, the Cayman Islands, the Cook Islands, Gibraltar, Guernsey, Isle of Man, Jersey, Macau, Mauritius, Monaco, the Netherlands Antilles, San Marino, St. Christopher and Nevis, St. Vincent and the Grenadines, and the Turks and Caicos Islands, as well as countries with which Australia has concluded DTAs, other than Austria, Greece, the Philippines, and Switzerland. Australia has entered into EEOI agreements with Andorra, Bahrain, Chile, Costa Rica, Dominica, Grenada, Liberia, Liechtenstein, the Marshall Islands, Montserrat, Saint Lucia, Samoa, Turkey, and Vanuatu; however, these countries have not yet been identified in regulations to be EEOI countries.

Tax administration

Taxable period
The Australian tax year runs from 1 July to 30 June. However, a corporation may apply to adopt a substitute year of income, for example, 1 January to 31 December.

Tax returns
A corporation (including the head company of a tax consolidated group) lodges/files a tax return under a self-assessment system that allows the Australian Taxation Office
(ATO) to rely on the information stated on the return. Where a corporation is in doubt as to its tax liability regarding a specific item, it can ask the ATO to consider the matter and obtain a binding private ruling.

Generally, the tax return for a corporation is due to be lodged/filed with the ATO by the 15th day of the seventh month following the end of the relevant income year or such later date as the Commissioner of Taxation allows. Additional time may apply where the tax return is lodged/filed by a registered tax agent.

**Payment of tax**
A PAYG instalment system applies to companies other than those whose annual tax is less than AUD 8,000 that are not registered for GST. Most companies are obligated to pay instalments of tax for their current income year on a quarterly basis by the 21st day of the fourth, seventh, and tenth months of that year and by the 21st day of the month immediately following that year. Instalments are calculated by applying an instalment rate to the amount of the company's actual ordinary income (ignoring deduction) for the previous quarter. The instalment rate is notified to the taxpayer by the ATO and determined by reference to the tax payable for the most recent assessment. The ATO may notify a new rate during the year on which subsequent instalments must be based. Taxpayers can determine their own instalment rate, but there may be penalty tax if the taxpayer's rate is less than 85% of the rate that should have been selected.

Legislation is proposed to require certain large companies to pay instalments of tax on a monthly basis (instead of quarterly), commencing from 1 January 2014. This change will be phased in over three years, commencing with companies with turnover of AUD 1 billion or more from 1 January 2014, followed by companies with a turnover of AUD 100 million or more from 1 January 2015, and those with a turnover of AUD 20 million or more from 1 January 2016.

Final assessed tax is payable on the first day of the sixth month following the end of that income year or such later date as the Commissioner of Taxation allows by a published notice.

**Tax audit process**
The Australian tax system for companies is based on self-assessment; however, the ATO undertakes ongoing compliance activity to ensure corporations are meeting their tax obligations. The ATO takes a risk-based approach to compliance and audit activities, with efforts generally focused on taxpayers with a higher likelihood of non-compliance and/or higher consequences (generally in dollar terms) of non-compliance. Compliance activities take various forms, including general risk reviews, questionnaires, reviews of specific issues, and audits.

**Statute of limitations**
Generally, the Commissioner of Taxation may amend an assessment within four years after the day of which an assessment is given to a company. Under the self-assessment system, an assessment is deemed to have been given to the company on the day on which it lodges its tax return. The four year time limit does not apply where the Commissioner is of the opinion there has been fraud or evasion, or to give effect to a decision on a review or appeal, or as a result of an objection made by the company, or pending a review or appeal. The current unlimited period of review of an assessment to give effect to a transfer pricing adjustment is proposed to be changed to a seven-year period of review.
**Topics of focus for tax authorities**

The ATO annually releases its compliance program that identifies issues that are attracting its attention, what it sees as risks for the upcoming year, and how it plans to respond to these risks. The following areas were identified in the 2012/13 Compliance Program:

- For large businesses, a focus on good corporate governance and tax risk management, the implementation of the TOFA provisions, profit shifting through the use of related party arrangements, corporate restructures and the use of the tax consolidation regime to gain inappropriate outcomes, transition to the new R&D tax incentive, private equity holding arrangements and disposal of target investments, deductions for mining, quarrying and prospecting rights, use of hybrid instruments and entities, and claims for losses.
- For small to medium enterprises, a focus on the use of trusts to minimise tax, non-disclosure and incorrect reporting of capital gains, overseas interests and international dealings, and lodgement compliance.

It was announced in the 2013/14 Federal Budget that further funding will be provided to the ATO to target the exploitation of trusts used to conceal income, mischaracterise transactions, artificially reduce trust income amounts, and underpay tax. Additionally, it plans to increase its compliance activity in respect of restructuring activity that facilitates profit shifting opportunities through the use of ‘marketing hubs and business restructures’.

Legislation is also proposed that will require the Commissioner of Taxation to publish limited information about the tax affairs of large corporate taxpayers (i.e. those with a reported total income of AUD 100 million and those with a liability to pay the MRRT or PRRT), including disclosure of the entity’s name, Australian Business Number, total income, taxable income, and tax payable. It is expected that the first reporting will cover the 2013/14 tax year, with the first published data occurring in late 2015.

**Significant developments**

On 13 November 2012, the ‘Abgabenänderungsgesetz 2012’ passed the Austrian parliament. This act includes several amendments, but does not result in significant changes for corporate income taxation.

On 10 January 2013, a law amendment regarding the registration fee on real estate transactions was enacted. See the Other taxes section for more information.

In March 2013, a draft of the ‘Gesellschaftsrechts-Änderungsgesetz 2013’ was published. It is planned that the law amendments will enter into force on 1 July 2013. The draft includes significant amendments to the Austrian tax and company law system. See Choice of business entity in the Other issues section for more information.

**Taxes on corporate income**

**Basis of corporate income tax (Körperschaftsteuer)**

Corporations (i.e. GmbH, AG) are subject to unlimited taxation in Austria of their entire (domestic and foreign) income if they have their legal seat or place of effective management in Austria. A non-Austrian corporate tax resident (with neither a legal seat nor place of effective management in Austria) is subject to limited taxation on certain sources of income in Austria.

**Rates of corporate income tax (Körperschaftsteuer)**

Due to the qualification of corporations as independent tax subjects, a distinction must always be made between tax ramifications at the level of the company and those at the shareholder level. At the level of the company, profits are taxed at the standard corporate income tax (CIT) rate of 25%, regardless of whether profits are retained or distributed. At the shareholder level, the profit distributions are usually subject to withholding tax (WHT) of 25%.

There is also a minimum CIT, payable by companies in a tax-loss position. The minimum CIT amounts to 437.50 euros (EUR) for limited liability companies (GmbH) and EUR 875 for stock corporations (AG) for each full quarter of a year. To promote the formation of new companies, the minimum CIT is reduced to EUR 273 for the first four quarters. The minimum CIT can be carried forward without time limitation and be credited against future CIT burdens of the company.

According to the draft of the ‘Gesellschaftsrechts-Änderungsgesetz 2013’, the minimum registered capital for limited liability companies will be reduced from EUR 35,000 to EUR 10,000. Since the amount of the minimum CIT depends on the minimum registered capital, the minimum CIT will be reduced to EUR 125 for each full quarter.
Austria

It is planned that the amendments regarding the minimum CIT become effective as of 2014.

Local income taxes
There is no additional local income tax levied at the company level.

Corporate residence
A corporation is resident in Austria for tax purposes if either it is registered in Austria (legal seat) or its place of effective management is located in Austria. The 'place of effective management' is located where the day-to-day management of the company is actually carried out and not where singular board decisions are formally made. However, the definition of place of effective management under Austrian tax law does not significantly deviate from its definition under the Organisation for Economic Co-operation and Development (OECD) guidelines.

Permanent establishment (PE)
An Austrian PE is defined under Austrian tax law as a fixed establishment where a business is carried out, in particular:

• the place where the management is carried out
• plants, warehouses, purchase and sales establishments, and other establishments where an entrepreneur or one's permanent representative carries out one's business, or
• construction sites, which last for more than six months.

However, the definition of PE is different in some tax treaties. The Austrian tax authorities generally follow the commentary to the OECD model convention regarding the PE concept.

Other taxes
Value-added tax (VAT) (Mehrwertsteuer)
Generally, the Austrian VAT law is based on the 6th European Union (EU) VAT Directive. Under the Austrian VAT law, companies and individuals carrying out an active business on a permanent basis are qualified as entrepreneurs for VAT purposes. As entrepreneurs, they have to charge the supply of goods or services provided to their customers with Austrian VAT at a rate of 20%. A certain limited range of goods and services (such as food, books, passenger transportation, cultural events) is taxed at the reduced rate of 10%. Certain other transactions are exempted from Austrian VAT (e.g. export transactions).

Input VAT
Entrepreneurs are entitled to deduct Austrian input VAT insofar as the input VAT does not result from goods/services purchased that are directly linked to certain VAT-exempt sales (e.g. interest income, insurance premium). However, certain transactions are exempt from Austrian VAT (e.g. export transactions) without limiting the ability of the entrepreneur to deduct the related input VAT. To be entitled to deduct input VAT, the entrepreneur must obtain an invoice from one’s supplier that fulfils certain formal requirements.
VAT filing and payment
Entrepreneurs have to file monthly or quarterly VAT returns by the 15th day of the second month following the month concerned or by the 15th day of the second month following the quarter concerned. The balance of the VAT due and the input VAT deducted has to be paid to the tax office (if VAT burden) or is refunded by the tax office (if in a net input VAT position) to the electronic tax account of the entrepreneur. A separate report has to be filed by the entrepreneur at the tax office showing the cross-border intra EU-transactions made.

Customs duties
Certain cross-border inbound movements of goods from non-EU countries trigger Austrian customs duty. The duty is levied according to the Austrian customs duty scheme, which is based on the EU-customs duty scheme. It defines the customs duty tariffs, dependent on the nature of the good.

Excise taxes
Excise taxes are imposed on certain products, including petroleum (approximately EUR 40 to EUR 600 per 1,000 litres), tobacco products (13% to 47% of price), and alcoholic beverages (tax rate depends on type of alcohol).

Real estate tax
Local authorities annually levy real estate tax on all Austrian real estate property, whether developed or not. The tax is levied on the assessed standard ratable value (Einheitswert) of immovable property. The assessed value is usually substantially lower than the market value. The effective tax rate depends on the intended use of the real estate and is calculated using a special multiplier.

Tax rates:

- Agricultural area and forestry
  - 1.6‰ for the first EUR 3,650 of the assessed standard ratable value.
  - 2‰ for the amount of the assessed standard ratable value exceeding EUR 3,650.
- Buildings and property are taxed at 2‰ of the assessed standard ratable value. This multiplier is reduced for:
  - Single family houses
    - to 0.5‰ for the first EUR 3,650 of the assessed standard ratable value and
    - to 1‰ for the next EUR 7,300.
  - Leasehold and shared property
    - to 1‰ for the first EUR 3,650 of the assessed standard ratable value and
    - to 1.5‰ for the next EUR 3,650.
  - All other property
    - to 1‰ for the first EUR 3,650 of the assessed standard ratable value.

After the assessed standard ratable value is multiplied by the relevant multiplier, the real estate tax is calculated by using a special municipal rate fixed by each municipality (maximum 500%). Finally, the tax amount is reduced by a general reduction of 25% as stated by law and increased by a 35% inflation adjustment.

Real estate transfer tax
Tax is levied at 3.5% on any transaction that causes a change in the ownership of Austrian real estate or in the person empowered to dispose of such property (e.g. direct owner). Real estate transfer tax is generally calculated on the basis of the acquisition price. However, in the case of corporate restructuring under the Reorganisation Tax Act and in case of real estate transfers free of consideration, the two-fold (in the case of the
Austria

former) and the threefold (in the case of the latter) assessed standard ratable value for tax purposes is taken as the tax base.

Real estate transactions with a tax base of EUR 1,100 or below are exempt.

Note that an additional 1.1% registration fee becomes due upon incorporation of the ownership change in the land register. Until 31 December 2012, the registration fee was calculated from the same tax base as the real estate transfer tax. However, due to a recent decision of the Austrian Constitutional Court, the relevant tax act was amended. From 2013 onwards, the registration fee has to be assessed on the basis of the market value. There is a preferential taxation (threefold ratable value capped at 30% of the fair market value) in case of family transactions or corporate restructuring qualifying under the Reorganisation Tax Act.

The Constitutional Court has also declared the real estate transfer tax as unconstitutional. However, the repeal does not have an immediate effect, as the legislature was granted a grace period until 31 May 2014 to recreate the law.

**Capital transfer tax (Gesellschaftsteuer)**

Capital transfer tax is imposed at a rate of 1% on the initial contribution of capital, other contractual or voluntary contributions in cash or in kind, and certain hybrid financing instruments to Austrian corporations. However, in many cases a taxable event for capital transfer tax purposes can be eliminated by careful structuring (e.g. contributions made by the indirect shareholder of an Austrian company [so called ‘grandparent contributions’] do not trigger capital transfer tax).

**Stamp duty**

Stamp duty is imposed in connection with certain legally predefined transactions for which a written contract has been established (e.g. lease contracts, bills of exchange, assignments of receivables). The Austrian administration’s understanding of a ‘written contract’ is very broad and covers not only paper contracts but also contracts concluded by electronic means (e.g. electronically signed emails).

The stamp duty is triggered upon the establishment of a legal relationship if at least one Austrian party is contractually involved or, even if a contract is concluded between non-Austrian parties only, if the subject of the contract relates to Austria (e.g. lease contract on Austrian real estate). However, various possibilities are available for most legal transactions subject to stamp duty to structure them in a way without triggering stamp duties (e.g. setting up of contracts abroad, offer-acceptance procedure, usage of audio-tapes).

Loan and credit agreements are not subject to stamp duty.

The stamp duty rates for the most common legal transactions are as follows:

<table>
<thead>
<tr>
<th>Legal transactions</th>
<th>Stamp duty (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lease agreements</td>
<td>1.00</td>
</tr>
<tr>
<td>Certificates of bonds</td>
<td>1.00</td>
</tr>
<tr>
<td>Bill of exchange</td>
<td>0.13</td>
</tr>
<tr>
<td>Assignment of receivables</td>
<td>0.80</td>
</tr>
</tbody>
</table>
**Payroll taxes**
Payroll taxes are income taxes levied on employment income, withheld by the employer. A progressive tax rate is applied to the tax base, being the salary after deduction of allowances and various expenditures (e.g. social security contribution). The employer is legally obligated to withhold the payroll tax and liable to do so vis-a-vis the Austrian tax authority. For more information, see Other taxes in Austria’s Individual summary at www.pwc.com/taxsummaries.

**Branch income**
Austrian branches of foreign corporations are taxed in the same way as Austrian corporations, except that inter-company dividends received by Austrian branches of non-EU corporations are not tax exempt (see the Income determination section) and Austrian tax losses can be carried forward only if they exceed non-Austrian profits. Books and records generally can be kept abroad but must be brought to Austria in case of a tax audit (upon official request).

**Income determination**
Taxable income is determined based on statutory accounts under Austrian generally accepted accounting principles (GAAP) adjusted for certain deductions and additions prescribed by the tax law.

**Inventory valuation**
In general, inventories are valued at the lower of cost or market. If specific identification during stock movements is not possible, other methods, such as last in first out (LIFO) and first in first out (FIFO), are permitted when shown to be appropriate. Conformity between financial book keeping and tax reporting is required.

**Capital gains/exit taxation/inbound transfer**
Generally, capital gains (short and long-term) are part of the normal annual result of a corporation and are taxed at the ordinary CIT rate (25%).

A special tax treatment applies to capital gains with respect to the exit of taxable assets. In the case of a transfer of assets that formed part of a business from Austria to a foreign country (e.g. allocation of assets to foreign branch), latent capital gains generally are taxed at the time of the transfer. However, if these assets are transferred to an EU member state, capital gains taxation can be postponed upon request until the assets are sold or transferred outside the European Union.

In case of an inbound transfer, generally, the fair market value of the assets is considered for Austrian income tax purposes (step up). Therefore, any hidden reserves accumulated abroad are not taxed in Austria.

**Dividend income**
Dividends received from an Austrian company at the corporate shareholder level are generally excluded from the tax base (no minimum stake, no minimum holding period). This tax exemption refers to domestic dividends only, not to capital gains or losses.

Additionally, dividends received from companies located within the European Union or from countries within the European Economy Area (EEA) with which Austria has concluded a comprehensive agreement on mutual assistance regarding the exchange of
Austria

Information are also tax exempt if the foreign company is subject to a tax similar to the Austrian CIT and if the foreign CIT rate is not below 15%.

In cases where the dividends from foreign investments are taxable, foreign CIT can be credited against the Austrian CIT.

**Portfolio dividends**

Portfolio dividends (i.e. dividends from an investment below 10%) received from corporations located in member states of the European Union, as well as dividends from corporations that are located in those EEA countries with which Austria has concluded a comprehensive agreement on mutual assistance regarding the exchange of information, are generally exempt from CIT. However, under special circumstances, a switch-over to the credit method, as outlined under *International participation exemption for dividends and capital gains below*, has to be considered.

In the past, the exemption of portfolio dividends applied to dividends from the EU/EEA countries only, but not to those from third countries. According to a decision of the European Court of Justice (ECJ) of February 2011 (C-436/08 and C-437/08, Haribo/Salinen), the limitation of the exemption to portfolio dividends received from countries within the EU/EEA is contrary to EU law. Therefore, an extension of the exemption to portfolio dividends from third countries with which Austria has concluded a comprehensive agreement on mutual assistance regarding the exchange of information was implemented for the fiscal years 2011 onwards in the course of the ‘AbgÄG 2011’. For fiscal years before 2011, the credit method has to be applied.

**Stock dividends**

A conversion from revenue reserves (retained earnings) to capital by a company does not lead to taxable income for the shareholder (but triggers 1% capital transfer tax). However, capital reductions are treated as taxable income if within ten years prior to the capital reduction the above-mentioned increase in capital was repaid to the shareholder. Otherwise, they are tax exempt.

**International participation exemption for dividends and capital gains**

Dividends received from a foreign company are also tax exempt at the corporate shareholder level if the Austrian company holds at least 10% of the issued share capital for a minimum holding period of one year (international participation exemption). Furthermore, both capital gains and capital losses derived from shares qualifying for the international participation exemption are tax neutral. This means a deduction of capital losses is no longer available. However, the parent company can exercise an (irrevocable) option for each single participation acquired to treat both capital gains and capital losses as taxable (spread of losses and depreciations over a period of seven years). The option refers to capital gains (losses) only and does not affect the tax treatment of ongoing dividend distributions.

In the case of presumed tax abuse, the participation exemption for dividends and capital gains is replaced by a tax credit (switch-over-clause). The credit system is applied if the foreign subsidiary does not meet an active-trade-or-business test (i.e. passive income from royalties, interest, etc. is greater than 50% of total income of subsidiary) and is not subject to an effective foreign minimum CIT rate of more than 15%. The domestic and foreign participation exemptions are available to Austrian resident corporations and to Austrian branches of EU corporations only, but not to Austrian branches of non-EU corporations.
**Interest income**
Interest income is taxed at the general CIT rate of 25%.

**Rental income**
Rental income is treated as normal business income.

**Foreign income**
Austrian resident corporations are taxed on their worldwide income. If a double taxation treaty (DTT) is in force, double taxation is mitigated either through an exemption or by granting a tax credit equal to the foreign WHT at the maximum (capped with the Austrian CIT incurred on the foreign-source income). If foreign WHT cannot be credited at the level of the Austrian corporation (e.g. due to a loss position), Austrian tax law does not allow one to carry forward the foreign WHT to future assessment periods. However, if the source of the income is a non-treaty country, exemption or a tax credit shall be available based on unilateral relief (representing a discretionary decision of the Austrian Ministry of Finance only but no legal entitlement for the applicant). Austrian tax law does not provide for a deferral of taxes on foreign income. Special rules for taxing undistributed income of foreign subsidiaries are applicable only to foreign investment funds.

Please note that Austrian Tax Law does not define special controlled foreign company (CFC) rules. However, under certain circumstances, the Austrian tax administration, under a substance over form approach, taxes passive income of foreign subsidiaries of Austrian companies located in low tax jurisdictions (see switch-over-clause under International participation exemption for dividends and capital gains above).

**Deductions**

**Depreciation and amortisation**
Only the straight-line method is accepted for tax purposes, whereby the cost is evenly spread over the useful life of an asset. For certain assets, depreciation rates relevant for tax purposes are prescribed by the tax law and shown in the following chart:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings (industrial use)</td>
<td>3.0</td>
</tr>
<tr>
<td>Buildings (banking, insurance)</td>
<td>2.5</td>
</tr>
<tr>
<td>Other buildings</td>
<td>2.0</td>
</tr>
<tr>
<td>Automobiles</td>
<td>12.5</td>
</tr>
</tbody>
</table>

Tax depreciation is not required to conform to financial depreciation under Austrian GAAP. If depreciated property is sold, the difference between tax value and sale proceeds is taxed as a profit or loss in the year of sale.

Trademarks are usually amortised over 15 years. Other intangibles have to be amortised over their useful lives.

**Goodwill**
Goodwill arising in the course of an asset deal for tax purposes must be amortised over 15 years. Goodwill arising in the course of a share deal can be amortised only if the acquired company is included in a tax group (see the Group taxation section). Goodwill arising as a result of a corporate merger cannot be amortised.
Organisational and start-up expenses
Generally, organisational and start-up expenses are tax deductible.

Interest expenses
Interest payments (also inter-company) are generally tax deductible if they meet the general arm’s-length requirements. See Thin capitalisation in the Group taxation section for more information.

Financing costs
According to current tax law, interest expenses resulting from the debt-financed acquisition of shares are usually tax deductible. This is so even if the Austrian participation exemption regime applies (see the Income determination section).

However, interest expenses relating to the debt-financed acquisition of shares from related parties or (directly or indirectly) controlling shareholders are generally non-deductible. This disallowance of interest also applies in circumstances where the shareholder acquiring the shares has been funded by a debt-financed equity contribution (insofar as the equity contribution was made in direct connection with the share acquisition). The deductibility of interest expenses incurred in connection with the debt-financed acquisition of shares from a third party is not impacted.

Other financing costs (e.g. fees, legal advice) directly related to tax-exempt dividend income are not deductible. However, foreign exchange expenses or profits accumulated in connection with the financing of tax-exempted international participations are treated as a deductible or taxable (respectively) item.

Accrued expenses
Certain accruals (such as provisions for liabilities and impending losses) running for more than 12 months as of the closing date of the accounts are accepted for tax purposes at 80% of their value only. Exempted from this reduction are provisions for personnel benefits (severance payments, pensions, vacations, and anniversary awards) for which specific reduction and computation methods have been provided and provisions that were already calculated by discounting a future obligation.

In general, lump-sum accruals and accruals for deferred repairs and maintenance are not allowed for tax purposes.

Bad debt
Valuation allowances for bad debts are, in principle, deductible for tax purposes, unless they are calculated on a lump-sum basis. In case of inter-company receivables, appropriate documentation regarding the compliance with the arm’s-length principle is required.

Charitable contributions
Donations to certain charitable institutions are generally tax deductible, up to a limit of 10% of the current year’s profit.

Furthermore, donations to certain public Austrian institutions, such as universities, art colleges, or the academy of science, and to non-profit organisations performing research and educational activities mainly for the benefit of the Austrian science or economy may also be deducted as operating expenses, up to the limit of 10% of the current year’s profit. The same is valid for donations granted to foreign institutions with residence in the EU/EEA or third countries with which Austria has concluded an agreement on mutual assistance regarding the exchange of information. The
requirement for deductibility is that the activities of the organisation are carried out mainly for the benefit of Austrian science or the Austrian economy.

**Meals and entertainment**
The deductibility of costs for business lunches generally is limited to 50% of actual expenses incurred (provided the business lunch had the purpose of acquiring new business).

The deductibility of entertainment expenses is restricted to advertising expenses.

**Payment to directors**
Payments to a member of the supervisory board (Aufsichtsrat) are tax deductible up to a limit of 50%. Payments to members of the executive (managing) board are tax deductible without special limitation.

**Fines and penalties**
Fines and penalties are generally not tax deductible.

**Taxes**
Austrian and foreign taxes on income and other personal taxes, as well as VAT insofar as it relates to non-deductible expenditures, are non-deductible. Other taxes, such as payroll or capital transfer taxes, are deductible.

**Net operating losses**
Tax losses can be carried forward without any time limit. However, tax loss carryforwards generally can be offset against taxable income only up to a maximum of 75% of the taxable income for any given year. Some exceptions apply (e.g. in connection with tax groups or in the case of liquidations), allowing a company to charge tax loss carryforwards available against 100% of annual taxable income.

The Austrian tax law does not provide for a carryback of tax losses.

**Loss-trafficking (Mantelkauf)**
Tax loss carryforwards may be lost in the case of a share deal being classified as loss-trafficking (so called ‘Mantelkauf’) or in the course of a legal restructuring leading to similar results.

Under Austrian tax law, a share deal against compensation is classified as a Mantelkauf if, from a substance over form perspective, the ‘economic identity’ of a company is changed due to the transaction. The change of economic identity of a company is realised if all of the following structural changes are made to the acquired Austrian company having the tax loss carryforwards available:

- Change of shareholder structure.
- Change of the organisational structure.
- Change of the business structure.

All three conditions cumulatively have to be met. There is no exact time period defined within which they have to be met; however, meeting them within one year after the share transfer usually is regarded as a strong indication for a Mantelkauf.

**Payments to foreign affiliates**
Generally, there are no restrictions on the deductibility of royalties, interest, and service fees paid to foreign affiliates, provided they are at arm’s length (which should be
Austria

appropriately documented by agreements, contracts, calculation sheets, etc.). Payments to affiliated companies not meeting arm’s-length standards are treated as a hidden distribution of earnings (i.e. they are not tax deductible, and WHT is usually triggered at source). See Transfer pricing in the Group taxation section for more information.

Note that the domestic implementation of the EU Interest Royalty Directive, which abolishes WHT on cross-border payments of interest and licence fees (regardless of whether taken out by deduction or by assessment) between affiliated companies in the member states, should be considered.

------------------------

**Group taxation**

Two or more companies can form a tax group, provided the parent company directly or indirectly owns more than 50% of the shares in the subsidiaries. The tax group also can include foreign group members. If a group member withdraws from the group within a minimum commitment-period of three years, all tax effects derived from its group membership must be reversed.

Within a tax group, all of the taxable results (profit and loss) of the domestic group members are attributed to their respective group parent. From foreign tax group members, tax losses in the proportion of the shareholding quota are attributed to the tax group parent. The foreign tax loss has to be calculated in accordance with Austrian tax law. However, it is capped with the amount actually suffered based on foreign tax law. Foreign tax losses utilised by the Austrian tax group parent are subject to recapture taxation at the time they are utilised by the tax group member in the source state, or in the moment the group member withdraws from the Austrian tax group. Under the recapture taxation scheme, the Austrian tax group has to increase its Austrian tax base by the amount of foreign tax losses used in prior periods.

For the purpose of the application of the recapture taxation scheme, a withdrawal from the tax group is also assumed if the foreign group member significantly reduces the size of its business (compared to the size of the business at the time the losses arose). Reduction of size is measured on the basis of business parameters such as turnover, assets, balance sheet totals, and employees, while the importance of the respective criteria depends on the nature of the particular business.

Goodwill arising in the course of a share deal (acquisition of an active business company from a third party contractor) must be amortised over 15 years, provided that the acquired company is included in a tax group.

Write-downs of participations in tax group members are not tax deductible.

**Transfer pricing**

Under Austrian Tax Law, there are no explicit transfer pricing regulations available defining, in detail, the local requirements with regards to arm’s length, the documentation standards required, penalties, etc. In general, Austria applies the OECD transfer pricing guidelines referring to the OECD model tax convention. Furthermore, Austrian transfer pricing guidelines were recently issued by Austrian tax authorities. The guidelines represent the Austrian authority’s understanding of inter-company business relationships with regards to their arm’s-length classification and are based on the OECD transfer pricing guidelines.
According to these guidelines, all business transactions between affiliated companies must be carried out under consideration of the arm’s-length principle. Where a legal transaction is deemed not to correspond to arm’s-length principles, the transaction price is adjusted for CIT purposes. Such an adjustment constitutes either a constructive dividend or a capital contribution. Currently, there is the option of applying for a non-binding ruling of the tax authorities. Additionally, there is an advanced ruling opportunity available. Under this regulation, binding information in the fields of transfer pricing, group taxation, and mergers and acquisitions (M&A) can be requested from the Austrian tax authorities against payment of an administrative fee (the fee rate depends on the size of the applicant’s business).

**Thin capitalisation**

There are no explicit tax regulations available under Austrian tax law stipulating the minimum equity required by a company (‘thin capitalisation rules’). Basically, group financing has to comply with general arm’s length requirements. Therefore, an Austrian group entity being financed by an affiliated entity must be able to document that it would have been able to obtain funds from third party creditors under the same conditions as from an affiliated financing entity. Therefore, the appropriate ratio between an Austrian company's equity and debt will mainly depend on the individual situation of the company (profit expectations, market conditions, etc.) and its industry. Nonetheless, the fiscal authorities in administrative practice (i.e. no ‘safe-harbour’ rule) tend to accept a debt-to-equity ratio of approximately 3:1 to 4:1. However, the debt-to-equity ratio accepted by tax authorities also strongly depends on the average ratio relevant for the respective industry sector. If an inter-company loan is not accepted as debt for tax purposes, it is reclassified into hidden equity and related interest payments into (non-deductible) dividend distributions. Furthermore, under Austrian commercial law (for companies subject to statutory audits), a minimum equity ratio of 8% is claimed. If the equity ratio of the company falls below 8% and its earning power (virtual period for debt redemption) at the same time does not meet certain requirements, a formal and public reorganisation process will have to be initiated.

**Tax credits and incentives**

**Foreign tax credit (matching credit)**

Generally, foreign WHT can be credited against Austrian CIT (see Foreign income in the Income determination section). In special cases (e.g. Brazil, China, Korea), the DTT provides for a matching credit, which allows the credit of a pre-defined amount that exceeds the actually paid foreign WHT.

**Research and development (R&D) incentives**

R&D costs are fully deductible at the time they accrue. An R&D premium of 10% (i.e. R&D expenses x 10% = tax refund) may be claimed for R&D activities performed in Austria.

In order to receive the R&D premium of 10%, an expert report (issued by an Austrian research promotion organisation) is required.

The R&D premium is also available in case of contract R&D; however, R&D incentives cannot be claimed by both principal and agent (the agent is just able to apply for the premium if the principal does not). In case of contract R&D, the privileged R&D costs are capped at EUR 1 million per year.
Austria

**Employment incentives**
A tax bonus payment of 6% or, alternatively, an allowance of 20% can be claimed for expenditures in connection with the training of employees. These incentives can be claimed for external training expenditures and for in-house training expenditures, provided that there is a dedicated in-house training department (for in-house training expenditures, only the allowance can be applied for).

**Investment incentives**
For investment in certain regions, government grants and subsidies are available and are generally individually negotiated.

---

**Withholding taxes**

**Dividend WHT**
Under Austrian domestic law, there is generally a 25% WHT on dividends (profit distributions) paid to a foreign parent company. The WHT has to be deducted and forwarded by the Austrian subsidiary to the tax office.

To end up with the reduced WHT rate as defined under the DTT applicable, Austrian tax law provides for the following alternative methods of WHT relief: refund method or exemption at source method.

**Refund method**
The Austrian subsidiary generally has to withhold 25% WHT on profit distributions to the foreign parent company, and the parent company has to apply for a refund (of the difference between 25% WHT and the lower DTT rate). In the course of the refund process, the Austrian tax administration analyses whether the foreign shareholder can be qualified as beneficial owner of the dividends paid. If the refund is approved by the Austrian tax authority, dividend distributions within the following three years can be done without deduction of WHT (for distributions of a comparable size and provided the foreign holding structure did not change in the meantime).

**Exemption at source method**
Relief at the source is available only if the direct parent company issues a written declaration confirming that it is an ‘active’ company carrying out an active business that goes beyond the level of pure asset management (holding activities, group financing, etc.) and has its own employees and office space at its disposal (substance requirements).

**WHT on dividends paid to EU companies**
With regard to dividends paid to EU resident corporate shareholders, Austria has implemented the EU Parent/Subsidiary Directive according to which domestic WHT is reduced to zero. The requirements for the reduction are that the EU resident parent company, which also has to meet the substance requirements mentioned above (see **Exemption at source method**) at the moment of the dividend distribution, must directly own at least 10% of the share capital of the Austrian subsidiary for a period of at least one year. In case of foreign EU shareholders being qualified as pure holding companies, the Austrian tax administration does not allow an exemption at source but claims the application of the refund method.

Provided the requirements according to the EU Parent/Subsidiary Directive are not met, Austrian WHT has to be deducted. If an EU parent company cannot credit the Austrian WHT deducted against the CIT of its resident state (e.g. because the foreign
dividend income is exempted from the CIT or due to a loss position of the shareholder), it is entitled to apply for a refund of the Austrian WHT. This application has to include a confirmation/documentation that the Austrian WHT could (fully or partly) not be credited at the level of the parent company.

**Repayment of equity**
The tax-wise equity of a company has to be annually reported to the Austrian tax authority as part of the CIT return (so called *Evidenzkonto*). This equity can be repaid to the domestic or foreign shareholders without triggering Austrian WHT. However, the tax-wise classification of a dividend as ‘capital repayment’ has to be shown in the shareholder resolution about the distribution.

**Interest WHT**
Interest payments to non-resident companies are not subject to WHT (provided no Austrian real estate property is used as security).

**Royalties WHT**
On royalties paid to a non-resident company, Austrian WHT at a rate of 20% has to be deducted. This tax rate can be reduced under an applicable DTT or under the application of the EU Interest Royalty Directive, which was implemented in Austrian Tax Law.

**Tax treaties**
The following table lists the countries with which Austria has signed a DTT and provides details of the amount of Austrian WHT.

**Notes**

1. Dividend distributions attributable to a prior release of paid-in surplus or other shareholder contributions (classified as capital reserves) are deemed to be a repayment of capital, i.e. no WHT is incurred. At the shareholder's level, dividends received and those classified as contribution refund will reduce the tax basis assessment for investments. To the extent to which the tax basis would become negative, such dividends are treated as taxable income (unless taxation is eliminated by a tax treaty).

2. Under certain treaties, the amount of the WHT is dependent on the extent of the proportion of issued share capital held by the recipient. Where this is the case, all rates are given. Those marked with + refer to an investment of 10%, ++ to 15%, +++ to 20%, * to 25%, ** to 50%, and *** to 70%.

3. Interest on cash deposits in euro or foreign currency in bank accounts, on fixed interest bearing securities in foreign currency (issued after 31 December 1988), and on fixed interest bearing securities denominated in Austrian schillings or euro (issued after 31 December 1983) are subject to a 25% WHT. If the recipient is an individual, this WHT is final (no further income taxation and inheritance taxation). Companies receiving interest payments may obtain an exemption from WHT if they provide the bank or other custodial agent with a written confirmation from the recipient that such interest payments constitute a part of the recipient's operating revenues (exemption statement). Interest payments to non-residents without a PE in Austria are generally not subject to WHT (provided the
4. In case of payments to countries marked with **, the rate is 0% unless more than 50% of the issued share capital of the company paying the royalties is held by the recipient, in which case the rate given applies. At royalty payments between affiliated companies, the regulations stipulated by the EU Interest Directive have to be taken into consideration.

5. If the recipient holds a participation of less than 10% in the distributing company, the dividends are subject to a 25% WHT. Since dividends distributed by an Austrian corporation to another Austrian corporation are generally not subject to taxation, the WHT is credited against CIT upon assessment of the recipient corporation for the respective tax year.

6. WHT on dividends from Austrian companies is final, i.e. no further income tax is collected from the recipient (provided it is an individual).

7. The treaty was recalled by Argentina in 2009. Austrian tax citizens are protected by section (§) 48 BAO [Bundesabgabenordnung [Austrian Fiscal Federal Code]] against double taxation. Austria will try to enter into new negotiations with Argentina.

8. 5% for shares of at least 25% and worth at a minimum of 250,000 United States dollars (USD); 10% for shares of at least 25% and worth at least USD 100,000; 15% in all other cases.

9. 5% for industrial licences and know-how not more than three years old; 10% in all other cases.

10. The treaty entered into force on 1 January 2012 and is applicable as of the beginning of FY 2012.

11. 10% for copyright licence fees in connection with literature, science, and art; 25% for trademarks licence fees; 15% in all other cases.

12. 6% for industrial, commercial, or scientific equipment; 10% in all other cases.

13. 5% for licence income from copyrights, brands, plans, secret formulas or procedures, computer software, industrial, commercial or scientific use of equipment, and information.

14. 0% for copyright royalties in connection with the production of literary, dramatic, musical, or artistic work; 5% in all other cases.

15. 20% for films.

16. 5% for leasing of mobile goods, and 10% for other licences.

17. 0% for shares of at least 50% and worth at a minimum of EUR 2 million; 5% for shares of at least 10% and worth at least EUR 100,000; 10% for shares in all other cases. The treaty was updated on 4 July 2012, but amendments will not enter into force before the beginning of FY 2013 (0% if a company holds directly at least 10% of the capital of the company paying the dividends, 10% for shares in all other cases).

18. The treaty entered into force on 1 January 2011 and is applicable as of the beginning of FY 2012 (Austria: 1 January 2012, Hong Kong: 1 April 2012).

19. 2% for licence income from industrial, commercial, or scientific use, and 10% for other licences.

20. 5% for the use of commercial or scientific equipment; 10% in all other cases.

21. The treaty was signed on 16 September 2010. It has not yet been decided when it will enter into force.

22. 5% in case of direct (or indirect over a patent-realisation-company) payments of royalties by companies of the other member state (with an industrial establishment in the other member state), and 10% for other licences.

23. 5% in case of licence income from industrial, commercial, or scientific use, and 10% for other licences.

24. 15% for films.

25. 0% for copyright licence fees in connection with literature, art, and scientific use, and 10% for other licences.

26. 10% for the right of use of copyrights to artistic, scientific, or literary as well as cinematographic works, and 5% for other licences.

27. For Portugal, the rate of WHT is 5%, but 10% if more than 50% of the issued share capital is owned by the recipient.

28. 5% if capital share amounts to at least 10% and worth at least USD 100,000; 15% in all other cases.

29. The treaty applies to Tajikistan and Turkmenistan. With Russia, a new treaty has been ratified.

30. 5% for copyright licence fees; 10% for other licences.

31. Until a new treaty will be established, the treaty with Czechoslovakia remains applicable.

32. For dividend distributions retroactive as of 1 January 2000.

33. The treaty was signed on 3 March 2009. It has not yet been decided when it will enter into force.

34. 15% for films.

35. 10% for films.

36. 7.5% for fees for technical services; 10% for royalties.

37. The treaty entered into force on 7 March 2012 and is applicable as of the beginning of FY 2013.

38. The new treaty was signed on 7 June 2011 and entered into force on 1 July 2012. It is applicable as of the beginning of FY 2013.

39. The treaty was signed on 6 December 2012. It has not yet been decided when it will enter into force.

40. 5% for the use of, or the right to use, any industrial, commercial, or scientific equipment; 10% in all other cases.

41. Austria and the United States created a draft for an amendment protocol to the existing DTT, but it has not yet been decided when it will be signed.

42. Austria and Liechtenstein signed an amendment protocol to the existing DTT. It will be applicable as of the beginning of FY 2014 for tax years starting on or after 1 January 2014.

43. As of 2014, 0% for a direct participation of at least 10% and a holding period of at least 12 months; 15% in all other cases.
**Tax administration**

**Taxable period**
The standard tax assessment period in Austria is the calendar year. However, a company’s financial year may deviate. When the tax and financial years deviate, the tax assessments for a year are based on the profits derived in the financial year(s) ending in the respective calendar year (e.g. if tax year is 1 June 2013 to 31 May 2014, then assessment is financial year 2014).

**Tax returns**
Generally, the CIT return has to be submitted electronically by 30 June of the calendar year following the year in which the fiscal year of the company ends. However, if the company is represented by an Austrian certified tax advisor, the tax return can be submitted by 31 March of the second following year at the latest (if the company will not be formally requested by the tax office to file it earlier). If the end of a tax year is 31 May 2013 for example, the filing deadline is 30 June 2014 (without tax advisor) or 31 March 2015 (with tax advisor).

**Electronic filing of annual CIT returns**
The annual CIT return (as well as the annual VAT return) has to be filed by electronic means. In the case of a company that cannot reasonably be expected to file tax returns electronically due to the lack of technical prerequisites, filing of the tax return is allowed to be done via pre-printed forms.

**Payment of tax**
CIT is prepaid in quarterly instalments during the calendar year, with a final settlement subsequent to the annual assessment. Prepayments of CIT generally are based on the most recently assessed tax year’s tax burden (unless the taxpayer can show that its tax charge for the current year will be lower).

The difference between CIT as per the final assessment and the prepayments made is interest bearing from 1 October of the year subsequent to the year when the tax claim arose up to the date when the assessment is released (late payment interest). Interest at a rate of currently 1.88% is applied to underpayments (as well as overpayments) of tax.

**Tax audit process**
Tax audits usually cover CIT, VAT, and WHT. Separate audits are carried out in connection with payroll taxes and social security contributions.

In general, companies are audited every three to four years. The audit period usually covers three to four fiscal years, so, generally, each fiscal year is audited.

The duration of a tax audit depends on the number of years covered and on the complexity of topics (usually between 0.5 and 1.5 years). These topics usually cover ongoing compliance, such as tax returns. Specific topics vary from company to company and can involve, for instance,

- Business restructurings (applicability of Austrian reorganisation tax act, transfer of intangibles, etc.).
- Tax groups (all group members are audited together).
- WHT on dividends, licences, etc.
- Compliance with arm’s-length principle in case of group transactions (tax auditors recently tend to focus on transfer pricing issues).
Austria

Statute of limitations
The right to assess CIT is subject to a general limitation period of five years after the end of the calendar year in which the fiscal year ends. Additionally, the limitation period can be extended for another two years in cases where certain interruptive events (e.g. tax audit, tax assessment) take place within the general limitation period.

The maximum limitation period in the case of tax evasion is ten years.

In certain cases, the maximum limitation period can be extended to 15 years.

Other issues
Choice of business entity
The most important types of companies in Austria are the limited liability corporation (GmbH) and the joint stock corporation (AG). Foreign investors generally choose the GmbH since it provides a higher degree of corporate law control and allows for lower equity provision.

As a legal entity, the GmbH exists upon registration with the Companies’ Register. The application for registration must contain the notarised signatures of all managing directors. The articles of association must be drawn up in the form of a notarial deed (written document executed by a public notary) and must, as minimum requirements, include the name of the company as well as its seat, the business purpose, the amount of registered capital, and the capital contribution of each of the various owners.

A GmbH’s minimum registered capital amount is EUR 35,000. Generally, one half of the registered capital must be raised in cash while the remainder may be contributed in the form of assets (contributions in kind). Of the original capital contribution, 25%, or at least EUR 17,500, must actually be paid in upon incorporation. Under certain conditions, the capital can be provided exclusively in the form of assets (incorporation in kind, in this case the contribution is subject to an audit verifying the market value of the assets contributed). The articles of association may provide for additional capital contributions payable by the owners on the basis of a resolution adopted by the shareholder meeting.

According to the ‘Gesellschaftsrechts-Änderungsgesetz 2013’, the requirements for the GmbH will be subjected to significant changes. It is planned that the law amendments will be in force as of the beginning of July 2013. The minimum registered capital amount will be reduced from EUR 35,000 to EUR 10,000. As up to now, it will be essential that half of the registered capital (at least EUR 5,000) must be raised in cash. Formations costs and fees in this context will decline proportionally.

The minimum share capital of an AG is EUR 70,000. For an AG, the same payment regulations apply as for a GmbH, but the owners can agree upon a further capital contribution going beyond the nominal value of the shares (premium). The premium is shown on the company’s balance sheet as a capital reserve.

Since 2004, the company type Societas Europaea (SE) can be chosen in Austria. The SE is a stock corporation based on community law. The advantages of this legal form are the simplification of organisational structures (in particular for international groups) and the possibility of cross-border transfers of corporation seats without loss of the legal identity. The SE allows the choice of a business location under an economic point of view as well as the choice of the most favourable legislation. The minimum share
capital required for the incorporation of a SE is EUR 120,000 while the statutory seat of the corporation must be located in the same country where the place of management is located in.

**Restructuring measures (M&A from a business perspective)**

Transfers of assets and undertakings can be realised with retroactive effect and be tax neutral within the framework of the Austrian Reorganisation Tax Act.

The legislation administers the following areas (Article I-VI):

- Mergers (within EU also cross border) of corporations.
- Special conversion (from corporations to partnerships).
- Contribution of businesses and exchange of shares.
- Merger of partnerships.
- Demerger of partnerships.
- Demerger of corporations.

If the reorganisation qualifies for the application of the Austrian Reorganisation Tax Act, the reorganisation steps are realised tax neutrally and with a retroactive effect as of the reorganisation due date. Existing tax loss carryforwards can be transferred under certain conditions as well. Furthermore, several other tax privileges are granted under the Reorganisation Tax Act for stamp duties, capital transfer tax, etc.
Significant developments

The changes to the Tax Code passed by the Parliament on 21 December 2012 came into effect on 1 January 2013.

In total, 131 changes have been introduced into the Tax Code, and a brief summary of some of the major changes is provided below.

General principles

• The list of types of income from Azerbaijan sources has been expanded to include payments made for engineering, architecture, culture, art, theatre, films, radio, television (TV), music, painting, sport, and science services.
• There is now the possibility of conclusion of Tax Partnership Agreements between the tax authorities and taxpayers for minimisation of tax risks. Minimisation of tax risks is defined as mitigation and elimination of negative impacts on full or partial execution of duties of taxpayers on tax calculations.
• Criteria for classification of taxpayers as special regime taxpayers have been introduced.
• Definition of gambling sport games has been introduced into the Tax Code along with simplified taxation regime provisions for these types of activities.

Fixed assets

• Revaluation of fixed assets does not have an impact on tax accounting and tax issues.
• The value of fixed assets in the definition of fixed assets has been increased to 500 Azerbaijani manats (AZN) (previously, it was AZN 100).

Value-added tax (VAT)

The threshold for mandatory VAT registration of both legal entities and physical persons engaged in business activities has been established at AZN 120,000 in any month(s) during any consecutive 12-month period. Previously, the threshold was AZN 150,000 for legal entities and AZN 90,000 for individuals.

Tax exemptions for industrial and technology parks

Certain privileges and exemptions for businesses operating in industrial and technology parks have been introduced. The privileges include the following:

• Exemption for seven years from the date of registration in these parks from profit/ income and property tax for resident legal entities and private entrepreneurs.
• VAT exemption for import of equipment for construction, scientific research works, and other activities in these parks for seven years or an indefinite period, depending on the nature of these activities.
Road taxes
Revisions to the road taxes have been made. The minimum rate of annual road tax for passenger cars is at the fixed rate of AZN 20. The rates for cars with an engine capacity of over 2,000 cm³ vary, depending on the engine capacity.

Taxes on corporate income
In Azerbaijan, resident taxpayers are subject to a profit tax on their worldwide income. A non-resident enterprise operating in Azerbaijan through a permanent establishment (PE) must pay tax on the gross income generated from Azerbaijan sources, less any related deductions attributable to the PE. Gross income of a non-resident enterprise generated from Azerbaijan sources and not connected with a PE will be taxed at the source of payment without any deductions allowed for expenses.

Taxable profits are defined to be the difference between a taxpayer’s gross income and deductible expenses.

Gross income encompasses all revenues received by a taxpayer from all economic activities, unless the revenues are expressly exempted under the law.

Deductible expenses encompass all properly documented expenses that are incurred in the furtherance of a taxpayer’s business activities.

Domestic enterprises and PEs of non-residents are subject to profit tax at the flat rate of 20%.

Simplified tax system
The Tax Code stipulates payment of taxes based on a simplified system for enterprises not registered as VAT payers and whose cumulative gross revenue during any consecutive 12-month period is less than AZN 120,000, except for enterprises producing excisable goods, credit and insurance organisations, and investment funds and professional participants in the securities market. The simplified tax is imposed on gross revenue at a rate of 4% in Baku and at a rate of 2% in other regions of Azerbaijan. A special rate of simplified tax is set for enterprises involved in residential construction at a fixed amount of AZN 10 per square metre plus an applied co-efficient, which is determined by regional executive authorities. A special rate of simplified tax is set for operators of gambling games at a rate of 6% from gross receipts from game participants.

Other special corporate tax regimes
There are other tax regimes applicable under special agreements concluded between the Azerbaijan government and foreign oil companies: production sharing agreements (PSAs) and host government agreements (HGAs). The PSA and HGA regimes apply to all enterprises involved in these agreements, including foreign oil companies functioning as contractors and foreign service companies providing services to the contractor or the operating company.

There are 22 signed and ratified PSAs and two HGAs, each with its own separate tax regime. Each PSA and HGA is in force, published on the official website of the Ministry of Taxes (www.taxes.gov.az), and contains a tax article that outlines the tax regime for that particular agreement. While there are several similarities with respect to tax terms in the various PSAs, there are some differences, other than merely differing tax rates (e.g. taxation of foreign subcontractors) or reporting requirements. Additionally, tax protocols for each PSA and HGA, which provide specific guidance regarding the
Azerbaijan

procedures for payment of taxes and filing of reports, are negotiated with the Ministry of Taxes and other executive authorities.

**Local income taxes**
Local income taxes are paid only by companies and organisations that are in the property of municipalities. Tax rates do not exceed 20% for profit taxpayers and 4% for simplified taxpayers.

**Corporate residence**
A resident enterprise is any legal entity established in accordance with the legislation of Azerbaijan and performing entrepreneurial activity or any entity that is managed in Azerbaijan.

**Permanent establishment (PE)**
A PE of a foreign legal entity is subject to taxation with respect to the income attributable to such PE. A PE is an establishment of a foreign legal entity, through which it fully or partially performs commercial activities (for these purposes, a PE may be considered a management unit, office bureau, agency, construction site, etc.) for 90 cumulative days or more within any 12-month period. Activities of an auxiliary or preparatory nature (e.g. exclusively storing or exhibiting goods or products belonging to a non-resident, purchasing goods, collecting data by a non-resident enterprise for its own purposes) do not create a PE.

**Other taxes**

**Value-added tax (VAT)**
VAT is levied on the supply of goods and services, and on the import of goods.

**VAT rates**
The standard rate of VAT is 18%.

Zero rating applies to the following:

- Exportation of goods and services.
- Importation under the PSA and HGA regimes.
- Importation of goods, the supply of goods, and the implementation of works and provision of services to grant recipients on the expense of financial aid (grants) received from abroad.
- International and transit cargo and passenger transportation, as well as the supply of works and services directly connected with international and transit flights.
- The supply of gold and other valuables to the National Bank of Azerbaijan.

**Taxable persons**
Any person who is registered or is liable to register as a VAT payer is regarded as a taxable person.

Companies are required to register for VAT if their cumulative taxable income exceeds AZN 120,000 for a consecutive 12-month period.
Taxable amount
The taxable base is established by starting with the value of the goods and services without adding the VAT amount, but including any customs duty and excise duty, if applicable.

The value of taxable imports consists of the value of the goods determined in accordance with the customs legislation and taxes and duties (other than VAT) to be paid upon importation to Azerbaijan.

The amount of VAT to be paid is the difference between the amount of VAT received on taxable supplies of goods and services and VAT paid on the purchase of goods and services necessary to generate taxable supplies of goods and services.

The Cabinet of Ministers can grant exemptions for the import of goods and equipment used for production purposes or to provide advanced technology know-how. Such exemptions are granted for a specific period and in a specific area, and can only be granted if it is impossible to satisfy the respective needs from local resources.

Customs duties
The Customs Code sets out the rules governing all aspects of the regime, including:

• The establishment of bonded warehouses and duty-free zones.
• Temporary imports and the processing of foreign goods in Azerbaijan.
• The procedures for the re-import and re-export of goods.

Azerbaijan has adopted the internationally accepted classification system for goods. The valuation procedures for customs purposes are to be determined in line with the general principles of the World Trade Organization (WTO).

The rates of customs duties are contained in the list of customs duties for the goods to be imported to Azerbaijan. These rates vary between 0% and 15%, depending on the type of goods.

Full or partial relief from the duty on temporary imports (generally, for a period of up to one year) is also available.

Under the PSA regime, contractors, their agents, and subcontractors are entitled to import and re-export from Azerbaijan, free from any import duties and restrictions, goods used for hydrocarbon activities.

Excise duty
Excise duties are imposed on tobacco products, alcoholic beverages, light vehicles, leisure and sports yachts, petroleum, and lubricants.

Taxable persons
Excise duties are paid by companies and organisations, including companies with foreign investment, as well as branches, divisions, and other independent subdivisions of companies in Azerbaijan that render services and sell self-produced goods.

Taxable operations
The following operations are subject to excise duties:

• Release of excise goods produced in Azerbaijan outside the premises of the building in which they were produced.
Azerbaijan

- Import of excise goods pursuant to the customs legislation of Azerbaijan.

**Tax rates**
The relevant executive authority shall determine rates of excise tax for excise goods imported into Azerbaijan (with exception of light vehicles, leisure and sports yachts, and other floating transports stipulated for these purposes).

The following excise rates apply for the following items produced in Azerbaijan:

- Food alcohol (including ethyl alcohol non-denatured with alcohol content of not less than 80%; ethyl alcohol non-denatured with alcohol content of less than 80%): AZN 0.8 per litre.
- Vodka, strong drinks and strong beverage materials, liqueurs, and liqueur products: AZN 0.5 per litre.
- Cognac and cognac products: AZN 0.2 per litre.
- Sparkling wines: AZN 0.2 per litre.
- Wine and vineyard materials: AZN 0.1 per litre.
- Beer (with the exception of non-alcoholic beer) and other beverages containing beer: AZN 0.08 per litre.
- All types of tobacco products: 12.5%.

Excise rates on petroleum materials, light vehicles, leisure and sports yachts, and other floating transports stipulated for these purposes produced in the Azerbaijan Republic are established by the Cabinet of Ministers. Excise rates for petroleum materials vary from 8% to 101% of the ex-factory price, depending on the product.

Excise rates for imported excised goods are also established by the Cabinet of Ministers.

**Property tax**
Property tax is levied on both movable and immovable tangible assets owned by individuals and companies.

**Property tax rates**
Property tax is imposed on the average annual book value of the taxable property at the rate of 1%.

**Taxable persons**
Taxable persons are comprised of the following:

- Resident companies, including companies with foreign investment that are treated as residents under Azerbaijani law; international organisations engaged in economic activities; and other enterprises.
- Branches and affiliated companies of such taxpayers.
- Agencies and representative offices of foreign legal entities located in Azerbaijan.
- Non-resident companies performing activities through a PE in the territory of Azerbaijan.

Enterprises can combine their assets and cooperate as joint owners. Joint owners are liable to pay tax according to their interest in the property concerned.

**Tax base**
The property tax base varies according to the residency status of the taxpayer. Resident companies are subject to property tax on their tangible assets recorded on their balance sheet. Non-resident companies carrying out a business activity through a PE
in Azerbaijan are only subject to property tax on their tangible assets connected with the PE.

The following assets are exempt:

- Facilities used for the purposes of the environment, fire protection, and civil defence.
- Product lines, railways and motorways, communication and power lines, and melioration and watering facilities.
- Automobile transport taxed for the road tax.
- Facilities of companies involved in education, health, culture, and sports that are used only for the purposes of such areas of activity.

**Administration**

Companies are required to report the average annual value of taxable property and pay property tax on a quarterly basis, subject to any necessary recalculation at the end of the year. Tax payments are due within 15 days of the second month of each quarter. The payment should be 20% of the previous year property tax amount.

The tax on water and air transport means is estimated on 1 January each year by the tax offices based on data provided by the organisations responsible for registration of means of transport. The tax is assessed on the person named in the registration document.

When an asset changes ownership during the tax year, the tax liability is defined as the liability of the new owner.

**Land tax**

Land tax is levied on Azerbaijan's land resources that are in the possession of or used by individuals or companies.

**Land tax rates**

The rate of land tax for agricultural land is AZN 0.06 per unit. The units are determined by the relevant authority on the basis of the purpose, geographical location, and the quality of agricultural land in the administrative regions.

The rate of land tax for industrial, construction, transport, telecommunications, trade and housing servicing, and other dedicated land varies from AZN 0.1 to AZN 10 per 100 square metres, depending on the city or region.

**Taxable base**

Land plots that are in ownership or used are subject to land tax. Exemptions apply to various types of land owned or used for public purposes by the state or other public authorities. The government may grant further tax exemptions and reliefs.

**Assessment and procedure of payment**

Companies must compute the exact amount of the land tax each year on the basis of documents evidencing the title of ownership, possession, and use. The computation must be submitted to the tax authorities by 15 May of each year. The tax must be paid by 15 August and 15 November in equal amounts.

**Transfer taxes**

No specific transfer taxes are levied upon the transfer of immovable property. However, certain notary fees and other sale duties applicable to transfer of property may apply.
Azerbaijan

**Stamp duties**
There are no stamp duties. State notary fees are payable upon notarisation of certain transactions.

**Road tax**
Legal entities and foreign nationals are subject to road tax. The road tax rate varies depending on vehicle engine volume, number of axles, weight carried, and how long the vehicle will be in Azerbaijan (for foreign vehicles).

Starting from 1 January 2013, the minimum rate of annual road tax for passenger cars is set at the fixed rate of AZN 20. The rates for cars with an engine capacity of over 2,000 cm³ vary, depending on the engine capacity.

**Mining tax**
Legal entities and individuals involved in the recovery of minerals in Azerbaijan are obligated to pay the mining tax. The rate depends on the type of mineral extracted and varies from 3% to 26% of its total wholesale price.

**Branch income**
In addition to profit tax paid by a PE of a non-resident, the amount transferred from the net profit of such PE to the non-resident is taxed at the source of payment at a rate of 10%.

**Income determination**
Profit tax is levied on an enterprise’s taxable profits. Profits are defined as the difference between the gross income and deductions defined by law.

**Inventory valuation**
Inventory valuation is determined according to national accounting standards.

No other inventory valuation method is recognised for tax purposes.

**Capital gains**
There is no separate capital gains taxation in Azerbaijan. Proceeds from the disposal of capital assets are included in ordinary taxable income.

**Dividend income**
Dividends distributed to residents and non-residents are subject to withholding tax (WHT) (taxable at source upon payment). Therefore, the received dividend amounts of legal entities and physical persons are not taxable for profit (income) tax purposes.

**Interest income**
If income is received from an Azerbaijani source, interests paid by a resident or a non-resident’s PE, or on behalf of such establishment, shall be taxed at the source of payment at a rate of 10%.

Interests paid on credits (loans) and deposits (accounts) of resident-banks, including loan interests paid on financial leasing operations, are not taxable.
Foreign income
If a resident of Azerbaijan directly or indirectly holds more than 20% of shareholders’ equity or possesses more than 20% of the voting shares of a foreign legal entity that, in turn, received income from a state with favourable taxation, then such income shall be included in the resident’s taxable income.

A state with favourable taxation is considered a country in which the tax rate is two or more times lower than that determined under the Tax Code of Azerbaijan, or a country in which the laws on confidentiality of information about companies exist (which allow secrecy to be maintained concerning financial information, as well as the actual owner of property or receiver of income).

Deductions
All expenses connected with generating income, except for non-deductible expenses and expenses with limited deductibility, specifically defined by the law, are deductible from income.

Depreciation
Depreciation may be calculated at the following rates:

- Buildings and premises: up to 7%.
- Machines, equipment, and calculation appliances: up to 25%.
- Means of transportation: up to 25%.
- Working cattle: up to 20%.
- Expenses incurred for geological and exploration works, as well as for preparatory works for the production of natural resources: 25%.
- Intangible assets with an undetermined period of use: up to 10%. For those with a determined period of use, pro-rata amount as per the useful life, in years.
- Other fixed assets: up to 20%.

Goodwill
Azerbaijani tax legislation does not specify the definition of goodwill.

Start-up expenses
The cost of assets shall include expenses for their acquisition, production, construction, assembly, and installation as well as other expenses that increase their value with the exception of expenses for which the taxpayer is entitled to a deduction.

Interest expenses
Interest on loans received from overseas and/or from related parties may be deducted, limited to the interest rate on loans with similar currency and maturity at the interbank credit auction. In absence of such an auction, deductions for interest may not exceed rates of 125% of the interbank auction credit rates published by the Central Bank of Azerbaijan.

Bad debt
A taxpayer shall be entitled to a deduction for doubtful debts connected with goods, work, and services that have been realised where income from them was previously included in the gross income received from entrepreneurial activity. Doubtful debt deduction shall be allowed only if the debt is written off as worthless in the taxpayer's books.
Azerbaijan

**Charitable contributions**  
Charitable contributions are non-deductible expenses in Azerbaijan.

**Fines and penalties**  
No deduction is allowed for financial sanctions or interest calculated for delayed payment of taxes.

**Taxes**  
Road, property, land, and mining taxes are deductible.

**Other expenses deductible within certain limits**

- The amount of repair expenses deductible each year is limited to the amount of the tax written down value of each category of fixed assets as of the end of the previous year. For buildings and premises, the limit is 2%; for machinery and equipment, the limit is 5%; and for other fixed assets, the limit is 3%. An amount exceeding these limits shall be taken as an increase of the residual balance value of the fixed assets in the appropriate category.
- Actual business trip expenses are deductible from income within the limits established by the Cabinet of Ministers.
- A legal entity engaged in insurance activities is entitled to deduct allocations to reserve insurance funds within the standards established by the legislation of Azerbaijan.
- Banks and credit entities engaged in certain types of banking activities shall be entitled to deduct from income the amounts assigned for establishment of special reserve funds, depending on the classification of assets in compliance with legislation and in accordance with procedures established by the relevant executive authority.

**Non-deductible expenses**  
The following expenses are non-deductible:

- Capital expenses.
- Expenses connected with non-commercial activity.
- Entertainment and meal expenses, accommodation, and other expenses of a social nature incurred for employees.

**Net operating losses**  
Taxable losses incurred by legal entities may be carried forward for five years to offset future taxable profit, without limitations. Carryback of losses is not possible.

**Payments to foreign affiliates**  
Payment to charter capital in order to create an affiliate in a foreign country is not tax deductible and is instead treated as investment to subsidiary on the balance sheet.

Under local transfer pricing rules, payment for goods and services supplied by foreign affiliates is deductible up to the fair market price of such supplies.

**Group taxation**  
Each taxpayer is liable to fulfil one’s own tax liabilities. Azeri tax legislation does not have the concept of ‘group taxation’.
**Transfer pricing**
The Tax Code provides that relations between associated (interrelated) entities must be based on the arm’s-length principle.

Interrelated persons for the purposes of taxation are natural and/or legal persons, relations between which might have direct effect on economic results of their activities or the activities of persons they represent.

**Thin capitalisation**
There is no concept of thin capitalisation in Azerbaijani tax law. However, the Tax Code provides that interest on loans received from overseas and/or from related parties may be deducted, limited to the interest rate on loans with similar currency and maturity at the interbank credit auction. In absence of such an auction, deductions for interest may not exceed rates of 125% of the interbank auction credit rates published by the Central Bank of Azerbaijan.

**Tax credits and incentives**

**Foreign tax credit**
Azeri legal entities are taxed on worldwide profit; however, any tax paid overseas, up to the tax amount that would be calculated under Azeri law, will be allowed to offset the Azeri profits tax. The tax credit may not exceed the tax that would be imposed on such income in Azerbaijan. This credit applies only to residents of Azerbaijan.

**Incentive for agricultural producers**
Taxpayers producing agriculture products are exempt from profit tax, VAT, and property tax until the end of 2013.

**Incentives for residents of industrial and technology parks**
As of 1 January 2013, businesses operating in industrial and technology parks are eligible for certain privileges and exemptions. The privileges include the following:

- Exemption for seven years from the date of registration in these parks from profit/income and property tax for resident legal entities and private entrepreneurs.
- VAT exemption for import of equipment for construction, scientific research works, and other activities in these parks for seven years or an indefinite period, depending on the nature of these activities.

**The Law on the Special Economic Regime for Export-Oriented Oil and Gas Activities**
The Law on the Special Economic Regime for Export-Oriented Oil and Gas Activities was adopted in April 2009 and will remain effective for 15 years. This law avails the following tax incentives to contractors and subcontractors (excluding foreign subcontractors without PE in Azerbaijan):

- Local companies are permitted to choose between (i) profit tax at a rate of 20% or (ii) 5% WHT on gross revenues.
- Foreign subcontractors are taxable only by a 5% WHT.
- A 0% VAT rate.
- Exemption from dividend WHT and taxation on branch’s net profits.
- Exemption from customs duties and taxes.
- Exemptions from property tax and land tax.
Azerbaijan

In order to derive these benefits, the relevant taxpayer should obtain a special confirmation certificate from the Ministry of Industry and Energy.

The Law on Special Economic Zones (SEZs)
The companies operating in SEZs shall have the following tax benefits:

• A 0.5% tax levied on overall turnover from supplied goods, performed services, or works.
• A 0% VAT rate.
• Customs exemptions.

In order to operate in an SEZ, a special residency certificate is necessary. However, the following companies may not apply for this certificate:

• Companies producing or processing oil and gas.
• Companies producing alcoholic beverages and tobacco.
• Television or radio broadcasting companies.

As of January 2013, no SEZs have yet been established in Azerbaijan.

Incentive for the employment of disabled persons
The rate of profit tax levied on production enterprises belonging to community organisations for disabled persons, and involving at least 50% of disabled persons, shall be reduced by 50%.

In determining eligibility for these privileges, disabled persons substituting for permanent employees, contractors (i.e. who work under contractor agreements, civil legal contracts), or disabled persons till the age of 18 are not included in the average number of employees.

Withholding taxes
Income received from Azerbaijan sources not attributable to a PE of a non-resident in Azerbaijan is subject to WHT at the following rates:

• Dividends paid by resident enterprises: 10%.
• Interest paid by residents, PEs of non-residents, or on behalf of such PEs (except for interest paid to resident banks or to PEs of non-resident banks): 10%.
• Rental fees for movable and immovable property: 14%.
• Royalties: 14%.
• Leasing, risk insurance, or reinsurance payments: 4%.
• Telecommunications or international transport services: 6%.
• Other Azeri-source income: 10%.

If a resident enterprise or a PE of a non-resident receives interest, royalties, or rental fees taxable at the source of payment in Azerbaijan, it is entitled to consider the tax deducted from the source of payment, provided that the documents supporting the tax deduction are in place.

Tax treaties
The following chart contains the WHT rates that are applicable to dividend, interest, and royalty payments by Azerbaijan residents to non-residents under the tax treaties in
force as of 1 January 2013. If the treaty rate is higher than the domestic rate, the latter is applicable.

Azerbaijan

Notes

1. The lower dividend rate applies if the qualifying company meets certain criteria (e.g. participation and capital holding criteria).
2. The lower interest rate applies, inter alia, to interest paid by public bodies or to bank loans.
3. The lower royalty rate applies to royalties for patents, designs or models, plans, secret formulas or processes, computer software, know-how, etc.

More detailed information about applicability of lower rates may be found in respective DTTs.

Tax administration

Taxable period
The tax year in Azerbaijan is the calendar year.

Tax returns
Resident enterprises and PEs of non-residents must file profit tax returns for a calendar year by 31 March of the following year. During liquidation of a legal entity or a PE of a non-resident, the tax return should be submitted within 30 days after the adoption of a decree on liquidation.

A non-resident that has no PE in Azerbaijan and receives income subject to WHT (except for dividends and interest) may file a tax return with respect to such income and expenses, connected with the generation of the income, for purposes of reassessment of profit tax at the rate of 20%.

If a taxpayer applies for an extension of time to file the profit tax return prior to the expiration of the filing deadline and at the same time settles the full tax amount due, the filing deadline may be prolonged for up to three months. The prolongation of the terms for filing the return will not modify the terms of tax payment.

Legal entities and entrepreneurs that withhold tax at the source of payment are obligated to file the WHT report with the tax authorities within 20 days following the end of the quarter.

Payment of tax
Taxpayers must make advance quarterly tax payments of profit tax by the 15th day of the month following the end of the calendar quarter. Payments are determined either (i) as 25% of tax for the past fiscal year or (ii) by multiplying the amount of actual income through the quarter by a ratio of tax to gross income for the previous year.

The final payment of profit tax coincides with submission of the declaration of profit tax, i.e. 31 March.

Tax audit process
The ordinary on-site tax audit shall be conducted not more than once in a year. An extraordinary tax audit may be performed at any time under the following conditions:

- If tax return documents that are necessary for tax calculation and payment are not submitted in time or not submitted at all upon the warning of the tax authorities.
- If incorrect information is found in the report made on the results of tax inspection.
• When exceedingly paid amount of VAT, interest, and financial sanction is assigned for the payment of other taxes, interests, and financial sanctions or assigned as payments on future liabilities. In such cases, the out of turn tax audit can be conducted only on taxable VAT operations of the taxpayer.
• When application is submitted by the taxpayer to return exceedingly paid amounts of tax, interests, and financial sanctions.
• When the tax authorities obtain information from a known source on hiding (decreasing) of incomes or object of taxation by the taxpayer.
• When, in accordance with criminal legislation, there is a decision of the court or law-enforcement agency on implementation of a tax audit.
• In case of failure to provide the documents specified in the Tax Code.
• In the event of application for liquidation, reorganisation of the taxpayer legal entity, or seizure of business operations of the natural person operating without formation of a legal entity.

**Statute of limitations**
Tax authorities are entitled to calculate and recalculate taxes, penalties, and financial sanctions of the taxpayer within three years after termination of the taxable reporting period and to impose calculated (recalculated) sums of taxes, penalties, and financial sanctions within five years after termination of the taxable reporting period.

**Topics of focus for tax authorities**
The main issues challenged by the tax authorities during a tax audit include, but are not limited to, the following:

• Application of the 20% profit tax on ‘deemed profit’.
• Application of benchmarking principle for income of foreign employees subject to tax in Azerbaijan.
• Correctness of claim of input VAT from budget and identification of operations taxable to VAT.
• Taxes withheld on payments to non-resident suppliers in cases where income of non-residents is considered as Azerbaijani-source income.
• Application of VAT on market price of assets that were written off, disposed free of charge, or at a discount rate.
• Challenging the transfer pricing.
• Grossed-up WHT paid at cost of the buyer disallowed for deduction.
• Deductibility of the head office costs.

**Tax Partnership Agreements**
Starting from January 2013, it may be possible for a taxpayer to conclude a Tax Partnership Agreement with the tax authorities in order to minimise tax risks. Minimisation of tax risks is defined as mitigation and elimination of negative impacts on full or partial execution of duties of taxpayers on tax calculations.
Significant developments

A new Labour Law was issued to the private sector on 30 July 2012 and is effective from 2 September 2012. By-laws to fully implement the new law and to provide clarification on the new law have not yet been published but are expected to be published shortly.

The new law includes provisions that amend minimum annual leave entitlements for employees, provide for sick leave, and increase maternity leave entitlements. The law also provides for compensation to dismissed employees in certain circumstances and provides for tougher punishments for companies in breach of health and safety standards.

Further, the new law addresses both employment and humanitarian concerns with regard to domestic workers who were previously not protected by law.

Taxes on corporate income

There are no taxes in Bahrain on income, sales, capital gains, or estates, with the exception, in limited circumstances, to businesses (local and foreign) that operate in the oil and gas sector or derive profits from the extraction or refinement of fossil fuels (defined as hydrocarbons) in Bahrain. For such companies, a tax rate of 46% is levied on net profits for each tax accounting period, irrespective of the residence of the taxpayer.

Corporate residence

Income Tax Law No. 22 of 1979 (which only applies to oil and gas businesses) does not define residence.

Other taxes

Value-added tax (VAT) and excise duty
There is currently no VAT or excise duty in Bahrain. However, a VAT system is under consideration at the Cooperation Council for the Arab states of the Gulf (GCC) level. The standard rate of VAT is expected to be 5%.
Custom duties
The general rate of customs duty is 5% of the value in cost, insurance, and freight (CIF), except for alcoholic beverages, which is 125%, and cigarettes, which is 100%.

Certain categories of goods, such as paper and aluminium products, are subject to 20% duty rate.

Stamp duty
Stamp duty applies to the transfer and/or registration of real estate only and is levied on the following basis: 1.5% up to 70,000 Bahraini dinar (BHD); 2% from BHD 70,001 to 120,000; 3% for amounts exceeding BHD 120,000.

Registration and licence fees
Companies are subject to registration fees of BHD 30 and licence fees that vary according to the nature of their activity.

Social insurance and training levy contributions
Employer’s social security contribution is 12% for Bahraini workers and 3% for non-Bahraini workers, calculated on their monthly salaries.

A training levy is imposed on companies with more than 50 employees that do not provide approved training to their employees. The applicable rates are 1% for Bahraini and 3% for non-Bahraini employees, calculated on their monthly salaries.

Municipality taxes
There is a 10% of municipality tax levied on the rental of commercial and residential property to expatriates.

Branch income
Profit from branch income is taxable in Bahrain at 46% if it is derived from activities in the oil and gas sector.

Income determination
There are no specific rules in Bahrain with respect to the calculation of specific items of income, such as inventory valuation, capital gains, dividend income, interest income, or foreign income. However, the income tax law requires that taxable profits be calculated using generally accepted accounting principles (GAAP).

Deductions
The law generally allows deductions for all costs associated with taxable activities in Bahrain, such as the cost of production, refinement, remuneration of employees associated with these taxable activities (including social insurance and pensions paid for the benefit of these employees), and other operational losses.

All reasonable and justifiable costs of production and exploration of products sold during the current taxable year are deductible for tax purposes, provided that these expenses have not been deducted elsewhere in calculating net taxable income.
Depreciation and depletion
Tax deductions may be claimed with respect to reasonable amounts for depreciation, obsolescence, exhaustion, and depletion incurred during the taxable year for properties used by the taxpayer in a trade or businesses from which income, taxable under the income tax law, is derived. Generally, such amounts may be claimed on a straight-line basis over the estimated remaining useful life of the properties, unless otherwise approved by the Minister of Finance.

Taxes
All taxes and duties not imposed by the Bahrain income tax law, including customs duties, may be deducted from taxable income as stipulated in Bahrain's income tax law.

Net operating losses
Unutilised losses may be carried forward and deducted up to an amount equivalent to the net income in future years as defined by the Bahrain income tax law. Carryback of losses is not permitted.

Payments to foreign affiliates
There are no specific restrictions in the income tax law pertaining to payments made to foreign affiliates.

Group taxation
There is no legislation or mechanism for group relief or the taxation of group activities in Bahrain. Additionally, there is currently no specific legislation regarding transfer pricing and thin capitalisation in Bahrain.

Tax credits and incentives
There are no tax incentives in Bahrain. There is also currently no legislation regarding foreign tax relief in Bahrain.

Withholding taxes
There are no withholding taxes (WHTs) on the payment of dividends, interest, or royalties in Bahrain.

Tax treaties
Bahrain has double tax treaties (DTTs) in force with various countries, including Algeria, Austria, Belarus, Brunei, Bulgaria, China, Egypt, France, Iran, Ireland, Isle of Man, Jordan, Lebanon, Luxembourg, Malaysia, Malta, Mexico, Morocco, the Netherlands, Pakistan, Philippines, Singapore, Sudan, Syria, Thailand, Turkey, the United States, Uzbekistan, and Yemen.

Tax administration
Taxable period
A company's accounting period should normally follow the (Gregorian) calendar year (i.e. 1 January to 31 December).
**Tax returns**
The law is silent on the due date for the filing of the final income tax statement. However, an estimated income tax statement must be submitted on or before the 15th day of the third month of the taxable year. Where applicable, a taxpayer may also be required to file an amended estimated income tax statement quarterly thereafter, unless a final income tax statement has been provided.

Approved accountants must prepare a certified tax return for the return to be acceptable to the authorities.

**Payment of tax**
Taxes (based on the initial estimated tax statement filed) are payable in 12 equal monthly instalments. Payments are due starting on the 15th day of the fourth month of the taxable year. Income tax as per the subsequent amended estimated income tax statements or the final income tax statement will form the basis of tax payments for the remainder of the 12 monthly instalments that are yet to be paid. The final payment is due on the 15th day of the third month after the end of the taxable year or the date the final income tax statement is filed, whichever is later.

Any excess income tax paid will be credited and used in the first invoice for income tax following the establishment of the credit by the Minister.

**Statute of limitations**
The Income Tax Law No. 22 of 1979 does not specify any statute of limitations.

**Significant developments**

Barbados currently has 32 double taxation agreements (DTAs) in force (the Caribbean Common Market [CARICOM] multilateral DTA extends to ten member countries). In addition, signed DTAs with Bahrain, the Republic of Ghana, Portugal, Qatar, and San Marino and protocols to existing DTAs with Canada and Finland are awaiting ratification. Treaties with Belgium, Italy, Singapore, Slovakia, the United Arab Emirates, and Vietnam have been initialled. The new treaty with the United Kingdom came into force on 19 December 2012, replacing a treaty that had been in force from 26 November 1970.

Tax information exchange agreements (TIEAs) with Denmark and Greenland came into force on 14 June and 2 May 2012, respectively. A TIEA with the Faroe Islands is awaiting ratification, and TIEAs with France, Germany, and South Africa have been initialled and are awaiting signature.

The legislation for international business entities has been amended such that the tax rate for such entities for taxable income in excess of 15 million United States dollars (USD) has been reduced from 1% to 0.5% for income year 2012 and from 0.5% to 0.25% for income year 2013 and onwards.

**Taxes on corporate income**

Companies resident in Barbados are taxed on income earned from all sources, whether generated within or outside of Barbados, less expenses incurred for the purpose of producing assessable income in a fiscal period not to exceed 53 weeks. Non-resident companies are generally only taxed on income derived from sources and operations conducted within Barbados.

**Corporate income tax (CIT) rates**

The following rates apply to taxes on corporate income:

<table>
<thead>
<tr>

**Notes**

1. This concessionary tax rate is available to any small company as defined in the Small Business Development Act.
2. This concessionary tax rate is available only to companies registered as manufacturers with the Barbados Customs & Excise Department.
3. The legislation for international business entities has been amended such that the tax rate for such entities for taxable income in excess of USD 15 million has been reduced from 1% to 0.5% for income year 2012 and from 0.5% to 0.25% for income year 2013 and onwards.
4. Selling price of the houses must be less than 400,000 Barbados dollars (BBD), including the house and land.
5. The exemption is available for a period of 15 years.

---

**Corporate residence**

A corporation is deemed to be resident in Barbados if its management and control is exercised in Barbados.

**Permanent establishment (PE)**

The concept of a PE is described within a number of Barbados’s DTAs. A PE is, in general, formed in line with the Organisation for Economic Co-operation and Development (OECD) Model Convention.

---

**Other taxes**

**Value-added tax (VAT)**

VAT is levied at the rate of 17.5% on the value of a wide range of goods and services imported or supplied in Barbados by VAT-registered persons.

A number of services, including financial services, real estate, medical services, and education are exempt. Intergroup transactions are taxable.

Persons operating under Barbados’ VAT regime must be registered for VAT. The threshold for VAT registration is BBD 80,000, but voluntary registration is permitted for persons whose annual turnover is less than BBD 80,000.

Certain supplies are zero-rated, including exports, basic food items, prescription drugs, crude oil, and the supply of certain items to the international financial services sector, e.g. legal and accounting fees. There is a concessionary rate of 8.75% applicable to the supply of accommodation by guest houses, hotels, inns, or any similar place, including a dwelling house normally let or rented for use as a vacation or holiday home.

Registered persons may deduct input tax from their output tax in calculating the tax payable for that VAT accounting period. Where input tax exceeds output tax, the registrant will be entitled to a refund of VAT.
Barbados

**Customs duties**
Customs duty is levied on a wide range of imported goods at rates specified in Part 1 of the First Schedule of the Customs Act. Barbados’ Customs Tariff is based on the Common External Tariff of the Caribbean Common Market (CARICOM) with special derogations for certain items, e.g. spirituous beverages. Customs duty is calculated on either an *ad valorem* basis or at specific quantitative rates. The *ad valorem* rates for most items vary between 0% and 20%, but certain goods regarded as luxury items are subject to higher rates (e.g. jewellery 60%). In addition, a select group of items that are produced within Barbados and CARICOM (including some agricultural products) are subject to a duty rate of 60% when imported from outside the region.

Manufacturers and agriculturists, including persons involved in fishing and horticulture, are exempt from the payment of duty on inputs (including packaging materials, machinery, equipment, and spares) imported for use in their businesses.

The various departments and institutions, international bodies, and organisations listed in Part II-B of the Customs Tariff are exempt from the payment of customs duty. Specific goods (e.g. computers), also mentioned in Part II-B, are exempt from customs duty.

**Excise taxes**
Four categories of goods (both locally manufactured, as well as imported) are subject to excise taxes. These are motor vehicles, spirituous beverages, tobacco products, and petroleum products. Most excisable goods are subject to the tax at a specific rate, with the exception of motor vehicles, which are subject to *ad valorem* rates.

A few persons and goods are exempt from excise taxes. These include motor vehicles imported by the diplomatic corps and other organisations exempt from customs duty under Part II-B of the Customs Tariff, goods imported for temporary use or for a temporary purpose that will be re-exported within three months, and goods (other than spirits) intended to be used as raw materials for the manufacture or production in Barbados of other taxable goods.

**Land tax**
The following land tax rates are in effect as of tax year 2012/13:

<table>
<thead>
<tr>
<th>Description</th>
<th>Land tax rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>On the improved value of each parcel of land on which there is a dwelling house that is used exclusively for residential purposes:</td>
<td></td>
</tr>
<tr>
<td>On first BBD 190,000</td>
<td>0</td>
</tr>
<tr>
<td>On amounts between BBD 190,000 and BBD 500,000</td>
<td>0.10% of the improved value</td>
</tr>
<tr>
<td>On amounts between BBD 500,000 and BBD 1,250,000</td>
<td>0.45% of the improved value</td>
</tr>
<tr>
<td>On amounts exceeding BBD 1,250,000</td>
<td>0.75% of the improved value</td>
</tr>
<tr>
<td>On the improved value of each parcel of land on which there is a building other than a residence</td>
<td>0.65% of the improved value</td>
</tr>
<tr>
<td>On the site value of each parcel of unimproved land</td>
<td>0.60% of the site value</td>
</tr>
</tbody>
</table>

The following concessions have been granted for land taxes:

- For villas, as defined by the Tourism Development Act, land tax is calculated and payable on only 75% of the tax demanded.
- For hotels, as defined by the Tourism Development Act, land tax is calculated and payable on only 50% of the tax demanded.
For pensioners occupying their own homes, land tax is calculated and payable on only 50% of the tax demanded in excess of BBD 190,000.

A 10% discount is granted if the land tax is paid within 30 days from the date of the tax demand notice or 5% if paid within 60 days. Hotels and restaurants are allowed to pay their land tax bills during January to March without losing access to the discount granted.

Land tax rebates for income year 2012/13 were extended to approved manufacturers who can certify exports to a value of BBD 100,000 or more in any one calendar year. The land tax is calculated and payable on no more than 50% of the tax demanded for that year. Manufacturers are required to have settled all outstanding liabilities with the Comptroller of Customs and the Commissioner of Inland Revenue to access the rebates.

Any person certified by the Minister responsible for Energy to be engaged in the production of solar energy and/or the manufacture of goods to be used in the production of solar energy will be entitled to the rebate of no more than 50% of the tax demanded for that year. Such persons are required to have settled all outstanding liabilities with the Comptroller of Customs and the Commissioner of Inland Revenue to access the rebates.

**Property transfer taxes**

Property transfer taxes are levied as set out in the following table:

<table>
<thead>
<tr>
<th>Property</th>
<th>Transfer tax rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Shares of companies listed on the Barbados Stock Exchange</td>
<td>Exempt</td>
</tr>
<tr>
<td>Shares of private companies *</td>
<td>2.5% of value or amount of gross consideration above BBD 50,000</td>
</tr>
<tr>
<td>Land with a building</td>
<td>2.5% of value or amount of gross consideration above BBD 150,000</td>
</tr>
<tr>
<td>Land with no building</td>
<td>2.5% of value or amount of gross consideration</td>
</tr>
<tr>
<td>Leases of 25 years or more or short-term leases that are continuously renewed for a period equal to 25 years or more</td>
<td>2.5% of value or amount of gross consideration</td>
</tr>
</tbody>
</table>

* Any transfer of shares to a person who is resident outside of Barbados, whether or not the transferor is resident in Barbados, where the assets of the company concerned consists of foreign assets and its income is derived solely from sources outside Barbados, will not be subject to transfer taxes in Barbados.

**Land development duty**

Where a person disposes of property situated in a specially designated development area within 15 years of the date specified by statute, duty may be charged. This may be at rates of up to 50% on the excess of the value of the consideration over the improved value at the specified base date, plus certain other expenses and an amount representing capital appreciation of the property.

**Stamp duty**

Barbados imposes a stamp duty tax on various instruments, including written documents. The rates imposed vary depending on the document. Stamp duties applicable to documents for the transfer of shares, real estate, and for mortgages are set out below:
Barbados

<table>
<thead>
<tr>
<th>Instruments</th>
<th>Stamp duty rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>On sale of real estate, leases, and shares in public companies *</td>
<td>BBD 10 per BBD 1,000 or part thereof</td>
</tr>
<tr>
<td>On mortgages</td>
<td>BBD 3 on each BBD 500 or part thereof</td>
</tr>
</tbody>
</table>

* Any transfer of shares to a person who is resident outside of Barbados, whether or not the transferee is resident in Barbados, where the assets of the company concerned consists of foreign assets and its income is derived solely from sources outside Barbados, will not be subject to transfer taxes in Barbados.

**Life insurance premium tax**
In addition to the CIT computed on the gross investment income of life insurance companies, a life insurance premium tax is levied on gross direct premium income earned by resident and foreign life insurance companies as set out in the following table:

<table>
<thead>
<tr>
<th>New business written for the income year</th>
<th>Resident life insurance companies (%)</th>
<th>Foreign life insurance companies (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>6</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>Renewal business</td>
<td>3</td>
<td>5</td>
</tr>
</tbody>
</table>

**General insurance premium tax**
In addition to the CIT computed on the taxable profits of general insurance companies, a general insurance premium tax is levied on gross direct premium income at a rate of 4.75% in respect of property insurance business and 4% for other general insurance business.

**National Insurance contributions**
Every individual between the ages of 16 and 65, who is gainfully employed in Barbados under a contract of service, must be insured under the National Insurance and Social Security Act. The current pensionable age is 66, with increases of six months each scheduled for 1 January 2014 and 1 January 2018, until the new standard retirement age of 67 is achieved.

Contributions are determined as a percentage of insurable earnings up to a maximum of insurable earning of BBD 4,270 per month or BBD 985 per week as of January 2013. Employers must remit National Insurance contributions by the 15th day of the following month. The employee’s share is 10.1%, with the employer paying 11.25%. Self-employed individuals make contributions quarterly of 16.1% on earnings of up to a maximum of BBD 4,270 per month.

**Branch income**
Branches are taxed on the same basis as corporations. In addition, a 10% tax is assessed on the transfer or deemed transfer of the after-tax profits to the head office that are not reinvested in Barbados, unless a DTA overrides this.
**Income determination**

**Inventory valuation**
Inventory is generally stated at the lower of cost and net realisable value. First in first out (FIFO) or average values are generally used for book and tax purposes. Last in first out (LIFO) is not acceptable for tax purposes. The Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade. Conformity between book and tax values is expected.

**Capital gains**
Capital gains are not taxed in Barbados.

**Dividend income**
Dividends between two companies resident in Barbados are not taxed in the hands of the recipient. Dividends received by a resident Barbados company from a non-resident entity where the equity interest owned is at least 10% of the non-resident company and the shareholding is not held solely for the purpose of portfolio investments are not subject to tax.

**Interest income**
Amounts received on account of, in lieu of, or in satisfaction of interest are included in the calculation of assessable income. In certain instances (to the extent specified by regulation) certain types of interest may be exempt from inclusion into the calculation of assessable income, including interest on bonds, debentures, or stock of the government of Barbados that is beneficially owned by a non-resident; interest on tax reserve and tax refund certificates; and interest on holdings (within certain limits) of National Development Bonds, National Housing Bonds, Savings Bonds, and Sugar Industry Bonds classified as non-taxable bonds, as well as interest income from some CARICOM countries.

**Partnership income**
Amounts received from a partnership or syndicate for the income year, regardless of whether or not these amounts were withdrawn during the income year, are included in the calculation of assessable income.

**Foreign income**
A Barbados corporation is taxed on foreign branch income as earned. Double taxation is avoided by means of foreign tax credits or an exemption where DTAs exist.

**Deductions**
Business expenses that are reasonable and incurred for the purpose of producing assessable income are deductible for tax purposes unless disallowed by a specific provision of the Income Tax Act. Deduction of capital expenditures is specifically prohibited, but special provisions may allow tax depreciation on these expenditures.

**Depreciation**
Depreciation for tax purposes is computed on a straight-line basis at prescribed rates. The process is accelerated by additional initial allowances in the year of acquisition. Conformity between book and tax depreciation is not required. Gains on sales of depreciable assets are taxable as ordinary income up to the amount of tax depreciation recaptured, and losses on sales below depreciated value are deductible.

Investment allowance (an incentive allowance limited by statute to entities operating in certain industries, claimed in lieu of initial allowances):

* Basic industry * | 20% |
* Businesses or persons entitled to export allowance for exports outside of CARICOM countries | 40% |
* Business engaged in the manufacture and refining of sugar | 40% |
* Business engaged in the manufacture of clay and limestone products | 40% |

* as prescribed by the regulations to the Barbados Income Tax Act.

Note: This allowance is not deducted from the cost of the asset in calculating tax written down value.

**Manufacturing allowance**
Companies involved in the manufacturing sector are granted an additional 50% of the annual allowance claimed in an income year. Such companies are also often able to claim investment allowances.

**Renewable energy allowance**
Companies that have had an energy audit, retrofitted a building, or installed a system to provide electricity from sources other than fossil fuels are granted an additional 50% of the annual allowance claimed in an income year.

**Commercial building allowance**
A deduction is available in respect of a commercial building. For each income year, the available allowance is calculated at 1% of the land tax improved value, or 10% of the land tax improved value if the building is registered with the National Trust.

**Depletion**
For oil and gas companies, depending on certain circumstances, a depletion allowance of 20% or 10% is given in addition to annual depreciation on prescribed types of capital expenditure.

**Goodwill**
Goodwill is not a depreciating asset, and tax amortisation is not available.

**Start-up expenses**
There are no specific provisions in relation to deductions for start-up expenses. However, some of these are treated as costs incurred on account of capital expenditure. Such costs are therefore not allowable deductions for tax purposes.
**Interest expenses**
A Barbados corporation can claim a deduction for interest expenses. However, where interest claimed as a deduction has not been paid within two years of being accrued (one year for related parties), it should be added back to assessable income.

**Bad debt**
Amounts representing debts owed that have been established as bad debts during the income year and have been previously included in calculating assessable income for that income year or a previous income year are deductible in calculating assessable income.

**Charitable contributions**
Charitable contributions are generally deductible where they are made to entities that are specifically registered as charities or not-for-profit organisations with the Corporate Affairs and Intellectual Property Office.

**Pension expenses**
Contributions made by companies under registered pension schemes are deductible in calculating assessable income.

**Fines and penalties**
Fines and penalties imposed are generally not deductible.

**Taxes**
Taxes on income are not deductible.

**Net operating losses**
Losses can generally be carried forward for nine years after the income year in which they are incurred and may be applied in full against future taxable profits. Notwithstanding this, a tax loss incurred by a person in respect of residential property can only be deducted against assessable income earned by that person in respect of residential property.

Losses of general insurance companies can only be carried forward for five years, and losses of life insurance companies cannot be carried forward at all.

No carryback is allowed for CIT losses.

**Payments to foreign affiliates**
A Barbados corporation can claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided that payments are no greater than what it would pay to an unrelated party.

**Group taxation**
Trading losses (i.e. the tax loss for the year, excluding capital allowances) incurred during an income year of a surrendering company may be set off wholly or partially against the profits of a claimant company, where both are members of the same group (defined as where one company is a 75% subsidiary of another, or both companies are 75% subsidiaries of a third company).
Barbados

Group relief is not available to companies operating in the international business and financial services sector or any other company that is operating under concessionary legislation.

**Transfer pricing**
Although Barbados has no specific transfer pricing legislation or regulations in place, the Income Tax Act contains a section dealing with artificial transactions. This enables the revenue authorities to amend the assessable income of a person where they believe the main purpose of a non-arm’s-length transaction is to artificially reduce that person’s assessable income.

In such circumstances, the transaction is disregarded or modified to achieve the effect that it no longer results in the artificial reduction of that person’s assessable income.

**Thin capitalisation**
Barbados does not have tax provisions relevant to thin capitalisation.

**Controlled foreign companies (CFCs)**
Barbados does not have tax provisions relevant to CFCs.

---

**Tax credits and incentives**

**Foreign tax credit**
Barbados allows a credit for foreign taxes (taxes paid in jurisdictions outside Barbados). The credit should not exceed the Barbados tax attributable to the income derived outside Barbados.

**Agricultural cash rebate**
The following rebates may be claimed on agricultural or agro-processing machinery or plants that are new or imported onto the island for the first time:

- Sugar cane harvesters: 10% or 15%.
- Other: 18%.

**Export allowance**
There is a rebate of tax under the Income Tax Act in respect of income from export sales outside CARICOM. The maximum tax credit on eligible sales is 93%, which is available where eligible sales exceed 81% of total sales.

**Exempt Insurance Act**
The Exempt Insurance Act is applicable to companies in Barbados that insure risks and earn premiums outside the island and for companies that own or manage the former. Under the Act, all three types of companies are exempt from exchange control regulations. In lieu of standard CIT rates, exempt insurance companies are subject to tax at the rate of 0% for the first 15 years; thereafter, the rate is 8% on the first BBD 250,000 of taxable income and 0% on taxable income in excess of BBD 250,000. No withholding tax (WHT) is levied on remittances of dividends or interest.

Exempt insurance companies are subject to an annual license fee of BBD 20,000.

**Fiscal Incentives Act**
The Fiscal Incentives Act provides to manufacturers of an ‘approved product’ a full exemption from taxes and duties for varying periods, up to a maximum of 15 years.
Foreign currency earnings credit
Persons carrying on business in Barbados may claim a tax credit of up to 93% of CIT on net profits from foreign currency earnings derived from construction projects or professional services undertaken outside of CARICOM, international insurance business, or services provided to the international business sector.

Employment tax credit
A tax credit of 10% of the actual amount of the expenditure incurred in respect of wages for the increase in employees is available where:

• there is an increase in profits directly attributable to the business
• there is an increase in the number of employees who are employed directly in the operations of the business by an amount of at least 10% of the total workforce employed during the previous year, and
• the increase in the number of employees referred to is maintained for a period of three years.

The credit is applied in the year in which persons meet the above mentioned criteria. Any unused credit can be carried forward for three years from the end of the income year in which the credit was obtained, and no cash refund shall be allowed.

Productivity and innovation tax credit
Entities incurring expenditure that is innovative in nature and leading to the development of a new manufacturing process, product, service, or organisational procedure will be granted a tax credit of 25% of the amount expended in that income year. The credit will only be granted if the innovation was successfully introduced to the market as evidenced by increases in sales, productivity, or organisational efficiency.

Any unused tax credit shall be carried forward for a maximum of three years from the end of the income year in which the credit was obtained, but no cash refund will be allowed. Certification from the Executive Director of the National Productivity Council is required.

Renewable Energy
A number of tax concessions have been enacted with respect to the conservation of energy. These measures include a 150% deduction of actual expenditure, not exceeding BBD 25,000, for each year for five years in respect of the following:

• energy audits and
• 50% of the cost of retrofitting premises or installing systems to produce electricity from sources other than fossil fuels.

The business must be current in the payment of its corporation tax, VAT, land tax, and national insurance contributions, or where not current, has entered into an agreement with the respective authorities to settle outstanding arrears.

Housing Incentives Act
The Housing Incentives Act provides CIT, import duty, WHT, and other concessions to developers who implement low income housing projects. Approved developers are subject to CIT at a rate of 15%.

International Business Companies (IBCs) Act
IBCs resident in Barbados but deriving income solely from sources outside Barbados are taxed at the following rates:
Barbados

<table>
<thead>
<tr>
<th>Taxable income (BBD)</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 10 million</td>
<td>2.5</td>
</tr>
<tr>
<td>10 million to 20 million</td>
<td>2</td>
</tr>
<tr>
<td>20 million to 30 million</td>
<td>1.5</td>
</tr>
<tr>
<td>In excess of 30 million</td>
<td>0.5 (income year 2012) or 0.25 (income year 2013)</td>
</tr>
</tbody>
</table>

Freedom from exchange controls is granted to IBCs, as well as duty-free concessions on certain imports. No WHT is levied on remittances of dividends, royalties, interest, management fees, fees, or other income paid by IBCs to persons outside Barbados. IBCs may also claim a credit for taxes paid outside Barbados, provided that this does not reduce the company's rate of CIT in Barbados to less than 0.5% (0.25% from income year 2013).

IBCs are subject to an annual license fee of BBD 850.

**International Financial Services Act (IFSA)**
The IFSA provides for the establishment of international banking, trust administration, and other related or ancillary services by eligible companies incorporated in Barbados or branches of qualified foreign banks. An annual license fee of BBD 100,000 is payable by IFSA licensees who are in the business of receiving foreign money deposits, while IFSA licensees who are not involved in deposit taking financial services are required to pay BBD 50,000.

International financial service entities are exempt from exchange controls and are granted duty-free concessions on certain imports. Profits and gains are taxed at the same rates as for IBCs. No WHTs are levied on remittances of dividends, interest, or fees. International financial service entities may also claim a credit for taxes paid outside Barbados, provided that this does not reduce the entity's rate of CIT in Barbados to less than 0.5% (0.25% from income year 2013).

**International Trust Act**
The International Trust Act is aimed at facilitating the use of Barbados trusts for purposes previously made possible in many tax-free financial centres. An international trust is taxed in Barbados as an individual that is resident but not domiciled in Barbados. This allows the trust to take advantage of a network of tax treaties while not subjecting its foreign earnings to Barbados tax unless they are remitted there. The Act exempts trusts from exchange control and WHT requirements. No registration is required.

**Market development allowance for export sales or the tourist industry**
150% of certain expenditure on research and development for export sales outside of CARICOM or on tourism development is deductible.

**Shipping (Incentives) Act**
The Shipping (Incentives) Act was enacted to encourage the development of Barbados' shipping activities by granting CIT, import duty, WHT and other concessions to approved shipping companies for a period of ten years.

**Small Business Development Act**
Companies incorporated under the Companies Act with at least 75% of their shares owned locally and having share capital of not more than BBD 1 million, annual sales not in excess of BBD 2 million, and not more than 25 employees may obtain approval as a small business. Such companies pay CIT at a reduced rate of 15% and are exempt from
the payment of import duties on equipment imported for use in the business and from stamp duty in some instances. In addition, 120% of certain expenditures directly related to the development of the business are deductible for tax purposes. Investors in such businesses are exempt from WHT on interest and dividends earned on their investment.

**Societies with Restricted Liability (SRL) Act**

An SRL is a hybrid entity that can be recognised as a corporation or partnership in certain jurisdictions, depending on the nature of its organisational documents. The entity has limited liability, and membership units are known as quotas. Societies qualifying under this Act may apply for a licence to operate as international SRLs and, as such, are taxed at the same rates as IBCs. No WHT is levied on any distributions, interest, or other income paid by an international SRL to non-residents. International SRLs are granted duty-free concessions on certain imports, and no exchange control requirements are applicable. Entity mobility is also a prominent feature of this legislation. Qualifying societies organised overseas can be continued into Barbados under the Act.

**Special Development Areas Act**

The Special Development Areas Act provides relief for approved developers constructing or improving a building or structure in certain defined locations in Barbados and to persons financing such work (other than a commercial bank). Persons financing such work are exempt from income tax on interest received. Approved developers are exempt from import duties and VAT on inputs for the construction or renovation of buildings, WHTs on repatriation of interest (for a period of 15 years), land tax, and property transfer tax payable by vendors on the initial purchase of the company. An approved developer pays CIT at the rate of 15% and is granted initial and annual allowances on industrial buildings of 40% and 6%, respectively, and on commercial buildings of 20% and 4%, respectively.

**Qualifying insurance companies**

Companies registered under the Insurance Act that derive at least 90% of their premiums from sources outside of CARICOM and at least 90% of whose risks originate outside of CARICOM may obtain a certificate of qualification. Such companies are entitled to the same exemptions from WHTs and exchange controls as exempt insurance companies. They are also entitled to the foreign currency earnings credit, which may reduce their CIT rate from 25% to 1.75% for general insurance business. The rate of tax on gross investment income applicable to life insurers may fall from 5% to 0.35%.

**Tourism Development Act**

The Tourism Development Act provides that a qualifying owner of a tourism project or of a completed tourism product may offset expenditures on construction or the provision of certain amenities against its profits.

A tourism project includes the following:

- The construction of a new hotel.
- The alteration or renovation of an existing hotel.
- The conversion of an existing building or buildings into a hotel by reconstruction, extension, alteration, renovation, or remodelling.
- The furnishing and equipping of a building to be utilised as a hotel.
- The provision of tourist recreational facilities and tourism related services.
- The construction and equipping of a new restaurant.
- The alteration or renovation of an existing restaurant.
Barbados

- The construction of a new attraction or the alteration or renovation of an existing attraction.
- The restoration, preservation, and conservation of natural sites.
- The establishment, restoration, preservation, and conservation of monuments, museums, and other historical structures and sites.
- The construction and furnishing of villas.
- The construction and furnishing of timeshare properties.
- The addition to a tourism product of any facilities or services intended to increase or improve the amenities that the tourism product provides.

Concessions extend to the following:

- The importation of building materials and supplies without payment of customs duty and an exemption from the payment of customs duties on specified supplies to be used for equipping the project.
- A refund of customs duty (including VAT) where the holder of a permit can satisfy the Comptroller of Customs that the building materials and supplies purchased for a tourism product have been purchased in Barbados, or in the case of importation that the customs duty was paid by the holder of the permit.
- Income tax concessions with respect to the write-off of interest, accelerated deduction of expenditure, interest rate subsidy, equity financing, training, and marketing.
- The set off of approved capital expenditures against revenues for a period of 15 years by the owner of a qualifying tourism project (except restaurants), which has a project with a value of up to BBD 200 million. Hotels with capital expenditure over BBD 200 million are allowed one additional year to write off expenditure for each additional BBD 20 million expended, up to a maximum of 20 years.

**Withholding taxes**

WHTs are levied as follows:

* Treaty/protocol not yet in force; awaiting ratification.
** Information not yet available.

Notes
1. The rate is 15% (or 7.5% for Ghana) for portfolio dividends and 5% for holdings of at least 10%.
2. Interest and royalties are only taxable in the country in which the beneficial owner of the dividends or interest is resident.
3. The rate is 12% for portfolio dividends and 5% for holdings of at least 25%.
4. This rate applies, provided that the interest is subject to tax in the other country.
5. This rate applies, provided that the royalties are subject to tax in the other country.
6. The rate is 10% for portfolio dividends and 5% for holdings of at least 25%.
7. The rate is 15% for portfolio dividends and 5% for holdings of at least 25%.
8. 5% of the gross royalties on any literary, artistic, or scientific work, including films or television broadcasting, and 10% on any patent, trademark, commercial, or scientific equipment, among others.
9. Interest is only taxable in the country in which the beneficial owner of the interest is resident.
10. Royalties are only taxable in the country in which the beneficial owner is resident.
11. The rate is 15% for portfolio dividends and 0% for holdings of at least 10% held for at least 12 uninterrupted months prior to dividend distribution.
12. The rate is 15% for portfolio dividends and 5% for holdings of at least 5%.
13. The rate is 10% for portfolio dividends and 5% for holdings of at least 10%.
14. The rate is 15% for portfolio dividends and 0% for holdings of at least 10%.
15. The rate is 75% of the statutory nominal rate at the time of distribution; 5% for companies with holdings of at least 25%.
16. The rate is 7.5% of the gross amount; 5% if the beneficial owner is a bank.
17. The rate is 15% for portfolio dividends and 5% for holdings of at least 25%.
18. The rate is 5% for portfolio dividends and 0% for holdings of at least 25%.
19. Agreement extended to Barbados by virtue of the agreement between Switzerland and the United Kingdom, on payments to non-residents from Barbados.
Barbados

20. Dividends are only taxable in the state in which the beneficial owner is resident. The rate of 15% applies to dividends paid out of income from removable property by an investment vehicle that distributes most of this income annually and whose income is exempt from tax, other than where the beneficial owner is a pension scheme.

21. This rate applies, provided that the interest is subject to tax in the other country.

22. WHT applies only to royalties in respect of cinematographic or television films. All other royalties are exempt from WHT, provided that they are subject to tax in the other country.

23. The rate is 15% for portfolio dividends, 5% for holdings of at least 10%. Dividends paid by a regulated investment company will bear WHT at a rate of 15%, regardless of the percentage of shares held by the recipient. Dividends paid by a real estate investment trust (REIT) will qualify for the 5% WHT rate only if the beneficial owner is an individual holding less than 10% of the shares in the REIT, otherwise, a 30% WHT rate will apply.

24. The rate is 10% for portfolio dividends, 5% for holdings of at least 5%.

25. The rate is 5% if the recipient is a bank, 15% in all other cases.

26. International business companies (IBSs), international societies with restricted liability (ISRLs), exempt insurance companies (EICs), and qualifying insurance companies (QICs) are exempt from WHTs on payments to non-resident persons or international business entities. Specific legislation applies.

30. Treaty in force 19 December 2012, replaces a treaty that had been in force from 26 November 1970.

32. The rate is 0% for dividends paid to a non-resident shareholder when the amount paid as dividends is derived from income earned from sources outside of Barbados.

---

**Tax administration**

**Taxable period**

CIT returns are prepared on a fiscal-year basis.

**Tax returns**

Companies with fiscal years ending between 1 January and 30 September (both dates inclusive) are required to file a CIT return on or before 15 March in the year following the end of the fiscal period. Companies with fiscal years ending any time between 1 October and 31 December (both dates inclusive) are required to file a CIT return on or before 15 June in the year following the end of the fiscal period.

The Department of Inland Revenue has instituted an online filing system, which is optional.

**Payment of tax**

Companies with fiscal years ending between 1 January and 30 September (both dates inclusive) are required to make an instalment of CIT for the income year in which the fiscal period ends on or before 15 September of that year. The instalment is 50% of the net CIT payable for the preceding income year. The remainder of CIT due (if any) must be paid on filing of the CIT return by 15 March of the following year.

Companies with fiscal years ending between 1 October and 31 December (both dates inclusive) are required to make two instalments of CIT for the income year in which the fiscal period ends on or before 15 December of that year and 15 March of the following year. The instalments are each 50% of the net CIT payable for the preceding income year. The remainder of CIT due (if any) must be paid on filing of the CIT return by 15 June of the following year.

It is possible to apply for a reduction or waiver in the instalments if lower profits are anticipated in the current year when compared with those of the preceding year.

**Penalties**

The penalties and interest for failing to file a return on time and pay the CIT due are as follows:
• Penalty for failing to file a CIT return by the due date is BBD 500 plus 5% of the tax assessed at the due date.
• Penalty for failing to pay CIT by the due date is 5% of the tax assessed and unpaid at the due date.
• Interest charge of 1% per month on the tax and penalties calculated for each month during which any amount of tax and penalties remain unpaid on the largest amount of tax and penalties that were due and unpaid at any time during that month.

The penalty for failing to make an instalment of CIT by the due date is 10% of the CIT instalment due, plus interest at 0.5% per month on the CIT instalment and penalty outstanding.

**Tax audit process**
A person authorised by the Commissioner may, at any reasonable time, audit the books and records, or other documents that may relate to the information that should be in the books or records, examine property, request reasonable assistance from the owner, or, as necessary, seize or retain any documents that may be relevant.

**Statute of limitations**
Every person required to deliver a return of one’s assessable income for an income year shall keep adequate records and shall retain every such record or voucher for a period of up to five years after the end of the relevant income year, unless the Commissioner otherwise directs, before the disposal of such records.

**Tax information exchange agreements (TIEAs)**
TIEAs provide for the exchange of information on tax matters. TIEAs with Denmark and Greenland came into force on 14 June and 2 May 2012, respectively. A TIEA with the Faroe Islands is awaiting ratification, and TIEAs with France, Germany, and South Africa have been initialled and are awaiting signature.

---

**Other issues**

**Bilateral investment treaties (BITs)**
Barbados, through its desire to create favourable conditions for greater flow if investments between territories, and through its recognition that the promotion and reciprocal protection of such investments will be conducive to the stimulation of individual business initiatives, has entered into BITs with Canada, China, Cuba, Germany, Italy, Mauritius, Switzerland, The United Kingdom, and Venezuela. BITs with Ghana and Belgium/Luxembourg await ratification.

BITs may provide the following benefits:

• Covers every kind of investment.
• Allow for most favoured nation (MFN) treatment.
• Allow for compensation for losses owing to war, revolution, state of national emergency, revolt, riot, etc. to be no less favourable than that for residents.
• There should be no expropriation without compensation equal to market value.
• Allows for unrestricted transfer of investments and returns.
• Subrogation.
• Allows for dispute settlement by diplomatic channels or a three member arbitral tribunal whose decision is binding.

Significant developments
As of 1 January 2013, numerous amendments to the Tax Code of Belarus have been introduced. The main objective for such amendments is further simplification of the Belarus tax system and its harmonisation with International Financial Reporting Standards (IFRS) requirements.

Taxes on corporate income
The standard corporate income tax (CIT), also known as profits tax, rate is 18%.

As of 1 January 2013, all resident companies are obligated to recognise revenue derived from the supply of goods, works, services, and property rights as of the date when it was recorded in accounting in line with the accrual method, notwithstanding the date of settlement for goods, works, services, and property rights supplied.

CIT is charged on taxable income (net profits). Taxable income is generally determined as revenues from sales of goods, works, and services, excluding value-added tax (VAT), less production and business related costs, less other deductible expenses, plus net results of non-operating income and expenses.

Resident companies are taxed on their worldwide income.

Non-resident companies are taxed on Belarus-sourced income derived through a permanent establishment (PE) with CIT (at the rate of 18%). Income of non-resident companies sourced in Belarus that is not related to the activities of a PE is subject to withholding tax (WHT) (at rates varying from 6% to 15%).

Local income taxes
There are no local taxes due on net profits.

Corporate residence
A company is resident in Belarus if it is incorporated in Belarus.

Permanent establishment (PE)
According to local legislation, a non-resident company is deemed to have a PE in Belarus in cases where:

• it permanently carries out commercial activities in Belarus, in whole or in part
• it carries out its activities through a dependent agent
• it uses a building site or construction, assembly, or equipment objects, or
• it provides services or performs works within a period of 90 days, continuously or in the aggregate, during a calendar year.

Double taxation treaties (DTTs) may establish different rules of PE recognition. According to domestic law, where there is a DTT, the provisions of the treaty shall prevail.

Notwithstanding the activities that create a PE in Belarus, a non-resident company must be registered with the local tax authorities controlling the territory where activities are carried out before starting a business in Belarus.

Any profits derived by a non-resident company via a PE in Belarus are subject to 18% CIT. Expenses incurred by a non-resident company, either in Belarus or abroad, that relate to a PE can be deducted, subject to local deductibility restrictions.

**Other taxes**

**Value-added tax (VAT)**

As of 1 January 2013, all taxpayers shall recognise revenue for VAT purposes on an accrual basis. The only exception is set out for taxpayers using the simplified taxation system and keeping simplified tax records without accounting records. Such taxpayers shall recognise revenue on a cash basis.

The standard VAT rate is 20%, whereas the preferential rate is 10%.

The 10% preferential rate applies on:

• local supplies of crop products (excluding floriculture, cultivation of ornamental plants), beekeeping, livestock (except for fur production), and fisheries locally produced and
• import and/or local supplies of certain food products and goods for children.

In general, local supplies of goods, works, and services made by a taxpayer performing its economic activities in Belarus, as well as the importation of goods, are subject to VAT.

Place of supply rules established by the Tax Code of Belarus should be followed to determine whether goods, works, and services are supplied locally, and therefore subject to tax in Belarus.

When a non-resident company, which does not have a PE registered in Belarus, sells goods or provides works and services that are considered local supplies according to the place of supply rules, the VAT due on such supplies is paid by the purchaser registered with the local tax authorities from its own funds. This VAT could be deducted against output VAT, if any, or refunded from the budget in the established order.

Some exceptions apply to provision of construction and other similar works.

Exemptions with credit (zero-rated) include, but are not limited to, the following:

• Supply of goods exported outside of Belarus.
Belarus

- Provision of works and services involving maintenance, loading, reloading, and any other similar works and services related to supply of exported goods.
- Transportation and any directly linked ancillary services related to the export or import of goods, including transit forwarding, as well as exported works for goods processing.
- Bunker fuel for fuelling aircraft of foreign companies carrying out international flights and (or) international carriages by air.
- Works and services related to repair (modernisation, conversion) of aircrafts (including engines and railway vehicles) and provided to non-resident companies or individuals.

In order to apply zero-rated VAT on goods carried out from Belarus, VAT payers must hold supporting documents as evidence that these goods were actually exported from Belarus to another country. Application of zero-rated VAT on respective works and services must be supported by the appropriate documents, which have to be provided to the local tax authorities where the taxpayer is registered for tax purposes.

Exemptions without credit include, but are not limited to, the following:

- Disposal of shares in resident legal entities.
- Supply of material rights for industrial property objects (e.g. inventions, utility models, industrial designs, breeding achievements, integrated circuits, know-how, trade names, trademarks, and service marks).
- Supply of securities, derivatives, and other similar financial instruments, certain limitations apply.
- Fiduciary management services related to funds and assets owned by an individual or an entity.
- Provision of all types of insurance and re-insurance (co-insurance) services rendered by insurance and re-insurance agents.
- Supply of medicines, medical equipment, instruments, medical products, as well as drugs, devices, equipment, veterinary products, under certain conditions.
- Personal or public health care services, under certain conditions.
- Social services supplied by institutions for children and young people care, nursing homes for the elderly and/or by care/guardianship institutions for disabled or by other non-profit entities.
- Supply of services in the field of culture and art, under certain conditions.
- Public services (services of barbers, baths, and showers; laundry and dry cleaning services; watch repairing; manufacturing and repair of clothing and footwear; repair and maintenance of household appliances; repair of personal and household goods).
- Services provided by religious organisations, if these services correspond to the purposes set out in their canons, statutes, and other documents.
- Funeral services, maintenance of the graves, tombstones, fences, and other objects associated with burial, as well as works on their production, under certain conditions.
- Supply of postage stamps, postcards, and envelopes marked, excise and control (identification) stamps for marking of goods at their nominal value, stamps which can be used as a confirmation of fees and charges payable in accordance with the legislation.
- Supplies of jewels as well as related services, under certain conditions.
- Retail trade of goods in duty-free shops, under certain conditions.
- Research and development, design, and technological works and services, under certain conditions.
- Education and training services.
- Lotteries and gambling, under certain conditions.
• Financial services supplied by the banks, under certain conditions.
• Goods and equipment imported into Belarus, under certain conditions.
• Transactions related to provision of loans.

In order to apply exemptions, taxpayers should ensure that the services and goods supplied meet the appropriate VAT exemption requirements.

VAT returns shall be submitted on either a monthly or quarterly basis, by the 20th day of the month following the reporting period. VAT shall be paid on either a monthly or quarterly basis, no later than the 22nd day of the month following the reporting period.

**Customs payments**

The Customs Union between Russia, Kazakhstan, and Belarus, with its unified trade regulations and customs code, has significantly affected administering customs clearance and payment procedures followed by Belarus in regards to exports and imports.

Indirect taxation issues within the Customs Union shall be administered in compliance with the International Agreement on Indirect Taxation and two Protocols signed by the Customs Union Member States.

The following charges are considered customs payments:

• Import duties.
• Export duties.
• Special anti-dumping and countervailing duties.
• VAT and excise taxes due upon importation of goods.
• Fees for customs processing/services.

Rates of import duties as well as description of goods subject to them are established by the Single Nomenclature of Goods of the Customs Union (HS Nomenclature) and Single Customs Tariff of the Customs Union.

However, for certain goods specified in Appendix 5 of HS Nomenclature, Belarus is allowed to apply specific rates of import duties different from the rates set in HS Nomenclature.

Export duties are not levied on exported goods, with the following exceptions: certain soft oil; light distillates; fuels and gasoline; wasted petroleum products; propane, butane, ethylene, propylene, and other liquefied gases; petroleum coke; petroleum bitumen, benzol, toluene, xylenes, potash fertilisers; etc. According to the Customs Union regulations, rates of export duties in regards to mentioned goods shall be established by Belarusian government and shall be equal to the rates applied in Russia.

Import and export duties are calculated on the customs value of the goods, which is defined pursuant to the price of transaction method established by the Customs Union regulations. Generally, the following components are considered when calculating the customs value of imported goods:

• Contract price of the goods.
• Rebates and discounts provided by a supplier, under certain conditions.
• Transportation related expenses to the border of the Customs Union (i.e. Belarusian border).
• Insurance premiums.
Belarus

- Cost of containers and other packaging.
- Part of direct or indirect income to be derived by the seller from future resale, transfer, or other use of imported goods.

Special, anti-dumping, and countervailing duties could be imposed as a measure to protect economic interests of Belarus.

Tax base for VAT calculation due on imported goods includes the total amount of customs value, import duty, and excise tax paid, if any.

Generally, the taxpayer is required to pay customs duties before the customs clearance of the appropriate goods; however, under certain conditions, a taxpayer may be provided with an extension of payment deadlines or allowed to pay only part of customs duties. It is also possible to pay customs duties in advance.

Electronic customs declaration is currently available for customs clearance of the goods declared in customs procedures of temporary exports, re-exports (exports) as well as re-imports, free circulation (imports), and free customs zones.

**Excise taxes**

Rules on determination of moment of actual supply of excisable goods are adjusted as consistent with the obligation of taxpayers to record revenue on an accrual basis as of 1 January 2013.

Excise taxes are imposed on the following goods produced and sold in or imported to Belarus:

- Rectified ethyl alcohol and alcoholic drinks, including beer and wine.
- Alcohol-containing food products in the form of solutions, emulsions, suspensions, produced with the use of ethanol from all types of raw materials, other alcohol-containing products.
- Tobacco (excluding raw tobacco), including cigarettes, cigars, cigarillos, and smoking tobacco.
- Energetic products, including petrol, kerosene, diesel, and bio diesel, gasoline, fuel, marine fuel, oils for diesel engines, and engines with a carburettor and an injector.
- Liquefied hydro carbonated gas and compressed natural gas used as motor fuel.
- Vans and passenger cars, including those converted to cargo.

The tax rate depends on the type and quantity of goods. Rates of excise taxes are stipulated by the Appendix to the Tax Code of Belarus. Compared to the rates applicable in 2012, rates of excise taxes effective in 2013 have increased considerably. The Tax Code provides for a gradual increase of rates of excise taxes over the course of the year by establishing different rates effective during each following half a year.

The excise tax rate for cigarettes with filters is defined on the basis of (i) maximum retail price per pack of cigarettes of certain brands declared by a taxpayer and (ii) reference of certain brands of cigarettes to one of three price groups defined in the Tax Code.

Generally, the following tax rates are applied (1 January 2013 to 30 June 2013):
<table>
<thead>
<tr>
<th>Description of tax object</th>
<th>Taxable item</th>
<th>Tax rate in BYR* per taxable item</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rectified ethyl alcohol and alcoholic drinks, including beer and wine</td>
<td>1 litre of 100% alcohol, or 1 litre of complete product</td>
<td>From 160 to 104,500</td>
</tr>
<tr>
<td>Tobacco (excluding raw tobacco), including cigarettes, cigars, cigarillos, and smoking tobacco</td>
<td>1 kg of pipe and smoking tobacco, or 1 cigar or 1,000 cigarettes, cigarillos</td>
<td>From 30,100 to 206,300</td>
</tr>
<tr>
<td>Energetic products (petrol, kerosene, diesel, and biodiesel, gasoline, fuel, marine fuel, oils for diesel engines and engines with a carburettor and an injector)</td>
<td>1 ton</td>
<td>From 306,500 to 2,016,100</td>
</tr>
<tr>
<td>Liquefied hydro carbonated gas and compressed natural gas used as motor fuel</td>
<td>1,000 litres and 1,000 cbm</td>
<td>173,300 and 327,000</td>
</tr>
<tr>
<td>Vans and passenger cars, including those converted to cargo</td>
<td>1 hp (0.75 kw.)</td>
<td>From 2,200 to 22,100</td>
</tr>
</tbody>
</table>

* Belarusian rubles (BYR)

Excise taxes paid on the purchasing/importation of excisable goods to be used in manufacturing of goods or provision of works and services in Belarus are considered as deductible for CIT purposes, with certain exceptions.

The tax is reported and paid on a monthly basis, no later than the 20th day of the month following the reporting period.

**Real estate tax (immovable property tax)**

Real estate tax is levied at the annual rate of 1% on the residual value of buildings, installations, including separated premises, and constructions, late construction in progress (if construction works take longer than the deadline established in technical documentation), owned by legal entities.

As of 1 January 2013, buildings and installations under reconstruction or modernisation are not regarded as late construction in progress.

The tax base of buildings and constructions located in the territory of Belarus and leased by individuals to legal entities will be the contract value of the leased real estate not less than its value established by the evaluation. Evaluation can be made in the order approved by the President of Belarus as well as by a certified appraiser or local authority responsible for state registration of real estate.

When the real estate subject to taxation is located in Belarus and leased by a resident company to a lessee, the lessee is considered a real estate taxpayer. The lessee is also obligated to pay the tax due on real estate leased from foreign companies that are not considered as having a PE in Belarus.

The amount of tax, except the tax due on late construction in progress (if construction works take longer than the deadline established in technical documentation), is deductible for CIT purposes.
The tax reporting obligation must be fulfilled by a taxpayer before 20 March of the reporting year. As of 1 January 2013, taxpayers are entitled to choose whether to pay tax on a quarterly basis by equal parts, not later than the 22nd day of the third month of each quarter, or once a year, not later than 22 March of a current tax period (tax year).

**Land tax**
Belarusian and foreign entities are subject to land tax collected by the local tax authorities with respect to land that they own or use in Belarus.

The tax base depends on plot location and purpose and is normally determined pursuant to cadastral value of a land plot.

The Tax Code provides for a number of land plot categories that are exempt from, or not subject to, land tax in Belarus.

The tax is payable on an annual basis at the rates established by the Appendices to the Tax Code of Belarus. Tax rates for agricultural plots vary from BYR 250 to BYR 69,130 per hectare. Tax rates on the land plots located in towns and rural areas range from 0.025% to 3% payable on the cadastral value.

Land tax is deductible, with some exceptions, for CIT purposes.

Land tax is reported annually, no later than 20 February of the current reporting year.

As of 1 January 2013, taxpayers are entitled to choose whether to pay tax on a quarterly basis, by equal parts before the 22nd of the second month of each quarter, or once a year, not later than 22 February of a current year on plots other that agricultural and not later than 15 April with regard to agricultural plots.

**State dues**
State dues are payable by legal entities that apply to the state institutions for the issuance of documents having legal force or other deeds, bring the cases before the courts for consideration, use bills of exchange in their activities, etc.

State dues include the following payments and duties:

- State fees (payable on suits, applications, appeals, and other documents that are submitted to or claimed from the courts or prosecution authorities, payable on applications for state registration of a legal entity, notary public services, real estate registration services, etc.).
- Patent fees (payable for registration and use of intellectual property).
- Stamp fees (payable on activities with bills of exchange).
- Consular fees (payable on the activities of state consular and diplomatic departments performed under the request of any applicant).

As of 1 January 2013, state dues for state registration of a business entity are not charged if registration related documents are filed with the registration authorities electronically via the official web-portal. State dues paid are refunded if proceedings in the economic court are terminated due to the parties consent to resort to mediation.

**Offshore charge**
An offshore charge is levied upon the following activities of domestic entities:
Belarus

• Any transfer of funds to an entity registered in an ‘offshore jurisdiction’, to a third party who is a creditor of that entity, or to the bank account of an offshore jurisdiction.
• In kind performance of obligation to an offshore entity, with some exceptions.
• Any transfer of material rights and obligations as a result of changes in commitment (cession or transfer of debt) between a domestic entity and an offshore entity.

According to Belarusian laws, an offshore jurisdiction is a territory that is included in the list of offshore territories established by the President, has a preferential tax treatment, and/or does not disclose the information related to financial transactions made by resident entities.

A list of 51 offshore territories has been published. With certain exceptions specified in the law, all payments to offshore companies or their branches for any kind of work or services, commodities, interest on loans, insurance premiums, guarantees, etc. are subject to an offshore charge, which is deductible for CIT purposes.

Tax relief is granted to: (i) repayment of loans including interests on them, borrowed from entities located in offshore territories, (ii) payments due under international marine cargoes and forwarding services, and (iii) payments for bank operations under certain conditions.

An offshore charge is paid at a 15% rate and is deductible for CIT purposes.

The tax is reported and paid on a monthly basis, no later than the 20th day of the month following the reporting period.

**Capital gains tax**

Capital gains from disposal of shares/stocks in a Belarusian entity are taxed as part of the taxpayer’s profits and are subject to a 9% tax. No tax exemptions are provided by the Tax Code for the capital gains taxation.

**Ecological (environmental) tax**

Ecological (environmental) tax is imposed on pollutants discharged into the environment, storage and disposal of industrial wastes, wastewater discharges, and on importation of ozone-depleting substances, including those contained in the products.

As of 1 January 2013, the amount of tax due is decreased by the amount of disbursed capital investments in renewable energy plants.

The following are excluded from taxation, including but not limited to:

• Pollutants discharged into the air by mobile sources (e.g. cars, vehicles).
• Transit of ozone-depleting substances, including those contained in the products through the territory of Belarus.

The tax base of environmental tax is the actual quantity of respective pollutants used/discharged. Tax rates of environmental tax are stipulated by the Tax Code of Belarus.

Environmental tax paid, with certain exceptions, is treated as deductible for CIT purposes.

The tax is reported on a quarterly basis, by the 20th day of the month following the reporting quarter. As of 1 January 2013, taxpayers are entitled to choose whether to pay...
Belarus

tax on a quarterly basis, by 22nd of the month following the reporting quarter, or once a year, not later than 22 April of a current year.

Certain exemptions are provided to legal entities effecting tax payments on the basis of established annual limits. These taxpayers will have to file an annual tax return and provide it to a tax authority no later than 20 April of the calendar year.

**Tax on natural resources**
A tax on natural resources is payable on the actual value of extracted natural resources. It depends on the kind and quantity of extracted resources.

Tax rates are established by the Tax Code of Belarus and are applied on natural resources that have been extracted by a taxpayer within established limits. Natural resources extracted over established limits are taxed by a standard tax rate multiplied by ten.

Tax paid on resources extracted within established limits, or if the limits are not established (for certain type of resources), is treated as deductible for CIT purposes.

The tax is reported and paid on a quarterly basis. Those taxpayers who calculate the tax on the basis of annual limits for extraction fulfil tax reporting and payment liability on an annual basis.

**Social insurance contributions (SIC) and other similar payments**
All payments to employees are subject to social insurance contributions (SIC) at the total rate of 35%. SIC at a rate of 34% (28% pension insurance and 6% social insurance) are paid by an employer and deducted for CIT purposes. SIC at a rate of 1% are withheld from employee’s salary and paid by the employer.

In addition to SIC, an employer is liable for payments under mandatory insurance against accidents at work and professional diseases to the state insurance company ‘Belgosstrakh’ on behalf of all its individuals employed. These payments are charged at flat rate of 0.6%. For employees engaged in certain sectors of the economy, special coefficients of up to 1.5 are applied; consequently, the amount of payments under mandatory insurance against accidents at work and professional diseases could increase.

Such payments as dismissal allowances, compensations for moral damages, legally provided compensations (with some exceptions), insurance premiums payable under certain personal mandatory and voluntary insurance, dividends and interests from participation in legal entities, and others, are exempt from SIC and from mandatory insurance against accidents at work and professional diseases.

**Local tax on providers (suppliers)**
The local tax on providers is levied on legal entities engaged in gathering/purchasing of wild plants (or parts thereof), mushrooms, and technical and medical raw materials of floral origin for their further industrial processing or resale.

Tax base is the cost of gathered items defined on the basis of procurement (purchasing) prices.

Tax rates do not exceed 5%. Tax on providers is treated as deductible for CIT purposes.

The tax is reported and paid on a quarterly basis.
**Branch income**

Non-resident legal entities pay tax on profits attributable to a PE. A PE is broadly defined as “a branch, division, office, bureau, agency, or any other place through which a foreign legal entity regularly carries out its business activities in Belarus”. Belarus’s various DTTs may define a PE differently, which could in some cases result in tax relief. Conducting business through an agent may also create a taxable PE in Belarus.

**Taxation of a PE**

A PE’s profits are computed on substantially the same basis as Belarusian legal entities, including the composition of tax deductible expenses. The Tax Code provides for the deductibility of expenses incurred abroad by a head office with respect to its PE in Belarus (including a reasonable allocation of administration costs).

To calculate a PE’s taxable income, a non-resident company is required to provide a tax authority with financial documents (i.e. accounting records, income statement, general ledger accounts, invoices, statements of services/works fulfilment, etc.) supporting the amount of revenue earned and expenses incurred. Generally, a PE’s taxable income is defined on a revenue less costs basis. Documentary support of each revenue and/or cost item is required.

When it is not possible to calculate a profit attributable to a PE, this profit can be calculated by the tax authority using one of the following methods:

- A profit sharing method (i.e. gross foreign profit is allocated to PE by using one of the following coefficients related to a PE: working time costs, expenses incurred, services/works performed).
- Benchmarking method (tax authority performs benchmarking study by collecting the respective ratios/indexes of other entities engaged in similar activities).

Head office expenses related to a PE are considered for calculation of taxable income in Belarus and require confirmation of an independent foreign auditor. Splitting of expenses is highly recommended in the audited financial statements of the parent company (head office).

If a non-resident company is deemed to have a PE in Belarus, it will have to register with a local tax authority and declare related profit. Profit related to a PE will be taxed by CIT at a rate of 18%.

Non-resident legal entities operating in Belarus through a PE are required to follow the filing and payment schedules established for Belarusian legal entities.

**Representative office**

Non-resident legal entities are also allowed to operate in Belarus via a representative office or to set up a resident legal entity.

A representative office of a non-resident company is defined as the structural subunit registered with the Ministry of Foreign Affairs, which is entitled either to engage in commercial activities in Belarus or not, conclude contracts, and undertake obligations according to the power of attorney issued to the management official of the branch by its head company (founder).

The representative office is not considered a legal person.
Belarus

A representative office conducting commercial activities is taxed in the same manner as a PE or as a local resident company, with some exceptions.

A non-commercial representative office pays taxes due on its primary and auxiliary activities, such as real estate tax (with some exceptions), customs duties, input VAT, personal income tax, social security contributions due on employment of individuals, etc.

**Income determination**

**Inventory valuation**
Under domestic accounting legislation, stock used in the production and included in the cost of produced goods may be generally valued by the following methods:

- Cost of each unit.
- Average cost.
- First in first out (FIFO).

The inventory valuation method used for CIT purposes must be the same method established by the taxpayer’s accounting policy.

**Capital gains**
Capital gains are subject to WHT. See Capital gains tax in the Other taxes section for more information.

**Dividend income**
Dividends distributed by a resident company to another resident company are subject to 12% CIT, which is withheld by a paying company.

Dividends distributed by a foreign entity represent non-operating income of a receiving Belarus entity and are subject to 12% CIT payable by the receiving entity in Belarus, irrespective of the fact that the foreign entity has paid the WHT on dividends distributed.

Dividends received by venture companies are exempt from CIT.

Dividends received by taxpayers from Belarusian companies are exempt from CIT in the hands of such taxpayers since CIT on dividend income is withheld by a respective dividend-distributing entity.

**Inter-company dividends**
The Tax Code provides no exemptions for taxation of inter-company dividends.

**Interest income**
Interest on most types of bonds, including state, municipal, bank, and corporate bonds, is exempt from Belarusian CIT under certain conditions provided for in the Tax Code.

CIT at the standard rate of 18% is charged on interest income derived by a Belarus entity from another resident company.

Interest income derived by a Belarus entity from a foreign entity represents non-operating income of a receiving Belarus entity and is subject to 18% CIT payable by the
receiving entity in Belarus, irrespective of the fact that the foreign entity has paid the WHT on interest income.

**Other significant items**
The following types of income are, *inter alia*, exempt from CIT:

- ‘Target financing’ received from the state or municipal budget. The taxpayer is required to hold separate accounting records of income and expenses derived and incurred within ‘target financing’.
- Amounts payable to a shareholder, whether in cash or in kind, not in excess of its contribution to the statutory capital of a legal entity in case of:
  - its liquidation
  - a shareholder’s withdrawal from a legal entity, or
  - if the shares are purchased by a legal entity from its shareholder.
- Payments to a shareholder in the value of its shares or as a result of an increase in their nominal value made by the legal entity’s sources, as long as such payments do not change the percentage of participation of either shareholder or change the percentage of participation interest for less than 0.01%.
- Goods (works, services), material rights, and monetary means granted:
  - to the successors by a legal entity in case of its restructuring
  - as an inter-company transfer pursuant to corporate decision
  - to taxpayers engaged in crop production, animal husbandry, fish farming, and beekeeping, provided that this income is spent for the appropriate activities, or
  - as a foreign gratuitous help on conditions stipulated by the President.
- Monetary means or assets received by a taxpayer from its shareholders as their contributions to the statutory capital, not in excess of amounts provided by the statutory documents.

**Foreign income**
Foreign income of Belarusian resident legal entities is taxed, except for dividends, as ordinary business income at the standard 18% CIT rate.

There are no provisions in the tax legislation that allow tax deferral with regard to foreign income.

---

**Deductions**
Deductible expenses include all the usual costs that an entity actually incurs for the purpose of earning income or receiving economic benefit, unless the Tax Code of Belarus or presidential regulations provide otherwise.

**Depreciation**
Assets may be depreciated using the directly proportional (straight-line) depreciation method, indirect disproportionate depreciation method, production depreciation method, or a declining-balance depreciation method. Depreciation may not exceed maximum rates established by the law.

Almost all types of fixed assets (buildings, premises, equipment, vehicles) are depreciated for tax purposes in accordance with the established procedures. Land plots are not depreciated. There are many different depreciation rates established for different types of fixed assets. Generally, fixed assets may be divided into five basic groups, as follows:
Belarus

<table>
<thead>
<tr>
<th>Group of assets</th>
<th>Description of the assets</th>
<th>Annual depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Buildings and constructions, premises</td>
<td>1 and 2</td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>Vehicles and equipment</td>
<td>10</td>
</tr>
<tr>
<td>3</td>
<td>Cars and vehicles</td>
<td>12.5</td>
</tr>
<tr>
<td>4</td>
<td>Inventories (furniture, tools, etc.)</td>
<td>10</td>
</tr>
<tr>
<td>5</td>
<td>Computers and other related devices</td>
<td>20</td>
</tr>
</tbody>
</table>

Application of depreciation premium is possible, i.e. taxpayers are entitled to classify/record part of the initial value of fixed assets and intangible assets as costs of production and supply of goods (works, services) for CIT purposes as of the date when such assets were initially accounted for. The amount of a premium is limited to 10% of the initial value with regard to buildings and constructions and to 20% of the initial value with regard to machines, equipment, vehicles, and intangible assets.

Depreciation premium cannot be applied with regard to fixed assets and intangible assets received by a taxpayer free of charge.

Fixed assets recorded on accounts of state-owned companies are obligatorily re-valued one time per year because of BYR inflation.

Annual re-evaluation of fixed assets for companies other than state-owned companies is required only with regard to buildings, constructions, and transfer units. A particular company is entitled to re-evaluate fixed assets on its own initiative as of 1 January of the year following the reporting one.

**Goodwill**

Goodwill and personnel experience cannot be recognised as intangible assets for CIT purposes.

**Start-up expenses**

Deduction of start-up expenses is possible only after registration of a business presence (i.e. respective resident entity) and starting from the first year of its operations, provided respective provisions for deductions of such expenses are outlined in the accounting policy of that resident entity.

**Interest expenses**

Interest expenses are generally deducted for CIT purposes unless interest is accrued on past-due loans. Moreover, from January 2013, thin capitalisation restrictions have to be considered (see Thin capitalisation in the Group taxation section).

**Bad debt**

Bad debts are deductible only if proved and specific criteria are met.

**Charitable contributions**

Amounts not exceeding 10% of an entity’s gross profit granted to health, education, social welfare, culture, and sports state institutions; religious organisations; and public associations (i.e. ‘Belarusian Society of Disabled Persons’, ‘Belarusian Society of Deaf Persons’, ‘Belarusian Fellowship of Visually Impaired Persons’), or spent for acquisition of goods, works, or services for the benefit of the named institutions, are deductible.
**Taxes**
Generally, the following taxes, dues, and other compulsory charges to the budget are deductible for CIT purposes:

- Excise taxes paid at purchasing/importation of excisable goods to be used in manufacturing of goods or provision of works and services in Belarus, with some exceptions.
- Environmental tax, with certain exceptions.
- Real estate tax, except the tax due on late construction in progress.
- Land tax, with some exceptions.
- Tax on natural resources, with some exceptions.
- State dues.
- Offshore charge.
- Tax on providers.
- Payments for social and other mandatory security.

The following taxes shall not be deducted for CIT purposes:

- VAT paid, with certain exceptions (see below).
- CIT.

VAT can be treated as deductible for CIT purposes only if acquired goods, works, or services are used for production or sale of goods, works, or services that are VAT exempt.

**Other significant items**
Limited deductible expenses also include the following:

- Modernisation and reconstruction of fixed assets. The value of modernisation or reconstruction is included in the acquisition costs.
- Business trips.
- Representation.
- Management fees payable to outsourcing companies, with restrictions.
- Natural losses, with certain exceptions.
- Cost of fuel and energy resources, with restrictions established for certain entities.
- Membership fees, contributions, and premiums, with restrictions.
- Premiums on certain types of voluntary insurance, with restrictions.
- Amounts of financial rebates granted by a supplier to a customer.

Non-deductible expenses also include the following:

- Expenses on provision or acquisition of works and services not related to the taxpayer’s business activities.
- Construction, maintenance, and other works, including all types of repair of assets that are not used for the purpose of earning income or receiving economic benefit.
- Default interest (forfeit), fines, and other sanctions paid to the budget.
- Dividends paid and similar type of payments.
- Contributions made to the authorised share capital.
- Expenses incurred on purchase and/or creation of depreciable assets.
- Depreciation for tangible and intangible assets not used in business, as well as for tangible assets that are not in operation.
- Cost of assets or material rights transferred as advance or a pledge to a third party.
- Expenses covered by reserves for future expenses created by a taxpayer in the prescribed manner.
Belarus

• Interest on overdue loans, as well as on loans related to the acquisition of tangible and intangible assets, other long-term assets.
• Other expenses not related to the deriving of income and not attributed to operating activities of the entity as well as expenses that are not considered as allowable deductions under the Tax Code of Belarus.

Net operating losses
Belarusian companies are given the possibility to recognise in the current tax period the tax losses incurred in the previous tax periods. Taxpayers are entitled to carry forward losses incurred in 2011 and subsequent tax periods. Losses can be carried forward only for ten years after the tax period when the losses have occurred.

However, tax loss carry forward is not applied to losses:

• incurred as a result of activities outside Belarus, if a company is registered as a taxpayer in a foreign state with regard to such activities, or
• incurred in a tax period when a company was entitled to apply CIT relief (tax exemption) established for several tax periods.

Tax losses cannot be carried forward if, following the results of a relevant previous tax period (calendar year), a taxpayer received income (profits), notwithstanding the fact that losses available to be carried forward in line with the Tax Code were actually suffered or not.

Tax losses may not be carried back in Belarus.

Payments to foreign affiliates
Payments to foreign affiliates of a Belarusian resident legal entity in amounts of financing aimed to cover ongoing costs thereof are deductible for CIT purposes in Belarus.

Group taxation
Currently, group taxation legislation and regimes are not available in Belarus. Each Belarusian entity is regarded as a separate taxpayer and may not deduct tax losses of any other group entity. The Belarus Tax Code does not allow the deduction of foreign losses from domestic taxable income or domestic losses from foreign taxable income.

Transfer pricing
Amendments to the Tax Code empower tax authorities to carry out transfer pricing control. Though Belarusian transfer pricing legislation is not as thorough as it is in the European Union (EU) member states, taxpayers should be aware of the following:

• In the course of the tax audit, tax authorities are entitled to check whether prices set by particular taxpayers are in line with market prices.
• Tax authorities can apply the market price of a transaction for taxation purposes in the following cases:
  • Selling of immovable property/real estate when the transaction price is 20% lower than the market price.
  • Entering into a foreign-trade transaction, including one with a related party, when the transaction price (price of a number of transactions with one person per year) is simultaneously higher than BYR 60 billion and 20% lower than the market price.
• The tax base for CIT purposes can be adjusted by the tax authorities on the basis of a market price only if the amount of CIT to be paid to the budget of Belarus goes up as a result of such adjustment.
• To determine the CIT base on the basis of a market price, the tax authorities are entitled to apply the following methods:
  • Comparable uncontrolled price method (CUP).
  • Resale price method.
  • Cost plus method.
• Before the tax audit has been carried out, a taxpayer who applied transaction prices not corresponding to market prices is entitled to independently adjust the CIT base according to market prices and pay the remaining CIT.

Moreover, there is a mechanism to control transfer pricing provided by the DTTs applicable for Belarus. When interests under the loan agreement between related parties exceeds the arm’s-length rate/basis (the amount which will be agreed upon between independent parties under normal business circumstances), a 5% rate of WHT (provided by the DTT) will be charged on the arm’s-length interest charge. Excess amounts, if any, will be taxed by WHT at a 10% rate.

**Thin capitalisation**
Starting from 1 January 2013, the amount of interest accrued on a loan granted to a taxpayer by a foreign company that can be deducted for CIT purposes will be limited if, in aggregate,:

• a foreign company holds over 20% of shares in the statutory capital of a taxpayer or a foreign company and a taxpayer are treated as related parties, and
• the amount of loan exceeds the value of a foreign company’s share in the statutory capital of a taxpayer by more than three times.

---

**Tax credits and incentives**

**Foreign tax credit**
If a Belarusian legal entity derives income subject to taxation abroad, the tax paid abroad may be deducted from the calculated CIT. In accordance with the Tax Code, the amount deducted from CIT may not exceed that part of the tax calculated in Belarus that is attributed to the income received in a foreign jurisdiction. If there is a valid DTT with the country in question, the provisions of the treaty regarding avoidance of double taxation shall apply.

**Special tax treatments**
The Belarusian Tax Code provides a more favourable tax environment for particular resident legal entities. Special tax treatments are available for certain taxpayers depending on their location, amount of revenue, number of individuals employed, types of business, etc. Special tax treatments include, but are not limited to, the following:

• Simplified taxation.
• Tax on farmers and other producers of agricultural products.
• Tax on gambling business.
• Tax on lotteries.
• Tax on electronic interactive games.
• Free economic zones.
Belarus

In cases where activities fulfil the criteria of a special tax treatment, the taxpayer is not permitted to use the general taxation regime with regard to income deriving from those activities, with certain exceptions. Concerning simplified taxation and tax on farmers, the taxpayer is entitled to determine whether to apply such treatment or not.

**Incentive for employing disabled persons**
Entities employing disabled persons, if their number exceeds 50% of the average number of employees for the reporting period, are exempt from CIT due on taxable profit derived from production activity.

**Exemption of CIT on profits derived from various activities**
- Profit of entities engaged in baby food production is exempt from CIT.
- Profit derived by insurance companies from investments of insurance reserves under the contracts of voluntary life insurance is exempt from CIT.
- Entities engaged in manufacturing of prosthetic and orthopaedic devices (including dental prostheses), provision of rehabilitation, and disability services are exempt from CIT due on profit derived from sales of these items.
- Entities deriving profit from sales of plants (except for flowers, ornamental plants), livestock (except for farming), fish farming, and beekeeping, provided the entities raise them, are exempt from CIT.

**Tax holidays**
Profit from the services provided by hotels, sport complexes, ski complexes, touristic complexes, motels, campgrounds, etc. located at tourist sites established by the President of Belarus is exempt from CIT for three years starting from the commencement of its activities, with certain exceptions.

Profit derived by motels, hotels, campgrounds, and maintenance stations located on the roadsides of national highways is exempt from CIT for five years starting from the day when the permission for such activities was received. This privilege does not cover roadside objects located on land plots granted for construction of gasoline stations.

**Scientific and Technological Association incentive**
Entities that are members of the Scientific and Technological Association established by Belarusian State University, in accordance with legislation, are entitled to apply a 5% CIT rate on their profit derived from sales of information technology and provision of information technology development services.

**Incentives for the production of innovative, high-technology goods and laser-optical equipment**
Income derived from selling goods of one’s own production that are included in the list of innovative goods approved by the Council of Ministers is exempt from CIT.

Income from selling goods of one’s own production that are included in the list of high-technology goods approved by the Council of Ministers is exempt from CIT, provided revenue from selling of such goods comprises at least 50% of total revenue of a taxpayer. If revenue from selling high-technology goods is less than 50% of total revenue, such income is taxable at a reduced CIT rate of 10%.

Entities engaged in production of laser-optical equipment, accounting for at least 50% of the entity’s total production, can benefit from a reduced CIT rate of 10% under certain conditions.
**Free economic zones**
Entities that are registered in Belarusian free economic zones are exempt from CIT for five years, starting from the date when the profits were declared, in relation to goods, works, and services of their own production that are either exported or included in the list of import-substituting goods and supplied in Belarus. After expiration of this term, the CIT rate is 9%.

Land plots within the borders of free economic zones, provided to free economic zone residents registered after 1 January 2012 for the purpose of objects construction, are exempt from land tax for the period of such objects' design and construction, but not more than for five years from the registration date. Free economic zone residents registered before 1 January 2012 can take advantage of this land tax exemption only during the period from 1 January 2017 till 1 January 2022, as long as design and/or construction works are performed.

Moreover, residents of free economic zones are granted, under certain conditions, a partial VAT relief and a relief for real estate tax on buildings and constructions located in free economic zones.

**High Technologies Park (HTP)**
The following tax privileges are granted to residents of the HTP:

- Full exemption from CIT.
- Full exemption from VAT when selling goods, works, or services in the territory of Belarus.
- Full exemption from VAT and customs duties when importing certain goods for the purpose of using them in activities connected with high technology.
- No land tax is applicable to land plots situated in the HTP on which a construction project is being carried out; however, this exemption will last no longer than three years.
- Full exemption from real estate tax on buildings and installations, including above-standard incomplete constructions that are situated in the territory of the HTP.
- 9% personal income tax (PIT) for employees of residents of the HTP.
- No social security contributions on the part of employees’ income exceeding the average salary in Belarus.

**Taxation of holding companies**
A holding company is a group of companies where one company of the group is considered to be a management company by virtue of influence over decisions passed by other group companies (i.e. the subsidiaries) as a result of holding 25% or more of their ordinary stock (shares).

A management company is entitled to create a centralised fund by means of contributions of subsidiaries from net income thereof. Subject to certain conditions, monetary means received by a management company (Belarusian tax resident) from subsidiaries (Belarusian tax residents) for the purpose of a centralised fund formation, as well as monetary means transferred from a centralised fund to subsidiaries, are not considered taxable income for CIT purposes.

Free of charge transfer of assets within a qualifying holding group is exempted from CIT in Belarus, conditional on certain terms, in particular:

- A management company possesses more than 50% of shares (stock) of its subsidiaries receiving or transferring assets.
Belarus

- Participants of a holding group receiving or transferring assets are not under special tax treatment and are not registered in any free economic zone.
- Participants of a holding group receiving or transferring assets do not participate in securities market and do not manufacture alcoholic and tobacco products; they are not banks, non-bank financial intermediaries, or insurance companies.
- Received assets are used to manufacture products, to perform works, and to render services.

**Withholding taxes**

The following income of a non-resident entity in Belarus that is not derived through a PE is deemed to be Belarusian-source income and is subject to WHT at the rates provided:

<table>
<thead>
<tr>

</tr>
<tr>
<td>Income derived from provision of works and services</td>
<td>15</td>
</tr>
</tbody>
</table>

In calculation of WHT due on certain types of income, a taxpayer is permitted to deduct related expenses following the rules specified by the Tax Code.

Generally, the tax is withheld and paid to the budget by a local entity, an individual entrepreneur, a branch, or a PE of a foreign company. When certain types of Belarusian-source income is received (e.g. capital gains, sale, transfer of title of ownership or lease of immovable property, provision of licenses for software, and other copyright objects), a WHT shall be paid directly by a foreign entity.

Currently, Belarus has over 60 DTTs with foreign countries. Where a treaty for the avoidance of double taxation with the country in question contradicts the local tax regulations, the treaty provisions prevail.
Reduction of or an exemption from WHT under a DTT may be obtained if a special residence certificate is completed and provided to the tax authorities before the payment is made.

If the payment that is covered by the DTT has already been made and WHT at the local rate was withheld, it is possible to obtain an appropriate refund (reduction) by completing a special claim for a refund. The claim for a refund must be filed with additional documents, such as a residence certificate, copies of the contract, and other documents related to the payment.

The following table indicates WHT rates stipulated in DTTs Belarus is a party to:

* In general, a 0% tax rate applies to interest payments to the governments of contracting states and to payments guaranteed by the governments of contracting states.

** DTT with this country is in force since Belarus is a successor of the former USSR.

### Tax Administration

#### Taxable Period
The taxable period for CIT is a calendar year. The taxable period for CIT withheld on dividends accrued by Belarusian companies is a month.

#### Tax Returns
A CIT return shall be submitted on an annual basis, whether a company has taxable income or not, by the 20th day of March following the reporting year.

The above CIT reporting rule is also applicable on PEs of foreign companies as well as non-commercial representative offices.

CIT withheld on inter-company dividends must be reported by a tax withholding entity no later than the 20th day of the month following the month in which the dividends were accrued.

A tax-withholding entity must submit a WHT return to the tax authorities no later than the 20th day of the month following the month when the payment was made.

#### Payment of Tax
CIT must be paid via equal instalments, on a quarterly basis, before 22 April, 22 June, 22 September, and 22 December of a current tax period.
Belarus

Remaining CIT, if any, shall be paid not later than 22 March following the expired tax period. The above deadlines shall also be followed by PEs of foreign entities.

CIT on inter-company dividends shall be paid no later than the 22nd day of the month following the month when dividends were paid.

WHT is to be calculated, withheld, and paid by a Belarusian company or a PE of a non-resident company no later than the 22nd day of the month following the month when the payment was made.

**Tax audit process**
Subject to certain exceptions, tax authorities are not permitted to carry out scheduled audits within two years after the company’s incorporation or representative office’s (of a foreign company) registration. Subsequently, scheduled audits can be performed every one, three, or five years, depending on whether a company is referred to as high-risk, middle-risk, or low-risk.

Tax authorities can perform off-schedule audits only on the grounds defined in legislation (e.g. reorganisation or liquidation of a taxpayer, information about tax violations).

**Statute of limitations**
Generally, the statute of limitations for tax liability is either three years after the date when violation was committed or six months after the date when violation was exposed by tax authorities.

**Topics of focus for tax authorities**
Below are the main areas that the tax authorities usually monitor in Belarus:

- Application of CIT incentives.
- CIT treatment of overdue loans and recognition of accounts payable above the statute of limitations.
- Proper justification of deductible marketing, consulting, and other similar costs for CIT purposes.
- VAT deductions and relevant justification thereof.
- Tax treatment of reorganisations, mergers, and spin-offs.
- Tax treatment of related party transactions.
- Tax treatment of charitable and other similar donations.

---

**Significant developments**

Recently, various new Belgian tax measures were proposed. Some of them are enacted into law and others will be enacted shortly.

**Professional withholding tax (WHT) exemption for qualifying researchers**

Currently, companies can benefit from a 75% professional WHT exemption for qualifying researchers, provided that certain conditions are met.

It is proposed that this regime will be modified as follows:

- The percentage of partial exemption of remittance of WHT will be raised to 80% (it is expected that the law will be voted and published in the course of June 2013, in which case the 80% exemption would be applicable as from 1 July 2013).
- A definition of ‘scientific research’ will be laid down in the law based on European Community (EC) Commission regulation 800/2008, which would include fundamental research, industrial research, and experimental research (these definitions correspond with the international criteria already applied by the Belgian ruling commission).
- A reporting obligation is introduced for ‘new’ research and development (R&D) programs with the Federal Administration for Scientific Policy (Federale overheidsdienst Wetenschapsbeleid/ Service public fédéral Politique Scientifique), which has to approve or reject the request for application.

In the draft bill, it is stated that ‘new’ research projects should comply with the aforementioned definition of scientific research and the reporting obligation as from 1 January 2014. Existing research projects should only comply with the definition of scientific research also as from 1 January 2014 and need to be reported as from 1 January 2015.

**Notional interest deduction (NID)**

Belgian corporate income taxpayers can claim NID for tax purposes, reflecting the economic cost of the use of capital (based on the cost of long-term, risk-free financing). The effective NID rate for tax year 2014 (i.e. accounting years ending between 31 December 2013 and 30 December 2014, both dates inclusive) is announced to be 2.742% (3.242% for small and medium-sized enterprises [SMEs], see the Tax credits and incentives section for the definition), which is based on the average rate of the Belgian (ten year) state bonds of July, August, and September of the previous year(s).
Belgium

**Capital gains on shares**
As of tax year 2014 (i.e. accounting years ending as of 31 December 2013), capital gains on shares are subject to a 0.412% tax (i.e. 0.4% plus 3% additional crisis surcharge). The rules for the calculation of the capital gain remain unchanged. Carried forward tax losses (and other tax assets) or capital losses on shares cannot be offset against this 0.412% taxation. This rule is only applicable to large companies (and not to SMEs).

**WHT measures**

**Dividend, interest, and royalty WHT**
As of 1 January 2013, a uniform WHT rate of 25% on interest, dividends, and royalties is applicable. However, there are some exceptions.

The numerous WHT exemptions (specifically for payments to companies) are not affected.

**Liquidation bonus**
Currently, the WHT rate on dividend distributions resulting from the liquidation of a company (liquidation bonus) is 10%. It is proposed by the Belgian government to increase the rate from 10% to 25% as of 1 October 2014. Until then, companies may limit this 25% WHT to (the currently applicable) 10% by converting their reserves into capital. The details are still unknown.

**Payments made to non-residents**
As of 1 March 2013, certain income attributed by a Belgian tax resident to a non-resident is, in principle, to be withheld by the debtor of the income at an effective tax rate of 16.5% (33% of the gross income minus lump-sum cost of 50%).

Which income is effectively in scope of the measures will be published via administrative guidelines issued by the Belgian tax authorities (e.g. technical service fees would be in the scope).

**Permanent establishments (PEs)**
As of 1 January 2013, the following situations are included in the Belgian domestic definition of a PE:

- A foreign company if, for the same or related projects, it carries out services in Belgium through one or more individuals (that are present in Belgium) for, in total, more than 30 days during any 12-month period.
- Splitting contracts and dividing them over the various group companies will no longer be possible to avoid having a PE in Belgium, as the duration of the project will be counted at group level. This anti-abuse measure will not be applicable if the taxpayer can prove that the provision of similar services by different group companies is justified by other reasons than to avoid the presence of a PE in Belgium.

**Value-added tax (VAT) developments**
See the Other taxes section for more detailed information on the following VAT developments.

**Company cars**
Input VAT related to company cars will be subject to a VAT limitation of minimum 50% according to the professional use of the company car.
Import deferral licence
As of 1 October 2012, in order to obtain the import deferral licence, the payment of a ‘guarantee’ is no longer required.

Chargeable event
As of 1 January 2013, in principle, VAT is due on the supply of goods or services at the time the supply is performed or the services are rendered. If before this moment a payment is received, VAT becomes due as from the receipt of the price or a part of the price.

Taxes on corporate income

Corporate income tax (CIT)
In general, the tax base for CIT purposes is determined on an accrual basis and consists of worldwide income less allowed deductions. The rules are equally applicable to companies and PEs. It is assumed that all income received by a company is, in principle, business income. The income tax base is based on the Belgian Generally Accepted Accounting Principles (GAAP) financial statements of the company.

General rate
CIT is levied at a rate of 33% plus 3% crisis tax, which is a surtax, implying an effective rate of 33.99%. This rate applies to both Belgian companies (subject to Belgian CIT) and Belgian branches of foreign companies (subject to Belgian non-resident CIT). Capital gains on shares realised without meeting the one year holding requirement are taxed at 25.75% (25% plus 3% crisis tax), provided certain conditions are met (and at 0.412% in case this one year holding period and certain other conditions are met).

Reduced rates
A progressive scale of reduced rates applies to taxpayers with lower amounts of taxable income. If the taxable income is lower than 322,500 euros (EUR), the following rates apply (including the 3% crisis tax):

<table>
<thead>
<tr>
<th>Taxable income (EUR)</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 25,000</td>
<td>24.98</td>
</tr>
<tr>
<td>25,001 to 90,000</td>
<td>31.93</td>
</tr>
<tr>
<td>90,001 to 322,500</td>
<td>35.54</td>
</tr>
</tbody>
</table>

Even if their taxable income does not exceed the aforesaid ceilings, certain companies are excluded from the reduced rate and always subject to the normal CIT rate. These companies include, amongst others, companies that are owned 50% or more by one or more companies.

Surcharge
A surcharge is due on the final CIT amount upon assessment (including the crisis surtax). The surcharge can be avoided if sufficient advance tax payments are made (see Payment of tax in the Tax administration section for more information). For tax year 2014 (i.e. accounting years ending between 31 December 2013 and 30 December 2014, both dates inclusive), the surcharge is 2.25%.
Secret commissions tax
A special assessment of 309% (300% plus 3% crisis tax) is applicable to so-called ‘secret commissions’, which are any expense of which the beneficiary is not identified properly by means of proper forms timely filed with the Belgian tax authorities. These expenses consist of:

- Commission, brokerage, trade, or other rebates, occasional or non-occasional fees, bonuses, or benefits in kind forming professional income for the beneficiaries.
- Remuneration or similar indemnities paid to personnel members or former personnel members of the paying company.
- Lump-sum allowances granted to personnel members in order to cover costs proper to the paying company.

The secret commissions tax is not applicable if the payer demonstrates that the payments have been reported in the beneficiary’s Belgian tax return. The 309% rate is also applicable to hidden profits that are not part of the property of the company, with the exception of certain specific hidden reserves. The special assessment of 309% and the expenses themselves are, however, fully deductible for CIT purposes.

A second escape method from the 309% separate assessment has been proposed. In case the recipient of the benefit agrees to include the non-reported benefit in a tax assessment of the beneficiary and with the agreement of the beneficiary within the normal assessment period of three years, no 309% is applicable. However, the expense will not be deductible in the hands of the company granting the benefit.

Important to note is that as of mid-2012, there is a strict(er) application of the secret commissions tax by the Belgian tax authorities.

Taxable income of non-residents
As of 1 March 2013, certain income attributed by a Belgian tax resident to a non-resident is taxable in Belgium. A new paragraph is added to the Belgian Income Tax Code that functions as a ‘catch all clause’ to tax certain payments made to a non-resident of Belgium.

Which income is specifically taxed via this ‘catch all clause’ will be published via administrative guidelines issued by the Belgian tax authorities (e.g. technical service fees would be in the scope).

Local income taxes
No tax is levied on income at the regional or local level. Note that immovable assets (land, building, and possibly machinery and equipment) situated within the Belgian territory are, in principle, subject to an immovable WHT that is levied locally.

Corporate residence
A company is considered to be a resident of Belgium for tax purposes if it has its registered office, its principal place of business, or its seat of management in Belgium. The seat of management has been defined by Belgian case law as the place from where directing impulsions emanate or the place where the company’s effective management and central administration abide, meaning the place where the corporate decision-making process actually takes place.
Permanent establishment (PE)
The definition of a Belgian establishment under Belgian domestic tax law corresponds, but is broader than, the definition of a PE under either the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention (OECD MC) or Belgium's double tax treaties (DTTs). Since the latter prevail over domestic law, Belgium generally cannot levy tax if a non-resident has a Belgian establishment that does not constitute a PE under the relevant DTT. Although Belgium would not be entitled to tax the profit attributable to the Belgian establishment in such a case, the foreign company should still abide by certain formal tax requirements (e.g. filing a non-resident tax return, responding to requests for information).

Other taxes

Value-added tax (VAT)
Scope of VAT
The following transactions are subject to VAT in Belgium:

- The supply of goods effected for consideration by a taxable person acting as such.
- The supply of services effected for consideration by a taxable person acting as such.
- The importation of goods.
- Intra-Community acquisition of goods for consideration by a taxable person acting as such or by a non-taxable legal person (including the transfer of assets).
- The self-supply by a taxable person.

Intra-Community supply and intra-Community acquisitions
An intra-Community supply of goods is a supply of goods whereby the goods are moving from one European Union (EU) member state to another EU member state. In the member state of departure of the goods, the goods can be, under certain conditions, VAT exempt. As a result, the intra-Community acquisition of the goods (i.e. the arrival of the goods in the other member state) will be taxable.

Standard and other VAT rates
The standard VAT rate is 21%. This rate applies to all goods and services not qualifying for one of the reduced VAT rates.

The following supplies of goods and services have a 12% VAT rate:

- Restaurant and catering services, excluding beverages.
- Phytopharmaceutical products.
- (Inner) tubes.
- Certain combustible material.
- Margarine.
- Social housing and certain renovation works on immovable property.

The following supplies of goods and services have a 6% VAT rate:

- Works on immovable property (limited in time and with strict conditions).
- Basic necessities, such as food and pharmaceuticals.
- Some printed materials.
- Transport services of persons.
- Hotels and camping.
- Use of cultural, sporting, and entertainment venues.
Belgium

- Works of art, antiques, and collector’s items.
- Supplies of cars for the disabled, as well as equipment and accessories for such cars.
- Supplies of certain devices for therapeutical use.
- Contract farming.
- Repair of bicycles, shoes and leather goods, clothing, and household linen.
- Some housing for private use, for the disabled, and in the social sector.
- Royalties.
- Concerts and exhibitions.
- Some medical equipment.
- Goods and services supplied by social organisations.

The following supplies of goods and services are VAT exempt with credit (‘zero-rated’):

- Exports and certain related services.
- Intra-Community supplies of goods and certain related services.
- Certain transactions on goods placed in a Customs or VAT warehouse.
- Cross-border passenger transportation by ship or aircraft.
- Supplies to diplomats and international organisations.
- Certain supplies of goods and services to certain vessels and aircraft mainly involved in international passenger transport.
- Certain newspapers, journals, and magazines.
- Supply of recovered goods or products.

The following supplies of goods and services are VAT exempt without credit:

- Healthcare services.
- Social services.
- Education services.
- Sport services.
- Cultural services.
- Services of lawyers (up to 31 December 2013; as from 1 January 2014, services of lawyers will be subject to VAT).
- Banking services.
- Interest charges.
- Financial services.
- Insurance services.
- Land and real estate sales.
- Property leasing and letting.

It should be noted that specific conditions may apply to the above two categories.

**VAT grouping**

Under a VAT group, independent legal persons are treated as one single taxable person for VAT purposes if they are closely linked financially, economically, and organisationally. Hence, for VAT purposes, all supplies of goods and services to or by the group members are deemed to be made to or by the group itself.

The application of a VAT group has, amongst other, the following consequences:

- No issuance of ‘inter-company’ invoices between companies in the VAT group.
- No charging of VAT between companies in the VAT group.
- Filing of one VAT return for all companies in the VAT group.
- No risks of incorrect VAT treatment of transactions between companies in the VAT group.
• No cascade of the limitation of the right to deduct VAT when on charging costs to companies in the VAT group.

Company cars
The input VAT on investment goods (e.g. company cars, immovable property) that are part of the business assets of a VATable person and that are used for professional and other purposes needs to be deducted immediately following the professional use of the asset (instead of an immediate deduction of the input VAT at the moment of purchase followed by a correction later on of this deduction through the application of a benefit in kind subject to VAT).

As of January 2011, these rules became applicable for immovable property. However, for movable assets, the ‘final’ administrative decision explaining the practical implementation of the rules for determining the ratio of professional/private use for movable assets (e.g. company cars), was only published in December 2012 due to practical difficulties. In the course of 2013, an addendum is expected with additional explanation.

In a nutshell, under the new rules as mentioned above, input VAT related to company cars in Belgium is subject to a VAT limitation of minimum 50% following the professional use of the company car.

The new administrative decision contains the different methods (i.e. logbook to register professional use, a lump-sum based upon home/work distance, and a general lump-sum calculation method) to determine the private/professional use of the company car, the rules to calculate the tax base in case a company car is sold, and the rules applicable in case of mixed use of other capital goods (e.g. mobile phones, tablets, laptops).

Import deferral licence
Belgian Royal Decree no. 7 establishes a system whereby the payment of VAT due on importation of goods can be shifted to the periodic VAT return. Because it is no longer necessary to pay the VAT to the Customs Authorities, companies do not have to finance the period between when the VAT is due (moment of importation) and when the VAT can be deducted.

Before 1 October 2012, in order to be able to benefit from this system, taxable persons had to request an import deferral licence and pay a ‘guarantee’ amount up-front that was 1/24th of the import VAT due (subject to annual revision). However, as of 1 October 2012, the payment of this ‘guarantee’ is no longer required.

E-invoicing and chargeable event
As of 1 January 2013, new rules with respect to (e-) invoices have been implemented. As a result of these changes, paper and e-invoices are to be treated equally. Amongst others, the changes include:

• An implicit acceptance procedure of e-invoices by customers.
• That the authenticity and integrity of the content and legibility of the invoice can be guaranteed by all business controls, which create a reliable audit trail between the invoice and a supply of goods/services.
• An implicit acceptance procedure for self-billing.

Next to that, the issuance of an invoice is no longer a chargeable event. VAT becomes due and the taxable event (tax point) takes place at the moment the supply of the
Belgium

good occurred or the service has been completed. If before this tax point a payment is received, VAT becomes due as from the receipt of the price or a part of the price.

For the supply of goods and services provided by a taxpayer who regularly supply goods or services to individuals/private persons where one is not obligated to issue an invoice (i.e. cash accounting), VAT will become due at the moment of the receipt of the money.

As these rules could cause significant problems, particularly for advance invoices, a (optional) transitional period has been foreseen. During this period, in case advance invoices are issued that do mention VAT, it is allowed to pay the VAT to the authorities and correspondingly to deduct the VAT upon issuance of the advance invoice (instead of linking it to the payment).

**Import duties**
Goods coming from outside the European Union and imported into Belgium are subject to import duties. Import duties are calculated based on three main elements:

**Classification**
All products are classified based on the rules laid down in the Combined Nomenclature (CN). A single commodity code (CN-code) applies for every product. An import duty rate is linked to every CN-code.

**Origin**
Based on international trade agreements, a preferential import duty rate (read: a lower import duty rate) may apply to products imported in the European Union meeting the origin criteria in the country participating in the agreement.

**Valuation**
The customs value is determined based on one of the six rules laid down in the Community Customs Code. These valuation rules are harmonised on a global level through the General Agreement on Tariffs and Trade (GATT) valuation agreement.

Various economic customs regimes are available allowing optimisation schemes throughout the supply chain.

**Excise duties**
Excise products are divided into the following two groups:

- Community excise products: These are defined as excise products at the EU-level, and the same procedures should apply in all EU member states. Products in scope are (i) alcohol, (ii) alcoholic beverages, (iii) energy products, and (iv) manufactured tobacco.
- National excise products: These are defined by the individual countries. Specific Belgian legislation applies to the national excise products, which are (i) non-alcoholic beverages and (ii) coffee.

The excise duty rates for Community and national excise products are fixed at the national level and vary and change regularly. Excise legislation includes compliance.

The Act of 27 December 2012 introduced an increase of the excise duties on tobacco and alcohol.
Property taxes
Immovable property is subject to an immovable WHT (also called ‘real estate tax’) due on a yearly basis. This tax is calculated in function of the so-called ‘cadastral income’ of the property (a kind of ‘deemed’ rental income). The deemed rental income constitutes the average normal net income of one year (based on rental income of 1976). This means that the deemed rental income can be considered as a presumed income, which generally will not match the actual income.

The tax rate depends on where the property is located (as it is a combination of regional, provincial, and communal tax).

Machinery and equipment can also be considered as immovable property in certain cases.

Registration duties
Purchases and transfers of real estate located in Belgium, including buildings (except new buildings, which are subject to VAT as described above), are subject to registration duty at the rate of 12.5% of the higher of transfer price or fair market value (except in the Flemish Region, where the applicable rate is 10%).

In cases where the purchase or transfer of land is subject to VAT, no registration duties will be charged on the purchase or transfer.

In principle, no registration duty is due upon a capital contribution; only a fixed fee of EUR 25 is due (it is proposed in draft law to increase the fixed fee to EUR 50).

Stamp duties
Stamp duties are due on transactions relating to public funds that are concluded or executed in Belgium, irrespective of their (Belgian or foreign) origin, to the extent that a professional intermediary intervenes in these transactions. Exemptions for non-residents and others are available.

Social security taxes
The employer’s share of social security taxes is around 30% of the total gross compensation; the employee’s share is 13.07%. Social security taxes are deductible in determining taxable income. For foreign employees with short-term assignments in Belgium who continue to be subject to the social security schemes of their home country, an exemption from social security may be granted, depending on the nationality of the claimant.

Branch income
Branch profits are subject to the normal tax rate for Belgian corporations of 33.99% (or 25.75% for certain capital gains on shares not meeting the one-year holding period or 0.412% for those capital gains meeting the one-year holding period) plus the possible surcharge for absence/insufficiency of advance payments (see the Taxes on corporate income section). Transfers of branch profits to the head office abroad do not give rise to further taxation in Belgium. Branches can benefit from the reduced CIT rates under specific conditions (see the Taxes on corporate income section).

Capital gains realised on real estate located in Belgium by non-resident companies are subject to a professional WHT at the normal CIT rate of 33.99%. The professional WHT
Belgium

is, in fact, an advance payment of the final Belgian non-resident CIT and can be offset against it. Any balance is refundable.

In general, taxable basis is the difference between the profits actually realised and the tax-deductible costs actually incurred in the hands of the Belgian branch as determined from the separate set of accounts of the Belgian branch. Please note, however, that no legal requirement exists to keep a separate set of accounts in the hands of the PE, in case no legal branch is deemed to exist in Belgium.

Should no separate set of accounts be kept, the taxable basis in the hands of the Belgian branch, in principle, will be determined on the basis of the Royal Decree implementing the Belgian Income Tax Code (BITC). As a result, the yearly taxable basis will be determined on 10% of the gross turnover realised in Belgium with a minimum of EUR 7,000 per employee (the minima vary between EUR 7,000 and EUR 24,000, depending on the kind of business) and an absolute minimum of EUR 19,000. Note that such determination of the taxable basis is often formalised in a written agreement with the local Belgian tax inspector without deviating from the tax law criteria as mentioned.

**Income determination**

**Inventory valuation**
Belgian accounting law provides for the following four methods of inventory valuation: the method based on the individualisation of the price of each item, the method based on the weighted average prices, the last in first out (LIFO) method, and the first in first out (FIFO) method. All of these methods are accepted for tax purposes.

**Capital gains**
Capital gains are subject to the normal CIT rate. For tax purposes, a capital gain is defined as the positive difference between the sale price less the costs related to the disposal of the asset and the original cost of the acquisition or investment less the deprecations and write-offs that have been deducted for tax purposes.

Capital gains realised on tangible fixed assets and intangible assets could be subject to a deferred and spread taxation regime, provided that the following conditions are cumulatively met:

- The assets realised had been held by the company for more than five years, and deprecations had been claimed on them for tax purposes.
- The proceeds of the transfer were reinvested fully in tangible or intangible assets subject to depreciation in Belgium within three years (or five years in the case of reinvestments in buildings, vessels, or aircrafts).

If the above conditions are met, the taxation of the net capital gain is spread over the depreciation period allowed for tax purposes of the asset that was acquired to fulfil the reinvestment obligation. Deferred and spread taxation occur at the normal CIT rate.

**Capital gains on shares**
Net capital gains realised by a large Belgian company (or Belgian branch) on shares are subject to a 0.412% tax, provided the subject to tax condition and the one-year holding period are met. As such, the 0.412% tax is not applicable to SMEs. This newly implemented measure is effective as of tax year 2014 (i.e. accounting years ending as of 31 December 2013).
Preceding tax year 2014, net capital gains on shares were 100% tax exempt if dividends from such shares met the ‘taxation conditions’ under the dividends-received deduction regime (see the Deductions section for more information) and if a minimum holding period of an uninterrupted period of one year in full ownership was reached.

If the capital gain was realised before the minimum holding period of one year was reached and the subject to tax condition was met, the capital gain was taxed at a rate of 25.75% (25% plus a 3% crisis tax). There were some exceptions (e.g. for financial institutions).

**Dividend income**

Dividends received by a Belgian company are first included in its taxable basis on a gross basis when the dividends are received from a Belgian company or on a net basis (i.e. after deduction of the foreign WHT) when they are received from a foreign company.

Provided certain conditions are met, 95% of the dividend income can be offset by a dividends-received deduction (DRD).

**Dividends-received deduction (DRD)**

A DRD of 95% of dividend income can be applied under certain conditions (see below). Any unused portion of the DRD from dividends received from a European Economic Area (EEA) subsidiary or a subsidiary from a country with which Belgium has concluded a DTT with a non-discrimination clause on dividends can be carried forward to future tax years. The possibility of carrying forward the unused portion of DRD from qualifying non-EEA dividends has not been codified, but should continue to apply based on an October 2009 practice note. The same also applies for dividends from Belgian subsidiaries.

The DRD is subject to a (i) minimum participation condition and (ii) taxation condition.

**Minimum participation condition**

According to the minimum participation condition, the recipient company must have, at the moment of attribution, a participation of at least 10% or an acquisition value of at least EUR 2.5 million in the capital of the distributing company. The beneficiary of the dividend must have been holding the full legal ownership of the underlying shares for at least one year prior to the dividend distribution or commit to hold it for a minimum of one year.

**Taxation condition**

The taxation condition, in summary, means that the dividend income received must have been subject to tax at the level of the distributing company and its subsidiaries if the former redistributes dividends received.

The taxation condition is based on five ‘exclusion’ rules and certain exceptions to these rules. Basically, the exclusion rules apply to the following:

- Tax haven companies, which are companies that are not subject to Belgian CIT (or to a similar foreign tax) or that are established in a country where the common taxation system is notably more advantageous than in Belgium. Countries in which the minimum level of (nominal or effective) taxation is below 15% qualify as tax havens for the application of the regime (a list of tainted countries has been published). The common tax regimes applicable to companies residing in the
Belgium

European Union are, however, deemed not to be notably more advantageous than in Belgium.

- Finance, treasury, or investment companies that, although are subject in their country of tax residency to a taxation system similar to that of Belgium as mentioned in the item above, nevertheless benefit from a taxation system that deviates from the one commonly applicable.
- Offshore companies, which are companies receiving income (other than dividend income) that originates outside their country of tax residency and in these countries such income is subject to a separate taxation system that deviates substantially from the common taxation system.
- Companies having branches that benefit globally from a taxation system notably more advantageous than the Belgian non-resident corporate taxation system. This exclusion is deemed not applicable to EU companies with an EU branch.
- Intermediary holding companies, which are companies (with the exception of investment companies) that redistribute dividend-received income, which on the basis of regulations mentioned under the items above would not qualify for the DRD for at least 90% of its amount in case of direct holding.

While this is a summary of the major exceptions, numerous exceptions to these exclusion rules exist and need to be analysed on a case-by-case basis.

**Bonus shares (stock dividends)**
Distribution of bonus shares to shareholders in compensation for an increase of the share capital by incorporation of existing reserves is, in principle, tax free. The situation may be different if the shareholder has the choice between a cash or stock dividend.

**Interest, rents, and royalties**
Interest that accrued, became receivable by, or was received by a company, and rents and royalties received by a company, are characterised as business profits and taxed at the general CIT rate of 33.99%. The income can be offset against available tax assets.

**Foreign income**
A Belgian resident company is subject to CIT on its worldwide income, and foreign-source profits not exempt from taxation by virtue of a DTT (see the treaty list in the Withholding taxes section) are taxable at the normal CIT rate in Belgium (i.e. 33.99%, or 25.75% for certain capital gains).

A foreign tax credit may be available for foreign royalty income and foreign interest income. See the Tax credits and incentives section for more information.

Undistributed income of subsidiaries, whether or not they are foreign, is not subject to any Belgian income tax (i.e. no controlled foreign company [CFC] rules).

**Deductions**
As a general rule, expenses are tax deductible in Belgium if they are incurred in order to maintain or to increase taxable income, they relate to the taxpayer's business activity, they are incurred or have accrued during the taxable period concerned, and evidence of the reality and the amount of such expenses is provided by the taxpayer.

**Depreciation and amortisation**
Depreciation of an asset is tax deductible to the extent that it results from a devaluation of the asset, and the devaluation effectively occurred during the taxable period.
Belgium

The depreciation methods that are accepted by Belgian tax law are the straight-line method (linear method) and the double-declining balance method. In the latter case, the annual depreciation may not exceed 40% of the acquisition value. The double-declining method may not be used for intangible fixed assets, automobiles, minibuses and automobiles used for mixed purposes, and for assets, the use of which has been transferred to a third party (e.g. in the case of operational leasing).

Depreciation rates are based on the estimated lifetime of the assets concerned, which are normally agreed upon by the taxpayer with the tax authorities. However, for certain assets, rates are set by administrative instructions as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial buildings</td>
<td>3</td>
</tr>
<tr>
<td>Industrial buildings</td>
<td>5</td>
</tr>
<tr>
<td>Machinery and equipment (depending on the type)</td>
<td>20 or 33</td>
</tr>
<tr>
<td>Rolling stock</td>
<td>20</td>
</tr>
</tbody>
</table>

Intangible fixed assets have to be amortised over a period of at least five years for tax purposes (except R&D expenses, for which the minimum amortisation period is three years).

For the year of acquisition of an asset, only the proportionate share of an annual depreciation calculation can be accepted as depreciation for income tax purposes (in principle to be computed on a daily basis). This provision, however, applies only to companies that cannot be considered as SMEs (see the Tax credits and incentives section for the definition). In contrast, SMEs can deduct a full year of depreciation in the year of acquisition.

Ancillary expenses incurred at the time of acquisition must be depreciated in the same way as the asset to which they relate (i.e. no full deduction in the year of acquisition, except for SMEs). Alternatively, ancillary expenses relating to the acquisition of land can be written down and such write-downs, if they are justified, may constitute a deductible expense.

**Goodwill**

Belgian accounting and tax laws allow amortisation of goodwill arising at the occasion of an asset deal. For Belgian tax purposes, the amortisation period, which depends on the elements included in the goodwill, is a minimum of five years, and the straight-line method must be applied. According to the Minister of Finance, ‘clientele’ (client lists) should be amortised over a period of ten to 12 years. The aforesaid accounting and tax amortisation for goodwill is not available in the case of mergers or de-mergers that occur tax free (i.e. they, among other things, follow the continuity principle from an accounting perspective).

**Start-up expenses**

Incorporation costs, at the election of the taxpayer, may be deducted fully in the year of incorporation or can be depreciated over a maximum period of five years.

**Interest expenses**

Interest paid is not tax deductible to the extent that it exceeds an amount corresponding to the market rate, taking into account factual circumstances proper to the appraisal of the risk linked to the operation and, particularly, the financial situation of the debtor.
Belgium

and the duration of the loan. The latter test, however, is not applied with respect to interest paid to a financial institution based in the European Economic Area.

**Provisions and bad debt reserves**
Provisions and bad debt reserves are tax deductible provided that:

- they are set up to cover clearly identified losses and charges (i.e. not to cover ‘general’ risks that have been rendered probable by events) that took place during the taxable period concerned
- they are booked at the end of the financial year in one or more separate accounts on the balance sheet
- they are reported on a specific form enclosed with the tax return, and
- they relate to losses and charges that are deductible for Belgian tax purposes.

**Charitable contributions**
Charitable contributions may not be less than EUR 40 and may not exceed 5% of the total net income of the taxable period, with a maximum of EUR 500,000 to be tax deductible. The law includes an exhaustive list of gifts that are deductible, including gifts in cash to certain social, cultural, or scientific organisations. Gifts to other organisations are deductible if approved by a Royal Decree or by (mediation of) the Minister of the Federal Public Service of Finance.

**Automobile costs**
The deductibility rate of automobile costs in the hands of Belgian companies (and Belgian branches) varies in a range between 50% and 120% of the automobile costs, depending on the CO2 emission of the automobile.

Moreover, the deduction for fuel costs is limited to 75%.

An additional disallowed expense is 17% of the benefit in kind (of the company car in the hands of the beneficiary of the company car). This additional disallowed expense cannot be offset against the NID, tax losses, or other tax deductions. Thus, the disallowed expense results in a minimum tax base.

**Taxes, fines, and penalties**
Belgian resident and non-resident CIT, including advance tax payments, any surcharge imposed in case of insufficient advance tax payments, any interest for late payment of the CIT, and any Belgian movable WHT, is not tax deductible in Belgium. Immovable WHT (i.e. real estate tax), secret commissions tax, and foreign taxes, however, are considered as tax deductible.

Regional taxes and contributions, including penalties, increases, ancillary expenses, and interest for late payment, are not tax deductible in Belgium (certain exceptions apply).

Any administrative and judicial fines or penalties (except for VAT proportionate fines) are not tax deductible in Belgium.

**Disallowed expenses**
The following expenses are not tax deductible in Belgium (this list is not exhaustive):

- 31% of restaurant expenses.
- 50% of representation expenses and business gifts (there are exceptions).
• Advantages granted to employees for social reasons, with certain exceptions (e.g. hospitalisation insurance premiums, gifts of a small value).
• Capital losses on shares (except in the case of liquidation, up to the amount of paid-up capital of the liquidated company).
• Brokerage, commissions, commercial discounts, or other payments allocated directly or indirectly to a person in the form of a Belgian public bribery.
• 17% of the benefit in kind of company cars.

Net operating losses

Principle: carryforward without limitation in time
Tax losses can, in principle, be carried forward without any limitation in time.

Change of control
In case of change in control of a Belgian company (e.g. if the shares of the company are transferred and along with them the majority of the voting rights), the amount of tax losses and NID carried forward available in that company (before the change of control) can no longer be offset against future profits unless the change can be justified by legitimate needs of a financial or economic nature in the hands of the loss realising company (i.e. evidence must be brought that the change is not purely tax driven).

The condition of legitimate needs of a financial or economic nature is considered to be fulfilled when the employees and activities of the company are maintained by the new shareholder or when the company’s control is acquired by a company belonging to the same consolidated group of companies as the former controlling company.

A ruling can be requested from the Belgian tax authorities to obtain upfront certainty on the Belgian tax treatment of the contemplated operation, so as to ensure the losses are not forfeited as a result of a change of control.

Tax-free merger or (partial) de-merger
In the case of a tax-free merger or (partial) de-merger, Belgian tax law provides for a partial transfer/maintenance of the rollover tax losses of the absorbed/absorbing company. The carried forward tax losses of the companies involved are then reduced based on the proportionate net fiscal value of the company (before the restructuring) compared to the sum of the net fiscal values of both the merging entities (before the restructuring).

No carryback
There is no tax loss carryback provision under Belgian tax law.

Payments to foreign affiliates
A Belgian corporation can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm’s length. However, when such payments are made, either directly or indirectly, to a foreign person, entity, or branch that is not subject to tax or is subject to a tax regime that is notably more advantageous than the Belgian tax regime on such income, there is a reversal of the burden of proof. Such charges will be disallowed unless the Belgian enterprise can prove that the payments are reasonable and that they correspond to genuine and real transactions.

Fees, commissions, etc. paid to beneficiaries located in foreign countries, which are not properly reported on Form 281.50 and Summary Form 325.50, will, in principle, be subject to the secret commissions tax (of 30%).
Payments to tax havens
Companies subject to Belgian CIT or Belgian non-resident CIT that make direct or indirect payments to recipients established in tax havens are obligated to declare them if they are equal to or exceed EUR 100,000 during the tax year. The reporting has to be made on a special form to be attached to the (non-resident) CIT return.

In the event of non-reporting, the payments will be disallowed expenses for CIT purposes. Where the payments have been reported duly and timely, their tax deductibility will be subject to the ability of the taxpayer to prove that (i) said payments were made as part of genuine, proper transactions and (ii) they were not made to an entity under an artificial construction.

A tax haven is defined as: (i) a jurisdiction regarded by the OECD as not being cooperative concerning transparency and international exchange of information or (ii) a jurisdiction where the nominal corporate tax rate is less than 10%. A royal decree containing the list of countries where the nominal corporate tax rate is lower than 10% is published. The countries that are mentioned in the royal decree are the following:

- Abu Dhabi
- Ajman
- Andorra
- Anguilla
- the Bahamas
- Bahrain
- Bermuda
- British Virgin Islands
- Cayman Islands
- Dubai
- Fujairah
- Guernsey
- Jersey
- Jethou
- Maldives Islands
- Isle of Man
- Micronesia (Federation of)
- Moldavia
- Monaco
- Montenegro
- Nauru
- Palau
- Ras el Khaimah
- Saint-Barthelemy
- Sark
- Sharjah
- Turks and Caicos Islands
- Umm al Qaiwain
- Vanuatu
- Wallis-and-Futuna

Group taxation
Belgium does not apply any tax consolidation mechanism with respect to corporate tax.

Transfer pricing
The arm's-length principle is formally codified in the BITC. In addition, the authorities can make use of other, more general, provisions in the BITC to challenge transfer prices (e.g. the general rules on the deductibility of business expenses). The BITC contains provisions that tackle artificial inbound or outbound profit shifting. These are the so-called provisions on abnormal or gratuitous benefits.

If a Belgian tax resident company grants an abnormal or benevolent benefit, the benefit should be added back to the taxable income as a disallowed expense unless the benefit was taken into account to determine the taxable basis of the beneficiary. Even if the abnormal or gratuitous benefit is taken into account for determining the taxable basis of the beneficiary, the tax deductibility of the related expenses can still be denied in the hands of the grantor. Notwithstanding the above exception, the abnormal or benevolent benefit should be added back to the taxable income when the benefit is being granted to a non-resident affiliated company. Such granted abnormal or benevolent benefits can be offset against any tax deductible items (e.g. tax losses carried forward, NID).

If a Belgian tax resident company receives an abnormal or benevolent benefit, and to the extent that such benefit is received from a related company, the benefit received
cannot be offset by the Belgian company against its current year or carryforward tax losses or other tax deductions. According to the position of the tax authorities (by the Minister of Finance), the taxable basis of a Belgian company equals at least the amount of the benefit received (however, there is a recent court case against this position).

There are no specific transfer pricing documentation requirements or rules on the selection of transfer pricing methods included in the Belgian tax legislation. Nevertheless, the Belgian tax authorities adhere to the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations and the EU Code of Conduct. In the administrative guidelines that were issued, taxpayers are urged to proactively compile a coherent and consistent documentation set, although there is no legal obligation to do so. In case information is requested, the taxpayer must provide the data requested within (in principle) one month.

Advance pricing agreements (APAs) can be concluded (unilaterally, bilaterally, and multilaterally) via which the taxpayer can obtain upfront certainty.

Belgium has a special transfer pricing investigation unit with a mission to (i) build up and share transfer pricing expertise and (ii) carry out in-depth transfer pricing audits of multinationals present in Belgium through a subsidiary or branch. Recently, it has been observed that the number of transfer pricing audits being initiated in Belgium have increased significantly.

**Thin capitalisation**
Before the Act of 29 March 2012 (modified by the Act of 22 June 2012), Belgian tax law did not have general thin capitalisation rules. A specific thin capitalisation rule existed for interest payments or attributions to (real) beneficiaries taxed at low rates on that interest. This was the so-called 7:1 debt-to-equity ratio.

The new thin capitalisation rule entered into force on 1 July 2012. It replaces the 7:1 rule with a new rule introducing a 5:1 debt-to-equity ratio.

For the purposes of the thin capitalisation rule, equity is defined as the sum of the taxed reserves at the beginning of the taxable period and the paid-up capital at the end of the taxable period. For the purposes of this new rule, certain non-taxed reserves are deemed to be taxed reserves. It regards certain tax-free reserves created upon a merger/de-merger (as a result of merger goodwill).

For the purposes of the thin capitalisation rule, debt is defined as:

- all loans, whereby the beneficial owner is not subject to income taxes, or, with regard to the interest income, is subject to a tax regime that is substantially more advantageous than the Belgian tax regime, and
- all intra-group loans (whereby ‘group’ should be interpreted in accordance with Section 11 of the Companies Code).

Bonds and other publicly issued securities are excluded, as well as loans granted by financial institutions.

Interest payments or attributions in excess of the 5:1 ratio are not tax deductible. The new thin capitalisation rule is not applicable to loans contracted by (movable) leasing companies (as defined by Article 2 of the Royale Decree n° 55 of 10 November 1967) and companies whose main activity consists of factoring or immovable leasing and this
Belgium

within the financial sector and to the extent the funds effectively are effectively used for leasing and factoring activities.

An anti-abuse rule is introduced stating that in case the loans are guaranteed by a third party or in case loans are funded by a third party that partly or wholly bears the risk related to the loans, the third party is deemed to be the beneficial owner of the interest, if the guarantee or the funding has tax avoidance as main purpose.

Note that the thin capitalisation rules take into account the specific characteristics of ex-coordination centres, cash-pooling, and financing companies. To safeguard companies having a centralised treasury function in Belgium, a netting for thin capitalisation purposes is allowed at the level of the interest payments and interest income related to the centralised financing function/cash pool function. Centralised treasury management is understood as the management of daily treasury transactions or treasury management on a short-term basis (e.g. cash pools) and, exceptionally, longer-term treasury management. In addition, in order to qualify for the exemption, the treasury company should set up a framework agreement under which the group companies clarify the treasury activities and the financing model applicable to their group.

Excess profit rulings
The Belgian tax authorities have at their disposal instruments to make both upward and downward adjustments to a taxpayer’s Belgian taxable basis in case of non-arm’s-length dealings. Belgium will refrain from taxing profits that a Belgian tax resident company would not have realised if it had not been party to related-party dealings.

As the cost structure (or the profit potential) of a member of a multinational group of companies will normally differ from that of a stand-alone entity, its profit will normally also be higher. Applying the arm’s-length principle, this profit differential, which does not result from the functions performed and risks assumed by the respective entities, should not be allotted to the Belgian group member. As such, Belgian tax law allows for unilateral adjustments of the Belgian tax base similar to the corresponding adjustments in Article 9 of the OECD Model Convention. The underlying assumption is that the ‘excess profit’ forms part of the profits of the foreign related party.

The part of profit that is deemed to derive from related-party dealings and that is exempted from taxation in Belgium and how the ‘part-of-the-profits-of-the-foreign-related-party’ condition should be interpreted will need to be submitted to the Belgian Ruling Office to obtain a ruling in advance. Such rulings are granted for renewable periods of five years and are based on a detailed functional, economic analysis of the relevant Belgian activities with a view to determining a profit level commensurate with the company’s functional and risk profile.

Tax credits and incentives

Foreign tax credits (FTCs)
Unilateral relief from double taxation of foreign-source income may be provided in the form of an exemption, credit, or tax reduction, depending on the type of income. Where taxable, foreign income is subject to tax only on its net amount (i.e. after deduction of expenses and foreign taxes).

Dividend income FTC
Generally, no FTC is available for foreign dividends.
Royalty income FTC
Unless a more advantageous provision (e.g. a tax sparing provision) would apply based on a DTT concluded by Belgium (see the treaty list in the Withholding taxes section), an FTC is granted under Belgian tax law with respect to foreign royalty income, provided that this income has effectively been subject to taxation in its source country. This FTC is equal to 15/85 of the net frontier amount (i.e. after deduction of foreign WHT) of the royalty. The FTC is included in the taxable basis of the recipient company and is only creditable against Belgian income tax to the extent that said foreign income is included in the taxable basis of the Belgian company. Excess FTC, if any, is not refundable.

Interest income FTC
Unless a more advantageous provision (e.g. a tax sparing provision) would apply based on a DTT concluded by Belgium (see the treaty list in the Withholding taxes section), the Belgian beneficiary of foreign interest income is entitled to an FTC under Belgian tax law, provided that this income effectively has been subject to taxation in its source country. The computation of the FTC is based on the net frontier interest income (i.e. after deduction of foreign WHT) and adjusted with a ratio taking into account the financial cost. The FTC is included in the taxable base of the Belgian lender. It is creditable against the CIT due but is not refundable in case of excess.

Notional interest deduction (NID)
Belgian corporate income taxpayers can claim NID for tax purposes, reflecting the economic cost of the use of capital, equal to the cost of long-term, risk-free financing. The NID rate for a given tax year is, in principle, based on the ten-year government bond interest rate for the calendar year two years prior to the tax year (e.g. for tax year 2012, reference is made to 2010 government bonds).

An SME is a company that does not exceed more than one of the following criteria during the two foregoing financial years when evaluated on a consolidated level: a yearly average number of employees of 50, a turnover of EUR 7.3 million (excluding VAT), or total asset value of EUR 3.65 million.

A company that employs more than 100 employees on the basis of an annual average workforce is automatically considered to be a ‘large’ company.

As of tax year 2013 (i.e. accounting years ending between 31 December 2012 and 30 December 2013, both dates inclusive), the NID rate is capped at 3% (3.5% for SMEs).

Under the new shortly expected rules, some additional modifications to the NID regime have been introduced (e.g. the NID rate will be more closely aligned with the rate on the Belgian state bonds). The NID rate for tax year 2014 (i.e. accounting years ending between 31 December 2013 and 30 December 2014, both dates inclusive) will be 2.742% (3.242% for SMEs), the rate which is based on the average rate of the Belgian (ten year) state bonds of July, August, and September 2012.

Note that as of tax year 2013, new excess NID can no longer be carried forward, whereas, under the old rules, ‘excess NID’ (i.e. NID that cannot be claimed owing to the taxpayer having insufficient taxable income) could be carried forward for a maximum of seven years.

However, under the new rules, the ‘stock’ of excess NID (stemming from previous years, i.e. tax years 2012 and before) can still be carried forward for seven years (as was previously the case), though the excess NID that can be applied in a given year is limited to 60% of the taxable profit (i.e. the profit remaining after setting off carried-forward
tax losses and other tax deductions). The 60% limit is only applicable to the part of taxable profit exceeding EUR 1 million. The portion of excess NID that cannot be used due to the ‘60% rule’ (i.e. 40% of taxable profit minus EUR 1 million) can be carried forward indefinitely.

As for determining the basis on which this deduction is calculated, the company’s share capital plus its retained earnings, as determined for Belgian GAAP purposes and as per the last year-end date, will have to be taken into account.

Certain adjustments to equity should be made in order to avoid double use. The accounting equity as per the last year-end date has to be reduced by, amongst others, (i) the fiscal net value of financial fixed assets qualifying as participations and other shares, and (ii) in case of a company that has a foreign PE, located in a jurisdiction with which Belgium has concluded a tax treaty, the positive difference between the net book value of assets attributable to the foreign PE and the liabilities (other than equity). Whether or not the latter adjustment is in violation with the EU freedom of establishment is currently being investigated by the European Court of Justice.

It has been announced that the shares qualifying as cash investments and also qualifying for DRD should be excluded from the NID basis.

In addition, various adjustments should be made in order to avoid abuse.

**Investment deductions**

The investment deduction is a deduction from the tax base in addition to the normal tax depreciation on, amongst others, qualifying patents, environmentally friendly R&D investments, and energy-saving investments.

A company can benefit from a one-shot investment deduction of 14.5% (for tax year 2014, i.e. accounting years ending between 31 December 2013 and 30 December 2014, both dates inclusive) of the acquisition value of qualifying investments. With respect to environmentally friendly R&D investments, a company can also opt for a spread investment deduction of 21.5% (for tax year 2014) of the depreciation on qualifying environmentally friendly R&D investments.

In case of insufficiency or absence of taxable profits, the investment deduction can be carried forward without any limitation in time or in amount. Certain restrictions apply as to the maximum amount of investment deduction carried forward that is tax deductible in a given year.

Under certain conditions, the investment deduction carried forward can be lost after a change of ownership (see Net operating losses in the Deductions section).

Note that the investment deduction for patents and R&D cannot be combined with the tax credit for patents and R&D.

**Patents and R&D tax credit**

As an alternative for the above investment deduction for patents and R&D, a company may opt for a tax credit for which the advantage corresponds to the advantage of the investment deduction (i.e. 14.5% one-time and 21.5% for a spread investment deduction for tax year 2014), multiplied by the normal CIT rate of 33.99%. The investment deduction implies a deduction of the taxable basis, while the tax credit is a reduction of the tax due. A key advantage of the tax credit for patents and R&D is that it is refundable if it has not been deducted for five subsequent tax years.
Note that the amount of the tax credit should be deducted from the basis of the NID.

**Reduced payroll tax for qualifying researchers**
75% of the payroll tax withheld from wages of qualifying researchers by a Belgian company or establishment does not need to be remitted to the Belgian Tax Revenue if the researchers are employed in R&D programmes and have a qualifying degree (such as a degree in [applied] sciences, veterinary medicines, bio-technology, etc.). For the employee's personal tax liability, the Belgian Tax Revenue considers that the payroll WHT amount entirely was withheld.

A new draft law proposes (i) to raise the payroll tax to be remitted from 75% to 80% as from June 2013, (ii) to include a definition of 'scientific research', and (iii) to introduce a reporting obligation as of January 2014 with the Federal Administration for Scientific Policy, which has to approve or reject the request for application.

**Patent income deduction (PID)**
The PID allows a taxpayer to deduct, as an extra tax deduction in the tax return, 80% of qualifying gross patent income. Therefore, only 20% of gross patent income will be taxable at the normal CIT rate (33.99%), resulting in a maximum effective tax rate of 6.8%.

Qualifying taxpayers are corporate taxpayers in Belgium that are involved in the development or further improvement of patents through an in-house R&D centre. They include both Belgian companies and Belgian PEs of foreign companies. The company must be the owner, licensee, or usufruct holder of the patents for which they claim the benefits of the PID.

To benefit from the PID, the R&D centre should qualify as a ‘branch of activity’ or ‘line of business’, which means that it should be a division of an entity that is capable of operating autonomously. The Belgian company or PE should have relevant substance to perform and supervise R&D activities, but may use subcontractors, related or unrelated, in its development of the patents or extended patent certificates. The R&D centre can be located outside Belgium but must belong to a Belgian legal entity. Based on new proposed law, the condition to qualify as a ‘branch of activity’ would be abolished for SMEs as from tax year 2014.

Belgian companies or PE's acting as ‘contract R&D’ service providers on behalf of another company cannot qualify for PID because they are not the owners, holder of beneficial rights to, or licensee of the patent.

**Qualifying patents**
The PID applies where patents or supplementary protection certificates are owned by a Belgian company or establishment as a result of its own patent-development activities (partly or fully) in an R&D centre in Belgium or abroad. It is proposed in draft law to abolish the condition of having an R&D centre for SMEs. The PID also applies where patents or supplementary protection certificates are acquired by a Belgian company or establishment from a related or unrelated party, in full ownership, joint ownership, usufruct, or via license agreement, provided it has further improved the patented products or processes in the company's R&D centre in Belgium or abroad.

Other intellectual property (IP), such as copyrights, know-how, designs, and trade or marketing intangibles, are, as such, not eligible for the Belgian PID.
Belgium

The Belgian company or establishment can license the patents to other parties. Alternatively, it can use the patents, which are owned by it or licensed to it, to manufacture and supply patented products or services.

For patents licensed by the Belgian company or establishment to any party, whether related or unrelated, the tax deduction amounts to 80% of the relevant patent income to the extent the income does not exceed an arm’s-length price.

For patents used by the Belgian company or establishment for the manufacture of patented products, manufactured by itself or by a contract manufacturer on its behalf, the tax deduction is 80% of the license fee (known as ‘embedded royalties’) that the Belgian company would have received had it licensed the patents used in the manufacturing process to an unrelated party.

No advance ruling is required to benefit from this deduction since it is applicable generally and automatically. Only minor compliance formalities apply. The taxpayer should submit a special application form together with the CIT return.

Withholding taxes

Domestic corporations and branches of foreign corporations paying dividends, interest, royalties, and/or certain rentals are required to withhold tax.

Under the old rule, interest was, in principle, subject to 21% WHT (there are some exceptions, e.g. for savings accounts). Dividends were, in principle, subject to 25% WHT, but certain dividends were subject to 21% WHT (e.g. dividends stemming from companies incorporated as of 1 January 1994 of which the shares are nominative and represent capital created via cash contributions). Royalties were subject to 15% WHT.

However, a uniform WHT rate of 25% on interest, dividends, and royalties is applied as of 1 January 2013. There are some exceptions.

Some WHT reductions/exemptions are still foreseen under Belgian domestic tax law.

- A WHT exemption is foreseen for the distribution of profits made by a Belgian subsidiary to an EU parent company if both the parent and subsidiary have a legal form that is mentioned in the Annex to the EU Parent-Subsidiary Directive, if both are subject to CIT, and if the parent company holds, during an uninterrupted period of at least one year, a shareholding of at least 10% in the capital of the distributing company (implementation of the Parent-Subsidiary Directive). If the one-year holding requirement is not fulfilled at the time of distribution, the distributing company provisionally should withhold the amount of WHT due (but it does not have to pay the tax authorities). Once the one-year holding requirement is met, the provisionally withheld tax amount can be paid out to the parent company. If the one year holding requirement eventually is not complied with (e.g. because the Belgian participation is disposed of by the parent company before the one year holding requirement is met) then the Belgian company has to pay the amount provisionally withheld, increased by interest for late payment (at an annual rate of 7%), to the competent services of the Belgian tax authorities.

- The application of the Parent-Subsidiary Directive to dividend payments has been extended towards non-EU-resident companies. Dividends distributed towards a country that has concluded a tax treaty with Belgium containing a qualifying
exchange of information clause can be exempt from WHT, subject to the same conditions as laid down in the Parent-Subsidiary Directive.

- A 10% tax is applicable to profits that are attributed or made payable as a result of the full or partial liquidation of a company. The rate will become 25% as of 1 October 2014. There are some exceptions.
- There is a WHT exemption on interest on loans granted by professional investors to banks established in the EEA or in a country that has concluded a DTT with Belgium. For example, banks situated in France, the United Kingdom, or the United States should be able to benefit from this exemption.
- No Belgium interest WHT arises where two related companies with tax residence outside Belgium are involved in a financial transaction with the intervention of a Belgium based intra-group financial enterprise. Under these circumstances, the Belgium intra-group financial enterprise is not required to retain Belgium interest WHT if the entity merely intervenes as a ‘paying agent intermediary’.
- Belgian domestic tax law also provides for a WHT exemption on the following movable income sourced in Belgium (this list is not exhaustive):
  - Income from deposits allocated or attributed to non-resident savers by Belgian banks.
  - Income from bonds, treasury bonds, or other similar instruments of which the beneficiaries are identified as financial institutions.
  - Income from receivables (this includes income from commercial receivables) or loans of which the beneficiaries are identified as financial institutions or professional investors. Professional investors are defined as any Belgian resident company or branch not being a financial institution or any equivalent. As a result, interest payments between two Belgian companies are exempt from WHT. The applicability of this exemption has been extended. As a result, on transactions with banks situated in a country with which Belgium has concluded a DTT, no withholding will be due. In practice, this means that on transactions with, inter alia, French, UK, and US banks no withholding will be due.
  - Income from bonds paid by a Belgian resident financial institution or by a Belgian resident company to non-resident savers, provided that such bonds are registered on a nominal basis with the debtor of the income during the entire period to which the interest relates and that the foreign beneficiaries of the interest are not located in a tax haven country or held by more than 50% by Belgian residents.
  - Income from bonds and loans granted by ‘eligible quoted companies’ and ‘eligible intra muros financial companies’ to non-residents (under certain conditions).
  - Interest and royalty payments between a Belgian company and an EU tax resident company in case of direct or indirect shareholding of at least 25% for an uninterrupted period of at least one year (i.e. transposition of EU Interest & Royalty Directive in Belgian tax law).

With respect to payments made to non-resident corporations or individuals, WHT exemptions and/or reductions can also be found in the DTTs concluded by Belgium.

Notes

1. The treaty concluded with ex-Yugoslavia is still applicable to Bosnia-Herzegovina, Macedonia, Serbia, and Montenegro.
2. Not applicable to Hong Kong. Note that a new treaty with China has been signed (but not yet into force). The rates under the new treaty are 5% and 10% for dividends, 10% for interest, and 7% for royalties.

www.pwc.com/taxsummaries
3. The treaty concluded with the former USSR is still applicable to Kyrgyzstan, Moldova, Tajikistan, and Turkmenistan.

4. It concerns an EU country or the treaty contains a qualifying exchange of information clause. Hence, the rate of 0% is applicable subject to the same conditions as invoked by the Parent-Subsidiary Directive (see above). Where multiple rates apply, the difference is generally based on the percentage of participation the recipient holds (directly) in the capital of the company paying the dividends.

5. Under the Bilateral II agreement concluded between Belgium and Switzerland, a rate of 0% is applicable under certain conditions.

6. With respect to EU countries, a WHT exemption is applicable provided that the conditions laid down in the Interest & Royalty Directive are met (see above). Furthermore, please note that some treaties contain an exemption for trade receivables or loans concluded with a governmental body.

7. The protocol amending the existing DTT between Belgium and the United Kingdom is applicable as of 1 January 2013 (for Belgian WHT) and as of assessment year 2014 (financial years ending on or after 31 December 2013) for all other Belgian taxes.

The treaties that are currently in force are listed above. The following tax treaties are signed, modified, or under renegotiation (including some for the exchange of information clause): Australia, Austria, Bahrain, China, Congo, Czech Republic, Denmark, Isle of Man, Finland, France, Germany, Greece, Iceland, Italy, Japan, Korea, Luxembourg, Macao, Macedonia, Malaysia, Malta, Moldova, the Netherlands, New Zealand, Norway, Oman, Qatar, Rwanda, San Marino, Seychelles, Singapore, Spain, Tajikistan, and Uganda.

---

**Tax administration**

**Taxable period**

The assessment is based on the taxable income of a financial year. For the application of the rules on statutory limitations and of new laws, an assessment year is related to each taxable period. If the financial year corresponds with the calendar year, the assessment year is the following calendar year (e.g. financial year closing 31 December 2013 corresponds with assessment year 2014). If the financial year does not correspond with the calendar year, the assessment year equals the calendar year during which the financial year ends (e.g. financial year closing 30 June 2013 corresponds with assessment year 2013).

**Tax returns**

As a general rule, the annual resident or non-resident CIT return cannot be filed less than one month from the date when the annual accounts have been approved and not later than six months after the end of the period to which the tax return refers. For instance, assuming that the accounting year has been closed on 31 December 2013, the corporate tax return needs to be filed, in principle, by 30 June 2014 at the latest (this deadline is often postponed).

**Payment of tax**

CIT is payable within two months following the issue of the tax assessment. Interest for late payment is charted at the (non-cumulative) rate of 7% per year.

The advance tax payments needed to avoid the CIT surcharge (see the Taxes on corporate income section) can be made in quarterly instalments. In the situation where the company’s financial year ends on 31 December 2012, the due dates for the advance tax payments are 10 April 2013, 10 July 2013, 10 October 2013, and 20 December 2013. If the due date is a Saturday, Sunday, or a bank holiday, the payment is due on the next working day. Advance tax payments give rise to a tax credit. The tax credit amounts to 3%, 2.5%, 2%, or 1.5% of the advance tax payment made, depending on whether such payment has been made respectively in the first, second, third, or fourth quarter (percentages applicable for tax year 2014). If the total amount of credits exceeds the
surcharge, no surcharge is due, but the excess is not further taken into account for the final tax computation. The taxpayer can choose to either have the excess reimbursed by the tax authorities or used as an advance tax payment for the next year.

**Tax audit process**

A tax audit normally begins with a written request for information from the tax inspector. The taxpayer must provide the data requested within (in principle) one month. Any documentary evidence considered relevant to the audit can be requested and reviewed by the authorities. Once the tax inspector has completed the analysis, any adjustment is proposed in a notification of amendment outlining the reasons for the proposed amendment. The taxpayer has 30 days to agree or to express disagreement. The tax inspector then makes an assessment for the amount of tax that the tax inspector believes is due (taking into account any relevant comments of the taxpayer with which the inspector agrees). Thereafter, the taxpayer has six months within which to lodge an appeal with the Regional Director of Taxes. The decision of the Regional Director of Taxes may be appealed and litigated. In a number of circumstances, the intervention of the courts can be sought prior to receiving the decision of the Regional Director of Taxes.

**Statute of limitations**

Based on the Belgian income tax statute of limitations, the period during which the tax authorities are authorised to perform a tax audit and adjust the taxable basis is three years (except in case of fraud, where the statute of limitations is extended to seven years) starting from the first day of the assessment year, unless the company's financial year does not correspond to the calendar year. Note that with respect to payroll tax or movable WHT, the statute of limitations period is, in principle, five years.

**Belgian ruling practice**

Belgium has a long tradition of providing formal and informal rulings. Currently, a taxpayer may request an advance tax ruling on a wide range of subjects, including, but not limited to, CIT, individual tax, non-resident income tax, legal entity income tax, VAT, customs, and registration duties. The request should cover a 'specific and concrete' operation, which effectively is envisaged to be realised in the foreseeable future. The ruling should be filed before the transaction takes place. In practice, the ruling decision should be granted prior to the filing of the CIT return of the year of the transaction. A ruling is binding upon the Belgian tax authorities for a renewable period of a maximum of five years. Delivery of a requested ruling takes, on average, three months.

The Ruling Office is autonomous from the Belgian tax authorities and has the legal authority to issue decisions, which are binding upon the Belgian tax authorities. The Ruling Office increasingly has adopted a constructive approach towards the taxpayer and is seen in the Belgian tax practice as a powerful insurance instrument in ascertaining the Belgian tax treatment of contemplated operations.

**Topics of focus for tax authorities**

Topics of interest to Belgian tax authorities include:

- Significant increase in transfer pricing audits by the special transfer pricing investigation unit.
- Payments of management fees or technical support fees (secret commissions tax of 309% in absence of reporting).
- The deductibility of interest payments (e.g. to tax haven companies).
- Transactions with entities based in tax havens.
- Lump-sum allowances (secret commissions tax of 309% in absence of reporting).
- Substance.

**Significant developments**

The Bermuda government has extended the tax exemption granted to Bermuda companies under the Exempt Undertakings Act of 1976 from 28 March 2016 until 2035. The extended Undertaking provides protection to companies from any newly enacted taxes on income or capital gains until 2035. Existing companies are required to apply for the tax exemption extension.

**Taxes on corporate income**

Income tax and taxes on capital gains are not imposed on corporations in Bermuda.

**Corporate residence**

From the Bermuda Tax Commissioner’s perspective, entities that are incorporated in Bermuda are not considered to be resident in the country unless they have resident employees subject to the Bermuda Payroll Tax.

**Other taxes**

**Value-added tax (VAT)**

There is no VAT or sales tax in Bermuda.

**Customs duties**

Customs duties are imposed on almost all goods arriving on the island at varying rates.

**Excise taxes**

There are no excise taxes imposed in Bermuda.

**Property taxes**

A land tax is imposed on all developed land throughout Bermuda, with certain exceptions. The tax is assessed on the annual rental value (ARV) of each valuation unit, depending on whether such unit is a private dwelling or any other dwelling. The owner of the valuation unit is liable for the land tax.

A progressive scale of tax rates ranges between 0.6% and 23% based on the ARV of the unit, while commercial properties are taxed on a single rate of tax of 4.4%.

**Transfer taxes**

There is no transfer tax imposed in Bermuda.
Stamp taxes
Bermuda does impose a stamp duty on certain types of legal instruments; however, exempt companies are not subject to stamp duty.

Social insurance
If an employer has employees in Bermuda for 26 or more weeks in a calendar year, the employer will have to register and obtain an account number from the Department of Social Insurance (DSI) (unless previously registered) and pay social insurance tax for its employees. At the same time, the employer must also apply for and obtain from the DSI a social insurance number for each employee, which is required to pay social insurance. Once the employer has registered for a social insurance account number and the employees have obtained social insurance numbers, the DSI will automatically send an electronic print-out to the employer with an itemised list of employees as well as the amount of social insurance tax due for the month. Under certain facts and circumstances, the employer may also file an Employee Amendment Form, which shows any change in status (i.e. termination or unpaid leave) of employees that could affect the amount of social insurance tax due.

The amount of social insurance tax due is calculated as 64.14 Bermudian dollars (BMD) per employee per week (effective 1 April 2012), with the employer and employee each paying half of the liability (or BMD 32.07). The employer must pay and remit monthly (for all employees), to the DSI, the total social insurance tax due per employee. The amount of social insurance tax due per month is based on the number of Mondays in the month and must be paid by the end of the following month. Employed persons over the age of 65 are not required to pay their half (BMD 32.07). The employer continues to pay their half (BMD 32.07).

Payroll tax
Under Section 3 of the Payroll Taxes Act 1995, an employer (viewed as the entity that has control over an individual's remuneration) is required to remit payroll taxes (currently 14% on all remuneration paid or given, up to a maximum compensation of BMD 750,000) for each of its employees whose employment in Bermuda exceeds four consecutive weeks in a calendar year (whether or not with one or more employers). If an employee's stay in Bermuda is for a period of less than four consecutive weeks, the employer is not obligated to remit the payroll taxes.

Once an employee's service period in Bermuda has exceeded four consecutive weeks, the employer must register the employee with the Office of the Tax Commissioner (OTC). The employer must obtain a payroll tax account number by filing an application with the OTC, if no previous account exists for such employee. The application must be filed within seven days after the end of the quarterly tax period (the four quarters end on 1 January, 1 April, 1 July, and 1 October) in which the employee's stay exceeded four consecutive weeks. A payroll tax return and remittance of tax must be filed with the OTC 15 days after the end of each quarterly period (i.e. 15 January, 15 April, 15 July, and 15 October). A return is due only when an employee's stay exceeds four consecutive weeks in a tax period. The employer may recover from the employee a maximum of 5.25% of the 14% payroll tax, and the employer is allowed an exemption of BMD 600 (of remuneration paid) per employee for each quarterly tax period. Penalties for tax returns filed late are 5% of the payroll tax due for each month (or part thereof) that the tax return is late (with a maximum of 30%).

Compensation subject to the payroll tax under the Payroll Taxes Act includes all remuneration paid or given to the employee. Remuneration includes:
Bermuda

- Wages, salary, leave pay, commission, gratuity, fee, bonus, perquisite, or allowance.
- Money paid under a profit-sharing scheme.
- Money or anything of value paid or given to an employee or ex-employee in connection with the permanent termination of employment.
- Any amount paid with respect to a retirement or provident fund, scheme, or society, or under a hospital or health insurance scheme.
- The value of meals, boarding, lodging, or other benefit of any kind, whether provided in cash or otherwise.
- The rental value of any place of residence provided rent-free, or the difference between the rent paid and the rental value if the rent paid is lower than the rental value.
- Any gain on the exercise or right to acquire company stock based on services rendered.

All employers or self-employed persons are required to report remunerations up to a maximum of BMD 750,000 per annum per employee, deemed employee, or self-employed person. There is no payroll tax on remunerations above BMD 750,000.

Please note that the Payroll Taxes Act is extremely broad in its definition of remuneration. Therefore, a Bermuda employer should take caution when calculating the amount of remuneration paid to an employee.

**Annual company fee**
Every exempted company shall, in the month of January, forward to the Registrar of Companies a declaration, signed on behalf of the company, as to the company's principal business and its assessable capital together with the appropriate fee payable. For the purposes of the Companies Act 1981, an exempted company means a local company that does not comply with the requirements of the Companies Act 1981. Exempt companies are generally owned by non-Bermudans.

<table>

</tbody>
</table>

**Corporate services tax**
A 4% corporate service tax is imposed on a provider of corporate services in respect of gross earned revenue derived from an exempted undertaking for taxable corporate services provided during a tax period. Corporate services include corporate administrative services, corporate management services, corporate secretarial services, the provision of a registered office, the performance of functions in the capacity of director or resident representative, and the provision of accounting and/or financial services.

**Hotel occupancy tax**
A 7.25% tax is imposed on revenue received from hotels and other forms of accommodation.
Bermuda

**Betting duty**
There is a betting duty charge of 20% imposed on all bets made, received, or negotiated by a person licensed under the Betting Act of 1975.

**Branch income**
Branches are treated the same as other corporations doing business in Bermuda.

**Income determination**
Since income taxes are not imposed on corporations in Bermuda, income determination is not relevant in the context of Bermuda taxation.

**Deductions**
Since income taxes are not imposed on corporations in Bermuda, deductions from income are not relevant in the context of Bermuda taxation.

**Group taxation**
Since income taxes are not imposed on corporations in Bermuda, group taxation is not relevant in the context of Bermuda taxation.

**Tax credits and incentives**
Bermuda offers no specific tax incentives.

**Withholding taxes**
There are no withholding taxes in Bermuda.

**Tax administration**
Since income taxes are not imposed on corporations in Bermuda, tax returns are not required to be completed for corporate income tax compliance purposes. For information regarding tax returns, due dates, and the payment of tax for non-income taxes imposed in Bermuda (e.g. Social insurance and Payroll tax), please see the Other taxes section.

**Other issues**

**Foreign exchange controls**
Exempt companies and permit partnerships are considered as non-residents for exchange control purposes. This allows these entities to make dividend payments, distribute capital, open and maintain foreign bank accounts, maintain bank accounts in any currency, and purchase securities.
Bermuda

There is a Foreign Currency Purchase Tax imposed at the rate of 1% on foreign currency purchased by a resident from a local bank.

**Tax treaties**
There are no tax treaties between Bermuda and other nations due to the fact that Bermuda does not impose direct taxes. However, Bermuda has a double taxation agreement (DTA) with the Kingdom of Bahrain and a limited tax treaty with the United States, which only applies to ‘enterprises of insurance’. Bermuda also has tax information exchange agreements (TIEAs) with the following 24 countries: Aruba, Australia, Canada, China, Denmark, Faroe Islands, Finland, Germany, France, Greenland, Iceland, India, Ireland, Italy, Japan, Mexico, Netherlands, Netherlands Antilles, New Zealand, Norway, Portugal, Sweden, the United Kingdom, and the United States.

Under certain circumstances, the United States-Bermuda Tax Treaty provides for relief from taxation of insurance business profits. The business profits of a Bermudian insurance company will not be taxed in the United States unless a company has a permanent establishment (PE) in the United States. The United States-Bermuda Tax Treaty also provides for mutual assistance on tax matters. The purpose of a mutual assistance provision is to prevent or decrease tax avoidance. The Unites States also believed that having a tax treaty with Bermuda would be beneficial for United States-Bermuda diplomatic relations.

Bermuda’s DTA with the Kingdom of Bahrain includes a provision for the full exchange of information on criminal and civil tax matters, consistent with the internationally agreed standard for transparency and the exchange of information for tax purposes set by the Organisation for Economic Co-operation and Development (OECD).

**Significant developments**

The Bolivian government, through Law 291, passed in September 2012, has introduced a transitory tax (36 months) applicable to the sale of foreign currency carried out by financial institutions (excluding the Central Bank of Bolivia) and bureau de change. This transitory tax is levied on the sale price at a rate of 0.70% and 0.35% for the financial institutions and bureau de change, respectively. This new tax has entered into force as of December 2012.

In addition, Law 291 has also modified the period in which the tax authorities have the right to review and recalculate taxes determined by taxpayers. This period has been modified from four years up to ten years on a gradual basis, as follows: four years for 2012, five years for 2013, six years for 2014, seven years for 2015, eight years for 2016, nine years for 2017, and ten years for 2018.

The way of computation of the above period has been regulated by Law 317, passed in December 2012, which establishes that this period must be computed as of the first day of the following year in which the tax payment due date has occurred (e.g. if the tax payment deadline occurred in August 2013, the period that can be subject to tax review is 1 January 2014 to 31 December 2018).

**Taxes on corporate income**

All companies in Bolivia are subject to corporate income tax (CIT) at a rate of 25%. The taxable base is the profit arising from financial statements prepared in accordance with Bolivian generally accepted accounting principles (GAAP), adjusted for tax purposes (i.e. by non-deductible and non-taxable items) as per the requirements established in the tax law and regulations.

Bolivia taxes the income generated by corporations following the ‘income source’ principle (i.e. on a territorial basis). Therefore, income arising from goods and assets located or utilised economically within Bolivian territory and from any activity carried out within the country is considered Bolivian income source. Hence, such income is subject to CIT, regardless of the nationality/residence of the parties involved in generating such income or the place where the contracts were subscribed.

**Additional income tax on certain financial institutions**

Financial institutions (except for development banks) with a return on equity index higher than 13% must pay an additional income tax of 12.5%. This additional income tax cannot be offset against the transaction tax (see below), nor can it be considered a deductible expense for CIT purposes.
Bolivia

Surtax on extractive activities
There is an additional 25% CIT that affects only extractive activities of non-renewable natural resources (mining and oil/gas). This additional tax is calculated on the same basis as the normal CIT, except that two additional deductions are allowed: (i) up to 33% of the accumulated investment as of 1991, and (ii) 45% of the gross revenue of each extractive operation (e.g. a field or a mining site), with a threshold of 250 million bolivianos (BOB) for each extractive operation.

Special taxes on mining companies
In addition to the general CIT of 25% and the 25% surtax on extractive activities, all mining companies are also subject to an additional tax, calculated on the taxable net profits, at the following rates:

- 12.5%, if the mining company carries out exploitation activities.
- 7.5%, if the mining company carries out manufacturing activities with raw minerals that add value.

Mining companies are also subject to mining royalties at a rate of between 1% and 7% (depending on the kind of mineral), calculated on the total sales price. Note that there is a 60% discount on the rates of mining royalties if minerals are sold within the Bolivian market. Mining royalties can be offset against CIT if official mineral prices are lower than the prices established by the tax law; however, in this case, mining royalties paid will not be deductible for CIT purposes. On the contrary, if official mineral prices are higher than the prices established by the tax law, then mining royalties will be considered a deductible expense for CIT purposes. Note that mining royalties paid on minerals and metals that are not included in the tax law can always be offset against CIT.

Tax on gross income (transaction tax)
The tax on gross income (also known as transaction tax) generally taxes gross income arising from the performance of any economic or commercial activity (including non-profitable activities) at a rate of 3% on a monthly basis. However, exceptions exist for the sale of investments (as defined by the Stock Exchange Law) and the sale of minerals, oil, and gas within the local market, as long as such sales will ultimately be exported.

Corporations pay either CIT or transaction tax, whichever is higher. From an administrative perspective, CIT is due and paid at the end of each tax year and is considered an advanced payment of transaction tax, while transaction tax is due monthly. If during the year the cumulative monthly transaction tax due exceeds the CIT prepayment, the taxpayer will be subject to transaction tax on a monthly basis until the end of the tax year. For example, a corporation pays CIT for the 2012 fiscal year in April 2013. This payment is considered a prepayment for the transaction tax due between May 2013 and April 2014.

Local income taxes
There are no local taxes on income in Bolivia.

Corporate residence
A corporation is considered resident in Bolivia if it has been incorporated in Bolivia.
Permanent establishment (PE)
Note that Bolivian commercial laws allow foreign corporations to carry out isolated commercial acts in Bolivia without the obligation to constitute a permanent representation in Bolivia; however, such corporations cannot carry out habitual commercial acts without fulfilling the requirements established to constitute a company in Bolivia (e.g. through either a subsidiary or a branch). Unfortunately, Bolivian legislation does not include provisions to regulate situations that could trigger PE nor does it define what should be understood by ‘carrying out habitual commercial acts’.

Other taxes

Value-added tax (VAT)
VAT is levied on the sale of movable goods and provision of services carried out within Bolivian territory at a rate of 13%, including definitive importations. Since this tax is included in the final price, the effective tax rate amounts to 14.94% (13%/87%).

Customs duties
Definitive importations are also subject to customs duties at a rate of 10% and 5% for consumption goods and capital assets, respectively. Customs duties are calculated over the ‘transaction value’ of the merchandise valued as per Bolivian customs legislation, plus transportation and insurance costs.

Taxes on specific goods for consumption (excise tax)
Specific goods are taxed at the following rates:

<table>
<thead>
<tr>
<th>Product</th>
<th>Tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cigarettes and tobacco for pipes</td>
<td>50 to 55</td>

**Direct tax on hydrocarbons**

A direct tax on hydrocarbons (IDH) is applied on the production of hydrocarbons, measured at the wellhead point, at a rate of 32%. To determine the taxable base for this tax, production of hydrocarbons must be valued taking into account the average sales price and considering the market (internal/external) where such hydrocarbons were sold.

**Property tax on real estate and vehicles**

Real estate and vehicles are annually subject to a property tax calculated at different rates based on a scale value determined by the municipal government, as follows:

<table>
<thead>
<tr>
<th>Property value (BOB)</th>
<th>Property tax liability</th>
</tr>
</thead>
<tbody>
<tr>
<td>From 0</td>
<td>Up to BOB</td>
</tr>
<tr>
<td>0</td>
<td>200,000</td>
</tr>
<tr>
<td>200,001</td>
<td>400,000</td>
</tr>
<tr>
<td>400,001</td>
<td>600,000</td>
</tr>
<tr>
<td>600,001</td>
<td>Onwards</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>

<tr>
<td>0</td>
<td>24,606</td>
</tr>
<tr>
<td>24,607</td>
<td>73,817</td>
</tr>
<tr>
<td>73,818</td>
<td>147,634</td>
</tr>
<tr>
<td>147,635</td>
<td>295,268</td>
</tr>
<tr>
<td>295,269</td>
<td>Onwards</td>
</tr>
</tbody>
</table>

**Transfer taxes**

Transfer of property and real estate are subject to a transfer tax at a rate of 3%. This tax must be determined based on the provisions set forth for the transaction tax (tax on gross income) and is collected by the municipal government where the property/real estate is registered.

**Stamp taxes**

There are no stamp taxes in Bolivia.

**Financial transaction tax**

A financial transaction tax is levied on bank transactions (deposit or transfer of funds), carried out within the domestic financial system, at a rate of 0.15%.
**Special tax on lottery and gambling games**
A specific tax on lottery and gambling games is applied in Bolivia. The tax is also applicable to business promotions that involve a raffle or random activities in providing awards in order to increase sales or attract clients. The tax rate for lottery and gambling games is 30%, whereas the tax rate for business promotions is 10%.

**Social contributions**
The Pension Law establishes employer social contribution obligations. Social tax charges for employers are equal to 16.71% of gross salary in general and 18.71% for the mining sector.

**Tax on sale of foreign currency**
This is a transitory tax (36 months) applicable to the sale of foreign currency carried out by financial institutions (excluding the Central Bank of Bolivia) and bureau de change within Bolivian territory. This transitory tax is levied on the sale price at a rate of 0.70% and 0.35% for the financial institutions and bureau de change, respectively.

**Branch income**
Branch income is subject to the same tax applicable to other types of Bolivian corporations (i.e. CIT of 25%). However, the net profits of Bolivian branches are deemed to be distributed to the head office at the annual filing due date for CIT (i.e. 120 days after the fiscal year end); consequently, a Bolivian branch must withhold 12.5% on such deemed distributed profits. Note that this can be avoided as long as the head office decides to reinvest the Bolivian branch’s net profits.

**Income determination**
Taxable income is determined based on the financial statements prepared under Bolivian GAAP; then the income is adjusted for tax purposes in accordance with guidelines provided with respect to non-deductible and non-taxable items.

**Inventory valuation**
Inventories must be valued at replacement cost or market value for tax purposes, whichever is lower. Replacement cost is defined as the necessary costs incurred in acquiring or producing the assets as of the year-end, whereas market value is defined as the net value that the company would have obtained for the sale of assets in normal conditions as of the year-end, less commercialisation direct expenses.

**Capital gains**
Bolivian legislation does not include specific regulations for capital gains. Capital gains must be included in annual CIT if they are considered Bolivian-source income and will be taxed at a rate of 25%.

**Dividend income**
Dividend income obtained from domestic corporations subject to CIT must be excluded from the net taxable profits of the investor. Dividend income obtained from foreign corporations is not subject to CIT due to the fact that it is not considered Bolivian-source income.
**Bolivia**

**Interest income**
Interest income is subject to annual CIT if loans have been economically utilised within Bolivian territory since associated interest is considered Bolivian-source income.

**Rent/royalty income**
Rent/royalty income is subject to annual CIT as long as the income comes from an asset situated or economically utilised in Bolivian territory.

**Foreign income**
Bolivian corporations are taxed only on income generated within Bolivian territory.

**Deductions**
As a general principle, expenses may be deducted for CIT purposes as long as they are necessary to generate Bolivian-sourced income and are properly documented.

Apart from the above, the Bolivian Tax Code (BTC) has established minimum amounts (BOB 50,000) for which taxpayers must document their economic transactions through documents of payments recognised by the Bolivian financial system and regulated by the Autoridad de Supervisión del Sistema Financiero (ASFI) (i.e. the bank regulator), including the possibility to document economic transactions through payments made via foreign financial institutions. Non-compliance with these requirements implies the lack of the possibility to compute input VAT and to deduct the associated expenses for CIT purposes.

**Depreciation**
Depreciation of fixed assets is permitted for CIT purposes if fixed assets contribute to generate taxable income. Depreciation must be calculated based on a straight-line method and considering useful lives included in tax law. Fixed assets that are not included in the tax law must be depreciated under a straight-line method in accordance with their useful lives, and this needs to be communicated to the tax authorities within ten working days following the incorporation of the affected fixed assets.

Some of the assets included in the tax law are as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Useful life (years)</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>

<td>10.0</td>
</tr>
</tbody>
</table>
**Goodwill**
Intangible assets (including goodwill) with a true cost can be deductible for tax purposes within a five-year period as long as taxpayers have paid a price for their acquisition.

**Start-up expenses**
Taxpayers may choose to deduct start-up expenses within the first fiscal period or distribute proportionally their amortisation within a four-year period, commencing the first year of operation. Note that start-up expenses cannot exceed 10% of paid-in capital.

**Interest expense**
Interest paid to owners or shareholders is not deductible to the extent the interest rate exceeds the London Interbank Offered Rate (LIBOR) plus 3% in the case of foreign owners/shareholders and to the extent the interest rate exceeds the official interest rate on loans published by the Central Bank of Bolivia for national owners/shareholders. Interest deductible on shareholder loans may not exceed 30% of the total interest paid to third parties.

**Bad debt**
Allowances for bad debt provisions are permitted if determined as required by law, which establishes an average method based on uncollectable receivables of the last three years. Uncollectable receivables are defined by current legislation as those that come from trade receivables and either: (i) remain unpaid for more than one year and have been sued without obtaining a seizure or (ii) when the receivables do not justify being sued due to the quantity of the receivables, remain unpaid for more than three years.

**Charitable contributions**
Donations are not deductible unless made to non-profit organisations that are not subject to CIT. These donations are deductible up to a maximum of 10% of the donor’s net taxable profit.

**Compensation expenses**
Salaries, as well as associated compensations, paid to employees without the application of withholding taxes (WHT) (i.e. RC-IVA) are not deductible. Employees are subject to RC-IVA at a rate of 13%, which is calculated on the gross salary (including any other compensation in kind/cash) less social contributions and four minimum national salaries. RC-IVA must be withheld and paid to the tax authorities by the employer on a monthly basis.

Provisions for employees’ severance payments are deductible. Provisions of other bonuses (e.g. holiday, productivity bonuses) accrued on behalf of employees are tax deductible as long as they are paid prior to the annual CIT filing due date and the company demonstrates it has withheld taxes (if applicable).

**Fines and penalties**
Fines and penalties arising from late tax payments are not tax deductible (except interest and restatement by inflation associated with tax obligations).

**Taxes**
Taxes effectively paid by the corporation as a direct taxpayer, other than CIT, are deductible for tax purposes. Any transaction tax (tax on gross income) that has been offset against CIT paid is not deductible for CIT purposes.
Bolivia

Taxes paid in the acquisition of fixed assets are not deductible. These taxes must be included in the cost of the asset and depreciated accordingly.

**Other significant items**
In broad terms, the following additional items are not deductible for tax purposes, according to current legislation:

- Owners’ or shareholders’ personal withdrawals and living expenses.
- Fees paid to individuals (i.e. acquisition of goods and services) for which no WHTs have been withheld.
- Amortisation of trademarks and other intangible assets, unless a price has been paid to acquire them.
- Provisions that are not specifically authorised by the tax law and regulations.
- Depreciation of fixed assets that include a revaluation reserve.
- Losses arising from illegal acts.

**Net operating losses**
Tax losses can be utilised over the following three fiscal years. New entrepreneurial productive projects with a minimum capital of BOB 1 million can utilise tax losses over the five fiscal years following the start-up of operations (including hydrocarbons and the mining sector).

Financial institutions cannot utilise tax losses accumulated through December 2010; however, tax losses generated starting from fiscal year 2011 can be utilised over the following three fiscal years, as stated above.

Tax losses cannot be restated due to inflation in any case.

Bolivian legislation does not envisage carryback provision for tax losses.

**Payments to foreign affiliates**
Payments to foreign affiliates are subject to a 12.5% WHT with no restriction if the Bolivian company is remitting Bolivian-sourced income (e.g. interest on loans, provision of any kind of services, royalties).

**Group taxation**
Bolivia does not include group taxation rules within its legislation.

**Transfer pricing**
Bolivian legislation does not include provisions for transfer pricing; however, transactions carried out between related companies must be performed at market value or as if they were carried out between third parties (i.e. sort of arm’s-length principle), and any excess must be considered non-deductible for tax purposes. Note that there are not further regulations regarding how taxpayers must demonstrate that transactions carried out between related parties were carried out at market value.

**Thin capitalisation**
Bolivian legislation does not include provisions for thin capitalisation apart from establishing restrictions on deductibility of interest when funding is provided by shareholders (see Interest expense in the Deductions section).
**Tax credits and incentives**

**Foreign tax credit**
Bolivian legislation does not include provisions regarding recognition of foreign tax credits.

**Investment incentives**
No incentives are granted in Bolivia for domestic or foreign investment.

**Export incentives**
Export activities benefit from reimbursement of VAT and customs duties paid in the process of producing goods to be exported (with some limitations for oil/gas companies).

**Other incentives**
Foreign exchange transactions are legal in Bolivia, and a system of free-floating exchange rates exists.

Tourist and lodging services by hotels to foreign tourists without a residence or address in the country are exempt from VAT.

**Regional manufacturing tax incentives**
New investments in manufacturing in the states of Oruro and Potosi are entitled to the following tax exemptions:

<table>
<thead>
<tr>
<th>Exemption</th>
<th>Conditions of exemption</th>
</tr>
</thead>
<tbody>
<tr>
<td>Import tariffs and VAT on imported machinery</td>
<td>Machinery imported exclusively for the new industry until start-up of operations.</td>
</tr>
<tr>
<td>Import tariffs on imported inputs</td>
<td>They do not replace domestic inputs of the same kind and are destined to a transformation process. The exemption is granted for the first ten years of operation.</td>
</tr>
<tr>
<td>Transaction tax</td>
<td>For ten years from the start-up of operations.</td>
</tr>
<tr>
<td>CIT</td>
<td>For ten years from the start-up of operations if the amount exempt is reinvested in fixed assets in the following fiscal year.</td>
</tr>
</tbody>
</table>

**Withholding taxes**

**Payments made to Bolivian residents**
Dividends paid to Bolivian residents, either individuals or corporations, are not taxable.

Payments made by corporations to individuals with respect to the acquisition of goods or provision of services that are not supported with an invoice or fiscal receipt are subject to a WHT of 8% on goods and 15.5% on services.

**Payments to non-residents**
Dividend payments, distributions of profits to the head office by Bolivian branches, interest payments, royalty payments, and fees paid for any type of services made to non-residents are subject to a WHT of 12.5%.
Bolivia

**Tax treaties**
Bolivia currently has in force double tax treaties (DTTs) with the Andean Community (i.e. Colombia, Ecuador, and Peru), Argentina, France, Germany, Spain, Sweden, and the United Kingdom.

Beneficial WHT rates on dividend distributions are provided by DTT with Spain and Sweden at 10% and 0%, respectively, provided the Spanish or Swedish holding company demonstrates it is the ultimate beneficial owner and holds more than a 25% interest in the Bolivian company.

**Tax administration**

**Taxable period**
The taxable year is the fiscal year. The fiscal year varies according to the activity of the corporation. Banks and commercial and other service activities have a fiscal year end as of 31 December; industrial, oil, and gas companies as of 31 March; agribusiness and forestry companies as of 30 June; and mining companies as of 30 September.

**Tax returns**
CIT is assessed on a self-assessment basis every fiscal year, and the due date for submission is 120 days after the fiscal year-end. Tax returns must be accompanied by audited financial statements (if applicable) and ancillary tax information as requested by the tax authorities.

**Payment of tax**
CIT is payable in one annual payment 120 days after the fiscal year-end, except for mining companies, which are obligated to make advance payments on a monthly basis with respect to the additional tax (i.e. 12.5% and 7.5% for exploitation and manufacturing mining companies, respectively).

**Tax audit process**
The tax audit process starts with a formal notification from the tax authorities where they indicate fiscal periods and taxes to be reviewed, together with a requirement of information. Tax inspection may generally take a 12-month period. Shortly after the provision of the finalisation of the tax inspection, a preliminary report of the tax audit’s results is provided to the taxpayer in which the total tax debt is described (i.e. tax due, restatement, interests and penalties) together with the legal arguments supporting the tax enquires.

Taxpayers do have 30 days after receiving the preliminary report to present all supporting documentation and technical arguments if they consider that the tax enquires do not have grounds to be claimed. Tax authorities do have 60 days to review all documentation/arguments provided by the taxpayer and then issue the final report, which is the formal document that could be subject to tax litigation, either via administrative process of by a judicial court.
Statute of limitations
According to the current Bolivian Tax Code, tax authorities have up to a ten year period to review and recalculate taxes determined by taxpayers. This period is determined as follows: four years for 2012, five years for 2013, six years for 2014, seven years for 2015, eight years for 2016, nine years for 2017, and ten years for 2018. This period must be computed as of the first day of the following year in which the tax payment due date has occurred (e.g. if the tax payment deadline occurred in August 2013, the period that can be subject to tax review is 1 January 2014 to 31 December 2018).

Topics of focus for tax authorities
There are not specific topics/taxes of focus in which the tax authorities address their review. This will generally depend on the nature of the taxpayer and the industry where they belong, e.g. a mining company could be more likely to be subject to tax inspections than an industrial company. There are no formal statistics to provide information in this regard.

Significant developments

Introduction of corporate income tax (CIT) incentives in Republika Srpska (RS)
Republika Srpska introduced two tax incentives in the second half of 2012 after several years of no incentives policy from the government.

The first incentive allows companies, registered for production activity, who invest in property, plant, and equipment (PPE) to use the invested amount as an additional deduction from the CIT base in the year when the PPE was put into use.

The second incentives are related to new employment. Companies who employ at least 30 new employees during the fiscal year are allowed to decrease the taxable base for the paid personal income tax and social security contributions for that period.

Proposed draft of CIT law in Federation of Bosnia and Herzegovina (FBiH) introduces additional transfer pricing methods
The Federal Ministry of Finance has prepared a proposal with amendments to the current CIT regulation by introducing additional methods for determining transfer prices to make it more aligned with the Organisation for Economic Co-operation and Development (OECD) guidelines.

Currently FBiH CIT law only recognises the comparable uncontrolled price (CUP) and cost plus methods.

Additionally, the proposal makes transfer pricing documentation obligatory for all companies with related party transactions.

The proposal will be submitted for Parliament discussion when finalised.

Taxes on corporate income

Bosnia and Herzegovina consists of two entities: Federation of Bosnia and Herzegovina (FBiH) and Republika Srpska (RS), with a third region, the Brčko District (BD), being administered by both. Direct taxes are imposed at the entity/district level, while indirect tax regulations are imposed at the state level. CIT systems in Bosnia and Herzegovina have been partially harmonised in the past few years, but significant differences remain.

The Federation of Bosnia and Herzegovina, Republika Srpska, and the Brčko District tax resident corporations on a worldwide basis. Non-residents are taxed on income realised in the FBiH, RS, and BD territories.
**FBiH CIT**
A CIT payer in the Federation of Bosnia and Herzegovina is a resident business association or other legal entity performing independent and permanent business activity through the sales of products and providing services on the market for the purpose of generating profit.

A CIT payer in the Federation of Bosnia and Herzegovina is also a non-resident who generates profits through business activity from a business unit in the territory of the Federation of Bosnia and Herzegovina.

A non-resident whose registered seat or management is not in the Federation of Bosnia and Herzegovina and who does not have a business unit in the Federation of Bosnia and Herzegovina is subject to withholding tax (WHT) for income generated in the Federation of Bosnia and Herzegovina.

The CIT rate in the Federation of Bosnia and Herzegovina is 10%.

**RS CIT**
A CIT payer in Republika Srpska is:

- A legal entity from Republika Srpska that generates income from any source in Republika Srpska or abroad.
- A business unit of a legal entity that generates income in the territory of Republika Srpska.
- A non-resident legal entity that conducts business activity and has a permanent establishment (PE) in Republika Srpska, for income that is related to that PE.
- A non-resident legal entity that generates income from immovable property in Republika Srpska, for the income generated in Republika Srpska.
- A non-resident legal entity that generates income in Republika Srpska, not mentioned above, and is subject to WHT in accordance with the CIT law of Republika Srpska.

The CIT rate in Republika Srpska is 10%.

**BD CIT**
A CIT payer in Brčko District is:

- A legal entity from Brčko District that generates income from any source in Bosnia and Herzegovina or abroad.
- A business unit of a legal entity with headquarters in the Federation of Bosnia and Herzegovina or Republika Srpska, for income generated in Brčko District.
- A non-resident legal entity that conducts business activity and has a PE in Brčko District, for income that is related to that PE.
- A non-resident legal entity that generates income from immovable property in Brčko District, for the income generated in Brčko District.
- A non-resident legal entity that generates income in Brčko District, not mentioned above, and is subject to WHT in accordance with the CIT law of Brčko District.

The CIT rate in Brčko District is 10%.
Bosnia and Herzegovina

Corporate residence

FBiH residency
Under FBiH CIT law, a resident is a legal entity whose headquarters (registration) is entered into a court registry or whose management and supervision over the business activities is located in the Federation of Bosnia and Herzegovina.

FBiH permanent establishment
A PE of a non-resident is a permanent place of business through which the non-resident performs activity in whole or partially throughout the territory of the Federation of Bosnia and Herzegovina.

A PE under FBiH CIT law is considered to be one of the following:

- Management headquarters.
- Branch office.
- Business office.
- Factory.
- Workshop.
- Location of natural resources extraction.
- Construction site (construction or mounting project) when the work is performed during a period exceeding six months.
- Providing consulting or business services lasting for a period exceeding three months consecutively over a 12-month period.
- A representative acting independently on behalf of a non-resident related to the activities of signing a contract or keeping supplies of products delivered on behalf of a non-resident.

RS residency
Under RS CIT law, a resident is a legal entity registered in Republika Srpska.

RS permanent establishment
A PE is considered to be a place of business of a non-resident in Republika Srpska (i.e. construction works, installation and assembly works, infrastructure used for research or exploitation of natural resources or supervisory of the same). A PE shall also be considered to be a place of business where an individual or legal person has the authorisation to conclude contracts for a foreign legal entity.

BD residency
The BD CIT law prescribes that a resident is a legal entity registered in Brčko District.

BD permanent establishment
A PE of a non-resident in Brčko District is considered to be:

- construction works, installation and assembly works, infrastructure used for research or exploitation of natural resources, or supervisory of the same, or
- a place of business where an individual or legal person has the authorisation to conclude contracts for a foreign legal entity.
Other taxes

Value-added tax (VAT)
The standard VAT rate is 17%, and the VAT regime applies equally throughout the country of Bosnia and Herzegovina. There is no reduced VAT rate in Bosnia and Herzegovina.

Taxable persons are all individuals and legal entities registered, or required to be registered, for VAT. Any person making taxable supplies of goods and services that exceeds or is likely to exceed a threshold of 50,000 konvertibilna marka (convertible mark or BAM) (25,000 euros [EUR]) is required to register as a VAT payer.

The export of goods is zero-rated.

Taxable transactions include the supply of goods and services in Bosnia and Herzegovina by a taxable person, as well as the importation of goods to Bosnia and Herzegovina by any person. The following transactions are also taxable:

- Transactions for no consideration or for a consideration less than the market value.
- The private use of taxable goods by a taxable person (self-supply).

The following services are exempt from VAT in Bosnia and Herzegovina:

- The leasing and subletting of residential houses, apartments, and residential premises for a period of longer than 60 days.
- The supply of immovable property, except for the first transfer of the ownership rights or the rights to dispose of newly constructed immovable property.
- Financial services.
- Insurance and reinsurance services.
- Educational services provided by private or public educational institutions.
- Postal services.

The VAT period is one calendar month.

Customs duties
The customs policy law and the rates of customs tariffs to be applied exist and are largely based on European Union (EU) standards. Bosnia and Herzegovina has signed the Stabilisation and Association Agreement (SAA) and the Central European Free Trade Agreement (CEFTA).

Excise duties
There is a single excise regime throughout Bosnia and Herzegovina, which levies excise tax on the following products:

- Petroleum products: BAM 0.3 to BAM 0.4 per litre.
- Tobacco products: 42% on retail price and an additional BAM 0.15 per pack of 20 cigarettes. If the calculated excise duty is lower than the minimally prescribed excise duty, then the minimal excise duty should be paid (the minimal duty is determined every year by the indirect tax authorities by special regulation).
- Non-alcoholic drinks: BAM 0.1 per litre.
- Alcohol and alcoholic drinks: BAM 8 to BAM 15 per litre of absolute alcohol.
Bosnia and Herzegovina

- Beer and wine: BAM 0.2 to BAM 0.25 per litre.
- Coffee (unroasted, roasted, and ground coffee and coffee extracts): BAM 1.5 to BAM 3.5 per kilogram.

**Property taxes (real estate)**

**FBiH property taxes**
FBiH property taxes are imposed at the cantonal level (ten cantons in total), and the rates as well as the taxpayers are different between the cantons. The taxes are paid in the range of BAM 0.5 to BAM 3 per square metre.

**RS property taxes**
RS property taxes are imposed at the entity level. The annual tax rate is between 0.05% and 0.5% of the market value of the property. The applicable tax rate is determined every year by the municipalities.

**BD property taxes**
BD property taxes are imposed by the BD assembly. The annual tax rate is between 0.05% and 1% of the market value of the property. The rate is adopted by the assembly for every year based on the proposed annual budget.

**Tax on transfer of land and real estate**

**FBiH transfer taxes**
The FBiH tax on transfer of land and real estate is imposed at the cantonal level. The rate differs by canton; however, it cannot be higher than 5%.

**RS transfer taxes**
The RS tax on transfer of land and real estate is imposed at the entity level. The rate is 3%.

**BD transfer taxes**
There is no tax on transfer of land and real estate in Brčko District.

**Other taxes**
There are several other taxes introduced at the entity, cantonal, and municipality level. The duties differentiate based on company location, business size, and type of business.

**FBiH other taxes**
FBiH other taxes include the communal tax, fire prevention contribution, tourist community contribution, forestry contribution fee, Foreign Trade Chamber of Bosnia and Herzegovina duty, Chamber of Commerce FBiH duty, and administrative stamp duties.

**RS other taxes**
RS other taxes include the special republic tax, communal tax, forestry contribution fee, fire prevention contribution, Foreign Trade Chamber of Bosnia and Herzegovina duty, Chamber of Commerce FBiH duty, and administrative stamp duties.

**BD other taxes**
BD other taxes include the communal tax, fire prevention contribution, forestry contribution fee, Foreign Trade Chamber of Bosnia and Herzegovina duty, and administrative stamp duties.
**Branch income**

Representative offices of foreign companies are permitted, although the concept of an international branch has not been recognised in Bosnia and Herzegovina.

**Income determination**

Taxable profit is profit determined by adjusting the accounting profit as stated in the profit and loss statement and determined in accordance with International Financial Reporting Standards/International Accounting Standards (IFRS/IAS) and accounting legislation, in accordance with the provisions of the CIT law.

**FBiH income**

Income for assessment of taxable profit in the Federation of Bosnia and Herzegovina is income from the sales of products, services, goods, and materials, as well as financial, extraordinary, and other income calculated in the profit and loss balance in accordance with accounting regulations and IFRS/IAS.

Income on the basis of collected written-off debt, in the event that it was included in income in a previous period and was not subject to tax allowable or recognised expenditure, shall not be included in the tax base.

**FBiH inventory valuation**

Expenses of production in accordance with accounting regulations and IFRS/IAS shall be recognised in the value of stocks of unfinished production, semi products, and finished products for the calculation of taxable profit.

The inventory is valued by using the average price method.

**FBiH capital gains**

The taxable base shall include profit from liquidation and capital gain from the balance sheet.

**FBiH dividend income**

Dividends realised based on participation in the capital of other taxpayers shall not be included in the tax base. Shares in the profit of a business association will be considered dividends.

**FBiH interest income**

Interest income is generally included in the taxable base. The exception, as per FBiH government decision, is for interest income realised from state bonds issued for war claims, which should not be included in the taxable base (the CIT law does not explicitly allow for this, which may be lead to discussion with the tax authority).

**FBiH foreign income**

The Federation of Bosnia and Herzegovina taxes resident corporations on a worldwide basis. There are no deferral or anti-deferral provisions in the Federation of Bosnia and Herzegovina.

**RS income**

Taxable revenue for the purpose of computing the tax base in Republika Srpska includes all revenue (domestic and foreign) from whatever source derived, whether in cash or in kind or whether related or unrelated to the legal person’s economic activity.
In the event of revenue received in the form of property (other than cash) or services, the amount of revenue is equal to the market price of the property or services received.

**RS inventory valuation**

Inventory includes goods used for resale, final goods produced by the taxpayer, semi-final goods used for further production, as well as main and auxiliary materials for production.

Purchase value of inventories at the beginning and end of a fiscal year has to be expressed using the same method for determination of purchase value of inventories.

The purchase value of inventories can be determined by using the first in first out (FIFO) method or the weighted average cost method.

**RS capital gains**

Capital gain is realised through the sale or other type of transfer of capital or investment assets and represents a difference between the sales price and adjusted base of an asset. The sales price is the contracted price (i.e. the market price established by the competent tax authority in case it finds the contracted price to be lower than the market price).

Capital gains or losses realised during the fiscal year can be offset, and the realised net gain or loss is added or subtracted from the taxable base, if they are not already included in the income or expense.

**RS dividend income**

Income from dividends is not included in the taxable base.

**RS interest income**

Interest income is generally included in the taxable base.

Income from securities issued by or guaranteed by the state authority, Central Bank BiH, or local authority, as well as interest income from bank deposits, is excluded from the taxable base.

**RS foreign income**

Republika Srpska taxes resident corporations on a worldwide basis. There are no deferral or anti-deferral provisions in Republika Srpska.

**BD income**

Taxable income in Brčko District includes all income from any source (domestic or foreign), whether in cash or in kind, independent of the relationship to the business activity of the legal person.

**BD inventory valuation**

The purchase value of inventories can be determined by using the first in first out (FIFO) method or the average cost method.

**BD capital gains**

Capital gain is realised by sale or transfer of capital and investment goods and represents positive difference between the sales price and adjusted property base.
Capital gains or losses realised during the fiscal year can be offset, and the realised net gain or loss added or subtracted from the taxable base, if they are not already included in the income or expense.

**BD dividend income**
Income from dividends is not included in the taxable base.

**BD interest income**
Income from securities issued by or guaranteed by the state authority, Central Bank BiH, or local authority is excluded from the taxable base.

**BD foreign income**
Brčko District taxes resident corporations on a worldwide basis. There are no deferral or anti-deferral provisions in Brčko District.

---

**Deductions**

**FBiH deductions**
Expenditures are deductible from revenue in computing the FBiH tax base if the expenditures directly relate to the realised revenue.

**FBiH depreciation**
Depreciation cost is deductible only if it relates to the property subject to depreciation and being used.

Depreciation of fixed assets is deductible up to the amount established by proportionate application of the highest annual depreciation rates using the linear method, prescribed by the FBiH government, as follows:

<table>
<thead>
<tr>

Property being depreciated with a value of less than BAM 1,000 may be fully deducted in the purchase year, on condition that that the property was put in service.

The purchase value of computer hardware and software may be deducted fully in the year the purchase was made.

Depreciated assets, once depreciated, shall not be re-included in the depreciation calculation for the purposes of the tax balance.
Depreciation is allowed for increases in the value of fixed assets due to revaluation in accordance with IFRS/IAS, up to the amount of calculated depreciation on the revaluation base and by using the proportion method prescribed by law.

**FBiH goodwill**
Amortisation of goodwill is not tax deductible.

**FBiH start-up expenses**
Start-up expenses are tax deductible if the expenses occurred, were necessary and related to the registered company, and if original documentation with regard to those expenses are available for inspection.

**FBiH interest expenses**
Interest expense is generally tax deductible, except for interest that is not calculated at arm’s length and interest on taxes, social security contributions, and other public revenue.

**FBiH bad debt**
The expenses occurring based on the write-off of doubtful debts are deductible. Debts are considered doubtful if one of the following is fulfilled:

- The debts have not been collected within 12 months from due date.
- The taxpayer has started court procedures in regard to the receivable or started the enforced collection procedure.
- The receivable is registered in the bankruptcy procedure.
- Agreement has been reached with the debtor in the bankruptcy or liquidation procedure.

**FBiH charitable contributions**
Costs of humanitarian, cultural, educational, scientific, and sports purposes (except professional sports) are deductible in the amount of up to 3% of total income.

**FBiH tax reserves**
Tax-deductible expenditures include expenditures to set up reserves for the following:

- Severance pay paid up to the prescribed amount.
- Expenditures of natural resources renewal.
- Expenditures in guaranteed time frames.
- Initiated court procedures.
- Potential credit losses of banks and microcredit organisations.

**FBiH fines and penalties**
Fines and penalties are not tax deductible.

**FBiH taxes**
Taxes are generally tax deductible expenses, except for paid CIT.

**FBiH other significant items**
Representation costs pertaining to business activity are deductible in the amount of 30% of representation costs.

Expenses of membership fees to the chambers are deductible in the amount not exceeding 0.1% of total income, with the exception of membership fees regulated by the law.
Expenses based on sponsorship are deductible in the amount of 2% of total income.

**FBiH net operating losses**
Tax losses may be offset against profits in a future tax period, not exceeding five years. Tax losses are utilised on a first in first out (FIFO) basis.

Tax losses cannot be carried back.

**FBiH payments to foreign affiliates**
Payments to foreign affiliates are generally allowed if they relate to realised revenue.

**RS deductions**
Expenditures are deductible from revenue in computing the RS tax base if the expenditures directly relate to the realised revenue.

**RS depreciation**
Depreciation deductions are allowed only with respect to depreciable assets that are being used.

A depreciable asset is any tangible or intangible asset that is held for use in the production or supply of goods and services, for rental to others, or for administrative purposes. Land or any other asset that does not decrease in value through wear and tear or obsolescence is not considered a depreciable asset.

Assets are depreciated using the linear method of depreciation, except for machines and equipment, which can be depreciated with acceleration (first year at 40%, second year at 30%, and third year at 30%). The CIT Rulebook prescribes a wide range of accepted depreciation rates, depending on type of assets, ranging from 1% to 50% annually.

**RS goodwill**
Amortisation of goodwill is not tax deductible.

**RS start-up expenses**
Start-up expenses are tax deductible if the expenses occurred, were necessary and related to the registered company, and if original documentation with regard to those expenses are available for inspection.

**RS interest expenses**
Interest on loans used for business purposes are tax deductible. The exceptions are interest that is not at arm’s length, interest on loans for private use, and interest on overdue tax payments.

**RS bad debts and tax reserves**
A legal person using the accrual form of accounting is allowed a deduction with respect to bad debts and reserves.

Legal persons, other than banks, authorised credit institutions, or insurance companies, are entitled to a bad debt deduction that arose in connection with a sale of goods or services but only if the revenue from the sale was previously included in the tax base of the legal person.

A loan or trade receivable is considered to be a bad debt only if the receivable has not been collected within 12 months from the due date and
Bosnia and Herzegovina

- the taxpayer has started court litigation for the receivables or if enforced collection procedure is initiated
- the receivables are registered in the bankruptcy procedure of the debtor, or
- an agreement has been reached with the debtor who is not a physical or related person in the bankruptcy or liquidation procedure.

In the case of a bank or other authorised credit institution, a deduction is allowed for increases in the reserve account for customary losses due to unpaid loans, and the amount may not exceed 20% of the tax base.

In the case of an insurance or reinsurance company, a deduction is allowed for increases in reserves as registered in accounting documents and as authorised according to applicable law. For insurance contracts pertaining to reinsurance, reserves are to be reduced so that they cover only part of the risk remaining with the insurer, and the amount may not exceed 20% of the tax base.

The tax savings resulting from a reduction or cancellation of any reserve that is collected later on will be included in taxable revenue at the moment of collection in accordance with this law.

**RS charitable contributions**
Contributions to public institutions and humanitarian, cultural, and educational organisations are deductible in an amount not exceeding 3% of the fiscal year’s total revenue. Any excess contribution may be carried forward three years.

**RS fines and penalties**
Fines and penalties are not tax deductible.

**RS taxes**
Taxes are generally tax deductible expenses, except for paid CIT.

**RS other significant items**
Expenditures that are recognised and deductible from revenue also include the following:

- 30% of the cost of entertainment, meals, and amusements related to the legal person’s economic activity.
- Sponsorship expenses in an amount not exceeding 2% of the fiscal year’s total revenue.
- Scholarships to students in an amount of up to 75% of average monthly net salary per employee in Republika Srpska in accordance with the latest published data from the body in charge of statistics.

**RS net operating losses**
Losses may be carried forward and offset against income in the following five years. Tax losses are utilised on a FIFO basis.

Tax losses cannot be carried back.

**RS payments to foreign affiliates**
Payments to foreign affiliates are generally allowed if they relate to realised revenue.
**BD deductions**
Expenditures are deductible from revenue in computing the BD tax base if the expenditures directly relate to the realised revenue.

**BD depreciation**
Depreciation deductions are allowed only with respect to depreciable assets that are being used.

A depreciable asset is any tangible or intangible asset that is held for use in the production or supply of goods and services, for rental to others, or for administrative purposes. Land or any other asset that does not decrease in value through wear and tear or obsolescence is not considered a depreciable asset.

Assets are depreciated using the linear method of depreciation, except for machines and equipment, which can be depreciated with acceleration (first year at 40%, second year at 30%, and third year at 30%). The CIT Rulebook prescribes a wide range of accepted depreciation rates, depending on type of assets.

The calculation of depreciation for newly purchased property starts the following month on the day when it was put to use. The calculation of depreciation for newly constructed buildings starts from the first day of the following year in which it was put to use.

**BD goodwill**
Amortisation of goodwill is not tax deductible.

**BD start-up expenses**
Start-up expenses are tax deductible if the expenses occurred, were necessary and related to the registered company, and if original documentation with regard to those expenses are available for inspection.

**BD interest expense**
Interest on loans used for business purposes are tax deductible. The exceptions are interest that is not at arm’s length, interest on loans for private use, and interest on overdue tax payments.

**BD bad debts and tax reserves**
Legal persons, other than banks, authorised credit institutions, or insurance companies, shall be entitled to a bad debt deduction that arose in connection with a sale of goods or services but only if the revenue from the sale was previously included in the tax base of the legal person. For this purpose, a credit or trade receivable is considered a bad debt only if one of the following is true:

- It is more than 12 months past the due date for payment of the invoiced receivable and the creditor has sued for the receivables or an enforced collection procedure is initiated due to receivables.
- The receivables are registered in the bankruptcy procedure of the debtor or an agreement has been reached with the debtor who is not a physical or related person in the bankruptcy or liquidation procedure.

In the case of a bank or other authorised credit institution, a deduction is allowed for increases in the reserve account for customary losses due to unpaid loans, and the amount may not exceed 20% of the tax base.
Bosnia and Herzegovina

In the case of an insurance or reinsurance company, a deduction is allowed for increases in reserves as registered in accounting documents and as authorised according to applicable law. For insurance contracts pertaining to reinsurance, reserves are to be reduced so that they cover only part of the risk remaining with the insurer, and the amount may not exceed 20% of the tax base.

**BD charitable contributions**
Contributions to public institutions and humanitarian, cultural, and educational organisations are deductible in an amount not exceeding 3% of the fiscal year’s total revenue.

**BD fines and penalties**
Fines and penalties are not tax deductible.

**BD taxes**
Taxes are generally tax deductible expenses, except for paid CIT.

**BD other significant items**
Expenditures that are recognised and deductible from revenue also include the following:

- 30% of the cost of entertainment related to the legal person’s economic activity.
- Awards to employees, up to the prescribed amount.
- Costs of business trips, meal allowance, transportation, and holiday allowance, up to the prescribed amount.
- Sponsorship expenses in an amount not exceeding 2% of the fiscal year’s total revenue.
- Scholarships to students in an amount up to 75% of average monthly net salary in Brčko District.
- Committee membership fees, up to 0.2% of total revenue in the tax year.
- Expenses for research and development (R&D) in accordance with the Rulebook.

**BD net operating losses**
Losses may be carried forward and offset against income in the following five years. Tax losses are utilised on a FIFO basis.

Tax losses cannot be carried back.

**BD payments to foreign affiliates**
Payment to foreign affiliates is generally allowed if it relates to realised revenue.

---

**Group taxation**

**FBiH group taxation**
A business association has the right to request tax consolidation on the condition that all businesses in the group are residents of the Federation of Bosnia and Herzegovina.

A headquarters company and its branches may form a business association when there is direct or indirect control between them with no less than 90% share.

A request for tax consolidation must be filed to the authorised branch office of the tax authorities by a headquarters company.
Each group member is required to file its tax balance, and the headquarters of the business association may file a consolidated tax balance for the group.

The consolidated tax balance may offset losses of one or more businesses against the profit of other businesses in the association.

Individual group members are liable for the tax calculated on the consolidated balance proportionately to the profit from the individual tax balance, and the headquarters is the payer of the tax calculated on the consolidated balance.

Once approved, tax consolidation shall be applied for the consecutive period of no less than five years.

When one, several, or all the businesses in the association later opt for individual taxation, all group members shall be obligated to pay the difference proportionately on behalf of the tax privilege they have used.

**RS group taxation**
An affiliated group of legal persons located within Republika Srpska may elect to file a consolidated annual tax declaration.

An affiliated group of legal persons is a group of one or more legal entities from Republika Srpska that are connected through the ownership of stock with a common parent, provided that the common parent owns at least 80% of the stock in a legal person that is included in the affiliated group. If the common parent does not own at least 80% of the stock in a legal person that is included in the affiliated group, then the parent may file a consolidated tax declaration if one or more other legal persons in the affiliated group own at least 80% of the stock in such legal person.

**BD group taxation**
An affiliated group of legal persons located within Brčko District may elect to file a consolidated annual tax declaration.

An affiliated group of legal persons is a group of one or more legal entities from Brčko District that are connected through the ownership of stock with a common parent, provided that the common parent owns at least 80% of the stock in a legal person that is included in the affiliated group.

**Transfer pricing**
Transfer pricing requirements are imposed at the entity level. The Federation of Bosnia and Herzegovina, Republika Srpska, and Brčko District have different regulations in place, including different rules in regard to applicable methods, related parties, and documentation. The regulations in place do not differ if the transactions are within one entity, cross-border, or international. Basically, this means that all transactions can fall under the transfer pricing scope.

With Bosnia and Herzegovina not being an EU or an OECD member, the local legislation does not have the same requirements with respect to transfer pricing documentation as in EU countries nor does the legislation refer to the OECD guidelines.

**FBiH related parties**
In the Federation of Bosnia and Herzegovina, a related party is considered to be an individual or legal person who has the possibility of control or significant influence on
the business decisions of the taxpayer. Owning more than half or individually the most stocks or shares in a company is considered to be enabled control.

Significant influence is considered to be mutually high sales turnover, technical dependence, or otherwise gained control over the management.

**FBiH prescribed methods**
The FBiH CIT law recognises only two methods:

- Comparable uncontrolled price (CUP) method (primary method).
- Cost plus method.

**RS and BD related parties**
As per the applicable RS and BD legislation, related parties of a legal person are considered to be physical or legal persons if those persons possess more than 10% of active shares with voting rights.

A legal person can be a related party if it possesses more than 10% active shares in the other person indirectly or directly. Indirect ownership is considered to be:

- If a legal person possesses more than 10% of a dependent company, and that dependent company possesses more than 10% in the other legal person.
- If both legal persons have a common shareholder who possesses more than 10% active shares with voting rights in both legal persons.

**RS and BD prescribed methods**
The RS and BD regulations prescribe the following five methods that can be used in order to establish whether the prices are in accordance with the arm's-length principle:

- CUP method (primary method).
- Cost plus method.
- Resale price method.
- Profit split method.
- Transactional net margin method.

**Thin capitalisation**
There are no thin capitalisation rules in Bosnia and Herzegovina.

---

**Tax credits and incentives**

**FBiH tax incentives**

**FBiH foreign tax credit**
When a taxpayer generates income or profit through business activities outside of the Federation of Bosnia and Herzegovina (directly or through a business unit) and pays the profit tax on such activities, the tax paid abroad shall be credited, up to the amount of the profit tax that would have been paid for the income or profit generated by the same activities in the Federation of Bosnia and Herzegovina.

**FBiH investment incentive**
A taxpayer who invested in production within the territory of the Federation of Bosnia and Herzegovina for five consecutive years for a minimum fee of BAM 20 million will be
relieved from taxation for a period of five years, starting with the first year in which it has invested at least BAM 4 million.

**FBiH special needs employment incentive**
A taxpayer who employs more than 50% of handicap or special needs individuals within its company for a period of time longer than one year is relieved from CIT for the year in which more than 50% of handicap or special needs individuals are employed within the company.

**FBiH export incentive**
A taxpayer who realises more than 30% of annual income by export will be relieved from CIT for that year.

**RS tax incentives**

**RS foreign tax credit**
If a legal entity from Republika Srpska obtains revenue from a foreign state and the revenue is taxed both in Republika Srpska and in the foreign state, then the tax paid to the foreign state, whether paid directly or withheld and remitted by another person, is to be credited from RS CIT, unless such legal entity from Republika Srpska elects to treat the foreign tax as a deductible expenditure in determining the fiscal year tax base.

There are no other tax incentives available in Republika Srpska.

**RS investment incentive for production companies**
For a taxpayer who invests in PPE for performing its own registered business activity in the territory of Republika Srpska, a deduction is allowed for the amount of the investment. Only companies registered for production activity in accordance with special Ministry decision can use this tax incentive.

If the taxpayer disposes of the PPE within three years of the year for which the tax incentive was used, the taxpayer will have to pay the additional tax as if they never used the incentive, as well as penalty interest for late payments.

**RS employment incentive**
For a taxpayer who employs 30 new employees (which were registered in the RS unemployment agency) for an indefinite period of time during the tax period, a deduction is allowed for the paid personal income tax and social security contributions for those employees.

If the taxpayer lets go of employees within three years for whom the tax incentive was used, the taxpayer will have to pay the additional tax as if they never used the incentive, as well as penalty interest for late payments.

**BD tax incentives**

**BD foreign tax credit**
If a legal entity from Brčko District obtains revenue from a foreign state and the revenue is taxed both in Brčko District and in the foreign state, then the tax paid to the foreign state, whether paid directly or withheld and remitted by another person, is to be credited from the BD CIT, unless such legal entity from Brčko District elects to treat the foreign tax as a deductible expenditure in determining the fiscal year tax base.
Bosnia and Herzegovina

**BD investment incentive**
For a taxpayer who invests in machines and equipment for performing its own registered business activity on the territory of Brčko District, a deduction is allowed for the amount of the investment.

**BD employment incentive**
For a taxpayer who employs new employees for an indefinite period of time during the tax period, a second deduction is allowed for the total amount of paid gross salaries for the new employees.

**Withholding taxes**

**FBiH WHT**
WHT in the Federation of Bosnia and Herzegovina is calculated on non-resident income generated throughout the territory of the Federation of Bosnia and Herzegovina.

The base for calculation of WHT is the gross amount paid by a resident of the Federation of Bosnia and Herzegovina to a non-resident for dividends, interest, royalties and other intellectual property rights, compensations for market research, tax consulting services, auditors’ services, fun and sports events, premium insurance for insurance or reinsurance of risk in the Federation of Bosnia and Herzegovina, telecommunication services between the Federation of Bosnia and Herzegovina and other countries, as well as all other services performed on the territory of the Federation of Bosnia and Herzegovina.

WHT shall be paid at the rate of 5% on dividend payments and 10% for interest, royalties, and other, if not reduced under a tax treaty.

**RS WHT**
Any legal or physical person from Republika Srpska, as well as any non-resident legal or physical person with PE in Republika Srpska, who pays revenue to a non-resident legal person is to withhold tax from the total payment of revenue and is to remit the withheld tax to the Public Revenues Account of Republika Srpska.

The WHT applies to the following revenue payments, regardless of whether the revenue is received in Republika Srpska or abroad:

- Payment of interest or its functional equivalent under financial instruments and arrangements from a resident.
- Payment for entertainment or sporting activities carried out in Republika Srpska, regardless of whether the revenue is received by the entertainer or sportsman or by another person.
- Payment for the performance of management, consulting, financial, technical, or administrative services, if the revenue is from a resident or if the revenue is paid by or included in the books and records of a PE in Republika Srpska or if such payment is deducted for the purpose of determining the tax base.
- Payment in the form of insurance premiums for the insuring or reinsuring of risks in Republika Srpska.
- Payment for telecommunication services between Republika Srpska and a foreign state.
- Payment of royalties.
- Payment of lease for movable property.
- Payment for the performance of other services in Republika Srpska.
WHT is not due on dividend payments.

The WHT rate in Republika Srpska is 10%.

**BD WHT**

Any legal or physical person from Brčko District, as well as any non-resident legal or physical person with PE in Brčko District, who pays revenue to a non-resident legal person is to withhold tax from the total payment of revenue and is to remit the withheld tax to the Public Revenues Account of Brčko District.

The WHT applies to the following revenue payments, regardless of whether the revenue is received in Brčko District or abroad:

- Payment of interest or its functional equivalent under financial instruments and arrangements from a resident.
- Payment for entertainment or sporting activities carried out in Brčko District, regardless of whether the revenue is received by the entertainer or sportsman or by another person.
- Payment for the performance of management, consulting, financial, technical, or administrative services, if the revenue is from a resident or if the revenue is paid by or included in the books and records of a PE in Brčko District or if such payment is deducted for the purpose of determining the tax base.
- Payment in the form of insurance premiums for the insuring or reinsuring of risks in Brčko District.
- Payment for telecommunication services between Brčko District and a foreign state.
- Payment of royalties.
- Payment of lease for movable property.
- Payment for the performance of other services in Brčko District.

WHT is not due on dividend payments.

The WHT rate in Brčko District is 10%.

**WHT rates based on available double taxation treaties (DTTs)**

Notes
1. The lower rate applies if the beneficial owner is a company (other than a partnership) that holds, directly, at least 25% of the capital of the company paying the dividends.
2. The lower rate applies if the beneficial owner is a company (other than a partnership) that holds, directly, at least 20% of the capital of the company paying the dividends.
3. The lower rates apply if the beneficial owner is a company (other than a partnership) that holds, directly, at least 10% of the capital of the company paying the dividends. The competent authorities of the contracting state shall, by mutual agreement, settle the mode of application of these concessions.

Tax administration

FBiH tax administration

FBiH taxable period
The taxable period is considered to be the calendar month.

FBiH tax returns
An FBiH taxpayer is obligated to file correctly and accurately a completed tax return (declaration) with the tax balance to the authorised branch office of the tax administration by 31 March of the following year.

The deadline for submission of annual calculation of business results is 28 February of the following year.

FBiH payment of tax
A taxpayer shall pay FBiH CIT pursuant to the final tax declaration. CIT prepayments are determined based on the tax return from the prior year and have to be paid monthly until the last day of the month for the previous month.
**FBiH tax audit process**
The tax system is generally based on self-assessment; however, many large and mid-size businesses are under continuous audit by the tax authority and the indirect tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller businesses with lower incomes are generally subject to audit on a random basis.

**FBiH statute of limitations**
The statute of limitations is five years.

**FBiH topics of focus for tax authorities**
The tax authorities focus increasingly on transactions with related parties with respect to transfer pricing and deductibility of expenses in general.

**RS tax administration**

**RS taxable period**
The taxable period is considered to be the calendar month.

**RS tax returns**
The RS tax declaration for a tax year shall be filed no later than 90 days upon the end of the tax year, and in case of a calendar year, no later than 31 March of the current year for the previous year.

**RS payment of tax**
A taxpayer shall pay RS CIT pursuant to the final tax declaration. CIT prepayments are determined based on the tax return from the prior year and have to be paid monthly until the tenth day of the month for the previous month.

**RS tax audit process**
The tax system is generally based on self-assessment; however, many large and mid-size businesses are under continuous audit by the tax authority and the indirect tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller businesses with lower incomes are generally subject to audit on a random basis.

**RS statute of limitations**
The statute of limitations is five years.

**RS topics of focus for tax authorities**
The tax authorities focus increasingly on transactions with related parties with respect to transfer pricing and deductibility of expenses in general.

**BD tax administration**

**BD taxable period**
The taxable period is considered to be the calendar month.

**BD tax returns**
The BD tax declaration for a tax year shall be filed no later than 90 days upon the end of the tax year, and in case of a calendar year, no later than 31 March of the current year for the previous year.
Bosnia and Herzegovina

**BD payment of tax**
A taxpayer shall pay BD CIT pursuant to the final tax declaration. CIT prepayments are determined based on the tax return from the prior year and have to be paid monthly until the tenth day of the month for the previous month.

**BD tax audit process**
The tax system is generally based on self-assessment; however, many large and mid-size businesses are under continuous audit by the tax authority and the indirect tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller businesses with lower incomes are generally subject to audit on a random basis.

**BD statute of limitations**
The statute of limitations is five years.

**BD topics of focus for tax authorities**
The tax authorities focus increasingly on transactions with related parties with respect to transfer pricing and deductibility of expenses in general.

Additionally, the BD authority scrutinises allocation of expenses for bank branches operating in the district, often decreasing or not allowing the allocated expenses of the headquarters.

---

**Significant developments**
There have been no significant corporate tax developments in Botswana during the past year.

---

**Taxes on corporate income**
Botswana has a source-based taxation system.

Corporate income tax (CIT) is charged at a single flat rate of 22%. Manufacturing companies having the approval from the Minister of Finance for a special tax rate of 15%.

**International Financial Services Centre (IFSC) profits**
IFSC companies are taxed at a flat rate of 15% and will continue to be taxed at that rate going forward. Companies must apply for a certificate to be classified as IFSC companies, which deal only in specified services and only with non-residents.

**Mining profits**
Mining profits, other than profits from diamond mining, are taxed according to the following formula:

Annual tax rate = 70 minus (1,500/x), where x is taxable income as a percentage of gross income.

The tax rate shall not be less than the flat CIT rate of 22%.

**Diamond mining**
Diamond mining is usually taxed in terms of an agreement with the government of Botswana.

**Local income taxes**
There are no local, state, or provincial government taxes on income in Botswana.

---

**Corporate residence**
If a company's registered office or place of incorporation is in Botswana or if the company is managed and controlled in Botswana, then the company is considered a resident of Botswana.
Botswana

Permanent establishment (PE)
PE has been defined in the Income Tax Act only in the limited context of interest, commercial royalty, and management or consultancy fee. However, PE is defined in all the double taxation agreements (DTAs) that Botswana has entered into with other contracting states. The definition of PE in the DTA follows the definition in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and Capital.

Other taxes

Value-added tax (VAT)
VAT is imposed on taxable supplies and the importation of goods into Botswana. The standard VAT rate of 12% applies to all supplies that do not qualify for an exemption or are not zero-rated.

Vocational training levy (VTL)
VTL is payable when submitting the VAT return by every taxpayer who is registered for VAT. It is calculated as a percentage of turnover ranging from 0.2% to 0.05%, depending on the turnover of the company.

Customs and excise duties
Customs and excise duties are charged on importation of goods (including currencies) into or exported out of Botswana. The import duties may also include anti-dumping and countervailing duties. No customs duties and excise duties are charged on trade between Botswana and South Africa, Lesotho, Namibia, and Swaziland, as these five countries constitute a Southern African Customs Union. In terms of the Botswana/Zimbabwe Trade Agreement, goods originating from either of the trading partners are exempted from payment of customs duties under the condition that the goods meet a minimum of 25% local content. Excise duty and local taxes, such as VAT, are due and payable where applicable.

Property taxes
There are no property taxes in Botswana.

Capital transfer tax (CTT)
CTT is levied on the donee upon the transfer (by way of inheritance or gratuitous disposal of property) of tangible or intangible, movable or immovable, property, at 12.5%.

Transfer duties on immovable property
Transfer duty is levied at 5% of the value of immovable freehold and leasehold property. The first 200,000 Botswana pulas (BWP) of such value are exempt from transfer duty in case of transfer to a Botswana citizen.

In the case of agricultural property, transfer duty is levied at the rate of 30% for a non-citizen. This duty is 5% in the case of a Botswana citizen.

Stamp duty
There is no stamp duty in Botswana.
Branch income

CIT payable on branch profits is 30%.

Income determination

Inventory valuation
Inventories are valued at cost less such amounts, if any, that the Commissioner General believes are reasonable as representing the amount by which the value of such stock has been diminished because of damage, deterioration, obsolescence, or other cause. Although not expressly excluded by legislation, last in first out (LIFO) has not been accepted in practice by the tax authorities.

Capital gains
Gains from disposal of specified capital assets (immovable property and marketable securities, including shares in private companies) are included in taxable income in the hands of the corporate taxpayer. Acquisition costs of immovable property are subject to a 10% compound annual addition for inflation for the period from acquisition to 30 June 1982, and thereafter to an inflation addition based on the increase in the consumer price index to the date of sale. For other gains, no inflation allowances are granted, but the taxable gain is set at 75% of the total gain.

Currently, the sale of any shares, units, or debentures of a resident company is exempt from tax under any of the following circumstances:

• The resident company whose shares are being sold is a public company.
• The shares, units, or debentures are traded on the Botswana Stock Exchange.
• The company has released for trading 49% or more of its equity on the Botswana Stock Exchange.

This exemption only applies if the shares, units, or debentures were held by the taxpayer for a period of at least one year prior to the date of disposal.

The aggregate amount of capital losses is offset against the aggregate amount of capital gains in the same tax year. Any excess of loss is deducted from aggregate gains over losses accruing in the succeeding tax year only. Capital losses cannot, in any circumstances, be deducted against other income.

Dividend income
Dividend income from local sources is not subject to tax.

Interest income
In the case of a resident company, interest income is included in gross income and taxed at the CIT rate. In the case of a non-resident company, interest income is subject to withholding tax (WHT), which constitutes a final tax.

Royalty income
Royalty income is included in gross income and taxed at the CIT rate. In the case of a non-resident company, royalty income is subject to WHT, which constitutes a final tax.

Partnership income
Partnership income is taxed in the hands of the partners, in proportion to their share in the partnership.
Botswana

**Foreign income**
Resident corporations are not generally taxed on a worldwide income basis. However, interest and dividend income from a foreign source is taxed in the hands of the resident company on an accrual basis. Relief is given for any WHT imposed on such income.

**Deductions**

**Depreciation and depletion**
Annual and capital allowances available are as follows.

**Companies other than mining companies**
Annual taxation allowances for expenditures incurred on machinery and equipment before 30 June 1982 can be claimed up to 100%. This allowance may be for any proportion of previously unclaimed expenditures. For expenditures incurred on machinery and equipment after 30 June 1982, annual allowances are granted, calculated on cost by the straight-line method on the basis of the expected useful lives of the individual assets. Guidelines are provided for expected useful lives of different categories of assets, which vary from four to ten years. Book depreciation is not required to conform to tax depreciation. The capital allowance claimable on a company motorcar is restricted to a maximum of BWP 175,000.

An initial allowance of 25% of cost is granted on certain industrial buildings. All industrial and commercial buildings (excluding residential properties) are granted a 2.5% annual allowance based on cost or, in the case of an industrial building on which an initial allowance has been claimed, the original cost less the initial allowance.

Balancing allowances and charges are brought to account on the disposal of assets on which allowances have been claimed. Where disposal value of an item of machinery or equipment exceeds the difference between expenditures incurred on the asset and allowances granted, the whole amount is taxable as corporate income or the balancing charge can be offset against further additions of new equipment, thus providing rollover relief. However, there is no rollover relief on motorcars except where the cars are used in a car rental or taxi service business.

**Mining companies**
In ascertaining the business income for any tax year from a business of mining, there shall be deducted from business income an allowance, to be known as a mining capital allowance, computed in accordance with 100% of the mining capital expenditure made in the year in which such expenditure was incurred, with unlimited carryforward of losses.

**Goodwill**
Amortisation of goodwill is not allowed as a tax deductible expense.

**Start-up expenses**
Start-up expenses are not specified in the law. However, pre-incorporation expenses might be disallowed since, generally, expenses incurred when there is no income are not allowed.

**Interest expenses**
Interest paid or accrued to a resident is deductible as an expense. Interest paid to a non-resident will be allowed as a deduction in the year where the relevant WHT on interest has been remitted to the Botswana Unified Revenue Service (BIRS).
**Bad debt**
Bad debts written off and specific provisions will be allowed as a deduction when computing taxable income. General provisions are not allowed as a deduction.

**Charitable contributions**
Donation made to (i) any educational institution recommended by the Ministry of Education or (ii) any sports clubs or sports associations recommended by the Ministry responsible for sports, and approved by the Commissioner General, shall be deducted when arriving at taxable income, limited to 20% of the chargeable income.

**Fines and penalties**
Penalties and associated interest are not allowed as a deduction.

**Taxes**
Any taxes paid are specifically disallowed in computing a company's taxable income.

**Other significant items**
An allowance is granted for dwelling houses erected for employees by a business other than a mining business. The amount of the allowance is the lower of cost or BWP 25,000 for each dwelling house constructed.

A deduction of 200% of the cost of an approved training expenditure is allowed.

Companies with shareholders having 5% or more of equity, either directly or indirectly, are classified as close companies, and there are additional tax regulations in respect of these shareholders.

Small companies, that is resident private companies whose gross income does not exceed BWP 300,000, may elect that the company be taxed as a partnership.

Expenses incurred by the company for having its shares listed on the Botswana Stock Exchange are deductible in determining the chargeable income of the company.

**Net operating losses**
Losses may be carried forward for five years, with the exception of farming, mining, and prospecting operations, for which there is no time limit. There is no allowance for carrybacks.

**Payments to foreign affiliates**
Royalties, interest, and service fees paid to foreign affiliates are generally deductible, provided such amounts are at arm's length and WHT is paid.

In the case of a mining company, head office expenses allowed as a deduction in ascertaining gross revenue from mineral licence shall be limited to 1.5% of gross income for the year of assessment, and any excess of such expense above the limit shall be treated and taxed as a dividend.

Where the interest rate on a loan made by a foreign-based mining company to an affiliate mining company resident in Botswana is considered by the commissioner to be in excess of the market rate, such excess will be disallowed as a deduction and taxed as a dividend.
Botswana

**Group taxation**

There are no concessions for group taxation, other than for wholly-owned subsidiary companies of the Botswana Development Corporation Limited (BDC).

BDC was established in 1970 to be the country's main agency for commercial and industrial development. The government of Botswana owns 100% of the issued share capital of the Corporation.

Where in any tax year a wholly owned subsidiary of BDC has incurred any assessed loss, such member may, during the current tax year, by notice in writing to the Commissioner General, elect that the whole or part of such assessed loss shall be deducted in ascertaining the chargeable income of one or more of the other wholly owned subsidiaries.

**Transfer pricing**

Botswana currently does not have any transfer pricing regulations, so transfer pricing is currently monitored through the anti-avoidance provisions contained in Section 36 of the Income Tax Act.

The arm's-length principle should always be followed in transactions between related parties. If such transactions have created rights or obligations that would not normally be created between independent persons dealing at arm's length, the Commissioner General may determine the liability in such manner as deemed appropriate. However, related party balances arising out of normal trading transactions (e.g. credit purchases with a 30 day credit period) would not be subjected to these provisions.

Interest (at prime rate) should be charged/provided on loans from shareholders/amounts due to related parties. If no interest has been charged/provided, in terms of the close company legislation, the BURS may deem interest at the prime rate prevailing at the beginning of the tax year, as income in the hands of the lender without allowing the corresponding interest as a charge against the profits of the borrower. The borrower is obligated to deduct WHT at the prevailing rate on the deemed interest.

Amounts due from shareholders/directors may be deemed as dividend income and shall form part of the taxable income of the borrower, in which event these will be taxed at the prevailing dividend WHT rate in the hands of the borrower.

**Thin capitalisation**

Thin capitalisation rules can be found in the Income Tax Act, but only in relation to mining companies and IFSC companies.

Where a foreign controlled resident mining company has a foreign debt-to-equity ratio in excess of 3:1 at any time during the year of assessment, the amount of interest paid by the resident company during that year on that part of the debt that exceeds the ratio shall be disallowed as a deduction, and the amount so disallowed shall be treated and taxed as a dividend.

In case of an IFSC company, where an amount of foreign debt interest is allowable as a deduction in a particular tax year and, at any time during that tax year, the total foreign debt exceeds the foreign equity product for that year, then the amount of foreign debt interest ascertained in accordance with the following formula will be disallowed:
I \times \frac{(A/B)}{\times \frac{(C/365)}{}}

A = \text{amount of the excess of the total foreign debt over the foreign equity product.}

B = \text{the total foreign debt.}

C = \text{the number of days in that tax year during which the total foreign debt exceeded the foreign equity product by that amount.}

I = \text{the foreign debt interest.}

Tax credits and incentives

To encourage investment in Botswana, extra tax relief on revenue or capital accounts will be granted for specific business development projects if the government is satisfied that such projects are beneficial to Botswana.

Foreign tax credit

A credit for the foreign WHT payable is permitted under domestic law. The credit, which is offset against the tax charged in Botswana, shall be the lesser of (i) the tax payable in the foreign country or (ii) the tax charged under the Botswana Income Tax Act on such amount.

Withholding taxes

WHT, at the following rates, must be deducted from payments to residents and non-residents unless a DTA exists.

<table>
<thead>
<tr>
<th>Residents</th>
<th>WHT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>

All rent and commission or brokerage payments to residents or non-residents are subject to WHT at 5% and 10%, respectively, where the total payment is BWP 36,000 per annum or more or the monthly payment is BWP 3,000 or more.

Botswana has tax agreements with the following countries, which provide for WHT at the rates shown.

Notes
1. 5% rate of WHT is applicable if the beneficial shareholder is a company resident in the DTA country and holds at least 25% of the share capital in the company paying dividends. Otherwise, the other rate applies.

---

**Tax administration**

**Taxable period**
Botswana has a fiscal year ending on 30 June. However, a business may select its own accounting year, which may end on a date other than 30 June. This accounting year is accepted for the computation of the company’s taxable income.

**Tax returns**
Botswana requires self-assessment, which means that the return submitted constitutes the assessment. The system is one that requires all taxpayers to file tax returns in standard format (providing information relating to taxable income earned) within four months after the financial year-end of the company.

**Payment of tax**
Under the self-assessment tax procedures, if the tax payable for a tax year exceeds BWP 50,000, then estimated tax is required to be paid in equal quarterly instalments over the period of 12 months ending on the company’s financial year-end date. Accordingly, the first quarterly payment should be made within three months of the beginning of the financial year and the balance quarterly payments at three monthly intervals thereafter. The final (balance) payment, if any, is to be made within four months from the end of the financial year, when submitting the return.

Where the tax is less than BWP 50,000, then the tax is payable within four months from the company’s financial year-end date.

**Tax audit process**
There is no prescribed audit process, and an audit can be initiated by any factor as determined by the BURS. The audit or inspection will commence with a request from the BURS for the taxpayer to make available any such records or information as may be required.
**Statute of limitations**
The assessment should be made any time prior to the expiry of four years after the end of the tax year to which it relates to. Tax returns submitted that have been assessed may not be reopened after a period of four years from date of assessment by the BURS.

**Topics of focus for tax authorities**
The BURS is focusing in establishing and strengthening the Large Tax Payers Unit, minimising the tax gap, and introducing electronic filing.

**Significant developments**

**Changes in Brazilian transfer pricing regulations regarding interest**

On 28 December 2012, the Brazilian government issued Law 12766/12 introducing changes to the Brazilian transfer pricing regulations regarding interest on related party transactions.

Until 2012, interest on related party loans were not subject to the Brazilian transfer pricing regulations, provided the respective transaction was duly registered with the Brazilian Central Bank. In September 2012, Law 12715 stated that interest on related party loans, even if registered with the Brazilian Central Bank, would be deductible only up to an interest rate equal to the London Interbank Offered Rate (LIBOR) dollar rate for six-month deposits plus a 3% annual spread. Also, the Ministry of Finance could reduce this percentage or restate it. However, such provisions were changed before becoming effective.

According to the new Law, interest paid or credited to a related party abroad, or to a beneficiary located in a low tax jurisdiction or under a privileged tax regime, will be deductible up to the amount that does not exceed the rate determined based on the following rules, plus a spread to be determined by the Ministry of Finance based on an average market spread:

i  in case of transaction in United States dollars (USD), subject to fixed interest rate: rate of Brazilian sovereign bonds issued in US dollars in foreign markets   
ii  in case of transaction in Brazilian reais (BRL), subject to fixed interest rate: rate of Brazilian sovereign bonds issued in Brazilian reais in foreign markets, and   
iii  in all other cases: LIBOR for the period of six months.

In the case of transactions in Brazilian reais, subject to a floating interest rate, the Ministry of Finance may determine a different base rate.

For transactions covered in item (iii) above, contracted in currencies for which there is no specific LIBOR disclosed, the LIBOR for US dollar deposits must be considered.

The deductibility limit must be verified on the contract date, it will apply during the full contract term, and the new rules will affect transactions to be carried out as of 1 January 2013. For this purpose, the renewal and the renegotiation of contracts will be treated as the signing of a new contract.
In the case of loans provided by Brazilian entities to a foreign related party, the criteria mentioned above must be considered to determine the minimum interest income to be subject to taxation in Brazil.

**Brazilian Federal Revenue Department issues further guidance on changes introduced in the transfer pricing legislation**

On 31 December 2012, the Brazilian Federal Revenue Department issued Normative Instruction (NI) 1312/2012, in order to provide further guidance on the changes introduced in the Brazilian transfer pricing regulations by Law 12715/12.

The main aspects introduced by NI 1312 are the following:

- In the case of adoption of the resale minus method, for purposes of determining the percentage of participation of the imported goods, services, or rights in the total cost of the item sold, such total cost must consider all costs incurred to have the item available for sale, including freight, insurance, taxes levied on imports, and customs clearance costs; based on the wording of law 12715, another possible interpretation was that such costs could not be considered in the total cost, which would lead to a better result for taxpayers.
- Back-to-back transactions are subject to transfer pricing rules; for this purpose, it should be considered as back-to-back transactions those in which the product is purchased from a foreign party and sold to another foreign party, and at least one of them is treated as a related party for Brazilian transfer pricing purposes, without the transit of goods in Brazil.
- The NI brought the list of the products considered as commodities for purposes of the application of the PCI and PCEX methods (new commodities methods for imports and exports, respectively), as well as the list of the commodities exchange markets that should be considered for purposes of the application of said methods; also, the NI provides the list of institutions involved in researches of specific sectors that can be considered, in the absence of quote in a commodities exchange, and it detailed what type of items can be considered in the determination of the market premium to be considered in the application of PCI and PCEX methods.
- The NI introduced changes in the profitability safe harbour available for exports: the minimum profitability required on exports, in order to be relieved from the obligation to prepare transfer pricing documentation for exports is now 10% (previously 5%), and it can only be applied in case the net exports to related parties do not exceed 20% of the total of net exports.
- In the case of exports of commodities, the PCEX method must be applied to all transactions and no safe harbour is available.

**Taxes on corporate income**

Brazilian resident companies are taxed on worldwide income. Non-resident companies are generally taxed in Brazil through a registered subsidiary, branch, or permanent establishment (PE), based on income generated locally. Other than that, non-resident companies can be subject to withholding tax (IRRF) on income derived from a Brazilian source.

Corporate income tax (IRPJ) is assessed at the fixed rate of 15% on annual taxable income, using either the ‘actual profits’ method or the ‘presumed profits’ method (see the Income determination section).
Brazil

**Surcharge**
Corporate taxpayers are also subject to a surcharge of 10% on the annual taxable income in excess of BRL 240,000.

**Social contribution on net income (CSLL)**
All legal entities are subject to CSLL at the rate of 9% (except for financial and insurance institutions, which are taxed at the rate of 15%), which is not deductible for IRPJ purposes. The tax basis is the profit before income tax, after some adjustments.

**Local income taxes**
Corporate income taxes are levied only at the federal level (i.e. there are no state or municipal income taxes).

---

**Corporate residence**
A corporation is considered resident in Brazil if it has been incorporated in Brazil, and its tax domicile is where its head office is located.

**Permanent establishment (PE)**
Brazilian tax law has yet to develop rules similar to those existing in other countries, which treat a non-resident as having a PE under various factual circumstances.

Currently, there are few rules to determine whether a foreign business constitutes a taxable presence in Brazil, and the concept of PE only appears in Brazil’s treaties.

In general, a non-resident company may be treated as having a taxable presence if it operates in Brazil either through: (i) a fixed place of business or (ii) an agent who has the power to enter into contracts in Brazil in the name of or on behalf of the non-resident.

---

**Other taxes**

**Value-added tax (VAT)**
VAT is payable on imports, sales, and transfers of goods and products in the form of (i) a federal excise tax (IPI) at various rates in accordance with the nature of the product (normally around 10% to 15%, but in certain cases ranging to over 300%) and (ii) a state sales and service tax (ICMS) with rates ranging from 7% to 25%.

Except for services related to freight and transportation, communications, and electric energy, which are subject to ICMS, income from services rendered is normally subject to a municipal service tax (ISS), which is not a VAT, with rates ranging from 2% to 5%.

**Import tax**
Import tax (II) is levied on the cost, insurance, and freight (CIF) price of the imported good. The rates depend on the degree of necessity and are defined in accordance with the product’s tariff code contained in the Mercosur Harmonised System (NCM/SH). The rates tend to be in the range of 10% to 20%, although there are many exceptions that are subject to higher or lower rates.

**Property taxes**
A property tax (IPTU) is levied annually based on the fair market value of property in urban areas at rates that generally vary according to the municipality and location of
the property. In the municipality of São Paulo, the basic IPTU rate is 1% for residential properties or 1.5% for commercial properties (both rates may be increased or decreased according to the market value of the property).

**Transfer taxes**
A property transfer tax (ITBI) is levied on the transfer of immovable property, with rates also varying based on the municipality where the property is located. The ITBI rate in the municipality of São Paulo is currently 2%, applied over the market value of the property.

A state property transfer tax (ITCMD) is normally payable at rates varying from state to state on inheritances and donations of goods and rights. In the State of São Paulo, ITCMD is charged at the rate of 4%.

**Tax on financial transactions (IOF)**
IOF is a tax levied primarily on certain financial transactions, such as loans, foreign exchange operations, insurance, and securities, as well as transactions with gold (as a financial asset) and foreign exchange instruments. The applicable rate will vary depending on the transaction. The IOF rate may be reduced to 0% in some cases, such as: (i) exchange transactions relating to the inflow of revenues in Brazil deriving from the export of goods and services; (ii) exchange transactions relating to the inflow and outflow of resources in and from Brazil, stemming from foreign loans, with average term exceeding 360 days; and (iii) remittances of interest on net equity and dividends relating to foreign investment.

Cross-border loans signed on or after 5 December 2012, with average payment terms of up to 360 days (one year), are subject to IOF at the rate of 6%, applicable on the foreign currency exchange transactions (inflow of funds into the country only).

**Social assistance contribution (COFINS)**
COFINS, a monthly federal social assistance contribution calculated as a percentage of revenue, is levied at the rate of 7.6%. A COFINS credit system is meant to ensure that the tax is applied only once on the final value of each transaction. However, some taxpayers (such as financial institutions, telecommunication companies, cooperatives, and companies that opt to calculate IRPJ and CSLL using a ‘presumed profits’ method) are still subject to the previous COFINS system, which applies a rate of 3% with no credit system.

**Federal social contribution (PIS)**
PIS, which is also a federal social contribution calculated as a percentage of revenue, is levied at the rate of 1.65%. A PIS credit system is meant to ensure that the tax is applied only once on the final value of each transaction. However, some taxpayers (such as financial institutions, telecommunication companies, cooperatives, and companies that opt to calculate IRPJ and CSLL using a ‘presumed profits’ method) are still subject to the previous PIS system, which applies a rate of 0.65% with no credit system.

**PIS and COFINS on imports**
Importation of goods and services are also subject to PIS and COFINS (in addition to all other taxes imposed on import transactions). PIS and COFINS are imposed on the Brazilian entity or individual (the importer of goods or services) and applied at the rates of 1.65% and 7.6%, respectively. The contributions paid upon import transactions may, in some instances, be creditable.
Brazil

**Contribution for Intervention in the Economic Domain (CIDE)**

CIDE is a contribution levied at the rate of 10% on remittances made by corporate taxpayers for royalties and for administrative and technical services provided by non-residents. CIDE is payable by the local entity, and, therefore, not creditable to the non-resident. CIDE does not represent a liability to the foreign recipient. CIDE is not applied on the payments relating to the license to use, market, or sublicense software, provided that it does not involve transfer of technology.

---

**Branch income**

Profits of branches of foreign corporations are taxable at the normal rates applicable to Brazilian resident corporations.

---

**Income determination**

Brazilian taxpayers have the option (subject to some restrictions) to calculate IRPJ and CSLL using an ‘actual profits’ method (‘Lucro Real’), which is based on total taxable income (book results before taxes), adjusted by certain additions and deductions as determined in the legislation.

Brazilian taxpayers also have the option to calculate IRPJ and CSLL using a ‘presumed profits’ method (‘Lucro Presumido’). Under the ‘presumed profits’ method, the income is calculated on a quarterly basis on an amount equal to different percentages of gross revenue (based on the entity’s activities) and adjusted as determined by the prevailing legislation.

---

**Inventory valuation**

Brazilian income tax regulations require that inventory may be valued at the actual average cost or by the cost of the most recently acquired or produced goods. Rulings to the effect that last in first out (LIFO) is not acceptable have been given.

---

**Capital gains**

Capital gains derived from the sale of assets and rights, including shares/quotas, are taxed as ordinary income. However, profits on certain long-term sales of permanent assets may be computed for tax purposes on a cash basis. Profits on long-term contracts may be computed on a percentage-of-completion basis. When these contracts are entered into with the government or government-owned companies, the profit may be recognised on a cash basis for tax purposes.

Except during the year when incurred, capital losses may be offset only against capital gains. Unused capital losses are treated similarly to income tax losses with regard to limits on use and carryforward period.

Capital gains derived by non-residents (including transactions carried out abroad between two non-resident investors, involving assets or rights located in Brazil) are taxed in Brazil. The Brazilian source performing the remittance of capital gains to the non-resident (whether a Brazilian acquirer or the local solicitor of a foreign acquiring entity) must withhold the applicable income tax on such amounts on behalf of the latter at the rate of 15% (or 25% if the beneficiary is located in a tax haven jurisdiction).
**Dividend income**  
No withholding tax (WHT) is payable on cash dividends or profits paid or credited to either corporate or individual local shareholders. Brazilian resident beneficiaries are not subject to further income tax.

Due to the harmonisation of Brazilian accounting standards with International Financial Reporting Standards (IFRS), new book-to-tax adjustments (not currently addressed by Brazilian tax law) are leading the tax authorities to reflect over which portion of distributable book profits actually fall within the scope of the tax exemption. This issue may evolve into more detailed discussions in the sense that a particular portion of distributable profits may be treated as not exempt in the future.

Foreign-source profits are subject to Brazilian income tax.

**Financial income**  
Fixed-rate interest income from short, medium, or long-term financial market transactions, including swap transactions, is subject to IRRF at rates ranging from 15% to 22.5%. Non-fixed financial gains related to stock/commodities exchange and/or futures market transactions are taxed at the rates of 20% (day-trade) and 15% (all other cases). The total income or gain is considered taxable income, and the tax withheld may be offset against the total tax due by the corporate taxpayer.

**Foreign currency exchange gain/loss**  
With respect to foreign currency exchange gain/loss, which may arise from receivables or liabilities denominated in foreign currency, Brazilian tax legislation allows the local company to elect to consider the related effect, for tax computation purposes, either upon an accrual or cash basis (i.e. actual receipt/payment of funds).

**Foreign income**  
Brazilian resident companies are taxed on worldwide income. See Controlled foreign companies (CFCs) in the Group taxation section for more information.

---

**Deductions**

**Depreciation and depletion**  
Depreciation is allowable on a straight-line basis over the useful life of the asset. The annual rates normally allowable are 10% for machinery, equipment, furniture, and installations; 20% for vehicles; and 4% for buildings. Accelerated depreciation is allowed for companies with a two or three working shift operation by increasing normal rates by 50% and 100%, respectively.

Depletion allowances are allowed for natural resources on a useful-life basis. Special incentive depletion allowances are granted for mining operations.

The new Brazilian accounting rules determine that companies must obtain a useful life study for fixed assets in order to determine the acceptable depreciation rates. However, for tax purposes, depreciation rates established by the Brazilian tax authorities are still being accepted under the so called 'Transitional Tax Regime' (RTT).

**Goodwill**  
Amortisation of goodwill that arises as a result of accounting for investments in subsidiary and associated entities by the equity pick-up method is deferred for taxation purposes until the related investment has been realised (e.g. sold, disposed). However,
under certain requirements, goodwill paid upon the acquisition of the shares or quotas of a permanent investment may be amortised before this realisation occurs (e.g. after a merger or a spin-off). It is important to note that, although still applicable for tax purposes (under the RTT, and until further regulation is issued), the amortisation of goodwill is no longer accepted under Brazil’s new accounting practices.

Amortisation of patents, trademarks, and copyrights, based on their legal limited life, is a deductible expense within approved limits.

**Start-up expenses**

As a general rule, and under the RTT, for tax purposes start-up expenses may be deferred and amortised on the straight-line basis over a period of not less than five years, beginning the month in which the business starts operating.

**Research and development (R&D) expenditures**

At the option of the company, R&D expenditures may be deducted when incurred or deferred until termination of the project and then amortised over a period of not less than five years.

**Interest on net equity**

Companies can pay interest (calculated on a pro rata basis and up to a given rate, known as the ‘long-term interest rate’ [TJLP], which is currently set at 5%) to partners and/or share/quota holders, based on the company’s net equity. Such interest, which may not exceed the highest of 50% of the annual profits or 50% of the accumulated earnings and profits, is deductible for both IRPJ and CSLL purposes and is subject to 15% IRRF at the source (or 25% if the beneficiary is located in a tax haven jurisdiction). Whenever the beneficiary is a legal entity subject to normal income tax in Brazil, the tax withheld at the source may be taken by the recipient as a tax credit against the normal corporate income tax due or the tax due at the source on distributions of interest. If the beneficiary is a Brazilian resident individual, such interest will not become subject to any further taxation.

**Interest and other payments to entities in a tax haven or under a privileged tax regime**

Provisions similar to those for thin capitalisation (see the Group taxation section) are also applicable to interest paid or credited by a Brazilian entity to an individual or legal entity (whether or not a related party) resident or domiciled in a tax haven or in a jurisdiction under a privileged tax regime. In these cases, the interest expense is only deductible for Brazilian income tax purposes if it is viewed as necessary to the company’s activities and the total amount of the Brazilian entity's debt with any foreign party resident or domiciled in a tax haven or in a jurisdiction under a privileged tax regime does not exceed 30% of the Brazilian entity's net equity.

The Law also provides that amounts paid, credited, delivered, used, or remitted under any title, directly or indirectly, to related or unrelated individuals or legal entities that are resident or domiciled in a tax haven or in a jurisdiction under a privileged tax regime will only be viewed as deductible for Brazilian income tax purposes if all of the following conditions are met: (i) the effective beneficiary of the payment is identified; (ii) there is evidence that the payment beneficiary has operational capacity (i.e. substance); and (iii) there is adequate documentation to support the relevant payments and the corresponding supply of goods, rights, or utilisation of services.
Brazil

Tax havens and privileged tax regime lists
Normative Instruction (NI) n. 1,037/2010, issued by the Brazilian tax authorities, lists several jurisdictions that are considered not to tax income or to tax it at a rate lower than 20%, or that deny access to information regarding shareholding and ownership of assets and rights.

The NI also enumerates jurisdictions that are considered to have ‘privileged tax regimes’, as set forth in Brazilian legislation. The following types of entities are included in the list:

• Holding companies incorporated under the law of Denmark, which do not carry out substantial economic activity.
• Holding companies incorporated under the law of the Netherlands, which do not carry out substantial economic activity. Note that inclusion has been temporarily suspended pending a review requested by the Dutch government.
• International trading companies (ITCs) incorporated under the law of Iceland.
• Offshore companies (KFTs) incorporated under the law of Hungary.
• Limited liability companies (LLCs) incorporated under the state law of the United States, owned by non-residents and not subject to US federal income tax.
• Holding companies (ETVEs) incorporated under the law of Spain. Note that inclusion has been temporarily suspended pending a review requested by the Spanish government.
• ITCs and international holding companies (IHCs) incorporated under the law of Malta.

It is generally understood that the concept of a privileged tax regime is subject to stricter transfer pricing, thin capitalisation, and tax deduction rules. As for the jurisdictions considered as tax havens, besides the tax consequences applicable for privileged tax regimes, the IRRF rate due on capital gains and cross-border payments, such as services fees, royalties, and interest, is increased from 15% to 25%.

Bad debt
Losses on bad debts are tax deductible, depending on the amounts, time overdue, and administrative and/or legal actions taken to recover losses. Losses arising from inter-company transactions are not tax deductible.

Charitable contributions
Donations are deductible, up to certain limits, if recipients are registered as charitable institutions.

Travel expenses
Travel expenses may only be considered deductible if they are duly documented and substantiated.

Medical and pension expenses
Expenses of group medical care and health insurance programmes for employees and contributions to private supplementary pension schemes are considered deductible if supplied to all employees indistinctly.

Fines and penalties
Punitive tax/contribution penalties are not deductible for tax purposes.
Brazil

**Taxes/contributions**
Taxes, contributions, and related costs, such as late-payment interest, are deductible for tax purposes on the accrual basis. This rule does not apply to taxes/contributions being or to be challenged by the taxpayer at any level of litigation, which are deductible for tax purposes only on a cash basis.

**Net operating losses**
Tax losses may be carried forward without any time limitation. However, the tax loss may not reduce taxable income by more than 30% of its amount prior to the compensation of the tax loss itself. Tax loss is defined as the accounting loss adjusted for tax purposes.

There is no carryback of tax losses.

**Payments to foreign affiliates and related companies**
Royalties and technical service fees (with transfer of technology or know-how) payable to foreign companies with a direct or indirect controlling interest in the Brazilian company are deductible for tax purposes (observing applicable deduction limits), provided the contract has been duly registered with the National Institute of Industrial Property (Instituto Nacional da Propriedade Industrial or INPI) and approved by the Brazilian Central Bank.

With regard to interest expense deriving from loan agreements with related parties/tax havens, the related interest expenses shall only be deducted for income tax purposes if: (i) the interest expense is viewed as necessary for the activities of the local entity; (ii) they are in compliance with the thin capitalisation rules; and (iii) they are in compliance with the new transfer pricing rules (mandatory for all inter-company loans contracted as of 1 January 2013), as mentioned in the Group taxation section.

**Group taxation**
Consolidated tax returns are not permitted in Brazil.

**Transfer pricing**
The Brazilian transfer pricing rules apply to import and export transactions of goods, services, and rights between related parties (the legislation provides a broad list of the parties considered as ‘related’ for transfer pricing purposes). Under such rules, the transfer price determined between related parties will be acceptable, for Brazilian tax purposes, if it is determined that such price is at arm’s length according to one of the traditional methods established by the legislation (no profit methods available). Moreover, all operations with jurisdictions considered as tax havens will also be subject to transfer pricing rules, whether involving related parties or not.

**Interest**
Regarding the Brazilian transfer pricing rules applicable to interest deriving from loan agreements with related parties, tax havens, or privileged tax regimes, the related payments must be within the rates established below, in addition to a spread yet to be determined by the Ministry of Finance, in order to be acceptable for tax deductibility purposes:

1. in case of transaction in United States dollars, subject to fixed interest rate: rate of Brazilian sovereign bonds issued in US dollars in foreign markets
ii in case of transaction in Brazilian reais, subject to fixed interest rate: rate of Brazilian sovereign bonds issued in Brazilian reais in foreign markets, and

iii in all other cases (e.g. euro): LIBOR for the period of six months.

In the case of transactions in Brazilian reais, subject to a floating interest rate, the Ministry of Finance may determine a different base rate.

For transactions covered in item (iii) above, contracted in currencies for which there is no specific LIBOR disclosed, the LIBOR for US dollar deposits must be considered.

**Royalties**

Operations involving royalty agreements will not be subject to transfer pricing rules if the related contract is registered with the Banco Central do Brasil (BACEN) and INPI.

**Services/Goods/Rights**

The adequacy of the price practiced between the related parties in any operations involving goods, services, and rights may be supported through the application of one of the following methods, as determined under the Brazilian transfer pricing regulations (the company may choose the most convenient method).

Methods used on import transactions:

- Comparable independent price (PIC) method.
- Resale price less profit (PRL) method.
- Production cost plus profit (CPL) method.

Methods used in export transactions:

- Export sales price (PVEx) method.
- Resale price method.
- Acquisition or production cost plus taxes and profit (CAP) method.

Please note that imports and exports of commodities, quoted in commodities exchange markets, must be tested through the use of the newly introduced methods PCI and PECEX, respectively. Based on these methods, taxpayers shall compare the transaction amounts with the daily average quote for each product.

Relief of proof rules for inter-company export transactions are available.

With regards to the PRL method, some relevant changes were recently introduced, such as:

- The PRL method shall now be calculated considering a specific mark-up determined for some industries (*), and a mark-up of 20% for the industries/sectors that are not specified in the legislation.

(*): 40% mark-up: pharma chemicals and pharmaceutical products; tobacco products; optical, photographic, and cinematographic equipment and instruments; machines, apparatus, and equipment for dental, medical, and hospital use; extraction of oil and natural gas; and oil derivative products. 30% mark-up: chemical products; glass and glass products; pulp, paper, and paper products; and metallurgy.

- The methodology to calculate the former PRL-60 (previously applicable to inputs), which gave rise to disputes with the tax authorities at the administrative and judicial
Brazil

courts, should be adopted under the new PRL method (until now it was included in a normative act issued by the tax authorities).

• Taxpayers are no longer required to include custom duty and other customs expenses in the tested price, nor are they required to include freight and insurance contracted with third parties, provided such third parties are not located in low tax jurisdictions or benefit from privileged tax regimes.

• The use of the taxpayer’s own transactions with third parties for purposes of the use of the PIC method will be acceptable only to the extent the comparable transactions are equivalent to 5% of the tested transactions.

**Thin capitalisation**
The Brazilian thin capitalisation rules establish that interest paid or credited by a Brazilian entity to a related party (individual or legal entity), resident or domiciled abroad, not constituted in a tax haven or in a jurisdiction with a privileged tax regime, may only be deducted for income tax purposes if the interest expense is viewed as necessary for the activities of the local entity and the following requirements are met:

(i) the amount of debt granted by the foreign related party (which has participation in the Brazilian entity) does not exceed twice the amount of its participation in the net equity of the Brazilian entity;

(ii) the amount of debt granted by a foreign related party (which does not have participation in the Brazilian entity) does not exceed twice the amount of the net equity of the Brazilian entity;

(iii) the total amount of debt granted by foreign related parties as per (i) and (ii) does not exceed twice the sum of participation of all related parties in the net equity of the Brazilian entity; and

(iv) in case debt is only granted by related parties that do not have a participation in the Brazilian entity, the total amount of debt granted by all of these related parties does not exceed twice the amount of the Brazilian entity’s net equity. If one of the mentioned 2:1 ratios is exceeded, the portion of interest related to the excess debt amount will not be deductible for Brazilian income tax purposes.

**Controlled foreign companies (CFCs)**
Profits of foreign subsidiaries, affiliates, and controlled companies are taxed at the date of the financial statements in which the profits are calculated, regardless of remittance. Double taxation may be avoided by means of foreign tax credits.

Very recently, the Brazilian Supreme Court (STF) passed judgment on a Direct Action on the Grounds of Unconstitutionality (ADI), confirming the constitutionality of CFC legislation with respect to controlled companies located in countries defined as ‘tax havens’ under the law and declaring the same CFC legislation unconstitutional with respect to associated companies located in countries not considered as ‘tax havens’ by the law.

No decision was taken in the case of controlled companies located in countries not defined as tax havens and associated companies located in tax havens.

Some guidance is still expected from the STF with regard to the applicability of double taxation treaties (DTTs) in order to avoid the taxation of the profits of foreign controlled companies.

**Tax credits and incentives**

**Foreign tax credit**
Brazilian resident companies are taxed on worldwide income, but they may compensate the income tax paid in the country of domicile of the branch, controlled, or associated
company, and the tax paid on earnings and capital gains, against the corporate income tax due in Brazil. The amount of tax effectively paid abroad, to be compensated, may not exceed the amount of income tax and surtax due in Brazil on the amount of profits, earnings, and capital gains included in the calculation of taxable income.

**Investment project incentives**

Total or partial exemption from duty, excise tax, and social contributions on imported equipment is granted on certain approved investment projects.

Approved investment projects are also granted accelerated depreciation on nationally produced equipment and access to low-cost financing. Sales of some capital equipment are exempt from state sales tax.

Brazilian corporate taxpayers can apply a percentage of their income tax liability on deposit for reinvestment and investment in their own approved investment projects. These approved investment projects are normally granted total or partial income tax exemption.

The Brazilian legislation also provides tax incentives for projects focusing on technological innovation.

**Greater Brasil Plan (Plano Brasil Maior)**

In August 2011, the Brazilian government announced several measures with the aim to benefit local manufacturers and exporters of goods and services. Referred to as ‘Brasil Maior’ (Greater Brazil), the government’s plan focuses on increasing national competitiveness through incentives for technical innovation, research, added value in production, as well as providing clear advantages for exporters.

**Tax incentives related to the realisation of FIFA’s 2013 and 2014 Cups**

**Tax exceptions**

In terms of incentives for FIFA's World Cups, the Brazilian legislation grants tax benefits to those involved with the organisation of FIFA's 2013 and 2014 Football Cups in Brazil, provided that such entities and events are previously licensed by the Brazilian tax authorities based on a list provided by FIFA.

These benefits include tax exemptions on import of several perishable goods or merchandise for use and consumption in the organisation of the events promoted by FIFA and its related entities, such as trophies, medals, plaques, statuettes, pins and badges, flags, and other commemorative objects; promotional material, flyers, and the like; and other similar non-durable material (which useful life is up to one year). The referred benefits are not applied to the import of durable goods and equipment, which shall be imported through the Special Temporary Admission Customs Regime (also with suspension of taxes).

The legislation also stipulates a series of exemptions on federal taxes granted exclusively: (i) to FIFA itself and related entities domiciled abroad; (ii) to FIFA’s Brazilian subsidiary and to the Brazilian Broadcasting Source; (iii) to FIFA’s service suppliers established in Brazil; and (iv) to non-resident individuals hired or engaged to work in the events. The referred entities are mainly exempt from a number of federal taxes, such as IRPJ, IRRF, IOF, IPI, CSLL, PIS/COFINS-Import, PIS/COFINS, and CIDE, depending on the case.
Brazil

The mentioned exemptions apply to taxable events occurring between 1 January 2011 and 31 December 2015.

Some municipalities have already issued legislation granting ISS exemptions in connection with the FIFA's 2013 and 2014 World Cups.

**RECOPA**

RECOPA is a special tax regime for the construction, expansion, reform, or modernisation of football stadiums, which will host the official matches of the 2013 Confederations Cup and the 2014 World Cup, to take place in Brazil. A specific licence is required prior to fruition of the associated benefits.

Legal entities that hold construction/reform projects approved by the Ministry of Sports may be entitled to the following benefits:

- Suspension of II, IPI, and PIS/COFINS-import on the import of machinery, working instruments, equipments, and construction material to be used or incorporated in the construction of football stadiums.
- Suspension of PIS/COFINS and IPI on local acquisition of the abovementioned goods.
- Suspension of PIS/COFINS-import on import of services by the RECOPA beneficiary.
- Suspension of PIS and COFINS on local provision of services to RECOPA's beneficiaries.

These suspensions may be converted to a 0% tax rate (exemption) after the incorporation of such goods in the construction/reform process.

**Tax incentives related to the realisation of the Olympic and Paralympic games**

The Brazilian government has also issued legislation that provides for tax measures applicable to operations involving the organisation or realisation of events directly related to the 2016 Olympic and Paralympic Games to be held in Rio de Janeiro.

The Law provides for the exemption of federal taxes due on import of goods or services used exclusively in activities directly related to the organisation or realisation of both events, such as trophies, medals, plaques, statuettes, pins and badges, flags, and other commemorative objects; promotional material, flyers, and the like; and other similar non-durable material (which useful life is up to one year). Taxes included in this exemption are II, IPI over imports due on customs clearance, and PIS/COFINS-Import, among other charges and duties.

Non-resident individuals entering Brazil with a temporary visa, employed or contracted by the above organisations in order to carry out activities related to the events' organisation, are exempt of individual income tax (IRPF).

Furthermore, the International Olympic Committee (IOC), the entities related to it (defined as the legal entities domiciled abroad or in Brazil that belong or are controlled by the IOC, directly or indirectly) and the Organizing Committee of the 2016 Olympic Games - RIO 2016 (non-profit legal entity domiciled in Brazil for the purpose of fostering, developing, and facilitating the requirements foreseen in the warranties entered into by Rio de Janeiro municipality and the IOC to achieve the 2016 Olympic Games) are exempt from a number of federal taxes, mainly IRPJ, IRRF, IOF, IPI, CSLL, PIS/COFINS-Import, and CIDE. With regards to RIO 2016, the IRRF exemption applies...
to income paid, credited, delivered, used, or remitted by or for this entity, regarding the supply of goods or services.

The Law also provides for the exemption of IPI and PIS/COFINS in the acquisition of goods and services in the local market used in the organisation or realisation of the events.

In order to enjoy these benefits, the IOC and associated companies, the Court of Arbitration for Sport (CAS), the World Anti-Doping Agency (WADA), National Olympic Committees, International Sporting Federations, media companies and accredited transmitters, sponsors, and IOC and RIO 2016 service providers must be established in Brazil if they commercialise products or services in Brazil or employ individuals with or without a formal employment relationship, even if only for organising or realising the games.

The mentioned exemptions apply to taxable events occurring between 1 January 2013 and 31 December 2017.

Some municipalities have already issued legislation granting ISS exemptions in connection with the Olympic and Paralympic Games.

**Regional incentives**
Income tax exemptions or reductions are also available for companies set up in specified regions within Brazil, primarily the north and northeast regions. These incentives are designed to accelerate the development of certain less-developed regions and industries considered to be of importance to the economy.

**Other incentives**
Excise and sales tax exemptions are granted to exporters of manufactured goods.

---

**Withholding taxes**

Profits/dividends distributed to resident or non-resident beneficiaries (individuals and/or legal entities) are not subject to IRRF. This provision is also applicable to dividends paid to non-resident companies located in a tax haven jurisdiction.

The IRRF rate applicable to payments for services rendered by non-resident companies or individuals is generally 15% but can be increased to 25% in certain cases.

Payments for services, royalties, and interest to non-resident companies located in a tax haven jurisdiction are subject to IRRF at the rate of 25%.

Certain types of income paid by Brazilian companies to non-resident recipients are subject to IRRF as follows:

### Notes

1. Note that the remittance of dividends is not subject to taxation in Brazil.
2. Treaty rates in excess of those in force for non-treaty countries are automatically reduced. The treaty concerned should be consulted to confirm that the tax reduction is applicable in each case.
3. For treaties with multiple IRRF rates, the following rules generally apply:
   - Dividends: if there was IRRF on dividends, which is not the case according to Brazilian legislation, the 10% (or 15%) rate would generally apply if the beneficial owner is a company that directly holds a certain minimum participation in the capital of the company paying the dividends; the 15% (or 25%) rate is considered for all other cases.
   - Interest: the 10% rate generally applies to loans with a certain minimum term granted for specific purposes (e.g. acquisition of capital goods); the 15% rate is considered for all other cases.
   - Royalties: the 10% rate generally applies to royalties arising from the use of, or the right to use, cinematograph films, films or tapes for television or radio broadcasting, and any copyright of literary, artistic, or scientific work produced by a resident of a contracting state; the 25% (or 15%) rate generally applies to royalties arising from the use of, or the right to use, trademarks; and the 15% (or 10%) rate is considered for all other cases.
**Tax administration**

**Taxable period**
For tax purposes, a company's year-end is 31 December. A different year-end for corporate purposes is irrelevant.

**Tax returns**
With few exceptions, corporate entities, including those that are foreign-controlled, must file an annual adjusting tax return consolidating the monthly results of the previous calendar year. This tax return must normally be filed by the end of June following the tax year ending on 31 December.

Supporting documentation must be retained for at least five years.

**Payment of tax**
In the case of income tax, it is calculated monthly, and prepayments must be paid by the last working day of the subsequent month. Any amounts of income tax due for the year (exceeding the prepayments performed) must be paid by the last working day of March of the subsequent year.

There is an option to pay the tax due at the end of each quarter in three instalments, the first one starting from the subsequent month to the end of the quarter. When income tax is calculated quarterly, the taxpayer must perform the applicable payment by the last working day of the month subsequent to the end of the quarter.

**Tax audit process**
Although all income tax returns are checked for mathematical accuracy, only a relatively small number are selected for further examination. Returns are selected for audit either manually or by computer, according to various criteria, including type of business, unusually large or small amounts of income or deductions, and random sampling.

No corporate entity, whether a taxpayer or not, is excused from furnishing information or explanations required by the tax authorities.

When audits are conducted on the premises of taxpayers, tax inspectors have broad powers to inspect books and documents and to request information and any data deemed necessary. This is generally disrupting and, in practice, every effort is made to expedite the conclusion of these audits.

Whenever a violation is determined during a tax audit, the inspectors must draw up an infringement notification, which starts the administrative procedure for additional tax assessments.

**Statute of limitations**
The tax authorities may generally audit taxpayers up to five years after the close of the tax year.

**Topic of focus for tax authorities**
It should be noted that, over the years, Brazil has applied a ‘form over substance’ approach. Nonetheless, as of 10 January 2001, Complementary Law 104/2001 introduced a substantial modification in the Brazilian tax code (the so-called anti-
Brazil

avoidance rule). This law establishes a substance-over-form approach that, once regulated, may allow the Brazilian tax authorities to disregard tax-driven transactions.

In our local practice, we have seen that tax authorities are keen on assessing taxpayers in relation to the economic substance of their operations (e.g. the use of special purpose entities to enable the amortisation of goodwill for tax purposes in Brazil).

Public digital bookkeeping system (SPED)
Brazil has implemented a public system of digital bookkeeping known as SPED, which aims at gradually replacing paper copies of invoices and tax records for electronic files. SPED can be defined as an instrument that unifies the activities of reception, validation, storage, and legalisation of records and documents that are part of the commercial and tax bookkeeping of companies, through a single, computerised flow of data.

Comprised of three pillars (electronic invoice, digital fiscal bookkeeping, and digital accounting bookkeeping), the implementation of SPED requires adjustments to the relationship with tax authorities, clients, suppliers and, mainly, on the internal operational processes, which will demand an integrated action from different areas (tax, accounting, information technology, supplies, production, commercial, and others). On the other hand, occasional inconsistencies from databases, as well as operational errors related to tax and accounting information to be generated, usually unknown to the companies’ administration, are subject to increased visibility and monitoring by the Brazilian tax authorities.

Ancillary obligations imposed on the importation of services
The Brazilian Revenue Service (Receita Federal do Brasil or RFB) issued regulations, which imposed an ancillary obligation regarding transactions carried out between Brazilian residents and non-residents involving services, intangible assets, and other operations. Whenever one of the previous situations takes place, tax authorities must be informed. The type of information to be disclosed is detailed in complementary rules issued by the RFB.

Said information is provided by means of an electronic system (SISCOSERV) made available at the RFB website. Those who must provide information to the local tax authorities include:

- The service provider or service contractor, when residing in Brazil.
- The individual or legal entity, resident in Brazil, who transfers/acquires an intangible asset, including intellectual property rights by means of cession, concession, licence, or any other means allowed by law.
- The individual, legal entity, or legal representative of an unincorporated entity, resident in Brazil, who carries out any operation that results in changes to its assets.

The legislation establishes a time schedule for implementation of the new provisions, based on different groups of activities.
**Significant developments**

**Corporate income tax (CIT) amendments**
Effective 1 January 2013, several amendments to the CIT Act have been adopted. Some of the major changes include the following:

- The mechanism for calculating and paying advance CIT instalments has been conceptually changed. The main change is that the amount of the instalments is determined by the entity based on a forecasted taxable profit for the current year (and not on the prior year taxable result as per the previous rules).
- One-off taxes are now calculated and paid on a yearly basis, compared to monthly calculation and payment before 2013.
- Submission of withholding tax (WHT) returns and payment of the tax, if due, should now be performed by the end of the month following the quarter during which the local entity accrued expense payable to a foreign entity.

**Priority order for settlement of tax and social security liabilities**
As of the beginning of 2013, payment of tax liabilities and social security contributions should be made to a single bank account of the National Revenue Agency (NRA). Only the contributions for supplementary mandatory retirement provisions and the liabilities under appealed/challenged tax assessment acts can be paid into separate bank accounts.

If a taxpayer has several public liabilities (e.g. tax and/or social security liabilities), the one with the earlier payment date will be settled first.

**Taxes on corporate income**
Bulgarian tax residents are taxed on their worldwide income. Non-residents are taxed on their income from Bulgarian sources only, through a permanent establishment (PE) and/or via WHT, depending on the case (see the Branch income section).

In general, corporate income is subject to CIT at a flat rate of 10%.

**Alternative tax**
Income earned by organisers of games of chance is subject to 15% alternative tax, applied on a specific tax basis (e.g. the total value of the stakes made). A fixed-sum tax is applied to the operation of gaming machines.

**Tonnage tax regime**
A special alternative tax regime applies to the operation of commercial maritime vessels, as per their net tonnage, at a rate of 10%.
Bulgaria

**Local income taxes**
There are no local government corporate income taxes in Bulgaria.

**Corporate residence**
A corporation is resident in Bulgaria for tax purposes if it is incorporated in Bulgaria.

**Permanent establishment (PE)**
PEs of foreign tax residents (e.g. branches) are treated as separate entities similar to Bulgarian residents for tax and accounting purposes.

The definition of a PE in the Bulgarian legislation follows, in general, the Organisation for Economic Co-operation and Development (OECD) model; however, it covers a broader scope of activities leading to a tax presence in Bulgaria. A PE is generally defined as a fixed place (own, rented, or otherwise used) through which a foreign entity partly or wholly carries out business activities in the country.

**Other taxes**

**Value-added tax (VAT)**
The standard VAT rate is 20%. A reduced VAT rate of 9% applies to certain tourist services. Some activities are zero-rated, including intra-Community supplies, exports of goods to countries outside the European Union (EU), and international transport of goods (i.e. transport to or from countries outside of the European Union).

Some supplies are VAT exempt without the right to a VAT credit, including (but not limited to) certain land transactions; leasing of residential property to individuals; and financial, insurance, gambling, educational, and health services. Options to charge VAT exist for certain land transactions, leasing of residential property to individuals, and finance lease contracts.

The following statutory periods for VAT refunds apply:

- 30 days for persons that have performed supplies subject to zero-rate (e.g. exports) within the last 12 months exceeding 30% of the total value of all taxable supplies performed by them in the same period, as well as by large investors meeting certain specific conditions.
- Two months and 30 days in all other cases.

The following mechanism for VAT recovery applies to VAT-registered companies: the positive or negative difference between the output VAT charged by the company and the input VAT for the respective month for which recovery is claimed results, respectively, in VAT payable or refundable. The VAT payable should be remitted to the state budget not later than the 14th day of the month following the respective month. VAT refundable is offset against any VAT payable in the following two months, and any remainder is effectively recovered within 30 days thereafter.

It is possible to claim a refund for VAT paid with respect to assets acquired not earlier than five years prior to the VAT registration, under certain conditions. In the case of real estate, the term is 20 years.
**Customs duties**

Customs duties are calculated in accordance with the EU customs tariff and regulations.

**Excise duties**

Excise duties are charged as a percentage of the sales price or customs value or as a flat amount in Bulgarian lev (BGN) per unit (or per other quantity measures, depending on the type of the excisable good), unless a suspension regime applies. For 2013, excisable products include petrol and diesel fuel, liquefied petroleum gas (LPG), heavy oil, kerosene, beer and spirits, tobacco and tobacco products, and electricity.

The applicable rates are as follows:

- Unleaded petrol: BGN 710 per 1,000 litres.
- Diesel: BGN 645 per 1,000 litres if used as motor fuel and BGN 50 per 1,000 litres if used for heating purposes.
- LPG: BGN 340 per 1,000 kg if used as motor fuel and BGN 0 per 1,000 kg if used for heating purposes.
- Kerosene: BGN 645 per 1,000 litres if used as motor fuel and BGN 50 per 1,000 litres if used for heating purposes.
- Natural gas: BGN 0.85 per gigajoule if used as motor fuel; BGN 0.10 per gigajoule if used for production purposes; and BGN 0 per gigajoule if used by households.
- Heavy oil: BGN 600 per 1,000 kg.
- Electricity: BGN 2 per MWh (zero rate if used by households).
- Beer: BGN 1.50/hl/°Plato.
- Wine: zero rate.
- Ethyl alcohol: BGN 1,100 per hectolitre.
- Cigarettes: 23% ad valorem plus BGN 101/1,000 pieces (minimum BGN 148).

Lower rates may apply in certain cases (e.g. beer produced by independent small breweries).

The Excise Duties and Tax Warehouse Act provides for the tax warehousing regime and regulates the production, storage, and movement of excisable products under duty suspension.

**Property tax**

The annual property tax rate is determined by each municipality and ranges from 0.01% to 0.45% of the tax value of property. Individuals and legal entities that are owners of immovable property (i.e. land and buildings) are liable for property tax. For individuals and residential properties of enterprises, the taxable base is the tax value as determined by the municipal authorities based on certain statutory criteria. The taxable base for properties of enterprises is the higher of the property’s gross book value and its tax value determined by the respective municipal authorities.

A garbage collection fee is payable for immovable property at a rate determined by the local municipal council annually.

**Transfer tax**

A transfer tax is due on the value of transferred real estate or motor vehicles, subject to certain exemptions (e.g. contributions in-kind, acquisitions under the Law on Privatisation and Post-privatisation Control). The rate of the transfer tax ranges from 0.1% to 3% and is determined by each municipality.
Stamp duties
There are no stamp duties in Bulgaria.

Insurance premium tax
A tax of 2% is levied on all insurance premiums paid under insurance agreements covering risks insured in Bulgaria. Life insurance, reinsurance, aircraft, vessels, and international transport insurance agreements are exempt from this tax. The taxable base is the insurance premium received by an insurance company under an insurance agreement.

Insurance companies and their tax representatives are liable to collect the tax and remit it to the budget monthly by the end of the month following the month when the insurance premium was collected.

Tourist tax
The tourist tax is levied with respect to the number of nights spent in hotels and other places for accommodation. The municipalities may determine the tax within a range of BGN 0.20 to BGN 3 per night, depending on the type of accommodation facility.

The tax is payable on a monthly basis by the 15th day of the following month.

One-off taxes
The following corporate expenses are subject to a one-off tax:

- Representative expenses related to a company’s business.
- Social expenses provided to employees in kind (monetary social expenses are subject to personal income tax).
- Expenses related to the exploitation and maintenance of cars where they are used for management activities (as distinguished from administrative activities).

The rate of the one-off tax with respect to the above expenses is 10%. Both the expenses and the related one-off taxes are deductible for CIT purposes.

National insurance contributions
National insurance contributions include social security and health insurance contributions.

The aggregate rate of social security contributions is 22.7% to 23.4%, of which 13% to 13.7% is payable by the employer and 9.7% is payable by the employee.

The aggregate rate of health insurance contributions is 8%, out of which 4.8% is payable by the employer and 3.2% is payable by the employee.

The total national insurance contribution rate (social security and health insurance) is 30.7% to 31.4%, out of which 17.8 to 18.5% is payable by the employer and 12.9% is payable by the employee.

* The range is due to the rate of contributions payable to the ‘Accident at Work and Occupational Illness Fund’, which is due only by the employer and can vary from 0.4% to 1.1%, depending on the employer’s economic activity. The rate for the administration and services sector is 0.5%.
Branch income

Although branches are not deemed to be separate legal persons, branches of non-resident companies have separate balance sheets and profit and loss accounts and are subject to CIT at the standard rate of 10% as well as other general taxes (e.g. VAT, property tax).

Representative offices of foreign entities are not allowed to carry out business activities and are not subject to CIT. A representative office registered under the Encouragement of Investments Act may perform only those activities that are not regarded as ‘economic activities’ (e.g. marketing activities normally carried out by a representative office and auxiliary to the activities of its head office). Representative offices do not constitute PEs of the non-resident entities unless they engage in business activities in breach of the law.

Profits repatriated by a branch to its head office abroad are not subject to WHT. However, certain income payable by a Bulgarian branch or a PE to other parts of the enterprise abroad may trigger WHT (e.g. income from technical services, interest, royalties) unless the respective expenses are not deductible to the branch or the PE, or are recharged at cost.

Income determination

The taxable result is based on the statutory accounting principles relating to profit/loss and adjusted for tax purposes. Statutory accounting is maintained on an accrual basis in line with the applicable accounting standards.

Small and medium-sized companies may apply specific national standards for the financial statements of small and medium-sized companies or, optionally, International Financial Reporting Standards (IFRS). The principles provided by the standards for the financial statements of small and medium-sized companies are similar to those provided by IFRS. Certain types of companies, including banks and insurance companies, are obligated to apply IFRS.

Inventory valuation

The tax legislation follows the accounting rules for inventory valuation methods. The accounting rules may restrict the application of certain methods (e.g. last in first out [LIFO] is not allowed under IFRS).

Inventory valuation and revaluation methods applicable under accounting standards may be used for tax purposes. Companies may choose the method of inventory valuation but must apply the chosen method consistently throughout the accounting period. An inventory of assets and liabilities is carried out in each accounting period. Accounting gains and losses realised upon revaluation of inventory will not be recognised for tax purposes and will form a temporary tax difference. These gains and losses will be recognised for tax purposes in the period in which the inventory is disposed of.

Capital gains

Realised capital gains are included in corporate income and are taxed at the full CIT rate.
Bulgaria

Note that capital gains from securities will not be subject to taxation if resulting from shares in listed companies and tradable rights in such shares on a regulated securities market in the EU/European Economic Area (EEA). Assets distributed as dividends are deemed realised at market value, and any capital gains arising from this will be subject to tax.

**Dividend income**
Dividends distributed by Bulgarian companies to foreign shareholders and resident individuals are subject to 5% WHT under the domestic legislation (see the Withholding taxes section for exceptions for payments to EU/EEA tax residents and under double tax treaties [DTTs]).

**Inter-company dividends**
Inter-company dividend payments between Bulgarian companies and dividends distributed by EU/EEA residents to Bulgarian companies (except for dividends from special purpose investment companies or in case of ‘hidden distribution of profits’) are not included in the tax base of the recipient company.

**Stock dividends**
No explicit regulation with respect to stock dividends exists in the Bulgarian CIT act. Rather, the tax treatment of stock dividends follows the accounting treatment.

**Interest income**
Interest income is included in the financial results of the company and is subject to 10% CIT.

**Exchange rate gains/losses**
Exchange rate gains and losses are reported in the profit and loss account and reflected in the assessment of taxable profit.

**Foreign income**
Income derived outside Bulgaria by resident legal entities and income derived in Bulgaria by Bulgarian branches of non-residents is included in the taxable base for the purpose of CIT, regardless of whether such income is subject to taxation abroad.

In instances where the provisions of a DTT are applicable, a tax credit or exemption for the foreign tax paid may be allowed. There is also a unilateral tax credit that may not exceed the amount of the tax that would be payable in Bulgaria for the same type of income.

Undistributed income of foreign subsidiaries of a Bulgarian resident company is not taxed.

**Deductions**

**Depreciation and depletion**
For accounting purposes, depreciation is calculated in accordance with the straight-line, progressive, or declining-balance methods of depreciation. Accounting regulations permit Bulgarian companies to establish a depreciation schedule for each tangible and intangible fixed asset on the basis of the method chosen by the company.
For tax purposes, only the straight-line method is permitted. For machines and equipment that are part of the initial investment, accelerated depreciation may also apply, subject to certain conditions.

For tax purposes, fixed assets are divided into the following seven categories:

<table>
<thead>
<tr>
<th>Category</th>
<th>Assets</th>
<th>Maximum rates (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>Massive buildings, industrial constructions/equipment, transmission facilities/lines (including electricity)</td>
<td>4</td>
</tr>
<tr>
<td>II</td>
<td>Machinery, production facilities, apparatuses</td>
<td>30/50</td>
</tr>
<tr>
<td>III</td>
<td>Vehicles (except cars), coverage of roads and runways</td>
<td>10</td>
</tr>
<tr>
<td>IV</td>
<td>Computers, peripherals to computers, software and rights to use software, mobile phones</td>
<td>50</td>
</tr>
<tr>
<td>V</td>
<td>Cars</td>
<td>25</td>
</tr>
<tr>
<td>VI</td>
<td>Long-term intangibles with legal or contractual limitations on the period of use</td>
<td>33⅓</td>
</tr>
<tr>
<td>VII</td>
<td>Other assets</td>
<td>15</td>
</tr>
</tbody>
</table>

Under certain conditions, assets classified in Category II that are new may be depreciated at a maximum rate of 50% for tax purposes.

The depreciation rate for Category VI is determined by the period of limitations, but not more than 33⅓%.

Depletion is not specifically regulated for tax purposes.

**Goodwill**

Goodwill is not amortisable under Bulgarian tax law.

**Start-up expenses**

Start-up expenses may be recognised as deductible in the year of establishment of the company.

**Interest expenses**

Interest expenses are recognised as deductible expenses, subject to the thin capitalisation rules applicable in Bulgaria (see Thin capitalisation in the Group taxation section).

**Bad debt**

Bad debt impairment costs can be deducted upon expiration of the statute of limitation period. Also, the impairment costs can be recognised for tax purposes upon transferring the receivables. Such impairment costs are tax deductible for financial institutions in the year of recognition.

**Charitable contributions**

Generally, charitable contributions to certain organisations or persons, specified by law, can be deductible at up to 10% of a company’s accounting profit.

**Fines and penalties**

Expenses for fines and penalties for violation of the legislation are not deductible.
Bulgaria

**Taxes**
CIT is not deductible for tax purposes. However, other taxes, such as one-off taxes on certain expenses (e.g. representative expenses, certain types of fringe benefits) or local taxes and fees may be recognised as deductible for CIT purposes.

**Net operating losses**
The taxpayer has the right to carry forward tax losses incurred in a given year over the following five years. The loss subject to carryforward is the negative amount of the financial result adjusted for tax purposes, with certain add-backs and deductions specified in the tax legislation.

Tax losses may be reversed up to the amount of the positive financial result after tax adjustments (without the effect of the loss subject to be carried forward itself).

Carryforwards of foreign-source losses may only offset income from the same source. However, EU/EEA-source losses may offset income from other sources, including Bulgarian sources.

Loss carryback is permitted in very specific cases.

**Payments to foreign affiliates**
Payments to foreign affiliates may be subject to recalculation by the tax authorities if such payments are not made at arm's length.

---

**Group taxation**
No group consolidation is permitted for tax purposes in Bulgaria. All companies must pay tax on the basis of individually assessable profits and losses.

**Transfer pricing**
Bulgarian law requires that taxpayers determine their taxable profits and incomes applying the arm’s-length principle to prices at which they exchange goods, services, and intangibles with related parties (transfer prices). Bulgarian transfer pricing rules generally follow OECD Transfer Pricing Guidelines.

Transfer prices are not set in compliance with the arm’s-length principle where:

- prices of the supply of goods or services differ from the market prices or
- loans are received or granted against an interest rate that differs from the market interest rate effective at the time the loan agreement is concluded.

The market interest rate is defined as the interest payable under the same conditions for a loan provided or received, notwithstanding the form of the loan, between non-related parties. The market interest is determined according to the market conditions.

The taxable person should be able to evidence that its relations with related parties are in line with the arm’s-length principle.

For the purposes of transfer pricing rules, market prices are determined by the following methods:

- Comparable uncontrolled price method.
- Resale price method.
• Cost plus method.
• Transactional net margin method.
• Profit split method.

Preparation of transfer pricing documentation is not mandatory but is recommendable for material related party transactions. Recently, the revenue authorities have tended to focus more on the transfer pricing area.

Currently, there is no possibility to obtain an Advance Pricing Agreement (APA). However, it is possible to obtain an opinion from the revenue authorities on a case-by-case basis. Such opinions are not binding, but they may provide protection from assessment of interest for late payment and penalties.

**Thin capitalisation**
Interest payable by local companies to local or foreign persons may be restricted by the thin capitalisation rules (which also apply to interest due to non-affiliated companies).

The tax deductibility for interest expenses that exceed interest income is restricted to 75% of the accounting result of the company, exclusive of interest income and expense. If the accounting result of the company before including the effect of the interest income and expenses is a loss, none of the net interest expense will be deductible for tax purposes. Interest on bank loans and interest under financial lease agreements are subject to thin capitalisation regulations only when the agreements are between related parties or guaranteed by or extended at the order of a related party.

The thin capitalisation rules do not apply if the debt-to-equity ratio does not exceed 3:1 for the respective tax period.

Interest expenses restricted in a given year under the thin capitalisation rules may be deducted from the financial result for tax purposes during the following five consecutive years. This reversal may be made up to the tax allowed interest expenses, as per the above formula.

**Tax credits and incentives**
Tax incentives may apply in certain circumstances, including:

• Partial granting of the CIT due for performance of agricultural activities.
• Additional tax deductions for hiring of long-term unemployed, handicapped, or elderly persons.
• Full granting back of the CIT due for investment in regions with high unemployment.

**Foreign tax credit**
See Foreign income in the Income determination section for a description of the foreign tax credit regime.

**Withholding taxes**
Bulgarian companies are required to withhold tax on payments of dividends and liquidation proceeds; interest (including that incurred under finance lease agreements and on bank deposits); royalties; fees for technical services; payments for the use
Bulgaria

of properties; payments made under operating leasing, franchising, and factoring agreements; and management fees payable to non-residents.

Capital gains from the transfer of shares in a Bulgarian company or immovable property located in Bulgaria realised by a non-resident are also subject to domestic WHT; however, the tax is payable by the non-resident. Capital gains from securities are not subject to WHT if they result from shares in listed companies and tradable rights in such shares on a regulated securities market in the EU/EEA.

Dividends and liquidation proceeds are also taxed where payments are made to resident individuals and non-profit organisations (for details on dividend payments between domestic companies, see Dividend income in the Income determination section). Dividends capitalised into shares (stock dividends) are not subject to WHT.

Interest and royalty payments payable to EU-based associated companies are subject to a reduced 5% WHT rate in Bulgaria. Associated company criteria are identical to those in the Interest and Royalty Directive and require holding of at least 25% for at least two years. Exemption from WHT on interest and royalties payable to associated companies will be introduced as of 1 January 2015.

Any fees for services and use of rights (in addition to technical services fees and royalties) accrued to entities in low-tax jurisdictions will attract 10% Bulgarian WHT unless there is proof of the effective provision of the supply. Subject to 10% WHT would also be any accruals for penalties or damages payments to entities in low-tax jurisdictions, except for insurance compensations. The tax legislation introduces a list of low-tax jurisdictions. These are certain off-shore territories that are explicitly listed, as well as countries with which Bulgaria has not signed a DTT and in which the applicable corporate tax rates are more than 60% lower than the applicable rate in Bulgaria.

Certain types of income (other than dividends) accrued by a PE of a foreign person to other parts of its enterprise located outside the country are subject to WHT (except for that mentioned in the Branch income section).

**Dividends**

When a dividend is accrued to a non-resident company or an individual (both resident and foreign), it is subject to WHT at a rate of 5%, unless the rate is reduced by an applicable DTT. No differentiation is made between portfolio and substantial holdings for purposes of this WHT on dividends.

Dividends distributed by a Bulgarian resident company to an entity that is a tax resident in an EU/EEA member state are not subject to Bulgarian WHT.

**Interest**

A 10% rate applies to interest (including interest from bank deposits) payable to a non-resident, unless the rate is reduced by an applicable DTT.

Interest on borrowings by the government or the Bulgarian National Bank from international financial institutions is not taxable if the respective loan agreements contain relevant exemption arrangements (international treaties override domestic legislation).

Interest paid to an associated EU-based related company is subject to a 5% WHT unless reduced by a DTT (require at least 25% holding for at least two years).
**Royalties**
Royalties payable to foreign persons are taxed at a rate of 10% at source, unless the rate is reduced by an applicable DTT.

Royalty payments to an associated EU-based related company are subject to a 5% WHT unless reduced by a DTT (require at least 25% holding for at least two years).

**Capital gains and technical services**
Capital gains and technical service fees payable to foreign residents are subject to 10% WHT, unless the rate is reduced by an applicable DTT. As per the domestic legislation, technical services include installation and assembly of tangible assets as well as consultancy services and marketing research.

**Application of DTT relief**
Applying DTT relief is generally possible only after completing an advance clearance procedure with the Bulgarian tax authorities. Companies have to evidence that they satisfy the requirements for applying the DTT (e.g. tax residence, beneficial ownership, existence of contractual relationship, actual accrual/payment of the income). The procedure usually takes 60 days to complete.

The above procedure has to be followed only if the annual income payable by a Bulgarian resident exceeds BGN 500,000 (approximately 250,000 euros [EUR]). In all other cases, DTT relief can be applied directly, through submitting a tax residence certificate and a beneficial ownership declaration with the payer of the income.

Beneficial ownership is explicitly defined in Bulgarian legislation. A company is considered a beneficial owner of the income if it has the right to dispose of the income, has discretion over its use, bears the whole or a significant part of the risk of the activity from which the income is realised, and does not qualify as a conduit company.

A conduit company is a company that is controlled by persons who would not benefit from the same type and amount exemption if the income was realised directly by them, does not carry out any economic activity except for owning and/or administering the rights or the assets from which the income was realised, and does not own assets, capital, or personnel relevant to its economic activity or does not control the use of the rights or assets from which the income was realised.

The conduit company restriction does not apply to companies that have more than a half of their voting shares traded on a registered stock exchange.

The following is a summary of the main parameters of the Bulgarian DTTs as of 1 January 2013:

<table>

**Notes**

* Under Bulgarian domestic legislation, dividends distributed to non-residents are subject to 5% WHT, unless the recipient is a resident of an EU/EEA member state.

** Under Bulgarian domestic legislation, interest and royalty payments to EU-resident companies satisfying the Interest and Royalty Directive requirements are subject to a reduced 5% WHT rate.

1. The lower rate applies to dividends paid out to a non-resident that is the direct owner of at least the equivalent of 100,000 United States dollars (USD) forming part of the capital of the company making the payment.
2. The reduced rate for royalties is available for the use of (or right to use) industrial, commercial, or scientific equipment.
3. The lower rate applies to dividends paid out to a foreign company that controls directly at least 25% of the share capital of the payer of the dividends. In the specific cases of the different countries, more requirements may be in place.
4. There is no WHT on royalties for the use of (or the right to use) scientific or cultural works.
5. The lower rate applies to dividends paid out to a foreign company that controls directly at least 15% of the share capital of the payer of the dividends.
6. There is no WHT on interest when paid to public bodies (government, the central bank, and, in several cases, certain governmental bodies).
7. 5% royalties are applicable if the Netherlands applies WHT under its domestic law.
8. Up to 10% branch tax may be imposed on PE profits.
9. The 10% rate on capital gains from securities applies in specific cases that are described in the respective treaty.
10. The zero rate on interest applies if the loan is extended by a bank and also for industrial, trade, and scientific equipment on credit.
11. The zero rate on interest applies if the interest is paid to public bodies (government, municipality, the central bank, or any financial institution owned entirely by the government), to residents of the other country when the loan or the credit is guaranteed by its government, or if the loan is extended by a company for any equipment or goods.
12. The Council of Ministers has stated its intention to renegotiate the DTIs with Austria, Malta, and Finland.
13. A 5% rate on royalties applies if the Swiss Confederation introduces its domestic law WHT on royalties paid to non-residents.
14. The 10% rate on interest applies if the interest is received from a financial institution, including an insurance company.
15. The 5% rate on royalties applies if the royalties are received for the use of copyright for literary, art, or scientific work.
16. The lower rate applies to dividends paid out to a foreign company that controls directly at least 10% of the share capital of the payer of the dividends.

www.pwc.com/taxsummaries
17. The zero rate applies to dividends payable by a Bulgarian resident entity to an entity resident in Malta. The 30% rate applies to dividends payable by a Maltese entity to a Bulgarian entity.

18. The 10% rate applies to dividends distributed by companies that enjoy a reduced or zero CIT by virtue of a tax incentive for investments. In all other cases, the rate is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the WHT rate may not be less than 7.5% or more than 12.5%.

19. The 5% rate applies to interest payable to banks or other financial institutions. The zero rate applies to interest payable to certain public bodies (governments, municipalities, central banks) or to residents of the other country when the loan or credit is guaranteed, insured, or financed by a public body of that country or by the Israeli International Trade Insurance Company.

20. The rate on royalties is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the WHT rate may not be less than 7.5% or more than 12.5%.

21. The rate on capital gains from securities is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the WHT rate may not be less than 7.5% or more than 12.5%. However, capital gains from transfers of shares in entities whose real estate properties exceed 50% of their assets are taxed in the country in which the real estate is located.

22. The zero rate applies to dividends and interest paid to certain public governmental and local bodies as well as entities fully owned by the state.

23. The 5% rate on royalties applies if the royalties are paid for the use of copyright for literary, art, or scientific work as well as for the use of industrial, commercial, or scientific equipment.

24. There is no WHT on interest when paid to and beneficially owned by public bodies (government, local public authorities, the central bank, or any financial institution wholly owned by the government), as well as on interest derived on loans guaranteed by the foreign government or based on an agreement between the governments of the states.

25. The 7% rate on royalties applies if the royalties are paid for the use of, or the right to use, cinematograph films and films or tapes for radio or television broadcasting, any patent, trademark, design or model, plan, secret formula, or process.

26. The zero rate applies for capital gains from shares in a Bulgarian resident company that are traded on the Bulgarian Stock Exchange.

27. In accordance with the EU Parent-Subsidiary Directive implemented in the Bulgarian legislation, dividends distributed by a Bulgarian resident company to an entity that is a tax resident in an EU member state may not be subject to Bulgarian WHT.

28. Full WHT at source may be levied on capital gains from the sale of shares in companies, the main assets of which are directly or indirectly holdings in real estate situated in Bulgaria, and in some other cases (subject to the specifics stipulated in the respective treaty).

29. There is no WHT on interest when paid to public bodies (government, the central bank, governmental institutions) or any financial institution wholly owned by the government.

30. Pension funds and charities are considered resident persons.

31. The zero rate does not apply to dividends distributed to real estate investment trusts (REITs).

32. The zero rate does not apply to interest paid under a back-to-back loan.

33. The benefits of the treaty are limited to entities that satisfy certain criteria (Limitation of Benefits clause).

34. The 5% rate on royalties applies if the royalties are paid for the use of, or the right to use, any patent, design, model, plan, secret formula, process, or know-how.

35. The treaty provides for 10% WHT on capital gains unless shares were sold on a recognised stock exchange or seller owned at least 20% of the issuing company’s capital.

36. The reduced rate for interest is available for bank loans (subject to specifics in the treaty).

Under some DTTs, technical service payments fall within the definition of royalty payments and are taxed accordingly.

---

**Taxable administration**

**Taxable period**
The financial and tax years coincide with the calendar year.

**Tax returns**
Annual profit must be declared no later than 31 March of the year following the financial (tax) year. Along with their annual CIT returns, companies are required to file financial information for their business activities during the year in a standard statistical form not subject to a financial audit. The self-assessment principle is applied.

**Payment of tax**
If a company realised net revenue from sales of more than BGN 3 million in the preceding year, it is liable for monthly CIT payments for each month in the current year. If the net revenue from sales for the preceding year is below BGN 3 million but above BGN 300,000, the company is liable for quarterly advance CIT payments for each quarter of the year except the fourth quarter. The amount of the monthly or quarterly CIT instalments is calculated based on the forecasted taxable profit for the current year.

Companies established during the current year and companies with net revenue from sales below BGN 300,000 for the preceding year are not required to pay advance CIT instalments.

The overpaid amount of CIT cannot be offset against advance and annual payments due for the next period. The overpaid amount may only be effectively claimed for refund by the taxpayer. The difference between the annual tax declared in the CIT return and the advance tax paid for the corresponding year must be paid by the deadline for submitting the tax return on 31 March of the following year.

**Priority order for settlement of tax and social security liabilities**
As of the beginning of 2013, payment of tax liabilities and social security contributions should be made to a single bank account of the National Revenue Agency (NRA). Only the contributions for supplementary mandatory retirement provisions and the liabilities under appealed/challenged tax assessment acts can be paid into separate bank accounts.

If a taxpayer has several public liabilities (e.g. tax and/or social security liabilities), the one with the earlier payment date will be settled first.

**Tax audit process**
Tax audits are usually performed every four to five years, corresponding to the period of the statute of limitations.

**Statute of limitations**
The statute of limitations, i.e. the period within which the state authorities are entitled to collect the tax liabilities and other related mandatory payments, is five years from the beginning of the year following the year in which the tax liabilities became payable. The above periods can be extended in certain cases. However, the maximum period of the statute of limitations is ten years.

**Topics of focus for tax authorities**
Transfer pricing is likely to become an area of focus for the tax authorities.
**Significant developments**

**Law on Financial Management 2013**
The Law on Financial Management 2013 has been recently promulgated. Under Chapter 3 of the Law, stamp tax applies on the following:

- 1 million Cambodian riels (KHR) (approximately 250 United States dollars [USD]) for certain documents relating to the establishment, dissolution, or merger of a business.
- 4% on the transfer value of transfer of title of certain assets (e.g. land, building, vehicles).
- 0.1% on the transfer value of transfer of company shares (partial or full).
- 0.1% on contract value of public procurement contracts for goods or services.

Receipts of land title deeds or land concession rights from the government are exempt from stamp tax.

**Cessation of sale of all types of tax forms**
The General Department of Taxation (GDT) of the Ministry of Economy and Finance issued a notification to inform taxpayers that from 1 January 2013 tax forms will no longer be sold. All tax forms are available for download on the GDT’s website at www.tax.gov.kh. Taxpayers can easily download the forms required by the Law on Taxation to fulfil their tax obligations. Taxpayers who do not have access to the internet may obtain copies of all tax forms from the GDT office or any tax branch for free.

**Notification for tax payment procedures at Canadia Bank**
As of 1 July 2012, tax payments to the GDT at the National Bank of Cambodia (NBC) are no longer being accepted; all tax payments payable to the GDT or its branches in Phnom Penh must be deposited at Canadia Bank into the relevant bank accounts.

Payments can be made by cash or commercial cheque at any branch of Canadia Bank in Cambodia. Taxpayers are required to keep the payment receipt issued by the bank for tax receipt purposes.

**Taxes on corporate income**
Cambodia’s taxation rules vary according to the taxpayer’s regime, the classification of taxpayers under different tax collection and control procedures of the GDT. Real-regime taxpayers include large or incorporated taxpayers duly registered with the Ministry of Commerce and the GDT. The majority of foreign investors will fall into the real regime. Unless otherwise stated, the focus of this summary is on real-regime taxpayers.
Resident taxpayers are subject to tax on worldwide income while non-residents are taxed on Cambodian-sourced income only. A permanent establishment (PE) is taxable on its Cambodian-source income only.

**Corporate tax rate**
The standard rate of corporate income tax, known as tax on profit (ToP), for companies and PEs is 20%.

**Industry-specific tax rates**
Oil and gas and certain mineral exploitation activities are subject to ToP at the rate of 30%.

Insurance companies are taxable at a rate of 5% on the gross premium income and at the rate of 20% on other income derived from non-insurance/reinsurance activities. Net interest income of insurance companies received after 4% or 6% withholding tax (WHT) is not taxable income.

**Minimum tax**
Real-regime taxpayers are subject to a separate minimum tax. The minimum tax is an annual tax with a liability equal to 1% of annual turnover inclusive of all taxes except value-added tax (VAT). However, an exemption has been provided for Qualified Investment Projects (QIPs) (see the Tax credits and incentives section for more information).

As a separate tax to the ToP, the minimum tax is due irrespective of the taxpayer’s profit or loss position (i.e. the minimum tax will be liable if the 1% of total annual turnover exceeds the 20% ToP liability).

**Additional ToP on dividend distribution**
A dividend-paying taxpayer is required to pay an additional ToP at the time of dividend distribution if the profit was previously subject to a 9% or 0% ToP. The rates of additional ToP vary depending on the profits to be distributed. For profit that has been subject to ToP at the rate of 20%, 9%, or 0%, that profit will be subject to additional ToP at the following rate respectively:

<table>
<thead>
<tr>
<th>ToP</th>
<th>Additional ToP</th>
</tr>
</thead>
<tbody>
<tr>
<td>20% (standard rate)</td>
<td>0%</td>
</tr>
<tr>
<td>9% (preferential rate, which was no longer applicable after 31 December 2010)</td>
<td>11/91 (approximately 12.09%)</td>
</tr>
<tr>
<td>0% (during tax holiday)</td>
<td>20%</td>
</tr>
</tbody>
</table>

A shareholder is entitled to establish a special dividend account from which the relevant dividend that was already subject to 20% ToP may be on-paid without further additional ToP obligations.

A dividend will be exempt from tax in the hands of the shareholder if additional ToP and WHT for non-resident shareholders has been paid.

**Local income taxes**
Local income taxes are not applicable in Cambodia.
Cambodia

**Corporate residence**

Resident taxpayers include companies organised, managed, or having their principal place of business in Cambodia.

**Permanent establishment (PE)**

A PE may be determined if there is a permanent place or entity through which the non-resident persons carry on their business or if there is an exercise of the authority to conclude a contract on behalf of a foreign entity or if business activities exceed certain time periods in Cambodia.

Factors to be considered in determining a PE include a place of management, an agent or office, a warehouse or factory, a workshop, any place of extraction of natural resources, a plantation, etc. Carrying out projects (e.g. supervisory activities of construction project, provision of services) exceeding a time period of six months in any 12-month period may also be considered as having a PE.

**Other taxes**

**Value-added tax (VAT)**

VAT is applicable to real-regime entities and is charged at 10% on the value of the supply of most goods and services.

Exported goods and services rendered outside Cambodia are zero-rated. In addition, 0% VAT applies to the supporting industries or contractors who directly supply goods or services to the export-oriented garment manufacturers, textile, footwear industries, and domestic supplies of paddy rice.

Some supplies are VAT exempt, the main categories being public postal services, medical and dental services, electricity, transportation of passengers by wholly state-owned public transport systems, insurance services, and primary financial services.

VAT returns and payments are due within 20 days of the following month. Note that strict record-keeping requirements do exist.

**Import and export duties**

Import duties are levied on a wide range of products. Rates vary from 0% to 35%. Following Cambodia’s entry into the Association of South-East Asia Nations (ASEAN) during 1999, the government is required to reduce import duties in accordance with the Common Effective Preferential Tariffs program.

Export duties are levied on a limited number of items, such as timber and certain animal products (including most seafood).

**Specific tax on certain merchandise and services (SPT)**

SPT is a form of excise tax that applies to the importation or domestic production and supply of certain goods and services. SPT on domestically produced goods is generally applied to the ‘ex-factory selling price’, which is defined as 65% of the selling price before VAT and any discount. For imported goods, SPT is due on the CIF (cost, insurance, and freight) value inclusive of customs duty. For hotel and telecommunication services, SPT is payable based on the invoice prices.
For local and international air transportation of passengers, SPT is 10%, payable based on the air ticket value issued in Cambodia for travel within and outside Cambodia. The SPT base is inclusive of all taxes other than SPT and VAT. For example, for return air tickets from Phnom Penh to Singapore costing USD 500, exclusive of airport tax, the SPT payable is USD 45.45 (USD 500/1.1 x 10%).

**Accommodation tax**
Accommodation tax is calculated at 2% of the accommodation fee inclusive of all taxes and other services except accommodation tax and VAT.

**Tax for public lighting (TPL)**
TPL is imposed on the distribution in Cambodia of both foreign made and locally produced alcoholic and tobacco products. TPL is levied at 3% of the value of such products at the time of each in-country sale. Value for these purposes includes all taxes other than TPL and VAT.

**Tax on immovable property (ToIP)**
ToIP is levied at 0.1% per annum of the ToIP base. The tax base is 80% of the market value of the immovable properties stated in Appendix 1 of Prakas No. 371 less the threshold of KHR 100 million (approximately USD 25,000). The immovable property valued below the threshold is not subject to ToIP. The Prakas also determines that ToIP is effectively collected on immovable properties located in Phnom Penh and other cities of the provinces.

Immovable property is defined to include land, buildings, and other constructions on land (e.g. infrastructures built on land, regardless of having a wall or roof). Certain exemptions exist for government-owned property, agricultural land, property owned and used for cultural and religious purposes, property of foreign embassies and non-governmental organisations (NGOs), and property in the special economic zones.

The owners, possessors, and final beneficiaries of immovable property are required to register and obtain a Tax Identification Number for each immovable property valued above the threshold from the tax administration where the immovable property is located. Any changes in relation to the registered immovable property (e.g. a change of title) are also required to be reported.

The owners, possessors, and final beneficiaries hold responsibility for calculating ToIP, preparing and filing a ToIP return, as well as remitting the ToIP liability to the tax administration once per year by 30 September. A ToIP return is required for every single immovable property and must be completed and filed separately. Since this is a self-assessment tax, the tax administration will perform tax audit on ToIP in the subsequent years.

**Tax on unused land**
Land in towns and other specified areas without any construction, or with construction that is not in use, and even certain built-upon land, is subject to the tax on unused land. The tax is calculated at 2% of the market value of the land per square metre as determined by the Commission for Valuation of Unused Land on 30 June each year. The owner of the land is required to pay the tax on 30 September each year.
Stamp tax

Property
The transfer of title in certain assets (e.g. land, building, vehicles) and transfer of company shares (partial or full) are subject to stamp tax. The tax is imposed on the transfer values at the rate as follows:

- Transfer of assets: 4%
- Transfer of shares: 0.1%

Government contract
Stamp tax is imposed at the rate of 0.1% on the contract value of the public procurement contract for goods or services.

Document/signage
Stamp tax is to be paid on certain documents relating to the establishment, dissolution, or merger of a business, other official documents (perhaps more importantly for foreign investors), and certain advertising postings and signage. Amounts vary according to such factors as the type of documents, the location of the signage, illumination, and nationality of any scripted words. For certain documents, the tax amount is fixed up to KHR 1 million (approximately USD 250).

Cigarettes
Domestic producers or importers of cigarettes have the obligation to buy and affix tax stamps on packets of cigarettes. No person is allowed to sell or display packaged cigarettes for sale without a tax stamp.

Patent tax
Registered businesses must pay a (relatively nominal) patent tax on initial business registration and annually thereafter. Patent tax is levied with reference to turnover or estimated turnover.

In practice, the GDT imposes patent tax at the top band regardless of the level of turnover.

The annual patent tax return and payment are to be filed annually, within three months of calendar year-end.

Tax on means of transportation
The tax on means of transportation imposes a number of statutory fees on the registration of certain vehicles, including trucks, buses, motor vehicles, and ships.

Tax on salary (ToS)/fringe benefits (ToFB)
Cambodia’s ToS rules follow internationally familiar residency and source principles. A Cambodian resident taxpayer’s worldwide salary will be subject to Cambodian ToS. For non-residents, only the Cambodian sourced salary will be subject to ToS. The place of salary payment is not considered relevant in determining source.

A distinction is made between cash and fringe benefit salary components. Different tax scales also apply.

ToS or ToFB is a tax on employees’ income, but employers are held liable to these taxes if the employers fail to withhold.
Branch income

Income of a branch is taxable in the same way as those for corporate profits.

Income determination

Inventory valuation

Inventory can be valued at weighted-average cost, first in first out (FIFO), or current value at the close of the period, where this value is lower than the purchase price or production cost. Work-in-progress should be valued at production costs.

Capital gain

Capital gains form part of taxable profit.

Dividend income

Dividend means any distribution of money or property that a legal person distributes to a shareholder with respect to the shareholder’s equity interest in such legal person, with the exception of stock dividends and distributions in complete liquidation of the company. Whether or not a distribution is a dividend shall be determined under the preceding condition without regard to whether or not the legal person has current or accumulated income or profit or earnings.

Inter-company dividends

Inter-company dividends between residents are exempt from ToP (see the Withholding taxes section for more information).

Gross dividend income received by a resident company from a non-resident enterprise is subject to ToP. A foreign tax credit for taxes paid on these dividends is allowed for deduction from the ToP. The maximum amount of the foreign tax credit is the ToP liability with respect to that dividend income.

Passive income

Designated passive income (such as interest, royalties, and rent) forms part of taxable profit.

Foreign income

Resident entities are taxed on their worldwide income, and tax credits are available for foreign taxes incurred. Foreign income is taxable in the period it is earned; there is no provision allowing tax to be deferred on the income earned overseas.

Deductions

Depreciation and amortisation

Property should be depreciated at rates according to four classes of assets as specified in the tax legislation. Land is not considered a depreciable asset. The straight-line or the declining-balance method is specifically required to be used for each class of assets.

<table>
<thead>
<tr>
<th>Assets</th>
<th>Method</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Building and structures</td>
<td>Straight line</td>
<td>5</td>
</tr>
<tr>
<td>Computers, electronic information systems, software, and data handling equipment</td>
<td>Declining balance</td>
<td>50</td>
</tr>
</tbody>
</table>
Cambodia

<table>
<thead>
<tr>
<th>Assets</th>
<th>Method</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Automobiles, trucks, office furniture, and equipment</td>
<td>Declining balance</td>
<td>25</td>
</tr>
<tr>
<td>All other tangible property</td>
<td>Declining balance</td>
<td>20</td>
</tr>
</tbody>
</table>

Expenditures on intangible property are amortisable over the life of the property or at 10% per annum.

**Special depreciation**
A QIP will be entitled to a 40% special depreciation in the first year of purchase or, if later, the first year the assets are used. However, the special depreciation will only apply to assets used in ‘manufacturing and processing’ (still to be defined) and only if the taxpayer has elected not to use a tax holiday. A clawback provision exists for assets held for less than four years.

**Goodwill**
Purchased goodwill is a depreciable intangible fixed asset for ToP purposes. If the useful life of the intangible fixed assets can be determined, the annual depreciation charges shall be calculated on the useful life by using the straight-line method. If the useful life cannot be determined, the annual depreciation rate of 10% shall be used.

**Start-up expenses**
Preliminary and formation expenses are allowed to be fully deducted in the period in which the expenses arise, or they can be amortised over two years.

**Interest expenses**
Interest deductibility in any year is limited to the amount of interest income plus 50% of the net profits excluding interest income and interest expense. The excess non-deductible interest expense can be carried forward to the following tax years indefinitely.

**Bad debt**
A loss on a claim (i.e. bad debt) is deductible where the impossibility to recover the loss can be clearly shown and that claim has been written off from the accounting books, except where the giving up of the claim is an abnormal act of management (still to be defined).

**Charitable contributions**
The charitable contribution expense is deductible to the extent the amount does not exceed 5% of taxable profit. The taxpayer must have proper evidence supporting the payments.

**Fines and penalties**
Additional tax, late tax payment interest, and fines of all types incurred for the violation of various legal provisions are not deductible.

**Taxes**
Taxes that are not a charge to the enterprise (e.g. WHT, ToS, ToFB, ToP, and additional ToP on dividend distribution) are not deductible.

**Loss between related parties**
No deduction is available for certain losses incurred on dealings between 51% commonly owned parties.
**Net operating losses**
Taxpayers may carry forward their losses for five years. The carryback of losses is not permitted. There is no provision for any form of consolidated filing or group loss relief.

To be eligible to carry forward tax losses, a taxpayer must not change its activities or ownership.

If a taxpayer received a unilateral tax reassessment from the GDT, a taxpayer will not be able to utilise the tax losses brought forward in the year of reassessment.

**Payments to foreign affiliates**
An expense payable to a related party that is not paid within 180 days of year end will not be deductible. A deduction can be claimed in the year in which the payments are made. This rule is not applicable for an outlay or expense for inventory, capital property, and depreciable property.

**Group taxation**
There is no specific provision for group taxation in Cambodia.

**Transfer pricing**
The GDT has wide powers to redistribute income and deductions between parties under common ownership in order to prevent the avoidance or evasion of taxes. Common ownership exists at a relatively low level of 20%.

**Thin capitalisation**
There is no provision for thin capitalisation in Cambodia.

**Tax credits and incentives**

**Foreign tax credit**
Residents earning foreign-sourced income can receive credits for foreign taxes paid.

**Inbound investment**
The Council for the Development of Cambodia (CDC) may be approached for a one-stop service to register a project and obtain approval for a QIP status. CDC licensing is, however, not mandatory (except for certain large, politically sensitive projects) and is applicable to those projects that do not fall within the ‘negative list’. Some of the projects in the ‘negative list’ include the following:

- All kinds of commercial activities, import and export activities, and transportation services (except the railway sector).
- Currency and financial services.
- Activities that relate to newspapers and media.
- Production of tobacco products.
- Provision of value-added services of all kinds of telecommunication services.
- Real estate development.

The current investment incentives that are applicable to the QIP registered with the CDC include a ToP exemption period of up to six years or special depreciation (see Special depreciation in the Deductions section), import duty exemptions, and exemption from minimum tax. Not all QIPs will be entitled to all incentives.
Cambodia

Annually, a QIP is required to obtain a Certificate of Compliance (CoC) from the CDC to guarantee its investment incentives. The CoC is intended to provide confirmation that the QIP has acted in compliance with the relevant tax regulations.

**Tax incentives in securities sector**
The Royal Government of Cambodia has issued Sub-Decree No.70 to provide tax incentives to companies listed on the Cambodian Stock Exchange (CSX) and public investors who hold and/or trade government, equity, and debt securities on the securities market.

The listed companies are entitled to a 10% reduction on the annual ToP payable for three years, starting from the beginning of the current financial year if the share is issued within the first half of the fiscal year or the following financial year if the share is issued within the second half of the fiscal year. A QIP is not entitled to the tax reduction during the tax holiday period. Public investors are entitled to a 50% reduction on the WHT payable on interest and/or dividends received from the above securities for three years, starting from the launch of the securities market. However, there are various conditions under which the Ministry of Economy and Finance can forfeit the tax incentives granted to the listed companies.

**Additional tax incentives for rice farming, paddy rice purchase, and export of milled rice**
The Ministry of Economy and Finance has issued a Prakas to provide additional tax incentives to any enterprises in the business of rice farming, paddy rice purchase, and export of milled rice, as follows:

**VAT:**
- Domestic supplies of paddy rice: 0%.
- Domestic supplies of milled rice: 10%.
- Export of milled rice: 0%.
- Input VAT related to rice farming, paddy rice purchase, and export of milled rice is creditable or refundable.

**ToP and minimum tax:**
- Exempt from 1% minimum tax.
- Entitled to tax holiday period (i.e. trigger period plus three years plus three year priority period).
- Exempt from 1% prepayment of ToP during the tax holiday period.

**Withholding taxes**
WHT needs to be withheld on payments made by residents (and it seems only to those who fall under the real regime). The withheld tax constitutes a final tax when withheld in respect of resident and non-residents.

The types of payments caught are as follows.

**WHT on payment to residents**
- Rental: 10%.
- Interest: 15% (except payment to a Cambodian bank).
Services: 15% (except payment to a registered taxpayer and supported by a valid VAT invoice).
Royalties: 15%.

**WHT on payment to non-residents**

- Interest: 14%.
- Rent or right for use of property: 14%.
- Management or technical fees (not defined): 14%.
- Dividends: 14%.

Public investors invested on the CSX are entitled to a 50% reduction on the WHT payable on interest and/or dividends received from the government, equity, and debt securities for three years, starting from the launch of the securities market.

WHT is due when the amount is paid. An expense is considered ‘paid’ when it is recorded in the accounting records.

**Tax administration**

**Taxable period**
The standard tax year is the calendar year, although different accounting year-ends may be granted upon application.

**Tax returns**
The return for annual tax (i.e. ToP/minimum tax) is to be filed annually, within three months of tax year-end.

Returns for monthly taxes (e.g. 1% prepayments of ToP, WHT, ToS or ToFB, SPT, PLT, and accommodation tax) are to be filed monthly, within 15 days of the following month.

**Payment of tax**
ToP or minimum tax is due for payment three months after tax year-end. The ToP or minimum tax liability can be reduced by prepayment of ToP payments.

Monthly taxes are due for payment by the 15th day of the succeeding month.

**Prepayment of ToP**
A prepayment of ToP equal to 1% of monthly turnover inclusive of all taxes, except VAT, is required to be paid on a monthly basis. The prepayment can be offset against the annual ToP liability and the minimum tax.

Where a taxpayer is in the period of ToP holiday, the taxpayer is also exempted from the prepayment obligations. However, a nil monthly return will need to be lodged.

Where a taxpayer is not subject to minimum tax, a monthly prepayment of ToP must still be made. However, unutilised prepayments from a prior year can be used to offset the current amount due, and no physical payment may be required.

**Tax audit process**
There are two types of tax audit in Cambodia (i.e. limited and comprehensive tax audits). Initially, the tax authorities will send a letter to notify the taxpayers to request
for a tax audit. During the tax audit process, tax auditors visit the taxpayers’ office to review the documents and discuss any potential tax issues with the taxpayers and may request supporting evidence. After the visit to the taxpayer’s office, the tax auditors issue a notice of tax reassessment (NoTR), which indicates the reassessed tax liabilities and the basis of their tax reassessment. If the taxpayers agree with the reassessed tax liabilities, they can proceed with the payment. If not, the taxpayers have to submit an objection letter to the tax authorities within 30 days of the receipt of the NoTR.

**Statute of limitations**

The tax audit period (i.e. the limitation of within which period the tax authorities can perform tax audits) is as follows:

- Within three years of the date of submission of the tax returns.
- Within ten years of the date of submission of the tax returns if there is any evidence of ‘obstruction of the implementation of laws’.
- Any time with the written consent of the taxpayers.

In practice, the GDT regularly extends the time limit for tax audit up to ten years.

**Topics of focus for tax authorities**

In practice, the tax authorities focus the tax reassessment on various matters, including payment to third parties overseas, fringe benefits provided to employees, and related party transactions (e.g. payment of management fee to head office, loans from shareholder).

**Other issues**

**Statutory financial audit requirement**

All enterprises (physical or legal persons) that meet two of the following criteria are required to have their financial statements audited by an independent external auditor registered with the Kampuchea Institute of Certified Public Accountants and Auditors (KICPAA):

- Annual turnover above KHR 3 billion (approximately USD 750,000).
- Total assets above KHR 2 billion (approximately USD 500,000).
- More than 100 employees.

QIPs registered with the CDC are required to have their financial statements audited by independent external auditors registered with the KICPAA.

The law does not state the deadline for the enterprises to submit their audited financial statements. However, the deadline for audited financial statements to be completed is six months after accounting year-end (i.e. for the financial year ended 31 December 2012, the deadline is 30 June 2013).
Significant developments

According to the 2013 Finance Law that went into effect from 1 January 2013, the deductible portion of head office overheads expenses and technical assistance has been reduced. In the past, subject to international conventions, head office expenses and technical assistance rendered by entities located abroad were deductible within the limit of 10% of the intermediary earnings. The 2013 Finance Law has reduced that deductible portion as follows:

- From 10% to 5% of intermediary earnings as a general rule.
- From 5% to 2.5% of the turnover for firms specialised in public works.
- From 15% to 7.5% for design firms operating in accordance with regulations relating to design firms and consulting engineers.

The 2013 Finance Law also states the following:

- Technical assistance shall include services provided by entities located either overseas or in Cameroon.
- Liberalities, gifts, and subsidies awarded to clubs participating in the elite national competitions or to recognised organisations responsible for the organisation of official sport competitions are now deductible, provided they are justified, within the limit of 5% of the annual turnover.
- Slot machines and other devices used for games of chance are now subject to the 25% excise duty.
- Properties belonging to clubs, associations, or sporting bodies accredited properties intended for sports and sports facilities are now exempt from real property tax.

Law No. 2013/004 of 18 April 2013 lays down the private investment incentives in Cameroon. This law is applicable to ‘investors’, which are Cameroonian or foreign natural or legal persons, whether or not established in Cameroon, conducting business therein or holding shares in Cameroonian companies. The purpose of the law is to encourage private investment and boost national production.

Incentives shall be granted to investors during the establishment and operation phases. The establishment phase may not exceed five years, with effect from the date of issuance of the approval. The operation phase may not exceed ten years.

Tax and customs incentives granted to investors consist of exemptions from or reductions of payment of several taxes, duties, and other fees clearly listed under the Law.
Cameroon, Republic of

**Taxes on corporate income**

Resident corporations in Cameroon are taxed on their worldwide income; non-resident corporations are taxed only on Cameroon-source income.

The profits subject to the corporate income tax (CIT) are determined with sole regard to profits earned by entities located in Cameroon (for residents) or transactions effected in Cameroon (for non-residents having a permanent establishment \[PE\] in Cameroon).

The net taxable profits are established after deduction of all charges directly entailed by the exercise of activities subject to assessment in Cameroon.

The total Cameroon CIT rate is 38.5%.

**Reduced CIT rate for newly listed companies**

The basic CIT rate of 38.5% is reduced to 33% for companies during their first three years of listing on the national stock exchange of Cameroon.

**Minimum tax**

There is a 1.1%, 3.3%, or 5.5% minimum tax in Cameroon that is based on turnover. This minimum tax is an instalment of CIT. As such, it shall be offset against CIT. The minimum tax is the sole tax payable if it is greater than CIT.

**Local income taxes**

A local tax of 10%, called Additional Council Tax, generally applies to the following taxes:

- CIT.
- Personal income tax (PIT).
- Withholding tax (WHT) on income from stock and shares.
- Value-added tax (VAT).

The rate provided in this summary for each tax above is therefore inclusive of a basic rate plus 10% surcharge.

**Corporate residence**

An entity is deemed resident if its registered office, centre of activity, or management is located in Cameroon; if it has resident employees in Cameroon that provide services to customers; or if it has a PE in Cameroon.

**Permanent establishment (PE)**

In Cameroon, the internal regulations do not provide for any definition of the concept of PE. For this reason, the tax authorities may refer to the definitions provided by the models of the United Nations (UN) and that of the Organisation for Economic Co-operation and Development (OECD) Tax Conventions, which constitute the basis of the double tax treaties (DTTs) concluded between Cameroon and France, Canada, and Tunisia.

According to these conventions, a PE is a fixed place of business through which an enterprise wholly or partly performs its activities.
Other taxes

Value-added tax (VAT)
VAT shall be levied on natural persons or corporate bodies that automatically, habitually, or occasionally carry out taxable transactions consisting of provisions of services or sales of goods.

The total VAT in Cameroon is 19.25%. Exports are zero rated. The VAT paid upstream is recoverable, except where otherwise stated.

Note that VAT is invoiced only by natural and legal persons whose turnover (taxes excluded) is equal to or above XAF 50 million and who are under the tax regime of actual earnings.

Custom duties
Customs duties of between 5% and 30%, depending on the nature of the goods imported, are levied based on the customs value.

Excise taxes
An excise duty of 25% is applicable to cigarettes, drinks, cosmetics, luxury items (e.g. jewels, precious stones), slot machines, and other devices used for games of chance. A reduced rate of excise duty (12.5%) shall apply to soft drinks and private vehicles with engine capacities of 2,000 cm³.

Real property tax
Cameroon property tax is payable annually on real estate with or without an ownership certificate or an administrative or judicial order issued. Tax is charged at 0.1% of the assessed property value.

Properties belonging to clubs, associations, or sporting bodies' accredited properties intended for sports and sports facilities are now exempt from real property tax.

Transfer tax
The sale of a business in Cameroon is subject to a transfer tax rate of 15%.

Registration duty
The registration duty applies to certain deeds listed by the General Tax Code (GTC). The assessment basis depends on the nature of transactions, and the rate varies from 1% to 15%.

The formation of a company and subsequent capital increases in Cameroon are not subject to registration duties.

Business licence tax
Any natural person or corporate body carrying on a trade, industry, or profession in Cameroon shall be liable to a business licence tax. The business licence tax is paid annually according to a graduated scale and is assessed on turnover.

New enterprises shall be exempt from the payment of the business licence tax during the first two years of operation.

Social security contributions
Employer and employee must contribute on a monthly basis to Cameroon’s National Social Insurance Fund at 11.2% and 2.8%, respectively. The basis of contribution
Cameroon, Republic of

is capped at XAF 300,000 per month. Employers in Cameroon must also contribute 1.75%, 2.5%, or 5% of total salaries to the National Social Insurance Fund for Industrial Accidents, depending on the risk category of activities performed by employees. The calculation basis in this category is the gross salary, including the benefits in kind assessed for their actual amount.

**Payroll tax**
Employers in Cameroon are required to make monthly contributions of 2.5% of the total amount of salaries and fringe benefits of their employees to the Housing Loan and Employment Fund of Cameroon.

**Branch income**
The local branch of any foreign company is taxed at the same rate as a company. The net profits (after CIT) of entities having their residence or head office outside Cameroon (such as the branch of a foreign company) are assumed to be distributed each fiscal year to companies not located in Cameroon. Their net profits (after CIT) shall therefore be subject to the WHT on distributions at 16.5%.

**Income determination**

**Inventory valuation**
For valuation purpose, the GTC only provides that stocks shall be valued at cost price; however, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory. No reference is made to the accounting method that shall be used (e.g. first in first out [FIFO], last in first out [LIFO]). Only FIFO and weighted average methods are allowed under the Organisation for the Harmonisation of Business Law in Africa (OHADA) Accounting Principles. Where there is any difference between the valuation method permitted by the GTC and the book valuation, the accounting result shall be modified accordingly.

**Capital gains**
Capital gains are normally taxed at full CIT rates.

The net overall capital gains arising from the transfer of stocks, bonds, and other capital shares made by natural and legal persons, occasionally or habitually, either directly or through a financial establishment, shall be subject to the 16.5% WHT.

**Dividend income**
Dividends are subject to the WHT of 16.5%. However, dividends shall be treated as proceeds for the purpose of CIT, and the tax withheld at source is used as instalment for the payment of CIT.

**Interest income**
Interests are subject to the WHT of 16.5%. However, interests shall be treated as proceeds for the purpose of CIT, and the tax withheld at source shall be used as instalment for the payment of CIT.

**Foreign income**
As a matter of both fact and law, revenue from abroad earned by corporate bodies situated in Cameroon shall be subject to CIT in Cameroon. There is no provision on tax deferral in Cameroon.
**Deductions**

**Depreciation**

Depreciation is generally computed on a straight-line basis over the useful life according to the rates provided for by the GTC, including those that might have already been deferred in times of deficit.

The following depreciation rates are generally accepted for tax purposes:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rates (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Construction</td>
<td>5 to 20</td>
</tr>
<tr>
<td>Stationary equipment and tools</td>
<td>5 to 20</td>
</tr>
<tr>
<td>Portable equipment</td>
<td>10 to 100</td>
</tr>
<tr>
<td>Transport equipment</td>
<td>10 to 33.33</td>
</tr>
<tr>
<td>Railway lines</td>
<td>1 to 10</td>
</tr>
<tr>
<td>Engines</td>
<td>5</td>
</tr>
<tr>

<td>5 to 25</td>
</tr>
<tr>
<td>Furniture fittings and other equipment</td>
<td>10 to 33.33</td>
</tr>
<tr>
<td>Fishing equipment and fishing vessels</td>
<td>15</td>
</tr>
</tbody>
</table>

The deduction of depreciation can be carried forward indefinitely.

**Goodwill**

With regard to rules governing the deduction of provisions and depreciation, impairment of goodwill shall not be allowable for CIT purposes.

**Start-up expenses**

There is no specific provision in the GTC relating to start-up expenses.

However, the OHADA Accounting Principles effectively state that start-up expenses shall be capitalised and must be completely depreciated as early as possible: over two to five years, except bond premiums, which are depreciated throughout the life of the loan.

No distribution of profit should be carried out before the complete depreciation of start-up expenses.

**Interest expenses**

Interest expenses are fully deductible.

However, interest paid to partners/shareholders in respect of the sums they leave with or place at the disposal of the company over and above their capital, irrespective of the type of company, shall be acceptable within the limits of those calculated at the rate of the central bank discount rate, raised by two points.

**Bad debt**

The deductibility of provisions for bad debts is subject to the following conditions:

- The debt must be specified (i.e. clarification is needed on the nature, amount, and the debtor).
- The company must show that it has unsuccessfully carried out actions for debt recovery (e.g. reminder letters, notice to pay, complaints).
For losses related to bad debts to be deductible, they should have been subjected to all amicable or forced collection methods and means provided for by the OHADA Uniform Act on the Organization of Simplified Procedures for Collection and Enforcement Procedures. Otherwise, they shall not be deductible.

In this regard, the impossibility of recovering the debt must be evidenced by:

- a deficiency report prepared by a bailiff
- a bankruptcy decision duly passed by the judge, if necessary, or
- a decision passed by a judge, bearing out the debtor who disputed the debt.

**Charitable contributions**
Acts of liberality, gifts, and subsidies shall not represent the charges deductible from profits.

However, payments made to research and development (R&D) bodies and to collective philanthropic, educational, sports, scientific, social, and family institutions and bodies, on condition that the latter are situated in Cameroon, shall be deductible as soon as there is proof of payment and as long as they do not exceed 0.5% of the turnover for the fiscal year. Similarly, gifts made on the occasion of a disaster shall be deducted in the form and conditions determined by order of the Minister of Economy and Finance.

According to the 2013 Finance Law, liberalities, gifts, and subsidies awarded to clubs participating in the elite national competitions or to recognised organisations responsible for the organisation of official sport competitions are deductible, provided they are justified, within the limit of 5% of the annual turnover.

**Fines and penalties**
Compounding fees, fines, confiscations, and any penalty concerning persons who violate legal, economic, and fiscal provisions shall not be deducted from the profits subject to taxation.

**Taxes**
Only the professional taxes issued for collection during the fiscal year and which are to be borne by the firm in relation to the operations carried out in Cameroon shall be subject to deduction.

CIT, WHT, and PIT shall not be considered as deductible expenses for the levying of taxes.

**Net operating losses**
Any loss sustained in a given year can be carried forward up to the fourth year following the recording of the loss. The carryback of losses is not permitted in Cameroon.

**Payments to foreign entities**
Head office overhead expenses for operations carried out in Cameroon and the remuneration of certain effective services (studies, technical, financial, or accounting assistance) provided to Cameroonian firms by foreign natural persons or corporate bodies are not totally deductible. Fees paid are deductible up to a maximum of 10% of the taxable profit before deducting the expenses concerned.
The 2013 Finance Law has reduced the deductible portion as follows:

- From 10% to 5% of intermediary earnings as a general rule.
- From 5% to 2.5% of the turnover for firms specialised in public works.
- From 15% to 7.5% for design firms operating in accordance with regulations relating to design firms and consulting engineers.

In addition, the 2013 Finance Law effectively states that technical assistance shall include services provided by entities located either overseas or in Cameroon.

Expenses linked to transactions with natural persons or legal entities resident or established in a territory or state considered to be a tax haven shall not be deductible. This rule shall not apply to imports of goods made in those countries. A tax haven is any state where the tax on the income of a natural person or legal entity is less than a third of that paid in Cameroon, or any state or territory considered not to be co-operative in matters of transparency or of exchange of information required for fiscal purpose by international or financial organisations. The rate of the Cameroonian CIT to be considered for that purpose is 35%.

**Group taxation**

There is specific taxation of groups within the Economic and Monetary Community of Central Africa (CEMAC) area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of the following conditions are met:

- The stocks or shares owned by the parent establishment represent at least 25% of the capital of the subsidiary firm.
- The parent and subsidiary firms have their registered office in a CEMAC state (Cameroon, Central African Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company that undertakes to retain them for at least two consecutive years in registered form.

**Transfer pricing**

There are provisions in the GTC that relate to transfer pricing.

Within the framework of a tax audit, the documents required for the justification of transfer pricing shall be presented to the tax inspectors at the start of the procedure. Items such as business transactions, payments in consideration for intangible rights, allocations of costs and expenses (head office costs, agreements to share costs, disbursements, etc.), financial transactions, etc. are particularly targeted for close scrutiny.

**Thin capitalisation**

There is no specific thin capitalisation rule in Cameroon.
Tax credits and incentives

Three major tax incentives are granted in Cameroon under the tax systems.

The system of reinvestment relief
Any corporate body reinvesting in Cameroon may be granted, under certain conditions, a reduction in CIT.

The reinvestment must take a form described by the GTC as construction or extension of permanent buildings for industrial, agricultural, forestry, tourism, or mining purposes, including technical offices, housing salaried workers free of charges, etc.

Note that total investment less than XAF 25 million is not eligible for reinvestment relief.

The reinvestment relief consists of a deduction from the taxable basis in an amount equal to 50% of the investment effected by the undertaking and approved by the tax authorities. The rate is 25% for telecommunication companies.

The special fiscal regime for structuring projects
The special fiscal regime for structuring projects applies to major enterprises with annual turnover not less than XAF 1 billion and small and medium-sized enterprises with annual turnover of less than XAF 1 billion.

The tax incentives consist of:

• Exemption from payment of the business licence tax for the first two years of operation.
• Fixed registration fee of XAF 50,000 for transfers of real estate that directly concern the establishment of the project.
• Exemption from payment of VAT on local purchases of building materials and on imports related to the establishment of the project.
• Extension of the carryover period for deficits from four to five years.

A taxpayer must apply, required conditions must be met, and authorisation must be issued for this tax incentive to be granted.

Incentives applicable to listed companies
Companies whose ordinary shares are listed on the Cameroon Stock Exchange shall be entitled to the following CIT reduced rates:

• 22% for a period of three years for capital increases that represent at least 20% of the share capital.
• 27.5% for a period of three years for transfers of shares that represent at least 20% of the share capital.
• 30.8% for a period of three years from the date of listing for capital increases or transfers of shares that represent less than 20% of the share capital.

Companies whose ordinary shares are listed on the bond market in Cameroon shall be entitled to pay basic CIT at a reduced rate of 33% for three years, effective from the date of listing.
Foreign tax credit
Taxes paid abroad are not considered as tax credits unless provided as such by international tax treaties.

Withholding taxes
A special tax is levied at an overall discharging rate of 15% on income paid to natural persons and corporate bodies domiciled outside of Cameroon by enterprises or establishments based in Cameroon for various services provided or used in Cameroon. The tax is withheld at source by the Cameroonian entity that pays the remuneration.

It has been clearly highlighted that software acquired overseas shall be subject to the 15% WHT.

Dividends
A total WHT of 16.5% applies to dividends paid to both Cameroon residents and non-residents. The WHT rate may be reduced under an applicable tax treaty.

Interest
The interest from foreign loans is subject to 16.5% WHT.

Royalties
Royalties paid to non-residents are subject to a 15% WHT (the 10% surcharge is not applicable). The tax rate may be reduced under an applicable tax treaty.

Tax treaties
Cameroon has tax treaties with Canada, France, Tunisia, and members of CEMAC (Cameroon, Gabon, Equatorial Guinea, Congo, Chad, and Central African Republic).

Tax administration

Taxable period
The tax year in Cameroon is the calendar year.

Tax returns
On or before 15 March, taxpayers are expected to submit to the tax administration the annual return of revenue derived from their business venture during the period serving as the tax base.

This return must be presented in conformity with the OHADA accounting system.
Payment of tax
An instalment representing the 1.1%, 3.3%, or 5.5% minimum tax of turnover realised during each month shall be paid to the tax authorities not later than the 15th day of the following month.

Advance payment of 0.5%, 1.1%, 3.3%, 5%, or 10% on imports or purchases of goods for resale is withheld at source by the supplier or the customs administration, depending on the tax regime applicable to the buyer or importer.

The balance of CIT is paid, at the latest, on 15 March following the fiscal year-end, when submitting the CIT return.

Surplus tax payments
A surplus tax payment can be offset against future taxes of the same nature to be paid. For the specific case of VAT, a reimbursement process is provided for by the GTC under certain conditions.

Tax audit process
There is no audit cycle in Cameroon.

Statute of limitations
The statute of limitations is four years.

Topics of focus for tax authorities
The topics of focus for tax authorities include the following:

• Remunerations paid for services provided to local entities by providers located overseas.
• Transfer pricing.

**Significant developments**

Canada’s corporate summary reflects all 2013 federal, provincial, and territorial budgets. Many of the tax changes continue what was started years ago, tightening perceived loopholes or inequities in various aspects of the tax system. Notably, tax rules were proposed as part of the 2013 federal budget to curtail certain transactions seen as eroding the Canadian corporate tax base, as well as to combat international tax evasion and aggressive tax avoidance. The summary is based on enacted and proposed legislation and assumes that the proposed legislation will become law.

**Corporate loss trading**

The 2013 federal budget introduces an anti-avoidance measure to support the restrictions on the deductibility of losses, and the use of certain other tax benefits, after certain share acquisition transactions. The rules will generally apply for shares acquired after 20 March 2013. See Corporate loss trading in the Deductions section for more information.

**Group taxation**

The federal government has completed its review of the taxation of corporate groups and has determined that moving to a formal system of corporate group taxation, such as the introduction of rules governing loss transfers or consolidated reporting, is not currently a priority. The government will continue to work with provinces and territories to address their concerns on loss utilisation.

**Tax avoidance**

Draft legislation that was re-released on 24 October 2012 makes an ‘avoidance transaction’ meeting certain conditions a ‘reportable transaction’ that must be reported to the Canada Revenue Agency (CRA), generally for transactions entered into after 2010, and those that are part of a series of transactions that commenced before 2011 and that are completed after 2010. Quebec already has a provincial reporting regime for certain aggressive tax planning transactions, generally carried out after 14 October 2009.

**Tax evasion and aggressive tax avoidance**

The 2013 federal budget introduces a number of proposals to help the CRA combat international tax evasion and aggressive tax avoidance. See Tax evasion and aggressive tax avoidance in the Tax administration section for more information.

**Cross-border tax compliance**

Canada is negotiating with the United States (US) to improve cross-border tax compliance through enhanced information exchange under the Canada-United States Tax Convention. Negotiations will include information exchange to support the provisions in the US Foreign Account Tax Compliance Act (FATCA).
Canada

**Thin capitalisation**
The 2013 federal budget extends the thin capitalisation rules to Canadian-resident trusts and non-resident corporations and trusts that operate in Canada for taxation years beginning after 2013. The rules will apply to existing as well as new debt. Additionally, newly enacted legislation that modifies the Canadian thin capitalisation rules reduces the debt-to-equity ratio from 2:1 to 1.5:1 and broadens the scope of these rules. See Thin capitalisation in the Group taxation section for more information.

**Foreign affiliate amendments**
Draft legislation released on 24 October 2012 includes proposals relating to the taxation of Canadian corporations with foreign affiliates and is the culmination of legislative developments that started a decade ago. See Foreign affiliate amendments in the Income determination section for more information.

**Shareholder loan rules**
Non-resident controlled Canadian corporations are permitted to make certain loans to foreign parent companies or related non-resident companies without incurring the deemed dividend withholding tax (WHT), generally for loans received or indebtedness incurred after 28 March 2012. This change also applies to loans made by, or to, certain partnerships. See Shareholder loan rules in the Income determination section for more information.

**‘Foreign affiliate dumping’ rules**
A variety of transactions described as ‘foreign affiliate dumping’ transactions, which involve an investment in a foreign affiliate by a corporation that is (i) resident in Canada and (ii) controlled by a non-resident of Canada, have been curtailed. When certain conditions are met, a dividend will be deemed to have been paid by the corporation to its foreign parent to the extent of any non-share consideration given by the corporation for the ‘investment’ in the foreign affiliate. The rules generally apply to transactions occurring after 28 March 2012. See ‘Foreign affiliate dumping’ rules in the Income determination section for more information.

**Non-resident trusts (NRTs)**
Draft legislation that was re-released on 24 October 2012 refines the NRT rules that generally apply to taxation years ending after 2006; trusts subject to these rules will be deemed resident for Canadian income tax purposes. A trust will be allowed to elect to start to be deemed resident for any taxation year ending after 2000.

In addition, the 2013 federal budget proposes that, for taxation years ending after 20 March 2013, an NRT other than an ‘immigration trust’ will be deemed to be resident in Canada if a Canadian-resident taxpayer transfers or lends property to the trust (regardless of the consideration received) and the property held by the trust may revert to the taxpayer, pass to persons to be determined by the taxpayer, or be disposed of only with the taxpayer’s consent.

**Offshore investment funds**
Draft legislation that was re-released on 24 October 2012 maintains the enacted provision for investments in offshore investment funds, but increases the prescribed income percentage by 2%, and extends the statute-barred period for taxpayers that have invested in offshore investment funds by three years, for taxation years ending after 4 March 2010.
**Tax compliance reporting**
The federal government is striving to implement common-sense solutions to barriers identified by Canadian businesses, such as Canadian tax compliance reporting. See Tax compliance reporting in the Tax administration section for more information.

**Provincial sales tax harmonisation**
On 1 April 2013, British Columbia’s 12% harmonised sales tax (HST) was cancelled and replaced with a 7% provincial sales tax (PST) and the 5% federal goods and services tax (GST).

Prince Edward Island implemented an HST on 1 April 2013. The 14% HST rate (i.e. 9% provincial component plus the 5% GST) replaced the combined PST/GST rate of 15.5% (i.e. 10% PST, which applied on the 5% GST).

Quebec further harmonised the Quebec sales tax (QST) with the 5% GST on 1 January 2013; the effective combined QST and GST rate remains 14.975%.

---

**Taxes on corporate income**
As a general rule, corporations resident in Canada are subject to Canadian corporate income tax (CIT) on worldwide income. Non-resident corporations are subject to CIT on income derived from carrying on a business in Canada and on capital gains arising upon the disposition of taxable Canadian property (See Capital gains in the Income determination section for more information). The purchaser of the taxable Canadian property is generally required to withhold tax from the amount paid unless the non-resident vendor has obtained a clearance certificate.

Canadian CIT and WHT can be reduced or eliminated if Canada has a treaty with the non-resident’s country of residence. A list of treaties that Canada has negotiated is provided in the Withholding taxes section along with applicable WHT rates.

**Federal income tax**
The following rates apply for 31 December 2013 year-ends. For non-resident corporations, the rates apply to business income attributable to a permanent establishment (PE) in Canada. Different rates may apply to non-resident corporations in other circumstances. Non-resident corporations may also be subject to branch tax (see the Branch income section).

<table>

</tr>
</tbody>
</table>

Notes
1. The basic rate of federal tax is reduced by a 10% abatement to give the provinces and territories room to impose CITs. The abatement is available in respect of taxable income allocated to Canadian provinces and territories. Taxable income allocable to a foreign jurisdiction is not eligible for the abatement and normally is not subject to provincial or territorial taxes.
2. The general rate reduction and M&P deduction do not apply to the first 500,000 Canadian dollars (CAD) of active business income earned in Canada by Canadian-controlled private corporations (CCPCs), investment income of CCPCs, and income from certain other corporations (e.g., mutual fund corporations, mortgage investment corporations, and investment corporations) that may benefit from preferential tax treatment.

3. Provincial or territorial taxes apply in addition to federal taxes. Provincial and territorial tax rates are noted below.

4. For small CCPCs, the net federal tax rate is levied on active business income above CAD 500,000; a federal rate of 11% applies to the first CAD 500,000 of active business income. Investment income (other than most dividends) of CCPCs is subject to the federal rate of 28%, in addition to a refundable federal tax of 6 2/3%, for a total federal rate of 34 2/3%.

**Provincial/territorial income tax**

All provinces and territories impose income tax on income allocable to a PE in the province or territory. Generally, income is allocated to a province or territory by using a two-factor formula based on gross revenue and on salaries and wages. Provincial and territorial income taxes are not deductible for federal income tax purposes. The rates given apply to 31 December 2013 year-ends and do not take into account provincial tax holidays, which reduce or eliminate tax in limited cases.

Notes

1. When two rates are indicated, the lower rate applies to M&P income.
2. In all provinces and territories, the first CAD 500,000 (CAD 400,000 in Manitoba and Nova Scotia) of active business income of a small CCPC is subject to reduced rates that range from 0% to 8.0%, depending on the jurisdiction.
3. British Columbia’s 2013 budget increased the rate from 10% to 11% on 1 April 2013.
4. New Brunswick’s 2013 budget increases the rate from 10% to 12% on 1 July 2013.
5. The lower Ontario rate applies to profits from M&P and from farming, mining, logging, and fishing operations, carried on in Canada and allocated to Ontario.

Ontario’s non-M&P rate is frozen at 11.5% until the province returns to a balanced budget (scheduled for 2017/18). The rate was to have dropped to 11% on 1 July 2012 and to 10% on 1 July 2013.

Corporations subject to Ontario income tax may also be liable for corporate minimum tax (CMT) based on adjusted book income. The CMT is payable only to the extent that it exceeds the regular Ontario income tax liability. The CMT rate is 2.7% and applies when total assets are at least CAD 50 million and annual gross revenue is at least CAD 100 million on an associated basis.

6. Saskatchewan’s M&P rate is as low as 10% (reduced from the 12% non-M&P rate), depending on the extent to which the corporation’s income is allocated to the province.

Saskatchewan intends to lower the general and M&P rate from 12% to 10% when it is ‘affordable and sustainable’ within a balanced budget.
Corporate residence

Under the Income Tax Act, a corporation incorporated in Canada (federally or provincially/territorially) will be deemed to be resident in Canada. A corporation not incorporated in Canada will be considered to be resident in Canada under Canadian common law if its central management and control is exercised in Canada. Where a corporation's central management and control is exercised is a question of fact but typically is where the Board of Directors meets and makes decisions, provided the Board takes action.

A corporation incorporated in Canada or a corporation incorporated outside of Canada but with its central management and control situated in Canada will be deemed to be a non-resident of Canada if it qualifies as a non-resident of Canada under treaty tie-breaker rules.

A corporation incorporated in Canada will cease to be a Canadian resident if it is granted Articles of Continuance in a foreign jurisdiction or if it is a predecessor corporation in a cross-border amalgamation and the amalgamated corporation is a non-resident of Canada. Similarly, a foreign corporation will become resident in Canada if it is continued in Canada or is a predecessor corporation of an amalgamated corporation that is resident in Canada.

Permanent establishment (PE)

Canada’s tax treaties generally provide that the business profits of a non-resident corporation are not subject to Canadian tax unless the non-resident corporation carries on business in Canada through a PE situated in Canada and the business profits are attributed to that PE. Canada’s tax treaties may also restrict the imposition of branch tax to situations when the non-resident corporation carries on business in Canada through a PE situated in Canada and/or limit the applicable branch tax rate. While the wording of tax treaties varies, a PE generally is defined as:

- a fixed place of business through which the business of the non-resident corporation is wholly or partly carried on
- a place of management, a branch, an office, a factory, and a workshop; a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources; a building site, construction, or assembly project that exists for a specified period of time, and
- a dependent agent or employee who has and habitually exercises an authority to conclude contracts in the name of the non-resident corporation.

The Canadian domestic definition of PE (federal and provincial/territorial) generally mirrors the above.

Other taxes

Consumption taxes

Federal goods and services tax (GST)

The federal GST is levied at a rate of 5%. It is a value-added tax (VAT) applied at each level in the manufacturing and marketing chain and applies to most goods and services. However, the tax does not apply to sales of zero-rated goods, such as exports and basic groceries, or to tax-exempt supplies, such as health care, educational services, and certain services provided by financial institutions.
Generally, businesses pay GST on their purchases and charge GST on their sales, and remit the net amount (i.e. the difference between the GST collected and the input tax credit for the tax paid on purchases). Suppliers are entitled to claim input tax credits for the GST paid on expenses incurred relating to their supplies of taxable and zero-rated goods and services, but not on expenses relating to the making of tax-exempt supplies.

**Harmonised sales tax (HST)**

Five provinces have fully harmonised their sales tax systems with the GST and impose a single HST. The HST includes the 5% GST and a provincial sales tax component. It is imposed on essentially the same base as the GST. HST rates follow.

<table>
<thead>
<tr>
<th>Province (1)</th>

</tr>
<tr>
<td>Ontario</td>
<td>13</td>
</tr>
<tr>
<td>Prince Edward Island (after 31 March 2013) (2)</td>
<td>14</td>
</tr>
</tbody>
</table>

Notes

1. Nova Scotia will reduce its HST rate from 15% to 14% by 1 July 2014, and to 13% by 1 July 2015 (i.e. the provincial portion of the HST will decrease from 10% to 9% and 8%, respectively).
2. Prince Edward Island implemented an HST on 1 April 2013. The HST rate is 14% (i.e. 9% provincial component plus the 5% GST), and replaced the combined PST/GST rate of 15.5% (i.e. 10% PST, which applied on the 5% GST).

**Retail sales tax**

British Columbia, Manitoba, and Saskatchewan levy a retail sales tax at 7%, 7% (8% from 1 July 2013 to 30 June 2023), and 5%, respectively, on most purchases of tangible personal property for consumption or use in the province and on the purchase of specific services. British Columbia reinstated its 7% retail sales tax on 1 April 2013, which together with the 5% GST replaces the province’s 12% HST. As mentioned above, Prince Edward Island replaced its retail sales tax regime with the HST on 1 April 2013.

Quebec’s sales tax is structured in the same manner as the GST and applies to most goods and services that are subject to the GST. On 1 January 2013, Quebec further harmonised the QST with the 5% GST and increased the QST rate from 9.5% to 9.975%. Furthermore, starting 1 January 2013, the QST is calculated exclusive of GST (not on the GST included amount). The effective combined GST and QST rate remains 14.975% (i.e. 9.975% provincial component plus the 5% GST). Quebec administers the GST in that province.

Neither Alberta nor the three territories (the Northwest Territories, Nunavut, and the Yukon) impose a retail sales tax. However, the GST applies in those jurisdictions.

**Customs duties**

Customs duties generally are intended to protect Canadian industry from foreign competition and not as a source of revenue. The majority of most-favoured-nation (MFN) duty rates are below 10%; notable exceptions are footwear, textiles and apparel, and certain food products (the last may be subject to ‘tariff rate quotas’). Goods imported from developed countries with which Canada does not have free trade agreements will attract the MFN duty rate. Many products, however, are duty-free, regardless of their country of origin.
Qualifying goods that originate in the North American Free Trade Agreement (NAFTA) territory (Canada, the United States, and Mexico) can enter Canada duty-free. Canada has implemented free trade agreements (FTAs) with Chile, Colombia, Costa Rica, the European Free Trade Association countries, Israel, Jordan, and Peru, and has signed or is negotiating agreements with several other countries. Like the NAFTA, these agreements set out rules of origin for determining whether the goods are eligible for preferential duty rates under the particular FTA.

Canada extends preferential duty rates to most (but not all) products imported from developing countries (the General Preferential Tariff). The government announced that, effective 1 January 2015, General Preferential Tariff treatment will be withdrawn from 72 countries, including China, Hong Kong, and Thailand. Countries that are entitled to the ‘Least Developed Countries Tariff’ are not affected. In either case, goods must satisfy rules of origin and be shipped directly to Canada from the beneficiary countries to qualify for these rates.

**Excise taxes and duties**

Excise duties are levied at various rates on alcohol, alcoholic beverages, and tobacco products manufactured in Canada, while imports are subject to customs duties (see above).

Excise tax is imposed on petroleum products and automobiles. In addition, a 10% federal excise tax is imposed on insurance against a risk in Canada if it is placed by insurers through brokers or agents outside Canada or with an insurer that is not authorised under Canadian or provincial/territorial law to transact the business of insurance. Certain premiums are exempt, including those for life, personal accident, marine, and sickness insurance.

**Property taxes**

Property taxes are levied by municipalities in Canada on the estimated market value of real property within their boundaries and by provinces and territories on land not in a municipality. In most provinces and territories, a general property tax is levied on the owner of the property. Some municipalities levy a separate business tax, which is payable by the occupant if the premises are used for business purposes. These taxes are based on the rental value of the property at tax rates that are set each year by the various municipalities. School taxes, also generally based on the value of real property, are levied by local and regional school boards or the province or territory.

**Land transfer tax**

All provinces and territories levy a land transfer tax or registration fee on the purchaser of real property within their boundaries. These levies are expressed as a percentage, in most cases on a sliding scale, of the sale price or the assessed value of the property sold and are generally payable at the time title to the property is registered. Rates generally range from 0.02% to 2%, depending on the province or territory, but may be higher if the purchaser is a non-resident. Some exemptions (or refunds) are available. Additional land transfer taxes apply for properties purchased in the municipalities of Montreal or Toronto. Other municipalities may also impose these taxes and fees.

**Federal capital taxes**

The federal government does not levy a general capital tax. It imposes the Financial Institutions Capital Tax (Part VI Tax) on banks, trust and loan corporations, and life insurance companies at a rate of 1.25% when taxable capital employed in Canada exceeds CAD 1 billion. The threshold is shared among related financial institutions. The tax is not deductible in computing income for tax purposes. It is reduced by the
corporation’s federal income tax liability. Any unused federal income tax liability can be applied to reduce Part VI Tax for the previous three and the next seven years. In effect, the tax constitutes a minimum tax on financial institutions.

**Provincial capital taxes**
All provincial general capital taxes have been eliminated (the last being Nova Scotia’s, which decreased from 0.5% to 0% on 1 July 2012; the rate was doubled for corporations with taxable capital under CAD 10 million). However, most provinces still impose a capital tax on financial institutions. Capital taxes are deductible for federal income tax purposes. The federal government had proposed to limit the deductibility of capital taxes, but has delayed implementing this proposal indefinitely. However, a proposed interim measure disallows a deduction for any increase in these taxes, with certain exceptions. The territories do not impose capital taxes.

Provincial capital taxes on financial institutions are imposed at the following rates for 31 December 2013 year-ends. Certain exemptions and reduced rates apply.

Notes
1. Financial institutions in Manitoba with taxable paid up capital under CAD 4 billion are not subject to capital tax. Manitoba’s 2013 budget increases the financial institutions capital tax rate from 4% to 5% for taxation years ending after 16 April 2013.
2. New Brunswick’s financial institutions capital tax rate increased from 3% to 4% on 1 April 2012.
3. Before 1 January 2013, Quebec applied a 0.25% compensation tax on the paid-up capital of financial institutions (other than insurance companies). A compensation tax of 2.8% (3.9% before 1 January 2013, and nil after 31 March 2019) on payroll also applies.
4. Saskatchewan’s rate for financial institutions that have taxable paid-up capital of CAD 1.5 billion or less is 0.7%. Financial institutions that qualified for the 0.7% capital tax rate in taxation years ending after 31 October 2008 and before 1 November 2009 are subject to a 0.7% capital tax rate on their first CAD 1.5 billion of taxable capital and a 3.25% capital tax rate on taxable capital exceeding CAD 1.5 billion.

**Additional taxes on insurers**
All provinces and territories impose a premium tax ranging from 2% to 4.4% on insurance companies (both life and non-life). In addition, Nova Scotia imposed a capital tax on all insurance companies that was eliminated on 1 July 2012, while Ontario and Quebec impose a capital tax on life insurance companies only. Quebec also levies a compensation tax on insurance premiums at a rate of 0.3% (0.55% before 1 January 2013, and nil after 31 March 2019).

**Part III.1 tax on excess designations**
Federal Part III.1 tax applies at a 20% or 30% rate if, during the year, a CCPC designated as eligible dividends an amount that exceeds its general rate income pool (GRIP), or a
non-CCPC pays an eligible dividend when it has a positive balance in its low rate income pool (LRIP). A corporation subject to Part III.1 tax at the 20% rate (i.e. the excess designation was inadvertent) can elect, with shareholder concurrence, to treat all or part of the excess designation as a separate non-eligible dividend, in which case Part III.1 tax will not apply to the amount that is the subject of the election.

Eligible dividends are designated as such by the payor and include dividends paid by:

- public corporations, or other corporations that are not CCPCs, that are resident in Canada and are subject to the federal general CIT rate (i.e. 15% in 2013), or
- CCPCs, to the extent that the CCPC’s income is:
  - not investment income (other than eligible dividends from public corporations), and
  - subject to the general federal CIT rate (i.e. the income is active business income not subject to the federal small business rate).

Non-eligible dividends include dividends paid out of either income eligible for the federal small business rate or a CCPC’s investment income (other than eligible dividends received from public companies).

**Social security taxes**
For 2013, employers are required to pay, for each employee, government pension plan contributions up to CAD 2,356.20 and employment insurance premiums up to CAD 1,247.57. However, Quebec employers contribute, per employee, a maximum of CAD 2,427.60 in Quebec government pension plan contributions, CAD 1,008.67 in employment insurance premiums, and CAD 527.85 to a Quebec parental insurance plan.

**Provincial/territorial payroll taxes**
Employers in Manitoba, Newfoundland and Labrador, Ontario, and Quebec are subject to payroll tax. Maximum rates range from 1.95% to 4.3%. In addition, Quebec employers with payroll of at least CAD 1 million must allot 1% of payroll to training or to a provincial fund. Employers in the Northwest Territories and Nunavut must deduct from employees’ salaries a payroll tax equal to 2% of employment earnings.

**Branch income**
A non-resident corporation will be subject to income tax at normal corporate rates on profits derived from carrying on a business in Canada. However, Canada’s tax treaties generally restrict taxation of a non-resident’s business income to the portion allocable to a PE situated in Canada.

In addition, a special 25% 'branch tax' applies to a non-resident’s after-tax profits that are not invested in qualifying property in Canada. The branch tax essentially is equivalent to a non-resident WHT on funds repatriated to the foreign head office. In the case of a corporation resident in a treaty country, the rate at which the branch tax is levied may be reduced to the WHT rate on dividends prescribed in the relevant tax treaty (generally 5%, 10%, or 15%). Some of Canada's treaties prohibit the imposition of branch tax or provide that branch tax is payable only on earnings in excess of a threshold amount. The branch tax does not apply to transportation, communications, and iron-ore mining companies. Nor does it apply to non-resident insurers, except in special circumstances.
Whether or not a treaty applies, a non-resident corporation that has a PE in Canada may be subject to federal and provincial capital taxes (i.e. financial institutions only). See the Other taxes section.

**Income determination**

**Inventory valuation**
In most cases, all property included in inventory can be valued at fair market value, or each item can be valued at its cost or fair market value, whichever is lower. Most well-established and reasonable approaches to inventory costing can be used for tax purposes, except for the last in first out (LIFO) method. Conformity between methods used for book and tax reporting is not mandatory, but the method chosen should be used consistently for tax purposes. Inventory must be valued at the commencement of the year at the same amount as at the end of the immediately preceding year.

**Capital gains**
Half of a capital gain constitutes a taxable capital gain, which is included in the corporation’s income and taxed at ordinary rates. Capital losses are deductible, but generally only against capital gains. Any excess of allowable capital losses over taxable capital gains in the current year can be carried back three years and carried forward indefinitely, to be applied against net taxable capital gains from those years, except in the case of an acquisition of control. No holding period is required. Intent is a major factor in determining whether the gain or loss is income or capital in nature.

Non-resident corporations are subject to CIT on taxable capital gains (50% of capital gains less 50% of capital losses) arising on the disposition of taxable Canadian property. Taxable Canadian property of a taxpayer includes, among other things:

- Real estate situated in Canada.
- Both capital and non-capital property used in carrying on a business in Canada.
- In general, shares in a Canadian-resident corporation that are listed on a stock exchange if, at any time in the preceding 60 months:
  - 25% of the shares of the corporation are owned by the taxpayer or persons related to the taxpayer, and
  - more than 50% of the fair market value of the shares are derived from real property situated in Canada, Canadian resource properties, and timber resource properties.
- In general, shares in a Canadian-resident corporation that are not listed on a stock exchange if, at any time in the preceding 60 months, more than 50% of the fair market value of the shares is derived directly from property similar to that described above for shares of a public corporation.

However, in specific situations, the disposition by a non-resident of a share or other interest that is not described above may be subject to Canadian tax (e.g. when a share is deemed to be taxable Canadian property).

The general requirement is that a non-resident vendor of taxable Canadian property must report the disposition to the CRA and obtain a clearance certificate in respect of the disposition. If no certificate is obtained, the purchaser is required to withhold and remit to the CRA 25% of the sales proceeds.

Relief from the reporting and 25% withholding requirements may be available if specified conditions are met (e.g. if the gain from the disposition is not taxable in
Canada by virtue of a tax treaty Canada has with another country). However, if the parties to the transaction are related, relief is available only if the CRA is notified.

**Dividend income**

Dividends received by one Canadian corporation from another Canadian corporation generally can be deducted in full when determining taxable income. However, dividends received by a 'specified financial institution' on certain preferred shares are an important exception and are taxed at full corporate rates.

Dividends on most preferred shares are subject to a 10% tax in the hands of the recipient, unless the payer elects to pay a 40% tax (instead of a 25% tax) on the dividends paid. The payer can offset the tax against its income tax liability. The tax is not imposed on the first CAD 500,000 of taxable preferred-share dividends paid in a taxation year. Nor does it apply to dividends paid to a shareholder with a ‘substantial interest’ in the payer (i.e. at least 25% of the votes and value).

Dividends received by private corporations (or public corporations controlled by one or more individuals) from Canadian corporations are subject to a special refundable tax of 33\(\frac{1}{3}\)%%. The tax is not imposed if the recipient is connected to the payer (i.e. the recipient owns more than a 10% interest in the payer) unless the payer was entitled to a refund of tax in respect of the dividend. When the recipient pays dividends to its shareholders, the tax is refundable at CAD 1 for every CAD 3 of dividends paid.

**Stock dividends**

If the payer is resident in Canada, stock dividends are treated for tax purposes in the same manner as cash dividends. The taxable amount of a stock dividend is the increase in the paid-up capital of the payer corporation because of the payment of the dividend. Stock dividends received from a non-resident are exempt from this treatment. Instead, the shares received have a cost base of zero.

**Interest income**

Interest that accrued, became receivable by, or was received by a corporation is taxable as income from a business or property, as the case may be.

**Rental income**

Rents received by a corporation are taxable as income from a business or property, as the case may be.

**Royalty income**

Royalties received by a corporation are taxable as income from a business or property, as the case may be.

**Foreign exchange gains and losses**

The foreign exchange gains and losses of a Canadian taxpayer that arise from business transactions (i.e. on income account), including the activities of a branch operation, are generally fully includable in income or fully deductible, as the case may be. Any method that is in accordance with generally accepted accounting principles (GAAP) may be used to determine foreign exchange gains or losses on income transactions, provided that the treatment is consistent with previous years and conforms to the accrual method of accounting.

A foreign exchange gain or loss that is on capital account is treated the same as any other capital gain or loss. The accrual method of accounting cannot be used for purposes of reporting gains or losses on capital account. This follows from the
Canada

CRA's view that a taxpayer has not made a capital gain or sustained a capital loss in a foreign currency until a transaction has taken place. Therefore, paper gains and losses are disregarded.

**Partnership income**
For Canadian tax purposes, a partnership is treated as a conduit, and the partners are taxed on their share of the partnership income, whether or not distributed. A corporation is not restricted from being a member of a partnership. Income is determined at the partnership level and is then allocated among the partners according to the terms of the partnership agreement. However, certain deductions, such as depletion allowances, exploration and development expenses, and donations, will flow through to be deducted by the various partners directly, as will any foreign tax credits, dividend tax credits, or investment tax credits. Partners generally may deduct expenses incurred directly, such as interest on borrowings to acquire partnership interests, in computing income from the partnership.

Corporate partners with taxation years ending after 22 March 2011 are generally prevented from deferring taxation on partnership income in respect of partnerships in which they (together with related parties) hold a greater than 10% interest (share of income or entitlement to assets); income from these partnerships must be accrued up to the end of the corporation’s taxation year.

The accrual is based on partnership income for the fiscal period ending in the corporation’s taxation year (the ‘formulaic amount’), unless a lower amount is designated by the partner. Penalties can apply if the designated amount reported is less than both the formulaic amount and the actual prorated income of the subsequent partnership fiscal period. Upon request, permission to change the partnership's fiscal period may be granted. Partnerships in multi-tier structures must adopt the same fiscal period (31 December unless otherwise elected by the partnerships). Certain transitional reserves may be available for up to five years.

**Joint venture income**
An unincorporated joint venture is not recognised as a separate legal entity, and no specific statutory rules govern the taxation of a joint venture in Canada. However, many business arrangements that are set up as a joint venture may be considered partnerships, and treated as such for Canadian tax purposes. Whether a partnership exists in a particular situation is a legal question based on the specific facts and circumstances.

Consistent with the partnership anti-deferral rules (discussed in Partnership income above), corporate participants must report their actual share of joint venture income or loss up to the end of their own year-end for tax years ending after 22 March 2011. A transitional reserve will be allowed, in respect of the additional income included in that year by a corporate participant (i.e. any actual income of the participant for the stub period), using the same rules as for the partnership transitional reserve. However, to claim a reserve, the corporation had to file an election with its tax return for that first year.

**Non-resident trusts (NRTs) and offshore investment funds**
Draft legislation that was re-released on 24 October 2012 changes Canada’s approach to taxing NRTs and will affect NRTs that have (i) Canadian resident contributors or (ii) Canadian resident beneficiaries if certain current or former Canadian residents have contributed property to the NRT. The legislation deems these NRTs to be resident for Canadian income tax purposes. However, an election can be filed to deem the creation
of a notional trust, referred to as a ‘non-resident portion trust’. Canadian tax applies only to income or gains from the properties contributed by Canadian residents, which would not include income or gains from properties held in the non-resident portion trust. Many direct or indirect transfers or loans of property or services can be deemed to be contributions to the NRT. The NRT rules will apply commencing 2007. A trust can elect to start to be deemed resident for any taxation year ending after 2000.

In addition, the 2013 federal budget proposes that, for taxation years ending after 20 March 2013, an NRT other than an ‘immigration trust’ will be deemed to be resident in Canada if a Canadian-resident taxpayer transfers or lends property to the trust (regardless of the consideration received) and the property held by the trust may revert to the taxpayer, pass to persons to be determined by the taxpayer, or be disposed of only with the taxpayer’s consent.

The offshore investment fund rules affect Canadian residents that have an interest as a beneficiary in these funds. The current legislation that applies to these funds is to be maintained with some modifications. For taxation years ending after 4 March 2010, draft legislation that was re-released 24 October 2012 increases the prescribed income percentage by 2% and extends the statute-barred period for taxpayers who have invested in offshore investment funds by three years. For taxpayers who voluntarily filed under the former proposed ‘foreign investment entity’ (FIE) rules, the draft legislation provides transitional measures to allow the income or deductions claimed even though those rules were never enacted, or to have the taxation years reassessed to remove the income or deductions claimed under the FIE rules. Also, for certain non-discretionary trust funds in which a Canadian-resident person, and persons that do not deal at arm’s length with the person, have interests in aggregate of 10% or more of the total fair market value of the total interests in the trusts, the trust is deemed to be a controlled foreign affiliate of the Canadian beneficiary and is thereby subject to the Canadian foreign accrual property income (FAPI) rules.

**Earnings of specified investment flow-throughs (SIFTs)**

Certain earnings of SIFTs (i.e. publicly traded income trusts and partnerships) are subject to a SIFT tax and are deemed to be a dividend when distributed. The rules are intended to discourage corporations from converting to income trusts. The rules do not apply to Real Estate Investment Trusts (REITs) that meet certain conditions.

**Foreign income**

Corporations resident in Canada are subject to Canadian federal income taxes on worldwide income, including income derived directly from carrying on business in a foreign country, as earned. In addition, resident corporations may be taxable currently on certain passive and active income earned by foreign subsidiaries and other foreign entities. Relief from double taxation is provided through Canada’s international tax treaties, as well as foreign tax credits and deductions for foreign income or profits taxes paid on income derived from non-Canadian sources.

16 Tax Information Exchange Agreements (TIEAs) have already entered into force (one on behalf of five jurisdictions). Canada is currently negotiating nine other TIEAs. To encourage non-treaty countries to enter into TIEAs:

- an exemption is available for dividends received in Canada from the active business income of foreign affiliates resident and carrying on their active business in non-treaty countries that have a TIEA with Canada, and
active business income earned by foreign affiliates in non-TIEA (and non-treaty) countries will be treated as FAPI, which is taxable in Canada on an accrual basis, if a TIEA with Canada is not concluded within a specified period.

Foreign investment income earned directly, other than dividends, is taxed as earned, with a non-business foreign tax credit and a deduction for foreign income or profits taxes available, subject to certain limits. Dividends received by private corporations from non-connected foreign corporations are subject to the special refundable tax of 33/3% (see above), to the extent that the dividends are deductible in determining taxable income.

The tax treatment of foreign dividends depends on whether the payer corporation is a foreign affiliate of the recipient. Dividends received from foreign corporations that are not foreign affiliates are taxed when received, with a non-business foreign tax credit and a deduction for foreign income or profits taxes available, subject to certain limits. Dividends received from foreign affiliates may be permitted to flow tax-free between foreign affiliates up to Canada, subject to certain limits. These limits pertain to the nature of the earnings from which the dividends were paid, the foreign income or profits taxes paid, and WHTs paid in respect thereof.

See Controlled foreign affiliates and foreign accrual property income (FAPI) in the Group taxation section for a discussion on foreign affiliates, controlled foreign affiliates, and FAPI.

Foreign affiliate amendments
Draft legislation released on 24 October 2012 includes proposals relating to the taxation of Canadian corporations with foreign affiliates and is the culmination of legislative developments that started a decade ago. It provides taxpayers and their advisors some stability in this area for the first time in almost ten years. Some provisions have retroactive effect. Key changes include:

• New income inclusion rules for upstream loans made by foreign affiliates.
• Foreign tax credit generator rules that target hybrid investments in foreign entities that are used to artificially create credits and deductions for foreign taxes when the taxpayer does not bear the economic cost of the tax.
• The creation of a ‘hybrid surplus’ regime to track certain capital gains realised by a foreign affiliate on the disposition of certain shares or partnership interests and related indebtedness.
• New rules dealing with distributions made by foreign affiliates (generally deemed to be dividends).
• New stop-loss rules applicable to dispositions of foreign affiliate shares or partnership interests.
• New rules for the streaming of passive capital losses realised by foreign affiliates.
• New foreign affiliate reorganisation rules applicable to liquidations, dissolutions, and foreign mergers (including absorptive mergers) involving foreign affiliates.
• A new anti-avoidance rule targeting increases in the exempt earnings of a foreign affiliate that are considered abusive.

Shareholder loan rules
Newly enacted legislation permits non-resident controlled Canadian corporations to make certain loans to foreign parent companies or related non-resident companies without incurring the deemed dividend WHT. To benefit from this elective relief, the Canadian corporation must include in income interest at the prescribed rate plus 4%. The legislation also applies to loans made by, or to, certain partnerships. The election
may apply, on a loan-by-loan basis, to loans or indebtedness that become owing to a corporation resident in Canada after 28 March 2012.

‘Foreign affiliate dumping’ rules
Newly enacted legislation introduces sweeping rules to curtail a variety of transactions described as ‘foreign affiliate dumping’ transactions. These transactions involve an investment in a foreign affiliate by a corporation that is (i) resident in Canada and (ii) controlled by a non-resident of Canada. When certain conditions are met, a dividend will be deemed to have been paid by the corporation to its foreign parent to the extent of any non-share consideration given by the corporation for the ‘investment’ in the foreign affiliate. The rules define ‘investment’ broadly to include:

- an acquisition of shares or contribution of capital
- transactions where the foreign affiliate becomes indebted to the corporation (or a related Canadian company), and
- an acquisition of certain options in shares or debt of the foreign affiliate.

Any deemed dividend will be subject to Canadian WHT (as reduced by the applicable treaty). The legislation generally applies to transactions occurring after 28 March 2012.

Treaty shopping
The federal government will explore methods to protect the integrity of Canada’s tax treaties while preserving a business tax environment that is conducive to foreign investment.

Deductions
Business expenses that are reasonable and paid out to earn income are deductible for income tax purposes unless disallowed by a specific provision in the Income Tax Act. Some expenses are deductible subject to limitation, e.g. charitable donations, entertainment expenses, and the cost of providing an automobile to employees. Deduction of capital expenditures is specifically prohibited, but special provisions may allow depreciation or amortisation of these expenditures.

Because Canadian corporations are taxable on worldwide income, there are basically no territorial limits on the deductibility of related expenses. Payments to affiliates are deductible if they reflect arm’s-length charges. Transfers of losses and other deductions between unrelated corporate taxpayers are severely limited after an acquisition of control.

Depreciation and amortisation
Generally, depreciation for tax purposes (capital cost allowance) is computed on a pool basis, with only a few separate classes (pools) of property. Annual allowances are generally determined by applying a prescribed rate to each class on the declining-balance basis. For example, the prescribed annual rate is 20% on most furniture and fixtures, 30% on automotive equipment, and 4% to 10% on most buildings. In the year of acquisition, only half of the amount otherwise allowable may be claimed on most classes of property. Generally, capital cost allowance may not be claimed until the taxation year the property is available for use. The taxpayer can claim any amount of capital cost allowance up to the maximum. Capital cost allowance previously claimed may be recaptured if assets are sold for proceeds that exceed the undepreciated cost of the class. Temporary incentives to accelerate depreciation for eligible manufacturing
Canada

and processing machinery and equipment acquired after 18 March 2007, and before 2016, revise the rate and method from 30% declining-balance to 50% straight-line.

Three-quarters of capital expenditures for goodwill and certain other intangible properties can be amortised at a maximum annual rate of 7%, on a declining-balance basis. A portion of proceeds may be taxable as recapture or as a gain on disposition.

**Mining and oil and gas activity**

Generally, mining and oil and gas companies are allowed a 100% deduction for exploration costs and certain preproduction development costs. Other development costs are deductible at the rate of 30% on a declining-balance basis. Capital property costs are subject to the depreciation rules noted above under Depreciation. In addition, in certain cases, significant asset acquisitions and assets acquired for a new mine or major expansion benefit from accelerated depreciation of up to 100% of the income from the mine. For certain oil sands assets acquired after 18 March 2007, accelerated depreciation has been reduced gradually since 2011 and will be eliminated by 2015. The 2013 federal budget further phases out the accelerated depreciation for other mining assets over the 2017 to 2020 calendar years, generally for expenses incurred after 20 March 2013.

The 2013 federal budget also proposes to treat pre-production mine development expenses as ‘Canadian development expenses’ (30% declining balance), instead of as ‘Canadian exploration expense’ (100% deduction), generally for expenses incurred after 20 March 2013, subject to a phase-in over three calendar years, from 2015 to 2017.

Provinces levy mining taxes on mineral extraction and royalties on oil and gas production. Most are deductible.

Investment tax credits (ITCs) are available federally (and in some provinces) to individuals who invest in shares to fund prescribed mineral exploration expenditures. The federal credit in 2013 for qualified ‘flow-through’ share investments is 15% of qualifying mining grassroots exploration expenditures. Certain mining exploration and preproduction expenditures that are incurred by a Canadian corporation and not used for flow-through are eligible for an ITC that is being phased out:

- for pre-production mining exploration expenses from 10% to 5% in 2013 and nil after 2013, and
- for pre-production development expenses from 10% to 7% in 2014, 4% in 2015, and nil after 2015 (transitional relief may be available).

The individual and corporate credits can be used to offset current taxes payable or carried over to certain previous or subsequent taxation years.

**Scientific research and experimental development (SR&ED)**

Canada provides a generous combination of deductions and tax credits for SR&ED. Current (and before 2014, capital) expenditures on R&D can be deducted in the year incurred or carried forward indefinitely to be used at the taxpayer’s discretion to minimise tax payable. See Scientific research and experimental development (SR&ED) credit in the Tax credits and incentives section for information on the tax credits currently available.
Start-up expenses
Expenses related to the incorporation, reorganisation, or amalgamation of a corporation, (i.e. cost of affidavits, legal and accounting fees, costs of preparing articles of incorporation) are not deductible for income tax purposes. They are considered to be eligible capital expenditures, for which 75% of the capital cost of the expenditure is amortised at a maximum rate of 7% per year on a declining-balance basis. Expenses incurred after the date of incorporation generally are deductible for income tax purposes if reasonable in amount and incurred to earn income from the business.

Interest expenses
Interest on borrowed money used for earning business or property income, or interest in respect of an amount payable for property acquired to earn income, is deductible, provided the interest is paid pursuant to a legal obligation and is reasonable under the circumstances.

Doubtful accounts and bad debts
A reasonable reserve for doubtful accounts may be deducted for tax purposes. The reserve calculation should be based on the taxpayer’s past history of bad debts, industry experience, general and local economic conditions, etc. Special rules apply for determining reserves for financial institutions. A taxpayer can deduct the amount of debts owing that are established to have become bad debts during the year, provided the amount has previously been included in the taxpayer’s income or relates to loans made in the ordinary course of business. Recoveries of bad debts previously written off must be included in income in the year of recovery.

Business meals and entertainment
Deductions by a corporation for business meals and entertainment expenses are limited to 50% of their cost. This includes meals while travelling or attending a seminar, conference, or convention, overtime meal allowances, and room rentals and service charges, etc. incurred for entertainment purposes. If the business meal and entertainment costs are billed to a client or customer and itemised as such, the disallowance (i.e. the 50% not deductible) is shifted to the client or customer.

Insurance premiums
Insurance premiums relating to property of a business are generally deductible, but life insurance premiums are generally not deductible if the company is the named beneficiary. However, if a financial institution lender requires collateral security in the form of life insurance, a deduction is allowed for the associated net cost of any pure insurance for the period.

Charitable contributions
Charitable donations made to registered Canadian charitable organisations are deductible in computing taxable income, generally to the extent of 75% of net income. A five-year carryforward is provided.

Fines and penalties
Most government-imposed fines and penalties are not deductible. Fines and penalties that are not government-imposed are generally deductible if made or incurred by the taxpayer for the purpose of gaining or producing income from the business or property.

Taxes
Federal, provincial, and territorial income taxes are not deductible in determining income subject to tax. The tax treatment of federal capital taxes and provincial payroll and capital taxes is discussed in the Other taxes section.
Net operating losses
Net operating losses generally may be carried back three tax years and forward 20 (ten years if the loss was incurred in taxation years ending before 2006 and after 22 March 2004, seven years if before 23 March 2004). Special rules may prohibit the use of losses from other years when there has been an acquisition of control of the corporation.

Corporate loss trading
The 2013 federal budget introduces an anti-avoidance measure to support the restrictions on the deductibility of losses, and the use of certain other tax benefits, where there has been an acquisition of control of a corporation. This measure applies when a person or group of persons acquires shares of a corporation to hold more than 75% of the fair market value of all of the shares of the corporation without otherwise acquiring control of the corporation, and if it is reasonable to conclude that one of the main reasons that control was not acquired was to avoid the loss restriction rules. This measure generally applies for shares acquired after 20 March 2013, unless the shares were acquired pursuant to a written agreement entered into before 21 March 2013.

Payments to foreign affiliates
Interest, rents, royalties, management fees, and other payments made to related non-residents are deductible expenses to the extent that they are incurred to earn income of the Canadian company and do not exceed a reasonable amount. In certain cases, the receipt of these payments by a foreign affiliate of the Canadian taxpayer will give rise to foreign accrual property income, which is taxable on an accrual basis in Canada.

Group taxation
Group taxation is not permitted.

The federal government has completed its review of the taxation of corporate groups and has determined that moving to a formal system of corporate group taxation, such as the introduction of rules governing loss transfers or consolidated reporting, is not currently a priority. The government will continue to work with provinces and territories to address their concerns on loss utilisation.

Transfer pricing
Canadian transfer pricing legislation and administrative guidelines are generally consistent with the Organisation for Economic and Co-operation Development (OECD) Guidelines. Statutory rules require that transactions between related parties be carried out under arm’s-length terms and conditions.

Penalties may be imposed when contemporaneous documentation requirements are not met. A taxpayer will be deemed not to have made reasonable efforts if the taxpayer does not maintain complete and accurate documentation to evidence that it has determined and used arm’s-length prices for its related-party transactions. The documentation must be prepared on or before the taxpayer’s documentation due date, which is six months after the end of the taxation year.

The transfer pricing penalty is 10% of the transfer pricing adjustment if the adjustment exceeds the lesser of CAD 5 million and 10% of the taxpayer’s gross revenue for the year. The penalty is not deductible in computing income, applies regardless of whether the taxpayer is taxable in the year, and is in addition to any additional tax and related interest penalties.
Canada has an Advance Pricing Agreement (APA) program that is intended to help taxpayers determine transfer prices acceptable to the local tax authorities and, when negotiated as bilateral or multilateral APAs, with tax authorities in other jurisdictions. Under this program, 270 APAs have been completed or are in progress.

Many of Canada’s international tax agreements contain provisions concerning income allocation in accordance with the arm’s-length principle. These include a Mutual Agreement Procedure, which is a treaty-based mechanism through which taxpayers can petition competent authorities for relief from double taxation resulting from transfer pricing adjustments.

**Transfer pricing adjustments**
When the Canadian transfer pricing rules have applied to adjust, for tax purposes, amounts related to transactions between a Canadian corporation and one or more non-arm’s length non-residents (a ‘primary adjustment’), the related benefit to the non-residents is treated by the CRA as a deemed dividend (a ‘secondary adjustment’), subject to WHT, which can be eliminated, at the discretion of the Minister of Revenue, if the amount of the primary transfer pricing adjustment is repatriated to the Canadian corporation.

**Thin capitalisation**
Thin capitalisation rules can limit interest deductions when interest-bearing debt owing to certain non-residents (or persons not dealing at arm’s length with certain non-residents) exceeds one and a half times the corporation’s equity (two times the corporation’s equity for taxation years beginning before 2013). For taxation years beginning after 28 March 2012, the rules were extended to apply to debts of a partnership in which a Canadian-resident corporation is a member.

The 2013 federal budget extends the thin capitalisation rules to Canadian-resident trusts and non-resident corporations and trusts that operate in Canada for taxation years beginning after 2013. The rules will apply to existing as well as new debt.

In addition, recent changes to the Canadian thin capitalisation rules:

- treat disallowed interest as a dividend for WHT purposes for taxation years ending after 28 March 2012, and
- prevent double taxation when a controlled foreign affiliate of a Canadian-resident corporation lends funds to the corporation and the interest would otherwise be both disallowed as a deduction in Canada and included in the foreign accrual property income of the affiliate for taxation years ending after 28 March 2012.

**Controlled foreign affiliates and foreign accrual property income (FAPI)**
Under Canada’s FAPI rules, Canadian corporations are taxed on certain income of controlled foreign affiliates (typically, certain income from property, income from a business other than active, income from a non-qualifying business, and certain taxable capital gains) as earned, whether or not distributed. A grossed-up deduction is available for foreign income or profits taxes and WHTs paid in respect thereof. In general, a foreign corporation is a foreign affiliate of a Canadian corporation if:

- the Canadian corporation owns, directly or indirectly, at least 1% of any class of the outstanding shares of the foreign corporation, and
Canada

- the Canadian corporation, alone or together with related persons, owns, directly or indirectly, at least 10% of any class of the outstanding shares of that foreign corporation.

The foreign affiliate will be a controlled foreign affiliate of the Canadian corporation if certain conditions are met (e.g. more than 50% of the voting shares are owned, directly or indirectly, by a combination of the Canadian corporation, persons at non-arm's length with the Canadian corporation, a limited number of Canadian-resident shareholders, and persons at non-arm's length with those Canadian-resident shareholders).

---

**Tax credits and incentives**

**Foreign tax credits**

Taxpayers that have foreign-source income and are resident in Canada at any time in the year are eligible for foreign tax credit relief. Separate foreign tax credit calculations are prescribed for business and non-business income on a country-by-country basis. All provinces and territories also allow a foreign tax credit, but only in respect of foreign non-business income taxes.

Foreign business income or loss is computed for each foreign country in which a branch is located. Income or profits taxes paid to foreign governments generally are eligible for credit against a taxpayer’s Canadian income taxes payable. The credit in respect of taxes paid on foreign income is restricted to the amount of Canadian taxes otherwise payable on this income. Excess foreign business income tax credits may be carried back three years or forward ten. Generally, foreign tax credits are available only to reduce Canadian tax on foreign-source income that is subject to tax in the foreign country.

The foreign non-business income tax credit applies to all foreign taxes other than those classified as business income tax. The credit is the lesser of:

- the foreign non-business income tax paid for the year on foreign non-business income, and
- Canadian federal tax otherwise payable for the year on the foreign non-business income.

The foreign non-business tax credit is available only to reduce Canadian income tax otherwise payable on foreign non-business income that is subject to income tax in the foreign country. No carryover is allowed with respect to the non-business income foreign tax credit. Unused foreign non-business income tax may be deducted in computing income.

**Regional incentives**

In specified regions of Canada (i.e. Atlantic provinces, the Gaspé region, and Atlantic offshore region), a 10% federal investment tax credit (ITC) is available for various forms of capital investment (generally, new buildings and/or machinery and equipment to be used primarily in manufacturing or processing, logging, farming, or fishing). The ITC is fully claimed against a taxpayer’s federal tax liability in a given year. Unused ITCs reduce federal taxes payable for the previous three years and the next 20, or may be 40% refundable to CCPCs. Changes to the 10% federal ITC that generally apply to assets acquired after 28 March 2012:
• phase out (subject to possible transitional relief) the ITC for certain oil and gas and
mining activities, from 10% to 5% in 2014 and 2015, and nil after 2015, and
• ensure that ‘qualified property’ includes certain electricity generation equipment and
clean energy generation equipment used primarily in an eligible activity (except oil
and gas or mining activities).

The provinces and territories may also offer incentives to encourage corporations
to locate in a specific region. Income tax holidays are available in Newfoundland
and Labrador, Nova Scotia, Ontario, Prince Edward Island, and Quebec for
certain corporations operating in specific industries (e.g. in Ontario and Quebec,
commercialisation of intellectual property; in Prince Edward Island, bioscience
or aviation) or meeting certain conditions (e.g. job creation for Newfoundland
and Labrador).

Industry incentives
Canada offers many tax incentives at the federal, provincial, and territorial levels, for
various industries and activities, including those related to:

• Research and development (see below).
• Film, media, computer animation and special effects, and multi-media productions.
• Manufacturing and processing.
• Environmental sustainability.

Scientific research and experimental development (SR&ED) credit
In addition to the R&D deduction, a taxpayer can benefit from an ITC, which is
generally a 20% non-refundable credit on SR&ED expenditures that can be applied
against taxes payable. Alternatively, this tax credit can be carried back three years or
forward 20, to be applied against taxes owing.

A qualifying CCPC can qualify for a 35% refundable tax credit annually on its first
CAD 3 million in expenditures. This enhanced credit is subject to certain income and
capital limitations.

SR&ED ITCs have been extended to certain salary and wages (limited to 10% of salary
and wages directly attributable to SR&ED carried on in Canada) incurred in respect of
SR&ED carried on outside Canada.

In addition to the federal R&D incentives, all provinces (except Prince Edward Island)
and the Yukon provide tax incentives to taxpayers that carry on R&D activities.

The Independent Panel on Federal Support to Research and Development released
the report, *Innovation Canada: A Call to Action*, that provides “advice in respect of the
effectiveness of federal programs to support business and commercially oriented R&D,
the appropriateness of the current mix and design of these programs, as well as possible
gaps in the current suite of programs and what might be done to fill them”. As a result,
changes:

• reduce the 20% SR&ED ITC rate to 15% for taxation years ending after 2013 (pro-
rated for taxation years straddling 1 January 2014)
• provide that capital property acquired generally after 2013 is not deductible as an
SR&ED expenditure nor eligible for ITCs
• reduce the overhead proxy rate from 65% to 60% for 2013 and to 55% after
2013, and
• allow only 80% of SR&ED contract payments (net of SR&ED capital expenditures) to
  an arm’s-length contractor incurred after 2012 to be eligible for ITCs.

In addition, the 2013 federal budget proposes that SR&ED program claims filed on
or after the later of 1 January 2014, and royal assent of the enacting legislation, will
require more detailed information about the SR&ED program tax preparers and billing
arrangements. A CAD 1,000 penalty per claim will apply for missing, incomplete, or
inaccurate information.

Withholding taxes

WHT at a rate of 25% is imposed on interest (other than most interest paid to arm’s-
length non-residents), dividends, rents, royalties, certain management and technical
service fees, and similar payments made by a Canadian resident to a non-resident
of Canada.

Canada is continually renegotiating and extending its network of treaties, some with
retroactive effect. This table summarises WHT rates on payments arising in Canada.
The applicable treaty should be consulted to determine the WHT rate that applies in
a particular circumstance.

### Notes

1. **Interest**: Canada does not impose WHT on interest (except for “participating debt interest”) paid to arm’s-length non-residents. Most treaties have an explicit provision for higher WHT on interest in excess of fair market value in non-arm’s-length circumstances.

2. **Royalties**: A zero royalty rate generally applies to:
   - copyright royalties and payments for a literary, dramatic, musical, or other artistic work (but not royalties for motion picture films, work on film or videotape, or other means of reproduction for use in television), and/or
   - royalties for computer software, a patent, or for information concerning industrial, commercial, or scientific experience (but not royalties for a rental or franchise agreement).

   Different rates may apply in the case of immovable property (e.g. payments that relate to Canadian natural resources). Most treaties explicitly provide for higher WHT on royalties in excess of fair market value in non-arm’s-length circumstances. A zero rate of tax may apply in certain circumstances.

3. **The treaty has been signed, but is not yet in force. In the absence of a treaty, Canada imposes a maximum WHT rate of 25% on dividends, interest, and royalties.**

4. **The lower (lowest two for Vietnam) rate applies if the beneficial owner of the dividend is a company that owns/controls a specified interest in the paying company. The nature of the ownership requirement, the necessary percentage (10%, 20%, 25%, or higher), and the relevant interest (e.g. capital, shares, voting power, equity percentage) vary by treaty.**

5. **If the other state (Canada for the treaty with Oman) concludes a treaty with another country providing for a lower WHT rate (higher rate for Kenya), the lower rate (higher rate for Kenya) will apply in respect of specific payments within limits, in some cases.**

6. **Canada’s treaty with China does not apply to Hong Kong.**

7. **The treaty status of the republics that comprise the former USSR is as follows:**
   - Azerbaijan, Estonia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Russia, Ukraine, and Uzbekistan: new treaties entered into force (see table for rates).
   - Other republics: no negotiations are underway.
Belarus, Tajikistan, and Turkmenistan will not honour the treaty with the former USSR. As a result, Canada will impose a maximum WHT rate of 25% on dividends, interest, and royalties until a new treaty enters into force. For other republics that comprise the former USSR, the status of the former treaty with the USSR is uncertain. Because the situation is subject to change, Canadian taxpayers are advised to consult with the CRA as transactions are carried out.

8. The Canada/Republic of Colombia treaty and Protocol entered into force on 12 June 2012. Its provisions apply in Canada:
   • for purposes of non-resident WHT, to amounts paid or credited after 31 December 2012, and
   • for other taxes, for taxation years beginning after 2012.
   Before that, the rates were 25%.

9. A new treaty and Protocol with New Zealand was signed on 3 May 2012. Upon ratification, its provisions will apply in Canada:
   • for purposes of non-resident WHT, to amounts paid or credited after the end of the first month after they enter into force, and
   • for other taxes, for taxation years beginning after the calendar year they enter into force.
   The rates in the table are from the new treaty and Protocol. Under the new treaty and Protocol, the WHT rate will be reduced from 15% to:
   • 5% on dividends paid to a company that owns at least 10% of the payor’s voting stock (the rate will remain 15% on other dividends)
   • 10% on interest, but certain interest payments will be exempt, and
   • 10% on royalties, but certain royalties for the use of computer software, patents, and know-how, and certain copyright royalties, will be subject to a rate of 5%.

10. A new treaty and Protocol with Poland was signed on 14 May 2012. Upon ratification, its provisions will apply in Canada:
    • for purposes of non-resident WHT, to amounts paid or credited after the calendar year they enter into force, and
    • for other taxes, for taxation years beginning after the calendar year they enter into force.
    The rates in the table are from the new treaty and Protocol. Under the new treaty and Protocol, the WHT rate will:
    • be reduced from 15% to 5% on dividends paid to a company that directly owns at least 10% of the payor’s capital (the rate will remain 15% on other dividends)
    • be reduced from 15% to 10% on interest, but certain interest payments will be exempt, and
    • remain 10% on royalties, but certain royalties for the use of computer software, patents, and know-how will be subject to a rate of 5%, and certain copyright royalties will no longer be exempt and will be subject to a rate of 5%.

11. For the United States, the zero rate applies between related persons, subject to the Limitation of Benefits article.

---

**Tax administration**

**Taxable period**
The tax year of a corporation, which is normally the fiscal period it has adopted for accounting purposes, cannot exceed 53 weeks. The tax year need not be the calendar year. Once selected, the tax year cannot be changed without approval from the tax authorities.

**Tax returns**
Both the federal and the provincial/territorial corporation tax systems operate on an essentially self-assessing basis. All corporations must file federal income tax returns. Alberta and Quebec tax returns must also be filed by corporations that have PEs in those provinces, regardless of whether any tax is payable. Corporations with PEs in other provinces that levy capital tax must also file capital tax returns. Tax returns must be filed within six months of the corporation’s tax year-end. No extensions are available.

Certain corporations with annual gross revenues exceeding CAD 1 million are required to electronically file (e-file) their federal CIT returns via the internet. Also, information return filers that submit more than 50 information returns annually must e-file via the internet. Penalties are assessed for failure to e-file.

**Payment of tax**
Corporate tax instalments are generally due on the last day of each month (although some CCPCs can remit quarterly instalments, if certain conditions are met). Any balance...
Canada

payable is generally due on the last day of the second month following the end of the tax year.

**Functional currency**
The amount of income, taxable income, and taxes payable by a taxpayer is determined in Canadian dollars. However, certain corporations resident in Canada can elect to determine their Canadian tax amounts in the corporation’s ‘functional currency’.

**Tax audit process**
The tax authorities are required to issue an assessment notice within a reasonable time following the filing of a tax return. These original assessments usually are based on a limited review, if any, of the corporation’s income tax return. However, the notice of assessment will identify any changes made (e.g. correcting discrepancies on any balances carried forward).

Traditionally, all corporations with gross income over CAD 250 million and their affiliates are assigned a large case file team and audited annually. Medium-sized corporations (gross income between CAD 20 million and CAD 250 million) generally are selected based on a screening process and identified risks. Smaller corporations, which are usually CCPCs with gross income under CAD 20 million, have been subject to compliance or restricted audits, selected based on statistical data and a screening process. Audits of CCPCs are generally restricted to covering the current and one previous taxation year.

However, the CRA announced in the fall of 2010 that, over the next five years, it will implement a new ‘risk assessment’ model to select corporations, partnerships, income trusts, and private equity funds for audit. Large corporations and their affiliated entities are to be classified as high, medium, or low risk, and their categorisation will dictate the scope of the audit undertaken. Factors that determine the risk category include the taxpayer’s history with the CRA, the type of industry, and the internal controls in place. The CRA implemented this new risk assessment approach in 2012 by subjecting 50 of approximately 1,100 large corporations to it.

In 2010, the CRA issued a policy paper describing the powers that CRA officials have to obtain information and supporting documentation from taxpayers, registrants, and third parties. It also discusses the CRA’s policies and procedures for obtaining information, and how concerns with any specific information gathering process can be addressed by taxpayers or their representatives. The paper confirms that auditors determine what information is relevant for the review being conducted. It lists the compliance tools that can be used to obtain the information and the consequences for non-compliance. The CRA expects transparency and cooperation from the taxpayer, registrant, or third party to benefit the compliance process.

**Statute of limitations**
A reassessment of the tax payable by a corporation that is not a CCPC may be made within four years from the date of mailing of the original notice of assessment, usually following a detailed field audit of the return and supporting information. The limitation period is three years for CCPCs. The three-year and four-year limits are extended a further three years to permit reassessment of transactions with non-arm’s-length non-residents. Reassessments generally are not permitted beyond these limits unless there has been misrepresentation or fraud. Different time limits may apply for provincial reassessments.
**Appeals**
A taxpayer that disagrees with a tax assessment or reassessment may appeal. The first step is to file a formal notice of objection within 90 days from the date of mailing of the notice of assessment or reassessment, setting out the reasons for the objection and other relevant information. Different time limits may apply for provincial reassessments. Corporations that qualify as ‘large corporations’ must file more detailed notices of objection. The CRA will review the notice of objection and vacate (cancel), amend, or confirm it. A taxpayer that still disagrees has 90 days to appeal the CRA’s decision to the Tax Court of Canada, and if necessary, to the Federal Court of Appeal and the Supreme Court of Canada. However, the Supreme Court hears few income tax appeals.

**Topics of focus for tax authorities**
Topics of interest to Canadian tax authorities include:

- Transfer pricing (inbound and outbound), including the deductibility of:
  - royalty payments made by Canadian corporations to non-arm’s-length non-residents
  - business restructuring expenses incurred by a group of corporations located in more than one country
  - interest paid on loans if the funds derived from the loans are used offshore
  - guarantee fees paid by Canadian corporations to related non-resident corporations, and
  - management fees and general and administrative expenses.
- The offshoring of Canadian-source income by factoring the accounts receivable of Canadian corporations.
- Treaty shopping to reduce Canadian WHT and capital gains tax.
- Surplus stripping to reduce Canadian WHT by artificially increasing a Canadian corporation’s paid-up capital and subsequently distributing the surplus as a return of capital.
- The generation of foreign tax credits by a corporation for foreign income taxes that have not been borne by the corporation.
- The requirement to withhold tax on certain payments made to a non-resident that relate to fees, commissions, or other amounts in respect of services rendered in Canada.
- The residency (i.e. central control and management) of foreign affiliates.

**Foreign reporting**
Reporting requirements apply to taxpayers with offshore investments. The rules impose a significant compliance burden for taxpayers with foreign affiliates. Failure to comply can result in substantial penalties.

**Tax compliance reporting**
On 1 October 2012, the federal government introduced the Red Tape Reduction Action Plan, which will be implemented over the next three years. The plan puts into practice common-sense solutions to barriers identified by Canadian businesses, such as Canadian tax compliance reporting. The action plan has three major themes:

- Reducing the burden on business.
- Making it easier to do business with regulators.
- Improving service and predictability.
Canada

Tax avoidance
Draft legislation that was re-released on 24 October 2012 makes an ‘avoidance transaction’ meeting certain conditions a ‘reportable transaction’ that must be reported to the CRA, generally for transactions entered into after 2010, and those that are part of a series of transactions that commenced before 2011 and that are completed after 2010. Quebec already has a provincial reporting regime for certain aggressive tax planning transactions, generally carried out after 14 October 2009.

Tax evasion and aggressive tax avoidance
The 2013 federal budget introduces a number of proposals to help the CRA combat international tax evasion and aggressive tax avoidance:

• Starting in 2015, certain financial intermediaries will be required to report to the CRA international electronic funds transfers of CAD 10,000 or more.
• Upon royal assent to the enacting legislation, the court order process for obtaining information or documents from a third party will be streamlined.
• The ‘Stop International Tax Evasion Program’ will be launched, under which the CRA will compensate certain persons who provide information that leads to the assessment or reassessment of over CAD 100,000 in federal tax.
• For Form T1135 (Foreign Income Verification Statement):
  • if a taxpayer fails to report income from a specified foreign property on Form T1135 and the form was not filed on time or a specified foreign property was not, or not properly, identified on the form, the normal assessment period for this form is extended by three years, and
  • more detailed information will be required to be reported on the form.

Cross-border tax compliance
Canada is negotiating with the United States to improve cross-border tax compliance through enhanced information exchange under the Canada-United States Tax Convention. Negotiations will include information exchange to support the provisions in US FATCA.

Other issues
Forms of business enterprise
Canadian law is based on the British common-law system, except in Quebec where a civil-law system prevails. The principal forms of business enterprise available in Canada are the following.

• Corporation: A legal entity distinct from its shareholders, whether public or private, incorporated federally, provincially, or territorially.
• Partnership: A business relationship between two or more ‘persons’ (i.e. individuals, corporations, trusts, or other partnerships) formed for the purpose of carrying on business in common. Not treated as a legal entity distinct from its partners.
• Sole proprietorship: An unincorporated business operated by an individual that is carried on under the individual’s own name or a trade name.
• Trust: A relationship whereby property (including real, tangible, and intangible) is managed by one person (or persons, or organisations) for the benefit of another. May hold commercial enterprises.
• Joint venture: Generally, the pursuit of a specific business objective by two or more parties whose association will end once the objective is achieved or abandoned. Not treated as a legal entity distinct from the participants.
Foreign investors usually conduct business in Canada through one or more separate Canadian corporations, although operation as a branch of a profitable foreign corporation may be preferable during the start-up period. In addition, foreign investors may participate as partners in partnerships carrying on business in Canada or as joint venturers.

**Financial statement reporting**
For fiscal years beginning after 31 December 2010:

- Private enterprises must adopt either IFRS or Accounting Standards for Private Enterprises (ASPE).

As a result, IFRS and ASPE have become Canadian GAAP. This could affect the measurement and reporting of income taxes for financial statement purposes and the calculation of Canadian taxes payable.

**Leveraged life insurance arrangements**
The 2013 federal budget eliminates certain tax benefits for:

- ‘Leveraged insured annuities’: Generally for taxation years ending after 20 March 2013, annual accrual-based taxation applies, premiums are not deductible, and death benefits no longer increase a private corporation’s capital dividend account (CDA).
- 10-8 arrangements: No deductions are allowed for interest on related borrowings and insurance premiums that relate to a period after 2013, and the CDA is not increased for death benefits that become payable after 2013 and are associated with the borrowing.
Significant developments

2013 State Budget Law
The State Budget Law for 2013 was published in the Official Gazette on 31 December 2012 (Law no. 23/VIII/2013) and has introduced some changes to the value-added tax (VAT) regime. The VAT rate applicable to accommodation in the hotel sector or in sectors with a similar function, as well as in restaurant services, has increased from 6% to 15%. The VATable amount was changed to 100% regarding certain supplies of goods and services, including diesel, fuel, oil, fuel-oil, and electricity. Additionally, a tourism tax was introduced.

The measures included in the document are applicable from 1 January 2013, except the tourism tax, which entered into force on 1 May 2013.

New Tax Benefits Code
Law number 26/VIII/2013, dated 21 January 2013, published the Tax Benefits Code, approving the general principles and rules, contents, and conditions for the granting of tax benefits.

The new Tax Benefits Code contains the tax benefits and incentives that entered into force on 1 January 2013 (see the Tax credits and incentives section).

Tax treaty with Macao
The tax treaty signed between Cape Verde and Macao has entered into force. Withholding taxes (WHTs) are limited as follows:

- Royalties: 10%.
- Interest: 10%.
- Dividends: 10% (currently dividends are not taxed in Cape Verde).

Taxes on corporate income
Cape Verde has a single tax on income, called Imposto Único sobre os Rendimentos (IUR), which is levied on profits arising from business activities carried out in Cape Verde by resident companies or individual entrepreneurs and by Cape Verdean permanent establishments (PEs) of non-resident entities.

Taxable profit is computed according to the local accounting rules and adjusted for tax purposes. The taxation system in Cape Verde is based on a territorial principle; if the source of the income is located abroad, no Cape Verde taxation is imposed on it.
**Income tax rates**
The following IUR rates are applicable:

- Companies are subject to a tax rate of 25%, where taxable income corresponds to the profit less any tax benefits and any losses carried forward, as stated in the tax return.
- Non-residents without a PE in Cape Verde are subject to a 20% WHT on the amount of the invoice.

**Surcharge**
The IUR rate is increased by a fire brigade surcharge, called *Taxa de Incêndio*, of 2% on the tax due. This surcharge is levied in the municipalities of Praia (Island of Santiago) and Mindelo (Island of São Vicente).

**Corporate residence**
A company or entity is deemed to be resident in Cape Verde if its registered head office or its place of effective management is in the Cape Verde territory.

**Permanent establishment (PE)**
Non-resident companies deemed to have a PE in Cape Verde are also subject to tax in Cape Verde. Under Cape Verdan tax law, a non-resident company is deemed to have a PE if the non-resident company:

- has any fixed installation or permanent representation located in Cape Verde through which, among others, activities of a commercial, industrial, or agricultural nature, or fishing and rendering of services are carried out (including agricultural, fishing, and cattle raising explorations, or other quarries or any other places of natural resources extraction) or
- carries out its activity in Cape Verde through employees, or any other personnel hired for that purpose, for a period (continuous or not) of not less than 90 days within a 12-month period.

**Other taxes**

**Value-added tax (VAT)**
The VAT system in Cape Verde closely follows the European Union (EU) VAT system and is assessed at the standard rate of 15% and at a reduced rate of 6%.

The standard VAT rate of 15% is a general tax on consumption, applicable to the import and sale of goods and services in Cape Verde territory.

**Increase of the VAT rate on services related to tourism**
The VAT rate applicable to accommodation in the hotel sector or in sectors with a similar function, as well as in restaurant services, has increased from 6% to 15%.

This change applies to contracts signed after the entry into force of the 2013 State Budget. To benefit from the previous regime, tour operators must have proven, during January 2013, to the Directorate General of Taxation, on which date the contracts were signed.
Cape Verde

**Change of VATable amount**
The VAT rate will be applied on 100% of the amount on the following supplies of goods and services:

- Diesel, fuel, oil, and fuel-oil.
- Electricity.
- Tap water from the public supply.
- Telecommunication services.
- Road passenger transport and transport of goods by sea.

**Exempt transactions**
The VAT regulations establish two types of exempt transactions: exempt transactions without credit and exempt transactions with credit (i.e. zero-rated transactions). VAT incurred is recoverable in as far as the goods and services are used for the purposes of the taxed transactions of a taxable person or for zero-rated transactions.

Exempt transactions without credit include the following:

- Hospital and medical care and closely related activities undertaken by bodies governed by public law, or comparable activities undertaken by other hospitals and centres for medical treatment.
- The provision of medical care through the exercise of the medical and paramedical professions, as well as the supply of transport services for sick or injured persons, and the supply of human organs, blood, and milk.
- The supply of services and goods closely linked to welfare and social security work.
- The supply of services and goods closely linked to the protection of children and young people by bodies governed by public law.
- The provision of children's or young people's education, school or university education, including the supply of services and goods closely related thereto.
- The supply of services, and goods closely linked thereto, by non-profit-making organisations.
- The supply of copyright and art objects by the original creators or their heirs.
- The supply by the public postal services of stamps and stamped paper.
- The supply of certain cultural, educational, technical, and recreational services.
- Garbage removal.
- Burial and cremation supplies.
- Banking, financial, insurance, and reinsurance transactions, including related services performed by insurance brokers and insurance agents.
- Immovable property transactions (excluding the provision of accommodation in the hotel sector or in sectors with a similar function, the granting of facilities for collective parking of vehicles, the leasing of permanently installed machinery and equipment, and the granting of facilities for exhibitions and advertising).
- Specified basic foodstuffs and pharmaceutical products.
- Goods used in agriculture, stockbreeding, forestry, and fisheries.

Exempt transactions with credit (i.e. zero-rated transaction) on imports include the following:

- Import of goods whose supply qualifies for exemption.
- Re-import of goods by the person who exported them, in the state in which they were exported, where they qualify for exemption from customs duties.
- Services in connection with the import of goods where the value of such services is included in the taxable amount.
- Import of gold by the central bank.
Cape Verde

- Import into ports by sea fishing undertakings of their catches, unprocessed or after undergoing preservation for marketing but before being supplied.
- Import of goods under diplomatic and consular arrangements that qualify for exemption from customs duties.
- Import of goods for the fuelling and provisioning of sea-going vessels and aircraft.

The most important exemptions with credit (i.e. zero-rated) for exports and connected transactions include the following:

- Supply, modification, repair, maintenance, chartering, and hiring of aircraft used by airlines operating both on domestic and international routes, and the supply, hiring, repair, and maintenance of equipment incorporated or used therein.
- The supply of goods for the fuelling and provisioning of such aircraft.
- Services meeting the direct needs of such aircraft or their cargoes.

**Customs duties/Import tariffs**

Customs duties are levied at rates ranging from 0% to 50% on the customs value of most imported goods. Since Cape Verde imports the majority of the goods it consumes, a 50% tariff protection applies for certain domestically produced goods.

Raw materials or capital goods can be imported with an exemption from custom duties or at a low rate.

**Special consumption tax**

A special consumption tax is imposed at rates ranging from 10% to 150% on goods that are deemed superfluous, luxurious, or undesirable for economic, social, or environmental policy reasons.

The excise duty rate is 40% in the case of beers, wines, vermouths, and other alcoholic drinks, and 20% in the case of tobacco.

Vehicles used for transportation, up to 5 tons, are subject to rates of up to 150%, according to their age:

- Up to four years: not applicable.
- More than four and up to six years: 40%.
- More than six and up to ten years: 80%.
- More than ten years: 150%.

**Property taxes**

A property tax, called Imposto Único sobre o Património (IUP), is levied at the rate of 3% in Cape Verde.

IUP is due on the ownership of immovable property on an annual basis by the owner of the real estate, registered as such on 31 December of the relevant year. The taxable basis corresponds to 25% of the value attributed by the Evaluation Commission.

IUP is also due on the transfer (gratuitously or for a consideration) of real estate, based on the value of the contract declared by the transferee.

Exemption of IUP due on the acquisition is granted to:

- Cape Verdean emigrants who own saving bank accounts.
- Retired individuals.
Cape Verde

• Projects with Touristic Utility Status (see the Tax credits and incentives section for more information).

In taxable transfers (not exempt), IUP is payable by the transferee.

IUP is also due on the capital gains arising from the sale of:

• plots of land for construction, if the sales price is more than double the purchase price, and
• buildings or other real estate, if the sale price exceeds the purchase price by more than 30%.

IUP on capital gains is normally paid by the transferor, on the highest of the declared price and the official value of the property concerned.

Capital gains obtained by companies that are in the business of buying real estate for resale are not subject to IUP.

**Stamp duty**

Stamp duty is payable on a wide variety of transactions and documents, at rates that may be set in specific amounts or on a percentage basis.

* Fixed exchange rate 1 euro (EUR) = 100.265 Cape Verdean escudos (CVE) under an exchange agreement between Cape Verde and Portugal.

**Ecologic charge**

Cape Verde’s ecologic charge is applied to packing material, whether empty or full, imported or produced internally, non-biodegradable or made out of metal, glass, or plastic.

The ecologic charge varies from CVE 2 to CVE 100 per item, depending on the quantity or weight of the goods.

This fee is due by the local producer or the importer.
Exemptions are available in the case of packing material used in medicine, essential food (e.g. corn, rice, sugar, flour, and milk), and construction (e.g. cement). Packing material that is exported, reutilised, or recycled is also exempt.

Tourism tax
As of 1 May 2013, a tourism tax is applied to accommodation in the hotel sector. The tax amounts to CVE 220 per person per night, for people over 16 years of age, and cannot exceed ten consecutive nights.

Branch income
A branch is not considered a separate legal entity distinct from the foreign head office. It is governed by the domestic law of Cape Verde.

From a tax perspective, branches are subject to IUR if considered a PE under Cape Verde law.

Income determination
Taxable income is computed on the basis of the accounting income, adjusted by deducting from taxable profits the prior years’ losses and any deductions under the tax (incentive) legislation.

Inventory valuation
The tax law does not foresee any mandatory inventory valuation method that should be adopted by Cape Verdean taxpayers. For tax purposes, accepted inventory methods should be consistent with the accounting rules in force and with generally accepted local business practice. Such methods should be applied in a consistent manner over the financial years and based on the prices effectively paid or established by official documents (for regulated prices).

Capital gains
Capital gains are not subject to a separate capital gains tax and are treated and taxed as ordinary business income.

The gain corresponds to the amount by which proceeds from disposal exceed the cost of asset acquisition.

Capital gains realised from the sale of shares and part of the capital of companies with a registered head office or place of effective management in Cape Verde, if owned for at least one year, are not subject to taxation.

Dividend income
Dividend income is currently fully exempt from taxation in Cape Verde.

Interest income
There is no special tax provision regarding interest income. Interest income is treated and taxed as ordinary business income.
Cape Verde

**Foreign income**
Resident companies and PEs of non-resident companies are taxable on a territorial base principle, meaning that income obtained outside Cape Verde is not subject to taxation therein.

**Deductions**

**Depreciation**
Depreciation is considered a deductible cost with respect to all fixed assets (except land), up to the limits determined by the applicable tax law.

As a general rule, depreciation must be computed by using the straight-line method. Tax authorities may allow other depreciation methods on the basis that the actual depreciation is higher than the one calculated at regular rates or according to the taxpayer’s accounting practice.

Under the straight-line method, the maximum depreciation that is deductible is calculated by applying the general depreciation rates set out in a Ministerial Decree of 28 January 1984 to the adjusted purchase cost or production cost.

Land is not depreciable.

### Goodwill

Goodwill is an asset subject to impairment tests. The goodwill's impairment is not a deductible cost for tax purposes.

### Start-up expenses

Start-up expenses include, among others, cost incurred with set-up and organisation of companies, projects, and increase of capital. Start-up expenses are considered a deductible cost up to the limits derived from the applicable tax law, 33.33% per year being deductible over a period of three years.

### Interest expenses

Interest expenses are deductible if considered indispensable for the realisation of taxable profits/gains.

### Bad debt

Provision regarding bad debts is accepted as a deductible cost within the following limits: 4% of accounts receivable per year, with a cumulative maximum of 5%.

### Charitable contributions

Charitable contributions granted to certain entities whose main activity consists in the execution of initiatives in the social, cultural, environmental, scientific or technologic, sports, and educational areas are considered as cost for tax purposes (within certain limits, and in certain circumstances, with an additional deduction).
Cape Verde

**Fines and penalties**
Tax (and fines) penalties are not deductible for tax purposes.

**Taxes**
Taxes paid in connection with the activity of the company are tax deductible, excluding IUR. The annual IUP can be deducted from the IUR assessed.

**Net operating losses**
Income tax losses can be offset against taxable profit and can be carried forward for three years. Carryback of tax losses is not allowed in Cape Verde.

The tax losses incurred by a company are not transferable to another company unless previously accepted by the tax authorities.

**Payments to foreign affiliates**
Currently, there are no special restrictions on the deductibility of royalties, interest, and service fees paid to foreign affiliates, provided that the payments are regarded as indispensable to generate taxable profits and gains and to maintain the business of the company.

**Group taxation**
There is no special tax regime for groups of companies in Cape Verde.

**Transfer pricing**
There is no special tax regime regarding transfer pricing in Cape Verde.

**Thin capitalisation**
There is no special tax regime regarding thin capitalisation in Cape Verde.

**Tax credits and incentives**

**Foreign Investor Status (Estatuto do Investidor Externo)**
The Foreign Investor Status, which has granted some tax benefits at the level of the investor (e.g. exemption from WHT on distribution of profits and on interest related to the financing of the investment) was revoked by the New Investment Code with effect from 1 January 2013. The tax benefits already granted or for which recognition has been requested prior to the entry into force of the Tax Benefits Code and the Investment Code are maintained. Investment projects submitted for analysis and approval to the competent authorities prior to the entry into force of the Tax Benefits Code continue to be regulated under the legislation in force at the date of the respective submission.

**Industrial Activity Law**
The following tax and custom benefits are provided for industrial activity:

**IUR benefits**
An IUR credit is available for up to 50% of the eligible investments made in an industrial activity. Any unused tax credit may be carry forward for ten years, subject to certain limitations.

Eligible investments include the acquisition of new fixed assets, patents, and licences regarding technologies.
IUP benefits
Industrial activities may benefit from an exemption from IUP on the acquisition of immovable property used exclusively for industrial purposes; however, the recognition of such tax exemption should be approved by the municipality.

Custom duty benefits
Industrial activities benefit from an exemption from custom duties on the import of construction material, machines, utensils, semi and finished materials, products, and raw materials used in the production of goods.

Stamp duty benefits
Financing transactions of industrial projects are exempt from stamp duty.

International Business Centre (IBC) of Cape Verde
The Cape Verdiean Agency for Foreign Investment is the entity responsible for granting the licences to operate within the IBC, upon previous proposal of the Zona Franca Comercial S.A.. The following tax benefits are applicable to entities licensed to operate in the IBC on income from industrial or business activities and services in respect of operations carried out with other IBC licensed entities or with non-residents entities (without a PE in Cape Verde).

Note that these tax benefits are not applicable to entities engaged in tourism, banking and insurance, real estate, or construction.

IUR benefits
Reduced IUR rates of 5%, 3.5%, or 2.5% are applicable to entities that create respectively 5, 20, or 50 jobs.

The IUR rate is 2.5% in case of the creation of two jobs for entities licensed to operate within the International Service Centre.

Under current IUR law, foreign-sourced income is not subject to taxation in Cape Verde.

VAT and custom duty benefits
All the exemptions foreseen in the VAT regulation and customs law apply.

An exemption from custom duties applies with respect to certain goods, equipment, and materials used within the scope of the activity developed and licensed under the IBC.

Tax and financial incentives for internationalisation of Cape Verdiean companies
A regime that provides for tax and financial incentives for investment projects in order to promote the internationalisation of Cape Verdiean companies is in force.

The following incentives, to be granted under a contract of not more than three years, apply to internationalisation projects of companies with head office and place of effective management in Cape Verde, which are undertaken before 31 December 2020.

IUR benefits
Investments that are eligible for the regime of tax benefits for internationalisation may benefit from:

- Reduced IUR rate of up to 50%, applicable until the term of the investment contract.
- Exemption from IUR on income obtained by qualified expatriate employees.
Cape Verde

Additionally, a deduction for creation of employment ranging between CVE 26,000 (approximately EUR 235) and CVE 35,000 (approximately EUR 320) for each new job created may apply.

**IUP benefits**

An exemption from IUP may be available on the acquisition of immovable property for the establishment or expansion of the activity of the investor.

**VAT and custom duty benefits**

Exemptions provided for in the VAT Code apply, as well as custom duties incentives as provided for in the general applicable legislation.

**Stamp duty and other benefits**

An exemption from stamp duty is available on the incorporation of companies on an increase of share capital of existing companies, and on financing transactions.

An exemption from notary and registration fees is available on the incorporation and registration of companies.

**Tax benefits for social housing**

Entities responsible for the construction of social housing, duly authorised by the competent regulatory authority (Comissão de Coordenação e Credenciação do Sistema Nacional de Habitação de Interesse Social or CCC-SNHIS), may benefit from the following:

- Only 30% of the income derived from the activity carried out within the scope of the social housing project is subject to IUR, under certain conditions.
- A refund of 80% of the VAT incurred in the Cape Verdean market is available in cases where those entities carry exclusively exempt operations without the right to deduct input VAT.
- A reduction of 75% of custom duties levied on construction material listed in an annex to the diploma is available.

Development promotion entities, provided they are also authorised by CCC-SNHIS, are also eligible for VAT benefits.

**Touristic Utility Status (Estatuto de Utilidade Turística)**

Cape Verde may grant Touristic Utility Status to certain touristic projects. Touristic Utility Status is granted to the following types of touristic projects:

- Installation: Granted to new touristic projects.
- Functioning: Granted to touristic projects starting to operate.
- Refurbishment: Granted to touristic projects in case of refurbishment projects with a value of at least 25% of the initial investment.

Touristic Utility Status generally allows for the following tax incentives and benefits:

- IUR credit of up to 50% of the eligible investments made in tourism, touristic promotion activities, and real estate tourism project investment.
- Exemption from IUP on the acquisition of real estate used for construction and installation of touristic projects, if granted by the municipality.
- Exemption from custom duties on the importation of materials and equipment used in touristic projects.
- Exemptions from stamp duty on the financing of tourism investments.
Tax incentives for renewable energies
There is a regime for promotion, encouragement and access, licensing, and exploitation inherent to the exercise of independent production and self-production of electricity based on renewable energy sources.

Water, wind, solar, biomass, biogas or industrial, agricultural or urban waste, oceans and tides, and geothermal are to be consider sources of renewable energy. Under the regime, renewable energy producers may benefit from the following.

IUR benefits
An IUR credit is available for up to 50% of the eligible investments made in renewable energies projects.

Custom duty benefits
An exemption from custom duties and other custom charges applies on the importation of capital goods, raw materials and supplies, finished and semi-finished products, and other materials that are incorporated or used in the production of goods or services involved in the production of electrical energy from renewable sources.

IUP and stamp duty
Exemptions from IUP and stamp duty are granted on the acquisition of immovable property and other assets related to the investment project or its financing.

Shipping transport industry incentive

IUR benefits
IUR credit is available for up to 50% of the eligible investments made in shipping, air, and sea transportation projects.

Custom duty benefits
An exemption from custom duties applies on the importation of shipping material for the maintenance, production, and repair of shipping and respective equipment.

IUP and stamp duty
Exemptions from IUP and stamp duty are granted on the acquisition of immovable property and other assets related to the investment project or its financing.

Job creation incentives
Entities taxed under the verification method are entitled to deduct the following amounts for each created permanent job:

- CVE 26,000 (approximately EUR 235) for each job created in the municipalities of Boa Vista, Praia, and Sal.
- CVE 30,000 (approximately EUR 270) for each job created in the remaining municipalities.
- CVE 35,000 (approximately EUR 320) in case of a disabled person.

Media, telecommunications, and internet
Importation of good, materials, equipment, vehicles, and other equipment exclusively for the purpose of telecommunications and media are exempt from custom duties.

Tax benefits to the financial sector
The Tax Benefit Code has introduced several measures in the financial sector, as follows.
Cape Verde

Financial investments
Income derived from certificates of deposit and long term bank deposits benefit from an IUR exemption of up to 75% (depending on the maturity date of the deposits).

Securities market (bonds)
Income derived from bonds or similar products (except debt securities listed in the securities market) obtained until 31 December 2017 benefit from a 5% IUR flat rate.

Additionally, dividends from shares listed in the stock exchange, placed at the disposal of its holders until 31 December 2017, are exempt from IUR.

Investment funds (securities and real estate funds)
Income derived from securities' funds, when established and operating under the Cape Verdean legislation, is taxed as follows:

• Income obtained in the Cape Verdean territory is exempt from IUR (except capital gains).
• Foreign income is subject to a 10% IUR flat rate (except capital gains).
• Capital gains are subject to a 10% IUR rate.

Income derived from real estate funds, established under the Cape Verdean legislation, is taxed as follows:

• Real estate income benefits from a 10% IUR rate (after deduction of the respective expenses).
• Capital gains benefit from a 15% IUR rate over 50% of the income, resulting in an effective rate of 7.5%.

Income received by unit holders in securities' funds and real estate investment funds, established under Cape Verdean legislation, is exempt from IUR.

Venture capital funds
Income derived from venture capital funds, established under Cape Verdean legislation, as well as income received by the unit holders in venture capital funds, is exempt from IUR.

International financial institutions
International financial institutions within the scope of Law 43/ III / 88, of 27 December, benefit from:

• Custom duties exemption on the importation of materials and equipment that are exclusively for the setting-up of the financial institution.
• IUR exemption until 31 December 2017 and a 2.5% IUR rate from 1 January 2018 onwards.
• Stamp duty exemption in transactions with non-residents entities.

Individuals and entities considered as clients of such international financial institutions, benefit from:

• IUR exemption, regardless of the type of income.
• Stamp duty exemption.
Holding companies (*Sociedades Gestoras de Participações Sociais*)
Capital gains or losses realised by holding companies, as well as financing expenses incurred with the acquisition of shares, held for at least 12 months, are not taken into account for the purposes of computation of the taxable profit of such holding companies.

This rule does not apply in case of shares acquired from associated enterprises or from entities located in territories with a more favourable tax regime.

**Tax benefits with social nature and custom duties benefits**

**Training, internships, and grants**
Companies taxed under the verification method may deduct 150% of the following costs:

- Costs related to the training of employees.
- Costs associated with the hiring of young people for internship positions.
- Costs associated with scholarships granted to students.

**Donations**
Companies may deduct 130% of the amounts donated to the following entities and activities, up to 1% of the turnover, under certain conditions:

- Entities that develop, among others, social, cultural, sportive, educational, environmental, scientific, technological work, and health services.
- State, municipalities, and any other public services.
- Municipal associations.
- Foundations.

**Custom duties benefits**
Under certain conditions, the following business sectors, among others, may benefit from custom duties exemption on the importation of products, materials, and equipment related to the activity/project:

- Agriculture, livestock, and fishing activity.
- Civil aeronautics.
- Diplomatic and consular missions.
- Aid to economic development.
- Foreign citizen retired.
- Sports and musicals.
- Fire corporation.

**Tax benefits to others sectors of investment**
Eligible investments made in activities such as information technology and scientific research may benefit from:

- IUR credit of up to 50%.
- Exemptions from IUP, stamp duty, and custom duties on the acquisition of immovable property and other assets related to the investment project or its financing.
Cape Verde

**Withholding taxes**

WHT of 15% is due on payments of interest and royalties made between resident companies.

Payments of services between resident companies are generally not subject to WHT.

Rental payments due by resident companies are, however, subject to WHT of 10%.

For a Cape Verde-based recipient, tax withheld is a payment on account against the final single income tax due.

Any non-Cape Verdesan resident entity carrying out an economic activity in Cape Verde is subject to a final 20% WHT, applied on interest, royalties, rents, services, and fees.

Dividends are not subject to WHT, irrespective of the residence status of the recipient.

**Tax treaties**

Under the Cape Verde/Portugal tax treaty, WHT is limited as follows:

- Royalties: 10%.
- Interest: 10% (0% applies to interest paid by public bodies).

Note that WHT on dividends under the Cape Verde/Portugal tax treaty is limited to 10%. However, dividends are currently not taxed in Cape Verde.

The tax treaty signed between Cape Verde and Macau has entered into force. WHT is limited as follows:

- Royalties: 10%.
- Interest: 10%.
- Dividends: 10% (currently, dividends are not taxed in Cape Verde).

**Tax administration**

**Taxable period**

As a general rule, the tax year is the calendar year. A different tax year may be applied, subject to authorisation from the Ministry of Finance, in the case of non-resident companies with a PE in Cape Verde and in other situations duly justified by economical reasons.

**Tax returns**

Taxpayers are required to file a tax return by 31 May of the year following the end of the tax year.

**Payment of tax**

Corporate taxpayers must make a prepayment of their income tax liability for the current tax year. The prepayment is calculated as 30% of the preceding tax year’s income tax liability and should be paid by 20 January of the following year.

Taxpayers are required to self-assess the tax due by 31 May of the year following the end of the tax year.
The tax authorities will verify the tax return and raise a final assessment of tax liability by 20 July of the same year. The taxpayer must then pay the remaining tax due by 31 July.

**Tax audit process**
There are no specific rules regarding the tax audit cycle in Cape Verde.

**Statute of limitations**
The statute of limitations period in Cape Verde is for five years.

**Topics of focus for tax authorities**
The main topics of focus for Cape Verdean tax authorities regard cost incurred for assets considered of mixed use (e.g. vehicles, communications), personnel costs, management fees, and payments to non-residents.
Significant developments

On 10 October 2012, the Secretary of Finance for the Netherlands announced a package of proposed tax cuts for the Caribbean Netherlands. This was a result of higher estimates of revenues for the budget year 2011. The following tax cuts have been implemented with regard to businesses:

- Reduction of the real estate tax rate from 1% to 0.8% in general and to 0.4% for hotels. The tax base of the real estate tax is the market value of the property.
- Tax exemption for the real estate tax for a period of five years for the increase in value as a result of new construction, renovation, and expansion.

Several other general tax cuts have been implemented, including the following:

- Expanding the list of exemptions for the sales tax, such as for certain groceries.
- Reduction of the gasoline tax.

Taxes on corporate income

Income from immovable property is subject to real estate tax. The real estate tax is levied based on the value of real estate. As is the case at present, the value is established for five years each time. The income is deemed to be 4% of the value of the real estate, and the tax rate is 10% for hotels and 20% for other real estate. Therefore, the tax effectively amounts to 0.4% and 0.8% of the value, respectively.

Exemptions apply for the dwelling that serves as the principal residence and land that is being commercially operated for agricultural or forestry purposes. A five year exemption applies for the increase in value of real estate as a result of new construction, renovation, and expansion.

A revenue tax is levied on the revenues from shares and profit-sharing certificates, as well as on distributions from foundations, special purpose funds, or a closed-end common fund. The rate of the revenue tax is 5%.

There are no other taxes on income or capital gains.

The revenue tax and the real estate tax only apply if certain requirements of residency have been met. A corporation that is established in the Caribbean Netherlands that does not meet certain criteria will, for the purpose of the revenue tax and the real estate tax, be deemed to be established in the Netherlands and will be taxed accordingly. That means that instead of revenue tax and real estate tax, the Dutch corporate income tax of 20% to 25% will apply, as well as the Dutch dividend tax of 15% (see the Corporate residence section for more information).
Corporate residence

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management in the Caribbean Netherlands is considered to be a resident.

For purposes of the revenue tax and the real estate tax, however, a resident corporation is deemed to be established in the Netherlands unless specific criteria have been met, the purpose of which is to guarantee commercial ties with the Caribbean Netherlands.

An entity is deemed to be established in the Caribbean Netherlands, not the Netherlands, based on the following criteria:

- It has been admitted to a bonded warehouse for commerce and services, or
- It obtained a declaration from the Inspector of Taxes that one of the following conditions applies:
  - It is not active in financial services or insurance, turnover is not more than 80,000 United States dollars (USD), and assets are not more than USD 200,000.
  - The assets usually consist of less than 50% of investments, participations, liquidities, and assets that are made available for use to persons outside the Caribbean Netherlands, as well as assets, directly or indirectly, used for financing persons outside the Caribbean Netherlands.
  - It usually provides permanent work to at least three persons living in the Caribbean Netherlands who engage independently in activities relating to the assets mentioned above and whose responsibility is in line with their job position, and it has, at its disposal, real estate situated in the Caribbean Netherlands for a period of at least 24 months with a value of at least USD 50,000 for the activities, and this real estate is used as an office with facilities that are customary in the financial sector.
  - It holds, at a minimum, 95% of the shares of an entity as mentioned above.

Resident corporations that do not meet these criteria are deemed to be established in the Netherlands, which causes them to be subject to the Dutch corporate income and dividend withholding taxes (WHT). This does not apply to foundations, special purpose funds, or a closed-end common fund.

Other taxes

Sales tax

A general expenditure tax (Algemene Bestedings Belasting or ABB) has replaced the levy of import duties, as well as the former sales tax (Omzetbelasting or OB and Belasting op Bedrijfsonzetten or BBO), of the former Netherlands Antilles. The rate is 8% in Bonaire and 6% in Saba and St. Eustatius.

The rate for insurances is 9% and 7%, respectively.

The rate for restaurants and bars is 6% and 4%, respectively.

A rate of 25% applies to cars, unless it concerns a very low energy car, in which case the rate is 0%.
Caribbean Netherlands

ABB is levied in respect of:

• Sale of goods by manufacturers.
• Delivery of services within the levy area.
• Import of goods.

Therefore, the sale of goods will only be subject to tax once, at the manufacturer or at the time of import. The sale of bread has been exempt. In addition, the supply of grain, potatoes, and rice will also be exempt. Other exemptions that apply, similar to the former OB and BBO legislation, are:

• Public transportation.
• Medical services and hospitals.
• Water and electricity.
• Fuels and other products, including supplies, for international transportation.
• Renting of houses.

**Excise taxes**
Excise tax is due on gasoline. On Bonaire, excise tax is also due on alcohol, with different tariffs for liquor, wine, and beer, as well as for tobacco. This does not apply to Saba and St. Eustatius.

The excise rates are:

• USD 41.86 per hectolitre of gasoline or approximately USD 1.60 per gallon on Bonaire (USD 1.30 on Saba and St. Eustatius).

Only on Bonaire:

• USD 67.04 per hectolitre of beer.
• USD 128.50 per hectolitre of wine.
• USD 12.85 per volume percent of alcohol per hectolitre of distilled products.
• USD 5.34 per 100 cigarettes.
• USD 9.78 per 100 cigars.
• USD 4.89 per 100 cigarillos.
• USD 30 per kilogram of smoking tobacco.

**Property taxes**
There is an annual property tax of 0.3% on the value of real estate.

**Transfer taxes**
The transfer of immovable property on the islands of the Caribbean Netherlands is subject to a 5% transfer duty.

**Stamp tax**
No stamp tax is levied in the Caribbean Netherlands.

**Branch income**
Entities not established in the Caribbean Netherlands are only taxed on the fixed income of local real estate (i.e. 25% real estate tax on 4% of the value of the property the corporation owns in the Caribbean Netherlands). The revenue tax does not apply to
the remittance of profits from the permanent establishment (PE) to the head office of the corporation. No other taxes are levied.

The criteria for deemed residency in the Caribbean Netherlands do not apply to PEs, except for a PE of a corporation that is a resident of Aruba, Curaçao, or St. Maarten. In cases where the activities of such a PE would not qualify for deemed residency in the Caribbean Netherlands if it had been a corporation, this PE is liable to taxation in the Netherlands.

**Income determination**

In the Caribbean Netherlands, there is a tax on the fixed income of local real estate (real estate tax) and on profits distributed to shareholders (revenue tax). As long as income is not distributed, profits other than from real estate are not subjected to tax. Therefore, there are no regulations with regard to income determination.

**Deductions**

No deductions are allowed on the fixed income with regard to real estate tax or the distributions of profit for revenue tax purposes.

**Group taxation**

Distribution of profits to another corporation on one of the islands of the Caribbean Netherlands is exempt from revenue tax if the other corporation holds, at minimum, a 5% interest in the corporation that is making the distribution.

**Tax credits and incentives**

A corporation that has been designated as a bonded warehouse for commerce and services is exempt from ABB and excise tax. As a result, goods in transshipment remain tax free. However, if goods that have been admitted to a bonded warehouse are sold within the Caribbean Netherlands, this will be considered importing these goods and ABB and excise tax will be due.

**Withholding taxes**

A revenue tax of 5% is levied on distributions from corporations as well as distributions from foundations, special purpose funds, or a closed-end common fund.

**Tax treaties**

The Caribbean Netherlands currently has a tax treaty in effect with Norway. A double tax agreement (DTA) has been negotiated with Jamaica, but this has not entered into force yet. *See the Tax administration section for a description of tax information exchange agreements (TIEAs).*

**Tax arrangement for the Kingdom of the Netherlands (TAK)**

As part of the Kingdom of the Netherlands (TAK), the Caribbean Netherlands is party to a federal tax agreement with Aruba, Curaçao, and St. Maarten as well as
a tax agreement for the Netherlands (TAN) with regard to the attribution of tax between the Netherlands and the Caribbean Netherlands. Subject to the TAK and the TAN, dividends, interest, and royalties paid to a company resident in the Caribbean Netherlands may qualify for reduced rates of WHTs in the subject countries or in the Netherlands.

Dutch dividend WHTs are 15% if the Caribbean Netherlands company owns less than 10% of the Dutch company. If the Caribbean Netherlands company's interest is 10% or more, Dutch WHT can be reduced to 0%. Aruban dividend tax will be reduced from the statutory rate of 10% to 5%. In the Caribbean Netherlands, the dividends will not be taxed when they are received. However, at the time the dividends are distributed to the shareholder, they will be subject to the 5% revenue tax.

The TAN came into force on 1 January 2011. The TAK is to be revised. Negotiations have already started between Aruba and Curaçao each with the Netherlands. In the end, the existing TAK will then be replaced by separate bilateral agreements. An agreement between the Netherlands and Curaçao is now expected to enter into force on 1 January 2014. There is no certainty when the old TAK will be replaced with regard to the other countries within the Kingdom.

**Tax administration**

**Tax returns**
Revenue tax returns must be filed and the amount due must be paid at the end of the quarter of the year in which the distribution has been made.

The real estate tax is levied by way of a tax assessment.

**Payment of tax**
Revenue tax must be paid at the time of filing and in a lump sum on the basis of the self-assessment.

The real estate tax must be paid within two months of the date of the tax assessment.

**Statute of limitations**
A reassessment can be imposed until five years after the tax year.

**Tax information exchange agreements (TIEAs)**
TIEAs have been signed with several countries, including Australia, Canada, Denmark, Mexico, New Zealand, Spain, Sweden, and the United States. As a result, the Caribbean Netherlands, as part of the former Netherlands Antilles, has been moved to the white list of the Organisation for Economic Co-operation and Development (OECD) Global Forum.

---

**Significant developments**
In March 2013, the Cayman Islands government announced that it would adopt a Model 1 intergovernmental agreement (IGA) in response to the United States (US) Foreign Account Tax Compliance Act (FATCA).

In April 2013, the Cayman Islands government communicated to the United Kingdom (UK) government that it is committed to joining the G5 pilot, recently announced by the United Kingdom, France, Germany, Italy, and Spain, on multilateral automatic exchange of tax information.

---

**Taxes on corporate income**
Corporate income, capital gains, payroll, or other direct taxes are not imposed on corporations in the Cayman Islands.

---

**Corporate residence**
Since no corporate income, capital gains, payroll, or other direct taxes are currently imposed on corporations in the Cayman Islands, corporate residency is not relevant in the context of Cayman Islands taxation.

Entities engaged in 'scheduled' trade and business in the Cayman Islands (as defined in the Trade & Business Licensing Law) are required to have a trade and business licence. Effecting and concluding contracts in the Cayman Islands and exercising, in the Cayman Islands, powers necessary for the carrying on of a business outside the Cayman Islands is generally not considered to be engaging in trade and business in the Cayman Islands.

---

**Other taxes**

**Value-added tax (VAT)**
There is no VAT imposed in the Cayman Islands.
Cayman Islands

**Import duties**
Import duty is paid, generally at a rate of 22% to 27%, on importation of most goods. Please refer to the Cayman Islands Customs' website (www.customs.gov.ky) for the latest list of tariff rates.

**Excise taxes**
There are no excise taxes in the Cayman Islands.

**Property taxes**
There are no property taxes in the Cayman Islands.

**Stamp duties**
Stamp duty is paid, generally at a rate of 7.5%, on transfers of Cayman Islands immovable property. Stamp duty, in the form of a transfer tax equal to the applicable stamp duty, also applies to transfers of shares in land holding companies.

Cayman Islands stamp duty may also be payable if any documents are executed in, after execution brought to, or produced before a court of the Cayman Islands. Such stamp duty will be nominal in most instances and is capped at 500 Cayman Islands dollars (KYD) (600 United States dollars [USD]).

Stamp duties also apply on legal or equitable mortgages or charges of immovable property or debentures. The stamp duty ranges from 1% to 1.5%, depending on the sum secured.

**Branch income**
Branches are treated the same as other corporations doing business in the Cayman Islands.

**Income determination**
Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, income determination is not relevant in the context of Cayman Islands taxation.

**Deductions**
Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, deductions from income are not relevant in the context of Cayman Islands taxation.

**Group taxation**
Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, group taxation is not relevant in the context of Cayman Islands taxation.
Tax credits and incentives

Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, tax incentives are not relevant in the context of Cayman Islands taxation. However, Cayman entities carrying on business outside the Cayman Islands can register as ‘exempted companies’ (i.e. a company formed primarily to do business outside of the Cayman Islands and subject to certain requirements) and can apply under the Tax Concessions Law for an undertaking to be issued by the Governor-in-Council (i.e. the Cayman Islands government) exempting such company from any tax on profits, income, gains, or appreciation that might be introduced in the period of 20 years following the grant of such concessions. The concession is extendable for a further ten years after expiry. ‘Exempted limited liability partnerships’ (i.e. certain partnerships formed primarily to do business outside of the Cayman Islands) can apply under the Exempted Limited Partnership Law for a similar concession that is for 50 years (rather than 20 years).

Withholding taxes

Currently, no withholding taxes (WHTs) are imposed on dividends or payments of principal or interest.

Tax administration

No tax returns, forms, or procedures are required to be completed for tax compliance purposes in the Cayman Islands.

The Tax Information Authority serves as the competent authority in the Cayman Islands. The Cayman Islands currently has 30 signed Bilateral Agreements, of which 25 are in force. Please refer to the Tax Information Authority’s website (www.tia.gov.ky/html/assistance.htm) for the latest list of Bilateral Agreements.

The Cayman Islands agreed with the United Kingdom (UK) government to implement the Savings Directive, and so the Reporting of Savings Income Information (European Union or EU) Law (2007 Revision) came into force, setting out a reporting regime whereby Cayman paying agents making interest payments to individuals who are tax resident in a EU member state may have to report interest paid. The Cayman Tax Information Authority receives or facilitates submission of such information reporting.

---

**Significant developments**

**Opportunity to set up a supplementary pension plan**

The new Article 20.10 of the 2013 Finance Law gives the opportunity for companies to set up a supplementary pension plan.

**Terms of implementation:**

- Direct payment of pension to employees.
- Payment of contributions to an outside agency (pension fund or insurance company) who will manage the benefits for the employees.

Furthermore, the deductibility of the pension contributions from taxable income is subject to some conditions:

- Payments must result from a genuine legal obligation enforceable by the employer.
- This commitment must be general and impersonal, i.e. involve all staff or one or more specific categories of it (workers, employees, supervisors, engineers, and managers).
- When the company chooses to entrust the pensions to a third party, the deductibility of contributions and premiums paid is subject to two specific supplementary conditions:
  - the pension fund or insurance company of the contributions must have a distinct personality from the company, and
  - the insurance company of the contributions shall retain no ownership or disposition of sums paid.

---

**Taxes on corporate income**

The profits subject to the company tax are determined with sole regard to profits earned by businesses carried out or transactions conducted in Chad.

The net taxable profits are established after deduction of all charges directly entailed by the exercise of activities subject to assessment in Chad. As income from other countries is not liable to tax, foreign charges and losses are not deductible either.

The corporate tax rate in Chad is 40%.
**Minimum tax**

There is a minimum tax of 1.5% based on the turnover and an additional 1 million Central African CFA francs (XAF) as the minimum/floor rate.

**Corporate residence**

Registered entities (i.e. companies, branches, and subsidiaries) conducting economic activities in Chad are liable to pay corporate tax. Specifically:

- Limited companies.
- Limited partnership with shares.
- Limited liability companies.
- Cooperative societies and their unions.
- Public institutions.
- Agencies of the state with financial autonomy.
- Municipal bodies and any other legal entity engaged in an operation for gain.
- Real estate companies, regardless of their form.
- Civil companies, other than real estate companies, involved in industrial, commercial, or agricultural activities.
- Limited partnerships, on the share of profits relating to the rights of sponsors.
- Associations in participation, including financial syndicates, on the share of profits relating to the rights of sponsors.
- Co-owners of ships companies, on the share of profits relating to the rights of sponsors of associated co-owners, other than those with unlimited liability or whose names and addresses are not listed with the tax administration.

**Permanent establishment (PE)**

According to the Economic and Monetary Community of Central Africa (CEMAC) Fiscal Convention, a legal person is domiciled in one’s ‘permanent home’; this expression denotes the center of vital interests, i.e. the place with which personal relations are closer.

Consequently, the domicile (permanent home) of legal persons is the place of the registered office or the statutory social place. It constitutes PEs such as:

- The head office of management.
- A branch.
- An office.
- A factory.
- A workshop.
- A mine, quarry, or other place of extraction of natural resources.
- A building or construction site or assembly.
- A facility used for storage, display, or delivery of goods belonging to the business.
- A warehouse belonging to the business, stored for storage purposes, and of display of delivery.
- A fixed installation of business used for the purpose of purchasing goods.

**Other taxes**

**Value-added tax (VAT)**

The standard VAT in Chad is 18%.
Chad

An operation performed in Chad that constitutes an economic activity and for which payment is made, unless included in the list of exemptions in the law governing VAT, is liable for VAT, even if the residence of the natural person or the registered office of the legal entity is located outside Chad.

The VAT law provides a list of transactions exempted from VAT that includes the following:

- Sales of products that are directly made by farmers, cattle farmers, or fishermen to consumers, farming, and fishing operations.
- Imports operations and sales of newspapers and periodicals, other than the advertising revenues.
- Exports and related international transportation.

There are no specific rules relating to refunds to non-residents.

There are no refunds of the excess in practice. If the amount paid exceeds the VAT payable, the credit can be offset against the VAT payable until the end of the second financial year following the birth of this credit. After that, it becomes a loss, which is deductible under corporate tax.

**Customs duties**

The tax base of customs duties corresponds with the customs valuation, namely the selling price of the goods plus cost of delivery to Chad (costs of insurance, transportation, etc.).

The rates of customs duties depend on the nature of the goods and range from 5% to 30%. These rates can be summarised as follows:

- Goods of first need (basic necessities): 5%.
- Raw materials and goods of equipment: 10%.
- Intermediate and miscellaneous goods: 20%.
- Consumer goods: 30%.

**Excise duty**

Excise duty applies to goods of great consumption: cigarettes, drinks (water, beers and wines), cosmetics, and luxury products. Excise duty rates depend on the nature of the goods and range from 5% to 25% of the value of the good.

This value differs depending on the origin of the good. If the good has been manufactured in the CEMAC zone, the value corresponds with the selling price charged by the manufacturer. If the good is imported into the CEMAC zone, the value is the sum of the freight value plus insurance costs and custom duties.

The rates are as follows:

- Water: 5%.
- Beer under 6.5% alcohol: 15%.
- Tobacco, perfume, jewellery, electronic devices (except computers and telephones etc.), private vehicle with an engine capacity above 1600 cm³, and weapons: 20%.
- Other alcoholic drinks: 25%.
**Real property tax**
The annual real property tax differs according to whether it is a built or an unbuilt property and whether it is located in N'Djamena or elsewhere.

The tax rate on built property is 10% in N'Djamena and 8% elsewhere.

The tax rate on unbuilt property is 21% in N'Djamena and 20% elsewhere.

The calculation base is the potential revenue of that property. The potential revenues correspond to four-fifths of the rental value, the rental value being 10% of the market value. For rural unbuilt property, the market value is fixed to XAF 50,000 per hectare.

Some temporary exemptions are granted to new buildings or additions to constructed buildings after 1 January 1968 from this tax in some conditions. In case of construction or reconstruction, owners can benefit from temporary exemptions as follows:

- If the villa is owned by a corporation: 2 years.
- If the villa belongs to an individual and put on rental: 2 years.
- If the villa is built or rebuilt for commercial and industrial use: 2 years.
- New construction or reconstruction and additions to buildings for a holiday resort, for approval (accreditation), or for furnished rent are excluded.

**Accommodation tax**
The person occupying a building (owner or tenant) has to pay the following amount as accommodation tax annually:

<table>
<thead>
<tr>
<th>Type of construction</th>
<th>N’Djamena (XAF)</th>
<th>Elsewhere (XAF)</th>
</tr>
</thead>
<tbody>
<tr>
<td>For constructions in local material</td>
<td>3,000</td>
<td>1,500</td>
</tr>
<tr>
<td>For hard or semi-hard constructions</td>
<td>10,000</td>
<td>5,000</td>
</tr>
<tr>
<td>For R+ hard constructions</td>
<td>10,000 and a supplement of 10,000 per level</td>
<td>5,000 and a supplement of 5,000 per level</td>
</tr>
</tbody>
</table>

**Transfer tax**
Fixed or proportional transfer duties must be paid on the transfer of ownership of estates, personal property, and real property. Transfer duties are also due on contributions to companies and divisions of property. The proportional fees for the following transfers are:

- Transfers of ownership interests in companies whose capital is not divided into shares: 3%.
- Transfers of shares, founders’ shares, or profit shares: 3%.
- Transfers of bonds of companies and legal entities: 3%.
- Transfers of the right to lease or of the benefit of a promise to lease of real estates: 10%.
- Transfers of goodwill (business) against payment: 10%.
- Transfer of leases of real estate: 3%.
- Transfers of pension against payment: 3%.
- The undivided shares and portions of real property acquired by bidding are subject to land transfer tax against payment at 10%.
- Transfers and delegations of term debts: 3%.
- The perfect transfer of notarised promissory notes containing the creation of a mortgage and other mortgage bonds: 5%.
- Real estate returns are subject to land transfer (against payment) tax of 10%.
Chad

• Transferring ownership for consideration of movable property: 6%.
• Judicial transfer (against payment) of ownership or usufruct of both developed and undeveloped land is 12.5%.

These transfers are generally registered within three months of their entry into possession.

**Stamp duties**
Stamp duties must be paid on each civil or judicial document intended to be used as evidence. Stamp duty is generally XAF 1,000 per page.

All claims for reimbursement submitted to the Board are subject to a stamp duty of XAF 2,000.

Requests to the administration for professional competitions are subject to a stamp duty of XAF 1,000.

Applications for allocation of land are subject to a stamp duty of XAF 1,000.

Invoices for supplies to the administration of less than XAF 1 million are subject to a stamp duty of XAF 5,000. The same applies to certificate of sales of reshaped vehicles and materials, of vehicles of the state and public bodies.

All invoices that accompany an order of the administration in lieu of a service contract or a public market are subject to a stamp duty of XAF 5,000.

Any application, other than those mentioned above, addressed to the tax authorities is subject to a stamp duty of XAF 2,000.

The subscription contracts to the mobile and landline phones are subject to a stamp duty of XAF 1,000. Telephone companies are responsible for the collection of those duties and pay back spontaneously on the 15th day of every month to the Stamps Tax Fund (Stamp and Registration Directorate). A penalty of 25% of the amount due, plus a fine of XAF 25, is awarded for late payment.

**Registration duty**
The registration duty applies to certain deeds listed by the general tax code. The assessment basis depends on the nature of transactions, and the rate varies from 1% to 15%.

**Business licence tax**
Any natural person or corporate body carrying on a trade, industry, or profession in Chad shall be liable to a business licence tax. The business licence tax is paid annually and is assessed as follows:

- A determined duty based on 0.1% of the first XAF 2 billion of turnover; above that, only 1/10 of the turnover is taxed.
- 10% of the rental value of the premises.
- 10% of the determined duty for the National Social Security Fund.
- 7% of the determined duty for the Consular Commercial Chamber.
- XAF 480 per year for the Rural Intervention Fund.
- 10% of the annual rental value of business premises.
For a new company, the determined duty is calculated based on the projected turnover estimated by the taxpayer as compared to similar activities or those achieved during the first 12 months of activity.

The business licence tax is due 31 December of the tax year.

**Capital gains and dividends tax**
Capital gains and dividends are taxed at 20%.

**Social security contributions**
The monthly contribution to Chad’s Social Security Fund is 16.5% of total salaries for the employer (upper limit: XAF 82,500 per month) and 3.5% for the employee (upper limit: XAF 17,500 per month), withheld by the employer.

**Payroll tax**
Employers in Chad are required to make monthly contributions of 7.5% of the total amount of salaries and fringe benefits paid to permanent employees.

**Apprenticeship tax**
Employers in Chad are required to make monthly contributions of 1.2% of the total amount of salaries and fringe benefits of their employees (permanent and temporary) to the National Professional Training Fund (FONAP).

**Branch income**
In Chad, there is a presumption of distribution of profits realised by branches. These profits are deemed distributed to their headquarters and are therefore subject to tax on income from capital gains at the rate of 20%.

However, this presumption of distribution is simple. Branches can provide evidence that the profits they have made have not actually been transferred but remained in the accounts of the branch.

**Income determination**

**Inventory valuation**
Stocks shall be valued at cost price; however, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory.

**Capital gains**
Capital gains are taxed at 20%.

**Dividend income**
Dividends are taxed at 20%.

**Interest income**
The interest paid to associates or shareholders in respect of sums paid by them in the social fund in addition to their share of capital is taxable within the limit of that calculated at the advance rate of the bank of emission and increased by two points.

**Foreign income**
Income from other countries is not liable to tax in Chad.
### Chad

**Deductions**

Expenses are deductible under the following conditions:

- They must lead to a reduction of the assets.
- They must be incurred in the interest of the enterprise.
- They must be regularly included in the accounts of the entity and justified by receipts.
- They must be related to the present fiscal year or a former fiscal year.
- They must not be considered as non-deductible by the law.

**Depreciation**

According to accountancy principles, depreciation is calculated based on the probable length of use of the asset. The straight-line system of depreciation is applicable, and rates vary according to the nature of the business activity concerned and the normal useful life of the assets involved.

From an accountancy point of view, it is possible to depreciate whatever amount corresponds to the above mentioned principles. However, from a tax point of view, depreciation (i.e. enabling a deduction of the depreciated amount from the taxable income) is only possible under the condition that the depreciation has been entered into the statement of accounts. Therefore, only a legal entity in Chad owning the assets is able to depreciate its assets. In addition, if depreciation in the statement of accounts is higher than the depreciation authorised, the difference is not deductible and has to be reinstated in the taxable income.

The starting point for depreciation is the day of first use. If this date is not the first day of the financial year, the first year’s depreciation is reduced pro-rata.

It should be noted that, despite the above, goods that are leased are depreciated at the rate that they are paid for.

Depreciation of goods that are made available for free to managers and supervisors of the business are deductible if the corresponding benefit in kind is declared.

The sum of depreciation applied to the acquisition or creation of an asset cannot, at the end of each financial year, be less than the amount of depreciation calculated on the linear system and spread out over the normal usage period.

Depreciation in loss-making years may be carried forward to the first profitable financial year, and to subsequent years if necessary.

**Goodwill**

There are no provisions for goodwill as regards deduction of expenses.

**Start-up expenses**

There are no provisions for start-up expenses.

**Interest expenses**

Interests paid for the depositing of funds by a shareholder are deductible within the base rate of the central bank plus two points, calculated on the basis of the share capital.
**Bad debt**
Provisions for credit customers are deductible once they meet the conditions for deductible expenses mentioned above.

**Charitable contributions**
Donations and liberalities are deductible within a 0.5% limit of the annual turnover, net of tax, when they are duly justified. However, a decision from the Minister of Finances is required.

**Fines and penalties**
Tax and customs penalties are not deductible.

**Taxes**
Income taxes are not deductible.

**Other significant items**
The following expenses are not deductible:

- Provisions for laying off employees.
- Provisions for self-insurance.
- Insurance premiums paid for a third-party.

The following expenses are not fully deductible:

- Foreign social security contributions are deductible only within 15% of the base salary of the expatriates when related to a compulsory retirement plan. Nonetheless, Chad’s social security contributions are fully deductible.
- Restaurants, hotels, receptions, and related costs are deductible within a 0.5% limit of the turnover, net of tax.
- Travel expenses for expatriates and their families for vacation are deductible, limited to one trip per year.

**Net operating losses**
Losses arising from normal business activities of the company are deductible and may be carried forward for up to three years. Carryback of losses is not permitted.

**Payments to foreign affiliates**
There is a specific regulation relating to head office and foreign technical assistance costs that are subject to a 10% limitation of deductibility. The scope of the 10% limitation covers study expenses, technical assistance, and other expenses, including commercial and industrial royalties, paid to the head office of an enterprise established outside Chad and outside the CEMAC zone. Duly justified, these costs are only deductible within 10% of the intermediary fiscal profit (accounting profits plus non-allowable charges/costs) prior to their deduction.

**Group taxation**
There is a specific taxation of groups within the CEMAC area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This
percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of the following conditions are met:

- The stocks or shares owned by the parent establishment represent at least 25% of the capital of the subsidiary firm.
- The parent and subsidiary firms have their registered office in a CEMAC state (Cameroon, Central African Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company that undertakes to retain them for at least two consecutive years in registered form.

**Transfer pricing**
The Tax Code acknowledges that dependent or controlled companies may transfer benefits indirectly to their company abroad if it is dependent on or to the company abroad if it is controlled by.

In order to calculate the real benefit, the indirectly transferred benefits (by means of increase of purchase price or decrease of sales price to the controlling company or by any other means) are incorporated into the result established by the accounts.

If the tax administration does not have enough precise elements to determine the benefit, it will establish the taxable benefit by way of comparison to companies normally operated in Chad.

The Tax Code provides further, in accordance with CEMAC regulation, that interest paid to shareholders on sums that they lend over and above their share capital is deductible at the rate for loans allowed by the central bank increased by two percentage points. This deduction is only possible if the amounts lent do not exceed 50% of the share capital.

**Thin capitalisation**
Chad applies Organisation for the Harmonization of Business Law in Africa (OHADA) regulations with regards to thin capitalisation rules.

In cases where the equity capital gets, due to the recorded losses in the summarising financial statement, below 50% of the share capital, a shareholder consultation has to be organised within four months to decide upon a potential anticipated dissolution of the company.

If the dissolution is excluded, the company has to reconstitute its equity capital up until it equals 50% of the share capital within the two years following the date of the end of the loss-making financial year. Otherwise, provided it stays above the legally required share capital minimum, the company has to reduce its share capital of an amount at least equal to the losses that it has not been able to charge against reserves.

In cases where no decision has been taken regarding dissolution, any interested person may claim dissolution of the company in front of a court. Any interested person is allowed to bring a legal action if the reconstitution of the equity capital has not taken place within the legal timeline.

This action ceases to exist the day the cause for dissolution ceases to exist or if the court has ruled on the grounds.
**Tax credits and incentives**

Chad does not offer any tax incentives.

**Foreign tax credit**

There are no provisions for foreign tax credit.

---

**Withholding taxes**

**Withholding tax (WHT) on commerce of retail goods**

A 4% WHT rate applies to natural persons and legal entities that purchase or sell wholesale or retail goods. This WHT also applies to imports.

Companies with more than one shareholder that regularly pay their taxes may apply for a suspension of payment of WHT (renewable every three months).

**WHT on capital gains**

WHT on capital gains is 20% and applies to residents and non-residents.

**WHT on income of non-residents**

WHT on income of non-residents is 25%. It applies to income of any legal or natural person that is not resident in Chad.

**WHT on personal income**

The employer withholds tax on personal income every month.

**WHT on income from public procurement contracts financed from outside of the country and income from petroleum projects.**

Chad’s lowest WHT rate on income is of 12.5%. It applies in either of the following two cases:

- On income of agents, consultancy firms, and corporations executing a contract within the framework of public procurement contracts financed from outside of the country.
- On income of companies working within the petroleum projects.

**WHT on interests of bonds, certificates, and notes**

Bonds and notes are subject to a WHT of 20% of the interests for registered bonds and 30% of the interests for bearer participation certificates.

**WHT on rent**

WHT on rent is 15% for residents and 20% for non-residents.

**Tax treaties**

Chad has one tax treaty with the member states of CEMAC (Cameroon, Gabon, Equatorial Guinea, Congo, Chad, and Central African Republic).

**WHT benefits on payments made to CEMAC residents**

To avoid double taxation of incomes of CEMAC origin, the provisions of the Convention provide a principle of exclusive taxation in one.

Regarding revenues of services, they will be taxed only in the country of location of the beneficiary of incomes (i.e. no WHT in the country of payment of incomes).
Chad

Regarding incomes from securities (dividends, interest on deposits, interest on bonds, etc.), they will be taxed only in the country of distribution (i.e. no WHT in the country of payment of incomes).

**Tax administration**

**Tax returns**
Corporate tax returns are due on 15 April.

**Payment of tax**
Certain taxes are considered instalment payments of corporate tax. Once the amount of corporate tax is known, these payments are deductible from the amount and only the balance has to be paid on 15 April. These taxes include the minimum corporate tax, the quarterly instalment payments, and the 4% discharge for retail goods, if applicable.

**Minimum corporate tax (monthly)**
The minimum corporate tax payment must be made prior to the 15th day of the month following the month of achievement of the turnover. However, for the payment of the floor rate, payment may be made in four instalments of XAF 250,000 each, 15 days after the end of the quarter.

If this instalment payment exceeds the annual corporate tax, the remainder is lost.

**One third instalment payments (paid three times quarterly)**
Corporations that fulfil the following conditions are subject to quarterly instalment payments:

- Liable to corporate tax.
- Made a profit during the prior fiscal year.
- The amount of the corporate tax of the prior fiscal year is superior to at least XAF 100,000.

The quarterly instalment payments are equal to one-third of the difference between the corporate tax due during the prior fiscal year and the minimum income tax paid during the same period.

The payment must take place before the tenth day of April, July, and October.

**Tax audit process**
The tax audit exercise of the Direction Générale des Impôts (Directorate General of Taxes) in Chad is completed in the following manner:

Tax officials having at least the rank of an inspector and with their professional card and a copy of the audit notice perform spot checks on the accounting documents that taxpayers are required to submit.

Accounts are audited at the head office of the enterprise or at the place of its main establishment. Where this is not possible, the taxpayer must expressly request that it be conducted either in the accountant’s office or in the offices of the tax authority.

The operations include confronting the accounts presented with certain facts or material to control the accuracy of returns filed and to proceed, where necessary, to the establishment of the taxes and the taxes evaded.
At least eight days before the date of the first intervention, the tax administration shall send to the taxpayer a verification notice by personally delivered registered mail with acknowledgement of receipt or discharge slip to inform the taxpayer of the date of the first intervention and the possibility of getting a tax consultant of the taxpayer’s choice to assist the taxpayer. It must, under pain of rejection, be mentioned in the verification notice.

In case of postponement of the original date of the first intervention, on the initiative of the tax administration, the tax authorities must imperatively send the taxpayer a notice of correction.

The taxpayer may also request a postponement of control by writing, giving reasons for his request within 48 hours of receipt of the notice. This report must be expressly accepted by the tax administration.

The tax administration may conduct unannounced inspections; it then sends an audit notice personally to the taxpayer, who acknowledges receipt, at the first intervention.

Where the notice bears no indication as to the taxes, duties, or years or periods of assessment, the items to be audited shall be all the taxes owed by the taxpayer for the period still due for payment. In such case, the audit is called a ‘general audit’.

However, where it is specified in the audit notice, the tax administration may limit the scope of the audit to one or more taxes due on all or part of the period still due for payment or on a group of operations over a period less than one fiscal year, in which case a spot check is done.

The verification can, nevertheless, go up to one or more years beyond the prescribed period when these exercises are in deficit, as long as the deficits made under a year are carried forward and are deducted from the profits of the non-specified first year that constitute charges. The verification can also go up to one or more years beyond the prescribed period when these exercises show a tax credit of a VAT carried over the first statement of the non-barred period.

Where the tax service intends to extend the audit to a period or a tax that is not indicated on the initial audit notice, it shall forward another notice following the same manner and deadline laid down in Article R. 13 et seq. of the General Tax Code (GTC), indicating the new period or new tax to be audited.

Where the accounts auditing or adjustment procedure require special technical knowledge, the tax authority may hire the consultants appearing on a list drawn up by Order of the Minister of Economic and Finance. Such consultants shall be professionally liable in case of damage resulting from their work.

When the accounts are kept using computerised systems, the tax administration is empowered to require, in accordance with Article L. 18 of the GTC, the technical advice from experts for carrying out tests on the hardware that hosts the operation and to check:

- the accounting operating system
- all information, data, and processes that contribute directly or indirectly in the formation of accounting or tax results and the elaboration of documents mandated by the GTC,
Chad

• the documentation, relating to analysis, programming, and the execution of processing.

The civil and military authorities lend support and assistance to Tax Officers for the exercise of their functions, whenever they are needed.

Statute of limitations
According to Article R. 33 of the GTC of Chad:

“The total or partial omissions found in the tax base, the inadequacies and inaccuracies, or the taxation errors, can be repaired by the tax administration until the end of the third year following that in which the tax or fee is payable.

Furthermore, any omission or insufficiency of tax revealed by a proceeding before the criminal courts or by a contentious claim may, without prejudice to the general period of repetitions established above, be repaired until the end of the third year following the revelation of the facts.”

Topics of focus for tax authorities
Topics of focus for tax authorities include the following:

• Obligation to file a return.
• The verification of the return filed.
• Taxation of office/Arbitrary Assessment.
• The right of access to taxpayers’ documents.
• Obligation to pay tax.
• Procedure for the abuse of control.
• Limiting the right of control.
• Tax collection procedure.
• Prosecution measures.

---

**Significant developments**

On 27 September 2012, an important tax reform was published in the Official Gazette Law N° 20.630. Among others, the most significant amendments are:

- The First Category tax (i.e. corporate income tax) rate increased to 20% (see the Taxes on corporate income section).
- The maximum stamp duty has been reduced to 0.4%.
- A new indirect sales provision (see Capital gains in the Income determination section).
- New transfer pricing provisions (see the Group taxation section).
- New goodwill/negative goodwill provisions (see the Deductions section).
- New rules for the taxation of branches (see the Branch income section).

---

**Taxes on corporate income**

**First Category tax**

The basic tax on income of a Chilean legal entity domiciled or resident in Chile and engaged in commerce, mining, fishing, or industry is the First Category tax, which is assessed at a rate of 20% (previously 18.5%) on the entity’s worldwide income.

Non-domiciled and non-resident shareholders and partners are subject to an ‘additional’ withholding tax (WHT) of 35% on their Chilean-source distributions or remittances, with a credit granted for the First Category tax paid on the underlying profits. This results in an effective tax rate of 35%.

**Local income taxes**

Chilean legislation does not establish any local income taxes.

---

**Corporate residence**

Companies incorporated in Chile are considered to be domiciled in the country.

**Permanent establishment (PE)**

An entity may be considered as a PE under double taxation treaty (DTT) terms but not under the local legislation. In this case, in principle, the correspondent WHT should apply over the gross basis of the remittance.

However, Chilean Internal Revenue Service (IRS) rulings have interpreted the relation between the two different PE concepts in the sense that, notwithstanding the local requirements are not met, the taxpayer can choose to be treated as a local PE in order to be allowed to deduct the expenses that are incurred for the purpose of the PE.
Other taxes

Value-added tax (VAT)
VAT is payable on transfers and services at a rate of 19%. In general terms, this tax is levied over the price of the following goods and services:

- Sales and other contracts used to transfer ownership of tangible goods, or real estate owned by a construction company, provided that said operations are customary. The law assumes that all sales made within the ordinary course of business are customary.
- Services that are commercial, industrial, or financial, or that are connected to mining, construction, insurance, advertising, data processing, and other commercial operations.
- Imports, customary or not.

Normally, the sale of fixed assets is not subject to VAT, unless the assets are sold before the end of their useful lives or within four years from the date of acquisition. The sale of immovable property as fixed assets is subject to VAT only when the sale takes place within 12 months from the date of acquisition.

VAT works on a credit-debit system. The tax borne by a company or business in the acquisition of goods or services is called the ‘VAT credit’. The VAT charged on the goods and services sold to customers is called the ‘VAT debit’. As a general rule, the seller or service provider is obligated to withhold and pay the VAT. The tax amount is added to the invoice for goods or services, as the final consumer is the economic taxpayer.

Exceptionally, when a seller or service provider is not domiciled in Chile or when, for other reasons, it is difficult for the IRS to supervise the correct payment of VAT, the responsibility to withhold and pay the tax is transferred to the buyer or beneficiary of the service.

The tax is paid every month by deducting the VAT credit from the VAT debit. The balance due to tax authorities (when the debit is larger than the credit) must be paid no later than the 12th day of the following month.

If on a given month the VAT credit is larger than the VAT debit, the balance may be kept and carried forward in the following months.

Custom duties
The rate of custom duty is, in general, 6%.

Chile has an extended network of Free Trade Agreements (FTAs) (e.g. with China, United States, Mexico, Japan, European Union [EU], Canada, Panama, Central America, and South Korea). Therefore, reduced or non-existing customs duties rates are available.

Duties on goods are imposed on the cost, insurance, and freight (CIF) price, without deducting special discounts.

In general, Chile has a very open economy and there are no significant barriers to foreign trade.
Excise taxes
Alcoholic and non-alcoholic beverages and certain luxury items, such as jewels, are subject to additional sales taxes ranging from 13% to 50%.

A variable gasoline tax is also levied on the difference between a fixed amount and the sales price of gasoline and diesel oil.

Real Estate Tax
Real Estate Tax is levied over an official valuation of real estate at an annual rate of 1.2% in case of non-farming real estate, and 1% for farming real estate. Some real estate is exempt from this tax.

Transfer taxes
Currently, Chilean regulations do not state that there are any transfer taxes.

Stamp tax
Stamp tax is payable mainly on documents that evidence money lending operations, and its rate varies depending on the document being executed.

After the recent tax reform, the maximum stamp tax rate is 0.4%. For documents payable on demand or without an expiration date, the tax rate is 0.166%.

Branch income
Prior law taxed branches only on their Chilean-sourced income. Currently, branches of foreign corporations that are operating in Chile are taxed on their worldwide income. In this sense, branches are subject to the First Category tax, which is assessed at a rate of 20%.

Additionally, branches are also subject to a 35% ‘additional’ tax on amounts remitted or withdrawn during a given calendar year, less a credit for the First Category tax paid, which is payable in April of the year following the distribution. Thus, the tax burden for a branch is 35%.

Income determination
For purposes of the First Category tax, as a general rule, corporate revenue must be determined on an accrual basis.

Inventory valuation
Inventories must be valued in accordance with monetary correction provisions, basically by adjusting raw material content and direct labour to replacement cost (which is generally the most recent cost), but excluding indirect costs. No conformity is required between book and tax reporting for income determination. Last in first out (LIFO) is not allowed.

Capital gains
Capital gains are subject to normal taxation unless special provisions, such as those pertaining to gains on the sale of shares/quotas or monetary correction on capital repayments, establish exemptions.
Under domestic laws, in certain circumstances, the capital gains derived from the following securities will be subject to a preferential tax treatment:

- Stock of listed local companies.
- Investment fund quotas, listed on an authorised stock exchange.
- Mutual funds quotas, if the fund invests in stock trade values.
- Investment funds quotas with no stock exchange participation or mutual funds, where at least a 90% of the investment portfolio is in a stock market.

Finally, it is important to bear in mind that the recent tax reform included a new indirect sales provision that provides that capital gain arising from the sale of foreign companies holding Chilean assets could be subject to Chilean taxation if certain requirements are met.

**Dividend income**
Dividends received from Chilean corporations are exempt from the First Category tax.

**Interest income**
No specific provision exists in Chile for interest income; consequently, interest income is subject to First Category tax.

**Foreign income**
Resident corporations are subject to taxes on their worldwide income. In general, foreign income and dividends received by a domestic corporation are subject to Chilean taxation in the financial year when received (i.e. on a cash basis). A tax credit for taxes paid abroad is granted, subject to the regulations of the Income Tax Law.

Branches of foreign corporations are taxed on their income without regard to the results of the head office.

**Deductions**
Net taxable income of a taxpayer is arrived at by deducting from gross income the expenses incurred to generate the income that have not been already deducted from gross revenue as costs.

As a general rule, expenses are not deductible for income tax purpose if they are not incurred to generate taxable income.

**Depreciation and depletion**
Depreciation rates are calculated based on the estimated useful life of the assets. The normal periods of depreciation for new assets under normal conditions are as follows: heavy machinery, 15 years; trucks, seven years; factory buildings, in general, 20 years to 40 years. At the request of the Foreign Investment Committee or the taxpayer, the IRS may reduce the normal useful life.

Annual depreciation is taken by the straight-line method. However, taxpayers may recover capitalised costs by using the accelerated depreciation method for up to one-third of the normal useful life with respect to new or imported fixed assets, provided that the normal period of depreciation is at least three years.
Accelerated depreciation may be used only to reduce the taxable basis of the First Category tax. For the purpose of the tax applicable to distributions of dividends, accelerated depreciation is not considered.

No conformity is required between book and tax depreciation.

For tax purposes, depletion for natural mineral resources is allowed on a unit-of-production basis.

**Goodwill**
In the case of goodwill and negative goodwill provisions, that is to say when the amount paid is higher/lower than the absorbed entity's tax equity in a statutory merger process or by the reunion of 100% of interests, the current law establishes that the difference must be either added or deducted proportionately into the non-monetary assets of the target with a cap of its fair market value. The difference (if any) will be considered as deferred loss/income that has to be recognised for tax purposes over a period of ten years on a straight-line basis.

Provided there are no non-monetary assets in the absorbed entity, goodwill will be considered as an intangible that can be amortised as a necessary expense in a period of up to ten years.

**Start-up expenses**
Start-up expenses must be capitalised and considered as an asset for tax purposes. They can be amortised over a six-year period counted from the year when they were incurred or starting from commercial exploitation.

Furthermore, they are usually deducted when the income is generated.

**Interest expenses**
As long as the interest paid complies with the general requirements set forth by the Income Tax Law, interest expenses can be deducted.

**Bad debt**
In general, bad debts are deductible only if they are a consequence of operations related to the business purpose, if they have been opportunely written off into accounting, and the company has prudentially exhausted all reasonable means to collect them.

Determination of whether the company has prudentially exhausted all reasonable means to collect the bad debts varies according to the total amount of the debts. Therefore, a simple estimation or general provision for bad debts is not allowable.

**Charitable contributions**
Charitable contributions may be deducted if they are made to the institutions named by varied laws (i.e. primary and secondary educational institutions; universities, professional or technical educational institutions, National Fire Brigade, National Solidarity Fund, etc.).

In case of charitable contribution, the total annual tax deduction for this purpose is limited. The deductible amount for this purpose may not exceed 5% of the company's net taxable income.
Chile

Fines and penalties
Fines and penalties imposed for breaking the law or a contract are not deductible, although a deduction is usually available for legal cost incurred in defending such an action.

Taxes
Taxes imposed by Chilean laws are deductible, provided they are related to the normal activities of the company. However, income taxes and special contributions for promotion or improvement are not deductible.

Net operating losses
An indefinite carryforward of losses is allowed. Consistent with monetary correction, losses are carried forward, adjusted by a cost-of-living increase. No carrybacks are allowed, except in a case where a taxpayer has retained tax profits and has a subsequent tax loss.

Payments to foreign affiliates
The deductibility of payments made abroad for the use of trademarks, patents, formulas, and consulting and similar services is limited to a maximum of 4% of the income derived from sales and services in the corresponding year, unless the royalty is subject to income tax of greater than 30% in the country of the beneficiary.

The recent tax reform included important transfer pricing regulations, which are in line with general Organisation for Economic Co-operation and Development (OECD) principles (see the Group taxation section).

Group taxation
Consolidated returns are not allowed in Chile.

Transfer pricing
The new transfer pricing legislation generally adheres to the OECD in its Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations (OECD Guidelines). The law established contemporaneous documentation requirements, filing of an informative return, and specific penalties for non-compliance.

Although the law does not explicitly mention the adoption of the methods established in the OECD Guidelines, the methods as described are in line with the same. The proposed rules also adopt the best method rule and allow the use of other unspecified methods when the methods described in the Chilean Income Tax Law are deemed not appropriate to determine the arm's-length nature of the inter-company transactions.

Finally, the Income Tax Law includes the ability to enter into advance pricing agreements (APAs), unilateral or multilateral. The Chilean tax authority can reject, totally or partially, the request, and such decision is not subject to an administrative appeal procedure. APAs should be valid for four years and are subject to renewal or extension.

Thin capitalisation
Thin capitalisation rules apply in case of related party loans at a 3:1 debt-to-equity ratio. In this regard, the total annual amount of such loans is deemed to exceed the 3:1 ratio if the monthly average value of the sum of all related party loans and financial
liabilities that the debtor has at the end of the taxable year in which the loan was granted exceeds three times the debtor’s adjusted tax equity.

**Tax credits and incentives**

**Foreign tax credit**

In order to avoid double taxation, the Chilean Income Tax Law recognises a tax credit mechanism in which the tax effectively paid abroad may be deducted from the taxes to be paid in Chile.

In order to regulate this matter, the Chilean Income Tax Law distinguishes between those countries with which there is a DTT in force with Chile and those that do not have a DTT in force with Chile.

**Investment incentives**

The principal investment incentives are the following:

- Tax benefits and other incentives for companies operating in the northernmost and southernmost parts of the country.
- Tax benefits to forestry companies, contracts for oil operation, and nuclear material operations.

**Inbound investment incentives**

The principal incentives to encourage foreign capital contributions are statutory guarantees covering the repatriation of capital, remittance of profits, non-discrimination toward foreign investment, and access to the foreign exchange market for remittance purposes. In general, foreign investors are subject to the same legislation as national investors. A guaranteed income tax rate of 42% may be granted for ten years or, provided the capital investment project exceeds 50 million United States dollars (USD), 20 years for the development of industrial or extractive projects.

The overall rate is comprised of the corporate tax on profits and WHT on dividend or branch profit distributions. The tax rate on dividend or profit distributions is the difference between 42% and the underlying tax paid at a corporate level. The option to be subject to an overall effective tax rate of 42% without change for ten or 20 years is usually not exercised by foreign investors because the current combined effective tax rate on profits and dividend distribution is 35% under the general tax regime.

Under the Foreign Investment Contract, a foreign investor may petition for tax stability with respect to VAT and customs duty regimes. With respect to customs duties, however, stability is granted only for the importation of certain machinery and equipment not available in Chile.

**Export incentives**

The principal incentives for exports can be summarised as follows:

- Taxes paid in the importation or acquisitions of goods required in the export activity are reimbursed.
- VAT on exports is zero-rated.

Chile has signed FTAs with Australia, Bolivia, Canada, Central America (i.e. Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua), China, Colombia, the European
Chile

Union, Mexico, Panama, Peru, Republic of South Korea, Turkey, and the United States. All these agreements provide for reduced customs duties.

**Withholding taxes**

Dividends paid to a non-resident recipient are subject to a 35% withholding of ‘additional’ tax, with a credit available that is equivalent to the income tax effectively paid at the corporate level, corresponding with the First Category tax paid by the corporation. This credit is added to the amount that is distributed to form the taxable base for the ‘additional’ tax. Consequently, the tax burden for a non-resident recipient of dividends, including taxes at the company level, is 35%. Branches are subject to a 35% ‘additional’ tax on amounts remitted or withdrawn, less the First Category tax credit. See the Branch income section for more information.

In the case of a foreign investor that has applied for the 42% tax invariability, the effective tax burden is also 42%.

Interest paid to non-residents is subject to additional WHT at a general 35% rate. Interest on loans granted by foreign banks or financial institutions is subject to a sole 4% additional WHT. Thin capitalisation rules requesting a 3:1 debt-to-equity ratio become applicable when the debt generating interest subject to the 4% rate is secured by related entities.

Royalties paid to non-residents are subject to additional WHT at a 30% rate. Royalty payments in connection to software are subject to additional WHT at a 15% rate. Such rate is increased in case the beneficiary of the payment is resident in a tax haven or in case the payment is made to a related entity.

**Tax treaties**

Chile has in force DTTs with the following countries: Belgium, Brazil, Canada, Colombia, Croatia, Denmark, Ecuador, France, Ireland, Malaysia, Mexico, New Zealand, Norway, Paraguay, Peru, Poland, Portugal, Republic of South Korea, Spain, Sweden, Switzerland, Thailand, and the United Kingdom.

Please note that Chile has signed DTTs with Australia, Russia, and the United States that are not yet in force.

The DTT between Argentina and Chile was terminated in 2012 by the Argentinean government’s unilateral decision.

The following table shows the higher and lower rates on WHT applicable by Chile and the countries with which DTTs exist. The application of one or the other rate will depend on the specific provisions of each treaty.

### Notes

1. 15% as a general rule. Interest arising from bank or insurance company loans, bonds, some securities that are regularly negotiated on stock markets, and credit sales of industrial equipments is taxed at a 5% tax rate.
2. 10% as a general rule. 5% is applicable for the use or the right to use some equipment.
3. 10% if the beneficiary owns at least 25% of the company’s shares. 15% in all other cases.
4. 5% if the beneficiary owns at least 25% of the company’s shares. 15% in all other cases.
5. 15% as a general rule. 10% if the most favoured nation clause applies.
6. 5% if the beneficiary owns at least 25% of the company’s shares. 7% in all other cases.
7. 5% if the beneficiary is a bank or an insurance company. 15% in all other cases.
8. 5% if the beneficiary owns at least 20% of the company’s shares. 15% in all other cases.
9. 15% as a general rule. It could be 5% by the application of the most favoured nation clause.
10. 5% for the use of, or the right to use, some equipment. 10% by the application of the most favoured nation clause.
11. 5% if the beneficiary owns at least 20% of the company’s shares. 10% in all other cases.
12. 15% as a general rule. If the most favoured nation clause applies, 10% as a general rule, 5% if interest is paid to a bank.
13. 15% as a general rule. 10% if interest is paid to banks or insurance companies, or if the most favoured nation clause applies.
14. 10% if the beneficiary is a bank or an insurance company. 15% in all other cases.
15. 15% as a general rule. 10% or 15%, depending on the interest source.
16. 5% if the beneficiary owns at least 25% of the company’s shares. 10% in all other cases.
17. 15% as general rule. 10% for the use of, or the right to use, any copyright of literary, artistic, or scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.

### Tax administration

#### Taxable period

The tax year coincides with the calendar year.

#### Tax returns

The tax system is one of self-assessment by the taxpayer, with occasional auditing by the tax authorities. Tax returns must be filed with the IRS before 30 April of each year with respect to the income of the previous calendar year.
Chile

Note that there are many other sworn statements with different deadlines, from March until June of each year.

**Payment of tax**
Taxes are payable when the annual tax return is submitted in April of each year. Taxpayers, in general, are subject to monthly advance payments on account of their yearly income taxes. The difference between the advance payments and the final tax bill is payable in cash at the time the tax return is filed. If prepayments exceed the final tax bill, the excess is reimbursed by the Treasury.

**Tax audit process**
Generally, the Chilean tax system is based on self-assessment; however, many large businesses are under continuous audit by the Chilean IRS. In this sense, businesses and individuals are generally subject to audit on a random basis.

**Statute of limitations**
As a general rule, the statute of limitations is three years. However, it can be extended to six years if no tax return was filed or if the tax return was maliciously false.

**Topics of focus for tax authorities**
After the recent tax reform, the authorities are focused on implementing the new provisions by means of issuance of Regulations and Circular Letters. In this sense, the authority has drawn special attention to the new transfer pricing provision.
Significant developments

Pilot Program of indirect tax reform
In order to mitigate the multiple taxation issue associated with goods and services and to support the development of ‘modern service industries’ in China, the State Council resolved to introduce a Pilot Program in the city of Shanghai from 1 January 2012 to expand the scope of value-added tax (VAT) to cover transportation and certain specified modern service industries that were originally subject to business tax (BT).

The Pilot Program is being gradually rolled out to the rest of China. Eight other provinces/municipalities, namely Beijing, Tianjin, Jiangsu, Anhui, Zhejiang, Fujian, Hubei, and Guangdong (including Shenzhen) (Pilot Regions), are now under the Pilot Program.

In April 2013, the State Council announced that the Pilot Program will be rolled out to the whole country from 1 August 2013. While the tax base is still confined to the existing pilot industries of transportation and certain modern services, the State Council will expand the scope of the ‘modern services’ to include the production, broadcasting, and distribution of media and cinematic productions. In addition, railroad transportation, postal, and telecommunications industries will be added to the scope at the appropriate time. It is generally contemplated that the transformation will be implemented nationwide within China’s 12th Five Year Plan (2011 to 2015).

See VAT in the Other taxes section for more information.

Taxes on corporate income

Tax resident enterprises (TREs) are subject to corporate income tax (CIT) on their worldwide income. A non-TRE that has no establishment or place in China is taxed only on its China-source income. A non-TRE with an establishment or place in China shall pay CIT on income derived by such establishment or place from sources in China as well as income derived from outside China that effectively is connected with such establishment or place.

Under the CIT law, the standard tax rate is 25%.

A lower CIT rate is available for the following sectors/industries:
• Qualified new/high tech enterprises are eligible for a reduced CIT rate of 15%. An enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a new/high tech enterprise.

• Integrated circuit (IC) production enterprises with a total investment exceeding 8 billion renminbi (CNY), or that produce integrated circuits with a line-width of less than 0.25 micrometre, are eligible for a reduced CIT rate of 15%.

• Key software production enterprises and IC design enterprises are eligible for a reduced CIT rate of 10%. An enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a key software production enterprise or key IC design enterprise.

• From 1 January 2009 to 31 December 2018, qualified technology-advanced service enterprises in 21 cities (e.g. Beijing, Shanghai, Tianjin, Guangzhou, and Shenzhen) are eligible for a reduced CIT rate of 15%. This incentive is only available to certain technology-advanced service sector members, and an enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a technology-advanced service enterprise.

• Qualified small and thin-profit enterprises are eligible for a reduced CIT rate of 20%. If the annual taxable income is less than CNY 60,000, the CIT rate is further reduced to 10% for the period from 1 January 2012 to 31 December 2015. An enterprise has to fulfil certain conditions in order to qualify as a small and thin-profit enterprise.

• From 1 January 2011 to 31 December 2020, encouraged enterprises in the Western Regions are eligible for a reduced preferential CIT rate of 15%.

Local income taxes
There is no local or provincial income tax in China.

Corporate residence
Enterprises established in China are always TREs. A foreign enterprise with a place of effective management in China is also regarded as a TRE.

Permanent establishment (PE)
An ‘establishment or place’ is defined in the CIT regulations as an establishment or place in China engaging in production and business operations, including the following:

• Management organisations, business organisations, and representative offices.
• Factories, farms, and places where natural resources are exploited.
• Places where labour services are provided.
• Places where contractor projects, such as construction, installation, assembly, repair, and exploration are undertaken.
• Other establishments or places where production and business activities are undertaken.
• Business agents who regularly sign contracts, store and deliver goods, etc. on behalf of the non-TRE.

Other taxes
China has a turnover tax system consisting of the following three taxes: value-added tax (VAT), business tax (BT), and consumption tax.
Value-added tax (VAT)
The sales or importation of goods and the provision of repairs, replacement, and processing services are subject to VAT. VAT is charged at a standard rate of 17%, and the rate for small-scale taxpayer is 3%. The sales of certain necessity goods may be subject to VAT at a reduced rate of 13%, as specified in the VAT regulations.

The VAT system is a consumption-based VAT system, which means that input VAT on fixed assets is fully recoverable, except for situations specified in the VAT regulations.

Export of goods from China may be entitled to a refund of VAT incurred on materials purchased domestically. The refund rates range from 0% to 17%. There is a prescribed formula for determining the amount of refund, under which many products do not obtain the full refund of input VAT credit and suffer different degrees of export VAT costs.

In order to mitigate the multiple taxation issue associated with goods and services and to support the development of ‘modern service industries’ in China, the State Council resolved to introduce a Pilot Program in the city of Shanghai from 1 January 2012 to expand the scope of VAT to cover transportation and certain specified modern service industries that were originally subject to BT.

The Pilot Program is being gradually rolled out to the rest of China. Eight other provinces/municipalities, namely Beijing, Tianjin, Jiangsu, Anhui, Zhejiang, Fujian, Hubei and Guangdong (including Shenzhen) (Pilot Regions), are now under the Pilot Program.

The industries that have been selected for the Pilot Program and the applicable VAT rates (for general VAT payers) are set out in the following table.

Small-scale VAT payers in the above Pilot Industries are subject to the VAT rate of 3%.

Enterprises (including foreign enterprises) providing Pilot Services in the Pilot Regions are subject to VAT instead of BT from the effective date of the Pilot Program in the respective Pilot Region.

In April 2013, the State Council announced that the Pilot Program will be rolled out to the whole country from 1 August 2013. While the tax base is still confined to the existing pilot industries of transportation and certain modern services, the State Council will expand the scope of the ‘modern services’ to include the production, broadcasting, and distribution of media and cinematic productions. In addition, railroad transportation, postal, and telecommunications industries will be added to the
China, People’s Republic of

scope at the appropriate time. It is generally contemplated that the transformation will be implemented nationwide within China’s 12th Five Year Plan (2011 to 2015).

**Business tax (BT)**

A BT is imposed on services, transfer of intangible assets, and immovable property taking place within China. Services taking place within China refers to situations where the service provider, the service recipient, or both are in China. This may make services even being rendered outside China subject to BT in China. BT rates are 3% or 5%, except for the leisure and entertainment industry, which may be subject to a rate of up to 20%. BT is not recoverable but is deductible for CIT purposes.

As indicated above, under the Pilot Program of indirect tax reform, enterprises providing Pilot Services in the Pilot Regions are subject to VAT instead of BT from the effective date of the Pilot Program in the respective Pilot Region.

**Customs duties**

In general, a customs duty is charged in either specific or *ad valorem* terms. For specific duty, a lump sum amount is charged based on a quantitative amount of the goods (e.g. CNY 100 per unit or per kg). For *ad valorem* duty, the customs value of the goods is multiplied by an *ad valorem* duty rate to arrive at the amount of duty payable. The applicable duty rate generally is determined based on the origin of the goods.

An exemption from customs duty applies to machinery and equipment imported by a foreign investment enterprise within the amount of its total investment, for its own use, if the project falls within the encouraged category of the ‘Catalogue for the Guidance of Foreign Investment Industries’ and the imported machinery or equipment is not within the list of commodities that are not exempted from customs duty.

A customs duty and VAT exemption may be allowed on importation of raw materials for contract processing or import manufacturing. Goods may be imported into, and exported out of, designated Free Trade Zones and Bonded Logistics Zones without liability to customs duty or VAT.

**Consumption tax**

A consumption tax is imposed on 14 categories of goods, including cigarettes, alcoholic beverages, and certain luxury and environmental unfriendly items. The tax liability is computed based on the sales amount and/or the sales volume, depending on the goods concerned. Consumption tax is not recoverable but is deductible as an expense for CIT purposes.

**Real estate tax**

A real estate tax, which is based on the value of the property or rental received, is assessed annually on land and buildings used for business purpose or leased. The tax rate is 1.2% of the original value of buildings. A tax reduction of 10% to 30% is commonly offered by local governments. Alternatively, tax may be assessed at 12% of the rental value. Real estate tax is deductible for CIT purposes.

**Urban and township land-use tax**

An urban and township land-use tax is levied on taxpayers who utilise land within the area of city, country, township, and mining districts. It is computed annually based on the space of area actually occupied by a taxpayer multiplied by a fixed amount per square metre that is determined by the local governments.
**Arable land occupation tax**
Arable land occupation tax is levied on companies and individuals who build houses or carry out non-agricultural construction on arable lands. It is computed based on the space of area actually occupied by a taxpayer multiplied by a fixed amount per square metre that is determined by the local governments and is settled in a lump sum.

**Land appreciation tax**
A land appreciation tax is levied on the gain from the disposal of properties at progressive rates from 30% to 60%. Land appreciation tax is deductible for CIT purposes.

**Stamp tax**
All enterprises and individuals who execute or receive ‘specified documentation’, including 11 types of contracts and a few specified documents, are subject to stamp tax. The stamp duty rates vary between 0.005% on loan contracts to 0.1% for property leasing and property insurance contracts. A flat amount of CNY 5 applies to certification evidencing business licences and patents, trademarks, or similar rights.

**Deed tax**
A deed tax, generally at rates from 3% to 5%, may be levied on the purchase, sale, gift, or exchange of ownership of land use rights or real properties. The transferee/assignee is the taxpayer.

**Urban construction and maintenance tax**
Urban construction and maintenance tax is imposed at a certain rate on the amount of China’s indirect taxes (i.e. VAT, BT, and consumption tax) payable by the taxpayer. Effectively, the taxpayers of indirect taxes are also the taxpayers of urban construction and maintenance tax. It is charged at three different rates depending on the taxpayer’s location: 7% for urban areas, 5% for county areas, and 1% for other areas.

**Educational surtax**
Educational surtax is imposed at 3% on the amount of China’s indirect taxes (i.e. VAT, BT, and consumption tax) payable by the taxpayer. Effectively, the taxpayers of indirect taxes are also the taxpayers of educational surtax.

**Local educational surtax**
Local educational surtax is levied at 2% on the amount of China’s indirect taxes (i.e. VAT, BT, and consumption tax) payable by the taxpayer. Effectively, the taxpayers of indirect taxes are also the taxpayers of local educational surtax.

**Motor vehicle acquisition tax**
A motor vehicle acquisition tax at a rate of 10% of the taxable consideration will be levied on any purchase and importation of cars, motorcycles, trams, trailers, carts, and certain types of trucks.

**Vehicle and vessel tax**
A vehicle and vessel tax is a tax that is levied on all vehicles and vessels within China. A fixed amount is levied on a yearly basis. Transport vehicles generally are taxed on a fixed amount according to their own weight, with passenger cars, buses, and motorcycles being taxed on a fixed unit amount. Vessels are taxed on a fixed amount, according to the deadweight tonnage.
Vessel tonnage tax
Vessel tonnage tax is levied on any vessel entering into a port inside the territory of China from overseas and is collected by the General Customs. The tax payable is computed based on the net tonnage multiplied by the applicable tax rate that is determined based on the net tonnage and the term of the tonnage tax licence.

Resource tax
The exploitation of crude oil and natural gas is subject to resource tax on a sales turnover basis. The exploitation of other natural resources, including coal, other raw non-metallic metals, raw ferrous metals, non-ferrous metallic minerals, and salt (including solid and liquid salt), is subject to resource tax on a tonnage or volume basis. The range of tax rates are specified by the State Council.

For Sino-foreign joint ventures exploiting crude oil or natural gas established before 1 November 2011, mine area usage fees are levied in lieu of resource tax.

Tobacco tax
Tobacco tax is levied on taxpayers who purchase tobacco leaves within the territory of China. The tax is assessed at the rate of 20% on the purchasing value and shall be settled with the local tax bureau at the place of the purchase.

Cultural business development levy
Companies and individuals engaged in entertainment and advertising businesses shall pay cultural business development levy at 3% on the relevant income.

Social security contributions
Employers are responsible for making social security contributions to pension funds, medical funds, unemployment funds, maternity and work-related injury, etc. for their employees. The percentage of social security to be borne by the employers and the contribution base vary from city to city.

Branch income
Under the CIT law, a branch of a non-TRE in China is taxed at the branch level. If there is more than one branch, they may elect to file their tax at the main office in China on a consolidated basis. There is no further tax upon remittance of branch profits.

Income determination
Taxable income is defined as “gross income in a tax year after deduction of non-taxable income, tax exempt income, various deductions, and allowable losses brought forward from previous years”. The accrual method of accounting should be used.

Gross income refers to monetary and non-monetary income derived by an enterprise from various sources, including, but not limited to, the sales of goods, provision of services, transfer of property, dividends, interest, rentals, royalties, and donations.

Non-taxable income refers to fiscal appropriation, governmental administration charges, governmental funds, and other income specified by the central government.
**Inventory valuation**
Inventory must be valued according to costs. In computing the cost of inventories, the enterprise may choose one of the following methods: first in first out (FIFO), weighted average, or specific identification.

**Unrealised gain or loss due to changes in fair value**
An unrealised gain or loss due to changes in the fair value of financial assets, financial liabilities, and investment properties held by an enterprise is not taxable/deductible for CIT purpose. The gain/loss is taxable/deductible only when the asset/liability actually is disposed of or realised.

**Capital gains**
Capital gains are treated in the same way as ordinary income of a revenue-nature for a TRE.

**Dividend income**
An exemption exists for CIT on dividend derived by a TRE from the direct investment into another TRE except for where the dividend is from stocks publicly traded on the stock exchanges and the holding period is less than 12 months.

**Interest income**
Interest income is treated as ordinary income.

**Rental income**
Rental income is treated as ordinary income.

**Royalty income**
Royalty income is treated as ordinary income.

**Partnership income**
Partnerships registered in China are not subject to CIT. The income of a partnership is taxable at the partners' level.

**Unrealised exchange gains**
Unrealised exchange gain (loss) from the year-end translation of assets (liabilities) denominated in foreign currency generally is taxable (deductible).

**Foreign income**
The worldwide income of a TRE and its branches both within and outside China is taxable. There are no provisions in the CIT law that allow foreign income directly earned by the TRE to be deferred for tax purposes. The CIT law contains a controlled foreign company (CFC) rule under which the unremitted earnings of a foreign company controlled by Chinese enterprises may be taxable in China (see the Group taxation section for more information). A foreign tax credit is allowed for foreign income taxes paid on foreign-source income.

**Deductions**
Generally, an enterprise is allowed to deduct reasonable expenditures that actually have been incurred and are related to the generation of income.
China, People’s Republic of

**Depreciation of fixed assets**
Fixed assets with useful lives of more than 12 months must be capitalised and depreciated in accordance with the CIT regulations. Generally, depreciation is calculated by the straight-line method. Shorter tax depreciation life or accelerated depreciation may be allowed due to advancement of technology or suffering from constant vibration or severe corrosion. Production-nature biological assets, such as livestock held for breeding and commercial timber, also have to be capitalised and depreciated using the straight-line method.

Under the straight-line method, the cost of an item, less its residual value, is depreciated over the useful life of the asset. Residual value should be reasonably determined based on the nature and usage of the asset. The CIT law provides minimum useful lives for the following assets:

<table>

<tr>
<td>Production-nature biological assets in the nature of forestry</td>
<td>10</td>
</tr>
<tr>
<td>Production-nature biological assets in the nature of livestock</td>
<td>3</td>
</tr>
</tbody>
</table>

**Amortisation of intangibles and goodwill**
A deduction is allowed for amortisation of intangible assets, such as, but not limited to, patents, trademarks, copyrights, and land use rights. Generally, intangible assets have to be amortised over a period of not less than ten years. For an intangible asset obtained through capital contribution or assignment, it can be amortised according to the useful life prescribed in the laws or agreed in the contracts, if any. However, acquired goodwill is not deductible until the invested enterprise is entirely transferred or liquidated.

**Organisational and start-up expenses**
Organisational and start-up expenses are tax deductible fully in the first year of operation.

**Research and development (R&D) expense**
For R&D expenses incurred for new technology, new products, or new craftsmanship, an extra 50% of the actual expenses incurred are also tax-deductible as an incentive.

**Asset loss**
Asset loss (including bad debt loss) may be deductible in the tax year during which such loss is incurred, provided that supporting documents are submitted to and accepted by the in-charge tax bureau before annual income tax reconciliation filing.

**Interest expenses**
Interest on loans generally is tax-deductible. For interest expenses on borrowings from non-financial institutions by a non-financial institution, the portion that does not exceed the commercial rate is deductible. The tax deduction of interest paid to related parties is subject to the thin capitalisation rule under the CIT law (see the Group taxation section for more information).
Reserves and provisions
Provisions for asset impairment reserves (e.g. bad debt provisions) and risk reserves generally are not tax-deductible unless otherwise prescribed in the tax rules. Financial institutions and insurance companies may deduct certain provisions and reserves subject to the caps specified in the relevant tax circulars.

Contingent liabilities
The CIT law does not specifically address the deductibility of contingent liabilities. According to the general principle of the CIT law, contingent liabilities are liabilities that an enterprise has not actually incurred and thus shall not be tax-deductible.

Charitable donations
Charitable donations are tax-deductible at up to 12% of the annual accounting profit. Non-charitable donations, as well as sponsorship expenditures that are non-advertising and non-charitable in nature, are not deductible.

Wages and staff welfare expenses
Reasonable wages and salaries of employees incurred by an enterprise are tax-deductible. Directors’ fees are also tax-deductible.

Basic social security contributions, including basic pension insurance, basic medical insurance, unemployment insurance, injury insurance, maternity insurance, and housing funds, that are made by an enterprise in accordance with the scope and criteria as prescribed by the state or provincial governments are deductible.

Commercial insurance premiums paid for investors or employees shall not be tax-deductible unless it is paid for safety insurance for workers conducting special types of work.

Staff welfare expenses, labour union fees, and staff education expenses are tax-deductible at up to 14%, 2%, and 2.5% of the total salary expenses, respectively. For qualified enterprises, the cap for tax-deductible staff education expenses is increased to 8% of the total salary expenses.

Entertainment expenses
Entertainment expenses are tax-deductible to the lesser of 60% of the costs actually incurred and 0.5% of the sales or business income of that year. The excess amount must not be carried forward to and deducted in the following tax years.

Advertising expenses and business promotion expenses
Advertising expenses and business promotion expenses are deductible at up to 15% (30% for certain enterprises in the cosmetics, medicine, and beverage industries) of the sales (business) income of that year unless otherwise prescribed in the tax regulations. Any excess amount is allowed to be carried forward and deductible in the following tax years. Advertising expenses and business promotion expenses incurred by the tobacco industry are entirely not tax-deductible.

Fines and penalties
Fines, penalties, and losses arising from confiscation of property are not deductible for CIT purposes.

Taxes
CIT payments and surcharges that are imposed on overdue taxes are not deductible for CIT purposes.
**Net operating losses**
Tax losses can be carried forward for no longer than five years starting from the year subsequent to the year in which the loss was incurred. Carryback of losses is not permitted.

**Payments to affiliates**
Management fees for stewardship are not deductible, but services fees paid for genuine services provided by affiliates in China or overseas and charged at arm’s length should be deductible. Other payments to affiliates, such as royalties, are also tax-deductible, provided that the charges are at arm’s length.

**Group taxation**
Group taxation is not permitted under the CIT law unless otherwise prescribed by the State Council.

**Transfer pricing**
All enterprises are required to conduct transactions with related parties on an arm’s-length basis. The Chinese tax authorities are empowered to make adjustments to transactions between related parties that are not conducted at arm’s length and result in the reduction of taxable income of the enterprise or its related parties using the following appropriate methods: comparable uncontrolled price method, resale price method, cost plus method, transactional net margin method, profit split method, and other methods that are consistent with the arm's-length principle. China also adopts stringent requirements on the disclosure of related party transactions in the filing of the annual tax return. In addition, there is also a requirement to prepare contemporaneous transfer pricing documentation if the amount of related parties’ transactions with an enterprise exceeds a certain prescribed threshold.

The CIT law also contains transfer pricing provisions relating to cost sharing arrangements and advance pricing arrangements (APAs). In addition, it also contains a few tax avoidance rules, such as a CFC rule, a thin capitalisation rule, and general anti-avoidance rules.

**Thin capitalisation**
The CIT law has a thin capitalisation rule disallowing interest expense arising from excessive related party loans. The safe harbour debt/equity ratio for enterprises in the financial industry is 5:1 and for enterprises in other industries is 2:1. However, if there is sufficient evidence to show that the financing arrangement is at arm's length, these interests may still be fully deductible even if the ratios are exceeded.

**Controlled foreign companies (CFCs)**
Under the CFC rule, the undistributed profits of CFCs located in low-tax jurisdictions with an effective income tax rate of less than 12.5% may be taxed as a deemed distribution to the TRE shareholders. The Chinese tax authorities have published a list of countries (i.e. a ‘white list’) that they do not regard to be low-tax jurisdictions.

**Tax credits and incentives**
The CIT law adopts the ‘Predominantly Industry-oriented, Limited Geography-based’ tax incentive policy. Key emphasis is placed on ‘industry-oriented’ incentives aiming at directing investments into those industry sectors and projects encouraged and
supported by the state. The tax incentive policies mainly include the following and are applicable to both domestic and foreign investments.

**Tax reduction and exemption**

CIT may be reduced or exempted on income derived from the following projects:

<table>
<thead>
<tr>

</tr>
<tr>
<td>Encouraged enterprises in underprivileged areas of Xinjiang</td>
<td>2 + 3 years tax holiday (1)</td>
<td>Starting from the first income-generating year</td>
</tr>
</tbody>
</table>

**Notes**

1. ‘2 + 3 years tax holiday’ refers to two years of exemption from CIT followed by three years of 50% reduction of CIT.
2. ‘3 + 3 years tax holiday’ refers to three years of exemption plus three years of 50% reduction of CIT.
3. ‘5 + 5 years tax holiday’ refers to five years of exemption plus five years of 50% reduction of CIT.

For income derived from the transfer of technology in a tax year, the portion that does not exceed CNY 5 million shall be exempted from CIT; and the portion that exceeds CNY 5 million shall be allowed a 50% reduction of CIT.

A CIT exemption applies to the dividend derived by a TRE from the direct investment into another TRE, except where the dividend is from stocks publicly traded on the stock exchanges and the holding period is less than 12 months.

A CIT exemption also applies to the income derived by recognised non-profit-making organisations engaging in non-profit-making activities.

From 1 January 2012 to 31 December 2015, qualified small and thin-profit enterprises with annual taxable income of less than CNY 60,000 shall be allowed a 50% reduction of their taxable income.
China, People’s Republic of

**Reduced tax rate**
The CIT rate may be reduced under certain conditions for different industries (see the Taxes on corporate income section for more information).

**Reduction of revenue**
Where an enterprise uses resources specified by the state as its major raw materials to produce non-restricted and non-prohibited products, only 90% of the income derived is taxable.

**Offset of certain venture capital investment**
For a venture capital enterprise that makes an equity investment in a non-listed small to medium-sized new/high tech enterprise for more than two years, 70% of its investment amount may be used to offset against the taxable income of the venture capital enterprise in the year after the holding period has reached two years. Any portion that is not utilised in that year can be carried forward and deducted in the following years.

**Investment tax credit**
Enterprises purchasing and using equipment specified by the state for environmental protection, energy and water conservation, or production safety purposes are eligible for a tax credit of 10% of the investment in such equipment. Any unutilised amount can be carried forward and creditable in the following five years.

**Other incentives**
There are also tax incentives in relation to the deduction of expenses and cost (e.g. 50% additional R&D deduction, shorter tax depreciation period, and accelerated depreciation). See the Deductions section for more information.

**Foreign tax credit**
A TRE is allowed to claim foreign tax credit in relation to foreign income tax already paid overseas in respect of income derived from sources outside China based on a country-basket principle. The creditable foreign tax also includes foreign income tax paid by qualified CFCs. However, the creditable amount may not exceed the amount of income tax otherwise payable in China in respect of the foreign-sourced income. In addition, there is a five-year carryforward period for any unutilised foreign tax.

**Withholding taxes**
Foreign enterprises without establishments or places of business in China shall be subject to a unilaterally concessionary rate of withholding tax (WHT) at 10% on gross income from dividends, interest, lease of property, royalties, and other China-source passive income unless reduced under a tax treaty. Nevertheless, dividends distributed by a foreign investment enterprise out of its pre-2008 profit are still exempted from WHT.

WHT rates under China’s tax treaties with other countries/nations are as follows (as of 31 May 2013):

<table>

Notes

- This table is a summary only and does not reproduce all the provisions relevant in determining the application of WHT in each tax treaty/arrangement.

1. 0% is due on interest paid to government bodies, except for Australia, Bosnia and Herzegovina, Brunei, Cyprus, Israel, Slovenia, and Spain. Reference should be made to the individual tax treaties.
2. The lower rate on royalties applies for the use of or right to use any industrial, commercial, or scientific equipment.
3. The following notes apply to dividend WHT:
   a. The lower rate applies where the beneficial owner of the dividend is a company (not a partnership) that directly owns at least 25% of the capital of the paying company.
   b. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 25% of the voting shares of the paying company.
   c. The lowest rate (i.e. 0%) applies where the beneficial owner is a company that directly or indirectly owns at least 50% of the capital of the paying company and the investment exceeding 2 million euros (EUR). The lower rate (i.e. 5%) applies where the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the paying company and the investment exceeding EUR 100,000.
   d. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 25% of the capital of the paying company.
   e. The lower rate applies where the beneficial owner of the dividend is a company that directly or indirectly owns at least 25% of the capital of the paying company.
   f. The lower rate applies where the beneficial owner of the dividend is a company that owns at least 10% of the voting stock of the paying company.
   g. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 10% of the capital of the paying company.
   h. The lower rate applies where the beneficial owner is a company (other than a partnership) that directly owns at least 10% of the capital of the paying company.
4. The following notes apply to interest WHT:
   a. The lower rate applies to interest payable to banks or financial institutions.
5. The following notes apply to royalties WHT:
   a. The higher rate applies to trademarks.
   b. The higher rate applies to copyright of literary, artistic, or scientific work, including cinematograph films or tapes for television or broadcasting.
   c. The lower rate applies to royalties paid for technical or economic studies or for technical assistance.
6. The lower rates apply in cases where the dividend, interest, or royalty paid from Ecuador to China is applicable to the Foreign Exchange Control Tax in Ecuador.
7. The tax treaty with the former Socialist Federal Republic of Yugoslavia is now applicable to Bosnia and Herzegovina.
8. The tax treaty with the former Federal Republic of Yugoslavia is now applicable to the nations of Serbia and Montenegro.
9. These tax treaties have not yet entered into force as of 31 May 2013.

In addition to the above tax treaties, China has also entered into tax information exchange agreements (TIEAs) with a few countries. For example:

- Argentina
- Bahamas
- Bermuda
- British Virgin Islands (BVI)
- Cayman Islands
- Guernsey
- Jersey
- Isle of Man
**China, People’s Republic of**

---

**Tax administration**

**Taxable period**
The tax year commences on 1 January and ends on 31 December.

**Tax returns**
Enterprises are required to file their annual income tax return within five months after the end of the tax year, together with an audit certificate of a registered public accountant in China. Information on related party transactions must be filed with the annual income tax return.

**Payment of tax**
Enterprises are required to file and pay provisional income taxes on a monthly or quarterly basis within 15 days following the end of each month/quarter. Three options are available to the taxpayer in computing the provisional tax: (i) actual profits of the month/quarter, (ii) average monthly or quarterly taxable income of the preceding year, or (iii) other formulas approved by the local tax authorities.

Settlement of tax payment is due, in conjunction with the annual income tax return, within five months after the end of the tax year.

**Tax audit process**
There is no fixed audit cycle in China. Tax audit targets are selected pursuant to certain criteria.

**Statute of limitations**
For unintentional errors (e.g. calculation errors) committed by the taxpayer in its tax filing, the statute of limitation is three years and extended to five years if the amount of tax underpaid is CNY 100,000 or more. For transfer pricing adjustments, the statute of limitation is ten years. There is no statute of limitation for tax evasion, refusal to pay tax, or defrauding of tax payment.

**Recent focus of Chinese tax authorities**
Since 2009, the Chinese tax authorities have strengthened their tax administration on transfer pricing and income derived by non-TREs. The State Administration of Taxation (SAT) has released a number of tax circulars addressing the tax administration of transfer pricing, foreign contractors and service providers, WHT on passive income, etc.

Under the CIT Law, non-TREs are subject to CIT on the capital gain derived from the disposal of equity investment in Chinese companies. In addition, the transfer has to be effected at fair value so that any gain shall be recognised for tax purpose at the time when the transaction takes place (unless the transaction qualifies for deferral tax treatment provided under the tax regulations). The Chinese tax authorities have, in recent years, challenged and clawed back CIT on several equity transfer cases whereby non-TREs disposed of their equity investment in China to related parties at cost or below ‘fair value’. In addition, they have become more knowledgeable on valuation theories and methodologies and are applying them in reviewing valuation reports in order to ascertain the fair value of equity transfer transactions for tax purposes.

In addition, the Chinese tax authorities have geared up their efforts in recent years to scrutinise investment structures involving intermediate holding companies incorporated in low-tax jurisdictions. One of their focuses is on the indirect equity transfer of Chinese companies by non-TREs. The income derived by a non-TRE from the disposal of a non-Chinese company is not taxable under China’s domestic income tax
China, People’s Republic of

law. However, if the Chinese tax authorities are of the view that the non-TRE transferor has used an abusive arrangement to indirectly transfer the equity of the Chinese company (i.e. interposing and disposing of the special purpose vehicle for no reasonable commercial purpose, but just for avoidance of China withholding income tax), it may re-characterise the equity transfer based on the ‘substance over form’ principle and disregard the existence of the special purpose vehicle. Once the special purpose vehicle is disregarded, the transfer would be effectively a transfer of the underlying Chinese company’s equity, and the transfer gain would be China source and subject to China withholding income tax.

The SAT has also released circulars relating to the claiming of treaty benefits by non-TREs and interpretation of certain articles and terms in the tax treaties, such as dividends, royalties, beneficial ownership, etc. Aggressive tax planning (including, but not limited to, tax-avoidance and treaty-abusive arrangements) not supported by reasonable commercial purposes and substance will be subject to scrutiny by the Chinese tax authorities.

On 26 July 2010, the SAT issued a Departmental Interpretation Note (DIN) for the tax treaty concluded between China and Singapore. It is the first time the SAT has introduced a set of technical views, interpretation, and practice guidelines for the implementation of a tax treaty in such a comprehensive manner. More importantly, this set of interpretation is also applicable to other tax treaties concluded by China if the provisions of the relevant articles in those tax treaties are the same as those in the China/Singapore tax treaty. Thus, it is likely to have a wide impact to tax residents of other countries/regions that have entered into tax treaties with China.

**General anti-avoidance rules (GAAR)**

There is a GAAR provision in the CIT law allowing the Chinese tax authorities to make adjustments to taxable revenue or taxable income where business arrangements, structures, or transactions are entered into without reasonable commercial purpose and result in a reduction, exemption, or deferral of tax payment. The Chinese tax authorities may initiate a GAAR investigation if they suspect that an enterprise undertakes any of the following arrangements: abuse of preferential tax treatments, abuse of tax treaties, abuse of corporate structure, use of tax havens for tax avoidance purposes, or other arrangements that do not have a reasonable commercial purpose.

**Other issues**

**Choice of business entity**

Foreign companies, enterprises, or individuals may, subject to approval from the Ministry of Commerce or other relevant ministries, establish equity joint ventures, contractual joint ventures, wholly foreign-owned enterprises, or representative offices in China. Certain foreign financial institutions, including banks and insurance companies, may, subject to approval, set up branches in China. Foreign investors are allowed to establish foreign invested partnerships in China.

**Exchange controls**

Foreign exchange transactions are administered by the State Administration of Foreign Exchange (SAFE) and its branches. The regulatory administration on foreign exchange transactions of an enterprise depends on whether the transaction is a current account item or a capital account item. Current account items refer to ordinary transactions within the context of international receipts and payments, including, but not limited to, balance of payments from trade, labour services, and unilateral transfers. Capital
account items refer to items of increase or decrease in debt and equity due to inflow or outflow of capital within the context of international receipts and payments, including, but not limited to, direct investment, all forms of loans, and investment in securities. Generally, a payment that falls under the category of a current account may be remitted to overseas if supported with proper contracts, invoices, and tax payment/exemption certificates. In the past, most of the transactions under the category of capital account items had to be approved by the SAFE. Since the end of 2012, the SAFE has relaxed the administration of certain capital account items so that approval is no longer needed for a few types of transactions.

**Intellectual properties**
Patents, trademarks, and copyrights are governed by separate laws and administered by separate governmental bodies. The government encourages the development and transfer of intellectual properties. The transfer of technology and technical services are currently exempted from BT.

**Mergers and acquisitions (M&A) activities**
Both Chinese domestic and foreign investors increasingly are using M&A transactions to establish or expand their Chinese operations.

The Ministry of Finance (MOF) and the SAT jointly released a tax circular that addresses the CIT treatments for six forms of restructuring transactions, namely, change in legal form, debt restructuring, equity acquisition, assets acquisition, merger, and spin-off. The general principle is that enterprises undergoing corporate restructuring should recognise the gain/loss from the transfer of relevant assets/equity at fair value when the transaction takes place. However, if certain prescribed conditions are satisfied, the parties involved could opt for special tax treatments, which are essentially tax deferral tax treatment. In other words, recognition of gain/loss of the transferor from transfer of assets/equity can be deferred with respect to the equity-payment portion; and the transferee may take over the transferor’s tax basis of the acquired assets/equity. Such special tax treatments are only available to a very few specific types of cross-border transactions.
Significant developments

A major tax reform occurred in 2012 (Law 1607 of 2012), which became enforceable as of 1 January 2013. The most significant corporate tax developments resulting from the reform include the following:

- The corporate income tax (CIT) rate decreased from 33% to 25%.
- An additional 9% ‘income tax for equality’ was introduced.
- The capital gains tax rate decreased from 33% to 10%.
- An internal permanent establishment (PE) concept was introduced (see the Corporate residence section).
- A new consumption tax was introduced for certain services and goods (see the Other taxes section).
- Thin capitalisation rules were introduced (see the Group taxation section).
- Anti-abuse regulations were introduced (see the Tax administration section).

Taxes on corporate income

National companies (i.e. incorporated in Colombia under Colombian law) are taxed on worldwide income. Foreign non-resident companies and local branches of foreign companies are taxed on their Colombian-source income only. The current general CIT rate is 25% (33% prior to 1 January 2013), which is applied on taxable income.

Taxable income is generally defined as the excess of all operating and non-operating revenue over deductible costs and expenses. The customary costs and expenses of a business are generally acceptable as deductible expenditure for CIT purposes, provided they are necessary, reasonable, and have been realised during the relevant tax year under the accrual or cash method of accounting, as the case may be.

The current general capital gains tax rate is 10% (33% prior to 1 January 2013).

Qualifying businesses located in free trade zones (FTZs) enjoy a reduced rate of 15% (while subject to capital gain tax at 10%).

Minimum presumptive tax

CIT payers are required to pay a minimum amount of income tax, which is determined based on the so-called presumptive income method. Under this method, presumptive taxable income is measured as 3% of net assets (or tax equity) as of 31 December of the prior tax year as reported by the taxpayer on the corresponding CIT return. The CIT rate is then applied to the greater of regular taxable income (revenue less allowable costs and expenses) or presumptive taxable income (exempting certain business activities).
Colombia

In order to determine the taxable base for presumptive income purposes, it is necessary to subtract from the total amount of net assets, which is the base to calculate presumptive income, the following amounts:

- The net asset value of the shares owned in national companies.
- The net asset value of the assets affected by force majeure.
- The net asset value of assets associated with operations in unproductive periods.

Each year, taxpayers must compare the value resulting from the application of the foregoing two systems. The income tax for the taxable year will be calculated on the higher value resulting from this comparison. If presumptive income is higher than the ordinary net income, the difference constitutes an excess of presumptive income, which can be carried forward (adjusted for inflation) to any of the following five taxable years and offset against the net income determined by the taxpayer.

**Income tax for equality**

From 2013 through 2015, 25% rate CIT payers are liable for an additional 9% income tax for equality. Beginning in 2016, the rate is reduced to 8%. Collections will be used to fund cuts on payroll taxes as well as health contributions to the social security system, which 25% rate CIT payers will enjoy on select headcount.

Structurally, the income tax for equality works as an income tax, except for certain limitations on the ability to claim costs and expenses.

The 15% rate CIT payers (FTZ users), and other entities that, at 1 January 2013, have already commenced the process of qualification as FTZ users, will maintain the same income tax rate.

The taxable basis will generally be calculated as revenue (excluding capital gains) minus the following:

- Rebates, discounts, and returns.
- Non-taxed revenue.
- Allowable costs and expenses.
- Select exempt income from Andean Tax Treaty countries and others.

Tax loss and presumptive taxable carryforward are not eligible to offset the taxable amount, although the potential impact on deferred assets for tax loss needs to be considered.

Please be aware that in no case can the taxable amount be lower than 3% of the taxpayer’s net equity as of the end of the last year (i.e. the same system is in place as for the income tax, where even loss-making taxpayers may be subject to liability). It is worth mentioning that the liability for this tax will be used to determine the amount of foreign tax credit that may be claimed by a resident.

**Stability Agreement Regime**

As of 1 January 2013, the Legal and Tax Stability Framework was repealed. Applications under consideration will be grandfathered and approved if they meet the applicable requirements. Any already executed Legal Stability Agreements will continue to apply until expiration.
Local income taxes
For a description of a local (municipal) tax, see Industry and trade tax in the Other taxes section.

Corporate residence
Corporate residence is determined by the place of incorporation of any given company.

For CIT purposes, companies incorporated under foreign laws that have their main domicile abroad are considered ‘foreign companies’, whereas any company incorporated in Colombia under Colombian law qualifies as a ‘national company’ even if fully owned by foreign shareholders.

Permanent establishment (PE)
As of 1 January 2013, the Colombian internal legislation incorporates the concept of PE. This concept follows the Organisation for Economic Co-operation and Development (OECD) criteria and means a fixed place of business throughout which an entity carries out its activity, whether partially or totally.

A PE will also be incorporated when a person (other than an independent agent) has the capacity to conclude contracts on behalf of the foreign entity, except for preparatory and auxiliary activities.

If a PE is incorporated, taxation is limited to domestic income attributable to the PE.

Other taxes
Value-added tax (VAT)
The Colombian VAT taxes the sale in the country of any items of tangible personal property that are not fixed assets and are not covered by an exemption, the provision of services within the national territory (certain services supplied outside Colombia but imported also attract VAT), and the importation of tangible personal property that is not covered by an exemption.

The Colombian VAT is based on a credit-debit system throughout the entire chain of a business. However, certain products are only taxed at the manufacturer level (one-phase VAT). For purposes of VAT calculation, the VAT payer may credit the VAT (input) paid to vendors (certain limitations apply) against any VAT (output) collected from customers.

The general VAT rate is 16%. However, certain services and goods are taxed at 5% and 0%.

The following are the most significant goods and services taxed at 5%:

- Agricultural goods.
- Basic groceries.
- Janitorial services, private security services, and temporal work related services (some qualifications are required).
- Medical care services.
The following are the most significant goods and services taxed at 0%:

- Meat, fresh eggs, and dairy products.
- Biofuel.
- Services to be exported (some requirements are needed).
- Internet services for low to mid-income residential customers.
- Manufactured goods to be exported.
- Tourism services to be supplied to non-resident individuals.

Under current law, there are VAT exemptions available for the following items, among others:

- Equipment and materials for the construction, installation, assembly, and operation of environmental monitoring and control systems.
- Imports of raw materials and supplies made under the so-called Vallejo Plan for further processing and incorporation into products that are to be subsequently exported. (see the Tax credits and incentives section for more information on the Vallejo Plan).
- Temporary importation of heavy machinery and equipment for basic industries (mining, hydrocarbons, heavy chemistry, the iron and steel industry, metallurgy, power generation and transmission, and the water industry).
- Importation of machinery and equipment, which is not produced in the country, for recycling and processing of waste and refuse.
- Regular imports by major exporters of industrial equipment, which is not produced in the country, for the transformation of raw material.
- Freight transportation.
- Public transportation of passengers in the national territory by water or land.
- Transportation of gas and hydrocarbons.
- Interest and other financial income from credit operations.
- Financial leasing.
- Public utilities.
- Restaurant and cafeteria services.

**Withholding VAT**

VAT withholding is reduced to 15% (down from 50%) on the purchase of goods and services for most domestic transactions.

A non-resident supplier of VAT-subject services does not require VAT registration. Rather, it is the locally-based recipient that must apply a reverse-charge (100% of the VAT). No VAT fiscal representation is allowed.

**VAT compliance**

Filing frequency depends on taxpayer’s annual revenue on 31 December of the previous taxable year. For businesses with annual revenue in excess of 1.3 million United States dollars (USD), the frequency is bimonthly. If annual revenue is not in excess of USD 1.3 million but is higher than USD 228,000, the filing frequency is quarterly. For small businesses (annual revenue below USD 228,000), the frequency is yearly.

No VAT filings are required for periods where no inputs or outputs exist.

**VAT credit**

VAT paid to vendors (other than VAT paid on fixed assets) is creditable even if paid at rates higher than those at which taxable sales are made. Where a receivable
arises above that credit, a refund will be available upon request subject, to certain circumstances.

**Consumption tax**

As of 1 January 2013, a new national consumption tax is levied against the following select services and goods:

- Mobile phone services at 4%.
- Certain vehicles, aircraft, and other goods at 8% or at 16%.
- Restaurant and cafeteria services at 8%.

The recent Tax Bill determined that the services to be levied with this tax must receive a new VAT treatment, whether by changing its nature from taxed services to untaxed services (restaurant and cafeteria), meaning that consumption tax applies in lieu of VAT, or by lowering its VAT rate to 16% (vehicles, aircrafts, mobile phone services) so the new consumption tax is added to VAT.

**Customs duties**

Imports, according to customs rules, consist of the entry of goods to the ‘national customs territory’ from the rest of the world, or from an FTZ, with the purpose of remaining permanently or temporarily in it for the achievement of a specific purpose.

As a general rule, the importation processes before the Colombian Internal Revenue and Customs Service (DIAN) can only be carried out by users registered in the Customs Information System, either as Customs Agencies (previously called Customs Intermediation Companies) or Permanent Customs Users (UAPs). The latter may file their own customs declarations.

According to the Harmonized System of Designation and Coding of Goods approved by the World Trade Organization (WTO), imported goods are classified into subentries composed of six digits. Also, two digits are added, which are for exclusive use of the Andean Community (CAN), and two final digits, which correspond to the digits for use of Colombia. The custom subentry or harmonized tariff schedule (HTS) code, which is the ten-digit result, is exposed in the Colombian Customs Tariff, which is governed by Decree 4927 of 2011, which also reflects the applicable tariff of each duty. VAT, which is also part of the customs duties, is regulated in the Colombian Tax Code.

The general VAT rate for the importation of goods is 16% and the custom duties range between 0% and 20%.

**Excise taxes**

There are some excise taxes for the consumption of beer and its derivates, wine, liquor and its derivates, and cigarettes and similar products.

The excise taxes are of municipal in nature. Therefore, the tax rates and applicable laws vary from one municipality to another.

**Property tax**

The property tax is a municipal tax that is imposed annually on real estate property located in urban, suburban, or rural areas. It is levied on both improved and unimproved real estate; consequently, the taxpayers of this tax are the owners or holders of the real estate property.
Colombia

The taxable base of this tax is the current cadastral value of the property, as adjusted for inflation. In some cities, such as Bogotá, the taxable base is the value of the property as appraised by the taxpayer directly.

Property tax rates depend upon the nature and usage of the property, and generally range between 0.4% and 1.2%.

This tax is fully deductible for CIT purposes, provided the same has a causal nexus with the income producing activity of the taxpayer (for example, where the tax is paid on rental property).

**Stamp tax**
The stamp tax rate is 0%.

**Capital gains tax**
As of 1 January 2013, the capital gains tax rate is 10% (33% prior to 1 January 2013).

**Financial transactions tax**
The financial transactions tax is a permanent tax on financial transactions, the collection of which is the responsibility of regulated financial institutions and the Central Bank (Banco de la República).

The tax rate is 0.4%, and the taxable event is the carrying out of financial transactions that involve the disposal of resources deposited in checking or savings accounts as well as in deposit accounts with Banco de la República, and the issuance of cashier’s checks.

50% of the total tax paid is deductible for CIT purposes, regardless of whether or not the transactions have a causal nexus with the income producing activity of the taxpayer.

The law establishes a series of operations and transactions that are exempted from this tax.

The financial transactions tax will be reduced to 0.2% for year 2014 and 2015, to 0.1% for years 2016 and 2017, and to 0% for year 2018 and onwards. Planning strategies, such as payment to third parties using overdrafts, repos, buy/sell back transactions, or portfolio investments that did not trigger this tax, are not permitted.

**Payroll taxes and social security contributions**
There are three major payroll taxes and contributions.

- General pensions system.
- Health social security system.
- General system of professional risks.

The basis for contributions is determined by the monthly salary (excluding non-salary items) earned by the employee, which may not be, for ordinary salaried employees, less than the minimum legal monthly salary (COP 589,500 in FY 2013) and may not exceed 25 minimum legal monthly salaries (COP 14,737,500 in FY2013).

For employees who earn an integral salary, the basis for pension contributions will be of the lower of 25 minimum legal monthly salaries or 70% of such integral salary.
Amounts of contributions
In the two regimes (public and private), the amounts of contributions are currently 28.5% of the monthly salary.

Out of this percentage, 75% (approximately 20.5% of the monthly salary) must be borne by the employer and 25% (approximately 8% of the monthly salary) must be borne by the employee.

However, employees who earn more than four minimum legal monthly salaries must contribute an additional 1%, which will be destined to the pension solidarity fund, created by law to cover the risks of workers with no resources. Also, employees who earn more than 16 minimum monthly salaries must contribute an additional percentage (between 0.2% and 1%), depending on the amount of salary received.

For professional risks (Aportes de Riesgos Profesionales), the employer must pay a contribution ranging from 0.375% to 8.7% of the monthly salary, which is an insurance that covers risks of labor related illnesses or accidents, permanent disability, death, and incapacity also derived from the employee’s activity.

In addition, for employees with salaries higher than ten minimum monthly wages, employers must pay a payroll tax of 9% on salary items only, the basis of which is 100% for ordinary salaried employees and 70% for integral salaried employees.

Industry and trade tax
The industry and trade tax is a municipal tax that is imposed on revenue obtained from the exercise of industrial, commercial, or service activities in any Colombian municipal jurisdiction. It can be viewed as a special form of a turnover tax.

The industry and trade tax rates are determined by each municipality, and, as a rule, they range between 0.2% and 1%. All of this tax can be deducted for CIT purposes when effectively paid.

Branch income
Branch income is taxed at the same rate as corporate income, which is 25%.

As of 1 January 2013, branch profits are re-categorised as dividends; consequently, untaxed profits at the branch level are subject to 25% dividend tax. If profits are taxed at the branch level, no further taxation is required.

Please be aware that this rate is unlikely to apply to the branch of a company resident in a treaty country (subject to treaty provisions).

The retained earnings as of the end of 2012 that are not fully taxed when obtained are not grandfathered.

Income determination
Inventory valuation
The value of inventories, which includes all expenses and direct and indirect charges necessary to put an item in a position to use or sell, must be determined using one
Colombia

of the following methods: first in first out (FIFO), last in first out (LIFO), specific identification, or weighted average. Special rules may authorise the use of other methods of recognised technical value.

**Capital gains**
Capital gains are taxed separately from income. See *Capital gains tax in the Other taxes section* for more information.

**Dividend income**
The so-called double income taxation on corporate earnings was eliminated from the Colombian tax system many years ago. This means that shareholders of Colombian companies are, as a rule, not required to pay any income taxes on dividend distributions, but only to the extent that dividends are paid out from earnings that were taxed at the corporate level prior to distribution. When the dividends are paid out from earnings that went untaxed at the corporate level, a foreign shareholder is required to pay income taxes on the dividends at 33% via a withholding tax (WHT) collected by the distributing company. Certain double taxation treaties (DTTs) offer limited or full relief for the 33% WHT on dividends.

As of 1 January 2013, branch profits are re-categorised as dividends (see *the Branch income section* for more information).

**Interest income**
Interest income derived from activities in Colombia is considered part of the CIT base for Colombian entities; however, if interest is paid to a non-resident that is not compelled to file CIT in Colombia, a WHT is accrued over the payment or deposit at a rate of 33% if the loan term does not exceed one year or 14% if the loan term does exceed one year.

Note that there are some special conditions derived from DTTs that decrease the WHT rate.

**Royalties**
Royalties paid in favour of a Colombian entity are subject to taxes in Colombia; consequently, such royalty payments are part of the CIT base. If royalties are paid in favour of a non-resident (i.e. in favour of an entity that is not compelled to file CIT in Colombia), WHT is accrued over the payment or deposit at a rate of 33%.

Certain DTTs offer limited relief for the 33% WHT on royalties (e.g. 10%).

**Foreign income**
The following cases, among others, qualify as foreign-source income:

- Income obtained from external debt, if it complies with some requirements provided by law. Interest produced by this external debt is not taxed via CIT, and there is no WHT liability. Additionally, the expense derived from this concept will be 100% deductible.
- Income derived from technical services of repair and maintenance of equipment carried out abroad.

There are no tax deferral provisions in Colombia.
Deductions

In Colombia, the customary costs and expenses of a business are generally acceptable as deductible expenditure for CIT purposes, provided they are necessary, reasonable, and have been realised during the relevant tax year under the accrual method of accounting. Examples of common (and not so common) deductions include the items below.

Depreciation

As a general rule, the acquisition cost of tangible fixed assets is fully depreciable for CIT purposes. The normal estimated useful lives are as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Useful life (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and pipelines</td>
<td>20</td>
</tr>
<tr>
<td>Machinery and equipment, office furniture,</td>
<td>10</td>
</tr>
<tr>
<td>and fixtures</td>
<td></td>
</tr>
<tr>
<td>Vehicles and computer equipment</td>
<td>5</td>
</tr>
</tbody>
</table>

The acceptable methods for depreciation are:

- **Straight-line**: The straight-line method is the easiest and most commonly used method of depreciation by companies; it is calculated by dividing the value of the asset by the asset’s useful life.
- **Declining-balance**: This method takes into consideration an accelerated rate of depreciation and is useful for those assets in which a higher value is lost during the beginning years of usage. Under the declining-balance tax depreciation method, in no case will a residual value lower than 10% of the asset’s cost be allowed nor will accelerated depreciation based on additional shifts be deductible.
- **Any other method of recognised value in accordance with the opinion of the tax authorities.**

Depreciation rates can be increased by 25% for each additional eight-hour shift of asset use (and pro rata for fractions thereof). When tax depreciation exceeds book depreciation, the taxpayer is required to establish a reserve equivalent to 70% of the difference. Recapture of depreciation on the sale of depreciated property is taxed at 25%.

Depletion

Depletion is available under certain specific circumstances.

Amortisation of intangible assets

As a general rule, taxpayers can amortise, for CIT purposes, the cost of any acquired intangible asset over a period of five years, at a minimum, unless the taxpayer is able to prove that the amortisation period should be less because of the specific nature or conditions of the business.

Goodwill

As a general rule, goodwill is deductible for CIT purposes, provided it is related to the business purpose or income producing activity. In order for such goodwill to be deductible, the intangible (goodwill) must fit the definition of an asset subject to be amortised. Amortisable investments are ones that, under the normal accounting rules, are subject to demerit and should be recorded as assets subject to be amortised in a period exceeding one year.
Goodwill cannot be amortised in a period of less than five years.

**Goodwill on share purchases**

Goodwill tax amortisation on share purchases of residents or non-resident entities is permitted, provided:

- a loss of value (impairment) is technically proven
- the acquiring vehicle remains separate from the entity owning the business (except when, while not entirely clear, the reorganisation is required under law), and
- taxable dividends are distributed to the acquiring vehicle.

If these requirements are not met, no amortisation is allowed.

Nevertheless, there is a grandfather rule that allows taxpayers to amortise goodwill acquired on share purchases that occurred prior to 1 January 2013 where goodwill was recognised, as well as on share purchase agreements entered into prior to the same date, but where completion is subject to approval or clearance by an authority, provided the relevant application was filed before 31 December 2012.

Banking institutions under surveillance by the financial authority are allowed to amortise goodwill on share purchases, even if registered after 1 January 2013.

**Start-up expenses**

Start-up expenses are deductible for CIT purposes, provided they are necessary, reasonable, and have been realised during the relevant tax year under the accrual method of accounting.

**Interest expenses**

Taxpayers are generally entitled to deduct any interest paid to financial institutions or to third parties.

As of 1 January 2013, the Colombian Tax Regime has incorporated thin capitalisation rules (see Thin capitalisation in the Group taxation section).

**Bad debt**

Bad debt is deductible for CIT purposes, provided the company keeps it accounting books under the accrual method, the debt is originated as a result of the development of an income producing activity, and the following requirements are met:

- The debt is due for over a year.
- The company is able to prove that the debt has a nature of bad debt.
- The company has registered the provision, related to the bad debt, within the same fiscal period.
- The debt does exist at the moment of the registration of the provision.
- The company has included the debt in the calculation of its CIT for previous fiscal periods.

**Charitable contributions**

Some specific charitable contributions are allowed as deductions, provided they are made to certain institutions dedicated to development of health, education, culture, religion, sports, scientific and technological research, ecology and the protection of the environment, or to social development programs of general interest. Most of these charitable contributions are limited with respect to their deduction.
Expenses incurred abroad
As a general rule, the deduction of expenses incurred abroad that are not subject to WHT are limited to 15% of the taxpayer’s net income.

Fines and penalties
Fines and penalties are not deductible for CIT purposes.

Taxes
It is important to mention that the current tax regulations state the following as the only taxes that can be claimed as a deductible expense:

- 100% of the industry and trade tax.
- 50% of the financial transactions tax.
- 100% of the property tax.
- The VAT that cannot be treated as output.
- Some local stamp taxes.

Special deductible items
Colombian income tax laws have established certain special deductible items, which include the following:

- 100% of the industry and trade tax and real property tax actual payments and 50% of the financial transactions tax actual payments are deductible.
- 100% of acquisition costs are available as a tax amortisation or depreciation base.
- 175% of the investments made in certain scientific and/or technological projects or in professional training projects of governmental, public, or private institutions of higher education are deductible. This deduction cannot exceed 40% of the taxpayer’s net income as determined before subtracting the amount of the investment.
- 100% of the investments made for the control and improvement of the environment are deductible. This deduction cannot exceed 20% of the taxpayer’s net income as determined before subtracting the amount of the investment.

Net operating losses
Net tax losses (adjusted for inflation) incurred in 2007 or thereafter may be carried forward without limitation. There is no loss carryback provision. Certain limitations apply to the offset of losses transferred on merger reorganisations.

Payments to foreign related parties
Royalties and similar charges
Royalties and the costs of exploitation or acquisition of all kinds of intangible property that are charged by foreign related parties are allowable as CIT deductions, provided that the corresponding WHT is collected at generally 33% (10% in the case of most DTTs). Other types of payments are subject to the general rules for expenses incurred abroad.

Management overhead expenses
Management overhead expenses paid to a foreign related party (e.g. the parent company) are deductible, provided they meet the arm’s-length test under transfer pricing regulations and provided the management services are real and are specifically related to the income producing activity of the local subsidiary that pays them. These expenses must also be carefully documented such that the local subsidiary can provide evidence to the authority of the fact that they are specifically related to its Colombian operations: to the planning and direction of the operations, the setting and
implementation of management controls, the measurement of progress made toward specific business goals, the related financial results, etc. Where these services are supplied inside Colombia, a 33% WHT is also required to ensure deductibility.

**Interest**
Interest and related financial costs (including foreign exchange losses) paid to foreign related parties are deductible, provided they meet the arm’s-length test under transfer pricing regulations and the thin capitalisation rules (see the Group taxation section). Furthermore, interest and the related financial costs paid on short-term financing relating to imports of merchandise and raw materials directly supplied by foreign related parties are also deductible for CIT purposes. Interest paid to a non-resident triggers WHT over the payment or deposit at a rate of 33% if the loan term does not exceed of one year or 14% if the loan term does exceed of one year.

Financial and non-financial institutions registered with the Colombian Central Bank are permitted to extend loans into Colombia.

**Group taxation**
Group taxation or group consolidation is not allowed for CIT purposes in Colombia.

**Transfer pricing**
In Colombia, transfer pricing rules are applicable to the transactions performed by local taxpayers with foreign related parties. Thus, for CIT purposes, Colombian taxpayers must determine their income, costs, expenses, assets, and liabilities on the basis of prices and profit margins used in comparable transactions entered into with or between independent or unrelated parties.

In general terms, the rules related to comparability criteria, supporting documents, and advanced pricing agreements (APAs) follow international transfer pricing standards. However, they introduce a wide definition of ‘related companies’ for transfer pricing purposes, including subordination and individual or joint control exercised by a foreign parent company or by individuals located in Colombia or abroad.

The law presumes that transactions with foreign non-domiciled entities located in so-called ‘tax havens’ are transactions performed with related parties and are subject to transfer pricing rules. However, the Colombian government has not yet issued the list of tax havens for these purposes, nor further regulations applicable to the payments made to such jurisdictions. Therefore, the Colombian tax rules related to tax havens are not yet applicable.

If (i) the gross equity (assets) of the local taxpayer on 31 December of each year is equal to or higher than the equivalent to 100,000 tax value units (TVU) (2,684,100,000 Colombian pesos [COP] or approximately USD 1,511,000) or (ii) the gross income obtained by the local taxpayer in a given year is equal to or higher than the equivalent to TVU 61,000 (COP 1,637,301,000 or approximately USD 922,000), it shall be required to prepare transfer pricing supporting documents (i.e. a transfer pricing study) and to file with the tax authority an informative return in connection with the transactions performed, during the corresponding year, with the foreign related parties.

If the local taxpayer does not file the transfer pricing return, the penalty will be up to TVU 20,000 (COP 536,820,000 or approximately USD 303,000). There are other
applicable penalties depending on the nature of the omission, but there is a relief based on a bracket system.

**Thin capitalisation**
As of 1 January 2013, the Colombian Tax Regime has incorporated thin capitalisation rules, which establish a ratio of 3:1 for related or unrelated party interest-bearing debt (whether cross-border or domestic).

The interests that are allocable to debt in excess of this ratio are considered to be permanently non-deductible. An exception applies for public services infrastructure projects, subject to a special purpose vehicle being used.

**Tax credits and incentives**

**Foreign tax credit**
Foreign income taxes are creditable against CIT and the income tax for equality, subject to certain limitations. Generally, the amount of the credit cannot exceed the sum of Colombian taxes imposed over the same income (CIT plus the income tax for equality). DTT’s provide for more comprehensive credit systems as well.

The foreign tax credit on dividend income is enhanced to include a third-tier of credit availability, subject to specific ownership requirements. A third-tier of credit means that Colombian entities can claim a tax credit not only for taxes paid by a company in which it has a direct investment, but also for taxes paid by a company in which it has an indirect investment.

The tax credit can be credited in the year of payment or in any of the following four years.

**CIT exemptions**
As items of exempt income, the law has established the following:

- Income obtained by publishing companies from the publication of scientific and cultural books, until fiscal year 2013.
- The principal and interest (as well as related commissions and fees) paid pursuant to public foreign debt operations.
- Income from the sale of electric power generated from wind, biomass, or agricultural waste, for a period of 15 years, provided the seller issues and negotiates Greenhouse Gas Reduction Certificates.
- Income obtained from slow yield crops and plantations, including cocoa, rubber, palm oil, citrus, and other fruits.
- Income obtained from river transportation services with shallow draft vessels and barges, for a period of 15 years, starting in 2003.
- Income obtained from hotel services offered in new hotels that are built within 15 years counted from 2003, for a term of 30 years, until 2032.
- Income obtained from hotel services offered in refurbished or enlarged hotel facilities, where the related work is started within 15 years counted from 2003, for a term of 30 years.
- Income obtained from ecotourism services, for 20 years starting in 2003.
- Income obtained from investment in new forestry plantations, sawmills, and plantations of timber-yielding trees.
Colombia

- Income obtained from new medicinal and software products developed in Colombia and protected under new patents registered with the authorities, with a high content of national research and technology, until 2017.
- The gain in trading derivatives that are qualified as securities are not subject to CIT, provided that the underlying asset is stock traded in the Colombian stock exchange, indexes, or participations in funds tracking such stock.

**Special CIT rate for free trade zones (FTZs)**

FTZ industrial users enjoy a special CIT rate. The so-called FTZ industrial goods users and industrial service users pay CIT at a reduced rate of 15% on income earned from their FTZ operations.

Note that capital gains are taxed at the standard CIT rate of 10%.

**Reduction to the statutory CIT rate for small companies**

Small companies (not exceeding USD 1,575,000 in total assets or 50 employees) are subject to CIT at the following reduced rates: 0% of the statutory CIT rate for the first two years, 25% of the statutory CIT rate for the third year, 50% of the statutory CIT rate for the fourth year, and 75% of the statutory CIT rate for the fifth year.

**Reduction of payroll fees for small companies**

Small companies (not exceeding USD 1,575,000 in total assets or 50 employees) are subject to payroll fees at the following reduced rates: 0% of the payroll fees for the first two years, 25% of the payroll fees for the third year, 50% of the payroll fees for the fourth year, and 75% of the payroll fees for the fifth year.

**Tax credit on payroll fees paid**

A tax credit is granted to employers hiring employees under 28 years old; women above 40 years old that have not been legally employed in the previous year; low-income workers earning less than 1.5 times the minimum monthly wage (approximately USD 475); and disabled, reintegrated (from armed conflict), or displaced (as victims of armed conflict) workers, subject to certain requisites and time limitations (two to three years).

**Vallejo Plan for raw materials**

The Vallejo Plan allows for the total or partial suspension of customs duties upon receipt, within the national customs territory, of specific goods destined to be totally or partially exported within a certain period of time, after having undergone transformation, manufacture, or repair, including the materials needed for these operations.

**Withholding taxes**

The Colombian tax system provides for WHT as a general mechanism of advance tax collection. Under the law, as a general rule, all corporate entities are required to collect or withhold taxes from payments made to third parties. The WHT collection agents must collect the applicable WHT amounts, deposit the withheld amounts with the authority, file monthly WHT returns, and issue WHT certificates to the payees. The payees who are also CIT return filers credit the withheld taxes against the annual CIT liability computed on their returns.
Foreign non-resident persons are taxed on their Colombian-source income only. Generally, the full tax liability accruing on payments made to foreign non-resident persons is satisfied via the collection of the applicable WHT. The WHT rate on payments made to foreign non-resident persons for taxable dividends, royalties, and taxable interest is 33%. On payments made for consulting, technical assistance, and technical services, the WHT rate is 10% (whether supplied inside or outside Colombia). On payments made for software licences, the WHT rate is 26.4%.

On other types of payments that give rise to Colombian-source income, the general WHT rate is 14%, with the foreign non-resident payee being required to file a CIT return in Colombia to report the final CIT liability, at 33% of net income (and being entitled to a refund where the final liability is less than the amount withheld at the 14% rate or being required to pay the deficit should the case be the opposite).

WHT returns do not need to be filed where there are no taxes to declare or pay.

**Offsetting of WHT**
WHT returns filed on a non-payment basis will be treated as not filed, except if the filer has a refundable tax credit balance over TVU 82,000 (USD 1,240,000) to offset the outstanding payment. A six-month deadline applies for the taxpayer to apply the offsetting of the credit balance. Otherwise, late filing penalties will apply.

**Self-withholding on some exports**
There is a 1% self-withholding tax on exports for the mining, oil, and gas industry. The self-withholding is creditable against the CIT liability.

**Exempt interest**
Interest payments made abroad on loans or cross-border leasing agreements are subject to a 14% WHT if the loan term exceeds one year. If the loan or cross-border agreement has a term not exceeding one year, a 33% WHT is triggered.

Notes

1. The treaty rate depends on the participation of the shareholder in the Colombian company that distributed the dividends.
2. The rate depends on whether the lender is a financial entity or not.
3. If services are locally untaxed, there is no WHT; otherwise, a 10% WHT will apply.

Tax administration

Taxable period
For CIT purposes, the taxable period is the calendar year, with no exceptions being admissible.

Tax returns
Income tax return filing due dates are set by the government every year. Usually, they fall in the month of April; but in the case of large taxpayers, the filing due dates are usually in February.

Payment of tax
For CIT purposes, corporate taxpayers are divided into ‘large taxpayers’ and ‘other taxpayers’. Large taxpayers pay their estimated outstanding CIT liability (outstanding after deducting applicable WHT from the estimated final liability) in five instalments over the year in which they file their annual CIT return. The due date varies according to the last digits of its NIT (Number of Tax Identification).

Other taxpayers pay their estimated outstanding CIT liability in two instalments over the year in which they file their annual CIT return. The due date varies according to the last digit of its NIT.

Please be aware that the CIT due dates for fiscal year 2012 were between 9 April 2013 and 22 April 2013.

The specific CIT due dates for fiscal year 2013 will be determined by a Decree issued by the government at the end of 2013.

Tax audit process
The audit cycle corresponds to the taxable period, which for the case of CIT is one year.

Statute of limitations
The statute of limitations is generally two years following the actual filing of the return (a longer statute of limitations applies in certain cases).

When no tax return is filed by the taxpayer, the statute of limitations is five years (counted as of the date on which the tax return should have been filed).

Topics of focus for tax authorities
While there are no specific topics to be observed by the tax authorities when performing an audit, usually they look at the formal compliance requirements and the correct application and deductibility of cost and expenses.
**Anti-abuse regulations**
The 2012 tax bill has established some anti-abuse provisions, which allow the tax authority to disregard the transactions considered not to have a valid commercial or business purpose and which tend to modify, reduce, eliminate, or defer the applicable tax consequences.

Under the anti-abuse regulations, the tax authority will be allowed to re-classify the nature of the transaction performed by the taxpayer and to assign the tax consequences applicable to the ‘real’ transaction.

**Other issues**

**Choice of business entity**
The most common type of company used in Colombia is the so-called simplified stock company or simplified corporation, known as a SAS (*sociedad por acciones simplificada*). Besides SAS, foreign investors also use branch offices of an offshore entity as their investment vehicles in Colombia.

As a general rule, from a high-level perspective, there are no major differences between a branch office and a subsidiary (such as a SAS) as far as Colombian taxation is concerned.

However, the following is a chart explaining the main differences between a branch and a subsidiary in Colombia.

<table>
<thead>
<tr>
<th>Tax</th>
<th>Subsidiary in Colombia</th>
<th>Branch of a Foreign entity</th>
</tr>
</thead>
<tbody>
<tr>
<td>CIT</td>
<td>Colombian companies are subject to CIT on their worldwide income at a rate of 25%.</td>
<td>Branches of foreign companies are taxed only on their Colombian-source income. The rate at which branches pay income taxes is the general CIT rate of 25%. As of 1 January 2013, branches are taxed in the same way as subsidiaries (Colombian corporations).</td>
</tr>
<tr>
<td></td>
<td>The CIT base applicable to Colombian companies is, as a general rule, the ordinary net taxable income determined by subtracting from the gross income of the corresponding taxpayer the cost and expenses allowed by the tax laws; however, Colombian law establishes a minimum taxable base called ‘presumptive income’, which is equivalent to 3% of the net equity (i.e. the result of subtracting the liabilities from assets) of the taxpayer on 31 December of the previous taxable year. The CIT of a taxpayer must be determined based on the presumptive income if the ordinary taxable income of the corresponding year, determined according to the ordinary or normal rules, is lower than the presumptive income. In addition, please bear in mind that related party liability is not allowed, except when a DTT applies.</td>
<td></td>
</tr>
</tbody>
</table>
### Colombia

#### Tax

**Subsidiary in Colombia**

- **Income tax on dividends or profits**
  
  Dividends received by foreign non-domiciled entities (which would be the case of the foreign shareholders of the local company) are not subject to income tax withholding, provided that such dividends correspond to profits subject to income tax at a corporate level. If such dividends correspond to profits that would have been subject to taxation if distributed to a Colombian resident (profits not taxed at the corporate level), they shall be subject to a 33% income tax withholding on the amount paid. In addition, please bear in mind that Colombia has DTTs with Switzerland, Canada, Spain, and Chile that are currently in application. Under these treaties, the dividends or profits shall not be levied in Colombia or will be levied with a lower WHT rate. The taxes applicable to dividends received by foreign non-domiciled entities must be withheld on the basis of the total amounts distributed or accrued. Please be advised that foreign non-domiciled entities are not required to file income tax returns in Colombia if their entire income was subject to the withholdings provided in articles 407 to 411 of the Colombia Tax Code (which refer to dividends, among other concepts). Therefore, if the entire income obtained by the foreign shareholders of the local company corresponds to dividends remitted by the company, and the applicable withholdings are duly performed, they would not be required to file income tax returns for the relevant periods.

#### Branch of a Foreign entity

- **Branch income is taxed at the same rate as corporate income, which is 25%**. As of 1 January 2013, branch profits are re-categorised as dividends; consequently, untaxed profits at the branch level are subject to 25% dividend tax. If profits are taxed at the branch level, no further taxation is required.

### Other Taxation Details

- **WHT**
  
  As a means to collect income taxes in advance, the Colombian law establishes a system of tax withholdings that requires every person making payments to a taxpayer to withhold a certain percentage depending on the concept being paid. For those who must file an income tax return, all amounts withheld are a prepayment of the final tax liability and, as such, are credited on their return. The withholding agent must file every month a WHT return. Please bear in mind that technical services, technical assistance services, and consultant services rendered by a foreign non-domiciled entity are subject to 10% income tax withholding, regardless of the place in which the service is rendered, in Colombia or abroad.

- **Applies exactly the same WHT described for a subsidiary as for the branch of a foreign entity.**

All the taxes discussed in this summary would apply equally to a branch operation or a subsidiary operation. However, from a commercial perspective, and specifically from the perspective of corporate liability, operating through a branch office means that the head office is exposed to direct liability for all the obligations of the branch, tax obligations included. Operating through a subsidiary means that only the subsidiary is liable for its obligations as a general rule, that is to say that the shareholders are not liable for company obligations. Of corporations, the advisable choice would be a SAS, which is very flexible in nature, easy to incorporate, and can be held by one single shareholder (regular corporations require a minimum of five shareholders).
**Mergers/De-mergers**
As of 1 January 2013, the tax free status for mergers and de-mergers is to be preserved, subject to limitations as follows:

- The surviving or the beneficiary entity must be a resident.
- De-mergers must be over units of business/going concern (substance requirement).
- If merger/de-merger participants are unrelated, shareholders owning at least 75% (85% where participants are related) must receive, as a result, shares proportional in value to what they had prior to the merger or de-merger.
- Shareholders must receive at least 90% of value in shares (99% if participants are related).
- Shareholders selling shares received within two years of the merger/de-merger must increase any income tax due on the sale by 30%.
- In any mergers/de-mergers among unrelated entities, if surviving or beneficiary participants sell assets within two years following the process, any gain will not be permitted to be offset with tax loss carryforward (only applicable where participants are unrelated).

Mergers/de-mergers failing to meet these standards will be treated as taxable dispositions. Where participants are not residents, the tax-free status is available if assets held in Colombia represent 20% or less of the aggregate of assets of the group.

**Significant developments**

The Democratic Republic of the Congo (DRC) Tax Law has recently been subject to various significant changes in different areas of taxation. The major changes likely to affect the activity of economic operators in the Democratic Republic of the Congo are included in the relevant sections of this summary.

**Taxes on corporate income**

Corporate income tax (CIT), known as *impôt sur les bénéfices et profits* (IBP) in the Democratic Republic of the Congo, is paid on profits realised by a company or an individual that carries out any operational activity in the country.

The Democratic Republic of the Congo levies taxes on resident companies and individuals on a territorial basis (or source basis) of taxation. Foreign-sourced profits (e.g. dividends received from a foreign subsidiary) are thus exempt from CIT.

Non-resident companies or individuals that carry out an activity in the Democratic Republic of the Congo are taxable on profits they realise through permanent establishments (PEs) or fixed establishments that are located in the Democratic Republic of the Congo.

The CIT rate has been lowered from 40% to 35% (30% for mining companies). This rate is applicable as of 1 January 2013 (and thus is applicable in respect of income relating to financial or accounting years ending on 31 December 2012).

**Minimum income tax**

There is a minimum tax of 0.1% of the yearly turnover. Note that the minimum tax cannot be less than 750,000 Congo Democratic francs (CDF) for medium companies and CDF 2.5 million for large companies. Also note that turnover includes all profits and interest received, as well as exception profits, in essence any credits on the income statement that have the nature of income or gain.

**Tax on rental income**

Rental income related to buildings, houses, offices, premises, warehouses, etc. is taxed in the Democratic Republic of the Congo at the rate of 22% and is administered at the level of every provincial tax authority.

In order to secure the payment of this tax, the tax code has put into practice a withholding tax (WHT) system. The tenant is liable to withhold 20% of the rentals paid and to remit this tax to the authority. The tax authority may challenge rentals that are not at arm’s length by referring to similar houses rented.
Local income taxes
There are no local or provincial government direct taxes on income (except for the tax on rental income that is administered at the level of provinces).

Corporate residence
Companies incorporated in the Democratic Republic of the Congo are considered resident companies, regardless of where they are managed and controlled.

Permanent establishment (PE)
A non-resident company is deemed to have a PE in the Democratic Republic of the Congo in either of the following cases:

- It has a material place of business (e.g. head office, branch) or any other fixed or permanent installations producing revenues in the Democratic Republic of the Congo.
- Without having a material place of business, it carries out a professional activity under its own name during a period of at least six months.

Other taxes

Value-added tax (VAT)

VAT rates
The VAT base includes whatever sums, amounts, goods, or services that are received as compensation for an operation; this involves subsidies as well as any other costs, taxes, rights, or any related levies, whatever their nature, excluding the VAT itself. For imports, VAT is normally charged on the customs value of the goods concerned, plus the customs duty and import-related expenses. There are two rates:

- A standard rate of 16%.
- A rate of 0% on exports and assimilated transactions.

VAT exemptions
The main exempted activities include some banking and financial services, education, medical services, charitable and social activities, and transactions that are subject to a specific taxation.

Application to non-residents
A non-resident having no PE in the Democratic Republic of the Congo but who raises an invoice on a DRC resident is required to appoint a VAT representative who is based in the Democratic Republic of the Congo and who will be accountable for the payments and collections that rest with the supplier non-resident. Failing to appoint a representative will result in the authorities holding the DRC resident customer liable for the payment of VAT that is due by application of a reverse-charge mechanism.

Mechanisms of VAT
An entrepreneur is entitled to offset VAT paid on purchase of goods and services used for business purposes against VAT charged on sales of goods and/or services. Businesses exempted from VAT on part of their sales are, in principle, entitled to deduct VAT paid on a pro rata basis (i.e. the ratio between the turnover related to VATable activities and the global turnover).
No VAT credit is allowed for expenditures not necessary for business purposes, nor on some specific expenditure (e.g. except in some specific circumstances, fuel, accommodation or entertainment for directors and employees, gifts, company cars).

VAT returns must be filed by the 15th day of each month in respect of transactions made the previous month. The net amount of VAT payable must be remitted to the tax authorities together with the return. If VAT paid exceeds VAT charged, the resulting VAT credit can be carried forward.

Refund of VAT can only be requested in some very specific circumstances.

**Customs duties**

**Customs duty on imports**

Customs duty on imports is calculated on the cost, insurance, and freight (CIF) value of the goods. The customs tariff on imports is the following:

<table>
<thead>
<tr>
<th>Example of goods</th>
<th>Customs tariff rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemical products</td>
<td></td>
</tr>
<tr>
<td>Machine tools</td>
<td>5</td>

<td></td>
</tr>
<tr>
<td>Clothing</td>
<td></td>
</tr>
<tr>
<td>Furniture</td>
<td>20</td>
</tr>
<tr>
<td>Cigarettes</td>
<td></td>
</tr>
</tbody>
</table>

Imported goods are also subject to the following levies at the time of border crossing:

- VAT on imports.
- For certain goods, consumption and excise duties.
- Various para-fiscal levies.

Customs regulation also allows for certain suspensive rates, such as temporary admission.

**Customs duty on exports**

Customs duty on exports applies to certain categories of products produced locally, which are:

- Green coffee.
- Electric current.
- Mineral products and their concentrates.
- Mineral oils.
- Logs.
- Scrap metal.

The bond value on exports of the said goods is fixed either by ministerial decree upon suggestion of the customs administration, or in the absence of a decree, by reference to the value of the goods when they leave the Democratic Republic of the Congo.
The rates of customs duties on exports are the following:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Consumption and excise duties**

**Scope**

The following goods are affected by consumption and excise duties:

- Alcohol and alcoholic drinks.
- Carbonated drinks.
- Mineral oils (petrol, oil, jet A1, diesel, etc).
- Lubricating oil and lubricant.
- Liquid for hydraulic brakes and other liquids for hydraulic transmissions.
- Perfumes.
- Cosmetics and make-up products.
- Hair preparations.
- Soaps, organic surface-active agents, lubricating preparations, polish, and creams for footwear.
- Plastic articles.
- Rubber articles.
- Tobacco.
- Vehicles.
- Telecommunications.

**Applicability and tax base**

Consumption and excise duty is applicable to:

- the production in the Democratic Republic of the Congo of consumer goods subject to duty and
- the import of these products to the Democratic Republic of the Congo.

Consumption and excise duties accrue on imports, as do customs duties and VAT.

On imports, the tax base on consumption and excise duties is the raised CIF value of the customs duties, except for mineral oils, for which the tax base is the average fiscal threshold price.

**Rates**

The rates of consumption and excise duties vary from 5% to 60% according to the products concerned.

</tbody>
</table>

Para-fiscal taxes
Various para-fiscal taxes shall be received at the time of the import and/or export of goods in the Democratic Republic of the Congo.

The main applicable levies include the following:

- Administrative payment: 2% of the CIF value.
- Congolese Audit Office (OCC) payments: 2% of the CIF value, plus various other administrative charges (Laboratory and analysis charges: 30 United States dollars [USD] maximum per test).
- Office de Gestion du Fret Maritime (OGEFREM) payment: 0.58% of the CIF value.
- Funds for the Promotion of Industry (FPI) charge: 2% of the CIF value.
- Cost of inspection from the Bureau of Inspection, Valuation, Assessment, and Control (BIVAC): 1.5% of the free on board (FOB) value.

Property tax (IF)

Scope
IF is applicable to constructions and land located in the Democratic Republic of the Congo.

Construction means villas, apartments, and other buildings.

The person owing this tax is the owner (bearer of title deed, holding, long leasehold, mining) of the construction on 1 January of the tax year.
The following are exempt from IF:

- The state, regions, towns, and public businesses disposing of no other resources than those coming from budgetary grants.
- Recognised religious, scientific, or philanthropic institutions.
- Private non-profit making organisations involved in religious, scientific, or philanthropic works and having obtained civil personality.
- Foreign states as far as embassy offices, consulates, or lodgings of diplomats or consuls are concerned (upon condition of reciprocity).

Certain constructions and land are, notwithstanding, exempt from IF, notably depending on the status of their owner. In this way, the following are exempt from the property tax on goods:

- Constructions and land allocated by the owner exclusively for agriculture or farming, including constructions serving to prepare agricultural or farming products, on the condition that at least 80% of these derive from the farming of the property owner concerned.
- Constructions and land allocated by the owner for non-profit purposes:
  - for the execution of a public service, teaching, scientific research, the setting up of hospitals, hospices, clinics, free clinics, or other similar charitable institutions
  - for chambers of commerce having obtained civil personality, or
  - for social activity of mutual companies and professional unions (syndicates) having obtained civil personality, with the exception of locales providing accommodation, a public house, or any business.

Tax base
The tax rates vary according to the nature of the goods (villas, buildings of more than one floor, flats, and other buildings) and locality ranks.

For villas, rates are fixed per square metre of area (between USD 0.3 and 1.5), while for other taxable items the contribution is determined on an inclusive basis (by floor, by flat, by unused land - in Kinshasa, the rate for one floor is USD 75).

Transfer tax
The transfer of a building in the Democratic Republic of the Congo gives rise to the payment, by the purchaser, of a registration duty amounting to 3% of the building’s value for a normal sale.

Stamp taxes
There are no stamp taxes in the Democratic Republic of the Congo.

Branch income
Tax rates on branch profits are the same as on corporate profits. However, the costs incurred abroad by the head office of the branch are not deductible in the Democratic Republic of the Congo, and the branch is liable for taxation of deemed distributed profits on top of the CIT. On profits realised, a branch will pay both the 35% CIT and a 20% tax based on 50% of the net profits after deduction of CIT.
Congo, Democratic Republic of the

**Income determination**
Taxable income consists of profits from any industrial, commercial, agricultural, or real estate operations entered into by the taxpayer in the Democratic Republic of the Congo, as well as any increases of assets invested as a result of such activities and any increases derived from capital gains either realised or not, of any nature and origin.

**Inventory valuation**
The following three inventory valuation methods are permitted under DRC law:

- Average cost of goods in stock at time of issuance, multiplied by the number of object or quantity output (i.e. weighted average cost method).
- Last in first out (LIFO).
- First in first out (FIFO).

**Capital gains**
There is no specific tax regime applicable to capital gains in DRC Tax Law.

Capital gains are included in the corporate taxable basis of the local entity benefitting from the capital gain and, as such, subject to the 35% CIT.

**Dividend income**
Local-sourced dividends received by a local company are subject to a 20% income tax rate under standard law. The DRC Tax Law does not organise any kind of participation exemption regime or tax credit regime for dividends received.

**Interest income**
Local-sourced interest received by local companies is subject to the standard CIT regime.

**Foreign income**
If an income is considered as foreign-sourced, by application of the territoriality principle, it is not taxable in the Democratic Republic of the Congo.

**Deductions**
To arrive at taxable income, a taxpayer may deduct all costs actually incurred and which have served in the production of income of the company during the year.

**Depreciation**
Depreciation of fixed assets used in the company’s operations may be deducted. Depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Nature of the good</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>2 to 5 (depending on the materials used)</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>10</td>
</tr>
<tr>
<td>Vehicles</td>
<td>20 to 25 (depending on its use)</td>
</tr>
<tr>
<td>Fixtures, facilities</td>
<td>10</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Item’s nature</th>
<th>Useful lives adopted (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Building - general purpose or heavy equipment</td>
<td>20 to 25</td>
</tr>
</tbody>
</table>
Goodwill

There is no specific provision relating to depreciation of goodwill in DRC Tax Law. However, it is generally agreed that taxpayers can amortise goodwill in accordance with the linear system. The amortisation of goodwill rate is at the discretion of the taxpayer, but with the risk that the tax authorities can assess the rate otherwise.

Start-up expenses

Start-up expenses are deductible, provided they are staggered over three or four years.

Interest expenses

Interest costs on funds borrowed from third parties and invested in the company’s operations are, in principle, deductible. Further to the tax authorities, the deduction, in principle, requires an effective payment.

Please note that if the borrower is a private limited company and if the lender is one of its shareholders, the interest on loans paid are not deductible from the CIT basis.

Bad debt

As a general rule, any kind of provisions (e.g. for bad debts) may not be deducted to arrive at taxable income.

Charitable contributions

Charitable contributions are not deductible.

Fines and penalties

Legal or administrative fines of any nature are not deductible.

Taxes

Income taxes are not deductible.

Other significant items

The following are examples of other expenses that may be deducted to arrive at taxable income:

- Rents actually paid and rental expenses linked to buildings or parts of buildings used in the exercise of the activity and any overheads derived from their maintenance, lighting, etc.
- Overheads costs, from maintenance of furniture and equipment used in connection with the company’s activities.
- Wages, salaries, bonuses, and allowances of employees and workers used in the operation, as well as benefits in kind if these have been added to remunerations paid.
- Professional expenses directly related to the acquisition of income.
Congo, Democratic Republic of the

The following are examples of other expenses that may not be deducted to arrive at taxable income:

- Expenses of a personal nature, such as accommodation, school fees, leave indemnities, and any other expenses not necessarily incurred in the business.
- Expenses linked to rental properties as a landlord as well as related depreciation expenses.

**Net operating losses**
Tax losses can be carried forward for the next five years following the tax loss year; however, the losses must be deducted from the first year of tax profits of the company.

There is no carryback loss regime in the Democratic Republic of the Congo.

**Payments to foreign affiliates**
As a general rule, payments to foreign affiliates should be at arm’s length.

In respect of payments made by a local company to a foreign company for services (e.g. management services, technical assistance services), such expenses are deductible, provided that:

- the services rendered can be clearly identified
- the services cannot be rendered by a local company, and
- the amount paid for the service is not overstated and is commensurate to the nature of the service itself.

**Group taxation**
There is no group taxation regime per the DRC tax legislation.

**Transfer pricing**
Transfer pricing rules are limited to the following provisions:

- Interests on loans are not considered as deductible expenses for the borrower, provided that it is a private limited company and that the lender is a shareholder.
- Where a local company is directly or indirectly controlled by a foreign company, any abnormal advantage given to the latter or related person is considered as an indirect distribution of profits and is then added back to the profits of the local company.
- In respect of payments made by a local company to a foreign company, for services (management services, technical assistance services), the Tax Code provides that such expenses may be deductible if (i) the services rendered can be clearly identified, (ii) the services cannot be rendered by a local company, and (iii) the amount paid for the service is not overstated and is commensurate to the nature of the service itself.

**Thin capitalisation**
There are no thin capitalisation rules in the DRC tax legislation. However, one may need to consider other types of regulations in that respect.
**Tax credits and incentives**

**Investment Code**

The Investments Code allows for a certain number of tax, customs, and general order measures designed to favour direct investments (notably a CIT holiday during a defined investment period that would differ depending on the location of the investments). The preferential tax treatment measures of the Investments Code apply to direct investments and/or to entities that carry them out.

The regime of the Investments Code does not apply to numerous sectors, notably:

- Mining and hydrocarbon.
- Banking and insurance.
- Trade.

In order to take advantage of the provisions of the Investments Code, the following conditions must be fulfilled by the investor:

- The investor must be a Congolese legal entity.
- The investment must be at least USD 200,000.
- The investing company must comply with the rules and regulations relating to environment.
- The investing company must undertake to train local personnel in technical and executive duties.
- The investing company must undertake to create an added value of 35% of its initial investment (within a stipulated time period to be agreed).

The application file is examined by the National Agency for the Promotion of Investments in the Democratic Republic of the Congo (ANAPI) and then sent to the Minister of Finance, who decides on the grant of the advantages foreseen in the Investments Code to the applicant, by the way of a Ministerial Order.

**Mining**

The Mining Code, completed by the Mining Regulations, sets out a preferential customs and fiscal regime that deviates on some important points from the standard regime.

The tax rules set-up by the Mining Code are supposed to be exhaustive and exclusive (it provides for all the taxes and customs duties owed to the Treasury by eligible entities, to the exclusion of any other form of taxation) and stable. This regime applies to all holders of a mining title or career, or for which a mining title or career is established, as well as to (i) affiliated companies carrying out mining activities and (ii) sub-contractors carrying out mining activities resulting exclusively from contracts concluded with the bearer of the mining title.

Among other tax preferential features of the Mining Code, the following apply:

- A reduced CIT rate of 30%.
- Absence, under conditions, of WHT on interest paid in relation to loans denominated in foreign currency and concluded abroad.
- A reduced 10% WHT rate for dividends.
- A reduced 10% exceptional tax for expatriates' remuneration.
- A possibility to deduct some specific provisions.
- A possibility for specific elements to carry forward related 'losses' without timing limitations.
A revision of the Mining Code is currently under discussion.

**Hydrocarbons**
The tax regime of oil companies is mainly provided in the production sharing contracts as well as in the Ordinance-Law 081-013 of 2 April 1981 bearing general regulations regarding Mining and Hydrocarbon (a revision of this Ordinance-Law is currently under discussion).

**Foreign tax credit**
No specific provision relating to foreign tax credits are provided for in DRC law.

---

**Withholding taxes**
The following DRC-sourced payments are subject to a WHT in the Democratic Republic of the Congo:

- Dividends.
- Royalties.
- Interest. Note that if the interest is paid to a local company, the WHT does not apply since the interest is included in the taxable income of the company charging such interest.
- Directorship fees.
- Service fees paid to foreign individuals or entities not established in the Democratic Republic of the Congo.

The Democratic Republic of the Congo has entered into double tax treaties (DTTs) with Belgium and South Africa. However, there are still discussions from the DRC tax authorities about their effective entry into force.

**WHT rate and payments**
The standard rate of WHT on dividends, royalties, interest, and directorship fees is 20%, which is based on the gross amount of sums paid.

If the payee does not withhold the tax from the amount invoiced and pays the tax of 20% directly, then the tax authorities consider that the basis of the 20% tax is composed of the amount invoiced plus the amount of the tax.

Consequently, in the case that the DRC company takes in charge the corresponding WHT, the WHT rate will be 25% (20/80) and the amount of tax will not be tax-deductible.

For royalties, the WHT is charged on the net amount of the royalties paid. The tax authorities consider that the net amount of royalties is calculated by deducting 30% from the royalties invoiced (i.e. the taxable basis will be 70% of the royalties invoiced).

The rate of WHT on amounts paid as compensation for services provided by foreign individuals/entities is 14%, which is based on the gross amount of sums paid.

The treaties conclude by the Democratic Republic of Congo, respectively with Belgium and South Africa, provide for reduced rates for dividends, interest, and royalties. It is also generally agreed that, by application of treaty, services furnished by providers being tax resident of those countries and being not established in the Democratic Republic of Congo should not be subject to the 14% services fees WHT (however,
one may note that the DRC tax authorities are still discussing the entry into force of these treaties).

The table below provides a summary of different WHT rates:

**Tax administration**

**Taxable period**
The taxable period is 1 January to 31 December.

**Tax returns**
The yearly CIT return is due by 31 March of the following year.

**Payment of tax**
Final payment of CIT is required when submitting the yearly tax return, which is due by 31 March of the following year.

CIT is payable in local currency through a DRC bank account by a wire transfer to the bank account of the Public Treasury. Consequently, in order to operate in the Democratic Republic of the Congo, the opening of a bank account in a DRC bank is mandatory. Moreover, the tax authorities require the bank account number of the applicant in order to grant a taxpayer number.

The collection of CIT is performed on an instalment basis. Collection by way of prepayment has been abrogated.

**Instalments of corporate tax**
Instalments, in respect of CIT, apply to taxpayers who come under the supervision of two specific kinds of tax departments: the Directorate General (DGE), the department of the tax authorities in charge of the most important taxpayers, and the Centre des Impôts (CDI), tax centres.

These taxpayers have to pay two instalments each representing 40% of the CIT paid during the previous fiscal year (including the amounts assessed by the tax authorities). This, therefore, totals 80% of the CIT actually paid in the previous year. The first instalment must be paid before 1 August, and the second instalment before 1 December. Both payments are offset against the final CIT due for the fiscal year. The balance is paid when the tax return is submitted.

**Tax audit process**
In practice, there is a tax audit every year.
Congo, Democratic Republic of the

**Statute of limitations**
Since 27 February 2013, a company may get audited up to four years after submission of a tax return (previously five years).

**Topics of focus for tax authorities**
The tax authorities shall discuss any relevant topic in relation to any tax.
Congo, Republic of

Significant developments

Further to the promulgation and publication of the 2013 Finance Act, the following new tax measures have been introduced:

- The corporate income tax (CIT) rate is now at 33% (previously at 34%).
- The basis of tax calculation for the housing allowance is now the capped salary for social security (i.e. 1.2 million Central African CFA francs [XAF]).
- For CIT purposes, the excess of actual rent over the lump sum housing allowance shall not be deductible.
- Tax regime for holding companies.
- Tax consolidation for group companies.
- Extension of taxpayers subject to 5% withholding tax (WHT) to include liberal professional companies.
- Capital gains realised by non-residents abroad from assignments of shares in Congolese companies are subject to a special tax on capital gains at the rate of 20%.
- A WHT (considered as advanced payment on CIT) on payments made by contractors to their sub-contractors awarded public and private building and public works contracts (3% for sub-contractors under the actual tax regime and 10% for sub-contractors under the simplified tax regime [Régime du forfait]).
- Specific taxation on business licences taxes for ship owners in the oil sub-contracting sector.
- Obligation to file returns imposed on taxpayers benefiting from conventions of establishments, public contracts, state contracts, and others, failure to which these companies could lose tax exemptions or have their accounts frozen.
- Reinforcement of sanctions resulting from failure to file annual remuneration returns (DAS) for foreign companies under the simplified tax scheme, penalty equal to the average of one and a half of monthly CIT of the previous fiscal year.
- Sanction on taxpayers who fail to respond to notifications of tax assessments by the tax administration by the deadline (tax arbitrary assessment and/or plus twice bailiff’s fee, loss of right to protest).
- The possibility to negotiate tax, fines, and its mode of payment.
- Joint liability for the payment of WHT by the legal and real taxpayers with regard to WHT, with fine of XAF 5 million for negligence or failure to withhold taxes.
- Fine of XAF 3 million (previously 25% of issued premium) for failure to register insurance contracts that are free of charge.
- Obligation to do inventories in the presence of the tax administration’s representatives for companies carrying a structural value-added tax (VAT) credit in October.
- Obligation to produce a VAT return every month there is a VAT balance.
- Possibility for companies exporting more than 80% of their sales to withhold deductible VAT mentioned on the invoices associated with goods and services.
- The deadline for the repatriation of funds back to Congo is now 30 days from date of payment of invoice (previously six months) for revenue obtained from exportation.
Congo, Republic of

- Electronic payments made by way of credit cards for a beneficiary outside the Economic and Monetary Community of Central Africa (CEMAC) zone are subject to tax on transfer of funds (1%).
- A special tax regime for microfinance establishments.
- A special tax on alcoholic drinks and tobacco.
- The obligation to use banks or financial institutions for business transactions.
- Companies have the obligation to open commercial bank accounts within 15 days from their incorporation and declare it to the tax administration not later than 20 January, failure to which the company cannot deduct expenses paid through such account or a fine of XAF 3 million for companies exempted from CIT.
- Taxes paid by way of cash payment to the Inland Revenue of amount of or exceeding XAF 500,000 shall not be deductible from the taxable profit.
- The registration of real estate property shall now be done through a single counter.
- A reduced customs duty at the rate of 2% on the importation of agricultural equipment and fertilisers.
- A national commission to renegotiate conventions of establishment with incentive beyond the investment charter, customs code, general tax code, but for conventions that have the same value as treaties.
- Obligation to use local insurance companies for importing equipments.
- A single counter for formalities related to custom clearance.
- The obligation for foreign companies operating under the temporary authorisation to register at the Trade Register after a continuous or discontinuous period of 12 months.
- An increase in the administrative costs for the application of temporary authorisation to XAF 10 million (previously XAF 3,010,000), and XAF 25 million (previously 2,010,000) for its renewal.
- Cancellation of the trade card.

---

**Taxes on corporate income**

Congolese registered companies are taxed on the territoriality principle. As a result, Congolese companies engaged in business outside of the Republic of Congo are not taxed in the Republic of Congo on the related profits.

In the absence of a tax treaty stating otherwise, a non-resident company is liable for corporate income tax (CIT) on income realised in the Republic of Congo or derived from or resulting from work/services of any nature supplied or used in the Republic of Congo.

The standard CIT rate in the Republic of Congo is 33%, with certain exceptions.

A 20% WHT is imposed on income sourced in the Republic of Congo that is derived by foreign companies not necessarily engaged in activities in the Republic of Congo.

**Minimum tax**

The minimum tax payable is 1% of the annual turnover and cannot be less than 1,524.49 euros (EUR) (EUR 762.25 if annual turnover is less than EUR 15,244.90).

A 2% minimum tax is payable by companies showing losses during two consecutive fiscal years. The 2% rate is applied to the sum of gross turnovers and products and benefits realised by the company in the most recent year in which it earned a profit. The 2% tax is not deductible for CIT purposes. However, in a company’s first profit-making year after incurring the losses, half of the 2% tax is deductible.
**Industry specific rates**

A CIT rate of 25% applies for agricultural companies, microfinance companies, and private schools organised as a company.

A CIT rate of 30% applies for mining companies and real estate companies.

A CIT rate of 35% is applied on a deemed profit equal to 22% of the total gross remuneration (i.e. an effective tax rate of 7.70% of the taxable turnover made in the Republic of Congo) derived from services rendered by:

- foreign companies that qualify for this simplified tax regime and
- local companies and branches that realise more than 70% of their annual turnover with oil companies and oil services companies (in this case, the deemed profit tax is regarded as an advance payment of CIT levied at the rate of 35% on net profits).

Note that these companies revert to the general taxation regime the year after the turnover realised with oil and gas sector companies becomes less than 70% of their annual turnover.

**Headquarters operations of foreign companies**

The headquarters operations of foreign enterprises taxation regime is subject to prior approval by the tax authorities.

If enacted, headquarters operations of foreign enterprises and international groups will be granted a favourable tax status in the Republic of Congo. For those that qualify, CIT is charged on a deemed profit equivalent to a prescribed percentage of headquarters expenses. The percentage of which is currently unknown.

To qualify, the headquarters must be registered under the form of a public limited company or branch and must act solely for the benefit of the group in the area of management, control, or coordination.

**Global flat taxation**

The global flat tax is at 10%. It is calculated on the annual turnover of small and medium-size enterprises taxable under the flat rate regime, whose turnover does not exceed EUR 60,980.

**Corporate residence**

A company is considered resident in the Republic of Congo if it has its registered office or principal office for all its activities in the Republic of Congo.

**Permanent establishment (PE)**

There is no general definition for a PE. However, a PE has been defined by the double tax treaties (DTTs) signed between Congo and France, the Common Organisation for Africa and Madagascar (OCAM), and the Customs and Economic Union of Central Africa (UDEAC) to include a place of management, a branch, an office, a factory, a workshop, and a mine, oil or gas well, quarry, or other place of extraction of natural resources.
Congo, Republic of

**Other taxes**

**Value-added tax (VAT)**
The Congolese VAT rate is 18%. In addition to VAT, there is a sales tax (surtax) calculated at the rate of 5%, applied to the amount of VAT, which must be invoiced and paid at the same time as the VAT. Therefore, the VAT rate is globally 18.9%. The surtax is not deductible (final cost).

Under the provisions of the VAT law, all economic activities conducted in the Republic of Congo are subject to VAT, regardless of their purpose, profitability, or the legal status of the business performing them, and irrespective of whether these activities are habitual, occasional, or originate in the Republic of Congo or from a foreign country. Therefore, any person, natural or legal, engaged in an industrial, commercial, or professional activity is subject to VAT unless specifically exempt by law.

Section 8 of the VAT law states a service is considered as provided in the Republic of Congo when the service is used or exploited in the Republic of Congo.

In principle, an entrepreneur is entitled to credit the VAT paid on purchases of goods, equipment, and services for use in business (input VAT) against the total of the tax charges to one’s customers for deliveries made and services rendered (output VAT).

Taxpayers not exclusively carrying out transactions giving rise to a VAT deduction shall deduct VAT proportionally on the portion of the income pertaining to taxable transactions and not a flat rate, as was previously the case.

VAT payers carrying structural VAT credit have the obligation to do inventories in the presence of tax administration representatives for companies in October, failure to which the VAT credit shall be cancelled.

VAT payers now have the obligation to provide an excerpt of their VAT trial balance of each account on VAT in accordance with the accounting system used by the company, failure to which all VAT deductions shall be added back.

Exporters subject to VAT who realise more than 80% of their sale transactions abroad are obligated to withhold VAT paid on the purchases of goods and services (the list of exporters entitled to withhold VAT will be published by the tax authorities).

VAT resulting from tax assessment is not deductible.

VAT paid in cash in connection with invoices exceeding XAF 500,000 is not deductible.

A VAT return must be filed on a monthly basis before the 15th day of every month.

**Customs duties**
When applicable, import duties are payable at rates ranging from 5% to 30% on the customs value of imported goods. Customs value is calculated on the cost, insurance, and freight (CIF) level.

**Customs duties rates**

<table>
<thead>
<tr>
<th>Group</th>
<th>Rates (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic necessities</td>
<td>5</td>
</tr>
</tbody>
</table>
Group | Rates (%)
--- | ---
Raw materials and capital goods | 10
Intermediate and miscellaneous goods | 20
Consumer goods | 30

**Additional entry taxes**

Additional entry taxes apply on the importation of goods, such as:

- CEMAC integration tax: 1% on CIF value.
- Statistic tax: 0.20% on CIF value.
- Organisation for the Harmonisation of Business Law in Africa (OHADA) contribution: 0.05% on CIF value.
- Economic Community of Central African States (CEEAC) contribution: 0.04% on CIF value.

**2% customs duties reduced rate**

The fiscal year 2013 Finance Act introduces, in addition to a VAT exemption on imports, as an exceptional measure, a 2% custom duty reduced rate on imports of machineries and equipments used for agriculture, flower, forest, and fish industries as well as fertilisers and other goods necessary for agriculture.

**Computer royalty**

The 2003 Finances Act instituted a 2% computer royalty, to cover expenses incurred by the Customs Administration on computer data processing, applicable without exception or exemption to all importation and exportation of goods. The royalty applies on the customs taxable value of any imported or exported goods in the Republic of Congo.

**Excise taxes**

Excise duties on all locally made products are at the rate of 10% while imported goods are subject to excise duty at the rate of 25%.

**Land tax on built properties**

Land tax is payable annually on built properties and is due from the owner. However, properties built for the purpose of accommodation are exempt for ten years, and properties built for business purposes are exempt for five years. The effective rate is determined every year by the local council.

The land tax is levied on the rental value after a deduction of 75% (decline, maintenance, and repair expenses) for properties built for business purposes. The land tax is levied on the cadastral value after a deduction of 75% (decline, maintenance, and repair expenses) for properties built for accommodation purposes.

**Land tax on non-built properties**

Land tax is payable annually on non-built properties and is due from the owner. However, properties intended for plantations and breeding are temporarily exempt for a three to ten year range. The effective rate is determined every year by the local council.

The land tax is levied on 50% of the cadastral value, determined every year by the Ministry of Finances. The land tax is arbitrarily assessed by hectares in rural areas according to the nature of the plantations.
Rent tax
Rent tax is payable annually on the rental of built property. It also applies on non-built property for business purposes. The rent tax is imposed on the occupant of the premises (whether the occupant is the owner, a tenant, or a subtenant).

The rent tax, which is equal to one-twelfth of the rents due within a year, is due annually on or before 28 February. For new lease agreements, the rent tax is due within three months of the effective date of the lease agreement and is calculated as a proportion of the rents due until the end of the year.

The rent tax is paid by the tenant on behalf of the owner, or by the subtenant on behalf of the tenant. The tenant/subtenant has the legal obligation to pay this tax on behalf of the lessor. Tenant and subtenants make a once-a-year deduction between 1 January and 30 April of the same year from all the rents due to the owner.

A 50% fine, assessed on the amount of the tax, is due for any late payment of the rent tax.

Registration fees and stamp duties
Lease agreement registration fees amount to 3% of the value of the annual rent paid during the tax year, including premises charges if any. ‘Additional centimes’ also apply at a 5% rate of the registration fees. Stamp duties and registration fees should be paid for the total duration of the lease agreement. In the case where the lease agreement is renewed, stamp duties and registration fees should be paid for the renewable period.

Stamp duty ranges from XAF 200 to XAF 20,000 on certain documents.

Examples of documents that are subject to stamp duty include:

- Letters of agreement and other letters, which are prepared for use as evidence of act, fact, or condition of civil nature.
- Notarial deeds and their copies.
- Visas and flight tickets.

The following fees for the registration of contracts are due within three months from date of signature:

- Private commercial contracts (as opposed to public commercial contracts) at the rate of 1% on the estimated amount of the transaction.
- Purchase orders for public contracts at the rate of 2% for contracts with a value exceeding EUR 15,240.
- Subcontracts in building construction and public work sector at a fixed fee of EUR 155.44.
- Insurance contracts are registered free of charge and failure to register such contracts will be subject to penalty at the fixed fee of XAF 3 million.
- A fixed fee of XAF 1 million for the registration of every oil services contract with foreign companies and their sub-contractors before the execution of the contract.
- All insurance policies carried out by oil, mining, and telephone companies are subject to registration free of charge; failure to register will result in penalties that total XAF 3 million.
- Registration fee on lease of movables and immovables used for habitation or commercial purposes at the rate of 3%.
- Registration fee on the transfer of rights in a lease at the rate of 10%.
Insurance contracts shall be registered and tax on insurance paid on the 15th day of the month following the insurance subscription.

The 2013 Finance Act has introduced an obligation on all importers to insure imported equipment with local insurance companies.

Transfer of company shares are subject to a 5% registration fee.

**Oil and gas**
Specific rules and caps apply for the upstream (production) oil and gas industry.

**Tax on pollution**
The tax on pollution is payable by petroleum and mining extracting companies in the production phase, at the rate of 0.2% on the annual turnover.

This tax constitutes a non-deductible expense for the extracting mining/hydrocarbon company in the production phase.

This tax is due in the course of the year and payable quarterly by instalment, proportionally to the production realised during the just-ended quarter and not later than the 20th day of the month following the end of the quarter.

**Business tax and accessory taxes**
The business tax (‘patente’, in French) is a tax collected by local communities. This tax, paid during the first three months of every year, includes both a fixed and variable fee depending on the specifications of the profession. The principal amount of the tax is increased with ‘additional centimes’, ‘communal centimes’, and ‘contributions to the National Investment Fund’ (accessory taxes).

Business tax is paid by traders and professionals. It is imposed on most commercial, industrial, and professional enterprises (including branches of foreign enterprises), although some traders are exempt. The business tax is charged on the actual or deemed annual rental value of the tangible assets of the enterprise, on the power of the machines, and on the average number of employees.

Any new taxpayer undertaking an activity requiring a trading licence must declare it in writing to the tax administration within 15 days following the start of the business. For the first tax year, the business tax is paid based on the date on which the business started (i.e. the tax is due from the first day of the quarter during which the business started).

Oil sub-contracting companies are now subject to business tax and accessory taxes under a specific nomenclature. The business tax and accessory taxes are made up of a fixed tax of EUR 422.89 and variable taxes of EUR 1.83 and EUR 3.05 following the power of the equipment and the number of employees.

The fiscal year 2013 Finance Act adds a XAF 1,000 per ton of gross tonnage (previously calculated on the net tonnage) for business tax calculation purpose for ship owners working for oil companies.

**Tax on company-owned cars**
The tax on company-owned cars applies to the previous fiscal year company-owned cars and is due on 1 March at the latest.
With the exception of estate cars, private cars of companies falling into the category of own use cars for the issuance of vehicle registration documents are subject to tax.

The tax rates vary from EUR 304.89 for engine ratings not over nine horsepower, to EUR 762.24 for the rest.

Cars registered more than ten years ago are exempt from tax.

**Single tax on remuneration**
A single tax, at the rate of 7.5% on the gross salary of employees, shall be borne by the employer. This tax is payable on the 15th day of the following month after the remunerations were due.

**Social contributions**
The employer shall be liable for the following social contributions:

- Family allowance fixed at the rate of 10.035% of gross salary, benefits in kind inclusive, capped at XAF 7.2 million annually.
- Work accident contribution fixed at the rate of 2.25% on gross salary, benefits in kind inclusive, capped at XAF 7.2 million annually.
- Old age, invalidity, and death insurance fixed at the rate of 8% of gross salary, benefits in kind inclusive, capped at XAF 14.4 million annually.

**Branch income**
70% of the net profits made by branch offices and foreign companies carrying out business are automatically considered as distributed profits and subject to tax on dividends at the rate of 20%.

**Income determination**
Taxable income is based on financial statements prepared according to standard statements of the OHADA treaty.

Business expenses are generally deductible, unless specifically excluded by law.

**Inventory valuation**
Stocks are valued at cost price. However, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory.

**Capital gains**
Capital gains are treated as ordinary business income and are taxed at the standard CIT rate of 33%. However, a capital gain realised on the disposal of a fixed asset in the course of trading is excluded from income for a period of three years if the taxpayer reinvests the gain in new fixed assets for the business.

If the business is totally or partially transferred or discontinued, only half of the net capital gain is taxed if the event occurs less than five years after the start-up or purchase of the business and only one-third of the gain is taxed if the event occurs five years or more after the business is started or purchased. However, the total gain is taxed if the business is not carried-on in any form.
Capital gains realised by non-residents on transfers of shares of Congolese companies are subject to taxation at the rate at 20%. This tax shall be paid upon registration of the deed of transfer of the considered shares. Under such sale transactions, the seller, the buyer, and the company whose shares are transferred are jointly and severally liable for the levied tax.

**Dividend income**
Dividends are treated as ordinary business income and are taxed at the standard CIT rate of 33% for resident corporations.

After three years, profits credited to the non-compulsory reserve are considered to be dividends and are accordingly subject to the 20% WHT on dividends.

Amounts claimed as a result of a tax adjustment and added back to revenue, if not invested in the company, are subject to tax on dividend.

**Inter-company dividends**
Dividends received from a Congolese company (DivCo) by a commercial company incorporated in the Republic of Congo (HoldCo) are exempt from CIT and subject to a final 20% WHT if the following conditions are met:

- HoldCo and DivCo are incorporated in the CEMAC.
- HoldCo holds 25% of the capital of DivCo.
- HoldCo holds the shares for at least two years from the date of purchase.

However, 10% of dividends that are deemed to represent the share of cost and expenses are included in the taxable profits of HoldCo and liable for the CIT.

If the above conditions are not met, dividends received from a Congolese company by another Congolese company are subject to a 20% WHT, which is an advance payment of the recipient’s CIT.

**Interest income**
Subject to any specific provisions, interest paid or deemed to be paid are subject to a WHT at the rate of 20% of the interest paid.

The interests paid are deductible for CIT purposes for the Congolese company to the limit of 20% of the taxable profit before deduction of the expenses in question.

**Foreign income**
Resident companies are taxed only on income derived from their activities carried out in Congo.
method is used, and the Congolese General Tax Code sets forth maximum rates of depreciation. Goods costing less than EUR 152.44 per item may be written-off at purchase as expenses.

Depreciation recorded when the company is in a loss position may be carried forward without limitation and deducted from the first available taxable profits, provided it was appropriately disclosed in the annual CIT return.

Recoverable and identifiable packaging is regarded as a fixed asset and is recorded in a fixed asset account at the time of purchase. This packaging is regarded as returnable packaging when the supplier intends to act as the sole owner of the packaging.

Unrecoverable packaging is recorded as an expense and is deductible for tax purposes.

Exceptional accelerated depreciation may be authorised in certain circumstances for heavy equipment with a value of more than EUR 60,979.60. This special accelerated depreciation does not apply to private vehicles owned by the enterprises.

The following list contains maximum rates of depreciation as set forth in the General Tax Code:

<table>

</tbody>
</table>

**Exceptional depreciation method**

The exceptional depreciation method is an accelerated depreciation method.

Companies may elect the accelerated depreciation method for heavy materials and equipments that:

- are purchased new for a value higher than EUR 60,979.60
- have a useful life of at least three years
- are used for manufacturing, processing, transport, and handling, and
- are bound to an intensive use.

The application for the accelerated depreciation must be submitted to the head office of taxes within three months of the purchase of the assets to be depreciated. The option is granted upon approval of the Ministry of Finances. If the administration fails to respond to the application for accelerated depreciation within three months, the application is tacitly granted.

Under the exceptional depreciation method, a 40% deduction may be taken in the year of acquisition of the previously mentioned assets, increased with the normal rate
calculated on the residual value after application of the accelerated depreciation. These assets are depreciated on a straight-line basis thereafter.

**Start-up expenses**
There is no specific provision in the Congolese General Tax Code on the deduction of start-up expenses. Start-up expenses that occurred in the first year of incorporation (N) are deductible in the second year of operation (N+1).

According to the OHADA Uniform Act relating to Accounting Systems and Accountancy, start-up expenses can be amortised either in one year (in such case, they are booked in the deductible expenses during the first fiscal year) or in two years (50% during the first fiscal year and 50% during the second fiscal year).

**Interest expenses**
Interests are deductible, subject to the following conditions:

- General limit: Regardless of the form under which a legal entity is registered, the deduction is allowed with an interest rate limited to the rate of the advances in current accounts on states funds of the Bank of the States of Central Africa (BEAC) raised by two points. Currently, the ceiling for the deduction of interests is 7.25%.
- For private limited companies and public limited companies, the deduction is allowed according to the status of control over the management of the enterprise, as follows:
  - For shareholders who have control over the company de facto or de jure, the deduction is allowed only to the extent that the sums paid do not exceed, for the shareholders as a whole, half of the paid-up capital and are within the limit sets forth in the ‘general limit’.
  - For other shareholders, the ‘general limit’ applies.

**Bad debt**
Expenses and debts not recovered within two years after their account recording shall be added back to the taxable basis of the first fiscal year subject to general accounting audit even if the fiscal year is statute barred.

**Charitable contributions**
The maximum amount of deductible donations is limited to 0.5 per thousand of the net turnover when these charitable contributions are made to beneficiaries situated in Congo and are justifiable.

**Fines and penalties**
Penalties relating to violation of regulations are not deductible.

**Taxes**
Taxes, other than income taxes, are usually deductible. Examples of deductible taxes include customs duties, excise duties, payroll taxes, business tax and accessory taxes, registration taxes, and unrecoverable VAT.

CIT itself is not deductible, nor is the special tax on company-owned cars.

Taxes withheld on remuneration, paid to third parties (third parties taxes), and remitted to the tax office by a Congolese enterprise are not deductible.
Congo, Republic of

**Net operating losses**
For tax purposes, losses may be carried forward to offset profits earned in the three succeeding fiscal years. Carry back losses are not permissible.

As mentioned above, depreciation recorded when the company is in a loss position may be carried forward without limitation.

**Payments to foreign affiliates**
Allowable deductions include sums paid abroad to foreign companies for:

- actual services, notably overhead for the operations made for the benefit of a company based in the Republic of Congo, including costs of studies; technical, financial, and accounting assistance; commissions and fees; and interests, and
- use of patents, licences, trademarks, drawings, manufacturing processes, patterns, and similar rights to the extent the payer proves they correspond to actual operations, and they are neither abnormal nor excessive.

Subject to the provisions of tax treaties (France, CEMAC, OCAM), the deduction is allowed within a limit of 20% of taxable profits before deduction of the expenses in question.

In the event of losses, the rate is applied on the results of the last profit period, which is not statutory limited. In the absence of profits during the period out of statutory limitation, the sums paid are not allowed as tax deductions.

When the sums are not allowed, as a whole or in part, in the deductible expenses, they are deemed to be paid benefits and are subject to tax on the dividends at the rate of 20%.

Royalties for the transfer or concession of patents, trademarks, drawings, and other similar titles are deductible to the extent the payer proves they are still valid. When these royalties benefit an enterprise contributing in the management or share capital of an enterprise in the Republic of Congo, they are deemed to be paid benefits and are subject to tax on the dividends at the rate of 20%.

Commission or brokerages, relating to goods purchased on behalf of enterprises based in Congo, are allowable tax deductions up to 5% of the purchase amount made by the central purchasing office, the head office, or the intermediaries. The reductions shall benefit enterprises based in the Republic of Congo. An original supplier’s invoice must be attached to the intermediary’s invoice.

The payer shall prove that:

- the purchases necessitated the interventions of a broker or intermediary
- the commissions provided better supply conditions compared with the actual situations on the market, and
- the commissions are not excessive compared with the nature of the services.

**Group taxation**
There is specific group taxation within the CEMAC area.
Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of the following conditions are met:

- The stocks or shares owned by the parent company represent at least 25% of the capital of the subsidiary company.
- The parent company and subsidiary companies have a registered office in the CEMAC state (Cameroon, Central Africa Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company, which undertakes to retain them for at least two consecutive years in registered form.

The fiscal year 2013 Finance Act introduces, upon option and under certain conditions, a new group taxation regime. Under the new regime, the taxable profits of the group’s companies can be consolidated at the level of the holding company, which will pay the tax due.

**Transfer pricing**
For companies under the control, de facto or de jure, of companies or groups situated outside the Republic of Congo, payments made by whatever means are considered as transfer of profits and subject to CIT and tax on income from securities if the transfer includes:

- Increase in the purchase price or decrease in the sale price.
- Payment of excessive royalty or without a consideration.
- Loans without interest or at an unjustifiable rate.
- Reduction of debts.
- Benefits that are out of proportion in relation to the service rendered.

Transfer pricing rules have been reinforced, and taxpayers can request their transfer method to be approved by the tax authorities before implementation.

**Thin capitalisation**
There are no specific thin capitalisation rules in the Republic of Congo.

**Holding companies**
The fiscal year 2013 Finance Act introduces a new taxation regime applicable to incorporated holding companies complying with certain conditions.

Within this regime, capital gains on shares are:

- subject to CIT at standard rate if the shares transferred have been held during less than two years
- subject to a reduced CIT rate (25% of the standard rate, i.e. 8.25%) if the shares transferred have been held during more than two years, and
- tax exempted if (i) the shares transferred have been held for more than two years and if (ii) the shares held include at least 60% of shares of CEMAC resident companies.
In addition, these companies benefit from other tax advantages, such as a WHT exemption on certain types of interest as well as a reduced WHT on dividend paid (i.e. 50% of applicable rate).

---

**Tax credits and incentives**

The current investment regime in the Republic of Congo was set out by Law No. 6-2003 of 18 January 2003, which established the investment charter. The charter’s application, Decree No. 2004-30 of 18 February 2004 established modes of business registration.

- **Scope:** The following may be registered under the investment charter:
  - Businesses wishing to pursue an activity in the Republic of Congo, except for activities such as brokerage, trade, import and production of arms, and import or processing of toxic waste and by-products.
  - Under certain conditions, commercial activities linked to collection, storage, distribution, and export of locally produced products, except alcoholic beverages and tobacco.
  - New activities (as opposed to pre-existing activities).
  - Forestry businesses benefiting from a forestry permit called the forestry development unit.
  - New companies coming from the redemption of a registered company.
- **Conditions of eligibility for the investment charter:** To be eligible, a company must satisfy the following conditions:
  - Be registered with the Trade and Personal Credit Registry in the Republic of Congo.
  - Create permanent employment, to be carried out over a minimum of 280 days per year.
  - Maintain company share capital equal to or greater than 20% of investments.
  - Primarily use local principal materials necessary for the production of the finished or semi-finished product, when available, with equal conditions concerning price, quality, and time of delivery to outside, in the case of industry.
  - Primarily use local business services, when available, with equal conditions concerning quality, price, and time of realisation regarding payments to external businesses, for the case of service businesses.
  - Be registered at the Congolese National Welfare Fund.
  - Open an account at a local bank or any other financial, savings, or credit establishment.
  - Primarily use a local workforce, when available, with the same expertise as the foreign workforce.
- **Registration procedure:** Entitlement to the benefits prescribed by the charter is subject to obtaining a registration agreement, provided by the National Investment Commission.
- **Fiscal and customs benefits set out by the Investment Charter:** These benefits vary according to privileged regimes, motivation measures, and in a general manner.

---

**Privileged regimes**

The charter sets out three privileged regimes:

- General regime (G).
- Special regime (S).
- Preferential development zone regime.
Congo, Republic of

General regime (G)
The general regime applies to businesses that fulfil the aforementioned general requirements, and carry out investments greater than or equal to EUR 152,450.

Special advantages are conferred according to the period of activity of the registered business.

During the set-up period and the first three exploitation tax years, the company receives several benefits, as follows:

• In customs matters, the company benefits from the provisions of the CEMAC customs code relative to asset improvement mechanisms for export activity and from the suspension of customs duty in the form of temporary admission or franchise for natural resource research activities.
• In fiscal matters, the company benefits from the 50% reduction of registration fees for business foundation, increases in capital, company mergers, and transfer of company stocks and shares.

For the three first exploitation tax years and until the first year of sale or first service, the following fiscal benefits are added with the aforementioned reduction of registration duties:

• Total exemption from the tax on company earnings.
  • Companies that are subject to CIT because of their size or activity will be exempt from CIT.
  • Businesses that are subject to personal income tax because of their size or activity will be exempt from personal income tax.
• The authorisation to proceed to accelerated depreciation.
• The authorisation to carry forward losses for the first three tax years.
• The application of zero-rate VAT on exported products.

Special regime (S)
The special regime applies to businesses that fulfil the aforementioned general requirements and carry out investments between EUR 45,734 and EUR 152,450.

In addition to the advantages of the aforementioned (G) regime, businesses registered under the (S) regime benefit during the set-up period and the first three exploitation tax years from the moderation of registration duties for the incorporation of the business, increases in capital, company mergers, and transfer of company stocks and shares.

This moderation of registration duties is granted exclusively by decree of the Minister in charge of the Economy and Finances upon a decision of the National Investment Commission.

Preferential development zone regime
All exporting businesses registered under the investment charter are eligible for the preferential development zone system, including free-trade zones.

The institution, organisation, and function of the preferential development zone are fixed by a specific text.
Incentives to set up in remote areas
All new businesses registered under (G) or (S) regimes that are located in a remote area benefit from a reduction of 50% on the tax on company earnings in the fourth and fifth year following the first three tax years for which the business benefited from total exemption from the tax on earnings or personal income tax.

The business is considered as belonging to a remote area from the moment its production units are set-up and 90% of the production unit workforce is working in the remote location.

The appraisal of a zone’s location results from the exclusive competency of the National Investment Commission.

Incentives for social and cultural investment
All new businesses registered under (G) or (S) regimes carrying out investments of a social and cultural character may benefit from a fiscal reduction by ministerial decree of the Minister in charge of Finance and the Economy, upon the decision of the National Investment Commission.

These benefits may not, however, be added to those mentioned above and allocated to remote areas, even if the business concerned is set-up in such a location.

General measures
For the duration of the privileged regime, and subject to current texts, the company shall enjoy fiscal stability in terms of local and state taxes.

Privileged regimes (G) and (S) are allocated only once and are not renewable. The business may receive fiscal and customs advantages pertaining to the set-up period.

Fiscal advantages concerning the exploitation period are applicable only after the set-up period.

The end of the set-up period is certified by decision of the Minister in charge of Finance and the Economy after the adoption of the verification report by the National Investment Commission.

Respect of the aforementioned general requirements set out by the charter is a prerequisite for benefiting from these motivation measures.

Export incentives
A measure is reserved for businesses that export at least 20% of their production.

The benefits are as follows:

• The provisions of the CEMAC customs code, relating to asset improvement mechanisms.
• Exemption from customs duties and taxes on manufactured products, except computing fees and statistic tax.
• Application of a zero-rate VAT on exported products.

Non-manufactured goods remain subject to the common law export system.
**Incentive to reinvest earnings**
A measure is reserved for businesses that carry out new investments of at least one-third of existing assets.

The benefit conferred consists of a 50% reduction of the tax on company earnings for the three years following the realisation of the investment.

Notwithstanding, this benefit is granted upon the following conditions:

- The business declares to the permanent secretary of the National Investment Commission its investments, planned investment, and the state of existing capital assets.
- The National Investment Commission, on the report of checking teams, verifies if the new investments correspond to one-third of the preceding capital assets.
- All investments are realised within one year.
- Investments generate new employment.
- Investments increase capacity of production by at least 10%.
- The business has sound ethical concerns.

---

**Withholding taxes**

**Services, dividends, and attendance fees**

**Services**
Services rendered by foreign suppliers are subject to a 20% WHT.

In addition, companies that have no tax residence in the Republic of Congo are subject to a 20% WHT if they earn revenues realised in the Republic of Congo or coming from the Republic of Congo, and which come from works or services of any nature performed or used in the Republic of Congo.

WHT does not apply to resident suppliers of a country that has signed an international tax treaty with the Republic of Congo, provided certain conditions are met.

**Payments made by building and public work companies to their sub-contractors**
The fiscal year 2013 Finance Act introduces a withholding on payments made by building and public work companies to their sub-contractors, including to engineering offices, at the following rates:

- 3% for sub-contractors taxable on their net profit.
- 10% for sub-contractors taxable on a deemed profit (*Régime du forfait*).

Non-observances, omissions, or underpayments are sanctioned by a XAF 5 million fine and by the non-deductibility of the amounts so paid. Late payments are sanctioned by a 2% penalty per month or portion of month, with a maximum of 100%.

For the considered sub-contractors, said withholding is considered as an instalment of tax.
Congo, Republic of

**Dividends**

Dividends distributed by a Congolese company are subject to a 20% WHT unless a different rate applies under an international tax treaty (e.g. France, CEMAC, OCAM). The same rate applies for dividends distributed to a resident shareholder.

Under the tax treaty between France and Congo, the applicable WHT rate is 15%. There is no specific rate defined in the CEMAC and OCAM tax treaties.

**Attendance fees**

Attendance fees are subject to a 22% WHT unless a different rate applies under an international tax treaty (e.g. France, CEMAC, OCAM).

**Payments to local independent contractors**

Payments to local independent contractors (self-employed contractors, i.e. those not registered with the Congolese Trade Registry) are subject to a WHT at the rate of 5% from such payments, to be remitted to the Public Treasury.

Late remittance of the WHT is subject to a late payment penalty of 50% within the first two months and 100% if the late payment exceeds two months.

The fiscal year 2013 Finance Act extends the application of the 5% WHT to companies regrouping professionals and increases penalties in case of non-payment (200% penalty, plus 5% interest per month for late payment).

**Tax treaties**

The Republic of Congo is a member of CEMAC, which unites the following six states: Cameroon, Central African Republic, Republic of Congo, Gabon, Equatorial Guinea, and Chad.

The Republic of Congo has signed the following tax treaties.

**The tax treaty of the Common Organisation for Africa and Madagascar (OCAM)**

The member states of this organisation adopted a tax cooperation agreement 29 January 1971, which was ratified by the Republic of Congo on 3 September 1971. The OCAM, which initially had 14 members, had 17 members when it was dissolved by the Conference of Heads of State in 1985. Those members were Cameroon, Central African Republic, Chad, Congo, Ivory Coast, Dahomey, Gabon, High Volta, Madagascar, Mauritius, Niger, Rwanda, Senegal, Togo, and the Democratic Republic of Congo. The Republic of Congo has not denounced the application of this tax treaty.
The tax treaty of the CEMAC Convention
The Republic of Congo signed the UDEAC Convention of 13 December 1966, which was designed to avoid or to limit double taxation among the member states: Cameroon, Central African Republic, Congo, Gabon, Equatorial Guinea and Chad. This tax treaty remains significant to companies interested in affiliate creation in Central Africa countries.

The tax treaty between the Republic of Congo and the French Republic
This tax treaty, which concluded on 27 November 1987, was designed to avoid double taxation and to prevent tax evasion related to income tax, inheritance tax, registration law, and stamp duty.

Tax administration

Taxable period
The taxable period is the calendar year.

Tax returns
The annual CIT return is a specific form (Document Statistique et Fiscal or DSF) that should be prepared in accordance with OHADA accounting principles. The form cannot be completed electronically.

The fiscal year 2013 Finance Act states that effective as of fiscal year 2013 to be declared in 2014, companies will have to use the new CEMAC CIT return form, which has been modified to be compliant with Congolese tax law (new form for the determination of the CIT basis and new tax balances for debts and liabilities).

The books must be maintained in French and in Central African CFA francs. This accounting system must follow the OHADA chart of accounts. All entries have to be booked under OHADA standards throughout the year.

The annual CIT return must be filed within four months following the end of the fiscal year of the company (i.e. before 30 April).

Payment of tax
Resident companies are required to pay quarterly instalments of tax (15 February, 15 May, 15 August, and 15 November), and these quarterly instalments are generally calculated with reference to the most recent CIT return. Special calculations of instalments apply to new taxpayers.

Based on the self-assessment system, when submitting annual tax returns due by 30 April every year, taxpayers must pay the amount of tax calculated in the annual tax return to the extent this amount exceeds tax instalments paid during the year.

Non-resident companies and individuals shall appoint tax representatives in the Republic of Congo. The Congolese resident shall be considered as tax representative if the non-resident person fails to appoint a tax representative.

Tax audit process
Tax audits are usually announced by a letter from the tax authorities to the entity concerned of their intention to audit, while stating the period to be audited and the taxes that will be covered by the audit.
Congo, Republic of

The tax authorities may organise meetings with the taxpayer to inform the taxpayer of the preliminary outcomes of the audit, and the taxpayer has the possibility to make counter remarks.

Thereafter, the tax authorities notify the taxpayer, in writing, of their proposed tax adjustments, and the taxpayer makes counter remarks in writing within 30 days from date of receipt of the tax adjustment notice.

Based on whether the tax authorities find the counter remarks from the taxpayer grounded or not, a letter confirming the tax adjustments or renouncing the proposed tax adjustments shall be sent to the taxpayer, who has the choice to either pay the taxes claimed, negotiate for a reduction of fines, or open up a tax litigation process.

The taxpayer may negotiate the taxes, fines, and the mode of payment of the tax claimed by the tax authorities thereby renouncing one’s right to open up tax litigation.

The taxpayer has the right to request from the Director General of Taxation and Real Estate a transactional mode of payment of fines or payment of tax by friendly settlement. If the taxpayer opts for the transaction, the taxpayer loses the right to object the outcome of the transaction and is obligated to immediately pay the taxes due (principal and penalties) according to the agreement.

To open up a tax litigation process, the taxpayer will pay a prior deposit of 10% of the sum contested as guarantee and 5 per thousand of the sum contested for the treatment of the tax claim file and will submit the tax claim file to the Tax Head Office if the amount of the claim exceed XAF 30 million and to the Director of Tax Department if the amount claimed is less than XAF 30 million.

The tax authorities will respond to the tax counter claim of the taxpayer, who, if not satisfied, could open a court claim.

**Statute of limitations**

Generally, the statute of limitations period for CIT is four years following the year in which the tax was due. However, this rule does not apply in the case of fraudulent acts reported by the tax administration.

**Topics of focus for tax authorities**

The tax authorities particularly focus on aspects such as:

- Compliance of deductible expenses.
- CIT compliance.

---

**Significant developments**

On 28 September 2012, the following two very important fiscal reforms entered into force in Costa Rica.

**Strengthening of the Tax Administration Law**

This reform grants the Tax Administration with heavier weapons in order to improve collection and compliance.

- The statute of limitations was expanded to four and ten years, depending on the level of compliance of the taxpayers.
- The buyer, by acquiring any good or right, becomes liable for the outstanding debts of the seller.
- The method of consultation to the Tax Administration was modified in order to eliminate the possibility of opposition of the Letter from the Administration.

The percentage of the sanctions applied to the amount of income tax not received has increased, as shown below, when committed with negligence:

<table>
<thead>
<tr>
<th>Sanction</th>
<th>Previous (%)</th>
<th>New (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Omit return filing</td>
<td>25</td>
<td>50</td>
</tr>
<tr>
<td>Inaccurate return filing</td>
<td>25</td>
<td>50</td>
</tr>
<tr>
<td>Inappropriate request of compensation or refund</td>
<td>25</td>
<td>50</td>
</tr>
<tr>
<td>Undue refunds</td>
<td>25</td>
<td>50</td>
</tr>
</tbody>
</table>

Additionally, this reform includes new classifications for infringements: serious and very serious. An error by simulation, misleading, distortion, or concealment is considered serious, and a sanction of 100% of the income tax not received will be applicable. For very serious infringements (by fraudulent means), the sanction will be 150%. Before this reform, the error by simulation received a sanction of 75% of the income tax not received.

Article 144 of the Fiscal Standards and Procedures Code experienced one of the greatest transformations under the Law. After the audit by the Tax Administration, an audience is requested; in this audience, the officials provide the record of the audit. After this audience, the taxpayer must pay the determined amount of the audit. This payment is the most important of the modifications. Previously, the taxpayer could pay until the matter was resolved by the Tax Administrative Court.
Costa Rica

**Compliance with the Standard for Fiscal Transparency Law**
This reform aims to meet the requirements of the Organisation for Economic and Co-operation and Development (OECD) tax transparency policies.

In connection with compliance with the Standard for Fiscal Transparency Law, individuals are now obligated to provide the Tax Administration with all the information foreseeable relevant for tax purposes. If taxpayers do not comply with the requirement, they will face sanctions of 2% of the previous fiscal year gross income, with a minimum of ten base salaries and a maximum of 100 base salaries. Additionally, if the information contains mistakes, a sanction of 1% of the base salary per each misregistration will be applied.

**Taxes on corporate income**

The Costa Rican tax system is based on the principle of territoriality, according to which any business that carries on industrial, agricultural, or commercial activity in Costa Rica is subject to income taxation on local income in the same way as a registered business, irrespective of the place of incorporation. Such corporations doing business in Costa Rica are subject to the permanent establishment (PE) rules.

Under the Costa Rican income tax law, income from transactions carried out abroad may be regarded as non-Costa Rican-source income and is not subject to income taxes.

In addition, it is important to bear in mind that Costa Rican income tax applies specifically to those incomes that directly originate in the lucrative activities carried out by the taxpayer within the country's territory.

Corporate income is taxed at a 30% rate. However, the law establishes special regulations for small companies whose gross income does not exceed 95,447,000 Costa Rican colones (CRC). For this category, the following rates apply:

- 10% for companies with gross income up to CRC 47,451,000.
- 20% for companies with gross income of more than CRC 47,451,000, but not more than CRC 95,447,000.
- 30% for companies with gross income over CRC 95,447,000.

Please note that these corporate income tax (CIT) brackets are adjusted yearly, effective 1 October to 30 September of the following year. The tax brackets listed are for the 2013 fiscal year.

**Local income taxes**

There are no provincial income taxes in Costa Rica.

**Corporate residence**

In most cases, the place where a company is incorporated is regarded by Costa Rican authorities as the corporate residence.

**Permanent establishment (PE)**

According to Costa Rica’s tax system, a PE of non-domiciled persons in the country is every office, factory, building, or any other real estate; plantation, mining, forest, agricultural, and farming development; warehouse or any other permanent business
centre, included the temporary use of warehouse facilities as well as the ones destined to the purchase and sell of merchandise and products inside the country; and any other company property of non-domiciled persons that develops commercial and lucrative activities in Costa Rica.

The Costa Rican Tax Administration has manifested that the essential characteristic of a PE is given by a territorial criteria, according to which are taxable the income and earnings generated in Costa Rica as well as the assets located in it, not taking into consideration the nationality or domicile of its owner.

The Tax Administration also applies the criteria of the OECD to determine when a person can be considered a PE of a company in a determined state. Accordingly, the Tax Administration takes into consideration the following conditions to determine the existence of a PE:

- The existence of a business centre (i.e. facilities such as an office or business centre or, in certain cases, machinery).
- Said business centre must be permanent (i.e. must be established in a determined place with a significant level of permanence).
- The company has to develop its essential activity through this permanent centre (i.e. the persons who depend in a way or another on the company [the staff] must develop the company’s business inside the country on which the permanent centre is located).

Note that the Costa Rican Tax Administration uses these OECD criteria to support and base its administrative resolutions; therefore, they hold a significant importance for the Costa Rican tax system. Regarding these criteria, the OECD has established as a generally accepted principle that a company will be treated as the owner of a PE in a determined state if a person acts on behalf of that company under certain circumstances, even if they are not in the presence of a permanent business centre in said state. These circumstances are as follows:

- The person has to be an agent on account of the non-domiciled company: A dependent agent, individual, or company, under an employment regime or outside of this, that, due to the nature of its activities or to the scope of its faculties, involves the non-domiciled company in commercial activities of certain significance.
- The person or local company has to be a dependent agent with enough faculties to celebrate and subscribe agreements on behalf of the non-domiciled company. The faculties of the person or local company have to be sufficient to involve the non-domiciled company in business activities inside the country on which the person or local company are situated.
- The agent has to be authorised to negotiate all elements and details of agreements on which the non-domiciled company is involved and obligated, even if said agreement is signed by another person in the country on which the non-domiciled company is located. In other words, it isn’t simply a mere authorisation to sign the agreement.
- The faculty to subscribe agreements must include those agreements that are part of the main commercial activity of the company. It is irrelevant the fact that the person has the faculty to celebrate agreements exclusively related to internal operations of the company.
- The agent has to take risks on behalf of the abroad domiciled company.
- The agent has to act accordingly to detailed instructions or general control of the abroad domiciled company.
Costa Rica

- The concept of PE under this context implies that this agent uses its authority on a repeatedly basis and not only on isolated cases. The faculties must be exercised regularly in the country on which the agent is located, a characteristic that is determined according to the real commercial situation. A person or company whose activities are limited to the following conditions and circumstances is not considered a PE:
  - Its activities consist only in storage, expose, or delivery of goods and merchandise that belong to the company domiciled in another country.
  - Its activity consists only in purchase of goods or merchandise or compiling information for the abroad domiciled company.
  - Its activity consists only in developing any other auxiliary or preparatory activity for the company.
- To consider a person as a PE of a company in a state, it has to be determined if the activities that this person develops are, by themselves, an essential and significant part of the activities of the company as a whole, which is why every case must be studied and analysed according to its own particular circumstances.

Other taxes

Sales tax
A fixed sales tax rate of 13% is applied at all stages of the sale of merchandise or the invoicing of certain limited services. The tax is levied on (i) sales of merchandise within the national territory (except sales of land, buildings, exports, and certain basic necessity items, such as basic foodstuffs, certain medicines, and veterinary products); (ii) the value of services performed by restaurants, bars, motels, printing companies, social and recreational clubs, painting and repair shops, and others; and (iii) imports consisting of merchandise for personal use or consumption or to satisfy commercial needs.

Selective consumption tax
The selective consumption tax may be applied at a rate of up to 100% and is levied on goods that are considered non-essential. The tax base is the cost, insurance, and freight (CIF) price plus import duties for imported items or the sales value for items produced in Costa Rica. The tax is levied at only one stage in the sale of merchandise. Payment of the tax is required at the time of importation or, for articles produced in Costa Rica, within 15 days of the month of the sale.

Customs duties/import tariffs
In Costa Rica, all importation of goods and merchandise, with certain exemptions, are liable for corresponding import tariffs and customs duties. Other taxes (e.g. sales tax, selective consumption tax) are also levied on the importation of said goods and merchandise.

The most important legal instruments for customs regulations are the Central American Uniformed Customs Code, the Customs Law and its rulings, and other administrative rulings that are periodically issued by the Customs Authority.

Property tax
Each local municipal government is in charge of real estate appraisal. The annual property tax to be applied throughout the Costa Rican territory is 0.25% of the appraised value, registered in the respective municipality where the tax liability originates.
Real estate transfer tax
Real estate transfer tax is calculated as 1.5% of the selling price of the real estate or its property tax value, whichever is greater.

Stamp duties
Stamp duties in Costa Rica are determined according to the transaction that is carried out (e.g. property transactions, service contracts, movable assets transactions).

Registration tax
There is a registration tax on every corporation/company that is registered in the Costa Rican Mercantile Registry and every new corporation that is formed.

The rate of this tax is approximately 300 United States dollars (USD) for commercially active companies and USD 150 for inactive ones (commonly known as shelf companies). The taxable event happens every 1 January and affects all companies, corporations, and branches that are registered in the Mercantile Registry to that date. For existing companies, the tax is paid during the 30 calendar days following 1 January; for new companies, the tax is paid at the moment of their registration.

Franchise tax
The payments realised abroad for the use of a franchise will be subject to remittances abroad with a 25% withholding tax (WHT).

Branch income
Branch income is subject to tax at the same rates as corporate income. There is a WHT of 15% on dividends distributed within the country and a 15% tax, in lieu of a dividend WHT, on profits transferred abroad.

Income determination

Inventory valuation
Inventories are generally stated at cost and can be valued using the compound average-cost method, first in first out (FIFO), last in first out (LIFO), retailer method, or specific identification method. Since all entities must keep legal records, any adjustment resulting from different methods of inventory valuation for tax and financial purposes should be recorded.

Capital gains
There is no capital gain tax on the sale of real estate or securities when such sales are not a habitual activity. There is a capital gain tax, at the regular rate, on the sale of depreciable assets when their sale price is higher than their adjusted basis (book value).

Dividend income
Dividends between domestic subsidiaries and other domestic corporations are not subject to taxes. There are no ownership requirements to qualify for this exclusion.

Stock dividends
Stock dividends are subject to CIT at 15% if the stock is not listed in an officially recognised stock exchange or 5% if the stock is registered in a stock exchange officially recognised by the Costa Rican government.
Dividends paid in the form of stock of the distributing company are allowed and are exempt from taxes.

**Interest income**
Interest income coming from sources related to normal business activities is taxable. Interest income coming from investments on financial entities included in the National Banking System is subject to an 8% withholding on the source as definitive tax.

Interest coming from investments abroad is considered non-Costa Rican-source income and is not taxable.

**Foreign income**
Foreign-source income is not taxable in Costa Rica.

**Deductions**
In general, any costs and expenses that are useful, necessary, and pertinent for the production of actual or potentially taxable income will be deductible from the company’s gross income, as long as they are duly supported by documentation authorised by the law and they comply with the following requirements:

- That they are necessary expenses to obtain actual or potential income, taxed under the law.
- That any withholding obligations, as stated in other sections of the law, have been carried out.
- That the supporting documentation has been authorised by the Tax Administration.

However, the Tax Administration may reject or disregard, in whole or in part, any expenses that it considers excessive, inadmissible, or not indispensable to obtain taxable income.

**Depreciation**
The straight-line and sum-of-the-years-digits methods of depreciation are allowed over the following useful lives:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Useful life (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>50</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>10</td>
</tr>
<tr>
<td>Furniture and fixtures</td>
<td>10</td>
</tr>
<tr>
<td>Vehicles</td>
<td>10</td>
</tr>
<tr>
<td>Agricultural plantations</td>
<td>3 to 20</td>
</tr>
</tbody>
</table>

The Tax Administration, at the request of the taxpayer, can adopt technically acceptable special depreciation methods in cases duly justified by the taxpayer. In addition, the Tax Administration can authorise, through general resolution, accelerated depreciation methods on new assets acquired by corporations with monetary activities requiring constant technological updates, higher installed production capacity, and productive reconversion processes in order to maintain and strengthen their competitive advantage.
**Goodwill**
If the intangible asset can be amortised, the gain is considered taxable and the loss is considered deductible from the income tax base. However, if the intangible asset is not amortisable, the gain is not taxable and the loss is not deductible.

**Start-up expenses**
A company's organisational expenses may be deducted in the tax year in which they are paid or credited, or, if they accumulate, in five consecutive tax years, starting from the date of start of productive operations, until the balance is exhausted. Organisational expenses will be considered to be those costs and expenses that are necessary to initiate the production of taxable income, that, in accordance with the law, are deducted from gross income.

**Interest expenses**
Interest and other financial expenses paid or incurred by the taxpayer during the fiscal year directly related to the management of their business and the creation of taxable income are deductible from gross income, as long as those interest expenses are not capitalised.

Note that those interest expenses with rates that exceed the usual market rates will not be considered deductible expenses by the Tax Administration.

**Bad debt**
Manifestly uncollectible unpaid debt will be deductible as long as this debt is originated in habitual operations from the taxpayer’s business and all legal actions towards its collection have been exercised.

**Charitable contributions**
All donations duly supported by documentation that are given to the government, public institutions, municipal corporations, public universities, to the Social Protection Board, to the Educational Boards, to the Costa Rican Red Cross, and other institutions, such as those foundations and associations with non-charitable, scientific, and cultural ends that are authorised by the Tax Administration to receive deductible donations, among other entities, will be deductible from gross income.

**Taxes**
With the exception of sales tax, selective consumption tax, specific taxes over consumption and special duties established by law, penalties and interest paid over any tax obligation, and the income tax itself, all other taxes that affect the goods, services, and negotiations of the company’s habitual commercial activity will be considered deductible.

**Net operating losses**
Losses incurred by industrial and agricultural enterprises may be carried forward and deducted from the taxable profits for the following three years for industrial enterprises and five years for agricultural enterprises. Loss carrybacks are not allowed.

**Payments to foreign affiliates**
Corporations may claim deductions for royalties, technical and management service fees, and interest charges paid to foreign affiliates, provided that a tax of 25% for royalties, franchises, and other services, and a tax of 15% for interest, is withheld. However, the deductions for technical, management service fees, and royalties may not exceed 10% of gross sales in the aggregate if paid to the parent company.
Costa Rica

**Group taxation**

There is no group taxation in Costa Rica.

**Transfer pricing**

Costa Rican legislation makes no mention of transfer pricing as such, and any attempt to govern transfer pricing is the product of interpretation and precedents and not strictly the product of the law or its rules and regulations. Although the law and its regulations do not specifically mention the phenomenon of transfer prices in its texts, the Tax Administration has attempted to approach the subject by means of an official interpretation of the law, as regards its application to transfer pricing among related companies.

By means of Interpretive Guideline No. 20-03 of 10 June 2003, the Tax Administration has applied the Principle of Economic Reality, regulated in Articles 8 and 12 of the Costa Rican Code of Tax Rules and Procedures, to transfer pricing.

The Tax Administration's argument basically states that the tax laws must be interpreted in accordance with their objectives, their economic meaning, and the facts, as they actually occurred. The Tax Administration will therefore apply the arm's-length principle, as understood by the OECD, which compares the conditions of a transaction between related parties with transactions that are carried out by independent companies; in other words, said prices must be equivalent to prices corresponding to those of transactions that are similar to operations carried out by independent entities, in order to grant them the appropriate fiscal treatment, particularly in light of the fact that the norm between related entities is the application of transfer prices.

**Thin capitalisation**

In Costa Rican legislation, there is no mention of thin capitalisation rules. However, as with transfer pricing, the Tax Administration applies general rules and principles for the treatment of these types of situations. For instance, the Income Tax Law gives the Tax Administration the faculty of reviewing and rejecting all expenses that it may consider excessive, not proportional, or unreasonable. Additionally by means of Interpretive Guideline No. 20-03 of 10 June 2003, the Tax Administration has applied the Principle of Economic Reality, regulated in Articles 8 and 12 of the Costa Rican Code of Tax Rules and Procedures, to thin capitalisation, limiting related companies to market value prices for their transactions.

**Tax credits and incentives**

**Free zones**

Entities established in free zones may enjoy exemption from import duties on goods, income tax, sales tax, export tax, selective consumption tax, real estate transfer tax, and WHT on payments abroad, as well as the discretionary use of foreign currency generated abroad. However, these incentives will be affected by the rules established by the World Trade Organization (WTO) in force in the year 2015.

**Drawback industries**

Special benefits exist for industries that import semi-manufactured materials for assembly in Costa Rica and export finished products. Benefits consist of duty-free imports of raw materials for subsequent export as manufactured products. Machinery for these industries may also be imported duty-free.
Tourism development
The Incentive Law for Tourism Development grants several tax benefits, such as exemption from import duties on certain tourism service-related goods and from property tax for companies dedicated to tourism, but only for those with a signed tourism agreement.

Withholding taxes
Payments to non-domiciled foreign corporations or individuals
Regarding payments to non-domiciled foreign corporations or individuals, taxes are withheld as follows:

<table>
<thead>
<tr>
<th>Payment</th>
<th>WHT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>
<td>15</td>
</tr>
<tr>
<td>Interest and other financial expenses (1, 2)</td>
<td>15</td>
</tr>
<tr>
<td>Royalties, patents, trademarks, franchises, and formulas</td>
<td>25</td>
</tr>
<tr>
<td>Technical service and management fees</td>
<td>25</td>
</tr>
<tr>
<td>Employees</td>
<td>10</td>
</tr>
<tr>
<td>Directors</td>
<td>15</td>
</tr>
<tr>
<td>Others</td>
<td>30</td>
</tr>
<tr>
<td>Transportation and communication services</td>
<td>8.5</td>
</tr>
</tbody>
</table>

Notes
1. No tax is withheld if the recipient is a bank or a financial institution recognised as a first-class bank by the Central Bank of Costa Rica or a supplier of merchandise. Interest or financial expenses paid to parties other than those aforementioned are subject to a 15% WHT. An 8% WHT applies to interest on bearer documents issued by financial entities registered at the Central Bank's General Auditor's Office or stock exchange. No WHT applies to interest paid on securities issued by the Workmen’s Bank or the Mortgage Housing Bank and its authorised institutions or on foreign currency securities issued by the state banks.
2. Banks or non-resident financial entities that are part of a local financial group are payers of a special tax. The taxpayers mentioned in Note 2 must pay, in lieu of tax on remittances abroad, a local currency tax equivalent to USD 125,000 per annum. The tax period will run from 1 January to 31 December of each year.

Tax treaties
Free-trade bilateral treaties
Costa Rica is a full member of the Central American Common Market, which guarantees free trade among the countries of the area. It also has a free-trade bilateral treaty in force with Mexico (1994), the Dominican Republic (1998), Chile (1998), Canada, and Panama. The US-Central American-Dominican Republic Free Trade Agreement (CAFTA-DR) entered into force on 1 January 2009. These agreements aim to provide favourable conditions for the exchange of merchandise between contracting parties.

Tax information exchange agreements (TIEAs)
The only tax treaty in force between Costa Rica and the United States, effective since 12 February 1991, is a TIEA, whereby both countries agree to exchange information, from and/or in relation to public and private entities and individuals, at the request of the party’s corresponding authority, in relation to any tax relevant issue.
Costa Rica

Double taxation treaties (DTTs)
Law No. 8888, regarding the DTT between Costa Rica and Spain, was published in the Official Gazette on 6 December 2010. This treaty entered into force on 1 January 2011 with the purpose of avoiding double taxation and tax evasion between the two countries.

Tax administration

Taxable period
The tax year in Costa Rica is a 12-month period from 1 October to 30 September. Current legislation contemplates that other fiscal year-ends may be adopted with the prior approval of the Tax Administration.

Tax returns
With certain exceptions, all corporations must file a tax return by 15 December on the basis of a fiscal year-end of 30 September. Entities with an operating period of less than four months may present a return together with the following year’s tax return.

The tax system is one of self-assessment with occasional auditing by the Tax Administration.

Payment of tax
In March, June, and September, all corporations and taxpayers must prepay instalments that total 75% of the average income taxes paid in the past three fiscal years, or the amount paid in the prior year, whichever is greater. Failure to pay on these dates results in the accrual of interest unless the taxpayer has requested, on a timely basis, that the Tax Administration eliminate the corresponding payments. Any amount owed in excess of the instalments should be paid by 15 December.

Tax audit process
For a tax audit to begin, it is necessary that the Tax Administration send a notification to the taxpayer to be audited. The taxpayer is selected according to one of the selection criteria previously established, and this should be indicated in the communication at the beginning of the tax audit. The Tax Administration must start the audit within two months of the communication to the taxpayer.

Once the audit is completed, the auditors hold a meeting with the company and invite them to correct the issues found.

If the company does not accept the correction, then the Tax Administration will present a tax assessment with the issues and tax adjustment. The taxpayer has 30 days to respond to the assessment as well as to pay it. An appeal may be requested to the Tax Administrative Court, where the administrative section finishes. Further appeals are handled by the judicial court.

Statute of limitations
The statute of limitations is four years starting from 1 January of the year following the income tax return filing. For taxpayers with an ordinary tax period with a due date to file their 2012 period return on 15 December 2012, the statute of limitations starts counting on 1 January 2013; however, for taxpayers with a special period of January to December with a due date to file their 2012 period return on 15 March 2013, the statute of limitations starts counting on 1 January 2014.
Topics of focus for tax authorities
Important topics for tax audits are sales tax credits, gross margin on sales, employee benefits, and income tax.
Croatia

**Significant developments**

On 1 July 2013, Croatia will become the 28th member state of the European Union (EU). As Croatian legislation will have to be in compliance with the EU Directives, there will be significant changes in the Croatian legislation prior to the EU accession.

Changes in tax regulation, implemented so far, are outlined below.

**Changes in the Tax Authorities Act**

On 19 October 2012, changes in the Tax Authorities Act were introduced that related to the structure of tax authorities and relations between offices. The changes introduced the new Office for Large Entrepreneurs and binding rulings of the tax authorities.

Opinions and instructions issued by tax authority central offices are now binding for all tax authority regional offices, and the goal is to ensure uniformity of the tax authority representative’s treatment of taxpayers.

**A new Act on Investment Promotion and Enhancement of the Investment Environment**

The Croatian government introduced a new Act on Investment Promotion and Enhancement of the Investment Environment, as a successor to the Act on Investment Promotion, as of 10 October 2012. The most significant changes are the introduction of a new investment category, improvements in respect to tax and employment incentives, a new project classification, and recognition of micro entrepreneurs.

**Changes in the Value-added Tax (VAT) Act**

As of 1 January 2013, the following changes in the VAT Act are applicable:

- Zero-rated supplies are abolished and replaced with 5% VAT.
- The preferential tax rate of 10% is applied to services of food preparation and related services in catering facilities, as well as to preparation and serving of non-alcoholic drinks and beverages, wine, and beer in those facilities.
- The threshold for optional VAT registration and quarterly VAT submission is increased.

As of 1 March 2013, VAT deduction restrictions are introduced for entertainment and vehicle expenses.

**Pending legislation**

Please note this information is current as of 1 June 2013. Typically, pending legislation is announced in June or July. Please visit the Worldwide Tax Summaries website at [www.pwc.com/taxsummaries](http://www.pwc.com/taxsummaries) to see any significant corporate tax developments that occurred after 1 June 2013.
**Taxes on corporate income**

Profit tax is paid at a flat 20% rate by enterprises engaged in independent activities on a long-term basis for the purpose of deriving profit, branches of foreign enterprises, enterprises that control shares in capital (unless the object of investment itself pays profit tax), and natural persons who choose to pay profit tax instead of personal income tax.

The profit tax base is the accounting profit adjusted for deductions and disallowed items. Croatian residents pay profit tax on profit derived in Croatia and abroad, and non-residents (e.g. branches) pay profit tax only on profits derived in Croatia. The tax base also includes gains arising from liquidation, sale, change of legal form, and division of the taxpayer where it is determined at the market rates.

Payments into voluntarily pension funds paid by an employer for an employee under certain conditions prescribed by Corporate Income Tax Act are also considered expenditures.

Expenditures are not considered to be expenditures if they are not related to the taxpayer’s business activity.

The profit tax base is reduced by the following items:

- Income from dividends and profit sharing.
- Unrealised profits from value adjustments of shares (increase of financial asset value), if these were included as profit in the profit and loss (P&L) account.
- Income from collected written-off claims that were included in the tax base in the previous tax periods but not excluded from the tax base as recognised expenditure.
- The amount of depreciation not recognised in previous tax periods, up to the amount prescribed by the Corporate Income Tax Act.
- The amount of tax relief or tax exemption in line with special regulations (i.e. costs of education, costs of research and development (R&D), costs of a new employee's salary).
- For reinvested profit, other than that earned in the banking or the financial non-banking sector.

The profit tax base is increased by the following items:

- Unrealised losses from value adjustments of shares (decrease of financial asset value), if these were included as expenses in the P&L account.
- The amount of depreciation in excess of the amounts prescribed by the Corporate Income Tax Act.
- 70% of entertainment costs (food and drink, gifts with or without the printed firm logo or product brand, and expenses for vacation, sport, recreation and leisure-time, renting cars, vessels, airplanes, and holiday cottages). Entertainment costs do not include the costs of goods and merchandise adapted by a taxpayer for business entertainment purposes, labelled ‘not for sale’, and other promotional objects with the name of the firm or merchandise or other advertising objects (e.g. glasses, ashtrays, table cloths, mats, pencils, business diaries, cigarette lighters, tags) put to use in the selling area of the purchaser and given to consumers, provided that their value does not exceed 80 Croatian kuna (HRK) per item.
- 30% of the costs, except insurance and interest costs, incurred in connection with owned or rented motor vehicles or other means of personal transportation (e.g. personal car, vessel, helicopter, airplane) used by managerial, supervisory, and other
employees, provided that the use of means of personal transportation is not defined as salary.

- Asset shortfalls exceeding the amount prescribed by the Croatian Chamber of Economy or Croatian Chamber of Trades and Crafts, in accordance with the VAT Act and on the basis of which no personal income tax was paid.
- The costs of forced collection of tax and other levies.
- Fines imposed by competent bodies.
- Late payment interest charged between associated persons.
- Privileges and other economic benefits granted to natural or legal persons for the purpose of causing or preventing a certain event in favour of the company (generally related to commissions paid to parties acting on behalf of the taxpayer).
- Donations in excess of the amounts prescribed by the Corporate Income Tax Act.
- Expenditures identified during tax authority’s audit, including VAT and contributions related to hidden profit payments and withdrawals from shareholders, company members, and physical persons performing independent activities taxable by profit tax.
- Any other expenditure not directly related to profit earning, as well as other increases in the tax base, which were not included in the tax base.

**Local income taxes**
A legal entity that is liable to pay profit tax and is registered for the performance of the business activity may be subject to tax on trade name at the amount of up to HRK 2,000, depending on the decision of the municipality or city.

**Corporate residence**
In terms of Corporate Income Tax Act, residents are legal or natural persons whose seat is recorded in the Register of Companies or other register in Croatia, or whose place of effective management and control of business is in Croatia. Residents are also entrepreneurs/natural persons with domicile or habitual residence in Croatia, whose business activity is recorded in a register or other records.

A non-resident is any person who does not satisfy one of the requirements referred to above.

**Permanent establishment (PE)**
Definition of a business unit of a non-resident is based on the Organisation for Economic Co-operation and Development (OECD) guidelines, which provides that a non-resident’s business unit is a place of management, a branch, an office, a factory, a workshop, a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources or construction site or project for a period longer than six months, including agents acting in its name, having the right to conclude contracts or hold stock of products that it distributes on the Croatian market in the name of a foreign entrepreneur. The business unit of a non-resident also includes the performance of services (i.e. advisory and business consulting services) for the same or a related project, which lasts for more than three months in a 12-month period.

**Other taxes**

**Value-added tax (VAT)**
The general VAT rate is 25%.
VAT returns and payments
A VAT-registered entity must calculate its VAT liability or refund and submit a monthly (by the end of the following month) VAT return to the relevant tax authority office or a quarterly VAT return (by the end of month following the quarter) if the taxpayer is classified as small (annual turnover below HRK 800,000). An annual VAT return must be submitted by 30 April of the following year.

Where the amount of input tax credits exceeds the entity’s VAT liability, a taxpayer is entitled to a refund of the difference or may choose to use the difference as a VAT prepayment.

As of 1 March 2013, input VAT is not deductible for:

- The purchase of goods and services for entertainment purposes.
- Purchase and rental of cars and other means of personal transport, vessels for leisure, and airplanes, including purchase of all goods and services related to those goods.

The above does not apply if the mentioned items are used for performing business activity of transportation of goods and passengers, rent, or further sales.

VAT paid to the customs office at the time of import can be credited to the taxpayer’s VAT account and offset against any domestic VAT liability. A VAT entity must self-assess VAT on imported services provided by a foreign entity. This VAT can be reclaimed through the VAT return as described above.

Determination of VAT payers
VAT payers are defined as entrepreneurs that deliver goods or perform services in Croatia. An ‘entrepreneur’ is a legal entity or a natural person that continuously and independently performs an activity for the purpose of deriving profit. In addition to those that may be regarded as ‘normal’ taxpayers, domestic enterprises receiving imported services from foreign enterprises and legal entities and individuals that issue invoices or receipts including VAT without authorisation are also liable to pay VAT.

A taxpayer is required to register for VAT where turnover in the previous year exceeded HRK 230,000. Voluntary registration is also possible.

Foreign entrepreneurs may also become VAT registered in Croatia through a tax representative. This will entitle them to reclaim input VAT incurred in Croatia.

In addition to foreign individuals, foreign legal entities are also entitled to claim a VAT refund under reciprocity agreement terms.

Determination of VAT base
The VAT base for goods and services supplied domestically is the consideration received. Where no consideration is provided, for instance where goods are exchanged, the VAT base is the market value of the good or service. The VAT base of imports is the customs value as prescribed by customs regulations, increased by customs duties, import duties, special taxes, and other fees paid during customs clearing.

VAT-exempt supplies
VAT-exempt supplies are similar to those contained in the EU’s Sixth Directive and include rental of residential property (with some exceptions); granting of credits and credit guarantees; transactions related to bank accounts, interest, winnings from special
games of chance in casinos, slot machine clubs, and other forms of gambling; supplies of domestic and foreign legal tender, securities and shares, and supplies of gold by the central bank.

Other exemptions include the following:

- Services and deliveries of goods by public institutions in the field of culture, such as museums, galleries, archives, libraries, theatres, religious communities and institutions, primary and secondary schools, universities, and student catering and boarding institutions.
- Medical services, including services conducted by doctors, dentists, nurses, physiotherapists, and biochemistry laboratories engaged in private practices; services of medical care performed in healthcare institutions; and services performed by social care institutions and child and adolescent care institutions.
- Supplies (transfers) of real estate (land, buildings, parts of buildings, housing premises, and other structures) with the exception of newly built buildings.
- Temporary imports of goods that are exempt from customs duty.

Reduced-rate services

There is a reduced rate of 5% for the following supplies:

- Bread and milk, including baby food used as a substitute for mother’s milk.
- Books of a scholarly, scientific, artistic, cultural, and educational character as well as school textbooks (primary, secondary, and tertiary education, including materials printed on paper and other media, such as CD-ROMs, video cassettes, and audio tapes).
- Certain medicines and surgical implants.
- Scientific journals.
- Services rendered by cinemas.
- Temporary imported boats used for sport and leisure, which will be put in the free circulation until 31 May 2013.

There is a reduced rate of 10% for services related to the following:

- Organised stays (accommodation or accommodation with breakfast, full or half board, in all kinds of commercial hospitality facilities) and agency fees with respect to the above mentioned services.
- Services of preparing food and restaurant services, as well as preparing and serving non-alcoholic drinks and beverages, wine, and beer in such premises, in accordance with special legislation.
- Daily and periodic newspapers and magazines (with the exception of those that consist entirely of advertisements or are used mainly for advertising purposes).
- Eatable oils and fat of animal and vegetable origin.
- Children’s food and processed cereal based foods for infants and small children.
- Water delivery, except for water in bottles and other packaging on the market.
- White sugar from cane or beet.

Custom duties

The general customs duty rate is 10%. However, it varies depending on the type and the origin of imported goods, as prescribed by the Customs Tariff. The Customs Tariff is based on the Harmonized Commodity Description and Coding System (HS Nomenclature).
Excise duties

There are a number of excise duties levied on specific products. They are levied at a fixed amount and are payable by the producer or importer. VAT is applied first, after which the fixed amounts are added.

- Oil derivatives: Tax ranging from HRK 110 to HRK 3,600 per 1,000 litres.
- Tobacco products: Tax on cigarettes may reach up to HRK 180 per 1,000 pieces plus 36% proportional special (excise) tax from retail price; for cigars HRK 1,100 per 1,000 pieces; for cigarillos HRK 220 per 1,000 pieces; and HRK 325 per kilogram for tobacco.
- Beer: HRK 40 per 1% volume fraction of the actual alcohol contained in one hectolitre of finished product.
- Soft drinks: HRK 40 per hectolitre for domestically produced brands and imported soft drinks. Some soft drinks, including mineral water and natural fruit juices, are exempt.
- Alcohol:
  - Excise duty on products with the volume of actual alcohol content at 15% and higher is paid in the amount of HRK 800 per hectolitre of finished product.
  - Excise duty on products with the volume of actual alcohol content of less than 15% is paid in the amount of HRK 500 per hectolitre of finished product.
  - Excise duty on ethyl alcohol is to be paid in the amount HRK 5,300 per hectolitre of pure alcohol.
- Imported coffee: HRK 5 to HRK 20 per kilogram.
- Passenger cars and motor cycles: from 13% to HRK 177,500 plus 63% of the amount exceeding HRK 500,000.
- Producers and dealers of used motor vehicles: As of 1 May 2013, producers and dealers of used motor vehicles are obligated to register in the registry of motor vehicle producers and dealers eight days before the beginning of the activities. Also, they are obligated to deposit a security instrument for the payment of special taxes.
- Imported boats and aircrafts: from 5% to HRK 445,000 plus 16% of the amount exceeding HRK 4 million.
- Luxury products: 30% of the sales value of the product without VAT.
- Liability and comprehensive road vehicle insurance premiums: for obligatory motor vehicle insurance premium, 15% of the contractual amount; and for comprehensive motor vehicle insurance premium, 10% of the contractual amount.

Property taxes

There are no property taxes in Croatia.

Real estate tax

The acquisition of real estate is subject to taxation. ‘Real estate’ includes agricultural, construction, and other land as well as residential, commercial, and other buildings. Transactions include the sale, exchange, and any other means of acquiring real estate for consideration.

Tax is charged at 5% of the market value of the real estate on the contract date and is paid by the acquirer.

Stamp tax

There are no stamp taxation provisions in Croatia.
Croatia

**Chamber of Commerce contribution**
Employers pay a mandatory contribution to the Croatian Chamber of Commerce. The amount varies between HRK 55 to HRK 4,675 depending on company size and 0.005% of total income.

**Branch income**
Foreign corporations carrying on business in Croatia are taxed on their Croatian-source income at a 20% rate.

**Income determination**

**Inventory valuation**
Inventories are generally valued at the lower of their acquisition cost or net realisable value. Taking into consideration the accounting principles set out in the Accounting Act and the International Accounting Standards (IAS), a company can choose to adopt the most favourable method.

**Capital gains**
Capital gains or losses are covered by the profit tax regime. They are either an increasing or decreasing item to the profit tax base.

**Dividend income**
Dividends and profit shares are taxed at the withholding tax (WHT) rate of 12%. This applies to all non-residents until Croatia becomes a part of the European Union.

Dividend and profit shares payments made to resident companies are not taxable.

**Interest income**
Interest income is taxable at the rate of 20% as a part of total income stated in the P&L account.

**Foreign income**
The tax base of a resident taxpayer subject to profit tax is the profit earned both in Croatia and abroad, excluding the case where the taxpayer has registered a branch office abroad and taking into account the provisions of respective double tax treaties (DTTs).

**Deductions**

**Depreciation**
Most companies depreciate assets on a straight-line basis; this is because depreciation calculated this way, at the prescribed rates, is recognised for tax purposes. Companies are, however, free to use any depreciation method defined in the IAS and to estimate the useful lives of all fixed assets in accordance with their accounting policies.
Prescribed annual depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation period (years)</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and ships of over 1,000 gross registered tonnage (GRT)</td>
<td>20</td>
<td>5</td>
</tr>
<tr>
<td>Basic herd and personal cars</td>
<td>5</td>
<td>20</td>
</tr>
<tr>
<td>Intangible assets, equipment, vehicles (except personal cars), and machinery</td>
<td>4</td>
<td>25</td>
</tr>
<tr>
<td>Computers, computer hardware and software, mobile telephones, and computer network accessories</td>
<td>2</td>
<td>50</td>
</tr>
<tr>
<td>Other non-mentioned assets</td>
<td>10</td>
<td>10</td>
</tr>
</tbody>
</table>

However, depreciation expenses in excess of the amount allowed for tax purposes are taxable. The value adjustment of tangible fixed assets rarely occurs in practice, except in the case of financial assets and claims.

The Corporate Income Tax Act no longer allows taxpayers to wholly write off plant and equipment acquired or built during the tax period. The cost of depreciation of assets that are not used for business purposes is not deductible.

Plant and equipment are considered to be acquired in the period in which installed or ready for use. Plant and equipment includes: tools of trade, information technology infrastructure (including software), furniture and fittings, and motor vehicles (excluding vehicles for personal use).

If the taxpayer writes off a portion of a depreciable asset, the remaining undepreciated portion will be depreciated at the rate prescribed by law. According to the Corporate Income Tax Act, the taxpayer can double the depreciation rates.

Land and forests (renewable resources) are not depreciated.

Financial assets, cultural monuments, and art work are not depreciated.

Depreciation of vessels, aircrafts, condominiums, and vacation houses can be tax deductible only if certain conditions are met.

**Goodwill**

Goodwill paid on the acquisition of a business must be amortised over five years. It is usually the difference between the estimated statistical value of assets and liabilities and their book value.

However, the amortisation of goodwill arising from mergers and acquisitions is not recognised for taxation purposes.

**Start-up expenses**

Start-up expenses depend on the amount of share capital and are included in operating costs for profit tax purposes.

**Interest expenses**

According to the Corporate Income Tax Act, late payment interests are tax deductible, unless those interests are due to related companies transactions, no matter if the late payment interests are charged by resident of non-resident related parties.
Croatia

Interest on loans is also deductible, up to the amount prescribed by the Ministry of Finance or Croatian National Bank (prescribed interest rate in Croatia is 7%) and if compliant with thin capitalisation rules (4:1).

**Bad debt**
Value adjustments arising from the adjustment of the value of claims against customers for goods delivered and services rendered are recognised as deductible expenditures if more than 60 days elapsed between the maturity of the claim and the end of the tax period, and if the claims were not paid up to 15 days before filing the tax return. The claim needs to be recorded in the business books as revenue, and all measures for debt collection have to be taken (legal actions) in accordance with best management practices.

**Charitable contributions**
Donations in a form of gifts in kind or cash for cultural, scientific, educational, health, humanitarian, sports, religious, environmental, or other socially beneficial purposes are tax deductible by 2% of the revenues generated in the previous year. Exceptionally, the amount may exceed 2% of the revenues generated in the previous year, provided that it is granted pursuant to the decisions of competent ministries on the financing of special programs and activities.

**Fines and penalties**
Fines and penalties prescribed by Croatian administrative and judicial authorities are considered to be non-deductible expenses.

**Taxes**
There are no provisions for tax treatment of taxes paid/accrued. *For foreign tax credits, please see the Tax credits and incentives section.*

**Net operating losses**
Tax losses may be carried forward and utilised within five years following the year in which the losses were incurred and must be utilised in the order in which they occurred. The losses may not be transferred to any third entity except in the case of merger, de-merger, or acquisition. Tax losses cannot be carried back.

Utilisation of tax losses from previous years in case of statutory changes of legal entities is prescribed in detail in the Corporate Income Tax Act, limiting the entitlement where the legal predecessor is inactive and in case of a significant change in business activity or ownership structure.

**Payments to foreign affiliates**
The treatment of payments made to foreign affiliates is dealt with through the mechanism of the profit tax base. The profit tax base is increased for any concealed profit payments made. The tax authorities may audit the expenditure of non-resident taxpayers, examining expenditure on goods and services abroad as well as management, intellectual property (IP), and other fees and payments that may have the character of a profit transfer. If the tax authorities discover that transactions have been used to conceal profit transfers, the difference between the declared price/fee and the average market price/fee will be added back into the taxpayer's tax base.

**Group taxation**
There are no group taxation provisions in Croatia.
**Transfer pricing**

Prices between a Croatian entity and its foreign related parties must be set at fair market value (the arm’s-length principle). Provisions on transfer pricing and interests are also introduced in transactions between resident related parties if one of the parties has:

- beneficial tax status (i.e. reduced tax rates) or
- entitlement to carry forward tax losses from previous years.

If the prices between related entities are different than those between non-related resident and non-resident entities, the tax base must be calculated with prices that would be charged between unrelated companies. In order to determine the market value of the related party's transaction, the following methods can be used:

- Comparable uncontrolled price.
- Resale price.
- Cost plus.
- Profit split.
- Net-profit.

**Thin capitalisation**

Interest on loans from a shareholder or a member of a company holding at least 25% of shares or voting power of the taxpayer will not be recognised for tax purposes if the amount of the loan exceeds four times the amount of the shareholder’s share in the capital or their voting power. Interest on loans obtained from financial institutions is exempt from this provision. A third-party loan will be considered to be given by a shareholder if it is guaranteed by the shareholder.

**Tax credits and incentives**

The Investment Incentive Act provides the following relief and incentives for taxpayers.

**Investment incentives**

Investment incentives are usually organised as corporate tax credits applicable for up to ten years upon completion of various conditions.

General incentives apply for investors profit earned as a result of an investment under the following conditions:

<table>
<thead>
<tr>
<th>Investment amount (EUR*)</th>
<th>Tax benefit rate (%)</th>
<th>Period (years)</th>
<th>Necessary to employ (employees)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 1 million</td>
<td>50</td>
<td>10</td>
<td>5</td>
</tr>
<tr>
<td>1 million to 3 million</td>
<td>75</td>
<td>10</td>
<td>10</td>
</tr>
<tr>
<td>More than 3 million</td>
<td>100</td>
<td>10</td>
<td>15</td>
</tr>
</tbody>
</table>

* euros

Furthermore, tax benefits for micro entrepreneurs are introduced. A minimum investment of EUR 50,000 allows tax incentives in the form of a 50% decrease of the tax rate over a period of five years, with a minimum of three new jobs.

Tax benefits cannot exceed investment amount.
Incentives for investments in technological development and innovation activities, strategic business support activities, and high value-added services

In addition to developing and innovative activities, as well as business support activities, a new investing category of high value-added services has been introduced. It relates to:

- Creative services (activities in a field of architecture, design, marketing, and art),
- Touristic services (projects related to accommodation facilities with four or more stars; accommodation facilities in cultural and historic buildings; activities for developing health, congress, nautical, and cultural tourism; recreation centres and parks and environmental projects in tourism).
- Managing, consulting, and educational services.
- Industrial engineering services.

These investments allow an additional non-refundable monetary subsidy over the incentive for creating new jobs, as follows:

<table>
<thead>
<tr>
<th>Investment type</th>
<th>Additional non-refundable subsidy (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Technological development and innovation activities</td>
<td>50</td>
</tr>
<tr>
<td>Strategic business support activities and services of high value added</td>
<td>25</td>
</tr>
</tbody>
</table>

Additionally, a non-refundable money subsidy for the purchase of equipment in the amount of up to 20% of justified costs related to investment in technological development and innovation activities and strategic business support activities (maximum amount of up to EUR 500,000) can be granted to a company, provided that equipment bought is high technology equipment.

Incentives for investments into capital intensive and work intensive projects

An investment qualifies as capital intensive if the minimum amount of the investments is EUR 5 million and 50 new jobs are created. Those projects can benefit from additional non-refundable subsidies between 10% and 20% of recognised costs of new plants, objects, equipment, and other capital costs, depending on the unemployment rate of the county where located.

Work intensive projects are those with at least 100 new jobs created within a three year period from the start of the investments project. Initial incentives can be increased by an additional 25% for 100 new jobs, and up to 100% for 500 new jobs.

Custom free zones

Taxpayers that were engaged in or participating in the building of infrastructure within a zone, in projects with a value exceeding HRK 1 million before July 2008, and that did not fully utilise the incentive prescribed by the Investment Incentive Act, are exempt from paying profit tax until the full amount has been used, but no later than 31 December 2016.

Supply of goods in the free zone and within the free zone is exempt from paying VAT.

Employment incentives

Employment subsidies are incentives for creating new jobs and incentives for training required by the new jobs.
Newly created jobs should be kept for at least five years.

<table>
<thead>
<tr>
<th>Unemployment rate (%)</th>
<th>Non-refundable cash subsidy (%)</th>
<th>Maximum costs per employee (EUR)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 10</td>
<td></td>
<td>3,000</td>
</tr>
<tr>
<td>10 to 20</td>
<td>20</td>
<td>6,000</td>
</tr>
<tr>
<td>More than 20</td>
<td>30</td>
<td>9,000</td>
</tr>
</tbody>
</table>

Incentives for training required by new jobs are also increased, as given in the table below.

<table>
<thead>
<tr>
<th>Entrepreneurs’ size</th>
<th>General training (% of non-refundable subsidy)</th>
<th>Specific training (% of non-refundable subsidy)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Large</td>
<td>60</td>
<td>25</td>
</tr>
<tr>
<td>Medium</td>
<td>70</td>
<td>35</td>
</tr>
<tr>
<td>Small</td>
<td>80</td>
<td>45</td>
</tr>
</tbody>
</table>

**Research and development (R&D) incentives**

Registered scientific organisations, centres of scientific excellence, individual scientists, and groups of scientists are entitled to apply for the state subsidies and tax incentives for scientific research, basic research, applied R&D research.

Depending on the type of research (e.g. scientific, basic, applied research, or technical feasibility) and size of entrepreneur (i.e. small, medium, or large entrepreneur, according to the Accounting Act), the percentage of the costs covered by state subsidy can vary between 25% and 100%. Additionally, the profit tax base can be decreased (depending on the same criteria) by up to 150% of the amount of the costs covered by the state subsidy, where the profit tax liability decrease is granted up to the amount of the percentage of the costs covered by state subsidy.

**Foreign tax credit**

If a domestic taxpayer has paid tax abroad on profit derived abroad, the tax paid can be included in its profit tax return, up to the profit tax rate in Croatia. The amount of paid tax abroad, which can be offset with the domestic tax, is calculated in the following way:

- The domestic tax rate is charged on the revenues/profit derived from abroad, and the result represents the highest amount of tax that can be offset with the domestic tax.

If the amount of paid tax abroad was charged at a rate lower than 20%, the actual amount of foreign tax paid can be offset with the domestic tax.

**Withholding taxes**

Taxpayers who pay fees for the use of IP rights (the right to reproduction, patents, licences, copyrights, designs or models, manufacturing procedures, production formulas, blueprints, plans, industrial or scientific experience, and such other rights); fees for market research services, tax consulting services, legal, auditing, or such other services; or interest to foreign legal entities, natural persons excluded, shall, when
making the payment, calculate and withhold tax at a rate of 15%. Exceptionally, WHT on dividends and shares in profit are taxed at the rate of 12%.

If a country has a DTT signed with Croatia, WHT rates are lowered if the treaty rate is lower than the non-treaty rate. There is specific application that needs to be fulfilled in order to benefit from a DTT between countries.

The following countries have a DTT with Croatia:

<table>
<thead>
<tr>
<th>Recipient</th>

**Notes**

1. 5% of the gross amount of royalties paid for any industrial, commercial, or scientific equipment; 10% of the gross amount of any other royalties.
2. 5% of the gross amount of interest on loans from banks or insurance companies; 15% in all other cases.
3. 5% when interest arose in the contracting state and was paid out of any kind of loan from a bank in the other contracting state; 10% in all other cases.
4. 10% when the actual user of the dividend is a company owning at least 10% of the capital of the company paying the dividend where this company is an Israeli resident and the dividends are paid out from the profit taxable at a lower rate than the usual profit tax rate.

In addition to the current WHT rates of 15% and 12%, an increased rate of 20% applies to all services paid to foreign entities whose place of seat or management is in a country with a profit tax rate below 12.5%. This provision does not apply to EU member countries.

The following countries have a profit tax below 12.5%:

- Andorra
- Anguilla
- Antigua and Barbuda
- Aruba
- Bahamas
- Bahrain
- Belize
- Bermuda
- British Virgin Islands
- Cayman Islands
- Cook Islands
- Dominica
- Gibraltar
- Grenada
- Guernsey
- Isle of Man
- Jersey
- Liberia
- Liechtenstein
- Marshall Islands
- Monaco
- Montserrat
- Nauru
- Netherlands Antilles
- Niue
- Panama
- Saint Kitts and Nevis
- Saint Lucia
- Saint Vincent and the Grenadines
- Samoa
- Seychelles
- Turks and Caicos Islands
- US Virgin Islands
- Vanuatu

Note that tax is not withheld from interest payments on the following:

- Commodity loans for the purchase of goods used for carrying out a taxpayer’s business activity.
- Loans granted by a non-resident bank or other financial institution.
- To holders of government or corporate bonds who are non-resident legal persons.
**Tax administration**

**Taxable period**
The profit tax shall be assessed for a period that is normally a calendar year. The tax authorities may agree, at the request of a taxpayer, that the tax period should not correspond with the calendar year, where the tax period may not exceed 12 months. The chosen tax period cannot be changed for five years.

**Tax returns**
All profit tax taxpayers are obligated to submit an annual profit tax return to the tax authorities no later than four months after the end of the tax period for which profit tax is assessed.

The Ministry of Finance administers taxation matters through the Tax Administration and the Financial Police. These organisations have responsibilities and powers defined by law.

**Payment of tax**
Every taxpayer is required to make monthly profit tax instalments (on the last day of each month) on the basis of the previous year’s tax return.

In the first year of operation, taxpayers are not obligated to pay any profit tax advances.

Profit tax is assessed at the end of the calendar year, and the assessed amount, less any instalments made, is payable by the day of submission of the tax return.

**Tax audit process**
The Inspection Sector of the Croatian tax authority performs a tax audit of a taxpayer.

The tax audit process is usually performed as follows:

- Notification of a tax audit is sent to the taxpayer.
- Tax audit is conducted.
- Minutes of the tax audit are issued.
- Taxpayer can object to the minutes within a prescribed filing deadline. If objection shows new facts and evidence, the tax inspector will prepare supplementary minutes.
- Resolution of the tax audit is issued within 60 days as of the day (supplementary) minutes have been provided to the taxpayer.
- Appeal against the resolution can be filed within 30 days as of the day the taxpayer received the resolution. It needs to be replied to within two months as of the day the appeal has been filed.
- After a rejected appeal, the taxpayer can initiate court litigation procedures.

**Statute of limitations**
The Croatian tax authority is entitled to review the tax returns of a company within three years following the end of the year in which the tax return is submitted. This period may be extended to a maximum of six years where the three-year period has been interrupted by actions taken by the tax authorities, such as a tax audit. Where the tax authority considers that there may be a significant impact from the results of the investigation, earlier years may be examined. This means that, in theory, even the closed years can be reopened and additional taxes can be imposed.
Croatia

**Topic of focus for tax authorities**
Tax authorities are focusing on business relations with related parties. The recent conduct of the tax authority implies that transfer pricing documentation is expected to be delivered along with the income tax return (PD form).

**Binding opinions**
As of October 2012, opinions and instructions issued by tax authority central offices are now binding for all tax authority regional offices, and the goal is to ensure uniformity of the tax authority representative’s treatment of taxpayers.

**Significant developments**

**Recent tax developments**

The government has implemented a new basic health care insurance program *(Basisverzekering ziektekosten* or BVZ). Government health care insurance was previously regulated in different ways for different groups, from old age pensioners and social welfare to governmental employees and private sector employees with an income of up to around 30,000 United States dollars. To simplify the system, all these groups have been brought together under the new BVZ, and the system has been expanded to include all residents. An exemption applies to residents that at the time of introduction of the BVZ, 1 February 2013, were insured based on a private health insurance plan for as long as that insurance plan continues. New residents will be covered by the new BVZ.

The premium for the BVZ is 12%, of which 9% must be paid by the employer and 3% by the employee. The employer also must pay 1.9% for the income risk related to sickness of the employee. Under the old system, the employer paid 8.3% (6.4% and 1.9%) and the employee 2.1%.

The commencement age for entitlement to the old age pension (AOV) increased, with effect from 1 March 2013, from 60 to 65 years. At the same time, the premium income cap increased to 100,000 Antilles guilders (ANG). This also applies to the widow and orphan pension (AWW).

In addition, the premium rate for AOV and AWW increased from 14% to 16%. In case of income from employment, the employer must pay the increase. As a result, the employer’s share, as of 1 March 2013, increased from 7.5% to 9.5%. The employee’s portion of the premium remained unchanged at 6.5%.

Additionally, anyone who enjoys an income of more than ANG 100,000 must pay a premium of 1% on the excess income. In case of wage income, this is borne by the employee.

**Transitional legislation**

While the offshore tax regime was abolished in 2001, qualifying offshore companies incorporated before 1 January 2002 may continue to apply the old regime until 2019, provided that certain conditions are met under transitional legislation.

---

**Taxes on corporate income**

Resident corporations are taxed on worldwide income. Non-resident companies are taxed on the following Curaçao-source income:

- Income attributable to a permanent establishment (PE).
Curaçao

- Income from real property situated on Curaçao.
- Interest on loans secured by a mortgage on property situated on Curaçao.

Capital gains are not differentiated from operating income and are subject to the same applicable rates. Corporations are taxed on their income as reflected in their profit and loss account, less certain deductible items.

Companies are generally taxed at a flat rate of 27.5%.

Special minimum rates apply to the taxable income of certain companies:

<table>
<thead>
<tr>
<th>Type of company</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>E-zone companies</td>
<td>2</td>
</tr>
<tr>
<td>New industries and hotels</td>
<td>2</td>
</tr>
<tr>
<td>Land development companies</td>
<td>2</td>
</tr>
</tbody>
</table>

**Shipping business**

Shipping companies are subject to the general profit tax rate of 27.5% but may apply for the tonnage regime. If applicable, their profit is calculated based on the rates provided in the table below. If a shipping company applies the tonnage regime, the actual profits or losses are not taken into account, regardless of whether they are regular profits or capital gains.

The calculated profit based on the table below is subject to the general profit tax rate of 27.5%.

**Exempt companies**

*Please see the Tax credits and incentives section for information on tax exempt companies.*

**Companies under transitional offshore rules**

The transitional rules distinguish three types of offshore companies.

- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) investments in or revenues from portfolio investments, royalties, holding companies, finance companies, or technical support subject to tax rates of 2.4% to 3% (while capital gains and losses were not taken into account) will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) their profit subject to tax rates of 4.8% to 6% or, under certain circumstances, 2.4% to 3% and that had a valid ruling with the tax inspector (e.g. trading companies, banks, captives commissions, and fee-earning companies) on the aforementioned date or for which a request for (extension of) such a ruling had been filed on that date will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had invested all (or almost all) investments in or revenues from real estate property or rights connected thereto, located outside the Netherlands Antilles. These revenues were, under the old offshore regime, exempt from tax. For profit tax purposes, these companies will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

Specific rules are applicable to companies that were incorporated after 30 June 1999 but before 31 December 2001. These companies may also qualify for the aforementioned transitional rules, provided that these companies have been active in a meaningful way. In principle, a company will not be considered to have been active in a meaningful way if the assets of the companies consist predominantly of deposits or receivables on shareholders or affiliated parties.

The grandfathering period continues until 2019.

**Corporate residence**

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management on Curaçao is considered to be a resident. A company that has been established on Curaçao will always be considered a resident of Curaçao.

Offshore entities on Curaçao must have a local managing director. This function is easily provided by one of the many trust companies established on Curaçao.

**Permanent establishment (PE)**

The definition of a PE on Curaçao is generally in line with the Organisation for Economic Co-operation and Development (OECD) model.

**Transfer of legal seat**

Legislation has been enacted under which a Curaçao company is allowed to transfer its legal seat to another jurisdiction (if permitted under the laws of the outside jurisdiction) and a foreign company is allowed to migrate to Curaçao.

**Other taxes**

**Turnover tax**

A 6% turnover/sales tax is levied on the revenue derived from services and deliveries rendered by an entrepreneur or company on Curaçao.

In addition to services rendered on Curaçao, if a foreign entrepreneur performs a service from abroad to a customer on Curaçao, this service is subject to turnover tax.

Non-commercial rental of property is also subject to turnover tax.

A limited number of services and deliveries are exempt, such as:

- Exports.
- Electricity and water.
- Certain services to non-residents.
- Medical services.
Curaçao

• Services at the airport or in the harbour regarding imported or exported goods or goods in transit.
• Advisory and management services provided to or by offshore companies and offshore banks.
• Rental of a dwelling that is the principal residence of the tenant.

An entrepreneur liable to turnover/sales tax must file a declaration, with the Tax Inspectorate before the 16th day of the month following the month concerned, at the Tax Collector's office.

Import tariffs
Import tariffs vary, in general, between 5% and 27%. There is also a range of products that may be imported without import duties. Below, we provide some examples, but we note that in each category there may be specific exemptions to the general tariff.

• Basic food products are tax exempt.
• Other food products are generally taxed at a rate of 5.5% up to 13%.
• Books, computers: 0%.
• Furniture: 22%.
• Cars: 27%.

Excise taxes
Excise tax is due on gasoline; alcohol, with different tariffs for liquor and beer; and tobacco.

Some examples include:

• ANG 0.4725 per litre of gasoline.
• ANG 23 per volume percent of alcohol per hectolitre of distilled products.
• ANG 14.55 per 100 cigarettes (imported).

Land tax
A land tax is levied on real estate located on Curaçao at an annual rate of 0.3% on the value of the land.

Transfer taxes
The transfer of immovable property located on Curaçao is subject to a 4% transfer duty.

Stamp taxes
A stamp tax is levied in two ways, in the form of stamps and as stamped paper.

Stamp tax applies to documents such as government licences, leases, agreements, and court documents. The rate depends on the type of document. As an example, the stamp tax for bank checks is ANG 0.25. The general rate for each page of a legal document is ANG 5.

Social security contributions

Basic health care insurance
The basic health care insurance insures all residents against the costs of healthcare. The premium is 12% (10% for those who are entitled to old age pension). In case of employment, the employer must pay 9% and the employee pays 3%. The maximum premium income is ANG 100,000.
Employers also pay 1.9% for insurance against loss of income of the employee in case of illness. The maximum premium income is ANG 61,620.

**Accident insurance**
Employees are insured against loss of income as a result of an accident that occurs at work. The premium varies from 0.5% to 5%, depending on the class of risk, to be paid fully by the employer. Maximum premium income is ANG 61,620.

**Old age insurance (AOV) and widows and orphans insurance (AWW)**
The collective premium for AOV and AWW amounts to 16%, up to an income of ANG 100,000, of which 9.5% is to be paid by the employer.

Additionally, anyone who enjoys an income of more than ANG 100,000 must pay a premium of 1% on the excess income. In case of wage income, this is borne by the employee.

**Withholding obligation**
Employers must not only withhold wage tax but also the employee part of social security premiums from their employees and pay the amount withheld, together with the amount payable by the employer, to the tax collector.

---

**Branch income**

Tax rates on the profits of PEs are the same as for resident corporations.

There are specific rules for the PE of an insurance company. In that case, the company may elect to declare profit based on a percentage of premiums received by the PE, as well as premiums the company has received from insured residents and from insured risks on Curaçao. The insurance company may also elect to declare a profit that is in the same proportion to total profit of the company as the aforementioned premiums to total premiums.

No tax is withheld on transfers of profits to the head office.

---

**Income determination**

**Inventory valuation**
Both the last in first out (LIFO) and first in first out (FIFO) methods of inventory valuation are permitted, provided the chosen method conforms to sound commercial practice. Conformity of book and tax reporting is not required. However, occasions or situations for differences are very rare.

**Capital gains**
Capital gains or losses are, in principle, considered ordinary income and subject to standard corporate rates. An exemption from profit tax is granted for advantages (dividends and capital gains) from a qualifying participation (see Dividend income below).

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired asset. The reserve may be maintained for a maximum of four years. If
the reserve has not been fully applied, the remainder will be liable to taxation in the fourth year.

Under the transitional regime for offshore companies (investment, holding, finance, and patent holding companies), capital gains and losses are tax exempt.

**Dividend income**
In general, a full participation exemption applies to all local as well as foreign participations for dividends as well as for capital gains. However, it is required that dividends be derived from an active participation (non-portfolio investment) or a participation that is subject to tax.

Expenses incurred in connection with a qualifying participation (including capital losses) are not deductible, unless it can be demonstrated that these are indirectly incurred to realise profits that are subject to tax on Curaçao.

**Non-portfolio investment clause**
A participation is deemed to be active if the gross income of that participation consists of not more than 50% of dividends, interest, or royalties received other than from an enterprise of that participation.

**Subject-to-tax clause**
A participation is deemed to be subject to tax if it is subject to a tax rate of at least 10%.

If at least one of these clauses has been met, the 100% participation exemption will apply. If none of these clauses are met, the participation exemption is limited to 63% of dividends. Consequently, the dividends would be subject to an effective tax rate of 10.17% (37% x 27.5% regular tax rate).

The 100% exemption also applies to income other than dividends, such as capital gains derived from qualifying participations.

**Immovable property**
The aforementioned clauses do not apply to dividends from a participation that (almost) exclusively (directly or indirectly) holds immovable property. The 100% participation exemption applies to these dividends.

**Definition of dividend**
A dividend is defined as a distribution of profits on shares or profit-sharing notes, paid from statutory profits or profit reserves. Dividends shall not be considered payments for the purchase of own shares or profit-sharing notes, distributions on shares upon liquidation, repayment of paid-up capital, or the distribution of bonus shares.

**Minimum cost-price threshold for participations**
The minimum cost-price threshold for shareholdings, profit-sharing notes, or voting rights of less than 5% is ANG 890,000.

**Interest income**
There is no specific regime for interest received. Interest income is therefore taxed at the same rate as other income.
**Curaçao**

**Foreign income**
A Curaçao corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Undistributed income of foreign subsidiaries is not taxable.

Curaçao has adopted a definition of a branch (permanent establishment/permanent representatives) that is in line with the definition in the OECD Model Double Taxation Convention on Income and Capital.

The profits of a PE in Aruba, St. Maarten, or the Netherlands, including the Caribbean Netherlands, are tax exempt on Curaçao based on the tax arrangement with the Kingdom of the Netherlands. In the case of a PE outside the Kingdom of the Netherlands (i.e. the Netherlands, Aruba, Curaçao, and St. Maarten), the income realised through the PE, after deduction of foreign taxes, is tax exempt. In the case of a foreign loss, this is not deductible.

The profits of a branch with more than 50% low-taxed passive investment income will only be 63% exempt. In case of a loss, 63% of the loss will not be deductible. The branch profit is in line with the treatment of participation profits and losses.

Foreign real estate is always deemed to be part of a PE and, as such, is fully tax exempt.

**Deductions**

**Depreciation and amortisation**
Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The depreciable base includes purchase price, customs duties, shipping costs, and installation costs, less residual value, if any. The straight-line method is customary, but the declining-balance method is also acceptable. In addition, an accelerated deduction of one-third of the assets’ depreciable basis may be taken. The assets’ remaining cost basis (two-thirds) is depreciated using one of the acceptable methods.

The cost basis of certain intangible assets, such as patents, trademarks, and copyrights, can be amortised over their expected useful lives. Goodwill and other intangibles resulting from the excess of purchase price over the cost basis of assets purchased are amortised over three to five years.

The tax department has issued the following estimated depreciation table.

<table>
<thead>
<tr>
<th>Assets</th>
<th>Rate (%)</th>
<th>Residual value (%)</th>

<tr>
<td>Machinery and installations</td>
<td>10</td>
<td>10</td>
</tr>
</tbody>
</table>
### Start-up expenses
Start-up expenses should be capitalised and may be depreciated, comparable to goodwill, over five years.

### Anti-abuse rules regarding interest and loans
Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides credible evidence of overriding commercial reasons for the transaction, or in case the interest in the hands of the recipient is taxed at an effective tax rate that is considered adequate by Curacao standards, the interest may be deductible.

In case of intra-group financing, for profit tax purposes the amount of interest paid or received should be based on arm’s-length principles.

In case of profit participating loans, the interest will be qualified as a dividend and will not be deductible. Interest received on such loans may meet the definitions of the participation exemption if the creditor also holds a qualifying participation in the debtor.

A write-down of an intra-group loan may be denied in case of a profit-participating loan, or if at the time of issuance it was foreseeable that the loan would never be fully repaid.

### Provision for bad debt
It is possible to make a provision for future expenses with a cause existing on the balance sheet of the tax year in question. Therefore, a provision may be made for bad debts.

### Charitable donations
Charitable donations to qualifying entities within the Kingdom of the Netherlands may be deducted to the extent that they exceed 1% of net income and ANG 100 after utilisation of tax loss carryforwards. The maximum deduction is 3% of net income.

### Bribes, kickbacks, and illegal payments
Expenses that are connected to a criminal offence for which a taxpayer has been convicted are not deductible. Bribes paid to public servants and politicians are not deductible.

### Fines and penalties
Fines and penalties are not deductible in cases where they have been imposed by a criminal court in Curacao, or have been paid to avoid prosecution, and in cases of administrative fines imposed by a government agency in Curacao.
**Taxes**
Taxes, other than the corporate profit tax itself, incurred in the course of doing business are deductible.

**Other significant items**
Deduction of certain expenses (e.g. costs for food, drink, and entertainment) are only deductible in part. These costs are often referred to as mixed costs. The non-deductible portion is 10% of the total of these expenses.

**Net operating losses**
Losses may be carried forward for a period of ten years. Start-up losses during the first four years for companies having tax holidays may be carried forward indefinitely. Carrybacks are not permitted.

**Payments to foreign affiliates**
The Corporate Tax Act provides for specific limitations for deduction of interest in certain cases of restructuring and refinancing involving the creation of artificial flows of interest payments to persons who are tax exempt or subject to lower taxes in their jurisdiction.

**Group taxation**

**Fiscal unity**
The Corporate Tax Act provides for fiscal unity treatment for corporate profit tax purposes. Resident companies with wholly owned resident subsidiaries can qualify for this regime. The parent company is entitled to submit one consolidated income tax return on behalf of the entire fiscal unity group. As a result, only the parent company is assessed.

Within certain limitations, losses of one company can be offset against the profits made by another company in the fiscal unity group. No profits need to be recognised on inter-company transactions, as these are disregarded for tax purposes. The fiscal unity applies for profit tax purposes only; the participating entities remain separate and identifiable under civil law.

Fiscal unity relief is confined to companies organised under the laws of Curaçao, the Netherlands, Aruba, or St. Maarten. The companies that invoke this relief must have their place of management on Curaçao.

On the basis of the non-discrimination provision of a relevant tax treaty, entities established under the laws of a tax treaty party may also be admitted to the fiscal unity regime provided that they are resident on Curaçao.

**Transfer pricing**
There are no specific regulations with regard to transfer pricing. However, based on case law, businesses can be required to show that in case of intra-company transactions, these transactions have been made at arm’s length.

**Thin capitalisation**
In cases where a company receives a loan from an associated exempt private limited liability company (*Besloten Vennootschap* or BV), and the amount of the loan is more than three times the net equity of the company, the interest on the loan is not deductible for the part that is more than three times the net equity.
**Tax credits and incentives**

**Foreign tax credit**
A tax credit applies to income from abroad that has been subject to tax at source or to another tax on income. The tax credit is allowed for the income tax levied abroad, but shall not exceed the Curaçao profit tax that is attributable to that foreign income.

**Inward investment and capital investment**
There are tax incentives or holidays for the establishment of new economic enterprises and hotels with a predetermined minimum employment and capital investment. Special provisions relate to the taxation of shipping and insurance companies.

**Investment allowance**
For a minimum investment of ANG 5,000, an 8% investment allowance on acquisitions and improvements (for new buildings, 12%) is permitted as a deduction from taxable profit in the year of investment and in the subsequent year for businesses operating on Curaçao.

**Accelerated depreciation and tax rollover reserve**
An accelerated deduction of one-third of the assets' depreciable basis may be taken. If a profit results at the time of sale of capital assets with the intention to replace that asset, the profit may be placed in a tax rollover account.

**Tax exempt company**
It is possible to elect tax-exempt status for a BV. To qualify for the exemption, a number of conditions must be met, including (but not limited to) the disclosure of beneficiaries, management, financials, and the activities (only investment and financing activities) of the company. Recently, the licensing of intellectual and industrial property rights and other comparable property and usage rights have been added to the list of allowed activities.

Another condition has been added that requires that no more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax regime comparable to that of Curaçao. A profit tax regime is comparable to that of Curaçao if the foreign tax regime provides for a profit tax rate of at least 13.75% (50% of the Curaçao tax rate).

The subject-to-tax requirement is also met if the foreign tax regime appears on a list of comparable tax regimes. The list that has been issued includes all European Union (EU) and OECD member states and all jurisdictions with which Curaçao has a tax treaty. According to the list, the subject-to-tax requirement is also met in the case of a jurisdiction that is included in the white list issued by the OECD, provided that no special tax regime is applicable.

**Independent expert**
Currently, an independent expert is required to certify that the exempt company meets the requirements for exempt status. If more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax comparable to that of Curaçao, the independent expert must inform the Inspectorate of Taxes. The inspector notifies the company that it no longer meets the requirements for exempt status. The exempt status is then terminated starting the first day of the year following the year in which the notification becomes final.
Ocean shipping companies
Ocean shipping companies are taxed on a fixed profit per net ton of ANG 0.60 up to ANG 2.00 (or per 10 net ton in case of management and control). International aviation companies may apply a reduced tax rate against 80% of their profit, as their profits are deemed to be gained outside of Curaçao. As a result, the overall effective tax rate is 9.66%.

E-zone companies
An e-zone is an area designated for international trade and services. The activities of companies established in an e-zone must be focused on trading or providing services to companies located outside of Curaçao. There are two types of e-zones:

- Designated areas where, amongst others, goods can be stored, processed, machined, assembled, packaged, displayed, and released or handled in any other way. On Curaçao, there are two of this type of e-zone that are dedicated to goods, one located at the harbour, and the other at the airport.
- E-zones where international trade and trade supportive services may be performed, supported by electronic communication and information equipment (e-commerce). There are several e-commerce zones on Curaçao.

E-zone companies are subject to a minimum 2% corporate profit tax until 1 January 2026. They will be granted special facilities regarding turnover tax.

New industries and hotels
New industries and hotels are granted partial exemption from profit tax and a minimum 2% tax rate for a period of five to 11 years. A minimum investment is required. Losses incurred during the first four years of operations may be used to offset taxable income for an indefinite period of time.

Land development companies
Land development companies are granted a tax holiday. They are exempt from tax on profits realised on the sale of the developed land. A minimum investment of ANG 1 million is required. Activities should be expected to enhance the economic development of Curaçao.

Private foundations
Private foundations are exempt from Curaçao profit tax, and their distributions are exempt from Curaçao gift tax, as are contributions of assets to the foundation by a non-resident. Gift tax in the contributor’s country may be applicable.

The ‘private’ foundation is a variant of the long-existing ‘common’ foundation. The most important difference is that the purposes of a common foundation may not include making distributions (other than distributions of an idealistic or social nature). This restriction does not apply to private foundations, whose purpose may include making distributions to the founders and others. A private foundation may not run a business or enterprise for profit. If, however, a private foundation does realise profits from a business or enterprise, that profit will be taxed at the normal tax rate of 27.5%. Acting as a holding company or investment company is not considered running a business. The private foundation is intended to be an alternative to the Anglo-Saxon trust, especially in civil law jurisdictions.

It is possible to opt for a taxable status for a private foundation. In that case, its profits, other than those arising from active business activities, will be taxed at a rate of 10%.
Curaçao

**Transparent companies**
It is possible to opt for a transparent status. This option is only available to a BV or a limited liability company (*Naamloze Vennootschap* or NV) established according to Curaçao law. It is, however, possible to convert a corporation that has been established elsewhere to a BV or NV, at which time the transparent status can be requested. Newly established companies can request the status from the start, if the request is filed with the Inspectorate within three months. Existing companies can request the status as of the next following year.

A transparent company will be treated as a partnership for tax purposes, and the shareholders will be treated as the partners in that partnership.

**Withholding taxes**
Although a dividend withholding tax (WHT) was approved in 1999, it has been decided that for the foreseeable future this tax will not enter into force. If it is decided that the tax will enter into force, there is a mandatory transitional period during which the tax will not be applicable to legal entities resident at that time on Curaçao.

**Tax treaties**
Curaçao currently has tax treaties in effect with Aruba, the Netherlands, Norway, and St. Maarten. A double tax agreement (DTA) has been negotiated with Jamaica, but this has not entered into force yet. See the Tax administration section for a description of tax information exchange agreements (TIEAs).

**Tax arrangement for the Kingdom of the Netherlands (TAK)**
As part of the Kingdom of the Netherlands (TAK), Curaçao is party to a federal tax agreement with the Netherlands, Aruba, and St. Maarten. Subject to this treaty, dividends, interest, and royalties paid out to a Curaçao company may qualify for reduced rates of WHT in the subject countries.

Dutch dividend WHT is 15% if the Curaçao company owns less than 25% of the Dutch company. If the Curaçao company's interest is 25% or more, Dutch WHT can be reduced to 8.3%.

The WHT regime in the TAK also applies to the old Curaçao offshore companies.

The TAK is to be revised. Negotiations have already started between Aruba and Curaçao each with the Netherlands. In the end, the existing TAK will then be replaced by separate bilateral tax agreements. The government has announced that an agreement with the Netherlands is expected to enter into force on 1 January 2014. Agreements with Aruba and St. Maarten have not been finalised. The old TAK will remain in force with regard to Aruba and St. Maarten until a separate agreement has been signed with each of these countries.

**Tax administration**

**Taxable period**
Profit tax is levied by way of a self-assessment system. Returns are to be filed on a calendar-year basis. Non-resident corporations may file their returns based on a calendar year basis or on a different book year. On request, this may also apply, for
example, when a resident company is the subsidiary of a foreign parent company (i.e. only a local company must request for a different tax year-end).

**Tax returns**
A provisional return must be filed within three months after the end of the book year. A final return must be filed within six months after the end of the book year.

For the provisional return, no extensions are granted. For the final return, an extension may be requested. In general, no extensions will be granted for more than 12 months after the book year.

**Payment of tax**
Payment is to be made at the time of filing and in a lump sum on the basis of the self-assessment. This means that if the book year equals the calendar year, the provisional return is due before 1 April of the following year, and the final return before 1 July of the following year.

In general, at the time of filing the provisional return, an amount equal to the profit tax of the previous year must be paid; the remaining balance due for the year for which the return is filed must be paid at the time of filing the final return.

For example, if the tax due for the year 2012 was 100, then at the time of filing the provisional return for 2013, which is due before 1 April 2014, that same amount must be declared and paid. If there is reason to believe that the amount for the year 2013 will be lower than for 2012, upon request, the estimated lower amount may be paid at the time of filing the provisional return.

At the time of filing the final return for the year 2013, which is due before 1 July 2014, the balance due must be paid, or if the total amount is less than the amount already paid up, a repayment will follow.

**Tax audit process**
As the profit tax is levied based on self-assessment, the tax department does not issue a final tax assessment. There is no specific cycle for audits. Depending on a desk review of the tax returns of the last couple of years, an audit may follow.

**Statute of limitations**
A reassessment can be imposed until five years after the tax year. In cases where the taxpayer is considered to be in bad faith, a reassessment can be imposed until ten years after the tax year.

**Topics of focus for tax authorities**
There are no specific topics of focus. In case an audit is started, each aspect may be investigated. Often the audit will not only focus on the profit tax, but also the other tax obligations, such as sales tax, wage tax, and social security premiums.

**Tax information exchange agreements (TIEAs)**
TIEAs have been signed with several countries, including Australia, Canada, Denmark, Mexico, New Zealand, Spain, Sweden, and the United States. As a result, Curaçao, as part of the former Netherlands Antilles, has been moved to the white list of the OECD Global Forum. In January 2013, Curaçao signed a TIEA with Colombia.
Other issues

Exchange controls
In general, exchange control regulations are very liberal for offshore companies. Offshore companies established on Curaçao can obtain non-resident status for exchange control purposes, which basically provides for total exemption from exchange controls. Onshore companies are subject to slightly stricter rules. These companies are subject to a license fee of 1%.

Business combinations
The Corporate Tax Act provides for a tax facility for business mergers. In a business merger, a company acquires all or a substantial part of the trade or business of another company with a view towards combining the business operations of the two companies into a permanent financial and economic organisation. If the business is transferred as part of a business merger, the gains realised by the transferor are not subject to profit tax if certain conditions are met.

Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups, and re-incorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.
Significant developments

The Cyprus Parliament voted in an increase of the corporate income tax (CIT) rate from 10% to 12.5% and of the Special Defence Contribution (SDC) on ‘passive’ interest income from 15% to 30%, effective as of 1 January 2013 and 29 April 2013 respectively.

The income tax law itself has been amended to provide exemptions from tax on income related to intellectual property (IP) (see Intellectual property [IP] regime in the Tax credits and incentives section for more information), as well as accelerated tax depreciation on certain assets (see Depreciation and amortisation in the Deductions section for more information).

Arm’s-length rules have also been relaxed (see Transfer pricing in the Group taxation section for more information).

As of 14 January 2013, the standard value-added tax (VAT) rate in Cyprus increased from 17% to 18% through to 13 January 2014. As from that date, the standard VAT rate will increase to 19%.

Taxes on corporate income

All companies that are tax residents of Cyprus are taxed on their income accrued or derived from all sources in Cyprus and abroad. A non-Cyprus tax resident company is taxed on income accrued or derived from business activity that is carried out through a permanent establishment (PE) in Cyprus and on certain other income arising from sources in Cyprus.

As of 1 January 2013, the CIT rate in Cyprus is 12.5% (previously 10%) on taxable income. However, the Cyprus income tax law provides explicitly for a number of exemptions for many and varied types of incomes, profits, and gains of Cyprus-based corporations (see the Income determination section for more information).

Special Defence Contribution (SDC)

SDC is also imposed on certain income earned by Cyprus tax residents. Non-tax residents of Cyprus are exempt from this SDC.

Dividends generally are exempt from SDC, subject to certain rarely applicable limitations (see Dividend income in the Income determination section).

Interest received by close-ended or open-ended collective investment schemes (CIS) is never subject to SDC. Such interest is only taxed under CIT after deducting expenses at the standard CIT rate of 12.5%.
Cyprus

Interest received by other companies in the ordinary course of business, including interest closely connected to the ordinary course of business, is also only taxed under CIT after deducting expenses at the standard CIT rate of 12.5%.

When companies receive interest that does not satisfy the conditions prescribed immediately above, the interest is subject to SDC without expense deduction at the rate of 30% as of 29 April 2013 (previously 15%). Such ‘passive’ nature interest would, however, be exempt from CIT.

In addition to CIT of 12.5%, gross rental income reduced by 25% is also subject to SDC at the rate of 3%.

Companies, partnerships, the government, or any local authorities that pay rents to Cyprus tax resident landowners should withhold SDC at source.

**Tonnage tax**

For ship-owning companies, the profits derived by the owner of a ship registered in the European Union (EU) or European Economic Area (EEA) (as well as other foreign jurisdictions, subject to conditions) from its operation/charter out are fully exempt from all direct taxes. The term ‘owner’ includes a bareboat charterer of a non-Cyprus flag vessel parallel registered in Cyprus. A similar exemption applies to charterers and ship managers.

Instead of CIT, ship owners, charterers, and managers pay tonnage tax on the net tonnage of the ships they own, charter, or manage. In addition, there is no tax on dividends paid at all levels of distribution by the above persons out of profits subject to tonnage tax and related capital gains on the sale of the ship and no capital gains tax on the sale or transfer of a ship, share in a ship, or shares in a ship-owning company. The same legislation also provides for income tax exemption of the salaries and benefits of the captain, the officers, and the crew aboard a Cyprus flag vessel.

This treatment applies until 2020 and is compulsory for Cyprus flag ship owners, but optional for other ship owners, charterers, and ship managers.

**Local income taxes**

There are no local government taxes on income in Cyprus.

---

**Corporate residence**

Only companies managed and controlled in Cyprus are treated as tax resident of Cyprus.

**Permanent establishment (PE)**

Cyprus domestic income tax legislation also explicitly provides for the determination of a taxable PE of a non-Cyprus tax resident company in Cyprus. These specific legislative provisions are in line with the relevant article of the Organisation for Economic Co-operation and Development (OECD) model treaty.
Other taxes

Value-added tax (VAT)
VAT is imposed on the provision of goods and services in Cyprus as well as on the acquisition of goods from the European Union and the importation of goods into Cyprus. Taxable persons charge VAT on their taxable supplies (output tax) and are charged with VAT on goods or services that they received (input tax).

As of 14 January 2013, the standard VAT rate in Cyprus is 18% (17% through 13 January 2013). Two reduced VAT rates, an 8% rate and a 5% rate, apply in Cyprus:

- The reduced VAT rate of 8% applies on accommodation, restaurant and catering services, as well as on certain local passenger transport services. The term ‘restaurant and catering services’ includes the supplies of prepared and unprepared foodstuffs and beverages that are accompanied by sufficient support services that enable the immediate consumption of the foodstuffs and beverages supplied.
- The reduced rate of 5% applies on foodstuffs, pharmaceutical products, books and newspapers, as well as on a variety of other goods and services that are beyond the scope of this summary. The reduced rate of 5% also applies, subject to conditions, on the sale of new buildings/houses to individuals/eligible persons, who will use them as their primary and main residences, provided the contract has been signed after 1 October 2011.

Exports from Cyprus are zero-rated (i.e. no VAT must be charged on the export, and the company is entitled to recover the relevant input VAT suffered). The services for the international transport of passengers as well as the transportation of goods either from or to countries outside the European Union are also zero-rated.

Supplies of goods to businesses resident in other EU member states are outside the scope of Cyprus VAT.

Certain education services, as well as the majority of financial, insurance, and medical services, are exempt from Cyprus VAT. Supplies of land and buildings also are exempt from VAT unless the supply relates to new buildings before first use.

VAT registration
VAT registration is compulsory for business with:

- turnover in excess of 15,600 euros (EUR) during the 12 preceding months or
- an expected turnover in excess of EUR 15,600 within the next 30 days.

Business with turnover of less than EUR 15,600, or with supplies that are outside the scope of VAT but for which the right to claim the amount of the related input VAT is granted, have the option to register on a voluntary basis.

An obligation for registration also arises for businesses that make acquisition of goods from other EU member states in excess of EUR 10,251.61 during any calendar year.

In addition, an obligation for VAT registration arises for businesses engaged in the provision of intra-Community services for which the recipient must account for VAT under the reverse charge provisions. Furthermore, an obligation for VAT registration arises for businesses carrying out economic activities from the receipt of services from abroad for which an obligation to account for Cyprus VAT under the reverse charge
provision exists, subject to the registration threshold of EUR 15,600 per any consecutive 12-month period.

No registration threshold exists for the provision of intra-Community supplies of services.

Exempted products and services, and disposals of items of capital nature, are not taken into account for determining annual turnover for registration purposes.

Registration is effected by completing the appropriate application form.

**VAT declaration and payment/return of VAT**

VAT returns must be submitted quarterly, and the payment of VAT must be made by the tenth day of the second month that follows the month in which the tax period ends.

VAT registered persons have the right to request for a different filing period. Approval of the VAT authorities is required. The VAT Commissioner also has the right to request for a taxable person to file one's VAT returns for a different period.

Where in a quarter input VAT is higher than output VAT, the difference is refunded or is transferred to the next VAT quarters.

**Customs duties**

Customs duties may be imposed upon the importation of goods into Cyprus. The customs duties are imposed in accordance with the provisions of the applicable legislation.

Whether customs duties are imposed depends on the nature of the goods and the respective customs duty codes.

**Excise taxes**

Excise taxes are imposed on certain products, including means of transport, petroleum, tobacco products, and alcoholic drinks.

**Immovable property tax**

Effective 1 January 2013, the bands and rates for IPT for properties situated in Cyprus have been revised as follows:

<table>
<thead>
<tr>
<th>Property value as of 1 January 1980 (EUR)</th>
<th>Tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 40,000</td>
<td>6 (with a minimum tax of EUR 75)</td>
</tr>
<tr>
<td>40,001 to 120,000</td>
<td>8</td>
</tr>
<tr>
<td>120,001 to 170,000</td>
<td>9</td>
</tr>
<tr>
<td>170,001 to 300,000</td>
<td>11</td>
</tr>
<tr>
<td>300,001 to 500,000</td>
<td>13</td>
</tr>
<tr>
<td>500,001 to 800,000</td>
<td>15</td>
</tr>
<tr>
<td>800,001 to 3 million</td>
<td>17</td>
</tr>
<tr>
<td>Over 3 million</td>
<td>19</td>
</tr>
</tbody>
</table>

The above apply per owner, not per property.
In the case where a taxpayer does not settle the IPT by the due date (30 September of the year the IPT relates to), a 10% penalty will be due on the principal amount of the IPT.

In the case where a taxpayer settles the IPT at least 30 days prior to the due date, a discount of 10% will be granted on the amount due.

The Council of Ministers has indicated that an amendment may be sent to Parliament before 30 September 2013.

**Stamp duty**

The general rule is that Cyprus stamp duty is imposed only on written contracts relating to assets located in Cyprus or to matters that will take place in Cyprus. The applicable rates are based on the value of each document and are nil for values up to EUR 5,000, 0.15% for values up to EUR 170,000, and 0.2% thereafter, subject to an overall maximum of EUR 20,000.

**Capital duty**

**Upon incorporation of the company**

Upon incorporation of the company, capital duty is due on the authorised share capital at EUR 102.52 plus 0.6% of the authorised share capital.

As for the issued share capital, there is no stamp duty payable if the shares are issued at their nominal value. There is a flat duty of EUR 17.09 if the shares are issued at a premium.

**Upon subsequent increases**

Upon subsequent increases, capital duty is due on the authorised share capital at 0.6% of the nominal value of the additional share capital.

As for the issued share capital, EUR 17.09 is due on every issue batch, whether the shares are issued at a premium or not and irrespective of the number of shares issued every time.

**Capital gains tax**

Capital gains tax is imposed at the rate of 20% on gains arising from the disposal of immovable property situated in Cyprus and of shares in companies (other than companies whose shares are listed in any recognised stock exchange) that own immovable property situated in Cyprus. Liability is confined to gains accruing since 1 January 1980. The costs deducted from gross proceeds on the disposal of immovable property are its market value at 1 January 1980, or the costs of acquisition and improvements of the property, if made after 1 January 1980, as adjusted for inflation up to the date of disposal on the basis of the consumer price index in Cyprus.

Other expenses that are related to the acquisition and disposal of immovable property also are deducted, subject to certain conditions (e.g. interest costs on related loans, transfer fees, legal expenses).

**Social security contributions**

Employed persons are compulsorily insured under a state-administered social insurance fund. Contributions to the fund are borne by both employer and employee. The employer's contributions are made as a percentage of earnings to the following funds:
Funds | Employer contribution (%)  
--- | ---  
Social insurance fund | 6.8  
Redundancy fund | 1.2  
Training development fund | 0.5  
Social cohesion fund | 2.0  
Holiday fund (option for exception) | 8.0

With the exception of the social cohesion fund, the maximum amount of monthly earnings on which the contributions are made is EUR 4,533 as of 1 January 2013. This maximum is usually adjusted for inflation annually at the beginning of each calendar year.

**Special Contribution**

As of 2012, the following Special Contributions are payable on the gross monthly employment incomes of private-sector individuals working within Cyprus:

| Gross monthly emoluments from employment/pension (EUR) | Contribution (%) (1)  
--- | ---  
0 to 2,500 | 0  
2,501 to 3,500 | 2.5 (minimum EUR 10)  
3,501 to 4,500 | 3.0  
Over 4,500 | 3.5

Notes

1. In the case of employed individuals, the recipient of the remuneration is liable for half the Special Contribution and the employer for the other half.

**Branch income**

The rate of tax on Cyprus branch profits is the same as on corporate profits. No further tax is withheld on transfers of profits or funds to a foreign head office.

**Income determination**

**Inventory valuation**

Inventories generally are stated at the lower of cost and net realisable value. Last in first out (LIFO) is not permitted for taxation purposes. First in first out (FIFO) is permitted. Conformity between book and tax reporting is not required.

**Capital gains**

Profits from disposals of corporate titles are unconditionally exempt from CIT. ‘Titles’ is defined as shares, bonds, debentures, founders' shares, and other titles of companies or other legal persons incorporated in Cyprus or abroad, and options thereon, as well as futures/forwards on titles, short positions on titles, swaps on titles, depositary receipts, repos, units in close-ended or open-ended CIS, international collective investment schemes (ICIS), undertakings for collective investments of transferable securities (UCITS), investment trusts and funds, mutual funds, real estate investment trusts (REITS), and units in stock exchange indices.
Capital gains on immovable property are taxed at a separate rate in Cyprus. See Capital gains tax in the Other taxes section for more information.

**Dividend income**
All dividends received from other Cyprus companies are excluded from all taxes at all times, unless they are declared after the lapse of four years from the end of the year in which profits generated.

Dividends earned from foreign investments are exempt from income tax in Cyprus. Such dividend income is also exempt from SDC unless:

- more than 50% of the foreign paying company’s activities result directly or indirectly in investment income and
- the foreign tax is significantly lower than the tax burden in Cyprus (i.e. less than 5%).

Note that where the Cyprus participation exemption on foreign dividend income is not available, then any foreign withholding tax (WHT) imposition on dividends paid to the Cyprus company will be credited against the Cyprus flat SDC rate of 20% on such dividends. Furthermore, in some cases, an underlying tax credit will also be granted.

**Stock dividends**
A Cyprus corporation can distribute tax-free dividends of common stock (bonus shares) proportionately to all common stock shareholders.

**Interest income**
See Special Defence Contribution (SDC) in the Taxes on corporate income section for a description of the tax treatment of interest income.

**Rental income**
See Special Defence Contribution (SDC) in the Taxes on corporate income section for a description of the tax treatment of rental income.

**Foreign income**
Resident corporations are subject to tax on their worldwide income. However, foreign-branch income, as well as dividend income from abroad (see above), is exempt from taxation in Cyprus.

Where foreign income is taxed in Cyprus, double taxation is avoided through unilateral relief, by giving credit for foreign taxation, or by treaty relief. This credit may not exceed the Cyprus taxes imposed on the same income.

Profits from a PE abroad are exempt from CIT. This exemption is always applicable, unless:

- more than 50% of the foreign PE’s activities result directly or indirectly in investment income and
- the foreign tax on the income of the foreign PE is significantly lower than the tax burden in Cyprus (i.e. less than 5%).
Deductions

All expenditure wholly and exclusively incurred for the generation of taxable income is deductible against the company's taxable income. All such expenditure should be supported by invoices and relevant receipts or other supporting documents.

Depreciation and amortisation

Depreciation is computed on a straight-line basis at rates that vary, depending on the life and type of asset. Tax depreciation is not required to conform to book depreciation. Gains on the sale of depreciated property are taxable as ordinary income to the extent of depreciation allowed.

Property and equipment acquired during the tax years 2012, 2013, and 2014 will be eligible to claim accelerated tax depreciation at the rate of 20% (excluding assets that are already eligible for a higher annual rate of tax depreciation).

In case of industrial and hotel buildings that are acquired during the tax years 2012, 2013, and 2014, tax depreciation at the rate of 7% per annum may be claimed.

Any expenditure of a capital nature for the acquisition or development of IP will be claimed as a deduction in the tax year in which it was incurred and the immediate four following years on a straight-line basis (see Intellectual property [IP] regime in the Tax credits and incentives section).

Goodwill

Any amounts paid for the acquisition of trading goodwill should be deductible upon the subsequent sale of such trading goodwill.

Start-up expenses

Start-up expenses, such as formation expenses, are generally not tax deductible in the computation of the company's taxable income.

Research and development (R&D) expenses

Any expenditure on scientific research of a capital nature for which no capital allowance is granted is deductible from taxable income and spread equally over the year in which it has been incurred and the five subsequent years. Scientific expenditure of a revenue nature is deducted in the year incurred.

Interest expenses

Any interest expenses incurred by the company for the generation of its taxable income should be deductible in the company's tax computation.

Bad debts

Bad debts of any business should be deductible, provided they are provided against specific trading receivables and the taxpayer can evidently prove that all necessary steps were taken beforehand to recover them.

Charitable contributions

Charitable donations or contributions made for educational, cultural, or other charitable purposes to Cyprus, or to approved charitable institutions, are wholly deductible, provided that these expenses are supported with relevant vouchers.
Fines and penalties
Fines and penalties are generally not deductible in the computation of the taxable income of the company.

Taxes
Taxes that are deducted in computing profits for CIT purposes include VAT not recovered and the employer’s share of contributions to the social insurance and other funds.

Net operating losses
Tax losses can be carried forward (from the end of the tax year in which the loss occurred) and set-off against taxable profits of the next five years. Carrybacks are not permitted.

Payments to foreign affiliates
A Cyprus corporation can claim a deduction for royalties and interest charges paid to foreign affiliates, and a reasonable amount of head office expenses of an overseas company, provided such expenditures can be justified as having been incurred in the production of the income.

In the case of insurance companies, the amount of head office expenses should not exceed 3% of the net premiums in Cyprus for the general insurance business and 2% for the life insurance business.

Group taxation
Group relief provisions allow, subject to certain conditions, companies of the same group to transfer losses from the loss-making companies to profitable companies. A group includes only Cyprus resident companies with at least a 75% direct or indirect holding relationship.

Transfer pricing
Cyprus tax law does not contain any transfer pricing provisions. However, transactions between related parties should be carried out at pure commercial terms (i.e. at arm’s length).

The Cyprus Income Tax Office has recently communicated that the transfer of shares of companies within a group at a value different than the market value should not have any adverse Cyprus tax implications in certain circumstances.

Thin capitalisation
There are no thin capitalisation provisions in the Cyprus tax law.

Tax credits and incentives
Foreign tax credit
See Foreign income in the Income determination section for a description of the foreign tax credit regime.
Cyprus

**The Cyprus holding company**
The exemptions for dividends received from abroad, foreign PE trading profits, and profits from transactions in titles (see Capital gains in the Income determination section for a description of titles), together with the fact that Cyprus does not withhold taxes on dividend, interest, and royalty (unless right is used in Cyprus) payments made abroad, and its extensive double tax treaty (DTT) network as well as full adoption and access to all EU Directives, makes Cyprus an ideal ‘holding company’ EU jurisdiction.

**The Cyprus financing company**
The low CIT rate of 12.5% imposed on interest incomes, coupled with acceptable thin spreads on related-party, back-to-back financing arrangements, makes Cyprus a very competitive ‘financing company’ EU jurisdiction.

The minimum acceptable spreads are as follows:

<table>
<thead>
<tr>
<th>Amount of loan (EUR)</th>
<th>Spread (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 50 million</td>
<td>0.35</td>
</tr>
<tr>
<td>50 to 200 million</td>
<td>0.25</td>
</tr>
<tr>
<td>Over 200 million</td>
<td>0.125</td>
</tr>
</tbody>
</table>

**Intellectual property (IP) regime**
The income tax law provides for generous exemptions from tax of income related to IP.

More specifically:

- 80% of any income generated from IP owned by Cypriot tax resident companies (net of any direct expenses) is exempt from income tax
- 80% of profit generated from the disposal of IP by Cypriot tax resident companies (net of any direct expenses) is exempt from income tax
- the definition of IP includes copyrights, patents, and trademarks
- registrable IPs need not be registered in Cyprus to benefit from this IP regime
- any expenditure of a capital nature for the acquisition or development of IP can be claimed as a deduction in the tax year in which it was incurred and the immediate four following years on a straight-line basis, and
- this IP regime is also available for IPs acquired or developed before January 2012.

**The Cyprus international collective investment schemes (ICIS)**
The ICIS law, enacted in 1999, provides the required legal framework for the registration, regulation of operations, and supervision of ICIS. The sole objective of ICIS is the collective investment of funds of the unit-holders.

ICIS can take the following legal forms:

- International fixed capital company.
- International variable capital company.
- International unit trust scheme.
- International investment limited partnership.

ICIS are exempt from tax on profits arising on disposal of titles. Dividend income also is exempt (with minor limitations), whereas interest income is taxed at the rate of 12.5%.

ICIS set up in Cyprus can utilise the DTT network of Cyprus.
**Withholding taxes**

Under Cyprus legislation there is no WHT on dividends, interests, and royalties paid to non-residents of Cyprus. Royalties earned on rights used within Cyprus are subject to WHT of 10%.

Notes

1. Under Cyprus legislation there is never any WHT on dividends and interest paid to non-residents of Cyprus.
2. Royalties earned on rights used within Cyprus are subject to WHT of 10%.
3. A WHT rate of 5% is applicable on film and TV royalties.
4. 0% if paid to a government, central bank, or public authority of the other state or for export guarantee.
5. 0% on literary, dramatic, musical, or artistic work.
6. This rate applies for patents, trademarks, designs or models, plans, secret formulas, or processes, or any industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
7. A rate of 15% if received by a company controlling less than 25% of the voting power. A rate of 10% if received by a person controlling less than 10% of the voting power.
8. 0% if paid to a government, bank, or financial institution.
9. A WHT rate of 5% is applicable on film royalties.
10. Treaty rate is 15%, therefore restricted to Cyprus legislation rate.
11. A rate of 10% if a dividend is paid by a company in which the beneficial owner has invested less than EUR 100,000.
12. A rate of 10% if a dividend is paid by a company in which the beneficial owner has invested less than EUR 200,000, dividends are subject to 15% WHT, which is reduced to 10% if the recipient company controls 25% or more of the paying company.
13. No WHT is applicable for interest on deposits with banking institutions.
14. Kyrgyzstan, Tajikistan, and Ukraine apply the USSR/Cyprus treaty.
15. A WHT rate of 10% is applicable on interest received by a financial institution or when it relates to sale on credit of any industrial, commercial, or scientific equipment or of merchandise.
16. A 15% rate applies for patents, trademarks, designs or models, plans, secret formulas, or processes.
17. A rate of 10% if a dividend is paid by a company in which the beneficial owner has invested less than EUR 150,000.
18. The provisions of the Parent-Subsidiary EU directive are applicable.
19. A new treaty has been ratified and will apply from 1 January 2014.
Cyprus

Tax administration

Taxable period
In Cyprus, the tax year is the calendar year.

Tax returns
Business organisations are required to prepare audited accounts based on International Financial Reporting Standards (IFRS). Tax returns are completed based on these accounts on a calendar-year basis.

Electronic submission
Companies should be registered online and submit their annual tax returns electronically. In this respect, the submission deadline of the 2012 corporate tax return is 31 March 2014.

Payment of tax
Corporate entities must pay provisional tax on the current year's income. From 1 January 2013, such provisional tax payment should be made in two equal instalments on 31 July and 31 December. A final payment must be made on or before 1 August of the following year on a self-assessment basis to bring the total payments of tax to the total actually due according to the tax return.

Statute of limitations
The Cyprus tax authorities have six years from the end of the relevant tax year to enquire and examine the tax affairs of the taxpayer. However, if fraud has been established, the statute of limitations extends to 12 years.

Topics of focus for tax authorities
Tax authorities generally focus on the tax statements being computed based on IFRS prepared and audited financial statements and on the principles of taxation as per the tax laws and their issued circulars.

Other issues

Business combinations
Transfers of assets and liabilities between companies can occur without tax consequences within the framework of a tax-exempt qualified reorganisation. Reorganisations include mergers, demergers, partial divisions, transfers of divisions of activities, and exchanges of shares.
Significant developments

An amendment to the corporate income tax (CIT) law has become effective as of 1 January 2013. While the amendment has not introduced any significant changes with respect to the CIT (more important changes were introduced in the personal income tax [PIT] area), one change that is worth mentioning is that the withholding tax (WHT) on certain types of income was increased to 35%. This rate applies to income from sources in the territory of the Czech Republic, e.g. dividends, interest, and royalties that are paid to residents of countries outside of the European Union (EU) and European Economic Area (EEA) and countries with which the Czech Republic does not have an enforceable double taxation treaty (DTT) or tax information exchange agreement (TIEA).

Changes were also made to the value-added tax (VAT) legislation with effect from 1 January 2013. The most important change was an increase of the standard VAT rate from 20% to 21% and of the reduced rate from 14% to 15%.

Substantial tax changes are planned from 2014 or 2015, when a one-stop-shop system for collection of taxes and social security contributions will be introduced (amendment to the tax legislation has been approved, but changes are expected even prior to the law becoming effective). Hand in hand, exemption of dividend income and liquidation surplus will be introduced. However, the exemption should not apply to profit shares from collective investment vehicles (both Czech and foreign).

Collective investment vehicles are planned to be subject to 0% taxation; however, 19% WHT should be introduced on profits from these vehicles flowing to corporations. The new rules on taxation of profit shares should apply only to profits generated after the effective date of the change.

Taxes on corporate income

CIT applies to the profits generated by all companies, including branches of foreign companies. Corporate partners in general partnerships (i.e. unlimited) and corporate general partners (i.e. unlimited) in a limited partnership are subject to CIT on their share of the profits in the partnership.

Czech resident companies are required to pay CIT on income derived from worldwide sources. Non-resident companies are required to pay CIT on income sourced in the Czech Republic.

The 19% CIT rate applies to all business profits, including capital gains from the sale of shares (if not exempt under the participation exemption regime).
There is a special tax rate of 15% levied on dividend income of Czech tax resident entities from non-resident entities (unless subject to participation exemption).

Local income taxes
There are no local income taxes in the Czech Republic.

Corporate residence
A company is resident in the Czech Republic for CIT purposes if it is registered in, or has a place of management located in, the Czech Republic.

Permanent establishment (PE)
Under domestic law, the creation of a PE of a foreign tax resident in the Czech Republic is triggered by a fixed place available for carrying out business activities, long-term provision of services (for more than six months in any 12 consecutive months), or presence of a dependent agent, unless an applicable DTT stipulates otherwise. For interpretation purposes, the Organisation for Economic Co-operation and Development (OECD) Model Tax Commentary is followed. The Czech Republic tends to have a service PE clause included in its DTTs.

Other taxes

Value-added tax (VAT)
As of 2013, VAT is charged at 21% on the supply of goods and services within the Czech Republic (20% prior to 2013), but certain supplies (such as groceries) are taxed at a rate of 15% (14% prior to 2013).

Exports are generally exempt from VAT with a credit. Some supplies are exempt without a credit, including the lease of real estate (with certain exceptions), financial and insurance services, radio and TV broadcasting, education, health, and welfare.

VAT registration
A company must be registered for VAT if its taxable supplies exceed 1 million Czech korun (CZK) for a period of 12 consecutive months or purchases of goods from other EU countries exceed CZK 326,000 per calendar year.

A company can register voluntarily even if its turnover fails to reach the threshold if it renders taxable supplies in the Czech Republic. These are general rules applicable to entities established in the Czech Republic. Different rules apply to non-Czech entities.

VAT returns and payments
The VAT return must be filed and tax paid within 25 days after the end of the taxable period. The taxable period is a calendar month (or calendar quarter under certain circumstances).

Customs duties
The Czech Republic is an EU member state; consequently, the EU customs code applies.

Excise taxes
Excise tax is charged on the production or import of certain products, such as tobacco and tobacco products, wines, semi-products, spirits and pure ethanol, beer, fuel, and mineral oils.
Czech Republic

Energy taxes
Energy tax is charged on natural gas and certain other gases, solid fuels, and on electricity sold to final customers in the Czech Republic.

Real estate tax
Real estate tax is payable annually by the owner of land or buildings. The amount of the tax is dependent on area, location, and usage of the land or buildings. Paved areas used for business purposes (such as concrete areas in logistics centres) are taxable, with taxpayers obligated to self-assess the tax. However, some areas (e.g. publicly accessible parking lands in shopping malls) are not taxable.

Real estate transfer tax
As of 2013, real estate transfer tax is levied on the transferor of real estate at a rate of 4% (3% prior to 2013) on the greater of the transaction price or the officially appraised value. The taxpayer is the transferor; transferee acts as tax guarantee.

Stamp duties
There are no stamp duties in the Czech Republic. Certain business operations in which a notary has to be involved by operation of law are subject to notarial fee.

Social security and health insurance contributions
Employers contribute 34% of the employee’s gross salary to the state health and social security funds. A cap on the premium is available.

Road tax
Road tax is payable annually with respect to vehicles (including private vehicles) used for commercial purposes. Rates vary depending on engine capacity and vehicle size.

Branch income
A foreign company can trade in the Czech Republic through a Czech branch. A branch usually creates a Czech PE of the foreign entity for CIT purposes (depending on the character of the activities carried out through the branch). The basis of taxation is the same as for corporations (i.e. tax base is calculated as taxable revenues less tax-deductible costs). In some cases, it may be possible for taxpayers to negotiate with the tax authorities regarding the basis on which profits are attributed to the branch.

A branch is liable for tax on its attributable profits at the standard CIT rate.

Income determination
The starting point for the calculation of the CIT base is the accounting result as per the Czech accounting standards. The tax non-deductible costs are then added and non-taxable revenues deducted from the accounting result.

Inventory valuation
Stock (i.e. inventory) is valued at cost. Czech legislation specifically provides for the use of the arithmetical average cost and first in first out (FIFO) methods to value stock. Last in first out (LIFO) and the replacement-cost methods (except for livestock) may not be used.
Capital gains
No separate capital gains tax is levied in the Czech Republic. Capital gains are included in the CIT base and taxed as ordinary income in the year in which they arise.

Capital gains from the sale of shares may be exempt from Czech taxation if all of the following conditions are met:

- The Czech or EU parent holds at least 10% of the shares of the subsidiary for at least 12 months.
- The subsidiary is a tax resident of the Czech Republic or another EU member state.
- Both the parent and the subsidiary have one of the legal forms listed in the Annex to the EU P/S directive.

If the subsidiary is not a tax resident of the Czech Republic or another EU member state, the exemption may be applied, provided that the subsidiary is a tax resident of a country where there is a DTT in place with the Czech Republic, it has a legal form similar to a limited liability company or a joint stock company, it is subject to CIT at the nominal rate of at least 12% in a year when dividends are paid, and the time test of 10% for at least 12 calendar months is met. The time test may be met both prospectively and retrospectively.

Dividend income
Dividends received by Czech tax resident corporations from non-resident entities are subject to a special tax rate of 15%, unless exempt under the participation exemption regime described below.

Dividends paid by Czech tax resident corporations to Czech resident entities are subject to 15% final WHT, unless exempt under the participation exemption regime.

Dividends paid by Czech tax resident corporations to Czech non-resident entities are subject to 15% final WHT, unless exempt under the participation exemption regime or decreased under the relevant DTT. Dividends paid to entities that are residents of countries outside of the European Union and European Economic Area, and countries with which the Czech Republic does not have an enforceable DTT or TIEA, are subject to 35% WHT.

Participation exemption regime
Dividend income may be exempt from Czech taxation (i.e. WHT, when a Czech company is paying dividends, and CIT, when a Czech company is receiving dividends) if all of the following conditions are met:

- The Czech or EU parent holds at least 10% of the shares of the subsidiary for at least 12 months.
- The subsidiary is a tax resident of the Czech Republic or another EU member state.
- Both the parent and the subsidiary have one of the legal forms listed in the Annex to the EU P/S directive.

Regarding dividends paid, provided that conditions above are met, the exemption also applies when dividends are paid by a Czech subsidiary to Switzerland, Norway, or Iceland.

Regarding dividends received, if the subsidiary is not a tax resident of the Czech Republic or another EU member state, exemption on dividends received by a Czech resident may be applied, provided that the subsidiary is a tax resident of a country...
where a DTT with the Czech Republic is in place, it has a legal form similar to a limited liability company or a joint stock company, it is subject to CIT at the nominal rate of at least 12% in a year when dividends are paid, and the time test of at least 10% for at least 12 consecutive calendar months is met.

**Interest and royalty income**
Interest and royalties received by Czech tax residents are included in the standard tax base subject to the 19% CIT rate.

Czech-source interest and royalty income received by Czech tax non-residents is subject to 15% WHT, unless subject to domestic exemption or a DTT stipulates otherwise. Interest and royalties paid by Czech tax residents to entities that are residents of countries outside of the European Union and European Economic Area, and countries with which the Czech Republic does not have an enforceable DTT or TIEA, are subject to 35% WHT.

Under domestic law, interest and/or royalty income is exempt if it is paid by a Czech resident to an EU resident recipient who is a beneficial owner of the interest and/or royalty income, provided that for at least 24 months before the payment:

- the payer is in at least a 25% parent-subsidiary or at least a 25% direct sister relation to the recipient of the income and
- the interest and/or royalty is not attributable to a Czech PE of the recipient.

The exemption is applicable subject to approval by the tax authorities.

**Exchange gains and losses**
Realised foreign exchange gains and losses are accounted for in profit and loss accounts and represent taxable revenues or tax-deductible costs, respectively. The same treatment applies to unrealised foreign exchange differences. However, in July 2012, the Supreme Administrative Court concluded in a particular case that unrealised foreign exchange gains do not represent taxable income. Following this court decision, the tax administration issued a recommendation to taxpayers saying that they should continue following the standard approach (i.e. include all foreign exchange differences to the tax base).

The default functional currency is the Czech koruna. A Czech company cannot opt for any foreign currency to be the functional currency for tax purposes.

**Foreign income**
Companies resident in the Czech Republic are taxed on their worldwide income. A Czech corporation is taxed on its foreign branch income when earned (accrual basis) and on foreign dividends when approved by general meeting.

The participation exemption regime described above may be applicable.

There is no controlled foreign company (CFC) legislation in the Czech Republic.

**Deductions**

**Depreciation and amortisation**
Methods of tax depreciation are prescribed by tax legislation and are independent from depreciation methods for accounting purposes. Tax depreciation is calculated
on an asset-by-asset basis, applying the straight-line or accelerated basis methods of depreciation at statutory rates. Under both methods, depreciation expense in the first year is lower than for subsequent years. The company may choose which method to apply to a new asset, but once the choice is made, it cannot be altered. All assets are classified into six groups, which determine the number of years over which the asset will be written off, as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation group</th>
<th>Minimum depreciation period (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Office machines and computers, tools</td>
<td>1</td>
<td>3</td>
</tr>
<tr>
<td>Engines, motor vehicles, machines, audio-visual equipment</td>
<td>2</td>
<td>5</td>
</tr>
<tr>
<td>Elevators, escalators, turbines, air conditioning equipment, electric motors, and generators</td>
<td>3</td>
<td>10</td>
</tr>
<tr>
<td>Buildings made of wood and plastic, long-distance lines, and pipes</td>
<td>4</td>
<td>20</td>
</tr>
<tr>
<td>Buildings (except for those listed in groups 4 and 6), roads, bridges, tunnels</td>
<td>5</td>
<td>30</td>
</tr>
<tr>
<td>Administrative buildings, department stores, historical buildings, and hotels</td>
<td>6</td>
<td>50</td>
</tr>
</tbody>
</table>

'Tangible assets' (i.e. assets that are subject to tax depreciation) are defined by tax legislation generally as assets with economic useful lives of greater than one year and acquisition prices higher than CZK 40,000. Certain assets, such as buildings, are always considered tangible assets.

Taxpayers are generally not obligated to depreciate a tangible asset for tax purposes every year. Depreciation may be interrupted in any year and continued in a later year without a loss of depreciation potential.

Tangible assets are generally depreciated by the taxpayer with ownership title. Certain exceptions apply, for instance, technical appreciation of a rented asset carried out by a tenant may be depreciated by that tenant, subject to certain conditions.

Depreciation can start only once the assets are put into use and comply with the requirements of specific laws.

Certain assets have special depreciation methods (e.g. moulds are depreciated based on expected life or number of products).

The value to be used as the basis for tax depreciation depends on how the asset is acquired, for example:

- Acquisition cost (construction and equipment costs, architect fees, legal fees, notary’s fees, etc.), if the asset is acquired for consideration.
- Internal costs incurred, if the asset is acquired or produced internally.

'Intangible assets' are defined by tax legislation as software, valuable rights, intangible results of research and development (R&D), and other assets regarded as assets for accounting purposes, provided that they:
Czech Republic

• were acquired from a third party or developed internally for the purpose of trading with them
• have an acquisition price of more than CZK 60,000, and
• have a useful life of greater than one year.

Intangible assets are amortised for tax purposes based on the number of years that the taxpayer has a licence for the assets, if the licence is for a limited number of years. Otherwise, amortisation for tax purposes will vary depending on the asset (e.g. software is amortised over 18 months, results of R&D is amortised over 36 months).

**Goodwill**

Goodwill arisen as a result of the purchase of a business (or its part) as a going concern may be evenly amortised for 180 months. Any other goodwill (e.g. arisen within a merger) is disregarded for tax purposes.

**Start-up expenses**

Start-up expenses exceeding CZK 60,000 with a useful life of more than one year accounted in line with Czech generally accepted accounting principles (GAAP) should be amortised evenly for a period of 60 calendar months.

**Interest expenses**

Interest as accrued and duly accounted for under Czech GAAP is generally tax deductible, with the following exceptions:

• Interest disallowed based on the thin capitalisation restriction (please refer to Thin capitalisation in the Group taxation section).
• Interest disallowed for its relation to income that is tax exempt or taxed outside the standard tax base.
• Interest disallowed due to its relation to holding a subsidiary.

**Bad debt**

Doubtful or bad receivables may be provisioned for under special rules. Generally, provisions may be created for trade receivables overdue for more than six months. Provisions of 100% may be created for debts duly registered in bankruptcy proceedings. For receivables, banks, insurance companies, and defined financial institutions have their specific system for provisioning.

**Charitable contributions**

Certain charitable donations are deductible. The minimum deductible donation is CZK 2,000 and the maximum deductible donation is 5% of the tax base (a maximum of up to 10% of the tax base is possible if gifts are granted to universities or R&D centres).

**Travel expenses and meal allowances**

Payments for travel expenses and meal allowances that are made to employees are tax-deductible, but only within the statutory limits.

**Fines and penalties**

Contractual fines and penalties are generally tax deductible on a cash basis. Non-contractual fines are not tax deductible.

**Taxes**

Road tax, real estate tax, and most other taxes, with the exception of income taxes, are deductible, as are social security contributions paid by an employer with respect to employees.
**Other significant items**

Fees paid to members of other statutory bodies of companies (i.e. board of directors of joint stock companies and cooperatives) for their services are deductible for tax purposes.

**Net operating losses**

Losses incurred in a tax year may be carried forward to offset taxable profits generated in the following five tax years. Losses may not be carried back. The possibility to utilise tax loss carried forward has been extended even to cross-border mergers (subject to certain limitations).

**Payments to foreign affiliates**

Generally, deductions may be claimed for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm's length.

**Group taxation**

Currently, the Czech Republic does not permit group taxation. Each company in a group is taxed individually. Consolidated tax base applies only for the general partners and their shares in profit of their general partnership.

**Transfer pricing**

For tax purposes, prices agreed between related parties have to meet the definition of the arm’s-length principle, and these prices are often subject to tax audits by tax authorities. The consequences of incorrect transfer pricing adjustments are tax exposure and penalties. In the case of companies receiving investment incentives, incorrect transfer pricing can cause a loss of the investment incentives. Generally, pricing methods as described in OECD guidelines should be followed.

Although there is no legal requirement to keep transfer pricing documentation, in practice it is strongly recommended to keep it as the taxpayer bears the burden of proof upon challenge of prices by tax authorities.

Taxpayers may request the tax administrators to issue an advance pricing agreement (APA) regarding progressing or future transactions between related parties.

**Thin capitalisation**

Thin capitalisation rules apply in the Czech Republic and may limit the tax deductibility of interest payments on debt financing from related parties as well as in certain cases from third parties (e.g. back-to-back financing with a bank interposed between two related parties).

Below is a brief summary of the thin capitalisation rules:

- The tax-deductibility test applies not only to interest but also to all so-called ‘financial costs’ on loans (e.g. interest plus other related costs, such as bank fees).
- Thin capitalisation applies only to related-party loans.
- The debt-to-equity ratio for related-party loans is 4:1 (6:1 for financial services industry), i.e. interest on such part of the related-party loans by which the principal of these loans exceeds four times the accounting equity (based on Czech GAAP) of the borrower is tax non-deductible.
- Unrelated-party loans (e.g. bank loans) guaranteed by a related party are not considered related-party loans for thin capitalisation purposes. If, however, a bank
provides a back-to-back loan to a Czech entity where the loan is provided to the bank by a related party, such a bank loan to the Czech entity is considered a related party loan.

- Interest on profit-participating loans is not deductible for tax purposes.

**Controlled foreign companies (CFCs)**

There is no CFC legislation in the Czech Republic.

---

**Tax credits and incentives**

**Foreign tax credit**

Foreign tax credits are available only under tax treaties. If credit is not available under a treaty, CIT paid abroad may be deducted as an expense in the following year, provided it is imposed on the income included in Czech taxable income.

**Investment incentives**

Investment incentives are available only to Czech entities (including Czech subsidiaries of foreign companies). Incentives include income tax relief, financial support for the creation of new jobs, financial support for training or retraining of employees, cash grant on capital expenditures, and a transfer of land at a specially reduced price.

The amendment to the Act on Investment Incentives introduced a new system of incentives, which includes changes in support of existing production in the manufacturing industry and incorporated the support of technology centres and strategic services.

**Research and development (R&D) allowance**

Up to 100% of specific R&D expenses (or costs) incurred in a given tax year may be deducted from the tax base as a special tax allowance. These costs are deducted twice for tax purposes: once as a normal tax-deductible cost and then again as a special tax allowance.

The following costs can be included in the R&D tax allowance:

- Direct costs (e.g. personnel costs of R&D engineers, consumed materials).
- Tax depreciation of fixed assets used for R&D activities.
- Other operational expenses directly related to the realisation of R&D activities (e.g. telecommunications fees, electricity, water, gas).

Only qualifying expenses are deductible for tax purposes and must be separately identified from other expenses (or costs). This allowance does not apply to costs of purchased services or intangible results of R&D acquired from other entities, except for expenses (or costs) incurred in connection with the certification of the results of R&D projects. In addition, expenses that were supported from public sources are also excluded.

Any non-utilised R&D allowance may be carried forward for three subsequent years.

A taxpayer may request a binding ruling with respect to R&D costs from the respective tax office in the event that the taxpayer is unsure of whether certain R&D costs are eligible for the allowance.
## Withholding taxes

Czech corporations are required to withhold tax on payments of dividends, interest, and royalties as follows:

**Notes**

1. The lower rate applies if the recipient is a company that owns at least a certain amount of the capital or a certain amount of the voting shares of the company paying the dividend directly. Non-treaty residents: Dividends paid to residents of countries outside of the European Union and European Economic Area, and countries with which the Czech Republic does not have an enforceable DTT or TIEA, are subject to 35% WHT.

2. The lower rate applies mostly in situations when the interest is received by the government or a state-owned institution or is paid by the government. Non-treaty residents: Interest paid to residents of...
countries outside of the European Union and European Economic Area, and countries with which the Czech Republic does not have an enforceable DTT or TIEA, is subject to 35% WHT.  

3. The lower rate applies mostly to cultural royalties. Non-treaty residents: Royalties paid to residents of countries outside of the European Union and European Economic Area, and countries with which the Czech Republic does not have an enforceable DTT or TIEA, are subject to 35% WHT.

---

**Tax administration**

**Taxable period**

A corporation may choose either a calendar year or an accounting year as its tax year.

**Tax returns**

Returns must be filed within three months of the end of the tax period.

A three-month extension of the filing deadline is available if a taxpayer is represented by a registered tax advisor or if the taxpayer is subject to a statutory accounting audit.

In some special cases, a filing deadline of less than three months may apply (e.g. upon merger or liquidation). This shorter deadline may, however, be extended if approved by the tax office.

**Payment of tax**

Tax payments are due on the same day as the filing deadline.

A company is obligated to make CIT advances based on its last known tax liability. The tax advances are paid semi-annually or quarterly, depending on the amount of the last known tax liability.

Upon filing a tax return, tax advances paid during the year for which the tax return is filed will offset the tax liability declared in the tax return. Any outstanding amount must be paid on the date the tax return is due. Any overpayment will be refunded upon request or may be credited against future tax liabilities.

**Tax audit process**

There is no statutory tax audit cycle. Entities are picked by the tax authorities based on selected criteria (e.g. tax loss position, huge marketing costs) or randomly.

**Statute of limitations**

The tax may be assessed within three years after the deadline for regular tax return filing. In certain cases (e.g. filing of supplementary tax return), such assessment period may be prolonged by one year, maximally up to ten years. Tax liability arisen as result of criminal action may be assessed any time within two years after the year of the relevant penal court decision becoming effective.

**Topics of focus for tax authorities**

The tax authorities seem to focus on marketing costs, intra-group relations, entities in tax loss position, and entities with tax investment incentives. In 2012, the Czech Republic introduced a so-called specialised tax authority for large businesses with turnover of over CZK 2 billion and financial institutions. It is expected that the specialised tax authority will be responsible for about 1,000 entities.

Significant developments

Taxation of dividends and interest paid by Danish entities to foreign group companies has been a hot topic in Danish taxation in the last few years. One of the main issues seems to be whether holding companies incorporated in the European Union (EU) can qualify as the beneficial owner of dividends and interest payments received from Danish group entities and, consequently, whether these payments can be remitted from Denmark without source taxation (withholding taxes [WHTs]).

Six cases have been publicly disclosed, of which the Danish tax authorities have prevailed in two. The remaining four, of which one was decided by the Danish High Court in December 2011, were won by the taxpayer.

The Danish tax authorities brought up these issues when they started to enquire into the tax implications related to inter-company payments and, more specifically, whether Danish entities have complied with the WHT requirements regarding dividends and interest. After these enquiries, numerous Danish entities belonging to international groups have been asked to pay substantial amounts of non-withheld taxes to the Danish tax authorities. Many of the Danish companies involved in these cases have disputed the claims.

The main focus of the Danish tax authorities seems to be private-equity-owned Danish groups, a number of which have been subject to the enquiries by the Danish tax authorities. However, industrial groups have also been subject to enquiries from the Danish tax authorities.

Several cases are currently being appealed through both the administrative and court system, and a final position regarding both interest and dividends therefore remains unclarified.

Rules enacted in December 2012, with effect from 1 January 2013, further tighten Danish rules on dividend taxation if a Danish company is a so-called ‘flow through’ entity. Under the new rules, a redistribution of dividends will be taxable in the hands of a foreign recipient company if the distributing Danish company has received the dividends from an underlying subsidiary. However, the tightening applies only if the Danish company cannot be considered the beneficial owner of the dividends distributed by the underlying company. Moreover, WHT is not levied if taxation of the distribution from the Danish company is abolished under the EU Parent-Subsidiary Directive.

The December 2012 changes also introduce dividend taxation on certain sales of shares between affiliated companies. The changes were enacted to avoid circumvention of Danish WHT. If, for example, company A sells shares in an affiliated company B to another affiliated company C, and compensation to company A is paid in other than shares, then the proceeds will be characterised as dividends for Danish tax purposes.
This only applies if company A, before the transfer of shares, cannot receive dividends from company B.

The Danish tax authorities have also increased their focus on tax deductions for costs related to the creation of tax exempt income, such as dividends from and capital gains on certain shares.

In November 2011, a landmark case regarding tax deductions for management fees was decided by the Danish Supreme Court. The taxpayer, a venture company, was allowed a deduction only because the fees generated income that, in great majority, was taxable in the hands of the venture company.

Laying down a condition that costs must be connected to taxable income in order to be deductible for tax purposes seems to be a novelty in Danish tax law, which may have a severe impact on venture funds etc. and even ‘ordinary’ holding companies. The exact fallout from this case depends on how liberal an interpretation the Danish tax authorities put on the ruling. In 2012, the ruling has without any doubt been a key item in the Danish tax authorities’ assessment of Danish holding companies.

In June 2012, a bill against so-called ‘zero-tax companies’ was passed with an overall purpose to increase Danish tax payment of multinational groups. The new rules introduce a limitation on the utilisation of tax losses carried forward. From the income year 2013 and forward, taxable income exceeding 7.5 million Danish kroner (DKK) can merely be reduced by 60% by utilising tax losses carry forward. Furthermore, the Danish tax authorities may in the future require a group to obtain a statement from an independent auditor as to whether anything causes the auditor to believe that the group’s transfer pricing documentation does not give a true and fair view or has not been prepared in accordance with Danish requirements.

**Taxes on corporate income**

According to Danish tax law, a territoriality principle prevails. Hence, a Danish company is not taxed on its worldwide income. Instead, income from a permanent establishment (PE) outside Denmark or from real estate located abroad is excluded from taxable income. Non-resident companies are taxed only on profits distributed from income sourced in Denmark.

The corporate income tax (CIT) rate is 25%.

**Hydrocarbon income tax**

A special CIT is levied on profits from the exploration and extraction of oil and gas on the Danish continental shelf at a rate of 52% under the new system applicable for licences granted after 1 January 2004. CIT (25%) is deductible in computing the hydrocarbon tax.

**Tonnage Tax Scheme**

Danish tax law provides for a special tax scheme for shipping entities.

The main principle of the Tonnage Tax Scheme is that qualifying shipping entities are not taxed on the basis of their actual income derived from their business but on a fictitious income based on the net tons carrying capability of their fleet used for purposes covered by the Tonnage Tax Act.
Denmark

The Tonnage Tax Scheme is available to Danish shipping entities organised as limited liability companies (Aktieselskab [A/S] or Anpartsselskab [ApS]), foreign shipping companies with the place of management and control in Denmark, and EU shipping companies with a PE in Denmark.

The scheme is available upon application to the Danish tax authorities. A decision to enter into the scheme is binding for a period of ten years.

As a general rule, group-related shipping companies based in Denmark must make the same choice regarding the Tonnage Tax Scheme. However, shipping companies that do not have the same management or operating organisation and do not conduct business in related fields may be exempt from the joint decision provision.

The Tonnage Tax Scheme is restricted to certain types of business activities. The entity must carry out commercial transportation of passengers or cargo between different destinations. The ships must be owned or chartered on a ‘bareboat’ or time-charter with a call/buy option by the company basis and have a minimum gross tonnage of 20 tons. Certain restrictions apply for ships chartered on a time charter basis without a call/buy option. The ships must be strategically and commercially run from Denmark.

Income from activities that are carried out in close connection with this business, such as the usage of containers and loading facilities, etc. may also be included in the Tonnage Tax Scheme. Ships used for exploration, diving, fishing, towing, sand dredging, etc. are specifically exempt from the scheme. The same applies for certain types of ships, such as barges, floating docks, etc. However, EU or European Economic Community (EEC) registered ships used for towage activities at sea (i.e. not in and around ports) during at least 50% of their operating time during the income year may be included in the tonnage tax system.

Ship operating companies may also use the Danish Tonnage Tax Scheme. A ship operator is defined as a company doing business with crew management and technical management of ships qualified for use in the tonnage tax system. It is a requirement that the ship operator has taken over the full operating responsibility and all obligations and responsibilities according to the International Safety Management codex.

**Taxable income**

The taxable income for the part of the business that qualifies for the Tonnage Tax Scheme is determined for each ship as a fixed amount of Danish kroner per 100 net tons (NT) per day according to the following:

<table>
<thead>
<tr>
<th>Ship net ton (NT)</th>
<th>Fixed amount per day (DKK per 100 NT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 1,000</td>
<td>7.80</td>
</tr>
<tr>
<td>1,001 to 10,000</td>
<td>5.60</td>
</tr>
<tr>
<td>10,001 to 25,000</td>
<td>3.35</td>
</tr>
<tr>
<td>Over 25,000</td>
<td>2.20</td>
</tr>
</tbody>
</table>

The income is taxed at the ordinary corporate tax rate (25%). No deductions relating to shipping income will be allowed. Special rules apply for financial income and financial expenses, and in relation to so called ‘thin capitalisation’. Income that does not qualify for the Tonnage Tax Scheme is taxed according to the general tax provisions in Denmark.
Denmark

Depreciation
Shipping entities that apply the Tonnage Tax Scheme from the time of their establishment may not deduct depreciation for tax purposes. Special rules apply for shipping entities that were already in existence when they elected to become subject to the scheme and for entities that elect to include certain other assets at a later point in time that were not previously subject to the scheme.

Gains on the sale of ships
Gains on the sale of ships that have not been used in the scheme prior to 1 January 2007 are tax exempt. The same applies to gains on the sale of contracts on the delivery of ships, provided that the ship was destined to be delivered after 1 January 2007. Gains on the sale of ships used in the scheme in prior years are taxable. The taxable gain is calculated as the sale price minus the purchase price plus improvements. Any losses on ships acquired and sold within the same income year as the income year in which a gain is realised may be offset against the gain.

Local income taxes
There is no local CIT or similar surcharge.

Corporate residence
A corporation is resident in Denmark for tax purposes if it is incorporated in Denmark and registered in the Companies Register as having a Danish place of business. Further, foreign companies having their actual place of management in Denmark are also tax resident in Denmark. The actual place of management is typically the place where the management decisions concerning the company’s day-to-day operations are made.

Permanent establishment (PE)
Non-resident companies are only liable to tax in Denmark on business profit if derived through a PE in Denmark. The existence of a PE is determined according to Danish tax law, which makes either a reference to a specific double taxation treaty (DTT) or to text similar to Article 5 of the Organisation for Economic Co-operation and Development (OECD) Model Convention.

Other taxes
Value-added tax (VAT)
The general VAT rate is 25% of the price charged (exclusive of VAT).
Exemption or a special reduced rate of 0% applies to a limited range of supplies (e.g. newspapers; hospital treatment; insurance and reinsurance services; most financial activities, including deposits of money, loans, and provision of loans).

Denmark was one of the first countries to introduce a VAT system. Since the first VAT Act came into force on 3 July 1967, the VAT legislation in Denmark has undergone several changes. The most important changes have been modifications to bring the legislation in line with the Council Directive 2006/112/EC on the common system of Value Added Tax.

Compared to the Directive, the Danish VAT legislation includes minor deviations and the use of various discretionary provisions.
Denmark

All supplies of goods and services by so-called ‘taxable persons’ (entrepreneurs who independently carry out economic activity) are subject to VAT, unless specifically exempted. The VAT exemptions are restricted to a limited range of services and goods but are nonetheless subject to discussions and complications in the Danish VAT jurisprudence. Transactions are subject to Danish VAT only when they are deemed to take place in Denmark. For the sake of tax neutrality, VAT is also levied on (i) imports (i.e. receipt of goods from non-EU territories), (ii) intra-Community acquisitions (i.e. receipt of goods from EU member states), and (iii) purchase of most types of services from abroad.

In order to avoid VAT being borne by anyone other than the final consumer, those who qualify as taxable persons can, with some exceptions, recover VAT charged by their suppliers according to the invoice/credit method, provided that the purchases relate to VAT taxable transactions. VAT is recovered either via the periodical VAT return (as a deduction in VAT payable) or by filing a special application.

In general, it is the supplier’s responsibility to collect and report VAT on supply of goods or services.

**Customs duties**
Denmark is a member state of the European Union, and, according to EU’s Common Customs Tariff, many goods imported into Denmark from outside the European Union are subject to customs duties. The rates of duty vary widely between goods.

**Excise duties**
According to Danish tax law, several excise duties are levied on different products. Some of the excise duties are enacted based on EU regulations while others are enacted according to domestic law only.

Excise duties are chargeable on a long list of goods, including hydrocarbon oil products, packaging, alcoholic drinks and tobacco, chocolate and products containing sugar, coffee/tea, etc.

The excise duty rates depend on the type of goods (e.g. chocolate, packaging) as well as, in some cases, the category of the goods (e.g. plastic bags, paper bags). Furthermore, many of the excise duty rates are regulated every year.

Only goods sold in Denmark (or taken into Denmark) are liable to the Danish excise duties. Companies importing goods into Denmark or companies producing goods in Denmark must be registered with the Danish tax authorities to settle the excise duties. This will often also be the case even though they are selling the goods on to other companies in Denmark.

The type of registration is decisive for when the companies must pay the excise duties. Companies just storing goods must register and settle excise duties in Denmark in spite of the fact that the goods are not being sold in Denmark.

As excise duties are a tax for national consumption in Denmark, a company can, in principle, obtain a reimbursement of the excise duties on products sold outside of Denmark. Companies are entitled to a reimbursement even if the company is not registered for the excise duties in question and even if the excise duties have been paid by previous resellers, etc.
Property taxes
Owners of non-residential property must pay land tax annually. The land tax rate is set by the municipalities and must be between 1.6% and 3.4% of the value of the land. Municipalities may also levy a special coverage charge on certain properties at a maximum of 1% of the value minus the value of the land. Land tax and coverage charge are deductible from CIT.

Stamp tax
Stamp tax is payable on a few documents, such as a deed of transfer of real estate (0.6% of the transfer sum). There is no stamp duty on transfer of shares.

Employer’s tax (social security charges)
The employer’s contribution to Arbejdsmarkedets Tillægspension (ATP) (i.e. old-age pension) charges is DKK 2,160 per annum for a full-time employee.

Companies that provide VAT-exempt services are liable to pay the employer’s tax, which is calculated on the total annual salary cost. The rate can be as high as 9.13%, which is the rate for banks and other financial institutions, the most significant sector paying the employer’s tax. This tax is deductible for income tax purposes.

Other than these taxes, an employer’s obligation for social security taxes is minimal. The main social security charge is an additional income tax of 8% on salaries and wages, which is borne by employees.

Environmental taxes/Energy taxes
Danish companies must pay environmental taxes, which were introduced to reduce companies’ energy consumption, discharges of fluids with an environmental impact, and emission. These taxes are paid to the companies that provide the energy, who then pay the taxes to the Danish tax authorities.

In general, almost all VAT-registered companies in Denmark can obtain a reimbursement of some of the environmental taxes on energy (also called energy taxes). The size of the reimbursement of the energy taxes depends on the type of energy used and to what extent the companies can deduct VAT.

Branch income
Danish branches and PEs of foreign companies are taxed under the same rules and rates as Danish resident companies. There is no branch remittance tax or other similar tax on branch profits. As a branch is considered to be the same legal entity as the headquarters, interest paid from the branch to the headquarters is not tax deductible.

Income determination
Taxable income generally is calculated as income determined for accounting purposes that is adjusted and modified for several items, as prescribed by the tax laws. Typical timing differences include reserves, work in progress, and depreciation.

Inventory valuation
Inventory is valued at acquisition cost, current market value, or manufacturing cost (if manufactured by the company itself) according to a first in first out (FIFO) principle.
The company may opt for different principles for each category of goods and may change principle from income year to income year, provided certain conditions are met.

**Capital gains**
Gains and losses realised on the sale of tangible and intangible assets, including goodwill, are generally included in taxable income. However, gains realised on the sale of shares are tax-exempt if the shares qualify as either ‘subsidiary shares’, ‘group shares’ or ‘tax-exempt portfolio shares’.

‘Subsidiary shares’ are shares held by a corporate shareholder that holds a minimum of 10% of the share capital in a subsidiary that is located in the European Union, European Economic Area (EEA), or a country with which Denmark has a DTT. A special anti-avoidance rule applies, which is targeted at Danish shareholders joining their shareholdings in order to reach the 10% threshold.

‘Group shares’ are defined as shares in companies with which the shareholder is jointly taxed or might be jointly taxed. The definition of a group is therefore the same as in the joint taxation rules and generally corresponds to the definition of a group for accounting purposes. The location where the companies are registered is irrelevant, as long as the companies are affiliated.

If the shares do not constitute group shares, subsidiary shares, or treasury shares, they constitute portfolio shares. As of 1 January 2013, portfolio shares are divided into two types: tax-exempt portfolio shares and taxable portfolio shares.

‘Tax-exempt portfolio shares’ consist of shareholdings less than 10% in unlisted companies.

The residual constitute taxable portfolio shares, unless held by the company that has issued the shares (gain on ‘own shares’ are also tax exempt).

Gains on taxable portfolio shares are fully taxable regardless of holding period, whereas losses on the sale of portfolio shares are generally tax-deductible.

Gains realised on the sale of real estate property are taxable, whereas losses are not tax-deductible unless the property is a building qualifying for tax depreciation. A loss realised on the sale of land and other buildings may be utilised only against taxable profits on the sale of real estate properties in the same year or may be carried forward infinitely.

A capital gain may, under certain conditions, be deferred if the capital gain is reinvested in properties. Reinvestment must be made no later than the income years following the income year of disposal.

Gains and losses on financial instruments generally are included in taxable income, according to the mark-to-market principle, which is required. There are special rules for losses on certain share-based contracts.

**Dividend income**
Dividends received on ‘subsidiary shares’ or ‘group shares’ are tax exempt regardless of the length of the ownership period, whereas dividends received on portfolio shares (both tax exempt and taxable) are fully included in taxable income.
Regardless of whether the shares qualify as 'subsidiary shares' or 'group shares', dividends are fully taxable if received from a foreign company that can deduct the dividends paid, unless a tax exemption is provided for in the EU Parent-Subsidiary Directive.

**Stock dividends**
Stock dividends may be distributed to shareholders free of tax, provided that the dividends are in proportion to the existing shareholdings (i.e. bonus shares).

**Interest income**
Interest income is generally included in the determination of taxable income.

**Foreign income**
As a general rule, foreign-source income, such as interest, is included in taxable income. However, income from a PE or real estate outside Denmark is excluded from taxable income.

The income of a foreign subsidiary may be taxed in the hands of its Danish parent company if the subsidiary constitutes a controlled foreign company (CFC). See the Group taxation section for more information.

**Deductions**

**Depreciation, amortisation, and depletion**
Tax depreciation need not be in conformity with book depreciation.

Annual depreciation allowances on machinery and equipment may be claimed under the diminishing-balance method at up to 25%. The depreciation base is the cost of fixed assets less sales proceeds from disposals and depreciation allowances previously claimed.

New machinery and equipment acquired between 30 May 2012 and 31 December 2013 can be included in the base with a supplement of 15%. Hence, 115% of costs of new fixed assets is added to the base and depreciated at up to 25% per year.

For ships, the depreciation rate is 20% in the year of construction and a 12% declining-balance basis in subsequent years.

Depreciation allowances on buildings (other than residential buildings and office buildings not adjoining an industrial building) may be claimed at up to 4% on the straight-line basis.

Airplanes, trains, and utility plants can be depreciated only at a 15% declining balance (presently subject to phasing-in rates).

Rails, telecommunications facilities, and certain other long-life plant and equipment can be depreciated only at a 7% declining balance.

Depreciation allowances that are recaptured as part of a capital gain on the sale of an asset generally are fully taxable.

Acquired goodwill and other intangible property rights can be amortised at up to one-seventh per year on a straight-line basis. Costs related to the purchase of patents or
Denmark

Know-how (including rights/licenses to utilise patents or know-how) can either be fully expensed in the year of acquisition or amortised over a seven-year period on a straight-line basis.

Certain restrictions regarding the depreciable value of goodwill apply in the case of group transactions. Goodwill on the purchase of shares cannot be amortised for tax purposes.

Depletion of the cost of acquisition or exploitation of natural resources is subject to special rules.

**Starts-up expenses**

No specific rules in Danish tax law govern the treatment of start-up expenses. Instead, these expenses are treated according to general tax law.

Companies may, under certain conditions, benefit from a scheme allowing for a cash payment equal to the tax value (25%) of negative taxable income, provided the negative income is created from research and development (R&D) costs (see the Tax credits and incentives section).

**Interest expenses**

See Thin capitalisation and interest relief limitations in the Group taxation section.

**Bad debt**

Companies may deduct loss on bad debt.

The main rule for calculation and taxation of companies’ gains and losses on receivables for tax purposes will be the inventory principle (i.e. taxation based on the difference in value at the beginning and end of the assessment year). Use of the inventory principle means that recognition of losses on these types of receivables for tax purposes is not conditional on a final loss having been ascertained.

Special rules apply to gains and losses on trade and inter-company receivables, as these, as a main rule, should be calculated according to realisation principles. Companies may, however, opt for the inventory principle for each category of receivables.

**Charitable contributions**

Companies may deduct a small amount in gifts to certain organisations approved by the Danish tax authorities and mentioned in the Danish tax authorities’ guidelines. The deduction cannot exceed DKK 14,500 per year.

Furthermore, companies may deduct gifts to cultural organisations that receive a maintenance grant for operating expenses from either the government or the municipality. According to these rules, there is no limitation in terms of value, but certain restrictions regarding the use of the gift are applicable.

Finally, gifts to certain charitable organisations within Denmark or the European Union may be deducted, provided the recipient uses the funds for research. Deductibility is conditioned upon the organisation being approved by the Danish tax authorities. No limitation in regards to amount is applicable.

**Fines and penalties**

Fines and penalties are, in general, not deductible, as these are not considered operational expenses.
**Bribes, kickbacks, and illegal payments**
Even if considered economically reasoned and custom in certain jurisdictions, amounts used for bribery of officials are not deductible.

**Taxes**
Taxes are non-deductible for CIT purposes, except for employer’s tax, non-recoverable VAT, land tax, and coverage charge (see the Other taxes section).

**Net operating losses**
Tax losses may be carried forward indefinitely.

New rules limiting the utilisation of tax losses carried forward have become effective for income years starting 1 July 2012 or later. According to the rules, taxable income up to DKK 7.5 million can always be eliminated by tax losses carried forward, whereas taxable income exceeding DKK 7.5 million merely can be reduced by 60% as a result of tax losses carried forward. For Danish tax consolidation groups, the rules apply for the group collectively. If losses are restricted, the limitation must be allocated to each of the companies according to complex rules.

Certain restrictions on the right to carry tax losses forward apply when more than 50% of the share capital or 50% of the voting rights at the end of the financial year are owned by shareholders different from those that held control at the beginning of the income year in which the tax loss was incurred.

Similarly, under certain circumstances, tax losses are cancelled if a Danish company receives a debt forgiveness or comparable transaction. However, there are numerous exceptions (e.g. inter-company transactions).

Tax losses may not be carried back and utilised in previous income years.

**Payments to foreign affiliates**
A Danish corporation can claim a deduction for royalties, management fees, and similar payments made to foreign affiliates, provided that such amounts are made on an arm’s-length basis and reflect services received. Interest at normal commercial rates paid to foreign affiliates generally will be allowed as a deduction but is subject to very complex thin capitalisation and interest relief limitation rules.

**Group taxation**

**Mandatory Danish tax consolidation**
A mandatory tax consolidation regime obligates all Danish resident companies and Danish branches that are members of the same domestic or international group to file a joint group tax return. The definition of a group generally corresponds with the definition of a group for accounting purposes. The tax consolidated income is equal to the sum of the taxable income of each individual Danish company and branch that are a member of the consolidated group.

The top parent company participating in the Danish tax consolidation group will be appointed the role of a so-called management company; this company is responsible for settling advance and final corporate tax payments of all group members.

With effect from 1 July 2012, companies included in a mandatory tax consolidation are jointly and severally liable for payment of corporate taxes. WHTs on dividends, interest,
and royalty payments made on 1 July 2012 or later are also covered by the joint and several liability. For companies with external minority shareholders, the company has a reduced liability and is merely liable if none of the other jointly taxed companies are able to pay the taxes.

**Elective cross-border tax consolidation**
A non-Danish subsidiary may be included as a member to a Danish tax grouping, provided that the group includes all of its foreign companies and branches in the Danish tax grouping. In effect, this all-or-nothing provision rules out the possibility for major international groups to have their Danish subgroup file a Danish group tax return that includes only certain hand-picked (typically loss-making) foreign group members.

If a general cross-border tax consolidation is established, it will be binding for ten years; however, there are certain possibilities of ‘breaking’ the ten-year period (e.g. in connection with takeovers).

The comments under Mandatory Danish tax consolidation with respect to the calculation of the tax consolidation income, ‘management’ company, etc. generally also apply to international tax consolidation.

**Transfer pricing**
Danish transfer pricing rules apply to transactions between related parties (e.g. inter-group transactions) whether the transactions are made between residents or non-residents. The rules apply when a company or person directly or indirectly owns at least 50% of the share capital or 50% of the voting rights in another company.

Companies are obligated to disclose in the annual tax return certain information regarding type and volume of intra-group transactions. Companies also are obligated to maintain detailed and extensive transfer pricing documentation to substantiate that intra-group transactions are conducted in accordance with arm’s-length principles. A company is subject to fines for failure to comply with the documentation rules. As of 1 January 2013, the penalty is DKK 250,000 per company per income year plus 10% of any increase in the taxable income as a result of a tax audit.

Furthermore, rules on an auditor’s statements regarding transfer pricing documentation are applicable as of 1 January 2013. The Danish tax authorities can require a company to obtain an auditor’s statement if certain criteria are met. The auditor must state whether any circumstances regarding the performed work causes the auditor to conclude that the transfer pricing documentation of the company does not provide a true and fair view.

**Thin capitalisation and interest relief limitations**
Danish resident companies and Danish branches of foreign companies are subject to three sets of restrictions, each of which may seriously limit or disallow Danish tax relief for financing costs. There is no recharacterisation of interest as dividends.

Firstly, there is the thin capitalisation rule. This rule works to disallow gross interest costs and capital losses on related party debt to the extent the overall debt-to-equity ratio exceeds 4:1. Related party debt is defined so as to include external bank debt if group member companies or shareholders have provided guarantees to the bank. This rule does not apply if the controlled debt is less than DKK 10 million. When calculating the 4:1 ratio, a special consolidation rules applies if two or more companies are considered affiliated (note that the definition of affiliated companies differs from the definition under the Danish rules on joint taxation).
Secondly, there is an asset-based rule. To the extent a Danish company on a stand-alone basis or, if part of a joint tax group, together with group companies has net financing costs in excess of DKK 21.3 million, tax relief may be obtained only within an amount equal to 3.5% (rate applicable for 2012) of the tax basis of certain assets of the group (rate applicable for 2013 is 3%). Net financing costs consist of, among other things, interest income/expenses, taxable gains/losses on debt, receivables and financial contracts, taxable gains/losses on shares, and taxable dividends.

Thirdly, there is an earnings before interest and tax (EBIT) based rule that works to limit interest relief to an amount equal to 80% of the Danish company’s/tax group’s taxable EBIT income. This rule applies the same definition of net financing costs as the asset-based rule, and it also allows for a minimum deduction of DKK 21.3 million in cases where EBIT is too low or negative.

**Controlled foreign companies (CFCs)**
According to the Danish CFC rules, a Danish company has to include in its taxable income the total income of a subsidiary, foreign or Danish, if such subsidiary qualifies as a CFC. A subsidiary qualifies as a CFC if all of the following criteria are met:

- The Danish company, together with other group member companies, directly or indirectly owns more than 50% of the capital or controls more than 50% of the voting rights in the subsidiary.
- More than half of the subsidiary’s taxable profits, as hypothetically assessed under Danish tax laws, are predefined CFC income types (mainly interest, royalty, capital gains, etc.).
- During the income year, the subsidiary’s CFC assets (assets, where the return is characterised as a CFC income type) make up more than 10% of the subsidiary’s total assets.

There is no black or white list that exempts subsidiaries resident in certain countries.

**Tax credits and incentives**

**Foreign tax credit**
According to Danish tax law, relief is generally available to credit foreign tax paid on non-Danish source profits against the Danish tax on the same profits. As Danish companies are not taxed on income from foreign PEs or properties, the rules have limited application.

For share holdings of 10% or more of the share capital in foreign companies, Denmark has further rules allowing ‘underlying’ tax relief in respect of foreign dividends, so that tax suffered at lower levels can be relieved where dividends flow to Denmark via a chain of companies. As Danish tax law, as a main rule, exempts dividends from companies resident in countries with which Denmark has a tax treaty in which the Danish recipient company holds 10% or more, this rule, as well, has a limited application.

**Capital expenditure incentives**
A small variety of tax incentives are available in the form of deductions for capital expenditures.

Danish tax law allows for an immediate write-off of capital expenditures for R&D. Alternatively, the taxpayer may choose to take tax depreciation in the same year and
Denmark

the following four years on a straight-line basis. Costs incurred in connection with the exploration for raw materials may also be fully deducted in the same year.

Companies in a loss making situation may not benefit from an immediate write-off of capital expenditures. However, companies have been granted the opportunity to apply to the Danish tax authorities for a payment equal to the tax value (25%) of negative taxable income. It is a condition that the negative taxable income relates to R&D costs. The rule does not cover costs incurred in connection with exploration for raw materials.

Tax payment according to this rule cannot exceed an amount of DKK 1.25 million (tax value of DKK 5 million). For companies participating in joint taxation, the limit of DKK 1.25 million applies for all companies in total.

Costs related to purchase of patents and know-how (including rights/licences to utilise patents or know-how) may either be fully expensed in the year of acquisition or amortised over a seven-year period on a straight-line basis.

------------------------------------------

**Withholding taxes**

**WHTs on payments to foreign corporations and non-resident aliens**

**Dividends**

Dividends paid to a parent company in another EU member state or a state with which Denmark has a DTT are exempt from WHT, provided that the shares qualify as subsidiary shares. The same applies for dividends paid on group shares (that are not also subsidiary shares, i.e. holdings below 10%), provided that the recipient company is resident within the EU/EEA.

Dividends paid on portfolio shares to a foreign shareholder are levied WHT of 27%. If the portfolio shareholder is situated in a country with which Denmark has a Tax Information Exchange Agreement (TIEA), the tax rate on the dividend is reduced to 15% and the difference between the higher WHT rate and the lower WHT rate may be reclaimed. However, the reduced rate does not apply if the shareholder is resident outside the European Union and together with related entities owns more than 10% of the capital in the Danish distributing company.

**Interest**

Interest generally is not subject to WHT unless paid to a foreign group member company that is tax resident outside the European Union and outside any of the states with which Denmark has concluded a tax treaty. In this situation, interest WHT is levied at 25%. Certain other exemptions apply, mainly relating to CFC taxation.

For recipients resident in countries within the European Union with which Denmark does not have a tax treaty, it is a condition that the paying company and the recipient company are associated as mentioned in the EU Interest/Royalty Directive.

**Royalties**

Royalties are subject to a 25% WHT. In most cases, the payer may reduce its withholding in accordance with the tax treaty applicable to the payee. Also, the EU Interest/Royalty Directive may provide an exemption from WHT if the payee is an immediate parent, sister, or subsidiary company resident in the European Union.

**Notes**

1. Denmark does not operate a system of WHT on dividends when the parent company holds:
   a. at least 10% of the share capital of the distributing Danish company, provided the receiving company is resident in a EU/EEA member state or a state with which Denmark has entered a double tax treaty (subsidiary shares) or
   b. less than 10% of the share capital in the distributing company, provided that the receiving company is an EU/EEA-resident and the distributing and the receiving company are affiliated companies (group shares).
2. Interest generally is not subject to WHT unless paid to a foreign group member company that is tax resident outside of the European Union and outside of any of the states with which Denmark has concluded a tax treaty. In this situation, interest WHT is levied at 25%.
3. Exceptions apply if the receiving company is directly or indirectly controlled by a Danish parent company or if the receiving company is controlled by a company resident in a state with which Denmark has a double tax convention and that company may be subject to CFC taxation. Finally, an exemption applies if the receiving company establishes that the foreign taxation of interest is not...
less than three-quarters of the Danish corporate taxation and that the interest is not paid to another foreign company subject to taxation that is less than three-quarters of the Danish corporate taxation.

4. Denmark has terminated its treaty with Spain and France with effect from 1 January 2009. The termination means that each country will tax the relevant income according to its domestic tax rules. New treaties are not expected to be agreed in the near future. Companies in Spain and France receiving dividends from a Danish company may, however, qualify for tax exempt dividends since they are EU member states.

5. The EU Interest/Royalty Directive may provide an exemption from WHT if the payee is an immediate parent, sister, or subsidiary company resident in the European Union.

6. Serbia has succeeded in the treaty between Denmark and Yugoslavia.

7. Different rates apply depending on the characteristics of the assets on which royalty is paid.

8. The 10% rate is applicable for royalties, whereas the 5% rate is applicable to fees for technical support.

---

**Tax administration**

**Taxable period**

Danish corporate taxpayers are taxed on an annual basis. Corporate taxpayers may choose a tax year that is different from the calendar year.

**Tax returns**

Tax returns are completed on the basis of audited financial accounts with adjustments for tax. Tax returns should be filed no later than six months following the end of the accounting year. Corporations with an accounting year-end that falls in the period from 1 January to 31 March must file a tax return no later than 1 August in the same calendar year.

The tax system, in practice, is based on self-assessment. Tax assessments are made automatically by the tax authorities on the basis of the tax return. However, the tax authorities may subsequently audit the tax return.

**Payment of tax**

CIT must be paid on a current year basis in two equal instalments due on 20 March and 20 November. The authorities request payments of 50% of the average of the last three years’ final income tax. In addition, voluntary additional payments may be made at the same dates; such voluntary payments are adjusted by 0.2% when set against the final tax bill.

The final tax bill is settled by 20 November in the following year. Underpaid tax is then payable by 20 November with a surtax of 4.3% of the tax amount (for the 2012 tax year). Overpaid tax is refunded by November of the following year with interest of 0.8% (for the 2012 tax year).

**Tax audit process**

The Danish tax system is based on self-assessment. Companies are, in general, subject to audit on a random basis, but some large companies/groups are subject to annual audit by the Danish tax authorities.

**Statute of limitations**

The general statute of limitations is 1 May in the fourth calendar year after that of the end of the relevant accounting period. This limitation is extended for another two years with respect to inter-company (transfer pricing) issues and certain tax-exempt restructurings.
Topics of focus for tax authorities
Once a year, the Danish tax authorities publish a list of topics subject to increased focus by the tax administration during their audit. Transfer pricing issues are on top of this list.

In general, all aspects of transfer pricing are in focus. However, specific topics certainly seem to have caught the tax authorities' attention. These are mainly transactions with group companies resident in countries with which Denmark does not have a tax convention, use and transfer of intangible assets, restructurings, and companies making continuous losses.

As described in the Significant developments section, attention has also been drawn to whether Danish entities have complied with the WHT requirements regarding dividends and interest.

Last but not least, the tax authorities have increased their focus on tax deductions for costs related to the creation of tax-exempt income, such as dividends from and capital gains on certain shares.

Other issues
Tax-free restructuring
Restructuring (e.g. mergers, demergers, share exchanges, drop-down of assets) can, in many cases, be carried out tax-free under the provisions of the EU Mergers Directive as implemented into Danish law. These types of restructuring can be carried out in a tax-exempt manner without prior approval from the tax authorities. However, several objective conditions must be fulfilled. Formation, merger, reorganisation, and liquidation expenses are mostly non-deductible.

Significant developments

There have been no significant corporate tax developments in Dominica during the past year.

Taxes on corporate income

Resident companies are taxed on gains or profits accrued directly or indirectly from all sources, whether in and out of Dominica, and are subject to tax at a flat rate of 30%.

Non-resident companies are taxed on Dominican-source income. The gross amount of such income is liable to 15% withholding tax (WHT).

Associations of underwriters are taxed at 30% on 10% of the gross premium arising in Dominica, and life insurance companies are taxed at 30% on 20% of the gross investment income arising in Dominica.

Corporate residence

Companies are regarded as resident if they are incorporated in Dominica or managed and controlled through a permanent establishment (PE) in Dominica.

Permanent establishment (PE)

A PE is defined in Dominica as a fixed place or premises through which the business is wholly or partly carried on. A PE includes:

- A place of management.
- A branch or office.
- A factory or workshop.
- Premises used as a sales outlet.
- A building site or construction or assembly project.
- The maintenance of plant and machinery for rental.

Other taxes

Valued-added tax (VAT)

VAT applies to practically all supply of services and import of goods or import of services, other than an exempt import. The tax is imposed at a rate of 15% of the value
Dominica, Commonwealth of

of every taxable supply by a taxable person in Dominica, except if the supply is classified as accommodations and diving activity, which carries a rate of 10%.

Certain transactions are zero-rated or exempt from VAT. Export sales by VAT-registered persons are zero-rated.

Certain supply of services is exempt from VAT, including services provided by financial intermediaries, schools, and medical practitioners. Exempt imports include goods imported by Dominicans returning home for permanent residence, motor vehicles imported by natural persons on change of permanent residence, unconditional gift of goods to an approved charitable organisation, other than for purposes of re-sale, etc.

Every registered person is required to file a tax return for each tax period with the Inland Revenue Division (IRD) within 20 calendar days after the end of the period, whether or not tax is payable in respect of that period. This return should be in the form prescribed by the IRD and should state the information necessary to calculate the tax.

**Customs duties**
Custom duties are charged on a wide range of imported goods. Exemptions are granted for raw materials and plant and machinery used in manufacturing and for certain items imported by hotels under construction, extension, or refurbishing projects.

**Excise taxes**
Excise tax is imposed on taxable goods (other than taxable goods previously imported into Dominica) removed for consumption in Dominica from a warehouse of a manufacturer registered or required to be registered and taxable goods imported into Dominica. Excise taxes are calculated either on the chargeable value of the goods or via the authorised tariff code.

For both importers and local manufacturers, the due date for payment is the 20th day of each calendar month.

Taxable goods include alcohol, cigarettes, petrol, and vehicles.

Tax rates are currently as follows:

* East Caribbean dollar
**Property taxes**
There are no property taxes administered by the IRD. However, there is municipal tax, which is collected by the town and village councils. The rate is 1.25% on the assessed value of the property.

**Stamp taxes**
Stamp tax is charged on any document that evidences a legal or contractual relationship between two or more parties. Additionally, many types of commercial and legal documents must be stamped, denoting the payment of taxes, which may be either at a fixed rate or at an *ad valorem* rate, depending, for example, on the value of the property transferred.

For a conveyance or transfer on sale of any property (except stock and debentures), a stamp duty of 6.5% on the value of the property, real or personal, transferred shall be paid, of which 2.5% shall be paid by the transferor and 4% by the transferred. Stamp duty, as set out above, shall also be paid on any stock or shares of a company or corporation whose assets consist of 50% or more real property.

**Branch income**
The tax rate on branch income is the same as that on income earned by resident companies. Every non-resident company carrying on business in Dominica is liable to WHT of 15% on such part of the profits of the business for any year of assessment as is remitted out of Dominica.

Where a controlled company fails to make a sufficient distribution in relation to any year of assessment, it is liable to pay tax on the undistributed profits of that year of assessment at the rate of 15%. A 'controlled company' means a resident company that is owned by not more than five shareholders, excluding the government and any company that is not itself a controlled company.

In determining the amount of a sufficient distribution, the Comptroller of the IRD shall give regard to the nature of the sources of its income and the financial resources available to it and may, where satisfied that it would be detrimental to the business of the company to regard the whole of its chargeable income after deduction of the tax payable thereon as a sufficient distribution, direct that such proportion thereof as the Comptroller may specify (hereinafter referred to as 'a retention allowance') may be retained for the purpose of the business without liability to tax.

**Income determination**

**Inventory valuation**
Stocks generally are valued at the lower of cost or market value. Obsolescence is permitted where it occurs, but there are no provisions to account for monetary inflation on inventory valuation.

**Capital gains**
There is no tax on capital gains except in instances where such gains comprise a portion of the income-earning activities of the business. In such instances, the corporate tax rate applies.
Dividend income
Dividends are subject to tax at a rate of 30%. However, there is a tax credit given that is equal to the amount by which the tax payable of a company has been increased by the inclusion of such dividend in its taxable income.

Interest income
The corporate tax rate applies to interest income. However, income earned on securities issued by member governments of the Eastern Caribbean Central Bank and any income accruing to the buyer, seller, or issuer from any transfer of securities that are listed on the Eastern Caribbean Securities Exchange through the facilities of that Exchange is tax exempt.

Any expenditure incurred for the purpose of producing exempt income is not deductible.

Foreign income
There are no provisions in Dominica for deferral of foreign-source income.

Deductions
Depreciation and amortisation
Capital allowance is available in Dominica.

Annual allowances for wear and tear, ranging from 3% to 20%, are granted on the acquisition of industrial and commercial buildings; on plant and machinery, including motor vehicles and furniture; and on fixtures and equipment.

The Comptroller of the IRD may also grant, on application, a higher rate for annual allowance for assets that have higher or abnormal wear and tear.

Goodwill
Neither the amortisation of impaired goodwill nor the related write-off of it is an allowable deduction.

Start-up expenses
All expenditures incurred in connection with incorporation costs for the establishment of a company are deductible unless considered as capital expenditure.

Interest expenses
Interest on any loan, including interest payable on debentures, is an allowable deduction to the extent that the amount of such loan was used for the purpose of producing assessable income.

Bad debt
Bad debt expense is deductible, provided it has been brought to account in generating the company's assessable income for any income year.

Charitable contributions
Charitable contributions are an allowable deduction when the contributions are made by way of subscription or donation to a business or professional organisation approved by the Comptroller of the IRD, where the Comptroller is satisfied that the organisation is a non-profit body established with the object of maintaining and advancing the standards of the business or profession.
**Fines and penalties**
Fines and penalties are not allowable deductions.

**Taxes**
Taxes are not allowable deductions, except taxes imposed on any immovable property used for the purpose of producing assessable income.

**Net operating losses**
Net operating losses may be carried forward up to a maximum five years. In carrying losses forward, the amount that can be claimed in any subsequent year is the full amount of the available loss. Losses cannot be carried back.

**Payments to foreign affiliates**
There are no restrictions on the deductibility of interest paid to foreign affiliates if the transaction is carried out at arm’s length and at commercial rates. However, deduction for management charges, which is subject to 15% WHT, is restricted to the lesser of such charges or 5% of all allowable deductions, excluding such charges and capital allowances.

**Group taxation**
Group tax filing is not allowed in Dominica.

**Transfer pricing**
Related party transactions are accepted if they are made on an arm’s-length basis. The Comptroller of the IRD has the power, under the Income Tax Act, to make any adjustment deemed necessary to place such transaction at arm’s length.

**Thin capitalisation**
No provision exists for thin capitalisation in Dominica.

---

**Tax credits and incentives**

**Foreign tax credit**
Dominica is signatory to the CARICOM Double Taxation Agreement (DTA) Order 2008, which provides relief against double taxation and seeks to prevent fiscal evasion with regard to taxes on income, profits, or gains. Where income has accrued to a resident and has been taxed in a foreign country with which there is no DTA, or is income to which a DTA, if there is one, does not relate, credit for tax on such income is allowed for the lesser of the tax payable in the foreign country or the tax charged under Dominican tax law.

**Tax holidays**
Tax holidays are available for manufacturing companies. The incentives are aimed at increasing the manufacturing base of Dominica, the level of exports, and the use of local materials and labour in production. An approved manufacturing enterprise will be granted a tax holiday up to a maximum of 15 years. In determining the length of the tax holiday, the extent of the local value added to approved products is taken into account.

**Investment incentives**
Income tax incentives and other fiscal concessions are provided under the Fiscal Incentives Act and other concessions granted by the Cabinet of Ministers. The extent
of the incentives and concessions granted are specific to the legislation or Cabinet conclusions and depend on the impact that the investment would have on local employment, exports, and the generation of foreign exchange earnings. The incentives granted include the following:

- Duty free importation of raw materials, machinery, components, and spare parts and other inputs used in manufacturing, and the duty-free importation of construction materials, equipment, and other inputs used in the construction and operation of hotels and other hospitality products.
- Income tax waivers of up to 100% of the taxable income of companies engaged in manufacturing, tourism, and agriculture and other employment generating activities, for periods of up to 15 years.
- Whole or partial waivers of stamp duties, Alien Landholding License fees, and WHT with respect to investments in specific areas, or in specific industries and activities.
- Export allowances for goods manufactured in Dominica and exported. Companies who engage in such activity are given tax exemption on the export of such goods up to a maximum of ten to 15 years.

### Withholding taxes

Resident corporations and persons that make certain payments of an income nature to residents or non-residents are required to withhold tax on these payments:

<table>

### Tax administration

**Taxable period**

Returns must cover a 12-month period, which may be changed only with the Comptroller's permission.

**Tax returns**

Tax returns must be filed within three months of the company's fiscal year-end. An extension of the filing date may be obtained.

Financial statements must be submitted with the returns, together with a schedule reconciling taxable income with book income and various other schedules of additional information.
The system is one of self-assessment. Upon receipt of the returns, the IRD examines the information provided and issues a notice of assessment at any time, subject to the statute of limitations. The IRD may also issue assessments in the absence of returns.

**Payment of tax**
Tax is payable in instalments on 31 March, 30 June, and 30 September in each income year, based on the preceding income year. Any remainder is payable on or before 31 March of the subsequent year.

**Tax audit process**
The IRD carries out audits of a selection of tax returns, usually at the taxpayer’s place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations, whether or not notices of assessment have been issued. The IRD has wide powers in determining the information it requires for these audits.

Within 30 days after the date of service of a notice of assessment or reassessment, the taxpayer may submit a written objection to the IRD on any matters in such assessment or reassessment. If the IRD confirms its assessment, the taxpayer may file an appeal with the Appeal Commission, which comprises four persons appointed by the Cabinet. A decision by that body may be further appealed to the High Court. An appeal against on an order from this Court may be made to the Court of Appeal.

**Statute of limitations**
Assessments are not final until six years after the end of the income year, within which period assessments may be made at any time. In cases of misrepresentation or failure to disclose any material fact, a reassessment can be made at any time.

**Topics of focus for tax authorities**
The government of the Commonwealth of Dominica is executing a Front End Tax Electronic Filing (E-Filing) System under which taxpayers will be able to file and pay their taxes online. The project is slated to be completed in July 2013.

Significant developments

Law 253-12 (‘Tax Reform Law’), enacted on 9 November 2012, introduced several changes to the Dominican Tax Code. The most significant changes are described below.

Corporate income tax (CIT) rate
The CIT rate was scheduled to be reduced from 29% to 25% for fiscal period 2013; however, the Tax Reform Law established a CIT rate of 29% for 2013, 28% for 2014, and 27% from 2015 on.

Dividend tax
A dividend tax of 10% was established to apply to the gross amounts distributed in cash or in kind, except profits capitalisations. Distributing entities should withhold the tax and remit it to tax authorities through its monthly Withholding Income Tax Return (Form IR-17). This tax reaches Dominican entities as well as foreign entities with presence in the country through branches/permanent establishments (PEs).

This new treatment of the dividend tax replaced the prior regime, which consisted of a 29% withholding tax (WHT) subject to a subsequent refund through a tax credit to the distributing entity in the same fiscal period the dividend takes place.

At the consolidated level, the effective tax rate, including the CIT rate of 29% (2012/13) plus the 10% dividend tax, is 36.1%.

Financial assets tax
The 1% tax on net financial productive assets applicable to financial institutions that was scheduled to end in June 2013 was extended to December 2013.

This is an annual tax applied on the credits portfolio and investments in securities (both net of allowances), with an exemption of 700 million Dominican pesos (DOP). Investments in securities issued by the Dominican government and Banco de Reservas de la República Dominicana are not taxable.

Indirect taxes

Tax on the Transfer of Industrialised Goods and Services (ITBIS)
As of 1 January 2013, the standard value-added tax (VAT, also known as ITBIS) rate increased from 16% to 18%.

Several goods previously exempt from this tax were included in the taxable base, with rates ranging between 8% and 18%.
Selective consumption taxes (Impuesto Selectivo al Consumo or ISCs)
ISCs applicable to alcoholic beverages, tobacco products, and fuels were increased (see Selective consumption taxes in the Other taxes section).

Interest treatment and thin capitalisation rules
The WHT on interest paid abroad is now fixed at 10%, instead of the prior 10% or 29% treatment.

A thin capitalisation rule has been introduced, limiting the deductibility of interest paid abroad. According to this rule, the maximum debt-to-equity ratio allowed to taxpayers is 3:1; over this threshold, the deduction of the expense is limited.

The Tax Reform Law also established a limitation on the interest expense deduction when the beneficiary is a non-resident located in a tax haven or in a low taxation jurisdiction, or when the interest is not otherwise subject to tax by the recipient.

Transfer pricing
The Tax Reform Law extended the scope of the transfer pricing rules, establishing that all transactions with related parties will be subject to documentation and reporting requirements, even in the case of local related parties. Transactions with third parties located in a tax haven or low taxation jurisdiction are also covered by these rules.

The Law also incorporated transfer pricing rules that were previously established in a general ruling issued by the tax authorities.

The new rules also opened the window for the establishment of advance pricing agreements (APAs) in general or on an individual basis, eliminating the requirement of negotiating such agreements on a group/sector basis.

Free trade zones (FTZs)
The income tax applicable to FTZ entities that sell goods or services in the local market was increased from 2.5% to 3.5% on the gross proceeds.

The Tax Reform Law prohibited issuing new approvals for Special FTZ entities. In the future, all FTZ entities that start operations should be located in a free zone park, which are specific geographic locations existing across the country.

The dividend tax will be applied to FTZs, unless this tax represents an unfair competition with the countries that are part of the Central America-Dominican Republic-US Free Trade Agreement (DR-CAFTA).

Asset tax
The asset tax has been reduced from 1% to 0.5% and will be abolished in 2016, provided that the tax burden goal of 16% is met in 2015 (see below); consequently, property tax will be applicable to real estate owned by juridical persons.

Pursuant to Article 26 of Law 01-12 about the National Strategy for Development, by 2015 the Dominican Republic's tax burden should reach 16% of gross domestic product (GDP), the pre-requisite for the abolishment of the asset tax in 2016.
Dominican Republic

**Special regimes**

**Tourism (Law 158-01)**
Exemptions to resident physical/juridical persons that invest in tourism projects (directly to the promoters/developers) within the specified tourist development zones have been eliminated.

**Cinematography (Law 108-10)**
Fiscal credit benefit of expenses made by physical/juridical persons that produce cinematographic/audiovisual works in the Dominican Republic may only be used by the producer in order to comply with tax obligations.

**Renewable energy (Law 57-07)**
This tax reform eliminates:

- Income tax exemption granted to companies generating renewable energy approved by the National Power Board (Consejo Nacional de Electricidad).
- Financing incentives granted to social and cultural institutions that develop renewable energy resources for community use.

The credit on investment expense granted to self power producers is reduced to 40% (previously 75%).

**Tax amnesty**
Law No. 309-12 was enacted on 7 December 2012 with the objective of granting the possibility of a tax amnesty to taxpayers regarding the following taxes: income tax, VAT, asset tax, transfer tax, property taxes, and customs taxes. The main benefits of the tax amnesty include closing fiscal periods up to 2011 for tax audit purpose and waiving of penalties regarding existing tax liabilities, including those appealed by the taxpayer.

**Taxes on corporate income**

The Dominican Republic follows a territorial concept (i.e. resident companies, branches, and PEs are generally subject to taxation on Dominican-source income only); consequently, the tax treatment for corporations, partnerships, and limited liability companies is similar in most aspects.

As of 31 December 2012, the CIT rate is a flat rate of 29%. The CIT rate will decrease to 28% for 2014 and to 27% for 2015 on. Please note that the asset tax is an alternative minimum tax that is payable when it is higher than a company's CIT liability (see Asset tax in the Other taxes section).

Dividends remitted abroad or paid locally are subject to a WHT of 10% as a definitive tax payment.

**Local income taxes**
In the Dominican Republic, local government income taxes do not apply.

**Corporate residence**
A company is resident when it is registered or incorporated under the laws of the Dominican Republic. Foreign entities are considered as domiciled when they are
registered in the Dominican Republic as a branch or PE, and they are subject to local tax in the same manner.

**Permanent establishment (PE)**
According to local tax legislation, which follows the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital, a PE is defined as a fixed place of business where a foreign entity or individual performs all or part of its activities, such as:

- An address in the Dominican Republic.
- Office.
- Branches.
- Workshop.
- Mine.
- Petroleum or gas well.
- Quarry or any other natural resource extraction place.
- Assembly projects, including supervision activities of such projects.
- Construction/supervision activities derived from the sale of machinery and equipment when its cost exceeds 10% of the sale price of such equipment.
- Consulting services, provided these exceed six months within the same fiscal period.
- Representatives or dependent or independent agents, when these act on behalf of the entity.

---

**Other taxes**

**Tax on the Transfer of Industrialised Goods and Services (ITBIS)**
ITBIS is a VAT applied to industrialised goods (movable) and services at a rate between 8% and 18%, with exemptions established by law to certain goods and services.

Exempt goods include a wide variety of goods, among which are basic products (eggs, milk, grains, live animals, frozen meats), seeds for planting, fruits and vegetables, medicine, insecticide and pesticides, books/magazines, educational material, wheelchairs, and prosthesis.

Exempt services include educational, health, financial (including insurance), pensions, ground transportation of people and cargo, electricity, water and waste pick-up, housing rental and personal care, and exported services.

A 0% rate applies to exports, including sales to FTZs.

**Tax on gross sales made by FTZs to local market**
A 3.5% tax was created on the gross sales of goods and services made by companies in Dominican FTZs to individuals and legal entities in the local market.

**Customs duties**
Customs duties are assessed at various rates depending on the nature of the goods and their country of origin. Free trade agreements exist (e.g. DR-CAFTA) that decrease the custom duty rates for goods imported from the member countries.

**Selective consumption taxes (Impuesto Selectivo al Consumo or ISCs)**
ISC is applied to the acquisition or import of certain goods and services.
Dominican Republic

There is an ISC for alcoholic goods and cigarettes, adjusted by inflation annually:

- Alcohol: ranges from DOP 356.84 to DOP 437.56 for every litre of pure alcohol.
- Cigarettes: DOP 40 for a 20 pack and DOP 20 for a 10 pack.

There is a 16% \textit{ad valorem} ISC for fossil fuel and petroleum derivatives. A DOP 2 tax (adjustable by inflation on a quarterly basis) is charged per gallon of regular and premium fuel and diesel.

There are ISCs that vary based on the product, which range from:

- 10% on the transfer of alcoholic beverages, applied on the retail price. Imports and transfers made by local manufacturers are accountable for this tax.
- 20% on the transfer of tobacco products, applied on the retail price. Imports and transfers by local manufacturers are accountable for this tax.
- 19.5% to 130% on the consumption of certain imported goods (listed in the law) that are considered to be non-essential.
- 10% on telecommunications services.
- 16% on insurance services.
- 0.0015% on the value of cheques or wire transfers made through financial entities (this tax does not apply to cash withdrawals or credit card use).

**Asset tax**

Asset tax/Law No. 557-05, modified by Tax Reform Law No. 253-12, imposes a 0.5% tax on total assets, net of depreciation, amortisation, and bad debt reserves. Share investments in other companies, land in rural areas, immovable property pertaining to livestock and agriculture, asset revaluations, and tax advance payments are excluded from this tax base.

The asset tax is a minimum tax filed and liquidated through the annual CIT return (Form IR-2) and paid applying the following rules:

- CIT is allowed as a credit against the asset tax.
- If CIT is greater than the asset tax, the obligation to pay the asset tax is cancelled and CIT is paid instead.
- If CIT is less than the asset tax, the difference (in order to complete the asset tax value) shall be paid in two equal instalments as follows:
  - First instalment shall be paid during 120 days subsequent to closing date.
  - Second instalment shall be paid within six months after first quote’s due date.

Entities may request a temporary exemption from the asset tax. Entities that require large capital (among other requirements established by General Ruling 3-06) may make such a request, which should be submitted at least 90 days before the filing due date. The local internal revenue service shall evaluate the merits of the request and approve or deny, as appropriate.

If the entity has an income tax credit arising from excess advance payments, it may request the refund of such balance be applied against the asset tax.

In the case of financial institutions, power generation and distribution companies, pension fund entities, and stock brokerage companies, the tax is calculated based on the fixed assets book value.
According to Rule 07-2007, construction companies may seek exemption from the asset tax, provided that such entities meet the requirements established in this rule.

Pursuant to the Tax Reform Law, the asset tax will be abolished in 2016, provided that the tax burden goal of 16% of GDP is met in 2015.

**Real Property Transfer Tax**
The Real Property Transfer Tax is assessed at a basic rate of 3% on any transfer of ownership of real estate.

**Stamp taxes**
Stamp taxes have been abolished in the Dominican Republic.

**Financial assets tax**
A 1% tax per year on net financial assets (which should not exceed net taxable income before expenses generated by this tax, calculated on the total average interest-earning financial assets for the year, and applies to the net financial assets over DOP 700 million) was established on 29 June 2011 for a two-year period, and was subsequently extended by Law 253-12 until 31 December 2013, for multiple banks, savings and loans associations, savings and credit banks, and credit corporations. The amount paid for this tax will constitute a deductible expense for CIT purposes if the tax is paid in the fiscal year.

Companies under the financial assets tax must pay a monthly payment equivalent to one-twelfth the rate of 1% over the productive assets of the month.

**Branch income**
Branch profits are taxed at the same rate as corporate profits. Before December 2012, branch profit remittances to its headquarters were not subject to WHT, provided that the corresponding annual CIT had been paid. However, Tax Reform Law No. 253-12 imposes a 10% WHT as definite payment on remittances abroad.

**Income determination**

**Inventory valuation**
The last in first out (LIFO) method of inventory valuation is established for tax purposes. Other methods may be authorised upon request.

Conformity between book and tax reporting is not required.

**Capital gains**
Capital gains are added to ordinary taxable income and subject to the CIT rate. Capital gains are defined as the difference between the sale price of an asset and the acquisition or production price, adjusted for inflation.

**Dividend income**
Dividend distributions in cash are subject to a 10% WHT as a sole and definite payment.

**Stock dividends**
Stock dividends are not subject to taxation.
Dominican Republic

**Interest income**
Interest income is considered as part of taxable income; in the case of non-resident non-domiciled taxpayers, the tax should be paid through WHT.

**Foreign income**
Dominican-resident companies, branches, and PEs are subject to taxation on income from Dominican sources and on income from foreign sources arising from investments and financial gains. Tax determined on income from foreign source is subject to a credit mechanism. Taxes paid in the country where the income is originated can be credited up to the amount of the tax payable in the Dominican Republic on the same income.

---

**Deductions**

**Depreciation and amortisation**
Depreciation allowances on fixed assets are determined by the declining-balance method at the following rates:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>5</td>
</tr>
<tr>
<td>Office furniture, fixtures, computers, light vehicles, etc.</td>
<td>25</td>
</tr>
<tr>
<td>Other assets not specified</td>
<td>15</td>
</tr>
</tbody>
</table>

The fiscal book value is adjusted by the annual inflation rate.

Amortisation of intangible assets (e.g. patents, author’s rights, drawings, franchises, and contracts without set expiration date) is not deductible.

**Goodwill**
Goodwill is not deductible.

**Start-up expenses**
The Dominican tax legislation does not establish specific provisions regarding the deduction of start-up expenses. The general deductions rule is the accrual method.

**Interest expenses**
Interest expenses are deductible, provided they are associated with the acquisition, maintenance, and/or exploitation of taxable income-generating assets.

The interest expense deduction is limited when the beneficiary is a non-resident located in a tax haven or in a low taxation jurisdiction, or when the interest is not otherwise subject to tax by the recipient. Thin capitalisation rules may also limit the deduction (see Thin capitalisation in the Group taxation section).

**Bad debt**
Bad debts are deductible only in the year the loss is suffered. Authorisation may be obtained to use an alternative method, which consists of creating a provision allowing the deduction only in the year the bad debts qualify as doubtful, up to 4% of the balance of the accounts receivable at year-end.

**Charitable contributions**
Donations made are not tax deductible in the Dominican Republic.
Fines and penalties
Fines and penalties are considered non-deductible expenses.

Taxes
Income taxes are not deductible. Other taxes can be deductible; however, interest and surcharges imposed on taxes are not deductible in general.

Other significant items
For tax purposes, the following significant items should be considered:

- Changes in methods are not allowed without prior approval.
- Bonuses paid to employees within 120 days after the end of the taxable year are deductible for the year just ended.

Net operating losses
The carryforward of losses of legal entities can be used to offset profits up to the fifth year following the year in which the losses were generated, with a maximum amortisation of 20% in each year. For the fourth year, the deduction allowed should not exceed 80% of the net taxable income. In the fifth year, the percentage is 70%.

There is no carryback loss mechanism in the Dominican Republic.

Payments to foreign affiliates
Payments to foreign affiliates for royalties, interest, or service fees are deductible, provided that the 29% WHT was paid (10% on interest).

Group taxation
Group taxation is not permitted in the Dominican Republic.

Transfer pricing
Tax Reform Law No. 253-12 incorporates local groups and transactions into the transfer pricing scope and includes regulations on the matter, as previously contained in General Norm 04-2011.

The changes made to Article 281 of the Dominican Tax Code (DTC) are:

- Expansion of the transfer pricing scope, stating that related party transactions carried out between Dominican companies, regardless of whether the companies are foreign-owned or not, or with companies located in areas of low or no taxation, must be carried out in accordance with the prices agreed in the transfer of goods or services between independent parties.
- These provisions shall also apply to transactions carried out by Dominican companies with related companies located in the country that is benefiting from a favourable tax regime.

The tax authorities, following the procedures in the current tax laws in the exercise of its powers of determination, verification, or investigation, may challenge the values declared by taxpayers if such values:

- do not correspond to the economic reality of the operation involved, or
- differ substantially from independent companies under similar conditions.
Additionally, Tax Reform Law No. 253-12 states that persons will be considered related parties or related persons or entities, resident or not in the Dominican Republic, when among them there is a financial dependency or capital of both is mostly owned by one of them, following (but not limited to) these criteria:

- One party participates, directly or indirectly, in the management, control, or capital of the other.
- The same natural persons, companies, or firms participate, directly or indirectly, in the management, control, or capital of such parties.
- An individual, company, or companies have the ability to influence the business decisions of the company.
- When participation is defined in terms of the share capital or control of voting rights, a direct or indirect participation of at least 25% will be necessary in either case.

Regarding the advance pricing agreement (APA) regime, Tax Reform Law No. 253-12 provides the possibility of requesting an APA from the tax authorities that sets the values of the transactions carried out between related parties if made prior to completion. It also states the following:

- The APA may be approved, denied, or modified by the tax authorities with customer acceptance and is valid within 36 months after approval.
- Subsequent agreements may be valid for up to 36 months; in cases in which it has expired and no new agreement exists, the existing agreement shall continue in effect until it is approved before a new APA.
- The tax authorities may challenge the taxpayers’ declared values included within the APA when they do not correspond with the criteria agreed in the APA and apply the penalties established in the DTC.
- For economic sectors, whose business has particular ties or high linkage between the parties, the tax authorities may determine a minimum price or profit margin. Once such price or margin is set, according to the sector, the companies covered by the scheme will act as independent companies. The price or minimum tax profit margin of the taxpayer may be calculated taking into account the total income, the assets used in the business operations during the fiscal year, the total amount of costs and expenses, and/or other sector variables.

Finally, taxpayers must file an annual Informative Tax Return of transactions between related parties, which shall contain detailed information of each transaction, the related party’s identification, transfer pricing method, etc.

**Thin capitalisation**

According to the thin capitalisation rule introduced on 1 January 2013, the maximum debt-to-equity ratio allowed to taxpayers is 3:1; over this threshold, the deduction of interest expense is limited.

**Tax credits and incentives**

In the Dominican Republic, tax incentive laws exist for the following.

**Tourism incentives**

Law 158-01 on the Promotion of Tourist Development for New or Low Development Locations in Provinces and Areas with Great Tourist Potential, and for the Creation of the Tourist Promotion Official Fund, enacted on 9 October 2001, establishes special incentives and benefits to individuals or companies, residing in the Dominican Republic,
that promote or invest capital in any tourist activity described in said Law. In order to
benefit from said Law, a special Resolution shall be obtained from the Council for the
Promotion of Tourism. However, Tax Reform Law No. 253-12 eliminated exemptions
to resident physical/juridical persons that invest in tourism projects (directly to the
promoters/developers) within the specified tourist development zones.

**Alternative energy incentives**

Law 57-07 provides significant incentives for the use and development of renewable
sources of energy. The renewable energy sources subject to this law include bio-fuel,
bio-diesel, ethanol, and wind, solar, and other renewable energy. However, Tax Reform
Law No. 253-12 eliminated the following incentives.

- Income tax exemption granted to companies generating renewable energy approved
  by the National Power Board (*Consejo Nacional de Electricidad*).
- Financing incentives granted to social and cultural institutions that develop
  renewable energy resources for community use.

Additionally, the credit on investment expense granted to self power producers was
reduced to 40% (previously 75%).

**Industrial renovation and modernisation incentives**

The main objective of Law 392-07 about competitive development and local industrial
manufacture is to promote policies and support programs for industrial renovation and
innovation so to diversify local production, create industrial parks, and link the country
to international markets. Main benefits include VAT exemption on import of machinery
and materials, priority on imports granted at customs, and accelerated depreciation.

**Industrial FTZ operations**

Law 8-90 about Export FTZs was created to promote employment, production, and
economic growth. Entities that would like to benefit from said Law shall be engaged
in manufacture/service within a confined space (FTZ park). Special FTZ classification
entities, which are entities located outside an FTZ park (e.g. call centres), were
abolished with Law No. 253-12.

**Border development incentives**

Law No. 28-01, dated 1 February 2001, creates a special development frontier zone for
industrial, agro-industrial, agriculture/livestock, metalmechanic, free zone, tourism,
metallurgical, and energy companies that exist at the time of promulgation of said
law, and those that may be installed in the future within the border of the Dominican
Republic and Haiti. Main incentives include 100% exemption on CIT and VAT, as well as
custom duties.

**Foreign tax credit**

Taxes paid abroad on foreign income taxed in the Dominican Republic may be credited
up to the amount of the Dominican tax liability generated by such income. The credits
should be determined on a case-by-case basis.

**Withholding taxes**

**WHT on dividends**

Dividends paid in cash to resident and non-resident individuals or corporations are
subject to a WHT of 10%.
The WHT on payments to foreign corporations, which are not permanently established in the Dominican Republic, are as follows:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>Dividends and interest</th>
<th>Royalties</th>
<th>Technical assistance</th>
<th>Other services</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-treaty, basic</td>
<td>10</td>
<td>29 (1)</td>
<td>29 (1)</td>
<td>29 (1)</td>
</tr>
<tr>
<td>Treaty (Canada)</td>
<td>18</td>
<td>18</td>
<td>29 (1)</td>
<td>29 (1)</td>
</tr>
</tbody>
</table>

Notes

1. 29% WHT rate to be reduced to 28% in 2014 and 27% from 2015 on.

**WHT on transfers of shares**

There is a 1% WHT on the value of the transfer of shares received by the seller. Foreign entities are not exempt from this obligation. In this case, WHT may be made by a person appointed as WHT agent by the tax authorities.

Such WHT is a payment on account against capital gain tax, payable by the seller through the Form IR-2 (legal entities) or Form IR-1 (individuals), as applicable. However, if they can substantiate that the transaction will not generate a capital gain or that the 1% WHT would generate a capital loss, they may request the tax authorities, no later than 30 days prior to withholding filing/payment’s due date, to be exempt from this obligation.

This 1% WHT should be filed and paid to the tax authorities through the monthly WHT return (IR-17 Form) within the first ten days of the month following the payment to the seller. In case the purchaser is an individual, the 1% WHT is not applicable.

**WHT on interest payments**

Financial institutions are appointed as 1% WHT agents on the value paid or credited on account for interest payments of any nature to legal entities.

The interests paid by financial institutions will constitute a deductible expense for tax purposes, provided the WHT was made.

In addition, this rule obligates financial institutions to provide a monthly electronic file, directly to the tax authorities or through the Banks Superintendency, containing all the information related to the interest payment, including the date, value, and identity of the beneficiary.

**Tax administration**

**Taxable period**

Corporate bylaws should establish as year-end one of the following: 31 December, 31 March, 30 June, or 30 September. Once the year-end is selected, any change should be authorised by the tax authorities.

**Tax returns**

The Corporate Annual Tax Return (Form IR-2) must be filed within 120 days after year-end. Tax authorities may allow extensions of up to 60 days, upon request.
Tax returns are based on self-assessment and must be filed on electronic forms supplied by the internal tax department.

**Payment of tax**
The balance of any tax due must be paid no later than the due date for filing the return. Corporations domiciled in the country and PEs of foreign enterprises shall be obligated to make advance payments on the 15th day of every month for tax related to the period in progress.

**Tax audit process**
The audit cycle is not established by law or practice. During the statute of limitations, tax authorities select the taxpayers subject to audit based on internal criterion.

**Statute of limitations**
The statute of limitations is three years, and five years if the entity has been notified of a tax audit, counting from the filing due date.

**Topics of focus for tax authorities**
Among the topics of focus are: non-deductible expenses, withholdings, VAT, and proportionality of VAT credits.
**Ecuador**

---

**Significant developments**

Corporate income tax (CIT) rates were reduced from 23% in 2012 to 22% in 2013.

International Financial Reporting Standards (IFRS) are in force for all entities. Local tax authorities have established that, for CIT purposes and its corresponding pre-payments, companies are obligated to follow these accounting principles.

A new tax reform was introduced with the aim to improve the collection of funds to support those who are in poverty. The reform introduced changes to CIT prepayment for financial institutions, 12% value-added tax (VAT) on financial services, and bank secrecy could be lifted in favour of tax authorities. Rates on the foreign assets tax were also changed.

---

**Taxes on corporate income**

Resident entities are taxed on their worldwide income. Non-resident entities are subject to tax on Ecuadorian-source income only.

Taxes on corporate income are levied at the following rates for fiscal year 2013:

<table>
<thead>
<tr>
<th>Type of income</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Distributed or undistributed profits of local corporations and branches</td>
<td>22</td>
</tr>
<tr>
<td>Reinvested profits of local corporations and branches</td>
<td>12</td>
</tr>
</tbody>
</table>

**Local income taxes**

No other government taxes on income are imposed on companies.

---

**Corporate residence**

Corporate residence is determined by the place of incorporation. For foreign branches, it is the place stated in the domiciliary deed.

**Permanent establishment (PE)**

According to the tax legislation, a company can be deemed to have a PE in Ecuador if it maintains any place or fixed centre, within the country, in which a foreign company develops all or part of its activities.

The corresponding regulations point out that a PE also exists when a foreign company maintains, within the country, a person or an entity that acts on its behalf and
habitually exercises an economic activity. It contemplates several instances where this is applicable, among them:

- A person with legal representation, which is normally granted through a power of attorney or through a legalised decision by the company and includes the capacity to legally act on behalf of the company.
- A person working under a contractual relationship for a foreign company to carry out economic activities on behalf of that company.
- A centre for the direction of the activities of the foreign company.
- A branch, agency, or office that acts on behalf of the foreign company.
- An office for the provision of technical consultancy services related to contracts that are executed in the country.

**Other taxes**

**Value-added tax (VAT)**

VAT is levied at the rates of either 12% or 0% on the transfer of goods, import of goods, and the rendering of services, as well as on services rendered within the country or imported. Royalties and intangible property imported or locally paid are also levied with a 12% VAT.

The following are transactions exempt from VAT:

- In-kind contributions to capital of companies.
- Inheritance and assets obtained from liquidation of companies.
- Transfer of business as a whole, amalgamations, mergers, takeovers, and spin-offs.
- Donations to public entities and non-profit organisations.
- Transfers of shares and securities.

Goods and services that are subject to 0% rate are explicitly listed in the law.

Among others, the following goods are taxed at a 0% rate upon either importation or local transfer of ownership:

- Most agricultural goods and foodstuff, when these remain in their natural state; this includes refrigerated or packaged goods that have not undergone further processing. Also included in this category are milk, meats, sugar, salt, bread, butter and margarine, flour, and cooking oil.
- Drugs, medicines, and other pharmaceutical products, including raw materials for their production.
- Fertilisers, insecticides, animal foods, and similar products, including the raw materials required for processing such goods.
- Agricultural machinery and equipment.
- Goods that are exported.
- Paper, books, magazines, and newspapers.

Among others, the following services are taxed at a 0% rate:

- Transportation of persons and cargo, except air transportation of persons and local air transportation of cargo.
- Book printing services.
- Housing rental.
Ecuador

- Water, electric, sewage, and other public services, including garbage collection.
- Exported services.

The 12% VAT paid on imports and local purchases can be deducted from the 12% VAT charged on sales or services rendered. VAT paid on raw materials, fixed assets, or components required for the production of goods or rendering of services is also creditable when the final product is considered taxable at 12%. On the other hand, VAT paid on raw materials, services, components, or fixed assets necessary for production of export goods is recoverable.

The 12% VAT paid in the acquisition of goods and services utilised for the production or rendering of services levied at 0% VAT is not creditable. Therefore, it will be considered as part of the cost.

Companies designated as ‘special taxpayers’ (qualified as such by the tax authorities, which, in recognition of its economic importance defined in special parameters, contributes to the effective collection of taxes, subject to special regulations regarding the compliance of their formal duties and payment of taxes) are required to withhold 30% of VAT applicable on their purchases of goods taxed at 12%, and 70% of VAT applicable on their purchase of services taxed at 12%, except with respect to services rendered by professionals, in which case 100% of VAT charged must be withheld.

In the importation of services, VAT at 12% must be self-determined and withheld at 100% by the local entity. This VAT is creditable.

**Customs duties**

Since Ecuador is a member of the Andean Community, goods to be imported are classified under the Common Nomenclature of the Andean Countries participating in the Cartagena’s Agreement (NANDINA) Pact, which is based on the Customs Cooperation Council Nomenclature (also known as the Brussels tariff nomenclature). Most consumer good imports pay 25%, while intermediate goods are usually imported at a 10% or 15% rate. Raw materials and capital goods generally pay 0% to 5%. Ecuador has negotiated exceptions under the Andean common tariff that allow lower duties on certain capital goods and industrial inputs. There is duty-free import of agricultural goods and equipment.

The price listed on the commercial bill or invoice is the basis for the assessment of duties, except when the Central Bank of Ecuador (CBE) considers the listed price unreasonable, in which case market prices in arm’s-length transactions will be used. The burden of proof lies with the importer.

In addition to import duties, all imports are subject to 12% VAT and other minor taxes that do not exceed 1%. Charges are based on the cost, insurance, and freight (CIF) value of the merchandise.

All Ecuadorian imports and exports are subject to inspection by authorised international verification companies operating in the country (there are some imports exempt from verification). Goods are appraised for value, quantity, quality, and weight at the port of origin.

**Special consumption tax (Impuesto a los Consumos Especiales or ICE)**

ICE is imposed on domestic and imported goods which are explicitly listed in the law. This tax is levied at a progressive rate from 5% to 35% on certain automobiles and 15% on airplanes, helicopters, and boats. The taxable basis on cigarettes and alcoholic
beverages is obtained by the number of produced or imported cigarettes or degrees of alcohol, respectively. It must be paid monthly and is collected upon sales. The ICE tax base for imported goods is the ad valorem value.

**Foreign assets tax (Impuesto a los Activos en el Exterior)**
The tax base for the foreign assets tax is the average monthly balance of cash deposits held in foreign entities by private entities registered in the stock market and regulated by the Superintendent of Banks and Companies. The monthly tax rate is 0.25% (0.35% for assets held in tax haven jurisdictions).

**Remittance tax (Impuesto a la Salida de Divisas)**
Remittance tax of 5% is imposed on the transfer of money abroad in cash or through cheques, transfers, or courier of any nature carried out with or without the mediation of the Ecuadorian financial system, included transfer from foreign bank accounts. Dividends are exempt from this tax, under certain considerations.

**Stamp taxes**
No stamp taxes are levied in Ecuador.

**Redeemable Tax on Non-Returnable Plastic Bottles**
A tax is levied on the bottling of beverages in non-returnable plastic bottles utilised for containing alcoholic and non-alcoholic drinks, beverages, soft drinks, and water. In the case of imported beverages, this tax is levied upon their customs clearance for home use.

For each plastic bottle levied with this tax, the rate is up to two cents of a United States dollar (USD 0.02). This amount is fully reimbursed to whoever collects, delivers, and returns the bottles.

Taxpayers of this tax are the bottlers of drinks contained in plastic bottles and importers of drinks in plastic bottles.

Milk products and medicines filled in plastic bottles are exempt from this tax.

This tax is not considered as a deductible expense for CIT purposes.

**Environmental Tax on Vehicle Pollution (ETVP)**
ETVP is levied to offset environmental pollution caused by the use of ground transportation motor vehicles.

Taxpayers of ETVP are individuals, undivided inheritances, and national or foreign corporations who are proprietors of ground transportation motor vehicles.

There are several vehicles exempt from this tax, including government vehicles, public transportation of passengers, school buses, taxis, ambulances, moving hospitals, vehicles regarded as ‘classical’, electric vehicles, and those destined for the use and transportation of handicapped individuals.

The taxable base of the ETVP corresponds to the cylinder capacity of the vehicle motor, expressed in cubic centimetres, and a percentage related to the potential level of environmental pollution provoked by motorised vehicles in connection with the vehicle’s motor’s years of antiquity.
Ecuador

**Social Security contributions**
Employers and employees pay contributions to the Social Security at the rates of 11.15% and 9.35%, respectively, on the minimum monthly taxable wages as established for the different contributing categories by the Social Security. Such categories are revised annually.

**Labour profit sharing**
Although it is not considered a tax, companies are obligated to pay 15% of their pre-tax earnings to their employees. This payment is considered a deductible expense for CIT computation purposes.

**Municipal taxes**

**Municipal asset tax**
The municipal asset tax is levied on all individuals and companies required to keep accounting records in accordance with Ecuadorian tax legislation. This tax is levied annually at a rate of 1.5 per thousand (or 0.15%) of total assets less current and contingent liabilities, as shown on the balance sheet.

**Municipal real estate tax**
The city governments assess an annual municipal property tax, which ranges between 0.25 per thousand and 5 per thousand (0.025% to 0.5%) of the commercial value of the property, as determined by valuation carried out by the city government, for both urban and rural properties (rural property is taxed at a maximum of 0.3%).

**Municipal tax on capital gain in the transfer of real estate (Plusvalía)**
The real estate transfer tax applies to the transfer of real estate. It is taxed at 10% of profits.

**Branch income**
Distributed or retained branch profits are taxed at a 22% rate. No further taxes are payable when profits are remitted to headquarters, except if located in a tax haven country. Re-invested profits are levied at a 12% CIT rate. Companies must increase their share capital within the following fiscal year to be beneficiaries of the CIT rate reduction.

**Countries and territories considered as tax havens by tax authorities**

---

**Income determination**

**Inventory valuation**
The valuation of inventories is not specifically treated in the tax law, IFRS must be applied.

**Capital gains**
Occasional gains from stock sales are tax exempt, and gains from investment funds and investment trusts are CIT exempt, as long as the income has been taxed at source. Gains on the sale of fixed assets are added to the taxable base and levied at regular CIT rates, except gains derived from occasional sales of real estate, which are tax exempt.

**Dividend income**
Dividends received by a resident company or foreign company, not domiciled in a tax haven, from a resident company are tax exempt.

**Interest income**
In general terms, interest income is considered as part of the CIT base for Ecuadorian entities.

**Foreign income**
Foreign-source income is considered exempt for tax purposes if the company demonstrates that the income tax was paid abroad. Income generated in tax haven jurisdictions is not considered to be part of this exemption and should be added to regular income.
**Ecuador**

**Deductions**

As a general rule, payments on operations that exceed USD 5,000 should be made through an institution of the financial system; otherwise, such operations will become non-deductible.

**Depreciation and amortisation**

Straight-line depreciation applies, at rates specified by law. The director of the Internal Revenue Service of Ecuador can authorise higher rates of depreciation in cases such as obsolescence, excessive use, and faster than expected wear-out of assets.

Annual depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Real estate (except land), aircraft, naval crafts, and similar property</td>
<td>5</td>
</tr>
<tr>
<td>Facilities, machinery, equipment, and furniture</td>
<td>10</td>
</tr>
<tr>
<td>Vehicles, trucks, and tractors used for construction</td>
<td>20</td>
</tr>
<tr>
<td>Computer equipment and software</td>
<td>33.33</td>
</tr>
</tbody>
</table>

Depreciation rates apply to the cost of assets.

In the case of vehicles, if at the time of purchase of the vehicle its appraisal exceeds USD 35,000, the deductibility on the excess will not apply, unless it is an armoured car or a vehicle exempt from the tax on vehicles. The limitation on the deductibility will also not apply in the cases of taxpayers that have as their only activity the car rental business.

Intangible assets are amortised either within the terms specified in the contract or over a 20-year period.

**Goodwill**

There are no specific rules in Ecuador about goodwill. However, it can be amortised as an intangible asset.

**Organisational and start-up expenses**

Organisation, experimentation, and preoperational expenses are to be amortised over five years at the rate of 20% per year.

**Interest expenses**

Interest on debts incurred for business purposes are deductible.

In general, foreign loan interests are deductible for CIT purposes to the extent that the credits are registered before the CBE and the interest rates do not exceed the referential rates established by the CBE.

Interest paid for loans granted by a related party are subject to withholding tax (WHT) at 22%.

According to thin capitalisation rules, interest payments for foreign loans granted by a related party are deductible only if the foreign debt does not exceed 300% of the entity’s equity. In case of branches, the ratio applies considering the total of the assigned equity. Credits granted by the head office to its branch are not considered as loans; consequently, any financial cost related to it is non-deductible.
If the above mentioned criteria are not met at the moment of the registration of the loan before the CBE, the excess will not be deductible for CIT purposes. This does not eliminate the obligation of the WHT on the total amount of the interests.

Interest paid on loans obtained from non-resident financial institutions is deductible and not subject to WHT unless the interest rate is higher than the referential interest rate established by the CBE. In such cases, any excess is subject to a 22% WHT. The above mentioned rules do not apply for financial entities domiciled in tax haven countries; in such cases, interest expense is non-deductible.

**Bad debt**
If the bad debt provision is less than 1% of the portfolio granted in the year, it will be deductible. Any excess will be non-deductible.

**Charitable contributions**
Payments for charitable contributions are non-deductible for CIT purposes.

**Fines and penalties**
Interest and fines paid as penalties imposed on late payments of tax obligations and on CIT payments are not deductible for CIT calculation purposes.

**Taxes**
Taxes, rates, and levies related to the generation of taxable income, as well as contributions to the Social Security system, are deductible.

**Net operating losses**
The carryforward of losses is allowed to a maximum of five years, with an amortisation limit of 25% per year over the taxable base. There is no loss carryback.

**Payments to foreign affiliates**
In most cases, payments made abroad are deductible, as long as income taxes have been withheld (at the rate of 22% over the taxable base). Professional fees, royalties, commissions, or any payment made abroad is subject to WHT at a rate of 22% over the taxable base. Payments on imports are deductible and are not subject to WHT.

**Group taxation**
Group taxation is not permitted in Ecuador.

**Transfer pricing**
The transfer pricing regime in Ecuador is based on the Organisation for Economic Co-operation and Development (OECD) guidelines. Related party transactions must be carried out at arm’s length. Formal documentation requirements exist.

**Thin capitalisation**
A thin capitalisation rule on foreign loans granted by related parties at a 3:1 ratio over equity must be considered. For branches of a foreign corporation, only capital must be taken into account.
Ecuador

**Tax credits and incentives**

*Foreign tax credit*
There are no provisions in Ecuador for a foreign tax credit. In general terms, income taxed abroad is considered as exempt income, with some special exceptions.

*Handicapped employee and new employee increases*
An amount equivalent to 150% and 100% of remunerations of handicapped and new employees, respectively, can be considered an additional deduction for income tax calculation purposes. New employees must be working with the company for at least six months.

*CIT exemptions*
Investments made by new companies located outside the cities of Quito and Guayaquil, in specific sectors determined by law, will have a five year CIT exemption.

*Tax credit on remittance tax paid*
5% remittance tax paid on imports of raw material and goods included in a list issued by the authorities and used for the production of other goods and services can be considered as a tax credit for CIT computation purposes.

**Withholding taxes**

Prepaid dividends are subject to a 22% WHT.

Dividends paid to non-resident entities generally are not subject to WHT. However, dividends paid to non-resident entities in tax haven countries are subject to 13% WHT at source.

Interest paid on loans obtained from non-residents is subject to a 22% WHT unless reduced by tax treaty. Royalties paid to a non-resident are subject to 22% WHT unless reduced by tax treaty.

Revenues from occasional services provided by non-resident individuals are levied at 22% WHT. Payments made abroad to non-resident individuals and companies are subject to a 22% WHT. Other payments made abroad, other than dividends or profits, are subject to a 22% WHT.

Periodically, the Internal Revenue Service of Ecuador establishes WHT percentages on local payments, which are not greater than 10%. Current rates are 1%, 2%, 8%, and 10% witholding.

**Tax treaties**
As a member of the Andean Community, Ecuador has adopted Decision 578, which provides relief from double taxation for individual or company members. Furthermore, Ecuador has similar tax treaties with Belgium, Brazil, Canada, Chile, France, Germany, Italy, Mexico, Romania, Spain, Switzerland, and Uruguay. Treaties with China and South Korea are under negotiation.

WHT rates may vary from 0% to 15%, depending on the nature of the payment.
Tax administration

Taxable period
The fiscal year is the calendar year.

Tax returns
The tax system operates on the basis of self-assessment, with subsequent inspection by the tax authorities.

Tax filing deadlines begin on 10 April and continue up to 28 April. The tax return due dates are determined by the ninth digit of the company’s Tax Identification Number (TIN).

Payment of tax
Local tax authorities have established that for CIT purposes, and its corresponding pre-payments, companies are obligated to follow IFRS accounting principles.

 Corporations are required to keep accounting records and must make CIT prepayments in two equal instalments in July and September, based on the following calculation:

The sum of 0.4% of the taxable income, 0.4% of total assets, 0.2% of total equity, and 0.2% of deductible expenses from the last fiscal year.

The final CIT obligation cannot be lower than the total amount of the tax prepayment calculated; there are minimum exceptions to this rule. The final CIT payment is due between 10 April and 28 April.

Tax audit process
In general terms, tax authorities look at the consistency of the information delivered by the taxpayers and information reported by third parties. Tax authorities can issue communications in the order to require explanations on any detected inconsistency. Additionally, accounting inspections can be performed.

Statute of limitations
Fiscal authorities have three years from the date of filing to start proceedings for tax audits or assessment and collection of taxes.

The statute of limitations is extended from three to six years if the corresponding tax returns have not been filed or are incompletely filed. A tax audit can be reopened, verified, or amended within one year from the date of completion.

Topics of focus for tax authorities
Tax authorities usually focus on formal compliance requirements and consistency of information filed.
**Significant developments**

During the past year, new amendments were made to the Egyptian tax laws, including the Income Tax Law, Sales Tax Law, and Stamp Tax Law.

**Corporate income tax (CIT)**

A unified CIT rate of 25% has replaced the 20% rate that applied to annual net profits less than 10 million Egyptian pounds (EGP) and 25% that applied to amounts equaling or exceeding the EGP 10 million threshold.

Upon changing the legal form of an Egyptian company, capital gains realised from revaluation (including acquisition gains) are now subject to CIT. The company is entitled to defer the payment of tax in certain instances.

If the taxpayer included a tax amount in the tax return that is less than the finally assessed tax, the taxpayer will now be liable to a fine based on the non-included percentage (see Payment of tax in the Tax administration section).

**Sales tax**

Please note that the following amendments to the Sales Tax Law are still proposed amendments being discussed in the Parliament and have not been approved:

- Sales tax rate on telecom services will increase from 15% to 18%.
- Sales tax rate on alcoholic beverages will increase from 100% to 200%.
- Tobacco excises will increase from EGP 1.25 to EGP 2.00 for locally manufactured products and to EGP 2.50 for imported products.
- Sales tax rate for construction steel will increase from 8% to 10%.
- Sales tax rate for cement will increase from 5% to 10%.
- Soft drinks will be subject to 25% sales tax, and will be transferred to schedule no. 1 (where the sales tax imposed on the inputs is non-recoverable).
- Imported capital equipments for production purposes will be exempted from sales tax, according to a ministerial decree to be issued.

**Stamp tax**

The new law levies a 0.1% tax on both the seller and the buyer for any Egyptian or foreign securities sale transactions, either listed on the stock exchange or not. The party responsible for settling the sale transaction will be obligated to withhold and remit the tax due within the first 15 days of the month following the sale transaction.

Stamp tax on advertisements increased from 15% to 20%.
The stamp tax on financial facilities will be due on the highest debit balance of each quarter.

Banks will be obligated to settle the stamp tax due during the first seven days (previously ten days) following the end of each quarter.

**Real estate taxes**
The new Real Estate / Property Tax Law will be effective starting from 1 July 2013.

**Social insurance**
The monthly social insurance basic salaries threshold has increased from EGP 912.5 to EGP 987.5, while the variable salaries threshold has increased from EGP 1,050 to EGP 1,380.

**Taxes on corporate income**
Resident companies are taxed on worldwide income. Non-resident corporations and partnerships pay tax on income derived from their permanent establishments (PEs) in Egypt.

The CIT rate in Egypt is 25% on the net profits of a company.

The above rate applies to all types of business activities except for oil exploration companies, whose profits are taxed at 40.55%. In addition, the profits of the Suez Canal Authority, the Egyptian Petroleum Authority, and the Central Bank of Egypt are taxable at a rate of 40%.

**Local income taxes**
In Egypt, there are no other local income taxes for corporate income other than those mentioned throughout this summary.

**Corporate residence**
Foreign corporations and partnerships are classified as residents of Egypt if they meet one of the following conditions:

- The entity is established according to the Egyptian law.
- The government or a public authority owns more than 50% of the capital of the entity.
- The effective place of management is in Egypt.

The executive regulations of the law indicate that Egypt is considered as the effective place of management if the entity meets any two of the following conditions:

- Daily managerial decisions take place in Egypt.
- Members of the board of directors hold their meetings in Egypt.
- At least 50% of the board members or managers reside in Egypt.
- The major shareholders (owners of more than 50% of the shares or voting rights) reside in Egypt.

**Permanent establishment (PE)**
The PE concept is defined in the Income Tax Law as follows:
Egypt

- Headquarters.
- Branch.
- Building used as sale outlet.
- Office.
- Factory.
- Workshop.
- Places of extraction of natural resources.
- Farms.
- Building site, construction or assembly point, installations, supervisory activities of the same.
- An agent who has the power to ratify contracts on behalf of a foreign company.
- An independent broker or agent who is proved to have dedicated most of one’s time during the year in the interest of a foreign company.

A foreign company that is deemed to have a PE risk, according to the Egyptian Companies Law, should incorporate a legal entity in Egypt.

There are several legal forms existing under the Egyptian Companies Law from which a foreign company can choose to incorporate, and these are: joint-stock company, limited liability company, branch, or a representative office.

**Other taxes**

**Sales tax**
The standard sales tax rate is 10% of the value of commodities (except for those referred to in special schedules of the law) and 5% to 10% for specific services. Some examples of the commodities subject to sales tax rates other than the standard 10% rate are as follows:

- Cement: 5%.
- Specific types of televisions and fridges: 25%.
- Air conditioners: 25%.

The Sales Tax Department is responsible for assessing the tax on the sales of locally produced goods and imported goods, except for those exempted by a special decree.

Consequently, all natural persons and legal entities are required to collect general sales tax and remit it to the Sales Tax Department. This includes manufacturers and providers of taxable services and every importer of commodities or taxable services.

There are some amendments that might be made to the sales tax law. However, they are still in the proposed phase and not approved yet. There is no timeframe regarding the introduction of a value-added tax (VAT).

**Customs duties**
The liability for customs duty rests with the person who is importing the goods from abroad.

Customs duty rates on imported goods range from 5% to 40%, with the exception of vehicles for which different rates apply.

Where entities import machines and equipment as capital assets, and to establish the company’s project, the machines and equipment will be charged customs duty at 5%.
Component parts, which are imported to be assembled in Egypt, are assessed customs duty based on the complete product. Then, it is reduced by a percentage ranging from 10% (if the local content of the final product is less than 30%) to a maximum of 90% (if the local content exceeds 60%).

Machines, equipment, and similar capital assets (with the exception of private motor cars) imported on a temporary basis are subject to fees at 20% of the original customs duty for each year or fraction of a year during which they remain in Egypt until they are exported.

There is also a proposed new law regarding this issue, which is currently at the draft stage.

**Excise taxes**
There are no excise taxes in Egypt.

**Real estate taxes**
The Real Estate Tax Law takes into consideration the different variables that can affect the value of a property, such as location, value of similar buildings, and the economic situation of the district in which the property is located. This is to be updated every five years.

Real estate tax is levied annually on all constructed real estate units. This covers land and building, excluding plant and machinery.

Such tax is assessed based on the rental value of the land and building, and these value assessments are set by the committees, after approval of the Minister or whomever the Minister delegates, and published in the Official Journal. Based on the announcement, any taxpayer can appeal the rental value assessment.

The real estate tax rate is 10% of the rental value, and the calculation of the rental value differs for residential units and non-residential units. Specific percentages of deductions are provided by the law to account for all the expenses incurred by the taxpayer, including maintenance costs.

The new Real Estate / Property Tax Law will be effective starting from 1 July 2013.

**Stamp tax**
There are two distinct types of stamp tax, which are imposed on legal documents, deeds, banking transactions, company formation, insurance premiums, and other transactions, as follows:

- The nominal stamp tax is imposed on documents, regardless of their value. The tax rate for items such as contracts is EGP 0.9 for each paper.
- Percentage or proportionate stamp tax is levied based on the value of transactions.

An annual proportional tax at the rate of 0.4% is imposed on the highest debit balance in each quarter of credit facilities and loans and advances provided by Egyptian banks or branches of foreign banks during the financial year. The bank and the customer each bear half of the tax.

Loans from other establishments are not subject to this tax.
The new law levies a 0.1% tax on both the seller and the buyer for any Egyptian or foreign securities sale transactions, either listed on the stock exchange or not, excluding Treasury bills and bonds. The Misr for Central Clearing, Depository, and Registry (MCDR) or the stock exchange administration are entities obligated to collect the tax due resulting from all sales and purchase transactions and remit it to the competent tax authority within the first 15 days of the month following the sale transaction.

Stamp tax is imposed on advertisements at the rate of 20% (previously 15%).

**Social insurance (employer’s contribution)**
The social contribution of the employer is 26% of the basic salary (up to EGP 987.5) and 24% of the variable salary (up to EGP 1,380).

**Branch income**

Branches of foreign corporations operating in Egypt receive tax treatment identical to that of corporate entities for the results of their activities in Egypt.

A branch, but not a subsidiary, may deduct a ‘head office charge’ of an amount of up to 10% of its taxable income.

**Income determination**

**Inventory valuation**

Egyptian generally accepted accounting principles (GAAP) should be applied to inventory valuation, and all methods that are acceptable by Egyptian GAAP can be used. The methods acceptable are the same as those acceptable under International Financial Reporting Standards (IFRS).

**Capital gains**

A foreign company is taxed on all capital gains realised in Egypt. However, capital gains on the sale of Egyptian securities listed on the Egyptian Stock Exchange are not taxable.

Capital gains are not taxed separately; they are considered as part of the company’s income and taxed accordingly (i.e. at the 25% CIT rate) after deducting all tax deductible expenses.

**Dividend income**

Dividends distributed by a company residing in Egypt are not subject to corporate taxes. Conversely, dividends that non-resident companies distribute are subject to the Egyptian corporate tax, after deducting foreign taxes paid abroad.

**Stock dividends**

Stock dividends receive the same treatment as ordinary dividends.

**Interest income**

Interest expenses are deducted from interest income when calculating the interest income to be included in taxable income.

**Rent/royalty income**

Rent/royalty income are not taxed separately; they are considered as part of the company’s income and taxed accordingly (i.e. at the 25% CIT rate).
**Foreign income**
Income from any source, domestic or foreign, received by a corporation within Egypt is subject to corporate tax. The scope of tax covers the activities carried out inside and outside Egypt, which are administered or managed within Egypt.

There is no provision for deferring income earned abroad.

**Deductions**
In order for expenses to be acceptable for tax deduction, such expenses must be:

- actual and supported by documents
- business related, and
- necessary for performing the company's activity.

**Depreciation and amortisation**
The tax law set the depreciation and amortisation rates for tax purposes to the following:

- 5% of the cost of purchasing, establishing, developing, and renovating buildings and establishments is deductible based on the straight-line method.
- 10% of the cost of purchasing, developing, and improving intangible assets is deductible based on the straight-line method.
- Computers, information systems, software, and data storage sets are depreciated at a 50% rate on a declining-balance method.
- All others assets are depreciated at a rate of 25% of the depreciation basis for each fiscal year, on a declining-balance method.

**Accelerated depreciation**
A company may deduct 30% accelerated depreciation from the cost of new or used machines and equipment used in industries during the first fiscal year of their employment.

**Goodwill**
According to Article 25 of the Egyptian Income Tax Law, goodwill is amortised at the rate of 10% using the straight-line method.

**Start-up expenses**
Start-up expenses are tax deductible, and the whole amount can be amortised for the first year.

**Interest expenses**
Interest expenses are deductible for tax purposes after offsetting any tax-exempt interest income.

Interest expense deductions are only allowed if the following conditions are fully met:

- The interest rate does not exceed twice the discount rate as determined by the Central Bank of Egypt at the beginning of the calendar year in which the tax year ends.
- The interest expense is in return for loans complying with the local thin capitalisation rule: 4:1 debt-to-equity ratio.
Egypt

- The Egyptian transfer pricing rules (i.e. arm's-length principle) must be followed (see Transfer pricing in the Group taxation section for more information). In case of a tax audit, if the interest rate isn’t proven to be at arm’s length, the tax authority has the right to adjust this price to arrive at a ‘neutral price’ and re-calculate the taxes due accordingly.
- The loan is business related.

**Bad debt**
According to Article 28 of the Egyptian Income Tax Law, deduction of bad debts shall be allowed, subject to submitting a report from the external auditor indicating the fulfilment of the following conditions:

- The company is maintaining regular books and records.
- The debt is related to the company activities.
- That debt value should have been previously included within the company accounts and records.
- The company shall have taken serious procedures for settlement of such debt and has been unable to collect it after 18 months from its due date.

**Charitable contributions**
Donations to the government are tax deductible. Donations to Egyptian charities are also deductible, but only up to 10% of taxable income.

**Fines and penalties**
Financial fines and penalties paid by the taxpayer because they or one of their subordinates has committed a deliberate felony or misdemeanour are not deductible.

**Taxes**
Income tax payable according to the Income Tax Law is not deductible.

**Other significant items**
The following other items are not deductible:

- Reserves and appropriations of all different types.
- Profit shares, distributed dividends, and the attendance fees paid to shareholders for attending the general assembly’s meetings.
- Compensation and allowances obtained by the chairmen and board members.
- Workers profit share to be distributed according to the law.

**Net operating losses**
A company may carry losses forward for a period not to exceed five years. Nevertheless, if a change occurs in the ownership of its capital exceeding 50% of the shares, stocks, or the voting rights, if the company is either a Joint Stock Company or a Company Limited by Shares whose shares are not listed on the Egyptian Stock of Exchange, and if the company changes its activity, the company cannot carry the losses forward.

In general, companies cannot carry losses back, except for contracting companies, which are allowed a loss carryback period of five years.

**Payments to head office**
A branch may deduct head-office charges of up to 10% of its taxable income. Moreover, the branch or subsidiary should withhold taxes before the payment of interest, royalties, and service fees to non-resident foreign corporations or affiliates.
Group taxation

The Egyptian tax law treats every company in a group of companies as a separate legal entity. Thus, affiliated companies or subsidiaries cannot shift the profits/losses within the group.

Transfer pricing

Transfer pricing rules follow the arm’s-length principle, specifying that any transaction between related parties should be at arm’s length (i.e. market value).

The law does not specify penalties with regard to transfer pricing. However, the law states that the Egyptian tax authorities may adjust the pricing of transactions between related parties if the transaction involves elements that would not be included in transactions between non-related parties, and whose purpose is to shift the tax burden to tax exempt or non-taxable entities. Where this is the case, the tax authorities may determine the taxable profit on the basis of the neutral price. The acceptable methods for determining such neutral price, according to the rule of the law, are as follows:

- Comparative free price (same as Comparable Uncontrolled Price method [CUP]).
- Total cost with an added margin of profit (same as Cost Plus method).
- Resale price.

On 29 November 2010, the Egyptian Tax Authority launched the Transfer Pricing Guidelines ("TP Guidelines"). The TP Guidelines are being issued as a series of parts, the first part of which was issued in final version to the public and provides guidance on the arm’s-length principle, how to establish comparability, choosing the most appropriate transfer pricing method(s), and documentation requirements. The coming parts should cover more complex transfer pricing topics, specifically transactions involving intellectual property, intra-group services, cost contribution arrangements, and advanced pricing agreements.

Taxpayers are required to prepare contemporaneous documentation studies to support the arm’s-length nature of their controlled transactions. The Egyptian tax authority does not require the submission of transfer pricing documentation studies with the tax return; rather, they are required to be available upon request in a tax audit. Studies are acceptable in English, but a translation may be requested from the taxpayer.

The Egyptian tax authority explained that TP Guidelines will be utilised as a practical guide to assist taxpayers and tax inspectors in understanding how to implement and examine transfer pricing transactions. Egyptian TP Guidelines were compared to the Organisation for Economic Co-operation and Development (OECD) by an OECD representative and were found to be similar.

Thin capitalisation

The Egyptian thin capitalisation rule provided by the Egyptian Income Tax Law dictates that the debt-to-equity ratio is 4:1. Accordingly, the Law disallows the deductibility of debit interests of Egyptian companies on loans and advances if such loans and advances are in excess of fourfold the equity average (which is calculated according to the financial statements prepared pursuant to the Egyptian accounting standards).

The debit interest includes all amounts chargeable by the company in return for loans, advances of any kind obtained thereby, bonds, and bills. Loans and advances include, for purposes of this item, bonds and any form of financing by debts through securities with fixed or variable interest.
Egypt

For determining the equity, the following items represent the basis for the calculation: the paid-up capital in addition to all reserves and dividends reduced by retained losses, provided that the differences of the adjusted account is not included in the reserves account and is determined to be non-taxable. In case of retained or carryforward losses, they must be used to reduce retained profits and reserves solely; the percentage is calculated on the basis of total loans and advances in proportion to the remaining equity amount after deducting the retained losses with a minimum of the paid-up capital.

**Tax credits and incentives**

Egypt offers no specific tax incentives.

**Foreign tax credit**

The foreign tax paid by a resident company on its profits earned abroad is deductible from the tax payable in Egypt; however, losses incurred abroad are not deductible.

**Withholding taxes**

A corporation paying invoices must withhold 0.5% to 5% of payments, depending on the services and commodities, to local taxpayers and remit them quarterly to the tax department.

Payments of interest, royalties, and services by a domestic corporation to foreign or non-resident bodies are subject to withholding tax (WHT) as follows.

**Interest**

Interest on loans with a three-year term or more entered into by private sector companies is exempt from WHT, while loans of less than three years are subject to 20% WHT on interest. However, an applicable double tax treaty (DTT) between Egypt and the foreign country may result in the reduction of such tax rate. Please see below for the ministerial decree affecting the treatment of interest and royalty payments.

**Royalties**

Royalty payments are subject to the 20% WHT. However, an applicable DTT signed between Egypt and the foreign country may result in a reduction in this rate. Please see below for the ministerial decree affecting the treatment of interest and royalty payments.

**Service payments**

Service payments are subject to the 20% WHT. However, an applicable DTT signed between Egypt and the foreign country may result in the exemption of these payments if the services are performed abroad and not through PE in Egypt.

For payments withheld on behalf of non-resident entities, tax shall be remitted to the tax authority the day following the withholding of the amount (previously within 15 days of the end of month in which the payment takes place).

**Tax treaties**

Egypt has concluded DTTs with about 50 countries, which could change the tax treatment of transactions carried out between Egyptian entities and residents of a treaty country.

Procedures for applying the WHT on payments to non-residents

A ministerial decree dictates that the reduced rate of WHT on interest or royalties provided by an applicable DTT should not be automatically applied. The rate of 20% (Egyptian tax rate) should be imposed upon deduction. However, under certain conditions, the foreign recipient of payments will be able to get a refund for the amount resulting from the variance between the normal rate of 20% and the reduced treaty rate.

Certain documents should be submitted to the tax authority along with the refund claim.

A special unit responsible for interest and royalty WHT refunds is tasked with reviewing each refund case and with issuing refund letters (subject to compliance with the requirements of the 2009 Ministerial Decree). A refund letter is required to be able to get a refund of excess WHT from the tax office to which the taxes were actually paid.

An amendment was made to the law regarding the WHT; free zone entities are now entitled to withhold tax when dealing with non-resident entities and shall remit the tax to the tax authority. Prior to this amendment, the obligation of withholding tax and remitting it to the tax authority lied with the non-resident party when dealing with the free zone.

Tax administration

Taxable period
The tax year is the financial year of the taxpayer.

Tax returns
The taxpayer is required to assess taxes due for every financial year and settle them with the tax return.

The corporate tax return is due within four months from the end of the financial year; so if a company’s financial year ends 31 December, then the tax return has to be filed before the end of April of the following year.

Payment of tax
Advance payments are deducted from taxes assessed per the tax return, and the balance is payable in a lump sum at the date of submitting the tax return.

The advance payment (i.e. WHT) is submitted on a quarterly basis.
Penalties
If the taxpayer included a tax amount in the tax return that is less than the finally assessed tax, the taxpayer is liable to a fine based on the non-included percentage, as follows:

- 5% of the tax payable on the non-included amount if such amount is equivalent to 10% up to 20% of the final tax due.
- 15% of the tax payable on the non-included amount if such amount is more than 20% up to 50% of the final tax due.
- 40% of the tax payable on the non-included amount if such amount is more than 50% of the final tax due.

Tax audit process
The audit cycle proceeds as follows:

Inspection
The tax authority inspects the company based on its documents and records in order to assess the total tax due on the company and determines the difference in tax due as per the company declaration and the tax authority assessment. The authority issues an assessment including the total tax due on the company. If the company objects to the inspection result, the dispute is transferred to the Internal Committee.

Internal Committee
The dispute is transferred to the Internal Committee to discuss the dispute points that arose from the inspection further to issue a modified assessment based on its opinion. If the company objects to the Internal Committee result, the dispute is transferred to the Appeal Committee to review the dispute points arising from the Internal Committee.

Appeal Committee
The Appeal Committee’s decision is final and binding on the company and the tax department unless a case is appealed by either of them at the court within 30 days of receiving the decision. Based on the fact that the total taxes due on the assessment as per the Appeal Committee are considered final if they are not paid within the appropriate period, there will be penalties for the late payment.

Court
If the decision of the Appeal Committee is not satisfactory for either party, the case will be transferred to the court system, which is considered the final stage of the disputes. Normally, the court will appoint an expert witness to investigate the case and prepare a report. The court process usually takes a long period of time.

Statute of limitations
The statute of limitations is five years according to the Egyptian Income Tax Law and is extended to be six years in case of tax evasion.

Topics of focus for tax authorities
The most important topic for tax authorities is transfer pricing.
Significant developments

There have been no significant corporate tax developments in El Salvador during the past year.

Taxes on corporate income

The corporate income tax (CIT) rate is 30% for entities with revenues above 150,000 United States dollars (USD), and this rate is applicable on the total amount of the mentioned revenues. For those companies that have revenues of USD 150,000 or less, the applicable rate is 25%.

CIT is based on the principle of territoriality, and, by general rule, taxes are paid on goods located, activities realised, and capital invested in El Salvador as well as on services rendered or utilised in the country. Nevertheless, there is a special rule regarding securities and financial instruments, since such income is considered to be obtained in El Salvador if the issuing entity is domiciled in El Salvador.

Taxable income is equal to gross income net of costs and expenses considered necessary for generating and maintaining the related source of income and other deductions allowed by law. Gross income is comprised of income or profits collected or accrued, either in cash or in kind, from any sources in El Salvador.

Corporations are required to follow the accrual method of accounting, and income is computed for 12-month periods beginning on 1 January and ending on 31 December of each year.

Income tax advance payment

A 1.75% tax is applied to gross revenues accrued. This tax is paid monthly as an advance payment that is applied against the CIT at the end of the year.

Local income taxes

There is a municipal tax related to taxpayers’ income. This tax depends on the location of the operations where the taxpayer performs its activity.

Corporate residence

A company incorporated in El Salvador is a resident entity in the country for tax purposes and subject to CIT on Salvadorian-source income. Also, branches from
foreign companies authorised in El Salvador and entities operating as a permanent establishment (PE) are considered resident entities for tax purposes and subject to CIT on Salvadorian-source income.

The general rule for the determination of the corporate domicile is that it will be the one established on the incorporation document.

**Permanent establishment (PE)**
The PE for a company is determined by a fixed place of business with installed infrastructure owned or leased by the company, with employees hired in the country, and where the taxpayer performs its activity.

---

**Other taxes**

**Value-added tax (VAT)**
VAT (i.e. Impuesto al Valor Agregado or IVA) is levied at a rate of 13% over the taxable amount. As a general rule, the taxable amount is the price or remuneration agreed upon by the parties. For imports, the taxable amount is the customs value.

The following transactions are subject to VAT when performed within the Salvadoran territory:

- Transfer/sale of tangible movable goods.
- Withdrawal of tangible movable goods from the inventory made by the company for self-consumption by its partners, directors, or personnel.
- Import of goods and services.
- The supply of services of any type, whether permanent, regular, continuous, or periodic, including technical advice and project designs; lease and sublease agreements over tangible goods; lease and sublease agreements over real estate for commercial purposes; lease of services in general; construction of real estate properties or building contracts; auctions; freight, whether inland, air, or maritime; and lease, sublease, and any form of use regarding trademarks.

The following imports are exempt from VAT:

- Imports made by diplomats and consulate representatives of foreign nations with presence in the country according to international agreements adopted by El Salvador.
- Imports made by international organisations to which El Salvador is a party.
- Traveller’s luggage according to customs regulations.
- Donations to non-profit organisations.
- Imports made by municipalities, if the goods imported are for the public benefit of the community.
- Imports of machinery by taxpayers duly registered for this purpose, which will be part of the taxpayer’s fixed assets.
- Vehicles for public transportation, which can only be transferred after five years.

The following services are exempt from VAT:

- Health services rendered by public institutions.
- Lease and sublease of real estate properties for housing.
- Services rendered under a labour relationship, as well as those rendered by public and municipal employees.
El Salvador

- Cultural public performances authorised by competent authorities.
- Educational services rendered by authorised entities, i.e. Ministerio de Educación (the Ministry of Education).
- Interest on deposits and loans provided by local financial institutions or entities registered at the Salvadoran Central Bank (BCR).
- Interest on securities issued by the government and/or private entities traded through a stock exchange.
- Water supply by public institutions.
- Public transportation.
- Insurance premiums covering individuals, and reinsurance in general.

VAT is levied on exports at a rate of 0%. Foreign-source income is not subject to VAT.

VAT paid by a registered taxpayer company on its purchases (tax credits) is credited against VAT charged to its customers (tax debits) on a monthly basis.

VAT returns are filed on a monthly basis within the first ten working days of each month following the period under taxation.

**Customs duties**

In El Salvador, the Arancel Centroamericano de Importación (Central America Import Duty) is applied, which is constituted in the Sistema Arancelario Centroamericano (SAC) (Duty Central American System) and its correspondent duties for import.

All duties for import are ad valorem and are applied at the cost, insurance, and freight (CIF) value of the merchandise. The duty is common for all the countries in Central America.

**Excise taxes**

**Tax on simple or sweetened soft drinks**

An ad valorem tax on simple or sweetened soft drinks is levied at the rate of 10% over the selling price to the public as suggested by the manufacturer, importer, or distributor, excluding VAT and returnable bottle taxes.

**Tax on the production and importation of alcohol and spirits**

A tax is levied on domestically produced or imported alcohol and spirits at rates ranging from USD 0.09 to USD 0.16 for each 1% of alcohol volume per litre or in proportion thereof. Spirits and alcohol also have an ad valorem tax levied at the rate of 8% over the suggested selling price to the public, excluding VAT.

**Tax on tobacco products**

A tax is levied at USD 0.005 per cigarette, cigar, little cigarette, or other tobacco product. Also, an ad valorem tax is levied at the rate of 39% over the suggested consumer selling price to the public, excluding VAT.

**Tax on transfer of real estate property**

A 3% tax is applied to transfers of real estate property. This tax is applied to the amount by which the value of the real estate exceeds USD 28,571.43.

**Stamp taxes**

No stamp taxes are assessed as the pertinent law was abrogated in 1992.
**Capital gains tax**

Capital gains are taxed at a flat rate of 10% of net profits, except when gains are realised within 12 months following the purchase date, in which case they are taxed as ordinary income. Capital losses can only be offset against capital gains. Whenever capital losses exceed capital gains, the remaining balance may be carried forward to future capital gains within a five-year period.

**Annual business tax**

Companies are required to register themselves with the Registry of Commerce and pay an annual business licence fee assessed on the company’s assets, as follows:

<table>
<thead>
<tr>
<th>Assets (USD)</th>
<th>Fee (USD)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2,000 to 57,150</td>
<td>91.43</td>
</tr>
<tr>
<td>57,151 to 114,286</td>
<td>137.14</td>
</tr>
<tr>
<td>114,287 to 228,572</td>
<td>228.57</td>
</tr>
<tr>
<td>An additional charge for each office, branch, or agency property of a company</td>
<td>34.29</td>
</tr>
</tbody>
</table>

If the assets exceed the amount of USD 228,572, there is an additional duty of USD 11.43 for each additional USD 100,000 in assets or fraction thereof. In any case, the relevant duties are limited to USD 11,428.57.

**Social security contributions**

Social security contributions (ISSS) are mandatory for both employee and employer and are destined to public health services. The employee’s contributions are withheld from the employee’s monthly salary and are transferred by the employer to the Salvadorian Institute of Social Security through monthly payrolls. The contribution amounts are summarised in the table below:

<table>
<thead>
<tr>
<th>Monthly employee’s salary (USD)</th>
<th>Employee’s rate (%)</th>
<th>Employer’s rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 685.71</td>
<td>3</td>
<td>7.50</td>
</tr>
</tbody>
</table>

Note: For individuals who have salaries above USD 685.71, the social security contribution applicable is USD 20.57 for the employee and USD 51.49 for the employer.

Contributions to pension fund (AFP) are mandatory for both employee and employer. The employee’s contributions are withheld from the employee’s monthly salary and are transferred by the employer. The employer’s contributions are paid to the AFP. Both contributions are reported to the Pension Fund Administrator through a monthly payroll. The percentages are summarised below:

<table>
<thead>
<tr>
<th>Monthly employee’s salary (USD)</th>
<th>Employee’s rate (%)</th>
<th>Employer’s rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 5,311.52</td>
<td>6.25</td>
<td>6.75</td>
</tr>
</tbody>
</table>

Note: For individuals who have salaries above USD 5,311.52, the pension fund contribution applicable is USD 331.97 for the employee and USD 358.53 for the employer.

**Payroll taxes**

Entities with more than ten employees must also pay a payroll tax that is destined to the National Institute of Professional Development (INSAFORP), which promotes professional development through courses and complementary studies. The percentages are summarised below:
### Monthly employee's salary (USD) vs. Employer's rate (%)

<table>
<thead>
<tr>
<th>Salary Range</th>
<th>Employer's Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 685.71</td>
<td>1</td>
</tr>
<tr>
<td>Over 685.71</td>
<td>0</td>
</tr>
</tbody>
</table>

### Municipal taxes

Municipal taxes are assessed according to a progressive tariff list issued by each municipality. The taxes are applicable to the company's assets located in each municipality, and are paid on a monthly basis. The tariff lists are applied separately to commercial, industrial, and financial sectors.

### Branch income

In El Salvador, tax rates on branch profits are the same as for domestic corporations. Dividends and profits paid or credited by headquarter (HQ) representatives, affiliates, branches, subsidiaries, agencies, and others not domiciled in El Salvador are subject to 5% withholding tax (WHT).

The law does not provide separate treatment for administrative offices located in El Salvador.

The general regulations indicate that branches, agencies, and/or establishments permanently operating in the country, with owned or leased installed infrastructure, employing domestic staff, and performing their economic activities in a material and perceptible manner in the country are subject to the same taxes as companies duly incorporated.

### Income determination

In El Salvador, income is considered taxable if it is obtained from goods located in the country, activities undertaken within the national territory, or services rendered or utilised in the country.

### Inventory valuation

For tax purposes, taxpayers are authorised to use any one of the following inventory methods, provided they are technically appropriate for the particular business, consistently applied, and easily audited:

- Purchase or manufacturing costs.
- Last purchase costs.
- Direct average allocation costs.
- Average costs.
- Last in first out (LIFO).
- First in first out (FIFO).
- Specific methods for fruits and farm products.
- Specific method for cattle.

Other than the methods enumerated above, taxpayers are not permitted to use other methods for valuing their inventories except with prior authorisation of the tax office, provided that in the latter's judgement the method in question contains clear determination and *bona fide* elements available to the office. Once an inventory
valuation method is adopted, the taxpayer may not change it without the tax office’s prior authorisation.

**Capital gains**
Capital gains are subject to capital gains tax, except when gains are realised within 12 months following the purchase date, in which case they are taxed as ordinary income. See [capital gains tax in the Other taxes section for more information](#).

**Dividend income**
Cash profits or dividends remitted or credited to shareholders are subject to a 5% WHT.

**Stock dividends**
Stock dividends (different from the ones generated from shares) for companies are treated as ordinary income obtained for these companies in the corresponding fiscal year. These revenues are taxable according to the 30% rate on gross income.

**Interest income**
Interest income is taxable in El Salvador when the entity paying the interest is resident in El Salvador, when the capital is invested in the country, and when the risk is assumed in El Salvador.

**Partnership income**
Partnership income is taxable if it is Salvadorian-source income; nevertheless, no specific provisions exist in El Salvador regarding partnership income.

**Rent/royalties income**
Rent and royalties income is taxable if it is Salvadorian-source income; nevertheless, no specific provisions exist in El Salvador regarding rent and royalties income.

**Condoned debts**
Condoned debts are considered taxable income and must be included as part of the income generated in that fiscal period.

**Foreign income**
Under the territoriality source of income principle, extraterritorial income is not taxable in El Salvador, with the exception of income and other benefits from securities and other financing operations. In this case, interest arising from loans granted to a resident of El Salvador is considered as taxable income, and the person or entity paying the loan must withhold 10% of the interest. If financial services are rendered between related parties, the withholding must be at 20%.

**Deductions**
All business expenses considered necessary to produce taxable income and/or maintain income sources (e.g. freight, marketing, power, telecommunications, water, salaries, lease contracts, merchandise and transport insurance, fuel, and interest paid on loans used by income generating sources) are deductible for income tax purposes.

**Depreciation and amortisation**
Depreciation is calculated using the straight-line method, which results in the following maximum annual rates for determining depreciation deductions.
Depreciation of new software is permitted at a rate of 25% of purchase or production costs.

Amortisation of goodwill, trademarks, and other similar intangible assets are not deductible for income tax purposes.

**Start-up expenses**
In El Salvador, there is not a special regulation for expenses related to the starting up of a company.

**Interest expenses**
Interest expenses are deductible if the amount of the loan is invested in a source that generates taxable income.

**Bad debt**
In El Salvador, bad debt is deductible if the following requirements are presented:

- The debt is generated from the business activity.
- The debt had been registered as taxable income.
- The debt is registered in the accounting system.
- The debt has been expired for 12 months.

**Charitable contributions**
The deductibility of charitable donations is limited to 20% of the donor’s net income after deducting the donation amount.

**Fines and penalties**
In general, penalties, late payment charges, and fines of that type are not deductible.

**Taxes**
Taxes paid are not deductible.

**Net operating losses**
Operating losses cannot be carried forward to future years or carried back. Capital losses, however, may be carried forward to offset capital gains for five years.

**Payments to foreign affiliates**
Remittance of royalties, interest income, and service fees to foreign affiliates are deductible, provided proper contracts are in place, a 20% WHT is applied, and these services have actually been received. Note that payments to entities located in tax haven regimes are subject to a 25% WHT.
Group taxation

There are no grouping rules in El Salvador between independent entities. Each entity, even if related, is treated separately and must report and pay their taxes independently.

Transfer pricing

In El Salvador, it is mandatory for entities that have operations with related parties or with entities resident in tax havens to undertake these operations according to the rules of market prices.

Local tax authorities can establish the value of the operations according to market prices rules if, according to their point of view, these operations have not been undertaken according to the arm’s-length principle.

Thin capitalisation

No specific provision for thin capitalisation exists in El Salvador.

Tax credits and incentives

El Salvador offers a wide range of incentives to attract foreign investment and drive new commercial and industrial developments. There are also no restrictions on foreign ownership or on mergers, acquisitions, or joint ventures.

There are three specific laws in El Salvador that seek to encourage foreign investment by improving the country’s competitiveness in all areas involving the granting of tax incentives. These laws are the Industrial and Commercial Free Zone Law, the Law of International Services, and the Export Reactivation Law.

The Industrial and Commercial Free Zone Law No. 405, dated 3 September 1998, grants companies the following incentives:

- CIT exemption.
- VAT exemption.
- Municipal tax exemption.
- Exemption from real estate transfer taxes when land is intended to be used for productive activities.
- Exemption from duties for imports on machinery, raw materials, equipment, and intermediate goods used for production.
- An option to sell merchandise or services linked to international trade produced in the free zone in the Salvadoran market as long as the corresponding import taxes, CIT, VAT, and municipal taxes are paid on the final goods or services.

Any foreign company may establish and function in a free zone or bonded warehouse and benefit from these incentives if they are engaged in production, assembly, manufacturing, processing, transformation, or commercialisation of goods and services and/or rendering of services linked to international or regional trade, such as gathering, packaging and repackaging, cargo consolidation, distribution of merchandise, and other activities connected or complementary to them.

The Law of International Services No. 431, dated 11 October 2007, grants the same benefits as the Free Zone Law, but the beneficiaries are companies operating in Service Centres specially created according to this law and dedicated to international services as defined therein.
El Salvador

The Export Reactivation Law No. 460 (i.e. Ley de Reactivación de las Exportaciones), dated 15 March 1990, grants reimbursement of 6% free on board (FOB) value of exports destined outside the region.

Withholding taxes

Payments or amounts credited to non-residents arising from income obtained in El Salvador are subject to a 20% WHT. Income earned in El Salvador covers income from assets located in the country, from any activities performed or capital invested in the land, and from services rendered or used in the national territory, regardless of whether they are provided or paid outside the country. Income from services used in the country is income earned in El Salvador by the service provider, irrespective of whether the relevant income generating activities are performed abroad. Note that payments to foreign entities located in tax haven regimes are subject to a 25% WHT.

Payments to resident individuals with respect to services rendered, other than under a labour relationship, are subject to a 10% WHT.

The acquisition of intangible goods among resident entities in the country is subject to a 10% WHT.

Certain transactions are subject to a reduced WHT rate of 5%, such as the following:

- International transport services paid to non-residents.
- Insurance services, re-insurances, and bondings paid to non-residents.
- Payments for transfer of intangible assets or use of the rights to intangibles and tangible assets related to films, movies, music records, cable TV, satellite, etc.

Moreover, a treaty to avoid double taxation exists between El Salvador and Spain, this treaty established reduced WHT, such as the following:

- 12% WHT made to dividend payments.
- 10% WHT made to interest payments.
- 10% WHT made to rent and royalties payments.
- 10% WHT made to payments for services.

Tax administration

National taxes, fees, and other contributions on all types of goods, services, and income in El Salvador are levied by the National Congress. Local governments (municipalities) may suggest contribution rates and propose their approval to the National Congress by way of a specific law.

The Ministry of Finance (Ministerio de Hacienda) controls the state’s finances and defines and guides the government’s financial policy. It also harmonises, directs, and implements its policies on taxation through its agencies.

Taxable period

In El Salvador, the fiscal year is from 1 January to 31 December.
**Tax returns**
CIT annual returns must be filed each year no later than 30 April, following the end of the year under taxation.

**Payment of tax**
Taxes are due on the date established for filing the tax returns. In El Salvador, tax payments are made together with the filing of tax returns, and payments must be made at the banks of the local financial system.

In addition, public and private legal entities resident in the country for tax purposes, other than farm and cattle concerns, are required to make advance income tax payments at 1.75% of gross revenues. These advance payments are due, together with the corresponding return, within ten working days following the corresponding calendar month and are ultimately applied against the CIT at the end of the year.

**Tax audit process**
In El Salvador, the audit cycle is constituted by the following steps:

- Tax administration issues a resolution of an auditor designation.
- The requirement of financial information of the company.
- The requirement of complimentary documentation to verify possible issues.
- The tax administration issues an audit report where the issues are expressed.
- A resolution hearing is issued by the tax administration, which gives the taxpayer the right to provide evidence to refute the issues made by the mentioned authority.
- Final resolution is determined regarding the complimentary tax or the penalties to be paid.

**Statute of limitations**
In El Salvador, the statute of limitations for the compliance of the payment of tax debts is ten years.

The tax administration’s power to perform a tax audit is for three years in the case of tax returns presented on time by the taxpayer; three years in the case of tax returns presented in a delayed way, but this time is going to start from the day after the extemporary presentation; and five years in cases where the taxpayer has not presented the tax return.

**Topics of focus for tax authorities**
In El Salvador, when the tax administration performs a tax audit, it focuses on the following topics:

- Compliance of the transfer pricing rules, this can be considered as the main element for the tax authorities.
- Compliance of the obligations held with non-domiciled subjects, especially those domiciled in tax havens.
**Equatorial Guinea**

**PwC contact**

Sébastien Lechêne  
Main Road Malabo 2 EGICO Tower, 3rd and 4th Floor, PO Box 431  
Equatorial Guinea

Email: sebastien.lechene@ga.pwc.com

**Significant developments**

There have been no significant corporate tax developments in Equatorial Guinea during the past year.

**Taxes on corporate income**

The corporate income tax (CIT) must be paid by any resident entity.

Taxable profit is determined by deducting from gross income all expenses tied to the performance of taxable activities in Equatorial Guinea. In principle, all expenses are deductible, but the Tax Code provides rules of deductibility for some of them.

Resident companies are subject to CIT on their worldwide income. Non-resident entities are subject to a 10% withholding tax (WHT) on gross income derived from sources in Equatorial Guinea.

The CIT rate is 35% on taxable profits.

**Minimum income tax**  
Minimum income tax is 1% of the turnover of the company for the previous year.

This amount cannot be lower than 800,000 Central African CFA francs (XAF) (even if the company does not have revenues). The minimum income tax can be totally or partially deducted from the CIT to be paid.

**Local income taxes**  
There are no local income taxes in Equatorial Guinea.

**Corporate residence**

A legal entity present in Equatorial Guinea more than three months within a calendar year, or more than six months within two consecutive calendar years, and performing an economic activity or providing paid services in the country is considered as a resident for taxation purposes.

The notion of residence applies equally to any kind of activity (even if there is some specificity in the oil and gas sector).

**Permanent establishment (PE)**  
The notion of ‘permanent establishment’ is not defined in the Tax Code. The authorities mainly refer to the notion of residence as defined above.
**Other taxes**

**Value-added tax (VAT)**
VAT is an indirect tax on consumption based on turnover.

All operations performed in Equatorial Guinea are subject to VAT unless they are included in the list of exemptions provided by the Equatorial Guinea Tax Code or a specific tax regime.

VAT is generally chargeable on the following:

- Goods sold or assigned for valuable consideration.
- Services provided.
- Self-consumed goods and services.
- Imports.
- Other operations carried on by individuals or legal entities in their sphere of business, professional, and individual activities, including extraction activities.

The standard VAT rate is 15%.

A rate of 0% is applicable to a specific list of products and equipment provided in the Tax Code (e.g. certain medical products, some equipment for construction).

A reduced rate of 6% is applicable to a limited list of basic consumables and books.

**Custom duties**
The customs duties are based on the categories of goods as follows:

- Category I: Primary necessity goods: 5%.
- Category II: Raw material and materials: 10%.
- Category III: Intermediary goods and miscellaneous: 20%.
- Category IV: Current consumption goods: 30%.

**Excise taxes**
Excise taxes are applicable on specific goods, such as alcoholic drinks and tobacco. The rates are from 20% to 50% plus a special Economic and Monetary Community of Central Africa (CEMAC) contribution from 0% to 35%.

**Real property tax**
A 1% urban property tax applies annually to 40% of the value of the land and the buildings on such land. Urban property is defined by the Tax Code as “any land with or without buildings and the buildings built thereon, whenever located in urban areas”.

**Transfer tax**
For the transfer of goods between residents and non-residents, and between non-residents, there is a 3% tax on the value of the goods.

Real estate transfers between residents are taxed at the rate of 5% on the value of the real estate. The rate increases to 25% on real estate transfers between residents and non-residents, and between non-residents.

**Stamp duties**
Stamp duties are payable on a variety of instruments and transactions and vary depending on the concerned legal act.
Social security contributions
Employers contribute 1% of gross salary to the Work Protection Fund (Fondo de Protección al Trabajo) and 21.5% to the National Social Security Fund (INSEO) on a monthly basis.

Employees contribute 0.5% of net salary to the Work Protection Fund and 4.5% to the INSEO on a monthly basis.

Branch income
Branch income is subject to CIT. We understand that there is no branch remittance tax, even if the tax authorities sometimes try to apply this tax.

Income determination

Inventory valuation
Inventory is evaluated at cost price for tax purposes. The tax method generally matches the book method.

Capital gains
Capital gains are, in principle, subject to CIT.

Some exemptions and specific tax regimes can apply, as follows:

• The capital gains that come from the assignment, in the ongoing operation, of the components of the fixed assets will not be included in the taxable profit of the fiscal year in the course of which they have been obtained if the taxpayer puts them in a special account named ‘capital gains to be reused’ and is committed to reinvesting in new fixed assets in the company before the expiration of a period of time of three years, starting from the close of this fiscal year, an amount equal to the amount of these capital gains plus the cost of the assigned components.
• The capital gains different from those obtained on goods, resulting from free assignment of stock, corporate portions, or liabilities, as a consequence of the merger of corporations, limited partnerships by shares, or limited companies, will be exempt from the tax regarding the profits made by those corporations, on condition that the take-over company or the new company has its corporate headquarters in Equatorial Guinea.

Dividend income
All dividends received by a resident company are subject to CIT.

A personal income WHT of 25% is applicable on dividends paid to individuals or companies not having their usual domicile or headquarters in Equatorial Guinea. This tax is a final tax for those taxpayers.

The net products of the shares owned and earned by the parent company from its subsidiary can be deducted from the total net profits of the parent company after offsetting from this amount 25% (expenses and charges lump sum amount) if the:

• shareholder holds at least 25% of shares of the subsidiary and
• shareholder guarantees the shares have always been registered in the name of
  the participating company and commits it will hold these shares for at least two
  consecutive years.

This proportional part is established at 10% of the amount of these products and
represents the management expenses already deducted from overhead costs.

**Interest income**
Interest earned by companies established in Equatorial Guinea is subject to CIT
(35% rate).

Interest earned by companies not having their usual domicile or headquarters in
Equatorial Guinea is considered as dividend income and is subject to WHT at a
25% rate.

**Foreign income**
 Resident companies are subject to CIT on their worldwide income.

There is no tax deferral in Equatorial Guinea.

---

**Deductions**

**Depreciation**
A straight-line method of computation of depreciation should be applied to fixed assets
according to the normal useful lives of the assets involved, as provided by the Tax Code.

**Goodwill**
Goodwill is, in principle, not deductible.

**Start-up expenses**
Start-up expenses can be amortised.

**Interest expenses**
Interest expenses are deductible if they do not exceed the limit for loans set up by the
Central Bank.

**Bad debt**
Bad debts are deductible, given they are supported.

**Charitable contributions**
Charitable contributions are deductible, given they are for philanthropic, sport,
educative, scientific, social, or family purposes and do not exceed 0.5% of the turnover
for the fiscal year of the company.

**Fines and penalties**
Fines and penalties are not deductible.

**Taxes**
Only professional taxes are deductible.
Equatorial Guinea

**Net operating losses**
Net operating losses can be carried forward for three years (five years for companies belonging to the oil and gas sector). Losses cannot be carried back. Losses of one entity cannot be transferred to another entity in a reorganisation.

In theory, when the results of a company, no matter the kind of company, are negative during a maximum period of three consecutive years, this company will immediately be removed from the register by the Tax Administration for the practice of the activity for which it was registered, except when the company is newly created.

**Payment to foreign affiliates**
The deductibility of the technical assistance made by the parent company to its subsidiary is limited to 50% of the intermediary tax result (accounting result plus potential fiscal reintegration).

In case of a deficit, the relevant basis for the evaluation of the foreign technical assistance amount to be reintegrated will be the intermediary result of the last beneficiary fiscal year.

**Group taxation**
Equatorial Guinea law does not provide specific provisions for taxation of groups.

**Transfer pricing**
There are no specific rules regarding transfer pricing, even if there are indirect references in the Tax Code.

**Thin capitalisation**
According to the Tax Code:

“Interest paid to the partners for amounts made available to the company, in addition to their capital contributions, no matter the form of the company, will be admitted [for deduction] within the limits established for the advances of the Central Bank.

In incorporated or limited companies, the deduction of interest will not be allowed for partners or shareholders that have the right to hold, or actually hold, the company management except to the extent that the amounts deposited do not exceed the combination of the contributions of these partners or shareholders.”

**Tax credits and incentives**
Some tax and customs exemptions can be granted by the government for some specific economic sectors (e.g. oil and gas sector, public work sector). These exemptions shall be negotiated in the contract signed between the company and the administration (e.g. Production Sharing Contract, Public Work Contract).

**Foreign tax credit**
There is no foreign tax credit in Equatorial Guinea.
**Withholding taxes**

**WHT in the non-oil and gas sector**
There is a 10% tax withheld on the gross incomes obtained in Equatorial Guinea by non-residents.

There is a 25% WHT on royalties for non-CEMAC residents.

Dividends and interests paid to non-residents are subject to 25% WHT.

**WHT on the oil and gas sector**
In Equatorial Guinea:

- a 6.25% WHT is imposed on payments made to a resident entity within the oil and gas sector and
- a 10% WHT is imposed on payments made to a non-resident entity within the oil and gas sector.

In practice, the tax authorities consider this tax only applies to sales of services.

The tax basis is composed of the gross amount paid to the provider.

**Tax administration**

**Taxable period**
The taxable period is from 1 January to 31 December for CIT purposes.

**Tax returns**
CIT returns must be filed within the first four months of the year following the taxable fiscal year.

**Payment of tax**
Payment of CIT must be made within 15 days from the day following the date of receipt of the tax liquidation issued by the Ministry of Finance and Budget.

The minimum income tax of 1% of the previous year’s turnover is payable by 31 March.

**Penalties**
Penalties of XAF 200,000 per month late, up to 75% of the tax owed, apply for late filing of CIT returns.

A penalty of 50% to 100% of the undeclared amount applies in case of shortfall in the return and in case of arbitrary settlement, 50% of the total amount if the good faith of the taxpayer is established or assumed and 100% wherever the taxpayer does not prove good faith.

**Tax audit process**
There is no specific provision related to the tax audit cycle in Equatorial Guinea.

**Statute of limitations**
The statute of limitations is five years from the date the tax is due.
**Estonia**

---

**Significant developments**

Estonia is regarded as offering a relatively favourable income tax regime, as all undistributed corporate profits are tax exempt. Estonia levies a corporate income tax (CIT) only on profits that are distributed as dividends, share buy-backs, capital reductions, liquidation proceeds, or deemed profit distributions. Distributed profits are generally subject to 21% corporate tax (21/79 on the net amount of the profit distribution). According to the law amendment passed by the Parliament on 16 June 2011, the CIT rate will be reduced to 20% in 2015.

On 1 January 2013, the tax treaty with India became effective. During 2012, tax treaties with Bahrain, Cyprus, Mexico, Thailand, and Uzbekistan were signed, but these treaties are not yet effective. Additionally, treaties with Turkmenistan (signed in 2011) and Russia (signed in 2002) are pending.

As of 1 January 2013, unemployment security contributions were reduced to 2% for employees and 1% for employers (previously 2.8% and 1.4%, respectively).

---

**Taxes on corporate income**

All undistributed corporate profits are tax exempt. This exemption covers both active (e.g. trading) and passive (e.g. dividends, interest, royalties) types of income. It also covers capital gains from the sale of all types of assets, including shares, securities, and immovable property. This tax regime is available to Estonian resident companies and permanent establishments (PE) of non-resident companies that are registered in Estonia.

The taxation of corporate profits is postponed until the profits are distributed as dividends or deemed to be distributed, such as in the case of transfer pricing adjustments, expenses and payments that do not have a business purpose, fringe benefits, gifts, donations, and representation expenses.

Distributed profits are generally subject to the 21% CIT at 21/79 of the net amount of profit distribution. For example, a company that has profits of 100 euros (EUR) available for distribution can distribute dividends of EUR 79, on which it must pay CIT of EUR 21.

According to the law amendment passed by the Parliament on 16 June 2011, the CIT rate will be reduced to 20% in 2015.
From the Estonian perspective, this tax is considered a CIT and not a withholding tax (WHT), so the tax rate is not affected by an applicable tax treaty. Certain distributions are exempt from such tax (see the Income determination section).

In Estonia, resident companies are taxed on profits distributed from their worldwide income, while PEs of non-residents are taxed only on profits distributed from income derived from Estonian sources. Other Estonian-source income derived by non-residents may be subject to final WHT or CIT by way of assessment.

**Local income taxes**
There are no local income taxes in Estonia.

---

**Corporate residence**

A legal entity is considered resident in Estonia for tax purposes if it is established under Estonian law. There is no management and control test for the purpose of determining corporate residency. Most tax treaty tie-breakers for legal entities are based on competent authority procedures.

**Permanent establishment (PE)**

A PE (including a branch registered in the Commercial Register) of a foreign entity is deemed to be a non-resident taxpayer. Under the domestic law, which deviates from the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention, a PE is defined as an enterprise through which the permanent business activities of the non-resident are conducted in Estonia. A PE is deemed to be created as a result of the business activities conducted in Estonia that are geographically linked or have movable character or as a result of the business activities of an agent that is authorised to conclude contracts in the name of the non-resident.

---

**Other taxes**

**Value-added tax (VAT)**
The following transactions are subject to Estonian VAT:

- Taxable supplies of goods and services (the place of supply of which is Estonia).
- Taxable imports of goods.
- Taxable intra-community acquisitions of goods.

The standard VAT rate is 20%. A reduced rate of 9% is applied to books, periodicals with few exceptions, hotel accommodation services, and listed pharmaceuticals.

The VAT rate on the export of goods and certain services is 0% (i.e. exempt with credit). Some services, such as health care, insurance, certain financial, and transactions with securities, are exempt (i.e. exempt without credit).

Transactions in real estate are generally exempt from VAT, but there are certain significant exceptions (e.g. transactions in new and significantly renovated buildings). Taxpayers can elect to add VAT to real estate transactions if certain conditions are met.

The reverse charge mechanism applies to the supply of waste metal and real estate, under which VAT is accounted for by the VAT liable purchaser and not by the supplier.
Estonia

For real estate, the reverse charge applies only when the seller has opted for taxation of real estate. As of 1 April 2012, the reverse charge mechanism is also extended to gold.

If the taxable supplies of Estonian resident businesses or a PE of a non-resident business in Estonia exceed EUR 16,000 in a calendar year, VAT registration is required. Voluntary registration is also possible. Certain transactions of non-resident businesses require Estonian VAT registration without any threshold.

The VAT accounting period is generally a calendar month, and VAT should be declared and paid on or before the 20th day of the following month.

Under certain conditions, a European Union (EU) taxable person that is not registered for VAT in Estonia will be entitled to a refund of input VAT paid in Estonia. Non-EU taxable persons are entitled to claim VAT refunds based on reciprocity.

Estonia has implemented a system that allows, under certain conditions, a company to account for VAT on imports on the VAT return without paying VAT to the customs authority.

**Customs duties**
After becoming a member of the European Union, Estonia also became a member of the Customs Union. The Community Customs Code and related implementation regulations apply, meaning that:

- trade between Estonia and other EU countries is customs-free
- imports from non-EU countries are subject to EU customs tariffs, and
- numerous free trade agreements concluded between EU and non-EU countries apply to Estonia.

**Excise duties**
Excise taxes are levied on tobacco, alcohol, electricity, some packaging materials, and motor fuel.

**Land and property taxes**
Land is subject to an annual land tax, which is calculated on the assessed value of land at rates between 0.1% and 2.5%, depending on the municipality. The tax is paid by the owners of land, or sometimes by the users of land, in two instalments, by 31 March and 1 October (amounts not exceeding EUR 64 are paid in one instalment by 31 March).

There is no property tax (i.e. tax on the value of buildings).

Property transfers are generally subject to state and notary fees.

**Transfer taxes**
There are no transfer taxes in Estonia.

**Stamp taxes**
Certain transactions may be subject to insignificant stamp taxes (i.e. state fees).

**Social security and unemployment insurance**
Employers operating in Estonia (including non-residents with a PE or employees in Estonia) must pay social tax on certain payments to individuals at the rate of 33% (where 20% is used for financing public pension insurance and 13% is used for financing public health insurance). Social tax paid by employers is not capped and
mainly applies to salaries, directors’ fees, and service fees paid and fringe benefits granted to individuals.

In addition to social tax, employers are also required to pay and withhold unemployment insurance contributions. As of 2013, employers must pay 1% and employees must pay 2% (collected by employers through payroll withholding). The contributions mainly apply to salaries and service fees paid to individuals.

**Compulsory accumulative pension scheme**
Employers’ payroll withholding includes 2% contributions to the compulsory accumulative pension scheme if the employee has joined that pension scheme.

**Heavy goods vehicle tax**
The heavy goods vehicle tax is paid for the following classes of vehicles that are registered with the Estonian National Motor Vehicle Register and are intended for the carriage of goods:

- Lorries with a maximum authorised weight or gross laden weight of not less than 12 tons.
- Road trains composed of trucks and trailers with a maximum authorised weight or gross laden weight of not less than 12 tons.

The tax is paid by the owners or users of the vehicles. The quarterly tax rates range from EUR 0 to EUR 232.60 per heavy goods vehicle.

**Gambling tax**
Gambling tax is imposed on amounts received from operating games of skill, totalisator, betting, lotteries, and promotional lotteries. Tax is also charged on gambling tables and machines used for games of chance located in licensed premises. The tax is paid monthly by authorised operators.

**Local taxes**
Local taxes can be imposed by rural municipalities or city councils; however, the fiscal significance of local taxes is almost nonexistent. Local taxes include advertisement tax, road and street closure tax, motor vehicle tax, tax on keeping animals, entertainment tax, and parking charges.

**Branch income**
Registered PEs of non-residents, much as with resident companies, are subject to CIT only in respect of profit distributions, both actual and deemed, as defined in domestic law.

Transactions and dealings between a head office and its PE(s) should be conducted on arm’s-length terms. Thus, such profits should be attributed to a PE of a non-resident taxpayer that the PE would be expected to make if it were a distinct and separate taxpayer engaged in the same or similar activities, and under the same or similar conditions, and dealing in a wholly independent manner with its head office.
Estonia

Income determination

Distributable profits are determined based on financial statements drawn up in accordance with Estonian Generally Accepted Accounting Principles (GAAP) or International Accounting Standards (IAS)/International Financial Reporting Standards (IFRS), and there are no adjustments to accounting profits for tax purposes (e.g. tax depreciation, tax loss carryforward or carryback).

The CIT liability associated with the distribution of dividends is accounted for as an expense at the time the dividends are declared, regardless of when the profits were generated or distributed.

Dividends paid by Estonian companies are generally subject to 21/79 CIT at the level of the distributing company. However, dividends distributed by Estonian companies are exempt from CIT if the distributions are paid out of:

- dividends received from Estonian, EU, European Economic Area (EEA), and Swiss tax resident companies (except tax haven companies) in which the Estonian company has at least a 10% shareholding
- profits attributable to a PE in the EU, EEA, or Switzerland
- dividends received from all other foreign companies in which the Estonian company (except tax haven companies) has at least a 10% shareholding, provided that either the underlying profits have been subject to foreign tax or if foreign income tax was withheld from dividends received, or
- profits attributable to a foreign PE in all other countries provided that such profits have been subject to tax in the country of the PE.

In addition, stock dividends (bonus shares) distributed to stockholders are exempt from 21/79 CIT charge.

Certain domestic and foreign taxes can also be credited against the 21/79 CIT charge under domestic law or tax treaties.

Deductions

Distributable profits are determined based on financial statements drawn up in accordance with Estonian GAAP or IAS/IFRS, and there are no adjustments to accounting profits for tax purposes (e.g. tax depreciation, tax loss carryforward or carryback).

Fringe benefits

Employers operating in Estonia (including non-resident companies that have a PE or employees in Estonia) are liable to Estonian taxation on any fringe benefits granted to their employees (including directors).

Fringe benefits are subject to an exceptional tax treatment in Estonia, as only the employer is obligated to pay taxes on the fringe benefits furnished to the employee. Taxable fringe benefits received by a resident employee are generally not included in the taxable income of the employee for Estonian tax purposes. Fringe benefits are subject to 21/79 CIT and 33% social tax. For example, where the amount of the benefit is EUR 100, the CIT due by the employer would be EUR 26.58 (21/79 x 100) and the social tax due EUR 41.77 (0.33 x 126.58), for a total fringe benefit tax charge of EUR 68.35.
Gifts, donations, and representation expenses
The 21/79 CIT is generally due on gifts and donations. Gifts and donations made to certain qualifying recipients are only subject to 21/79 CIT if such expenses exceed one of two limitations:

- 3% of the calculated social tax base for the existing calendar year or
- 10% of the profit of the last financial year according to statutory financial statements.

Representation expenses, those expenditures whose character and primary purpose is for representational or entertainment related activities, are generally subject to 21/79 CIT only if they exceed the threshold of EUR 32 per month plus 2% of the calculated social tax base of the calendar month in which the expenses are paid.

Taxes
All taxes paid are deductible for CIT purposes. In certain circumstances, domestic or foreign taxes may be creditable against the 21/79 CIT charge under domestic law or an applicable tax treaty.

Other significant items
The 21/79 CIT is generally due on expenses and payments that do not have a business purpose and that are regarded as deemed profit distributions. These may include, for example, late payment interest on tax arrears, penalties imposed by law, bribes, purchase of services or settlement of obligations not related to taxpayer's business, and acquisition of assets not related to taxpayer's business.

Furthermore, there are specific anti-tax haven rules treating certain transactions and dealings with tax haven companies as deemed profit distributions, which are therefore subject to 21/79 CIT. These include the following:

- Acquisition of securities issued by a tax haven entity (exception for certain listed securities).
- Acquisition of an ownership interest in a tax haven entity.
- Payment of fines or penalties to a tax haven entity, unless settled by court or arbitration.
- Granting loans or making prepayments to a tax haven entity or otherwise acquiring a claim against a tax haven entity.

Payments to foreign affiliates
Payments to foreign affiliates are deductible for tax purposes (i.e. not subject to 21/79 CIT as deemed profit distributions) if the payment serves a business purpose, provides a benefit to the payer, is at arm's length, and is substantiated by sufficient documentation.

Payments to foreign affiliates may also be subject to various WHT. Certain payments to affiliates located in tax haven countries are always subject to 21/79 CIT or a 21% WHT rate.

Group taxation
There is no form of consolidation or group taxation for CIT purposes in Estonia.
Transfer pricing
Transfer pricing rules are applicable to all types of transactions between related parties. Both domestic and cross-border transactions with related parties must be conducted at arm's length. Estonian tax legislation includes a relatively broad definition of related parties. Under the present corporate tax system, if the transactions between related parties do not follow the arm's-length principle, then the subsequent transfer pricing adjustments are treated as hidden profit distributions subject to 21/79 monthly CIT.

As a general rule, Estonian group companies and PEs of foreign companies are obligated to prepare transfer pricing documentation to prove the arm's-length nature of the inter-company transactions with all related parties.

However, this documentation requirement does not apply to small and medium-size enterprises (SME), unless they have conducted transactions with entities located in low-tax territories. A company or PE is deemed to be an SME if the consolidated results of the previous financial year of an Estonian company or a PE, together with its associated enterprises or head office (i.e. at the group level), are below all of the following criteria:

- EUR 50 million annual sales.
- EUR 43 million balance sheet.
- 250 employees.

Apart from the formal transfer pricing documentation and general requirement to disclose the transactions with the related parties in the annual reports, there are no additional reporting requirements related to transfer pricing in relation to inter-company transactions.

Thin capitalisation
There are no thin capitalisation rules in the Estonian tax legislation.

Controlled foreign companies (CFCs)
Estonia has no CFC rules for corporate taxpayers.

Tax credits and incentives
There are no special tax incentives in Estonia. However, the entire Estonian corporate tax system, which provides for an indefinite deferral for taxing corporate profits, may be viewed as a tax incentive that promotes reinvestment of profits and thus stimulates economic growth.

Foreign tax credit
In certain circumstances, domestic or foreign taxes may be creditable against the 21/79 CIT charge under domestic law or an applicable tax treaty. See the Income determination section for more information.

Withholding taxes
Withholding agents must withhold CIT from certain payments. Withholding agents include resident legal entities, resident individuals registered as sole proprietorships or acting as employers, and non-residents having a PE or acting as employers in Estonia. The tax must be reported and paid by the tenth day of the month following the payment. CIT is not withheld from payments to resident companies, registered sole
proprietorships, and registered PEs of non-resident companies. The following rules are in place with respect to payments that are subject to WHT:

- There is no WHT on dividends.
- There is no WHT on interest payments to non-residents on the condition that the interest charged does not significantly exceed the arm’s-length rate at the time the debt is incurred and the interest payments are made. A 21% Estonian WHT rate will thus apply only to the part of interest that significantly exceeds the arm’s-length amount. WHT on interest will be abolished as of 1 January 2014.
- Royalties (including payments for the use of industrial, commercial, or scientific equipment) paid to non-residents are generally subject to a 10% WHT rate under domestic law, but reduced rates may be available under double tax treaties (DTT). Certain royalty payments to associated EU and Swiss companies that meet certain conditions are exempt from WHT.
- Rental payments to non-residents for the use of immovable property located in Estonia and movable property subject to registration in Estonia (excluding payments for the use of industrial, commercial, or scientific equipment) are subject to a 21% WHT rate under domestic law, but DTTs may exempt payments for the use of movable property from WHT.
- Royalties and rental payments to resident individuals are subject to a 21% WHT rate.
- Payments to non-resident companies for services provided in Estonia, including management and consultancy fees, are subject to a 10% WHT rate under domestic law, but may be exempt under DTTs. Service fee payments to tax haven entities are always subject to a 21% WHT rate.
- Salaries, directors’ fees, and service fees paid to individuals are subject to a 21% WHT rate under domestic law, but DTTs may exempt service fee payments to non-resident individuals from WHT.
- Payments for the activities of non-resident artistes or sportsmen carried out in Estonia are subject to a 10% WHT rate.
- Certain pensions, insurance benefits, scholarships, prizes, lottery winnings, etc. paid to non-residents and resident individuals are subject to a 21% WHT rate under domestic law.

For non-residents without a PE in Estonia, the tax withheld from these payments at domestic or treaty rates constitutes final tax in terms of their Estonian-source income, and they do not have any tax reporting requirements in Estonia.

For certain types of Estonian-source income, non-residents are liable under Estonian domestic law to self assess their Estonian tax and submit a tax return to the Estonian tax authorities. These types of income include:

- Taxable capital gains.
- Profits derived from business conducted in Estonia without a registered PE.
- Other items of income from which tax was not withheld but should have been withheld.

From 2013, Estonia has effective tax treaties with the territories listed in the table below. Treaties have also been concluded with Bahrain, Cyprus, Mexico, Russia, Thailand, Turkmenistan, and Uzbekistan, but these are not yet effective.

The following WHT rates apply to dividends, interest, and royalties paid to a recipient or beneficial owner resident in a tax treaty country. The lower of the domestic or the treaty rate is given.

**Notes**

1. Under the domestic law, the rate is nil for all non-resident individual and corporate shareholders.
2. The rate is nil on the condition that the interest paid to a non-resident does not significantly exceed the arm’s-length rate at the time the debt is incurred and the interest payments are made. Estonian WHT at the domestic rate of 21% will thus apply only to the part of interest that significantly exceeds the arm’s-length amount. This WHT may be reduced under tax treaties.
3. The rate is nil for arm’s-length royalties paid to an associated EU or Swiss company if certain conditions are met.
4. The lower 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
5. The lower 5% rate applies to royalties paid for the use of copyright royalties, excluding software royalties.

**Tax administration**

**Taxable period**
The tax period is a calendar month.

**Tax returns**
The combined CIT and payroll tax return (form TSD with appendices) must be submitted to the local tax authorities by the tenth day of the month following a taxable distribution or payment. Tax returns may be filed electronically via the Internet.

**Payment of tax**
CIT and payroll taxes must be remitted to the local tax authorities by the tenth day of the month following a taxable distribution or payment. No advance CIT payments are required.

**Advance rulings**
The aim of the advance ruling system is to provide certainty on the tax consequences of specific transactions or combination of transactions taking place in the future. The ruling is binding on the authorities (and not on the taxpayer) if the transaction was made within the deadline and the description provided in the ruling and the underlying legislation has not been substantially changed in the meantime. Estonian legislation specifically excludes obtaining rulings when the interpretation of the legislation is objectively clear, the situation is hypothetical, or the main purpose of the planned transaction is tax avoidance. In addition, transfer pricing valuation issues are excluded from the scope of the binding ruling system.

**Tax audit process**
There is no statutory tax audit cycle in Estonia.

**Statute of limitations**
As a general rule, the statute of limitations is three years. In case of intentional tax evasion, it is six years.
Estonia

**Topics of focus for tax authorities**
The main topics of focus for tax authorities are ‘envelope wages’, VAT fraud, and transfer pricing.

**Other issues**

*Company restructurings*
In accordance with the EC Directive 2009/133/EC on mergers, divisions, partial divisions, transfers of assets, and exchanges of shares concerning companies of different member states, the mergers, divisions, and re-organisations of companies are generally tax-neutral in Estonia. The principle of going concern is applied in taxation of referred restructuring transactions.
Significant developments

During the 2013 National Budget Address, the government announced that the following measures will be introduced effective 1 January 2013:

- A corporate income tax (CIT) rate of 17% for foreign companies that establish headquarters in Fiji.
- The CIT rate of 18.5% for companies listed on the South Pacific Stock Exchange with 40% local shareholding.
- Expansion of the Tax Free Region incentives.
- Maintenance of the 40% export income deduction.
- Extended period until 2014 for the Employment Taxation Scheme.
- 150% or 200% deduction for donations of computers to schools, subject to certain conditions.
- Employee Pay-As-You-Earn (PAYE) taxes are to be imposed as a final tax (in most cases), with the employer being responsible for the same.

Furthermore, a new Income Tax Decree is expected to be introduced with effect from 1 January 2013. The new Income Tax Decree is expected to repeal the Income Tax Act, Capital Gains Tax Decree, and Fringe Benefit Tax Decree.

The above measures have not yet been legislated as of 1 June 2013. The Fiji corporate tax summary on the Worldwide Tax Summaries website (www.pwc.com/taxsummaries) will be updated once the legislation has been promulgated.

Effective 1 January 2013, the stamp duty rates have been increased.

Taxes on corporate income

Resident corporations are taxed on their worldwide income. Non-resident corporations may only be taxed on their Fiji-sourced income.

Normal tax is payable and assessed on the chargeable income of the business calculated by subtracting deductible expenses from all assessable income specified under Section 11 of the Fiji Income Tax Act.

Normal tax is payable on taxable income at the following rates:
Fiji

<table>
<thead>
<tr>
<th>Type of company</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-resident shipping companies in respect of outgoing business from Fiji</td>
<td>2</td>
</tr>
<tr>
<td>All other companies, including non-resident companies carrying on business in Fiji</td>
<td>20</td>
</tr>
</tbody>
</table>

**Corporate residence**

A company incorporated in Fiji is considered a ‘resident’ in Fiji. A company not incorporated in Fiji is resident in Fiji if it carries on business in Fiji and either its practical management and control are in Fiji or its voting powers are controlled by shareholders who are residents of Fiji.

**Permanent establishment (PE)**

PE is determined based on the applicable tax treaty. There is no specific definition of ‘permanent establishment’ under the Fiji Income Tax Act. However, generally a PE may be defined as a fixed place of business and includes the following:

- A place of management, branch, office, factory, warehouse, or workshop, but not a liaison office.
- A mine, oil or gas well, quarry, or other place of extraction of natural resources.
- A building site, or a construction, assembly, or installation project, or supervisory activities connected with such site or project, but only if the site, project, or activities continue for more than six months.
- The furnishing of services by the person, including consultancy services, through employees or other personnel engaged by the person for such purpose, but only if activities of that nature continue for the same or a connected project for a period or periods aggregating more than six months in any 12-month period.
- A person, referred to as an ‘agent’, acting on behalf of another person, referred to as the ‘principal’, if the agent:
  - has and habitually exercises an authority to conclude contracts on behalf of the principal or
  - habitually maintains a stock of trading stock from which the agent regularly delivers trading stock on behalf of the principal but does not include an agent of independent status.

**Other taxes**

**Value-added tax (VAT)**

VAT of 15% generally applies on the supply of goods and services in Fiji by a registered person in the course or furtherance of a taxable activity carried on by that person. The threshold amount for VAT registration is 100,000 Fijian dollars (FJD) for the supply of goods and/or services.

The supply of financial services (except for certain insurance services), residential accommodation, and education by an approved institution is exempt.

The sale of edible oil, tin fish, rice, flour, tea, powdered milk, and kerosene are zero-rated. Exports of goods and services and international transportation are also zero-rated. The export of services, however, is zero-rated only under certain conditions.
The due date for lodgement of VAT returns and payment of any VAT payable is the end of the month following the taxable period, which is normally a month. However, where an entity's supplies do not exceed FJD 300,000, it may opt to lodge VAT returns and pay any VAT payable on an annual basis.

Under certain conditions, directors of companies with insufficient funds may be held liable for any outstanding VAT or CIT liability of the company and may be sued in their personal capacity.

**Customs duties/import excise taxes**
Import excise tax (from 5% to 15%) applies to selected goods (in addition to the fiscal duties imposed on importation), including:

- Alcohol and tobacco.
- Used or second-hand liquefied petroleum gas (LPG) powered motor vehicles.
- New or used licensed mini buses.
- Some goods that are also locally manufactured.
- Certain white goods and luxury items.

**Excise taxes**
Excise tax is payable on tobacco, alcohol products, and carbonated soft drinks manufactured in Fiji, based on quantities produced.

**Property taxes**
There are no property taxes at the national level. However, the municipalities may charge property rates in their respective areas.

**Stamp duties**
Under the Fiji Stamp Duties Act, stamp duty is payable in respect of instruments, including, but not limited to, declaration of trusts, leases, mortgages, transfer of property (or interest therein), and shares.

**Capital gains tax (CGT)**
Capital gains made from the following assets may be subject to CGT of 10%:

- Land or an interest therein.
- Vessels of over 100 tonnage.
- Yachts.
- Shares, securities, equities, or other financial assets (except shares listed on the South Pacific Stock Exchange).
- Intangible assets.
- Interest in a partnership or trust.
- Aircraft.
- Option, right, or other interest in an asset referred to above.

A capital gain made on disposal of an asset that is used solely to derive income exempt from tax under the Income Tax Act shall be exempt from CGT.

Foreign tax paid in respect of the disposal of a capital asset may be allowed as a tax credit against the CGT payable.

There is no carryforward of capital losses in calculating CGT.
Service turnover tax (STT) (formerly hotel turnover tax)
STT at the rate of 5% is imposed on turnover of a person conducting a business involving the provision of a prescribed service, which includes the following:

- Provision of accommodation, refreshments, and other services by a hotel.
- Any services provided in a vessel that is principally or wholly engaged in the carriage of tourists in Fiji.
- Provision of meals and drinks in a bar.
- Provision of services in a nightclub.
- Provision of in-bound tour services.
- Live entertainment provided by artists for a fee.
- Provision of services for recreational activity for gain.
- Provision of services relating to exhibition of films to the public or section thereof by an exhibitor where a charge is made for admission, including services provided by cinema operators.
- Provision of services by rental car operators.
- Provision of meals and beverages by bistros or coffee shops with an annual gross turnover over FJD 1.5 million.
- Provision of meals on sale by restaurants with annual gross turnover over FJD 1.5 million.
- Provision of charter flight services by an aircraft or helicopter with an annual gross turnover over FJD 300,000.
- Provision of all water sports, including underwater activities and river safaris, with an annual gross turnover in excess of FJD 300,000.
- Provision of accommodation in a private residence or property that accommodates tourists, international students, or overseas visitors who are paying guests.

The due date for payment is aligned with the VAT Decree requirements (i.e. end of the month following the taxable period).

Fringe benefit tax (FBT)
FBT of 20% is payable by the employer on the grossed-up value of certain fringe benefits provided to employees (the effective tax rate is 25%).

Contributions to the Fiji National Provident Fund (FNPF)
The FNPF is a compulsory superannuation scheme for local employees. Under the FNPF Decree, employers are required to contribute 16% of cash emoluments of employees to the Fund. Employers may recover one-half (8%) of the required contribution from employees.

Employers are not required to contribute to the FNPF for expatriate employees.

Telecommunication levy
Telecommunication levy of 1% is imposed on all voice call charges.

Credit card levy
Credit card levy of 2% is imposed on the monthly credit card balance, including interest and other bank charges.

Third party insurance levy
Third party insurance levy of 20% is imposed on the total third party insurance premium collected in a month.
Gambling turnover tax (GTT)
Under the Gambling Turnover Tax Decree of 1991, GTT is imposed on the value of consideration paid or payable in respect of the provision of prescribed gambling services (i.e. acceptance of bets and provision of tickets for any lottery) at the rate of 15%.

Branch income
The profits of a foreign company’s branch operating in Fiji are subject to the same tax rate as the tax rate levied on profits of a resident corporation (i.e. 20%).

Income determination
Normal tax is payable and assessed on taxable income of the business. Taxable income is calculated by subtracting allowable deductions from all assessable income (i.e. all sources of income).

Inventory valuation
Inventories are normally valued at the lower of cost and net realisable value. While the first in first out (FIFO) method is acceptable, the last in first out (LIFO) method is not, for either book or tax purposes. Conformity between book and tax reporting is not required, and there are no special provisions for valuing inventories or determining inventory flows.

Capital gains
Any profit or gain accrued or derived from the sale or disposal of real or personal property, or any interest therein, shall be subject to income tax when:

- the business of the company comprises dealing in such property
- the property is acquired for the purpose of selling or otherwise disposing thereof, or
- any profit or gain is derived from the carrying on or carrying out of any undertaking or scheme entered into or devised for the purpose of making a profit.

Notwithstanding the above, the profit or gain derived from a transaction that does not form part of a series of transactions and that is not itself in the nature of trade or business shall not be included.

In such a case, the capital gain may be subject to CGT of 10% (see Capital gains tax [CGT] in the Other taxes section for more information).

Dividend income
Transfers of property by private companies to shareholders and associates may be deemed to be a dividend paid by that company.

Dividends received from a company incorporated in Fiji by resident corporations are exempt from tax.

Interest income
Interest income over FJD 200 derived by a resident from a financial institution shall be subject to resident interest withholding tax (WHT) of 20%, which may be claimed as a tax credit against income tax payable on income.
**Partnership income**
The income of the partners from a partnership for any income year is equal to each partners’ respective share of income from that partnership. Each partner declares income separately and is individually liable for filing a tax return for each applicable year.

**Liability of directors/shareholders**
Directors/shareholders of companies in liquidation or with insufficient assets to satisfy tax liabilities may be held liable for any outstanding tax liability of the company, under certain conditions.

**Other significant items**
Where a foreign-controlled business in Fiji produces less income than might be expected, the revenue authorities may determine the income for tax purposes.

An entity normally residing outside Fiji that disposes of an interest in land in Fiji held directly or through a shareholding in a company may be assessed for income tax on the profit on that disposal.

**Foreign income**
Resident corporations are taxed on their worldwide income. Foreign income derived from a treaty country is taxed according to the treaty. Foreign income sourced from a non-treaty country is subject to income tax in Fiji. A credit is allowed in Fiji for foreign tax paid on foreign income. The tax credit is limited to the lesser of the Fiji tax payable or the foreign tax paid on such income. There are no special provisions for taxing undistributed income of foreign subsidiaries.

**Deductions**
Generally, expenses wholly and exclusively incurred in deriving assessable income are allowable deductions. Expenditures that are capital or domestic in nature are generally not deductible.

**Depreciation and depletion**
Depreciation is calculated on the cost of an asset on a straight-line basis. The prescribed rates of depreciation are based on the estimated life of the asset. Upon disposal of an asset, either recoupment of depreciation claimed is taxable or the excess of tax written-down value over sale proceeds is deductible. The taxpayer has an option to set-off recoupment of depreciation against the cost of replacement assets. Conformity between book and tax depreciation is not required.

There are seven broad bands of depreciation rates for assets acquired after 1 January 1998, and the prescribed effective life of the asset is used to determine the relevant depreciation rate. The seven broad bands and the depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Band</th>
<th>Effective life (years)</th>
<th>Standard rate (%)</th>
<th>Maximum rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2 to less than 3</td>
<td>50</td>
<td>60</td>
</tr>
<tr>
<td>2</td>
<td>3 to less than 5</td>
<td>33/3</td>
<td>40</td>
</tr>
<tr>
<td>3</td>
<td>5 to less than 6½</td>
<td>20</td>
<td>24</td>
</tr>
<tr>
<td>4</td>
<td>6½ to less than 10</td>
<td>15</td>
<td>18</td>
</tr>
<tr>
<td>5</td>
<td>10 to less than 20</td>
<td>10</td>
<td>12</td>
</tr>
</tbody>
</table>
An optional 20% loading, which applies on the broadband rate, may be claimed. Assets acquired before 1 January 1998 continue to be depreciated at the former rates.

Subject to certain conditions, accelerated depreciation is available for (i) buildings constructed between 1999 and 2014 that are to be used for agricultural, commercial, or industrial purposes; (ii) multi-storey, multi-unit residential buildings; and (iii) other capital expenditure considered of benefit for the economic development of Fiji. Up to one-fifth of the expenditure may be claimed in each of any five years of an eight-year period.

Certain renewable energy plant and water storage facilities also qualify for a 100% write-off.

Capital expenditure aimed at economising on the consumption of fuel, electricity, or its derivatives, or on an asset using energy sources indigenous to Fiji, may be eligible for accelerated depreciation at varying rates.

The cost of the acquisition of a mining lease or tenement and the cost of development of mines may be written off in equal instalments in any five of the first or last eight years of a nine-year period, commencing with the year in which the expenditure was incurred.

A deduction for depletion of other natural resources is not available.

**Goodwill**

Goodwill, and the amortisation thereof, is generally not deductible for income tax purposes.

**Start-up expenses**

Start-up expenses are generally not deductible for income tax purposes.

**Interest expenses**

Interest expenses that are revenue expenditure wholly and exclusively incurred in deriving taxable income are deductible in calculating taxable income.

**Provisions**

Provisions for expenses not yet incurred (e.g. bad debts) are not tax-deductible. Deductions are generally permitted in respect to amounts that are actually paid or written off.

**Charitable contributions**

Contributions to approved charitable organisations of up to FJD 100,000 are deductible.

There are certain other specific donations that qualify for varying levels of deductions, including:

- Donations to the Fiji Heritage Foundation, which qualify for a deduction of 150%.
- Cash donations exceeding FJD 50,000 to the Poverty Relief Fund for education, which qualify for a deduction of 200%.
Fiji

- Cash donations exceeding FJD 100,000 to a Sports Fund (as approved by the Commissioner of Inland Revenue) for purposes of sports development in Fiji, which qualify for a deduction of 150%.

**Fines and penalties**
Generally, fines and penalties are not deductible for income tax purposes.

**Taxes**
Taxes levied on income are not deductible. Only 50% of the employer’s statutory FNPF contribution paid by the employer shall be allowed as a deduction for tax purposes in the year the contribution was paid (see Contributions to the FNPF in the Other taxes section for more information).

**Net operating losses**
From 2012, losses may be carried forward for four consecutive years (previously eight years), provided the company can demonstrate a minimum 51% continuity of shareholding between the year of loss and the year of claim. Notwithstanding the change in ownership, losses may also be carried forward where a company carries on the same business in the carried forward year as it did in the loss year.

In relation to certain hotel business, tax losses may be carried forward for eight years (previously 13 years). Please refer to the Hotel industry incentives in the Tax credits and incentives section.

Loss carrybacks are not permitted.

**Payments to foreign affiliates**
Subject to the normal rules of deductibility, a deduction may be claimed for royalties, management service fees, and interest charges paid to foreign affiliates. However, any deductions claimed by any company carrying on business in Fiji (whether incorporated in Fiji or not) in respect of head office charges or any other like payments shall not exceed 3% of total gross Fiji income.

**Group taxation**
Group taxation is not available in Fiji.

**Transfer pricing**
Transfer pricing provisions state that the tax authority may allocate income and expenses between associates (related entities) to reflect income and expenses on an arm’s-length basis.

The Income Tax (Transfer Pricing) Regulations provide that the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing guidelines may be used in interpreting the provisions of the Regulations in determining income or expenses on an arm's-length basis.

**Thin capitalisation**
There are no thin capitalisation rules in Fiji.
**Tax credits and incentives**

The tax incentives in Fiji are designed primarily to promote export sales and to encourage the development of industries that are considered of benefit to the economic development of Fiji.

**Export income deduction**

A deduction for export income is allowed in accordance with the following:

<table>
<thead>
<tr>
<th>Year of assessment</th>
<th>Percentage of export income to be deducted (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2012</td>
<td>40</td>
</tr>
<tr>
<td>2013</td>
<td>30</td>
</tr>
<tr>
<td>2014</td>
<td>20</td>
</tr>
<tr>
<td>2015</td>
<td>10</td>
</tr>
</tbody>
</table>

*Export income* means net profit derived by a taxpayer from the business of exporting goods and services; and the Commissioner of Inland Revenue may, where separate records for export income are not maintained, determine such income on the basis of a formula as set out in the legislation.

The 5th Schedule of the Fiji Income Tax Act, ‘Export Incentives’, has been repealed. However, the existing beneficiaries are expected to continue to enjoy the incentives under this schedule until the expiry of the incentives granted.

**Information communication technology (ICT) tax incentives**

The income of an information communication technology operator may be exempt from CIT, provided that the business employs 50 employees or more for six months within the income year and 60% or more of the total value of its services in that income year is exported, if it is:

- operating on or before 1 January 2009 in the declared Kalabu Tax Free Zone (exempt from 1 January 2007 to 31 December 2016) or
- granted a licence after 1 January 2009 (exempt for a period of 13 years from the date of issue of the licence).

The following tax incentives are available to taxpayers engaged in new ICT business and for existing taxpayers so engaged who are able to show a significant increase in capacity and number of employees:

- 80% tax exemption for businesses employing more than 101 employees.
- 60% tax exemption for those that employ between 60 and 100 employees.
- 40% tax exemption for those employing 10 to 59 employees.

Prior to 1 January 2013, a 150% deduction was available for costs incurred for the development of an ICT business by any taxpayer employing 500 or more employees. This deduction is no longer available.

‘Information communication technology business’ means an entity engaged in software development, call centres, or internet service provision. It does not include an internet café, any retail or wholesale of information technology products, or the repair, sale, or service of any such products.
Employment incentives
Prior to 1 January 2013, salary and wages paid to first-time employees for the first 12 months of employment qualified for a 150% deduction. During the 2013 National Budget Address, the government announced that this incentive shall be extended until 2014. However, the measure has not yet been legislated.

Hotel industry incentives
Approved capital expenditure incurred in building, renovating, or expanding a hotel is subject to an investment allowance of 55% of the approved expenditure, in addition to normal depreciation.

Under the Short Life Investment Package (SLIP), the following concessions are available to a company:

- Exemption from CIT for a period of ten years, provided that the capital investment in the hotel is more than FJD 7 million.
- Duty-free entry of certain capital equipment, plant, and machinery, upon receiving provisional approval from the Minister.
- Permission to generate own electricity, the excess to be sold to the Fiji Electricity Authority.

Any tax losses incurred by an entity granted approval for the investment allowance or SLIP may be carried forward for eight years, but may only be set off against income of the hotel business or from the hotel premises.

The recipients of provisional approval for hotel investment tax incentives are required to commence implementation of the hotel projects within one year from the date provisional approval is granted.

Filmmaking and audiovisual incentives
A tax exemption or reduced tax rate is available on the income of non-resident employees of an approved non-resident company engaged or intending to be engaged in making a film in Fiji.

A resident entity (excluding an entity holding a broadcast license in television or radio in Fiji or with substantial shareholdings in the same) may deduct up to 150% of expenditure on audio-visual production in respect of income in the year of the expenditure. ‘Audio-visual productions’ include production for exhibition or sale of theatrical films, broadcast television, direct-to-video and video disk programme, audio recording, computer software, and interactive websites.

A tax exemption is available on the income derived by a taxpayer from the commercial exploitation of a copyright until the taxpayer has received from the commercial exploitation a return of up to 60% of the expenditure. The expenditure must be of capital nature and in relation to the audio-visual production costs in respect of a qualifying audio-visual production.

Tax concessions are also available for residents of areas declared as studio city zones by the appropriate government minister.

Other tax incentives
An investment allowance of 55% is available for the construction or refurbishment and renovation of a vessel, in addition to normal depreciation, subject to certain conditions.
An approved mining company may, for a specified period, be exempt from CIT or taxed at a lower rate. The holder of a valid prospecting licence may write off approved expenditure on prospecting for minerals against income from all sources.

A 150% deduction is available for direct capital expenditure incurred by commercial banks in rural banking programmes.

Investors engaged in value adding processes in the food processing, agricultural processing, fisheries, or forestry business may be able to claim a 100% deduction with respect to amounts invested or re-invested (for expansion), provided that the businesses meet the 50% local content rule.

A CIT exemption may be available to a taxpayer engaged in the following commercial agricultural farming and agro-processing activities, subject to certain conditions:

- Any new activity approved and established between 1 January 2009 and 31 December 2009, for a period of four to ten consecutive fiscal years, depending on the level of capital investment.
- Any new activity with a capital investment of at least FJD 2 million approved and established between 1 January 2010 and 31 December 2014, for a period of ten consecutive fiscal years.

Income derived by a taxpayer from a new activity in processing agricultural commodities into bio-fuels may be exempt from CIT for a period of ten years, under certain conditions.

An exemption from CIT for a period of five years may be available to a taxpayer engaging in renewable energy projects and power cogeneration.

Entities in the agriculture, fisheries, and tourism industries, with a maximum turnover threshold of FJD 300,000, may also be exempt from CIT.

An investment allowance equal to 60% of the qualifying expenditure is available as a deduction for investment in Fixed Line Next Generation Networks. A qualifying expenditure means an expenditure of FJD 50,000 or more incurred for the purpose of acquiring a capital asset in any of the years from the 2009 year of assessment to the 2012 year of assessment.

A 150% deduction is available on expenses incurred in reorganising a company for the purpose of listing on the South Pacific Stock Exchange.

40% of capital expenditure of not less than FJD 50,000 incurred by any existing business located in Vanua Levu is allowed as a deduction for tax purposes, subject to certain conditions.

**Foreign tax credit**

A credit is allowed in Fiji for foreign tax paid on foreign income, limited to the lesser of the Fiji tax payable or the foreign tax paid on such income.
**Withholding taxes**

WHTs are levied as follows:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>Dividends</th>
<th>Interest</th>
<th>Royalties</th>
<th>Know-how, management fees</th>
<th>Professional fees</th>

Notes

1. Applies to interest (over FJD 200) on savings and deposits with commercial banks and other financial institutions.
2. 10% of gross amount of dividends if beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends; 15% in all other cases.
3. 5% of gross amount of dividends if beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 15% in all other cases.
4. Depending on the provisions of the applicable double taxation agreement.

**Tax administration**

The Tax Administration Decree (TAD) was promulgated with the stated intention of harmonising the administration of the various tax laws, including CIT and VAT. FBT and STT are now also covered by the provisions of the TAD.

If a due date falls on a Saturday, Sunday, or holiday, the due date is the last working day before the due date.

**Taxable period**

Tax is assessed on income derived during the calendar year preceding the year of assessment. Returns are therefore generally accepted on a calendar-year basis, although approval is also given to use an alternative fiscal-year basis. For purposes of assessment of returns completed on a fiscal-year basis, the calendar year in which more than one-half of the fiscal year falls is deemed to be the calendar year in which the income is derived.

**Tax returns**

The Fiji tax system is not based on self-assessment. Returns of income contain information on the basis of which assessments are raised by the tax authorities.
The due date for lodgement of CIT returns is three months after the end of the income year. However, under the Tax Agent Lodgement Programme, an extension of time may be granted to lodge the CIT returns.

**Payment of tax**

Advance tax payments are required to be made in four instalments, as follows:

- **First advance**: Due on the last day of the sixth month of the current fiscal year (30% of the estimated tax payable).
- **Second advance**: Due on the last day of the ninth month of the current fiscal year (30% of the estimated tax payable).
- **Third advance**: Due on the last day of the fiscal year (30% of the estimated tax payable).
- **Fourth advance**: Due two months after the fiscal year-end (10% of the estimated tax payable).

The TAD provides for various ways to ensure the collection of taxes, including, but not limited to, the following:

- **Departure prohibition order**: A departure prohibition order may be used by the tax office to prevent taxpayers from leaving the country without settling outstanding taxes.
- **Garnishee orders**: The tax office may garnish bank accounts for outstanding taxes.
- **Registration of charges on personal and real properties of the taxpayer**.
- **Distress and sale of personal property**.
- **Temporary closure of business**.

**Penalties**

Administrative penalty provisions have been amended and increased under the TAD. Some of the penalties are as follows:

- **Failure to register**: Every person who fails to apply for registration as required pursuant to the Decree commits an offence against the Decree and will, on conviction, be liable to a fine not exceeding 50% of the tax payable where the delay does not exceed six months; or a fine not exceeding the tax payable where the delay exceeds six months.
- **Late filing of a return**: A registered person who fails to lodge a tax return is liable for a penalty of 20% of the tax payable in the case where tax is payable and a penalty of 5% of the tax payable for every month of default.
- **Late payment of tax payable**: Where any tax remains unpaid on the expiry of the due date, a penalty of 25% of the tax payable in respect of that taxable period will apply.
- **Failure to comply with the late payment penalty**: Every person who fails to comply with the late payment penalty is liable for penalty of 5% of the unpaid tax for each month of default.
- **Failure to maintain proper records**: A registered person who fails to keep, retain, or maintain account, documents, or records is liable for a penalty of 75% (knowingly or recklessly made) or 20% (in other cases).
- **Insufficient payment of advance taxes**: A taxpayer who makes insufficient advance payment of taxes on the third and fourth instalments is liable for a penalty of 40%.

**Tax audit process**

The Fiji Revenue and Customs Authority (FRCA) undertakes ongoing compliance activity to ensure corporations are meeting their tax obligations. Compliance activities take various forms, including questionnaires, reviews of specific issues, and audits.
Fiji

**Statute of limitations**
Generally, the tax authority may issue notices of amended assessment within six years after service of a notice of assessment. However, the six-year limit does not apply in cases of fraud, wilful neglect, or serious omission.

Under the TAD, ‘fraud’ is defined as an act of making a false statement to the tax authority; ‘wilful neglect’ is defined as the deliberate act to minimise tax payable; and ‘serious omission’ is defined as the omission of any amount of tax as determined by the tax authority.

**Topics of focus for tax authorities**
The FRCA has recently been focusing on transfer pricing issues, the introduction and implementation of PAYE tax as a final tax, FBT (which was introduced in 2012), and the introduction of the proposed new Income Tax Decree.
Significant developments

A special tax to finance Finland’s national public service broadcasting company (Yleisradio or YLE) has been applicable from the tax year 2013. For organisations, the annual amount of the YLE tax is between 0 euros (EUR) and EUR 3,000.

All the value-added tax (VAT) rates have been raised by 1% as of 2013. The general Finnish VAT rate is 24% as of 1 January 2013.

Notification duty for construction businesses will be applied as of 1 October 2013.

At the end of 2012, the Finnish Parliament approved several significant changes to the Finnish tax legislation, including the following:

- General limitation on the deductibility of intra-group interest expenses: The limitations will be applied for the first time in the tax assessment for tax year 2014.
- Changes in the transfer tax rate: The transfer tax rate of shares in housing companies and real estate companies has increased from 1.6% to 2% for transfers made on 1 March 2013 or thereafter. As of 1 March 2013, the applicability of the transfer tax regulation is extended to cover transfer of shares of a foreign company whose activities consist mainly of owning or holding (directly or indirectly) real estates in Finland.
- A temporary tax on Finnish deposit banks for years 2013 to 2015: The bank tax is 0.125% of the amount of risk-weighted assets and is non-deductible for corporate income tax (CIT) purposes. Finnish branches of foreign banks are outside of the scope. The bank tax will be abolished if a framework for the recovery and resolution of credit institutions and investment firms is established at the European Union (EU) level.
- New temporary tax incentives: Additional tax deductions are available for research and development (R&D) related wage costs and educational expenses as well as double tax depreciations on certain industrial investments. The incentives are applicable from 2013 to 2015. However, the Finnish government decided in the spring of 2013 that it will propose that the additional deductions would already expire at the end of 2014.

In addition, in the spring of 2013, the Finnish government decided that it will propose the following changes to the tax legislation:

- The CIT would be reduced from 24.5% to 20% as of tax year 2014.
- Entertainment costs would become 100% non-tax deductible as of 2014 (currently, 50% is tax deductible).
- Long-term investments would be deducted on a per item basis for tax purposes (currently, the deductions are made from the pooled amount of investments).
Finland

- A so-called windfall tax would be applied for the first time in the tax assessment for tax year 2014. The tax would affect the nuclear and hydro power plants built before the 1997 Kyoto Protocol environmental agreement.

---

**Taxes on corporate income**

Finnish resident companies are subject to Finnish CIT on their worldwide income (i.e. unlimited tax liability). Also, Finnish permanent establishments (PE) of non-resident companies are subject to Finnish CIT on their worldwide income attributable to the PE.

The CIT rate is 24.5%.

**Local income taxes**

No local income taxes are levied in Finland on the income of a company.

---

**Corporate residence**

A company is deemed to be resident on the basis of incorporation. Consequently, a company is deemed to be resident in Finland if it is incorporated (registered) in Finland.

**Permanent establishment (PE)**

A PE is, in general, formed in line with the Organisation for Economic Co-operation and Development (OECD) Model Convention.

---

**Other taxes**

**Value-added tax (VAT)**

As of 1 January 2013, the general VAT rate is 24%. A reduced rate of 14% is applied to food and animal feed. The reduced VAT rate of 14% also applies to restaurant and catering services. A reduced VAT rate of 10% is applied to certain goods and services (e.g. books, subscriptions of newspapers and magazines lasting one month or longer, accommodation, passenger transport).

A zero rate applies in certain instances (e.g. intra-Community supplies of goods and exports of goods). Additionally, certain services (e.g. financial services, insurance services, and certain educational services) are exempted from VAT.

**Customs duties**

Many goods imported into Finland from outside the European Union are subject to customs duties. The rates of duty are provided by the EU’s Common Customs Tariff and vary widely.

**Excise duties**

Alcohol and alcoholic beverages, tobacco products, liquid fuels, electricity, natural gas, and coal are subject to EU harmonised excise duties. National excise duties are levied in Finland on waste delivered to landfill sites, lubricating oil, oil imported into or through Finland, ice cream, sweets, soft drinks, beverage containers, and tall oil.
**Real estate tax**
Municipalities impose an annual real estate tax. The tax is levied on the taxable value of buildings and land. The municipal council determines the applicable tax rates, although the minimum and maximum tax rates are set by tax legislation (e.g. 0.32% to 0.75% for permanent dwellings, 0.6% to 1.35% for other real estate). The tax is deductible from taxable business income if the real estate is used for business purposes. The tax is deductible from taxable income of the so-called other source of income if the real estate is used to acquire other taxable income than business income.

**Transfer tax**
A transfer tax of 4% of the sales price is payable on the transfer of real estate situated in Finland. The transfer of shares in Finnish companies and other domestic securities is subject to a transfer tax of 1.6%. Generally, the transfer tax is payable by the transferee.

No transfer tax is payable on the transfer of securities that are subject to trading on a regulated market or multilateral trading facility in the European Economic Area (EEA). Similarly, no transfer tax is payable if both the seller and the transferee are non-residents. Transfer tax is, however, always payable on transfers between non-residents if the transferred shares are shares in a Finnish housing or real estate company.

The transfer tax rate for housing companies’ and real estate companies’ shares has increased from 1.6% to 2% for transfers made on 1 March 2013 or thereafter. In addition, as of 1 March 2013, the applicability of the transfer tax regulation is extended to cover transfer of shares of a foreign company whose activities consist mainly of owning or holding (directly or indirectly) real estates in Finland.

**Stamp tax**
No stamp taxes are levied in Finland.

**Public service broadcasting tax**
A new public service broadcasting tax (YLE tax) has been applicable since 2013.

YLE tax for companies and organisations is based on the taxable income for a tax year. The tax amounts to EUR 140 per year if the taxable income of the organisation is at least EUR 50,000. For organisations with taxable income exceeding EUR 50,000, the tax is levied at EUR 140 plus 0.35% of the taxable income exceeding EUR 50,000. The maximum of the annual tax is EUR 3,000, which will be payable by organisations with taxable income of EUR 867,143 or more.

The tax will be collected for the first time for the financial years ending in 2013, and the tax will be calculated based on the taxable income from the whole financial year. YLE tax is tax deductible for organisations.

**Bank tax**
A temporary tax on Finnish deposit banks is applicable for years 2013 to 2015. The bank tax rate is 0.125% of the amount of risk-weighted assets and it is non-deductible for CIT purposes. The tax is collected from the Finnish deposit banks. The Finnish branches of foreign banks are outside of the scope of the tax. The bank tax will be abolished if a framework for the recovery and resolution of credit institutions and investment firms is established at the EU level.

The purpose of the bank tax is to collect funds in advance in case of possible new problems in the financial sector. Thus, the intention is to limit taxpayer’s liabilities in any future bank crises.
Finland

**Social security contributions**

According to the Finnish social security legislation, both Finnish and foreign employers have a liability to pay several social security payments in Finland in cases where an employee performs one’s tasks partly or wholly in Finland. The liability concerns all employers, regardless of the form of the company and whether the foreign company has a PE in Finland. The percentage rates for the employer’s (and employee’s) social security contributions are revised on an annual basis.

Compulsory social security contributions payable by the employer in 2013, according to the paid salaries, are as follows:

- **Employer’s social security charge:** 2.04% (no cap).
- **Employer’s pension insurance contribution:** 17.35% (on average, no cap).
- **Employer’s unemployment insurance contribution:** 0.80% for the first EUR 1,990,500 of gross salaries and 3.20% for the portion of the gross salaries exceeding EUR 1,990,500 (no cap).
- **Group life insurance premium:** 0.07% (on average, no cap).
- **Accident insurance premium:** 1.00% (on average, no cap).

The new rates for employer’s social security charge are applicable to salaries paid as of 1 January 2013. The employer’s social security charge is paid to the regional tax office, and the other contributions are paid to the insurance company. All of these contributions are tax deductible as salary cost.

Compulsory social security contributions payable by the employee in 2013 are as follows:

- **Employee’s pension insurance contribution:** 5.15% or 6.50% used for employees of age 53 or over (no cap).
- **Employee’s unemployment insurance contribution:** 0.60% (no cap).

The above mentioned contributions are tax deductible for the employee. These contributions are withheld from the gross salary at the time of salary payment and remitted by the employer to the appropriate insurance company together with the employer’s pension and unemployment contributions.

- **Employee’s sickness insurance contribution:** 2.04% (no cap).

The sickness insurance consists of two payments, a daily allowance contribution of 0.74% and a medicare contribution of 1.30%. From these two contributions, only the daily allowance contribution is tax deductible for the employee. The medicare contribution is not tax deductible. Unlike other employee’s social security contributions, the sickness insurance contribution is included in the withholding tax (WHT) rate of the employee’s personal WHT card and, thus, withheld and remitted to the tax authorities together with the withheld income taxes and is finally settled in the final assessment.

If an employee is regarded as a foreign-posted employee and has an A1 certificate or a certificate of coverage from one’s home country, neither the aforementioned employer’s social security contributions nor the employee’s social security charges are payable in Finland.
Branch income

As a general rule, a branch is taxed like a corporation (tax rate 24.5%) on the profits attributable to it, provided the branch constitutes a PE in Finland. No tax is withheld on transfers of (taxed) profits to the head office.

Income determination

Companies and other legal entities may have income from three different sources: income from business activities, agricultural income, and personal source income. The net taxable income is calculated separately for each source. The expenses of one source of income cannot be deducted from the taxable income of another source, and a loss from one source of income cannot offset taxable income from another source. All taxable income received by a company is taxed at the CIT rate of 24.5%, irrespective of the source to which it is attributable.

Income from business and professional activities falls into ‘business source’ income (taxed in accordance with the Business Income Tax Act or BITA), while income from non-business activity is ‘personal income’. Typically, personal income is passive income derived, for example, from investments. As an example, rental income from real estate let to non-related companies is usually regarded as ‘personal source’ income. The same can apply to a dividend received from stock exchange quoted companies, where the recipient of the dividend is a passive holding company. Farming and forestry income are, as a main rule, treated as agricultural source income.

In general, Finland has a very broad income concept, and taxable income includes all income derived from a company’s activities, though there are some significant exceptions, including (among others):

- Capital contributions by shareholders.
- In most cases, dividends from unlisted companies (see Dividend income below).
- Liquidation gains and capital gains qualifying for the participation exemption (see Capital gains below).
- Proceeds from disposal of company’s own shares.
- Merger gain.

There is no general distinction between capital gains and other income; capital gains of a company are taxed as part of its general income either in the ‘business income’ basket or the ‘other income’ basket. No rates other than the general CIT rate of 24.5% are applied to any part of taxable income of a company.

Taxable income of a company generally is computed on an accrual basis (i.e. income is taxable in the year it is earned). However, exemptions to this main rule do exist, including unrealised exchange gains and losses, which are taxable/deductible in the year of the rate change.

Inventory valuation

Inventories may be written down to the lower of direct first in first out (FIFO) cost, replacement cost, or net realisable value. Conformity between book and tax reporting is required.
Finland

**Capital gains**
Capital gains and losses are generally included in the taxable business income (i.e. sales proceeds are included in the taxable income, and the undepreciated balance of the asset sold is deducted in the sales year) and treated as ordinary income. However, the entire stock of machinery and equipment is treated as a single item, and the capital gain on machinery and equipment is entered as income indirectly by deducting the selling price from the remaining value of the stock of machinery and equipment.

Capital gains arising from the sale of shares are tax exempt via a participation exemption, under certain circumstances. Specifically, capital gains arising from the sale of shares are tax exempt if:

- the seller is not a company carrying out private equity activities (as defined by the BITA)
- the seller has owned continuously, for a period of at least one year, at least 10% of the share capital of the target company, and
- the shares are part of the seller’s fixed assets and the shareholding is included in the seller’s business income source for tax purposes.

For the participation exemption to apply, the target company cannot be a real estate company, a housing company, or a company the activities of which mainly include owning of real estates. The target company must also be a Finnish company, a company referred to in the European Commission (EC) Parent-Subsidiary Directive, or a company resident in a country with which Finland has concluded a tax treaty that applies to the target company’s dividend distribution.

Note that a capital gain is taxable to the extent that the gain corresponds with a previous tax-deductible write-down or provision made in connection with the acquisition cost of shares, subsidies received for acquiring shares, or previous capital losses deducted for Finnish tax purposes from intra-group transfer of the shares.

Capital losses are non-deductible in situations where capital gains are exempt from tax.

**Dividend income**
Dividends received by a Finnish company are tax exempt in most cases. However, dividends received are partly (75%) taxable if:

- the dividend is received on shares belonging to ‘investment assets’ and the receiving company does not own at least 10% of the equity of the distributing company that is resident in another EU member state and covered by the EC Parent-Subsidiary Directive (note that only financial, pension, and insurance institutions may have assets that are considered as ‘investment assets’)
- the dividend is received from a company other than a Finnish or EU resident, and
- the dividend is received from a publicly quoted company, the receiving company is not a publicly quoted company, and the shareholding is less than 10% of the equity of the distributing company.

Dividends that a Finnish company receives from other than a company resident in Finland or another EU member state are, however, fully taxable (100%) if there is no applicable tax treaty. Note that most of the Finnish tax treaties include provision enabling tax-exempt dividends from the tax treaty country in case of at least a 10% shareholding.
Stock dividends
Stock dividends (bonus shares) may be distributed to stockholders, which are corporations and other legal entities with some exceptions, free of tax on the shareholder (see Dividend income above).

Interest income
Interest income of a company is taxed as part of its general income, thus the regular CIT rate of 24.5% is applied.

Foreign income
A Finnish corporation is taxed on foreign dividends when the decision to distribute dividends is made and on foreign branch income and other foreign income (e.g. interest and royalties) as earned. The principal method of avoiding double taxation is the credit method, although the exemption method is still applied in a few older treaties (see the Tax credits and incentives section for more information).

Deductions
As with taxable income, the concept of deductible costs is wide and covers, in general, all costs incurred in the pursuance of taxable income. Significant exceptions to this rule include (among others):

- Income taxes (see below), tax late payment interests, and punitive tax increases.
- Fines and other punitive payments.
- 50% of entertainment costs.
- Capital losses and liquidation losses if capital gains from the sale of shares of a target company would qualify for the participation exemption (see Capital gains in the Income determination section).
- Losses from the disposal of a company’s own shares.
- Merger losses.

As the accrual method is applied to the calculation of taxable income, expenses are usually deductible in the year they are realised (i.e. the year the obligation to pay has arisen).

Depreciation, amortisation, and depletion
The maximum annual rates of depreciation calculated on net book value (declining-balance method) are 25% for machinery and equipment and from 4% to 20% for buildings and other constructions, depending on the type and estimated life of the asset. Net book value is defined as cost less accumulated depreciation and, in the case of machinery and equipment, proceeds on disposal of the assets. The straight-line method is applied to certain intangible assets and capitalised expenditures and to assets with long economic use, such as dams. Tax depreciation is limited to the cumulative charges made in the books.

Costs related to qualifying intangible property are usually amortisable over a period of ten years or a shorter period if the economic life is proven to be less than ten years.

The capital cost of mines, sandpits, quarries, and peat bogs is written off in proportion to the quantities extracted. Short-lived items (the economic life of which is three years or less) may be written off immediately.

Land is not a depreciable asset.
Finland

The Finnish government has approved a proposal concerning temporary double depreciation for investments in production for tax years 2013 to 2015. The double depreciation is applied to new factories and workshops and new equipment and machinery used in factories and workshops. Such new investments should be taken into use or be purchased in 2013 to 2015. The double deduction can be made up to two years in a row during 2013 to 2015. The double depreciation is 50% of the undepreciated balance for machinery and equipment and 14% of the undepreciated balance for buildings.

**Goodwill**
Acquired goodwill is amortisable for tax purposes over its economic life, up to a maximum of ten years.

**Start-up expenses**
Start-up expenses are generally deductible expenses when determining taxable income.

**Interest expenses**
As a general rule, interest expenses are fully deductible. However, the Finnish Parliament has recently approved a new law concerning intra-group interest deduction limitations (see the Group taxation section).

**Bad debt**
In general, bad debts incurred from sales receivables, etc. are tax deductible. The bad debts must also be deducted for accounting purposes. Additionally, loan receivables may be tax deductible in cases where external loans or ownership of less than 10% is in question.

**Charitable contributions**
Donations are deductible for CIT purposes in certain cases.

In order for a donation to be tax deductible, the amount of the donation should be at least:

- EUR 850, but not more than EUR 250,000, if made to an EEA member state or to a publicly financed university or other higher educational institution in the EEA to benefit the sciences, the arts, or the Finnish cultural heritage, or
- EUR 850, but not more than EUR 50,000, if made to an association, foundation, or other institution in the EEA nominated by the Tax Administration and to benefit the sciences, the arts, or the Finnish cultural heritage.

Donations of not more than EUR 850 (e.g. to charitable purposes) are, in general, tax deductible.

**Taxes**
No income taxes are deductible when determining taxable income. However, the real estate tax is deductible.

**Net operating losses**
Losses may be carried forward for ten subsequent years. However, the right to carry forward losses may be forfeited in certain instances, such as in cases where there is a direct or indirect change in the ownership of the company operating at a loss. Loss carrybacks are not allowed.
**Payments to foreign affiliates**
A Finnish corporation may claim a deduction for royalties, service fees, and interest charges paid to foreign affiliates, provided the underlying transaction is beneficial to it and the amounts paid are at arm’s length.

**Group taxation**
Companies within a group are not consolidated for CIT purposes. However, via group contributions (i.e. lump sum payments of cash based on annual taxable profits), group companies may even out their taxable profits and losses, which leads effectively to the same result as consolidation would. A group contribution is a deductible cost for the granting company and taxable income for the receiving company, provided that all of the following are true:

- Both companies belong to a structure where there is a direct or indirect common ownership of at least 90%, and the structure has existed for the entire tax year.
- Both companies are Finnish resident for tax purposes.
- Both companies are limited liability companies or co-operatives with business activities (i.e. have a source of income from business activities, see the Income determination section) and are not financial, insurance, or pension institutions.
- The contribution is recorded in the annual statutory accounts of both companies involved and must affect their annual net income.
- The accounting period for both companies ends at the same date.
- The amount of contribution does not exceed the taxable business income of the granting company.
- The contribution is not considered a capital investment.

Based on case law, the ownership chain may also be traced via foreign entities, provided there is a tax treaty between Finland and the country wherein the ultimate parent for the group is resident.

**Transfer pricing**
All transactions between related parties must happen at arm’s length. The requirement is imperative even in relation to purely domestic transactions. If the arm’s-length requirement is not followed, income or deductions of a company may be adjusted for tax purposes, in addition to which a risk for substantial penalties exists.

A Finnish company is obligated to prepare transfer pricing documentation to support transactions between its non-Finnish related parties. Documentation is subject to statutory requirements regarding content, which vary depending on the volume of related party transactions. The documentation requirement does not concern small and medium-sized companies that have less than 250 employees and feature a turnover of no larger than EUR 50 million or a balance sheet of no more than EUR 43 million.

Thresholds are calculated at the group level. Failure to present appropriate documentation may lead to a punitive tax increase.

**Thin capitalisation**
The Finnish parliament has recently approved a new law concerning intra-group interest deduction limitations. The limitations will be applied for the first time in the tax assessment for tax year 2014.
Finland

In addition, the amount of debt and rate of interest should be at arm’s length. If not, a possibility for application of the general anti-avoidance provision may exist.

**Controlled foreign companies (CFCs)**
The CFC rules are applicable with respect to foreign entities in low tax jurisdictions controlled by Finnish residents. The undistributed profits of such foreign entities may be taxed as profit of the Finnish resident direct or indirect shareholders. The entity is deemed to be controlled by Finnish residents if at least 50% of the capital or total voting rights are directly or indirectly held by Finnish residents or if Finnish residents have the right to at least 50% of the profits of the entity. The taxable person in such a case is the Finnish resident shareholder who owns directly or indirectly at least 25% of the capital of the corporate body or has the right to at least 25% of the profits of the entity. A foreign entity is considered to be low taxed if the actual income tax burden of the foreign corporation in its country of residence is lower than three-fifths of the tax burden of a comparable Finnish corporation (i.e. an effective rate of less than 14.7%, which is three-fifths of the Finnish tax rate of 24.5%).

Foreign PEs of non-resident companies can be regarded as equal to foreign companies, provided that the PE's profits are not taxed in the head office state. Due to the transitional period, the PE provision will be applicable to PEs of foreign entities only as of 1 January 2015.

Certain types of businesses are excluded from the scope of the CFC rules (e.g. income principally from industrial, manufacturing, or shipping activities, as well as sales or marketing activities related to such activities, if they are directed principally to the country of residence of the sales or marketing company). Also, companies resident in a country with which Finland has a double tax treaty (DTT) generally are outside the scope of the CFC rules if the company does not benefit from any special tax incentives in that treaty country. Tax treaty countries that are not covered by this rule are exhaustively mentioned in a specific ‘black list’ provided by the Ministry of Finance. These countries are Barbados, Bosnia-Herzegovina, Georgia, Macedonia, Malaysia, Moldova, Montenegro, Serbia, Singapore, Switzerland, United Arab Emirates, and Uzbekistan.

In addition to these two mentioned exclusions, the Finnish CFC rules are not applicable in cases of genuine economical establishment in a foreign country, which is either an EU/EEA member state or a tax treaty state not on the ‘black list’. The genuine economical establishment is evaluated in light of the requirements of the business in question and paying special attention to capable personnel and office space located in the low tax jurisdiction.

---

**Tax credits and incentives**

**Foreign tax credit**
The principal method of avoiding double taxation is the credit method, although the exemption method is still applied in a few older treaties. Foreign tax can be credited against taxes payable in Finland on the same income over the same period on a pro-rata basis. The credit is given for taxes paid to a foreign state and covered by the relevant double tax treaty. The maximum credit is the lesser of either the amount of the foreign tax or an amount equal to the Finnish tax payable on the income from a foreign state. This maximum is calculated on a source-by-source basis. Unused credit of foreign tax paid may be carried forward for five years on an income basket basis.
Research and development (R&D) activities
Qualifying R&D related costs may be deducted annually under certain circumstances, despite the fact that they should be capitalised under general rules.

The Finnish Parliament has recently approved a temporary tax incentive for tax years 2013 to 2015 concerning R&D costs. According to the new law, an additional deduction on salary expenses of personnel involved in R&D is allowed in taxation. The amount of additional deduction on R&D salary expenses is 100% (maximum EUR 400,000).

Withholding taxes
Finnish corporations paying certain types of income are required to apply a 24.5% or 18.38% WHT on payments to foreign corporations and a 30% WHT on payments to non-resident individuals or other than corporate entities.

According to domestic legislation, interest paid to a non-resident is usually tax exempt in Finland.

Dividends paid to a company referred to in the EC Parent-Subsidiary Directive, owning at least 10% of the capital of the dividend distributing company, are also tax exempt.

No WHT is levied on dividend payments received by companies resident in the EU/EEA area (other than in Liechtenstein), which would have been tax-free if paid to a Finnish corporate body, if the WHT cannot be credited in the company's country of residence.

The domestic WHT rate is 18.38% if the requirements for WHT exemption listed above are not met and

- the non-resident recipient is a financial, insurance, or pension institution resident in the EU/EEA area (other than Lichtenstein)
- the shares belong to its investment assets, or
- the non-resident recipient is a non-listed company or a private company resident in the EU/EEA area (other than Lichtenstein) receiving dividends from a resident listed company in which it holds less than 10%.

See the table below for WHT rates on dividends and other payments from Finland to non-residents.

For countries not included in table, the WHT rate is 24.5% (corporate entity) and 30% (individual or other than corporate entity).

Note that each tax treaty should be studied carefully because there are often exceptions to general rules.

Notes

* The recipient is a company whose share in the company making the payment is at least the percentage indicated in brackets.

1. Tax is not levied on literary, scientific, or artistic royalties (for film royalties see text of treaty).
2. If corporate entity, then:
   - no tax if these dividends were tax free under Business Tax Act and if the recipient does not receive a full credit for the Finnish tax in the country of residence, and
   - no tax on dividend paid to a company meant in the EC Parent-Subsidiary Directive owning at least 10% of the capital of the paying company.
3. The tax rate is 15% on films, tapes used in television or radio broadcasts, use of copyright of literary, artistic, or scientific works, or royalty paid for usufruct.
4. The tax rate is 10% on literary, scientific, artistic, and film royalties.
5. The tax rate for an individual is 30% if income is tax-exempt in the country of residence.
6. A lower tax in certain cases.
7. Foreign capital greater than 100,000 United States dollars (USD) when dividend becomes due and payable.
8. See the treaty for additional requirements.
9. The tax rate is 7% on industrial, scientific, and commercial royalties.
10. The tax agreement does not apply if the recipient is a special holding company.
11. The tax rate is 5% on royalties from films and tapes.
12. The tax rate is 5% on royalties paid for the use of industrial, commercial, or scientific equipment.
13. The tax rate is 15% if the payer is also an industrial enterprise.
14. The 10% is calculated on the total voting stock.
15. There is no tax on profit shares meant in EC Directive 2003/48/EC.
16. The tax rate is 1% for finance lease of equipment and 5% for operating lease of equipment and computer software.
17. The tax rate is 5% for the use of secret process or for know-how; there is no tax for computer software or patent.
18. The tax rate is 10% on industrial royalty, 3% on royalties to news agency, and 5% on artistic royalty to the author or the author’s mortis causa successor.
19. The tax rate is 2.5% on royalties paid for the use of industrial, commercial, or scientific equipment or computer software.
20. The tax rate is 15% if the recipient is a company.
21. There is no tax on dividends to qualified parents-subsidiaries and pension funds.
22. There is no tax if the recipient proves that one has domicile (individual) or is incorporated in the United Arab Emirates.
23. If corporate entity tax is 18.38% or 24.5%.
24. There is no tax on royalties between associated companies meant in EC Directive 2003/49/EC.

Non-treaty areas include Andorra, Antigua and Barbuda, Bahama Islands, Bahrain, Belize, Cayman Islands, Channel-Islands, Cyprus, Gibraltar, Grenada, Greenland, Hong Kong, the Spitsbergen, Jan Mayen, Liberia, Macao, Mauritius, Monaco, Panama, Samoa, San Marino, Vanuatu, and Virgin Islands.

**Tax administration**

**Taxable period**
The tax year is generally the calendar year. A company having an accounting period other than the calendar year is taxed for the accounting period or the accounting periods ending during the calendar year.

**Tax returns**
A company must file a CIT return within four months from the end of the accounting period.

**Payment of tax**
Income taxes are levied as prepayments during the tax year. Advance tax payments for companies are collected in two or 12 instalments during the tax year. If the total amount to be paid is not more than EUR 1,700, the instalments are due in the third and the ninth month of the accounting period. If the total amount to be paid exceeds EUR 1,700, the instalments are due monthly (due date is the 23rd day of each month).

If the final taxes exceed the advance payments, the difference is payable in the form of a supplementary payment due on the 25th day of the month following the month during which the final assessment is completed (ten months after the end of accounting period). Interest is payable on the supplementary amount if paid after the filing deadline of the CIT return (see above).

The YLE tax will be included in the advance taxes payments as of 2014. However, in 2013, the tax will be collected together with the final tax assessment for tax year 2013. In order to avoid late payment interest charges because of the YLE tax, corporate taxpayers can make supplementary prepayments to cover the tax.

After the assessment of the taxes, any excess prepayments are refunded without application.
**Tax audit process**

Tax audits are performed at irregular intervals by tax auditors, who are entitled to examine the accounts of a company and to request additional information necessary to the examination. Generally, the taxpayer receives an advance notice of an audit from the tax authorities.

**Statute of limitations**

Tax assessment must be completed within ten months from the end of the tax year. After the assessment, a tax office can change an incorrect assessment. A correction for the benefit of the taxpayer has to be made in five years, calculated from the beginning of the year following the assessment year.

Any correction disadvantageous for the taxpayer must be made within the following time limits, calculated from the beginning of the year following the assessment year:

- One year: All errors.
- Two years: Writing errors made by the administration, calculation errors, and other comparable errors, as well as errors caused by erroneous or inadequate information given by third parties.
- Five years: If the taxpayer has failed to file one’s return or has filed an incomplete, false, or misleading return.

**Topics of focus for tax authorities**

Current issues of special focus for tax audits are transfer pricing and PEs.

**The Tax Account system**

The Tax Account system is a taxpayer-specific information system under which unprompted taxes (e.g. VAT and employer’s social charges) are declared on a monthly basis. Payments are made through regular payment channels.

Tax types not covered by the Tax Account system are income tax, real estate tax, inheritance tax, gift tax, forestry fees, and transfer tax. It is important to note that WHTs are declared through the Tax Account system.

**Other issues**

**Company restructurings**

In accordance with the EC directive 2009/133/EC on mergers, divisions, partial divisions, transfers of assets, and exchanges of shares concerning companies of different EU member states, it is possible to carry out the said restructurings tax neutral if statutory conditions are met. In cross-border situations, both parties should be resident in the European Union. The principle of going concern is applied in taxation (i.e. the receiving company receives the assets with the values the transferring company had for those assets in its taxation).

**Notification duty for construction businesses**

As of 1 October 2013, a monthly notification duty of the employee and contract information to the Tax Administration applies to construction work subscribers and the main contractor of a joint construction site.

**Significant developments**

**New tax credit to boost competitiveness and employment**

To improve the competitiveness of the French economy and reduce employment costs, France introduced a new tax credit, which is available to French and foreign enterprises subject to corporate income tax (CIT) in France.

Partnerships will pass their tax credit through to their partners, provided the partners are subject to French tax.

There are no requirements regarding the nature of the activity carried out in France.

The regime is effective from 1 January 2013, and the tax credit will be calculated as a percentage of the wages paid during the calendar year to employees receiving less than 2.5 times the French regulated minimum wage (SMIC).

The current gross monthly SMIC is 1,430 euros (EUR). The rate applicable for this tax credit will be 4% for calendar year 2013, increasing to 6% for 2014 and subsequent years. The tax credit can be offset against the CIT liability payable by the taxpayer with respect to the calendar year during which the wages are paid. Any excess credit can be carried forward and offset against the tax liability of the taxpayer during the next three years.

Credits unused after three years will be refunded to the taxpayer. The ‘receivable’ (unused credits) can be transferred or sold only to credit institutions. Finally, special provisions apply in the case of mergers and assimilated restructuring operations.

**Additional limit on interest deductions**

The Finance Act also introduces a new limit on interest deductions. The new limit applies in addition to existing limits, such as the interest rate cap on related-party debt, thin capitalisation rules, and the so-called ‘Carrez Amendment’ that denies a deduction for interest relating to the financing of the acquisition of shares when the purchaser does not actually ‘make decisions’ relating to the shares and does not exercise control or influence over the target.

Under the new limit, 15% of the net finance expenses of a company subject to French CIT will no longer be deductible. In a tax group, this limit applies to the consolidated tax result of the group. This is a permanent disallowance, as there is no mechanism to carry the disallowed interest forward to subsequent tax years. ‘Net finance expense’ is defined as the total amount of finance expense incurred as consideration for financing granted to the company, reduced by the finance income received by the company in consideration for financing granted.
Rents incurred as part of a rental agreement between related parties or a leasing agreement also are included in finance expenses after the deduction for depreciation of the lessor. However, rents paid in relation to real estate rental agreements between related parties should be excluded. The new limit applies to both related and third party financing, regardless of the purpose of the financing.

This limit will not apply if a company's net finance expense is lower than EUR 3 million. In a tax group, this applies if the net finance expense of the group is lower than EUR 3 million. Groups will need to consider the impact of this new provision on how tax is shared among the members of the tax group in the tax sharing agreement.

In addition, in a tax consolidated group, the new limit does not apply to the portion of net finance expense resulting from financing transactions between members of a French tax unity. The new limit applies ‘retroactively’ to financial years (FYs) ending on and after 31 December 2012. For financial years starting on and after 1 January 2014, the percentage of non-deductible financial expenses will increase from 15% to 25%.

**3% additional contribution on dividend distributions**
Dividend distributions (or deemed distributions for tax purposes) made as of 17 August 2012 by French companies are subject to a genuine 3% additional tax, which comes on top of underlying CIT. The 3% tax is not due (i) by French companies meeting the European Union (EU) small and medium enterprise (SME) criteria, (ii) by foreign partners in a tax-transparent French partnership, and (iii) by French branches of EU companies.

Tax credits are not creditable, with the possible exception of foreign tax credits eligible under a double tax treaty (DTT).

Distortion of taxation resulting from the form of establishment in France (branch vs. subsidiary) will generate new litigations based on EU principles. Foreign investors may revisit the most appropriate structure (branch vs. subsidiary) for investment in France.

**Tighter participation-exemption rules on long-term gains**
Under the prior regime, 90% of long-term gains resulting from the disposal of participating shares were exempt from tax. The Finance Act changes the basis for calculation of the taxable portion of the gain. The taxable portion of the gain is now based on the ‘gross gains’. Long-term capital losses cannot be offset against long-term capital gains. In addition, the exempt portion of the capital gain has been reduced from 90% to 88%.

The new regime applies to financial years closed on or after 31 December 2012.

**Tighter rules governing loss carryforward**
Under the new rule, tax losses carried forward are available to offset EUR 1 million plus 50% of the current taxable income exceeding that amount (instead of the previous 60%). The tax losses that cannot be offset in a given year are still eligible to be carried forward and offset against future taxable profits.

The new regime applies to financial years ending on or after 31 December 2012.

**New exit tax rules in case of transfer of French head office or establishment**
Under prior law, in the case of a transfer of assets outside France as part of a transfer of a head office or an establishment, unrealised gains were immediately taxable. In the
future, in the case of a transfer to an EU member state or, under certain conditions, to a European Economic Area (EEA) member state, taxpayers will be able to either pay the full amount of tax immediately or pay it over five years in five equal instalments.

**Accounting records to be provided in ‘computerised format’ in case of tax audit**
Under the new law, companies are required to keep their accounting records in computerised form and to provide them to the tax authorities in the same format. Printed records will no longer be accepted.

Taxpayers failing to comply with this new rule will be liable for penalties as high as 0.5% of the declared or reassessed gross revenue.

**Payroll tax**
Payroll tax (*taxe sur les salaires*), which is assessed on gross salaries, has increased. The rate of tax varies from 4.25% to 13.6%, and a new 20% rate has been created for annual gross salaries above EUR 150,000. The taxable base has also been extended to compulsory or voluntary profit sharing.

**Taxes on corporate income**

France levies CIT at a rate of 33.33%.

A resident company is subject to CIT in France on its French-source income. In that respect, income attributable to foreign business activity (if there is no treaty in force between France and the relevant foreign country) or to a foreign permanent establishment (PE) (if a tax treaty applies) is excluded from French tax basis.

A non-resident company is subject to CIT in France on income attributable to French business activity or to a French PE, as well as on income from real estate located in France.

**Social contribution tax**
Concerning large size companies, a social contribution tax amounting to 3.3% is assessed on the CIT amount from which a EUR 763,000 allowance is withdrawn.

**Temporary CIT surcharge**
A CIT surcharge of 5% assessed on the CIT amount is due by companies whose turnover exceeds EUR 250 million.

This temporary surcharge is applicable to fiscal years ending on or after 31 December 2011 until 30 December 2015.

**3% additional contribution on dividend distributions**
Dividend distributions (or deemed distributions for tax purposes) made as of 17 August 2012 by French companies are subject to a genuine 3% additional tax, which comes on top of underlying CIT. The 3% tax is not due (i) by French companies meeting the EU ‘SME’ criteria, (ii) by foreign partners in a tax transparent French partnership, and (iii) by French branches of EU companies.

Tax credits are not creditable, with the possible exception of foreign tax credits eligible under a DTT.
Distortion of taxation resulting from the form of establishment in France (branch vs. subsidiary) will generate new litigations based on EU principles. Foreign investors may revisit the most appropriate structure (branch vs. subsidiary) for investment in France.

**Patent box regime**
Under certain conditions, income derived from the sale or license of patents or patentable inventions is taxed at a reduced 15% rate.

**Capital gains**
A reduced tax rate of 15% applies to certain capital gains. See Capital gains in the Income determination section for more information.

**Local income taxes**
No tax is levied on income at the regional or local level.

---

**Corporate residence**

France is defined as metropolitan France (excluding Monaco, but including the continental shelf), Corsica, and the overseas departments (French Guyana, Guadeloupe, Martinique, Reunion).

As a general rule, a resident company is a company that is incorporated under French commercial laws.

**Permanent establishment (PE)**
The notion of PE is not defined by the French Tax Code and has been specified by a case law of the French Administrative Supreme Court (i.e. ‘Conseil d'Etat’). The notion of PE refers to an enterprise exploited in France that can be materialised in one of the three following situations:

- Business activity conducted through an establishment (i.e. a fixed business installation operating with some degree of autonomy [e.g. a branch, sales office]).
- Business conducted in France by a dependent agent.
- Existence of a complete commercial cycle in France.

---

**Other taxes**

**Turnover taxes**
Turnover taxes are assessed on goods sold and services rendered in France, and operate much like a value-added tax (VAT). The normal rate is 19.6%. Sales of certain kinds of medicines and transports of persons are taxable at a 7% reduced rate. Food products, subscription to gas and electricity (under certain circumstances), sales of books, and products and services provided to disabled persons are taxable at a 5.5% rates. Other specific sales and services are taxable at a 2.1% reduced rate. Exports and certain specific services invoiced to non-French residents are zero-rated.

As of 1 January 2014, the above mentioned 19.6% normal rate, 7% reduced rate, and 5.5% reduced rate will be respectively replaced by a 20% normal rate, 10% reduced rate, and 5% reduced rate.
France

Business-to-business (B2B) suppliers of services are taxable at the location of the customer and not at the location of the supplier. For business-to-consumer (B2C) suppliers of services, the place of taxation is where the supplier is established.

Turnover taxation applies only to taxable persons, partly taxable persons, and non-taxable legal persons that are registered for turnover taxes.

Specific turnover taxation rules apply to leases of transportation equipment; cultural, arts and sports services; electronic and telecommunication services; and transportations of goods.

**Excise taxes**
Some specific goods are subject to excise duties, notably:

- Alcohol and alcoholic drinks (e.g. wine, beer, ethylic alcohol).
- Processed tobaccos (e.g. cigars, cigarettes, tobacco).
- Electric power.

**Real estate tax**
All properties located in France are subject to a 3% real estate tax. The tax is assessed annually on the fair market value of the real estate, in proportion to the direct or indirect interest held. All entities in the chain of ownership are jointly liable for the payment of the tax.

Automatic exemptions apply in three situations. First, to entities whose French real estate assets represent less than 50% of their total French assets. Second, to entities listed on a regulated market whose shares, units, or rights are significantly traded on a regular basis. Third, to entities having their registered office in France, in an EU member state, or in a country that has concluded a DTT with France providing for an administrative assistance or a non-discrimination clause, where:

- their direct or indirect interest in the French real estate is less than either EUR 100,000 or 5% of the fair market value of the French real estate
- they are pension funds or public charities recognised as fulfilling a national interest whose activities justify the need to own French real estate, or
- they are non-listed French real estate funds (société de placement à prépondérance immobilière à capital variable [SPPICAV] or fonds de placement immobilier [FPI]) or foreign funds subject to equivalent regulations.

Where an automatic exemption does not apply, a claim may be submitted for conditional exemption.

**Territorial economic contribution**
The territorial economic contribution (Contribution Economique Territoriale or CET) is comprised of two different taxes: the companies’ land contribution (Cotisation Foncière des Entreprises or CFE) and the companies’ added value contribution (Cotisation sur la valeur ajoutée des entreprises or CVAE). Although they have a similar scope, the taxes are subject to very different rules.

The CFE tax is based on the rental value of assets that are subject to the real estate tax, excluding movable goods and equipment. For industrial plants, the taxable base is reduced by 30%. There is a specific rental value for each town and an upgrading ratio is set forth at the national level each year.
The CVAE is based on a company’s added value. Only taxpayers that are not exempt from the CFE and whose turnover is greater than EUR 152,500 are subject to CVAE. However, tax relief equal to the amount of the tax is provided for companies whose turnover is below EUR 500,000. The tax rate for companies whose turnover ranges from EUR 500,000 to EUR 50 million is assessed according to a progressive scale, which ranges from 0% to 1.5%.

There is an upper ceiling on the added value that applies to the CET. As a consequence, tax relief applies and is equal to the excess of the sum of CFE and CVAE over 3% of the added value of the company.

**Registration duties**
Registrations duties mentioned hereafter are imposed on the purchaser. However, the seller may be liable for these duties in case of non-settlement by the purchaser.

**Transfer of goodwill**
The transfer of goodwill is subject to a registration duty at a rate of 3% on the part of the transfer price amounting from EUR 23,000 to EUR 200,000 and at a rate of 5% on the part exceeding EUR 200,000.

**Transfers of shares**
The transfer of shares is subject to registration duty at a rate of 3% with no cap.

The transfer of listed shares recorded by a deed will be subject to registration duty at a rate of 0.1%.

Several exemptions are added to the list of the transactions that are not subject to transfer duties:

- Transactions subject to the financial transaction tax (FTT).
- Repurchase by companies of their own shares intended to be sold to the subscribers of a company employee saving plan, with some exceptions.
- Transactions between companies in the same group within the meaning of Article L233-3 of the French Commercial Code.
- Transfer of ownership resulting from a merger, a contribution, or a spin-off made under the provisions of Article 210 A and 210 B of the French Tax Code and acquisition shares of a company by its employees.

**Transfer of interest or quotas in legal entities whose capital is not divided into shares**
The transfer of interests or quotas in legal entities whose capital is not divided into shares (e.g. Société à responsabilité limitée or SARLs, which are a form of private limited liability corporate entity) is subject to a registration duty of 3%.

**Transfer of shares in non-quoted real estate companies**
The transfer of shares in non-quoted companies whose assets consist principally of immovable property is subject to a registration duty of 5%. According to Article 5 of the Finance Act for 2012, in case of disposal of shares held in real estate companies, the taxable basis for transfer tax purposes is equal to the fair market value of the real estate assets or rights reduced by the debt contracted for the acquisition of such assets or rights. Other kinds of debts are not taken into account to compute the taxable basis of the transfer tax.
Transfer of real estate
The sale of land and buildings is subject to registration duty at a rate of 5.09% on the transfer price, including expenses.

Exit tax rules in case of transfer of French head office or establishment
Under prior law, in the case of a transfer of assets outside France as part of a transfer of a head office or an establishment, unrealised gains were immediately taxable. In the future, in the case of a transfer to an EU member state or, under certain conditions, to an EEA member state, taxpayers will be able to either pay the full amount of tax immediately or pay it over five years in five equal instalments.

Systemic risk tax
A bank tax known as a systemic risk tax has been implemented to prevent excessive risk behaviour by banks. This tax is payable by certain financial institutions (including credit institutions).

It should be noted that ‘fund’ entities (e.g. hedge funds or securitisation vehicles) are outside the scope of the tax.

French banks are subject to the bank tax on their worldwide business activities. The equity requirements that are used as the taxable basis for the calculation of the bank tax are calculated on a consolidated basis. Therefore, institutions that fall within the scope of the tax and that belong to a consolidated group are not subject to the tax on an individual basis. Where they are not part of such a group, institutions pay a contribution calculated on their individual position. The taxable basis is made up of the minimum equity required of the institution, as set out by the Prudential Control Authority to meet reserve ratio requirements in accordance with Basel II standards and specified during the previous calendar year.

The rate of the bank tax amounts to 0.25% of the taxable basis, and any amounts paid in that respect will be deductible for CIT purposes.

A tax return must be filed by 30 June every year, and the tax due must be settled at the same time.

Subject to the principle of reciprocity, it should be noted that taxpayers, for which the registered office or the group parent company is located in a country that has enforced a similar tax on systemic risk, can benefit from a tax credit. This tax credit can be used to settle the tax due or can be reimbursed.

Payroll tax
Companies that are not liable for VAT on at least 90% of their annual turnover are subject to payroll tax (taxe sur les salaries) regarding salaries paid during the following calendar year. Companies below the 90% trigger are liable for the payroll tax on the complement of their VAT recovery ratio, called the counter VAT recovery ratio.

Payroll tax is assessed on gross salaries. The rate varies from 4.25% to 13.6%. A new 20% rate has been created for annual gross salaries above EUR 150,000. The taxable base has also been extended to compulsory or voluntary profit sharing.

Financial transaction tax (FTT)
FTT applies to acquisitions for consideration of equity securities or similar securities in the meaning of the French Monetary and Financial Code issued by certain French-listed companies (i.e. financial instruments giving access to capital or to voting rights
in the company and securities issued under foreign law representing French-eligible securities). FTT applies regardless of whether the transaction is executed inside or outside of France.

The tax is due by the investment service provider (ISP) that has executed the purchase order or, when there is no ISP, by the custodian, irrespective of its place of establishment.

In most cases, the central securities depositary will be in charge of centralising the collection of the tax, the reporting to the French tax authorities, and the payment of the tax to the French Treasury.

The tax rate is 0.2% computed based on the acquisition price of the shares.

Branch income

Tax rates on branch profits are the same as on corporate profits. As a principle, branch profits are deemed to be distributed to the head office. A withholding tax (WHT) is levied on French branches of non-resident non-EU corporations at the rate of 30%, or a reduced tax treaty rate (e.g. for the United States, 5%), on net profits. Refund (limited or full) of tax may be claimed to the extent that the taxable amount exceeds the dividend(s) actually distributed by the foreign corporation during the 12 months following the close of the fiscal year concerned, or to the extent the dividends are distributed to residents of France.

Profits realised in France by non-resident corporations whose head offices are located in an EU country are not subject to branch WHT, provided that certain conditions are met (e.g. effective head office in an EU country or non-resident corporation subject to corporate taxation).

Income determination

Inventory valuation

Inventories must be valued at the lower of cost or market. Cost must be determined in accordance with the first in first out (FIFO) or the average-cost method. The last in first out (LIFO) method is prohibited.

Capital gains

Capital gains generally are taxable as ordinary income and subject to CIT at the standard rate of 33.33%, regardless of the duration of ownership of the assets sold.

However, a reduced rate of 15%, increased by the social contribution tax, is applied to capital gains on the disposal of patents or patentable inventions, as well as on income from the licensing of patents or patentable inventions.

Gains on the sale of shares in subsidiaries held for at least two years benefit from significant relief (88% of such capital gains are excluded from CIT, with the remaining 12% portion being taxed at the standard 33.33% rate).

Capital gains and losses on shares sold to a related company

Capital gains derived from the disposal of shares held in subsidiaries for less than two years are immediately taxable at the common rate of CIT.
France

Capital losses derived from such disposal are not immediately deductible. In such a case, the loss will be deducted if, before a period of two years (as from the date of acquisition by the purchaser):

- the vendor stops being subject to CIT
- the shares are, after a restructuring of the transferee company, held by a company that is not related to the vendor, or
- the shares stop being held by the related company (notably further to a new sale).

If no event mentioned above arises within a period of two years starting from the acquisition by the vendor, the capital loss that has not been immediately deducted is treated in accordance with the long-term regime (i.e. the capital loss is therefore not deductible).

 Otherwise, the vendor has to join to its corporate tax return a specific form mentioning capital losses that are not immediately deducted.

**Capital gains of non-residents**
As a general rule, non-resident companies are not taxable in France regarding capital gains derived from the disposal of French assets unless these are part of a PE.

There are two main exceptions to this principle:

- Capital gains derived from the disposal of real estate assets located in France or derived from the disposal of French real estate non-listed companies are subject in France to WHT at a 33.33% rate.
- Capital gains derived from the disposal of shares held in a French company subject to CIT are subject in France to WHT at a 19% rate in the specific case where the seller has owned, at any point in time during the five years preceding the sale, at least 25% of the rights in the profits of the French company.

Note that in the specific case where the non-resident company is located in a non-cooperative state or territory (NCST), all capital gains derived from the disposal of French assets are subject to WHT in France at a specific rate of 75%.

**Dividend income**
Dividends generally are taxable as ordinary income and subject to CIT at the standard rate of 33.33%.

*For information on the taxation of inter-company dividends, see Participation exemption regime in the Group taxation section.*

**Interest income**
Interest income generally is taxable as ordinary income and subject to CIT at the standard rate of 33.33%.

**Foreign income**
Resident corporations are not taxed on foreign-source income derived from activities carried out abroad through foreign branches and foreign PEs. Other foreign income is not taxable until actually repatriated to French resident corporations. As a result, undistributed income of foreign subsidiaries is not taxable. The only exception to the territoriality principle is provided by Article 209 B of the Tax Code, known as the Controlled Foreign Company (CFC) rules (see the Group taxation section for more information).
**Deductions**

**Depreciation**
The depreciation of fixed assets has to be carried out component by component. The components of a fixed asset have to be depreciated separately according to their own lifetime.

Declining-balance depreciation is allowed for certain new and renovated assets whose useful life is in excess of three years.

For assets bought or manufactured between 4 December 2008 and 31 December 2009, the rate is computed by multiplying the rate of straight-line depreciation by:

- 1.75, if the useful life of the asset is three or four years
- 2.25, if the useful life of the asset is five or six years, or
- 2.75, if the useful life of the asset is more than six years.

For assets bought or manufactured after 31 December 2009, the rate is computed by multiplying the rate of straight-line depreciation by:

- 1.25, if the useful life of the asset is three or four years
- 1.75, if the useful life of the asset is five or six years, or
- 2.25, if the useful life of the asset is more than six years.

**Goodwill**
Under French tax rules, goodwill (e.g. clientele, trademarks) cannot be amortised.

**Start-up expenses**
No specific rules apply regarding deduction of start-up expenses.

**Research and development (R&D) and software expenses**
Concerning R&D and software expenses, a business may elect to immediately deduct costs incurred in R&D of software or to amortise their cost straight-line over a maximum period of five years.

The cost of acquiring software may be written off straight-line over 12 months.

The cost of patents acquired can be amortised over a five-year period.

**Interest expenses**
In principle, interest expenses are tax deductible.

**Carrez Amendment**
In accordance with Article 40 of the fourth amended Finance Act for 2011 (i.e. ‘Carrez Amendment’), interest expenses incurred by a French company for the acquisition of participation or shareholding acquisitions will not be deductible for CIT purposes if the French acquiring company is not in a position to demonstrate that it actually:

- makes decisions relating to the acquired participation and
- exercises an actual control or influence over the participations.

The purpose of the legislation is to prevent the interest deduction for the participation acquisition by a French entity when the acquired participation is effectively managed outside of France.
This rule will not apply where:

- the total fair market value of the participations owned by the French acquiring company does not exceed EUR 1 million
- the participation acquisition has not been financed by debt at the level of the French acquiring company or at the level of a company of the same group, or
- the debt-to-equity ratio of the group is equal to or higher than the acquiring company's debt-to-equity ratio.

**Additional limit on interest deductions**
The Finance Act for 2013 introduces a new limit on interest deductions that applies in addition to existing limits.

Under the new limit, 15% of the net finance expenses of a company subject to French CIT will no longer be deductible. In a tax group, this limit applies to the consolidated tax result of the group. This is a permanent disallowance, as there is no mechanism to carry the disallowed interest forward to subsequent tax years. 'Net finance expense' is defined as the total amount of finance expense incurred as consideration for financing granted to the company, reduced by the finance income received by the company in consideration for financing granted.

Rents incurred as part of a rental agreement between related parties or a leasing agreement also are included in finance expenses after the deduction for depreciation of the lessor. However, rents paid in relation to real estate rental agreements between related parties should be excluded. The new limit applies to both related and third party financing, regardless of the purpose of the financing.

This limit will not apply if a company's net finance expense is lower than EUR 3 million. In a tax group, this applies if the net finance expense of the group is lower than EUR 3 million. Groups will need to consider the impact of this new provision on how tax is shared among the members of the tax group in the tax sharing agreement.

In addition, in a tax consolidated group, the new limit does not apply to the portion of net finance expense resulting from financing transactions between members of a French tax unity. The new limit applies 'retroactively' to financial years ending on and after 31 December 2012. For financial years starting on and after 1 January 2014, the percentage of non-deductible financial expenses will increase from 15% to 25%.

**Thin capitalisation**
*Please see comments regarding thin capitalisation in the Group taxation section.*

**Bad debt**
Bad debts that are definitively non-recoverable are treated, from a tax point of view, as losses.

Under certain conditions, a tax-deductible reserve can be established for debts whose collection is uncertain.

**Charitable donations**
Charitable donations made by companies to certain foundations or societies are deductible at up to 60% of their amount (limited to EUR 5,000 of the turnover before taxes).
Taxes
Most taxes, including unrecoverable turnover taxes, registration duties, and CET, are deductible. The major exceptions are CIT and tax penalties.

Corporate tax losses

Carryforward of tax losses
Tax losses carried forward are available to offset the first EUR 1 million of taxable profits and 50% of taxable profits in excess of this.

Carryback of tax losses
Tax losses are available for carryback to the fiscal year immediately preceding that in which the losses arise and up to a maximum of EUR 1 million. Any unused surplus will be carried forward and used as set out above. In addition, the election to carry back tax losses must be filed prior to the deadline for submission of the tax return for the loss-making period.

Tax groups
The overall tax losses of a French tax group, as well as pre-election tax losses of the individual members of the group, will be attributed, whether carried forward or carried back, in the same manner and within the same limits as those set out above.

Payments to foreign related parties
Payments to foreign affiliates are allowed, as long as they meet the arm's-length test. If they do not, Article 57 of the French Tax Code provides that income directly or indirectly transferred to the foreign related parties, through either the increase or the reduction of the purchase or sales price of goods and services, or through any other means, must be added back to taxable income. For the purpose of this provision, foreign related parties are defined as parent subsidiaries or sister companies.

Where the payments are made to companies located in a country with a privilege tax regime, the French taxpayer must prove that the transaction is bona fide and that the amount due is not exaggerated (see the Group taxation section for more information on countries with a privilege tax regime).

Royalties
Article 11 of the Finance Act for 2012 restricts the conditions for deducting licensing royalties where the licensor and the licensee are related parties. A full deduction for the royalty expense may only be allowed if the licensee can demonstrate, and properly document, that:

- the use of the licence results in added value for the licensee over the entire licensing period and
- such use is real (i.e. does not consist of an artificial scheme).

Group taxation

Tax consolidation regime
French corporations and their 95% owned domestic subsidiaries may elect to file one single tax return, thus allowing the offset of losses of one group corporation against the profits of a related corporation. CIT is then levied on the aggregate income after certain adjustments for intra-group provisions (e.g. debt waivers, dividend distributions) have been made.
When shares in a company that will be integrated into the group are acquired by a
group company from individuals or legal entities that control this group, either directly
or indirectly, a portion of the group's overall financial expense incurred by the members
of the group is progressively added back to the group's taxable income on a straight-line
basis over a nine-year period.

A French subsidiary can be included in a tax consolidated group even if its parent
company is not located in France. However, at least 95% of the share capital of the
foreign company must be held, directly or indirectly, by the French company that is
head of the tax consolidated group. In addition, the foreign company must be subject to
CIT, be located in the European Union or in a member state of the European Economic
Area whose tax treaty with France includes a mutual administrative assistance clause to
fight tax fraud and tax evasion, and hold 95% of the lower-tier subsidiary's shares.

A PE of a foreign company subject to French CIT can be a member of a French tax
consolidated group if the shares of the foreign company are held by other French
companies, which are members of the consolidated group.

Provisions on the tax neutrality of intra-group transaction flows (e.g. dividends,
provisions, waivers of debts, interest, and capital gains on the sales of shares) have been
modified to treat tax consolidated groups with an intermediate foreign company the
same as other tax consolidated groups.

**Allocation of the tax charge within a tax consolidated group**

In an important decision dated 12 March 2010 ('Wolseley Centers France'), the French
Supreme Court disagreed with the French tax authorities by ruling that the tax charge
of the group can be freely allocated between members of the consolidated tax group.

Following this decision, group companies are free to enter into a tax consolidation
agreement stating the conditions for the allocation of the group tax charge or, where
applicable, the tax savings arising from the group arrangement.

The Supreme Court concludes that since the terms of an agreement to allow a re-
allocation taking into account the specific results of each of the group companies,
the terms of this re-allocation cannot be regarded as an indirect subsidy. However,
this allocation should not undermine the corporate benefit of each group member
nor the minority shareholders rights; otherwise, this will result in an abnormal act
of management.

**Underpriced sale of asset between two entities of a same tax
consolidated group**

In a decision dated 10 November 2010 ('Société Corbi'), the French Supreme Court has
specified that an underpriced sale of an asset between two members of the same tax
group must be neutralised at the group level only after the computation of the entities
results on a standalone basis.

First, on a standalone basis, the seller has to add back the advantage given to the
buyer (i.e. the difference between the fair market value and the amount paid) and the
buyer adds back this advantage as if it was a dividend. Second, when reprocessing the
different entities results, the advantage added back by the buyer has to be neutralised at
the group level.
**Participation exemption regime**

French parent companies (i.e. companies incorporated in France and holding qualifying shares that represent at least 5% of the issued capital of subsidiaries, French or foreign) have the option of excluding 95% of the subsidiaries’ net dividends from CIT (5% of charges and expenses must be added back to the parent company’s taxable results).

The French parent-subsidiary regime extends to certain shares without voting rights. There is no formal commitment to hold the shares for at least two years, and companies can benefit from this regime from the acquisition date of the shares. However, the obligation remains to hold the shares over this period of time. Certain shares of listed real estate companies are not eligible to the French parent-subsidiary regime.

The taxation of dividends received by a parent company from its subsidiary cannot be capped at the amount of the expenses actually incurred by the parent company. Thus, the tax liability will be equal to 5% of the dividends received, tax credits included.

The French parent-subsidiary regime is not applicable to dividends paid from entities located in an NCST.

**Distribution followed by absorption or sale of subsidiary**

The rules abolish the possibility for a company to accumulate the exemption of dividends received from its subsidiaries (under the participation exemption regime or the tax consolidation regime) and the deduction of a loss in value resulting from the dividends’ distribution due to previous distributions at the time of the securities exchange or sale of shares.

In principle, the subsidiary’s shares must be kept by the parent company for at least two years in order to benefit from the participation exemption regime. However, some operations lead to a break of the two-year holding period. In that case, the exchanged shares are deemed withheld until the sale of the securities received in exchange.

The exchanged shares will be deemed kept for the application of the participation exemption regime only if the gain or loss is not taken into account in the result of that exchange. If the gain or loss is included in the result, the dividends received may not benefit from the participation exemption regime and will be taxed.

**Transfer pricing**

**Transfer pricing documentation**

Large corporations located in France (i.e. with annual turnover or amount of gross assets in excess of EUR 400 million) are required to provide documentation containing general information regarding the relevant group of companies, including main activities, operational and legal structures of the related companies, functions performed and risks borne, main intangible assets, and group transfer pricing policy, amongst others.

**Individual advanced pricing agreements (APAs)**

APAs are available for taxpayers only on the basis of international agreements entered into in accordance with Article 25 of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention. Currently, taxpayers are allowed to enter into APAs with the French tax authorities on a unilateral basis. In practice, taxpayers are entitled to submit their transfer pricing policy to the French tax authorities. Agreement of the tax authorities to the APA precludes a later challenge.
Thin capitalisation
Under current rules, the tax deduction of interest paid by a French company to its foreign controlling shareholders is subject to the following three restrictions:

Interest rate limitation
Under the amended Article 212 of the French Tax Code, tax deduction of interest paid to related parties is limited to the higher of (i) the average annual interest rate applied by credit institutions to companies for medium-term variable rate loans or (ii) the interest that the borrowing company could have obtained from independent banks under similar circumstances. This rate is 3.39% for financial years ending on 31 December 2012. Having passed this interest rate test, French indebted companies have to pass a second test: the debt ratio.

Debt ratio
That part of interest paid to related parties that is deductible under the rate limitation test is disqualified if it exceeds all of the three following limitations during the same financial year:

- Interest relating to financing of any kind granted by related parties, within the limit of 1.5 times the net equity of the borrower.
- 25% of adjusted net income before tax (‘résultat courant avant impôt’, defined as the operating income, increased by certain items).
- Interest income received from related parties (i.e. there is no limitation on thin capitalisation grounds when the borrowing company is in a net lending position vis-à-vis related entities).

The portion of the interest that exceeds the three above limits is not deductible, except if it is lower than EUR 150,000.

Carryforward of excess interest
That part of the interest that is not deductible immediately by the borrowing company can be carried forward, without time limit, for relief in subsequent years, provided there is an excess capacity during such years. The amount in excess is, however, reduced by 5% each year, from the second financial year following the financial year in which the interest expense has been incurred.

Exceptions
The thin capitalisation rules do not apply to interest payable by banks and credit institutions, and also to certain specific situations such as interest in connection with intra-group cash pools or with certain leasing operations.

The thin capitalisation rules do not apply if the French indebted company can demonstrate that the debt-to-equity ratio of the worldwide group to whom it belongs exceeds its own debt-to-equity ratio.

Deductibility is also facilitated within a French tax consolidated group. The thin capitalisation rules apply to each company member of the group taken on a stand-alone basis. Any excess interest incurred by such company is, however, not carried forward by it. Instead, it is appropriated at the group level.

Extension of the thin capitalisation mechanism to loans granted by related parties
In the specific case where the repayment of a loan granted by a third party (including banks) is guaranteed by a related party or by a third party whose commitment is itself
secured by a related one, then the proportion of interest that is payable on that part of the loan that is secured in this way is potentially subject to thin capitalisation rules.

The provisions will not apply where the loan:

- takes the form of a bond issued by way of a public offering or under equivalent foreign regulations, although this excludes private placements
- is guaranteed by a related party solely by way of a pledge of shares in the debtor, security over the debtor’s receivables, or shares in a company directly or indirectly owning the debtor so long as the holder of such shares and the debtor are members of the same tax group; as a result, this exception will not apply where a foreign company grants a pledge of shares in its French subsidiary to guarantee the bank loan granted to it
- is obtained in the context of a refinancing to allow the debtor to complete the mandatory repayment of a pre-existing debt, which is required as a result of a direct or indirect takeover of the debtor (allowed up to the amount of the loan principal repaid and accrued interest to that date), or
- has been obtained prior to 1 January 2011 in connection with an acquisition of securities or the refinancing of such acquisition debt.

**Controlled foreign companies (CFCs)**

The CFC rules provide that:

- French corporations are required to include in their taxable income profits made by their more than 50% owned foreign subsidiaries and branches. The 50% holding is determined by direct and indirect control of shares and voting rights.
- The minimum holding threshold has to be reduced to 5% if over 50% of the share capital of the foreign entity is indirectly held through French or foreign companies controlled by the French parent company. However, if the shares in the foreign entity are listed on a regulated market, the French tax authorities will have to demonstrate that the French parent company, together with other entities holding shares in such foreign entity, is acting in concert.
- The CFC rules are only applicable if the foreign legal entity or PE in which the French company owns the requisite percentage of shares is in a country with a privileged tax regime. A privileged tax regime is defined by the French tax code as a tax regime in which a foreign jurisdiction subjects taxable income of a foreign entity to at least 50% or lower of the income tax liability that would have been incurred in France, had the activity of the foreign entity been performed in France.
- Profits of the foreign entity that fall under the CFC rules are no longer taxed separately. They are now aggregated with the other taxable profits of the French parent company. Consequently, any tax losses incurred by the French parent company may be offset against the foreign entity’s profits.
- The French parent company can avoid the application of the CFC rules if it demonstrates that the foreign entity carries an effective trading or manufacturing activity, conducted from its country of establishment or registered office. Furthermore, the CFC rules, in principle, are not applicable with respect of foreign branches or subsidiaries located in another EU country. However, this exception is not applicable if the French tax authorities can demonstrate that the foreign entity located in another EU country constitutes an artificial arrangement, set up to circumvent French tax legislation. This concept is similar to the ‘abuse of law’ concept, although it does not have all the same characteristics.
Foreign tax credit
Under DTTs signed by France, several methods have been established to avoid double taxation. The main one is the traditional deduction of a tax credit from tax effectively paid. However, some treaties establish a tax exemption or the exclusive right to tax. Also, a tax-sparing clause is included in some treaties, which allows for the deduction of not only the tax actually paid but a higher amount of tax.

New tax credit to boost competitiveness and employment
To improve the competitiveness of the French economy and reduce employment costs, France introduced a new tax credit that is available to French and foreign enterprises subject to CIT in France.

Partnerships will pass their tax credit through to their partners, provided the partners are subject to French tax.

There are no requirements regarding the nature of the activity carried out in France.

The regime is effective from 1 January 2013, and the tax credit will be calculated as a percentage of the wages paid during the calendar year to employees receiving less than 2.5 times the French regulated minimum wage (SMIC).

The current gross monthly SMIC is EUR 1,430. The rate applicable for this tax credit will be 4% for calendar year 2013, increasing to 6% for 2014 and subsequent years. The tax credit can be offset against the CIT liability payable by the taxpayer with respect to the calendar year during which the wages are paid. Any excess credit can be carried forward and offset against the tax liability of the taxpayer during the next three years.

Credits unused after three years will be refunded to the taxpayer. The ‘receivable’ (unused credits) can be transferred or sold only to credit institutions. Finally, special provisions apply in the case of mergers and assimilated restructuring operations.

R&D tax credit
The R&D tax credit is determined on the basis of the eligible R&D expenses incurred during the calendar year.

Currently, the R&D credit equals 30% of the R&D eligible expenses incurred during the year, up to EUR 100 million in eligible R&D expenses, and 5% beyond this amount. In addition, eligible R&D expenses incurred by the company can be included in the basis for computation of the tax credit at up to 100% of that amount.

Moreover, the 30% ‘standard’ rate is increased to 40% and 35% for the first and the second year, respectively, during which the company incurs eligible R&D expenses, or after the expiration of a period of five consecutive years during which the company did not benefit from the tax credit, provided, in both cases, that the concerned company is not affiliated with another company that benefited from the R&D tax credit within the same time period.

The tax code classifies eligible technical and scientific research operations in three areas: fundamental research, applied research, and experimental development.

The eligible expenditures include the following:
France

- Tax deductible depreciation expenses relating to fixed assets, created or acquired newly, assigned to eligible R&D works/projects, including patents acquired.
- Costs relating to staff qualifying as scientists and/or engineers (staff costs relating to ‘young graduate doctors’ are retained at up to 200% during the 24 months following their hiring by the company).
- Expenses resulting from outsourced R&D works/projects.
- Expenses incurred for patent registration and/or in connection with the defence of patents.
- Expenses relating to the monitoring of technical developments.
- Premiums paid in connection with insurance contracts relating to the legal defence of patents.

Operating costs are now taken into account by retaining 50% of the R&D staff costs plus 75% of the depreciation on the assets allocated to the research. Also, spending on outsourcing to private research organisations now is included in the limit of three times the total amount of other research expenses qualifying for the tax credit.

**The use of patented or patentable technologies in manufacturing**
Companies that are involved in the manufacturing of products in France containing patented or patentable technologies, or companies that incorporate such technologies into goods that are manufactured in France, benefit from a reduced effective rate of tax.

In the case of a licensing arrangement between connected French companies, the licensor will benefit from a reduced 15% tax rate on royalty income, whereas the licensee company will benefit from a tax deduction at 33.33%.

In order for a licensee company to benefit from full deductibility for royalties paid, the rules require that the licensee company ‘effectively exploits’ the rights available to it.

**Inbound investment incentives**
No particular incentives are available to foreign investors in France. However, the government offers a comprehensive programme of tax incentives and development subsidies to encourage investment in underdeveloped areas.

Capital investment is encouraged through the declining-balance method of depreciation as well as through exceptional depreciation for certain capital expenditures.

**Withholding taxes**
Payments to resident corporations and individuals are not subject to WHT.

Payments to non-resident corporations and individuals are subject to WHT, as shown below.

Explanation of columns

**Column 2:** Individuals and companies not qualifying as parents are subject to the WHT rates for dividends as indicated in this column.

**Columns 3 and 4:** Column 3 indicates the WHT rate for dividends paid to a foreign ‘parent’ company. To be considered as a parent company, the foreign company must hold a specified percentage of the French company’s share capital or voting rights. These minimum percentages range from 0% to 50%, as indicated in Column 4, and certain other conditions must be met (see each treaty). If no percentage is indicated, either no minimum shareholding is required or the tax treaty does not reduce the WHT rate of 30%.

No WHT is levied on dividends paid to an EU parent company by a French company that is subject to CIT, provided all the following conditions are met:

- The EU parent company has held a minimum percentage of the share capital of the distributing company, directly and continuously, for at least two years. As of 1 January 2009, the participation required is 10%.
- The EU parent company is the effective beneficiary of the dividends.
- The EU parent company has its effective seat of management in an EU state and is not deemed to be domiciled outside the European Union under an applicable tax treaty.
- The EU parent company is one of the legal forms enumerated by the relevant Directive.
- The EU parent company is subject to CIT in the member state where it has its effective seat of management.
- There is an anti-avoidance rule.

**Column 5:** The tax mechanism has been changed so as to exempt the interest from WHT in France except where the interest is paid to a financial institution established in a non-cooperative state or territory (WHT at a rate of 75% applicable). The payer can, however, be exempt if one proves that the main purpose and effect of such a payment is not to take advantage of locating the income in such a jurisdiction.

These provisions apply to income paid as of 1 March 2010. A special provision applies to loans entered into outside of France by French companies and some investments funds prior to this date. Interest paid on these loans and on related loans after 1 March 2010 will continue to be exempt.

**Column 6:** There is no requirement to withhold income tax on royalties paid to EU companies if all the following conditions are met:

- The taxpayer is a French resident company or a French PE of a company resident in another EU member state.
- The recipient of the income is an EU resident company.
The taxpayer and the recipient are at least 25% associates, which means that either one directly holds 25% or more of the share capital or voting rights in the other, or a third party directly holds 25% or more of the capital or voting rights in them both.

**Column 7:** WHT is automatically imposed on after-tax profits of a PE unless certain conditions are met. The rate is 25% or the reduced tax treaty rate.

**Notes**

1. See explanation of Columns 3 and 4.
2. Exceptions where the dividends are excluded from the taxable income of the company that has received the dividends.
3. A rate of 15% is applicable for dividends distributed by certain companies.
4. The 1929-type Luxembourg holding companies are not entitled to any of the benefits of the France-Luxembourg tax treaty.
5. A 25% rate applies if dividends are not included in the income taxed to either corporate or income tax.
6. No WHT applies if dividends are taxable in Morocco.
7. The 5% rate applies to dividends when three conditions are fulfilled, as follows: (1) the effective recipient of the dividends must have invested at least EUR 76,224.51 in the company that pays these dividends; (2) the recipient must be a company liable for corporate tax; and (3) the latter company must be exempt from corporate tax. The rate is 10% when only condition (1) or conditions (2 and 3) are fulfilled. In all other cases, the rate is 15%.
8. An addendum signed on 22 July 1997 modifies the provisions of the French-Swiss tax treaty relating to dividends, interest, and royalties, and provides for the removal of the 5% WHT on profits realised by French PE of Swiss resident companies.
9. The rate indicated applies to Swiss resident companies controlled by Swiss residents.
10. The rate indicated applies to Swiss resident companies that are controlled by non-Swiss residents (non-UE) (Article 11.2.b ii) and meet the conditions of Article 14 of the tax treaty. In the case of column 3, the 15% rate applies to these companies, provided both the recipient and the distributing company are not quoted on a stock exchange. If these conditions are not met, the tax exemption applies.
11. The rate indicated applies to Swiss resident companies controlled by non-Swiss residents but not complying with Article 14 of the tax treaty.
12. The 5% rate applies to gross dividends if the effective recipient is a Ukrainian company that holds, directly or indirectly, at least 10% of the French company's capital. The rate is 0% if the participation exceeds 50% and EUR 762,245. It is 15% in all other cases.
13. Non-treaty recipients of royalties and management fees are subject to a 33.33% withholding rate. Where a treaty exists, management fees are exempt from WHT unless they are included in the definition of royalties subject to WHT.
14. In France, the WHT is levied on a provisional basis at 25% of the net profit. This amount is reduced to the extent it exceeds the dividends actually paid by the company during the previous 12 months, and the amount of dividends paid to residents of France. Consequently, if the foreign head office undertakes not to distribute dividends in a given year, the after-tax profits of its French branch are not subject to WHT, even when they are transferred abroad.
15. WHT on interest on loans with a contract is 0%, while withholding on other interest is in a range from 15% to 50%. For treaty rates, consult the individual entry in the table.
16. The WHT rate can be 60% for certain securities if the investor's identity is not disclosed.
17. The WHT is levied on the following amount: French net profit divided by the total foreign company net profit, multiplied by the amount of the distribution.
18. The rate of 10% is applicable on royalties for the use of literary, artistic, or scientific works, including films; 25% on royalties for the use of trademarks; and 15% otherwise.
19. No WHT is applicable on a royalty arising from the use of or the right to use literary, artistic, or scientific works (excluding film).
20. WHT is reduced to 6% for royalties paid for the lease of industrial, commercial, or scientific equipment.
21. A rate of 5% (Cyprus) and 10% (Israel) is applicable on royalties paid for the use or the right of the use of films.
22. Profits realised in France by foreign corporations whose head offices are located in a European country are not subject to WHT if certain conditions concerning the foreign corporation are met (effective head office in a European country; foreign corporation subject to corporate taxation).
23. No WHT is applicable on a royalty arising from the use or the right to use literary, artistic, or scientific works.
24. The rate of 25% is applicable on royalties paid for the use of trademarks.
25. No WHT is levied on certain royalties paid in the field of audiovisual techniques.
26. The rate of 15% is applicable on royalties paid for the use of industrial property and trademarks.
27. A rate of 33.33% is applicable on royalties paid for the use of or the right to use films.
28. The rate of 5% is applicable on royalties paid for the use of literary, artistic, or scientific works, excluding films.
29. The rate of 33.33% is applicable on royalties paid for the use of literary and artistic works, including films, and for information concerning commercial experience.
30. No WHT is levied on royalties paid for the use of or the right to use literary or artistic works, excluding films and recordings.
31. No WHT is levied on royalties paid for the use of or the right to use copyrights or films.
32. No WHT is levied on royalties paid for the use of or the right to use industrial, commercial, or scientific equipment.
33. The rate of 20% is applicable on royalties paid for the use of trademarks, 15% for the use of industrial property, and 5% for the use of literary, artistic, or scientific works.
34. The rate of 5% is applicable on royalties for the use of literary, artistic, or scientific works, not including films.
35. The rate of 5% is applicable on royalties for the use or the right to use industrial, commercial, or scientific equipment.
36. The reduced rate is applicable if the beneficial owner is a company (other than a partnership).
37. Voting shares solely.
38. French domestic law decreases the WHT rate from 30% to 21% concerning individuals who are resident in another EU member state, in Iceland, and in Norway.
39. See explanation of Column 6.

**Anti-avoidance rules applicable to Non-Cooperative States or Territories (NCSTs)**
The French parent-subsidiary regime is not applicable to dividends paid from entities located in an NCST.

WHT on passive income is 75% for transactions with an NCST person or entity.

For French tax purposes, a state or territory is considered non-cooperative if it meets at least one of the following criteria:

- It is not a member of the European Community.
- It has been reviewed and monitored by the OECD Global Forum on Transparency and Exchange of Information.
- It has not concluded at least 12 administrative assistance agreements/treaties that allow a complete exchange of information for tax purposes.
- It has not concluded an administrative assistance agreement/treaty with France.

Payments (e.g. interests, royalties, payments for services) made to an NCST person or entity are, as a general rule, not tax deductible. In addition, it is not possible to offset WHT in France with any foreign WHT borne by the entity located in an NCST.

Moreover, concerning shareholders (individuals and companies) located in an NCST, a tax amounting to 75% is levied on capital gains derived from the disposal of shares in French companies, whatever the level of shareholding.

**Tax administration**

**Taxable period**
The ordinary taxable period is equal to 12 months. Conformity with the calendar year is not requested. In particular cases, the duration of the taxable period can be different from 12 months (e.g. newly established companies are allowed to have taxable periods longer than 12 months; companies that are involved in extraordinary transactions [merger, de-mergers, etc.], as well as companies that are liquidated, may have taxable periods shorter than 12 months).

**Tax returns**
Regarding fiscal years that end on 31 December, CIT returns are due by the end of April of the following year.
France

Accounting records to be provided in ‘computerised format’ in case of tax audit
Under the new law, companies are required to keep their accounting records in computerised form and to provide them to the tax authorities in the same format. Printed records will no longer be accepted.

Taxpayers failing to comply with this new rule will be liable for penalties as high as 0.5% of the declared or reassessed gross revenue.

Payment of tax
Payment of tax is made during the fiscal year by way of four instalments totalling 33.33% of the taxable income of the preceding year (i.e. by 15 March, 15 June, 15 September, and 15 December for fiscal years that end on 31 December). Regarding fiscal years that end on 31 December, final CIT payment is due on 15 April of the following year.

Currently, for companies that have gross income in excess of EUR 500 million, the last down-payment is now assessed on the basis of the estimated taxable income of the present year (in case of significant increase of the taxable profits in comparison with the previous fiscal year). This modification leads to an anticipated payment of CIT.

Interest and penalties
Regarding CIT, VAT, registration duties and business tax:

- late payment is subject to late interest computed at a rate of 0.4% per month (4.80% per year) and to a 5% penalty, and
- late filing is subject to late interest computed at a rate of 0.4% per month (4.80% per year) and to a 10% penalty.

Moreover, a penalty of 40% applies in case of bad faith and is increased to 80% in case of fraud.

Tax audit process
The French tax authorities are responsible for verifying that taxpayers' obligations are correctly complied with and, if necessary, for making adjustments by issuing tax assessments.

Once an assessment is notified by the tax inspector and if the taxpayer disagrees with such an assessment, the taxpayer has 30 days to answer and to provide comments to the French tax authorities.

Following an exchange of written correspondences between the tax inspector and the taxpayer, either party may submit any disagreement on a factual issue to the departmental tax commission. The decision of this commission will not be binding on the taxpayer.

In cases where the disagreement between the French tax authorities and the taxpayer still remains, the taxpayer can file a claim with the French civil courts or with the French administrative courts, depending on the type of tax that has been subject to assessment by the tax inspector.

Statute of limitation
Regarding CIT, the general statute of limitation expires at the end of the third year following the one that has triggered the tax liability.
Under certain circumstances, the statute of limitation can be extended (e.g. fraud, undisclosed/hidden activity); statute of limitation can also be interrupted (e.g. notification of a notice of reassessment).

**The ruling system**
To secure the tax status of a situation, foreign companies and individuals can request a private ruling from the French tax authorities as to whether their activities constitute a PE or fixed base.

The French tax authorities have to provide an answer within three months after the receipt of the request. In the absence of response from the French tax authorities within this period of time, the foreign company or individual will be deemed not to have a PE in France.

APAs are also provided by the French tax authorities for transfer pricing purposes (see the Group taxation section for more information).
**Significant developments**

Further to the promulgation of the 2013 Financial Act on 8 January 2013, the following new tax measures have been introduced:

- Possibility for companies having hotel activity in the tourism sector to be exempted from corporate income tax (CIT) during the first three years of existence, provided that the amount of the investment equals or exceeds 300 million Central African CFA francs (XAF).
- Reduction of CIT to 30%, instead of 35%, for companies operating in sectors other than the oil and mining sectors.
- Reduction of CIT to 25%, instead of 35%, for companies owning intellectual property shares, authorised companies of property promotions, public companies, non-profit partnerships and collectives, and authorised companies of the tourism sector.
- Possibility to benefit, during a five-year period, from a 5% tax credit for authorised companies investing in the tourism sector for an amount less than XAF 300 million.
- Exemption from the Minimum Tax (Impôt Minimum Forfaitaire or IMF) during the first two years of existence for any newly incorporated companies, without consideration of the sector of activity.

The Financial Act for 2013 also provides new provisions pertaining to the specific tax regime applicable to oil subcontractors as well as some amendments on the provisions of the Gabonese Tax Code, notably the provisions dealing with transferable securities income tax (Impôt sur le Revenu des Capitaux Mobiliers or IRCM), personal income tax (PIT), value-added tax (VAT), complementary tax on salaries, registration duties, and penalties for late payment of taxes.

**Taxes on corporate income**

Subject to the provisions of double tax treaties (DTTs), profits subject to CIT in Gabon are those obtained by companies exploited in Gabon or those relating to operations carried out in this country.

The CIT rate is fixed at 35%.

This rate is reduced to 30% for companies operating in sectors other than the oil and mining sector and to 25% for:

- companies owning intellectual property shares
- the Gabonese Development Bank
- authorised companies of property promotions
- public companies
• non-profit partnerships and collectives, and
• authorised companies of the tourism sector.

CIT is assessed on profits minus deductible expenses and charges. Profits are composed of all operations carried out in Gabon by companies during the period of taxation, including, notably, capital gains on fixed assets.

Non-resident companies shall be taxed via withholding tax (WHT) at the rate of 10% for income raised in Gabon if they have no permanent establishment (PE) in Gabon.

In cases where non-resident companies have PE in Gabon, they shall be subject to CIT on the income raised in Gabon via the Gabonese PE.

**Impôt Minimum Forfaitaire (IMF)**
The IMF is a lower limit to the CIT and is calculated as 1% of the global turnover carried out during the fiscal year of taxation. Note that the IMF cannot be less than XAF 1 million, even in the case of a negative turnover.

New companies (as defined in Articles 194, etc. of the Gabonese Tax Code), without consideration of the sector of activity, are exempt from this minimum tax during the first two fiscal years of their existence.

**Local income taxes**
There are no local government taxes on income in Gabon.

**Corporate residence**
As a general rule, a resident company is a company that is incorporated under commercial laws in force in Gabon.

**Permanent establishment (PE)**
From a general treaty perspective, a PE designates a permanent business installation through which a company carries out the whole or part of its activity.

The expression ‘permanent establishment’ notably includes the following:

• Head office.
• Branch.
• Office.
• Plant.
• Workshop.
• Mine, oil or gas shaft, quarry or other place of natural resources extraction.
• Building site or assembly line.

**Other taxes**

**Value-added tax (VAT)**
VAT is a cumulative tax levied on the sale of goods and the provision of services rendered or used in Gabon.

There are four rates of VAT:
Gabon

- Standard rate: 18%, which applies to all transactions unless otherwise provided for by the law.
- Reduced rates:
  - 10%, which applies to manufacturing operations and sales of products mentioned in a limitative list provided by Article 221 of the new Gabonese Tax Code, including mineral water, chicken, and sugar.
  - 5%, which applies to sales and services relating to cement.
  - Zero-rate: 0%, which applies to exports and international transports.

Taxable persons are individuals or legal entities carrying out, usually or occasionally, in an independent manner, taxable operations in the scope of an economic activity and for an onerous consideration.

The aforesaid persons, subject to CIT or PIT, being registered or not, are liable to VAT should their turnover out of taxes reach XAF 60 million.

**Customs duties**

Gabon is member of the Central African Economic and Monetary Community (CEMAC), a customs union that comprises countries from Central Africa.

Merchandise entering into the CEMAC customs territory is subject to importation duties registered into the Customs Tariff.

Four customs regimes are available in Gabon, notably one standard regime and three specific regimes (an exemption regime, a temporary admission regime, and a reduced tax regime).

Apart from customs duties, the importation of merchandise in Gabon is subject to the community tax of integration (CCI) at a rate of 0.4% and to the Organisation for the Harmonisation of Business Law in Africa (OHADA) withholding (duty) at a rate of 0.05% of the customs value of the imported merchandise.

**Excise duty**

Excise duty principally applies to luxury goods, such as alcoholic drinks, perfume and cosmetic products, caviar, salmon, cigars, and cigarettes.

The rates of the excise duty are between 20% and 32%.

**Tax on property**

Tax on buildings (Contributions Foncières des Propriétés Bâties or CFPB) is levied annually at the rate of 15% of the rental value of the building after deduction of 25% for deterioration and maintenance. Tax on non-built property is levied annually at the rate of 25% of the taxable revenue corresponding to 4% to 5% of the rental value or 10% of the purchase value.

**Transfer tax**

The tax on funds transfer is due on remote transfer operations carried out in Gabon at destination of countries outside the Central Africa Monetary Union (UMAC) countries.

The tax is calculated on the amount of the funds to be transferred, except for related fees and commissions paid by the giver.

The rate of the transfer tax is 1.5%.
Stamp duty
A stamp duty is levied on all paperwork relating to civil and judicial actions and to documents that could be produced in court as evidence.

All signatories for mutually binding contracts, lenders and borrowers for loans, and ministerial officials who receive or modify deeds announcing unstamped deeds or books are jointly responsible for the payment of stamp duties and fines.

Business license tax
The business license tax applies to both individuals and entities, Gabonese and foreign, engaged in a profession, business, or industry in Gabon.

Business license tax corresponds to a professional tax borne annually. It is deductible from the taxable income for CIT purposes.

The rates of this tax vary according to the profession, business, and location within Gabon territory (this tax may vary between XAF 15,000 and XAF 540,000).

The head of the group of companies is exempted from the payment of the business license tax.

Franchise tax
The franchise tax is a fixed annual duty varying from XAF 10,000 to XAF 500,000, according to the size, nature, and location of the company. Each company that carries on a trade, business, or activity that is not expressly exempted is liable for franchise tax.

Activities that are expressly exempted from franchise tax are those carried out by companies of provident, craftsmen, teachers and professors, lyrical and dramatic artists, farmers, cattle-breeders, fishers, etc.

Registration duties
Registration duties in Gabon are fixed, proportional, or progressive, depending on the nature of the acts and transfers in question.

Tax on insurance premiums
Insurance or annuity agreements made with insurance companies or any other Gabonese or foreign insurer are subject to an annual obligatory tax.

The tax is levied on the sums charged by the insurer and on any accessory payments made to this party by the insured party according to the following rates:

<table>
<thead>
<tr>
<th>Nature of the policies</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Marine policies</td>
<td>5</td>
</tr>
<tr>
<td>Life policies</td>
<td>Exempt</td>
</tr>
<tr>
<td>Fire policies</td>
<td>30</td>
</tr>
<tr>
<td>Other (e.g. personal liability, transportation)</td>
<td>8</td>
</tr>
<tr>
<td>Reinsurance</td>
<td>Exempt</td>
</tr>
</tbody>
</table>

Social security contributions
Employers must contribute to the social security system (National Social Security Fund or CNSS).
Gabon

The taxable basis for social security contributions is made up of gross salaries, including indemnities having the function of a salary and any benefits in kind. However, there is an annual ceiling of XAF 18 million (or XAF 1.5 million per month).

The social security contributions are determined according to the following rates:

<table>
<thead>
<tr>
<th>Contribution</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family allowances</td>
<td>8</td>
</tr>
<tr>

<tr>
<td><strong>Total</strong></td>
<td><strong>20.1</strong></td>
</tr>
</tbody>
</table>

**Branch income**

Taxation of branch income is the same as for corporate income. However, a 10% WHT on profit is due at the time the profit is taken by the head office, located abroad, of the branch.

**Simplified tax regime for oil subcontractors**

There is a simplified tax regime specific to the oil sector, which is a lump-sum tax regime granted for a triennial period (which, since the promulgation of the 2013 Financial Act, will become a biennial period).

Features of this specific regime are as follows:

- The option for this regime is irrevocable for a period of two years, renewable once.
- The total duration of the benefit of such a regime can’t exceed four years.
- The companies must perform their activities exclusively in the scope of oil operations.
- The option is granted by the Director of the General Tax Office to foreign companies.
- The subcontractor must have signed, with an oil company, a temporary agreement for the provisions of services to this company.
- The option is no longer granted to companies that have been in Gabon for more than nine years. The duration of nine years is calculated from the year during which the company started its activities in Gabon.
- The subcontractor must constitute a Gabonese branch office.

The rate for the 2013 and 2014 fiscal years is 8.75%, corresponding to CIT (5.95%) and PIT for expatriate employees (2.80%).

**Specific regime for regional offices (quartiers généraux)**

A regional office is a company or a branch that renders various administrative services, such as management or accounting, exclusively to other companies of the same group based in a given geographical area (usually a group of countries).

Taxation is based on the expenses of the regional office. A rate, between 5% and 12%, is applied to operating expenditures to determine the tax basis. The CIT rate is then applied to that basis.
**Income determination**

**Inventory valuation**
Stocks are estimated at cost price. If the market price as of date is lower than the cost price, the company has to make provisions for depreciation of inventory.

**Capital gains**
Capital gains arising from the transfer of assets must be used for the calculation of taxable profits. However, the tax on capital gains can be deferred if a company reinvests an amount equal to the capital gain and the sale price of the transferred asset back into its fixed assets within three years.

**Dividend income**
The rate of IRCM is 15% on distributed dividends when the beneficiary is a company and 20% when the beneficiary is an individual.

IRCM charged on the beneficiaries of the earnings is withheld at source by the distributing company. It is paid over to the Registration Officer within 30 days from the payment of the dividends.

**Inter-company dividends**
Inter-company dividends are taxed at a reduced rate in full discharge of the 10% WHT if paid and received by or from companies with their registered office in a CEMAC country, shares were allotted at the time of issue or kept for two years, and the Gabonese company owns more than 25% of the share capital of the subsidiary.

**Interest income**
Interest income paid to companies is subject to a 15% WHT in Gabon. When paid in respect of bonds of five years or more, it is subject to a 10% WHT.

**Foreign income**
Foreign interest, royalties, and dividends are included in taxable income, subject to international tax treaties. Note that tax treaties provide that certain/all types of income are not includable in Gabon taxable income. Gabon has tax treaties with France, Belgium, the other countries of CEMAC, and the African and Malagasy Common Organisation (OCAM).

The concept of deferred tax is not applicable in Gabon.

**Deductions**

**Depreciation**
The straight-line method and an accelerated depreciation method are permitted in Gabon. Tax and book conformity is obligatory (i.e. annual depreciation must be booked to preserve tax deductibility).

The main depreciation rates provided by the Gabonese tax code are the following:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>8</td>
</tr>
<tr>
<td>Machinery, equipment</td>
<td>8 to 20</td>
</tr>
<tr>
<td>Office furniture</td>
<td>15</td>
</tr>
</tbody>
</table>
Gabon

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Office equipment</td>
<td>20</td>
</tr>
<tr>
<td>Vehicles</td>
<td>20 to 33.3</td>
</tr>
<tr>
<td>Computing equipment</td>
<td>25 to 33.3</td>
</tr>
</tbody>
</table>

**Goodwill**
There is no provision in the Gabonese Tax Code concerning the tax treatment of goodwill.

**Start-up expenses**
During the first five years of activity, a start-up can use an accelerated depreciation method on the acquired equipment goods under certain conditions and subject to specific provisions of the Gabonese Tax Code applicable to start-ups. Applicability of these provisions must be requested from the General Tax Manager prior to the incorporation of the company.

**Interest expenses**
Interests paid to shareholders with respect to the sums made available by them to the company are only deductible within the global limit amounting to half of the share capital and within the limit of the intervention rate on invitation to tender (TIAO) of the Bank of the Central African States raised by 2%, provided that the share capital is fully paid up.

**Bad debt**
Bad debt can be deducted from the result of the fiscal year during which the debt became completely unrecoverable, subject to the irrecoverable character of the compromised debt being justified due to the situation of the debtor.

**Provisions**
To be tax deductible, provisions must relate to existing liability or loss. General provisions are not deductible.

**Charitable contributions**
Charitable contributions do not, in principle, constitute expenses deductible from the taxable result. However, contributions for charity can be deducted, provided that the donation is made to the profit of organisms of public interest located in Gabon and that the donation is justified.

The deduction is limited to 1/1,000 of the company’s turnover for the considered fiscal year.

**Fines and penalties**
Fines and third-party taxes borne by companies are not tax deductible.

**Taxes**
Only professional taxes for which the recovery proceeding has started in the current fiscal year and for which the company is effectively liable due to operation carried out in Gabon can be deducted.

**Net operating losses**
The Gabonese Tax Code does not provide the possibility to carry back losses. It does, however, provide for a three-year carryforward for net operating losses.
Regarding depreciation deferred in the accounts, they can be carried forward indefinitely.

**Payments to foreign affiliates**
Management fees paid to a foreign parent company are deductible if they meet all of the following conditions:

- They reflect real transactions.
- They do not present an abnormal characteristic.
- They are not exaggerated.

Management fees determined in a lump sum basis are not deductible.

Interests paid to shareholders are deductible only within the limit of the Central Bank’s (BEAC) normal rate for advances plus two percentage points, on the condition that the registered capital is entirely paid. The portion exceeding the ceiling is not deductible and is thus subject to taxation.

---

**Group taxation**

**Specific group tax regime**
There is a specific tax regime derogatory to the common law tax regime that is applicable, under conditions, to groups of companies.

According to the provisions of Article 11 b. of the Law No. 44/2010, modified by the 2013 Finance Act, groups of companies are those constituted by companies subject to CIT, or a foreign equivalent tax, united between them through direct or indirect capital links of at least 50% and that allow one of them or several companies, jointly, to control the others.

The control is defined as:

- either the direct or indirect holding of the majority of the vote in another company or
- the nomination, during two consecutive years, of the majority of the members of the board of directors of another company.

To be eligible for this specific tax regime, and without any prejudice of other activities performed to the profit of third parties, the head of the group of companies must perform to the profit of other companies of the group an activity relating exclusively to the following fields:

- Provisions of services of any kind, notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial corresponding to functions of management, coordination, and control of the group’s companies.
- Research and development (R&D) to the sole profit of the group.
- Management of the finance intra-group.

Each company subject to CIT that is a member of the group and fulfils the conditions provided by the law will be subject to a separate taxation of its results according to the rules of common law and subject to amendments expressly provided by the law for the determination of the taxable result.
Gabon

The express amendments provided in the scope of the specific tax regime applicable to groups of companies are the following:

**Capital gains**
Net capital gains are taxed at a reduced rate of 20% when they are realised in the scope of intra-group operations.

**Expenses deductible from the taxable result subject to CIT**
The following expenses are deductible within the group:

- Head office fees and management fees determined in a lump sum basis, according to the conditions of allocation of the expense between the companies members of the group defined in a previous ruling with the tax authorities.
- The whole of the interests on partners’ current accounts (i.e. on the sums put, by the partners, at the disposal of a company of the group) within the sole limit of the intervention rate on invitation to tender (TIAO) of the Bank of the Central African States (equivalent to 4%) raised by 2%.
- Rents of movables carried out within the group by the mother company or between companies of the same group.

**10% WHT**
Sums subject to CIT according to the provisions of Article 206 of the Gabonese Tax Code paid by a Gabonese debtor member of a group of companies to a foreign company member of the same group are exempted from the 10% WHT even though no DTT aiming to avoid double taxation has been concluded between Gabon and the country of residence of the beneficiary of the remunerations.

**Transferable securities income tax (IRCM)**
Companies of the group that benefit from transferable securities income originating from Gabon are exempted from IRCM when the said revenues are paid by a company member of the group.

In return, payments carried out by the head of the group of companies to the profit of its partners (individuals or legal entities) are subject to IRCM at a unique and at source rate of 10% (instead of 20% for individuals and 15% for legal entities).

It is to be noted that the transferable securities incomes having their source abroad and which gave rise to taxation in their country of origin give the right in Gabon to a tax credit of the amount of the taxation that is deductible from the CIT of the fiscal year of perception of the incomes. The aforesaid tax credit applies even though no DTT aiming to avoid double taxation has been concluded between Gabon and the country of origin of the incomes.

**VAT**
The head of the group of companies is liable for VAT.

Members of a group of companies could, however, on option, consider the following provisions of services performed within the group as being out of the scope of application of VAT.

- Provisions of services of any kind, notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial.
- Fees relating to studies.
- Putting at disposal of personal.
• Management of finance.

The option for the subjection of the abovementioned operations must be formulated by the concerned taxpayers on express request addressed to the General Tax Manager.

Registration duties
Deeds relating to incorporation, increase or reduction of share capital, breaking up with or without clearance, merger, scission, partial contribution of assets, and transfer of shares of a company member of a tax group, are subject to a fixed duty of XAF 20,000.

In the absence of a more favourable duty provided by the common law of registration, the changes of ownership and use that are not provided at Article 6 of the Gabonese Tax Code are subject to a proportional rate of 1% when carried out by members of the same tax group.

Requirements relating to declaratory obligations
The adherence to the group tax regime must be notified in writing by the head of the group of companies to the General Tax Manager accompanied by the list of the companies included in the tax perimeter of the group.

Each company remains liable for the periodical returns applicable to its activity.

For the purpose of calculation and verification of the returns, each tax return relating to the CIT of each company of the group will be gathered and filed at the same time by the head of the group of companies before the Tax Office.

Transfer pricing
The Gabonese Tax Code provides rules regarding transfer pricing issues.

According to these rules, any payment considered to be a result of mismanagement will be subject to the CIT rate at 35% plus penalties.

Indeed, Article 12 of the Code provides that “By virtue of law or in fact, for companies which are dependent of companies or groups of companies located outside the CEMAC area, or for those which possess the control of companies located outside the CEMAC area, payments or expenses realised by any mean whatsoever, comparable to abnormal act of management, constitute transfer of profits subject to corporate income tax”.

It is applicable for the following:

• Payments constituting increase or decrease of purchases or sales.
• Payments of excessive royalties or royalties without compensation.
• Relinquishment of revenues (underestimated sale price, free of charge service provision, granting of a free loan or a loan with low interests).

The abnormal act of management is not limited to expenses; it also includes any form of advantages or allowances granted to third parties without any equivalent compensation for the company.

Article 13 of the Gabonese Tax Code provides that “The advantages or assistance granted by companies belonging to the same group can only be considered as resulting from a normal management if the company which grants these advantages or assistance demonstrates the existence of its own interest in acting as such. The general interest of the group is not sufficient to justify such practices”.

www.pwc.com/taxsummaries
Gabon

**Thin capitalisation**
There is no specific tax rule under Gabon legislation related to thin capitalisation.

---

**Tax credits and incentives**

**Foreign tax credit**
DTTs include provisions relating to the attribution of foreign tax credits. Such tax credits aim to limit the double taxation of profits that are subject to taxation in both member states of the treaty.

**Tax credits for job creation**
There is a mechanism in place for granting corporate tax credits for any salaried appointments of Gabonese personnel.

This tax credit is equal to 20% of the gross salary paid to new employees and is subject to the creation of a minimum number of jobs, according to the size of the company as follows:

- Two jobs, for companies with less than 20 employees.
- Three jobs, for companies with 20 to 50 employees.
- Five jobs, for companies with more than 50 employees.

Note that the tax credit is granted only on newly created jobs since the preceding fiscal year. Contracts concluded with the employees must also be for an undetermined duration, and the new jobs must not result from the diminution of existing jobs.

**Inbound investment incentives**
Due to the provisions of the Investments Law, any private investment in Gabon can benefit from:

- A common law framework.
- Privileged frameworks.
- Specifically agreed frameworks.

Depending on the frameworks it is eligible for, a company can benefit from customs privileges and tax breaks.

Industrial companies already set up in Gabon and wishing to increase their production capacity can be admitted to a preferential tariff framework. This entails the application of a global reduced rate of 5% for duties and taxes paid on imports of equipment (excluding materials, furniture, and spare parts), provided that these correspond to an investment schedule and their value is in excess of XAF 100 million.

New industrial companies can also benefit from this framework, provided they are not subject to any of the other privileged frameworks outlined by current legislation.

The granting of this privileged tariff framework occurs on the basis of a decision by the Minister of Finances, following a proposal from the Director of Customs and Indirect Taxes.

**Capital investment incentive**
New companies are exempt from the IMF, the minimum taxation of CIT, during the first two years of operations.
**Social housing incentive**

There are some tax exemptions applicable exclusively to authorised companies during the performance of a social housing investment project.

The Financial Act of 2013 provides favourable measures regarding the importations of materials, engines, and equipments destined to authorised companies. Indeed, such importations are exempt of customs duties. They can also be imported under the normal temporary admission.

The concerned companies may apply before the Customs Authorities in order to benefit from the abovementioned regime.

The concerned companies are those authorised for the planning of urban lands intended for social habitat and the building of housings of a socio-economic nature and industrial units of manufacturing of materials and other inputs used for the building of social housings. The above mentioned tax exemptions relate to CIT, VAT, and business license tax.

**Tourism incentive**

According to the 2013 Financial Act, companies having hotel activity in the tourism sector are exempted from CIT during the first three years of existence, provided that the amount of the investment equals or exceeds XAF 300 million. If not (investment of less than XAF 300 million), aforesaid authorised companies investing in the tourism sector can benefit, during a five-year period, from a 5% tax credit.

---

**Withholding taxes**

**10% WHT**

When they are paid by a debtor established in Gabon to individuals or companies subject to CIT or PIT that do not have a permanent professional base in Gabon, the following amounts are subject to a 10% WHT:

- All amounts paid pursuant to the practice of an ‘independent profession’ in Gabon.
- Payments received by inventors, payments relating to copyrights, and all payments relating to intellectual and commercial property as well as assimilated rights.
- All amounts paid for services materially rendered or effectively used in Gabon.
- Interest, arrears, and all others fixed-income investment-products pertaining to income declared as professional revenue of the beneficiary.

Net profits carried out by branches of foreign companies having their head offices abroad are also subject to a 10% WHT in Gabon before they are taken into account by the foreign companies.

**Transferable securities income tax (IRCM)**

IRCM is due at a 15% rate on revenues from stocks and shares paid to legal entities. It is due by beneficiaries of these revenues and must be withheld by the distributing company.

---

**Tax administration**

**Taxable period**

Companies are required by law to have a 31 December closing of any fiscal year.
Gabon

**Tax returns**
Returns for the previous calendar year are to be filed before 30 April of each year.

**Payment of tax**
Tax is payable to the General Tax Office in two instalments on 30 November and 30 January. The balance of the tax due must be paid by 30 April. The first instalment must equal one-quarter of the tax assessed in the previous year and the second instalment must equal one-third of this tax.

**Tax audit process**
There is no a specific audit cycle in Gabon.

**Statute of limitations**
The tax administration can proceed to tax audit until the fourth year following the year for which the tax is due.

**Topics of focus for tax authorities**
The tax administration shall particularly focus on the following aspects:

- Compliance of deductibility of management fees.
- Compliance of deductibility of corporate expenses.
- Compliance of WHT on payments made to foreign services providers.
- Payment of VAT on behalf of third parties.

**Other issues**

**Legal reserve**
According to the provisions of the OHADA Uniform Act relating to commercial companies and economic interest groups, one-tenth of the year’s profits, reduced, if applicable, by any previous losses, must be put into a reserve account named ‘Legal Reserve’.

The endowment of this reserve ceases to be obligatory when its value reaches one-fifth (20%) of the company share capital.

**Significant developments**

There have been no significant corporate tax developments in Georgia during the past year.

**Taxes on corporate income**

Corporate income tax (CIT) in Georgia is applied to taxable profit at a rate of 15%. Taxable profit is defined as gross income minus deductible expenses.

Resident enterprises are subject to CIT on worldwide income.

Non-resident enterprises carrying out economic activities in Georgia through a permanent establishment (PE) are subject to CIT with respect to gross income earned from Georgian sources, which can be reduced by deductions attributable to such income.

Non-resident enterprises earning income from Georgian sources, other than through a PE, are subject to withholding taxes (WHTs) (see the Withholding taxes section for more information).

**Local income taxes**

There are no local income taxes imposed on the profit of legal entities.

**Corporate residence**

A resident enterprise is any legal entity that is established under the laws of Georgia or has its place of effective management in Georgia.

**Permanent establishment (PE)**

The domestic definition for a PE essentially adopts the definition for PE found in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Local legislation provides the definition for economic activity to be any activity undertaken with the intent to gain profit, income, or compensation, regardless of the results of such activity, unless otherwise provided by the tax code.
Other taxes

Value-added tax (VAT)
The standard VAT rate is 18% and applies to the sale of all goods and services supplied in Georgia. Goods are considered to be supplied in Georgia if they are transferred in or their shipment originates in Georgia. Services generally are considered to be supplied in Georgia if they are performed in Georgia. However, special rules apply for services relating to immovable property and certain services provided to non-residents.

The export and re-export of goods is exempt from VAT with the right to credit input tax (formerly referred to as zero-rated). VAT-exempt supplies include financial services, goods and services required for oil and gas operations, and medical services.

Reverse-charge VAT applies to services provided to Georgian taxpayers by a non-resident entity.

A VAT payer is a person who is registered or required to be registered as a VAT payer. Any person whose annual taxable turnover exceeds 100,000 Georgian lari (GEL) in any continuous period up to 12 months or who produces or imports excisable goods must register as a VAT payer. In addition, an enterprise that expects to perform one-off taxable transaction of more than GEL 100,000 must also register as a VAT payer no later than the second day after effecting the transaction.

Customs duties
Import tax is levied on goods that cross the economical borders of Georgia (except export). Depending on the types of products, general rates on imported goods are: 0%, 5%, and 12%. Imported cars are taxed at GEL 0.05 * volume of engine, plus 5% of import tax on each additional year of ownership.

Excise tax
Excise tax is levied on specified goods that are produced in Georgia or imported into Georgia. Excise tax generally is calculated with reference to the quantity of goods (e.g. volume, weight) or, in the case of automobiles, on the basis of the engine capacity and vehicle age. Excise tax rate varies from GEL 0.15 to 400 for one unit.

Excise tax applies to the following goods:

- Alcoholic drinks (i.e. GEL 5 per litre of whiskey).
- Condensed natural gas, except for pipeline.
- Oil distillates.
- Goods produced from crude oil.
- Tobacco products.
- Automobiles.

The export of excisable goods is exempt from excise tax with the right to credit.

Property tax
Property tax is payable at the rate of 1% on the annual average residual value of fixed assets (except for land) on the balance sheet as well as on leased out property of Georgian entities or foreign entities with taxable property in Georgia. For immovable property acquired before 2005, the average residual value must be multiplied by a coefficient of between 1.5 and 3, depending on the acquisition date.
Land tax
The annual land tax rate for agricultural land varies according to the administrative unit and the land quality.

The base tax rate per 1 hectare of agricultural land varies from GEL 1.50 to GEL 100. The tax is further adjusted by a territorial coefficient of up to 150%, depending on the location.

The base tax rate payable on non-agricultural land is GEL 0.24 per square metre, which is further adjusted by a territorial coefficient not exceeding 150%.

Transfer taxes
There are no transfer taxes in Georgia.

Stamp taxes
There are no stamp taxes in Georgia.

Branch income
Branch income is taxed at the general rate of 15%. There is no tax on branch profit remittances.

Income determination
Taxable income is determined as the difference between the gross income of a taxpayer and the relevant deductions granted under the Georgian tax code.

Inventory valuation
A taxpayer is required to record the value of goods produced or acquired as the outlays (except for depreciation charges) or the purchase price in tax accounting. Furthermore, the taxpayer shall include the storage and transportation expenses in the value of such goods.

A taxpayer is entitled to record the cost of inventory using the individual accounting method, the average weighted cost method, or first in first out (FIFO).

Capital gains
The Georgian tax code does not define any separate tax for capital gains. Capital gains are taxable as normal business income at the general CIT rate.

Dividend income
Dividends received by local legal entities (except for sole enterprises and entrepreneur partnerships) are not subject to taxation at source and shall not be included in gross income.

Dividends received by non-resident enterprises from resident enterprises are subject to WHT at source (see the Withholding taxes section for more information).

Interest income
Resident legal entities and PEs of non-residents that received interest income that was taxed at source in Georgia are entitled to a credit on tax paid to the state budget.
Interest income received from a licensed financial institution is not subject to WHT at source, and it should not be included in the gross income of a recipient unless the recipient is another licensed financial institution.

**Rent/royalty income**
Rent and royalty income received by resident companies and/or PEs of non-resident enterprises should be included in the gross income of the enterprise and taxed at the CIT rate of 15%.

**Foreign income**
Resident legal entities are subject to CIT on their worldwide income. Foreign income is subject to CIT at 15%. There is no tax deferral available under the Georgian Tax Code.

### Deductions
Expenses connected with the receipt of income generally are deductible from income, provided sufficient primary documentation is available.

**Depreciation**
The declining-balance method of depreciation applies to fixed assets for tax purposes. The maximum rate of depreciation is 20% for most fixed assets, though buildings and construction are subject to depreciation at the rate of 5% (please contact us for additional information regarding other groups and rates).

A taxpayer is entitled to fully deduct costs of fixed assets (excluding those contributed to capital) in the year when the fixed assets are put into operation (a form of capital allowance). In case the taxpayer employs the right of full deduction in this manner, this method may not be changed for five years.

**Amortisation of intangible assets**
Intangible assets (e.g. goodwill) are amortisable in proportion with the period of beneficial use. However, intangible assets of value less then GEL 1,000 are fully deductible from gross income.

If the period of beneficial use of an intangible asset cannot be defined, it is amortisable at the rate of 15%.

**Start-up expenses**
Expenses incurred before registration of an entity as a taxpayer (e.g. public registry fee) are not deductible under Georgian tax legislation.

**Interest expenses**
Interest paid on loans is deductible within the limits established by the Finance Minister. The annual deductible interest rate limitation established by the Minister of Finance of Georgia for the year 2012 is 24%.

**Bad debt**
A taxpayer is entitled to deduct bad debt only if all of the following conditions are met:

- The bad debt is related to the taxpayer's goods or services sold.
- Income receivable from the sale of goods or services was previously included in taxable gross income.
• The bad debt has been written off and recorded as such in the taxpayer’s accounting records.

Charitable contributions
Charitable contributions are deductible, up to 10% of taxable profit.

Fines and penalties
Fine and penalties paid to the state budget are not deductible.

Taxes
CIT is disallowed for deduction.

Other significant items
The following other expenses are not deductible:

• Expenses not related to the generation of income.
• Expenses related to the receipt of income exempted from CIT.

The deduction of certain expenses is subject to limitations, including:

• Representation expenses, up to 1% of gross income.
• Repair expenses, up to 5% of the book value of the relevant asset at the end of the year. Any excess must be capitalised and deducted through depreciation.

Net operating losses
Losses may be carried forward for five years but may not be carried back.

A taxpayer may elect to extend the carryforward period to ten years. However, this also results in the statute of limitations period being extended from six to 11 years.

International financial companies, international enterprises, and Special Trading Companies are not entitled to carry forward losses.

An international financial company is a financial institution that, on behalf of the application of plenipotentiary representative, gets state registered, is granted as ‘international financial company’, and is given a status confirming certificate. These are resident companies that, after application, were granted the status of international financial company.

An international enterprise is an enterprise operating in the free industrial zone, which, for the purposes of tax exemption, is granted the status of international enterprise.

Payments to foreign affiliates
There is no special tax regime in Georgia for payments made to the foreign affiliates; as such, general rules will apply. Payments may be classified as equity, financing, or service fee. Any such transaction will need to be at arm’s length in accordance with the Georgian transfer pricing rules.

Group taxation
Georgian law does not provide for taxation of groups.
Transfer pricing
The transfer pricing rules introduced in the tax code are broadly based on the OECD arm’s-length principle adopted in tax treaties and by most countries when they implement domestic transfer pricing rules.

The law recognises the five OECD transfer pricing methods for evaluating whether prices are at arm’s length:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Net profit margin method.
- Profit split method.

The tax code stipulates that in accordance with the Ministry of Finance instructions, the tax authority may recalculate the taxes if they can prove that the prices applied by related parties of transactions differ from the market prices.

The following general penalties, determined by tax legislation, apply for non-compliance with the arm’s-length principle or failing to prepare or submit transfer pricing documentation:

- An understated tax liability (e.g. VAT, CIT) is subject to a penalty of 50% of the understated tax.
- Late payment of taxes is subject to interest at a rate of 0.07% per overdue day.
- Failing to submit a required document is generally subject to a penalty of GEL 400 (approximately 220 United States dollars [USD]).

Thin capitalisation
Interest expense may be disallowed if a company’s debt-to-equity ratio exceeds 3:1 (5:1 for leasing companies). The thin capitalisation rules do not apply to financial institutions, entities that have gross income of less than GEL 200,000, and entities with interest expense that is less than 20% of their taxable income before deducting such interest expense.

Tax credits and incentives

Foreign tax credit
Income tax or profit tax paid on income earned from outside Georgia may be credited against CIT payable in Georgia. The amount of credited taxes may not exceed the Georgian tax payable on the foreign income.

CIT exemptions
The following are exempt from CIT (the list is not exhaustive):

- Income of budgetary, international, and charitable organisations (including grants, membership fees, and donations), except for the profit from commercial activity.
- Profit received from financial services conducted by international financial companies.
- Gains on sales of securities issued by international financial companies.

Free industrial zone (FIZ)
The following rules apply for enterprises located in an FIZ:
• Income received by an international enterprise from its permitted activities conducted in an FIZ is exempt from CIT.
• The importation of foreign goods into an FIZ is free of customs duties and VAT-exempt.
• Operations carried out in an FIZ are VAT-exempt without the right to credit.
• Property located in an FIZ is exempt from property tax.
• The personal income tax of employees is paid by those individuals through self-reporting.

**Withholding taxes**

Non-resident enterprises earning income from Georgian sources, other than through a PE, are subject to WHT at the following rates:

<table>
<thead>
<tr>
<th>Income</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>

**Tax administration**

The tax departments under the Ministry of Finance are responsible for tax administrative matters in Georgia.

**Taxable period**

The tax year is the calendar year in Georgia.

**Tax returns**

A CIT return should be submitted before 1 April of the year following the reporting period.

**Payment of tax**

CIT is paid in advance in four equal instalments, before 15 May, 15 July, 15 September, and 15 December. The advance instalments are estimated according to the previous year’s annual tax. A taxpayer with no prior-year CIT obligation is not required to make advance payments.

Final payment is due by 1 April of the year following the reporting period. Excess CIT payments may be offset against other tax liabilities.
**Tax audit process**
There are two types of tax audits: desk tax audit and field audit. The tax audit may be conducted based on the order of the Revenue Service of Georgia. The Revenue Service sends a notice to the taxpayer no less than ten working days before the commencement of the audit. The audit should commence no later than 30 days after receiving such notice by the taxpayer. Normally, the tax audit may last for three months, and may be extended to another two months with the approval of the head of the Revenue Service. The findings should be presented to the taxpayer in the form of a tax act.

**Statute of limitations**
The statute of limitations is six years in Georgia. For those taxpayers who decide to increase the loss carryforward to ten years, the statute of limitations is 11 years.

**Topics of focus for tax authorities**
In recent periods, the tax authorities became largely focused on transfer pricing issues during tax audits.

Significant developments

A number of legislative proposals were under discussion towards the end of 2012. However, party politicking stalled legislative action at the time, even though most of the items under debate were, as such, non-controversial at the political level. However, all parliamentary parties had already set their sights on the next general election due to be held on 22 September 2013. In the meantime, some of the changes have been enacted, the most important being:

• The group taxation rules have been slightly widened to include subsidiaries registered in another European Union (EU)/European Economic Area (EEA) member state, provided they are managed from Germany. On the other hand, it is now a condition for group taxation that the income falling to the parent is not excluded from German taxation by either double tax treaty (DTT) or domestic law. German relief for losses arising within a tax group will be denied if the loss is ‘taken into account’ in a foreign state when taxing the subsidiary, the parent, or other entity. These changes apply to all open cases.

• For 2013, the loss carryback has been increased from 511,500 euros (EUR) to EUR 1 million.

• Dividends received by a corporation on or after 1 March 2013 are taxable income if paid on a holding of less than 10%. However, corresponding capital gains on the sale of the shares continue to be exempt.

A proposal to adopt the Authorised Organisation for Economic Co-operation and Development (OECD) Approach to determining permanent establishment (PE) (branch) income as though it had been earned by an independent enterprise has not yet been enacted, but remains current. The next parliamentary move is scheduled for 5 June.

Taxes on corporate income

Germany taxes its corporate residents on their worldwide income. However, most DTTs exempt income attributable to a foreign PE. Non-residents with PE or property income are taxed by assessment on German-source income; those earning royalties and dividends are taxed by withholding at source. Interest paid abroad is, in most cases, free of German tax altogether.

German business profits are subject to two taxes, corporation tax and trade tax.
Corporation tax (Körperschaftsteuer)
Corporation tax is levied at a uniform rate of 15% and is then subject to a surcharge of 5.5% (solidarity levy).

Trade tax (Gewerbesteuer)
The effective rate of trade tax varies by location from a minimum of 7%, which is the legal minimum and applies in a few small villages in depressed areas, to the Munich rate of 17.1%. The local rates in most cities range between 14% and 16%, while those in small towns can be as low as 12%. The basis for this tax is the adjusted accounting profit: in particular, 25% of all financing costs over EUR 100,000, including the implicit financing costs in leasing, rental, and royalty payments, are added back to taxable income.

If the basis for the two taxes is identical (unlikely in practice), the overall burden on corporate profits earned in Munich would be 33%. In Frankfurt, the burden would be 32%. In Berlin, the burden would be 30.2%.

Corporate residence
A corporation is resident in Germany for tax purposes if either its place of incorporation or its main place of management is in Germany. A corporation meeting neither of these criteria will be regarded as non-resident with tax obligations limited to its income from German sources. These include active business activities through a PE or the letting of property, as well as investment income, royalties, and equipment rental (leasing). Income of the first two categories is generally taxed by assessment on the actual net earnings. That of the last three is usually taxed at source by withholding from the gross amount payable. Interest paid abroad is generally tax-free. However, interest on convertible or profit-sharing bonds is taxed as a dividend; interest on a German property or ship mortgage is seen as property or shipping income respectively.

Permanent establishment (PE)
Domestic law defines a PE as any fixed business facility serving the corporate purpose. ‘Fixed’ is not defined further, but is generally taken to imply a duration of at least six months. A permanent representative is someone who ‘habitually’ deals on behalf of the principal acting on the principal’s instructions, again without any specific time limit. Germany consistently follows the OECD model in her tax treaty PE definitions; thus purchasing activities, delivery stores, and independent agents acting in the ordinary course of their business are regularly excluded from the PE concept. Some, but not all, of Germany’s recent tax treaties reflect the Authorised OECD Approach to PE income, and there is a current proposal to adopt this approach into domestic law.

Other taxes
Value-added tax (VAT)
Proceeds of sales and services effected in Germany are subject to VAT under the common system of the European Union at the standard rate of 19% (7% on certain items, such as food and books). The taxpayer generally is entitled to deduct the VAT charged on inputs from that payable on outputs.

VAT is administered by the tax office responsible for the corporation tax assessment of a company. It is based on returns filed monthly or quarterly by the tenth day of the following month (monthly where the output tax in the previous year was more than
Germany

EUR 7,500) drawn up on the basis of the actual transactions during the filing period as shown in the books of account. A permanent filing extension of one month is available against an advance payment of one-eleventh of the total net tax due during the previous year. Otherwise, payment is due when the return is filed.

Legally, VAT is an annual tax. Each taxpayer must file an annual return for each calendar year, regardless of the actual accounting date for the business. The VAT return is filed together with the corporation and trade tax returns. If the annual return does not agree with the total of the monthly or quarterly returns, the tax office can be expected to ask for a detailed explanation and to penalise any irregularity.

**Customs duties**
Customs duties are levied under a common system on imports into the European Union. The rate is set at zero on most imports from EU candidate countries and on many imports from countries with which the European Union has an association agreement.

For manufactured products from other countries, the rates generally lie within the range of 0% to 10%. The basis is the import value of the goods and thus includes uplifts for royalty or other payments associated with their use but not apparent from the transit documents.

The European Commission (EC) also sets ‘countervailing’ duties from time to time on specific imports from specific countries in order to counter dumping attempts. The countervailing duty rate is set to fully absorb the dumping margin and is therefore usually much higher than 10%.

**Excise taxes**
Excise taxes on fuel, electric power, insurance, and some other products are not a compliance issue for businesses other than dealers in bonded goods and insurance companies, although they can be a significant additional cost factor for business users. These excise taxes also have an environmental element in as much as the rates are set to discourage excessive use of pollutants. However, an air passenger duty is the only tax on pollution as such. Energy producers (such as power stations) can claim a refund of the excise tax borne in the cost of the energy products used in the production process.

**Property taxes**
There are no taxes on wealth or capital employed. There is a minor local authority tax on property, but the effect of this is partly offset by an additional trade tax deduction.

**Stamp taxes**
The only significant German stamp tax is the real estate transfer tax on the consideration on conveyances of German property. The rate varies by province: 3.5% for property in Bavaria and Saxony; 4.5% in Bremen, Hamburg, and Lower Saxony; 5.5% in the Saar; 5% elsewhere.

This tax is also levied on indirect transfers from the acquisition of at least 95% of the shares in property owning companies. This applies to shares in the shareholder throughout the corporate chain. If the transfer is indirect, and therefore without its own specific consideration, the basis for the tax is 12.5 times the annual rentable value. This value is derived from rents actually achieved over the past three years or estimated from statistics maintained by the local authority.

The tax is not levied on direct or indirect transfers without consideration in the course of a corporate reorganisation under the laws of a member state of the European
Economic Area, provided at least 95% of the ultimate interest in the property remains unchanged for five years before and after the transaction.

Real estate transfer tax is currently under attack before the Constitutional Court.

**Social security contributions**

All employers are required to account for social security contributions on wages and salaries paid, up to set monthly limits. There are four separate types of insurance: for old-age pensions, unemployment benefits, health care, and invalidity care. Employees regularly earning more than EUR 4,350 per month can opt out of the health and invalidity insurances if they take out appropriate coverage with a private insurance company. The pension and unemployment insurances are compulsory for all employees. The upper monthly salary limits are EUR 5,800 (EUR 4,900 in the eastern part of Germany) for the pension and unemployment insurances and EUR 3,937.50 for the health and invalidity insurances. The rates are as follows:

- Pension insurance: 18.9%, of which the employee’s share is one half.
- Unemployment insurance: 3.0%, of which the employee’s share is one half.
- Health insurance: 15.5%, of which the employee’s share is 8.2%.
- Invalidity insurance: 2.05%, of which the employee’s share is one half.

**Branch income**

Both corporation tax and trade tax are imposed on the taxable income of a foreign company’s German branch. The rates are the same for branches as for resident German companies, although the withholding tax (WHT) on dividend distributions by German companies is not deducted from profits transferred by a German branch to its foreign head office.

**Income determination**

Strict conformity between book and tax reporting is no longer required. Rather, a company must draw up its financial statements according to the dictates of fair presentation, but may exercise all valuation and other options in the tax acts in its own best tax interest without regard to the accounting treatment for the item concerned. It must keep a register of all variances between the financial statements and the tax computation showing the basis on which each arose and its reversal. IFRS financial statements are not accepted as a basis for computing taxable income.

**Inventory valuation**

Inventories normally are valued at the lower of actual cost, replacement cost, and net realisable value. However, any write-downs below actual cost must be for specific reasons. If specific identification of the inventories is not possible, valuation at either standard or average cost is acceptable. The last in first out (LIFO) method is accepted as an option. First in first out (FIFO) is not accepted unless its assumption accords with the facts, although this condition is often fulfilled in practice.

**Long-term liabilities and accruals**

Non-interest bearing long-term liabilities, other than advance payments received, must be discounted at 5.5% per year. A similar provision applies to refurbishment (to restore an asset to its original condition) and other accruals that accumulate over time.
Germany

**Capital gains**
Generally, capital gains realised by a corporate entity from a disposal of business assets are treated as ordinary income. It is possible to postpone the taxation of part or all of the gain on real estate by offsetting the gain against the cost of a replacement property.

Capital gains from the sale of investments in other companies are exempt from corporation and trade taxes. Corresponding losses are not deductible. However, 5% of the capital gains are added back to taxable income as non-deductible directly-related expenses.

**Dividend income**
Dividends received on significant holdings are exempt from corporation and trade taxes without a minimum holding period. Portfolio dividends are taxable. A portfolio holding is less than 10% for corporation tax and less than 15% for trade tax. 5% of the tax-free gross dividend is added back to taxable income as non-deductible business expenses.

Note that banks do not enjoy this exemption on dividends from securities held for trading.

**Stock dividends**
In principle, a declaration of stock dividends (by converting reserves to capital stock) by a company will not lead to taxable income for the shareholder or to other tax effects. Subsequent capital reductions, however, will be treated as cash dividends in most circumstances. There is no German tax reason for distributing a stock dividend as opposed to merely leaving accumulated profits on the books to be carried forward. The decision, therefore, depends upon the situation in the investor's home country.

**Interest income**
Interest received is taxed as part of a company's ordinary trading income. There is no exemption corresponding to the trade tax disallowance of 25% of the interest expense or to the general tax disallowance of net interest expense in excess of 30% of 'earnings before interest, tax, depreciation, and amortisation' (EBITDA) under the interest limitation rule (see the Deductions section). However, since the interest limitation is based on the net interest margin, a company can benefit from earning income as interest as opposed to an interest substitute.

**Foreign income**
Foreign income, except dividends, received by a German corporation from foreign sources is included in taxable income for corporation tax unless a tax treaty provides for an exemption. Foreign PE income, in most cases, is exempt from corporation and trade taxes, while double taxation on most items of passive income (e.g. interest and royalties) is avoided by foreign tax credit or, at the taxpayer's option, by a deduction of the foreign taxes as an expense.

Irrespective of any tax treaty, income from a foreign branch or partnership is not charged to trade tax.

A Foreign Tax Act sets anti-avoidance (including controlled foreign company [CFC]) rules with respect to subsidiaries in certain lines of business subject to a low-tax regime. A low-tax regime is one in which the rate applicable to the income in question is less than 25%. Most forms of passive income fall under the CFC rules, which essentially attribute the income to the German shareholder as though it had been earned directly. Active business income is not generally caught where the business operates from properly established facilities.
Investment income held in an EU/EEA subsidiary is also exempt from attribution, provided the subsidiary is commercially active in its country of operation and maintains at least a minimum establishment.

Other provisions give the tax office the right to insist on full disclosure of all the facts and circumstances surrounding a transaction as a condition for the deduction of a business expense incurred within an essentially tax-free environment for the supplier. This rule operates independently of ownership or shareholding considerations.

**Deductions**

**Depreciation and amortisation**
Depreciation on movable fixed assets is calculated on the straight-line method over the asset’s anticipated useful life. The declining-balance method was available for assets capitalised in 2009 and 2010 at a maximum of two and a half times the straight-line rate, but in no case to exceed 25%. If this option was taken, it may be continued within subsequent years. On the other hand, a taxpayer is free to change from declining-balance to straight-line at any time. This election is by individual asset and cannot be reversed later. Depreciation takes the residual value of the asset into account only if it is material, with any gains on a sale being treated as normal business income.

Buildings are depreciated on a variety of straight-line or reducing-rate systems designed to reach a full write-down between 25 and 50 years, depending on the age of the building and on whether the taxpayer was its first owner.

In addition to normal depreciation, special depreciation is deductible for tax purposes in certain limited circumstances (e.g. small businesses, ancient monuments, buildings in designated renovated city zones).

Intangibles are amortised straight-line over their estimated useful lives, with goodwill amortised over 15 years.

**Start-up expenses**
Start-up and formation expenses are deductible as incurred.

**Interest limitation**
Annual net interest expense (the excess of interest paid over that received) of group companies is only deductible at up to 30% of EBITDA for corporation and trade tax purposes. The 30% limitation applies to all interest, whether the debt is granted by a shareholder, related party, or a third party.

This limitation does not apply where the total net interest expense for the year is less than EUR 3 million or where the net amount paid to any one shareholder of more than 25% (or a related party) is no more than 10% of the total. However, this latter concession is dependent on the demonstration that the equity to gross assets ratio of the company is no more than two percentage points below that of the group as a whole. Unused EBITDA potential may be carried forward for up to five years to cover future excess interest cost. This carryforward is otherwise subject to the same principles as the loss carryforward, including curtailment on change of shareholder(s).

It is emphasised that the interest limitation is additional to, and not a substitute for, the transfer pricing requirement that related party finance be at arm’s length.
Bad debts
Bad debts incurred on trading with unrelated parties are deductible once irrecoverability is apparent and all attempts to pursue the debt have failed or been abandoned. Provision for future bad debts may be made; general provisions must reflect the past experience of the business; specific provisions require specific justification based on the actual circumstances. Loans to shareholders of more than 25% or to their related parties may not be written down or off with tax effect, unless a third party creditor would have granted the loan or allowed it to remain outstanding in otherwise similar circumstances.

Charitable contributions
Donations to recognised charities in cash or in kind are deductible, up to the higher of 20% of otherwise net taxable income or 0.4% of the total of sales revenue and wages and salaries paid during the year. Donations to charities registered in other EU/EEA member states also qualify for deduction if the recipient charity meets the German requirements for recognition.

Fines and penalties
Fines and other penalty payments levied by a court, or by an authority, with an intent to punish are not deductible. By contrast, those levied to confiscate ill-gotten gains or income, or to relieve damage to the victims or to the public good, are deductible. Penalty payments levied for attempted tax evasion are not deductible, but late payment surcharges are deductible if the tax itself is, for example VAT.

Taxes
All taxes borne are deductible except for corporation tax, trade tax, and VAT on non-deductible expenses.

Net operating losses
Net operating losses are carried forward without time limit. For corporation tax (but not trade tax), there is an optional carryback to the previous year of up to EUR 1 million.

The loss relief brought forward claimable in any one year is limited to EUR 1 million plus 60% of current income exceeding that amount. The remaining 40% of income over EUR 1 million is charged to trade and corporation taxes at current rates. This is referred to as ‘minimum taxation’.

The loss carryforward ceases if a single (immediate or ultimate) shareholder acquires more than 50% of the issued capital (voting rights) within a five-year period. An acquisition of between 25% and 50% leads to a corresponding reduction in the loss carryforward.

Under the statute, these forfeiture rules do not apply to share acquisitions in connection with the recovery of a troubled business, where the change is part of a group internal reorganisation without effect on the single ultimate shareholder, or inasmuch as the loss carryforward is covered by hidden reserves in the company’s assets that, on realisation, will lead to German taxation. This excludes the appreciation in value of shareholdings in other companies as well as business assets held in foreign PEs. However, the European Commission has chosen to view the exemption from the forfeiture rules for share acquisitions within the context of a corporate recovery bid as unlawful state aid. Application of the provision has been suspended since April 2010; the government lost its appeal before the European Court of Justice against the
Commission’s decision by virtue of a missed deadline, but is supporting a number of companies in their own actions against the Commission.

**Payments to foreign affiliates**
A German corporation can claim a deduction for royalties, management service fees, and, subject to the interest limitation, interest charges paid to foreign affiliates, provided the amounts are at arm’s length. Detailed provisions covering both form and substance define this. In particular, all services must be covered by prior written agreement, and it is also necessary to conclude agreements for the purchase and sale of goods in writing where this would be usual between third parties (e.g. for quantity rebates on sales). The substance tests must be satisfied, both as to value for money and as to business relevance. Thus, the manager of a German subsidiary must be able to show both an adequate business benefit from a related party transaction and that the company could not have obtained a better deal on the open market. These and all other aspects of inter-company (related-party) trading fall under strict and extensive documentation requirements, breach of which can lead to serious penalties.

**Special features for trade tax**
There are a number of differences between the income subject to trade tax and to corporation tax. The most significant is the trade tax disallowance of one-quarter of the interest costs, including interest implicit in leasing, rental, and royalty charges. Banks have an exemption from this interest disallowance.

**Group taxation**
If a German parent holds more than 50% of the voting rights in a domestic or EU/EEA subsidiary managed from Germany, the two may conclude a formal, five-year, court-registered profit pooling agreement. The ensuing relationship is then referred to as an Organschaft. Effectively, the annual results of an Organschaft are pooled in the accounts and tax returns of the parent. Profits and losses within a group can therefore be offset, but there is no provision for the elimination of intra-group profits from the total tax base. It should also be noted that any loss incurred within an Organschaft is excluded from offset in the same or another year if a foreign country takes it into account in the taxation of an Organschaft member, or of any other entity.

**Transfer pricing**
Extensive rules on transfer pricing in respect of all transactions with foreign related parties are in force. The basic principle is that all trading should be at arm’s length, but the documentation requirements go far beyond the level of documentation normally found sufficient to demonstrate a conscientious approach to true third party business. Failure to meet these rules exposes the company to serious risk of penalties as well as unfavourable estimates by the authorities with the right to exercise every possible leeway or margin to the taxpayer’s disadvantage.

**Thin capitalisation**
There are no thin capitalisation rules as such; their substitute is the ‘interest limitation’ to, basically, 30% of EBITDA discussed in the Deductions section.

**Controlled foreign companies (CFCs)**
Germany operates a CFC regime aimed at passive income sheltered abroad and taxed at less than 25%. Essentially, the income is added to that taxable in Germany in the regular manner against a credit for the foreign tax actually paid and not recoverable by either the foreign entity or its shareholder. Active business income, except from tourism
Germany

and the arms trade, is generally exempt from the CFC net, provided it is earned through a properly established facility of a scale appropriate to the activity concerned. Treaty and EU directive rules exempting foreign income are respected, although taxpayers do have to demonstrate their treaty entitlement.

**Tax credits and incentives**

Germany does not offer tax incentives except in very limited circumstances, not usually of direct business relevance (e.g. special depreciation for buildings under a conservation order). Partly, this is a question of the state budget, and partly, it reflects the constitutional requirement for equal treatment of all taxpayers.

**Other incentives**

Investment grants of between 2.5% and 12.5%, depending on the year of commencement of the investment project, are available on capital expenditure on new manufacturing facilities or hotels in the eastern part of Germany. This system is being phased out, and expenditure in 2014 or later will not rank for grant.

Local authorities may offer facilities on favourable terms, such as the provision of cheap land on industrial estates.

**Foreign tax credit**

If foreign-source income is not exempt from German taxation, a credit will be given for the foreign tax actually paid and not otherwise recoverable. However, the credit is limited to the corporation tax (including the solidarity levy) on the net income after deducting the related expense. Unused credit is lost, as there are no provisions for carryforward or for offset against other taxes, such as trade tax. There are still a few cases of fictitious foreign tax credits under tax treaties with developing countries (to protect the treaty partner’s investment incentives), but German treaty policy is to abandon such provisions at the first opportunity.

**Withholding taxes**

Resident corporations paying certain types of income are required to withhold tax as shown in the following tables. There is also a solidarity levy of 5.5% on the tax due.

**General**

Notes

1. Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15%, regardless of any further relief available under a treaty.
2. Generally, only interest paid by banks to a resident is subject to a WHT. A 25% tax is also withheld from income on convertible or profit-sharing bonds.
3. Interest paid to non-residents other than on convertible or profit-sharing bonds is generally free of WHT. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity levy) of the interest income net of attributable expenses. The tax authorities can order a WHT of 15.825% (including solidarity levy) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.
4. Movable asset rentals are taxed by assessment rather than by withholding. For corporations, the rate is the standard 15% corporation tax rate (plus solidarity levy) unless reduced by treaty.
5. Where the EC Parent/Subsidiary Directive applies, dividends paid by a German company to a qualifying parent company resident in another EU member state are exempted from German WHT. The minimum shareholding is 10%, to be held continuously for at least one year.
6. The EC Interest and Royalties Directive exempts payments from WHT if made to an associated company in another EU member state. The association must be through a common shareholding of at least 10%, to be held continuously for at least one year.

### Notes

1. Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15%, regardless of any further relief available under a treaty.
2. Generally, only interest paid by banks to a resident is subject to a WHT. A 25% tax is also withheld from income on convertible or profit-sharing bonds.
3. Interest paid to non-residents other than on convertible or profit-sharing bonds is generally free of WHT. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity levy) of the interest income net of attributable expenses. The tax authorities can order a WHT of 15.825% (including solidarity levy) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.
4. Movable asset rentals are taxed by assessment rather than by withholding. For corporations, the rate is the standard 15% corporation tax rate (plus solidarity levy) unless reduced by treaty.
5. The treaty does not (effectively) limit the taxation of profit-based interest income; thus, the domestic rate (plus solidarity levy) applies.
6. The USSR treaty continues in force with Armenia, Moldova, and Turkmenistan.
7. The lower royalty rate applies to commercial and industrial royalties, as opposed to cultural royalties.
8. Mortgage interest to a Belgian business is exempt unless the recipient holds at least 25% of the voting rights in the payer.
9. The Yugoslav treaty continues in force with Bosnia-Herzegovina, Kosovo, Montenegro, and Serbia. Croatia, Macedonia, and Slovenia have their own treaties.
10. The higher royalty rate applies to film and television (TV) royalties, licences to use trademarks and names, and to franchises.
11. The Czechoslovak treaty continues to apply to the Czech Republic and to Slovakia. Interest on profit-sharing bonds is taxed as a dividend.
12. 25% on trademark royalties.
13. The higher royalty rate of 5% applies to commercial, industrial, and scientific royalties.
14. Cultural royalties are exempt.
15. Interest on convertible and profit-sharing bonds is taxed as a dividend; mortgage interest is exempt.
16. The 10% royalty rate applies to copyrights.
17. Treaty relief on interest, royalties, and rentals is conditional on taxation in country of receipt.
18. The 5% royalty rate applies to copyrights.

[www.pwc.com/taxsummaries](http://www.pwc.com/taxsummaries)
19. Royalties for copyrights, except for films and TV, are exempt.
20. The 10% interest rate applies in certain circumstances where the recipient is a bank.
21. The 15% royalty rate applies to patents, trademarks, films, and TV.
22. The dividend exemption applies to corporate shareholders with at least 80% throughout the previous 12 months.
23. The 5% royalty rate applies to industrial, commercial, film, and TV royalties.
24. The 10% royalty rate applies to access to industrial, commercial, or scientific experience.

Treaties signed, but awaiting ratification: Luxembourg, Netherlands, Oman, and South Africa.

---

**Tax administration**

**Taxable period**
The tax year in Germany is the calendar year.

**Tax returns**
Returns are filed for each calendar year and reflect the financial statements for the business year ending in that calendar year. Assessments are issued once the tax office has reviewed the return.

In principle, returns are due by 31 May of the following year. However, there is a virtually automatic extension to 31 December for those filing with professional assistance. A further extension to 28/29 February is possible, if justified under the circumstances. Known late-filers and those with a record of other irregularities can be asked to submit their returns before these extension dates, though not before 31 May.

**Electronic returns**
Monthly or quarterly returns for WHT from employee salaries, dividends, interest, royalties, and other payments, and for VAT must be submitted electronically. The same applies to the annual returns for corporation tax, trade tax, and VAT. There is also an electronic filing requirement for the financial statements supporting the return. In principle, this applies to business years beginning in 2012, although the finance ministry has announced that no objection will be taken to paper filings of financial statements for the first year of the new system.

**Payment of tax**
Taxes are payable in quarterly instalments during the year, with a final settlement when the assessment is issued (usually five to six weeks afterwards). The quarterly instalments are based on the estimated ultimate liability. Usually, this is the total tax due shown by the last assessment issued, as adjusted by any rate changes. The corporation tax instalments are due on the tenth day of March, June, September, and December. For trade tax, the due dates are the 15th day of February, May, August, and November. Failure to pay by the due date followed by a three day grace period leads to a penalty of 0.5% per month.

Corporation and trade tax assessments bear interest on the net amount payable after deduction of all credits and previous payments. The rate is 0.5% per month simple interest, and the period runs from 1 April of the second year following the year of assessment. The interest period is independent of the actual date of assessment. It thus runs in retrospect on assessments issued later, for example following a tax audit.
Rulings
Tax offices are able to issue binding rulings in respect of planned transactions, provided the taxpayer can show a particular interest in the tax consequences of the intended action. The fee varies between EUR 121 and EUR 91,456, depending upon the amount of tax involved.

Advance pricing agreements (APAs)
A taxpayer can request the Central Tax Office to negotiate an APA on related-party transactions with a foreign tax authority on one’s behalf. The vehicle is the mutual agreement procedure under the treaty, and the fee is a lump sum EUR 20,000 for each new agreement.

Tax audit process
Germany relies heavily on tax audits as a means of ensuring taxpayer discipline. Audits of small businesses are carried out at random, although those for larger operations and for the local subsidiaries of foreign groups tend to be regular. With some district variations, audits are usually conducted at four to five yearly intervals, though not always with equal intensity for the entire period since the auditors’ previous visit.

Statute of limitations
The statutory limitation period for the issue or correction of assessments is four years from the end of the year in which the return was filed. If no return was filed, the period runs from the end of the third year following the end of the year of assessment. The four-year period is extended to five in cases of taxpayer negligence and to ten in the event of evasion.

The statutory limitation period for the collection of tax debts is five years from the end of the year in which payment became due.

Topics of focus for the tax authorities
Tax office reviews of tax returns prior to issuing the assessment notice and payment demand are often rather superficial. Audits, though, are intense, being field reviews on site often lasting for several weeks or even months. Companies with an international focus can expect significant audit emphasis on all aspects of their dealings with their foreign business partners. If the company is a member of an international group, its most important audit component will usually be its transfer pricing on its dealings with foreign related parties and the relevant documentation. It is emphasised that these two topics are separate fields, as documentation deficiencies can lead to unfavourable estimates on the taxpayer, even if the taxpayer is able to justify the taxpayer’s group company pricing in terms of overall result.

International exchange of information
For several years, Germany has been forceful in promoting the international exchange of tax information. Ideally, the government would like the information exchange to be automatic, but has been prepared to accept limiting exchanges to specific requests if the other state insists and is willing to discourage evasion with a meaningful WHT. However, attitudes are hardening, not least in the wake of Foreign Account Tax Compliance Act (FATCA) and the Bundesrat refusal to ratify an agreement with Switzerland, seen by many as being too protective of evaders. Indeed, Germany is now pressing for a fully automated system within the European Union and for EU insistence on this from European tax havens outside.
In 2012, Germany participated in a working group with France, Italy, Spain, the United Kingdom (UK) and the United States (US) with the task of drafting a model FATCA agreement designed to keep Germany's own banks FATCA-compliant, acquire equivalent rights from the United States in respect to Germany's own taxpayers, and to resolve potential legal difficulties arising from co-operation of Germany's own banks with the tax authorities of a foreign power. A bilateral agreement with the United States on this model was initialled on 22 February 2013, and Germany has agreed with the other members of the working group to exchange information on the same lines as a pilot project within the European Union. The current hope is that this will lead to a European FATCA in the form of an EU legal act ensuring a multilateral exchange of information between all member states.
Significant developments

2013 amendments
In keeping with its commitment to expand the tax base and ensure efficiency in tax administration, the government made various amendments to the income tax laws in 2012 while there are proposed changes in 2013. The purpose of these amendments, amongst others, includes streamlining the tax refund process and leveraging technology to simplify tax refunds under the current tax relief programme.

In 2013, the proposed amendments to the tax laws include the following changes:

• Pass the current Windfall Tax Bill, which seeks to impose an additional tax of 10% on the profits of mining companies.
• Increase the deductible cost of non-commercial vehicles from the current limit of 25,000 Ghana cedi (GHS) to GHS 70,000 for capital allowance calculations.
• Revise the annual value-added tax (VAT) threshold from GHS 90,000 to GHS 120,000 and split the current rates for taxpayers under the VAT Flat Rate Scheme (VFRS).
• Consolidate the tax laws, which would enable the tax authority to offset tax credits due to a taxpayer against the liabilities of the taxpayer in order to reduce the need for tax refunds.

Effective financial year 2013, the long awaited Transfer Pricing Regulations were passed into law.

Taxes on corporate income
A resident is taxed on income accruing in, derived from, brought into, or received in Ghana. The income of a resident is treated as accruing in or derived from Ghana unless attributable to a permanent establishment (PE) of the resident outside Ghana.

A non-resident is taxed on income accruing in or derived from Ghana. The income of a non-resident is treated as accruing in or derived from Ghana if the income is attributable to a PE of the non-resident in Ghana.

National corporate income tax (CIT) is payable on the following:

• Income accruing in, derived from, brought into, or received in Ghana in respect of gains or profits from a trade, business, profession, or vocation.
• Dividends, interest, or discounts.
• Any charge or annuity.
Ghana

- Royalties, premiums, and any other profits arising from property, including rents.
- Receipts, including royalties and deferred payments of any kind.

The general CIT rate is 25%.

Companies listed on the Ghana Stock Exchange (GSE) are subject to a reduced CIT rate of 22% (this rate is applicable for only a three-year period for companies that listed on the GSE after 1 January 2004).

Mining companies pay CIT at a rate of 35%, while the hotel and hospitality industry pays a reduced rate of 20%.

The CIT rate for companies engaged in non-traditional exports is 8%, while banks lending to the agricultural and leasing sectors pay a CIT rate of 20%.

Corporate residence

Corporate residence is determined by the place where the trade, business, profession, or vocation is carried on. A company is resident if it is incorporated under the laws of Ghana or has its management and control exercised in Ghana at any time during a year of assessment.

Where a non-resident corporate body carries on any trade, business, profession, or vocation in Ghana (part of the operations of which may be carried on outside Ghana), the full gains or profits of the trade, business, profession, or vocation are deemed to be derived from Ghana.

Permanent establishment (PE)

A PE is determined under the tax law as the place where a person carries on business, as well as a place where a person:

- carries on business through an agent, other than a general agent of independent status acting in the ordinary course of business as such
- has, is using, or is installing substantial equipment or machinery, or
- is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to such project.

A non-resident carrying on business in Ghana through a PE is subject to tax in Ghana only on that income attributable to the PE in Ghana.

Other taxes

Value-added tax (VAT)

Other than exempt goods and services, VAT of 12.5% and the National Health Insurance Levy (NHIL) of 2.5% are charged on the following:

- Every supply of goods and services made in Ghana.
- Every importation of goods.
- Supply of any imported service.
The VAT and NHIL is charged on the supply of goods and services where the supply is a taxable supply and made by a taxable person in the course of business.

VAT and NHIL are payable:

- in the case of taxable supply, by the taxable person making the supply
- in the case of imported goods, by the importer, and
- in the case of imported services, by the receiver of the service.

Most professional services are also subject to the same VAT and NHIL rates, including the following:

- Management services.
- Insurance brokerage and other services.
- Financial, tax, and economic consulting.
- Engineering and technical services.
- Accounting services.
- Courier services.
- Legal services.
- Provision of satellite television.
- Architectural services.
- Mobile cellular phone services.
- Services rendered by surveyors.

Exports of goods and services are zero-rated. Unless specifically exempt, supplies of all goods and services are subject to VAT.

There are proposals to amend the existing VAT Flat Rate Scheme (VFRS). Currently, all traders whose annual turnover is less than GHS 90,000 are classified under the VFRS and account for VAT at a rate of 3% without recourse for any input VAT incurred.

Per the 2013 Budget, all businesses supplying non-taxable supplies with an annual turnover between GHS 10,000 GHS and GHS 120,000 would be obligated to operate the VFRS charging a rate of 3%, whereas business making taxable supplies would operate the VFRS at a rate of 6%. All businesses whose annual turnover exceeds the GHS 120,000 threshold would be obligated to charge and account for charged VAT at 15%. Businesses whose designations change due to the amendment would convert to the appropriate system that they would qualify for.

The proposal seeks to create a distinction between producers of taxable and producers of non-taxable supplies. Suppliers of taxable goods would be required to charge a flat rate of 6% on their goods, but would be allowed to offset input VAT against VAT payable; whereas suppliers of non-taxable goods remain under the old regime.

**Customs and excise duties**

Customs and excise duties are imposed on the importation of goods at the port of entry and certain manufactured goods produced or imported into Ghana.

The current rates of excise duties range from 150% on tobacco products, to 22.5% on wines, to 17.5% on water.

Some significant changes made in 2013 to excise duties included the inclusion of plastic packaging materials for water and mineral water in the environmental excise duty. The
2013 Budget also proposes a further increase in the duty on plastic from the current 20% (introduced in the 2012 Budget) to fight pollution.

**Property taxes**

Property tax rates are payable by owners of immovable property to the local District Assembly. The rate of property tax differs depending on the location of the property. The Local Government Act 1993 enjoins all employers to deduct from the remuneration of every employee general or special rates imposed by the Rating Authority (District Assembly) as a basic amount.

**Stamp taxes**

Stamp duty is paid, at rates ranging between 0.25% to 1% and GHS 0.05 to GHS 25, depending on the type of transaction and the instrument. The stamp duty is not a tax on transactions but on documents brought into being for the purposes of recording transactions. It is therefore a tax on documents or specific instruments that have legal effect, such as the following:

- Insurance policies.
- Awards of cost in matters of dispute.
- Conveyances or transfers on the sale of any property.
- Appointment letters of new trustees.
- Natural resource leases or licences (e.g. mining and timber).
- Agreements or memoranda of agreement.
- Bills of exchange (e.g. issue of cheques).
- Bills of lading.

**Capital gains tax (CGT)**

CGT is payable by every person, including a corporate body, on any capital gain accruing or derived from the realisation of any chargeable asset situated in Ghana. These chargeable assets include buildings of a permanent or temporary nature; business and business assets, including goodwill; land, other than agricultural land; and any assets declared as chargeable by legislative instrument made under the law.

Capital gains in excess of GHS 50 are subject to tax at 15%. However, gains resulting from a merger, amalgamation, reorganisation, or reconstruction are exempt from CGT under certain conditions, as are gains accruing to or derived from a venture capital financing company.

A 20-year exemption that was granted on gains from the sale of securities of companies listed on the GSE and that ended in January 2011 was extended for five additional years to encourage transactions on the stock exchange and, in the long term, to make the securities market more vibrant and fluid.

Details of further exemptions can be found in the income tax laws of Ghana.

**Communications service tax (CST)**

CST of 6% is levied on charges payable by both individual and corporate consumers for the use of communication services provided by Communications Class 1 licensees as defined in the National Communications Authority Act. This essentially covers national fixed and mobile cellular network operators and internet service providers (ISPs). CST applies on services provided by the following:
• Public/corporate data operators.
• ISPs.

The National Communication Authority issued confirmation that radio and FM broadcasting services, as well as providers of free-to-air and pay-per-view television services, are excluded from CST because those businesses are not Class 1 licensees, and, by extension, such businesses are not required to levy CST on their communication services provided.

The 2013 Budget proposes to make amendments to the CST law in consultation with the industry. Communication services providers have been urged to pay arrears of the CST while the government intends to revisit the implications of the tax on interconnect calls.

**Social security contributions**
Currently, the employer is required to contribute 5.5% of gross salary to the Social Security and National Insurance Trust (SSNIT), and the employee contributes 13%. Effective 2 July 2013, the National Pensions Authority requires expatriate workers to make contributions to SSNIT. However, negotiations on the application of the law regarding expatriates are still ongoing.

**Branch income**
The CIT rate on branch profits is the same as that on corporate profits.

In addition, a PE of a non-resident entity is subject to branch profit tax at a rate of 10% on deemed repatriated profits of the PE. Repatriated profits, or deemed repatriated profits, are determined by a formula under the tax law that computes the movements of the accumulated profits and net assets.

Note that the deemed repatriated profits for the period that arise in connection with the operations of the branch may, at the discretion of the tax authorities, be computed by reference to the total consolidated profits of the entire group, taking into account the proportion that the turnover of that branch bears to the total consolidated turnover of the group.

**Income determination**

**Inventory valuation**
The Internal Revenue Act 2000 (Act 592), under Section 31, provides general guidance on the principles of stock (inventory) valuation for income tax purposes. A company that accounts for tax on an accrual basis is required to account for inventory using the absorption-cost method. A company accounting for tax purposes on a cash basis may calculate the cost of stock using a prime-cost method or absorption-cost method. The closing value of inventory is valued for tax purposes at the lower of cost or market value.

**Capital gains**
Capital gains are taxed at a separate rate in Ghana. See Capital gains tax in the Other taxes section for more information.
Dividend income
A dividend paid to a resident company by another resident company is exempt from tax where the company receiving the dividend controls, directly or indirectly, 25% or more of the voting power in the company paying the dividend.

Stock dividends
The issue of stock dividends is permitted under Section 74 (1) of the Ghana Companies Code 1963, Act 179. It is, however, subject to income tax at the dividend withholding tax (WHT) rate of 8%.

Interest income
Interest received by a resident company from another resident company is subject to WHT at a rate of 8%.

However, no WHT applies on any interest paid by an individual person, on government of Ghana bonds, or on interest received by a resident financial institution.

In addition, interest of an approved unit trust scheme or mutual fund is exempt from tax.

Exempt income
Specific exemptions from tax include the following:

- Income of a local authority.
- Income of a statutory or registered building society.
- Income of a charitable or an educational institution.
- Income of organisations formed for the purpose of promoting social or sporting amenities.
- Income accruing from a farming enterprise, for a limited period.
- Income of a registered trade union.
- Income of rural banks, for the first ten years of operations.
- Gain or profit from the business of operating ships or aircraft by non-resident persons if an equivalent exemption is granted by the person’s country of residence to persons resident in Ghana.
- Investment income of a pension or provident society.
- Income or profit of any registered cooperative society.

Foreign income
Resident corporations are taxed on their foreign income as and when it is brought into or received in Ghana. Foreign income is taxed together with other income derived in Ghana, and double taxation is avoided through treaties or foreign tax credits. No special rules exist for taxing undistributed income of foreign subsidiaries.

Deductions
Depreciation and depletion
Depreciation of depreciable assets in the accounts of a business is not an allowable deduction in computing taxable profits. It is instead replaced by capital allowances at prescribed statutory rates, as follows:
<table>
<thead>
<tr>
<th>Class</th>
<th>Comments</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Assets pooled (allowance calculated on a reducing-balance basis). Mainly computers and data handling equipment.</td>
<td>40%</td>
</tr>
<tr>
<td>2</td>
<td>Assets pooled (allowance calculated on a reducing-balance basis). Mainly automobiles, buses, mini buses, construction and earth-moving equipment, trailers and trailer-mounted containers, plant and machinery used in manufacturing.</td>
<td>30%</td>
</tr>
<tr>
<td>3</td>
<td>Assets not pooled (allowance calculated on a straight-line basis). Mainly mining and petroleum rights assets, such as exploration and development costs, buildings, structures and works of a permanent nature related and plant and machinery.</td>
<td>20%</td>
</tr>
<tr>
<td>4</td>
<td>Assets pooled (allowance calculated on a reducing-balance basis). Mainly railroad cars, locomotives and equipment, vessels and similar water transportation equipment, aircraft, public utility plant, equipment, office equipment and fixtures, and any other depreciable asset not elsewhere classified.</td>
<td>20%</td>
</tr>
<tr>
<td>5</td>
<td>Assets not pooled (allowance calculated on a straight-line basis). Mainly other building structures and works of a permanent nature.</td>
<td>10%</td>
</tr>
<tr>
<td>6</td>
<td>Assets not pooled (allowance calculated over the useful life of the asset). For other intangible assets.</td>
<td>Useful life</td>
</tr>
</tbody>
</table>

Allowances are granted only on the following conditions:

- The taxpayer must own the asset.
- Capital expenditure must be incurred.
- The asset must be used in the trade.
- The asset must be in use up to the end of the basis period.

Capital allowances are granted for every year in which the asset is in use. Balancing allowances and charges are made, as the case may be, on disposal of the asset.

For intangibles, such as goodwill, patents, trademarks, and copyrights, the law allows for capital allowance deduction over the useful life of the asset.

**Start-up expenses and pre-operating costs**

Although the tax law does not specifically mention start-up expenses or pre-operating costs, generally a deduction is allowed for start-up and pre-operating costs incurred by a business, provided such expenses are wholly, exclusively, and necessarily incurred in the production of income of the taxpayer.

**Interest expenses**

Any sum payable by way of mortgage or debenture interest by any company to a non-resident, except where tax has been deducted and accounted for, is considered non-deductible.

**Bad debts**

A deduction is allowed for bad debts incurred in the normal course of business, other than advances made on capital accounts. A bad debt is allowed as a deduction if the taxpayer has taken all reasonable steps to pursue payment and the person reasonably believes payment will not be made.

Any amounts recovered in respect of a bad debt previously written off should be included in income and subject to tax accordingly.
Ghana

An existing debt that becomes a bad debt after a 50% or more change in underlying ownership is not allowed as a bad debt deduction after the change in ownership has taken place.

**Charitable contributions**
The following contributions/donations are allowable as deductions in ascertaining the taxable income of a person:

- Contributions made to a charitable institution or fund approved by the government.
- Payments towards a scholarship scheme approved by the government for a technical, professional, or other course of study.
- Donations made for the purpose of any rural or urban area and approved by the government.
- Donations for the purpose of sports development approved by the government.
- Donations to the government for worthwhile government causes approved by the Commissioner.

**Fines and penalties**
Fines and penalties arising as a result of non-compliance with the provisions of the tax law are generally not allowable deductions.

**Taxes**
Taxes are not deductible in determining taxable income.

**Other significant items**
No other special deductions are allowed. Principal non-deductible expenses include the following:

- Domestic or private expenses, including cost of travel between residence and place of business or employment.
- Any disbursement or expense not being wholly and exclusively paid or expended for the purpose of acquiring income.
- Capital withdrawn or any sum employed or intended to be employed as capital.
- Capital employed in improvement.
- Any sum recoverable under an insurance contract of indemnity.
- Rent of or any expense in connection with premises or a part of premises not occupied or used for the purpose of producing business income.
- Any payment to a provident, savings, or other society or fund unless specifically allowed by the tax Commissioner General (CG); this may change under tiers 2 and 3 under the new Pensions Act.

**Net operating losses**
Tax losses can be carried forward and deducted from assessable income for the five years immediately following the year in which the loss was incurred. This provision covers the following industries: farming and agro-processing, mining, manufacturing (mainly for export), tourism, and information communications technology (ICT) (i.e. software development).

Carryback of losses is permitted for persons deriving income relating to a long-term contract, except this is not allowed where there has been a change in ownership of 50% or more compared with the prior year. A long-term contract of a business includes a contract for manufacture, installation, or construction that is not completed within the company’s accounting year in which it is commenced.
**Payments to foreign affiliates**
No special restrictions are imposed on the deductibility of royalties, interest, and service fees paid to foreign affiliates, provided they are expenses incurred wholly, exclusively, and necessarily in the production of the income. However, the CG may disallow certain transactions if they are deemed artificial or fictitious.

**Group taxation**
No form of combined reporting of results of operations by a group or affiliates is permitted.

**Transfer pricing**
With effect from 1 January 2013, the Transfer Pricing Regulations were passed into law. The Transfer Pricing Regulations follow the internationally accepted guidelines published by the Organisation for Economic Co-operation and Development (OECD), only with a much broader perspective on the nature of entities and transactions.

The Regulations cover transactions between related parties, including PEs and employees, and also prescribe the transfer pricing methods and documentation that entities are required to maintain and retain.

The Regulations also require entities with related party transactions to file a return on an annual basis. The return is currently in draft format but would be expected to be formalised by the due date for filing the tax returns for the 2013 year of income.

**Thin capitalisation**
Interest expenses and foreign exchange currency losses incurred by an exempt-controlled resident entity are not allowed as a deduction in arriving at the chargeable income of the entity if the entity is thinly capitalised. An exempt-controlled entity is deemed to be thinly capitalised if its exempt debt to exempt equity ratio exceeds the ratio 2:1.

A resident entity is deemed to be exempt-controlled if at least 50% of the underlying ownership or control is held by a non-resident person, either alone or together with an associate or associates.

Thin capitalisation provisions do not apply to resident financial institutions.

There are currently no thin capitalisation provisions in the Petroleum Income Tax Laws, and, as such, the provisions are deemed not to apply to petroleum licence holders.

**Tax credits and incentives**

**Foreign tax credit**
A resident is entitled to a credit in respect to any foreign income tax paid to the extent to which the tax paid is in respect to the resident’s foreign taxable income. The foreign tax credit available on a specific income type should not exceed the average rate of Ghanaian income tax of the resident for a year.

**Inward investment**
Under the Ghana Investments Promotion Centre Act 1994, various incentives are available to encourage investments in the country, particularly in the areas of
agriculture; manufacturing industries engaged in export trade or using predominantly local raw materials or producing agricultural equipment, etc.; construction and building industries; mining; and tourism.

Incentives generally include exemption from customs import duties on plant and machinery; reduced CIT rates; more favourable investment and capital allowances on plant and machinery; reduction in the actual CIT payable, where appropriate; retention of foreign exchange earnings, where necessary; guaranteed free transfer of dividends or net profits, foreign capital, loan servicing, and fees and charges in respect of technology transfer; and guarantees against expropriation by the government.

**Capital investments**

Venture capital tax incentives include the following:

- Relief from stamp duty in each year on subscriptions for new equity shares in venture capital funds.
- Full tax exemption from CIT, dividend WHT, and CGT for five years.
- Carryforward of losses from disposal of shares during the tax-exempt period to the post-exempt period, up to five years.
- Chargeable income tax deduction equal to 100% of their investment, for financial institutions that invest in venture capital subsidiaries.

**Tax holidays**

A tax holiday is available to companies that partner with the Minister responsible for Works and Housing in the construction and sale or letting of low cost affordable residential premises and are certified as such by the Minister responsible for Works and Housing.

Tax holidays are also extended to entities in agro-processing, farming business, and for venture capital financing entities.

In the 2013 Budget, the government outlined its intention to review the existing tax exemption regime available to industries and enterprises to ensure that beneficiary businesses do not abuse the incentive.

Notes  
1. The lower rate applies where the recipient holds at least 10% of the shares. The higher rate applies in any other case.  
2. 5% for non-resident banks. 10% in any other case.

**Tax administration**

**Taxable period**  
The tax year runs from 1 January to 31 December. Corporations with financial periods other than the calendar year are taxed on their financial period ending during the calendar year.

**Tax returns**  
Companies are expected to submit a tax return not later than four months after the end of the financial year. They may file an application for extension of filing time for not more than two months.

**Assessments**  
The CG publishes in the Gazette or print media a list of persons who are under the Large Taxpayer Office and are under the self-assessment scheme. Companies under the self-assessment scheme are required to make an estimate of their annual chargeable income to be derived for the year and the tax to be payable thereon. The annual tax estimated by the taxpayer is paid in quarterly instalments on or before the last day of the third,
sixth, ninth, and 12th months of the period. These tax instalments are an advance payment deductible against the actual tax payable at the end of the year.

An entity that is not under the self-assessment scheme may be issued with a provisional assessment by the CG. The CG may, at the start of the year, serve a provisional assessment on a taxpayer’s chargeable income and estimated tax payable. The taxpayer is required to proceed and make advance quarterly tax instalment based on the provisional assessment.

The revenue office has, however, been gradually moving towards a self-assessment system, with some taxpayers in selected tax offices being required to go under the self-assessment regime. From the 2013 year of assessment, all medium taxpayers may be required to make their own estimates of annual chargeable income.

**Payment of tax**
CIT is due for payment at the same time as the due date for filing the return. Where a taxpayer is under self-assessment or is issued with a provisional assessment, the tax is payable in four equal instalments at the end of each quarter (i.e. March, June, September, and December) in each year of assessment, but such payments are not deemed to be the actual tax payable.

At the end of the year, all taxpayers are required to file final tax returns and pay any tax outstanding. The final return and tax are due within four months after the financial year-end.

There are also instances where the CG may issue an additional assessment after conduct of an audit. Where such assessment is served, the tax is payable within 30 days after service of the notice. At the discretion of the CG, the time for payment may be extended.

**Penalties**
Where tax is not paid by the due date, a penalty is assessed at 10% of the tax payable in addition to the tax unpaid up to three months after the due date; thereafter, the penalty is 20%.

**Tax amnesty bill**
Following the government’s planned fiscal policy in its 2012 budget statement, the tax amnesty bill came into force from 1 January 2013 and is expected to end on 30 September 2013.

The tax amnesty grants a waiver to persons who have failed to file returns or pay full taxes from paying penalties and interest on taxes arising under the Internal Revenue Act 2000, Act 592 (the IRA). As such, the amnesty covers income taxes, CGT, WHT, employment, and gift taxes. Taxes that fall outside the scope of the IRA, including customs duty, excise taxes, and VAT, are not covered under the amnesty.

During this period, the Ghana Revenue Authority (GRA) also intends to conduct a registration and re-registration of taxpayers as part of its efforts to increase the tax base. This exercise will be done in conjunction with the ongoing e-registration of taxpayers. This is not only expected to offer a good opportunity for businesses to reassess and regularise their tax affairs to ensure compliance but also to increase the GRA’s revenue prospects.
**Tax audit process**
The GRA assesses taxpayers on a regular basis. The IRA gives powers to persons authorised by the GRA to gain full and unlimited access to the taxpayers’ premises, records, and electronic information. Industries such as mining, upstream oil and gas, and financial institutions are more likely to be selected for a tax audit. Also, request for a tax refund is also likely to lead to a tax audit. The GRA usually gives notice of its intention to perform a tax audit and, after performance, prepares a report on its findings, which is then shared with the taxpayer.

**Statute of limitations**
The IRA requires all taxable persons (excluding employees) to maintain records of all receipts and payments, revenue and expenditure, and all assets and liabilities of the business for a period of not less than six years. This is in conjunction with the fact that the Statute of Limitation bars actions to recover tax after 12 years. The IRA further requires withholding agents to maintain records of payments made to a payee and tax withheld from those payments for up to five years.

**Topics of focus for tax authorities**
Topics of focus include:

- Tax refunds.
- CST.
- Transfer pricing sensitisation of taxpayers.
- Widening the scope of taxpayers and GRA offices under the self-assessment system.

**Other issues**

**Local content and local participation regulations**
With effect from 20 March 2012, local content and local participation regulations applicable to mining entities were passed into law. The regulations oblige mining contactors and sub-contractors to conform with the requirements for recruitment of expatriates, train Ghanaians, and give preference to local products and services in their operations.

The local content and local participation regulations for petroleum contractors and sub-contractors are still in draft and are yet to be passed into law. Following the recent presidential elections in December 2012, the regulations for petroleum contractors are due to be laid before the new Parliament for approval. These regulations would require petroleum contractors and sub-contractors to carry out research and development (R&D) and make plans for technology transfer of petroleum know-how to Ghanaians.

**Ring fencing for mining entities**
With effect from 9 March 2012, in determining the chargeable income for a basis period, mining companies are no longer able to deduct expenses incurred in one mining area against revenue from another mining area.
**Significant developments**

The European Union (EU) Code of Conduct Group recently completed its review of the Gibraltar Income Tax Act, 2010. With the exception of the non-taxation of interest receivable arising on inter-company transactions, the EU Code of Conduct Group has found the Act to be compliant with EU law in all areas.

As a result of the review, interest received or receivable by a Gibraltar company, arising from an inter-company loan, will be taxable at the corporate rate of taxation, which is currently 10%, as of 1 July 2013.

Where the interest received or receivable is less than 100,000 British pounds (GBP) per annum, it is exempt from any charge to taxation.

**Pending legislation**

Please note this information is current as of 1 June 2013. Typically, pending legislation is announced in June or July. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2013.

**Taxes on corporate income**

Companies are subject to Gibraltar taxation on income accrued in and derived from Gibraltar.

The standard rate of corporate income tax (CIT) is 10%, with utility and energy providers and companies that abuse a dominant position paying a higher rate of 20%.

**Corporate residence**

A company will be considered resident in Gibraltar if the management and control of its business is exercised from Gibraltar.

The location of central management and control will be established under legal principles laid down in the United Kingdom (UK) and is the place of the highest form of control and direction over a company’s affairs, as opposed to decisions on the day-to-day running of the business.

**Permanent establishment (PE)**

Gibraltar has not entered into any double tax treaties (DTTs); consequently, there are no provisions on PE from a general treaty perspective.
Other taxes

Value-added tax (VAT)
There is no VAT in Gibraltar.

Import duties
Goods imported into Gibraltar are subject to import duty at the rate of 0% to 12%. The most noticeable exceptions are fuel, tobacco, alcohol, and motor vehicles.

Excise taxes
There is no provision for excise taxes in Gibraltar.

Property tax
A general business property rate is levied annually on all businesses in Gibraltar. The amount varies depending on the property and is subject to an annual review.

Stamp duty
Stamp duty is payable on the transfer or sale of any Gibraltar real estate or shares in a company owning Gibraltar real estate (on an amount based on the market value of said real estate) at the following rates:

- GBP 200,000 or less: 0%.
- Between GBP 200,001 and GBP 350,000: 2% on the first GBP 250,000 and 5.5% on the balance.
- Over GBP 350,000: 3% on the first GBP 350,000 and 3.5% on the balance.

Stamp duty is also payable on mortgages secured on Gibraltar real estate at the rate of 0.13% for mortgages less than GBP 200,000 and 0.20% for mortgages over GBP 200,000.

Gaming tax
Gaming tax is levied at 1% of the gaming income. The tax paid is subject to a minimum of GBP 85,000 and maximum of GBP 425,000.

Capital duty
Capital duty of GBP 10 is payable on the initial authorisation of share capital or any subsequent increase thereto.

Social insurance contributions
Social insurance contributions are payable by every employer in respect of every employee.

Employer contributions are 20% of gross earnings, subject to a minimum of GBP 15 per week (GBP 65 per month) and a maximum of GBP 32.97 per week (GBP 142.87 per month).

Branch income
The basis for taxation of branches of foreign enterprises is the same as for corporations.

Allowable head office charges or expenses incurred by a Gibraltar branch for the common purpose of the company and its branches, or for the purpose of the head office
Gibraltar

or another branch exclusively, are limited to 5% of turnover of the Gibraltar branch (see Payments to foreign affiliates in the Deductions section).

**Income determination**

Generally, companies are subject to Gibraltar taxation on income accrued in and derived from Gibraltar.

**Inventory valuation**

Inventory is valued at the lower of historical cost or net realisable value. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

**Capital gains**

Capital gains are not subject to tax in Gibraltar.

**Dividend income**

There is no charge to tax on the receipt by a Gibraltar company of dividends from any other company.

**Interest income**

Except in the case of companies with a banking or money lending licence, interest receivable is not taxable in Gibraltar.

For companies where interest is taxable, no tax shall be charged on the net interest receivable from deposits received from related parties to the extent that these funds do not themselves generate interest income from money lending activities to third parties.

The EU Code of Conduct Group recently completed its review of the Gibraltar Income Tax Act, 2010. With the exception of the non-taxation of interest receivable arising on inter-company transactions, the EU Code of Conduct Group has found the Act to be compliant with EU law in all areas.

As a result of the review, interest received or receivable by a Gibraltar company, arising from an inter-company loan, will be taxable at the corporate rate of taxation, which is currently 10%, as of 1 July 2013.

Where the interest received or receivable is less than GBP 100,000 per annum, it is exempt from any charge to taxation.

**Royalty income**

Income from royalties is not taxed in Gibraltar.

**Foreign income**

Foreign income is not normally taxed in Gibraltar.

**Deductions**

For the purpose of ascertaining assessable income, all expenses wholly and exclusively incurred in the production of income shall be deducted.
**Capital allowances**
The first GBP 30,000 of qualifying expenditure on plant and machinery (including fixtures and fittings) and the first GBP 50,000 of qualifying expenditure on computer equipment is fully deductible in the first year as a ‘first year allowance’.

Thereafter, qualifying assets are pooled and are subject to an annual capital, or wear and tear, allowance. Allowances are available for plant and machinery (including fixtures and fittings), computer equipment, and motor vehicles at the rate of 15% (20% for companies that are obligated to pay the higher CIT rate, see the Taxes on corporate income section) and are calculated on a reducing balance basis.

Capital allowances for industrial buildings are deductible at the rate of 4% per annum on a straight-line basis.

**Goodwill**
Amortisation of goodwill is not a deductible expense.

**Start-up expenses**
Expenditure incurred with a view to carrying on a trade is treated as incurred on the first day on which the trade is carried on for the purposes of computing the profits or gains of the trade.

**Interest expenses**
Full deduction is available in respect of interest expenses, subject to anti-avoidance rules (see the Group taxation section for more information).

**Bad debt**
Only specific bad debts or specific bad debt provisions are deductible to the extent that they are respectively estimated to be bad during the said period, notwithstanding that such bad debts were payable prior to the commencement of the period. General doubtful debt provisions are not an allowable expense.

**Charitable contributions**
A charitable donation is not considered as having been wholly and exclusively expended for the purposes of the production of the income of the trade and is therefore not allowable as a deduction for tax purposes.

**Fines and penalties**
Fines and penalties, including those resulting from late payment of taxation or from failure to make the necessary tax submissions, are deemed to be a tax and are therefore not a deductible expense.

**Taxes**
No deduction is allowed for any tax charges under the Income Tax Act.

**Other significant items**
Additionally, no deduction is allowed in respect of the following:

- Domestic or private expenses.
- Expenses not incurred wholly and exclusively in the generation of income.
- Any expenses of a capital nature.
- Any sum recoverable under an insurance contract or contract of indemnity.
- Property expenses not incurred for the purposes of producing income.
- Depreciation of assets (although capital allowances are available, see above).
Gibraltar

- Employee remuneration not accompanied by a certified statement of name, address, and amount of remuneration (in respect of Gibraltar employment only).
- Certain business entertainment expenditure falling within guidelines published by the Commissioner.
- Interest paid to a non-Gibraltar resident that is more than a reasonable commercial rate.

In the case of a company that has income, some of which is chargeable to tax and some of which is not, the deductions allowed shall be apportioned on a pro-rata basis between the chargeable and non-chargeable income.

**Net operating losses**
A trading loss incurred in an accounting period may be offset against trading income arising in the same period or subsequent period, provided that within a period of three years there has not been both a change in the ownership of the company and a major change in the nature or conduct of the trade.

There is no provision for the carrying back of losses.

**Payments to foreign affiliates**
In the case of branches, the amount of general head office expenses incurred that is deductible is limited to 5% of its turnover.

The Income Tax Act 2010 includes anti-avoidance provisions. These provisions state that if the amount charged for goods or services by a connected person is not at ‘arm’s length’, then the expenses that are allowed are subject to a maximum of:

- the expense
- 5% of the gross turnover of the company, or
- 75% of the pre-expenses profit of the company.

**Group taxation**
Companies are assessed on an individual basis, and trading losses of group members may not be offset against profits of other members of the group.

The Income Tax Act contains a generic anti-avoidance clause that allows the Commissioner to disregard an arrangement that the Commissioner believes is fictitious or artificial. In addition, it includes the following specific anti-avoidance measures.

Where a taxpayer seeks to reduce their liability to tax by creating an artificial split between activities in Gibraltar and outside of Gibraltar, the Commissioner shall use anti-avoidance provisions to defeat such an attempt.

**Transfer pricing**
The amount of interest payments to connected persons that are in excess of that payable at arm’s length will be deemed to be a dividend. Where the amount charged for goods and services by connected persons is not at arm’s length, this will be disallowed as a taxable expense. Any expenses allowed will be subject to the lesser of (i) the expense, (ii) 5% of the gross turnover of the company, and (iii) 75% of the pre-expense profit of the company.
**Thin capitalisation**
Interest paid on a loan to related parties that are not companies (or loans where security is provided by related parties) where the ratio of the value of the loan capital to the equity of the company exceeds 5:1 will be considered as dividend payments and thus not deductible for tax purposes. This provision is not applicable to Gibraltar banks or money lenders.

**Back-to-back loans**
Since interest income is not taxable on back-to-back loans, the interest expense is not deductible.

**Dual employment**
Income from dual employment contracts is taxed in Gibraltar if both employers are connected persons.

**Transfer of assets abroad**
Where assets are transferred abroad with the purpose of avoiding tax and the taxpayer has the power to enjoy these assets either now or in the future, then any income or benefits received from these assets will be deemed to be income chargeable to tax.

---

**Tax credits and incentives**

**Development aid**
In order to encourage private development in Gibraltar, promoters and developers of approved projects are offered certain incentives, such as tax relief, import duty relief, and rates relief.

In order to qualify for the above reliefs, the project needs to be a new project that is for the economic benefit of Gibraltar and the aim of which is:

- to create a tangible immovable asset in Gibraltar that will remain in existence after the applicant has ceased to derive the benefits under the licence
- to provide more than two additional units of housing accommodation in Gibraltar
- to contribute materially to the development of the tourism industry in Gibraltar
- to afford any new employment opportunities or career prospects in Gibraltar, or
- to improve materially the economic or financial infrastructure of Gibraltar.

The project needs to be completed within a specified time (dependent on the type of project) following the issue of the licence, and the applicant must not expend less than the prescribed amount for the project.

Applications for development aid must be made to the Minister for Trade.

**Deduction of approved expenditure on premises**
For taxpayers with an interest in a building situated in Gibraltar, an allowance is available for approved expenditure on the painting, decorating, repair, or enhancement of the frontage of that building.

The approved amount will be available as a deduction against the taxpayer’s income. This deduction is in addition to any deduction, relief, or allowance given in accordance with any other provision of the Income Tax Act in respect of the same expenditure.
Gibraltar

The claim for the deduction must be made within two years after the end of the year of assessment with respect to which the deduction is claimed.

**Commercial property rate incentives**
There are early payment discounts available on property rates, depending on the business conducted from the premises.

---

**Withholding taxes**
There are no withholding taxes (WHTs) in Gibraltar, except in the following cases:

- Payments to subcontractors in the construction industry. Unless the subcontractor is in possession of an exemption certificate, tax is withheld at the rate of 25% of the amount that relates to the labour and profit element of the contract.
- Payments to employees under the Pay As You Earn (PAYE) system. Under the PAYE regulations, employers are obligated to deduct an amount of tax in accordance with the employee’s tax code.

---

**Tax administration**

**Taxable period**
The taxable period is the accounting period of the company, which begins on the later of the beginning of the accounting period and the date when the company first receives a source of taxable income and ends on the earlier of the end of the accounting period, 12 months from the beginning of the accounting period, or the date on which trade ceased.

**Tax returns**
Companies with income subject to tax in Gibraltar are required to file a return and calculate their tax liability for the year. The return, together with the estimated liability, needs to be accompanied by payment of the tax due six months after the date of the company's financial year end.

Companies with turnover of less than GBP 500,000 are obligated to file accounts accompanied by an Independent Accountant’s Report together with the tax return within six months of the company’s financial year end.

Companies with turnover of GBP 500,000 or more may submit unaudited accounts together with the tax return but are required to file audited accounts within nine months of the company’s financial year end.

**Payment of tax**
Companies are required to make payments on account of future liabilities on 28 February and 30 September in each calendar year. Each payment should be equal to 50% of the tax based on the previous year’s tax liability.

The balance of tax due (i.e. the actual liability less payments on account) is payable on the date of filing of the return.
Penalties and fines
The following penalties and fines are applicable:

- For the late payment of tax, there is a penalty of 10% of the amount of tax due on the day immediately after such payment was due. If unpaid for 90 days, a further amount of 20% of the tax due is charged; and if still unpaid after this period, then a 10% per annum surcharge will be added, which is compounded on a daily basis until the amount of the tax and penalties are fully paid.
- Failure to file a return by the due date will result in a penalty of GBP 50 with a further penalty of GBP 300 if the return is not submitted within three months after the due date.
- Failure to respond to a notice or request to submit information or documentation will result in a fine of GBP 200 on the day the failure occurs and a penalty of up to GBP 500 per day thereafter. Failure to comply beyond a three month period, if convicted, can result in imprisonment.
- For fraudulently, recklessly, or negligently delivering to the Commissioner an incorrect return, accounts, or information, there is a fine of up to 150% of the difference between the actual tax due and the tax due as per the original declaration. The amount of the penalty will depend on:
  - the amount of the tax lost and/or delayed
  - the gravity of the offence (i.e. if deliberate or an honest mistake), and
  - the level of cooperation in the investigation.
- Failure to pay to the Commissioner PAYE or social insurance that has been withheld or should have been withheld will become a criminal offence leading to imprisonment and/or a fine.
- If an amount of PAYE and/or social insurance exceeding GBP 5,000 is outstanding for over three months, the Commissioner will, after giving 14 days notice, publish in the Gibraltar Gazette the name of the person whom the Commissioner has reason to believe has failed to comply with the PAYE regulations.
- Failure to notify the Commissioner of an arrangement, the main benefit of which is to avoid the payment of tax, will result in a fine of GBP 100 on the day the failure occurs and a penalty of GBP 200 per day thereafter.

Tax audit process
The Gibraltar tax system is based on self assessment. However, the Income Tax Office has powers to make an enquiry into the tax return of a company within a period of 12 months from the date when the return is due to be filed or, if filed later than the deadline, 12 months from the date it was filed. If the Commissioner of Income Tax believes a return to be fraudulent, the above time limits will not apply.

A taxpayer may appeal against a disputed assessment by notice in writing addressed to the Commissioner within 28 days of the date of service of the notice of the assessment.

Statute of limitations
The Commissioner has up to six years following the date of assessment to revise any incorrect assessments. There is no limit where the incorrect assessment is as a result of fraud, wilful default, or neglect.
Significant developments

As of 1 January 2013, the Greek Code of Books and Records is abolished and replaced by the Code of Tax Recording of Transactions, integrating the European Directive 2006/112/EE on Invoicing Regulations.

Various new tax laws (L.4110/2013, L.4111/2013, and L.4141/2013) were recently ratified by the Greek Parliament, introducing significant amendments to the Greek tax legislation.

Below is the summary of the most important changes introduced by the new tax laws:

- The corporate income tax (CIT) rate is increased from 20% to 26%.
- The withholding tax (WHT) rate applicable to dividends and profit distributions or capitalisations is reduced from 25% to 10% (applicable for profits distributed and approved by General Meetings from 1 January 2014 onwards).
- The tax rate applicable to profit distributions (excluding shareholders’ dividends and interest from shares and founders’ shares) made by Societe Anonymes (SAs) to foreign beneficiaries that are legal entities is reduced from 40% to 33%.
- The WHT rate applicable to payments of Board of Director (BoD) members of SAs is increased from 35% to 40% from fiscal year 2014 onwards.
- The WHT rate applicable to interest on bank deposits and bond loans is increased from 10% to 15%.
- The taxation upon transfer of non-listed shares of SAs originally acquired from 1 July 2013 onwards is amended by introducing a tax rate of 20% on the derived capital gains.
- Capital gains derived from the sale of listed shares originally acquired from 1 April 2013 onwards are taxed at a rate of 20%. The 0.2% stock exchange transaction duty is maintained.
- A 20% income tax is imposed on capital gains derived from the transfer of real estate property.
- The provisions concerning the deductibility of expenses from the gross income of enterprises are amended, such as the depreciation rates for fixed assets.
- The double legal framework regulating intra-group transactions (Ministry of Finance - Ministry of Development) is abolished and is only regulated by the respective provisions in the tax legislation.
- The option for entering into an advance pricing arrangement (APA) with the tax authorities is introduced by submitting an application at the General Directorate of Tax Audits and Collection of Public Revenue of the Ministry of Finance.
- The requirement of tax certificate issued by certified auditors is also extended to Greek branches of foreign companies.
- The Greek tonnage tax regime is also extended to vessels flying a foreign flag that are managed by Greek or foreign ship management companies established in Greece.
The application of this new provision enters into force from 1 January 2013 onwards. Additionally, an annual contribution (for fiscal years 2012 through 2015) is imposed on offices or branches of foreign enterprises that have been established in Greece by virtue of Article 25 of L.27/197 and that are engaged in the chartering, insurance, average (damage) settlements, purchase, chartering or shipbuilding brokerage, or chartering of insurance of ships under Greek or foreign flag of total tonnage over 500 shipping tons, as well as the representation of ship owner companies or undertakings whose object is identical to the abovementioned activities.

**Taxes on corporate income**

The CIT rate of legal entities is set at 26%.

Resident corporations are taxed on their worldwide income. Non-resident corporations are taxed in Greece on any Greek-source income they derive. Such tax may take the form of a WHT, depending on the nature of the income, or of permanent establishment (PE) taxation, if the criteria for establishment of a PE in Greece are met.

**Shipping companies**

**Taxation of vessels flying a foreign flag**

The Greek tonnage tax regime is extended to vessels flying foreign flags, which are managed by Greek or foreign companies established in Greece on the basis of L.27/1975. The application of this provision commences from 1 January 2013 onwards.

This tax burdens the ship owners or ship owning companies, while the ship management companies are jointly and severally liable for the payment thereof.

An obligation of the liable parties for submitting before the Ministry of Mercantile Marine an annual statement indicating the name, flag, total tonnage, and age of the vessel under the foreign flag is established.

For calculating the tonnage tax (tax rates and tax brackets, criteria) and the special tax return and payment of tax, the provisions on the tonnage tax payable for Greek flagged vessels apply in analogy. A credit for the tonnage tax paid abroad is provided.

**Annual contribution imposed on foreign ship management companies**

An annual contribution (referring only to fiscal years 2012 through 2015) is imposed on offices or branches of foreign enterprises that have been established in Greece by virtue of Article 25 of L.27/197 and that are engaged in the chartering, insurance, average (damage) settlements, purchase, chartering or shipbuilding brokerage, or chartering of insurance of ships under Greek or foreign flag of total tonnage over 500 shipping tons, as well as the representation of ship owner companies or undertakings, whose object is identical to the abovementioned activities.

Greek and foreign companies of L.27/1975 that are engaged in the management of vessels flying a Greek or foreign flag (that are subject to tonnage tax), as well as in other activities approved by the license of operation, are exempt. Passenger coastal ships or merchant vessels that perform internal routes are exempt.

This contribution is imposed on the total amount of imported foreign exchange, calculated on a minimum 50,000 United States dollars (USD), and is calculated on the following tax scale:
Greece

<table>
<thead>
<tr>
<th>Bracket of annual total foreign exchange (USD)</th>
<th>Tax per bracket Rate (%)</th>
<th>Total foreign exchange (USD)</th>
<th>Total tax (USD)</th>
</tr>
</thead>
<tbody>
<tr>
<td>200,000</td>
<td>5</td>
<td>10,000</td>
<td>200,000</td>
</tr>
<tr>
<td>200,000</td>
<td>4</td>
<td>8,000</td>
<td>400,000</td>
</tr>
<tr>
<td>Excess amount</td>
<td>3</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

A special tax return for calculating the contribution on the basis of the imported foreign exchange of the previous year should be filed within March of each year. Upon filing of said tax return, one-quarter of the annual contribution is payable. The remaining contribution is paid in three instalments (June, September, and December).

The distribution of profits by a foreign ship owning company maintaining an office or branch in Greece by virtue of Article 25 of L.27/1975 that is exclusively engaged in the chartering, insurance, brokerage, etc. of vessels to Greek individual tax residents is subject to tax at a rate of 10%.

This tax applies to dividends paid or credited from accounting period 2012 (fiscal year 2013) onwards and shall be rendered to the Greek State by the beneficiary of the dividend.

The 10% tax also applies to cases of distributions of profits by the abovementioned companies in the form of extraordinary fees and percentages (bonus) to BoD members, directors, and officials, in addition to the regular remuneration, exhausting the tax liability of the beneficiaries for said income.

**Local/state/provincial tax rates**

No local taxes on income are paid at a local level. However, it should be noted that the aforementioned rates are reduced by 40% for profits of companies derived from activities carried out on islands with less than 3,100 inhabitants.

**Corporate residence**

Corporate residence is determined primarily by place of incorporation. However, based on the effective management criterion under the corporate law rules, the place of legal seat could be relevant.

**Permanent establishment (PE)**

Subject to related tax treaty provisions, foreign corporations are subject to Greek taxation if they maintain a PE in the country. Such PE may arise in cases of foreign companies maintaining inventories from which orders are filled; maintaining offices, warehouses, factories, etc.; carrying out any other operations for the purposes of exploiting natural resources; processing raw materials or agricultural products in their own factories or through third parties; or providing services of a technical or scientific nature (surveys, designs, or research).

Note that the local definition of a PE is generally broader than the standard Organisation for Economic Co-operation and Development (OECD) definition; however, where a double tax treaty (DTT) applies, its provision will override the domestic definition.
Other taxes

Value-added tax (VAT)
The standard VAT rate is 23%. The reduced rate on basic necessities is 13%. A super reduced rate of 6.5% for accommodation in hotels or similar establishments (including holiday accommodation and letting of places in camping or caravan sites), medicines of CN3003 and 3004, and vaccines of CN3002 intended for human consumption is applicable. The aforementioned rate is also applicable for children’s books, colouring, and drawing books.

Supplies of goods and services to individuals and legal entities subject to VAT and established in European Union (EU) countries (intra-Community supplies) are exempt from VAT (zero rated). Exports of goods and certain services to non-EU countries are also exempt (zero rated).

With the following exceptions, real estate leases are generally exempt from VAT. Lease contracts for shopping centres and logistics centres may also be subject to VAT on condition that the taxable person opts for the submission to taxation of the leasing right.

Recently, the right to elect to subject leases of property used for the exercise of professional activities, either independently or as part of mixed contracts, to VAT has been introduced.

Customs duties
Many goods imported into Greece from outside the European Union are subject to customs duties. The rates of duty are provided by the EU’s Common Customs Tariff.

Excise taxes
Excise taxes are imposed on energy and electricity products (e.g. petrol, natural gas, electricity), manufactured tobacco, and alcoholic products. The tax rates vary depending on the category of products.

Real estate tax
An annual real estate tax is imposed on real estate located in Greece, which is owned on 1 January of the tax year by individuals or legal entities, regardless of nationality or residence.

The applicable tax rate for legal entities amounts to 0.6%, 0.3%, or 0.1% depending on their profit or non-profit making character and the use of the properties. The tax rate remains reduced at 0.33% for real estate owned by hotel enterprises and used for their business activities.

An exemption from real estate tax is provided for buildings built within three years from the issuance of the initial building permit, unless these have been leased or in any other way used.

Extraordinary special duty on built surfaces supplied with electricity (special duty on real estate)
An extraordinary special duty, in favour of the Greek state, is imposed on commercial or residential real estate property to which electricity is supplied and which, on the 17th day of September of every year, will fall within the ambit of the real estate duty (in favour of Local Administration). Subject to said special duty is the legal owner or the beneficial owner of the real estate property, whereas the payment liability will be borne
by the tenant of the property. In the event that such person is a lessee (i.e. tenant for consideration), that individual can offset payment of the special duty against future or owed leases.

The determination of the payable duty will be calculated as follows: the square metre built surface of the property (as identified by the relevant electricity bills in the context of determining the real estate duty for Local Administration) will be multiplied by the applicable rate of the area where said property is located (designated value zones) and further multiplied by the surcharge rate (deriving from the building age).

Various exceptions from said special duty are provided, in particular, communal areas of apartment blocks and buildings that have been designated as preserved structures.

The special duty on real estate will be collected by the Public Electricity Company (DEH) or alternative suppliers of electricity through the utility bills for electricity sent to consumers or assessed by the competent tax office.

For 2013, an extraordinary special duty for real estate will apply.

**Special real estate tax**
A special real estate tax of 15% is applicable on legal entities owning real estate property in Greece on the objective value of such property. This tax is mainly directed against property held, directly or indirectly, by offshore companies for the purpose of tax avoidance of transfer and inheritance taxes by the real owners. In this context, exemptions apply to listed companies, companies with registered shares up to the individual shareholder (provided such shareholder holds a tax registration number in Greece), companies for which the income derived from the real estate property does not exceed the income from other activities, EU banks, insurance companies, investment funds, etc, on the condition, however, that these are not established in non-cooperatives states (see the Deductions section for more information on non-cooperative states).

**Real estate transfer tax**
Each transfer of real estate, which is not subject to VAT, is subject to real estate transfer tax. The tax rates of the real estate transfer tax amount to 8% for the value up to 20,000 euros (EUR) and 10% for the exceeding value of the real estate.

Exemptions from real estate transfer tax for the acquisition of primary residences are determined according to the value of the property.

**Stamp taxes**
Rentals of non-residential properties are subject to 3.6% stamp duty (with the exception of shopping centres and logistics centres subject to VAT).

In general, loans and interest may be subject to a 2.4% stamp duty. However, there are a number of exemptions, the main one covering bank loans and bond issues.

Other stamp duties may apply, in certain limited cases.

**Contribution tax on capital accumulation**
A 1% tax contribution is imposed on capital accumulation by:

- business companies and joint ventures
- associations of all degrees and any other form of company, legal entity, or union of persons or society aiming to make profits, and
branches of foreign companies (unless of EU origin).

For SA companies, an additional 0.1% duty is payable on capital to the competition committee.

**Branch income**

Profits of branches of foreign companies are subject to CIT at a rate of 26%.

Note that the equivalent of a dividend WHT is also imposed on profit repatriations from the branch to its head office or other foreign branches of the legal entity.

**Income determination**

**Inventory valuation**

Inventories are stated at the lower of cost or market (replacement value). The Greek tax system recognises various valuation methods such as first in first out (FIFO), last in first out (LIFO), weighted average, etc.

**Capital gains**

In general, capital gains are included in the taxable profits of Greek companies. Certain special rules apply in the case of sales of shares in listed or non-listed entities.

**Capital gains tax on sale of listed shares**

The sale of listed shares that were originally acquired up to 30 June 2013, and irrespective of the time of sale of those shares, is subject to a transaction duty at a rate of 0.2%. The capital gains derived from the sale of such listed shares shall be exempt from CIT, on the condition that the capital gain is booked in a special tax-free reserve.

Capital gains derived from the sale of listed shares originally acquired from 1 July 2013 onwards are taxed at a rate of 20%. Said WHT exhausts the tax liability of individuals. In the case of legal entity beneficiaries, however, said income is further taxed according to the general provisions, a credit being provided for the tax already withheld. The 0.2% stock exchange transaction duty is imposed, even after the introduction of the capital gains tax.

**Transfer tax on sale of non-listed shares**

The sale of Greek shares non-listed on the Stock Exchange originally acquired up to 30 June 2013 triggers a 5% tax calculated on the transfer value as either agreed by the parties or determined on the basis of a ‘minimum-value’ formula set forth by law, whichever is the higher. The aforementioned 5% tax is also due in the case of transfer of foreign non-listed shares by a Greek tax resident, calculated on the consideration agreed. In the case where the seller is a Greek corporation, the payment of the 5% tax does not exhaust the transferor’s tax liability. Any capital gains arising thereof are further subject to tax at the standard CIT rate (i.e. they are included in the taxable profits of the company). It should be noted that the 5% tax paid at the time of the transfer may, under certain conditions, be provided as a credit against the company’s annual corporate liability.

However, for non-listed shares originally acquired from 1 July 2013 onwards, the method of taxing the transfer of SA shares not listed on the Stock Exchange is amended by introducing a capital gains tax of 20%. For the calculation of said capital gain,
the acquisition cost is deducted from the minimum value of the shares at the time of transfer, which is calculated according to the formula of art.13 par.2 of L.2238/1994. The resulting value is compared to the consideration agreed, and the acquisition cost is deducted from the higher amount in order to determine the capital gain taxed at source.

The capital gains tax exhausts the tax liability of individuals. In the case of legal entities, however, the capital gains shall be further taxed according to the general provisions, a credit being provided for the 20% capital gains tax paid at the time of the transfer.

Moreover, gains arising from the sale of parts of limited liability companies (LLCs) are subject to a 20% tax rate. In cases where the seller is a Greek entity, the tax liability is not exhausted and the respective capital gain is taxed according to the general tax provisions with the 20% tax being credited against the final CIT liability.

**Dividend income**

Profits distributed from Greek companies are not included in the taxable profits of their shareholders.

A participation exemption is applicable also on dividends received by Greek SAs and LLCs from subsidiaries that have their registered seat in another EU member state, in which they participate, on the condition that these profits are booked in an untaxed reserve account, even if the profits of the parent company do not suffice for the creation of a reserve.

In case of further distribution of the reserve created by dividends received from foreign subsidiaries, both the underlying CIT and dividend WHT that may have been paid by the foreign subsidiary are credited against the Greek dividend WHT.

Other foreign dividends are included in taxable profits, but a foreign tax credit may be obtained under certain conditions.

**Stock dividends**

Stock dividends are treated as cash dividends for CIT purposes.

**Interest income**

Interest income is generally taxable. There are certain special rules that govern the receipt of interest income from bonds by banks and insurance companies.

**Partnership income**

Both general partnerships (Omorrythmi Etairia or OE) and limited partnerships (Eterrorythmi Etairia or EE) are not tax transparent. They are generally taxed according to a progressive income tax scale with two income brackets, taxable at a rate of 26% for income up to EUR 50,000 and 33% for any exceeding amount, provided that single entry accounting books are kept. In cases where double entry accounting books are kept, partnerships are taxed at the CIT rate of 26%.

**Rents/royalties income**

Income derived from rents and royalties is taxed as ordinary income.

**Foreign income**

Resident corporations are taxed on their worldwide income. Foreign income received by a domestic corporation is taxed together with other income. If related income tax is paid or withheld abroad, a tax credit is generally available up to the amount of
the applicable Greek income tax. Losses incurred abroad can only be offset against foreign profits.

There are no special anti-deferral regimes or controlled foreign company (CFC) rules in Greece.

**Deductions**

**Depreciation**

Mandatory depreciation on a fixed basis (and not on a reducing-balance method basis, as per the company’s choice) is now applicable by using fixed depreciation rates stipulated in the law. The new rates apply from 1 January 2013 onwards; however, certain transitional provisions apply for companies having elected the reducing-balance method in the past.

More specifically, the new depreciation rates per fixed asset and business sector, according to the NACErev2 classification, are as follows:

<table>
<thead>
<tr>
<th>Sectors</th>

</tbody>
</table>

The maximum acquisition cost of fixed assets that may be depreciated in total within the accounting period in which they were used or put into operation is EUR 1,500.
An incentive for investment is provided for enterprises in the research and development (R&D) sector by recognising the amount of realised expenses, increased by a percentage of 30%, as a deductible expense.

**Goodwill**
There are some court cases that support the deductibility of goodwill as a start-up expense, but the specifics of each case must be carefully considered.

**Organisational and start-up expenses**
The amount of start-up expenses (including costs for acquisition of real estate) is amortised, either as a lump sum during the year of its realisation or in equivalent instalments within a five year period. Specifically, expenses realised by financial leasing companies in relation to the acquisition of real estate, which will constitute the object of an agreement of the same law, may be depreciated in equivalent amounts, in analogy to the years of duration of the agreement.

**Interest expenses**
Accrued interest from loans or credits of a company is generally deductible, with the exception of interest on arrears due to the debt of taxes, duties, contributions, and fees to the state and other legal entities governed by public law; interest on loans for the purchase of shares in any type of company, to the extent that this participation is transferred within a two-year period; interest on loans used for the purchase of shares in a legal entity established in non-cooperating states or states with a preferential tax regime; and interest paid to companies established in such states.

**Bad debt**
Tax-deductible bad debt provisions are calculated at 0.5% on the stated value of invoices for sale of goods or provision of services, after a reduction for discounts, to the state or other entities governed by public law and the special consumption tax imposed in certain cases. Special restrictions and rules apply to certain transactions, while there is a recapture system for provisions that are not realised.

**Charitable contributions**
Donations and sponsorships paid to charitable institutions, non-profit making foundations, churches and monasteries, and various other welfare institutions may be deductible at up to 10% of the total net profits or income arising from the balance sheet of the legal entity.

**Pension expenses**
Group life insurance premiums, which include pension plans, may be deducted at up to EUR 1,500 per employee.

Insurance contributions paid to primary insurance and occupational funds that have been established by law and refer to legal entities’ partners and/or directors are explicitly recognised as tax deductible.

**Payment for directors**
Fees of board members are taxed at source at a rate of 40%. Such amounts are tax-deductible.

Bonuses (benefits in cash, on top of regular remunerations and overtime payments) paid to executives of credit institutions up to financial year 2014 are subject to special increased taxation. Taxation is based on the general progressive tax scale applicable to individuals, provided the total annual income of the executive does not exceed EUR
60,000 and the amount of the bonus does not exceed 10% of the total annual regular remuneration. For amounts exceeding the outlined limitations, taxation at source based on a progressive tax scale is provided as follows:

- Up to EUR 20,000: 50%.
- EUR 20,001 to EUR 40,000: 60%.
- EUR 40,001 to EUR 60,000: 70%.
- EUR 60,001 to EUR 80,000: 80%.

**Fines and penalties**
Fees received from activities constituting a criminal offence, from penal clauses, fines, and penalties are not recognised as deductible expenses.

**Taxes**
Taxes, other than income tax and real estate tax, are recognised as deductible expenses if supported by related tax returns and payment receipts and borne by the company.

**Other significant items**
In general, expenses are deductible, subject to certain conditions. The following is a list of certain key conditions or restrictions on expense deductibility:

- The deductibility of hotel expenses, expenses for corporate gifts, education of personnel, special clothing of personnel, and mobile telephone expenses are subject to specific conditions.
- Payroll expenses are not deductible when they are not paid through professional bank accounts or cheques paid through the same accounts.
- The value of raw and ancillary materials and other goods (plus processing thereon), which is paid to a legal entity whose role consists exclusively of the invoicing of the transactions, while the delivery of goods or provision of services is conducted by a third party, is not deducted from the gross profits of companies.
- Car expenses are generally deductible at up to 70% for motor vehicles up to 1,600 cc and 35% for motor vehicles exceeding 1,600 cc.
- Expenses concerning transactions realised between Greek companies and entities established in preferential tax regimes may be deductible for Greek companies, on the condition that satisfactory evidence is provided that the transactions are real, usual, and do not result in the transfer of profits, income, or capital for the purpose of tax evasion or tax avoidance.

Accrued expenses are, in principle, non-deductible until they become final and settled, supported by respective invoices.

**Net operating and capital losses**
Losses can be carried forward five years. Carrybacks are not permitted.

**Payments to foreign affiliates**
Royalties, interest, and service fees paid to foreign affiliates are deductible expenses under certain requirements and conditions.

**Special restrictions on transactions with non-cooperative states and states with preferential tax treatment**
Greek tax law has established rules in relation to non-cooperating states and states with preferential tax treatment.
Non-cooperating states are defined as states that are not EU member states and have not concluded agreements of administrative assistance in the tax sector with Greece or with, at least, 12 other states. Non-cooperative states are enumerated in a Ministerial Decision to be issued annually.

Pursuant to the Ministerial Decision for 2013, the non-cooperating states for 2013 are specified as follows:

- Andorra
- Anguilla
- Antigua & Barbuda
- Aruba
- the Bahamas
- Bahrain
- Barbados
- Bermuda
- Belize
- British Virgin Islands
- Brunei
- Cayman Islands
- the Cook Islands
- Costa Rica
- Dominica
- former Yugoslav Republic of Macedonia (FYROM)
- Gibraltar
- Grenada
- Guatemala
- Guernsey
- Hong Kong
- Isle of Man
- Jersey
- Lebanon
- Liberia
- Liechtenstein
- Malaysia
- Marshall Islands
- Mauritius
- Monaco
- Montserrat
- Nauru
- Netherland Antilles
- Niue
- Panama
- Philippines
- St. Lucia
- St. Kitts and Nevis
- St. Vincent and the Grenadines
- Samoa
- Seychelles
- Singapore
- Turks and Caicos
- Uruguay
- US Virgin Islands
- Vanuatu

An individual or legal entity, irrespective of its legal form, is considered located in a preferential tax regime, even if its residence of registered office is located in an EU member state, in cases where it is not subject to taxation in this state or is de facto not subject to taxation, or is subject to tax on income or capital at an amount that is lower than 60% of the tax that would have been due, in accordance with Greek tax legislation, if such entity were resident or were maintaining a PE in Greece.

Expenses concerning transactions realised between Greek companies and entities established in non-cooperative states or preferential tax regimes may be deductible for Greek companies, on the condition, however, that satisfactory evidence is provided that transactions are real and usual and do not have, as a result, the transfer of profits or income or capital with the purpose of tax evasion or tax avoidance.

**Group taxation**

Group taxation is not permitted in Greece.

**Transfer pricing**

The parallel legislative framework for transfer pricing (Ministry of Finance - Ministry of Development) is abolished (transitional provisions apply).

Under the new regime, affiliated entities are obligated to document the prices of their intra-group transactions. An exemption from the documentation obligation is provided for liable companies for their transactions with one or more affiliated enterprises, the value of which does not exceed the amount of EUR 100,000 (or EUR 200,000 in total), on the condition that the gross profits of the accounting period for all affiliated enterprises does not exceed EUR 5 million.
Greek affiliated enterprises (as well as branches of foreign enterprises) must keep a transfer pricing documentation file for their intra-group transactions.

The time for drafting the transfer pricing documentation file before the General Secretariat of Informative Systems is prior to the issuance of the tax certificate, and, in any case, within 50 days from the end of the accounting period (for balance sheets closing after the 30 December 2012). The file is accompanied by a summarised table of transfer pricing information, which is submitted electronically at the General Secretariat of Informative Systems by the same deadline as is applicable for the drafting of the documentation file. Exceptionally for the accounting period 2012, the documentation file should have been drafted and the respective summarised table of transfer pricing information should have been submitted by 10 May 2013.

The transfer pricing documentation file should be kept at the company until the lapse of the prescription period for the state’s right to impose taxes, as well as for the time that the case is pending before the courts. In case of an ordinary tax audit (performed by the Tax Office of Large Enterprises by taking into account the OECD Transfer Pricing Guidelines on multinational enterprises), the transfer pricing file should be submitted before the competent audit authority within a reasonable time, not exceeding 30 days.

The transfer pricing documentation file should be updated in case of a change in the market conditions influencing the data included in the file.

For cases considered as not documented (i.e. non-keeping or non-submission of the transfer pricing documentation file before the competent audit authority; keeping of an insufficient or inaccurate transfer pricing documentation file, provided that the relevant audit checks for the accuracy of calculating or documenting prices of intra-group transactions cannot be performed and cannot be remedied by additional information provided to the audit authorities; non-providing or providing of insufficient or inaccurate additional information, to the extent that the relevant audit checks of prices of intra-group transactions cannot be performed), the relevant prices shall be determined by the competent audit authorities on the basis of data available from every source.

An Advance Pricing Approval (APA) of the methodology of specific future intra-group transactions may be obtained, following an application submitted before the General Directorate of Tax Audits and Collection of Public Revenue of the Ministry of Finance.

The APA will be valid for two years, providing the option of its renewal, review, revocation, or cancellation under certain circumstances. The documentation data concerning the APA should be kept for the whole duration of maintaining the respective transfer pricing file.

In case of granting an APA decision, the tax audit is limited to the verification of the terms of the decision as well as the equal application of important assumptions.

An independent fine is imposed in case of non-submission or delayed submission of the summarised table of transfer pricing information table, which is calculated at a percentage of 1/1000 of the declared gross profits of the enterprise and cannot fall below EUR 1,000 or exceed EUR 10,000 in case of a delayed filing and cannot fall below EUR 10,000 or exceed EUR 100,000 in case of non-filing of a summarised table of transfer pricing information, as well as non-provision of the transfer pricing file.
Greece

The imposition of an independent fine (1/1000 on the gross profits, that cannot fall below EUR 1,000 or exceed EUR 10,000) due to the delayed submission of the intra-group transaction list has also been introduced.

**Thin capitalisation**
According to the relevant thin capitalisation rules, accrued interest on loans paid to affiliated companies is deductible on the condition that the debt to equity ratio is 3:1.

There are certain exceptions from the application of the thin capitalisation rules, applicable to banks, factoring companies, leasing companies, investment service companies, and securitisation special purpose vehicles (SPVs). Loans assumed by third companies, and for which any kind of guarantee has been issued by the aforementioned connected companies, are added to the total amount of loans undertaken by the connected companies.

**Controlled foreign companies (CFCs)**
There are currently no CFC rules in Greece.

---

**Tax credits and incentives**

**Foreign tax credit**
Tax paid abroad for income taxable in Greece is credited but is limited to the amount of Greek tax due.

**Incentives for the maintenance of workplaces**
Legal entities that suffer a reduction of turnover for two consecutive accounting periods without reducing their workforce can enjoy a reduction of the tax rate by three percentage units. However, a revocation of the granted benefit and imposition of further tax in case of reduction of personnel or increase of the turnover within the three-year period is provided.

**Other tax incentives**
Apart from the aforementioned tax incentives, L. 3908/2011 on ‘Bolstering of Private Investments for Economic Growth, Entrepreneurship and Regional Sustainability’ (the new Investment Incentive Law) includes the following tax incentives:

- Any investment plan in any sector of the economy may receive benefits under the law. Only certain cases explicitly specified in the law are exempt (e.g. power generation from photovoltaic arrays).
- The types of subsidised expenditures for tangible and intangible assets are indicatively mentioned, whereas the expenses that may not be subsidised are exhaustively enumerated. Especially the subsidy percentage for the expenditure of intangible assets may not exceed 50% of the total eligible expenditure of the investment plan.
- The term of ‘new’ enterprises is specifically defined for the new law’s purposes. An enterprise is considered as ‘new’, if the establishment procedures have not been completed before the enterprise applies for aid according to the new law or if it has been established within the past 24 months prior to filing the application.
- There are three types of aid: (i) tax exemption, (ii) subsidy, and (iii) leasing subsidy.
- The new law lists three categories of General Investment Plans and specifies the type of aid for each of them: (i) General Entrepreneurship which only the tax exemption may be granted for, whereas for the (ii) Technological Development and the (iii) Regional Sustainability investment plan, the subsidy and/or the leasing subsidy
may be granted in principle, with different percentages for the existing and the new enterprises. The remaining percentage may be covered by tax exemption.

- The law also lists four categories of Special Investment Plans: (i) Youth Entrepreneurship, (ii) Major Investment Plans, (iii) Integrated Long-Term Investment Plans, and (iv) Synergy and Networking. The aids granted are further specified by type, volume, and/or percentage for each of them.

- The percentages of aid available are specified in conjunction with the division of the country into three zones (A, B, and C) and are the following:

<table>
<thead>
<tr>
<th>Zones</th>
<th>Large enterprises</th>
<th>Medium-sized enterprises</th>
<th>Small and micro enterprises</th>
</tr>
</thead>
<tbody>
<tr>
<td>ZONE A (Prefecture of Attica, Prefecture of Viotia)</td>
<td>15</td>
<td>20</td>
<td>25</td>
</tr>
<tr>
<td>ZONE B (Prefectures with GDP per capita &gt; 75% of the average GDP of the country)</td>
<td>30</td>
<td>35</td>
<td>40</td>
</tr>
<tr>
<td>ZONE C (Prefectures with GDP per capita &lt; 75% of the average GDP of the country)</td>
<td>40</td>
<td>45</td>
<td>50</td>
</tr>
</tbody>
</table>

In any case, the above percentages should comply with the ceiling set by the Regional State Aid Map (RSAM) approved by the European Commission.
