Quick access to information about corporate tax systems in 155 countries worldwide.

Africa
Welcome to the 2016/17 edition of Worldwide Tax Summaries (WWTS), one of the most comprehensive tax guides available. This year’s edition provides detailed information on corporate tax rates and rules in 155 countries worldwide.

As governments across the globe are looking for greater transparency and with the increase of cross-border activities, tax professionals often need access to the current tax rates and other major tax law features in a wide range of countries. The country summaries, written by our local PwC tax specialists, include recent changes in tax legislation as well as key information about income taxes, residency, income determination, deductions, group taxation, credits and incentives, withholding taxes, indirect taxes, and tax administration. All information in this book, unless otherwise stated, is up to date as of 1 June 2016.

If you have any questions, or need more detailed advice on any aspect of tax, please get in touch with us. The PwC tax network has member firms throughout the world, and our specialist networks can provide both domestic and cross-border perspectives on today’s critical tax challenges. A list of some of our key network and industry specialists is located at the back of this book.

I hope Worldwide Tax Summaries continues to be a valuable reference tool in helping you manage your organisation’s taxes around the world.

**Taxes on corporate income**

Corporate entities are taxed on activities performed in Algeria via the following two regimes:

**Standard tax regime**

The standard tax regime is applicable for all tax resident companies, which are taxed in Algeria on their worldwide income. The standard tax regime includes the following taxes:

- IBS at the rate of:
  - 19% for manufacturing activities.
  - 23% for building activities, public works, and hydraulics, as well as tourist and thermal activities, excluding travel agencies.
  - 26% for all other activities not mentioned above.

For mixed activities, companies should keep management accounts to determine the portion of each activity performed. Failing this, the highest rate (i.e. 26%) will be applicable for the whole taxable profits.

Nil corporate annual tax returns include the payment of a minimum corporate tax amounting to 10,000 Algerian dinars (DZD).

- Tax on business activity (TAP) at the rate of 1% for manufacturing activities, without any reduction. However, this tax is fixed at 2% for all other activities, with a reduction of 25% for some activities and locations, and computed based on the invoiced turnover.
- Value-added tax (VAT) at the rate of 17% or 7% (except any specific exemption). See VAT in the Other taxes section for more information.
- Branch tax set at the rate of 15% calculated on net profits after IBS. See the Branch income section for more information.
**Withholding tax (WHT) regime**
Non-resident entities performing service contracts in Algeria are subject to the WHT regime. The 24% WHT, which encompasses the IBS, the TAP, and the VAT, is required to be levied on services only. The calculation base is the gross amount of the services invoiced.

**Local income taxes**
There are no local or provincial taxes on income in Algeria. The TAP is being distributed for each district/location where there is a principal or secondary establishment.

**Corporate residence**
According to the provisions of Article 137 of the Algerian Tax Code, a company is considered as an Algerian tax resident entity in cases where it is incorporated under the Algerian law and is realising (i) commercial, industrial, or agricultural activities (physical presence obligation) or (ii) taxable profits through dependent agents. However, please note the existence of the permanent establishment (PE) concept, which can also refer to permanent place of business.

**Permanent establishment (PE)**
The Algerian legislation introduces the PE concept in Article 137 of the Algerian Tax Code, relating to territoriality rules of IBS. This Article provides that IBS is due in Algeria on:

- Profits made by companies, which, without owning in Algeria an establishment or designated representatives, directly or indirectly perform an activity in Algeria resulting in a complete cycle of commercial operations.
- Profits made by companies using the assistance of representatives in Algeria that don’t have a separate professional personality from these companies.

Based on the above, a PE is created under Algerian law if a professional activity is performed in Algeria by a foreign entity and this activity is generating a complete business cycle, or in the case whereby a foreign company is making profits in Algeria through a dependent agent.

In the absence of a double tax treaty (DTT), the basic principle that governs taxation of non-resident entities is that such entities are taxable in Algeria on their Algerian-source income whatever the way and wherever the location the work is carried out, provided only that the same are rendered or used in Algeria.

As a consequence, an entity will be liable for IBS in Algeria through the execution of a related contract (services contract) to be performed in Algeria. From an Algerian point of view, such a contract is not an investment and is, by nature, temporary. Note that it is possible to execute several contracts under the same PE.

In the presence of a DTT, a foreign company will be taxed in Algeria if it has a PE only.

**Other taxes**

**Value-added tax (VAT)**
VAT is applied on the supply of goods or services in Algeria. It includes all economic activities conducted in Algeria. The zero rate is also applied to all exports and sales to exempted sectors under specific regimes. The standard VAT rate is 17%. The reduced rate is 7%, applying to various basic items listed by law.

Monthly VAT returns and payments are due by the 20th day of the following month.
Algeria

**Customs duties**
Algerian imports are subject to payment of customs duties in the following increments: duty-free, 5%, 15%, or 30%.

Specific customs exemptions and temporary admission regimes are granted to the oil and gas sector and to investments under the incentives tax regime of the National Agency of Investment (ANDI in French).

**Excise taxes**
All tobacco products are subject to excise tax.

**Property taxes**
An annual property tax is levied on real estates in Algeria. Rates depend on the location of real estate.

**Wealth tax**
The supplementary Finance Act for 2015 introduced a wealth tax, calculated as follows:

<table>
<thead>
<tr>
<th>Value of the holdings (DZD)</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 100,000,000</td>
<td>0</td>
</tr>
<tr>
<td>100,000,001 to 150,000,000</td>
<td>0.50</td>
</tr>
<tr>
<td>150,000,001 to 250,000,000</td>
<td>0.75</td>
</tr>
<tr>
<td>250,000,001 to 350,000,000</td>
<td>1.00</td>
</tr>
<tr>
<td>350,000,001 to 450,000,000</td>
<td>1.25</td>
</tr>
<tr>
<td>More than 450,000,000</td>
<td>1.75</td>
</tr>
</tbody>
</table>

**Transfer taxes**
A transfer tax is applicable to land, buildings, and ongoing business at a rate of 5% for registration fees, plus 1% tax applicable for publication formalities of land and building transfer of ownership. Additionally, registration duties are due on the transfer of shares or movable assets and on the merger, demerger, increase, or decrease of the share capital of existing companies.

**Stamp taxes**
Stamp duty is levied at varying rates on transactions, including the execution of various documents and deeds.

**Bank domiciliation tax**
A 3% tax (Taxe de domiciliation bancaire) applies on the importation of services. Fixed fees are applicable for the importation of goods (DZD 10,000 per shipment).

**Pollution tax**
Assets that may cause environmental damage are subject to a pollution tax.

**Payroll taxes**
Personal income tax (PIT) is withheld on salary and assimilated income (minus employee social security contributions) by applying the progressive scale rates (with a maximum rate of 35%). Additionally, training tax and apprenticeship tax are each levied at the rate of 1% of the payroll cost.

**Social security contributions**
Social security contributions are levied at the rate of 35% on the gross salary (26% borne by the employer and 9% borne by the employee).
Branch tax is levied at the rate of 15%. Note that, since 2010, it is no longer possible to register a legal branch in Algeria. However, under certain conditions, a foreign company could operate in Algeria by registering its contract with the local tax authorities by registering a tax branch/PE. Under this scenario, a 15% tax rate applies on the deemed distribution of profits after tax, which may be reduced or removed by the applicable DTT provisions.

Income determination
Taxable income is determined using the accounting profits and adding back non-deductible expenses and deducting the allowable non-taxable incomes.

Inventory valuation
The inventory valuation method for tax purposes must match the accounting method as defined by the Algerian Financial Standards (SCF).

Capital gains
Capital gains realised on the sale of assets are taxed as ordinary income when realised by a company subject to IBS. For certain assets, 30% relief is given where the assets have been held for up to three years, and 65% relief is given where the movable assets have been held longer. Capital gains on the disposal of assets can be exempted if the company commits to re-invest them within a three-year period.

Dividend income
Dividends to non-resident shareholders are subject to WHT at source of 15%. For resident shareholders, dividends are subject to WHT at source of 10%. If the dividends are received by a parent entity resident in Algeria, they are not included in the taxable profits for IBS purposes.

Interest income
Interests paid are subject to 10% WHT and are included in the income of the beneficiary and subject to IBS if the beneficiary is a legal entity. Interests paid to a non-resident are generally subject to a 10% WHT. The rate may be reduced under an applicable DTT.

Rental income
Rental income is subject to IBS when received by a taxable corporate entity in Algeria. Rental income paid to non-residents is subject to 24% WHT, except for international lease agreements, where a reduction of 60% on the taxable basis is applicable, making the effective tax rate 9.60%.

Royalty income
Subject to DTT provisions, royalties are subject to 24% WHT. A reduction of 80% on the taxable basis is applicable for software, making the effective tax rate 4.80%. This rate could change in presence of a DTT.

Unrealised gains/losses
Realised gains and losses are subject to IBS. However, unrealised gains and losses are not subject to IBS. There are specific provisions relating to the free re-evaluation of assets.

Foreign currency exchange gains/losses
Foreign realised currency exchange gains/losses are subject to IBS.
Algeria

Foreign income
Subject to DTT provisions, income from other countries is liable to IBS in Algeria, except exportation revenues and revenues realised in hard currency by resident legal entities, which are exempted.

Deductions

Depreciation and amortisation
The depreciation rates are determined according to tax administration instructions and common usage, for example:

- The depreciation rate for office items is 10% or 20%.
- The depreciation rate for industrial buildings is 5%.
- The depreciation rate for cars is 20% or 25%. The depreciation base for cars is limited to DZD 1 million.

Accelerated depreciation rates, when justified, can be used, depending on the activity sector and the economic use of the assets.

Goodwill
Under the SCF, goodwill is registered in the local books as a non-current/intangible asset of the balance sheet and cannot be amortised. Consequently, the accounting of goodwill has no fiscal impact for companies.

Start-up expenses
Start-up expenses are deductible when paid and can be capitalised and depreciated.

Interest expenses
Interest expenses are deductible when paid.

Bad debt
A bad debt provision becomes deductible when legal action has been taken to recover the debt or when evidence is provided that the receivable has become irrecoverable.

Charitable contributions
Charitable contributions are deductible, up to a limit of DZD 1 million.

Pension expenses
Pension expenses are deductible when paid.

Payments to directors
Payments to directors are deductible.

Research and development (R&D) expenses
R&D expenses are fully deductible when paid by the entity bearing the expenses and when justified. Revenues derived from R&D activities are exempted from IBS, up to a limit of 10% of the taxable benefit or DZD 100 million. The exempted amount has to be reinvested in R&D activities.

Bribes, kickbacks, and illegal payments
Bribes, kickbacks, and illegal payments are non-deductible from the IBS basis.

Fines and penalties
Fines and penalties are non-deductible from the IBS basis.

Taxes
Taxes duly paid are deductible, except for the IBS itself, which is not deductible.
**Net operating losses**
Carryforward losses are permitted until the fourth fiscal year following the year of loss. Carryback losses are not permitted.

**Payments to foreign affiliates**
Payments to foreign affiliates are deductible.

---

**Group taxation**
When an Algerian company holds 90% or more of the shares of one or more Algerian companies, the group may choose to be taxed as a single entity. Hence, IBS is payable only by the parent company. Under this system, the profits and losses of all controlled subsidiaries in Algeria are consolidated. The consolidated group may also benefit from other tax advantages, such as exemption from VAT and TAP on the inter-group transactions.

**Transfer pricing**
An arm’s-length approach to transfer pricing applies. All entities registered with the tax department responsible for large-sized companies (Direction des Grandes Enterprises), in addition to the other foreign companies established in Algeria, must submit their transfer pricing documentation along with their annual tax returns (before 30 April of each year). Failing this, and should the documentation to support one’s transfer pricing practices not be provided within 30 days after a first request is made by the Algerian tax administration, a fine of 25% of the deemed transferred benefits on top of the late payment penalties of 25% are applicable.

**Thin capitalisation**
There are no thin capitalisation provisions in Algeria.

**Controlled foreign companies (CFCs)**
There are no CFC rules in Algeria.

---

**Tax credits and incentives**

**Investment incentives**
Tax incentives can be granted to new investors, subject to the application of a specific request with the ANDI. The tax incentives can be granted for the investment phase and for the exploitation phase. They can be granted for a period of three years or five years, depending on the kind and the size of the business.

Other incentives can be granted for start-up businesses to encourage youth investment.

Many tax regimes and tax holidays/incentives are available to attract foreign direct investors in Algeria. For example, there is a temporary exemption from IBS for investing companies creating 100 jobs or more. VAT and custom duties exemptions are also available during the investment phase.

There is also a temporary exemption from IBS for companies that invest in certain strategic sectors, such as advanced technologies, the food industry, mechanics, and the automotive sector.

There is a five-year reduction of IBS for companies whose securities are introduced on the stock exchange.
Foreign tax credit
Algerian tax law does not provide for unilateral tax relief. A DTT, however, may provide for bilateral relief.

Withholding taxes
As explained in the Taxes on corporate income section, The WHT levied on services is 24%, which covers IBS, TAP, and VAT (i.e. three taxes in one). The calculation base is the gross amount of the services invoiced. In principle, it could be reduced or removed by a DTT.

The WHT levied on dividends (10% for residents and 15% for non-residents) and the 10% WHT levied on interest can be reduced in the presence of a DTT.

The WHT levied on royalties is 24%. In the presence of a DTT, the WHT cannot exceed 5%, 10%, or 12%, depending on different cases.

Notes

1. Equipment rental may be considered as royalties, or remuneration of services entering in the scope of industrial and commercial benefits, or other remuneration. Royalties paid for the use of industrial equipment in the frame of an international leasing contract is subject to a tax allowance of 60% applied on the basis of such WHT. Thus, the effective tax rate of WHT will be 9.6% = 24% * (1 - 60%). For software, a reduction of 80% is applicable, making the effective tax rate 4.80%.
2. Domestic rate applies. There is no reduction under the treaty.
3. 5% if the beneficial owner is a company that directly or indirectly holds at least 10% of the capital of the company paying the dividends. 15% in all other cases.
4. 10% if the beneficial owner is resident in Algeria and interests sourced from France and 12% if the beneficial owner is resident in France and interests sourced from Algeria.
5. 5% for royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, or films, tapes, and other means of image or sound reproduction. In other cases, 10% if royalties sourced from France and 12% if royalties sourced from Algeria.
Tax administration

Taxable period
The taxable period is the fiscal year, which corresponds generally to the calendar year. For periodic activity, the fiscal year could be different from the calendar year.

Tax returns
Companies are required to file an annual tax return before 30 April of the following year together with a detailed statement of proceeds paid to third parties with respect to subcontracted services, hiring of personnel and equipment, leases, and technical assistance services, as well as transfer pricing documentation. Monthly tax returns, which include VAT, IBS instalments, WHTs, PIT, and payroll taxes, should be filed within 20 days of the following month.

Payment of tax
IBS is paid when the tax return is submitted after offsetting the corporate income instalments already paid before the IBS liquidation. Three IBS instalments are due on 20 March, 20 June, and 20 November, equal each to 30% of the IBS of the previous year.

Tax audit process
As a general rule, the tax administration informs the company when a tax audit has to be performed. The tax audit notification indicates the audited taxes (in all cases: IBS/TAP/VAT) and the concerned period. The company can be assisted by an expert, and it can ask the tax administration about several issues subject to audit. The tax audit is concluded by sending a final tax reassessment notification.

Some discounts or moderations can be granted to a debtor that is usually punctual in meeting its tax obligations and honouring its debts. For this purpose, taxpayers may, if indigent or hinders introduce a release request to the tax administration, seek remission or moderation of direct taxes properly established. A payment schedule may be granted to a company or to an individual in order to honour, progressively, their liabilities.

Taxpayers may also apply for some reconsideration by the tax administration. There are two alternatives:

- Applications for reconsideration by the tax administration (recours gracieux). The application may refer to direct and assimilated taxes, related penalties, recovery penalties, and fiscal fines.
- Conditional rebate (remise conditionnelle). Conditional rebate could relate to penalties and fiscal fines. It may concern tax penalties applied under direct taxes, turnover taxes, registration fees, stamp duties, indirect taxes, and non-codified taxes. In order to enjoy these arrangements, the taxpayer must make a written application to the competent authority to which the conditional rebate is requested.

Statute of limitations
Subject to some exceptions, the fiscal statute of limitations is four years.

Topics of focus for tax authorities
The tax administration will focus on non-deductible expenses, the declaration of turnover, and, more often, on transfer pricing issues.

Other issues

Exchange controls
A non-resident foreign company can open a non-resident account in local currency (i.e. dinars), called an ‘INR account’, based on the contract to be performed and on its
registration to tax. An INR account can be used only for the object (purpose) for which it is opened.

A non-resident foreign company can also open a CEDAC (Compte Etranger en Dinars Algériens Convertible) account, which must be credited only from abroad in foreign currency.

The CEDAC account allows payment in dinars as well as in hard currency. Furthermore, there is no restriction or limitation for transferring any remaining sum in the CEDAC account back abroad in foreign currency or for drawing any foreign payment instrument. The exchange rate that will be used for converting dinar to foreign currency is the official rate at the date of the debit.

Please note that a non-resident foreign company will not be able to transfer any balances from INR accounts to its CEDAC account or abroad without the express authorisation of the central bank, except in case of reimbursing temporary funding from the CEDAC account (such reimbursement must be for the exact same amount).

Please note that trading companies cannot pay any dividends to their foreign shareholders.

Choice of business entity
Foreign companies can run a business in Algeria through various forms of legal entities (e.g. joint stock company [SPA], limited liability company, partnership company), a joint venture or consortium, or PE. As for legal entities, the foreign companies should comply with the local shareholding requirement. Indeed, the foreign company cannot hold more than 49% of joint venture share-capital in Algeria.

---

**Significant developments**

Under recent legislation, the following Decrees and agreement were approved:

- Presidential Decree no. 207/15, of 5 November, which sets out the new regime applicable to the depreciation and amortisation of fixed assets of companies and other entities subject to corporate income tax (CIT).
- Presidential Decree no. 204/15, of 28 October, which amends the tax regime for provisions applicable to all commercial companies and entities subject to CIT.
- Presidential Decree no. 195/15, of 7 October, which approves the Patronage Law Regulation, was published in the Official Gazette.
- Legislative Presidential Decree no. 5/15, of 21 September, amended the consumption tax rates and customs duties applicable on imports and exports.
- The Presidential Legislative Decree no. 2/15, of 29 June, approved the Special Contribution Regime for Foreign Technical Assistance and Management Services.
- An agreement under the Foreign Account Tax Compliance Act (FATCA), between the government of Angola and the government of the United State (US), was signed on 9 November 2015. This FATCA regime aims to fight tax evasion of US taxable persons who hold financial assets through financial institutions outside the US territory.

---

**Taxes on corporate income**

CIT is levied, currently at a 30% rate, on the profits deriving from business activities carried out in Angola by resident entities or non-resident entities with a tax permanent establishment (PE), as defined by Angolan domestic legislation.

Tax residents are taxed on worldwide profits, while PEs are liable to taxation on the profits attributable to the PE, sales in Angola of goods or merchandise of the same or a similar kind to that sold by the PE, and to any other business activity that is of the same or similar kind to that conducted by the PE.

There are two CIT payer groups:

- **Group A**: Tax is levied on actual profits as shown in taxpayers’ accounting records (e.g. public and private companies, PEs of foreign entities), adjusted accordingly with the provisions of the CIT code.
- **Group B**: Tax is levied on actual profits as shown in taxpayers' accounting records or on presumable profit (e.g. taxpayer not included in group A).

Special regimes, rules, and tax rates are provided for the oil and gas industry and the mining industry.

Exemptions from CIT are provided for non-resident shipping operators (as long as reciprocity exists).
**Investment income tax (Imposto sobre a Aplicação de Capitais or IAC)**

The IAC is due on interest, dividends, royalties, and other income of a similar nature. In Angola, the IAC Code divides such income into two taxable sections, as follows:

**Section A**

Section A investment income includes the following:

- Interest on credit facilities.
- Interest on loans.
- Income derived from deferred payments.

Tax is due at the moment that the interest or income is earned or at the moment when it is presumed to have been earned.

Note that a minimum annual interest rate of 6% is deemed on loan agreements and credit facilities, except if another rate is proven through a written contract.

**Section B**

Section B investment income includes the following:

- Dividends.
- Repatriation of profits imputable to PEs of non-residents in Angola (e.g. branches of foreign entities).
- Interest (accrued or paid), premiums on the amortisation or reimbursement, and other forms of remuneration of: (i) bonds and securities or other financial instruments issued by any company, (ii) treasury bills and treasury bonds, and (iii) Central Bank Securities.
- Capital gains.
- Capital remuneration of members of ‘cooperatives’.
- Indemnities paid to entities for the suspension of their business activity.
- Bond interest.
- Treasury bond interest.
- Interest on loans, granted by third parties or shareholders.
- Income derived from profits of non-public interest entities not collected until the end of the year.
- Gambling income (premiums on gambling, prize raffles, lotteries, or any other gambling bets).
- Royalties.

For the purposes of this group of income, note that:

- The concept of royalties includes the remuneration of any kind attributed to the use of or consent to use copyrighted literature; arts or science works, including movies and films or recordings for radio or television transmissions; patents; brands; drawings or models of a plan; formulas; or secret processes. The concept of royalties also applies to the use of or the consent to use industrial, commercial, or scientific equipment and information related to an experience acquired on the industrial, commercial, or scientific sector.
- A minimum annual interest rate equal to the rate used by commercial banks on credit operations is deemed interest for shareholders’ loans.

Tax is due at the moment the effective attribution of income (dividends or repatriation of profits) is earned (interest) or paid (other income).

**Exemptions**

The following income is exempt from the IAC:

- Interest on deferred payment of commercial transactions.
• Payment of dividends to Angolan CIT payers that hold a share higher than 25% for more than one year.
• Interest from financial products approved by the Ministry of Finance that intend to encourage savings, capped to capital invested of 500,000 Angola kwanza (AOA) for each person.
• Interest from housing saving accounts intended to encourage savings for main permanent dwelling.

**IAC rate**
The IAC rate is 15%, except for certain income, for which the rate is 10% or 5%.

The tax rate is 10% for the following income:

• Dividends and repatriation of profits.
• Capital remuneration of members of ‘cooperatives’.
• Bond interest.
• Interest from shareholders’ loans.
• Royalties.

The tax rate is 5% for the following income:

• Indemnities paid to entities for the suspension of their activity.
• Interest on bonds, securities, or other financial instruments issued by any company, Treasury Bills and Treasury Bonds, and Central Bank Securities, as well as accrued interest on these securities, when the securities have been admitted to trade on a regulated market and have been issued with a maturity equal to or in excess of three years.
• The profits of commercial companies or civil law companies operating under a commercial form, as well as the repatriation of profits imputable to PEs of non-residents in Angola, when the securities to which the profits relate have been admitted to trade on a regulated market. This rate is applicable solely during the five years following the entry into force of the IAC Code.

**Assessment and payment**
Tax is withheld by the payer on Section B income.

For shareholders loans, the tax on the interest paid is withheld at the same time of payment or when the interest is earned.

Third party loans are deemed to attract interest at a minimum of a 6% rate, unless a written contract provides otherwise.

On Section A income, the IAC is paid and assessed by the receiving entity, through the filing of a tax return in January of the following year the tax relates to. If the interest is paid to foreign entities, then the obligation shifts to the Angolan resident entity paying the interest.

**Local income taxes**
There are no local taxes on income in Angola.

**Corporate residence**
Business entities with a head office or effective management in Angola are considered resident entities and are taxed on worldwide income.
Permanent establishment (PE)
Angola has not signed any double tax treaties (DTTs); consequently, its domestic tax provisions apply with regards to PE.

The Angolan concept of tax PE is inspired in the United Nations (UN) Double Tax Treaty Model. A foreign entity is deemed to create a PE in Angola if it:

- has a branch, an office, or place of management in Angola
- has a construction or installation site, or provides supervision over such site, only when such site or activities exceed a period of 90 days in any given 12-month period, or
- carries out services in Angola, including consulting, acting through employees or other personnel contracted for that end, when such services are provided for a period of at least 90 days in any given period of 12 months.

Other taxes
Consumption tax
Consumption tax is due on imported or locally produced goods at rates varying from 2% up to 30%. The consumption tax is also due on some services, as follows:

<table>
<thead>
<tr>
<th>Type of service</th>
<th>Consumption tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hotel management and similar services</td>
<td>10</td>
</tr>
<tr>
<td>Telecommunications</td>
<td>5</td>
</tr>
<tr>
<td>Water supply</td>
<td>5</td>
</tr>
<tr>
<td>Electricity supply</td>
<td>5</td>
</tr>
<tr>
<td>Lease of areas designated for collection and parking of motor vehicles</td>
<td>5</td>
</tr>
<tr>
<td>Leasing of machinery and other equipment, if not subject to the IAC</td>
<td>5</td>
</tr>
<tr>
<td>Leasing of areas used for conferences, colloquiums, seminars, exhibitions, showrooms, advertising, or other events</td>
<td>5</td>
</tr>
<tr>
<td>Consultancy services, namely legal, tax, financial, accounting, audit, information technology (IT), engineering, architecture, economic, and real estate</td>
<td>5</td>
</tr>
<tr>
<td>Photographic services, film processing and imaging, IT services, and construction of web sites</td>
<td>5</td>
</tr>
<tr>
<td>Private security services</td>
<td>5</td>
</tr>
<tr>
<td>Tourism and travel services promoted by travel agencies or equivalent tour operators</td>
<td>5</td>
</tr>
<tr>
<td>Canteen, cafeteria, dormitory, real estate, and condominium management services</td>
<td>5</td>
</tr>
<tr>
<td>Access to cultural, artistic, and sporting events</td>
<td>5</td>
</tr>
</tbody>
</table>

For all the services mentioned above, the tax compliance obligations are the responsibility of the Angolan service providers, who can then add the tax to the amount charged to the acquirers. However, if the service providers are non-resident entities in Angola, the obligation will revert to the resident entities acquiring the services, if they are liable to pay CIT.

Service providers are exonerated from the obligation to pay consumption tax in the provision of services to oil and gas companies, but will only receive from the latter the amount due for the services, although the assessed consumption tax should be included in their invoices. The obligation of paying the tax falls on the oil and gas companies, pursuant to the provisions of the Consumption Tax Regulation.

The consumption tax amount supported by oil and gas companies will be deductible for petroleum income tax purposes.
**Customs duties**
Duties are levied on imports at *ad valorem* rates varying from 2% to 30%. The range of taxation for both consumption tax and import duties varies according to the type of goods. The rates are set out in the tariff book.

Listed equipment may be imported temporarily, if a bank guarantee is provided.

A 0.1% statistical fee and a 1% stamp duty is also due on importation plus customs fees (from 1% to 3%).

A special exemption regime applies for the oil industry for some listed equipment.

Recently, there has been an increase in custom duties taxation that applies to both imported products/goods and to products produced in Angola. In general, there are now lower tax rates for domestic products compared to imported products/goods.

Among the changes, there is an increase of the maximum rate of consumption tax from 30% to 80% on imports and from 30% to 65% on domestic production.

Further, the production of several petroleum products is now liable to consumption tax at the rates of 2% or 5%.

**Stamp tax**
Stamp tax is payable on a wide variety of transactions and documents, at specific amounts or at a percentage based on value.

Important examples include:

<table>

<td></td>
</tr>
<tr>
<td>Other operations</td>
<td>The following other stamp taxes are applicable:</td>
</tr>
<tr>
<td>In addition to the operations referred to above, stamp tax is also applicable to written agreements, financial and operation leasing in tangible assets, customs operations, cheques, lending, civil deposits, gambling, licences, traders’ books, deeds, report, credit bonds, and transfer of business, among other acts.</td>
<td>• 0.2% on the transfer of industrial or agricultural business.</td>
</tr>
<tr>
<td></td>
<td>• 1% on the import value.</td>
</tr>
</tbody>
</table>

The following exemptions apply:

- Credit granted for a period of up to a maximum of five days, micro-credit, credit related to young accounts and old age accounts, and others of a similar nature that does not exceed the amount of AOA 17,600 each month.
- Credit derived from credit card utilisation, when the reimbursement is made free of interest, according to the terms of the contract.
- Credits related with exportation, when duly documented with the respective customs clearance.
- Amounts due on the mortgage for the acquisition of a permanent dwelling.
- On interest and commissions charged on financial operations, such as young accounts, old age accounts, and credits related to export under the terms mentioned above.
- Interest from Treasury Bonds and Angolan Central Bank notes.
- Commissions charged for subscriptions, deposit and withdrawal from units of investment funds, as well as the charges from pension funds.
- Commission charged on the opening and utilisation of saving accounts.
- Credit operations (including interest) for periods not exceeding one year, provided these are obtained exclusively to cover treasury needs, when realised between shareholders and entities in which a direct capital shareholding not lower than 10% is held and which has remained in their ownership for a year (consecutively), or since the incorporation of the respective entity.
• Loans bearing the characteristics of shareholder loans, including the respective interest, made by shareholders to the company in respect of which an initial period not shorter than one year is stated and no reimbursement is occurred before the end of that period.
• Treasury management operations carried out between companies within the same group.
• The exemption foreseen for the reporting of securities or equivalent rights includes other financial instruments negotiated on the regulated market.
• Sale of negotiable securities.
• Transitions of real estate (within the scope of merger, demerger, or incorporation operations).
• Employment contracts.
• Export operations, except for the export of products listed in the table.
• Insurance premiums and commissions related to life insurance, work accidents, health, and agriculture and livestock insurance products.

**Real estate income tax (IPU)**

IPU is levied on rental income earned by individuals or companies owning real estate assets. It is based on actual rental income when the assets are leased and on the assets’ registered value when the assets are not leased.

**Leased assets**

IPU is levied on rental income at a 25% rate.

The rental income is automatically reduced by 40% of its value, as it is presumed to finance all real estate related expenses.

Therefore, in practice, IPU applies at an effective 15% rate on rental income (i.e. 25% multiplied by 60% of rental income), with a minimum amount of 1% of the asset registered value.

A real estate asset is registered at the higher of (i) its valuation (based on criteria and tables to be published, which will take into account the area [square metres] and the characteristics of the property) or (ii) the value of its latest transfer.

**Assets that are not leased**

IPU is levied as follows for assets that are not leased:

<table>
<thead>
<tr>
<th>Patrimonial value (AOA)</th>
<th>IPU rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 5 million</td>
<td>0</td>
</tr>
<tr>
<td>Over 5 million (on the excess) (1)</td>
<td>0.5</td>
</tr>
</tbody>
</table>

Notes

1. For example, an asset registered at AOA 35 million will pay IPU only on AOA 30 million, resulting in an IPU payable of AOA 150,000.

**Exemptions**

The only accepted exemptions of IPU are the following:

• State public institutions and associations that are granted with the public utility statute.
• Property of Embassies or Consulates of foreign countries, provided there is reciprocity.
• Religious temples.
Angles

Payment
Rents paid by Angolan entities (individuals or companies) that carry out commercial activity must withhold the 15% IPU from rents paid. The IPU so withheld must be paid over to the tax authorities by the end of the following month.

For any other cases, owners of real estate assets must pay the IPU in January and July of the following year. At the request (by July each year) of the IPU taxpayer, if approved, the IPU is payable over four instalments in January, April, July, and October of the following year.

Filing requirements
IPU Model 1 must be filed by IPU taxpayers each January, disclosing the rents effectively received in the preceding year, distinguishing the leases agreed and received.

Real estate transfer tax (SISA)
SISA is levied at a 2% rate for all acts that involve onerous permanent or temporary transmission of real estate. The value liable to tax is the higher of (i) the sale value or (ii) the registered value.

Exemptions of SISA are only applicable to the following entities:

- State public institutions and associations that are granted with the public utility statute.
- Property of Embassies or Consulates of foreign countries, provided there is reciprocity.
- Religious temples.
- Real estate transferred for less than AOA 6,864,000 only when (i) at the first sale and (ii) for residential purposes.

Payroll taxes

Employment income tax (IRT)
Resident and non-resident individuals earning income from employment sourced in Angola (if paid for or borne by an Angolan employer) are subject to monthly taxation (IRT) at rates progressing from 0% to 17%. Angola operates a fairly straightforward pay-as-you-earn (PAYE) system, in which the Angolan employer withholds monthly from each employee's gross compensation the Angolan income tax.

Individuals do not file tax returns, as the employment income tax is withheld at source by their employer and any adjustments are also made by the employer.

Social security contributions
Social security contributions are due on the gross income of employees at rates of 3% by the employee and 8% by the employer.

The contributions are intended to cover family, pension, and unemployment protection.

Special contribution
A Special Contribution Regime for Foreign Technical Assistance and Management Services has been approved and published. This regime introduces additional restrictions on the payment for technical assistance and management services to foreign entities, particularly by requiring a special contribution of 10% on the amount of the transfer due by the entity requesting the transfer of funds abroad.

This regime applies to both private and public companies. Petroleum activities are not liable to the special contribution.
Branch income

The repatriation of profits imputable to PEs of non-residents in Angola (e.g. branches of foreign entities) is now taxable under the IAC.

Income determination

Inventory valuation

Inventory is valued at the historic acquisition cost. Any other method of valuation needs to be approved by the tax authorities.

Capital gains

According to the CIT Code, the capital gains arising from the disposal of bonds, securities, or other financial instruments issued by any company, of Treasury Bills and Bonds, as well as of Central Bank Securities, are taxable under the IAC Code. The positive balance calculated in each period, between capital losses realised, provided these do not arise within the scope of a commercial activity subject to CIT, are also taxable under the IAC.

Dividend income

Dividend income is only taxed under the IAC.

Interest income

Interest income is only taxed under the IAC.

Rental income

Rental income, as being liable to real estate income tax, is not liable to CIT. See the Other taxes section for more information.

Royalty income

Royalty income is only taxed under the IAC.

Foreign income

An Angolan resident CIT payer is taxed on all its foreign income. Any income tax proved to be paid outside the country for activity carried on outside the country will be credited against the CIT liability.

No tax deferral provisions exist in Angola.

Deductions

Depreciation

Depreciation should be computed using the straight-line method; any other method must be approved by the tax authorities.

The tax depreciation rates should respect the limits imposed by Presidential Decree no. 207/15, of 5 November; as an example, please refer to the table presented below. A transition rule is foreseen, establishing that the changes will only apply to assets that come into use following the date of entry into force of that legislation.

<table>
<thead>
<tr>
<th>Type of asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Office buildings</td>
<td>4</td>
</tr>
<tr>
<td>Industrial buildings</td>
<td>4</td>
</tr>
<tr>
<td>Computers</td>
<td>33.33</td>
</tr>
<tr>
<td>Furniture</td>
<td>12.5 to 16.67</td>
</tr>
</tbody>
</table>
Angola

<table>
<thead>
<tr>
<th>Type of asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Software</td>
<td>20</td>
</tr>
<tr>
<td>Light passenger vehicles</td>
<td>25</td>
</tr>
<tr>
<td>Start-up expenses</td>
<td>20</td>
</tr>
</tbody>
</table>

The depreciation that is not considered a tax cost or loss in a period, for exceeding the maximum depreciation allowed in that period, may be considered as a cost or loss of the subsequent period when acceptable under the CIT Code and provided the appropriate accounting adjustments are made.

An intensive operating regime is now foreseen, permitting that the depreciation calculated in accordance with the method used be increased by 25% in the case of two shifts and by 50% in the case of continuous operations.

In mergers, demergers, and sales of business, the method and depreciation/amortisation periods used post-operation are to continue the same as the pre-operation.

**Interest expenses**
Interest costs are accepted as deductible for tax purposes, except the interest on shareholder loans or supplementary capital.

**Bad debt**
Write-off of debts may only be considered as costs or losses for the period to the extent the execution, bankruptcy, or insolvency processes are duly documented through public certificates.

**Provisions**
A new regime applicable to deductible provisions for CIT purposes has been published. This regime applies to provisions created in fiscal year 2015 and thereafter. Nevertheless, the accumulated limits should apply to provisions constituted in previous fiscal years.

The only provisions accepted as deductible for tax purposes are:

- Doubtful debt provision within an annual limit of 4% of the taxpayer's current total account value and provided that a 10% accumulated provision limit is not exceeded. This provision should be calculated taking into consideration the ageing of the debts.
- Inventory depreciation within limits that vary from 0.5% to 12% (annual and accumulated), depending on the nature of the company's activity.
- Those respecting the limits and rules imposed by the Insurance Supervision Institute for insurance companies, as well as the Central Bank for Financial Institutions.
- Provisions for possible losses resulting from a court process.

In relation to doubtful debts, the new regime:

- Limits the provision's deductibility to credits in which the risk of collection is considered duly justified, namely, when the credits are in arrears for at least six months and there is proof of collection diligences taking place.
- Excludes from tax deductibility the provisions on credits granted to shareholders and subsidiaries (at least 10% share) unless when associated with judicial or enforcement procedures, bankruptcy, or similar activity.

In relation to the losses incurred with inventories, the new regime:

- Foresees increases and reductions on the provisions intended to cover losses incurred with inventory value, depending on the sector of activity.
- Imposes that the determination of provisions takes into account the respective market price.
• Foresees a special regime for taxpayers engaged in editorial activities.

**Charitable contributions**
Donations are accepted as deductible, under the patronage law, if the donations are granted to Angolan education, science, charity, and cultural institutions.

**Fines and penalties**
Fines and penalties are not accepted for tax purposes.

**Taxes**
Indirect taxes are deductible for CIT purposes. Direct taxes are non-deductible, namely the CIT itself, IRT, IAC, IPU, or taxes paid on behalf of others (e.g. social security contribution supported on behalf of the employees).

**Net operating losses**
Tax losses are deductible from the taxable income of the following three years. Carryback of losses is not allowed.

**Payments to foreign affiliates**
Payments to foreign affiliates are accepted for tax purposes, although the arm’s-length principle should be respected.

**Group taxation**
There is a special rule for group taxation in Angola that, in general terms, allows for single taxation of the sum of the taxable income of all companies within the group. For this regime to be applied, it is mandatory that the holding company is an Angolan one.

**Transfer pricing**
Under a special regime for ‘so called’ major taxpayers, being the ones identified in a list published by the Ministry of Finance, there are additional specific reporting and administrative obligations, namely the obligation of audited accounts and to prepare special transfer pricing documentation (e.g. the same will have to, under certain requisites, organise their transfer pricing documentation and submit it to the tax authorities). This is applicable to those major taxpayers that have registered annual profits higher than 70 million United States dollars (USD).

**Thin capitalisation**
There are no thin capitalisation rules in Angola.

**Controlled foreign companies (CFCs)**
There are no CFC rules in Angola.

**Tax credits and incentives**

**Foreign tax credit**
Any income tax proved to be paid outside the country for activity carried out outside the country will be credited against the CIT liability.

**Investment incentives**
Profits retained and then reinvested by the company in new installations or equipment during the following three financial years may be deductible from taxable income during the following three years after the investment is finalised.

Special regulations also provide tax and customs incentives for investment projects in strategic economic development areas and sectors.
Angola

**Withholding taxes**

Withholding tax (WHT) is applicable on payments for services provided to resident and non-resident entities at the rate of 6.5%. For Angolan taxpayers, this is regarded as an advance payment of the CIT due at the year-end; the deduction of these WHTs against tax CIT payable is limited to a period of five years. For non-resident companies, this is a final tax.

Services that are not subject to withholding are now expressly foreseen.

Due to the IAC, Angola does not have a separate WHT for dividends, interest, and royalties (*see the Taxes on corporate income section for more information*).

---

**Tax administration**

**Taxable period**
The tax year follows the calendar year.

**Tax returns**
The annual CIT return for Group A and B must be submitted by the last business day of May and April, respectively, following the year to which the income relates.

**Payment of tax**
Provisory payments of CIT could be applicable for companies that are not subject to WHT or when the amounts withheld are not relevant. The provisory payment is based on 2% of the turnover generated in the first six months of the calendar year and it is payable by July (Group B) and August (Group A) of the same year.

The final tax must be settled by the last business day of the month of April (Group B) and May (Group A) of the current year. The provisional and final settlement must be computed at the rate of 30%. The lack of payment of the CIT provisional payment or final tax will be sanctioned by the application of penalties and interest according to the General Tax Code in force.

**Tax audit process**
The tax authorities carry out audits to the monthly and annual tax returns to identify any possible internal inconsistencies.

Taxpayers may disagree with any tax decision they are notified of and file an appeal to their respective Taxpayers Chief within 15 days upon receiving the tax notification.

Based on an unsatisfactory decision of the Taxpayers Chief, the taxpayer may also file a hierarchic appeal addressed to the National Director of Taxes (DNI) within 15 days upon receiving the tax notification.

The judicial stage, in which appeals against the final decisions of the DNI are handled by the courts, has a very low degree of success as there are still no specialised tax courts and the courts will ask for technical support from the same public entities that carry out the tax audits.

**Statute of limitations**
The statute of limitations in Angola is five years.

**Topics of focus for tax authorities**
The main areas of focus of the tax authorities relate to compliance in respect of payment in due time of any WHTs due, as well as the 1% stamp tax on receivables. Further, they usually try to investigate the deductibility of costs according to their nature.
Legal regime on invoices and equivalent documentation
Taxpayers (individuals or corporate entities whose residency, registered office, effective management, or PE is in Angola) should ensure that their software provide for the invoices to be duly dated, sequentially numbered, and include certain mandatory information, amongst which we highlight, for its novelty in regards to the previous regime, the obligation for the invoices and equivalent documents to be written in Portuguese and expressly mention that they were computer processed.

Taxpayers who issue invoices or equivalent documents that do not follow this regime will be subject to payment of fines and penalties (corresponding to 20% of the amount of the non-issued invoice, which may increase up to 40% in the event of a repeated fault), and, in the ‘hands’ of the acquirer, the respective cost will not be accepted as deductible for tax purposes.

Other issues
Intergovernmental agreements (IGAs)
An agreement under the Foreign Account Tax Compliance Act (FATCA), between the government of Angola and the government of the United State, was signed on 9 November 2015. This FATCA regime aims to fight tax evasion of US taxable persons who hold financial assets through financial institutions outside the US territory.

---

**Significant developments**

The Botswana Unified Revenue Services (BURS) has expanded e-services to value-added tax (VAT), personal income tax (PIT), and pay-as-you-earn (PAYE), and is also planning to expand to corporate return filing.

The BURS has limited carryforward of farming losses to five years, like for most other businesses.

The BURS has introduced a 4% withholding tax (WHT) on sale of livestock sold for slaughter.

---

**Taxes on corporate income**

Botswana has a source-based taxation system.

Corporate income tax (CIT) is charged at a single flat rate of 22%. Manufacturing companies having the approval from the Minister of Finance for a special tax rate will be charged at the rate of 15%.

**International Financial Services Centre (IFSC) profits**

IFSC companies are currently taxed at a flat rate of 15%. Companies must apply for a certificate to be classified as IFSC companies, which deal only in specified services and only with non-residents.

**Mining profits**

Mining profits, other than profits from diamond mining, are taxed according to the following formula:

Annual tax rate = 70 minus (1,500/x), where x is taxable income as a percentage of gross income.

The tax rate shall not be less than the flat CIT rate of 22%.

**Diamond mining**

Diamond mining is usually taxed in terms of an agreement with the government of Botswana.

**Local income taxes**

There are no local, state, or provincial government taxes on income in Botswana.
Corporate residence

If a company’s registered office or place of incorporation is in Botswana or if the company is managed and controlled in Botswana, then the company is considered a resident of Botswana.

Permanent establishment (PE)

PE has been defined in the Income Tax Act only in the limited context of interest, commercial royalty, and management or consultancy fee. However, PE is defined in all the double taxation agreements (DTAs) that Botswana has entered into with other contracting states. The definition of PE in the DTA follows the definition in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and Capital.

Other taxes

Value-added tax (VAT)

VAT is imposed on taxable supplies and the importation of goods into Botswana. The standard VAT rate of 12% applies to all supplies that do not qualify for an exemption or are not zero-rated.

The VAT registration threshold is 1 million Botswana pula (BWP).

Vocational training levy (VTL)

VTL is payable when submitting the VAT return by every taxpayer who is registered for VAT. It is calculated as a percentage of turnover ranging from 0.2% to 0.05%, depending on the turnover of the company.

Customs and excise duties

Customs and excise duties are charged on importation of goods (including currencies) into or exported out of Botswana. The import duties may also include anti-dumping and countervailing duties. No customs duties and excise duties are charged on trade between Botswana and South Africa, Lesotho, Namibia, and Swaziland, as these five countries constitute a Southern African Customs Union. In terms of the Botswana/Zimbabwe Trade Agreement, goods originating from either of the trading partners are exempted from payment of customs duties under the condition that the goods meet a minimum of 25% local content. Excise duty and local taxes, such as VAT, are due and payable where applicable.

Property taxes

There are no property taxes in Botswana.

Capital transfer tax (CTT)

CTT is levied on the donee upon the transfer (by way of inheritance or gratuitous disposal of property) of tangible or intangible, movable or immovable, property, at 12.5%.

Transfer duties on immovable property

Transfer duty is levied at 5% of the value of immovable freehold and leasehold property. The first BWP 200,000 of such value are exempt from transfer duty in case of transfer to a Botswana citizen.

In the case of agricultural property, transfer duty is levied at the rate of 30% for a non-citizen. This duty is 5% in the case of a Botswana citizen.

Stamp duty

There is no stamp duty in Botswana.
Payroll taxes
An employer with resident employees earning income above the taxable threshold and non-resident employees must deduct tax by applying the relevant tax rate and remit to the BURS on a monthly basis before the 15th day of the succeeding month. Every employer is required to submit an annual return within 31 days after the end of the tax year.

Social security contributions
There are no social security taxes or contributions in Botswana.

Branch income
CIT payable on branch profits is 30%.

Income determination

Inventory valuation
Inventories are valued at cost less such amounts, if any, that the Commissioner General believes are reasonable as representing the amount by which the value of such stock has been diminished because of damage, deterioration, obsolescence, or other cause. Although not expressly excluded by legislation, last in first out (LIFO) has not been accepted in practice by the tax authorities.

Capital gains
Gains from disposal of specified capital assets (immovable property and marketable securities, including shares in private companies) are included in taxable income in the hands of the corporate taxpayer. Acquisition costs of immovable property are subject to a 10% compound annual addition for inflation for the period from acquisition to 30 June 1982, and thereafter to an inflation addition based on the increase in the consumer price index to the date of sale. For other gains, no inflation allowances are granted, but the taxable gain is set at 75% of the total gain.

Currently, the sale of any shares, units, or debentures of a resident company is exempt from tax under any of the following circumstances:

- The resident company whose shares are being sold is a public company.
- The shares, units, or debentures are traded on the Botswana Stock Exchange.
- The company has released for trading 49% or more of its equity on the Botswana Stock Exchange.

This exemption only applies if the shares, units, or debentures were held by the taxpayer for a period of at least one year prior to the date of disposal.

The aggregate amount of capital losses is offset against the aggregate amount of capital gains in the same tax year. Any excess of loss is deducted from aggregate gains over losses accruing in the succeeding tax year only. Capital losses cannot, in any circumstances, be deducted against other income.

Dividend income
Dividend income from local sources is not subject to tax.

Interest income
In the case of a resident company, interest income is included in gross income and taxed at the CIT rate. In the case of a non-resident company, interest income is subject to WHT, which constitutes a final tax.
**Royalty income**
Royalty income is included in gross income and taxed at the CIT rate. In the case of a non-resident company, royalty income is subject to WHT, which constitutes a final tax.

**Partnership income**
Partnership income is taxed in the hands of the partners, in proportion to their share in the partnership.

**Foreign income**
Resident corporations are not generally taxed on a worldwide income basis. However, interest and dividend income from a foreign source is taxed in the hands of the resident company on an accrual basis. Relief is given for any WHT imposed on such income.

---

**Deductions**

**Depreciation and depletion**
Annual and capital allowances available are as follows.

**Companies other than mining companies**
Annual taxation allowances for expenditures incurred on machinery and equipment before 30 June 1982 can be claimed up to 100%. This allowance may be for any proportion of previously unclaimed expenditures. For expenditures incurred on machinery and equipment after 30 June 1982, annual allowances are granted, calculated on cost by the straight-line method on the basis of the expected useful lives of the individual assets. Guidelines are provided for expected useful lives of different categories of assets, which vary from four to ten years. Book depreciation is not required to conform to tax depreciation. The capital allowance claimable on a company motorcar is restricted to a maximum of BWP 175,000.

An initial allowance of 25% of cost is granted on certain industrial buildings. All industrial and commercial buildings (excluding residential properties) are granted a 2.5% annual allowance based on cost or, in the case of an industrial building on which an initial allowance has been claimed, the original cost less the initial allowance.

Balancing allowances and charges are brought to account on the disposal of assets on which allowances have been claimed. Where disposal value of an item of machinery or equipment exceeds the difference between expenditures incurred on the asset and allowances granted, the whole amount is taxable as corporate income or the balancing charge can be offset against further additions of new equipment, thus providing rollover relief. However, there is no rollover relief on motorcars except where the cars are used in a car rental or taxi service business.

**Mining companies**
In ascertaining the business income for any tax year from a mining business, there shall be deducted from business income an allowance, to be known as a mining capital allowance, computed in accordance with 100% of the mining capital expenditure made in the year in which such expenditure was incurred, with unlimited carryforward of losses.

**Goodwill**
Amortisation of goodwill is not allowed as a tax deductible expense.

**Start-up expenses**
Start-up expenses are not specified in the law. However, pre-incorporation expenses might be disallowed since, generally, expenses incurred when there is no income are not allowed.
Interest expenses
Interest paid or accrued to a resident is deductible as an expense. Interest paid to a non-resident will be allowed as a deduction in the year where the relevant WHT on interest has been remitted to the BURS.

Bad debt
Bad debts written off and specific provisions for bad debt are allowed as a deduction when computing taxable income. General provisions are not allowed as a deduction.

Charitable contributions
Donations made to (i) any educational institution recommended by the Ministry of Education or (ii) any sports clubs or sports associations recommended by the Ministry responsible for sports, and approved by the Commissioner General, shall be deducted when arriving at taxable income, limited to 20% of the chargeable income.

Fines and penalties
Penalties and associated interest are not allowed as a deduction.

Taxes
Any taxes paid are specifically disallowed in computing a company's taxable income.

Other significant items
An allowance is granted for dwelling houses erected for employees by a business other than a mining business. The amount of the allowance is the lower of cost or BWP 25,000 for each dwelling house constructed.

A deduction of 200% of the cost of an approved training expenditure is allowed.

Companies with shareholders having 5% or more of equity, either directly or indirectly, are classified as close companies, and there are additional tax regulations in respect of these shareholders.

Small companies, that is resident private companies whose gross income does not exceed BWP 300,000, may elect that the company be taxed as a partnership.

Expenses incurred by the company for having its shares listed on the Botswana Stock Exchange are deductible in determining the chargeable income of the company.

Net operating losses
Losses may be carried forward for five years, with the exception of mining and prospecting operations, for which there is no time limit. There is no allowance for carrybacks.

Payments to foreign affiliates
Royalties, interest, and service fees paid to foreign affiliates are generally deductible, provided such amounts are at arm's length and WHT is paid.

In the case of a mining company, head office expenses allowed as a deduction in ascertaining gross revenue from mineral licence shall be limited to 1.5% of gross income for the year of assessment, and any excess of such expense above the limit shall be treated and taxed as a dividend.

Where the interest rate on a loan made by a foreign-based mining company to an affiliate mining company resident in Botswana is considered by the commissioner to be in excess of the market rate, such excess will be disallowed as a deduction and taxed as a dividend.
**Group taxation**

There are no concessions for group taxation, other than for wholly-owned subsidiary companies of the Botswana Development Corporation Limited (BDC).

BDC was established in 1970 to be the country’s main agency for commercial and industrial development. The government of Botswana owns 100% of the issued share capital of the Corporation.

Where in any tax year a wholly owned subsidiary of BDC has incurred any assessed loss, such member may, during the current tax year, by notice in writing to the Commissioner General, elect that the whole or part of such assessed loss shall be deducted in ascertaining the chargeable income of one or more of the other wholly owned subsidiaries.

**Transfer pricing**

Botswana currently does not have any transfer pricing regulations, so transfer pricing is currently monitored through the anti-avoidance provisions contained in Section 36 of the Income Tax Act.

The arm’s-length principle should always be followed in transactions between related parties. If such transactions have created rights or obligations that would not normally be created between independent persons dealing at arm’s length, the Commissioner General may determine the liability in such manner as deemed appropriate. However, related party balances arising out of normal trading transactions (e.g. credit purchases with a 30 day credit period) would not be subjected to these provisions.

Interest (at prime rate) should be charged/provided on loans from shareholders/amounts due to related parties. If no interest has been charged/provided, in terms of the close company legislation, the BURS may deem interest at the prime rate prevailing at the beginning of the tax year, as income in the hands of the lender without allowing the corresponding interest as a charge against the profits of the borrower. The borrower is obligated to deduct WHT at the prevailing rate on the deemed interest.

Amounts due from shareholders/directors may be deemed as dividend income and shall form part of the taxable income of the borrower, in which event these will be taxed at the prevailing dividend WHT rate in the hands of the borrower.

**Thin capitalisation**

Thin capitalisation rules can be found in the Income Tax Act, but only in relation to mining companies and IFSC companies.

Where a foreign controlled resident mining company has a foreign debt-to-equity ratio in excess of 3:1 at any time during the year of assessment, the amount of interest paid by the resident company during that year on that part of the debt that exceeds the ratio shall be disallowed as a deduction, and the amount so disallowed shall be treated and taxed as a dividend.

In case of an IFSC company, where an amount of foreign debt interest is allowable as a deduction in a particular tax year and, at any time during that tax year, the total foreign debt exceeds the foreign equity product for that year, then the amount of foreign debt interest ascertained in accordance with the following formula will be disallowed:

\[ I \times \left( \frac{A}{B} \right) \times \left( \frac{C}{365} \right) \]

A = amount of the excess of the total foreign debt over the foreign equity product.

B = the total foreign debt.
C = the number of days in that tax year during which the total foreign debt exceeded the foreign equity product by that amount.

I = the foreign debt interest.

**Controlled foreign companies (CFCs)**

There are no CFC rules in Botswana.

---

**Tax credits and incentives**

To encourage investment in Botswana, extra tax relief on revenue or capital accounts will be granted for specific business development projects if the government is satisfied that such projects are beneficial to Botswana.

**Foreign tax credit**

A credit for the foreign WHT payable is permitted under domestic law. The credit, which is offset against the tax charged in Botswana, shall be the lesser of (i) the tax payable in the foreign country or (ii) the tax charged under the Botswana Income Tax Act on such amount.

---

**Withholding taxes**

WHT, at the following rates, must be deducted from payments to residents and non-residents unless a DTA exists.

<table>
<thead>
<tr>
<th>Residents</th>
<th>WHT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>
<td>7.5</td>
</tr>
<tr>

All rent and commission or brokerage payments to residents or non-residents are subject to WHT at 5% and 10%, respectively, where the total payment is BWP 36,000 per annum or more or the monthly payment is BWP 3,000 or more.

Botswana has tax agreements with the following countries, which provide for WHT at the rates shown.

### Botswana

#### Taxable period
Botswana has a fiscal year ending on 30 June. However, a business may select its own accounting year, which may end on a date other than 30 June. This accounting year is accepted for the computation of the company’s taxable income.

#### Tax returns
Botswana requires self-assessment, which means that the return submitted constitutes the assessment. The system is one that requires all taxpayers to file tax returns in standard format (providing information relating to taxable income earned) within four months after the financial year-end of the company.

#### Payment of tax
Under the self-assessment tax procedures, if the tax payable for a tax year exceeds BWP 50,000, then estimated tax is required to be paid in equal quarterly installments over the period of 12 months ending on the company’s financial year-end date. Accordingly, the first quarterly payment should be made within three months of the beginning of the financial year and the balance quarterly payments at three monthly intervals thereafter. The final (balance) payment, if any, is to be made within four months from the end of the financial year, when submitting the return.

Where the tax is less than BWP 50,000, then the tax is payable within four months from the company’s financial year-end date.

#### Tax audit process
There is no prescribed audit process, and an audit can be initiated by any factor as determined by the BURS. The audit or inspection will commence with a request from the BURS for the taxpayer to make available any such records or information as may be required.

#### Statute of limitations
The assessment should be made any time prior to the expiry of four years after the end of the tax year to which it relates to. Tax returns submitted that have been assessed may not be reopened after a period of four years from date of assessment by the BURS.

#### Topics of focus for tax authorities
The BURS is focusing in establishing and strengthening the Large Tax Payers Unit, minimising the tax gap, and introducing electronic filing.

### Notes
1. 5% rate of WHT is applicable if the beneficial shareholder is a company resident in the DTA country and holds at least 25% of the share capital in the company paying dividends. Otherwise, the other rate applies.

Significant developments

Depreciation and amortisation regime
Decree No. 42/2015, of 24 August, was published, establishing the asset depreciation and amortisation regime and approving the annual rates of depreciation and amortisation of tangible fixed assets, intangible assets, and investment properties.

Devaluation coefficients
Decree No. 76/2015, of December 31, was published, approving the table of currency devaluation coefficients. It applies on the determination of capital gains or capital losses resulting from the disposal of shares, investment properties, tangible fixed assets, intangible assets, non-current assets held for sale, and assets derived from accidents or resulting from the permanent allocation of assets to non-business purposes.

The Decree establishes currency devaluation coefficients that vary between 2.4 (assets acquired until 1990) and 1.0 (assets acquired in 2015).

Transfer pricing
The Ministry of Finance and Planning published the Decree No. 75/2015, which regulates the application of the transfer pricing regime and its requirements, as set forth in the Corporate Income Tax (CIT) Code.

The Decree clarifies, amongst others, how the transfer pricing methods should be determined, which comparability factors should be taken into consideration, and what is the relevant supporting information and documentation that must be obtained and maintained by the taxpayer.

Additionally, the Decree states that the taxpayer must keep on-hand information and documentation regarding its transfer pricing policy.

Tax Benefits Code (TBC) amended and republished
Law No. 102/VIII/2016, of 6 January, amends and republishes the TBC.

Unemployment allowance
Decree No. 15/2016, of March 5, was published and entered into force on 4 April 2016, establishing the legal regime for the allocation of unemployment allowance under the compulsory social protection scheme for employees in a state of involuntary unemployment.

Under this scheme, the rate of contribution increased to 24.5%, 8.5%, and 16% to employee and employer, respectively.
Cabo Verde

Taxes on corporate income

Cabo Verde’s CIT, called Imposto sobre o Rendimento das Pessoas Colectivas, is levied both on profits obtained within the Cabo Verden territory and those obtained outside by resident companies (worldwide principle). Non-resident companies with a permanent establishment (PE) in Cabo Verde are also subject to CIT on Cabo Verden-source income attributable to the PE.

Taxable profit is computed according to the local accounting rules and adjusted for tax purposes.

For the purposes of determining taxable income, CIT payers can be taxed under two methods/ regimes as follows:

- Special regime for micro and small-sized companies:
  - Micro-sized company: An entity that employs up to five persons with an annual turnover (gross amount of sales and services) that does not exceed 5 million Cabo Verden escudos (CVE).
  - Small-sized company: An entity that employs between six and ten persons with an annual turnover (gross amount of sales and services) of between CVE 5 million and CVE 10 million.
- Standard organised accounting regime (standard/normal regime under which the computation of profits follows the local accounting rules).

Income tax rates

Resident companies are subject to a tax rate of 25%, where taxable income corresponds to the profit less any tax benefits and any losses carried forward, as stated in the tax return. The tax rate of 25% is also applicable for PEs of non-resident companies.

Micro and small-sized companies are subject to a single special tax (SST) of 4% levied on the gross amount of sales obtained in each taxable year, to be paid quarterly. The SST replaces the CIT, fire brigade surtax, and value-added tax (VAT), as well as the contribution to social security attributable to the company.

Non-resident companies without a PE are subject to withholding tax (WHT) rates applicable for each income category foreseen in the Tax Code, which range between 1% and 20%.

Surcharge

The CIT rate is increased by a fire brigade surcharge, called Taxa de Incêndio, of 2% on the tax due, leading to a final tax rate of 25.5%. This surcharge is levied in the municipalities of Praia (Island of Santiago) and Mindelo (Island of São Vicente).

Corporate residence

A company or entity is deemed to be resident in Cabo Verde if its registered head office or its place of effective management is in the Cabo Verde territory.

Permanent establishment (PE)

Non-resident companies deemed to have a PE in Cabo Verde are also subject to tax in Cabo Verde. Under Cabo Verden tax law, a non-resident company is deemed to have a PE if the non-resident company:

- has any fixed installation or permanent representation located in Cabo Verde through which, among others, activities of a commercial, industrial, or agricultural nature, or fishing and rendering of services are carried out (including agricultural, fishing, and
cattle raising explorations, or other quarries or any other places of natural resources extraction) or
• carries out its activity in Cabo Verde through:
  • employees, or any other personnel hired for that purpose, for a period (continuous or not) of not less than 183 days within a 12-month period
  • a person (a dependent agent), which is not an independent agent, acting, in the Cabo Verde territory on behalf of a company, with powers to intermediate and conclude binding contracts for that company, within the scope of its business activity, or
  • a building site or a construction installation if it lasts for more than 183 days, as well activities of coordination, supervision, and inspection related with the building site or its construction installation.

A PE of a non-resident is taxed as a resident company.

Other taxes

Value-added tax (VAT)
The VAT system in Cabo Verde closely follows the European Union (EU) VAT system and is assessed at the standard rate of 15%.

The standard VAT rate of 15% is a general tax on consumption, applicable to the import and sale of goods and services in Cabo Verde territory.

The VAT rate will be applied on the following amount on the following supplies of goods and services:

• Diesel: 120%.
• Fuel: 300%.
• Petroleum: 30%.
• Butane gas: 16.65%.
• Fuel-oil: 30%.
• Electricity: 30%.
• Tap water from the public supply: 20%.
• Telecommunication services: 60%.
• Road passenger transport and transport of goods by sea: 15%.

The following transactions are considered to fall outside the scope of VAT:

• The transfer, for consideration or not, of a totality of assets or a part thereof that constitute an undertaking or a part of an undertaking capable of carrying on an independent economic activity.
• Indemnities for damages.
• Repayment of expenditure incurred in the name and on behalf of a third party.

Exempt transactions
The VAT regulations establish two types of exempt transactions: exempt transactions without credit and exempt transactions with credit (i.e. zero-rated transactions). VAT incurred is recoverable in as far as the goods and services are used for the purposes of the taxed transactions of a taxable person or for zero-rated transactions.

Exempt transactions without credit include the following:

• Hospital and medical care and closely related activities undertaken by bodies governed by public law, or comparable activities undertaken by other hospitals and centres for medical treatment.
Cabo Verde

- The provision of medical care through the exercise of the medical and paramedical professions, as well as the supply of transport services for sick or injured persons, and the supply of human organs, blood, and milk.
- The supply of services and goods closely linked to welfare and social security work.
- The supply of services and goods closely linked to the protection of children and young people by bodies governed by public law.
- The provision of children's or young people's education, school or university education, including the supply of services and goods closely related thereto.
- The supply of services, and goods closely linked thereto, by non-profit-making organisations.
- The supply of copyright and art objects by the original creators or their heirs.
- The supply by the public postal services of stamps and stamped paper.
- The supply of certain cultural, educational, technical, and recreational services.
- Garbage removal.
- Burial and cremation supplies.
- Banking, financial, insurance, and reinsurance transactions, including related services performed by insurance brokers and insurance agents.
- Immovable property transactions (excluding the provision of accommodation in the hotel sector or in sectors with a similar function, the granting of facilities for collective parking of vehicles, the leasing of permanently installed machinery and equipment, and the granting of facilities for exhibitions and advertising).
- Specified basic foodstuffs and pharmaceutical products.
- Goods used in agriculture, stockbreeding, forestry, and fisheries.

Exempt transactions with credit (i.e. zero-rated transaction) on imports include the following:

- Import of goods whose supply qualifies for exemption.
- Re-import of goods by the person who exported them, in the state in which they were exported, where they qualify for exemption from customs duties.
- Services in connection with the import of goods where the value of such services is included in the taxable amount.
- Import of gold by the central bank.
- Import into ports by sea fishing undertakings of their catches, unprocessed or after undergoing preservation for marketing but before being supplied.
- Import of goods under diplomatic and consular arrangements that qualify for exemption from customs duties.
- Import of goods for the fuelling and provisioning of sea-going vessels and aircraft.

The most important exemptions with credit (i.e. zero-rated) for exports and connected transactions include the following:

- Supply, modification, repair, maintenance, chartering, and hiring of aircraft used by airlines operating both on domestic and international routes, and the supply, hiring, repair, and maintenance of equipment incorporated or used therein.
- The supply of goods for the fuelling and provisioning of such aircraft.
- Services meeting the direct needs of such aircraft or their cargoes.

**Customs duties**

Customs duties are levied at rates ranging from 0% to 50% on the customs value of most imported goods. Since Cabo Verde imports the majority of the goods it consumes, a 50% tariff protection applies for certain domestically produced goods.

Raw materials or capital goods can be imported with an exemption from customs duties or at a low rate.
**Special consumption tax**
A special consumption tax is imposed at rates ranging from 10% to 150% on goods that are deemed superfluous, luxurious, or undesirable for economic, social, or environmental policy reasons.

The excise duty rate is 40% in the case of beers, wines, vermouths, and other alcoholic drinks, and 20% in the case of tobacco.

Vehicles used for transportation, up to 5 tons, are subject to rates of up to 150%, according to their age:

- Up to four years: not applicable.
- More than four and up to six years: 40%.
- More than six and up to ten years: 80%.
- More than ten years: 150%.

**Property taxes**
A property tax, called *Imposto Único sobre o Património* (IUP), is levied at the rate of 1.5% in Cabo Verde.

IUP is due on the ownership of immovable property on an annual basis by the owner of the real estate, registered as such on 31 December of the relevant year. The taxable basis corresponds to 25% of the value attributed by the Evaluation Commission.

IUP is also due on the transfer (gratuitously or for a consideration) of real estate, based on the value of the contract declared by the transferee.

Exemption of IUP due on the acquisition is granted to:

- Cabo Verdean emigrants who own saving bank accounts.
- Projects with Touristic Utility Status *(see the Tax credits and incentives section for more information)*.

In taxable transfers (not exempt), IUP is payable by the transferee.

IUP is also due on the capital gains arising from the sale of:

- plots of land for construction if the sales price is more than double the purchase price, and
- buildings or other real estate if the sale price exceeds the purchase price by more than 30%.

IUP on capital gains is normally paid by the transferor, on the highest of the declared price and the official value of the property concerned.

Capital gains obtained by companies that are in the business of buying real estate for resale are not subject to IUP.

**Stamp duty**
Stamp duty is payable on a wide variety of transactions and documents, at rates that may be set in specific amounts or on a percentage basis.

</tr>
</tbody>
</table>

* Fixed exchange rate 1 euro (EUR) = CVE 100.265 under an exchange agreement between Cabo Verde and Portugal.

**Ecologic charge**
Cabo Verde’s ecologic charge is applied to packing material, whether empty or full, imported or produced internally, non-biodegradable or made out of metal, glass, or plastic.

The ecologic charge varies from CVE 2 to CVE 100 per item, depending on the quantity or weight of the goods.

This fee is due by the local producer or the importer.

Exemptions are available in the case of packing material used in medicine, essential food (e.g. corn, rice, sugar, flour, and milk), and construction (e.g. cement). Packing material that is exported, reutilised, or recycled is also exempt.

**Tourism tax**
A tourism tax is applied to accommodation in the hotel sector. The tax amounts to CVE 220 per person per night for people over 16 years of age and cannot exceed ten consecutive nights.

**Payroll taxes**

**Social security contributions**
Social security contributions are payable by the employee on their gross income at a rate of 8% and by the employer at 15%.

**Branch income**
A branch is not considered a separate legal entity distinct from the foreign head office. It is governed by the domestic law of Cabo Verde.

From a tax perspective, branches are subject to CIT if considered a PE under Cabo Verde law.

**Income determination**
Taxable income is computed on the basis of the accounting income, adjusted by deducting from taxable profits the prior years’ losses and any deductions under the tax (incentive) legislation.

**Inventory valuation**
The tax law does not foresee any mandatory inventory valuation method that should be adopted by Cabo Verdana taxpayers. For tax purposes, accepted inventory methods should be consistent with the accounting rules in force and with generally accepted local business practice. Such methods should be applied in a consistent manner over
the financial years and based on the prices effectively paid or established by official
documents (for regulated prices).

**Capital gains**
Capital gains are not subject to a separate capital gains tax and are treated and taxed as
ordinary business income.

Capital gains and capital losses determined for tax purposes are usually different from
capital gains and capital losses determined for accounting purposes and are quantified
as follows:

\[
\text{Capital gains/losses} = \text{sales} - (\text{acquisition value} - \text{deductible accumulated depreciation} - \text{deductible impairment losses}) \times \text{coefficient}
\]

The exemption on capital gains derived from disposal of shares when owned for more
than one year was revoked.

Capital gains can be considered only in 50% of the respective amount if the sales
proceeds are reinvested in the acquisition, production, or construction of tangible
fixed assets, intangible assets, or non-consumable biological assets. For this purpose,
the reinvestment must take place in the previous tax year, in the tax year in which the
transfer occurs, or in the two tax years following the transfer.

In case of partial reinvestment, a partial relief (proportional to the investment made)
will apply. In case the reinvestment is not fully accomplished during the reinvestment
period, the difference (or the proportional difference) will be considered as taxable
income of the second year following the disposal, increased by 15%.

**Dividend income**
Dividend income is taxed in Cabo Verde (the prior exemption was revoked with the
introduction of the CIT Code).

Double economic taxation can be avoided if the following conditions are cumulatively
fulfilled:

- Direct or indirect participation in share capital of at least 10%.
- The participation is held consecutively for one year prior to the date at which the
  profits are made available.
- None of the entities benefit from a favourable tax regime (under the General Tax
  Code, it is considered a favourable tax regime if the national or foreign jurisdiction
  grants exemption, tax relief, or where the CIT rate applicable is lower than 10%).

Regarding individual shareholders, double economic taxation can be relieved on 50% of
the amount of dividend paid or made available.

**Interest income**
There is no special tax provision regarding interest income. Interest income is treated
and taxed as ordinary business income (excluding interest from bonds or similar
products listed in the securities market).

**Foreign income**
Resident companies are subject to taxation on foreign income. Cabo Verdean tax law
allows a foreign tax credit to mitigate the double taxation on foreign income taxed in
another jurisdiction (see Foreign tax credit in the Tax credits and incentives section).

PEs of non-resident companies are taxable on a territorial base principle, meaning that
income obtained outside Cabo Verde is not subject to taxation therein.
Deductions

Depreciation

Depreciation is considered a deductible cost with respect to all fixed assets (except land), up to the limits determined by the applicable tax law.

As a general rule, depreciation must be computed by using the straight-line method. Tax authorities may allow other depreciation methods on the basis that the actual depreciation is higher than the one calculated at regular rates or according to the taxpayer’s accounting practice.

Under the straight-line method, the maximum depreciation that is deductible is calculated by applying the general depreciation rates set out by the Decree No. 42/2015, of 24 August, to the adjusted purchase cost or production cost.

Land is not depreciable.

Goodwill
Goodwill is an asset subject to impairment tests. The goodwill’s impairment is not a deductible cost for tax purposes.

Start-up expenses
Start-up expenses include, among others, cost incurred with set-up and organisation of companies, projects, and increase of capital. Start-up expenses are considered a deductible cost up to the limits derived from the applicable tax law, 33.33% per year being deductible over a period of three years.

Interest expenses
Interest expenses are deductible if considered indispensable for the realisation of taxable profits/gains (see Thin capitalisation in the Group taxation section).

Bad debt
Bad debts are those where the related recovery risk is considered to be justified. According to the CIT Code, the recovery risk is justified whenever there is a:

- Company insolvency and recovery proceeding and enforcement procedure.
- Law court or arbitration court claimed debt.
- Overdue debt.

The deduction for tax purposes of impairment losses on overdue debt is subject to the following limits, computed on the amount of the debt:

Charitable contributions
Charitable contributions granted to certain entities whose main activity consists of the execution of initiatives in the social, cultural, environmental, scientific or technologic, sports, and educational areas are considered as cost for tax purposes (within certain limits, and in certain circumstances, with an additional deduction).

Fines and penalties
Tax fines and penalties are not deductible for tax purposes. Contractual fines and penalties are deductible for tax purposes.

Taxes
Taxes paid in connection with the activity of the company are tax deductible, excluding CIT and autonomous taxation. The annual IUP cannot be deducted as a cost for CIT purposes.

Net operating losses
Income tax losses can be offset against taxable profit and can be carried forward for seven years, capped at 50% of the taxable profit. Carryback of tax losses is not allowed in Cabo Verde.

According to the transitional regime, tax losses generated before 2015 can be carried forward for three years without limit.

The tax losses incurred by a company are not transferable to another company unless previously accepted by the tax authorities.
Cabo Verde

Payments to foreign affiliates
Currently, there are no special restrictions on the deductibility of royalties, interest, and service fees paid to foreign affiliates, provided that the payments are regarded as indispensable to generate taxable profits and gains and to maintain the business of the company.

Payments made to foreign affiliates located in a favourable tax regime are not accepted as deductible tax costs unless it can be demonstrate that the payment is a necessary cost and is not an exaggerated amount (i.e. it should be demonstrated that it is an acceptable/normal amount).

Group taxation
There is no special tax regime for groups of companies in Cabo Verde.

Transfer pricing
Commercial transactions between associated enterprises should be subject to identical terms and conditions to those that would be accepted and agreed between independent entities (arm’s-length principle).

Taxpayers must keep information and documentation regarding their transfer pricing policies on hand. The following taxpayers must prepare a transfer pricing documentation file:

- Entities classified as ‘Large Taxpayers’.
- Entities considered taxed under a privileged tax regime, as defined in the General Tax Code.
- PEs of non-resident entities.
- Other entities designated as such by the tax authorities.

Thin capitalisation
Net financing expenses are only deductible up to the higher of the following limits:

- CVE 330 million.
- 30% of earnings before depreciation, net financing expenses, and taxes.

Controlled foreign companies (CFCs)
The CIT Code contains specific CFC rules. Profits or income obtained by non-resident entities that are clearly subject to a more favourable tax regime are imputed to the resident taxpayers subject to CIT that hold, either directly or indirectly, even if through a representative, fiduciary, or intermediary, at least 25% of their share capital, voting rights, or attribution rights over the income or the assets of those non-resident entities.

Tax credits and incentives

Foreign Investor Status (Estatuto do Investidor Externo)
The Foreign Investor Status, which has granted some tax benefits at the level of the investor (e.g. exemption from WHT on distribution of profits and on interest related to the financing of the investment) was revoked by the New Investment Code with effect from 1 January 2013. The tax benefits already granted or for which recognition has been requested prior to the entry into force of the Tax Benefits Code and the Investment Code are maintained. Investment projects submitted for analysis and approval to the competent authorities prior to the entry into force of the Tax Benefits Code continue to be regulated under the legislation in force at the date of the respective submission.
Industrial activity
The following tax and customs benefits are provided for industrial activity:

CIT benefits
A CIT credit is available for up to 50% of the eligible investments made in an industrial activity. Any unused tax credit may be carried forward for ten years, subject to certain limitations.

Eligible investments include the acquisition of new fixed assets, patents, and licences regarding technologies.

IUP benefits
Industrial activities may benefit from an exemption from IUP on the acquisition of immovable property used exclusively for industrial purposes; however, the recognition of such tax exemption should be approved by the municipality.

Customs duty benefits
Industrial activities benefit from an exemption from customs duties on the import of construction material, machines, utensils, semi and finished materials, products, and raw materials used in the production of goods.

Stamp duty benefits
Financing transactions of industrial projects are exempt from stamp duty.

International Business Centre (IBC) of Cabo Verde
The Cabo Verdean Agency for Foreign Investment is the entity responsible for granting the licences to operate within the IBC, upon previous proposal of the Zona Franca Comercial S.A.. The following tax benefits are applicable to entities licensed to operate in the IBC on income from industrial or business activities and services in respect of operations carried out with other IBC licensed entities or with non-residents entities (without a PE in Cabo Verde).

Note that these tax benefits are not applicable to entities engaged in tourism, banking and insurance, real estate, or construction.

CIT benefits
Reduced CIT rates of 5%, 3.5%, or 2.5% are applicable to entities that create respectively 5, 20, or 50 jobs.

The CIT rate is 2.5% in case of the creation of two jobs for entities licensed to operate within the International Service Centre.

Entities licensed to operate within the IBC are granted to benefit from reduced CIT rates until 2030.

Shareholders benefits
Shareholders of the entities licensed to operate within the IBC are exempt from taxation on dividends and interest received.

VAT and customs duty benefits
All the exemptions foreseen in the VAT regulation and customs law apply.

An exemption from customs duties applies with respect to certain goods, equipment, and materials used within the scope of the activity developed and licensed under the IBC.
Tax and financial incentives for internationalisation of Cabo Verdean companies

A regime that provides for tax and financial incentives for investment projects in order to promote the internationalisation of Cabo Verdean companies is in force.

The following incentives, to be granted under a contract of not more than three years, apply to internationalisation projects of companies with head office and place of effective management in Cabo Verde that are undertaken before 31 December 2020.

CIT benefits

Investments that are eligible for the regime of tax benefits for internationalisation may benefit from:

- Reduced CIT rate of up to 50%, applicable until the term of the investment contract.
- Exemption from CIT on income obtained by qualified expatriate employees.

Additionally, a deduction for creation of employment ranging between CVE 26,000 and CVE 35,000 for each new job created may apply.

IUP benefits

An exemption from IUP may be available on the acquisition of immovable property for the establishment or expansion of the activity of the investor.

VAT and customs duty benefits

Exemptions provided for in the VAT Code apply, as well as customs duties incentives as provided for in the general applicable legislation.

Stamp duty and other benefits

An exemption from stamp duty is available on the incorporation of companies on an increase of share capital of existing companies, and on financing transactions.

An exemption from notary and registration fees is available on the incorporation and registration of companies.

Tax benefits for social housing

Entities responsible for the construction of social housing, duly authorised by the competent regulatory authority (Comissão de Coordenação e Credenciamento do Sistema Nacional de Habitação de Interesse Social or CCC-SNHIS), may benefit from the following:

- Only 30% of the income derived from the activity carried out within the scope of the social housing project is subject to CIT, under certain conditions.
- A refund of 80% of the VAT incurred in the Cabo Verdean market is available in cases where those entities carry exclusively exempt operations without the right to deduct input VAT.
- A reduction of 75% of customs duties levied on construction material listed in an annex to the diploma is available.

Development promotion entities, provided they are also authorised by CCC-SNHIS, are also eligible for VAT benefits.

Touristic Utility Status (Estatuto de Utilidade Turística)

Cabo Verde may grant Touristic Utility Status to certain touristic projects. Touristic Utility Status is granted to the following types of touristic projects:

- Installation: Granted to new touristic projects.
- Functioning: Granted to touristic projects starting to operate.
- Refurbishment: Granted to touristic projects in case of refurbishment projects with a value of at least 25% of the initial investment.
Touristic Utility Status generally allows for the following tax incentives and benefits:

- CIT credit of up to 50% of the eligible investments made in tourism, touristic promotion activities, and real estate tourism project investment.
- Exemption from IUP on the acquisition of real estate used for construction and installation of touristic projects if granted by the municipality.
- Exemption from customs duties on the importation of materials and equipment used in touristic projects.
- Exemptions from stamp duty on the financing of tourism investments.

**Tax incentives for renewable energies**

There is a regime for promotion, encouragement, and access, licensing, and exploitation inherent to the exercise of independent production and self-production of electricity based on renewable energy sources.

Water, wind, solar, biomass, biogas or industrial, agricultural or urban waste, oceans and tides, and geothermal are to be considered sources of renewable energy. Under the regime, renewable energy producers may benefit from the following.

**CIT benefits**

A CIT credit is available for up to 50% of the eligible investments made in renewable energies projects.

**Customs duty benefits**

An exemption from customs duties and other customs charges applies on the importation of capital goods, raw materials and supplies, finished and semi-finished products, and other materials that are incorporated or used in the production of goods or services involved in the production of electrical energy from renewable sources.

**IUP and stamp duty**

Exemptions from IUP and stamp duty are granted on the acquisition of immovable property and other assets related to the investment project or its financing.

**Shipping transport industry incentive**

**CIT benefits**

A CIT credit is available for up to 50% of the eligible investments made in shipping, air, and sea transportation projects.

**Customs duty benefits**

An exemption from customs duties applies on the importation of shipping material for the maintenance, production, and repair of shipping and respective equipment.

**IUP and stamp duty**

Exemptions from IUP and stamp duty are granted on the acquisition of immovable property and other assets related to the investment project or its financing.

**Job creation incentives**

Entities taxed under the verification method are entitled to deduct the following amounts for each created permanent job:

- CVE 26,000 for each job created in the municipalities of Boa Vista, Praia, and Sal.
- CVE 30,000 for each job created in the remaining municipalities.
- CVE 35,000 in case of a disabled person.

**Media, telecommunications, and internet**

Importation of good, materials, equipment, vehicles, and other equipment exclusively for the purpose of telecommunications and media are exempt from customs duties.
Cabo Verde

Tax benefits to the financial sector
The Tax Benefit Code has several measures in the financial sector, as follows.

Financial investments
Income derived from certificates of deposit and long-term bank deposits benefit from a CIT exemption of up to 75% (depending on the maturity date of the deposits).

Securities market (bonds)
Income derived from bonds or similar products (except public debt securities) listed in the securities market obtained until 31 December 2017 benefit from a 5% CIT flat rate.

Additionally, dividends from shares listed in the stock exchange, placed at the disposal of its holders until 31 December 2017, are exempt from CIT.

Investment funds (securities and real estate funds)
Income derived from securities funds, when established and operating under the Cabo Verdean legislation, is taxed as follows:

- Income obtained in the Cabo Verdean territory is exempt from CIT (except capital gains).
- Foreign income is subject to a 10% CIT flat rate (except capital gains).
- Capital gains are subject to a 10% CIT rate.

Income derived from real estate funds, established under the Cabo Verdean legislation, is taxed as follows:

- Real estate income benefits from a 10% CIT rate (after deduction of the respective expenses).
- Capital gains benefit from a 15% CIT rate over 50% of the income, resulting in an effective rate of 7.5%.

Income received by unit holders in securities funds and real estate investment funds, established under Cabo Verdean legislation, is exempt from CIT.

Venture capital funds
Income derived from venture capital funds, established under Cabo Verdean legislation, as well as income received by the unit holders in venture capital funds, is exempt from CIT.

International financial institutions
International financial institutions within the scope of Law 43/III/88 and revoked by Law 61/VIII/2014, of 27 December, benefit from:

- Customs duties exemption on the importation of materials and equipment that are exclusively for the setting-up of the financial institution.
- CIT exemption until 31 December 2017 and a 2.5% CIT rate from 1 January 2018 onwards.
- Stamp duty exemption in transactions with non-residents entities.

Individuals and entities considered as clients of such international financial institutions, benefit from:

- CIT exemption, regardless of the type of income.
- Stamp duty exemption.
Holding companies (Sociedades Gestoras de Participações Sociais)
Capital gains or losses realised by holding companies, as well as financing expenses incurred with the acquisition of shares, held for at least 12 months, are not taken into account for the purposes of computation of the taxable profit of such holding companies.

This rule does not apply in case of shares acquired from associated enterprises or from entities located in territories with a more favourable tax regime.

Exemption of WHT is granted on the payment of income made by affiliate entities held for at least 12 months with a share capital of at least 10%.

**Tax benefits with social nature and customs duties benefits**

**Training, internships, and grants**
Companies taxed under the verification method may deduct 150% of the following costs:

- Costs related to the training of employees.
- Costs associated with the hiring of young people for internship positions.
- Costs associated with scholarships granted to students.

**Donations**
Companies may deduct 130% of the amounts donated to the following entities and activities, up to 1% of the turnover, under certain conditions:

- Entities that develop, among others, social, cultural, sportive, educational, environmental, scientific, technological work, and health services.
- State, municipalities, and any other public services.
- Municipal associations.
- Foundations.

**Customs duties benefits**
Under certain conditions, the following business sectors, among others, may benefit from customs duties exemption on the importation of products, materials, and equipment related to the activity/project:

- Agriculture, livestock, and fishing activity.
- Civil aeronautics.
- Diplomatic and consular missions.
- Aid to economic development.
- Foreign citizen retired.
- Sports and musicals.
- Fire corporation.

**Tax benefits to other sectors of investment**
Eligible investments made in activities such as information technology and scientific research may benefit from:

- CIT credit of up to 50%.
- Exemptions from IUP, stamp duty, and customs duties on the acquisition of immovable property and other assets related to the investment project or its financing.

**Tax benefits regarding the Recovery of Business and Insolvency Code**
It is expected that new CIT, personal income tax (PIT), stamp duty, and property tax benefits will be implemented for companies under recovery of business and insolvency procedures. These will apply once the Recovery of Business and Insolvency Code enters into force.
Exceptional regime of tax debt regularisation for tax debt

There is an exceptional regime of tax debt regularisation for debt whose legal payment period ends until 31 December 2015, applicable to all tax debts declared by the taxpayer and tax debts required in tax enforcement proceedings for the purpose of enforcing payment, established until 31 December 2015.

The Regime provides the remission of compensatory interest and default interest and reduction of the costs of the tax enforcement process and penalties in cases of debt payment in cash, in whole or in part, over up to 12 monthly instalments.

Foreign tax credit

Cabo Verdean tax law allows a foreign tax credit to mitigate the double taxation on foreign income taxed in another jurisdiction. The tax credit is equal to the lesser of: (i) the income tax paid abroad or (ii) the CIT fraction calculated before the deduction is given corresponding to incomes that may be taxed in the country concerned, net from any cost or losses, directly or indirectly incurred, for the purposes of its realisation. Foreign tax credit cannot exceed the tax foreseen in the tax treaty, if applicable.

Withholding taxes

Dividends are subject to WHT at a rate of 10%. The WHT may be waived if the following conditions are cumulatively fulfilled:

- Direct or indirect participation in share capital of at least 10%.
- The participation is held consecutively for one year prior to the date at which the profits are made available.
- None of the entities benefit from a favourable tax regime as defined in the General Tax Code.

Interest payments, in general, are subject to WHT at a rate of 20%.

Bond interest is subject to WHT at the rate of 10%, except bonds and similar financial products (except public debts) duly listed on the stock exchange, which are subject to CIT at the reduced rate of 5%.

Royalty payments are subject to WHT at the rate of 20%.

Payments of services between resident companies are generally not subject to WHT.

Rental payments are subject to WHT of 20% when paid or made available by companies. However, rental payments between resident companies are, generally, not subject to WHT.

For a Cabo Verde-based recipient, tax withheld is a payment on account against the final income tax due regarding income derived from (i) business, commercial, and services activities, (ii) real estate income, and (iii) employment income when the beneficiary of such income opts to file a tax return.

Any non-Cabo Verdean resident entity carrying out an economic activity in Cabo Verde is subject to a final WHT at the same rates applicable to each income category foreseen but the Tax Code.

Regarding income paid to micro and small-sized companies, the WHT applicable is 4%.

Tax treaties

Under the Cabo Verde/Portugal tax treaty, WHT is limited as follows:
• Dividends: 10%.
• Interest: 10% (0% applies to interest paid by public bodies).
• Royalties: 10%.

The tax treaty signed between Cabo Verde and Macau has entered into force. WHT is limited as follows:

• Dividends: 10%.
• Interest: 10%.
• Royalties: 10%.

The tax treaty signed between Cabo Verde and Guinea Bissau has entered into force. WHT is limited as follows:

• Dividends: 5%. However, there is a WHT exemption (WHT at the rate of 0%) if a direct or indirect participation in share capital or voting rights of at least 5% is held, consecutively, for 24 months prior to the date at which the profits are made available.
• Interest: 10%.
• Royalties: 10%.

Tax administration

Taxable period
As a general rule, the tax year is the calendar year. A different tax year may be applied, subject to authorisation from the Ministry of Finance, in the case of non-resident companies with a PE in Cabo Verde and in other situations duly justified by economical reasons.

Tax returns
Taxpayers are required to file a tax return by 31 May of the year following the end of the tax year.

Payment of tax
Corporate taxpayers taxed under the standard regime must make three pre-payments on account of their income tax liability for the current tax year. The pre-payments are due by the end of March, July, and November and amount to 30%, 30%, and 20%, respectively, of the preceding tax year’s income tax liability or the most recent year with a positive result.

Taxpayers are required to self-assess the tax due by 31 May of the year following the end of the tax year.

Micro and small-size companies are also subject to pre-payments, at a 4% tax rate levied on the annual turnover (sales and services), due by the last day of April, July, October, and January of the following year.

Tax audit process
There are no specific rules regarding the tax audit cycle in Cabo Verde.

Statute of limitations
The statute of limitations period in Cabo Verde is for five years.

Topics of focus for tax authorities
The main topics of focus for the Cabo Verde tax authorities include cost incurred on vehicles, communications, representation expenses, personnel costs, management fees, and payments to non-residents.
Cabo Verde

**Large Taxpayers**
Taxpayers that meet at least one of the following criteria qualify as a ‘Large Taxpayer’ and shall be monitored by the Special Tax Office for Large Taxpayers:

- Turnover exceeding CVE 200 million, based on the annual income tax return.
- High level of inherent risk, based on a matrix developed by specific software.
- Taxes paid exceeding CVE 15 million, correspond to the sum of payments of CIT, WHT, VAT, and stamp duty.

**Other issues**

**United States (US) Foreign Account Tax Compliance Act (FATCA)**
Cabo Verde and the United States have reached an ‘agreement in substance’ on a Model 1 Intergovernmental Agreement (IGA), in which Cabo Verde consented to disclose this status as of 30 June 2014.
Significant developments

As of 1 January 2016, the following significant corporate tax developments were introduced in Cameroon by the 2016 Finance Law:

- Sums paid for the use of valid patents, brands, designs, and models are henceforth capped at the overall limit of 2.5% of the taxable income before the deduction of expenses claimed only when such sums are paid to firms participating directly or indirectly in the management or capital of a Cameroonian firm.
- Losses due to damage in inventories shall be deductible from the taxable basis when they are duly established and validated by a Commissioner of damage in the presence of a taxation officer.
- The deadline for the reduced corporate income tax (CIT) rates granted to companies whose ordinary shares are listed on the Cameroon Stock Exchange has been extended for three years, with effect from 1 January 2016 (see Incentives applicable to listed companies in the Tax credits and incentives section for more information).
- Mobile telephone communications and internet services are henceforth subject to excise duties at an extra-reduced rate of 2%.
- Public orders for fuels and lubricants, regardless of the purchase or payment method, shall be exempted from registration duty and stamp duty.

Taxes on corporate income

Resident corporations in Cameroon are taxed on their worldwide income; non-resident corporations are taxed only on Cameroon-source income.

The following shall be deemed to be operating in Cameroon and subject to CIT:

- Undertakings headquarterd in Cameroon or with an effective management office in Cameroon.
- Undertakings that have a PE in Cameroon or with an effective management office in Cameroon.
- Undertakings that have a dependent representative in Cameroon.
- Undertakings that carry out activities that form a full commercial cycle in Cameroon.

The profits subject to CIT are determined with sole regard to profits earned by entities located in Cameroon (for residents) or transactions effected in Cameroon (for non-residents having a permanent establishment [PE] in Cameroon).

The net taxable profits are established after deduction of all charges directly entailed by the exercise of activities subject to assessment in Cameroon.

The total Cameroon CIT rate is 33%.
Minimum tax
There is a 2.2% or 5.5% minimum tax in Cameroon based on turnover and depending on the tax regime of the taxpayer. The advance payment shall be 10% for any taxpayer that is not on the register of a tax office. The 10% rate also applies to remunerations paid to non-salaried sales agents or representatives and agents of direct network sales. The 15% rate applies to taxpayers not registered with a taxation centre and engaged in import activities. The 15% rate shall be increased to 20% where the taxpayer carries out the sale of in-bond goods. This minimum tax is an instalment of CIT. As such, it shall be offset against CIT. The minimum tax is the sole tax payable if it is greater than CIT.

Local income taxes
A local tax of 10%, called Additional Council Tax, generally applies to the following taxes:

- CIT.
- Personal income tax (PIT).
- Withholding tax (WHT) on income from stock and shares.
- Value-added tax (VAT).

The rate provided in this summary for each tax above is therefore inclusive of a basic rate plus 10% surcharge.

Corporate residence
An entity is deemed resident if its registered office, centre of activity, or management is located in Cameroon; if it has resident employees in Cameroon that provide services to customers; or if it has a PE in Cameroon.

Permanent establishment (PE)
Undertakings that have a PE in Cameroon or with an effective management office in Cameroon shall be deemed to be operating in Cameroon and subject to CIT.

PE shall mean a physical installation with certain fixity and with a certain degree of autonomy through which the foreign company carries out wholly or part of its business.

Other taxes
Value-added tax (VAT)
VAT shall be levied on natural persons or corporate bodies that automatically, habitually, or occasionally carry out taxable transactions consisting of provisions of services or sales of goods.

The total VAT in Cameroon is 19.25%. Exports are zero rated. The VAT paid upstream is recoverable, except where otherwise stated.

Note that VAT is invoiced only by natural and legal persons whose turnover (taxes excluded) is equal to or above 50 million Communauté Financière Africaine francs (XAF) and who are under the tax regime of actual earnings.

Customs duties
Customs duties of between 5% and 30%, depending on the nature of the goods imported, are levied based on the customs value.

The 2016 Finance Law has re-established the rate of the Common External Tariff (CET) on some products, such as rice and cement. As such, the import of rice, which previously
benefitted from the suspension of duties and taxes, is henceforth subject to the CET at the rate of 5%, and the CET rate has been revised upwards for some types of cement.

**Excise taxes**
An excise duty of 25% is applicable to cigarettes, drinks, cosmetics, luxury items (e.g. jewels, precious stones), slot machines, and other devices used for games of chance. A reduced rate of excise duty (12.5%) shall apply to soft drinks and private vehicles with engine capacities of 2,000 cm³.

The 2016 Finance Law has instituted an extra-reduced rate of excise duties at 2% applicable to mobile telephone communications and internet services.

Deductions initially made as excise duties shall be subject to regularisations by tax officials in case of reselling throughout the national territory.

There are minimum excise duties applicable to alcoholic beverages and tobacco. For tobacco, the minimum tax shall not be less than XAF 3,500 for 1,000 cigarette rods. For alcoholic beverages, the minimum tax depends on the nature of the alcohol and the alcohol level per litre.

**Real property tax**
Cameroon property tax is payable annually on real estate with or without an ownership certificate or an administrative or judicial order issued. Tax is charged at 0.1% of the assessed property value.

According to the 2016 Finance Law, taxpayers who voluntarily regularise their property tax in the 2016 financial year shall be exempted from the payment of tax arrears for the non-prescribed period as well as from related penalties. At the end of the 2016 financial year, no tax or penalty remission will be granted on the land tax for the non-prescribed period.

Properties belonging to clubs, associations, or sporting bodies’ accredited properties intended for sports and sports facilities are exempt from real property tax.

**Transfer tax**
The sale of a business in Cameroon is subject to a transfer tax rate of 15%.

**Registration duty**
The registration duty applies to certain deeds listed by the General Tax Code (GTC). The assessment basis depends on the nature of transactions, and the rate varies from 1% to 15%.

The formation of a company and subsequent capital increases in Cameroon are not subject to registration duty.

Public contracts or orders paid from the budget of the state, regional, and local authorities; public institutions, public corporations, and semi-public companies; or through external financing shall be subject to registration duty at the rate of 2% for amounts below XAF 5 million and 5% for amounts at or above XAF 5 million.

As of 1 January 2016, public orders for fuels and lubricants, regardless of the purchase or payment method, shall be exempted from registration duty and stamp duty.

The following transactions are subject to registration duty at the rate of 2%:

- The transfer of shares and bonds of commercial or civil companies with registered offices outside of the Economic and Monetary Community of Central Africa (CEMAC)
zone when said instruments are utilised or when the transfer produces consequences in a CEMAC country.

- The transfer (even indirect) in Cameroon or abroad of shares and bonds of companies with registered offices in Cameroon.

**Stamp duty**
Stamp duty in CEMAC countries is established, independent of registration fees, on all papers to be used for civil and legal instruments and documents that may be brought before law courts as proof. It shall be collected on the basis and in accordance with the rules laid down in the GTC.

Stamp duty shall be fixed according to the nature of the instruments subject thereto. There shall be no exemptions except those expressly indicated in the GTC.

The maximum and minimum stamp duty based on paper size are fixed at XAF 1,500 and XAF 1,000, respectively, in Cameroon.

**Business licence tax**
Any natural person or corporate body carrying on a trade, industry, or profession in Cameroon shall be liable to a business licence tax. The business licence tax is paid annually according to a graduated scale and is assessed on turnover.

New enterprises shall be exempt from the payment of the business licence tax during the first year of operation.

**Payroll tax**
Employers in Cameroon are required to make monthly contributions of 2.5% of the total amount of salaries and fringe benefits of their employees to the Housing Loan and Employment Fund of Cameroon.

**Social security contributions**
Employer and employee must contribute on a monthly basis to Cameroon’s National Social Insurance Fund at 11.2% and 4.2%, respectively. The basis of contribution is capped at XAF 750,000 per month (i.e. XAF 9 million per year). Employers in Cameroon must also contribute 1.75%, 2.5%, or 5% of total salaries to the National Social Insurance Fund for Industrial Accidents when they are respectively classified in groups A, B, or C according to the classification per type of activity. The calculation basis in this category is the gross salary, including the benefits in kind assessed for their actual amount.

**Branch income**
The local branch of any foreign company is taxed at the same rate as a company. The net profits (after CIT) of entities having their residence or head office outside Cameroon (such as the branch of a foreign company) are assumed to be distributed each fiscal year to companies not located in Cameroon. Their net profits (after CIT) shall therefore be subject to the WHT on distributions at 16.5%.

**Income determination**

**Inventory valuation**
For valuation purpose, the GTC only provides that stocks shall be valued at cost price; however, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory. No reference is made to the accounting method that shall be used (e.g. first in first out [FIFO], last in first out [LIFO]). Only FIFO and weighted average methods are allowed under the Organisation for the Harmonisation
of Business Law in Africa (OHADA) Accounting Principles. Where there is any difference between the valuation method permitted by the GTC and the book valuation, the accounting result shall be modified accordingly.

As of 2016, firms shall, by 15 March, submit a summary of all the stock movements of the financial year concerned, together with the software used in managing the said stock. The summary of inventory movements should be produced in dematerialised form.

The 2016 Finance Law has instituted the right of ascertainment of stocks by the tax administration. As such, tax officers shall conduct unannounced on-site operations to physically audit the stocks of one or several products of the non-prescribed period. A notice of passage shall be remitted to the taxpayer or representative during the first intervention within the framework of such audit.

**Capital gains**
Capital gains are normally taxed at full CIT rates.

The net overall capital gains arising from the transfer of shares and stocks; income from bonds; income from debts, deposits, surety-bonds, and current accounts; profits realised from the transfer of shares; reimbursement of sums put at the disposal of the company by a manager or a partner as an advance or a loan; and capital gains on the transfer of rights relating to natural resources shall be subject to 16.5% WHT.

For transfers realised abroad, the Cameroonian law enterprise and the transferor shall be jointly and severally liable to payment of the sums due under such transfer.

**Dividend income**
Dividends are subject to the WHT of 16.5%. However, dividends shall be treated as proceeds for the purpose of CIT, and the tax withheld at source is used as instalment for the payment of CIT.

**Interest income**
Interests are subject to the WHT of 16.5%. However, interests shall be treated as proceeds for the purpose of CIT, and the tax withheld at source shall be used as instalment for the payment of CIT.

Interests on external loans of a maturity period of at least seven years, signed as of 1 January 2014, are exempted from the WHT.

**Foreign income**
As a matter of both fact and law, revenue from abroad earned by corporate bodies situated in Cameroon shall be subject to CIT in Cameroon. There is no provision on tax deferral in Cameroon.

**Deductions**

**Depreciation**
Depreciation is generally computed on a straight-line basis over the useful life according to the rates provided for by the GTC, including those that might have already been deferred in times of deficit.

The following depreciation rates are generally accepted for tax purposes:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rates (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Construction</td>
<td>5 to 20</td>
</tr>
<tr>
<td>Stationary equipment and tools</td>
<td>5 to 20</td>
</tr>
</tbody>
</table>
The deduction of depreciation can be carried forward indefinitely.

**Goodwill**

With regard to rules governing the deduction of provisions and depreciation, impairment of goodwill shall be allowable for CIT purposes.

**Start-up expenses**

There is no specific provision in the GTC relating to start-up expenses.

However, the OHADA Accounting Principles effectively state that start-up expenses shall be capitalised and must be completely depreciated as early as possible: over two to five years, except bond premiums, which are depreciated throughout the life of the loan.

No distribution of profit should be carried out before the complete depreciation of start-up expenses.

**Intellectual property (IP)**

Sums paid to related entities for the use of valid patents, brands, designs, and models are capped at the overall limit of 2.5% of the taxable income before the deduction of expenses claimed. When they are paid to entities located outside the CEMAC that directly or indirectly hold shares or are members of the Cameroonian entity’s board of directors, they shall be considered as sums accruing from the distribution of profits. As such, they are not allowable.

**Interest expenses**

Interest expenses are fully deductible.

However, interest paid to partners/shareholders in respect of the sums they leave with or place at the disposal of the company over and above their capital, irrespective of the type of company, shall be acceptable within the limits of those calculated at the rate of the central bank discount rate, raised by two points.

**Bad debt**

The deductibility of provisions for bad debts is subject to the following conditions:

- The debt must be specified (i.e. clarification is needed on the nature, amount, and the debtor).
- The company must show that it has unsuccessfully carried out actions for debt recovery (e.g. reminder letters, notice to pay, complaints).

For losses related to bad debts to be deductible, they should have been subjected to all amicable or forced collection methods and means provided for by the OHADA Uniform Act on the Organization of Simplified Procedures for Collection and Enforcement Procedures. Otherwise, they shall not be deductible.

In this regard, the impossibility of recovering the debt must be evidenced by:

- a deficiency report prepared by a bailiff
Cameroon, Republic of

• a bankruptcy decision duly passed by the judge, if necessary, or
• a decision passed by a judge, bearing out the debtor who disputed the debt.

**Charitable contributions**

Acts of liberality, gifts, and subsidies shall not represent the charges deductible from profits.

However, payments made to research and development (R&D) bodies and to collective philanthropic, educational, sports, scientific, social, and family institutions and bodies, on condition that the latter are situated in Cameroon, shall be deductible as soon as there is proof of payment and as long as they do not exceed 0.5% of the turnover for the fiscal year. Similarly, gifts made on the occasion of a disaster shall be deducted in the form and conditions determined by order of the Minister of Economy and Finance.

Liberalities, gifts, and subsidies awarded to clubs participating in the elite national competitions or to recognised organisations responsible for the organisation of official sport competitions are deductible, provided they are justified, within the limit of 5% of the annual turnover.

**Fines and penalties**

Compounding fees, fines, confiscations, and any penalty concerning persons who violate legal, economic, and fiscal provisions shall not be deducted from the profits subject to taxation.

**Taxes**

Only the professional taxes issued for collection during the fiscal year and which are to be borne by the firm in relation to the operations carried out in Cameroon shall be subject to deduction.

CIT, WHT, and PIT shall not be considered as deductible expenses for the levying of taxes.

**Net operating losses**

Any loss sustained in a given year can be carried forward up to the fourth year following the recording of the loss. The carryback of losses is not permitted in Cameroon.

As of 1 January 2016, losses due to damage in inventories shall be deductible from the taxable basis when they are duly established and validated by a Commissioner of damage in the presence of a taxation officer with the rank of at least an inspector, under the conditions specified in the Manual of Tax Procedures.

**Payments to foreign entities**

Head office overhead expenses for operations carried out in Cameroon and the remuneration of certain effective services (studies, technical, financial, or accounting assistance) provided to Cameroonian firms by foreign natural persons or corporate bodies are not totally deductible.

Fees paid are deductible up to a maximum of:

• 5% of intermediary earnings as a general rule
• 2.5% of the turnover for firms specialised in public works, and
• 7.5% for design firms operating in accordance with regulations relating to design firms and consulting engineers.

The notion of technical assistance shall include services provided by entities located either overseas or in Cameroon.
Expenses linked to transactions with natural persons or legal entities resident or established in a territory or state considered to be a tax haven shall not be deductible. This rule shall not apply to imports of goods made in those countries. A tax haven is any state where the tax on the income of a natural person (PIT) or legal entity (CIT) is less than a third of that paid in Cameroon, or any state or territory considered not to be co-operative in matters of transparency or of exchange of information required for fiscal purpose by international or financial organisations. The rate to be considered in Cameroon for that purpose is 35% for PIT and 30% for CIT.

**Group taxation**

There is specific taxation of groups within the CEMAC area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of the following conditions are met:

- The stocks or shares owned by the parent establishment represent at least 25% of the capital of the subsidiary firm.
- The parent and subsidiary firms have their registered office in a CEMAC state (Cameroon, Central African Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company that undertakes to retain them for at least two consecutive years in registered form.

**Transfer pricing**

There are provisions in the GTC that relate to transfer pricing.

Within the framework of a tax audit, the documents required for the justification of transfer pricing shall be presented to the tax inspectors at the start of the procedure. Items such as business transactions, payments in consideration for intangible rights, allocations of costs and expenses (head office costs, agreements to share costs, disbursements, etc.), financial transactions, etc. are particularly targeted for close scrutiny.

Companies in the Large Taxpayers Unit (LTU) shall declare participation in companies that are equal to or more than 25% of the share capital of the latter, as well as the supporting documents for intra-group transactions, at the same time as their annual tax return.

**Thin capitalisation**

The deduction of interests on sums of money left or placed at the disposal of local entities by partners or related companies who directly or indirectly own at least 25% of the share capital or corporate voting rights is capped at:

- one and a half times the amount of equity or
- 25% of profit before corporate tax and before deduction of the said interests and amortisations taken into account in determining such profit.

Otherwise, interests on the excess amount shall not be deductible.
Cameroon, Republic of

**Controlled foreign companies (CFCs)**
We are not aware of any special provisions for CFCs. Indeed, subject to the provisions of international conventions and the provisions relating to group taxation mentioned above, revenue from stocks and shares held in a company based abroad shall be subject to income tax in Cameroon.

**Tax credits and incentives**

**Foreign tax credit**
Taxes paid abroad are not considered as tax credits unless provided as such by international tax treaties.

**The system of reinvestment relief**
This system of reinvestment relief previously provided by the GTC has been cancelled by the 2015 Finance Law.

**The private investment tax incentive regime**
The private investment tax incentive regime applies to investment operations relating to the creation, extension, renewal, refurbishing of assets, and/or the transformation of activities carried out in Cameroon.

The major tax advantages related to the private investment regime in Cameroon are the following:

- During the installation phase: Tax incentives for a maximum period of five years.
- During the exploitation phase: Tax incentives for a maximum period of ten years.
- For the development of existing companies: Tax incentives for a maximum of five years.
- Possibility of specific advantage for prioritised sectors.

Tax and customs incentives granted to investors consist of exemptions from or reductions of payment of several taxes, duties, and other fees listed.

**Incentives applicable to listed companies**
Companies whose ordinary shares are listed on the Cameroon Stock Exchange shall be entitled to the following CIT reduced rates:

- 22% for a period of three years for capital increases that represent at least 20% of the share capital.
- 27.5% for a period of three years for transfers of shares that represent at least 20% of the share capital.
- 30.8% for a period of three years from the date of listing for capital increases or transfers of shares that represent less than 20% of the share capital.

According to the 2016 Finance Law, such reduction shall be granted to companies listed on the stock market within three years, with effect from 1 January 2016.

Companies whose ordinary shares are listed on the bond market in Cameroon shall be entitled to pay basic CIT at a reduced rate of 33% for three years, effective from the date of listing.

**Withholding taxes**

**Special income tax**
A special tax is levied at an overall discharging rate of 15% on income paid to natural persons and corporate bodies domiciled outside of Cameroon by enterprises or
establishments based in Cameroon for various services provided or used in Cameroon. The tax is withheld at source by the Cameroonian entity that pays the remuneration.

The special income tax at an overall rate of 15% is also levied on income paid to natural persons and corporate bodies domiciled out of Cameroon as remuneration for deliveries of all sorts of public contracts or orders paid from the budget of the state, regional, and local authorities; public institutions, public corporations, and semi-public companies; or through external financing.

It has been clearly highlighted that software acquired overseas shall be subject to the 15% WHT.

**Non-commercial profits WHT**
The 2015 Finance Law has set up a 16.5% WHT to be deducted at source by entities that pay remunerations granted to the board members of public institutions, public corporations, and semi-public companies in any capacity.

The 2016 Finance Law has reduced the tax rate applicable to non-commercial revenue from 16.5% to 11% to be deducted at source by entities that pay the following:

- Allocations of any nature, such as allowances, gratuities, compensations, and daily subsistence allowances granted, in addition to salaries, by public and semi-public entities, excluding statutory compensations falling under the category of wages and of salaries, and reimbursement of costs, the list of which shall be established by decision of the Minister in charge of finance.
- Amounts, allowances, allocations, or remunerations of any nature paid to sportsmen and artists, irrespective of their tax domicile.

**Dividends WHT**
A total WHT of 16.5% applies to dividends paid to both Cameroon residents and non-residents. The WHT rate may be reduced under an applicable tax treaty.

**Interest WHT**
The interest from foreign loans is subject to 16.5% WHT. The WHT rate may be reduced under an applicable tax treaty.

Interests on external loans of a maturity period of at least seven years, signed as of 1 January 2014, are exempted from the WHT.

**Royalties WHT**
Royalties paid to non-residents are subject to a 15% WHT (the 10% surcharge is not applicable). The tax rate may be reduced under an applicable tax treaty.

**Tax treaties**
Cameroon has tax treaties with Canada, France, Tunisia, and members of CEMAC (Cameroon, Gabon, Equatorial Guinea, Congo, Chad, and Central African Republic).

Tax administration

Taxable period
The tax year in Cameroon is the calendar year.

Tax returns
On or before 15 March, taxpayers are expected to submit to the tax administration the annual return of revenue derived from their business venture during the period serving as the tax base.

This return must be presented in conformity with the OHADA accounting system.

No one may invoke a claim on the state to shirk their return and payment obligations.

Despite the declarative tax system applicable in Cameroon, the tax administration may send a pre-completed return of collected revenue or any other taxable item, with the tax amount owed, to any natural or legal person paying taxes or duties as per laws and regulations in force.

The taxpayer that feels overtaxed or wrongfully taxed under a pre-filled tax return procedure shall submit a request for correction to the competent taxation centre within one month of receipt of such return. In such case, the tax authorities and the taxpayer shall have 30 days within which to decide the final taxes established by a collection notice (CN).

Failure to pay within 15 days of receiving the CN or respond to a pre-filled tax return in time shall be tantamount to accepting the terms thereof.

Other tax filings
As of 2016, firms falling under a dispensational or special tax regime shall file, by 15 March, a summary declaration of transactions of the previous year for which they obtained tax benefits, including theoretical taxes and levies corresponding to the said transactions.

Payment of tax
An instalment representing the 2.2% or 5.5% minimum tax of turnover realised during each month shall be paid to the tax authorities not later than the 15th day of the following month.

Advance payment of 0.5%, 2%, 5%, 10%, 15%, or 20% is withheld at source by the buyer or the customs administration on purchases and imports destined to be resold, depending on the tax regime applicable to the buyer or importer. See Minimum tax in the Taxes on corporate income section for more information.

The balance of CIT is paid, at the latest, on 15 March following the fiscal year-end, when submitting the CIT return.

Surplus tax payments
A surplus tax payment can be offset against future taxes of the same nature to be paid. For the specific case of VAT, a reimbursement process is provided for by the GTC under certain conditions.

Tax audit process
There is no audit cycle in Cameroon.

Statute of limitations
The statute of limitations is four years.
Topics of focus for tax authorities
The topics of focus for tax authorities include the following:

• Remunerations paid for services provided to local entities by providers located overseas.
• Transfer pricing.
• Deduction and reimbursement of VAT.
• WHT.
• Stocks (inventory valuation and management).
**Significant developments**

There have been no significant corporate tax developments in Chad during the past year.

**Taxes on corporate income**

The profits subject to the corporate tax are determined with sole regard to profits earned by businesses carried out or transactions conducted in Chad.

Net taxable profits are established after deduction of all charges directly entailed by the exercise of activities subject to assessment in Chad. As income from other countries is not liable to tax, foreign charges and losses are not deductible either.

The corporate tax rate is 35% (prior to fiscal year 2015, the rate was 40%).

**Minimum tax**

There is a minimum tax of 1.5% based on turnover and an additional 1 million Central African CFA francs (XAF) as the minimum/floor amount.

**Local income taxes**

There are no local income taxes in Chad.

**Corporate residence**

Registered entities (i.e. companies, branches, and subsidiaries) conducting economic activities in Chad are liable to pay corporate tax. Specifically:

- Limited companies.
- Limited partnerships with shares.
- Limited liability companies.
- Cooperative societies and their unions.
- Public institutions.
- Agencies of the state with financial autonomy.
- Municipal bodies and any other legal entity engaged in an operation for gain.
- Real estate companies, regardless of their form.
- Civil companies, other than real estate companies, involved in industrial, commercial, or agricultural activities.
- Limited partnerships, on the share of profits relating to the rights of sponsors.
- Associations in participation, including financial syndicates, on the share of profits relating to the rights of sponsors.
- Co-owners of shipping companies, on the share of profits relating to the rights of sponsors of associated co-owners, other than those with unlimited liability or whose names and addresses are not listed with the tax administration.
Permanent establishment (PE)
According to the Economic and Monetary Community of Central Africa (CEMAC) Fiscal Convention, a legal person is domiciled in one’s ‘permanent home’; this expression denotes the centre of vital interests, i.e. the place with which personal relations are closer.

Consequently, the domicile (permanent home) of legal persons is the place of the registered office or the statutory social place. It constitutes PEs such as:

- The head office of management.
- A branch.
- An office.
- A factory.
- A workshop.
- A mine, quarry, or other place of extraction of natural resources.
- A building or construction site or assembly.
- A facility used for storage, display, or delivery of goods belonging to the business.
- A warehouse belonging to the business, stored for storage purposes, and of display of delivery.
- A fixed installation of business used for the purpose of purchasing goods.

Other taxes

Value-added tax (VAT)
The VAT rate applicable in Chad is:

- 18% on all taxable operations.
- 0% on exports and their related international transportations.

An operation performed in Chad that constitutes an economic activity and for which payment is made, unless included in the list of exemptions in the law governing VAT, is liable for VAT, even if the residence of the natural person or the registered office of the legal entity is located outside Chad.

The VAT law provides a list of transactions exempted from VAT that includes, among many others, the following:

- Sales of products that are directly made by farmers, cattle farmers, or fishermen to consumers, farming, and fishing operations.
- Import operations and sales of newspapers and periodicals, other than the advertising revenues.

There are no specific rules relating to refunds to non-residents.

There are no refunds of the excess in practice. If the amount paid exceeds the VAT payable, the credit can be offset against the VAT payable as long as 12 months have not passed since the birth of this credit. After that, it becomes a loss, which is deductible under corporate tax. The deductibility of a VAT credit under corporate tax is subject to a certificate of VAT credit delivered by the General Tax Director after a VAT audit.

Customs duties
The tax basis of customs duties corresponds with the customs valuation, namely the selling price of the goods plus cost of delivery to Chad (costs of insurance, transportation, etc.).

The rates of customs duties depend on the nature of the goods and range from 5% to 30%. These rates can be summarised as follows:
• Goods of first need (basic necessities): 5%.
• Raw materials and goods of equipment: 10%.
• Intermediate and miscellaneous goods: 20%.
• Consumer goods: 30%.

**Excise duty**

Excise duty applies to goods of great consumption: cigarettes, drinks (water, beer, and wine), cosmetics, and luxury products. Excise duty rates depend on the nature of the goods and range from 5% to 25% of the value of the good.

Some of the rates are as follows:

• Water: 5%.
• Beer and wine: 25%.
• Perfume, jewellery, electronic devices (except computers, telephones etc.), private vehicles with an engine capacity above 1600 cm³, and weapons: 20%.
• Compound alcoholic preparations: 25%.
• Tobacco (all types): 25%.

This value differs depending on the origin of the good. If the good has been manufactured in the CEMAC zone, the value corresponds with the selling price charged by the manufacturer. If the good is imported into the CEMAC zone, the value is the sum of the freight value plus insurance costs and customs duties.

This value constitutes the basis of the calculations of the excise duty.

From fiscal year 2016, the basis of calculations mentioned above shall be increased by the amount of VAT paid.

**Real property tax**

The annual real property tax differs according to whether it is a built or an unbuilt property and whether it is located in N’Djamena or elsewhere. The tax is imposed in the municipality where the property is situated.

The tax rate on built property is 10% in N’Djamena and 8% elsewhere.

The tax rate on unbuilt property is 21% in N’Djamena and 20% elsewhere.

The calculation basis is the potential revenue of that property. The potential revenues correspond to four-fifths of the rental value, the rental value being 10% of the market value. For rural unbuilt property, the market value is fixed to XAF 50,000 per hectare.

Some temporary exemptions are granted to new buildings or additions to constructed buildings after 1 January 1968 from this tax in some conditions. In case of construction or reconstruction, owners can benefit from temporary exemptions as follows:

• If the villa is owned by a corporation: 2 years.
• If the villa belongs to an individual and put on rental: 2 years.
• If the villa is built or rebuilt for commercial and industrial use: 2 years.
• New construction or reconstruction and additions to buildings for a holiday resort, for approval (accreditation), or for furnished rent are excluded.

**Accommodation tax**

The person occupying a building (owner or tenant) has to pay the following amount as accommodation tax annually:

<table>
<thead>
<tr>
<th>Type of construction</th>
<th>N’Djamena (XAF)</th>
<th>Elsewhere (XAF)</th>
</tr>

<td>5,000 and a supplement of 5,000 per level</td>
</tr>
</tbody>
</table>

**Transfer tax**

Fixed or proportional transfer duties must be paid on the transfer of ownership of estates, personal property, and real property. Transfer duties are also due on contributions to companies and divisions of property. The proportional fees for the following transfers are:

- Transfers of ownership interests in companies whose capital is not divided into shares: 3%.
- Transfers of shares, founders’ shares, or profit shares: 3%.
- Transfers of bonds of companies and legal entities: 3%.
- Transfers of the right to lease or of the benefit of a promise to lease real estates: 10%.
- Transfers of goodwill (business) against payment: 10%.
- Transfer of leases of real estate: 10%.
- Transfers of pension against payment: 10%.
- The undivided shares and portions of real property acquired by bidding are subject to land transfer tax against payment at 10%.
- Transfers and delegations of term debts: 3%.
- The perfect transfer of notarised promissory notes containing the creation of a mortgage and other mortgage bonds: 5%.
- Real estate returns are subject to land transfer (against payment) tax of 10%.
- Transferring ownership for consideration of movable property: 6%.
- Judicial transfer (against payment) of ownership or usufruct of both developed and undeveloped land is 10%.

These transfers are generally registered within three months of their entry into possession.

**Stamp duties**

Stamp duties must be paid on each civil or judicial document intended to be used as evidence. Stamp duty is generally XAF 1,000 per page.

All claims for reimbursement submitted to the Board are subject to a stamp duty of XAF 2,000.

Requests to the administration for professional competitions are subject to a stamp duty of XAF 1,000.

Applications for allocation of land are subject to a stamp duty of XAF 1,000.

Invoices for supplies to the administration of less than XAF 1 million are subject to a stamp duty of XAF 5,000. The same applies to certificate of sales of reshaped vehicles and materials of vehicles of the state and public bodies.

All invoices that accompany an order of the administration in lieu of a service contract or a public market are subject to a stamp duty of XAF 5,000.

Any application, other than those mentioned above, addressed to the tax authorities is subject to a stamp duty of XAF 2,000.

The subscription contracts to mobile and landline phones are subject to a stamp duty of XAF 1,000. Telephone companies are responsible for the collection of those duties and pay them on the 15th day of every month to the Stamp Tax Treasury (Stamp and...
Registration Directorate). A penalty of 25% of the amount due, plus a fine of XAF 25, is awarded for late payment.

The post-paid invoices of mobile and fixed telephone companies are subject to a stamp duty of 10%.

**Registration duty**
The registration duty applies to certain deeds listed by the General Tax Code (GTC). The assessment basis depends on the nature of transactions, and the rate varies from 0.25% to 15%.

**Business licence tax**
Any natural person or corporate body carrying on a trade, industry, or profession in Chad shall be liable to a business licence tax. The business licence tax is paid annually and is assessed as follows:

- A determined duty based on 0.1% of the first XAF 2 billion of turnover of the fiscal year N-2; above that, only 1/10 of the turnover is taxed at the rate of 0.1%.
- 10% of the rental value of the premises.
- 10% of the determined duty for the National Social Security Funds.
- 7% of the determined duty for the Consular Commercial Chamber.
- XAF 480 per year for the Rural Intervention Funds.
- 10% of the annual rental value of business premises.

For a new company, the determined duty is calculated based on the projected turnover estimated by the taxpayer as compared to similar activities or those achieved during the first 12 months of activity.

The business licence tax is due 31 December of the tax year.

**Payroll tax**
Employers in Chad are required to make monthly contributions of 7.5% of the total amount of salaries and fringe benefits paid to permanent employees.

**Social security contributions**
The monthly contribution to Chad’s Social Security Funds is 16.5% of total salaries for the employer (upper limit: XAF 82,500 per month) and 3.5% for the employee (upper limit: XAF 17,500 per month), withheld by the employer.

**Apprenticeship tax**
Employers in Chad are required to make monthly contributions of 1.2% of the total amount of salaries and fringe benefits of their employees (permanent and temporary) to the National Professional Training Funds (FONAP).

**Branch income**
Subject to international conventions, the profits realised by companies that do not have their tax residence in Chad (i.e. branches) are deemed distributed in respect of each fiscal year to the persons who do not have their tax residence in Chad and, to this effect, are subject to WHT at the rate of 20%.

**Income determination**

**Inventory valuation**
Stocks shall be valued at cost price; however, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory.
Chad

**Capital gains**
Capital gains are taxed at 20% via WHT.

**Dividend income**
Dividends are taxed at 20% via WHT.

**Interest income**
The interest paid to associates or shareholders in respect of sums paid by them in the social fund in addition to their share of capital is taxable within the limit of that calculated at the advance rate of the bank of emission and increased by two points.

**Foreign income**
Income from other countries is not liable to tax in Chad.

---

**Deductions**

Expenses are deductible under the following conditions:

- They must lead to a reduction of the assets.
- They must be incurred in the interest of the enterprise.
- They must be regularly included in the accounts of the entity and justified by receipts.
- They must be related to the fiscal year within which they are incurred.
- They must not be considered as non-deductible by the law.

**Depreciation**

According to accountancy principles, depreciation is calculated based on the probable length of use of the asset. The straight-line system of depreciation is applicable, and rates vary according to the nature of the business activity concerned and the normal useful life of the assets involved.

From an accountancy point of view, it is possible to depreciate whatever amount corresponds to the above mentioned principles. However, from a tax point of view, depreciation (i.e. enabling a deduction of the depreciated amount from the taxable income) is only possible under the condition that the depreciation has been entered into the statement of accounts. Therefore, only a legal entity in Chad owning the assets is able to depreciate its assets. In addition, if depreciation in the statement of accounts is higher than the depreciation authorised, the difference is not deductible and has to be reinstated in the taxable income.

The starting point for depreciation is the day of first use. If this date is not the first day of the financial year, the first year’s depreciation is reduced pro-rata.

It should be noted that, despite the above, goods that are leased are depreciated at the rate that they are paid for.

Depreciation of goods that are made available for free to managers and supervisors of the business are deductible if the corresponding benefit in kind is declared.

The sum of depreciation applied to the acquisition or creation of an asset cannot, at the end of each financial year, be less than the amount of depreciation calculated on the linear system and spread out over the normal usage period.

Depreciation in loss-making years may be carried forward to the first profitable financial year, and to subsequent years if necessary.
**Major repairs**
The major repairs carried out by a company on the assets listed in the balance sheet are only deductible by way of depreciation.

**Goodwill**
There are no provisions for goodwill as regards deduction of expenses.

**Start-up expenses**
There are no provisions for start-up expenses.

**Interest expenses**
Interest paid for the depositing of funds by a shareholder is deductible within the base rate of the central bank plus two points, calculated on the basis of the share capital.

**Bad debt**
Provisions for credit customers are deductible if judicial actions have been taken for the recovery of the said debt.

**Charitable contributions**
Donations and liberalities are deductible within a 0.5% limit of the annual turnover, net of tax, when they are duly justified. However, a decision from the Minister of Finances is required.

**Fines and penalties**
Tax and customs penalties are not deductible.

**Taxes**
Income taxes are not deductible.

**Structural VAT credits**
Structural VAT credits are deductible if the following conditions are met:

- The company justifies the origin of the VAT credits by producing the statement of the deductible VAT accompanied by the original invoices and the receipts of the customs.
- An attestation of VAT credit, signed by the General Tax Director, is produced.

**Other significant items**
The following expenses are not deductible:

- Provisions for laying off employees.
- Provisions for self-insurance.
- Insurance premiums paid for a third-party.

The following expenses are not fully deductible:

- Foreign social security contributions are deductible only within 15% of the base salary of the expatriates when related to a compulsory retirement plan. Nonetheless, Chad’s social security contributions are fully deductible.
- Restaurants, hotels, receptions, and related costs are deductible within a 0.5% limit of the turnover, net of tax.
- Travel expenses for expatriates and their families for vacation are deductible, limited to one trip per year.

**Net operating losses**
Losses arising from normal business activities of the company are deductible and may be carried forward for up to three years. Carryback of losses is not permitted.
**Chad**

**Payments to foreign affiliates**

There is a specific regulation relating to general administrative and foreign technical assistance costs that are subject to a 10% limitation of deductibility. The scope of the 10% limitation covers study expenses, technical assistance, and other expenses, including commercial and industrial royalties, paid to the head office of an enterprise established outside Chad and outside the CEMAC zone.

These costs are only deductible within 10% of the intermediary fiscal profit (accounting profits plus non-allowable charges/costs) prior to their deduction if the following conditions are met:

- The details of these general administrative and technical assistance costs shall be annexed to Table 22 of the annual tax returns (*Déclaration Statistique et Fiscale* or DSF).
- The details shall present the amounts paid according to the activities’ sectors and countries where the company carries out its activities.

**Group taxation**

There is a specific taxation of groups within the CEMAC area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of the following conditions are met:

- The stocks or shares owned by the parent establishment represent at least 50% of the capital of the subsidiary firm.
- The parent and subsidiary firms have their registered office in a CEMAC state (i.e. Cameroon, Central African Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company that undertakes to retain them for at least two consecutive years in registered form.

**Transfer pricing**

The Tax Code acknowledges that dependent or controlled companies may transfer benefits indirectly to their company abroad it is dependent on or to the company abroad it is controlled by.

In order to calculate the real benefit, the indirectly transferred benefits (by means of increase of purchase price or decrease of sales price to the controlling company or by any other means) are incorporated into the result established by the accounts.

If the tax administration does not have enough precise elements to determine the benefit, it will establish the taxable benefit by way of comparison to companies normally operated in Chad.

The Tax Code provides further, in accordance with CEMAC regulation, that interest paid to shareholders on sums that they lend over and above their share capital is deductible at the rate for loans allowed by the central bank increased by two percentage points. This deduction is only possible if the amounts lent do not exceed 50% of the share capital.
**Thin capitalisation**
Chad applies Organisation for the Harmonization of Business Law in Africa (OHADA) regulations with regards to thin capitalisation rules.

In cases where the equity capital gets, due to the recorded losses in the summarising financial statement, below 50% of the share capital, a shareholder consultation has to be organised within four months to decide upon a potential anticipated dissolution of the company.

If the dissolution is excluded, the company has to reconstitute its equity capital up until it equals 50% of the share capital within the two years following the date of the end of the loss-making financial year. Otherwise, provided it stays above the legally required share capital minimum, the company has to reduce its share capital of an amount at least equal to the losses that it has not been able to charge against reserves.

In cases where no decision has been taken regarding dissolution, any interested person may claim dissolution of the company in front of a court. Any interested person is allowed to bring a legal action if the reconstitution of the equity capital has not taken place within the legal timeline.

This action ceases to exist the day the cause for dissolution ceases to exist or if the court has ruled on such grounds.

**Controlled foreign companies (CFCs)**
There are no provisions relating to CFCs in Chad.

---

**Tax credits and incentives**
Chad does not offer any tax incentives.

**Foreign tax credit**
There are no provisions for foreign tax credit in Chad.

---

**Withholding taxes**

**WHT on commerce of retail goods**
A 4% WHT rate applies to natural persons and legal entities that purchase or sell wholesale or retail goods. This WHT also applies to imports.

Companies with more than one shareholder that regularly pay their taxes may apply for a suspension of payment of WHT (renewable every three months).

**WHT on capital gains and dividends**
WHT on capital gains and dividends is 20% and applies to residents and non-residents.

**WHT on income of non-residents**
WHT on income of non-residents is 25%. It applies to income of any legal or natural person who is not resident in the CEMAC area (i.e. Cameroon, Central African Republic, Chad, Gabon, Equatorial Guinea, Republic of Congo).

The income of legal persons (companies) whose tax residence is in the CEMAC area is exempted from the WHT. However, the income of natural persons whose tax residence is in the CEMAC area is subject to WHT at the rate of 20%.

**WHT on personal income**
The employer withholds tax on personal income every month.
Chad

**WHT on income from public procurement contracts financed from outside of the country and income from petroleum projects**
Chad’s lowest WHT rate on income is 12.5%. It applies in either of the following two cases:

- On income of agents, consultancy firms, and corporations executing a contract within the framework of public procurement contracts financed from outside of the country.
- On income of companies working within the petroleum projects.

The WHT at the rate of 12.5% does not apply to dividends and interests, but only to royalties paid to non-residents within the petroleum projects.

The dividends paid to residents and to non-residents is subject to WHT at the rate of 20%.

The interests paid to non-residents whose tax residence is outside the CEMAC area are subject to WHT at the rate of 25%, but they are exempted from WHT if they are paid to the CEMAC area’s residents.

**WHT on interests of bonds, certificates, and notes**
Bonds and notes are subject to a WHT of 20% of the interests for registered bonds and of the interests for bearer participation certificates.

**WHT on rent**
WHT on rent is 15% for residents and 20% for non-residents when the monthly rent paid is up to XAF 1,000,000.

WHT on rent is 20% for residents and 25% for non-residents when the monthly rent paid is between XAF 1,000,001 and XAF 4,000,000.

WHT on rent is 25% for residents and 30% for non-residents when the monthly rent paid is higher than XAF 4,000,001.

**WHT on interconnection expenses of mobile companies**
WHT on interconnection expenses of mobile companies paid to non-resident companies is 25%.

**WHT on rental of equipment**
The rate of WHT on rental of equipment held by natural persons is 20% applied on the total amount paid, including the major repairs, which, by nature, should be normally supported by the owner, when these repairs are supported by the tenant without deduction from the price of the rental.

**Tax treaties**
Chad has one tax treaty with the member states of CEMAC.

**WHT benefits on payments made to CEMAC residents**
To avoid double taxation of incomes of CEMAC origin, the provisions of the Convention provide a principle of exclusive taxation in one country.

Regarding revenues of services, they will be taxed only in the country of location of the beneficiary of incomes (i.e. no WHT in the country of payment of incomes).

Regarding incomes from securities (dividends, interest on deposits, interest on bonds, etc.), they will be taxed only in the country of distribution (i.e. no WHT in the country of payment of incomes).
**Tax administration**

**Taxable period**
Companies must, in principle, close off their yearly financial accounts on 31 December each year. Where a company begins operations later in the year (say June 2016), it has the option of operating for a minimum of 12 months or a maximum of 18 months to close off its accounts.

**Tax returns**
Corporate tax returns are due on 30 April, at the latest, with the possibility to apply for an exceptional extension to 15 May.

**Payment of tax**
Certain taxes are considered instalment payments of corporate tax. Once the amount of corporate tax is known, these payments are deductible from the amount and only the balance has to be paid on 15 May. These taxes include the minimum corporate tax, the quarterly instalment payments, and the 4% discharge for retail goods, if applicable.

**Minimum corporate tax (monthly)**
The minimum corporate tax shall be filed, at the latest, on the 15th day of the month following the month of achievement of the turnover, and the related payment shall be made before the end of this month.

However, for the payment of the floor rate, payment may be made in four instalments of XAF 250,000 each, 15 days after the end of the quarter.

If this instalment payment exceeds the annual corporate tax, the remainder is lost.

**One third instalment payments (paid three times quarterly)**
Corporations that fulfil the following conditions are subject to quarterly instalment payments:

- Liable to corporate tax.
- Made a profit during the prior fiscal year.
- The amount of the corporate tax of the prior fiscal year is superior to at least XAF 100,000.

The quarterly instalment payments are equal to one-third of the difference between the corporate tax due during the prior fiscal year and the minimum income tax paid during the same period.

The payment must take place before the 15th day of May, August, and November.

**Tax audit process**
In brief, the tax audit exercised by the Direction Générale des Impôts (Directorate General of Taxes) in Chad consists of three different types of control:

- Audit of monthly, quarterly, and annual tax returns, which requires no prior notice by the tax administration to the taxpayer.
- Spot checks, which are done on one or more taxes on a group of operations over a period of less than one fiscal year. Prior notice is obligatorily given by the tax administration to the taxpayer.
- General verification, which is the most important audit and needs prior notice by the tax administration to the taxpayer. This type also involves the other two audits aforementioned, so that the taxpayer can perform the necessary adjustments on previous declarations.
In all the audits, there are contradictory and contentious proceedings. The contradictory proceeding is engaged when the tax administration finds deficiency, inaccuracy, or omission in the information on the tax returns and notifies the taxpayer thereof. The contentious proceeding, on the other hand, is engaged when the taxpayer, in turn, disagrees with the observations of the tax administration and challenges its position directly with the tax administration and/or with the courts.

**Contentious claim**
Taxpayers who disputes the justification or the amount of tax levied on them may, if they had formally filed the claim under certain conditions, obtain stay of payment of the disputed portion of the said taxes, on condition that they:

- expressly request respite of payment in the complaint
- state the amount or the basis of the tax relief requested
- provide supporting documents showing payment of the undisputed portion of the tax and 15% of the disputed one (10% prior to fiscal year 2016), and
- provide the bank guarantee obtained from a bank located in Chad.

**Statute of limitations**
According to Article R. 33 of the GTC of Chad:

“The total or partial omissions found in the tax base, the inadequacies and inaccuracies, or the taxation errors, can be repaired by the tax administration until the end of the third year following that in which the tax or fee is payable.

Furthermore, any omission or insufficiency of tax revealed by a proceeding before the criminal courts or by a contentious claim may, without prejudice to the general period of repetitions established above, be repaired until the end of the third year following the revelation of the facts.”
Significant developments

In summary, the Finance Act 2016:

• Confirms most of the tax measures introduced under the Finance Act for 2015.
• Institutes a lump-sum tax payable by enterprises that carry on business but realise no turnover in a concerned year.
• Applies the threshold of subjection to value-added tax (VAT) to independent professionals.
• Unifies the date of payment of the corporate income tax (CIT), known as impôt sur les bénéfices et profits (IBP) in the Democratic Republic of the Congo (DRC), at 30 April for small-sized companies and micro-sized companies.
• Amends the modalities of offsetting business losses.
• Significantly reviews certain aspects of tax procedure.

Taxes on corporate income

CIT is paid on profits realised by a company or an individual that carries out any operational activity in the country.

The Democratic Republic of the Congo levies taxes on resident companies and individuals on a territorial basis (or source basis) of taxation. Foreign-sourced profits (e.g. dividends received from a foreign subsidiary) are thus exempt from CIT.

Non-resident companies or individuals that carry out an activity in the Democratic Republic of the Congo are taxable on profits they realise through permanent establishments (PEs) or fixed establishments that are located in the Democratic Republic of the Congo.

The CIT rate is 35% (30% for mining companies).

Minimum income tax

There is a minimum tax of 1% of the yearly turnover for companies other than small-sized companies (see below for the rates for small-sized companies).

The minimum tax applies to loss making companies as well as companies with CIT of less than 1% of turnover. Companies that carry on business but realise no turnover in a concerned year are also subject to the minimum income tax as follows:

• 2.5 million Congolese francs (CDF) for large companies.
• CDF 750,000 for medium-sized companies.
• CDF 30,000 for small-sized companies.

Note that turnover includes, inter alia, all profits and interest received, as well as exceptional profits, in essence, any credits on the income statement that have the nature of income or gain, as well as capital gain.
Micro-sized companies are those whose annual turnover is less than CDF 10 million, and small-sized companies are those whose annual turnover is between CDF 10 million and CDF 200 million.

Small-sized companies are subject to minimum tax at the following rates:

- 1% for the supply of goods.
- 2% for the supply of services.

In the event of business termination, companies pay a lump-sum amount as follows:

- CDF 500,000 for large companies.
- CDF 250,000 for medium-sized companies.
- CDF 30,000 for small-sized companies.

**Tax on rental income**

Rental income related to buildings, houses, offices, premises, warehouses, etc. is administered at the level of every provincial tax authority. Gross rental income is subject to tax at a flat rate of 22% in the province of Kinshasa.

In order to secure the payment of this tax, the Tax Code has put into practice a withholding tax (WHT) system. In the province of Kinshasa, the tenant is liable to withhold 20% of the rentals paid and to remit this tax to the authority. The tax authority may challenge rentals that are not at arm’s length by referring to the rental prices of similar houses.

The rent of buildings and land owned by real estate companies is subject to CIT.

**Local income taxes**

There are no local or provincial government direct taxes on income (except for the tax on rental income that is administered at the level of provinces).

**Corporate residence**

Companies incorporated in the Democratic Republic of the Congo are considered resident companies, regardless of where they are managed and controlled.

**Permanent establishment (PE)**

A non-resident company is deemed to have a PE in the Democratic Republic of the Congo in either of the following cases:

- It has a material place of business (e.g. head office, branch) or any other fixed or permanent installations producing revenues in the Democratic Republic of the Congo.
- Without having a material place of business, it carries out a professional activity under its own name during a period of at least six months.

**Other taxes**

**Value-added tax (VAT)**

**VAT rates**

The VAT base includes whatever sums, amounts, goods, or services that are received as compensation for an operation; this involves subsidies as well as any other costs, taxes, rights, or any related levies, whatever their nature, excluding the VAT itself. For imports, VAT is normally charged on the customs value of the goods concerned, plus the customs duty and import-related expenses. There are two rates:
• A standard rate of 16%.
• A rate of 0% on exports and assimilated transactions.

VAT exemptions
The main exempted activities include some banking and financial services, education, medical services, charitable and social activities, and transactions that are subject to a specific taxation.

The import of wheat flour, corn, and corn flour; the local sale of bread, wheat flour, corn, and corn flour; the domestic sales of animals; and the import and sale of inputs for agriculture are also VAT-exempt.

Application to non-residents
A non-resident having no PE in the Democratic Republic of the Congo but who raises an invoice on a DRC resident is required to appoint a VAT representative who is based in the Democratic Republic of the Congo and who will be accountable for the payments and collections that rest with the non-resident supplier. Failing to appoint a representative will result in the authorities holding the DRC resident customer liable for the payment of VAT that is due by application of a reverse-charge mechanism.

Mechanisms of VAT
An entrepreneur is entitled to offset VAT paid on purchase of goods and services used for business purposes against VAT charged on sales of goods and/or services. Businesses exempted from VAT on part of their sales are, in principle, entitled to deduct VAT paid on a pro rata basis (i.e. the ratio between the turnover related to VATable activities and the global turnover).

No VAT credit is allowed for expenditures not necessary for business purposes, nor on some specific expenditure (e.g. except in some specific circumstances, fuel, accommodation or entertainment for directors and employees, gifts, company cars).

VAT returns must be filed by the 15th day of each month in respect of transactions made the previous month. The net amount of VAT payable must be remitted to the tax authorities together with the return. If VAT paid exceeds VAT charged, the resulting VAT credit can be carried forward.

Refund of VAT can only be requested in some very specific circumstances.

Customs duties

Customs duty on imports
Customs duty on imports is calculated on the cost, insurance, and freight (CIF) value of the goods. The customs tariff on imports is the following:

<table>
<thead>
<tr>
<th>Example of goods</th>
<th>Customs tariff rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemical products</td>
<td></td>
</tr>
<tr>
<td>Machine tools</td>
<td>5</td>

<td></td>
</tr>
<tr>
<td>Clothing</td>
<td></td>
</tr>
<tr>
<td>Furniture</td>
<td>20</td>
</tr>
<tr>
<td>Cigarettes</td>
<td></td>
</tr>
</tbody>
</table>

Imported goods are also subject to the following levies at the time of border crossing:
Congo, Democratic Republic of the

- VAT on imports (wheat flour, corn, and corn flour are exempt from VAT).
- For certain goods, consumption and excise duties.
- Various para-fiscal levies.

Customs regulation also allows for certain suspensive rates, such as temporary admission.

**Customs duty on exports**

Customs duty on exports applies to certain categories of products produced locally, which are:

- Crude coffee.
- Electric current.
- Mineral products and their concentrates.
- Mineral oils.
- Timber.
- Scrap metals.

The bond value on exports of the said goods is fixed either by ministerial decree upon suggestion of the customs administration, or in the absence of a decree, by reference to the value of the goods when they leave the Democratic Republic of the Congo.

The rates of customs duties on exports are the following:

<table>
<thead>
<tr>
<th>Example of goods</th>
<th>Customs duty rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coffee</td>

</tbody>
</table>

**Consumption and excise duties**

**Scope**

The following goods are affected by consumption and excise duties:

- Alcohol and alcoholic drinks.
- Carbonated drinks.
- Mineral oils (petrol, oil, jet A1, diesel, etc.).
- Lubricating oil and lubricant.
- Liquid for hydraulic brakes and other liquids for hydraulic transmissions.
- Perfumes.
- Cosmetics and make-up products.
- Hair preparations.
- Soaps, organic surface-active agents, lubricating preparations, polish, and creams for footwear.
- Plastic articles.
- Rubber articles.
- Tobacco.
- Vehicles.
- Telecommunications industry's products.
Applicability and tax base
Consumption and excise duty is applicable to:

- the production in the Democratic Republic of the Congo of consumer goods subject to duty and
- the import of these products to the Democratic Republic of the Congo.

Consumption and excise duties accrue on imports, as do customs duties and VAT.

On imports, the tax base on consumption and excise duties is the raised CIF value of the customs duties, except for mineral oils, for which the tax base is the average fiscal threshold price.

Rates
The rates of consumption and excise duties vary from 5% to 60% according to the products concerned.

Para-fiscal taxes
Various para-fiscal taxes shall be collected at the time of the import and/or export of goods in the Democratic Republic of the Congo.

The main applicable levies include the following:

- Administrative payment: 2% of the CIF value.
- Congolese Control Office (OCC) payments: 1.5% of the CIF value, plus various other administrative charges (Laboratory and analysis charges: 30 United States dollars [USD] maximum per test).
- Office de Gestion du Fret Maritime (OGEFREM) payment: 0.58% of the CIF value.
- Funds for the Promotion of Industry (FPI) charge: 2% of the CIF value.
- Cost of inspection from the Bureau of Inspection, Valuation, Assessment, and Control (BIVAC): 1.5% of the free on board (FOB) value.
Congo, Democratic Republic of the

Property tax (IF)

Scope
IF is applicable to constructions (i.e. villas, apartments, and other buildings) and land located in the Democratic Republic of the Congo.

The person subject to this tax is the owner (bearer of title deed, holding, long leasehold, mining) of the construction on 1 January of the tax year.

The following types of property are exempt from IF:

- The public administrations of states, provinces, and towns, and public businesses disposing of no other resources than those coming from budgetary grants.
- Licensed religious, scientific, or philanthropic institutions.
- Private non-profit making organisations involved in religious, scientific, or philanthropic works and having obtained civil personality.
- Foreign states as far as embassy offices, consulates, or lodgings of diplomats or consuls are concerned (upon condition of reciprocity).

Some constructions and land are, notwithstanding, exempt from IF, notably depending on the status of their owner. From this perspective, the following are exempt from the property tax on goods:

- Constructions and land allocated by the owner exclusively for agriculture or farming, including constructions serving to prepare agricultural or farming products, on the condition that at least 80% of these derive from the farming of the property owner concerned.
- Constructions and land allocated by the owner for non-profit purposes:
  - for the execution of a public service, teaching, scientific research, the setting up of hospitals, hospices, clinics, free clinics, or other similar charitable institutions
  - for chambers of commerce having obtained civil personality, or
  - for social activity of mutual companies and professional unions (syndicates) having obtained civil personality, with the exception of locales providing accommodation, a public house, or any business.

Tax base
The tax rates vary according to the nature of the goods (villas, buildings of more than one floor, flats, and other buildings) and locality ranks.

For villas, rates are fixed per square metre of area (between USD 0.3 and USD 1.5), while for other taxable items the contribution is determined on an inclusive basis (by floor, by flat, by unused land - in Kinshasa, the rate for one floor is USD 75).

Transfer tax
The transfer of a building in the Democratic Republic of the Congo gives rise to the payment, by the purchaser, of a registration duty amounting to 3% of the building’s value for a normal sale.

Stamp taxes
There are no stamp taxes in the Democratic Republic of the Congo.

Payroll taxes
The tax on wages is withheld at source by the employer.

Professional salaries tax (Impôt professionnel sur les remunerations or IPR)
Any remuneration paid by a third party, whether public or private, provided it is not part of a service contract, and remuneration paid to executive shareholders, other than those involved in joint stock companies, are subject to payroll taxes and social contributions.
These remunerations includes salaries, wages, fees, benefits that do not represent reimbursement of professional expenses, gratuities, bonuses, and all other payments, fixed or variable, whatever their qualification.

All benefits, except for housing, transport, family allowances, and medical expenses, to the extent that they are legal or reasonable, are added to remunerations.

The tax basis of the IPR for expatriate employees must not be lesser than the equivalent minimum wage applied in their home country.

The IPR is computed by applying a progressive tax scale. The overall tax shall not exceed, in any case, 30% of the taxable income.

It should be noted there are other applicable rates depending on the activity or the nature of the compensations paid as remuneration:

- Proportional (10%): Applicable on severance pay.
- Proportional (15%): Applicable on income of casual or temporary workers.

A rebate of 2% applies on the tax amount in terms of the number of the dependants.

**Exceptional salaries tax (Impôt exceptionnel sur les rémunérations or IER)**

Employers of expatriate employees are subject to a tax of 25% on the expatriates’ remuneration (10% for mining companies). This amount is not deductible for corporate tax purposes, except for mining companies. This tax was established to discourage employers from hiring expatriate staff. Expatriate staff are comprised of employees from counties other than those bordering the Democratic Republic of the Congo.

Filing and payment obligations for IER are identical as for IPR. Employers are required to file a return for payroll taxes on the 15th day of the month following the payment of the salaries. An annual payroll tax return also needs to be submitted on the 15th day of the year following the year of the payment of the salaries.

Failure or default or delay in paying due taxes gives rise to:

- Tax penalties: 20% to 40% of the tax amount due.
- Tax interest: 4% per month of the tax amount due for late payment.

**Social security contributions**

Social security contributions are as follows:

- National insurance fund (Institut National de Sécurité Sociale or INSS): 3.5% for the employees' share (withheld at source by the employer) and 9% for the employer's share.
- National office for professional training (Institut National de Préparation Professionnelle or INPP): INPP contribution is paid only by the employer at:
  - 3% for state-owned companies and private companies with up to 50 employees.
  - 2% for private companies with 51 to 300 employees.
  - 1% for private companies with over 300 employees.
- National office of employment (Office National de l’Emploi or ONEM): ONEM contribution is paid only by the employer at 0.2%.

The deadline to file and to pay INSS, INPP, and ONEM return is the 15th day of the month following the month where the salary has been paid. In this regard, a single return is filed.

**Business tax on pension capital**

The Finance Act 2016 has introduced a business tax of 10% based on pension capital. This tax applies to companies that implement a supplementary pension scheme in favour of
employees of a certain category. The tax is triggered by the actual payment of the pension to the retired person and not at the time of their constitution (administrative position).

**Branch income**

Tax rates on branch profits are the same as on corporate profits. However, the costs incurred abroad by the head office of the branch are not deductible in the Democratic Republic of the Congo, and the branch is liable for taxation of deemed distributed profits on top of the CIT. On profits realised, a branch will pay both the 35% CIT and a 20% tax based on 50% of the net profits after deduction of CIT.

**Income determination**

Taxable income consists of profits from any industrial, commercial, agricultural, or real estate operations entered into by a taxpayer in the Democratic Republic of the Congo, as well as any increases in the net assets as a result of such activities and any increases derived from capital gains, either realised or not, of any nature and origin.

**Inventory valuation**

Since adhesion of the Democratic Republic of the Congo into the Organisation for the Harmonisation of Business Law in Africa (OHADA) law treaty effective from 12 September 2012, or as from 1 January 2015 as far as accounting matters are involved, the inventory valuation methods permitted are as follows:

- The weighted average cost method.
- Last in first out (LIFO).

**Capital gains**

There is no specific tax regime applicable to capital gains in DRC Tax Law.

Capital gains are included in the corporate taxable basis of the local entity benefitting from the capital gain and, as such, subject to the 35% CIT (30% for mining companies).

**Dividend income**

Local-sourced dividends received by a local company are subject to a 20% income tax rate under standard law. Of the gross dividends received by resident companies, 90% are excluded from the CIT base, provided that such dividends have been subject to the 20% WHT.

**Interest income**

Local-sourced interest received by local companies is subject to the standard CIT regime.

**Foreign income**

If an income is considered as foreign-sourced, by application of the territoriality principle, it is not taxable in the Democratic Republic of the Congo.

**Deductions**

To arrive at taxable income, a taxpayer may deduct all costs actually incurred and which have served in the production of income of the company during the year.

**Depreciation**

Depreciation of fixed assets used in the company’s operations may be deducted. Depreciation rates are as follows:
As per the OHADA accounting law, however, assets should be depreciated as per the practice of the specific industry so as to depreciate each category of asset over the related normal expected useful life.

**Goodwill**

There is no specific provision relating to depreciation of goodwill in DRC Tax Law.

However, it is generally agreed that taxpayers can amortise goodwill in accordance with the linear system. The amortisation of goodwill rate is at the discretion of the taxpayer, but with the risk that the tax authorities can assess the rate otherwise.

**Start-up expenses**

Start-up expenses are deductible, provided they are staggered over three or four years.

**Interest expenses**

Interest costs on funds borrowed from third parties and invested in the company’s operations are, in principle, deductible. Further to the tax authorities, the deduction, in principle, requires an effective payment.

Please note that if the borrower is a private limited company and the lender is one of its shareholders, the interests on loans paid are not deductible from the CIT basis.

Moreover, assuming the terms of the loan are at arm’s length, the interest expense will be tax deductible in the Democratic Republic of the Congo provided (i) the interest rate applied is less than the average international interbank market rate in the month the payment of the principal is made and (ii) the repayment of the principal takes place within five years from when it has been made available.

**Bad debt**

As a general rule, any kind of provisions (e.g. for bad debts) may not be deducted to arrive at taxable income.

**Charitable contributions**

Charitable contributions or donations are not deductible.

**Fines and penalties**

Legal or administrative fines of any nature are not deductible.

**Taxes**

Income taxes are not deductible.
Congo, Democratic Republic of the

Other significant items
The following are examples of other expenses that may be deducted to arrive at taxable income:

- Rents actually paid and rental expenses linked to buildings or parts of buildings used in the exercise of the activity and any overhead derived from their maintenance, lighting, etc.
- Overhead costs from maintenance of furniture and equipment used in connection with the company's activities.
- Wages, salaries, bonuses, and allowances of employees and workers used in the operation, as well as benefits in kind if these have been added to remunerations paid.
- Professional expenses incurred for the purpose of acquiring or maintaining income or earnings.

The following are examples of other expenses that may not be deducted to arrive at taxable income:

- Expenses of a personal nature (i.e. for private purposes), such as accommodation, school fees, leave indemnities, and any other expenses not necessarily incurred in the business.
- Expenses linked to rental properties as a landlord as well as related depreciation expenses.

Net operating losses
The Finance Act for 2016 significantly amends the rules applicable to the offsetting and carryover of business losses. Henceforth, the new wording of Article 42-1° of the legislative-order n° 69/009, dated 10 February 1969, pertaining to the scheduled income taxes:

- repeals the prior authorisation of the tax administration to the offsetting of the losses carried over, but
- limits the offsetting to 60% of the tax profits made in the tax period prior to applying the deduction of said business losses, and
- no longer fixes a time limit for carrying over business losses.

There is no carryback loss regime in the Democratic Republic of the Congo.

Payments to foreign affiliates
As a general rule, payments to foreign affiliates should be at arm's length and transfer pricing documentation must be provided.

In respect of payments made by a local company to a foreign company for services (e.g. management services, technical assistance services), such expenses are deductible, provided that:

- the services rendered can be clearly identified
- the services cannot be rendered by a local company, and
- the amount paid for the service is not overstated and is commensurate to the nature of the service itself.

The Finance Act 2014 has introduced the notion of abnormal acts of management, which include, in addition to expenses, any form of benefits or aid granted to third parties without equivalent consideration for the company, such as:

- Payments in the form of mark-ups or markdowns of purchases or sales.
- Payments of excessive royalties without any equivalent consideration.
- Income waivers (sales at a reduced price, free supply of services, grant of interest-free loans or loans bearing insufficient interest).
- Debt or commission waivers.
- Debt forgiveness.
• Benefits disproportionate to the service rendered.

Benefits or aids granted to companies within the same group may be deemed as normal acts of management, provided that the company shows the existence of its own interest in granting such benefits or aids. The sole general interest of the group is not sufficient to justify such practices.

**Group taxation**

There is no group taxation regime per the DRC tax legislation.

**Transfer pricing**

The following specific transfer pricing requirements are provided by the Tax Code:

• Interests on loans are not considered as deductible expenses for the borrower if the borrower is a private limited company and the lender is a shareholder.
• Where a local company is directly or indirectly controlled by a foreign company, any abnormal advantage given to the latter or related person is considered as an indirect distribution of profits and is then added back to the profits of the local company.
• In respect of payments made by a local company to a foreign company, for services (management services, technical assistance services), the Tax Code provides that such expenses may be deductible if (i) the services rendered can be clearly identified, (ii) the services cannot be rendered by a local company, and (iii) the amount paid for the service is not overstated and is commensurate to the nature of the service itself.

Finance Law 2015 imposes an obligation for companies established in the Democratic Republic of the Congo to have transfer pricing documentation on operating transactions with their affiliated companies located abroad. However, Finance Law 2015 only provides general guidelines for the information to be provided (i.e. structure of the group, selection of the most appropriate transfer pricing method).

**Thin capitalisation**

There are no thin capitalisation rules in the DRC tax legislation. However, it is provided in the Mining Code, from a general perspective, that, for the holder of a mining licence, the ratio of the funds borrowed against the amount of own funds does not exceed 75/25.

Moreover, the OHADA Treaty provides that shareholders’ equity should be above half of the company’s authorised share capital.

**Controlled foreign companies (CFCs)**

No specific provision relating to CFCs are provided for in DRC law.

**Tax credits and incentives**

**Investment Code**

The Investments Code allows for a certain number of tax, customs, and general order measures designed to favour direct investments (notably a CIT holiday during a defined investment period that would differ depending on the location of the investments). The preferential tax treatment measures of the Investments Code apply to direct investments and/or to entities that carry them out.

The regime of the Investments Code does not apply to numerous sectors, notably:

• Mining and hydrocarbon.
• Banking and insurance.
• Trade.
In order to take advantage of the provisions of the Investments Code, the following conditions must be fulfilled by the investor:

- The investor must be a Congolese legal entity.
- The investment must be at least USD 200,000.
- The investing company must comply with the rules and regulations relating to environment.
- The investing company must undertake to train local personnel in technical and executive duties.
- The investing company must undertake to create an added value of 35% of its initial investment (within a stipulated time period to be agreed).

The application file is examined by the National Agency for the Promotion of Investments in the Democratic Republic of the Congo (ANAPI) and then sent to the Minister of Finance, who decides on the grant of the advantages foreseen in the Investments Code to the applicant, by the way of a Ministerial Order.

**Mining**
The Mining Code, completed by the Mining Regulations, sets out a preferential customs and fiscal regime that deviates on some important points from the standard regime.

The tax rules set-up by the Mining Code are supposed to be exhaustive and exclusive (it provides for all the taxes and customs duties owed to the Treasury by eligible entities, to the exclusion of any other form of taxation) and stable. This regime applies to all holders of a mining title or career, or for which a mining title or career is established, as well as to (i) affiliated companies carrying out mining activities and (ii) sub-contractors carrying out mining activities resulting exclusively from contracts concluded with the bearer of the mining title.

Among other tax preferential features of the Mining Code, the following apply:

- A reduced CIT rate of 30%.
- Absence, under conditions, of WHT on interest paid in relation to loans denominated in foreign currency and concluded abroad.
- A reduced 10% WHT rate for dividends.
- A reduced 10% exceptional tax for expatriates’ remuneration.
- A possibility to deduct some specific provisions.

The holder of a mining licence is also liable to mining royalties, computed on the basis of the amount of sales minus the cost of transport, analysis in relation to the quality control of the commercial product for sale, insurance, and cost relating to the sale transaction.

**Hydrocarbons**
The tax regime of oil companies is mainly provided in the production sharing contracts as well as in the Ordinance-Law 081-013 of 2 April 1981 bearing general regulations regarding Mining and Hydrocarbon.

A revision of the Hydrocarbons Code is currently under discussion.

**Foreign tax credit**
No specific provision relating to foreign tax credits is provided for in DRC law.

**Withholding taxes**
The following DRC-sourced payments are subject to a WHT in the Democratic Republic of the Congo:
• Dividends.
• Royalties.
• Interest. Note that if the interest is paid to a local company, the WHT does not apply since the interest is included in the taxable income of the company charging such interest.
• Directorship fees.
• Service fees paid to foreign individuals or entities not established in the Democratic Republic of the Congo.

The Democratic Republic of the Congo has entered into double tax treaties (DTTs) with Belgium and South Africa. However, there are still discussions from the DRC tax authorities about their effective entry into force.

**WHT rate and payments**
The standard rate of WHT on dividends, royalties, interest, and directorship fees is 20%, which is based on the gross amount of sums paid.

If the payee does not withhold the tax from the amount invoiced and pays the tax of 20% directly, then the tax authorities consider that the basis of the 20% tax is composed of the amount invoiced plus the amount of the tax.

Consequently, in the case that the DRC company takes in charge the corresponding WHT, the WHT rate will be 25% (20/80) and the amount of tax will not be tax-deductible.

For royalties, the WHT is charged on the net amount of the royalties paid. The tax authorities consider that the net amount of royalties is calculated by deducting 30% from the royalties invoiced (i.e. the taxable basis will be 70% of the royalties invoiced).

The rate of WHT on amounts paid as compensation for services provided by foreign individuals/entities is 14%, which is based on the gross amount of sums paid.

The treaties concluded by the Democratic Republic of Congo with Belgium and South Africa provide for reduced rates for dividends, interest, and royalties. It is also generally agreed that, by application of treaty, services furnished by providers being tax resident of those countries and being not established in the Democratic Republic of Congo should not be subject to the 14% services fees WHT (however, one may note that the DRC tax authorities are still discussing the entry into force of these treaties on the grounds that the implementation measures have not yet been published by the Ministry of Finance).

The table below provides a summary of different WHT rates:

Notes
1. A reduced 10% WHT rate for dividends is applied in the mining sector.
2. The WHT charged shall not exceed 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
Congo, Democratic Republic of the

**Tax administration**

**Taxable period**
The taxable period is 1 January to 31 December. This duration can be less than 12 months for the first accounting period beginning in the course of the first half of the calendar year. The same duration can also be more than 12 months for the first accounting period beginning in the course of the second half of the calendar year.

**Tax returns**
The yearly CIT return is due by 30 April of the following year.

**Payment of tax**
Final payment of CIT is required when submitting the yearly tax return, which is due by 30 April of the following year.

CIT is payable in local currency through a DRC bank account by a wire transfer to the bank account of the Public Treasury. Consequently, in order to operate in the Democratic Republic of the Congo, the opening of a bank account in a DRC bank is mandatory. Moreover, the tax authorities require the bank account number of the applicant in order to grant a taxpayer number.

The collection of CIT is performed on an instalment basis. Collection by way of prepayment has been abrogated.

**Instalments of corporate tax**
Instalments, in respect of CIT, apply to taxpayers who come under the supervision of two specific kinds of tax departments: the Directorate General (DGE), the department of the tax authorities in charge of the most important taxpayers, and the Centre des Impôts (CDI), tax centres.

These taxpayers have to pay two instalments each representing 40% of the CIT paid during the previous fiscal year (including the amounts assessed by the tax authorities). This, therefore, totals 80% of the CIT actually paid in the previous year. The first instalment must be paid before 1 August, and the second instalment before 1 December. Both payments are offset against the final CIT due for the fiscal year. The balance is paid when the tax return is submitted.

Small-sized companies shall make an advance payment amounting to 60% no later than on 31 January of the year following the one of the realisation of the concerned income. The balance payment is henceforth to be made no later than on 30 April. As a reminder, the rate of the CIT applicable to small-sized companies is 1% based on the turnover for enterprises selling goods and 2% for enterprises providing services.

Micro-sized companies shall pay an annual lump-sum tax amounting to CDF 50,000, no later than on 30 April of the year following the one of the realisation of the income.

**Tax audit process**
In practice, there is a tax audit every year.

**Statute of limitations**
Since 27 February 2013, a company may get audited up to four years after submission of a tax return (previously five years).

**Topics of focus for tax authorities**
The tax authorities shall discuss any relevant topic in relation to any tax.

There is no general statutory system of advance rulings.
**Significant developments**

During the past year, two different laws were promulgated (although not published yet, according to the General Director of the Tax Administration, the two laws entered into force from the date of their promulgation):

- **The Law No. 10-2015 of 5 August 2015 on the revised Finance Act for the year 2015**, which was promulgated by the President of the Republic but has not yet been published in the official Gazette.
- **The 2016 Finance Act (Law 33 dated 15 January 2016).**

The following new tax measures have been introduced:

**Concerning the Law No. 10-2015 of 5 August 2015 on the revised Finance Act for the year 2015**

- Exemption from corporate income tax (CIT) for companies in the following sectors:
  - Agriculture.
  - Agro pastoral.
  - Poultry or fishing.
- All traders carrying out an economic activity in the Republic of Congo and subject to taxes provided in the General Tax Code must have an Identification Number. The absence of an Identification Number exposes the taxpayer to the following:
  - The loss of the right to deduct the value-added tax (VAT), custom clearance duties on goods.
  - The loss of the right to mandate any payment by the Public Treasury, local authorities, and public institutions.
  - The payment of a fine of 1 million Coopération financière en Afrique centrale (Central African CFA) francs (XAF).
- The General Director, Departmental Director, and Tax Collector have authority to decide on deferred or instalment payment of the minimum tax in the following manner:
  - When the amounts claimed are less than or equal to XAF 200 million, deferred or instalment payment authorisation is given by the Departmental Director.
  - When the amounts claimed are beyond XAF 200 million, deferred or instalment payment is authorised to the taxpayer from the General Director.
- The extension of excise duties to imported non-alcoholic beverages following their specific customs classification.
- The increase of the fees for the issuance and renewal of authorisations for the establishment and exploitation of networks electronic communication services for pylons operators as follows:
  - Authorisation fee is now at XAF 100 million.
  - Authorisation renewal fee is now at XAF 75 million.
  - Royalties for management of the authorisation is now at XAF 50,000 per pylon (previously XAF 10,000 per pylon).
- The increase of the tax on transfer fund from 1% to 1.5%.
- A special tax regime for manufacturing animal feed, processing and packaging of agricultural, livestock, fish farming, and fishing continental products.
Congo, Republic of

• Establishment of tax on exportation of processed wood products from natural forests or plantations. The rates are based on value of the exports’ free on truck (FOT) and free alongside (FAS) quality. The applicable rates range from 0.5% to 4%.
• Institution of royalties for public market regulations at the rate of 1% on the amount, duty free, regardless of its tax and customs regime.

Concerning the tax provisions of the 2016 Finance Act (Law 33 dated 15 January 2016)

• The reduction of VAT on imported goods from 18% to 5%.
• The creation of the Medium Enterprises Unit in the cities of Brazzaville and Pointe-Noire, with a list of medium-sized companies that will be managed by the Unit (to be launched shortly).
• The introduction of the bank guarantee as security for litigation claim.
• The payment of taxes by bank transfer to the Public Treasury for security purposes.
• Change of the tax on electronic communications due by consumers. This tax is declared monthly and withheld spontaneously by phone operators.
• Change of the tax on tobacco and alcohol.
• Reinforcement of tax provisions applicable to the forestry industry.

Taxes on corporate income

Congolese registered companies are taxed on the territoriality principle. As a result, Congolese companies engaged in business outside of the Republic of Congo are not taxed in the Republic of Congo on the related profits.

In the absence of a tax treaty stating otherwise, a non-resident company is liable for CIT on income realised in the Republic of Congo or derived from or resulting from work/services of any nature supplied or used in the Republic of Congo.

The standard CIT rate in the Republic of Congo is 30%, with certain exceptions.

A withholding tax (WHT) of 15% or 20% is imposed on income sourced in the Republic of Congo that is derived by foreign companies not necessarily engaged in activities in the Republic of Congo (see the Withholding taxes section for more information).

Minimum tax

The minimum tax payable is 1% of the annual turnover and cannot be less than XAF 1 million (XAF 500,000 if annual turnover is less than XAF 10 million).

A 2% minimum tax is payable by companies showing losses during two consecutive fiscal years. The 2% rate is applied to the sum of gross turnovers and products and benefits realised by the company in the most recent year in which it earned a profit. The 2% tax is not deductible for CIT purposes. However, in a company’s first profit-making year after incurring the losses, half of the 2% tax is deductible.

Industry specific rates

Companies in the following sectors are exempt from CIT:

• Agriculture.
• Agro pastoral.
• Poultry or fishing.

A CIT rate of 25% applies for microfinance companies and private schools organised as a company.

A CIT rate of 30% applies for mining companies and real estate companies.
A CIT rate of 35% is applied on a deemed profit equal to 22% of the total gross remuneration (i.e. an effective tax rate of 7.70% of the taxable turnover made in the Republic of Congo) derived from services rendered by:

- Foreign companies that qualify for this simplified tax regime.
- Local companies and branches that realise more than 70% of their annual turnover with oil companies and oil services companies (in this case, the deemed profit tax is regarded as a final burden).
- Catering activities performed or delivered on petroleum sites.

Note that these companies revert to the general taxation regime the second year after the turnover realised with oil and gas sector companies becomes less than 70% of their annual turnover.

A substantiated request shall be made to the Director General of Taxation between 10 October and 20 October of the second year, who shall reply, at the latest, by 15 December of the same year.

**Headquarters operations of foreign companies**
The headquarters operations of foreign enterprises taxation regime is subject to prior approval by the tax authorities.

If enacted, headquarters operations of foreign enterprises and international groups will be granted a favourable tax status in the Republic of Congo. For those that qualify, CIT is charged on a deemed profit equivalent to a prescribed percentage of headquarters expenses, the percentage of which is currently unknown.

To qualify, the headquarters must be registered under the form of a public limited company or branch and must act solely for the benefit of the group in the area of management, control, or coordination.

**Global flat taxation**
The global flat tax is at 7% (of the annual turnover) or 10% (of the annual margin) and applies in lieu of the standard CIT rate. It is calculated on the annual turnover of very small and small enterprises taxable under the flat rate regime, whose turnover does not exceed XAF 100 million.

**Local income taxes**
*See Business tax in the Other taxes section.*

---

**Corporate residence**
A company is considered resident in the Republic of Congo if it has its registered office or principal office for all its activities in the Republic of Congo.

**Permanent establishment (PE)**
There is no general definition for a PE. However, a PE has been defined by the double tax treaties (DTTs) signed between the Republic of Congo and France and the Customs and Economic Union of Central Africa (UDEAC) to include a place of management, a branch, an office, a factory, a workshop, and a mine, oil or gas well, quarry, or other place of extraction of natural resources.
Other taxes

Value-added tax (VAT)
The Congolese VAT rate is 18%. In addition to VAT, a surtax calculated at the rate of 5% applies to the amount of VAT, which must be invoiced and paid at the same time as the VAT. Therefore, the VAT rate is globally 18.9%. The surtax is not deductible (final cost).

A reduced VAT at the rate of 5% is levied on importation.

Under the provisions of the VAT Law, all economic activities conducted in the Republic of Congo are subject to VAT, regardless of their purpose, profitability, or the legal status of the business performing them, and irrespective of whether these activities are habitual, occasional, or originate in the Republic of Congo or from a foreign country. Therefore, any person, natural or legal, engaged in an industrial, commercial, or professional activity is subject to VAT unless specifically exempt by law.

Section 8 of the VAT Law states that a service is considered as provided in the Republic of Congo when the service is used or exploited in the Republic of Congo.

In principle, an entrepreneur is entitled to credit the VAT paid on purchases of goods, equipment, and services for use in business (input VAT) against the total of the tax charges to one’s customers for deliveries made and services rendered (output VAT).

Taxpayers not exclusively carrying out transactions giving rise to a VAT deduction shall deduct VAT proportionally on the portion of the income pertaining to taxable transactions.

VAT payers carrying structural VAT credit have the obligation to do inventories in the presence of tax administration representatives for companies in October, failure to which the VAT credit shall be cancelled.

VAT payers have the obligation to provide an excerpt of their VAT trial balance of each account on VAT in accordance with the accounting system used by the company, failure to which all VAT deductions shall be added back.

Taxpayers without a Tax Identification Number (NIU) will lose the right to deduct the VAT on custom clearance duties on goods.

Exporters subject to VAT who realise more than 80% of their sale transactions abroad are obligated to withhold VAT paid on the purchases of goods and services (the list of exporters entitled to withhold VAT will be published by the tax authorities).

VAT resulting from tax assessment is not deductible.

VAT paid in cash in connection with invoices exceeding XAF 500,000 is not deductible.

A VAT return must be filed on a monthly basis before the 20th day of every month.

Customs duties
When applicable, import duties are payable at rates ranging from 5% to 30% on the customs value of imported goods. Customs value is calculated on the cost, insurance, and freight (CIF) level.

**Additional entry taxes**

Additional entry taxes apply on the importation of goods, such as:

- Economic and Monetary Community of Central Africa (CEMAC) integration tax: 1% on CIF value.
- Statistic tax: 0.2% on CIF value.
- Organisation for the Harmonisation of Business Law in Africa (OHADA) contribution: 0.05% on CIF value.
- Economic Community of Central African States (CEEAC) contribution: 0.04% on CIF value.

**2% customs duties reduced rate**

In addition to a VAT exemption on imports, as an exceptional measure, a 2% customs duty reduced rate on imports of machinery and equipment used for agriculture, flower, forest, and fish industries, as well as fertilisers and other goods necessary for agriculture, is applicable.

**Computer royalty**

A 2% computer royalty, to cover expenses incurred by the Customs Administration on computer data processing, is applicable without exception or exemption to all importation and exportation of goods. The royalty applies on the customs taxable value of any imported or exported goods in the Republic of Congo.

**Excise taxes**

Excise duties on all locally made products are due at the rate of 10%, while imported goods are subject to excise duty at the rate of 25%.

Imported non-alcoholic beverages are subject to excise duties following specific customs classification.

**Land tax on built properties**

Land tax is payable annually on built properties and is due from the owner. However, properties built for the purpose of accommodation are exempt for ten years, and properties built for business purposes are exempt for five years. The effective rate is determined every year by the local council.

The land tax is levied on the rental value after a deduction of 75% (decline, maintenance, and repair expenses) for properties built for business purposes. The land tax is levied on the cadastral value after a deduction of 75% (decline, maintenance, and repair expenses) for properties built for accommodation purposes.

**Land tax on non-built properties**

Land tax is payable annually on non-built properties and is due from the owner. However, properties intended for plantations and breeding are temporarily exempt for a three to ten year range. The effective rate is determined every year by the local council.

The land tax is levied on 50% of the cadastral value, determined every year by the Ministry of Finances. The land tax is arbitrarily assessed by hectares in rural areas according to the nature of the plantations.
Rent tax
Rent tax is payable annually on the rental of built property. It also applies on non-built property for business purposes. The rent tax is imposed on the occupant of the premises (whether the occupant is the owner, a tenant, or a subtenant).

The rent tax, which is equal to one-twelfth of the rents due within a year, is due annually on or before 20 March. For new lease agreements, the rent tax is due within three months of the effective date of the lease agreement and is calculated as a proportion of the rents due until the end of the year.

The rent tax is paid by the tenant on behalf of the owner, or by the subtenant on behalf of the tenant. The tenant/subtenant has the legal obligation to pay this tax on behalf of the lessor. Tenant and subtenants make a once-a-year deduction between 1 January and 30 April of the same year from all the rents due to the owner.

A 50% fine, assessed on the amount of the tax, is due for any late payment of the rent tax.

Registration fees and stamp duties
Lease agreement registration fees amount to 3% of the value of the annual rent paid during the tax year, including premises charges if any. ‘Additional centimes’ also apply at a 5% rate of the registration fees. Stamp duties and registration fees should be paid for the total duration of the lease agreement. In the case where the lease agreement is renewed, stamp duties and registration fees should be paid for the renewable period.

Stamp duty ranges from XAF 200 to XAF 20,000 on certain documents.

Examples of documents that are subject to stamp duty include:

- Letters of agreement and other letters that are prepared for use as evidence of act, fact, or condition of civil nature.
- Notarial deeds and their copies.
- Visas and flight tickets.

The following fees for the registration of contracts are due within three months from date of signature:

- Purchase orders for public contracts at the rate of 2% for contracts with a value exceeding XAF 10 million.
- Subcontracts in the building construction and public work sector at a fixed fee of XAF 100,000.
- Insurance contracts are registered free of charge and failure to register such contracts will be subject to penalty at the fixed fee of XAF 3 million.
- A fixed fee of XAF 1 million for the registration of every oil services contract with foreign companies and their sub-contractors before the execution of the contract.
- All insurance policies carried out by oil, mining, and telephone companies are subject to registration free of charge; failure to register will result in penalties that total XAF 3 million.
- Registration fee on lease of movables and immovables used for habitation or commercial purposes at the rate of 3%.
- Registration fee on the transfer of rights in a lease at the rate of 10%.

Private contracts, as well as contracts signed abroad or in jurisdictions where registration is not required, do not have to be registered within three months after their signature. They can be registered at any time.
Insurance contracts shall be registered and tax on insurance paid on the 20th day of the month following the insurance subscription. All importers have an obligation to insure imported equipment with local insurance companies.

Transfer of company shares are subject to a 5% registration fee.

The direct or indirect transfer of assets or social rights of Congolese companies is also subject to a registration duty of 5% calculated on the value of the assets transferred and social rights of these companies. This registration duty is also due in the event of change of control of the company by a change of at least 60% shareholding.

**Oil and gas**
Specific rules and caps apply for the upstream (production) oil and gas industry.

**Tax on pollution**
The tax on pollution is payable by petroleum and mining extracting companies in the production phase, at the rate of 0.2% on the annual turnover.

This tax constitutes a non-deductible expense for the extracting mining/hydrocarbon company in the production phase.

This tax is due in the course of the year and payable quarterly by instalment, proportionally to the production realised during the just-ended quarter and not later than the 20th day of the month following the end of the quarter.

**Business tax**
The business tax (‘patente’, in French) is a tax collected for local communities.

Legal entities that carry out, in the Republic of Congo, a commercial activity, industrial activity, or any other activity not included in the statutory exemptions are subject to business tax.

The taxable basis of the business tax is:

- For taxpayers under the general regime: The annual turnover, excluding taxes of the previous fiscal year declared or assessed by the administration, for fiscal years ended on 31 December of the year N-1 and to be filed to the tax administration between 10 May and 20 May of the year N.
- For taxpayers that do not realise turnover: All operating expenses in the Republic of Congo.

Newly registered companies in their first calendar year are exempt from paying business tax.

Foreign companies subject to the deemed profit tax regime are taxed for the entire year from the start of operations in the Republic of Congo on the basis of the estimated contract value of their services.

The business tax is payable on the basis of graduated rates as follows:

<table>
<thead>
<tr>
<th>Annual turnover (XAF)</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Below 1,000,000</td>
<td>XAF 10,000</td>

</tr>
</tbody>
</table>

Business tax is due for the 12-month period from 1 January to 31 December of the taxation year and must be paid in full by the taxpayer, not later than 20 April of each year. Beyond this date, the taxpayer is liable to a penalty of 100% of the amount in excess of the principal amount.

Business tax due by foreign companies subject to the deemed profit tax is payable within 15 days after the beginning of activities. Otherwise, a penalty of 100% is applied.

Business tax paid to the Inland Revenue is not refundable.

**Tax on company-owned cars**

The tax on company-owned cars applies to the previous fiscal year company-owned cars and is due on 20 March at the latest.

With the exception of estate cars, private cars of companies falling into the category of own use cars for the issuance of vehicle registration documents are subject to tax.

The tax rates vary from XAF 200,000 for engine ratings not over nine horsepower, to XAF 500,000 for the rest.

Cars registered more than ten years ago are exempt from tax.

**Single tax on remuneration**

A single tax, at the rate of 7.5% on the gross salary of resident employees and non-resident seafarers’ employees, shall be borne by the employer. This tax is payable on the 20th day of the following month after the remunerations were due.

**Social contributions**

The employer shall be liable for the following social contributions:

- Family allowance fixed at the rate of 10.035% of gross salary, benefits in kind inclusive, capped at XAF 7.2 million annually.
- Work accident contribution fixed at the rate of 2.25% on gross salary, benefits in kind inclusive, capped at XAF 7.2 million annually.
- Old age, invalidity, and death insurance fixed at the rate of 8% of gross salary, benefits in kind inclusive, capped at XAF 14.4 million annually.

**Branch income**

70% of the net profits made by branch offices and foreign companies carrying out business are automatically considered as distributed profits and subject to tax on dividends at the rate of 15%.

**Income determination**

Taxable income is based on financial statements prepared according to standard statements of the OHADA treaty.

Business expenses are generally deductible, unless specifically excluded by law.
**Inventory valuation**

Stocks are valued at cost price. However, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory.

**Capital gains**

Capital gains are treated as ordinary business income and are taxed at the standard CIT rate of 30%. However, a capital gain realised on the disposal of a fixed asset in the course of trading is excluded from income for a period of three years if the taxpayer reinvests the gain in new fixed assets for the business.

If the business is totally or partially transferred or discontinued, only half of the net capital gain is taxed if the event occurs less than five years after the start-up or purchase of the business and only one-third of the gain is taxed if the event occurs five years or more after the business is started or purchased. However, the total gain is taxed if the business is not carried-on in any form.

Capital gains realised by non-residents on transfers of shares of Congolese companies are subject to taxation at the rate of 20%. This tax shall be paid upon registration of the deed of transfer of the considered shares. Under such sale transactions, the seller, the buyer, and the company whose shares are transferred are jointly and severally liable for the levied tax.

Net capital gains realised as part of a direct or indirect transfer of social assets and/or rights resulting in a change of control of a Congolese company become subject to CIT.

**Dividend income**

Dividends are treated as ordinary business income and are taxed at the standard CIT rate of 30% for resident corporations.

After three years, profits credited to the non-compulsory reserve are considered to be dividends and are, accordingly, subject to the 15% WHT on dividends.

Amounts claimed as a result of a tax adjustment and added back to revenue, if not invested in the company, are subject to tax on dividend.

**Inter-company dividends**

Dividends received from a Congolese company (DivCo) by a commercial company incorporated in the Republic of Congo (HoldCo) are exempt from CIT and subject to a final 15% WHT if the following conditions are met:

- HoldCo and DivCo are incorporated in the CEMAC.
- HoldCo holds 25% of the capital of DivCo.
- HoldCo holds the shares for at least two years from the date of purchase.

However, 10% of dividends that are deemed to represent the share of cost and expenses are included in the taxable profits of HoldCo and liable for the CIT.

If the above conditions are not met, dividends received from a Congolese company by another Congolese company are subject to a 15% WHT, which is an advance payment of the recipient's CIT.

**Interest income**

Subject to any specific provisions, interest paid or deemed to be paid is subject to a WHT at the rate of 20% of the interest paid.

The interest paid is deductible for CIT purposes for the Congolese company to the limit of 20% of the taxable profit before deduction of the expenses in question.
Foreign income
Resident companies are taxed only on income (except for dividends received abroad) derived from their activities carried out in the Republic of Congo.

Deductions
Generally, a deduction is allowed for all expenditures incurred to obtain, collect, and maintain business profits. To be deductible, expenses should be incurred necessarily for the normal purposes of the business and be supported by suitable evidence.

Depreciation and depletion
In general, all types of fixed assets, except land, are depreciable for tax purposes as long as they can be shown to have been acquired for business purposes of the corporation. Depreciation must be calculated on the original purchase price. The straight-line method is used, and the Congolese General Tax Code sets forth maximum rates of depreciation. Goods costing less than XAF 500,000 per item may be written-off at purchase as expenses.

Depreciation recorded when the company is in a loss position may be carried forward without limitation and deducted from the first available taxable profits, provided it was appropriately disclosed in the annual CIT return.

Recoverable and identifiable packaging is regarded as a fixed asset and is recorded in a fixed asset account at the time of purchase. This packaging is regarded as returnable packaging when the supplier intends to act as the sole owner of the packaging.

Unrecoverable packaging is recorded as an expense and is deductible for tax purposes.

Exceptional accelerated depreciation may be authorised in certain circumstances for heavy equipment with a value of more than XAF 40 million. This special accelerated depreciation does not apply to private vehicles owned by the enterprises.

The following list contains maximum rates of depreciation as set forth in the General Tax Code:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Rates per year (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Construction</td>
<td>5 to 20</td>
</tr>
<tr>
<td>Fixed devices and equipment</td>
<td>5 to 25</td>
</tr>
<tr>
<td>Movable equipment</td>
<td>10 to 100</td>
</tr>
<tr>
<td>Transport materials</td>
<td>5 to 33.33</td>
</tr>
<tr>
<td>Furniture, fittings, and other equipment</td>
<td>10 to 33.33</td>
</tr>
<tr>
<td>Fishing equipment</td>
<td>10 to 20</td>
</tr>
<tr>
<td>Hotels, bars, and restaurants</td>
<td>10 to 50</td>
</tr>
<tr>
<td>Plastic equipment (moulding)</td>
<td>10 to 33.33</td>
</tr>
<tr>
<td>Equipment subject to chemical action</td>
<td>20</td>
</tr>
</tbody>
</table>

Exceptional depreciation method
The exceptional depreciation method is an accelerated depreciation method.

Companies may elect the accelerated depreciation method for heavy materials and equipment that:

- are purchased new for a value higher than XAF 40 million
- have a useful life of at least three years
- are used for manufacturing, processing, transport, and handling, and
• are bound to an intensive use.

The application for the accelerated depreciation method must be submitted to the head office of taxes within three months of the purchase of the assets to be depreciated. The option is granted upon approval of the Ministry of Finances. If the administration fails to respond to the application for accelerated depreciation within three months, the application is tacitly granted.

Under the exceptional depreciation method, a 40% deduction may be taken in the year of acquisition of the previously mentioned assets, increased by the normal rate calculated on the residual value after application of the accelerated depreciation. These assets are depreciated on a straight-line basis thereafter.

Goodwill
There is no specific provision relating to amortisation of goodwill in the Republic of Congo.

Start-up expenses
There is no specific provision in the Congolese General Tax Code on the deduction of start-up expenses. Start-up expenses that occurred in the first year of incorporation (N) are deductible in the second year of operation (N+1).

According to the OHADA Uniform Act relating to Accounting Systems and Accountancy, start-up expenses can be amortised either in one year (in such case, they are booked in the deductible expenses during the first fiscal year) or in two years (50% during the first fiscal year and 50% during the second fiscal year).

Interest expenses
Interest is deductible, subject to the following conditions:

• General limit: Regardless of the form under which a legal entity is registered, the deduction is allowed with an interest rate limited to the rate of the advances in current accounts on states funds of the Bank of the States of Central Africa (BEAC) raised by two points. Currently, the ceiling for the deduction of interest is 7.25%.
• For private limited companies and public limited companies, the deduction is allowed according to the status of control over the management of the enterprise, as follows:
  • For shareholders who have control over the company de facto or de jure, the deduction is allowed only to the extent that the sums paid do not exceed, for the shareholders as a whole, half of the paid-up capital and are within the limit sets forth in the ‘general limit’.
  • For other shareholders, the ‘general limit’ applies.

Bad debt
Expenses and debts not recovered within two years after their account recording shall be added back to the taxable basis of the first fiscal year, subject to general accounting audit even if the fiscal year is statute barred.

Charitable contributions
Donations and gifts made to beneficiaries in the Republic of Congo are deductible from CIT basis at a limit of 0.5‰. The limit is 0.5% as regards donations and subsidies made for the support and development of sport. 50% of amounts of donations and payments upon the occurrence of a natural disaster or accidental disaster are deductible.

Fines and penalties
Penalties relating to violation of regulations are not deductible.
Taxes
Taxes, other than income taxes, are usually deductible. Examples of deductible taxes include customs duties, excise duties, payroll taxes, business tax and accessory taxes, registration taxes, and unrecoverable VAT.

CIT itself is not deductible, nor is the special tax on company-owned cars.

Taxes withheld on remuneration, paid to third parties (third parties taxes), and remitted to the tax office by a Congolese enterprise are not deductible.

Net operating losses
For tax purposes, losses may be carried forward to offset profits earned in the three succeeding fiscal years. Carryback losses are not permissible.

As mentioned above, depreciation recorded when the company is in a loss position may be carried forward without limitation.

Payments to foreign affiliates
Allowable deductions include sums paid abroad to foreign companies for:

- actual services, notably overhead for the operations made for the benefit of a company based in the Republic of Congo, including costs of studies; technical, financial, and accounting assistance; commissions and fees; and interests, and
- use of patents, licences, trademarks, drawings, manufacturing processes, patterns, and similar rights to the extent the payer proves they correspond to actual operations, and they are neither abnormal nor excessive.

Subject to the provisions of tax treaties (France, Italy, Mauritius, and CEMAC), the deduction is allowed within a limit of 20% of taxable profits before deduction of the expenses in question. For specific activities, such as, namely, public works business, the limitation of deductibility is capped at 2% of turnover.

In the event of losses, the rate is applied on the results of the last profit period that is not statutory limited. In the absence of profits during the period out of statutory limitation, the sums paid are not allowed as tax deductions.

When the sums are not allowed, as a whole or in part, in the deductible expenses, they are deemed to be paid benefits and are subject to tax on the dividends at the rate of 15%.

Royalties for the transfer or concession of patents, trademarks, drawings, and other similar titles are deductible to the extent the payer proves they are still valid. When these royalties benefit an enterprise contributing in the management or share capital of an enterprise in the Republic of Congo, they are deemed to be paid benefits and are subject to tax on the dividends at the rate of 15%.

Commission or brokerages relating to goods purchased on behalf of enterprises based in the Republic of Congo are allowable tax deductions at up to 5% of the purchase amount made by the central purchasing office, the head office, or the intermediaries. The reductions shall benefit enterprises based in the Republic of Congo. An original supplier’s invoice must be attached to the intermediary’s invoice.

The payer shall prove that:

- the purchases necessitated the interventions of a broker or intermediary
- the commissions provided better supply conditions compared with the actual situations on the market, and
- the commissions are not excessive compared with the nature of the services.
**Group taxation**

There is specific group taxation within the CEMAC area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of the following conditions are met:

- The stocks or shares owned by the parent company represent at least 25% of the capital of the subsidiary company.
- The parent company and subsidiary companies have a registered office in the CEMAC state (Cameroon, Central Africa Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company, which undertakes to retain them for at least two consecutive years in registered form.

Another group taxation regime is also available upon option and under certain conditions, wherein the taxable profits of the group’s companies can be consolidated at the level of the holding company, which will pay the tax due.

**Transfer pricing**

For companies under the control, de facto or de jure, of companies or groups situated outside the Republic of Congo, payments made by whatever means are considered as transfer of profits and subject to CIT and tax on income from securities if the transfer includes:

- Increase in the purchase price or decrease in the sale price.
- Payment of excessive royalty or without a consideration.
- Loans without interest or at an unjustifiable rate.
- Reduction of debts.
- Benefits that are out of proportion in relation to the service rendered.

Transfer pricing rules have been reinforced, and taxpayers can request their transfer method to be approved by the tax authorities before implementation.

**Thin capitalisation**

There are no specific thin capitalisation rules in the Republic of Congo.

**Holding companies**

A taxation regime applies to incorporated holding companies complying with certain conditions.

Within this regime, capital gains on shares are:

- subject to CIT at standard rate if the shares transferred have been held during less than two years
- subject to a reduced CIT rate (25% of the standard rate, i.e. 7.5%) if the shares transferred have been held during more than two years, and
- tax exempted if (i) the shares transferred have been held for more than two years and (ii) the shares held include at least 60% of shares of CEMAC resident companies.

In addition, these companies benefit from other tax advantages, such as a WHT exemption on certain types of interest as well as a reduced WHT on dividends paid (i.e. 50% of applicable rate).
Controlled foreign companies (CFCs)
There is no provision under Congolese tax law related to CFCs.

Tax credits and incentives

The current investment regime in the Republic of Congo was set out by Law No. 6-2003 of 18 January 2003, which established the investment charter. The charter's application, Decree No. 2004-30 of 18 February 2004, established modes of business registration.

- **Scope:** The following may be registered under the investment charter:
  - Businesses wishing to pursue an activity in the Republic of Congo, except for activities such as brokerage, trade, import, and production of arms, and import or processing of toxic waste and by products.
  - Under certain conditions, commercial activities linked to collection, storage, distribution, and export of locally produced products, except alcoholic beverages and tobacco.
  - New activities (as opposed to pre-existing activities).
  - Forestry businesses benefiting from a forestry permit called the forestry development unit.
  - New companies coming from the redemption of a registered company.
- **Conditions of eligibility for the investment charter:** To be eligible, a company must satisfy the following conditions:
  - Be registered with the Trade and Personal Credit Registry in the Republic of Congo.
  - Create permanent employment, to be carried out over a minimum of 280 days per year.
  - Maintain company share capital equal to or greater than 20% of investments.
  - Primarily use local principal materials necessary for the production of the finished or semi-finished product, when available, with equal conditions concerning price, quality, and time of delivery to outside, in the case of industry.
  - Primarily use local business services, when available, with equal conditions concerning quality, price, and time of realisation regarding payments to external businesses, for the case of service businesses.
  - Be registered at the Congolese National Welfare Fund.
  - Open an account at a local bank or any other financial, savings, or credit establishment.
  - Primarily use a local workforce, when available, with the same expertise as the foreign workforce.
  - Registration procedure: Entitlement to the benefits prescribed by the charter is subject to obtaining a registration agreement, provided by the National Investment Commission.
  - Fiscal and customs benefits set out by the Investment Charter: These benefits vary according to privileged regimes, motivation measures, and in a general manner.

Privileged regimes

The charter sets out three privileged regimes:

- General regime (G).
- Special regime (S).
- Preferential development zone regime.

General regime (G)
The general regime applies to businesses that fulfil the aforementioned general requirements and carry out investments greater than or equal to XAF 100 million.

Special advantages are conferred according to the period of activity of the registered business.
During the set-up period and the first three exploitation tax years, the company receives several benefits, as follows:

- In customs matters, the company benefits from the provisions of the CEMAC customs code relative to asset improvement mechanisms for export activity and from the suspension of customs duty in the form of temporary admission or franchise for natural resource research activities.
- In fiscal matters, the company benefits from the 50% reduction of registration fees for business foundation, increases in capital, company mergers, and transfer of company stocks and shares.

For the three first exploitation tax years and until the first year of sale or first service, the following fiscal benefits are added with the aforementioned reduction of registration duties:

- Total exemption from the tax on company earnings.
  - Companies that are subject to CIT because of their size or activity will be exempt from CIT.
  - Businesses that are subject to personal income tax (PIT) because of their size or activity will be exempt from PIT.
- The authorisation to proceed to accelerated depreciation.
- The authorisation to carry forward losses for the first three tax years.
- The application of zero-rate VAT on exported products.

**Special regime (S)**
The special regime applies to businesses that fulfil the aforementioned general requirements and carry out investments between XAF 30 million and XAF 100 million.

In addition to the advantages of the aforementioned (G) regime, businesses registered under the (S) regime benefit during the set-up period and the first three exploitation tax years from the moderation of registration duties for the incorporation of the business, increases in capital, company mergers, and transfer of company stocks and shares.

This moderation of registration duties is granted exclusively by decree of the Minister in charge of the Economy and Finances upon a decision of the National Investment Commission.

**Preferential development zone regime**
All exporting businesses registered under the investment charter are eligible for the preferential development zone system, including free-trade zones.

The institution, organisation, and function of the preferential development zone are fixed by a specific text.

**Incentives to set up in remote areas**
All new businesses registered under (G) or (S) regimes that are located in a remote area benefit from a reduction of 50% on the tax on company earnings in the fourth and fifth year following the first three tax years for which the business benefited from total exemption from the tax on earnings or PIT.

The business is considered as belonging to a remote area from the moment its production units are set-up and 90% of the production unit workforce is working in the remote location.

The appraisal of a zone’s location results from the exclusive competency of the National Investment Commission.
Incentives for social and cultural investment

All new businesses registered under (G) or (S) regimes carrying out investments of a social and cultural character may benefit from a fiscal reduction by ministerial decree of the Minister in charge of Finance and the Economy, upon the decision of the National Investment Commission.

These benefits may not, however, be added to those mentioned above and allocated to remote areas, even if the business concerned is set-up in such a location.

General measures

For the duration of the privileged regime, and subject to current texts, the company shall enjoy fiscal stability in terms of local and state taxes.

Privileged regimes (G) and (S) are allocated only once and are not renewable. The business may receive fiscal and customs advantages pertaining to the set-up period.

Fiscal advantages concerning the exploitation period are applicable only after the set-up period.

The end of the set-up period is certified by decision of the Minister in charge of Finance and the Economy after the adoption of the verification report by the National Investment Commission.

Respect of the aforementioned general requirements set out by the charter is a prerequisite for benefiting from these motivation measures.

Export incentives

A measure is reserved for businesses that export at least 20% of their production.

The benefits are as follows:

- The provisions of the CEMAC customs code, relating to asset improvement mechanisms.
- Exemption from customs duties and taxes on manufactured products, except computing fees and statistic tax.
- Application of a zero-rate VAT on exported products.

Non-manufactured goods remain subject to the common law export system.

Incentive to reinvest earnings

A measure is reserved for businesses that carry out new investments of at least one-third of existing assets.

The benefit conferred consists of a 50% reduction of the tax on company earnings for the three years following the realisation of the investment.

Notwithstanding, this benefit is granted upon the following conditions:

- The business declares to the permanent secretary of the National Investment Commission its investments, planned investment, and the state of existing capital assets.
- The National Investment Commission, on the report of checking teams, verifies if the new investments correspond to one-third of the preceding capital assets.
- All investments are realised within one year.
- Investments generate new employment.
- Investments increase capacity of production by at least 10%.
- The business has sound ethical concerns.
Institution of preferential tax regime for special economic and industrial zones and health free zones

The 2014 Finance Act provides for incentives in special economic zones as follows:

- CIT and dividend tax exemptions for six years.
- From seven to ten years: CIT and dividend tax rate of 5%.
- Beyond ten years: CIT rate of 15% and dividend tax rate of 10%, permanently.
- Single tax on remuneration rate of 2.5%, permanently.
- Exemption from registration fees for company creation and 50% reduced rates on transfer deeds.

The 2014 Finance Act provides for incentives in industrial zones as follows:

- CIT and dividend tax exemption for five years.
- From six to ten years: CIT rate of 10% and dividend tax rate at 5%.
- Beyond ten years: CIT rate of 20% and dividend tax rate at 10%, permanently.
- Single tax on remuneration rate of 2.5%, permanently.
- Exemption from registration fees for company creation and 50% reduced rates on transfer deeds.

The 2014 Finance Act provides for incentives in health free zones, as follows:

- CIT total exemption.
- Dividend tax rate of 5%.
- Single tax on remuneration rate of 2.5%.

It should be noted that eligibility requirements for the preferential regimes described above have not been set yet.

Foreign tax credit

There are no specific rules relating to foreign tax credits in the Republic of Congo.

Withholding taxes

Services, dividends, and attendance fees

Services

Services rendered by foreign suppliers are subject to a 20% WHT.

In addition, companies that have no tax residence in the Republic of Congo are subject to a 20% WHT if they earn revenues realised in the Republic of Congo or coming from the Republic of Congo, and which come from works or services of any nature performed or used in the Republic of Congo.

WHT does not apply to resident suppliers of a country that has signed an international tax treaty with the Republic of Congo, provided certain conditions are met.

Payments made by building and public work companies to their sub-contractors

WHT is applicable on payments made by building and public work companies to their sub-contractors, including to engineering offices, at the following rates:

- 3% for sub-contractors taxable on their net profit.
- 10% for sub-contractors taxable on a deemed profit (Régime du forfait).
Congo, Republic of

Non-observances, omissions, or underpayments are sanctioned by an XAF 5 million fine and by the non-deductibility of the amounts so paid. Late payments are sanctioned by a 2% penalty per month or portion of month, with a maximum penalty of 100%.

For the considered sub-contractors, said withholding is considered as an instalment of tax.

Dividends
Dividends distributed by a Congolese company are subject to a 15% WHT unless a different rate applies under an international tax treaty (e.g. France, Italy, Mauritius, CEMAC). The same rate applies for dividends distributed to a resident shareholder.

Under the tax treaties between France and the Republic of Congo and between Italy and the Republic of Congo, the applicable WHT rate is 15%.

Under the tax treaty between Mauritius and the Republic of Congo, the applicable WHT rate is 5%.

There is no specific rate defined in the CEMAC tax treaty.

Attendance fees
Attendance fees are subject to a 17% WHT unless a different rate applies under an international tax treaty (e.g. France, CEMAC).

Payments to local independent contractors
Payments to local independent contractors (self-employed contractors, i.e. those not registered with the Congolese Trade Registry) are subject to a WHT at the rate of 5% from such payments, to be remitted to the Public Treasury.

Late remittance of the WHT is subject to a late payment penalty of 50% within the first two months and 100% if the late payment exceeds two months.

The application of the 5% WHT also applies to companies regrouping professionals and increases penalties in case of non-payment (200% penalty, plus 5% interest per month for late payment).

Revenues of legal entities subject to CIT are excluded from the application of the WHT of 5%.

Tax administration

Taxable period
The taxable period is the calendar year.
**Tax returns**

The annual CIT return is a specific form (*Déclaration Statistique et Fiscale* or DSF) that should be prepared in accordance with OHADA accounting principles. The form cannot be completed electronically.

Companies have to use the CEMAC CIT return form, which has been modified to be compliant with Congolese tax law (new form for the determination of the CIT basis and new tax balances for debts and liabilities).

The books must be maintained in French and in Central African CFA francs. This accounting system must follow the OHADA chart of accounts. All entries have to be booked under OHADA standards throughout the year.

The annual CIT return must be filed on 20 May at the latest.

**Payment of tax**

Resident companies are required to pay quarterly instalments of tax (20 February, 20 May, 20 August, and 20 November), and these quarterly instalments are generally calculated with reference to the most recent CIT return. Special calculations of instalments apply to new taxpayers.

Based on the self-assessment system, when submitting annual tax returns due by 20 May every year, taxpayers must pay the amount of tax calculated in the annual tax return to the extent this amount exceeds tax instalments paid during the year.

Non-resident companies and individuals shall appoint tax representatives in the Republic of Congo. The Congolese resident shall be considered as tax representative if the non-resident person fails to appoint a tax representative.

**Tax audit process**

Tax audits are usually announced by a letter from the tax authorities to the entity concerned of their intention to audit, while stating the period to be audited and the taxes that will be covered by the audit.

The tax authorities may organise meetings with the taxpayer to inform the taxpayer of the preliminary outcomes of the audit, and the taxpayer has the possibility to make counter remarks.

Thereafter, the tax authorities notify the taxpayer, in writing, of their proposed tax adjustments, and the taxpayer makes counter remarks in writing within 30 days from date of receipt of the tax adjustment notice.

Based on whether the tax authorities find the counter remarks from the taxpayer grounded or not, a letter confirming the tax adjustments or renouncing the proposed tax adjustments shall be sent to the taxpayer, who has the choice to either pay the taxes claimed, negotiate for a reduction of fines, or open up a tax litigation process.

The taxpayer may negotiate the taxes, fines, and the mode of payment of the tax claimed by the tax authorities thereby renouncing one’s right to open up tax litigation.

The taxpayer has the right to request from the Director General of Taxation and Real Estate a transactional mode of payment of fines or payment of tax by friendly settlement. If the taxpayer opts for the transaction, the taxpayer loses the right to object to the outcome of the transaction and is obligated to immediately pay the taxes due (principal and penalties) according to the agreement.

To open up a tax litigation process, the taxpayer will pay a prior deposit of 10% of the sum contested as guarantee (or a banking guarantee as security for litigation) and 5 per
Congo, Republic of

thousand of the sum contested for the treatment of the tax claim file and will submit the tax claim file to the Tax Head Office if the amount of the claim exceed XAF 30 million and to the Director of Tax Department if the amount claimed is less than XAF 30 million.

The tax authorities will respond to the tax counter claim of the taxpayer, who, if not satisfied, could open a court claim.

Statute of limitations
Generally, the statute of limitations period for CIT is four years following the year in which the tax was due. However, this rule does not apply in the case of fraudulent acts reported by the tax administration.

Topics of focus for tax authorities
The tax authorities particularly focus on aspects such as:

• Compliance of deductible expenses.
• CIT compliance.
Significant developments

A new law was introduced in Egypt (law no. 96 of 2015) on 20 August 2015 amending certain articles of the Egyptian income tax law. Among these changes is the following:

• The corporate income tax (CIT) rate was amended to be a flat rate of 22.5% on the net profits of a company.
• The 5% surtax on the taxable income exceeding 1 million Egyptian pounds (EGP) was abolished.
• The tax on capital gains on listed shares has been placed on hold for two years as of 17 May 2015.
• There have been recent amendments to the customs duty in Egypt, where new registration processes as well as an increase in some of the customs rates (specifically those imposed on 500 tariff items) have been imposed within the past six months.

Taxes on corporate income

Resident companies are taxed on worldwide income. Non-resident corporations and partnerships pay tax on income derived from their permanent establishments (PEs) in Egypt.

The CIT rate in Egypt is 22.5% as of 20 August 2015 (previously 25%) on the net profits of a company.

The above rate applies to all types of business activities except for oil exploration companies, whose profits are taxed at 40.55%. In addition, the profits of the Suez Canal Authority, the Egyptian Petroleum Authority, and the Central Bank of Egypt are taxable at a rate of 40%.

Surtax

As per the amendments introduced by law no. 96 of 2015, the 5% surtax on the taxable income exceeding EGP 1 million has been abolished.

Local income taxes

There are no local income taxes on corporate income.

Corporate residence

Foreign corporations and partnerships are classified as residents of Egypt if they meet one of the following conditions:

• The entity is established according to the Egyptian law.
• The government or a public authority owns more than 50% of the capital of the entity.
• The effective place of management is in Egypt.

The executive regulations of the law indicate that Egypt is considered as the effective place of management if the entity meets any two of the following conditions:

• Daily managerial decisions take place in Egypt.
• Members of the board of directors hold their meetings in Egypt.
• At least 50% of the board members or managers reside in Egypt.
• The major shareholders (owners of more than 50% of the shares or voting rights) reside in Egypt.

**Permanent establishment (PE)**

The PE concept is defined in the Income Tax Law as follows:

• Headquarters.
• Branch.
• Building used as sale outlet.
• Office.
• Factory.
• Workshop.
• Places of extraction of natural resources.
• Farms.
• Building site, construction or assembly point, installations, supervisory activities of the same.
• An agent who has the power to ratify contracts on behalf of a foreign company.
• An independent broker or agent who is proved to have dedicated most of one’s time during the year in the interest of a foreign company.

A foreign company that is deemed to have a PE risk, according to the Egyptian Companies Law, should incorporate a legal entity in Egypt.

There are several legal forms existing under the Egyptian Companies Law from which a foreign company can choose to incorporate, and these are: joint-stock company, limited liability company, branch, or a representative office.

**Other taxes**

**Sales tax**

The standard sales tax rate is 10% of the value of commodities (except for those referred to in special schedules of the law) and 5% to 10% for specific services. Some examples of the commodities subject to sales tax rates other than the standard 10% rate are as follows:

• Cement: 5%.
• Specific types of televisions and fridges: 25%.
• Air conditioners: 25%.

The Sales Tax Department is responsible for assessing the tax on the sales of locally produced goods and imported goods, except for those exempted by a special decree.

Consequently, all natural persons and legal entities are required to collect general sales tax and remit it to the Sales Tax Department. This includes manufacturers and providers of taxable services and every importer of commodities or taxable services.

**Customs duties**

The liability for customs duty rests with the person who is importing the goods from abroad.
Customs duty rates on imported goods range from 5% to 40%, with the exception of vehicles for which different rates apply.

Where entities import machines and equipment as capital assets, and to establish the company’s project, the machines and equipment will be charged customs duty at 5%.

Component parts, which are imported to be assembled in Egypt, are assessed customs duty based on the complete product. Then, it is reduced by a percentage ranging from 10% (if the local content of the final product is less than 30%) to a maximum of 90% (if the local content exceeds 60%).

Machines, equipment, and similar capital assets (with the exception of private motor cars) imported on a temporary basis are subject to fees at 20% of the original customs duty for each year or fraction of a year during which they remain in Egypt until they are exported.

It is worth noting that, within the past six months, recent amendments have been introduced in the customs duty law. These amendments include:

- The Ministry of Trade and Industry in Egypt (‘the Ministry’) issued Resolution no. 43 of 2016 concerning the new rules of registering qualified foreign manufacturers prior to exporting their products to Egypt. The new requirement mandates that foreign manufacturers, their authorised distributors, or companies owning the manufacturer products’ trademarks to register with the General Organisation Export and Import Control (GOEIC) in order to clear their products into Egypt for trading purposes. The new requirements are applicable for a wide range of products, including foodstuff, cosmetics, cutlery, steel bars, household appliances, furniture, clothes, shoes, toys, motorcycles, and other products.
- Central Bank Instruction of 21 December 2015 stipulates that customs documents that are related to import transactions conducted through ‘cash against documents’ must only be exchanged between the importer and exporter’s banks. Previously, customs documents were allowed to be sent directly from the exporter to the local importer or its representative in Egypt by mail, courier, etc.
- The Egyptian Authorities through Resolution no. 25 of 2016 have increased the customs duty rate on 500 tariff items effective on 31 January 2016. The customs duty applied to these items has been increased by 10% (e.g. from 5% to 15%, from 30% to 40%). Some of the items subject to increased customs duties are clothes, cosmetics products, vegetables and fruits, furniture, toys, and other goods.
- The Egyptian Customs Authority issued Instruction no. 202 of 2015 enforcing the requirement for submitting attested invoices for import customs purposes. The attestation is only required at the level of the Chamber of Commerce in the exporting country. Although the Egyptian Customs Law and its amendments required the submission of authenticated customs documents already, the submission of an attested invoice was not being enforced at the borders. This Instruction is applied as of 21 January 2016.

**Excise taxes**
There are no excise taxes in Egypt.

**Real estate taxes**
The Real Estate Tax Law takes into consideration the different variables that can affect the value of a property, such as location, value of similar buildings, and the economic situation of the district in which the property is located. This is to be updated every five years (most recently in August 2014).

Real estate tax is levied annually on all constructed real estate units, with the exemption of schools, orphanages, charitable organisations, and private residences with a market
value of less than EGP 2 million. This tax covers land and buildings, excluding plant and machinery.

Such tax is assessed based on the rental value of the land and building, and these value assessments are set by the committees, after approval of the Minister or whomever the Minister delegates, and published in the Official Journal. Based on the announcement, any taxpayer can appeal the rental value assessment.

The real estate tax rate is 10% of the rental value, and the calculation of the rental value differs for residential units and non-residential units. Specific percentages of deductions are provided by the law to account for all the expenses incurred by the taxpayer, including maintenance costs.

**Stamp tax**
There are two distinct types of stamp tax, which are imposed on legal documents, deeds, banking transactions, company formation, insurance premiums, and other transactions, as follows:

- The nominal stamp tax is imposed on documents, regardless of their value. The tax rate for items such as contracts is EGP 0.9 for each paper.
- Percentage or proportionate stamp tax is levied based on the value of transactions.

An annual proportional stamp tax at the rate of 0.4%, shared by the bank and the client, is imposed on a bank’s loans. This stamp tax is due on a quarterly basis on the beginning balance of each quarter of credit facilities and loans and advances provided by Egyptian banks or branches of foreign banks during the financial year in addition to the amounts utilised within the quarter.

Loans from other establishments are not subject to this tax.

Stamp tax is imposed on advertisements at the rate of 20%.

**Payroll taxes**
There is no payroll tax other than the employer’s social insurance contribution.

**Social insurance (employer’s contribution)**
The social insurance contribution of the employer is 26% of the basic salary (up to EGP 1,120) and 24% of the variable salary (up to EGP 2,110).

**Branch income**
Branches of foreign corporations operating in Egypt receive tax treatment identical to that of corporate entities for the results of their activities in Egypt.

A branch, but not a subsidiary, may deduct a ‘head office charge’ of an amount of up to 10% of its taxable income.

According to law no. 53 of 2014, which imposed withholding tax (WHT) on dividend payments, a PE’s profits will be deemed dividend payments (and thus subject to 5% tax) if not repatriated within 60 days of the following financial year end.

**Income determination**

**Inventory valuation**
Egyptian generally accepted accounting principles (GAAP) should be applied to inventory valuation, and all methods that are acceptable by Egyptian GAAP can be used.
The methods acceptable are the same as those acceptable under International Financial Reporting Standards (IFRS).

**Capital gains**
The new law defines capital gains as the difference between the acquisition cost and the fair value/selling price of the share. As for listed shares acquired before 1 July 2014 and sold after that date, the capital gain will be calculated as the difference between either the acquisition price or the closing price on 30 June 2014 (whichever is higher) and the selling price.

**Capital gains tax treatment applicable to resident companies**

- Listed shares/securities: Capital gains realised from the sale of listed shares will be subject to 10% WHT. However, law no. 96 of 2015 has put the tax on capital gains on listed shares on hold for two years as of 17 May 2015.
- Unlisted shares/securities: Capital gains realised from the sale of unlisted shares will be subject to CIT (i.e. 22.5%).
- Foreign shares/securities (invested abroad): Capital gains realised from shares invested abroad will be subject to CIT, with a credit to be given for the foreign tax paid.

**Capital gains tax treatment applicable to non-resident companies**

- Listed shares/securities: Capital gains realised from the sale of listed shares will be subject to 10% WHT. However, law no. 96 of 2015 has put the tax on capital gains on listed shares on hold for two years as of 17 May 2015.
- Unlisted shares/securities: Capital gains realised from the sale of unlisted shares will be subject to CIT (i.e. 22.5%).
- Foreign shares/securities (invested abroad): Capital gains realised from shares invested abroad will not be taxable in Egypt.

**Capital losses**
A capital loss can be offset against a capital gain arising during the same tax year, provided that they both arise from the sale of shares. Excess capital losses that are not utilised during a tax year can be carried forward for a period of three years and should be offset against capital gains from the sale of shares.

**Dividend income**

**Dividend income treatment applicable to resident companies**
A 10% WHT will be imposed on dividends paid by Egyptian companies to resident corporate shareholders. The 10% WHT can be reduced to 5% if both of the following conditions are met:

- The shareholder holds more than 25% of the share capital or the voting rights of the subsidiary company.
- The shares are held for at least two years.

Dividends received by resident companies from other resident companies, and the related costs, are excluded from the recipient companies’ taxable profit.

**Dividend income treatment applicable to non-residents**
A 10% WHT will be imposed on dividends paid by Egyptian companies to non-resident corporate shareholders. The 10% WHT can be reduced to 5% if both of the following conditions are met:

- The shareholder holds more than 25% of the share capital or the voting rights of the subsidiary company.
The shares are held for at least two years.

**Participation exemption**

90% of the dividends distributed by a non-resident corporate shareholder to a resident one will be exempt from tax (i.e. only 10% of the amount of the dividends will be subject to tax). Such exemption can be benefited from if both of the following conditions are met:

- The shareholder holds at least 25% of the share capital or the voting rights of the subsidiary company.
- The company holds or commits to hold the shares of the subsidiary for at least two years.

**Permanent establishments (PEs)**

A PE's profits can be deemed dividend payments, and thus subject to the above treatment, if they were not repatriated to the parent company within 60 days of the PE's financial year end.

**Stock dividends**

Stock dividends are not subject to tax in Egypt.

**Interest income**

Interest expenses are deducted from interest income when calculating the interest income to be included in taxable income if certain conditions are met.

**Rent/royalty income**

Rent/royalty income are not taxed separately; they are considered as part of the company's income and taxed accordingly (i.e. at the 22.5% CIT rate).

**Foreign income**

Income from any source, domestic or foreign, received by a corporation within Egypt is subject to CIT. The scope of tax covers the activities carried out inside and outside Egypt, which are administered or managed within Egypt.

There is no provision for deferring income earned abroad.

**Deductions**

In order for expenses to be acceptable for tax deduction, such expenses must be:

- actual and supported by documents
- business related, and
- necessary for performing the company's activity.

**Depreciation and amortisation**

The tax law set the depreciation and amortisation rates for tax purposes to the following:

- 5% of the cost of purchasing, establishing, developing, and renovating buildings and establishments is deductible based on the straight-line method.
- 10% of the cost of purchasing, developing, and improving intangible assets is deductible based on the straight-line method.
- Computers, information systems, software, and data storage sets are depreciated at a 50% rate on a declining-balance method.
- All others assets are depreciated at a rate of 25% of the depreciation basis for each fiscal year, on a declining-balance method.
Egypt

Accelerated depreciation
A company may have the option to deduct 30% accelerated depreciation from the cost of new or used machines and equipment used in industries during the first fiscal year of their employment. This should be done by submitting a request to the tax authority prior to deducting the 30% accelerated depreciation.

Goodwill
According to Article 25 of the Egyptian Income Tax Law, goodwill is amortised at the rate of 10% using the straight-line method.

Start-up expenses
Start-up expenses are tax deductible, and the whole amount can be amortised for the first year.

Interest expenses
Interest expenses are deductible for tax purposes after offsetting any tax-exempt interest income.

Interest expense deductions are only allowed if the following conditions are fully met:

- The interest rate does not exceed twice the discount rate as determined by the Central Bank of Egypt at the beginning of the calendar year in which the tax year ends.
- The interest expense is in return for loans complying with the local thin capitalisation rule: 4:1 debt-to-equity ratio.
- The Egyptian transfer pricing rules (i.e. arm's-length principle) are being followed (see Transfer pricing in the Group taxation section for more information). In case of a tax audit, if the interest rate isn’t proven to be at arm’s length, the tax authority has the right to adjust this price to arrive at the ‘arm’s-length price’ and re-calculate the taxes due accordingly.
- The loan is business related.

Bad debt
According to Article 28 of the Egyptian Income Tax Law, deduction of bad debts shall be allowed, subject to submitting a report from the external auditor indicating the fulfilment of the following conditions:

- The company is maintaining regular books and records.
- The debt is related to the company activities.
- That debt value was previously included within the company accounts and records.
- The company has taken serious procedures for settlement of such debt and has been unable to collect it after 18 months from its due date.

Charitable contributions
Donations to the government are tax deductible. Donations to Egyptian charities are also deductible, but only up to 10% of taxable income.

Fines and penalties
Financial fines and penalties paid by the taxpayer because they or one of their subordinates has committed a deliberate felony or misdemeanour are not deductible.

Taxes
Income tax payable according to the Income Tax Law is not deductible.

Other significant items
The following other items are not deductible:

- Reserves and appropriations of all different types.
• Profit shares, distributed dividends, and the attendance fees paid to shareholders for attending the general assembly's meetings.
• Compensation and allowances obtained by the chairmen and board members.
• Workers profit share to be distributed according to the law.

**Net operating losses**
A company may carry losses forward for a period not to exceed five years. Nevertheless, if a change occurs in the ownership of its capital exceeding 50% of the shares, stocks, or the voting rights, if the company is either a joint-stock company or a company limited by shares whose shares are not listed on the Egyptian Stock of Exchange, and if the company changes its activity, the company cannot carry the losses forward.

In general, companies cannot carry losses back, except for contracting companies, which are allowed a loss carryback period of five years.

**Payments to head office**
A branch may deduct head-office charges of up to 10% of its taxable income. Moreover, the branch or subsidiary should withhold taxes before the payment of interest, royalties, and service fees to non-resident foreign corporations or affiliates.

---

**Group taxation**

The Egyptian tax law treats every company in a group of companies as a separate legal entity. Thus, affiliated companies or subsidiaries cannot shift the profits/losses within the group.

**Transfer pricing**

Transfer pricing rules follow the arm's-length principle, specifying that any transaction between related parties should be at arm's length (i.e. market value).

The law does not specify penalties with regard to transfer pricing. However, the law states that the Egyptian tax authorities may adjust the pricing of transactions between related parties if the transaction involves elements that would not be included in transactions between non-related parties, and whose purpose is to shift the tax burden to tax exempt or non-taxable entities. Where this is the case, the tax authorities may determine the taxable profit on the basis of the neutral price. The acceptable methods for determining such neutral price, according to the rule of the law, are as follows:

• Comparative free price (same as Comparable Uncontrolled Price method [CUP]).
• Total cost with an added margin of profit (same as Cost Plus method).
• Resale price.

On 29 November 2010, the Egyptian Tax Authority launched the Transfer Pricing Guidelines (‘TP Guidelines’). The TP Guidelines are being issued as a series of parts, the first part of which was issued in final version to the public and provides guidance on the arm’s-length principle, how to establish comparability, choosing the most appropriate transfer pricing method(s), and documentation requirements. The coming parts should cover more complex transfer pricing topics, specifically transactions involving intellectual property (IP), intra-group services, cost contribution arrangements, and advanced pricing agreements (APAs).

Taxpayers are required to prepare contemporaneous documentation studies to support the arm’s-length nature of their controlled transactions. The Egyptian tax authority does not require the submission of transfer pricing documentation studies with the tax return; rather, they are required to be available upon request in a tax audit. Studies are acceptable in English, but a translation may be requested from the taxpayer.
The Egyptian tax authority explained that the TP Guidelines will be utilised as a practical guide to assist taxpayers and tax inspectors in understanding how to implement and examine transfer pricing transactions. The Egyptian TP Guidelines were compared to the Organisation for Economic Co-operation and Development (OECD) by an OECD representative and were found to be similar.

**Thin capitalisation**
The Egyptian thin capitalisation rule provided by the Egyptian Income Tax Law dictates that the debt-to-equity ratio is 4:1. Accordingly, the Law disallows the deductibility of debit interests of Egyptian companies on loans and advances if such loans and advances are in excess of fourfold the equity average (which is calculated according to the financial statements prepared pursuant to the Egyptian accounting standards).

The debit interest includes all amounts chargeable by the company in return for loans, advances of any kind obtained thereby, bonds, and bills. Loans and advances include, for purposes of this item, bonds and any form of financing by debts through securities with fixed or variable interest.

For determining the equity, the following items represent the basis for the calculation: the paid-up capital in addition to all reserves and dividends reduced by retained losses, provided that the differences of the adjusted account is not included in the reserves account and is determined to be non-taxable. In case of retained or carryforward losses, they must be used to reduce retained profits and reserves solely; the percentage is calculated on the basis of total loans and advances in proportion to the remaining equity amount after deducting the retained losses with a minimum of the paid-up capital.

**Controlled foreign companies (CFCs)**
Egypt currently does not define specific rules for CFCs; however, in an effort to exert similar CFC provisions, investments are evaluated according to the Egyptian Accounting Standards and the equity rights method where the profits generating from the disposal of such investments are determined on the basis of the difference between the cost of investment acquisition and its sale value.

**Tax credits and incentives**
Egypt offers no specific tax incentives.

**Foreign tax credit**
The foreign tax paid by a resident company on its profits earned abroad is deductible from the tax payable in Egypt; however, losses incurred abroad are not deductible.

**Withholding taxes**
A corporation paying invoices must withhold 0.5% to 5% of payments, depending on the services and commodities, to local taxpayers and remit them quarterly to the tax department.

A 10% WHT is imposed on dividends paid by Egyptian companies to resident corporate shareholders. See Dividend income in the Income determination section for further information.

Payments of dividends, interest, royalties, and services by a domestic corporation to foreign or non-resident bodies are subject to WHT as follows.
**Dividends to non-residents**
A 10% WHT is imposed on dividends paid by Egyptian companies to non-resident corporate shareholders (see Dividend income in the Income determination section for further information). However, an applicable double tax treaty (DTT) between Egypt and the foreign country may result in the reduction of such tax rate.

**Interest to non-residents**
Interest on loans with a three-year term or more entered into by private sector companies is exempt from WHT, while loans of less than three years are subject to 20% WHT on interest. However, an applicable DTT between Egypt and the foreign country may result in the reduction of such tax rate. Please see below for the ministerial decree affecting the treatment of interest and royalty payments.

**Royalties to non-residents**
Royalty payments are subject to the 20% WHT. However, an applicable DTT signed between Egypt and the foreign country may result in a reduction in this rate. Please see below for the ministerial decree affecting the treatment of interest and royalty payments.

**Service payments to non-residents**
Service payments are subject to the 20% WHT. However, an applicable DTT signed between Egypt and the foreign country may result in the exemption of these payments if the services are performed abroad and not through PE in Egypt.

For payments withheld on behalf of non-resident entities, tax shall be remitted to the tax authority the day following the withholding of the amount.

**Tax treaties**
Egypt has concluded DTTs with about 50 countries, which could change the tax treatment of transactions carried out between Egyptian entities and residents of a treaty country.

Notes

1. Dividends paid out by a company resident of Egypt to an individual of the other contracting state shall not be taxed more than the maximum amount mentioned. 15% in all other cases.
2. Reduced rate of the gross amount of dividends is applied if the beneficial owner is a company that holds at least 25% of the company’s capital. Higher rate applies in all other cases.
3. In the absence of specific provisions, dividends may be taxed under the local law at 10%, which may be reduced to 5% under certain conditions.
4. Lower rate applies if the foreign company holds more than 25% of the capital in the company.
5. Lower rate applies if the beneficial owner is a company.
6. Taxed in both the resident and source state.
7. The reduction in the rate does not apply if the recipient is engaged in a trade or business in the United States through a PE that is in the United States. However, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a PE in the United States to apply the reduced treaty rate to that item of income.
8. See Dividend income in the Income determination section for descriptions of instances when the 5% rate applies.
Procedures for applying the WHT on payments to non-residents
Ministerial decree no. 771 for 2009 dictates that the reduced rate of WHT on interest or royalties provided by an applicable DTT should not be automatically applied. The rate of 20% (Egyptian tax rate) should be imposed upon deduction. However, under certain conditions, the foreign recipient of payments will be able to get a refund for the amount resulting from the variance between the normal rate of 20% and the reduced treaty rate.

Certain documents should be submitted to the tax authority along with the refund claim.

A special unit responsible for interest and royalty WHT refunds is tasked with reviewing each refund case and with issuing refund letters (subject to compliance with the requirements of the 2009 ministerial decree). A refund letter is required to be able to get a refund of excess WHT from the tax office to which the taxes were actually paid.

Please note that free zone entities, which are considered tax exempt, are obligated to withhold tax when dealing with non-resident entities and shall remit the tax to the tax authority.

In April 2015, the Egyptian tax authority issued new Executive Regulations to amend certain articles of the original Executive Regulations of the Egyptian Income Tax Law no. 91 of 2005. The amendments introduced by the new Executive Regulations abolished some provisions of article 76 of the original Executive Regulations of the law; however, it’s still controversial whether or not the provisions of decree 771 regarding paying the 20% tax and claiming a refund should continue to apply or the DTT should apply automatically.

Tax administration

Taxable period
The tax year is the financial year of the taxpayer.

Tax returns
The taxpayer is required to assess taxes due for every financial year and settle them with the tax return.

The CIT return is due within four months from the end of the financial year; consequently, if a company's financial year ends 31 December, then the tax return has to be filed before the end of April of the following year.

For the filing requirements of the WHT on dividends, the entity executing the transaction should withhold 1% of the dividends distributed by an Egyptian entity, and remit it to the tax authority at a maximum date of the fifth day of the month following the month at which the distribution took place. This amount is considered part of the dividends tax. Later, the shareholder should remit the remaining amount of the tax to the tax authority.

Payment of tax
Advance payments are deducted from taxes assessed per the tax return, and the balance is payable in a lump sum at the date of submitting the tax return.

Note that tax on capital gains realised on shares listed on the Egyptian stock exchange should be remitted to the tax authority by the legal entity undertaking the sale transaction. However, in case the shares are unlisted in the Egyptian stock exchange, the tax on capital gains should be withheld by any party executing the transaction.

The advance payment (i.e. WHT) is submitted on a quarterly basis.
Egypt

Penalties
If the taxpayer included a tax amount in the tax return that is less than the finally assessed tax, the taxpayer is liable to a fine based on the non-included percentage, as follows:

- 5% of the tax payable on the non-included amount if such amount is equivalent to 10% up to 20% of the final tax due.
- 15% of the tax payable on the non-included amount if such amount is more than 20% up to 50% of the final tax due.
- 40% of the tax payable on the non-included amount if such amount is more than 50% of the final tax due.

Tax audit process
The audit cycle proceeds as follows:

Inspection
The tax authority inspects the company based on its documents and records in order to assess the total tax due on the company and determines the difference in tax due as per the company declaration and the tax authority assessment. The authority issues an assessment including the total tax due on the company. If the company objects to the inspection result, the dispute is transferred to the Internal Committee.

Internal Committee
The dispute is transferred to the Internal Committee to discuss the dispute points that arose from the inspection further to issue a modified assessment based on its opinion. If the company objects to the Internal Committee result, the dispute is transferred to the Appeal Committee to review the dispute points arising from the Internal Committee.

Appeal Committee
The Appeal Committee’s decision is final and binding on the company and the tax department unless a case is appealed by either of them at the court within 30 days of receiving the decision. Based on the fact that the total taxes due on the assessment as per the Appeal Committee are considered final if they are not paid within the appropriate period, there will be penalties for the late payment.

Court
If the decision of the Appeal Committee is not satisfactory for either party, the case will be transferred to the court system, which is considered the final stage of the disputes. Normally, the court will appoint an expert witness to investigate the case and prepare a report. The court process usually takes a long period of time.

Statute of limitations
The statute of limitations is five years according to the Egyptian Income Tax Law and is extended to be six years in case of tax evasion.

Topics of focus for tax authorities
The most important topic for tax authorities is transfer pricing.

General anti-avoidance rule (GAAR)
A GAAR is applicable to arrangements entered into on or after 1 July 2014. The primary objective of the GAAR is to deter taxpayers from entering into abusive arrangements for the purpose of obtaining an abusive tax advantage. The law stipulates that the tax effect of any transaction whose main purpose, or one of the main purposes thereof, is tax avoidance shall not be reckoned with. In this case, the crucial factor when making tax assessments is the real economic substance of the transaction in question. The burden of proving that the main purpose, or one of the main purposes, of conducting a transaction has been to avoid taxation lies with the tax authority.
**Significant developments**

There have been no significant corporate tax developments in Equatorial Guinea during the past year.

**Taxes on corporate income**

The corporate income tax (CIT) must be paid by any resident entity.

Taxable profit is determined by deducting from gross income all expenses tied to the performance of taxable activities in Equatorial Guinea. In principle, all expenses are deductible, but the Tax Code provides deductibility rules for some of them.

Resident companies are subject to CIT on their worldwide income (even if, in practice, it is tolerated for CIT only to be applied to income related to activities carried out in Equatorial Guinea). Non-resident entities are subject to a 10% withholding tax (WHT) on gross income derived from sources in Equatorial Guinea.

The CIT rate is 35% on taxable profits.

**Minimum income tax (MIT)**

The MIT rate is 3% of the turnover of the company for the previous year. This amount cannot be lower than 800,000 Central African CFA francs (XAF) (even if the company does not generate any revenue).

MIT can be totally or partially deducted from the CIT liability to be paid.

**Local income taxes**

There are no local income taxes in Equatorial Guinea.

**Corporate residence**

A legal entity present in Equatorial Guinea more than three months within a calendar year, or more than six months within two consecutive calendar years, and performing an economic activity or providing paid services in the country is considered as a resident for taxation purposes.

The notion of residence applies equally to any kind of activity (even if there is some specificity in the oil and gas sector).

**Permanent establishment (PE)**

The notion of ‘permanent establishment’ is not defined in Equatorial Guinea’s Tax Code. Authorities mainly refer to the notion of residence as defined above.
**Other taxes**

**Value-added tax (VAT)**
VAT is an indirect tax on consumption based on turnover.

All operations performed in Equatorial Guinea are subject to VAT unless they are included in the list of exemptions provided by the Equatorial Guinea Tax Code or a specific tax regime.

VAT is generally chargeable on the following:

- Goods sold or assigned for valuable consideration.
- Services provided.
- Self-consumed goods and services.
- Imports.
- Other operations carried on by individuals or legal entities in their sphere of business, professional, and individual activities, including extraction activities.

The standard VAT rate is 15%.

A rate of 0% is applicable to a specific list of products and equipment provided in the Tax Code (e.g. certain medical products, some equipment for construction).

A reduced rate of 6% is applicable to a limited list of basic consumables and books.

**Customs duties**
The customs duties are based on the categories of goods as follows:

- Category I: Primary necessity goods: 5%.
- Category II: Raw material and materials: 10%.
- Category III: Intermediary goods and miscellaneous: 20%.
- Category IV: Current consumption goods: 30%.

**Excise taxes**
Excise taxes are applicable on specific goods, such as alcoholic drinks and tobacco. The rates are from 20% to 50% plus a special Economic and Monetary Community of Central Africa (CEMAC) contribution from 0% to 35%.

**Real property tax**
A 1% urban property tax applies annually to 40% of the value of the land and the buildings on such land. Urban property is defined by the Tax Code as “any land with or without buildings and the buildings built thereon, whenever located in urban areas”.

**Transfer tax**
For the transfer of goods between residents and non-residents, and between non-residents, there is a 3% tax on the value of the goods.

Real estate transfers between residents are taxed at the rate of 5% on the value of the real estate. The rate increases to 25% on real estate transfers between residents and non-residents, and between non-residents.

**Stamp duties**
Stamp duties are payable on a variety of instruments and transactions and vary depending on the concerned legal act.

**Payroll taxes**
The personal income tax (PIT) liability is withheld from the employee’s salary and declared and paid by the employer.
Equatorial Guinea

The tax tables applicable to individuals are provided in the Taxes on personal income section of Equatorial Guinea’s Individual tax summary at www.pwc.com/taxsummaries.

Social security contributions
Employers contribute 1% of gross salary to the Work Protection Fund (Fondo de Protección al Trabajo in Spanish) and 21.5% to the National Institute of Social Security (INSESO for its Spanish acronym) on a monthly basis.

Employees contribute 0.5% of net salary to the Work Protection Fund and 4.5% to the INSESO on a monthly basis.

Both of these contributions are declared and paid by the company.

Branch income
Branch income is subject to CIT. We understand there is no branch remittance tax, even if tax authorities have tried to challenge this position in the past.

Income determination
Inventory valuation
Inventory is evaluated at cost price for tax purposes. The tax method generally matches the book method.

Capital gains
Capital gains are, in principle, subject to CIT.

Some exemptions and specific tax regimes can apply, as follows:

- Capital gains that come from the assignment, in the ongoing operation, of the components of the fixed assets will not be included in the taxable profit of the fiscal year in the course of which they have been obtained if the taxpayer puts them in a special account named ‘capital gains to be reused’ and is committed to reinvesting in new fixed assets in the company before the expiration of a period of time of three years, starting from the close of this fiscal year, an amount equal to the amount of these capital gains plus the cost of the assigned components.
- Capital gains different from those obtained on goods, resulting from free assignment of stock, corporate portions, or liabilities, as a consequence of the merger of corporations, limited partnerships by shares, or limited companies, will be exempt from the tax regarding the profits made by those corporations, on condition that the take-over company or the new company has its corporate headquarters in Equatorial Guinea.

Dividend income
All dividends received by a resident company are subject to CIT.

A personal income WHT of 25% is applicable on dividends paid to individuals or companies not having their usual domicile or headquarters in Equatorial Guinea. This tax is a final tax for those taxpayers.

The net products of the shares owned and earned by the parent company from its subsidiary can be deducted from the total net profits of the parent company after offsetting from this amount 25% (expenses and charges lump sum amount) if the:

- shareholder holds at least 25% of shares of the subsidiary and
• shareholder guarantees the shares have always been registered in the name of the participating company and commits it will hold these shares for at least two consecutive years.

This proportional part is established at 10% of the amount of these products and represents the management expenses already deducted from overhead costs.

**Interest income**
Interest earned by companies established in Equatorial Guinea is subject to CIT (35% rate).

Interest earned by companies not having their usual domicile or headquarters in Equatorial Guinea is considered as dividend income and subject to WHT at a 25% rate.

**Foreign income**
Resident companies are subject to CIT on their worldwide income.

There is no tax deferral in Equatorial Guinea.

---

**Deductions**

**Depreciation**
A straight-line method of computation of depreciation should be applied to fixed assets according to the normal useful lives of the assets involved, as provided by the Tax Code.

**Goodwill**
Goodwill is, in principle, not deductible.

**Start-up expenses**
Start-up expenses can be amortised (regarding tangible assets) or fully deductible (regarding registration costs and fees).

**Interest expenses**
Interest expenses are deductible if they do not exceed the limit for loans set up by the Central Bank.

**Bad debt**
Bad debts are deductible, given they are supported.

**Charitable contributions**
Charitable contributions are deductible, given they are for philanthropic, sport, educative, scientific, social, or family purposes and do not exceed 0.5% of the turnover for the fiscal year of the company.

**Fines and penalties**
Fines and penalties are not deductible.

**Taxes**
Only professional taxes are deductible.

**Net operating losses**
Net operating losses can be carried forward for three years (five years for companies belonging to the oil and gas sector). Losses cannot be carried back. Losses of one entity cannot be transferred to another entity in a reorganisation.

In theory, when the results of a company, no matter the kind of company, are negative during a maximum period of three consecutive years, this company will immediately be
removed from the register by the Tax Administration for the practice of the activity for which it was registered, except when the company is newly created.

**Payments to foreign affiliates**
The deductibility of the technical assistance made by the parent company to its subsidiary is limited to 50% of the intermediary tax result (accounting result plus potential fiscal reintegration).

In case of a deficit, the relevant basis for the evaluation of the foreign technical assistance amount to be reintegrated will be the intermediary result of the last beneficiary fiscal year.

**Group taxation**
Equatorial Guinea law does not provide specific provisions for taxation of groups.

**Transfer pricing**
There are no specific rules regarding transfer pricing, even if there are indirect references in the Tax Code.

Indeed, according to the Tax Code, in order to determine the CIT liability of entities under dependence and control of companies located outside of Equatorial Guinea, any transfer of profits shall be recorded in the accounting’s profits and losses.

Furthermore, CEMAC’s Directive related to CIT states that head office costs are fully deductible if they correspond to real operations, and they are neither unusual nor exaggerated.

However, there is no regulation in force providing a definition of ‘transfer of profits’ and neither any criterion that would allow the determination of the ‘exaggerated’ nature of costs.

**Thin capitalisation**
According to the Tax Code:

“Interest paid to the partners for amounts made available to the company, in addition to their capital contributions, no matter the form of the company, will be admitted (for deduction) within the limits established for the advances of the Central Bank.

In incorporated or limited companies, the deduction of interest will not be allowed for partners or shareholders that have the right to hold, or actually hold, the company management except to the extent that the amounts deposited do not exceed the combination of the contributions of these partners or shareholders.”

**Controlled foreign companies (CFCs)**
According to the Tax Code:

“Regarding legal entities located outside of Equatorial Guinea and which have subsidiary or interdependence ties with other legal entities or companies located in Equatorial Guinea, the place of their taxation will be the same as that of the legal entities or companies with which it maintains those ties (i.e. Equatorial Guinea). These latter are jointly and severally liable for the payment of the tax owed by the legal entities located outside of Equatorial Guinea.”
**Tax credits and incentives**

Some tax and customs exemptions can be granted by the government for some specific economic sectors (e.g. oil and gas sector, public work sector). These exemptions shall be negotiated in the contract signed between the company and the administration (e.g. Production Sharing Contract, Public Work Contract).

**Foreign tax credit**

There is no foreign tax credit in Equatorial Guinea.

**Withholding taxes**

**WHT in the general regime (i.e. any sector other than the oil and gas sector)**

There is a 10% tax withheld on the gross incomes obtained in Equatorial Guinea by non-residents.

There is a 25% WHT on royalties for non-CEMAC residents.

Dividends and interests paid to non-residents are subject to 25% WHT.

**WHT on the oil and gas sector**

In Equatorial Guinea:

- a 6.25% WHT must be applied to payments made to a resident entity within the oil and gas sector and
- a 10% WHT must be applied to payments made to a non-resident entity within the oil and gas sector.

In practice, the tax authorities consider this tax only applies to sales of services.

The tax basis is composed of the gross amount paid to the provider.

**Tax administration**

**Taxable period**

The taxable period is from 1 January to 31 December for CIT purposes.

**Tax returns**

CIT returns must be filed within the first four months of the year following the taxable fiscal year.

**Payment of tax**

Payment of CIT must be made within 15 days from the day following the date of receipt of the tax liquidation issued by the Ministry of Finance and Budget.

The MIT of 3% of the previous year’s turnover is payable before 31 March.

**Penalties**

Penalties of XAF 200,000 per month late, up to 75% of the tax owed, apply for late filing of CIT returns.

A penalty of 50% to 100% of the undeclared amount applies in case of shortfall in the return and in case of arbitrary settlement, 50% of the total amount if the good faith of the taxpayer is established or assumed and 100% wherever the taxpayer does not prove good faith.
**Equatorial Guinea**

**Tax audit process**
There is no specific provision related to the tax audit cycle in Equatorial Guinea.

**Statute of limitations**
The statute of limitations is five years from the date the tax is due.

**Topics of focus for tax authorities**
Topics systematically assessed by tax authorities in the framework of audits are:

- WHT of the oil and gas sector.
- PIT and social contributions.

In the framework of recent audits, the tax authorities are more and more interested in assessing transfer pricing operations.
**Gabon**

**PwC contact**

Email: christophe.relongoue@ga.pwc.com

---

**Significant developments**

Further to the promulgation of the Financial Act for 2016, the following new tax measures have been introduced:

- The increase of the branch tax rate from 15% to 20%.
- The increase of the rate of the withholding tax (WHT) from 10% to 20%.
- The institution of a value-added tax (VAT) on real estate operations.
- A new condition for the deduction of the VAT paid on services available in the Gabonese territory that are provided by foreign suppliers.
- The increase of registration duties.
- A penalty for non-compliance of the share’s register of the company.

---

**Taxes on corporate income**

Subject to the provisions of double tax treaties (DTTs), profits subject to corporate income tax (CIT) in Gabon are those obtained by companies exploited in Gabon or those relating to operations carried out in this country.

As the Uniform Act of the Organisation for the Harmonisation of Business Law in Africa (OHADA) relating to the law of companies and economic interest groups has introduced the simplified stock company (SAS) in the OHADA area, the General Tax Code has enlarged the application of the CIT to include the SAS.

The CIT rate is fixed at 30%.

The CIT rate is 35% for companies operating in the oil and mining sectors and 25% for the following entities:

- Companies owning intellectual property shares.
- The Gabonese Development Bank.
- Authorised companies of property promotions.
- Public companies.
- Non-profit partnerships and collectives.
- Authorised companies of the tourism sector.

CIT is assessed on profits minus deductible expenses and charges. Profits are composed of all operations carried out in Gabon by companies during the period of taxation, including, notably, capital gains on fixed assets.

Non-resident companies shall be taxed via WHT at the rate of 20% for income raised in Gabon if they have no permanent establishment (PE) in Gabon.

In cases where non-resident companies have PE in Gabon, they shall be subject to CIT on the income raised in Gabon via the Gabonese PE.
Gabon

**Impôt Minimum Forfaitaire (IMF)**
The IMF is a lower limit to the CIT and is calculated as 1% of the global turnover carried out during the fiscal year of taxation. Note that the IMF cannot be less than 1 million Central African CFA francs (XAF), even in the case of a negative turnover.

New companies (as defined in Articles 194, etc. of the Gabonese Tax Code), without consideration of the sector of activity, are exempt from this minimum tax during the first two fiscal years of their existence.

**Local income taxes**
There are no local government taxes on income in Gabon.

---

**Corporate residence**
As a general rule, a resident company is a company that is incorporated under commercial laws in force in Gabon.

**Permanent establishment (PE)**
From a general treaty perspective, a PE designates a permanent business installation through which a company carries out the whole or part of its activity.

The expression ‘permanent establishment’ notably includes the following:

- Head office.
- Branch.
- Office.
- Plant.
- Workshop.
- Mine, oil or gas shaft, quarry, or other place of natural resources extraction.
- Building site or assembly line.

---

**Other taxes**

**Value-added tax (VAT)**
VAT is a cumulative tax levied on the sale of goods and the provision of services rendered or used in Gabon.

There are four rates of VAT:

- Standard rate: 18%, which applies to all transactions unless otherwise provided for by the law.
- Reduced rates:
  - 10%, which applies to manufacturing operations and sales of products mentioned in a limitative list provided by Article 221 of the Gabonese Tax Code, including mineral water, chicken, and sugar.
  - 5%, which applies to sales and services relating to cement.
- Zero-rate: 0%, which applies to exports and international transports.

Taxable persons are individuals or legal entities carrying out, usually or occasionally, in an independent manner, taxable operations in the scope of an economic activity and for an onerous consideration.

The aforesaid persons, subject to CIT or personal income tax (PIT), being registered or not, are liable to VAT should their turnover out of taxes reach XAF 60 million.
VAT on real estate
According to article 248 ter of the Gabonese Tax Code, operations in relation to the construction or sale of real estate, such as sales of lands to build on, delivery of new buildings, or self-delivery of some buildings, carried out by persons subject to VAT in the scope of their economic activities are subject to VAT on real estate.

The taxpayer of the VAT on real estate is the builder of the building.

The VAT is payable on the delivery date.

The deeds relating to the transfer of buildings subject to VAT on real estate are subject to registration formalities.

The VAT on real estate is calculated based on the sale price as determined by the parties or on the real value of the real estate in case it is superior.

The applicable rate is 18%.

Customs duties
Gabon is member of the Central African Economic and Monetary Community (CEMAC), a customs union that comprises countries from Central Africa.

Merchandise entering into the CEMAC customs territory is subject to importation duties registered into the Customs Tariff.

Four customs regimes are available in Gabon, notably one standard regime and three specific regimes (an exemption regime, a temporary admission regime, and a reduced tax regime).

Apart from customs duties, the importation of merchandise in Gabon is subject to the community tax of integration (CCI) at a rate of 0.4% and to the OHADA withholding (duty) at a rate of 0.05% of the customs value of the imported merchandise.

Excise duty
Excise duty principally applies to luxury goods, such as alcoholic drinks, perfume and cosmetic products, caviar, salmon, cigars, and cigarettes.

The rates of the excise duty are between 20% and 32%.

The Financial Act for 2015 has provided increased excise duty rates for the following goods:

- Local and imported beers: 30% (previously 20%).
- Local and imported wines: 30% (previously 20%).
- Cigarettes, cigars, cigarillos, tobacco: 32% (previously 30%).

Tax on property
Tax on buildings (Contributions Foncières des Propriétés Bâties or CFPB) is levied annually at the rate of 15% of the rental value of the building after deduction of 25% for deterioration and maintenance. For properties booked into the assets of a company’s balance sheet, the rental value of the premises is equal to 10% of the gross balance sheet value, however, being inferior to the tenth of the market value of the premises.

Tax on non-built property is levied annually at the rate of 25% of the taxable revenue corresponding to 4% to 5% of the rental value or 10% of the purchase value.
Gabon

**Transfer tax**
The tax on funds transfer is due on remote transfer operations carried out in Gabon at destination of countries outside the Central Africa Monetary Union (UMAC) countries.

The tax is calculated on the amount of the funds to be transferred, except for related fees and commissions paid by the giver.

The rate of the transfer tax is 1.5%.

**Stamp duty**
A stamp duty is levied on all paperwork relating to civil and judicial actions and to documents that could be produced in court as evidence.

All signatories for mutually binding contracts, lenders and borrowers for loans, and ministerial officials who receive or modify deedsannouncing unstamped deeds or books are jointly responsible for the payment of stamp duties and fines.

**Business license tax**
The business license tax applies to both individuals and entities, Gabonese and foreign, engaged in a profession, business, or industry in Gabon.

Business license tax corresponds to a professional tax borne annually. It is deductible from the taxable income for CIT purposes.

The rates of this tax vary according to the profession, business, and location within Gabon territory (this tax may vary between XAF 15,000 and XAF 540,000).

The head of the group of companies is exempted from the payment of the business license tax.

**Franchise tax**
The franchise tax is a fixed annual duty varying from XAF 10,000 to XAF 500,000, according to the size, nature, and location of the company. Each company that carries on a trade, business, or activity that is not expressly exempted is liable for franchise tax.

Activities that are expressly exempted from franchise tax are those carried out by companies of provident, craftsmen, teachers and professors, lyrical and dramatic artists, farmers, cattle-breeders, fishers, etc.

**Registration duties**
Registration duties in Gabon are fixed, proportional, or progressive, depending on the nature of the acts and transfers in question.

**Tax on insurance premiums**
Insurance or annuity agreements made with insurance companies or any other Gabonese or foreign insurer are subject to an annual obligatory tax.

The tax is levied on the sums charged by the insurer and on any accessory payments made to this party by the insured party according to the following rates:

<table>
<thead>
<tr>
<th>Nature of the policies</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Marine policies</td>
<td>5</td>
</tr>
<tr>
<td>Life policies</td>
<td>Exempt</td>
</tr>
<tr>
<td>Fire policies</td>
<td>30</td>
</tr>
<tr>
<td>Other (e.g. personal liability, transportation)</td>
<td>8</td>
</tr>
<tr>
<td>Reinsurance</td>
<td>Exempt</td>
</tr>
</tbody>
</table>
**Payroll taxes**

PIT and complementary tax on salary (TCS) are withheld monthly by the employer and paid to the Treasury before the 15th day of the following month.

**Social security contributions**

Employers must contribute to the social security system (National Social Security Fund [CNSS] and to the National Disease Insurance and Social Guarantee Fund [CNAMGS]).

The taxable basis for social security contributions to the benefit of the CNSS is made up of gross salaries, including indemnities having the function of a salary and any benefits in kind. However, there is an annual ceiling of XAF 18 million (or XAF 1.5 million per month).

The taxable basis for social security contributions to the benefit of the CNAMGS is made up of gross salaries, including taxable indemnities in the limit of a monthly ceiling of XAF 2.5 million.

The social security contributions due by the employer for both funds are determined according to the following rates:

<table>
<thead>
<tr>
<th>Contribution to CNSS</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family allowances</td>
<td>8</td>

<td>2</td>
</tr>
<tr>
<td>Hospitalisations</td>
<td>1.5</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>20.1</strong></td>
</tr>
</tbody>
</table>

**Branch income**

Taxation of branch income is the same as for corporate income. However, a 20% WHT on profit is due at the time the profit is taken by the head office (located abroad) of the branch. This rate is reduced to 10% in case of the existence of a tax treaty.

**Simplified tax regime for oil subcontractors**

There is a simplified tax regime specific to the oil sector, which is a lump-sum tax regime granted for a biennial period. The request to benefit from such a tax regime is renewable for an additional period of two years, at least. Should the biennial period end after the first quarter of a considered year, the benefit from the simplified tax regime will apply until the end of the said year.

Features of this specific regime are as follows:

- The option for this regime is irrevocable for a period of two years, renewable once.
- The total duration of the benefit of such a regime can’t exceed four years.
- The companies must perform their activities exclusively in the scope of oil operations.
- The option is granted by the Director of the General Tax Office to foreign companies.
- The subcontractor must have signed, with an oil company, a temporary agreement for the provisions of services to this company.
- The option is no longer granted to companies that have been in Gabon for more than nine years. The duration of nine years is calculated from the year during which the company started its activities in Gabon.
- The subcontractor must constitute a Gabonese branch office.
Gabon

The rate for the 2015 and 2016 fiscal years is 8.75%, corresponding to CIT (5.95%) and PIT for expatriate employees (2.80%).

**Specific regime for regional offices (quartiers généraux)**
A regional office is a company or a branch that renders various administrative services, such as management or accounting, exclusively to other companies of the same group based in a given geographical area (usually a group of countries).

Taxation is based on the expenses of the regional office. A rate, between 5% and 12%, is applied to operating expenditures to determine the tax basis. The CIT rate is then applied to that basis.

---

**Income determination**

**Inventory valuation**
Stocks are estimated at cost price. If the market price is lower than the cost price, the company has to make provisions for depreciation of inventory.

**Capital gains**
Capital gains arising from the transfer of assets must be used for the calculation of taxable profits. However, the tax on capital gains can be deferred if a company reinvests an amount equal to the capital gain and the sale price of the transferred asset back into its fixed assets within three years.

Capital gains realised on the transfer of legal rights of persons or entities, whose asset is, in its majority, constituted of such rights or rights directly or indirectly owned in a company located in Gabon, are subject to CIT in Gabon.

**Dividend income**
The rate of transferable securities income tax (Impôt sur le Revenu des Capitaux Mobiliers or IRCM) is 20% on distributed dividends.

IRCM charged on the beneficiaries of the earnings is withheld at source by the distributing company. It is paid over to the Registration Officer within 30 days from the payment of the dividends.

**Inter-company dividends**
Inter-company dividends are taxed at a reduced rate in full discharge of the 20% WHT if paid and received by or from companies with their registered office in a CEMAC country, shares were allotted at the time of issue or kept for two years, and the Gabonese company owns more than 25% of the share capital of the subsidiary.

**Interest income**
Interest income paid to companies is subject to a 20% WHT in Gabon. When paid in respect of bonds of five years or more, it is subject to a 10% WHT.

**Foreign income**
Foreign interest, royalties, and dividends are included in taxable income, subject to international tax treaties. Note that tax treaties provide that certain/all types of income are not includable in Gabon taxable income. Gabon has tax treaties with France, Belgium, the other countries of CEMAC, and the African and Malagasy Common Organisation (OCAM).

The concept of deferred tax is not applicable in Gabon.
Deductions

Depreciation
The straight-line method and an accelerated depreciation method are permitted in Gabon. Tax and book conformity is obligatory (i.e. annual depreciation must be booked to preserve tax deductibility).

The main depreciation rates provided by the Gabonese Tax Code are the following:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>5</td>
</tr>
<tr>
<td>Machinery, equipment</td>
<td>5 to 33.33</td>
</tr>
<tr>
<td>Office furniture</td>
<td>15</td>
</tr>
<tr>
<td>Office equipment</td>
<td>10</td>
</tr>
<tr>
<td>Vehicles</td>
<td>20 to 33.3</td>
</tr>
<tr>
<td>Computing equipment</td>
<td>25 to 100</td>
</tr>
</tbody>
</table>

Goodwill
There is no provision in the Gabonese Tax Code concerning the tax treatment of goodwill.

Start-up expenses
During the first five years of activity, a start-up can use an accelerated depreciation method on the acquired equipment goods under certain conditions and subject to specific provisions of the Gabonese Tax Code applicable to start-ups. Applicability of these provisions must be requested from the General Tax Manager prior to the incorporation of the company.

Interest expenses
Interest paid to shareholders with respect to the sums made available by them to the company is only deductible within the global limit amounting to half of the share capital and within the limit of the intervention rate on invitation to tender (TIAO) of the Bank of the Central African States raised by 2%, provided that the share capital is fully paid up.

Bad debt
Bad debt can be deducted from the result of the fiscal year during which the debt became completely unrecoverable, subject to the irrecoverable character of the compromised debt being justified due to the situation of the debtor.

Provisions
To be tax deductible, provisions must relate to existing liability or loss. General provisions are not deductible.

Expenditures on rent
The amount of the rentals granted to a company is allowed as a deductible expense under the condition that it does not exceed the average rentals applied for similar buildings and amenities.

Charitable contributions
Charitable contributions do not, in principle, constitute expenses deductible from the taxable result. However, contributions for charity can be deducted, provided that the donation is made to the profit of organisms of public interest located in Gabon and that the donation is justified.

The deduction is limited to 1/1,000 of the company's turnover for the considered fiscal year.
Gabon

**Fines and penalties**
Fines and third-party taxes borne by companies are not tax deductible.

**Social security contributions paid to foreign retirement funds**
According to the provision of the Finance Act for 2015, the deductibility of social security contributions paid by the employer to foreign retirement funds are only allowed when paid to the benefit of employees in secondment and within a limit of 15% of the gross salary paid to these employees.

**Taxes**
Only professional taxes for which the recovery proceeding has started in the current fiscal year and for which the company is effectively liable due to operations carried out in Gabon can be deducted.

**Net operating losses**
The Gabonese Tax Code does not provide the possibility to carry back losses. It does, however, provide for a five-year carryforward for net operating losses.

Regarding depreciation deferred in the accounts, they can be carried forward indefinitely.

**Payments to foreign affiliates**
Management fees paid to a foreign parent company are deductible if they meet all of the following conditions:

- They reflect real transactions.
- They do not present an abnormal characteristic.
- They are not exaggerated.

Management fees determined on a lump sum basis are not deductible.

Management fees exceeding 10% of the taxable profit before deduction of the said fees are not deductible.

Interest paid to shareholders is deductible only within the limit of the Central Bank’s (BEAC) normal rate for advances plus 2%, on the condition that the registered capital is entirely paid. The portion exceeding the ceiling is not deductible and is thus subject to taxation.

---

**Group taxation**

**Specific group tax regime**
There is a specific tax regime derogatory to the common law tax regime that is applicable, under conditions, to groups of companies.

According to the provisions of Article 11 b. of the tax measures applying to groups of companies, groups of companies are those constituted by companies subject to CIT, or a foreign equivalent tax, united between them through direct or indirect capital links of at least 50% and that allow one of them or several companies, jointly, to control the others.

The control is defined as:

- either the direct or indirect holding of the majority of the vote in another company or
- the nomination, during two consecutive years, of the majority of the members of the board of directors of another company.
To be eligible for this specific tax regime, and without any prejudice of other activities performed to the profit of third parties, the head of the group of companies must perform to the profit of other companies of the group an activity relating exclusively to the following fields:

- Provisions of services of any kind, notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial corresponding to functions of management, coordination, and control of the group’s companies.
- Research and development (R&D) to the sole profit of the group.
- Management of the finance intra-group.

Each company subject to CIT that is a member of the group and fulfills the conditions provided by the law will be subject to a separate taxation of its results according to the rules of common law and subject to amendments expressly provided by the law for the determination of the taxable result.

The express amendments provided in the scope of the specific tax regime applicable to groups of companies are the following:

**Capital gains**

Net capital gains are taxed at a reduced rate of 20% when they are realised in the scope of intra-group operations.

**Expenses deductible from the taxable result subject to CIT**

The following expenses are deductible within the group:

- Head office fees and management fees determined on a lump sum basis, according to the conditions of allocation of the expense between the companies members of the group defined in a previous ruling with the tax authorities.
- The whole of the interests on partners’ current accounts (i.e. on the sums put, by the partners, at the disposal of a company of the group) within the sole limit of the intervention rate on invitation to tender (TIAO) of the Bank of the Central African States (equivalent to 2.85%) raised by 2%.
- Rents of movables carried out within the group by the mother company or between companies of the same group.

**20% WHT**

Sums subject to CIT according to the provisions of Article 206 of the Gabonese Tax Code paid by a Gabonese debtor member of a group of companies to a foreign company member of the same group are exempted from the 20% WHT even though no DTT aiming to avoid double taxation has been concluded between Gabon and the country of residence of the beneficiary of the remunerations.

**Transferable securities income tax (IRCM)**

Companies of the group that benefit from transferable securities income originating from Gabon are exempted from IRCM when the said revenues are paid by a company member of the group.

In return, payments carried out by the head of the group of companies to the profit of its partners (individuals or legal entities) are subject to IRCM at a unique and at source rate of 10% (instead of 20%).

It is to be noted that the transferable securities incomes having their source abroad and which gave rise to taxation in their country of origin give the right in Gabon to a tax credit of the amount of the taxation that is deductible from the CIT of the fiscal year of perception of the incomes. The aforesaid tax credit applies even though no DTT aiming
to avoid double taxation has been concluded between Gabon and the country of origin of the incomes.

**VAT**
The head of the group of companies is liable for VAT.

Members of a group of companies could, however, on option, consider the following provisions of services performed within the group as being out of the scope of application of VAT:

- Provisions of services of any kind, notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial.
- Fees relating to studies.
- Putting at disposal of personal.
- Management of finance.

The option for the subjection of the abovementioned operations must be formulated by the concerned taxpayers on express request addressed to the General Tax Manager.

**Registration duties**
Deeds relating to incorporation, increase or reduction of share capital, breaking up with or without clearance, merger, scission, partial contribution of assets, and transfer of shares of a company member of a tax group, are subject to a fixed duty of XAF 50,000.

In the absence of a more favourable duty provided by the common law of registration, the changes of ownership and use that are not provided at Article 6 of the Gabonese Tax Code are subject to a proportional rate of 1% when carried out by members of the same tax group.

**Requirements relating to declaratory obligations**
The adherence to the group tax regime must be notified in writing by the head of the group of companies to the General Tax Manager accompanied by the list of the companies included in the tax perimeter of the group.

Each company remains liable for the periodical returns applicable to its activity.

For the purpose of calculation and verification of the returns, each tax return relating to the CIT of each company of the group will be gathered and filed at the same time by the head of the group of companies before the Tax Office.

**Transfer pricing**
The Gabonese Tax Code provides rules regarding transfer pricing issues.

According to these rules, any payment considered to be a result of mismanagement will be subject to the CIT rate at 30% (35% for companies operating in the oil and mining sectors) plus penalties.

Indeed, Article 12 of the Code provides that “By virtue of law or in fact, for companies which are dependent of companies or groups of companies located outside the CEMAC area, or for those which possess the control of companies located outside the CEMAC area, payments or expenses realised by any mean whatsoever or any kind of advantages or help granted to third parties without equivalent counterpart for the company, comparable to abnormal act of management, constitute transfer of profits subject to corporate income tax”.

It is applicable for the following:

- Payments constituting increase or decrease of purchases or sales.
• Payments of excessive royalties or royalties without compensation.
• Relinquishment of revenues (underestimated sale price, free of charge service provision, granting of a free loan or a loan with low interests).

The abnormal act of management is not limited to expenses; it also includes any form of advantages or allowances granted to third parties without any equivalent compensation for the company.

Article 13 of the Gabonese Tax Code provides that “The advantages or assistance granted by companies belonging to the same group can only be considered as resulting from a normal management if the company which grants these advantages or assistance demonstrates the existence of its own interest in acting as such. The general interest of the group is not sufficient to justify such practices”.

According to the Gabonese Tax Code, the following documents must be made available and provided to the tax authorities upon request:

• General information about the group of related entities, notably:
  - A general description of the activity, including any changes that occurred since the beginning of the activity.
  - A general description of the legal and operational structures of the group of related entities, including an identification of each entity.
  - A general description of the exercised functions and assumed risks of the related enterprises.
  - A list of the main intangible assets owned (notably licences, brands, know-how).
  - A general description of the group transfer pricing policies.

• Specific information relating to the company:
  - A description of the spread activity, including any changes that occurred during fiscal years.
  - A description of the operations carried out with other related entities, including the nature and the amount of the flow and including royalties.
  - A list of the agreements pertaining to costs allotment together with copies of any prior agreement on transfer prices and rescripts pertaining to the determination of transfer prices affecting the company’s results.
  - A presentation of the methods of determination of transfer prices according to the arm's-length principle, including an analysis of the exercised functions, the assets that are used, and the risks that are assumed, together with an explanation concerning the selection and application of this or these method(s).
  - An analysis of the elements of comparison considered as relevant by the company, when the chosen method requests it.

**Thin capitalisation**
There is no specific tax rule under Gabon legislation related to thin capitalisation.

**Controlled foreign companies (CFCs)**
There is no specific tax rule under Gabon legislation related to CFCs.

---

**Tax credits and incentives**

**Foreign tax credit**
DTTs include provisions relating to the attribution of foreign tax credits. Such tax credits aim to limit the double taxation of profits that are subject to taxation in both member states of the treaty.

**Tax credits for job creation**
There is a mechanism in place for granting corporate tax credits for any salaried appointments of Gabonese personnel.
This tax credit is equal to 20% of the gross salary paid to new employees and is subject to the creation of a minimum number of jobs, according to the size of the company as follows:

- Two jobs, for companies with less than 20 employees.
- Three jobs, for companies with 20 to 50 employees.
- Five jobs, for companies with more than 50 employees.

Note that the tax credit is granted only on newly created jobs since the preceding fiscal year. Contracts concluded with the employees must also be for an undetermined duration, and the new jobs must not result from the diminution of existing jobs.

**Inbound investment incentives**

Due to the provisions of the Investments Law, any private investment in Gabon can benefit from:

- A common law framework.
- Privileged frameworks.
- Specifically agreed frameworks.

Depending on the frameworks it is eligible for, a company can benefit from customs privileges and tax breaks.

Industrial companies already set up in Gabon and wishing to increase their production capacity can be admitted to a preferential tariff framework. This entails the application of a global reduced rate of 5% for duties and taxes paid on imports of equipment (excluding materials, furniture, and spare parts), provided that these correspond to an investment schedule and their value is in excess of XAF 100 million.

New industrial companies can also benefit from this framework, provided they are not subject to any of the other privileged frameworks outlined by current legislation.

The granting of this privileged tariff framework occurs on the basis of a decision by the Minister of Finances, following a proposal from the Director of Customs and Indirect Taxes.

**Capital investment incentive**

New companies are exempt from the IMF, the minimum taxation of CIT, during the first two years of operations.

**Social housing incentive**

There are some tax exemptions applicable exclusively to authorised companies during the performance of a social housing investment project.

Favourable measures are applicable with regards to the importations of materials, engines, and equipment destined to authorised companies. Indeed, such importations are exempt of customs duties. They can also be imported under the normal temporary admission.

The concerned companies may apply before the Customs Authorities in order to benefit from the abovementioned regime.

The concerned companies are those authorised for the planning of urban lands intended for social habitat and the building of housings of a socio-economic nature and industrial units of manufacturing of materials and other inputs used for the building of social housings. The abovementioned tax exemptions relate to CIT, VAT, and business license tax.
**Tourism incentive**
Companies having hotel activity in the tourism sector are exempted from CIT during the first three years of existence, provided that the amount of the investment equals or exceeds XAF 300 million. If not (investment of less than XAF 300 million), aforesaid authorised companies investing in the tourism sector can benefit, during a five-year period, from a 5% tax credit.

**Withholding taxes**

**20% WHT**
When they are paid by a debtor established in Gabon to individuals or companies subject to CIT or PIT that do not have a permanent professional base in Gabon, the following amounts are subject to a 20% WHT:

- All amounts paid pursuant to the practice of an ‘independent profession’ in Gabon.
- Payments received by inventors, payments relating to copyrights, and all payments relating to intellectual and commercial property as well as assimilated rights.
- All amounts paid for services materially rendered or effectively used in Gabon.
- Interest, arrears, and all others fixed-income investment-products pertaining to income declared as professional revenue of the beneficiary.

Net profits carried out by branches of foreign companies having their head offices abroad are also subject to a 20% WHT in Gabon before they are taken into account by the foreign companies.

The WHT of 20% may not apply in the context of the application of a DTT, as follows:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>Dividends (%)</th>
<th>Interest (%)</th>
<th>Royalties (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Belgium (1)</td>
<td>18</td>
<td>15</td>
<td>10</td>
</tr>
<tr>
<td>Canada (1)</td>
<td>15</td>
<td>10</td>
<td>10</td>
</tr>
<tr>
<td>France (2)</td>
<td>15</td>
<td>10</td>
<td>10</td>
</tr>
<tr>
<td>Morocco (2, 3)</td>
<td>15</td>
<td>10</td>
<td>10</td>
</tr>
</tbody>
</table>

**Notes**
1. If the beneficial owner of the dividends, interest, or royalties is a resident of the other contracting state.
2. If the person receiving the dividends, interest, or royalties is the beneficial owner.
3. The tax treaty concluded between Gabon and Morocco has not yet been notified.

**Transferable securities income tax** (**IRCM**)
IRCM is due at a 20% rate on revenues from stocks and shares paid to legal entities. It is due by beneficiaries of these revenues and must be withheld by the distributing company.

**Tax administration**

**Taxable period**
Companies are required by law to have a 31 December closing of any fiscal year.

**Tax returns**
Returns for the previous calendar year are to be filed before 30 April of each year.

**Payment of tax**
Tax is payable to the General Tax Office in two instalments on 30 November and 30 January. The balance of the tax due must be paid by 30 April. The first instalment must
equal one-quarter of the tax assessed in the previous year and the second instalment must equal one-third of this tax.

**Tax audit process**
The rules concerning the tax audit procedure are provided by the Gabonese Tax Code.

There is no specific rule on the selection of companies to be subject to a tax audit. However, it has to be noted that generally, the tax administration proceed by sectors of activities.

The Tax Inspectors proceed to audits at the head office or at the place of the taxpayer’s main establishment.

The main steps of the tax audit are the following:

- Notification of a tax audit by which the taxpayer is informed on the date of performance of the tax audit.
- Performance of the audit.
- Provisions of a notification of reassessment.
- Provision, by the taxpayer, of its answers to the notification of reassessment (to be provided within a delay of 20 days from the receipt of the notification).
- Reply of the tax administration to the answers of the taxpayer (to be provided within a delay of 60 days from the receipt of the above-mentioned answer from the taxpayer).
- Closing of the tax audit.

**Statute of limitations**
The tax administration can proceed to tax audit until the fourth year following the year for which the tax is due.

**Topics of focus for tax authorities**
The tax administration shall particularly focus on the following aspects:

- Compliance of deductibility of management fees.
- Compliance of deductibility of corporate expenses.
- Compliance of WHT on payments made to foreign services providers.
- Payment of VAT on behalf of third parties.

**Other issues**

**Legal reserve**
According to the provisions of the OHADA Uniform Act relating to commercial companies and economic interest groups, one-tenth of the year’s profits, reduced, if applicable, by any previous losses, must be put into a reserve account named ‘Legal Reserve’.

The endowment of this reserve ceases to be obligatory when its value reaches one-fifth (20%) of the company share capital.

**Tax regime of merger and similar operations**
There is a specific tax regime derogatory from the common law applicable to the following operations:

- Mergers.
- Scissions.
- Partial transfers of assets.
- Subsidiarisation.
This regime only applies to operations performed by companies liable to CIT.

The benefit of this specific tax regime is also subject to the fulfilment of conditions listed in the Finance Act for 2015.

This Finance Act also provides the provisions applicable to the abovementioned operations regarding the following taxes:

- CIT.
- VAT.
- Registration duties.
Significant developments

A new tax law, the Income Tax Act, 2015 (Act 896) as amended (ITA), which was passed on 1 September 2015 but entered into force effective 1 January 2016, repealed the Internal Revenue Act, 2000 (Act 592) (IRA). The ITA has not only made changes to provisions that were hitherto in the IRA but has also sought to consolidate such provisions. The ITA, in effect, seeks to align the new provisions with worldwide approaches of taxation. This summary has been updated to reflect the ITA.

2016 government budget highlights

Below are some of the reforms announced in the 2016 budget that the government of Ghana intends to undertake during the year:

- Implementation of excise tax stamp.
- Review of tax exemptions granted to business and other entities.
- Roll out the electronic point-of-sale device project fully.
- Extensive use of Tax Identification Number.

Taxes on corporate income

A resident’s worldwide income is assessed for tax. Income from business and investment worldwide is included in determining the resident person’s assessable income.

The business and investment income of a non-resident person is included in the assessable income for a year of assessment if that income has a source in Ghana. Where a non-resident person has a Ghanaian permanent establishment (PE), any income connected with the PE is assessed to tax.

The general corporate income tax (CIT) rate is 25%.

Mining and upstream petroleum companies pay CIT at a rate of 35%, while companies principally engaged in the hotel industry pay a reduced rate of 22%.

The CIT rate for companies engaged in non-traditional exports is 8%, while banks lending to the agricultural and leasing sectors pay a CIT rate of 20% on income from those businesses.

National Fiscal Stabilisation Levy (NFSL)

The NFSL applies to specified companies and institutions to raise revenue for fiscal stabilisation of the economy. The NFSL is 5% on the profit (accounting profit) before tax on specified companies. The specified companies and institutions include:

- Banks (excluding rural and community banks).
- Non-bank financial institutions.
- Insurance companies.
- Telecommunications companies liable to collect and pay the communications service tax (CST) under the CST Act, 2008 (Act 754).
- Breweries.
- Inspection and valuation companies.
- Companies providing mining support services.
- Shipping lines, maritime and airport terminals.

The levy shall apply to the aforementioned industries irrespective of any existing exemption granted to an entity under any other laws in Ghana. The tax payable shall not be a deductible expense in arriving at the CIT liability of an entity, and the Commissioner-General (CG) shall issue an assessment to an entity for the amount of tax payable for the period.

NFSL is payable in four equal instalments at the end of each quarter (i.e. March, June, September, and December).

The NFSL was initially scheduled to end in December 2014 but has been extended to 2017.

**Local income taxes**
Ghana has no local, state, or provincial government taxes on income.

---

### Corporate residence

A company is resident if it is incorporated under the laws of Ghana or has its management and control exercised in Ghana at any time during a year of assessment.

### Permanent establishment (PE)

The ITA recognises both Ghanaian PE and foreign PE.

A Ghanaian PE includes:

- a place in the country where a non-resident person carries on business or that is at the disposal of the person for that purpose
- a place in the country where a person has, is using, or is installing substantial equipment or substantial machinery
- a place in the country where a person is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to that project, or
- the provision of services in the country.

A foreign PE means a fixed place of business situated in a foreign country where the business is conducted continuously for at least six months, but excludes any place at which only activities of a preparatory or auxiliary nature are conducted.

---

### Other taxes

#### Value-added tax (VAT)

Other than exempt goods and services, VAT of 15% and the National Health Insurance Levy (NHIL) of 2.5% are charged on the following:

- Every supply of goods and services made in Ghana.
- Every importation of goods.

VAT and NHIL are charged on the supply of goods and services where the supply is a taxable supply and made by a taxable person in the course of business.
VAT and NHIL are payable by the taxable person making the supply in the case of taxable supply and by the importer in the case of imported goods.

Most professional services are also subject to the same VAT and NHIL rates, including the following:

- Management services.
- Insurance brokerage and other services.
- Financial, tax, and economic consulting.
- Engineering and technical services.
- Accounting services.
- Courier services.
- Legal services.
- Provision of satellite television.
- Architectural services.
- Services rendered by surveyors.

Exports of goods and services are zero-rated. Unless specifically exempt, supplies of all goods and services are subject to VAT.

A special petroleum tax of 17.5% has been imposed on supply of specified petroleum products by licensed oil marketing companies.

VAT on financial services rendered for a fee has been enforced. The tax is currently charged by banks on services rendered for a fee.

A flat VAT rate of 5% on the supply of immovable property by an estate developer has also been enforced. However, estate developers supplying immovable properties are not allowed input tax deductions relating to the supply of immovable properties.

**Customs and excise duties**

Customs and excise duties are imposed on the importation of goods at the port of entry and certain manufactured goods produced or imported into Ghana.

The following rates of excise duties apply on the ex-factory price:

<table>
<thead>
<tr>
<th>Product</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sachet water</td>
<td>0</td>
</tr>
<tr>
<td>Bottled water</td>
<td>17.5</td>
</tr>
<tr>
<td>Malt drink</td>
<td>2.5 to 17.5</td>
</tr>
<tr>
<td>Beer</td>
<td>10 to 47.5</td>
</tr>
<tr>
<td>Spirits</td>
<td>0 to 25</td>
</tr>
<tr>
<td>Cigars and cigarettes</td>
<td>175</td>
</tr>
<tr>
<td>Snuff and other tobacco products</td>
<td>175</td>
</tr>
</tbody>
</table>

In addition, a Special Import Levy Act was amended to impose tax on the cost, insurance, and freight (CIF) value of imported goods. The levy varies from 1% to 2%, depending on the type of goods, and is expected to apply up to 2017.

**Property taxes**

Property tax rates are payable by owners of immovable property to the local District Assembly. The rate of property tax differs depending on the location of the property.

**Stamp taxes**

Stamp duty is paid, at rates ranging between 0.25% to 1% and 0.05 Ghana cedi (GHS) to GHS 25, depending on the type of transaction and the instrument. A stamp duty of 0.5% applies on the initial stated capital and any subsequent increase in the stated capital.
The stamp duty is not a tax on transactions but on documents brought into being for the purposes of recording transactions. It is therefore a tax on documents or specific instruments that have legal effect, such as the following:

- Insurance policies.
- Awards of cost in matters of dispute.
- Conveyances or transfers on the sale of any property.
- Appointment letters of new trustees.
- Natural resource leases or licences (e.g. mining, timber).
- Agreements or memoranda of agreement.
- Bills of exchange (e.g. issue of cheques).
- Bills of lading.

**Communications service tax (CST)**
CST of 6% is levied on charges payable by both individual and corporate users of electronic communication services (ECS) provided by service providers other than private electronic communication services. The levy is also applicable to any form of recharge and is payable once a person makes a payment for ECS regardless of whether or not that person is authorised or permitted to provide ECS under the Electronic Communication Act (Act 755). Note that the definition of electronic communication includes interconnection.

**Payroll taxes**
Employers are required to withhold tax (pay-as-you-earn or PAYE) on employees’ salaries and other emoluments, including benefits in kind, on a monthly basis at the graduated rates, with the highest rate at 25%, and remit it to the Ghana Revenue Authority (GRA) by the 15th day of the subsequent month. Failure to withhold the tax and remit to the GRA on the due date attracts an interest penalty of 125% of the statutory rate, compounded monthly, applied to the amount outstanding at the start of the period.

Employers are also required to file annual returns of employees by 31 March of the year following the year to which the returns relate.

**Social security contributions**
The social security contribution scheme is structured into three tiers, with the first two requiring mandatory contributions and the last one being voluntary. The employee is required to contribute 5.5% with the employer contributing 13%. Of the total contribution of 18.5%, 13.5% is contributed to the first tier and 5% to the second tier schemes.

**Local business permits**
Business ‘permits’ are payable annually to local district assemblies or municipal authorities. The amount is dependent on the physical location where business activity is conducted. It is therefore possible that if a taxpayer operates from two business locations in different regions, such permits would be paid to two different local authorities.

**Branch income**
The CIT rate on branch profits is the same as that on corporate profits.

However, a non-resident person that conducts activities in Ghana through a branch pays tax at 8% on earned repatriated profits, payable within 30 days. The portion of net profit of the resident person that corresponds to interest of the non-resident shareholders is treated as repatriated profits. The repatriated profit is also treated as a dividend distributed in accordance with the respective shares of the non-resident person.
Ghana

**Income determination**

**Inventory valuation**
The ITA, under Section 11, provides general guidance on the principles of stock (inventory) valuation for income tax purposes. A person making a determination of the cost of trading stock is required to use the absorption cost method. The owner of a trading stock or other fungible assets may determine the cost of that asset by using the first in first out (FIFO) method or the average cost method. The closing value of inventory is valued for tax purposes at the lower of cost or market value.

**Capital gains**
Capital gains are now included as part of business income and taxed at 25%. They are no longer taxed separately.

**Dividend income**
A dividend paid to a resident company by another resident company is exempt from tax where the company receiving the dividend controls, directly or indirectly, 25% or more of the voting power in the company paying the dividend.

**Stock dividends**
The issue of stock dividends is permitted under Section 74 (1) of the Ghana Companies Code 1963, Act 179. It is, however, subject to income tax at the dividend withholding tax (WHT) rate of 8%.

**Interest income**
Interest received by a resident company from another resident company is subject to WHT at a rate of 8%.

However, WHT does not apply on the following:

- Interest received by a resident financial institution.
- Interest paid to an individual by a resident financial institution.
- Interest paid to an individual on bonds issued by the government of Ghana.

**Exempt income**
Specific exemptions from tax include the following:

- Income of a local authority.
- Income of a statutory or registered building society where only individuals are eligible to be members and the organisation does not engage in political party activities.
- Non-business income of a charitable organisation.
- Pensions.
- Income of organisations formed for the purpose of promoting social or sporting amenities.
- Income of a registered trade union.
- Gain or profit from the business of operating ships or aircraft by non-resident persons if an equivalent exemption is granted by the person's country of residence to persons resident in Ghana.
- Retirement contributions received by a retirement fund.

**Foreign income**
Resident corporations are taxed on their worldwide income. Foreign income is taxed together with other income derived in Ghana, and double taxation is avoided through treaties or foreign tax credits. No special rules exist for taxing undistributed income of foreign subsidiaries.
Deductions

Depreciation and depletion
Depreciation of depreciable assets in the accounts of a business is not an allowable deduction in computing taxable profits. It is instead replaced by capital allowances at prescribed statutory rates, as follows:

<table>
<thead>
<tr>
<th>Class</th>
<th>Assets</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Assets pooled (allowance calculated on a reducing-balance basis). Mainly computers and data handling equipment together with peripheral devices.</td>
<td>40%</td>
</tr>
<tr>
<td>2</td>
<td>Assets pooled (allowance calculated on a reducing-balance basis). Mainly automobiles, buses, mini buses, construction and earth-moving equipment, trailers and trailer-mounted containers, plant and machinery used in manufacturing.</td>
<td>30%</td>
</tr>
<tr>
<td>3</td>
<td>Assets pooled (allowance calculated on a reducing-balance basis). Mainly railroad cars, locomotives and equipment, vessels and similar water transportation equipment, aircraft, public utility plant and equipment, office equipment and fixtures, and any other depreciable asset not elsewhere classified.</td>
<td>20%</td>
</tr>
<tr>
<td>4</td>
<td>Buildings, structures, and similar works of a permanent nature (allowance calculated using the straight-line method)</td>
<td>10%</td>
</tr>
<tr>
<td>5</td>
<td>Intangible assets</td>
<td>Useful life</td>
</tr>
<tr>
<td>6</td>
<td>Mining and petroleum expenditure (allowance calculated using the straight-line method)</td>
<td>20%</td>
</tr>
</tbody>
</table>

Allowances are granted only on the following conditions:

- The taxpayer must own the asset.
- Capital expenditure must be incurred.
- The asset must be used in the trade.
- The asset must be in use up to the end of the basis period.
- Capital allowances are granted for every year in which the asset is in use. Balancing allowances and charges are made, as the case may be, on disposal of the asset.

For intangibles, such as goodwill, patents, trademarks, and copyrights, the law allows for capital allowance deduction over the useful life of the asset.

Start-up expenses and pre-operating costs
Although the tax law does not specifically mention start-up expenses or pre-operating costs, generally a deduction is allowed for start-up and pre-operating costs incurred by a business, provided such expenses are wholly, exclusively, and necessarily incurred in the production of income of the taxpayer.

Interest expenses
Interest incurred on loans used to generate the income of a business is ordinarily deductible. Restrictions apply on interest payments on related loans. See Thin capitalisation in the Group taxation section.

Financial costs
Deductions for financial costs other than interest are limited to the sum of:

- financial gains derived by the person that are to be included in calculating the income of the person from the investment or business for the year of assessment, and
- 50% of the income of the person for the year from the business or investment calculated without including financial gains derived by the person or financial costs incurred by the person.
**Bad debts**
A deduction is allowed for bad debts incurred in the normal course of business, other than advances made on capital accounts. A bad debt is allowed as a deduction if the CG is satisfied that the taxpayer has taken all reasonable steps to pursue payment and the person reasonably believes payment will not be made.

Any amounts recovered in respect of a bad debt previously written off should be included in income and subject to tax accordingly.

An existing debt that becomes a bad debt after a 50% or more change in underlying ownership is not allowed as a bad debt deduction after the change in ownership has taken place.

**Charitable contributions**
The following contributions/donations are allowable as deductions in ascertaining the taxable income of a person:

- Contributions made to a charitable institution or fund approved by the government.
- Payments towards a scholarship scheme approved by the government for a technical, professional, or other course of study.
- Donations made for the purpose of any rural or urban area and approved by the government.
- Donations for the purpose of sports development approved by the government.
- Donations to the government for worthwhile government causes approved by the CG.

**Fines and penalties**
Fines and penalties arising as a result of non-compliance with the provisions of the tax law are generally not allowable deductions.

**Taxes**
Any income taxes, profit taxes, or other similar taxes are not deductible in determining taxable income.

**Other significant items**
No other special deductions are allowed. Principal non-deductible expenses include the following:

- Domestic or private expenses, including cost of travel between residence and place of business or employment.
- Any disbursement or expense not being wholly and exclusively paid or expended for the purpose of acquiring income.
- Capital withdrawn or any sum employed or intended to be employed as capital.
- Capital employed in improvement.
- Any sum recoverable under an insurance contract of indemnity.
- Rent of or any expense in connection with premises or a part of premises not occupied or used for the purpose of producing business income.
- Any payment to a savings or other society or fund unless specifically allowed by the CG.

**Net operating losses**
Tax losses can be carried forward for all sectors and deducted from assessable income for the three years immediately following the year in which the loss was incurred. Specified priority sectors can carry forward their tax losses for up to five years. Carryback of losses is permitted for persons deriving income relating to a long-term contract (except where there is a more than 50% change in underlying ownership within a period of three years). A long-term contract of a business includes a contract for manufacture, installation, or construction that is not completed within the company’s accounting year in which it is commenced.
**Payments to foreign affiliates**
The Transfer Pricing Regulations 2012, (LI 2188) require that payments or transactions between persons in a controlled relationship are conducted at arm's length. A transaction is conducted at arm's length between persons in a controlled relationship if the terms of the transaction do not differ from the terms of a comparable transaction between independent persons. The CG may disregard or disallow transactions if they are deemed to be fictitious or do not have a substantial economic effect and the form does not reflect its substance.

**Group taxation**
No form of combined reporting of results of operations by a group or affiliates is permitted.

**Transfer pricing**
The Transfer Pricing Regulations follow the internationally accepted guidelines published by the Organisation for Economic Co-operation and Development (OECD), only with a much broader perspective on the nature of entities and transactions.

The Regulations cover transactions between related parties, including PEs and employees, and also prescribe the transfer pricing methods and documentation that entities are required to maintain and retain.

The Regulations also require entities with related party transactions to file a return on an annual basis.

**Thin capitalisation**
Interest expenses and foreign exchange currency losses incurred by an entity in which 50% or more of the underlying ownership or control is held by an exempt person, either alone or together with an associate, are not allowed as a deduction in arriving at the chargeable income of the entity if the entity is thinly capitalised. An entity controlled by an exempt person is deemed to be thinly capitalised if its debt-to-equity ratio exceeds the ratio 3:1.

Thin capitalisation provisions do not apply to resident financial institutions.

**Controlled foreign companies (CFCs)**
There are no provisions for CFCs in the tax laws of Ghana.

**Tax credits and incentives**

**Foreign tax credit**
A resident is entitled to a credit in respect to any foreign income tax paid, to the extent to which the tax paid is in respect of the resident’s foreign taxable income. The foreign tax credit available on a specific income type should not exceed the average rate of Ghanaian income tax of the resident for a year.

**Inward investment**
Under the Ghana Investments Promotion Centre Act, 2013 (Act 865), various incentives are available to encourage strategic or major investments in the country, particularly in the areas of agriculture; manufacturing industries engaged in export trade or using predominantly local raw materials or producing agricultural equipment, etc.; construction and building industries; mining; and tourism.

Incentives generally include exemption from customs import duties on plant and machinery; reduced CIT rates; more favourable investment and capital allowances on
plant and machinery; reduction in the actual CIT payable, where appropriate; retention of foreign exchange earnings, where necessary; guaranteed free transfer of dividends or net profits, foreign capital, loan servicing, and fees and charges in respect of technology transfer; and guarantees against expropriation by the government.

**Capital investments**

Venture capital tax incentives include the following:

- Relief from stamp duty in each year on subscriptions for new equity shares in venture capital funds.
- Interest and dividends from investment in a venture capital company are subject to tax at 1% for the first ten years of assessment.
- Chargeable income is subject to tax at 1% for the first ten years of assessment.
- Carryforward of losses for five years after the year of disposal.
- Carryforward of losses from disposal of investment in a venture capital subsidiary for five years after the ten years of assessment.

**Free zone developers/enterprises**

Companies registered to operate as free zone developers/enterprises do not pay CIT for the first ten years of operation. After the ten year corporate tax holiday has expired, the CIT rate on export outside the domestic market is 15% while income earned from sales in the domestic market is taxed at 25%.

**Construction of residential premises**

The income of a certified company from a low cost housing business is subject to tax at 1% for a period of five years of assessment.

Notes
1. The lower rate applies where the recipient holds at least 10% of the shares. The higher rate applies in any other case.
2. 5% for non-resident banks. 10% in any other case.

The government of Ghana is pursuing DTTs with various countries, including the Czech Republic, Mauritius, Sweden, Syria, the United Arab Emirates, and the United States.

Tax administration

Taxable period
The tax year runs from 1 January to 31 December. Corporations with financial periods other than the calendar year are taxed on their financial period ending during the calendar year.

Tax returns
Companies are expected to submit a tax return not later than four months after the end of the financial year. They may file an application for extension of filing time for not more than two months.

Payment of tax
CIT is due for payment at the same time as the due date for filing the return. The tax is payable in four equal instalments at the end of each quarter (i.e. March, June, September, and December) in each year of assessment, but such payments are not deemed to be the actual tax payable.

At the end of the year, all taxpayers are required to file final tax returns and pay any tax outstanding. The final return and tax are due within four months after the financial year-end.

There are also instances where the CG may issue an additional assessment after conduct of an audit. Where such assessment is served, the tax is payable within 30 days after service of the notice. At the discretion of the CG, the time for payment may be extended.
Penalties
Where tax is not paid by the due date, a penalty is calculated at 125% of the statutory rate, compounded monthly, and applied to the amount outstanding at the start of the period.

Tax audit process
The GRA assesses taxpayers on a regular basis. The ITA gives powers to persons authorised by the CG to gain full and unlimited access to the taxpayers' premises, records, and electronic information. Industries such as mining, upstream oil and gas, and financial institutions are more likely to be selected for a tax audit. Also, request for a tax refund is also likely to lead to a tax audit. The GRA usually gives notice of its intention to perform a tax audit and, after performance, prepares a report on its findings, which is then shared with the taxpayer.

Statute of limitations
The ITA requires all taxable persons (excluding employees) to maintain records of all receipts and payments, revenue and expenditure, and all assets and liabilities of the business for a period of not less than six years. This is in conjunction with the fact that the Statute of Limitation bars actions to recover tax after 12 years.

Topics of focus for tax authorities
Topics of focus for the tax authorities include:

- Tax refunds.
- CST.
- Transfer pricing sensitisation of taxpayers.
- NFSL.

Other issues

Local Content and Local Participation Regulations
The Minerals and Mining General Regulations 2012 (LI 2173) applicable to mining entities oblige mining contractors and sub-contractors to conform to the requirements for recruitment of expatriates, train Ghanaians, and give preference to local products and services in their operations.

The Petroleum (Local Content and Local Participation) Regulations, 2013 (LI 2204) aim at providing a transparent monitoring system to meet the objectives of the government’s Local Content Policy. Further, the Regulations are expected to help facilitate job creation through the use of local expertise for goods and services, business, and financing in the petroleum industry value chain.

Ring fencing for mining and petroleum entities
In determining the chargeable income for a basis period, mining companies are not able to deduct expenses incurred in one mining area against revenue from another mining area.

Similarly, companies engaged in petroleum operations are required to treat the activities of a petroleum right as an independent activity separately from other rights.
Significant developments

The FY16 Financial Law has enforced new tax rules related to the procedure for value-added tax (VAT) credits reimbursement and the procedure for VAT exemption certificates for the oil and gas industry and the mining industry.

Another significant change provided by the FY16 Financial Law is the extension of the investment code’s provisions to shopping centres.

From a compliance perspective, the single tax return introduced since 2015 is effectively in force and used for tax returns and payments.

Taxes on corporate income

Taxable corporate income in Côte d’Ivoire is based on worldwide income for resident companies (for exceptions, see Foreign income in the Income determination section).

Tax on industrial and commercial profits in Côte d’Ivoire is levied at 25%, subject to a minimum tax. The rate is 30% for companies in the telecommunication, information technology, and communication sectors.

Non-resident entities are subject to withholding tax (WHT) at 20%, subject to existing double taxation agreements (DTAs), on their Côte d’Ivoire source income when they do not have a permanent establishment (PE). Non-residents with a PE are taxed in the same way as a resident.

Minimum tax

The minimum tax is based on total turnover and is calculated at the rate of 0.5% (0.15% for banking activities, 0.1% for oil companies), with a minimum tax of 3 million Communauté financière d’Afrique (Financial Community of Africa or CFA) francs (XOF) and a maximum tax of XOF 35 million.

Local income taxes

The income tax is levied at the national level. There is no local income tax.

Corporate residence

In Côte d’Ivoire, companies are considered resident in tax jurisdictions where they have a registered fixed establishment (e.g. subsidiaries, branches, representative offices).
Permanent establishment (PE)
A non-resident is considered as having a PE in Côte d'Ivoire when its activities involve a comprehensive commercial cycle in Côte d'Ivoire or when it operates through a dependent agent in Côte d'Ivoire.

According to DTAs, a non-resident is considered as having a PE in Côte d'Ivoire when it has a registered establishment, including a subsidiary, a branch, a representative office, a mine or an oil well, a building site, a manufacture plant, or a trading establishment. Sometimes, a time threshold of six months is considered.

Other taxes

Value-added tax (VAT)
VAT is a non-cumulative tax levied on the sale of goods and services at the rate of 18%. Subject to certain restrictions, VAT is recoverable.

The rate is reduced to 9% for milk, pasta products that contain 100% durum wheat semolina, and equipment designed for the production of solar energy.

Customs duties
Customs duties rates range from 0% to 35%, depending on the classification of the imported goods according to the customs tariff.

Upon import, goods are also subject to the statistical duty (1%), to community levy (0.5%), and to VAT (18%).

Special taxes, depending on the nature of the imported goods, may apply, such as excise duties.

Statistical duty
The statistical duty is levied together with the customs duties during the customs clearance procedures of imported goods.

The rate of the statistical duty is 1% on the cost, insurance, and freight (CIF) value of the imported goods.

Community levy
The community levy is due together with the customs duties during the customs clearance procedures of imported goods.

The rate of the Economic Community of West African States (ECOWAS) community levy is 0.5% on the CIF value of the imported goods.

Products imported from outside the West African Economic and Monetary Union (WAEMU) remain subject to the community levy at 1% for five years from January 2015.

The community levy does not apply to goods imported from member countries of the WAEMU, which includes Côte d'Ivoire, Senegal, Burkina Faso, Mali, Benin, Togo, Niger, and Bissau Guinea.

Excise duties
Excise duties apply on cigarette imports, alcoholic or non-alcoholic beverages, and oil products.

Real estate tax
A real estate tax is imposed at the following rates:
Ivory Coast (Côte d’Ivoire)

- 1.5% for undeveloped lands.
- 4% on land revenue.
- 11% on developed land or 15% when the built property is used by the company itself. The rate is reduced to 4% for unoccupied buildings.

Property renters paying the rents directly to the owners are required to withhold 15% of rents, payable on the 15th day of the month following the payment of the rent, to the tax authorities. This is an advance payment on the annual real estate tax due by the owner of the estate property.

**Transfer taxes**
In the case of the transfer of property through a direct sale, taxes are assessed at the following rates:

- 10% for lease transfers.
- 4% for the sale of real estate.
- 10% for the sale of businesses.

For mortgages, the rate is 5% for the financial lessor at the acquisition of the good and 1% for acquisition of the immovable property by the lessee from the exercise of the option.

**Stamp duty**
A direct tax is paid for any document subject to a registration procedure, for an acknowledgement of a cash payment, and for bills of exchange.

**Special tax for equipment**
A special tax is paid by all taxpayers for the purpose of the equipment of the government. The tax is calculated on 0.1% of total turnover and is paid monthly.

**Business franchise tax**
The business franchise tax includes a turnover tax and a proportional tax. The turnover tax is calculated on turnover at the rate of 0.5%, with a minimum tax of XOF 300,000 and a maximum tax of XOF 3 million. The proportional tax rate is 18.5% and is based on the rental value of the professional office location (based on general office rents).

**Tax on banking operations**
A cumulative tax of 10% is levied on bank services rendered. Tax on banking operations charged by banks to companies is fully deductible from output VAT.

**Registration taxes**
Registration of capital contributions is taxed, whether the capital contribution or increase in capital is made in cash or in kind. The rate is 0.3% for contributions exceeding XOF 10 million to XOF 5 billion and 0.1% for contributions over XOF 5 billion, with a minimum tax of XOF 18,000. Increases in capital by incorporation of reserves are taxed at 6%.

In the event of a capital increase through a merger, the increase in the share capital of the acquiring company is taxed at half of the rates above.

According to the new Article 764 bis of the General Tax Code enforced by the 2016 Tax Law (in force since 4 January 2016), the transfer of shares held in a company located in Côte d’Ivoire is liable to a 1% registration duty on the sale price or market value of the shares when the transfer does not trigger the disappearance of the company or the creation a new legal entity.

**Tax on insurance premiums**
Insurance premiums are subject to tax as follows:
Premiums paid under commercial shipping insurance policies for maritime risks are exempt. The tax may be paid by the insurance company, its agent, or the subscriber in cases where the subscriber had to pay the premium to a foreign insurance company.

**Tax on telecommunication companies**
A specific tax of 5% is applicable on the turnover of mobile telecommunication, information technology, and communication companies.

Companies renting passive infrastructures and telecom towers to telecom companies are not within the scope of this tax.

Companies operating in the telecommunication, information technology, and communication sector must also invest 20% of the amount of dividends transferred abroad in bonds of the public Treasury or any borrowing instrument issued by the government of Côte d’Ivoire.

**Tax on telecommunication services**
A special tax of 3% is applicable on telecommunication services provided to the public. The tax is invoiced and collected by companies operating mobile or land telecommunication and internet services in Côte d’Ivoire.

**Payroll taxes**
Taxes are levied at the rates of 2.8% for local employees and 12% for expatriate employees on the total taxable remuneration, including salaries, benefits, and benefits in kind.

**Social security contributions**
Employers must contribute to the social security system (CNPS) at the following rates:

<table>
<thead>
<tr>
<th>Contribution</th>
<th>Contribution rate (%)</th>
<th>Monthly ceiling (XOF)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family allowance</td>
<td>5.75</td>
<td>70,000</td>
</tr>
<tr>
<td>Work injury</td>
<td>2.0 to 5.0</td>
<td>70,000</td>
</tr>
<tr>
<td>Retirement pension</td>
<td>7.7</td>
<td>1,647,315</td>
</tr>
</tbody>
</table>

Note that even though the retirement contribution ceiling (XOF 1,647,315) is calculated on the basis of 45 times the minimum wage, this amount has not been updated since the minimum wage increased from XOF 36,607 to XOF 60,000.

**Branch income**
The tax rate for branch income is the same as that for corporate income. After-tax branch earnings are subject to a 15% tax (Impôt sur le revenu des valeurs mobilières or IRVM) calculated on 50% of the taxable profit. This is analogous to the WHT on dividends.
Ivory Coast (Côte d’Ivoire)

**Income determination**

**Inventory valuation**

Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) methods are permitted. Book and tax conformity is required.

**Capital gains**

Capital gains are normally taxed at full corporate rates. However, the tax on capital gains, exclusive of recaptured depreciation, can be deferred if the gain is reinvested within three years.

**Dividend income**

Dividends are brought into taxable income at 50% of the net amount earned by the company (after 15% WHT).

The exemption is increased to 95% for dividends received from a subsidiary if a parent company domiciled in Côte d’Ivoire owns 10% of the subsidiary.

**Stock dividends**

Stock dividends are unusual, but in the event they are declared, they are not taxable to the recipient.

**Interest income**

Interest from loans is brought into taxable income at 50% of the net amount earned by the company (after 18% WHT).

**Foreign income**

Resident corporations are taxed on their worldwide income, except for profits derived from business conducted through a PE outside Côte d’Ivoire. Since income derived from business conducted outside Côte d’Ivoire is not taxable, no tax credit is allowed. Interest and dividends from foreign sources are entitled to certain deductions to alleviate instances of double taxation. Subject to provisions of tax treaties, no deductions or tax credits are allowed for revenue from royalties and services.

**Deductions**

**Depreciation and depletion**

Depreciation is generally computed on a straight-line basis over the useful life of the asset (e.g. 20 years for buildings, 3 years for automobiles). Accelerated depreciation is sometimes permitted for machinery. The following depreciation rates are generally accepted for tax purposes:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>5</td>
</tr>
<tr>
<td>Machinery, equipment (rate depending on equipment)</td>
<td>8/10/20</td>
</tr>
<tr>
<td>Office furniture</td>
<td>10</td>
</tr>
<tr>
<td>Office equipment</td>
<td>20</td>
</tr>
<tr>
<td>Vehicles</td>
<td>33.3</td>
</tr>
<tr>
<td>Computing equipment</td>
<td>20 to 50</td>
</tr>
</tbody>
</table>

A time coefficient is applied to the rate of depreciation to obtain the declining balance. Depreciation rates may be amended, but only after agreement with the tax authorities.

New plants and equipment may be depreciated at twice the normal rate in the first year of use, provided they are depreciated over at least six years. Under certain circumstances, buildings used for staff housing may be depreciated at 40% of cost in
the first year. Annual depreciation must be booked to preserve tax deductibility. The whole or any part of the annual charge can then be deferred in annual accounts for fiscal years showing a tax loss. Recaptured depreciation is taxed at full rates. Tax and book conformity is obligatory.

Depletion allowances, as such, do not exist, but tax incentives are available for exploration to replace depleted natural reserves.

**Goodwill**

Goodwill (capital gain) deriving from the transfer of assets is included in taxable profit. The gain may be exempt from the income tax basis if the taxpayer commits to reinvest the purchase price of the transferred assets plus the goodwill in the three following years.

If the reinvestment is not completed in the three years, the gain will be subject to income taxation.

**Start-up expenses**

Start-up expenses (e.g. legal fees, registration duties on share capital subscription, the costs of any registration procedure, advertisement expenses) have to be amortised over a period from two to five years.

**Interest expenses**

Interest paid to shareholders may be deducted. The maximum interest rate allowed is related to the Banque Central des Etats de l’Afrique de l’Ouest (BCEAO) rate plus three points. The reimbursement of the loan must take place in the five years following the loan.

**Bad debt**

Provisions for bad debts are deductible, provided that a minimum set of collection procedures have been engaged.

Bad debts are deductible for income tax purposes unless the debt results from abnormal business decisions.

**Charitable contributions**

Charitable contributions to recognised sport and health associations are deductible.

Charitable contributions to individuals or non-recognised beneficiaries are not tax deductible.

**Fines and penalties**

Fines borne by corporations are not tax deductible.

**Taxes**

Regular taxes paid by corporations are deductible for income tax purposes.

Third party taxes (such as WHT on non-resident service providers) borne by corporations are not tax deductible.

**Other significant items**

In respect to legal reserves, 10% of net profit must be transferred to a reserve for legal fees until the reserve equals 5% of the paid-up share capital.

To be tax deductible, provisions must relate to existing liability or loss. General reserves are not deductible.
Ivory Coast (Côte d’Ivoire)

**Net operating losses**
Losses may be carried forward for five years.

Losses derived from depreciation can be carried forward indefinitely.

Losses cannot be carried back.

**Payments to foreign affiliates**
Reasonable royalties, interest, and management and service fees paid to foreign parent companies are tax deductible. However, the deductions should not exceed 5% of the turnover and 20% of the overhead. Otherwise, the portion exceeding the ceiling is not tax deductible. The onus is on the taxpayer to prove that expenses are justified and reflect real transactions.

**Group taxation**
Group taxation is not permitted in Côte d’Ivoire.

**Transfer pricing**
Profits directly or indirectly transferred to related non-resident companies are disallowed from the income tax basis.

The tax administration may inquire on transfer pricing when local subsidiaries having most of their transactions with non-resident group companies record losses.

Transfer price documentation is not generally requested.

**Thin capitalisation**
The deduction of the interest of loans granted on top of the share capital by related parties is subject to restrictions (see Interest expenses in the Deductions section).

When, because of losses, the equity of the company is less than 50% of the share capital, the company must be recapitalised in the two following years, unless the company is dissolved.

**Controlled foreign companies (CFCs)**
There are no CFC rules in Côte d’Ivoire.

**Tax credits and incentives**

**Foreign tax credit**
Since income derived from business conducted outside Côte d’Ivoire is not taxable, no tax credit is allowed.

**Investment zones**
The aim of the Investment Code is to:

- help create companies in other regions than the economic capital city (Abidjan)
- help the employment of nationals
- help companies doing business in a sustainable manner
- develop the regions of the country, and
- favour the existence of local small and medium-sized enterprises (SME).

The Investment Code regimes involve the creation of three zones (A, B, and C), depending on the location of the company:
Ivory Coast (Côte d’Ivoire)

- Zone A covers Abidjan District.
- Zone B covers any town in Côte d’Ivoire with more than 60,000 inhabitants.
- Zone C covers any town in Côte d’Ivoire with less than 60,000 inhabitants.

The duration for the granted tax benefit is:

- 5 years for Zone A.
- 8 years for Zone B.
- 15 years for Zone C.

The Investment Code includes two specific tax incentive regimes: the Investment Declaration Regime and the Investment Approval Regime. Both regimes apply to all economic activities, excluding finance and banking, non-industrial buildings builders, and commerce activities. However, investment related to the creation or the development of important shopping centres could qualify for the exemptions if certain conditions are met.

The Investment Declaration Regime has no minimum investment threshold, but has special requirements related to the activities of the company.

For the Investment Approval Regime, the minimum investment cost is XOF 200 million (VAT and working capital exclusive).

The benefit from the Investment Code is granted by the Centre for the Promotion of Investments (named CEPICI), after an application is filed by the requestor.

During the investment period, the beneficiary enjoys the following:

- Reduction of 50% of the customs duties on the equipment and materials included on the filed list together with the first spare parts, when the investment is less than XOF 1 billion.
- Reduction of 40% of the customs duties on the equipment and materials included on the filed list together with the first spare parts, when the investment is more than XOF 1 billion.
- Exemption from VAT on purchase of equipment, materials, and first spare parts.

After the completion of the investment, the beneficiary enjoys the following exemptions during a period that depends on the zone the company is located in:

- Exemption from corporate income tax (CIT).
- Exemption from business franchise tax.
- Exemption from real estate tax (only for Zone C in the Investment Declaration Regime).
- Exemption from registration taxes on share increases (only for Zone C in the Investment Declaration Regime).
- Reduction of the payroll taxes due on employee’s wages. The reduction is 80% for Zone B and 90% for Zone C in the Investment Declaration Regime and 50% for Zone A, 80% for Zone B, and 90% for Zone C in the Investment Approval Regime.

These incentives may not be combined with sector-specific investment programs, such as those for mining and hydrocarbons.

**Capital investment incentives**

With prior approval of the tax authorities and varying with geographical location, 35% to 40% of the total investment in fixed assets related to commercial, industrial, or agricultural activity may be deducted from taxable income. The deduction is limited to 50% of taxable profits. The balance of deduction of the first year may be carried forward over the three following years.
Ivory Coast (Côte d’Ivoire)

**Export incentives**
No VAT is levied on export sales.

**Export incentives for the mining industry**
During the exploration phase, investments may be exempt from payroll tax; VAT on goods and services; additional tax (on the sale of goods) on imports and purchases; all import taxes and duties, including VAT on materials, machines, and equipment used in research activities; registration duties applicable to in-kind or cash share-capital contributions; real estate tax; CIT; and minimum tax.

In the exploration phase, mining subcontractors can benefit from the same import VAT and customs exemptions granted to mining title holders.

During the production phase, mining activities may have a five-year exemption from CIT and relief from all import duties, including VAT on recovered investments required for exploitation, special equipment tax, business franchise tax, etc. In addition, they may be granted temporary admission of machines and equipment that facilitate research and exploitation. Mining subcontractors are exempt from customs duties, including VAT on importing of liquid or gas fuels, lubricants, and chemical or organic products intended for the treatment of minerals, for the whole duration of the mine.

A tax on profit is levied as soon as investment funds are recovered. Mining enterprises may not combine these incentives with those of the Investment Code.

**Export incentives for petroleum service contractors**
A special and optional tax treatment applies to petroleum service contractors that meet established criteria. CIT, distribution (i.e. dividend) tax, payroll tax, income tax on salaries, and the tax on insurance premiums are calculated on the turnover of the contractor. The total taxes represent 5.786% of turnover. Standard rates apply for business franchise tax and social security contributions for local personnel. The exemption from customs duties and VAT for oil companies is extended to petroleum service contractors.

**Withholding taxes**
WHTs are levied as follows:

- **Impôt sur le revenu des valeurs mobilières (IRVM):** 15% on dividends and directors’ fees.
- **Impôt sur le revenu des créances (IRC):** 18% on interest payments, reduced to 13.5% (individuals) and 16.5% (businesses) on bank deposit interest. The revenue realised by individuals on Treasury Bonds is subject to 10% tax on terms of up to 12 months and to 5% tax when ranging from three years to five years. Foreign banks are subject to 18% tax on loan interest or 9% on equipment loans with minimum three-year terms.
- **Impôt sur les benefices non commerciaux (BNC):** 25% of 80% of revenues on royalties, licence fees, and management and service fees paid by Ivorian companies to foreign companies (effective rate: 20% of net amount paid). Treaties with Belgium, Canada, France, Germany, Italy, Norway, Switzerland, and the United Kingdom provide a maximum BNC rate of 10% on royalties and management fees. The tax treaty between the member states of the West African Economic and Monetary Union (UEMOA) provides a maximum BNC rate of 15% on royalties.
- **Interest on certificates of deposit (bons de caisse):** 25%.
Ivory Coast (Côte d’Ivoire)

**WHT on public contracts for services**
Any payment made by government bodies or public institutions to non-resident persons or companies for a contract for goods or services is subject to a 20% WHT, subject to DTAs (see *Impôt sur les benefices non commerciaux above*).

Resident persons or companies are not subject to this WHT, except for individual service (or goods) providers registered under the standard tax regime for small companies (see below).

**WHT on small-size businesses**
A 7.5% WHT is applicable on the remunerations paid to individual service providers registered under the standard tax regime for small companies.

A 10% WHT is applicable on payments made by government bodies or public institutions for a contract for services (or goods).

**WHT on writers’ revenue**
A 7.5% WHT applies to occasional revenue paid to individuals or companies as royalties on books, scientific studies, and artistic productions.

---

**Tax administration**

**Taxable period**
Companies are required by law to have a 31 December fiscal year-end.

**Tax returns**
Financial statements are filed annually, according to local generally accepted accounting principles (GAAP). Taxpayers under the real taxation scheme (the normal real taxation scheme is for companies with a turnover above XOF 150 million, the simplified real taxation scheme is for companies with a turnover between XOF 50 million and XOF 150 million) are required to produce electronic and paper financial statements. The deadline for filing is 30 April for medium and large-size companies and 30 May for other entities.

Companies under the real taxation scheme are allowed to submit tax returns electronically and perform tax payments via wire transfer.

**Payment of tax**
Payment of CIT is made in three instalments in April, June, and September following the end of the fiscal year, depending on the sector of activity and taxpayer’s office, as follows:

- Medium and large-size companies tax office:
  - 10 April, 10 June, and 10 September for industrial, oil and gas, and mining companies.
  - 15 April, 15 June, and 15 September for commercial companies.
  - 20 April, 20 June, and 20 September for service providers.
- Companies with other tax offices:
  - 15 April, 15 June, and 15 September.

**Tax audit process**
Many types of tax audits are available to the tax administration, which may request any accounting-related document for the purpose of tax audit.

The most common is the general tax audit of the taxpayer’s situation, which covers the statute of limitation period. It is carried out with a notice at least five days before the beginning of the audit. The audit is carried out on the premises of the taxpayer for a
Ivory Coast (Côte d’Ivoire)

maximum of six months (with a possibility to extend for a period of three additional months), and a primary tax assessment is issued.

The taxpayer then has 30 days to agree or challenge the assessment, and the definitive assessment is issued within a maximum of two months following the primary tax assessment.

The tax administration is entitled to release tax assessments electronically.

Further challenge of the definitive assessment is possible before the head of the tax administration and the court.

Statute of limitations
The statute of limitations covers the current year and the three prior years.

Topics of focus for tax authorities
The tax administration generally focuses on compliance with the CIT filing deadline and on the payment of the instalments.

For consistency of the tax returns, the tax administration focuses on the filing of the additional records (Annual Financial Statements, Etat 301: Annual Salary Statement, Etat 302: Annual Fees Statement), records of the provisions, tax losses, and amortisations carried forward.

During tax audits, the focus is on transactions with non-resident related parties.

Significant developments

In line with the Constitution, the new Public Finance Management (PFM) Act, 2012 sets out the fiscal responsibility to ensure that a reasonable degree of predictability with respect to the level of tax rates and tax bases shall be maintained, including taking into account any tax reforms that may be made in the future.

Tax Procedures Act (TPA)
The TPA, which came into force on 19 January 2016, aims to provide uniform procedures for consistency and efficiency in the administration of tax laws, facilitate tax compliance by taxpayers, and promote the effective and efficient collection of tax.

The TPA also harmonises and consolidates tax procedural rules. For example, the TPA provides that a taxpayer should keep records for five years. Previously, the different tax laws, such as the Value-Added Tax (VAT) Act 2013, Income Tax Act, and Excise Act, prescribed different timeframes that records should be kept by a taxpayer. Given that it is a relatively new piece of tax legislation, there are some inconsistencies when you mirror the TPA and other tax legislation, though we expect these inconsistencies to be addressed with time.

The Tax Appeal Tribunal Act, 2013
The Tax Appeal Tribunal Act, which came into operation on 1 April 2015, establishes one tribunal that will hear appeals for all tax areas. Previously, income tax matters would be heard by the Local Committee whereas VAT matters would be heard by the Tax Tribunal.

Proposed tax reforms
The government of Kenya’s strategy on tax and revenue reforms aims to significantly grow revenue in the 2017/18 fiscal year. To this end, the following tax policies and revenue administration reforms are to be put in place:

• Further implementation of tax modernisation and revenue administration reforms. These include making greater use of technology, enhancing taxpayer education and awareness, and implementing a simplified tax regime for the informal sector.

There is a proposal to waive taxes on bonuses, overtime, and retirement benefits for low income earners in the Finance Bill, 2016, which may be included in the Finance Act, 2016.

Specific changes introduced in the Finance Act, 2015

Capital gains tax on listed securities
Following the reintroduction of taxation of capital gains (ToCG) on 1 January 2015, the Finance Act, 2015 clarified that there will be no ToCG realised on the disposal of listed securities.
Kenya

Carryforward of tax losses
Tax losses may now be carried forward nine years following the period in which they are incurred. This effectively doubles the period within which losses must be utilised from five years to ten. This period may be extended further upon approval by the Cabinet Secretary responsible for Finance.

Tax on residential rental income
The Finance Act, 2015 introduced a simplified tax on residential rental income for Kenyan resident persons who earn rental income of 10 million Kenya shillings (KES) or less. This is to be paid at the rate of 10% of the gross rental receipts. The Finance Bill, 2016 proposes a monthly withholding tax (WHT) of 10% on qualifying residential income.

Tax amnesty on rental income
With respect to income from rental property, a tax amnesty has been introduced on:

- Principal taxes, penalties, and interest accrued in any period before and including the 2013 year of income.
- Penalties and interest relating to the 2014 and 2015 years of income.

The amnesty does not apply in cases where the tax has already been assessed on a person or the person is under audit or investigation in respect of the income.

Furthermore, where a person has no documentation to support their expenditure, they will be permitted a deduction of 40% of the gross rent charged.

The amnesty applies to both individuals and corporate entities.

Incentives for businesses operating in special economic zones (SEZs)
The SEZ Act contains a range of tax incentives for all licensed SEZ enterprises, developers, and operators on taxes and duties payable under the Excise Act, Income Tax Act, East African Community (EAC) Customs Management Act, and the VAT Act, 2013.

The Finance Act, 2015 introduced amendments to streamline the Income Tax Act with the SEZ Act, 2015. These are:

- Supply of taxable goods and services to SEZ enterprises, developers, and operators licensed under the SEZ Act, 2015 are VAT exempt.
- SEZ enterprises, developers, and operators will be subject to a reduced corporate income tax (CIT) rate of 10% for the first ten years of operation and 15% for the next ten years.
- Payments for services and interest to non-residents by SEZ enterprises, developers, and operators shall be subject to WHT at 10%.
- The Finance Bill, 2016 has proposed to further harmonise the incentives with those available for the export processing zone (EPZ) companies.

Wear and tear allowance on petroleum pipelines
The Finance Act, 2015 has clarified the rate of wear and tear allowance on petroleum pipelines as 12.5%.

Taxes on corporate income
Resident companies are taxable in Kenya on income accrued or derived from Kenya. Resident companies with business activities outside Kenya are also taxed on income derived from business activities outside of Kenya.
Non-resident companies are subject to Kenya CIT only on the trading profits attributable to a Kenyan permanent establishment (PE).

The rate of CIT for resident companies, including subsidiary companies of foreign parent companies, is 30%. The CIT rate for branches of foreign companies and PEs is 37.5%.

**Special rates**
There are special rates for certain resident and non-resident companies as set out below.

<table>

**Local income taxes**
There are no county or provincial taxes on income, as all taxes are collected by the national government. However, county governments are empowered by the Constitution to impose property and entertainment taxes at the county level.

**Corporate residence**
Kenya-incorporated companies are treated as Kenyan-tax resident. Additionally, companies incorporated overseas are also treated as Kenya resident if their “management and control is exercised in Kenya in a particular year of income under consideration”. A company may also be declared a tax resident in Kenya pursuant to a declaration in a legal notice by the Cabinet Secretary to the National Treasury.

**Permanent establishment (PE)**
A business carried on in Kenya through a fixed place of business gives rise to a PE, as does a building site, or a construction or assembly project, that has existed for six months or more.

The definition of a PE has been extended to include a dependent agent that habitually concludes contracts on behalf of others. This definition is closer to that contained in the Organisation for Economic Co-operation and Development (OECD) Model Convention on Double Tax Treaties (DTTs).

Note that the definition of a PE may be modified by a DTT.
Other taxes

Value-added tax (VAT)

VAT in Kenya is governed by the VAT Act, 2013, which came into effect on 2 September 2013, read together with VAT Regulations, which are yet to be published. VAT is levied on the supply of taxable goods and services in Kenya, as well as on the importation of taxable goods and services into Kenya.

The following VAT rates apply in Kenya:

<table>
<thead>
<tr>
<th>Activity</th>
<th>VAT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>All goods and services that are neither exempt nor zero-rated</td>
<td>16</td>
</tr>
<tr>
<td>Export of goods and taxable services, designated goods and services</td>
<td>0</td>
</tr>
</tbody>
</table>

Certain goods and services are designated as exempt from VAT. Exempt supplies do not count towards the VAT registration threshold, and the related input VAT is not recoverable.

Zero rating mainly applies to the export of goods or taxable services. Additionally, the supply of goods or services to certain designated persons and projects is also zero-rated.

The threshold for VAT registration is the supply of taxable supplies of KES 5 million per year. Registered persons must record their turnover using an approved electronic tax register or signature device. Only registered persons may recover input tax. Input tax recoveries must be made within six months of the relevant compliant tax invoice; otherwise, the claims are deemed time-barred.

Input tax claims are generally not deductible for several items, such as non-commercial vehicles and accommodation, restaurant, and entertainment services. Excess input tax credit may be carried forward to be offset against future output tax, or may be refunded to the taxpayer on application to the revenue authority. However, VAT refunds are only available to registered persons making zero-rated supplies, and the payment of the refunds may be subject to lengthy delays.

The transitional clauses provide for:

• Exemption from VAT of petroleum products for a period of three years with effect from 2 September 2013 to 2 September 2016. The Finance Bill, 2016 has extended this by another year to September 2017.
• Remission of tax on any taxable goods and services to continue for a period of five years.
• Remission of tax on taxable goods and services supplied to official aid funded projects where the agreement was concluded before commencement of the VAT Act, 2013. Such remission shall remain in force for a period of five years with effect from 19 September 2014.

Reintroduction of withholding VAT by government ministries, departments, and agencies

The Finance Act, 2014 reintroduced the withholding VAT system, which was abolished in 2011. Under this system, government ministries, departments, agencies, and any other person appointed by the Commissioner for domestic taxes are required to withhold 6% of the taxable value on any taxable supplies acquired and remit the same directly to the Commissioner (i.e. the supplier of the goods or services only receives 10% out of the 16% VAT, with the remaining 6% being paid directly to the revenue authority by the recipient of the goods or services).
Kenya

A notable difference with the re-introduced regime is its expanded scope, i.e. the Commissioner for domestic taxes is now empowered to appoint any taxpayer as a withholding VAT agent, which is a move from the traditional appointments, which were restricted to government ministries, departments, and agencies.

However, the provisions of the VAT Act regarding withholding VAT were deleted by the TPA with effect from 19 January 2016. Despite this, the Kenya Revenue Authority (KRA) has continued to appoint withholding VAT agents and enforce the withholding VAT obligations even without the requisite legal backing.

**Import (customs) duty**

Import duty is levied under the EAC Customs Management Act. Imported goods are generally subject to import duty at varied rates, including 0% for raw materials and capital goods (also exempt from VAT), 10% for intermediate goods, and 25% for finished goods. However, a different rate of duty can be prescribed by the Council of Ministers of the EAC partner states. Enterprises established in an EPZ are exempt from customs duty on machinery and inputs for products manufactured for export while licensed oil and gas contractors with a Production Sharing Contract (PSC) with the government of Kenya are exempt from customs duty on importation of machinery, spares, and inputs used in exploration activities, excluding motor vehicles. Where raw materials that are not subject to 0% import duty are used to manufacture goods for export outside the East African Community, one may apply for remission under the EAC duty remission arrangement. This is subject to a requirement for proof of export and one may be required to execute a bond/bank guarantee. Further, there is a list of other items and persons that are exempted from import duties under the Act.

**Changes introduced by the EAC Gazette Notice No. 9 of 2015**
The EAC Gazette notice dated 19 June 2015 introduced a number of changes, including increase in the import duty rates for plastic tubes for packing toothpaste (10% to 25%), iron and steel products (10% to 25%), rice (higher of 75% or 345 United States dollars [USD] per metric ton (MT), and sugar (higher of 100% or USD 460/MT). In addition, import duty was increased from 10% to 25% for paper and paperboards, electronic circuits, iron or steel bars and rods, made up fishing nets, towers and lattice masts, screws and bolts made of metal, aluminium milk cans, smart cards, oil or petrol filters, and prefabricated buildings. Duty for bridges and bridge sections and LPG cylinders was increased from 0% to 25%.

**Excise duty**

Excise duty in Kenya is governed by the Excise Duty Act, 2015, which came into effect on 1 December 2015. Prior to the introduction of this Act, excise duty was levied under the Customs and Excise Act, Cap 472, which has since been repealed.

Excise duty is imposed on the local manufacture or the importation of certain commodities and services. Excisable commodities include items such as bottled water, soft drinks, cigarettes, alcohol, fuels, and motor vehicles. Excisable services include mobile cellular phone services, fees charged for money transfer services, and other fees charged by financial institutions.

Further, excise stamps must be affixed on certain excisable goods, such as alcohol and tobacco products.

Below are the different categories of excisable products and their corresponding rates of excise duty:

* Transfer of quoted securities is exempt.

**Tax on capital gains (ToCG)**

After being suspended for 30 years, the 2014 Finance Act reintroduced ToCG on transfer of property situated in Kenya. Therefore, gains derived on the sale or transfer of property by an individual or company carried out on or after 1 January 2015 are subject to a final tax at the rate of 5%.

**Compensating tax**

Where a company pays dividends out of profits that have not been subject to CIT, the company will be liable to pay a compensating tax. The compensating tax rate is 42.8%. The aim of this tax is to ensure that all dividends are paid out of profits that have suffered CIT.

**Turnover tax for small business taxpayers**

A resident taxpayer whose annual gross turnover does not exceed KES 5 million will be taxed at the rate of 3% per quarter of one's turnover. In such a case, the taxpayer will not be required to register for VAT. Turnover tax does not apply to rental income, management or professional fees, training fees, income subject to WHT as a final tax, and income of incorporated companies. Loss making businesses are allowed to make an election to be exempted from turnover tax. A written application for exemption has to be made to the Commissioner, and there is a procedure to be followed.

**Business permit**

Every person who carries on a business in Kenya is required to apply for a business permit from the relevant local authority. The business permit is usually based on the size of one's business and is renewable on an annual basis.

**Tourism levy**

The tourism levy is payable to the Tourism Fund by establishments dealing in tourism activities and services as listed in the Tourism Act at a rate of 2% of turnover.

**National industrial training levy**

All employers are required to pay to the Directorate of Industrial Training a monthly levy of KES 50 per employee. The only exemption is for employers remitting the tourism levy.

**Railway development levy (RDL)**

The RDL is payable on all imports into the country at 1.5% of the customs value of the goods. This was implemented to provide funds for the construction of a standard gauge railway track.

**National construction levy**

The National Construction Authority introduced a construction levy for all construction works that commenced after 6 June 2014. The levy is payable at the rate of up to 0.5% of the contract value of any construction project whose construction value exceeds KES 5 million. The levy is in relation to all construction projects relating to buildings, roads, water works, electrical works, and other works that require the service of a contractor.

**Advance tax on motor vehicles**

Advance tax is payable at varying annual rates depending on the motor vehicles and is creditable against any CIT payable for the year.
**Fringe benefit tax (FBT)**

The FBT is payable by an employer on interest-free or low-interest loans granted to employees, company directors, and their relatives. FBT is due, whether the employer is exempted from tax or not, at the resident CIT rate of 30%. The benefit is the difference between actual interest charged and the interest computed using the Commissioner’s prescribed rate published quarterly. The directors and employees are not personally taxed on the benefit.

**Payroll taxes**

Payroll taxes are administered through the pay-as-you-earn (PAYE) mechanism of deducting income tax from employment income (salaries, wages, bonuses, commissions, etc.). PAYE also applies to taxable non-cash benefits.

It is the employers’ obligation to deduct and account for payroll taxes on a monthly basis.

The tax tables applicable to individuals are provided in the Taxes on personal income section of Kenya’s Individual tax summary at www.pwc.com/taxsummaries.

**Employers’ National Social Security Fund (NSSF) contributions**

Employers and employees are obligated to contribute monthly to the NSSF a standard contribution of KES 200 each. However, the new NSSF Act provides for a higher contribution rate of 6% of pensionable earnings with matching contribution from the employer. The implementation of the new Act awaits conclusion of a pending court case.

**National Hospital Insurance Fund (NHIF) contributions**

An employer has an obligation to deduct and remit NHIF contributions on a monthly basis.

NHIF is payable by the employee at graduated bands, up to a maximum of KES 1,700 per month. The maximum contribution is reached at a salary level of KES 100,000 per month.

**Local government rent and rates**

Rent and rates are levied annually on properties in Kenya, and the rateable value that is payable to the county government shall vary in each county based on various forms of ratings, such as area rate, agricultural rental value, or site value.

**Branch income**

The profit of a PE is taxed at the branch income tax rate of 37.5%, but there is no further taxation on the distribution of branch profits. There are certain restrictions with respect to the tax deductibility of certain costs, such as royalties, interest, and management fees, paid to the head office. However, these payments are also not subject to WHT.

**Income determination**

**Inventory valuation**

Inventory is stated at the lower of cost or net realisable value, with the exception of biological assets, whose value is prescribed by the Commissioner.

**Capital gains**

Tax on capital gains (ToCG) has been reintroduced. See Tax on capital gains (ToCG) in the Other taxes section for more information.
Kenya

**Dividend income**
Kenya-source dividends are taxable income in Kenya unless the recipient is a Kenya resident company holding 12.5% or more of voting power of the company paying the dividend. However, for companies holding less than 12.5% of the votes, and other resident taxpayers, the 5% WHT is the final tax. Dividends paid to non-residents and any overseas holding company attract 10% WHT.

Dividends issued in a ratio not proportionate to shareholding of the existing equity are considered as taxable dividends to the extent of the disproportionate increase in the value of the ownership of the company.

**Interest income**
Interest income is generally included in the determination of taxable income unless expressly exempted for income tax.

**Foreign income**
In Kenya, companies are taxed on income accrued or derived from Kenya. Resident companies with business activities outside Kenya are taxed on worldwide profits.

**Deductions**
The general principle in Kenya is that, unless expressly provided otherwise, expenses are tax deductible if they are incurred wholly and exclusively to generate taxable income.

**Depreciation and depletion**
No deduction is allowed for accounting depreciation or impairment. However, capital allowances are permitted at varying rates (on a straight-line basis) for certain assets used for business purposes, including buildings and machinery used in manufacturing, industrial buildings and hotels, machinery and plant, agricultural works, and mining.

</tbody>
</table>
* Different percentages apply for previous years.

**Goodwill**
Cost acquisition of goodwill and amortisation of goodwill are not deductible since they are capital in nature.

**Start-up expenses**
There is a specific provision allowing the deduction of certain start-up expenses, provided that the required conditions have been met.

**Interest expenses**
A deduction for interest is allowed only to the extent that the borrowings are used for the purpose of trade. Where a non-resident person controls a company alone or with four or fewer other persons, interest restriction or ‘thin capitalisation’ rules apply (see Thin capitalisation in the Group taxation section).

**Bad debts**
Bad debts are deductible in the year in which it is evident that the debt has become irrecoverable. Detailed rules apply for making this determination.

**Charitable contributions**
Donations to qualifying charities and for certain public works are deductible, subject to certain conditions.

**Fines and penalties**
Generally, fines and penalties are not deductible as they are not considered to be expenses incurred for producing profits chargeable to tax.

**Taxes**
Kenyan income taxes are not deductible while computing income tax of a person. However, foreign income taxes incurred are generally deductible as an expense if tax credit relief is not available under a DTT.

**Net operating losses**
Losses calculated under the tax rules may be carried forward against income from the same source for a maximum of ten years, including the year in which the losses arise. Losses cannot be carried back, except for petroleum companies, where losses can be carried back indefinitely.

**Payments to foreign affiliates**
Transfer pricing rules based on OECD principles apply to transactions with foreign affiliates (both companies and branches/PEs). Additionally, there are restrictions on the deductibility of expenses incurred outside of Kenya by non-residents with a Kenyan PE.

**Group taxation**
Each company in a group is taxed as a separate entity in Kenya.

**Transfer pricing**
A company that has related-party transactions is required to ensure such transactions are at arm’s length. The company is therefore required to prepare a transfer pricing policy to justify the pricing arrangements. The Commissioner is allowed to specify conditions and procedures on the application of the methods for determining the arm’s-length price and to adjust the prices if they do not conform to the arm’s-length principle. The policy should be prepared and submitted to the KRA upon request.
Kenya

Thin capitalisation
In Kenya, a company is thinly capitalised if all of the following occur:

- The company is controlled by a non-resident person alone or together with four or fewer persons.
- The company is not a bank or financial institution.
- The highest amount of all loans held by the company at any time exceeds the sum of three times the revenue reserves (including accumulated losses) and the issued and paid up share capital of all classes of shares of the company.

A company that is thinly capitalised cannot claim a deduction on the interest expense incurred by the company on loans in excess of three times the sum of revenue reserves and issued and paid up capital of all classes of shares of the company. The company also cannot claim a deduction for any foreign exchange loss realised by the company with respect to any loans from its shareholders in the period that the company remains thinly capitalised.

For companies in the extractive sector, the debt-to-equity ratio is 2:1.

Deemed interest
The Kenyan tax legislation gives the Commissioner for Domestic Taxes the discretion to ‘deem interest’ on interest-free borrowings received by foreign-controlled entities in Kenya. The ‘deemed interest’ is based on the Commissioner’s prescribed rates.

This means that WHT is due on the ‘deemed interest’ as if this was an actual finance charge. The WHT rate on payments of interest to non-residents is currently 15% (in the absence of a DTT).

Controlled foreign companies (CFCs)
Kenya has no specialised rules regarding CFCs.

However, there are restrictions on the deductibility of interest and foreign exchange losses of companies that are foreign controlled and thinly capitalised.

Tax credits and incentives

Foreign tax credit
For business income, there is no tax credit for foreign tax paid on business income except as provided for by a DTT (if applicable) between Kenya and the other country. However, foreign tax paid can be deducted as an expense.

Investment deduction
Qualifying investments exceeding KES 200 million incurred outside Nairobi or the municipalities of Mombasa or Kisumu are allowed an investment deduction of 150%. All other qualifying investments are allowed a 100% investment deduction in the year the asset is put into use.

Export processing zone (EPZ)
Companies located in an approved EPZ, principally to export goods, are taxed at a 0% CIT rate for ten years from its commencement and at a rate of 25% for the next ten years.

Special economic zones (SEZs)
Companies registered under the SEZ Act benefit from a reduced CIT rate of 10% in their first ten years of operation. The CIT rate in the succeeding ten years is then 15%.
Listed companies
Companies listed on the Nairobi Securities Exchange are entitled to reduced rates of income tax for a period depending on the percentage of share capital listed (see the Taxes on corporate income section for the rates).

Withholding taxes
WHT is levied at varying rates (3% to 30%) on a range of payments to residents and non-residents. Resident WHT is either a final tax or creditable against CIT. Non-resident WHT is a final tax.

Notes
1. Interest paid by the government and the Central Bank of Kenya is tax-exempt.
2. The rate is 12.5% for management and professional fees.
3. No Kenya tax is due if subject to tax in Zambia.
4. The rate is 17.5% for management and professional fees.
5. Management and professional fees subject to normal WHT rates.

Where the treaty rate is higher than the non-treaty rate, the lower rate applies.

Treaties awaiting conclusion and/or ratification: Iran, Italy, Kuwait, Malaysia, Mauritius, Netherlands, Qatar, Seychelles, Singapore, Thailand, and the United Arab Emirates.

**Tax administration**

**Taxable period**
A company has discretion to determine its financial year-end, provided it is a 12-month period. However, any changes in this must be approved by the Commissioner of the KRA.

**Tax resident**
Resident companies and PEs of non-resident companies must file a self-assessment tax return annually. The return is accompanied by a tax computation and financial statements, amongst other schedules. The return is due within six months following a company's financial year-end.

**Payment of tax**
Instalment tax payments must be made quarterly during the year based on the lower of 110% of the previous year's liability or an estimate of the current year's liability. Agricultural companies are required to pay estimated tax in two instalments of 75% and 25% during the year. Any balance of tax at the end of the year must be paid within four months of the financial year-end.

**Payment of agency taxes**
The tax withheld from payments must be paid by the 20th day of the month following the month in which the deduction is made.

**Penalties for non-compliance**
If a self-assessment tax return is not submitted by the due date, a penalty of 5% on the unpaid tax for the year may be imposed, subject to a minimum of KES 10,000. Failure or
late submission of an EPZ company return will be subject to a penalty of KES 2,000 per day for as long as the failure continues.

A penalty of 20% and interest at 1% per month are imposed on underestimation and late payment of instalment tax and any balance of tax. Interest is charged only on the principal tax due, capped at the amount of the principal tax due.

Failure to make a deduction or to remit the WHT deducted attracts a penalty equal to 10% of the amount of tax involved (subject to a maximum of KES 1 million) and accrues interest at 1% per month.

**Tax audit process**
There is no prescribed audit process, as an audit can be triggered by various factors as determined by the KRA. Generally, tax audits should be carried out after every two to four years. The audit or inspection will commence with a request from the KRA for the taxpayer to make available any such records or information as may be required.

**Statute of limitations**
The tax authorities must commence an audit before the expiry of seven years after the end of a year of income. The KRA may go back past seven years where fraud is suspected. There is no time limit for completing tax audits. However, they are normally completed within a reasonable time, especially if there are no major disputes.

**Topics of focus for tax authorities**
The KRA, in their 2015/16 to 2017/18 Strategic Plan, stated that they will focus on the following key areas:

- Enhancing revenue mobilisation by broadening the revenue base, enhancing compliance, and combating tax evasion and fraud using intelligence and risk-based, forward-looking enforcement.
- Strengthening revenue administrative capacity and enhancing transparency and fairness through organisational change and business process optimisation.
- Creating a staff establishment that is professional courteous, accessible, and proactive in solving customer problem.
- Enabling business by leveraging on technology to achieve full electronic customer service and enhance operational efficiency and electronic customer service and enhance operational efficiency and service delivery in line with the best practice to achieve high customer satisfaction level.
**Significant developments**

**Taxation of residents**
The income tax exemption during the first two years of activity is no longer applicable.

**Corporate residence**
The notion of permanent establishment (PE) is introduced by the Financial Act 2016. It is inspired from the Organisation for Economic Co-operation and Development (OECD) rules.

**Income determination**
Capital gains realised from the sale of shares is subject to income tax at a rate of 20% if the value of such shares includes the value of assets or rights situated in Madagascar.

---

**Taxes on corporate income**

**Taxation of residents**
Resident corporate entities are subject to corporate income tax (CIT) based on realised worldwide income.

A corporate entity having an annual turnover of less than 20 million Malagasy ariary (MGA) is subject to CIT at a rate of 5% of 70% of turnover, with a minimum tax of MGA 16,000.

A corporate entity registered in Madagascar and having an annual turnover exceeding MGA 20 million is subject to CIT at a rate of 20%.

The tax payable cannot be less than 5/1,000 of turnover plus a fixed amount of MGA 100,000 for taxable persons carrying on agricultural, artisan, transportation, industrial, hotel, or mining activities. The minimum tax cannot be less than 5/1,000 of turnover plus MGA 320,000 for other activities.

**Taxation of non-residents**
Only Madagascar-source income is taxable for non-residents.

Revenue of foreign businesses providing services to a Madagascar taxpayer that do not have a PE in Madagascar is subject to withholding tax (WHT) at a rate of 10% of any income realised in Madagascar. However, dividend income is exempt and financial loan interest is subject to WHT of 20%. See the Withholding taxes section for more information.

**Local income taxes**
No other local income taxes are applicable in Madagascar.
Corporate residence

Companies are considered resident in Madagascar if they are registered in Madagascar or have a legal existence in Madagascar.

Permanent establishment (PE)

PE refers to a fixed place of business through which a company carries out the whole or part of its activities, including:

- Management offices.
- Branches.
- Offices.
- Factories.
- Workshops.
- Mining sites, oil or gas wells, quarries, or any other places for the extraction of natural resources.
- Building sites, construction or installation projects, or supervising activities lasting for more than six months in relation to those projects.
- Provision of services by a company, including advisory services, via employees or other staff hired by the company to this end, only if such activities are carried out in Madagascar for a total period of 183 days for a 12-month period either starting or ending during the fiscal year involved, for the given or a related project.

PE does not include:

- The use of facilities for the storage or display of goods or merchandise belonging to the company.
- Exploiting a stock of goods or merchandise belonging to the company for the sole purpose of either storage or display or of being processed by another company.
- Exploiting a fixed place of business for the sole purpose of:
  - either purchasing merchandise or collecting information for the company
  - carrying out any other activity of preparatory or auxiliary character for the company, or
  - pursuing any combination of the activities mentioned above, conditional on the overall activity of the fixed place of business, as resulting from this combination, remaining of preparatory or auxiliary character.

Other taxes

Value-added tax (VAT)

The VAT rate is 20%, and the VAT rate on export is 0%. VAT input is recoverable under certain conditions.

VAT is applicable to all transactions realised in Madagascar by a VAT vendor. Services are considered to be performed in Madagascar if such services are used in Madagascar or invoiced to a taxpayer established in Madagascar.

Business engaged in e-commerce is subject to VAT.

Transport companies are allowed to claim VAT input on gasoline used for land transportation. The objective is to reduce the impact of cost of oil and gas on transportation fees.

Any corporate entity or individual person who realises an annual turnover exceeding MGA 200 million is a VAT vendor. For a business realising annual revenue less than MGA 200 million, VAT vendor registration is an option.
A foreign company that has no PE in Madagascar but renders services to a Madagascar taxpayer must appoint a tax representative to collect and pay VAT on its behalf. Otherwise, the beneficiary of the services must collect and pay VAT on behalf of the foreign supplier.

All transactions made by a VAT vendor with a non-VAT vendor must be done via the banking system when the value of the transaction exceeds a threshold fixed by Decree.

Any suppliers not registered as VAT vendors engaged in public market transactions are subject to VAT at a rate of 8%, which is representative of income tax. VAT is withheld by the public treasury and paid directly to the tax authorities.

**Customs and import tax**
The importation of goods is subject to payment of customs and import tax payable to the customs office.

In addition, Gasynet fee, corresponding to 0.5% of the cost, insurance, and freight (CIF) value of goods, is applicable on importation of goods.

**Excise duty**
Excise duty applies on a range of goods and services, such as tobacco, alcohol, lighters, and communication by mobile phones. Excise duty rates range from 10% to 325% or are a fixed amount per litre or per unit.

**Real estate ownership tax**
Real estate ownership tax is imposed annually at the rate of 5% to 10% on the rental value of the property. Land ownership is also taxable at a rate depending on the nature of the land.

**Registration fees**
Registration fees are applicable to transfers of title ownership (e.g. sales, donations) of movable and immovable assets, to transfers of interests, to share capital increases, and to lease agreements.

Registration fee rates are 0.5% to 5%, depending on the nature of the transaction. The rate of 5% is applicable mainly on transfers of assets and transfers of business.

**Tax on insurance contracts**
All insurance or life annuity conventions concluded with a company, insurance firm, or with any other Madagascan or other insurer are subject to an annual tax on insurance contracts at a rate of 3% to 20% levied on the insurance premiums.

**Payroll tax**
Salary income taxes, called Impôt sur les Revenus Salariaux et Assimilés (IRSA), are levied at a rate of 20% on the total taxable remuneration of employees, including salaries, allowances, and benefits in kind. Employers are responsible for withholding and paying salary income taxes on behalf of employees.

**Social security contributions**
Employers must contribute to Caisse Nationale de Prévoyance Sociale, Madagascar’s national social security fund, which includes pensions and accident insurance. The contribution is capped at 13% of eight times the legal minimum salary per employee.

**Health contributions**
Employers must contribute to the health system assessment at a rate of 5% of the total amount of taxable remuneration of its employees. The contribution may or may not be capped at 5% of eight times the legal minimum salary per employee, depending on the health system organisation where the company is affiliated.
**Branch income**

The tax on branch income is the same as for corporate income. The branch income tax base is the income realised by the branch in Madagascar.

**Income determination**

**Inventory valuation**

There are no provisions for valuing inventories or determining inventory flows in Madagascar. The tax treatment will follow the accounting treatment.

**Capital gains**

Capital gains realised from the sale of shares held in a company of which the entire or partial value is derived, either directly or indirectly, from goods located in Madagascar, or from rights thereof, are subject to income tax at a rate of 20%.

Capital gains made by a company on the sale of assets and interests are considered as normal business income that is subject to CIT.

**Dividend income**

Dividends received by a company are considered as business income subject to CIT.

Certain dividends from a subsidiary may be excluded from CIT (see Dividends exclusion in the Group taxation section).

**Stock dividends**

Stock dividends are unusual, but they are considered as business income that is subject to CIT.

**Interest income**

Interest income received by a resident taxpayer from another entity established in Madagascar is subject to WHT at a rate of 20%. Revenue already subject to WHT is no longer taxable to CIT.

**Foreign income**

Foreign income earned by corporate bodies situated in Madagascar is considered as normal business income subject to CIT unless a tax treaty is established and indicates otherwise. There is no provision for tax deferral in Madagascar.

**Deductions**

**Depreciation**

The amount of deductible depreciation should not exceed the amount that is calculated according to the following rates of depreciation provided by the law:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial buildings</td>
<td>5</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>10</td>
</tr>
<tr>
<td>Mining exploration and development (licence)</td>
<td>33</td>
</tr>
<tr>
<td>Transportation (car)</td>
<td>20</td>
</tr>
<tr>
<td>Transportation (utility cars, vans, trucks)</td>
<td>25</td>
</tr>
<tr>
<td>Computers</td>
<td>25</td>
</tr>
<tr>
<td>Electricity generators</td>
<td>10</td>
</tr>
</tbody>
</table>
With the exception of buildings, it is also possible to practise a graduated depreciation. In this case, the annual depreciation corresponds to 30% of the net book value of the asset.

In case of loss, depreciation of assets can be deferred and carried forward to the next financial years until absorption.

**Goodwill**
There is no provision concerning deductibility of goodwill in the Madagascar tax code.

**Start-up expenses**
There is no specific tax provision on start-up expenses. Accounting rules are applicable for the profit and loss recognition.

Start-up and prospecting expenses for the installation of an overseas establishment, as well as the costs of running such a foreign establishment, for the first three years are tax deductible. However, the amounts deducted must be reported, in equal amounts, to the taxable income of the five consecutive years from the fifth year following the creation of the foreign establishment.

**Interest expenses**
Interest expenses are deductible. However, interests on inter-company loans are subject to thin capitalisation rules (see Thin capitalisation in the Group taxation section for more information). In addition, interest on inter-company loans is not deductible if the loan agreement is not documented by a written agreement submitted according to registration procedures.

**Bad debt**
To be tax-deductible, provisions for doubtful debt must be subject to justification of existence of amicable or judicial settlement.

**Charitable contributions**
Payments made for the benefit of educational, social, or cultural recognised public associations; accredited bodies for scientific research; or for the promotion and creation of businesses for achievement of planned economic and social development are deductible within the limits of 0.5% of annual turnover.

Gifts in kind or in cash granted in case of natural calamities and donations in cash granted to a corporation established by decree for the interest of the nation are also deductible.

Any other charitable contributions are not deductible.

**Deductible wages**
Salaries and wages that are not included in salary income taxes or not declared to Caisse Nationale de Prévoyance Sociale are not deductible.

**Fines and penalties**
Fines and penalties are not deductible for CIT purposes.

**Taxes**
Except for CIT, taxes in relation to business in Madagascar are deductible.

Third-party taxes borne by the company are not tax-deductible.

**Net operating losses**
Accumulated loss can be carried forward for the next five financial years following the period in which the loss occurs. Carryback of losses is not permitted in Madagascar.
Madagascar

**Payments to foreign affiliates**
For branches, the deductible amount of overhead that the head office can charge to the branch is limited to 1% of the turnover of the branch.

*For interest on inter-company loans, see Thin capitalisation in the Group taxation section.*

**Payments to foreign companies established in a country having a very favourable fiscal regime**
Payments made to a foreign company established in a country having a very favourable fiscal regime are not tax deductible unless there is proof of effectiveness of the services and reasonability of the amount.

**Group taxation**
There is no provision regarding group taxation in Madagascar, except for the following:

For entities subject to the actual tax regime, a parent-subsidiary regime option is established by which the net dividends received by the parent company from its subsidiary are excluded from the tax base of the parent company. However, a share of fees and expenses, uniformly fixed at 5% of the amount of dividends paid, must be reintroduced into the tax base.

**Transfer pricing**
There is a provision in the tax law allowing the tax authority to claim a tax adjustment in cases where the transactions between a Madagascar entity and a foreign entity controlling or controlled by the Madagascar entity are not concluded at fair market value.

The following transfer pricing methodologies are acceptable:

- Methods of comparable prices on the free market.
- Resale price method.
- Cost plus method.
- Transactional method on net margin.
- Transactional method on profit split.

Effectiveness of services and fair market value must be justified by appropriate documentation.

**Thin capitalisation**
Under Malagasy tax law, deductible inter-company financial interest cannot exceed the interest calculated on twice the share capital at the rate of the Central Bank of Madagascar plus two points (the rate of the Central Bank of Madagascar is 9.5%).

Inter-company loan agreements must be submitted according to registration formalities within two months from the execution date. Failure of submission of an inter-company loan agreement according to registration formalities implies non-deductibility of interest on the inter-company loan.

**Dividends exclusion**
Dividends received by a shareholder holding more than 75% share capital from its subsidiary are excluded from business revenue subject to income tax.

**Controlled foreign companies (CFCs)**
There is no special provision in relation to CFCs in Madagascar.
**Tax credits and incentives**

The following activities benefit from a special tax and/or customs regime:

**Microfinance activity**
Microfinance benefits are available for entities specialising in lending money on the basis of small or medium scale value. Entities duly licensed to practise microfinance activities are exempt from CIT during the first five years. After this period, the microfinance company is subject to CIT at a rate of 20%.

**Free zone (free trade zone)**
Free zone law is available for industrial and other service providers that export all of their products. If eligible under the free zone law, a CIT exemption is provided during the first two to five years and a reduced CIT of 10% is levied thereafter. Exemption from customs duties on importation is also provided.

**Companies investing in renewable energy, tourism, industrial, civil work and construction, and transformation**
Companies investing in renewable energy, tourism, industrial, civil work and construction, and transformation can benefit from a tax reduction equal to the tax calculated on 50% of the amount of investment that they realised during the related tax year. The right to reduction that can be used for the tax year cannot exceed 50% of tax actually due. The balance is carried forward with the same limitation to subsequent years, until clearance.

**Big investment mining**
A mining company committing to invest more than 50 million United States dollars (USD) is considered a big investment mining company. The big investment mining law provides a minimum income tax exemption, a reduced CIT rate for the transformation entity (i.e. the entity in charge of processing the extracted minerals), exemption from custom and importation duties, and VAT reimbursement on locally purchased equipment and investments.

**Petroleum code**
The petroleum code provides a custom and importation duties exemption for hydrocarbon research, exploration, and exploitation activities.

**Leasing law**
The leasing law provides that leasing activities can benefit from CIT exemption and reduction of tax rate during the first four years.

**Foreign tax credit**
Except under a tax treaty, there is no foreign tax credit rule under Malagasy tax law.

**Withholding taxes**

WHTs are levied as follows:

- Purchases of goods and services from non-registered suppliers by a registered supplier are subject to WHT at a rate of 5% payable to the tax authorities within 15 days following the month of payment of the supplier.
- *Impôt sur les revenus des capitaux mobiliers* (IRCM): WHT on interest of 20% is applicable on financial loan interest. However, interest paid to banks, financial institutions, and foreign financial organisations is exempt.
- WHT of 20% is applicable on remuneration of a member of a board of directors or a single director.
Madagascar

- Income tax for non-resident entity: Management fees, royalties, technical and assistance fees, licence fees, equipment rental fees, and any income realised by foreign suppliers is subject to WHT at a rate of 10%.

Madagascar has signed two tax treaties.

**Tax administration**

**Taxable period**
The financial year may be spread over any period of 12 months. There is no need to obtain prior authorisation in order to close the financial year on a date other than 31 December or 30 June.

**Tax returns**
CIT returns are due before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and no later than the 15th day of the fourth month from the date of closing of the financial year for all other year-ends.

**Payment of tax**
CIT is payable bimonthly in provisional instalments. The balance is payable before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and within four months from the date of closing of the financial year for all other year-ends.

Taxpayers can decide to suspend the payment of bimonthly income tax instalments, but they must pay a penalty of 80% if the final tax due is more than the previous year’s income tax.

WHT on foreign services is payable to the tax authorities within one month of the date of payment.

WHT on interest and on payments to members of boards of directors are payable before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and no later than the 15th day of the fourth month from the date of closing of the financial year for all other year-ends.

**Tax audit process**
The tax authority carries out audits of a selection of tax returns, usually at the taxpayer’s place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations.

During tax audit, tax authorities can access all the taxpayer data available on servers, terminals, and any supporting systems.

After examination of available information, the tax authority issues a notice of assessment, and the taxpayer has 30 days after the date of reception of the notice of
assessment to answer and submit its written objection to the tax authority. If the tax authority confirms its assessment, the taxpayer has two options:

i. 15 days from the confirmation of assessment, the taxpayer may request the opinion of the Tax Administrative Appeal Commission (CFRA). 30 days from the CFRA opinion, the Director of Tax Audit issues the final decision. The decision of that body may be further appealed to the Court (State Council) within 30 days.

ii. 30 days from the confirmation of assessment, the taxpayer may file a claim to the tax authorities. The Director of Tax will issue the final decision. Ultimately, decisions of the Director of Tax may be further appealed to the Court (State Council) within 30 days.

Statute of limitations
The tax limitation period is three years.

Topics of focus for tax authorities
Areas where tax authorities usually claim adjustment are:

• VAT reverse on foreign services.
• Completeness of VAT output on revenue.
• Sales without invoices.
• Expenses without invoices.
• Employees' remuneration not subject to salary tax.
• Payment to non-registered suppliers.
**Significant developments**

Effective 1 July 2015:

- Thin capitalisation was introduced, but the regulations are not yet provided; consequently, the acceptable ratio is not known currently.
- There is deemed interest on interest-free loans and outstanding balances due to related parties.
- Interest on outstanding tax liability has been revised to be calculated at the prevailing bank lending rate plus 5% *per annum*.

**Taxes on corporate income**

Malawi does not have separate legislation for the determination of taxable income of different types of legal persons. Taxation of all income is included in the Taxation Act.

Section 11 of the Taxation Act defines income as the total amount in cash or otherwise, including any capital gain, received by or accrued to a person in any year or period of assessment from a source within or deemed to be within Malawi. The taxpayer’s assessable income excludes any amount exempt from tax under this act.

**Income deemed to arise in Malawi**

The liability for Malawi tax is based on whether the income is sourced from Malawi, irrespective of the residence of the recipient of such income. Certain transactions may be deemed to be from a source within Malawi even if carried out outside Malawi. Section 27 of the Taxation Act limits the income that may be deemed to have arisen in Malawi to the following:

- Remuneration for services rendered or work performed in Malawi.
- Remuneration for services rendered or work performed in or out of Malawi where the amount may be claimed as a tax-deductible expense by a permanent establishment (PE) in Malawi.
- Amounts incurred, claimed, or claimable in connection with a PE in Malawi.
- Realised exchange gains and losses arising in connection with a PE in Malawi or foreign exchange assets and liabilities held in Malawi.
- Capital gains and losses realised with respect to tangible property located in Malawi and interests in companies incorporated in Malawi.

Notes

1. In the case of a mining company, an additional resource rent tax of 10% is levied on profits after tax if the company’s rate of return exceeds 20%. The basis for calculating rate of return has not been defined.
2. Agricultural produce processing and power generation are designated as priority industries.

Non-resident tax

Non-resident tax is payable on income due to a non-resident at the rate of 15% of the gross income.

Any income payable to a person who is not resident in Malawi (i.e. who has not been in Malawi for an aggregate period of 183 days) arising from a source within Malawi is liable to a final WHT of 15% of the gross of such income. Non-resident tax is applicable where the recipient of the income does not have a PE in Malawi from which the income emanated.

Non-resident tax may not be withheld on income of residents of countries that have a standing double tax agreement (DTA) with Malawi, subject to the provisions of the specific DTAs. For details of applicable WHT rates, see the Withholding taxes section.

Currently, the following countries have a DTA with Malawi: Denmark, France, Norway, South Africa, Sweden, Switzerland, and the United Kingdom.

Local income taxes

There are no local income taxes in Malawi.

Corporate residence

A corporate entity is considered a resident for tax purposes in Malawi if it has a PE in Malawi.

Permanent establishment (PE)

The Taxation Act defines a PE as ‘an office or other fixed place of business through which business activity is carried on’. This short definition is wide in scope. Care must be exercised when considering this definition in situations that may be affected by a DTA. Each DTA contains a specific and far more detailed definition of what constitutes a PE.

Other taxes

Value-added tax (VAT)

VAT is applicable on taxable goods and services. There are three classes of supplies for VAT: taxable supplies (at the rate of 16.5%), zero-rated supplies, and exempt supplies.

A taxable person can claim input VAT on inputs used in making taxable supplies.

A taxable person should complete VAT returns and make VAT payment, where applicable, on a monthly basis within 25 days after the end of the month.

Zero-rated supplies include exercise books, fertilisers, motor vehicles for the transport of goods, and salt.
The following supplies are tax exempt: machinery, financial services, bread, and newspapers.

**Customs duties**
Customs duty is applicable on goods imported into Malawi. The basis for calculating duty is cost, insurance, and freight (CIF). There are three types of import duties: customs duty, import excise, and import VAT. The rate of custom duty varies from product to product.

The following are the customs and excise measures that are effective in Malawi:

- Returning residents will have to clear, duty free, a motor vehicle owned for more than 12 months under CPC 430.
- Duty free on importation of diagnostic and laboratory reagent under CPC 405 by Health Institutions.
- Removal of VAT on imported goods on water supply.
- Removal of duty on imported electronic fiscal devices.
- Removal of taxes applicable on large buses with seating capacity of more than 45 passengers (including the driver).
- Reintroduction of the Industrial Rebate System. This is a major relief to the manufacturing sector; however, given the abuse of the scheme in the past and the Minister's intimation, it will be subject to serious monitoring by the Malawi Revenue Authority (MRA). Taxpayers will be required to register with the MRA.
- Other measures are in alignment with the Common Market for Eastern and South Africa (COMESA) and South African Development Community (SADC) tariff structures.

**Excise duties**
Domestic excise is chargeable on certain goods manufactured in Malawi and on certain services, such as alcoholic drinks, tobacco, and cell phone airtime. The rate of excise varies depending on the goods and services.

**Tobacco levy**
Buyers of tobacco must pay a levy of 0.2% for every kilogram of tobacco bought.

**Property taxes**
There are no property taxes in Malawi.

**Transfer taxes**
There are no transfer taxes in Malawi.

**Stamp duties**
Stamp duties apply on certain documentation.

**Turnover tax**
Turnover tax is applicable for businesses with a turnover between 2 million Malawian kwachas (MWK) and MWK 6 million. The turnover tax rate is 2% of turnover.

**Resource rent tax for miners**
Miners pay resource rent tax of 10% on after-tax profits if the rate of return exceeds 20%. Since introduction of this tax, there has not been clear administrative guidance on its applicability, like a formula for the determination of the tax.

**Payroll taxes**
Under pay-as-you-earn (PAYE) regulations, the employer is required to withhold tax from employees’ salaries and remit to the tax authority on their behalf. There are penalties for non-compliance with the regulatory requirements.
Social security contributions
Under the National Pension Scheme (NPS), an employee contributes a minimum of 5% of the pensionable emoluments while the employer contributes at least 10% of the employee’s pensionable emoluments. Contributions by the employer are tax deductible up to a maximum of 15% of the employee’s pensionable emoluments while those made by the employee are not.

Fringe benefits tax (FBT)
A fringe benefit is defined as any asset, service, or other benefit in kind provided by or on behalf of an employer to an employee if such benefit includes an element of personal benefit to the employee. The employer providing such benefits is liable for payment of FBT. FBT is charged at the rate of 30% of the taxable figure.

Take note that a benefit need not be wholly for personal use in order to be considered for FBT.

Note as well that no benefit in cash, no matter what it is termed as, can be treated as a fringe benefit. All monies paid in cash (rather than in kind) should be considered for PAYE deduction.

However, subsistence allowances, given to employees working out of their duty station for instance, presumably to cater wholly, exclusively, and necessarily for their needs, such as accommodation, meals, transport, etc., ought not be taxed. This applies also for reimbursement of expenses incurred in business.

Every employer shall register for FBT within the month in which one begins to provide fringe benefits.

The sums due as FBT shall be remitted to the MRA in quarterly instalments not later than 14 days after the end of each quarter of a period of 12 months ending 30 June, and remittance should be accompanied with a duly completed FBT return in Form FBT 2.

Note that the value for FBT should not be included in the employee’s certificate of gross emoluments.

Assessment of housing fringe benefits
The taxable value of a housing fringe benefit is the greatest of (i) 10% of salary where the house is unfurnished, (ii) 12% of salary if furnished, or (iii) the rental value.

Where the house occupied by the employee is owned by the employer, the taxable value is reduced by 50%.

Motor vehicles
FBT is applicable on motor vehicles allocated for use by members of staff and does not include pool cars or cars that are strictly commercial in nature.

The taxable value is 15% of the original cost of the vehicle.

School fees (for children/dependants)
50% of the cost to the employer for school fees is a taxable benefit, where payment is made directly to the educational institution. Education allowances payable to employees are not subject to FBT as the allowance is considered part of normal salary and taxable as such.

Utilities, household items, vacations, travel, and domestic services
The taxable value of utilities (e.g. electricity, water, and telephone expenses), household items, vacations, travel, and domestic services (e.g. gardener, cook, house boy, guard, nanny) is the entire cost to the employer. Except that for a house owned by the employer,
the cost of a gardener, security guard, and watchman shall not constitute a taxable benefit.

**Interest free loans and loans given at interest lower than the commercial rate**
Where an employer gives a loan to an employee that is interest free or bears interest that is lower than the predetermined commercial rate, the difference between the interest offered and the commercial rate is a taxable benefit.

---

**Branch income**

There is a 35% tax on taxable income of a branch of a foreign company.

No dividend WHT is applicable on repatriation of profits.

---

**Income determination**

**Inventory valuation**
Inventory is stated at cost or net realisable value (i.e. market price) for tax purposes. There is no specific requirement for the valuation of cost. The only legal emphasis is consistency in the application of the selected method. This means that one cannot change from one valuation method to another over different tax periods.

**Capital gains**
The tax basis for capital gains is the cost of the asset adjusted by the applicable consumer price index (inflation index). Once determined, the taxable gain is subject to corporate tax at the rate applicable to the particular entity.

Capital gains arising from the disposal of personal and domestic assets not used in connection with trade are exempt from corporate tax.

Capital gains arising from the sale of shares held for more than one year traded on the Malawi Stock Exchange are not taxable.

**Rollover relief**
If a business asset is sold and the taxpayer acquires a qualifying replacement asset, the taxpayer may claim rollover relief. This means that the taxpayer does not immediately pay the tax on the gain. Instead, the cost of the replacement asset is reduced by the amount of the gain. The taxpayer must declare this in the tax return.

A qualifying replacement asset is an asset similar to, or related in service or use to, the asset disposed of. The replacement asset must be acquired within 18 months of the disposal giving rise to the gain.

**Dividend income**
Dividend income is exempt from corporate tax; however, dividends received from Malawi sources are subject to a 10% dividend WHT, which is a final tax. Note that although the word 'final' has not been defined, it is applied as meaning that dividend WHT suffered may not be offset against an income tax liability.

**Interest income**
Interest is added to the other income categories and taxed at a rate applicable to the person that earns the income. There is a mandatory WHT on interest earned from financial institutions unless the earner is exempted.

Effective 1 July 2015, there is deemed interest on any interest-free loans and balances. The deemed interest is taxable income to the lender.
Foreign exchange gains and losses
Foreign exchange gains realised on foreign currency assets or liabilities are taxable.

Foreign exchange losses realised on foreign currency assets or liabilities are tax deductible.

Unrealised gains and losses are carried forward until realised and then included in income or allowable expenditures. The maintenance of records that accurately track unrealised exchange rate adjustments from year to year is necessary to ensure correct tax computations.

Tax-exempt income
The following are common examples of other tax-exempt income:

- The income of agricultural, mining, and commercial institutions or societies not operating for private pecuniary profit or gain of the members.
- The income of clubs, societies, and associations formed, organised, and operated solely or principally for social welfare or civic improvement or other similar purpose, provided that the income of such bodies may not be divided among or used for the benefit of the members or shareholders.
- The income of ecclesiastical, charitable, and educational institutions of a public character.

Foreign income
Generally, income whose source is not Malawi is not taxable in Malawi.

Deductions
Taxable income is calculated by deducting allowable items from assessable income. Section 28 of the Taxation Act defines tax-allowable deductions as any expenditures and losses (not being of a capital nature) wholly, exclusively, and necessarily incurred by the taxpayer for the purpose of trade or in the production of income.

Capital allowances
Capital allowances (i.e. depreciation allowances) are applicable as stipulated in the Taxation Act at various rates.

Capital allowances, which are available to companies and individuals in business, are allowed as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Allowances (%)</th>

</tbody>
</table>

Notes
1. The 100% investment allowance is available only on new and unused qualifying assets, as indicated above, belonging to and used by a manufacturer or farmer. The rate for used qualifying assets is 40%. The investment allowance is claimable only in the first year of use.
2. Where an investment allowance is claimed, the initial allowance is not allowed to be claimed on the same asset. The initial allowance is claimable only in the first year of use.
3. Annual allowances at the above rates are based on cost less investment and initial and annual allowances previously granted.

4. Investment allowance on plant and machinery excludes motor vehicles intended or adapted for use on roads.

5. A 20% annual allowance is standard, but the Commissioner General may vary the amount.

6. No initial allowance is granted on private motor vehicles. These include saloons, sedans, station wagons, and double cabin pickups. However, the restriction does not apply where the motor vehicle is used for hiring purposes.

7. The building must be newly constructed at a cost of no less than MWK 100 million.

On disposal, assets are subject to balancing charges (capital gains) or balancing allowances.

If an asset is subject to extensive use, such as machinery working double shifts, so that its expected economic life is reduced, the Commissioner General may agree to increase the rates of annual allowances.

**Lease, patent, trademark, and copyright premium**

The tax-deductible amount of a premium paid for the right of use or occupation of land or buildings, plant or machinery, patent design, trademark, copyright, or any other property of a similar nature is one of the following:

- The amount of premium or consideration divided by the number of years for which the right of occupation or use is granted.
- Where the period for which the right of occupation or use is granted exceeds 25 years, the deduction is one-twenty-fifth of the premium or consideration.

The premium is tax deductible only where the asset or right with respect to which the premium or consideration is paid is used for the generation of income. If a taxpayer acquires ownership of the asset or right, no further deduction of the premium or consideration is allowed from the date ownership is acquired.

**Goodwill**

The legislation does not prescribe treatment for goodwill. It has been the practice that goodwill is not deductible for tax purposes.

**Pre-operating expenditures**

A manufacturer may claim as a deduction any expenditure incurred in the course of establishing the business, provided that the following are true:

- The expenditure was incurred not more than 18 months before commencing business.
- The expenditure would have been allowed as a deduction if it had been incurred after commencing business.

**Interest expenses**

Interest that arises out of financing operations is allowable, while interest due to late payment of a debt is not allowable.

**Bad debt**

Specific bad debts are tax deductible and taxable in the following year. Bad debts written off are allowable and taxable upon eventual recovery.

**Charitable contributions**

Donations to approved charities and approved non-profit institutions formed for the purpose of social welfare, civic improvement, educational development, or other similar purposes are deductible. The minimum individual donation allowable is MWK 500. The minimum donation for other approved charities is MWK 250. In both cases, there is no maximum donation.
Social contributions
50% of social contributions towards construction of hospitals and schools, and sponsorship of school sports activities, are tax deductible.

Research and development (R&D) expenditures
Research expenditures are fully allowable as a deduction if they are for ‘experiments and research relating to trade’.

Pension contributions
The tax-allowable amount of ordinary pension contributions made by an employer to an approved pension fund is subject to limitations. The limit with respect to each employee is the lowest of one of the following per annum:

- The actual contribution.
- Up to 15% of employee’s annual salary.

Fines and penalties
Fines and penalties are not tax deductible in any way.

Taxes
Taxes are not allowed as deductible expenses, except where they are local taxes.

Net operating losses
Current taxable income may be offset against net operating losses brought forward, and current operating losses may be increased by net unexhausted trading losses brought forward. Losses may be carried forward for six years. Net operating losses may not be carried back.

Payments to foreign affiliates
A deduction is allowed for payments to foreign affiliates if such payments are expended wholly, exclusively, and necessarily for the production of income or for the purposes of trade, and it can be demonstrated that the transaction is at arm’s length.

Group taxation
Group taxation is not permitted in Malawi.

Transfer pricing
There are transfer pricing regulations in Malawi. There is also a tax anti-avoidance provision that is used to check transactions between related parties. If transactions between related parties result in profits that are lower than what would be expected if the company was trading with an independent party, then the tax authorities can challenge the transaction.

Thin capitalisation
Effective 1 July 2015, thin capitalisation has been introduced in Malawi. However, the rules and regulations governing thin capitalisation have not been enacted. The acceptable level of gearing is therefore not yet provided.

Consequently, there are no restrictions on the level of external borrowings. If a Malawi company wants to borrow money from a foreign entity (whether or not a bank), it will require exchange control approval. In such instances, Reserve Bank does not consider the debt-to-equity ratio. It looks at the terms and conditions to see that they are what would be commonly available on the open market between unrelated parties. As you can see, this is an anti-transfer pricing measure.
If a new application is made for exchange control approval of foreign ownership (normally this is when there is a new business/investment into Malawi), Reserve Bank will look at the external-debt-to-local-equity ratio. There are no fixed rules, but Reserve Bank does not normally like external debt to be more than twice equity (i.e. 1:2 equity to external debt). It does give approval for external ownership where the proportion of external debt is higher than this as it looks at each proposal on its own merit. The applicant would have to justify the higher level of external debt in such a case.

**Controlled foreign companies (CFCs)**

There is no CFC regime in Malawi.

---

**Tax credits and incentives**

---

**Foreign tax credit**

Malawi does not have a provision for recognition of a foreign tax credit because the taxation regime is based on source.

**Export allowances**

Exporters, including those manufacturing in bond, are entitled to claim additional tax allowances for non-traditional exports:

- On the export of non-traditional products, there is a 25% tax allowance on taxable income derived from exports.
- There is a 25% transport tax allowance on international transport costs for non-traditional exports. Traditional exports are tea, coffee, cane sugar, and unmanufactured tobacco and tobacco refuse.

Export allowances may not be claimed in respect of exports from mining operations.

**Investment allowance**

There is a 100% investment allowance on new and unused industrial buildings, plant, and machinery for taxpayers in the manufacturing industry. A 40% investment allowance for used versions of the same items is also applicable.

**Farming operations**

Farming operations receive a 100% allowance with respect to expenditures incurred during any year of assessment on the following:

- Stumping, levelling, and clearing of land.
- Work in connection with the prevention of soil erosion.
- Boreholes.
- Wells.
- Aerial and geophysical surveys.
- Water control work, including any canal, channel, dyke, furrow, and any flood control structure, whether or not of a permanent nature.
- Water conservation work, meaning any reservoir, water dam, or embankment constructed for the impounding of water. In the case of water conservation work, the Taxation Act limits the amount deductible to amounts actually paid, where the farmer incurs a liability in terms of any law relating to natural resources.

Where a farmer derives taxable income from growing timber, the farmer may elect that the taxable income is determined in accordance with the following rules:

- Carryforward the cost of planting the timber until the timber reaches maturity.
- Add annually to the cost of planting the timber an amount calculated as 5% of the cost of planting the timber until the timber reaches maturity.
When the timber is sold, a proportionate amount of the total of the carryforward cost and annual added cost is deducted from the proceeds.

In each year of assessment, the annual added cost is treated as taxable income in the hands of the farmer.

A farmer may not deduct any expenditure that has been recovered through a subsidy or claim a capital allowance on any assets where the expenditure has been recovered through a subsidy.

**Mining operations**

Mining operations receive a 100% allowance with respect to mining expenditures incurred during any year of assessment. Mining expenditures are defined as capital expenditures incurred in Malawi by a person carrying on or about to carry on mining operations in Malawi:

- In searching for or in discovering and testing or in winning access to deposits of minerals.
- In the acquisition of or of rights in or over such deposits, other than the acquisition from a person who has carried on mining operations in relation to such deposits.
- In the provision of plant and machinery and industrial buildings that would have little or no value to such person if the mine ceased to work.
- On the construction of any buildings or works that would have little or no value if the mine ceased to be worked.
- On development, general administration, and management prior to the commencement of mining operations.

Persons engaged in mining operations are not entitled to claim the export tax allowance on non-traditional exports or the 15% transport tax allowance on international transport costs for non-traditional exports.

**Withholding taxes**

**Dividend WHT**

Dividend WHT is a final tax and is charged at 10%. The dividend is not included in the taxpayer’s taxable income, and the WHT is not deducted from the taxpayer’s tax liability.

**Resident WHT rates**

Notes

1. See Non-resident tax in the Taxes on corporate income section.

WHT exemption

There is WHT exemption on local supplies for compliant resident taxpayers. A ‘compliant taxpayer’ is defined as one that has settled all their tax liabilities with the tax authorities, including customs and excise.

Tax administration

Taxable period

The taxable period for income tax is a 12-month period ending on 30 June of each year. For businesses whose year-end is 31 July and 31 August, the applicable tax year-end is the preceding 30 June, while all the years ending in the subsequent months have the following 30 June as a year-end.

Tax returns

Income tax returns are due within 180 days after the end of the financial year.

Payment of tax

Tax is payable in quarterly instalments within 25 days of the month following the end of the quarter, with the balance of the tax being paid upon submission of the return.

Penalties and interest

The penalty for late submission of returns is MWK 200,000.

Interest on outstanding tax liability is charged at the commercial lending rate plus 5% per annum.

Tax audit process

The target for the tax authorities is to audit 30% of the taxpayers in any fiscal year. This translates to approximately three years per audit cycle.

Statute of limitations

There is no statute of limitations in Malawi, except for the mandatory seven-year period for keeping records.

Topics of focus for tax authorities

The tax authorities have recently focussed on transfer pricing and have consequently established a unit responsible for this. All multinationals are under scrutiny to check if they are dealing at arm’s length with related entities.
**Commissioner General’s power to increase taxable income**

The Commissioner General is empowered to increase the taxable income and liability of a taxpayer when of the opinion that the main purpose or one of the main purposes of a transaction was the avoidance or reduction of tax or where the main benefit that might have been expected to accrue from a transaction was the avoidance or reduction of tax.
**Significant developments**

The conclusion of the negotiations on the India-Mauritius double taxation treaty (DTT) and the signing of the Protocol has ended an era of uncertainty. Investors have been re-assured of their tax positions for investments made prior to 1 April 2017, as these will remain exempt in India irrespective of when these are being disposed of.

The taxability of gains in India, as amended under the Protocol, applies only to shares, and it would appear that investments in mutual funds, derivatives, and debt instruments will not be impacted and will continue to be exempt from tax in India.

The effect of the Protocol on other jurisdictions that investors have traditionally used for investing into India cannot be ignored. For example, the exemption from tax on the sale of shares under the India-Singapore DTT Protocol is also likely to be void as this provision is specifically linked to the India-Mauritius DTT.

Overall, the Protocol has set new challenges around investing into India and may ultimately affect returns from investments. However, the reduced withholding tax (WHT) of 7.5% on interest payments may present new opportunities for Mauritius, as this is the lowest rate under any DTT that India has signed.

**Taxes on corporate income**

A corporation resident in Mauritius is subject to tax on its worldwide income. A non-resident corporation is liable to tax on any Mauritius-source income, subject to any applicable tax treaty provisions.

Corporations are liable to income tax on their net income, currently at a flat rate of 15%.

Mauritius has a credit system of taxation whereby foreign tax credit is given on any foreign-source income declared in Mauritius on which foreign tax of similar character to Mauritian tax has been imposed.

All corporate bodies incorporated in Mauritius (except companies holding a Category 2 Global Business Licence and certain approved funds and associations) are subject to income tax. This applies to all associations and other registered bodies. Income derived by local partnerships is shared and taxed in the hands of the partners. Foreign corporations carrying on business, or having a place of business, in Mauritius are also liable to income tax on income derived from Mauritius. Resident sociétés are not liable to corporate tax.

*Société* means a *société* formed under any enactment in Mauritius and includes:

- a *société de fait* or a *société en participation*
- a limited partnership
• a joint venture, and
• a société or partnership formed under the law of a foreign country.

Income tax is payable on total net income before distribution at the following rates:

<table>
<thead>
<tr>
<th>Entity</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Global Business Category 1 (GBC1) companies and offshore trusts (see below)</td>
<td>15</td>
</tr>
<tr>
<td>Freeport operators or Private Freeport Developers carrying on Freeport activities other than providing goods and services on local markets</td>
<td>Exempt</td>
</tr>
<tr>
<td>Global Business Category 2 (GBC2) companies (see below)</td>
<td>Exempt</td>
</tr>
<tr>
<td>All other companies</td>
<td>15</td>
</tr>
</tbody>
</table>

Global Business Category 1 (GBC1) companies are liable to tax at the rate of 15%. However, they are entitled to a foreign tax credit equivalent to the higher of 80% of the Mauritius tax chargeable or the actual tax suffered abroad in respect of foreign-source income. The maximum effective tax rate is therefore 3%.

Global Business Category 2 (GBC2) companies incorporated under the laws of Mauritius are exempt from income tax and are not tax residents for treaty purposes. For more information, see the Tax credits and incentives section.

**Alternative minimum tax (AMT)**
AMT is repealed as of 1 July 2015.

**Special levies**

**Banks**
All banks are required to pay a special levy calculated according to their book profit and their operating income derived during, or its chargeable income in respect of, the preceding year. ‘Operating income’ means the sum of net interest income and other income before deducting non-interest expense.

The rates of the special levy on banks are as follows:

<table>
<thead>
<tr>
<th>Year of assessment commencing</th>
<th>Rates</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 July 2015, 1 July 2016, and 1 July 2017</td>
<td>Segment A: 10% of chargeable income; Segment B: 3.4% on book profit; 1.0% on operating income</td>
</tr>
</tbody>
</table>

Segment A: Banking transactions with residents.
Segment B: Banking transactions with non-residents and corporations holding a Global Business Licence.

Except where the levy is computed on chargeable income, no levy shall be paid in a year where in the preceding year:

• the bank incurred a loss, or
• the book profit of the bank did not exceed 5% of its operating income.

**Telephony service providers**
Providers of public fixed or mobile telecommunication networks and services (including information and communication services, such as value added services and mobile internet), commonly known as ‘operators’, are liable to a solidarity levy. The solidarity levy is calculated according to the book profit and turnover for the preceding income year of the operator. The applicable rates are as follows:
Mauritius

Years of assessment commencing 1 July 2015, 1 July 2016, and 1 July 2017: 5% of the book profit and 1.5% of the turnover of the operator.

‘Book profit’ means the profit derived by an operator from all its activities and computed in accordance with International Financial Reporting Standards (IFRS).

No levy is to be paid in a year where, in the preceding year, the operator incurred a loss or the book profit of the operator did not exceed 5% of its turnover.

**Corporate Social Responsibility (CSR) Fund**

Every year, a company has to set up a CSR Fund equivalent to 2% of its chargeable income of the preceding year to implement a CSR Programme in accordance with its own CSR framework.

Note that the following entities are not subject to the CSR regulations:

- A company holding a GBC1 Licence under the Financial Services Act.
- A bank holding a banking licence under the Banking Act, in respect of its income derived from its banking transactions with non-residents or with corporations holding a Global Business Licence under the Financial Services Act.
- An Integrated Resort Scheme (IRS) company referred to in the Investment Promotion (Real Estate Development Scheme) Regulations 2007.
- A non-resident società, a foundation, a trust, or a trustee of a unit trust scheme.

The CSR Fund is either disbursed by the company on its own CSR framework or remitted to the Mauritius Revenue Authority (MRA) if not expensed fully.

A company has to submit, as an annex to its return of income, a statement showing the amount of CSR spent and the details of CSR projects implemented by the company during the income year.

Please also note the following:

- Any amount underpaid (not exceeding 20% of the Fund provided) in respect of a year can be carried forward to the following year to form a part of the CSR Fund for that following year, and the remaining amount should be remitted to the MRA.
- Any amount overpaid compared to the amount provided can be carried forward (in an amount not exceeding 20% of the amount provided) and offset in equal instalments against any amount to be remitted in respect of the five succeeding years. The carryforward does not apply to any excess arising in respect of more than two consecutive years.
- The CSR Fund in respect of a year includes any amount brought forward to that year.
- The CSR Fund shall apply in all respects to a resident società, other than a resident società holding a Global Business Licence under the Financial Services Act, and its net income shall be deemed to be its chargeable income and any distribution of its net income shall, for the purposes of the CSR Fund, be deemed to be dividends.

**Local income taxes**

Local income taxes levied by local administration, such as urban councils, do not exist in Mauritius.

**Corporate residence**

Under domestic law, a company is resident in Mauritius for tax purposes if it is incorporated in Mauritius or centrally managed or controlled in Mauritius.
A company not incorporated in Mauritius is resident in Mauritius only if it is centrally managed and controlled in Mauritius.

In the absence of a tax treaty, any income derived from the following is taxed in Mauritius:

- Any business carried on wholly or partly in Mauritius.
- Any contract wholly or partly performed in Mauritius.

A GBC2 company is not considered a resident in Mauritius for the purposes of DTTs.

Under a tax treaty, a company is considered a resident in Mauritius if it is incorporated in Mauritius or if its effective management is in Mauritius.

**Permanent establishment (PE)**

Generally, a PE is created under a tax treaty if one of the following criteria is met:

- Branch, office, factory, workshop, or installation used for extraction of natural resources.
- Building site, construction, installation, assembly, or supervisory services where the activity on the site lasts for a minimum of six months or 12 months, depending on the tax treaty.

**Other taxes**

**Value-added tax (VAT)**

VAT is charged by VAT-registered entities at the standard rate of 15% on all goods and services supplied by them in Mauritius (except those taxed at 0%), other than the following exempt supplies (not an exhaustive list):

- Bread, wheat, and cereal flours (excluding wheat flour).
- Medical, hospital, and dental services, including clinical laboratory services, services provided in a health institution, and veterinary services.
- Educational and training services provided by institutions approved by the Mauritius Qualification Authority.
- Construction of building for residential purpose, provided letter of intent relating to an IRS was issued prior to 1 October 2006.
- Sale or transfer of an immovable property, a building or part of a building, apartment, flat, or tenement.
- Banking services, except:
  - services provided to merchants accepting credit/debit card
  - services in respect of safe deposit locker, and issue and renewal of credit/debit cards
  - services for keeping and maintaining customer’s accounts, and
  - services supplied by a bank holding a banking licence under Banking Act 2004 in respect of its banking transactions with non-residents and corporations holding a Global Business Licence.

As of 1 July 2015, an entity should register for VAT if turnover exceeds 6 million Mauritian rupees (MUR) a year. However, certain service providers (e.g. accountants and auditors, attorneys and solicitors, consultants, surveyors, valuers) should register for VAT irrespective of their turnover.

VAT-registered persons with annual taxable turnover exceeding MUR 10 million should submit their VAT return monthly and electronically by the end of the month following the end of the taxable month. Otherwise, VAT return filing is completed quarterly (i.e. within 20 days following the end of a taxable quarter). The taxable quarter is a period of...
Mauritius

three months ending at the end of March, June, September, or December. Also, where the VAT-registered persons are filing pay-as-you-earn (PAYE) returns electronically under the Income Tax Act (ITA), they are required to file the VAT returns electronically by the end of the month following the taxable period.

**Customs duties**

Customs duty is levied on commodities imported into Mauritius. The rate of duty applicable is the rate in force under the Customs Tariff Act at the time the bill of entry is validated at the Customs.

A number of exemptions and concessions are available to industries, organisations, and persons under the Customs Tariff Act.

**Excise taxes**

An excise duty is levied at the time of importation on selected commodities, which includes spirits, vehicles, and petroleum products at corresponding prescribed rates. A levy is also chargeable on some specified excisable goods, whether the goods are for home consumption or not, at corresponding prescribed rates.

**Campement site tax**

Per the Land (Duties and Taxes) Act, every owner of a campement site situated in a specified zone is subject to an annual tax known as the campement site tax, varying between MUR 2 to MUR 6 per square metre.

The tax shall be payable to the authorised officer on or before 31 July in every year.

**Land transfer tax**

Per the Land (Duties and Taxes) Act, land transfer tax is levied on the transfer of land (excluding the value of any building thereon) and is payable by the transferor at the rate of 5%.

Land transfer tax is also payable at the above rates by the transferor upon transfer of the shares of a company owning immovable properties, based on the value of shares or property, whichever is the lower.

**Leasehold tax**

Per the Land (Duties and Taxes) Act, leasehold tax is levied on the registration of a deed of transfer of leasehold rights in state land. Both the lessor and the lessee are liable to leasehold tax (in equal proportion) at the rate of 20% on the open market value of the leasehold right at the time of transfer.

**Registration duty**

The Registration Duty Act provides for a duty at an effective rate of 5% of the sum of money paid as a condition of an exchange of immovable property, or a division in kind of immovable property, where such sum does not exceed MUR 100,000.

The transfer of shares of a company other than those listed on the Stock Exchange of Mauritius or traded on the secondary market is subject to registration duty if the company holds immovable property.

The following transactions are not subject to registration duty:

- A transfer of immovable property from ascendant to descendant (or vice versa).
- A transfer of property made to a company holding a letter of approval for the implementation of a project under the Real Estate Development Scheme, provided that the transferor holds shares in the company equivalent to at least the value of the land transferred.
• A transfer of immovable property or shares between companies forming part of a group of companies, as defined in the Companies Act 2001.
• A transfer of immovable property where such transfer takes place between companies having the same shareholders for the sole purpose of merging.

**Stamp duty**
Stamp duty is levied and paid to the Registrar General on every document at the time of registration, transcription, inscription, or erasure of inscription. Stamp duty varies from MUR 25 to MUR 1,000.

**Payroll taxes**
Every employer has to register with the MRA as an employer and has to withhold income tax from the emolument of the employee at the time the emolument is made available to the employee.

The employer has to remit the amount withheld within 20 days from the end of the month in which the tax was withheld. Where the employer has 25 or more employees, the PAYE return and tax withheld should be remitted electronically. In cases where the employer has less than 25 employees, the PAYE return and tax withheld may be remitted electronically.

Failure to comply with the above entails a penalty of 5% of the unpaid tax and an interest of 1% per month or part of the month during which the tax remained unpaid.

**Social security contributions**

**National Pensions Fund (NPF)**
Contributions to the NPF are payable by the employer at 6% of cash remuneration, up to a maximum remuneration of MUR 15,710 per month. Employees contributed to the NPF at 3%, subject to a maximum amount of MUR 471 per month.

**National Savings Fund (NSF)**
Employers are required to contribute 2.5% of remuneration to the NSF, subject to a maximum of MUR 393 per month per employee, and to pay a monthly levy of 1.5% of basic salaries and wages of every employee. Employees are required to pay a 1% levy, subject to a maximum amount of MUR 157 per month.

**Branch income**
Tax rates on branch income are the same as on corporate profits. No tax is withheld on the remittance of profits by way of dividend to a head office.

**Income determination**

**Inventory valuation**
Inventories should be valued at the lower of historical cost or net realisable value. The last in first out (LIFO) basis of valuation is not allowed for tax purposes.

Conformity is required between book and tax reporting. Where the MRA is not satisfied that the basis of valuation is acceptable (e.g. where the LIFO basis has been applied), it will make such adjustment as it believes is appropriate to determine the profits arising from the business carried on.

**Capital gains**
There is no tax on capital gains in Mauritius. However, certain transactions are taxed as ordinary business profit instead of capital gains. Where a transaction is in the nature of
Mauritius

trade, the MRA may take the view that it is an ordinary trading transaction and assess the gains derived as income.

Any gains derived from the sale of shares held for less than six months are classified as trading income and are therefore taxed as ordinary income.

Gains realised from the sale of any property or interest in property acquired in the course of a business, as part of a profit-making undertaking or scheme, are taxable as ordinary income.

**Dividend income**
Companies, whether resident or not, are exempt from tax on dividends received from resident companies.

Dividend income received from abroad by a company resident in Mauritius (non-GBC1 company) is subject to tax at the rate of 15%. Credit for any foreign tax withheld is given, subject to documentary evidence provided to the MRA.

Dividend income received from abroad by a GBC1 company is subject to tax at an effective rate of 3%.

**Stock dividends**
A resident company can distribute stock dividends (bonus shares) proportionately to all of its shareholders. Stock dividends *per se* or convertible into cash are not taxable in the hands of the recipient. Dividends in kind (i.e. other than cash or shares) are treated as taxable benefits.

**Interest income**
Interest income received by resident companies (non-GBC1 companies) is liable to tax at the rate of 15%.

A GBC1 company receiving interest income from abroad is liable to tax at the effective rate of 3%.

Interest income paid by any person, other than by banks or non-bank deposit-taking institutions under the Banking Act, to individuals and non-residents is liable to WHT at the rate of 15% (final tax).

**Foreign income**
Resident corporations are taxed on their worldwide income, but tax credit and treaty relief is generally available in order to avoid double taxation (see Foreign tax credits in the Tax credits and incentives section for more information).

Undistributed income of foreign subsidiaries is not subject to any special taxation as long as the income of the foreign subsidiary before distribution is not included in the accounts of the local parent company. Dividends paid by the foreign subsidiary to the local parent company will, however, be taxable to the latter, whether or not such dividends are actually received in Mauritius.

**Deductions**

**Depreciation**
Annual allowance rates vary between 5% and 100% of base value (unless stated otherwise), as per the following table:
### Capital expenditure incurred on

<table>
<thead>
<tr>
<th>Base value</th>
<th>Cost</th>
<th>Percentage of Base value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial premises, excluding hotels</td>
<td>5</td>
<td></td>
</tr>
<tr>
<td>Industrial premises dedicated to manufacturing</td>
<td>30</td>
<td></td>
</tr>
<tr>
<td>Commercial premises</td>
<td>5</td>
<td></td>
</tr>
<tr>
<td>Hotels</td>
<td>30</td>
<td></td>
</tr>
</tbody>
</table>

#### Plant or machinery:

<table>
<thead>
<tr>
<th>Base value</th>
<th>Cost</th>
<th>Percentage of Base value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Costing MUR 50,000 or less</td>
<td>100</td>
<td></td>
</tr>
<tr>
<td>Costing more than MUR 50,000:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Ships or aircraft</td>
<td>20</td>
<td></td>
</tr>
<tr>
<td>Aircraft and aircraft simulators leased by a company engaged in aircraft leasing</td>
<td>100</td>

<td>15</td>
<td></td>
</tr>
<tr>
<td>Acquisition or improvement of any other item of a capital nature that is subject to depreciation under the normal accounting principles</td>
<td>5</td>
<td></td>
</tr>
</tbody>
</table>

Tax depreciation need not conform to book depreciation. Depreciation is generally recaptured on disposal or sale when balancing charges or allowances are computed.

**Goodwill**

Goodwill amortised under normal accounting principles is not allowed as an expense for tax purposes. However, the cost amount can be capitalised, and an annual allowance of 5% of cost can be claimed.

**Leasing agreements**

There has been a substantial increase in leasing activity over the last decade. Where an asset is transferred under a financial lease agreement, the lessee is entitled to capital allowances on the value of the asset, including finance charges, as if it was an outright sale by the lessor.

On the other hand, the lessor cannot capitalise the leased assets in its books, and no capital allowance is claimed on the assets leased. However, the lessor is taxable on the interest income derived from the assets leased.

There are no special rules for operating leases.

**Set-up costs**

Set-up costs are not deductible for tax purposes as they are considered as pre-operational expenses.

**Interest expenses**

Expenditure incurred on interest is deductible, provided it is incurred in respect of capital employed exclusively in the production of income.

A request can be made by the tax authorities to support any claim made in respect of interest expense by a certificate from a qualified auditor certifying that the amount of
Mauritius

Interest claimed has been incurred on capital employed exclusively in the production of gross income.

Interest paid by a GBC1 company to a non-resident is exempt from corporate tax.

The tax authorities may refuse to allow a deduction on expenditure incurred as interest where it is found that:

- the interest is payable to a non-resident who is not chargeable to tax on the amount of the interest, or
- the interest is not likely to be paid in cash within a reasonable time.

**Bad debt**
A provision for bad or doubtful debt is generally not deductible unless a court ruling has been obtained against the debtor.

**Charitable contributions**
Donations/gifts, whether to charitable institutions or not, are not deductible for tax purposes.

**Fines and penalties**
Fines and penalties are not deductible for tax purposes as they are expenses not exclusively incurred for the production of gross income.

**Taxes**
Income taxes and foreign taxes paid are not normally deductible; however, some taxes (e.g. municipal taxes relating to buildings, land transfer tax, irrecoverable input VAT) are deductible.

**Other significant items**
A bank or an approved financial institution may claim as deductions any irrecoverable loans due by a company in liquidation in respect of which winding-up procedures have started or by a company in receivership.

**Net operating losses**
Losses made in an accounting year are carried forward for a maximum of five years.

A company may claim to carry forward to an income year any loss it incurred in any former income year, provided the company can demonstrate a 50% continuity of shareholding at the end of those income years. Losses resulting from capital allowances can be carried forward indefinitely. Loss carrybacks are not permitted.

Where a company takes over another company engaged in manufacturing activities, or two or more companies engaged in manufacturing activities merge into one company, any unrelieved loss of the acquiree may be transferred to the acquirer in the income year in which the takeover takes place, on such conditions relating to safeguard of employment as may be approved by the Minister of Finance.

**Payments to foreign affiliates**
Royalties, interest, and service fees payable to foreign affiliates are allowed as expenses, provided they correspond to actual expenses incurred, are reasonable, and do not exceed what would be paid under an arm’s-length agreement. There are certain limitations if the recipient of the interest is not liable to Mauritius tax. Royalties paid to non-residents by GBC1 companies, banks out of their foreign-source income as defined in the ITA, and trusts are tax-exempt.
**Group taxation**

There are no group taxation provisions in the Mauritius tax legislation other than the transfer of losses by tax incentive companies, sugar factory operators, subsidiaries located in the Island of Rodrigues, and manufacturing companies upon their take-over *(see Net operating losses in the Deductions section for more information).*

**Transfer pricing**

Mauritius does not have any specific transfer pricing legislation. However, it does contain an arm’s-length provision requiring transactions between related parties to reflect a commercially objective value, which would be the amount charged for the services were the parties not connected.

**Thin capitalisation**

Mauritius does not have specific thin capitalisation legislation; however, it does have other anti-avoidance provisions as described below:

If a company has issued debentures to each of its shareholders, subject to the number, the nominal value, or paid-up value of the shares in that company, any interest paid on debentures and claimed as a deductible expense may be disallowed and treated as a dividend.

**Controlled foreign companies (CFCs)**

There are no CFC rules under Mauritius tax legislation.

---

**Tax credits and incentives**

**Global Business Category 1 and 2 companies**

A GBC1 company can trade with a Mauritian resident as well as non-residents.

However, any trading with residents should be only incidental to the main operations with non-residents and should be subject to the Financial Services Commission’s (FSC’s) approval.

Transactions made with a Mauritian resident are taxed at the rate of 15%, whereas transactions with non-residents are taxed at an effective tax rate of 3%.

The registration and application of GBC1 companies should be submitted to the FSC through a duly licensed Management Company on a prescribed form accompanied by the following:

- The certified supporting documents.
- The applicable processing fees and relevant fees.

A GBC1 company is tax resident in Mauritius and may apply for a Tax Residence Certificate (TRC) from the Director General of the MRA should this be required by the tax authorities in the jurisdiction in which the company is conducting its business.

Investors may benefit from an extensive network of DTTs. Entities holding a GBC1 Licence wishing to avail to the benefits of a DTT must obtain a TRC issued by the MRA.

A GBC1 company is encouraged to have more substance in Mauritius by ascertaining the following:

- It has at least two directors, resident in Mauritius, of sufficient calibre to exercise independence of mind and judgment.
- It maintains, at all times, its principal bank account in Mauritius.
Mauritius

• It keeps and maintains, at all times, its accounting records at its registered office in Mauritius.
• It prepares, or proposes to prepare, its statutory financial statements and causes or proposes to have such financial statements to be audited in Mauritius.

In addition to the requirements mentioned above, when determining whether a corporation is managed and controlled from Mauritius, the Commission shall also consider whether a corporation meets at least one of the following criteria:

• The corporation has or shall have office premises in Mauritius.
• The corporation employs or shall employ on a full-time basis, at the administrative/technical level, at least one person who shall be resident in Mauritius.
• The corporation's constitution contains a clause whereby all disputes arising out of the constitution shall be resolved by way of arbitration in Mauritius.
• The corporation holds, or is expected to hold, within the next 12 months, assets (excluding cash held in a bank account or shares/interests in another corporation holding a Global Business Licence) that are worth at least 100,000 United States dollars (USD) in Mauritius.
• The corporation's shares are listed on a securities exchange licensed by the Commission.
• The corporation has, or is expected to have, a yearly expenditure in Mauritius that can be reasonably expected from any similar corporation that is controlled and managed from Mauritius.

A GBC1 company can apply for a TRC to show substance in Mauritius. The TRC is generally issued within a period of seven days from the date of application, provided that the person has submitted the return required under the ITA 1995.

A GBC2 company is required to have, at all times, a registered agent in Mauritius. Only a management company shall act as the registered agent of a company holding a GBC2 Licence. A GBC2 company is defined as a resident corporation conducting business outside Mauritius and can engage in activities other than the following:

• Banking.
• Financial services.
• Holding, managing, or otherwise dealing with a collective investment fund or scheme as a professional functionary.
• Providing registered office facilities, nominee services, directorship services, secretarial services, or other services for corporations.
• Providing trusteeship services by way of business.

An applicant for a GBC2 Licence must submit the following forms/documents to the FSC through a management company:

• The application form, duly filled in and signed.
• The certified supporting documents.
• The applicable processing fees and relevant fees.

The fees payable to the FSC for registering a GBC1 and a GBC2 company are as follows:

<table>
<thead>
<tr>
<th>Fee</th>
<th>GBC1 (USD)</th>
<th>GBC2 (USD)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Processing</td>
<td>500</td>
<td>100</td>
</tr>
<tr>
<td>Annual Licensing</td>
<td>1,750</td>
<td></td>
</tr>
</tbody>
</table>

* This amount excludes the annual registration fee of USD 65, or such other fee as the Registrar of Companies may determine, payable to the Registrar of Companies.
The TRC is renewable on an annual basis and issued in two formats, one specific to India and one general for any other country.

A GBC2 company is a limited liability company incorporated in Mauritius. However, GBC2 companies are exempt from Mauritius tax and are not required to file tax returns. GBC2 companies are therefore not able to access the tax treaty network of Mauritius.

**Companies in the Freeport zone**
The income of a Freeport operator derived from Freeport activities is exempt from income tax, except for income that is derived from goods or services provided on the local market.

**Income tax exemption for vessel owners**
Owners of foreign vessels registered in Mauritius are exempt from income tax on income derived from the operation of such vessels, including any income derived from the chartering of such vessels. Owners of local vessels registered in Mauritius are also exempt to the extent that the income is derived from deep-sea international trade only.

**Foreign tax credits**
Generally, double taxation is avoided by means of unilateral credit relief for foreign tax paid. The net amount of foreign income that has borne tax is grossed up at the foreign rate of tax, and the foreign tax paid is allowed as a credit against the Mauritius tax payable. However, the tax credit cannot exceed the Mauritius tax referable to the relevant foreign income. Unused credit is not refunded.

Regarding foreign income derived from countries with which Mauritius has DTTs, a tax credit is given for foreign tax in accordance with the treaties. There are clauses in the DTTs that provide that income arising from certain specified foreign sources is to be exempt from Mauritius tax.

Mauritius has signed DTTs with 43 countries (see the Withholding taxes section for a listing).

The following treaties await ratification: Gabon, Kenya, Nigeria, Russia, and Morocco.

The following treaties await signature: Burkina Faso, Cabo Verde, and Jersey.

The following treaties are being negotiated: Algeria, Canada, Czech Republic, Gibraltar, Greece, Hong Kong, Lesotho, Malawi, Montenegro, North Sudan, Portugal, Republic of Iran, Saudi Arabia, Spain, St. Kitts and Nevis, Tanzania, Vietnam, and Yemen.

A GBC1 company may, in the absence of evidence of payment of foreign tax, claim as tax credit (presumed tax credit) an amount equal to 80% of the Mauritius tax chargeable on the foreign-source income. The presumed tax credit may also be claimed by a bank against the tax payable on income derived from banking transactions with non-residents and with GBC1 and GBC2 companies.

In the case of foreign dividends, the general tax credit includes foreign tax imposed on the profits out of which the dividends are paid (underlying tax), provided that the shareholding in the foreign company is at least 5%.

Mauritius also allows a tax-sparing credit under its local tax legislation.

**Withholding taxes**
There is no WHT in Mauritius for payments made by GBC companies to non-residents not carrying out any business in Mauritius. There is no WHT on dividends received from
resident companies and on payments made by a company having an annual turnover of less than MUR 6 million. The table below shows the rates of WHT applicable for the following payments:

<table>
<thead>
<tr>
<th>Payment</th>
<th>WHT (%)</th>
</tr>
</thead>

Notes

1. The domestic rate of WHT on dividends is 0%. For completeness, the treaty rates that would apply if the domestic rate was higher are provided.
2. Same rate as under domestic law.
3. 10% of the gross amount of the interest if the beneficial owner is a financial institution, an insurance company, or an investment company receiving income from financial investments; 15% in all other cases.
4. 10% of the gross amount of the interest if it is received by any financial institution (including an insurance company); 15% in all other cases.
5. 5% of the gross amount of the royalties received as consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematograph films, tapes, or discs for radio or television broadcasting. 15% is applicable on the gross amount of the royalties in any other case.

**Tax administration**

**Taxable period**
Companies are assessed for a year beginning 1 July and ending 30 June on their income for the preceding year ending 30 June. Where a company closes its accounts at a date other than 30 June, it may elect to adopt as a basis year the accounting year ending in the 12-month period preceding the year of assessment.

**Tax returns**
Every company, both taxpayer and non-taxpayer, must file a return of its income on the basis of the income year preceding the year of assessment. The return must be filed within six months of the financial year-end.

**Payment of tax**
Any tax due should be paid when the return is filed and within the six months deadline.

**Advance Payment System (APS)**
Every company (except non-resident trusts and non-resident partnerships) having gross income exceeding MUR 10 million or that has taxable income is required to submit an APS statement and pay any tax for the quarter immediately following the end of the accounting year.
Mauritius

Tax under APS can be calculated based on the following:

- 25% of taxable income for the accounting year immediately preceding the commencement of that quarter or
- the actual taxable income of the current quarter.

The APS statement shall be filed and tax (if any) shall be payable within three months from the end of the quarter.

Penalties
If timely payment is not made, a penalty representing 5% of the amount of tax due is payable. In addition, interest at the rate of 0.5% of the tax unpaid for each month or part of a month is payable until the tax is paid. A penalty of MUR 2,000 for each month or part of a month is also prescribed for failure to file a return, subject to a maximum of MUR 20,000.

Tax audit process
Tax audits are carried out on a sample basis throughout the year. Generally, the audits are fairly detailed, but more protracted enquiries are carried out into cases where fraud is suspected.

Statute of limitations
While there is no statutory time limit for recovering tax already assessed, the Director General is barred from making an assessment for a period beyond three years preceding the current tax year.

Topics of focus for tax authorities
The MRA pays special attention to the arm's-length nature of any transactions between related parties and evidence of foreign tax suffered predominantly for GBC1 companies in respect of their claim for actual foreign tax credit.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)
On 27 December 2013, the government of the Republic of Mauritius and the government of the United States of America signed an Agreement for the Exchange of Information Relating to Taxes (the Agreement) to set the legal framework to enable exchange of tax information between the two countries. This was followed by the signing of another agreement known as the Inter-Governmental Agreement (Model 1 IGA) to improve international tax compliance and to implement FATCA. Both agreements have been published in the Government Gazette No. 61 of 5 July 2014 as GN 135 of 2014. Both the Agreement and the IGA entered into force on 29 August 2014.

The Agreement provides for exchange of tax information (upon request, spontaneous and automatic) between Mauritius and the United States. The IGA provides for the automatic reporting and exchange of information in relation to accounts held with Mauritius financial institutions by US persons and the reciprocal exchange of information regarding financial accounts held by Mauritius residents in the United States.

The MRA has issued guidance notes (available on MRA’s website) to provide practical assistance to financial institutions, businesses, their advisers, and officials dealing with the application of FATCA.

Corporate Reporting Standards (CRS)
Mauritius signed the Organisation for Economic Co-operation and Development (OECD) Convention on Mutual Administrative Assistance in Tax Matters in June 2015 and, as a
member of the Early Adopters Group, the country had initially planned to implement the CRS early. The effective date of 1 January 2016 was subsequently deferred to 1 January 2017, and the first reporting will now start from 31 July 2018.

The Mauritius ITA was amended to enact the CRS, and the MRA is the competent authority to administer the process. Under the CRS, financial institutions (FIs) will need to report accounts held by non-residents to the MRA, which will be used for eventual exchange with other jurisdictions. In line with the OECD commentaries and handbook on the CRS, the MRA published a set of guidance notes in April 2016 (MRA Guidance Notes) to help identify which FIs have reporting obligations as well as set out the type of financial information and accounts that will need to be reported.

Significant developments

New corporate income tax (CIT) rates
Prior to 1 January 2016, the normal CIT rate in Morocco was 30% (10% for companies for which the taxable income was equal to or lower than 300,000 Moroccan dirham [MAD]). See the Taxes on corporate income section for the CIT rates applicable as of 1 January 2016 under Finance Law 2016.

Minimum contribution carryforward
Prior to 1 January 2016, companies were allowed to carry forward the minimum contribution (minimum of CIT) in order to offset against the difference between the CIT and minimum contribution of future years (with a limit of three years).

Finance Law 2016 cancels the possibility of the above carryforward as of 1 January 2016; consequently, the minimum contribution payable for a specific fiscal year becomes a final income tax.

Tax penalties
Finance Law 2016 provides for the application of new rates for penalties and late payment interest as of 1 January 2016. See the description of Penalties in the Tax administration section for more information.

Taxes on corporate income

In general, the Moroccan tax code considers that all revenues and capital gains generated in Morocco are subject to Moroccan taxation.

Companies are taxed on the difference between their trading income and expenditure. Business expenses incurred in the operation of the business are generally deductible unless specifically excluded.

The CIT rates are as follows:

<table>
<thead>
<tr>
<th>Taxable income (MAD)</th>
<th>From</th>
<th>To</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>0</td>
<td>300,000</td>
<td>10</td>
</tr>
<tr>
<td></td>
<td>300,001</td>
<td>1,000,000</td>
<td>20</td>
</tr>
<tr>
<td></td>
<td>1,000,001</td>
<td>5,000,000</td>
<td>30</td>
</tr>
<tr>
<td></td>
<td>5,000,001 and above</td>
<td>31</td>
<td></td>
</tr>
</tbody>
</table>

A higher CIT rate of 37% applies to leasing companies and credit institutions.

Non-resident companies can, under certain conditions, opt for an alternative tax at the rate of 8% of the amount of their contract, whatever the taxable income is.
**Minimum contribution**
CIT cannot be lower than a minimum contribution of 0.5% (or 0.25% for specific products) levied on the turnover and other specific revenues. The minimum contribution is not due during the first 36 months following the beginning of activities.

Prior to 1 January 2016, the minimum contribution paid in case of loss or the portion of minimum contribution that exceeded the amount of CIT could be offset against the portion of CIT that exceeded the minimum contribution until the third year.

Finance Law 2016 revokes the three-year carryforward for minimum contributions accrued as of 1 January 2016.

**Local income taxes**
There are no local taxes levied on income in Morocco.

---

**Corporate residence**
Companies, whether or not established in Morocco, are subject to CIT on all profits or income relating to property that they own, activities that they carry on, and profit-making transactions that they carry out in Morocco, even when these are of an occasional nature.

**Permanent establishment (PE)**
The notion of PE is not explicitly defined under Moroccan tax law.

However, the Moroccan tax authorities apply this concept for non-resident companies according to some determined criteria that are inspired from the various tax treaties that Morocco has signed with other countries.

Indeed, the question of whether an entity will be deemed to have a PE in Morocco is a question of fact, in particular, subject to having, in Morocco, any fixed place of business through which a foreign entity conducts industrial or commercial activity for an indefinite or substantial period of time.

The term fixed place of business includes, for instance, a place of management or operations, a branch, an agency, a premises used as a sales outlet, a construction of assembly project, or a purchasing office. Also, in some specific cases, a non-resident company may be deemed as having a PE if it operates in Morocco through a dependent agent.

---

**Other taxes**

**Value-added tax (VAT)**
VAT is levied under the Moroccan Tax Code and is due on all industrial, commercial, and handicraft transactions taking place in Morocco, as well as on importation operations.

The standard rate of VAT is 20%. Lower rates of 7%, 10%, and 14% apply to specifically designated operations.

The sale of goods is considered as taking place in Morocco, and thus subject to VAT, if the goods sold are delivered in Morocco.

The sale of services is considered as taking place in Morocco, and thus subject to VAT, if the services sold are consumed or used in Morocco.
Morocco

Two types of exemptions from VAT are provided. The first is an exemption with credit, equivalent to the zero tax concept. The second is an exemption without credit.

The zero-rated supplies include (but are not limited to) supplies of the following goods or services:

- Exported goods and services.
- Certain agricultural equipment supplied under prescribed circumstances.
- Investment goods recorded as fixed assets in the company accounting and acquired during the first 24 months following the beginning of activity.
- Offshore banks for certain specific operations, such as interest and commissions.
- Goods and services rendered to companies established in free trade zones (FTZs).
- Activities related to hydrocarbon exploration, etc.

Exempt supplies without deduction right include (but are not limited to) supplies of the following goods or services:

- Milk, sugar, bread, cereals.
- Fiscal stamps.
- Newspapers, books, documentaries.
- Interest on government loans.

**Customs duties**

Importation of goods in Morocco gives rise to payment of importation duties, the VAT on importation, and the special tax on importation called *Taxe Parafiscale à l’Importation* (TPI).

Customs duties are computed on the basis of the *ad valorem* value of the goods at the time of their entrance into Morocco.

Customs duties can be reduced if the imported products are covered by free trade agreements signed by Morocco or other specific regulatory dispositions.

Under Moroccan tax law, the importation operations are subject to VAT at the rate of 20%. Lower rates of 7%, 10%, and 14% apply to specifically designated importations.

The Moroccan tax law also offers some economical customs regimes that provide VAT exemptions with credit (equivalent to zero rate).

The TPI rate is 0.25% levied on the value of the imported goods.

**Excise taxes**

Excise taxes apply to specific products imported or produced in Morocco, such as tobacco, alcohol, and lubricants.

**Professional tax**

A professional tax is levied on individuals and enterprises that carry out a professional activity in Morocco.

The tax consists of a tax on the rental value of business premises (rented or owned) and fixed assets. The tax rates range from 10% to 30%, with exemption for the five first years of activity.

The rental value is exempted for the portion of cost exceeding MAD 50 million.
**Registration duties**

Registration duties are due on all written or verbal conventions, such as property transfer of real estate, shares, or rights; company set up; equity increase; and goodwill transfer.

The rates of registration duties range from 1% to 6%. A flat rate of MAD 200 is also applicable to specific operations and conventions.

The company set up and the capital increase are subject to registration duties at the rate of 1%.

The transfer of non-listed shares is subject to registration duties at the rate of 4%. However, a 6% rate is applicable to the transfer of shares of real estate companies.

The applicable rate for the transfer of goodwill is 6%.

**Payroll taxes**

Individual income tax on salaries is paid by way of withholdings made by resident employers.

**Social security contributions**

The only mandatory social security regime in Morocco is the one managed by the CNSS fund (Caisse Nationale de Sécurité Sociale).

The CNSS rates are as follows and apply to the gross salary, excluding exempted allowances and indemnities:

<table>
<thead>
<tr>
<th></th>
<th>Employee portion (%)</th>
<th>Employer portion (%)</th>
<th>Computation basis ceiling (MAD)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family allocation</td>
<td>-</td>
<td>6.40</td>
<td>-</td>
</tr>
<tr>
<td>Social allocation</td>
<td>4.29</td>
<td>8.60</td>
<td>6,000</td>
</tr>
<tr>
<td>Professional tax</td>
<td>-</td>
<td>1.60</td>
<td>-</td>
</tr>
<tr>
<td>Mandatory medical care</td>
<td>2.26</td>
<td>4.11</td>
<td>-</td>
</tr>
</tbody>
</table>

**Branch income**

Non-resident entities are subject to income tax at normal CIT rates derived from all profits or income relating to property that they own, activities that they carry on, and profit-making transactions that they carry out in Morocco.

The taxation is levied to the portion of income allocable to the branch located in Morocco.

In addition, a 15% ‘branch tax’ applies to a non-resident’s after-tax profits. Some treaties may provide protection against the application of the branch tax.

For resident entities having branches in Morocco, the income is taxable in the hands of the head office at normal CIT rates.

**Income determination**

**Inventory valuation**

Cost of inventory must be determined in accordance with the first in first out (FIFO) or the average cost method. The last in first out (LIFO) method is prohibited.
Capital gains
Capital gains are taxable as a part of ordinary business income.

Dividend income
Dividends received by corporate shareholders from Moroccan-resident entities subject to CIT must be included in business profits of the recipient company, but the dividends are 100% deductible in the computation of taxable income.

The participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

Interest income
Interest income received from tax resident entities (other than financial institutions) is subject to a withholding tax (WHT) at the rate of 20%. The WHT is deductible from CIT.

Rents/royalties income
Rents and royalties income are taxable as a part of ordinary business income.

Foreign income
The income derived from activities carried out in a foreign country is not subject to taxation in Morocco unless the taxation is granted by treaty dispositions.

Note that the participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

Deductions
Depreciation
Fixed assets are normally depreciated according to their economic life duration according to the provision of the accounting regulation.

Depreciation is computed according to two methods: the straight-line method and the declining-balance method.

The tax regulation (through administrative guidelines) has provided indicative depreciation rates applicable when the company activity or the asset to be depreciated is specific or particular.

Indicative depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business premises and buildings</td>
<td>4 to 5</td>
</tr>
<tr>
<td>Light construction (metal frame construction)</td>
<td>10</td>
</tr>
<tr>
<td>Production equipment, tools, and construction fittings</td>
<td>10 to 15</td>
</tr>
<tr>
<td>Huge computer facilities</td>
<td>10 to 20</td>
</tr>
<tr>
<td>Computers and related items (printers) and programs, as well as vehicles (cars, trucks, vans, lifters)</td>
<td>20 to 25</td>
</tr>
<tr>
<td>Office furniture and software</td>
<td>20</td>
</tr>
<tr>
<td>Non-significant tools</td>
<td>30</td>
</tr>
</tbody>
</table>

Goodwill
Under Moroccan tax law, goodwill cannot be subject to amortisation. However, a decrease of the value of goodwill is allowed to be recorded through provisions.
Start-up expenses
The development as well as incorporation expenses shall be capitalised and depreciated for tax purposes over a period of five years.

The carryforward of any loss due to the above expenses is limited to a period of four years.

Interest expenses
Interest on loans granted by direct shareholders is deductible if the capital is fully paid in. Also, the deductible interest is limited to (i) the portion of the loan that does not exceed the share capital equity and (ii) the interest rate provided, annually, by the Ministry of Finance (2.53% in 2016).

Bad debt
Bad debts that are definitively non-recoverable (after all recovery procedures have been undertaken) are treated, from a tax point of view, as deductible losses.

Charitable contributions
Charitable contributions made by companies are deductible only if they are granted to foundations and societies explicitly provided by law.

The contributions made to the community enterprise are deductible at up to 0.2% of the company turnover.

Fines and penalties
Fines and penalties are not tax deductible expenses if they relate to infringements to legal and regulatory dispositions.

However, expenses relating to late payment penalties (calculated in accordance with the provisions of the law) should be tax deductible.

Taxes
Taxes constitute deductible expenses, except CIT itself and recoverable taxes.

Net operating losses
Tax losses may be carried forward for a period of four years from the end of the loss-making accounting period. However, the portion of a loss that relates to depreciation may be carried forward indefinitely.

A carryback mechanism is not allowed under Moroccan law.

Payments to foreign affiliates
Payments to foreign affiliates are allowed under Moroccan law. However, such payments should respect the arm’s-length principle and foreign exchange regulations.

Group taxation
Under Moroccan law, consolidation or group taxation is not allowed.

Transfer pricing
Morocco has a general provision within its tax legislation requiring transactions between related parties to be at arm’s length.

Where a Moroccan company is directly or indirectly connected with enterprises situated inside or outside Morocco, profits transferred indirectly to such enterprises, by means of increases or decreases in buying or selling prices or by any other means, must be included among taxable profits on the tax return.
Morocco

In order to determine the amount to be included among taxable profits, Moroccan tax authorities will make comparisons with other similar companies carrying on normal business activities or by means of direct assessment based on information available to the tax authorities.

**Thin capitalisation**
No specific thin capitalisation rules exist in Morocco.

However, the tax law restricts the interest rate on debts issued by shareholders and the basis of calculating deductible interests.

Interest incurred is tax deductible if the shareholder’s capital is fully paid. Additionally, the sum of the shareholder loans generating deductible interests should not exceed the equity capital subscribed, and the applicable interest rate should not exceed the official rate calculated annually on the basis of six months treasury bills.

**Controlled foreign companies (CFCs)**
There are no provisions for CFCs in Morocco.

---

**Tax credits and incentives**
The Moroccan tax law provides several tax incentives for specific sectors of activities.

**Export companies**
Export companies are exempt from CIT on their profits related to their export turnover during the first five years following their first export transaction. These companies benefit from a reduced CIT rate of 17.5% in subsequent years.

**Hotel companies**
Hotel companies are fully exempt from CIT on their profits relating to foreign currency turnover for the first five years following their first accommodation operation in foreign currency. They also benefit from a reduced CIT rate of 17.5% on such profits for subsequent years.

**Mining companies**
Exporting mining companies, including those that sell products to export companies, benefit from a reduced CIT rate of 17.5%.

**Agricultural companies**

**Small-scale companies**
Agricultural companies with a turnover of less than MAD 5 million qualify for a total exemption of CIT. If such companies realise a turnover that exceeds MAD 5 million in year (n), they become liable to CIT in year (n), year (n + 1), year (n + 2), and year (n + 3).

Moreover, such companies qualify for a reduced rate of 17.5% during the first five fiscal years following the first year during which they become liable to CIT.

**Medium and large-scale companies**
Finance Law 2014 provides for a progressive approach to tax medium and large-scale agricultural companies that realise a turnover exceeding MAD 5 million. As such, companies with a turnover exceeding MAD 35 million, MAD 20 million, or MAD 10 million should become liable to CIT, respectively, in 2016, 2018, and 2020.

Moreover, such companies qualify for a reduced rate of 17.5% during the first five fiscal years following the first year during which they become liable to CIT.
**Capital risk companies**
Capital risk companies are exempt from CIT on profits derived within the scope of their activities (these are profits related to purchases of companies' shares that support such companies' development and the sales of such shares thereafter).

**Hydrocarbon companies**
Companies holding hydrocarbon exploration and exploitation permits are exempt from CIT for ten years from the beginning of hydrocarbon regular production.

**Banks and holding companies located in offshore zones**
Banks and holding companies located in offshore zones benefit from a reduction in CIT for the first 15 years of operation.

Banks may opt for a minimum CIT of 25,000 United States dollars (USD) or pay the tax at a reduced rate of 10%.

Holding companies pay a flat tax of USD 500 during the first 15 years.

**Casablanca Finance City (CFC)**
A law was enacted in 2010 for the setting up of a finance area in Casablanca, called, Casablanca Finance City.

The CFC statute may be granted to specific financial institutions as well as non-financial institutions that offer such services as auditing, fiscal, legal, financial, actuarial, and human resources management advisory.

The above statute may also be granted to regional and international headquarters.

Entities established in Casablanca Finance City are exempt, for their export turnover, from CIT during the first five years following the date they obtain the CFC statute. These companies benefit, for the export turnover, from a reduced rate of 8.75% in subsequent years.

**Free trade zones (FTZs)**
The activities that must be necessarily performed by the companies established in the FTZs are mainly the following (the activities may vary for each FTZ):

- Food processing industries.
- Textile and leather industries.
- Metallurgic, mechanic, electric, and electronic industries.
- Chemical and special chemical industries.
- Services connected with the aforementioned activities.

Entities established in FTZs are exempt, for their export turnover, from CIT during the first five years. These companies benefit, for the export turnover, from a reduced CIT rate of 8.75% for the following 20 years.

Moreover, for entities established in FTZs, the dividends paid to non-residents relating to activities performed in the FTZ are totally exempted from the WHT on dividends.

**Listed shares**
Non-resident entities are exempt from capital gains derived from the sale of stocks listed on the Casablanca stock exchange, excluding the shares of real estate entities.

**Foreign tax credit**
Income tax paid on income earned from outside Morocco may be credited against CIT payable in Morocco if provided by treaty.
Morocco

**Withholding taxes**

**WHT on dividends**
The standard WHT rate on dividends is set at 15% according to the Moroccan law (unless reduced by treaty).

WHT does not apply to dividends paid to Moroccan companies subject to Moroccan CIT, subject to the delivery of a property attestation.

A branch tax of 15% applies to the net income transferred by the Moroccan branch to foreign entities (may be reduced by the tax treaty).

**WHT on interests**
The standard WHT on interest paid to non-resident entities is set at 10% as provided by the Moroccan law (unless reduced by treaty). However, the Moroccan law provides that interest on loans granted in foreign currency with a maturity exceeding ten years is exempt from WHT.

**WHT on services paid to non-resident entities**
According to the Moroccan tax code, all payments of all kinds of services rendered by non-resident entities are subject to WHT at the rate of 10%.

However, it shall be noted that treaty dispositions limit the scope of application of WHT only to remunerations that constitute royalties. Such dispositions overrule the domestic tax law provided by the Moroccan law.

**Treaty WHT rates**
Payments to non-resident corporations and individuals are subject to WHT, as shown below.

Notes

1. Some treaties provide for an exemption for certain types of interest (e.g. interest paid to public bodies and institutions). Such exemptions are not dealt with in this treaty chart.
2. The member states of the Arab Maghreb Union are Algeria, Libya, Mauritania, Morocco, and Tunisia.
3. There is no limitation on WHT under the treaty.
4. The lower rate (i.e. 5%) usually applies to copyright royalties and other similar payments in respect of the production or reproduction of any literary, artistic, or dramatic work (excluding cinematographic and television films), while the 10% rate applies to other types of royalties.

Tax administration

Taxable period

The taxable period corresponds to 12 months. The first taxable period can be less than one year but should never exceed it.

Tax returns

CIT returns must be filed within three months following the closing of the fiscal year.

Payment of tax

Payment of tax is made during the fiscal year by way of four instalments of 25% each based on the CIT of the previous year.

In case the CIT of the year exceeds the sum of the four instalments, the company should proceed to tax regularisation along with the submitting of the taxable income return after three months following the closing of the fiscal year (i.e. 31 March for fiscal year corresponding to the calendar year). Otherwise, the exceeding tax amount should be offset against the following instalments without limitations.
Morocco

Penalties
Finance Law 2016 provides for the application of new rates for penalties and late payment interest, as of 1 January 2016, as follows:

In case of late tax return:

• 5% penalty in case the tax return is submitted within 30 days following the legal deadline, or in case of corrective return.
• 15% penalty in case the tax return is submitted after the above mentioned 30 days.
• 20% penalty in case of automatic taxation due to non-submission of tax return.

In case of late tax payment:

• 5% penalty in case the tax payment is made within 30 days following the legal deadline.
• 10% penalty in case the tax is paid after the above mentioned 30 days.
• 20% penalty in case of non-payment or late payment of VAT and other WHTs.
• 5% interest related to the first month late tax payment and 0.5% interest for the following months.

Statute of limitations
The statute of limitations runs until the end of the following fourth year. This period may be extended in case of deficits or credits.

Topics of focus of tax authorities
The topics of focus of tax authorities depend on each specific situation (sector of activity, company size, etc.). However, it is very common to find the following points:

• Transfer pricing.
• Tax treatment of provisions.
• Taxation of indemnities and benefits granted to employees.

Other issues

Exchange controls
Foreign investors are allowed, following the accomplishment of some formalities, to freely transfer abroad the whole proceeds of their investments in Morocco (i.e. dividends, shares sale price, and liquidation income under the condition that the initial investment is realised in one of the foreign currencies listed by the Moroccan Central Bank).

However, some specific transfers of funds into and out of Morocco are subject to prior authorisations from the exchange control office.

Choice of business entity
The legal vehicles used by foreign companies for the purpose of setting up a business in Morocco are the branch and the subsidiary.

Under subsidiary form, the foreign entities generally opt for the corporation (SA) or the limited liability company (SARL).

The SARL is most adequate for companies with low investment capital while the SA is most appropriate for companies that are investing an important amount of capital. In general, the rules relating to the organisation and functioning of an SARL are more flexible than those required for an SA.
Significant developments

Regulation of the specific tax regime and tax benefits for mining activity
The Decree no. 28/2015 of 28 December did not bring changes or clarifications in relation to Law no. 28/2014 of 23 September.

Recalling some changes in the new regime, namely the tax on mining production (TMP), article 4.1 of this regulation establishes that the value of mining product is determined by the price of the last sale by the taxable person, which must match with the price of reference in the international market, or, if there was no sale, is determined by the price of reference in the international market.

This regulation reduced the rates for mining products, being 8% for diamonds, 6% for precious metals, precious stone and semi-precious stone, and heavy sand, 3% for base metals, coal, and others, and 1.5% for sand and stone. Such rates can be reduced to 50% when the products are used in Mozambique for the development of local industry.

The settlement of the TMP is now performed on the tenth day of the month that follows the production.

There are also changes regarding the rate of the surface tax (ST), which is based on the type of mining title and year of activities, with exception of the mining concession for mineral water that has an amount of 85,000 Mozambican metical (MZN) per mining title.

The additional settlement for the TMP and ST must be done within 30 days from the tax settlement.

At the end of each year, the taxpayer must report the yearly profit for each mining title, separately.

According to this regulation, the holder of the mining title also pays the tax on mining resource rent (TMRR), and, for its deduction, the concessionaire must provide information to the tax authorities on the accumulated net cash flows, corresponding to the taxable income.

The applicable rate for TMRR is 20%.

At the beginning of the fiscal year, each taxpayer must prepare a forecast to TMRR that must be regularly updated and presented by 31 May of the fiscal year. The TMRR is paid in two instalments (50% in August and 50% in November), based on the forecast.

It was expected that this regulation would bring more details about the calculation of TMRR, which was not the case.
**Regulation of the specific tax regime and tax benefits for oil and gas operations**

In accordance with the regulation of the specific tax regime and tax benefits for oil and gas operations, the obligation to pay the tax on oil production (TOP) is deemed to be at the time that the oil produced comes to the station defined in the concession agreement.

The settlement of the TOP is made by the taxpayer, which must submit the official form to the tax administration by the tenth day of the following month of the production, and, if the taxpayer fails to do so, the tax administration will make the necessary assessments based on the elements it has and the application of penalties established in article 22 of the mentioned regulation.

The TOP rates are the following: 10% for crude oil and condensate and 6% for natural gas and liquefied natural gas (LNG), which can be reduced by 50% in cases where the production is to be used for the development of local industry. It is considered local industry if the sale is for the national hydrocarbon company (ENH, E.P).

After the settlement made by the taxpayer, the tax administration shall evaluate the official model and can make corrections to it. If a correction is to be made, the tax administration has the prerogative to conduct an additional settlement, in which it must charge or cancel the calculated difference, and this amount must be corrected in 30 days from the tax assessment.

It is important to mention that the government has a period of time to notify the taxpayer to pay in kind, which is within 12 months in advance, starting from the first day of the month to which the tax relates, indicating the quantity of oil and delivery point.

In order to have benefits established in Law no. 27/2014 of 23 September, the taxpayer must apply to the Customs Services for the exemption. In this request, the applicant must attach the global list of the goods to import for the determination of eligible goods for the exemption.

The violation of this regulation is subject to impeditive sanctions (in case of violation of article 36 of Law no. 27/2014), suspensive sanctions (the practice of acts established in article 22.3 of the regulation), and extinctive sanctions.

---

**Taxes on corporate income**

Corporate entities and other entities with headquarters or permanent establishment (PE) in Mozambique are subject to corporate income tax (CIT) based on their worldwide income. On the other hand, corporate entities and other entities without headquarters or PE in Mozambique (i.e. non-resident entities) are only subject to CIT on the income earned in Mozambique.

CIT is levied on taxable profits, defined as accounting profits adjusted to comply with tax law rules, at a tax rate of 32%. For tax years ending prior to 1 January 2016, income arising from agricultural or cattle breeding activities was subject to a reduced rate of 10%.

**Local income taxes**

*See Municipality taxes in the Other taxes section.*

---

**Corporate residence**

Corporate residence is determined on the basis of a company's place of incorporation or effective management. Thus, all companies with headquarters in Mozambique, as well
as any PE of non-resident entities, are considered tax residents and are liable for CIT on their worldwide income.

**Permanent establishment (PE)**
Under the relevant internal legislation, a non-resident entity is deemed to have a PE in Mozambique whenever any of the following circumstances exists:

- It has premises or other fixed places of business through which industrial, trading, agricultural, rendering of services, or similar activities are totally or partially carried out.
- It has an office, branch, plant, workshop, mines, quarries, oil or natural gas wells, or other places of extraction of natural resources.
- It has a construction, installation, or assembly site when the duration of works exceed six months, including the activities of coordination, inspection, and supervision connected to these sites.
- It has persons or hired personnel, acting and dealing in Mozambique, who are not independent agents in the terms of the law but rather acting on behalf of the company with legal capacity to conclude contracts on its behalf and its name within the scope of the company's activities.

**Other taxes**

**Value-added tax (VAT)**
VAT is chargeable on the sale of most goods and services as well as on imports. The standard rate is 17%. Usually, VAT is recoverable by corporate entities, except for those engaged in special business activities (e.g. financial and insurance operations, leasing [exemption with restrictions], sale of immovable property, some exempt activities).

**Customs duties**
Customs duties are charged on importation of goods into Mozambique, and the applicable rates vary from 0% to 20%. Mozambique is part of the Southern African Development Community (SADC) protocol on commercial trade that exempts from customs duties some goods produced within the SADC region. However, in order to benefit from the exemption, the importer should provide proof of the origin of the said goods through the presentation of the certificate of origin of goods.

Mozambique also has signed agreements with the European Union (EU) based on which preferential rates are applicable on certain goods imported from such region.

**Excise taxes**
Excise duties are levied on certain goods manufactured locally or imported, which are identified in a specific table that is an integrant part of the Excise Duty Act and indicates the applicable rates. Amongst others, the said table includes goods such as tobacco, beer and other alcoholic beverages, vehicles, cosmetics, cloths, airplanes, boats, etc.

Examples of excise duty rates include the following:

- Alcoholic beverages: 40% (55% for wine of fresh grape).
- Tobacco: 75%.
- Air vehicle without engine: 35%.
- Boats and other recreational or sportive crafts: 35%.
- Cloths and respective accessories: 30%.

**Property transfer taxes (SISA)**
In Mozambique, a property transfer tax is charged on transfers of real estate, excluding the land, which is owned by the state. The rate of tax is 2% of the selling price of the
building. When the beneficiaries live in a country with a privileged tax regime, the applicable rate is 10%.

**Stamp duties and service charges**
Various documents require the payment of stamp duties. Service charges are payable for the performance of certain services for official purposes, such as those rendered by public notaries. These duties vary generally from 0.03% to 50% on the amount of the transaction supported by the document to be stamped. In some other cases, the stamp duty comprises fixed amounts, ranging from MZN 0.50 to MZN 5,000.

**Payroll taxes**
All remunerations paid to employees are subject to monthly withholding as per the definitive tax rates that are established in a specific schedule approved by law, depending on the gross amounts received and personal and family specific circumstances. The employer is obligated to withhold at source the tax due by the employees.

The monthly withholding rates vary from 0% to 32%, being withheld definitively at source.

The amounts withheld by the company shall be delivered to the tax authorities up to the 20th day of the following month.

The company is not allowed to support any taxes due by employees or third parties. In case any tax is paid by the company on behalf of employees, such cost will not be accepted as a deductible cost unless this is treated as part of the remuneration cost and taxed at the hands of the employee as employment income.

**Social security contributions**
Social security contributions are payable by employers and employees on monthly remuneration. The aggregate rate of contribution is 7%, with 4% paid by the employer and the remaining 3% by the employee.

**Municipality taxes**
Municipality taxes that should be considered for corporate purposes include the following:

**Municipality tax on real estate**
The municipality tax on real estate is levied annually on the value of immovable assets situated within the municipality and owned or possessed by corporate entities. Effective tax rates range from 0.4% (for housing purposes) to 0.7% (for office purposes or mixed activities) of the building value, depending on the municipality.

**Municipality tax on economic activities**
The municipality tax on economic activities is levied on commercial or industrial activities carried out within a municipal territory. The tax depends on the activity being carried out, adjusted by coefficients, which are based on the zone and total area of the premises in square metres. In Maputo, this tax is calculated based on the following formula:

\[
\text{Maputo tax on economic activities} = \text{Basis rate} \times \text{Index of category} \times \text{Index of location} \times \text{Index of area occupied}
\]

Where the basis rate is the applicable maximum amount of the national minimum salary (MZN 8,050 for the year 2015).

Where the index of the location varies from 1.3 to 1.5, depending on the location of the premises within the municipality.
Where the index of the area occupied varies from 1.2 to 1.5, depending on the nature of the activities and the space occupied by the premises.

**Municipal vehicles tax**
The municipal vehicles tax replaces the vehicles tax within the municipality and is levied on the use of specific vehicles (e.g. light and heavy vehicles less than 25 years old, motorcycles less than 15 years old, aeroplanes, and boats for private use). This tax is due by the owners who are residents of a municipality, regardless of the place of registration of the vehicle owned.

The rate varies, depending on specific criteria such as type of fuel, engine capacity, period of registration, and weight.

This tax must be paid between January and March or within 30 days after the acquisition of the vehicle.

**Branch income**
From a tax perspective, branches are liable for Mozambican CIT as a separate entity; consequently, the regime is the same that would apply to a Mozambican resident company. However, on the grounds that branches do not distribute dividends, the 20% withholding tax (WHT) does not apply to the after-tax profits arising in Mozambique.

**Income determination**

**Inventory valuation**
All inventory valuation methods generally accepted according to international accounting principles are permitted for tax purposes, provided that the method is:

- used by the taxpayer consistently and
- based on arm's-length prices duly documented and effectively exercised.

Based on the above assumptions, last in first out (LIFO) and first in first out (FIFO) methods are allowed. Write-downs and depreciation of inventories are not allowed. Conformity between book and tax reporting is required.

**Capital gains**
Capital gains less any capital losses derived from the sale or disposal of tangible fixed assets, including insurance indemnities received in case of accident, are taxed as part of normal income. If a taxpayer reinvests the sale proceeds within three tax years following the year of sale, the gain may be deferred until the end of the third year. A three-year reinvestment period may be accepted, provided a prior application is submitted to the Minister of Finance. However, if the taxpayer does not realise the reinvestment, the CIT that was not assessed during the three-year period will be assessed, along with compensatory interest.

Capital gains arising from indirect transfers of participating interests of assets located in the country are subject to taxation. Capital gains resulting from the disposal of shares, participating interests, or rights in general, between non-residents, whether direct or indirect, free or for consideration, are taxable in Mozambique, provided the transaction involves assets located in the country.
Dividend income
In the case of resident companies, income arising from dividends is excluded from taxable income, provided that the shares that a resident company holds in another resident company represents at least 20% of the total capital and are held for at least two consecutive years (or with an undertaking to hold the shares for this period). The same applies to income arising from risk capital companies and holding companies (Sociedade Gestora de Participações Sociais or SGPSs) or from subsidiaries as a result of the application of technical reserves in insurance companies. However, in the case of holdings, the percentage of share capital decreases to 10% and shares should be held for at least one year.

If the shareholding falls outside the parameters indicated above, the tax withheld (20%) constitutes a payment on account. A tax credit corresponding to 62.5% of the CIT is attributable to the gross-up dividend.

Interest income
Interest is subject to 20% WHT. In the case of foreign entities, the WHT is considered as a definitive tax. In the case of resident entities, it is considered as an advance of the final tax.

Interests on treasury bonds and public debt bonds listed on the stock exchange are subject to definitive WHT at 20%.

Foreign income
Mozambican resident companies are taxed on the total income earned on a worldwide basis. Please note that there is no provision on tax deferral in Mozambique in relation to income earned abroad. Double taxation treaties (DTTs) allow tax paid abroad to offset Mozambican CIT. Mozambique has signed DTTs with Botswana, India, Italy, Macau, Mauritius, Portugal, South Africa, the United Arab Emirates, and Vietnam.

Deductions
Depreciation
Depreciation is a deductible cost for CIT purposes, according to the regulations of the CIT Code, subject to restrictive and specific rules.

The main legal principles regarding depreciation are as follows:

• The establishment of the applicable rates falls under the competence of the Ministry of Finance.
• The calculation is carried out on a straight-line basis in accordance with the rates applicable.

The main depreciation rates are:

<table>

### Notes

1. Subject to certain conditions set forth by the tax authorities.
2. Depreciation is only allowed in cases of effective reduction of value within the limits regarded as reasonable by the tax authorities.

### Accelerated depreciation

New immovable assets, used for the furtherance of the business, may be depreciated by increasing to 50% the normal depreciation rates approved by law. This benefit is also granted to rehabilitated immovable assets, machinery, and equipment used in agro-industrial activities, provided there is an investment project duly approved by the government.

### Goodwill

Although goodwill is considered for accounting purposes in Mozambique, there is no provision for goodwill in the tax legislation. Consequently, goodwill should be regarded as an intangible asset for tax amortisation purposes.

### Interest expenses

A basic principle regarding acceptance of costs and expenditures requires that these are necessary for the company’s/branch’s activity (i.e. indispensable to generate the profits and gains obtained by the company). This concept includes, among others, interest and other financial costs that are, in principle, also deductible for tax purposes unless the tax authorities assume that the interest rate applicable in one transaction is higher than the applicable rate applicable in the market, with the exceeding amount being subject to taxation.

Interest and other types of remuneration above the Maputo Interbank Offered Rate (MAIBOR) plus two percentage points at time of payment on the shareholders’ loans are not tax-deductible costs.

### Provisions

In Mozambique, companies are able to create all the provisions necessary and relevant for the normal course of business. However, for tax purposes, only the provisions listed below can be deducted as a cost:

- Bad debts.
Mozambique

• Depreciation of stock.
• Ongoing judicial procedures.
• Credit institutions/Insurance companies.
• Reconstruction of mines.
• Rehabilitation of land.

Any other provisions reflected in the company’s accounts will not be accepted as tax-deductible costs.

Bad debt
With regards to provisions for bad debts, companies are only allowed to deduct 1.5% per year (and 6% accumulated) of the provisions created for bad debts.

Charitable contributions
Donations can be deducted as costs for tax purposes, provided specific requirements are met and the beneficiaries thereof are:

• Social and cultural organisations that, acting without lucrative intent, carry out actions in art, education, science, health, preservation and restoration of cultural patrimony, or social activities: Donations can be deducted up to the limit of 5% of the previous year’s taxable income.
• The Mozambican state: Donations can be fully deducted.

It is important to note that this deduction is not applicable automatically, as it is necessary to present proof that the donation was previously communicated to and approved by the Ministry of Finance.

Fines and penalties
Fines and other penalties paid due to any infringement, which do not have a contractual basis, including interest, are not accepted as tax-deductible costs.

Taxes
Taxes paid in relation to the activities of a company are tax deductible, excluding CIT itself.

Net operating losses
Carryback of losses is not allowed in Mozambique. On the other hand, losses may be carried forward for a period of five consecutive years.

Payments to foreign affiliates
Any payments to non-residents are allowed as deductible expenses, provided that the amount does not exceed normal rates and that the taxpayer is able to prove that a business transaction was carried out with the non-resident company. The tax authorities may redetermine taxable income if, due to a special relationship between the Mozambican and non-resident companies, certain conditions existed that allowed a calculation of profit that differed from the profit that would have been calculated without the existence of such relationship (i.e. the arm’s-length principle).

Group taxation
There are no group taxation provisions available in Mozambique. Each member of a group of companies preparing consolidated accounts for accounting purposes must file separate tax returns in order to be taxed on its profits on a stand-alone basis.

Transfer pricing
The tax authorities may proceed with the necessary corrections for assessing the profits for tax purposes whenever:
• by virtue of special relations between the taxpayer and other entity, different conditions from those that should be normally agreed upon between independent entities have been established, and
• in consequence of those conditions, the profits for accounts purposes are different from those that would have resulted had such special relations not existed.

The corrections above shall be equally applicable whenever the profits for accounts purposes regarding non-resident entities are different from those that should have resulted if the non-resident entity were a separate entity carrying out similar activities in similar conditions and with total independence.

The corrections referred to above will also be applicable to entities that carry out activities simultaneously subject and not subject to the CIT Code, provided that similar evasion regarding such activities is verified.

Whenever these corrections are applicable to one taxpayer of CIT (Taxpayer 1) by virtue of special relations with another taxpayer of CIT or of individual income tax (Taxpayer 2), the adjustments reflecting the corrections made in the calculation of the profits for tax purposes of Taxpayer 1 shall be applicable in the assessment of the profits for tax purposes of Taxpayer 2.

The definition of ‘special relation’ has been introduced into the transfer pricing regime. However, specific transfer pricing regulations remain non-existent, although they are expected to be approved during this year.

**Thin capitalisation**
Where loans from related foreign corporations exceed twice the corresponding equity in the borrowing Mozambican corporation, the interest on the excess borrowing is not tax deductible. Thin capitalisation rules are in force.

According to the Mozambican thin capitalisation rules, subsidiaries are considered and treated as thinly capitalised companies if and to the extent that, as at any date of the tax period, any of their relevant debt-to-equity ratios exceed a factor of two.

‘Relevant debt-to-equity ratio’, within the context of the law, means the ratio between, on one hand, the amount of direct and indirect indebtedness of a Mozambican company towards a specially related non-resident, and on the other, the amount of equity that this non-resident holds in the Mozambican company.

A ‘specially related non-resident’, for these purposes, is an entity with special links with another, which includes any entity that:

• holds, either directly or indirectly, at least 25% of the share capital of the Mozambican company
• though holding less than 25%, has a significant influence on its management, or
• both taxpayer and non-resident entity are under control of the same entity, which has participation in their share capital, either directly or indirectly.

Under any of these circumstances, interest paid to such specially related non-residents is not allowed as a tax-deductible cost for the Mozambican company in the part that corresponds to the excessive indebtedness, unless the company can prove that it could have obtained the same level of indebtedness at comparable conditions from unrelated parties, taking into account the nature of its business, its sector of activity, dimension, and other relevant criteria.

**Controlled foreign companies (CFCs)**
In Mozambique, we do not have any specific provision regarding taxation of CFCs.
Tax credits and incentives

Foreign tax credit
Resident companies are allowed to deduct a credit correspondent to a tax paid abroad. The tax credit to be deducted should be equal to the lower of the amount of Mozambican corporate tax imputed to income obtained abroad or the amount of foreign tax effectively paid.

Inbound investment incentives
In addition to the guarantees of ownership and remittance of funds abroad, the Mozambican government also guarantees the concession of tax and customs incentives. The incentives vary depending on whether a company is starting a new venture or rehabilitating one and also on the nature of the project to be developed. The incentives discussed in this section are the generic benefits applicable to standard projects. Certain specific benefits also may be applicable depending on the activities of the industry for the investment project (e.g. agriculture, tourism, science and technology).

Exemption from import duties
An exemption from customs duties and VAT applies upon the importation of capital equipment, listed in Section K of the Customs Tariff Schedule.

Tax credit for investment
Investments in new fixed tangible assets used in the operations of an enterprise within the Mozambican territory may benefit from an investment tax credit equal to 5% to 10% of the total investment realised, for a period of five years. This investment tax credit is offset against CIT, up to the total amount of the tax assessment. This incentive does not apply when the investment in tangible fixed assets is with respect to the construction, acquisition, restoration, or extension of buildings, passenger vehicles, furnishings, and articles of comfort and decoration, leisure equipment, advanced technology, or other assets not directly associated with the production activity carried out by the enterprise. When the project is located outside Maputo City, this tax credit is increased to up to 10%.

Advanced technology incentive
The amount invested in specialised equipment classified as advanced technology, during the first five years from the date of commencement of activity, may be deducted from taxable income for purposes of calculating CIT, up to a maximum of 10% of taxable income.

Professional training incentive
Investment expenditures for professional training of Mozambican workers shall, up to a maximum amount of 5% of the taxable income (10% in case of professional training related to new/high technology equipment), be deductible from taxable income for the purposes of calculating CIT during the first five years from the date of the commencement of such activities.

Exploration incentives
During a period of five years counting from the date of exploration (i.e. the date the implementing company starts the activities approved under the investment project terms of authorisation), the following expenditures may be treated as deductible expenditures for purposes of calculating CIT:

- In the case of undertakings carried out in the City of Maputo, 110% of the value of expenditures for the construction and rehabilitation of roads, railways, airports, telecommunications, water supply, electric energy, and other works of public utility is deductible for tax purposes.
- In the case of undertakings carried out in the rest of the provinces, an amount equal to 120% of the expenditures referred to in the paragraph above is deductible for tax purposes.
In the case of expenditures for the acquisition for personal ownership of works of art and other objects that are representative of Mozambican culture, as well as activities that contribute to the development of such works, 50% of the expenditures are deductible for tax purposes.

**Withholding taxes**

Any non-resident entity carrying out economic activities in Mozambique, without being registered as a taxpayer, is liable to a final and definitive 20% WHT that is applied on all income earned. An exception exists for (i) telecommunications and international transport, as well as the respective installation and assembly of equipment made by those same entities, (ii) construction and rehabilitation of production, transport, and distribution of electricity infrastructures in the rural zones under the public projects of rural electrification; and (iii) maritime vessels freight for fishing and coasting activities, all of which are subject to a 10% WHT rate.

Both Mozambican resident and non-resident recipients are liable to tax on dividends at a tax rate of 20%.

**Tax treaties**

In accordance with Mozambique’s DTTs, the following tax rates are applicable to dividends, interest, and royalties:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>Dividends WHT (%)</th>
<th>Interest</th>
<th>Royalties</th>
<th>Capital gains on shares</th>
</tr>
</thead>
<tbody>

</table>

**Notes**

1. The 8% rate applies if the recipient of the dividends is a company that has more than 25% of the share capital in the company that distributes the dividends.
2. The 10% rate applies if the recipient of the dividends is a company that has less than 25% of the share capital in the company that distributes the dividends.
3. The 15% rate applies in all other cases.
4. The 0% rate applies if the recipient of the dividends is a company that has more than 25% of the share capital in the company that distributes the dividends.
5. The 12% rate applies in all other cases.
6. Gains are only taxed in the other state if assets of the entity sold are composed of more than 50% immovable assets.

**Tax administration**

**Taxable period**

The tax year is, as a general rule, the calendar year. A different tax year may be applied (if previously authorised by the Ministry of Finance) for companies that carry out activities that justify a different year (e.g. held at more than 50% by a company with a different year) or non-resident companies with a PE in Mozambique.
Mozambique

**Tax returns**
CIT assessment must be prepared by the companies on annual returns, based on the accounting records and on adjustments prescribed by the tax regulations.

The submission of the annual tax return is due by the last working day of May for companies using the calendar year as their tax year. For companies with a tax year that is not coincident with the calendar year, the presentation of the tax return is due by the last day of the fifth month subsequent to the respective year-end.

**Payment of tax**
Mozambican companies and non-resident companies with a PE in Mozambique must pay CIT as follows:

- In three advance payments (based on 80% of the preceding tax year’s CIT), due in May, July, and September of the respective tax year; or, if the tax year chosen is not coincident with the calendar year, in the fifth, seventh, and ninth months of the respective tax year.
- In three special advance payments (based on 0.5% of the preceding year’s turnover less the advance payments made in previous years, which cannot be less than MZN 30,000 or more than MZN 100,000) due in June, August, and October of the respective tax year; or, if the tax year chosen is not coincident with the calendar year, in the sixth, eighth, and tenth months of the respective year.

Final tax should be paid by the last working day of May or the fifth month after the tax year-end in cases where a different tax year is adopted.

**Tax audit process**
The tax authorities may carry out an inspection whenever necessary. Normally, the inspection occurs after the taxpayer files a refund application or on a random basis.

**Statute of limitations**
The statute of limitations period is five years, but the company documents must be kept for ten years.

**Topics of focus for tax authorities**
Based on our experience and through assistance provided to several clients during audit reviews, we noted that the Inspectors are focusing their attention on the following aspects:

- Confirmation of the amounts reported on the monthly VAT forms and the annual tax return to determinate if the figures are the same or not or if there are non-declared sales.
- Confirmation of whether the non-deductible costs were added back to the tax computation for CIT purposes.
- Deductibility of VAT.
- Analysis of supplier invoices to confirm the right of deduction of VAT.
- Analysis of the company’s sales for verification of whether there are undisclosed sales.
- Authorisation for electronic invoicing.
- VAT on self-assessment.
- Mandatory books, namely, ledger (diário), day book (razão), and inventory and balance (inventário e balanço).
- WHT on payments to non-resident entities.
- Thin capitalisation.

**Significant developments**

**2015 tax amendments**

Income tax and value-added tax (VAT) amendments were enacted on 30 December 2015 and 29 December 2015, respectively, and entered into effect on those dates. The most significant amendments are listed below. See the Taxes on corporate income section for more information.

**Corporate tax and withholding tax (WHT)**

- Reduction of WHT rate on services from 25% to 10%.
- Non-mining corporate tax rate reduced from 33% to 32%, effective for financial years commencing on or after 1 January 2015.
- WHT on interest was introduced on cross-border loans and financing.
- WHT on royalties is now fixed at a rate of 10%.
- Taxability of disposal of oil and gas rights/licences (including the sale of shares in a company that owns such rights/licences).

**Indirect taxes:**

- The VAT threshold was increased to 500,000 Namibian dollars (NAD) per annum.
- Conditions and terms were introduced for allocation of import VAT (deferred payment) accounts.
- Introduction of mandatory security for import VAT accounts.

**Taxes on corporate income**

Namibia has a source-based tax system, which means that income from a source within Namibia or deemed to be within Namibia will be subject to tax in Namibia, unless a specific exemption is available.

Income earned by foreign companies from a source within or deemed to be within Namibia will be subject to tax in Namibia. In such cases, the foreign entity must determine whether it is obligated to register a local entity or branch. A foreign company is required to register a local company (local subsidiary) or an external company (branch) if it has established a place of business in Namibia.

In the event that Namibia has entered into a double tax agreement (DTA) with the country where the foreign company resides, such entity will only be taxable in Namibia if it has established a permanent establishment (PE) in Namibia. If a PE exists, only the portion of income attributable to the PE will be subject to tax in Namibia.

Non-residents who do not have a place of business in Namibia may, however, be subject to WHTs. See the Withholding taxes section for more information.

**Calculation of taxable income**

Gross income: The total amount, in cash or otherwise, received by or accrued to any person from a source within, or deemed to be within, Namibia, excluding receipts of a capital nature (provisions for specific inclusions in gross income and amounts deemed to be from a Namibian source exist).

Less: Exemptions: The Income Tax Act provides for certain amounts to be specifically exempt from tax.

Equals: Income

Less: Deductions: Expenditures and losses actually incurred to generate income may be deducted, provided that these expenses are not of a capital nature. The Income Tax Act specifically provides for certain expenditures to be deductible and allows a deduction for capital allowances. Only expenses incurred to generate ‘income’ may be deducted. Expenses incurred to generate income exempt from tax are not deductible. Apportionment should be considered when expenses are incurred to generate both income and exempt income.

Equals: Taxable income: Taxable income is taxed at the corporate tax rate as set out under the tax rate section below.

**Tax rates**

The corporate tax rates are summarised below:

<table>
<thead>
<tr>
<th>Entity</th>
<th>2015/16 tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Domestic companies and close corporations (excluding entities mentioned below)</td>
<td>32</td>
</tr>
<tr>
<td>Branches of foreign companies</td>
<td>32</td>
</tr>
<tr>
<td>Registered manufacturers (only applicable for the first ten years of registration)</td>
<td>18</td>
</tr>
<tr>
<td>Diamond mining companies and companies that render services to such companies in connection with diamond mining</td>
<td>55</td>
</tr>
<tr>
<td>Mining companies (other than diamond mining companies) and companies that render services to such companies in connection with mining</td>
<td>37.5</td>
</tr>
<tr>
<td>Long-term insurers (the rate is applied to gross investment income)</td>
<td>12.8</td>
</tr>
<tr>
<td>Petroleum income tax rate</td>
<td>35</td>
</tr>
</tbody>
</table>

**Local income taxes**

Namibia does not levy income taxes at the local, state, or provincial levels.

**Corporate residence**

The Namibian tax system is based on source and not on residency. Income derived or deemed to be derived from sources within Namibia are subject to tax.

The source is determined as the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Namibia, the source of income is deemed to arise in Namibia, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Namibia may, in the hands of a domestic company, be deemed to arise in Namibia and be taxed as such. Examples are interest and certain copyright royalties arising outside Namibia.

**Permanent establishment (PE)**

The term ‘permanent establishment’ is not defined or recognised in the Income Tax Act, but it is included in all DTAs concluded with Namibia.
A PE includes a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered.

Except for the PE concept embodied in the tax treaties and WHT on service provisions, corporate residence is of little tax significance since transactions are taxed on a source basis.

*For the list of DTAs, please see the Withholding taxes section.*

---

**Other taxes**

**Value-added tax (VAT)**

VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions.

VAT is levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Namibia that involves the supply of goods or services for consideration.

VAT is payable on all imports for home consumption in Namibia, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state, goods of which the local supply is zero-rated).

Import VAT is payable on the greater of the free on board (FOB) value plus 10% or the market value. The payment may be deferred in terms of an import VAT account registered with the Directorate of Inland Revenue to the 20th day of the month following the month of importation. Penalties of 10% per month or part of a month and 20% interest on outstanding import VAT, according to the Customs Asycuda reports on import VAT account numbers, are levied by the Directorate of Inland Revenue.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard rated and zero-rated supplies) exceed NAD 500,000 in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may be deducted only as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

VAT returns are due within 25 days following the month to which the VAT relates.

The Inland Revenue system automatically selects VAT periods for audits. An audit will focus on deposits made into bank statements and whether VAT was charged as required. It will also focus on whether tax invoices meet the criteria as set out in the VAT Act.

**Customs and excise duties**

Namibia is a member of the Southern African Customs Union (SACU), and customs duties are not levied on intra-SACU trade (i.e. between Botswana, Lesotho, Namibia, South Africa, and Swaziland).

Customs duties are payable according to the Common Customs Tariff of SACU on imports from outside SACU. Preferential duty rates apply on imports from Southern
African Development Community (SADC) countries, while goods may be imported free of customs duties from Zimbabwe in terms of the Namibia-Zimbabwe Free Trade Agreement.

Excise duties are levied on local production of excisable products (e.g. cigarettes, liquor, fuel) and are included on most excisable products imported from another SACU country in terms of the duty at source procedures. Identical excise duty rates are applied throughout the SACU. Importation of excisable products from outside the SACU is subject to customs duties and specific customs duties.

Current specific excise/customs duty rates for the above-mentioned products are as follows:

- Cigarettes: NAD 13.24/20 cigarettes.
- Spirits (whisky, rum, brandy, gin, vodka, etc.): NAD 161.47/litre AA.
- Petrol: 3.909 cents/litre.
- Diesel and biodiesel: 3.817 cents/litre.

Ad valorem excise/customs duties are levied on certain products (e.g. motor vehicles, perfumes) in addition to the normal customs duties.

Ad valorem excise/customs duty rates are as follows for the above-mentioned goods:

- Motor vehicles: ([0.00003 x A] - 0.75)%, with a maximum of 25%, where ‘A’ is the recommended retail price, exclusive of VAT.
- Perfumes: 7%.

Customs fuel levies are payable on petrol, diesel, and illuminating kerosene. The current customs fuel levies are as follows:

- Petrol: NAD 0.12/litre.
- Diesel: NAD 0.10/litre.
- Illuminating kerosene (paraffin): NAD 0.47/litre.

Fuel levies payable to the Namibian Road Fund Administration (RFA) may be claimed back for certain non-road operations (e.g. mining, farming, construction) under certain conditions (e.g. 81.7 Namibian cents of the current RFA fuel levy of 104 Namibian cents used in mining operations may be claimed back from the RFA).

Surety in the form of a provisional payment, bank, or insurance guarantee is required by Customs on most temporary imports to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs’ bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

Namibia has introduced the AsycudaWorld customs clearing system, which is a web-based, Java-enabled system enabled at most points of entry. A few land border posts still need to be linked to the system during 2016.

Property taxes
Property taxes are levied by municipalities based on municipal valuations of properties.
**Transfer duty**
Transfer duty is payable at 12% of the acquisition value where property is acquired by non-natural persons (a sliding scale applies to property purchases by natural persons). While it is normally payable by the buyer, the agreement for the sale of the property may determine the person liable to pay these costs.

Amendments to the Transfer Duty Act were proposed to include transfer duty on the sales of shares/members interest in property/mining right-owning entities. These amendments have not been enacted or promulgated per the Government Gazette.

**Stamp duty**
Certain transactions may attract stamp duty. The amount of stamp duty payable differs and is based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

<table>
<thead>
<tr>
<th>Transaction</th>
<th>Stamp duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agreements or contracts (other than those where duty is specifically provided for in the Act)</td>
<td>NAD 5</td>
</tr>
<tr>
<td>Lease agreement or lease</td>
<td>The stamp duty will be based on lease payments, together with additional considerations specified in the lease agreement</td>
</tr>
<tr>
<td>Transfer or issue of marketable securities and other share transactions</td>
<td>NAD 2 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction</td>
</tr>
<tr>
<td>Transfer deed relating to immovable property purchased</td>
<td>NAD 12 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction</td>
</tr>
</tbody>
</table>

Additional stamp duty of NAD 5 for every NAD 1,000 of debt secured is payable on the registration of a bond over immovable property.

**Annual duty**
Annual duty is levied in terms of the Companies Act at an amount of NAD 4 for every NAD 10,000 (or part thereof) of the issued share capital of a company, with a minimum duty of NAD 80 per annum. Issued share capital includes ordinary shares, share premium, and preference shares.

Since a branch does not issue share capital, the issued share capital of the head office will be used to calculate the annual duty payable in Namibia.

**Employee taxes**
Any remuneration paid by an employer to an employee will place an obligation on the employer to withhold employee taxes. The employee taxes are due on the 20th day of the month following the month during which the payment was made. The tax tables applicable to individuals are provided in the Taxes on personal income section of Namibia’s Individual tax summary at www.pwc.com/taxsummaries.

Late payment of employee taxes will result in penalties of 10% per month and interest of 20% per annum. Both penalties and interest are limited to the amount of tax outstanding.

**Social security contributions**
Social security contributions are payable by the employer for employees working in Namibia. Social security is based on a principle of 50/50 contributions from employers and employees. It is calculated at 0.9% of earnings, with a minimum monthly contribution of NAD 2.70 and a maximum monthly contribution of NAD 81 each (i.e.
Namibia, Republic of

the total maximum monthly contribution of both the employer and the employee will amount to NAD 162).

Workmen’s compensation
Under the Employees Compensation Act, employers are required to contribute to a fund that provides cash benefits for industrial injury, disability, and death. Contribution rates vary according to inherent occupational risk, from less than 1% in most low-risk commercial/administrative occupations to 8% for high-risk sectors (drilling, tunnelling, and rock-blasting). Employees whose annual remuneration exceeds NAD 81,300 are normally excluded from coverage.

Branch income
Branch income that is received or accrued from a source within, or deemed to be within, Namibia is taxable in Namibia based on the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may, therefore, not deduct fees paid to its foreign head office (unless a tax treaty provides for such a deduction), as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

Transfer pricing rules apply to transactions between a branch and cross-border related parties.

Income determination

Inventory valuation
Inventory is valued at cost for tax purposes in Namibia.

The last in first out (LIFO) basis of valuation is only accepted if:

- written consent was obtained from the Minister of Finance before such taxpayer renders one’s income tax return for the first year of assessment for which the LIFO basis was adopted by the taxpayer, and
- various conditions are met by the taxpayer as determined by the Minister of Finance.

Capital gains
Other than profits on the sale of mining and petroleum licences/rights, and the transfer of any share/interest (whether directly or indirectly) in a company owning a mineral/petroleum licence or right, capital gains are not taxed in Namibia.

Mining and Petroleum licences/rights
The sale, donation, expropriation, cession, grant, or any other alienation or transfer of ownership of any share or member’s interest in a company that holds a mineral or petroleum licence/right, whether directly or indirectly, has been included in the definition of gross income. The definition also specifically includes a sale of shares in a company for a licence or right to mine minerals or oil and gas in Namibia.

Dividend income
Dividends received are exempt from tax. Non-resident shareholders tax (NRST) should be withheld on dividends declared to non-resident shareholders. For more information on NRST, see the Withholding taxes section.

Interest income
Namibian companies are taxed on interest received from a Namibian source. Persons other than Namibian companies are subject to a final WHT on interest from banks and
unit trusts. Interest paid to non-residents is now subject to WHT on interest. For more information, see the Withholding taxes section.

**Partnership income**
The relevant partners of a partnership are regarded as the responsible taxpayers and not the partnership itself.

In practice, the assessment of a partnership is treated like that of a private business. The partnership is first treated as a business entity on its own in terms of income and expenditure. The profit or loss at the end of the year is then allocated to the individual partners. If they derived a profit from the partnership, it is added to their other non-partnership income; or if the partnership made a loss, the partners have the right to deduct it from their non-partnership income.

**Rental income**
Companies are taxed on rental income received from a Namibian source.

**Royalty income**
Companies are taxed on royalty income received from a Namibian source.

**Foreign income**
Corporate tax in Namibia is determined on the source basis; consequently, only income from a Namibian source or deemed Namibian source is subject to corporate tax.

---

**Deductions**

**Capital allowances**
The cost (including finance charges) of machinery, equipment, and other articles used by the taxpayer to generate income is deductible in three equal annual allowances. No apportionment is allowed where an asset is held for less than 12 months.

Buildings used by the taxpayer to generate income qualify for an initial allowance of 20% of erection costs in the year they are first brought into use. Thereafter, an annual allowance of 4% is deductible for the 20 following years. Additions to existing buildings (not alterations, improvements, or repairs) qualify for the same 20% and 4% deductions. Note that the allowance is calculated on the cost of erection and not the cost of acquisition. The allowance is also only calculated for a period of 21 years from the date of erection.

Registered manufacturers can claim 20% of the erection costs of the building in the year it is first brought into use, and 8% for ten years thereafter (see Manufacturing in the Tax credits and incentives section).

Mining exploration and initial development expenditure incurred before commencement of mining production are deductible in full in the first year that income is generated from the mine. Subsequent developmental expenditures are written off in three equal annual allowances.

Capital allowances may also be deducted with respect to patents, trademarks, leasehold improvements, etc.

A recovery or recapture of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recaptured by way of disposal, withdrawal from trade for non-trade purposes, or removal from Namibia. The recapture is calculated at the market value of the asset.
Namibia, Republic of

**Goodwill**
The amortisation of goodwill is not deductible for tax purposes and should be excluded from calculating taxable income.

**Start-up expenses**

**Mining**
The Income Tax Act allows exploration and initial development expenditure to be deducted in full during the year in which the mine commences with production. All exploration expenses incurred before the commencement of mining is therefore deferred until such time that the mine commences production.

**All other industries**
The general deduction formula determines that only expenses incurred in the production of income that are not of a capital nature may be claimed for tax purposes. The Income Tax Act defines income as ‘income in any year or period of assessment’.

**Interest expenses**
A deduction is allowed in respect of financing expenditure incurred in respect of any financing agreement for the acquisition of fixed assets utilised in ordinary trade activities.

The general deduction formula determines that only expenses incurred in the production of taxable income that are not of a capital nature may be claimed for tax purposes. Therefore, where the interest can be argued to be incurred in the production of income, the interest expense will be deductible.

Thin capitalisation legislation may be applied to interest paid on cross-border, related-party loans (see Thin capitalisation in the Group taxation section).

**Bad debt**
The Income Tax Act allows a specific deduction for bad debts, provided that the amount written off was previously included in the taxpayer’s income.

**Charitable contributions/donations**
A specific deduction for donations is allowed, provided that it is made to a registered welfare organisation or an approved educational institution. It is a further requirement that a certificate should be issued by the welfare organisation/educational institution in respect of the donation and submitted with the entity’s tax return in order for it to qualify as a deduction. However, this allowance may not create or increase a tax loss.

**Fines and penalties**
In terms of practise applied by Inland Revenue, tax penalties and fines are not deductible for tax purposes.

**Taxes**
Taxes levied on income are not allowed as a deduction.

**Net operating losses**
Assessed tax losses may be carried forward indefinitely if the company continues the same trade. Tax laws do not allow losses to be transferred to other members of a group, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

If a company ceases to trade for a full fiscal year, its assessed losses are forfeited, regardless of subsequent activities. Assessed losses are also reduced in the event of a compromise agreement with creditors.
Namibian tax legislation does not provide for the carrying back of tax losses.

**Payments to foreign affiliates**  
For information on payments to foreign affiliates, please refer to the Branch income section, Group taxation section, and Withholding taxes section.

**Group taxation**

No taxation of combined operations is allowed in Namibia where operations are conducted in a group.

**Transfer pricing**

Namibian transfer pricing legislation is aimed at enforcing the arm’s-length principle in cross-border transactions carried out between connected persons. It is based on guidance set out by the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for multinational enterprises and tax administrations.

The objective of the transfer pricing legislation is to provide taxpayers with guidelines regarding the procedures to be followed in the determination of arm’s-length prices, taking into account the Namibian business environment. It also sets out the Minister of Finance’s views on documentation and other practical issues that are relevant in setting and reviewing transfer pricing in international agreements.

The transfer pricing legislation is essentially aimed at ensuring that cross-border transactions between companies operating in a multinational group are fairly priced and that profits are not stripped out of Namibia and taxed in lower tax jurisdictions. The legislation achieves this by giving the Minister of Finance (who essentially delegates to the Directorate of Inland Revenue) the power to adjust any non-market related prices charged or paid by Namibian entities in cross-border transactions with related parties to arm’s-length prices and to tax the Namibian entity as if the transactions had been carried out at market-related prices.

In terms of the normal penalty provisions of the Income Tax Act, the Directorate of Inland Revenue may levy penalties of up to 200% on any amount of underpaid tax. Consequently, the Inland Revenue may invoke such provisions in the event that a taxpayer’s taxable income is understated as a result of prices that were charged in affected transactions, which were not carried out at arm’s length. Further, interest will be charged on the unpaid amounts at 20% per annum.

**Thin capitalisation**

The Minister of Finance may, if any amount of financial assistance provided by a foreign connected person is excessive in relation to a company’s fixed capital (being share capital, share premium, accumulated profits, whether capital or not), disallow, for income tax purposes, the deduction of any interest or other charges payable by the Namibian person on the ‘excessive portion’ of the financial assistance provided by the foreigner.

There is no guidance that provides a definition for ‘excessive’. Therefore, each case should be considered on the basis of the facts provided. The 3:1 ratio is applied by the Bank of Namibia for exchange control purposes, and this guideline is therefore deemed suitable until otherwise determined by Inland Revenue.

**Controlled foreign companies (CFCs)**

CFC rules are not applicable in Namibia.
Tax credits and incentives

Foreign tax credit
A tax credit may be claimed in Namibia for foreign taxes paid on dividends, royalties, and similar income, limited to the amount of tax payable in Namibia. Proof of the taxes paid in the foreign jurisdiction should be provided to Inland Revenue in order to claim the tax credit.

Manufacturing
The following is a high-level comparison of the different tax treatments for normal companies and registered manufacturing companies. This description does not consider the specific conditions that should be met in order for these incentives to be utilised.

Note that only the building allowance and preferential tax rate (as set out below) may create or increase a tax loss.

Building allowance
A building allowance is deductible with respect to buildings used for purposes of trade.

For normal companies, the allowance is calculated as 20% of the cost of erection in the year in which the building enters service and 4% during the 20 years that follow.

For registered manufacturing companies, the allowance is calculated as 20% of the cost of erection in the year in which the building enters service and 8% during the ten years that follow.

Employee allowances
For normal companies, expenditures for remuneration and training of employees are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of remuneration and training of employees that are directly engaged in the manufacturing process are deductible. However, this allowance may not create or increase a tax loss. Deductions sought for training should be approved by the government.

Export expenditure allowance
For normal companies, export expenditures incurred are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of costs incurred in an export country, in order to export Namibian manufactured goods to such country, may be deducted. However, this allowance may not create or increase a tax loss.

Export allowance
Any taxpayer (not required to be a registered manufacturer) that derives income from the export of goods manufactured in Namibia, excluding meat or fish, may deduct an export allowance equal to 80% of the taxable income derived from the export of manufactured goods.

Gross profit derived from the export of manufactured goods as a percentage of total gross profit should be used to determine the percentage of taxable income that is used to calculate the export allowance. However, this allowance may not create or increase a tax loss.

Transport allowance
For normal companies, land-based transport costs (i.e. transport by road or rail) are deductible for tax purposes.
For registered manufacturing companies, an additional allowance of 25% of land-based transport cost in respect of material and components used in the manufacturing process or equipment imported for direct use in the manufacturing process may be deducted. However, this allowance may not create or increase a tax loss.

**Preferential tax rate**

For normal companies with a financial year commencing on or after 1 January 2015, the normal tax rate for companies other than mining companies or registered manufacturers is 32%.

The tax rate for a registered manufacturer for taxable income with respect to the manufacturing activity for which they are registered is 18%. This preferential rate is applicable for a period of ten years from registration as a manufacturer.

**Export Processing Zones (EPZs)**

In order to become an EPZ company, a particular entity must register with the EPZ governing body and obtain approval from Inland Revenue.

An EPZ company qualifies for the following benefits:

- The company is exempt from corporate tax.
- No VAT is payable on the sale of goods or services rendered in the zone.
- No VAT is payable on goods imported or manufactured in the zone.
- No customs or excise duty is payable on goods imported into the zone.
- No stamp duty or transfer duty is payable in relation to the transfer of movable or immovable property in the zone.
- A 75% refund of expenditures incurred in training Namibian citizens.
- Some of the provisions in the Labour Relations Act do not apply in the zone.

Enterprises must comply with the following requirements in order to qualify for EPZ status:

- Goods must be exported to countries other than countries in the SACU.
- Industrial employment must be created or increased.
- Namibia’s export earnings must be increased as a result of manufactured goods exported.

EPZ companies may not be involved in retail business operations.

**Withholding taxes**

WHTs are applicable where certain payments are made to non-Namibian residents.

**Dividends**

Dividends declared by a Namibian company to a non-resident holding company are subject to NRST, a WHT. NRST is payable at the standard rate of 10% if at least 25% of shares are held in the Namibian company, unless DTA relief is available. Where less than 25% of shares are held in the Namibian company, the NRST payable is 20%, unless DTA relief is available.

NRST is payable within 20 days after declaration of a dividend.

**Interest**

A WHT of 10%, calculated on the gross amount of interest, is payable on interest accruing to any person, other than a Namibian company, from a registered Namibian banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.
Namibia, Republic of

Namibian companies, however, are taxed on interest at the corporate tax rate.

It is the obligation of the financial institution to withhold the tax and pay such tax to the revenue authorities.

WHT of 10% is payable on the interest accruing or paid to a non-resident company. The WHT is payable within 20 days after the interest payment was made. Interest is deemed to be paid on the earlier of the date on which the interest is paid or becomes due and payable.

Treaty relief may be available.

**Royalties or similar payments**

WHT on royalties are payable when a Namibian company pays a royalty to a non-resident. WHT is levied at a fixed rate of 10% and is payable within 20 days after the end of the month during which the liability for payment is incurred.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula, or process, or any other property or right of a similar nature. A royalty also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Namibia. The nature of fees payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty. It also include payments made for the use or right to use industrial, commercial, or scientific equipment (i.e. rentals).

Treaty relief may be available.

**Services**

Any Namibian resident paying a management, consultancy, entertainment, or directors fee to a non-resident must withhold tax at 10%.

Management and consulting fees are specifically defined as: “any amount payable for administrative, managerial, technical, or consultative services or any similar services, whether such services are of a professional nature or not”.

A branch is specifically included in the definition of a resident.

The rate is subject to DTA relief, where applicable.

**Summary of WHT payable**

The WHT rates and treaty relief for Namibian DTAs can be summarised as follows. Note that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, interest, and royalties in the various treaties should also be considered.

<table>
<thead>
<tr>

Notes
1. Lower rate applies where at least 25% of shares are held in the Namibian company. Higher rate applies otherwise.
2. Namibian companies are taxed at the corporate tax rate on interest received.
3. Lower rate applies where at least 10% of shares are held in the Namibian company. Higher rate applies otherwise.
4. Rate depends on shareholding.
5. Lower rate applies where at least 25% of shares are held in the Namibian company and recipient directly invested at least 100,000 United States dollars (USD) in the equity capital of the company paying the dividend. Higher rate applies otherwise.
6. 5% where at least 50% of shares are held in the Namibian company. 10% where at least 25% of shares are held in the Namibian company. 15% otherwise.
7. Local rates are lower than the 15% rate per the treaty.

Mining royalties
The Minerals (Prospecting and Mining) Act levies a royalty on minerals won or mined by a licence holder in Namibia, based on the table below:

Tax administration

Taxable period
The tax year for companies and close corporations is aligned with the financial year.

Tax returns
The income tax return is due within seven months after the financial year-end of the company and can be extended to five months after the seventh month due date, provided that no other prior year income tax returns are outstanding.

Payment of tax
The first provisional payment for income tax is due within six months from the commencement of the company's financial year (at least 40% of tax payable at year-end is paid on first submission). The second provisional payment is due on/before the last day of the respective tax year (at least 80% of tax payable at year-end is paid on second submission). The final provisional payment is due within seven months after the financial year-end of the company.

WHT on dividends are due within 20 days after declaration of the dividend.
Namibia, Republic of

WHT on royalties or similar payments are due within 20 days after the end of the month during which the liability for payment of the royalty was incurred.

WHT on services is payable to Inland Revenue within 20 days after the end of the month during which the amount was deducted or withheld.

WHT on interest is due within 20 days after the end of the month during which the interest was paid. Interest is deemed to be paid on the earlier of actual payment or when the interest becomes due and payable.

It is advised that if relief is available under the DTA, a nil form should still be submitted when payment is made to non-residents. The amount of DTA relief claimed should be disclosed on the form submitted.

Penalties and interest
The penalties and interest due for late submissions and payments can be summarised as follows:

<table>
<thead>
<tr>
<th>Tax area</th>
<th>Reason</th>
<th>Penalty</th>
<th>Interest (%)</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

* Both penalties and interest are limited to the amount of taxes outstanding.

Anti-avoidance
Note that the Income Tax Act, Act 24 of 1981, contains an anti-avoidance section, Section 95, which enables the Receiver of Revenue to disregard the implications of a transaction or scheme if it can be proven that:

• such transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Act
• such transaction or scheme was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, or has created rights or obligations that would not normally be created between persons dealing at arm’s length under a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, and
• such transaction or scheme was entered into or carried out solely or mainly for the purposes of the avoidance or the postponement of liability for the payment of any tax duty or levy.
The Receiver of Revenue can, at its sole discretion, impose Section 95 on any transaction or scheme, which will place the onus on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

**Tax audit process**
The tax audit process is a discretionary process instituted by Inland Revenue. Inland Revenue will inspect the validity of invoices and whether such expenses are deductible for tax purposes.

Generally, income tax audits are initiated on amounts being refunded to taxpayers, with the focus being on high-value refunds.

Subsequent to an audit, a letter will be sent to the taxpayer indicating changes made to the return of income.

In the event that the taxpayer agrees with the outcome, an assessment is issued. Where the taxpayer is not satisfied with the outcome, an objection may be lodged within 90 days.

**Statute of limitations**
There is no statute of limitation in respect of claiming a refund for excess income tax paid. Debts to the state prescribe after 30 years.

**Topics of focus for tax authority**
Topics of focus for the tax authority include import VAT, general compliance, the construction industry, and employee taxes.
Significant developments

A new list of pioneer industries and products has been approved
The federal government of Nigeria embarked on a review of the pioneer incentive scheme in order to address identified lapses, abuses, and loopholes. Under the scheme, eligible companies are exempted from corporate income tax (CIT) for three years, which may be extended for an additional one or two years. The Ministry of Industry, Trade, and Investment has now released a list of only 44 industries and products that are eligible for the pioneer status. Irrespective of the introduction of the new list, the Federal Executive Council is reviewing the pioneer incentive and has suspended all pending applications for the incentive. It is not clear how long this suspension will last before the regulator is allowed to consider new and pending applications.

Nigeria joins the Organisation for Economic Co-operation and Development (OECD) Convention on Mutual Administrative Assistance in Tax Matters
The Nigerian government ratified the Convention on Mutual Administrative Assistance in Tax Matters, an initiative of the OECD. The Convention is designed to facilitate exchange of information on tax matters between the tax jurisdictions of the signatory countries and is in force from 1 September 2015.

The ratification of the Convention is a significant step in the administration of taxes in Nigeria. This is likely to give the Federal Inland Revenue Service (FIRS) new lines of enquiry about the tax affairs of multinational companies operating in Nigeria. It also means that the FIRS must surrender itself for peer review and must meet a minimum standard of tax administration by global benchmark.

The new OECD base erosion and profit shifting (BEPS) action plans and its impact in Nigeria
The OECD released its final BEPS package containing measures that will significantly change existing international tax rules. The report is the result of a two-year work and extensive consultations with a broad range of stakeholders, including Nigeria, that participated in the OECD Committee on Fiscal Affairs.

It is expected that different countries will begin to take steps to implement the BEPS recommendations through changes to existing legislation. Although Nigeria is not a member of the OECD, the BEPS documents will have an impact on the Transfer Pricing Guidelines as contained in the Nigerian Transfer Pricing Regulations.

A new order has been issued to amend the approved list of taxes and levies
The Schedule to the Taxes and Levies (Approved List for Collection) Act has been amended in an official gazette issued in May 2015 by the Finance Minister. The new Order amends the existing list of taxes and levies to be collected by the three tiers
Nigeria

of government and seeks to harmonise tax collection between the states and local governments. The changes are effective from 26 May 2015.

Nigeria is set to ratify double tax treaties (DTTs) with South Korea, Spain, and Sweden
The tax treaties with South Korea, Spain, and Sweden are still being ratified.

Stamp duties payable on banking transactions
The Central Bank of Nigeria has directed all deposit money banks and financial institutions to commence the charging of 50 Nigerian naira (NGN) on all receipts issued as an acknowledgement of banking transactions on electronic transfers and teller deposits of NGN 1,000 and above.

Taxes on corporate income
Resident companies are liable to CIT on their worldwide income while non-residents are subject to CIT on their Nigeria-source income.

The CIT rate is 30%, assessed on a preceding year basis (i.e. tax is charged on profits for the accounting year ending in the year preceding assessment).

Investment income paid by a Nigerian resident to a non-resident is sourced in Nigeria and subject to withholding tax (WHT) at source, which serves as the final tax.

In respect of business profits, a non-resident company that has a fixed base or a permanent establishment (PE) in Nigeria is taxable on the profits attributable to that fixed base. As such, it is required to register for CIT and file its tax returns. Any WHT deducted at source from its Nigeria-source income is available as offset against the CIT liability.

Small company rates
For small companies in the manufacturing industry and wholly export-oriented companies with turnover not exceeding NGN 1 million, the CIT rate is reduced to 20% in the first five calendar years of operation.

Petroleum profit tax (PPT)
PPT is a tax on the income of companies engaged in upstream petroleum operations in lieu of CIT.

The PPT rates vary as follows:

- 50% for petroleum operations under production sharing contracts (PSC) with the Nigerian National Petroleum Corporation (NNPC).
- 65.75% for non-PSC operations, including joint ventures (JVs), in the first five years during which the company has not fully amortised all pre-production capitalised expenditure.
- 85% for non-PSC operations after the first five years.

Tertiary education tax
Tertiary education tax is imposed on every Nigerian resident company at the rate of 2% of the assessable profit for each year of assessment. The tax is payable within two months of an assessment notice from the FIRS. In practice, many companies pay the tax on a self-assessment basis along with their CIT.

For companies subject to PPT, tertiary education tax is to be treated as an allowable deduction. For other companies, income/profit taxes are not deductible in arriving at
taxable income. Non-resident companies and unincorporated entities are exempt from tertiary education tax.

**Minimum tax**
Minimum tax is payable by companies having no taxable profits for the year or where the tax on profits is below the minimum tax. However, companies in the first four calendar years of business, companies engaged in the agriculture business, or companies that have foreign equity capital of at least 25% are exempt from minimum tax.

Minimum tax payable is calculated as follows:

- Where the turnover of the company is NGN 500,000 or below, minimum tax is the highest of:
  - 0.5% of gross profits
  - 0.5% of net assets
  - 0.25% of paid-up capital, or
  - 0.25% of turnover of the company for the year.
- Where the turnover is higher than NGN 500,000, minimum tax is the highest of the calculations listed above plus 0.125% of turnover in excess of NGN 500,000.

**Alternative tax on distribution**
There is a tax on distribution where a company pays a dividend in excess of its taxable profit. Such a company will be charged tax on the dividend paid as if the dividend is the taxable profit of the company for that year of assessment.

**Enforcement of advance CIT on interim dividends**
The new leadership at the FIRS has commenced the strict enforcement of advance CIT on interim dividends. Companies that declare interim dividends are required by the law to be subject to advance CIT at 30% of the interim dividend paid. The advance CIT is creditable against the final CIT computed at the end of the year.

**Alternative tax on deemed profit**
The law allows the FIRS to assess and charge companies to tax on a fair and reasonable percentage of turnover under the following circumstances:

- When the trade or business produces no assessable profits.
- When the trade or business produces assessable profits that, in the opinion of the Board of the FIRS, are less than might be expected to arise from that trade or business.
- When the true amount of the assessable profits of the company cannot be ascertained.

**Local income taxes**
CIT is payable only to the federal government. State governments collect income taxes of individuals and unincorporated entities, while local governments are only allowed to collect levies and rates but not income tax.

**Corporate residence**
A company is considered resident in Nigeria if such a company is registered or incorporated under the Companies and Allied Matters Act. This means that a company formed outside Nigeria under the laws in force in the foreign territory will be considered as a non-resident company for CIT purposes.

**Permanent establishment (PE)**
Fixed base is not defined but is generally considered to be a location with a degree of permanence. The following would generally not be considered to be a fixed base:
Nigeria

- The use of facilities solely for the purpose of storage or display of goods or merchandise.
- The use of facilities solely for the collection of information.

Other activities that could trigger a tax presence in Nigeria include a dependent agency arrangement, execution of a turnkey project, or artificial arrangements between related parties.

**Other taxes**

**Value-added tax (VAT)**
The standard VAT rate is 5%. The government has confirmed that this rate will not change in 2016.

Zero-rated items include non-oil exports, goods and services purchased by diplomats, and goods and services purchased for use in humanitarian donor-funded projects. Exempt items include plants and machinery for use in export processing zones (EPZs) or free trade zones (FTZs), basic food items, medical products and services, pharmaceutical products, books and educational materials, and exported services. Commissions on stock market transactions are also exempted from VAT.

Government agencies and oil and gas companies are required to deduct at source VAT charged by their suppliers and remit it to the tax authority. All other organisations are required to collect VAT charged on their invoices from their customers for filing and payment to the tax authority.

The FIRS recently implemented a platform for auto tracking and remittance of VAT known as FIRS VAT-Collect. Some of the intended users of the system are domestic airlines (for instant remittance of VAT on their ticket sales) and other retailers. The effective compliance date for all domestic airlines to migrate to the VAT platform was September 2015.

**Customs duties**
Customs duties in Nigeria are levied only on imports. Rates vary for different items, typically from 5% to 35%, and are assessed with reference to the prevailing Harmonized Commodity and Coding System (HS code).

**Excise duties**
Excise duty is applicable on beer and stout, wines, spirits, cigarettes, and homogenised tobacco manufactured in or imported into Nigeria at 20%.

**Property taxes**
Property taxes in Nigeria are usually levied annually by the state government with varying rates depending on the state and the location of the property within the state. The two major property taxes are governor’s consent fee and land registration fee. In Lagos (which is the economic hub of Nigeria), governor’s consent fee, land registration fees, and other levies payable to the state give rise to a total levy of 3% of the fair value of the land.

Also, Right of Occupancy fee and tenement rates are chargeable by state and local government authorities.

**Stamp duties**
Under the Stamp Duty Act, stamp duty is payable on any agreement executed in Nigeria, or relating, whatsoever, to any property situated in or to any matter or thing done in Nigeria. Instruments that are required to be stamped under the Stamp Duties Act must be stamped within 40 days of first execution.
Stamp duty is chargeable either at fixed rates or ad valorem (i.e. in proportion to the value of the consideration), depending on the class of instrument. Stamp duty is imposed at the rate of 0.75% on the authorised share capital at incorporation of a company or on registration of new shares.

All deposit banks and financial institutions are required to charge stamp duties of NGN 50 on every eligible transaction above NGN 1,000. There are exemptions for transactions between accounts held by the same bank customer and for salary accounts.

**Capital gains tax (CGT)**

Gains accruing to a chargeable person (individual or company) on the disposal of chargeable assets shall be subject to tax under the CGT Act at the rate of 10%. There is no distinction between long-term and short-term gains and no inflation adjustment to cost for CGT purposes.

All forms of assets, including options, debts, goodwill, and foreign currency, other than those specifically exempt, are liable for CGT. The gains on the disposal of shares are exempt from CGT.

CGT is applicable on the chargeable gains received or brought into Nigeria in respect of assets situated outside Nigeria.

Capital losses are not allowed as an offset against chargeable gains accruing to a person from the disposal of any assets.

**Information technology levy**

A company with an annual turnover of NGN 100 million or more is required to pay 1% of its profit before CIT as information technology tax. This levy is deductible for CIT purposes when paid (typically in the year of assessment following that in which the payment was made).

This tax is applicable to:

- Banking and other financial activities, including capital and money market operators, mortgage institutions, and micro-finance banks.
- Insurance activities, including brokerage.
- Pension fund administration, pension management, and related services.
- GSM service providers and telecommunication companies.
- Cyber and internet services providers.

**Levy on contracts awarded in the upstream oil and gas sector**

The Nigerian Content Development Act was introduced to increase the level of Nigerian participation in the oil and gas industry. The Act imposes a levy of 1% on every contract awarded in the upstream oil and gas sector of the economy. Any violation of the Act is liable for a fine of 5% of the contract value and may result in outright cancellation of the contract.

**Payroll contribution**

Under the Employee Compensation Act, all employers were required to contribute 1% of their payroll cost in the first two years of commencement of the Act (2010 to 2012). Subsequently, assessments were expected to be issued by the Nigeria Social Insurance Trust Fund, the body empowered to administer and implement the Act. In practice, a contribution of 1% of payroll continues to apply.

**Pension contributions**

Employers with at least 15 employees are required to participate in a contributory pension scheme for their employees. The minimum contribution is 18% of monthly emolument (with a minimum contribution of 10% by the employer and 8% by
the employee). If the employer decides to bear all the contribution, the minimum contribution is 20% of monthly emolument. Mandatory and/or voluntary contributions by the employers are deductible for CIT purposes.

**National Housing Fund (NHF) contributions**

NHF contributions are applicable to Nigerian employees earning a minimum of NGN 3,000 per annum. The employer is required to deduct 2.5% of basic salary from employees earning more than NGN 3,000 per annum and remit it to the Federal Mortgage Bank of Nigeria within one month of deduction.

---

**Branch income**

Except in rare circumstances, it is illegal for a non-resident company to operate through a branch in Nigeria. The Nigeria-source income of a non-resident company is taxable at the CIT rate of 30% (see the *Taxes on corporate income* section for more information).

---

**Income determination**

The following income is subject to CIT in Nigeria:

- Profits accruing in, derived from, brought into, or received in Nigeria in respect of any trade or business.
- Dividends, interest, royalties, discounts, charges, or annuities.
- Rent or any premium arising from the right granted to any person for the use or occupation of any property, where applicable.
- Any source of annual profits or gain not falling within the preceding categories.
- Fees, dues, and allowances (wherever paid) for services rendered.
- Any amount of profits or gains arising from the acquisition or disposal of short-term money instruments like federal government securities, treasury bills, treasury or savings certificates, debenture certificates, and treasury bonds.

---

**Inventory valuation**

The first in first out (FIFO) valuation method is commonly used. Average and standard cost methods are also allowed, but last in first out (LIFO) is not permitted. Other than the accounting requirement in the local generally accepted accounting principles (GAAP), there are no special statutory provisions for inventory valuation.

---

**Capital gains**

Capital gains are not subject to CIT, but may be subject to CGT. See *Capital gains tax* in the *Other taxes* section for more information.

---

**Dividend income**

Dividends received by a Nigerian resident company from another Nigerian resident company are taxable at source (see the *Withholding taxes* section for more information) and not subject to further tax.

Dividends received from non-resident companies are taxable except if repatriated into Nigeria through government approved channels (i.e. any financial institution authorised by the Central Bank of Nigeria to deal in foreign currency transactions).

Dividends received from small manufacturing companies are exempt for CIT purposes during the first five years of operation. Dividends from investments in wholly export-oriented businesses are also exempt.
Stock dividends
Stock dividends (bonus shares) are not taxable at source or included in the taxable income of the recipient company.

Interest income
Interest payable to a non-resident investor is liable to WHT at 10%, which is the final tax. Recipients who are resident in a country with a DTT with Nigeria enjoy a reduced rate of 7.5%. Interest received by a Nigerian company is liable to tax at the CIT rate of 30% with tax withheld at 10% available as an offset against the final tax liability.

Interest on government bonds is tax exempt. Interest on foreign currency domiciliary accounts is also exempt.

Other significant items
The following entities’ income or profit is exempt for CIT purposes:

- Statutory or registered friendly societies.
- Co-operative societies registered under any ecclesiastical, charitable, or education establishments of a public character.
- Profit of a company established within an EPZ or FTZ (see the Tax credits and incentives section).
- Profit of a registered trade union.
- Export profits, as long as proceeds are brought into Nigeria through government approved channels and invested in raw materials, spare parts, and plant and machinery (see Export incentives in the Tax credits and incentives section).

Foreign income
A Nigerian resident company is taxable on its worldwide income. On the other hand, a non-resident company is subject to tax only on income derived from Nigeria.

Dividends, interest, rents, and royalties earned abroad and brought into Nigeria through government-approved channels are exempt from Nigerian tax; otherwise, the income is taxable at the CIT rate of 30% and tertiary education tax at 2%. Government-approved channels mean the Central Bank of Nigeria and any bank or financial institution authorised to carry out foreign exchange transactions.

Taxable foreign income earned by a Nigerian tax resident entity cannot be legally deferred.

Deductions
Expenses are deductible for CIT purposes if they are wholly, reasonably, exclusively, and necessarily incurred for the business or trade.

Depreciation
Capital allowances are calculated on a straight-line basis. Capital allowances claimable in any year are restricted to two-thirds of assessable profits for all companies, except companies in the manufacturing and agricultural sectors, which are excluded from this restriction.

The following are the capital allowance rates on fixed assets (qualifying expenditures):

<table>

### Notes

1. 95% initial allowance for plant used in agricultural production; others 50%.
2. 95% initial allowance is granted for motor vehicles used for public transportation if the company has a fleet of at least three buses; all other motor vehicles 50%.

The initial allowance is first deducted, and the balance is written off on a straight-line basis over a fixed period, depending on the rates of annual allowance. There is a requirement that assets not yet disposed of cannot be fully written off in the books. A nominal amount of NGN 10 per asset must be retained in the books till the assets are disposed of. However, where 95% has been claimed as an initial allowance, the 5% balance is the value that must be maintained in the books until the final disposal of the asset.

When assets are sold, the proceeds over the tax written-down value are taxed at 30% to the extent of the allowances already claimed.

**Goodwill**

There is no tax deduction for goodwill.

**Start-up expenses**

Start-up expenses are not specifically stated as non-deductible in the tax law, but, in practice, they are usually not allowed by the tax authority. This is based on the assumption that start-up expenses are not directly attributable to any taxable income of the company, which is a fundamental condition for tax deductibility of expenses.

**Interest expense**

Interest on money borrowed and employed in producing taxable income is a deductible expense. There is currently no thin capitalisation regulation in Nigeria, but general anti-avoidance rules are usually applied to limit deductible interest on related-party loans.

**Bad debt**

Bad debt incurred in the course of trade is deductible.

**Charitable contributions**

Donations are deductible, subject to the provisions of the law.

**Fines and penalties**

Any punitive payments for default or violation of law are expressly not deductible for CIT purposes. In practice, this is usually extended to include default surcharges and other avoidable fines.

**Taxes**

Any tax on income or profit is not deductible except where such tax was paid on profit earned outside Nigeria. In this case, if the source country has no DTT with Nigeria, the foreign tax paid is allowed as a deduction for CIT purposes. State and local taxes (business rates) and levies may be deducted from taxable income.

**Other significant items**

Other deductible expenses include the following:
• Sum payable by way of interest on capital borrowed.
• Rent for the period.
• Expenses incurred in respect of salary and wages.
• Expenses incurred for repair of assets.
• Liability incurred for purpose of trade.
• R&D costs.

**Net operating losses**
Losses can be carried forward indefinitely, except for insurance companies where losses can only be carried forward for four years. Losses made from one line of business cannot be relieved against another line of business. Losses cannot be carried back.

**Payments to foreign affiliates**
Payments considered to be artificial are not deductible for CIT purposes. Royalties, management fees, and technical fees require the approval of the National Office for Technology Acquisition and Promotion (NOTAP) for exchange control purposes and for tax deduction. NOTAP-approved royalties and technical fees are limited to a range of 1% to 5% of net sales, while management fees are limited to a range of 2% to 5% of profit before tax, and consultancy fees are limited to 5% of total project cost. Technical fees are limited to approved man-hour rates.

Trademark fees are disallowed where the trademark owner has more than 75% equity participation in the local company.

**Group taxation**
There are currently no provisions for group taxation, group relief, or group filing of tax returns in Nigeria. Each legal entity within a group is treated as distinct and separate for CIT purposes.

**Transfer pricing**
The transfer pricing regulations are applied in a manner consistent with the arm’s-length principle in Article 9 of the United Nations (UN) and OECD Model Tax Conventions on Income and Capital; and the OECD Transfer Pricing Guidelines for Multi-national Enterprises and Tax Administrations. However, where there are inconsistencies between the model conventions and the local legislation, the provisions of the relevant local tax laws shall prevail.

The rules cover all transactions between ‘connected taxable persons’, which is broadly defined to include individuals, PEs created by head offices, subsidiaries, associates, partnerships, joint ventures, and trusts to the extent that they participate directly or indirectly in the management, control, or capital of another, or both of which have common control, management, or shareholders. Specifically, the rules apply to sale and purchase of goods; lease or sale of tangible assets; licensing, transfer, or use of intangible assets; provision of services; lending or borrowing of money; manufacturing arrangements; and any transaction that may affect profit and loss or any other incidental matter.

The rules are applicable to both domestic and cross-border related-party transactions.

**Thin capitalisation**
Nigeria has no thin capitalisation rules. However, interest charged between related parties is expected to reflect arm’s-length transactions. The tax authority may disallow any related-party interest considered to be excessive.

Note that the tax authorities are currently considering introducing a formal thin capitalisation rule with a likely 3:1 debt-to-equity ratio.
Controlled foreign companies (CFCs)
There are no specific CFC rules in Nigeria.

Tax credits and incentives
Nigeria has various tax incentives intended to encourage investment in key sectors of the economy, as follows.

Tax holidays
Pioneer companies investing in specified industrial activities may, on application, be granted a tax holiday for three years initially, which may be extended for up to two years upon satisfaction of specified conditions. Examples of economic activities that may be granted a tax holiday include glass and glassware manufacturing, manufacturing of fertilisers, and steel manufacturing.

A new company that engages in the mining of solid minerals is exempt from tax for the first three years of its operation.

Rural location incentives
Certain incentives are available to companies located in rural areas. The incentives take the form of tax reductions at graduated rates for enterprises located at least 20 kilometres from available electricity, water, and tarred roads.

Export incentives
Export processing zones (EPZs) and free trade zones (FTZs) are locations within Nigeria designated by the government as free areas where export trade activities can be carried on free of tax and foreign exchange restrictions.

A company that is engaged in an approved manufacturing activity in an EPZ and incurs expenditures in its qualifying building and plant equipment is entitled to 100% capital allowance in that year of assessment.

In addition, a company that is 100% export oriented but located outside an EPZ will enjoy a three year tax holiday, provided the company is not formed by splitting up or reconstruction of an already existing business and the export proceeds form at least 75% of its turnover.

Profits of companies whose supplies are exclusively inputs to the manufacture of products for export are exempt from tax. Such companies are expected to obtain a certificate of purchase of the input from the exporter in order to claim tax exemption.

Where plant and machinery are transferred to a new company, the tax written down value of the asset transferred must not exceed 25% of the total value of plant and machinery in the new company. The company should also repatriate at least 75% of the export earnings to Nigeria and place it in a Nigerian domiciliary account in order to qualify for a tax holiday.

Profits of any Nigerian company in respect of goods exported from Nigeria are exempt from tax, provided that the proceeds from such exports are repatriated to Nigeria and are used exclusively for the purchase of raw materials, plant, equipment, and spare parts.

In order to streamline the administration of permissible taxes within the tax free zones, the Oil and Gas Free Zone Authority (OGFZA) has established the Free Zones Tax Administration (FZTA) Unit with effect from January 2015. Going forward, all tax matters relating to the free zones will be coordinated by the FZTA.
Gas utilisation incentives
Companies engaged in gas utilisation are entitled to:

- A tax-free period for up to five years.
- Accelerated capital allowance after the tax-free period.
- Tax-free dividends during the tax-free period.

Tourism incentives
25% of the income derived from tourism by hotels in convertible currencies is exempt from tax if such income is put in a reserve fund to be utilised within five years for expansion or construction of new hotels and other facilities for tourism development.

Interest incentives
Interest accruing on deposit accounts of a non-resident company is tax-exempt, provided the deposits are made by transfer of funds to Nigeria on or after 1 January 1990 and the depositor does not become non-resident after making the deposit while in Nigeria.

Interest on foreign-currency domiciliary accounts is also tax-exempt.

Interest on any foreign loans, and interest on any loan granted by a bank for the purpose of manufacturing goods for export, is exempt from tax as follows:

<table>
<thead>
<tr>
<th>Repayment period</th>
<th>Moratorium</th>
<th>Exemption (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over 7 years</td>
<td>Not less than 2 years</td>
<td>100</td>
</tr>
<tr>
<td>5 to 7 years</td>
<td>Not less than 1.5 years</td>
<td>70</td>
</tr>
<tr>
<td>2 to 4 years</td>
<td>Not less than 1 year</td>
<td>40</td>
</tr>
</tbody>
</table>

Interest on any loan granted by a bank to a company engaged in agricultural trade, fabrication of local plant and machinery, or as working capital to any cottage industry is 100% tax free if the loan has a moratorium of not less than 18 months and the rate of interest is not more than the base lending rate.

Investment allowances
An investment allowance of 10% on the cost of qualifying expenditures in respect of plant and machinery is available as a deduction from assessable profits in the year of purchase. There is no restriction to the full claim of capital allowance in any year of assessment for companies in the mining, manufacturing, and agricultural sectors.

Foreign tax credit
Nigeria does not grant automatic tax credits to Nigerian companies for foreign tax on income derived from other countries. The Nigerian tax laws already provide for tax exemption for dividends, interest, and royalties.

Foreign tax credits are only granted based on the provisions of existing DTTs and partial credits as applicable to Commonwealth countries. In this regard, full tax credits are usually provided for in the DTTs. Tax credits for members of Commonwealth countries are granted at up to half the Nigerian CIT rate.

Withholding taxes
WHT is applicable on specified transactions as indicated below. There is no distinction between the WHT rates for resident companies or individuals and non-resident companies or individuals.
Types of payment | WHT for companies (%) | WHT for individuals (%)
--- | --- | ---
Dividends, interest, and rents | 10 | 10
Directors fees | N/A | 10
Hire of equipment | 10 | 10
Royalties | 10 | 5
Commission, consultancy, technical, service fees | 10 | 5
Management fees | 10 | 5
Construction/building (excluding survey, design, and deliveries) | 2.5 | 5
Contracts other than sales in the ordinary course of business | 5 | 5

The period for filing WHT is 21 days after the duty to deduct arose for deductions from companies.

The penalty for failure to deduct or remit tax is 10% of the amount not deducted/remitted.

Note that companies are required to submit, in electronic form, a schedule of all their suppliers for the month showing the tax identification number (TIN), address of the suppliers, the nature of the transaction, WHT deducted, and invoice number.

**Double tax treaties (DTTs)**

Nigeria has DTTs with the countries listed in the table below. Nigeria also has tax treaties with Kenya, Mauritius, and Poland; however, these treaties have not been ratified by the Nigerian National Assembly. The tax treaties with South Korea, Spain, and Sweden are still being ratified.

* The tax treaties with South Korea, Spain, and Sweden are still being ratified.
**Tax administration**

**Taxable period**  
The taxable period is the fiscal year, which runs from 1 January to 31 December.

**Tax returns**  
Companies are required to register for tax and file their audited accounts and tax computations with the FIRS within six months of their financial year end on a self-assessment basis or 18 months after incorporation (whichever comes first). A company may file an application for extension of filing tax returns for up to two months at the discretion of the FIRS.

Upon registration, a company is issued a TIN, which serves as the company’s file number for all federal taxes and future correspondence with the FIRS.

The company must file the following documents with the tax authority on an annual basis:

- Tax computation for the relevant year of assessment.
- The audited financial statements for the respective period; this should be in conformity with the International Financial Reporting Standards (IFRS).
- A duly completed and signed self-assessment form for CIT.
- Evidence of remittance of the income tax liability (partly or in full).

PPT is payable on an actual year basis. Estimated tax returns must be filed within two months of the fiscal year. Actual tax returns should be filed within five months after the end of the accounting period, that is, not later than 31 May.

**Assessment**  
Nigerian companies file their tax returns based on a self-assessment system where the taxpayer prepares its annual returns and determines its tax liability. However, the FIRS may apply a best of judgment (BOJ) assessment where it is of the opinion that the tax returns filed are deliberately misstated or where no returns are filed within the stipulated period.

**Payment of tax**  

**CIT**  
A company that files its self-assessment within six months after the accounting year-end can apply to the FIRS in writing to pay its income tax in instalments. The maximum number of instalments the FIRS may approve is three. Evidence of the first instalment has to accompany the tax returns filed in order to qualify for the instalment payment. However, all payments have to be made not later than eight months after the financial year-end.

Assessments are made on a preceding year basis. This means that the financial statements for a period ended in 2015 will form the basis for the 2016 year of assessment.

**PPT**  
Payments with respect to PPT in any accounting period of 12 months are made in 12 instalments, with a final 13th instalment (if there is an underpayment). The first instalment for the year is due by the end of March.

**Penalty for non-compliance**  
Failure to file CIT returns attracts a penalty of NGN 25,000 for the first month and NGN 5,000 for each subsequent month of default. Late payment of CIT attracts a 10% penalty and interest at the commercial rate.
Nigeria

Late submission of PPT returns attracts an initial penalty of NGN 10,000 and NGN 2,000 for each day such failure continues, while late payment of tax attracts a penalty of 5% of the tax not paid.

**Tax audit process**

Generally, the tax authority will commence a desk examination of a taxpayer’s returns immediately after filing. This may be followed by a tax monitoring exercise whereby tax officers visit taxpayers to conduct an interview and on-site high level review of their tax affairs.

Random or specific tax audit may be carried out usually within six years of filing tax returns. In unusual cases, a back-duty tax investigation may be conducted for more than six years, especially where a tax fraud or wilful default is suspected.

In the past, tax audits took a long time to conclude, usually between three to five years. However, the tax authorities are seeking ways to improve the average turnaround time.

**New methodology for tax audit**

FIRS has now implemented an audit methodology that contains a dashboard for monitoring the progress of tax audits. Altogether there is a timescale of three months from commencement of audit to completion broken into one or two weeks for different activities (field work, initial report, reconciliation meetings, assessment). Colour green, amber, or red are used to indicate if everything is ‘on time’, ‘becoming due’, or ‘overdue’ respectively.

**Statute of limitations**

The tax authority may carry out a tax audit and issue an additional assessment within six years from the relevant tax year. However, the limitation does not apply in the event of a fraud, wilful default, or neglect by the company.

**Topics of focus for tax authorities**

The tax authorities are currently exploring ways to generate more tax revenue. As a result, certain areas of taxation, such as transfer pricing, filing of tax returns by PEs, and review of tax incentives and waivers have become a central focus for tax authorities.

There has been increased scrutiny by the FIRS on related-party transactions as a way of preventing taxpayers from shifting profits away from Nigeria. It is expected that transfer pricing audits are expected to be an area of focus in the next one to two years.

Further, for non-resident entities that create a PE in Nigeria, the tax authorities are focused on ensuring that they file full tax returns, including audited accounts as opposed to filing on a deemed-profit basis. It is expected that the expenses of these PEs will be scrutinised for tax deductibility.

The tax authorities at the federal and state levels are sealing up companies, putting up non-compliance stickers, and holding principal officers of organisations to public scrutiny and prosecution under the tax law for non-compliance in terms of tax default or failure to make timely payments or to file tax returns. On a related note, the Lagos state government has set-up a rapid tax prosecution unit to prosecute tax evaders with considerations to a jail term.
Significant developments

Rwanda enacted a new investment code (Law no. 06/2015 of 28 March 2015) to replace the old code. The new code became effective from 27 May 2015 and is more focused on priority sectors. The priority sectors identified include exports, industrial manufacturing, energy, transport, information and communications technology (ICT), financial services, and construction of low-cost housing.

The new investment code has phased out incentives that did not achieve the code’s strategic objectives, such as tax discounts, construction incentives, and those not conforming to East African Community (EAC) Customs Union rules.

See the Tax credits and incentives section for a description of the incentives available to a registered investor under the new investment code.

Taxes on corporate income

Rwanda operates both a source and residence-based taxation system. This means that any income that is deemed to be from sources within Rwanda will be liable to tax in Rwanda. In addition, resident entities are taxed on their worldwide income. However, where such income is taxed in another country, a tax credit is allowed, which does not exceed the tax that would have been payable on the same income in Rwanda.

Non-resident entities are taxed on income sourced in Rwanda through a permanent establishment (PE).

The standard corporate income tax (CIT) rate is 30%; however, small businesses and individuals (whose business has a turnover of less than 20 million Rwanda francs [RWF] in a tax period) pay profit tax at the rate of 4% of turnover.

Special CIT regimes

There are special CIT rates for certain industries or sectors of the economy.

Newly listed companies on capital markets are taxed as follows for a period of five years:

- If a company sells at least 20% of their shares to the public, the CIT rate is 28%.
- If a company sells at least 30% of their shares to the public, the CIT rate is 25%.
- If a company sells at least 40% of their shares to the public, the CIT rate is 20%.

Venture capital companies registered with the Capital Markets Authority in Rwanda enjoy a CIT rate of 0% for a period of five years. This is also the same rate applicable to companies that carry out micro-finance activities.
Rwanda

Registered investors in priority sectors can enjoy reduced CIT rates and tax holidays where certain conditions and thresholds are fulfilled. See the Tax credits and incentives section for more information.

**Local income taxes**

Rwandan legislation does not provide for any local taxes on income.

**Corporate residence**

Rwanda incorporated companies or associations are treated as Rwanda resident entities. In addition, companies incorporated overseas are also treated as Rwandan resident companies if they have a place of effective management in Rwanda at any time during the tax period. The term ‘effective management’ is not defined in the tax law.

Rwandan government companies are also considered to be residents in Rwanda.

**Permanent establishment (PE)**

The definition of a PE for Rwanda is largely based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention definition. According to Rwandan tax law, a PE means a fixed place of business through which the business of a person is wholly or partially carried on.

For non-resident companies, CIT liability will arise if they have a PE in Rwanda through which a trade is carried on. The profits attributable to the PE will be taxed in Rwanda. However, there are no rules or guidance on how the PE's profit should be evaluated for Rwanda tax purposes. The general understanding is that entities are required to use transfer pricing methods to determine the level of profits that should be attributable to the PE based on the functions it performs.

In particular, the existence of the following triggers a PE: an administrative branch; a factory; a workshop; a mine, quarry, or any other place for the exploitation of natural resources; a building site; or a place where construction or assembly works are carried out.

There are a number of specific exceptions from the definition of a PE. A person is deemed not to have a PE if that person:

a. uses facilities solely for the purpose of storage or display of goods or merchandise
b. maintains a stock of goods or merchandise solely for the purpose of storage or display
c. maintains a stock of goods or merchandise solely for the purpose of processing by another person
d. has a place of operation aimed purposely at purchasing goods or merchandise or at collecting information related to one’s business, or
e. has a place of operation solely for the purpose of carrying on preparations of one's activities and performing any other activities that make them more effective.

Where an agent, except an independent person concerned with (e) above, acts on behalf of a company (or person) and the agent has capacity to conclude contracts in the name of that company, the company is considered as having a PE in respect of activities one’s agent undertakes except if such activities of the agent are limited to those mentioned in (b) above.

However, a person is not considered as having a PE if it carries out activities through a broker, general commission agent, or any other private agent in accordance with procedures of the ordinary course of the activities of such an agent.

A company that controls or is controlled by another company does not, of itself, constitute either company to be a PE of the other.
**Other taxes**

**Value-added tax (VAT)**

VAT is levied on the supply of taxable goods and services in Rwanda as well as on the importation of taxable goods and services into Rwanda.

The threshold for VAT registration is taxable turnover of RWF 20 million in any relevant year or RWF 5 million in a calendar quarter.

The standard VAT rate is 18% and applies to goods and services that are neither exempt from VAT nor zero-rated.

Export of goods and services are subject to VAT at 0%. Supplies to privileged persons, such as goods imported for official purposes of diplomatic missions, supplies made under special arrangements between the government of Rwanda and donors, and supplies or importation made under special technical aid agreements, are subject to VAT at 0%. Persons entitled to zero rating of goods or supplies received by them are required to pay VAT at the time of receiving the supply and then apply for a refund of the VAT paid.

Some supplies are exempt from VAT, the main categories being supply of water service, goods and services for health purposes, educational materials and services, transport services, books and newspapers, financial and insurance services, lending or leasing interests in land or building for residential purposes, funeral services, energy supplies, all unprocessed agricultural and livestock products, mobile handsets, and equipment for information, communication, and technology.

Suppliers who provide zero-rated services or goods are entitled to recover input VAT incurred in making the supply. This is unlike exempt supplies, where input VAT recovery is not allowed. Therefore, zero rating is preferable to exemption.

The VAT returns and relevant payment are due to the Rwanda Revenue Authority (RRA) on a monthly basis by the 15th day of the following month. However, taxpayers with annual turnover of RWF 200 million or below may elect to file VAT returns or make payments on a quarterly or monthly basis.

**Customs duties**

Rwanda is a member of the East African Community, which uses the East African Community Customs Act (EACMA) for levying import duty. The EACMA prescribes Common External Tariffs (CET) for goods originating outside the Customs Union. Goods are generally subject to import duty of 0% for raw materials and capital goods, 10% for intermediate goods, and 25% for finished goods.

Goods will only enjoy the preferential community tariffs if they meet the EAC Customs Union Rules of Origin.

Certain industries and items are also entitled to exemptions under the customs law (e.g. assemblers of bicycles and motor cycle kits, importers of gas cylinders, certain hotel equipment, solar equipment, and energy saving bulbs).

Enterprises established in Free Trade Zones are exempt from customs duty on machinery and inputs for exported products. There also exists an import duty remission scheme, where import duty may be remitted for raw materials used to manufacture goods for export. This is subject to a requirement for proof of export and execution of the bond.

In 2015, a new law establishing the infrastructure development levy on imported goods was introduced. According to this law, all imported goods, except those listed as exempt, are subject to a levy of 1.5%. The levy is required to be computed on the customs value of imported goods.
Rwanda

Excise taxes
Excise tax is imposed on the manufacturer or importation of certain commodities, mainly soft drinks, bottled water, cigarettes, alcohol, fuels, and lubricants.

The following rates apply in respect of products and services for which excise duty is applied:

- Juice from fruits: 5%.
- Soda and lemonade: 39%.
- Mineral water: 10%.
- Beer: 60%.
- Wine, brandies, liquors, and whisky: 70%.
- Cigarettes: 36% of retail price of a pack (of 20 rods) and RWF 30 per pack.
- Telephone communication: 10%.
- Premium (excluding benzene) fuel and gas oil: RWF 183/litre on premium fuel and RWF 150/litre on gas oil.
- Lubricants: 37%.
- Powdered milk: 10%.
- Vehicles with an engine capacity of above 2500cc: 15%.
- Vehicles with an engine capacity of between 1500cc and 2500cc: 10%.
- Vehicles with an engine capacity of less than 1500cc: 5%.

Property taxes/fixed asset tax
Local government levies fixed asset tax on:

- the market value of parcels of land
- the market value of buildings and all improvements thereto registered with the land registration centre and for which the owner has obtained a title deed from the time the building is inhabited or used for other activities
- the value of land exploited for quarry purposes, and
- the market value of usufruct with a title deed.

The tax rate is fixed at a thousandth (1/1000) of the taxable value per year. The tax payment must be paid not later than 31 March of the year.

Transfer taxes
There is a fixed fee of RWF 20,000 on transfer of property. However, no transfer of ownership of a fixed asset can be effected without a tax clearance certificate issued by the concerned decentralised entity.

Stamp taxes
There are no stamp duties in Rwanda.

Trading licence fee
Districts charge a trading licence fee, which is paid by any person who commences a profit-oriented activity in Rwanda. The tax year starts on 1 January, and the trading licence fee must be paid for a whole year. If such activity starts after January, the taxpayer must pay a trading licence fee equivalent to the remaining months, including the one in which the activities started.

The tax declaration is done not later than 31 March of the tax year. The trading licence fee is calculated on the basis of turnover, and the amount of the fee varies between RWF 60,000 (for turnover of RWF 40 million) and RWF 250,000 (for turnover of over RWF 150 million).

The turnover applied is as per the amount approved in the previous year by the RRA. Every year, not later than 31 January, the RRA submits the necessary data to the concerned decentralised entity.
There are also different rates for the trading licence fee for other small traders, such as small-scale technicians, transport activities by boat, traders, and technicians.

**Payroll taxes**

Employers are required to withhold tax on payments to employees in respect of employment services that they have rendered. The tax is withheld through the pay-as-you-earn (PAYE) system. The tax deducted should be remitted to the RRA by the 15th day of the following month.

**Social security contributions**

All people working in Rwanda, both nationals and foreigners, are required to contribute to a national social security contribution fund managed by the Rwanda Social Security Fund. The employer is required to contribute 5% of the employee’s gross salary to the scheme, while the employee’s contribution is 3%.

Gross salary means total remuneration received by the employee, including allowances, bonuses, commissions, and all other cash benefits, as well as any fringe benefits, but excludes reimbursement of business expenses and transport allowances.

The social security contributions computed are required to be remitted to the RRA by the 15th day of the following month.

---

**Branch income**

The tax law does not prescribe special provisions for taxation of branches; consequently, tax rates on the profits of PEs are the same as for domestic corporations. PEs are subject to tax at a rate of 30% and treated as domestic companies.

A branch is considered a PE for the parent company; consequently, it is taxed on the income that is sourced from Rwanda only.

---

**Income determination**

**Inventory valuation**

Trading stock is valued at a lower of cost price or market price on the last day of the tax period. Work in progress is valued at cost.

**Capital gains**

There is a general capital gains tax law in Rwanda that provides that capital gains arising from the sale of commercial immovable property are subject to tax at the rate of 30%. However, capital gains arising from secondary market transactions on listed securities are exempt from taxation.

In addition, capital gains and losses arising on reorganisation are exempt from tax in respect of the transferring company. Reorganisation is defined to include the following:

- a merger of two or more resident companies
- the acquisition or a takeover of 50% or more of shares or voting rights by number or value in a resident company in exchange for shares of the purchasing company
- the acquisition of 50% or more of the assets and liabilities of a resident company by another resident company solely in exchange of shares in the purchasing company, or
- splitting of a resident company into two or more resident companies.
**Rwanda**

**Dividend income**  
Dividend income includes income from shares and similar income distributed by companies, cooperative societies, public business enterprise, and partnerships. Dividend income is subject to withholding tax (WHT) at the flat rate of 15%.

If dividend distribution has been subjected to WHT, this becomes the final tax.

In determination of taxable business profit of a resident company or partnership, dividends and other profit-shares received from a resident entity are therefore excluded.

**Interest income**  
Interest income includes income from loans, deposits, guarantees, and current accounts. It also includes income from government securities and bonds, as well as from negotiable securities issued by public and private companies.

Interest income is subject to WHT at the flat rate of 15%.

**Foreign income**  
Resident companies and enterprises are taxed on their worldwide income. However, a foreign tax credit is granted in respect of taxes paid on the foreign income, subject to the limit of the tax that would have been paid in Rwanda on the same income.

There are no provisions in Rwanda for tax deferral of income earned abroad.

**Deductions**  
A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for purposes of the company's trade, provided these costs are not capital in nature and are charged to the profit and loss account.

The Rwandan tax law stipulates that deductible expenses should fulfil the following conditions:

- Used for direct purpose of and in normal course of business.
- Actual expenses substantiated by proper documents.
- Result in a decrease in net assets.
- Used for activities related to the tax period in which they are incurred.

**Depreciation and amortisation**  
Accounting depreciation of fixed assets is not allowable as a deduction for tax purposes. The same applies in the case of amortisation of assets. However, businesses are allowed specified deductions, referred to as tax depreciation in respect of specified classes of assets. This is deducted in arriving at taxable income.

Tax depreciation allowance is granted to persons who own depreciable assets at the end of the tax period and use such assets in the production of income.

Land, fine arts, antiquities, jewellery, and any other assets that are not subject to wear and tear or obsolescence are not granted tax depreciation. Cost of refining or reconstruction of building, equipment, and heavy machinery fixed to the walls attract tax depreciation at the rate of 5%.

Intangible assets, including goodwill that is purchased from a third party, enjoy tax depreciation at the rate of 10%, while computers and accessories, information and communication systems, software products, and data equipment are granted tax depreciation at 50%.
Tax depreciation allowance is also available on all other classes at the rate of 25%.

There is also an enhanced allowance in the form of an investment allowance that is granted to investors where they incur an investment of at least RWF 30 million. The rate is 40% where the investment is within Kigali city or 50% where the investment is within priority sectors defined by the Rwandan Investment Code or a registered business located outside Kigali. Businesses are required to hold the investment for at least three years in order to benefit from the investment allowance.

Note that the above incentives have been repealed by the new investment code. However, taxpayers who were enjoying the benefits can continue to do so until 27 May 2016. The new investment code introduces new incentives for registered investors (see the Tax credits and incentives section).

**Goodwill**
As mentioned above, purchased goodwill will attract tax depreciation at the rate of 10%, which is an allowable deduction. However, amortisation of goodwill is not tax deductible.

**Start-up expenses**
There is no clear guidance on the tax treatment of start-up expenses. However, in practice, start-up expenses of a capital nature are not deductible for tax purposes. Where they relate to purchase of assets, respective tax depreciation is claimed. Start-up expenses of a revenue nature are tax deductible.

**Interest expenses**
Interest on borrowed money used for earning business profit or interest in respect of an amount payable for property acquired to earn income is deductible, provided the interest paid is pursuant to a legal obligation and is reasonable under the circumstances.

Thin capitalisation rules can limit interest deductions when debt owed to related entities exceeds four times the amount of the corporation’s equity (see Thin capitalisation in the Group taxation section).

**Bad debt**
A bad debt provision will be deductible for tax purposes if it fulfils the following conditions:

- The amount was previously included in the income of the taxpayer.
- Debt is written off in the books of accounts.
- All possible steps have been pursued by the taxpayer, and there is concrete proof that the debtor is insolvent.

It is the last condition that makes the criteria difficult to satisfy, and local taxpayers rarely obtain bad debt relief in practice.

However, licensed commercial banks and leasing entities duly licensed as such are allowed to deduct, in determining business profit, any increase of the mandatory reserve for non-performing loans as required by the directives related to management of bank loans and similar institutions of the National Bank of Rwanda. Similarly, the business profit is increased by the entire amount recovered from bad debts deducted from such reserves.

**Charitable contributions**
Donations and gifts to charitable organisations and other non-profit making organisations are tax deductible where the amounts are less than 1% of turnover. However, donations to profit making organisations are not allowed for tax, irrespective of the amount.
**Fines and penalties**
Fines and penalties imposed for breaking the law or for statutory offences, such as payment of taxes late, are not tax deductible.

The law does not specify which type of non-statutory fines or penalties are not allowed for tax. For example, there is no guidance on whether fines or penalties paid for breach of contract are deductible or not.

**Taxes**
Income tax paid on business profit and recoverable VAT are not deductible for tax purposes. This includes any back taxes paid by the business.

**Net operating losses**
Tax losses can be carried forward for the next five tax periods, earlier losses being deducted before later losses.

If the direct or indirect ownership of the share capital or the voting rights of an unlisted company changes more than 25% by value or by number during a tax period, such a company is restricted from carrying forward losses incurred during the tax period and previous tax periods.

There are no provisions for carryback of tax losses.

**Payments to foreign affiliates**
Royalties, management fees, and similar payments to affiliated non-residents are deductible expenses to the extent that they are incurred to earn income of the Rwandan company and the payments adhere to the arm’s-length principle and comply with transfer pricing requirements.

**Group taxation**
There is no provision for group taxation in Rwanda. Each individual corporate group member is required to submit their own tax return on a stand-alone basis.

**Transfer pricing**
Rwandan transfer pricing legislation and the prescribed transfer pricing methods are generally consistent with OECD guidelines. The law requires that transactions between related parties be carried out under the arm’s-length principle.

The tax law empowers the Commissioner General to adjust profits earned between related parties if the Commissioner General considers that the trading arrangements between related parties do not adhere to the arm’s-length principle. The arm’s-length principle requires that transfer prices charged between related parties are equivalent to those that would be charged between independent parties in the same circumstances.

Rwanda operates a self-assessment system; consequently, taxpayers are obligated to self-assess their compliance to the tax legislation, which includes transfer pricing policy. However, there are no specific transfer pricing documentation requirements currently in place.

Rwanda’s transfer pricing legislation provides an opportunity for advance pricing agreements (APAs) with the RRA, a progressive development giving businesses operating in Rwanda a greater degree of certainty. Taxpayers can discuss and negotiate their transfer pricing arrangements with the RRA and obtain an advance ruling confirming that their transfer pricing arrangement is appropriate. This is intended to minimise the potential for future disputes.
**Thin capitalisation**
The interest paid on loans and advances from related entities is not tax deductible to the extent that the total amount of loans/advances exceeds four times the amount of equity during the tax period. For purposes of determining the above, equity excludes provisions and reserves. This provision does not apply to commercial banks and insurance companies.

**Controlled foreign companies (CFCs)**
There are no provisions in Rwanda for CFCs.

---

**Tax credits and incentives**

There are tax incentives in the form of lower CIT rates (see Special CIT regimes in the Taxes on corporate income section) for registered investors.

The new investment code also provides the following incentives to a registered investor with effect from 27 May 2015:

- A seven-year tax holiday for investments in the following specific sectors: manufacturing, tourism, health, exports, energy projects producing at least 25 MW (excluding investors having an engineering procurement contract [EPC] executed on behalf of the government of Rwanda, and ICT with an investment involving manufacturing, assembly, and service. The investment should be of at least 50 million United States dollars (USD) and the investor should contribute at least 30% of this investment in the form of equity in these sectors.
- A preferential CIT rate of 0% for international companies with their regional offices in Rwanda and that fulfil certain requirements.
- A preferential CIT rate of 15% for registered investors undertaking; (i) exportation (ii) energy generation, transmission, and distribution, (iii) transport of goods and related activities, (iv) mass transportation of passengers and goods, (v) ICT, (vi) financial services, including global business activities, private equity funds, fund management, wealth management, mutual funds, collective investment schemes, captive insurance schemes, venture capital, and asset backed securities, (vii) building of low-cost housing, and (viii) any another priority economic sector as may be determined by an Order of the Minister of Finance.
- Exemption from capital gains tax.
- Five-year tax holiday for micro-finance institutions.
- Customs exemption on products used in Export Processing Zones (EPZs).
- Prompt settlement of VAT refunds.

There are, however, certain conditions that have to be fulfilled to obtain the incentives above.

Note that a variety of tax incentives were given in the form of enhanced tax depreciation allowances (known as capital allowances) under the old investment code. The incentives were granted based on the type of assets purchased and used for business and the amount of investment made (see Depreciation and amortisation in the Deductions section).

Also note that there is a transition period of one year in which the registered investors who are eligible for some incentives under the old code can continue to benefit from these until 27 May 2016.

**Foreign tax credit**
Rwanda allows a foreign tax credit on income generated from business activities performed abroad by a tax resident. The income tax payable is offset by the foreign tax paid on that income. However, the foreign credit is limited to the amount of tax that would have been applicable on that income in Rwanda.
Rwanda

The credit is allowed where it is supported by appropriate evidence, such as a tax declaration, a WHT certificate, or any other similar acceptable document.

**Withholding taxes**

A resident individual or resident entity is required to deduct a WHT of 15% when making the following payments:

- Dividends.
- Interest.
- Royalties.
- Service fees, including management and technical service fees, with the exclusion of international transport.
- Performance payments made to an artist, musician, or sports person.
- Lottery and other gambling proceeds.
- Goods supplied by companies or physical persons not registered with the tax administration.

There is also a WHT of 5% that is applicable on goods imported for commercial use. Public institutions are required to retain 3% on payments to winners of public tenders. However, businesses that possess a tax clearance certificate are exempted from deduction of the above WHT.

The WHT deducted should be remitted to the RRA within 15 days following the month of deduction.

**Tax treaties**

Rwanda has double tax treaties (DTTs) with Belgium, Mauritius, Singapore, and South Africa.

The DTT between Rwanda and Belgium provides for a lower rate of 10% on interest and royalties, but 0% on dividends.

The DTT between Rwanda and Mauritius has been ratified and provides for a lower rate of 10% on royalties, dividends, and interest and 12% on management fees.

The DTT between Rwanda and South Africa provides for a lower WHT rate of 10%.

The DTT between Rwanda and Singapore provides for lower rate of 10% on interest, royalties, and management or professional fees, but 7.5% on dividends.

The DTT agreements contain conditions to be complied with for the preferential rates to apply; consequently, it is recommended that professional advice is sought before application.

**Tax administration**

**Taxable period**

The normal taxable period is between January and December. However, a different tax period can be allowed on approval by the Minister of Finance.

**Tax returns**

Companies are assessed with reference to accounting periods. This refers to the period for which a company prepares its accounts. However, an accounting period for CIT purposes cannot exceed 12 months, so companies preparing statutory accounts for longer than 12 months need to prepare more than one CIT return.
Rwanda operates a self-assessment regime. Quarterly tax returns are due on 30 June, 30 September, and 31 December (or by the sixth, ninth, and 12th month of the tax period). The annual tax return/declaration must be filed within three months after the tax period. The tax declaration must include audited financial statements as well as any other documents that may be requested by the tax administration.

**Payment of tax**
Advance CIT is payable in three instalments. Tax payments are due on 30 June, 30 September, and 31 December (or by the sixth, ninth, and 12th month of the tax period). Each instalment is 25% of the tax liability as calculated in the tax return/declaration of the previous tax period. This amount can be reduced by WHT paid during the tax period. The final payment of CIT for taxpayers with a December year-end is 31 March of the following year. In the case of other accounting year-ends, the final CIT payment is due on the last day of the third month following the accounting year-end.

**Tax audit process**
Large taxpayers are selected for audit by the RRA on a regular basis. The RRA tends to audit two tax periods, but this can be extended on request by the taxpayer. Most audits are carried out onsite. The RRA may conduct a desk audit of the taxpayer’s tax affairs where they note discrepancies on tax returns filed by the taxpayer, anomalies with turnover, or any other situations that justify an audit.

Under normal in-depth audits, the RRA is required to issue a taxpayer with a draft notice of assessment following the completion of the field audit. The draft assessment is referred to as a rectification note. The taxpayer is granted 30 days within which to respond. In case the tax issues are not resolved, a final notice of assessment is issued. The taxpayer is allowed 30 days within which to appeal. Once an appeal is submitted to the Commissioner General, the RRA has 30 days within which to respond to the objection. This can be extended by another 30 days but not beyond this period. At this stage, the appeal is handled by the appeal committee, and the taxpayer and the taxpayer’s agent are invited for a meeting to provide explanations.

Once the final assessment is issued, the tax due is payable, although the Commissioner General has powers to suspend the payment pending the determination of the appeal.

There is a provision for resolving the dispute through an amicable settlement process. Taxpayers can opt for this approach while at the same time exploring the next stage of the appeal process.

A taxpayer that disagrees with the response on the final assessment can appeal to the high court within 30 days.

**Statute of limitations**
The RRA has powers to audit a taxpayer for a period going back five years, although this can be extended to ten years in case of fraud. Taxpayers are required to keep their records for a period of ten years.

**Topics of focus for tax authorities**
Topics of interest for the RRA include:

- Deduction of WHT on payments to non-resident persons and reverse VAT.
- Treatment of capital gains on disposal of assets.
- Recovery of reverse VAT on services that are regarded as being available in the local market.
- Reconciliation of turnover per financial statements to receipts as per taxpayer bank statements.
Significant developments

The ceiling for minimum corporate income tax (CIT) of 20 million *Communauté financière d'Afrique* (Financial Community of Africa or CFA) francs (XOF) has been reduced to its prior amount of XOF 5 million.

Taxes on corporate income

Branches and companies are liable for CIT at the rate of 30%.

Residents are taxed upon their worldwide income. Non-residents are generally taxed via the existence of a permanent establishment (PE) on Senegal-source income.

Withholding taxes (WHTs) may also apply to non-residents, as per the services delivered to Senegalese taxpayers, subject to the application of a double tax treaty (DTT).

Minimum CIT

A minimum CIT is due, in case of lack of profits, at the rate of 0.5% applied on the annual turnover. The minimum amount cannot be less than XOF 500,000 and the maximum amount cannot be more than XOF 5 million.

Local income taxes

See the Other taxes section for a description of local taxes based on turnover and property.

Corporate residence

Companies are considered as Senegalese residents if they have a registered fixed establishment. Nonetheless, foreign companies that are not registered locally may be deemed to have a PE in Senegal in relation to their local activity and will then be subject to tax liabilities.

Permanent establishment (PE)

The criteria for a PE were derived from the former General Tax Code (GTC) and are close to the Organisation for Economic Co-operation and Development (OECD) standards. The new GTC does not include a PE provision, but the former one should be applicable. DTTs can be applicable and can provide specific definitions. These DTTs are based on the OECD model in most cases. See the Withholding taxes section for a list of countries with which Senegal has concluded DTTs.

Other taxes

Value-added tax (VAT)

Subject to certain exclusions, most commercial operations are subject to an 18% VAT.
VAT on tourism activities is 10%.

A 17% special tax on financial activities (mainly banking, money transfers, and change operations) is applicable instead of VAT.

VAT returns must be filed monthly.

**Customs duties/Import tariffs**
In the case of import of goods, the following tariffs apply:

- Customs duties: 0%, 5%, 10%, or 20%, depending on the nature of the goods.
- Statistical import charge: 1%.
- Community solidarity levy: 1%.
- Economic Community of West African States (ECOWAS) levy: 0.5% (only applicable among ECOWAS countries).
- Senegalese Shippers Council (COSEC) royalty: 0.4% (only applicable on importation by sea).

**Excise taxes**
The products on which the Senegalese authorities levy excise tax, and the relevant excise tax rates, are as follows:

- Beverages: 40% for beverages containing alcohol, plus an additional tax ranging from XOF 1,500 to XOF 5,000 per litre; 3% for sparkling beverages.
- Tobacco: 45%.
- Coffee: 5%.
- Tea: 5%.
- Fat: Rate varies from 5% to 12%.
- Private cars with a horsepower (tax engine rating) superior to 13CV: 10%.
- Cosmetic products: 10% (increased to 15% for depigmentation products).
- Oil products (rates per nature and per hectolitre): XOF 21,665 for super-petrol, XOF 19,847 for conventional petrol, XOF 3,856 for petrol for the use of pirogues, XOF 10,395 for diesel.

**Tax on built real estate**
The tax on built real estate applies annually to owners of buildings, factories, industrial premises, or equipment fixed on the land. The tax rate is 5% for common buildings and 7.5% for factories and industrial premises. It is applied on the basis of the rental value of the lands, buildings, etc.

**Tax on non-built real estate**
The tax on non-built real estate applies annually to owners of land without buildings, factories, industrial premises, or equipment fixed on the land. The tax rate is fixed at 5%. It is applied on the basis of the rental value of the land.

**Stamp/registration duties**
There are many stamp and/or registration duties, depending on the operations, such as the following:

<table>
<thead>
<tr>
<th>Operation</th>
<th>Stamp and/or registration duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial, house, or equipment lease</td>
<td>2% applicable on the basis of the annual rent</td>
</tr>
<tr>
<td>Transfer of real estate</td>
<td>5% on the sales price</td>
</tr>
<tr>
<td>Transfer of debt</td>
<td>1% on the guarantee value</td>
</tr>
<tr>
<td>Pledge</td>
<td>1% of the increase where the share capital is greater than XOF 100 million</td>
</tr>
<tr>
<td>Increase of the capital in cash</td>
<td>5% on the sales price</td>
</tr>
<tr>
<td>Transfer of business</td>
<td>5% on the sales price</td>
</tr>
</tbody>
</table>
Senegal

<table>
<thead>
<tr>
<th>Operation</th>
<th>Stamp and/or registration duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Transfer of shares</td>
<td>1% on the sales price (or the market value if higher)</td>
</tr>
</tbody>
</table>

**Business licence tax**

Business licence tax is an annual duty consisting of a fixed annual payment (fixed duty) and a proportional duty, calculated in most cases on the basis of the rental value of the premises used. The amounts and rates of these taxes are fixed according to the type and size of the activity carried out.

There is a table that includes several categories of business. For each category, a fixed tax is provided as well as the percentage that is applied on the assets at their fair value.

As an example, when the fixed tax depends on the level of the annual turnover, the following scale is applicable:

<table>
<thead>
<tr>
<th>Level of turnover (XOF)</th>
<th>Fixed amount of tax (XOF)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over</td>
<td>Not over</td>
</tr>
<tr>
<td>0</td>
<td>50 million</td>
</tr>
<tr>
<td>50 million</td>
<td>150 million</td>
</tr>
<tr>
<td>150 million</td>
<td>250 million</td>
</tr>
<tr>
<td>250 million</td>
<td>500 million</td>
</tr>
<tr>
<td>500 million</td>
<td></td>
</tr>
</tbody>
</table>

In this case, the proportional tax is determined by applying the rate of 19% on the annual rental value of the offices, warehouses, sites, and other premises and installations considered as constructions, real estate, and assets in general that are used for the activities.

In the absence of a determined rent, the rental value is calculated by applying the following rates to the purchase price:

- Land: 3%.
- Buildings and installations: 4.8%.
- Fixed and movable tools: 5%.

**Tax on telecommunication**

The tax rate is 5% on telecommunication use and access. To offset the tax, the purchase of mobile telephones (and other types of telephones) remains exempt from VAT and customs duty.

There are also two specific taxes payable by companies in the telecommunications sector. These taxes represent 3% (for the tax called ‘CODETE’) and 1% (for the tax called ‘PST’) of the annual turnover less the payments made to other operators for networking services.

**Tax on vehicles**

An owner of a motor vehicle (car, truck, or motorbike) must pay an annual tax fixed at XOF 1,000 per hectolitre, except for the pirogue gasoline.

**Company tax on vehicles**

In addition to the tax on vehicles, companies owning or renting vehicles (more than 15 days a year) must pay a specific annual tax on them. Rates range from XOF 50,000 to XOF 200,000, depending on the type and horsepower of the vehicle.
**Payroll taxes**

**Pay-as-you-earn (PAYE)**

All compensation (including salary, cash allowances, and benefits in kind) paid to employees is generally taxable. For the calculation of the personal income tax (PIT) to be withheld by the employer, the tax administration provides a tax table determined on a monthly basis so that no calculation is necessary.

**Employer tax**

Employers are subject to a 3% tax based on the total gross salaries paid to employees.

**Social Security contributions**

Social Security contributions are borne exclusively by the employer.

The rate for the industrial accident/occupational disease branch has to be confirmed by the authority when registering the entity with the Social Security Office (applicable rate to be stated within the related certificate).

<table>
<thead>
<tr>
<th>Sector</th>
<th>Rate of contributions (only payable by employers) (%)</th>
<th>Maximum monthly basis of calculation (XOF)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family</td>
<td>7</td>
<td>63,000</td>
</tr>
<tr>
<td>Industrial accident / Occupational disease</td>
<td>1/3/5</td>
<td>63,000</td>
</tr>
</tbody>
</table>

**Retirement contributions**

Retirement contributions are payable both by the employer and the employees:

<table>
<thead>
<tr>
<th>Regime</th>
<th>Rates of contributions (%)</th>
<th>Maximum monthly basis of calculation (XOF)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Payable by employers</td>
<td>Payable by employees (withheld on the salary)</td>
</tr>
<tr>
<td>General</td>
<td>8.4</td>
<td>5.6</td>
</tr>
<tr>
<td>Executive</td>
<td>3.6</td>
<td>2.4</td>
</tr>
</tbody>
</table>

**Employment medical coverage**

The employer shall subscribe for all employees a medical coverage. The level of coverage depends on the type of agreement concluded with the dedicated organism. Usually, the employee is reimbursed for 80% of medical expenses, even though the law provides a range between 50% and 80%.

The monthly rate is 6%, to be levied on a contribution rate between XOF 60,000 and XOF 250,000, for both the employee and the employer.

**Branch income**

In general, the tax on branch income is similar to that of corporate income. Nonetheless, a 10% duty is automatically applied to profits generated after CIT. It corresponds to an automatic application of the 10% tax on payment on dividends applicable to a company.

Headquarter expenses, which are a proration of the worldwide office expenses, may be allocated to the Senegal branch. This proration is based upon a ratio of the local turnover of the branch and the worldwide turnover of the parent company. It applies to the total amount of headquarters’ expenses incurred by the company. In addition, the deductibility of headquarters expenses is limited to 20% of the accounting profits before the deduction. This limitation does not apply to other types of services provided by headquarters, such as technical assistance.
**Senegal**

---

### Income determination

#### Inventory valuation
Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) are permitted. Book and tax conformity is required.

#### Capital gains
Capital gains derived from the transfer of assets are subject to the 30% CIT. There is no basket system. Sales of stocks by a non-resident are liable to the 30% CIT, subject to the application of a DTT.

#### Dividend income
If a parent company domiciled in Senegal owns 10% of the subsidiary (main condition for the application of the parent-subsidiary corporation special taxation status), a 95% reduction on the dividends received is applicable for CIT purposes.

If these conditions are not met, dividends received by a company are subject to CIT as follows:

- 40% of the dividends are added back to the taxable profit.
- The company benefits from a tax credit upon the CIT equal to 40% of the tax on distributions withheld (at the general WHT rate of 10%).

#### Stock dividends
Stock dividends are unusual in Senegal. However, this kind of distribution would be taxable at the general WHT rate of 10% on the basis of its real value.

#### Interest income
Article 105 of the General Tax Code provides a list of interests that are not subject to CIT. For instance, the following are not subject to CIT:

- Interest on sovereign debt.
- Interest on deposit accounts opened at the Housing Bank of Senegal (*Banque de l’Habitat du Senegal*).
- Interest on loans granted by the Central Bank.

#### Foreign income
In general, profits generated in Senegal are taxed under Senegal’s income tax law. Profits generated outside Senegal and constituting a PE in the relevant country are not taxed in Senegal. A DTT can provide different rules.

---

### Deductions

#### Depreciation and depletion
The rates of depreciation are not provided by the law. The rate is determined on the normal and predictable duration of use of the asset by taking into account normal wear and tear. In practice, there are standard rates for common assets. Accelerated depreciation can be applicable, subject to conditions.

#### Goodwill
There are no provisions in Senegal for goodwill.

#### Start-up expenses
Start-up expenses are deductible if justified and approved by the shareholders.
**Interest expenses**

Interests on current account advances or loans from a shareholder (directly or indirectly) are subject to restrictions as to their deduction from taxable income:

- The share capital of the company receiving the loan or advance shall be, beforehand, fully paid.
- The amount of the loan or advance shall not exceed the share capital of the company receiving it. It is not an individual but an overall ceiling on the total amount of loans and advances of all shareholders and seniors.
- The rate of interest shall not exceed the rate of advance of the Institute of Emissions plus 3 points. The rate published by the Ministry of Economy and Finance for 2016 is 3.5%.

**Bad debt**

There are no provisions in Senegal for bad debt.

**Charitable contributions**

Only payments made to specific chartered organisations are deductible, at a rate of up to 0.5/100 of turnover. On the contrary, payments made to non-chartered organisations are not deductible.

**Fines and penalties**

Fines and penalties are not deductible for CIT purposes.

**Taxes**

CIT and the company tax on vehicles are not deductible.

**Other significant items**

Provisions are deductible if they correspond to a risk or a probable cost that is more than possible and leads to a decrease in the assets. Provisions for paid holidays and retirement compensation are not deductible.

**Net operating losses**

Tax losses may be carried forward to the next three years. Losses corresponding to the depreciation of assets can be carried forward indefinitely. The carryback of losses is not allowed.

**Payments to foreign affiliates**

Reasonable royalties, interest, and management service fees paid to foreign parent companies are deductible. Supporting documents (e.g. invoices, contracts) will be necessary to prove that these expenses are justified.

**Group taxation**

Group taxation is not permitted in Senegal.

**Transfer pricing**

The transfer pricing regulations globally correspond to the OECD requirements standards (i.e. identifying related-party transactions, choosing the suitable transfer pricing method, and preparing documentation to support the selection of such method).

**Thin capitalisation**

There are no specific rules regarding thin capitalisation in Senegal. Nonetheless, the following tax and legal rules should be known:

- From a legal point of view (corporate law), the net assets must be equal to at least half of the share capital of the company. In case the net assets are lower than this
threshold, the situation should be regularised by any lawful means within a period of two years following the financial year it appears. Otherwise, any third party can request the closing of the entity before the courts.

• The deductibility of interest paid to a shareholder upon a loan or an advance in general is limited to a maximum rate calculated on the Central Bank legal interest rate (currently fixed at 3.5%) plus 3 points, calculated on the amount of the share capital (see Interest expenses in the Deductions section for more information). Portions exceeding this limit are not deductible for CIT purpose.

### Controlled foreign companies (CFCs)

There are no provisions in Senegal for CFCs.

---

### Tax credits and incentives

#### Foreign tax credit

Usually, DTTs may provide some tax credit on the basis of the relationship between Senegalese entities and their partners located abroad. For each DTT, the specific process to enforce those tax credits either in Senegal or abroad (depending on the payments directions) are stipulated within that DTT. Nonetheless, as far Senegal is concerned, the practice consisting of enforcing foreign tax credits locally is very rare.

#### The Investment Code

The Investment Code applies to investments over XOF 100 million (mainly production, processing, industrial, tourism, agricultural, and complex trade). The benefits of the Investment Code include exemption from customs duties, suspension of VAT payment for three years, CIT limitation, etc. The tax benefits are directly integrated in the GTC and do not require administrative authorisation (i.e. as long the requirements are met, the taxpayers may benefit from those tax benefits).

#### Free export company status

Agriculture, industry, and telecommunications companies that have an exporting potential amounting to at least 80% of their turnover may qualify for the free export company status. There are several advantages for companies that qualify, including a CIT rate of 15%, exemption from dividend WHT, exemption from business licence tax, exemption from taxes on real estate, and exemption from registration duty for incorporation or bylaws change purposes.

#### Miscellaneous incentives

There are a wide range of investment laws (i.e. negotiations with the government to set up a specific tax regime different from common rules) for investments greater than XOF 250 billion, including the mining code and the petroleum code, among others. All of these tax benefits are directly included in the GTC.

---

### Withholding taxes

Senegal has various WHTs. The primary ones are as follows:

• 20% WHT on remuneration paid for services (including royalties) rendered by a foreign individual or foreign company.
• 5% WHT on remuneration paid for services rendered by a resident individual (liable for tax under lump sum taxation, among others) or resident company that are not subject to CIT.
• 10% WHT on dividends distributed.
• 13% WHT on bond interest.
• 8% WHT on deposits or guaranteed interest on accounts with a bank.
• 16% WHT on other revenues, notably interest on loans.
These WHTs may be limited by DTTs.

**Double tax treaties (DTTs)**
The DTTs concluded by Senegal are based on the OECD model in most cases. Senegal has concluded such treaties with the countries listed in the table below.

Treaty WHT rates are as follows:

* West African Economic and Monetary Union (member states are Benin, Burkina-Faso, Côte d'Ivoire, Guinea-Bissau, Mali, Niger, and Togo).

**Tax administration**

**Taxable period**
The tax year in Senegal is the calendar year.

**Tax returns**
Companies must file CIT returns by 30 April of the year following the tax year.

Also, in addition to the miscellaneous annual returns (business licence tax, company car tax, etc.) and other monthly tax returns (VAT, payroll taxes, WHT, etc.), taxpayers must file by 31 January for the prior financial year:

- An annual recapitulative payroll tax return.
- An annual recapitulative return on payment for services.

**Payment of tax**
CIT must be paid in two instalments (each equal to one-third of the previous year’s tax) by 15 February and 30 April. The outstanding balance payment amount of the tax due must be paid by 15 June.

For the first financial year of a newly incorporated company, no instalment is due; the new company pays the whole CIT before 15 June of the following year.

**Penalties**
In case of late payment, a 5% interest of delay on the amount due plus an additional 0.5% duty per month of delay or portion of month of delay are applicable. This late payment is due when the taxpayer’s regularisation is spontaneous.

On the other hand, if such payment is triggered by a tax audit from the authority itself after the deadline is crossed, the following penalties apply:

- 50% for any WHT and VAT.
Senegal

- 25% for other taxes (CIT, business licence tax, taxes on real estate, registration duties, company car tax).

Also, the late filling of tax returns triggers an XOF 200,000 penalty per return.

**Tax audit process**
The tax authorities may request information, clarifications, or justification to the taxpayers. The taxpayers have 20 days to answer to those requests.

The tax authorities may also implement an inspection of the accounting documents at the premises of the taxpayer or at any place the taxpayer would consider more appropriate for material reasons upon a specific request. In such cases, a notice is sent to the taxpayer at least five days before the beginning of the inspection.

The tax authorities are not allowed to process a new tax inspection on a period already inspected by their services unless a new element or document is revealed after the first inspection was processed.

Where the tax authorities estimate that the taxpayer has not fulfilled all of one’s tax obligation, a tax reassessment shall be transmitted to the taxpayer, who has 30 days in order to answer or comment on the findings.

After the tax authorities have received those comments, they can confirm partially or totally the reassessment within a statutory delay of 60 days.

**Statute of limitations**
The statute of limitations is, generally speaking, four years.

**Topics of focus for tax authorities**
With regards to corporate tax compliance, the tax authorities are generally focusing on certain expenses with forbidden or limited deductibility, such as depreciation of assets, provisions, interest, royalties/services fees, insurance premiums, head office costs, etc., but they usually define their approach according to the business sector of the company.
Significant developments

After the switch from the source-based taxation to the worldwide taxation of South African (SA) residents in 2000, and the introduction of capital gains tax in 2001, the SA tax system has not undergone fundamental changes. Smaller reforms, however, are ongoing. The most significant recent changes are:

- Amendments extending prescription periods in certain circumstances.
- Withdrawal of a foreign tax rebate (s6quin) in respect of SA-source services income and a slight extension of the deduction rule (s6quat) as partial compensation.
- The proposed introduction of a 15% withholding tax (WHT) on cross-border service fees has been withdrawn.
- The inclusion rate for capital gain tax for companies has increased from 66.6% to 80%, raising the effective capital gain tax rate from 18.6% to 22.4%, for years of assessment beginning on or after 1 March 2016.

Taxes on corporate income

An SA-resident company is subject to corporate income tax (CIT) on its worldwide income, irrespective of source. Non-residents are taxable on SA-source income.

In South Africa, the CIT rate applicable for corporate income of both resident and non-resident companies for tax years ending between 1 April 2016 and 31 March 2017 is a flat 28%.

Close corporations, which are essentially a simplified form of company, are taxed at the same rate as companies and are subject to the same taxation rules.

Small business corporations (i.e. companies with only natural persons as members/owners and with gross income of not more than 20 million South African rand [ZAR]) are taxed at 0% on the first ZAR 75,000 of taxable income earned, 7% on the amount above ZAR 75,000 but not exceeding ZAR 365,000, 21% on the amount above ZAR 365,000 but not exceeding ZAR 550,000, and 28% on the amount exceeding ZAR 550,000.

Special CIT rates apply in certain industries, such as mining and long-term insurance (see below).

Alternative turnover-based tax for very small companies

To reduce the compliance costs for very small companies, a turnover-based presumptive tax is available. Companies with a turnover of less than ZAR 1 million per year can elect to pay this tax instead of normal CIT, at a rate ranging from 0% to 3%, depending on the turnover.
Dividends tax
Dividends tax is imposed at 15% on dividends declared and paid by resident companies and by non-resident companies in respect of shares listed on the Johannesburg Stock Exchange (JSE) paid to SA residents.

Dividends are tax exempt if the beneficial owner of the dividend is an SA resident company, SA retirement fund, or other prescribed exempt person.

The tax is to be withheld by companies paying the taxable dividends or by regulated intermediaries in the case of dividends paid through a regulated intermediary. In the case of in specie dividends, the company declaring the in specie dividend is liable for the dividends tax and not the beneficial owner of the dividends.

Exemptions from dividends tax and treaty-imposed reduced rates only apply if the beneficial owner of the dividend has made the required declaration to the paying company or regulated intermediary.

CIT for mining companies
Special rates of normal tax, based on a standard formula, are laid down for companies mining for gold. Companies mining for other minerals are subjected to the same 28% rate of normal tax applying to ordinary companies.

CIT for long-term insurance companies
Life insurance companies are obligated to follow the ‘four-funds approach’, with policies divided into four funds, depending on the nature of the beneficiary. Each fund is then allocated assets according to the risk carried by the fund. Funds are treated as separate taxpayers and taxed at four separate rates. These rates are 30% for individual policyholder funds, 0% for untaxed policyholder funds, 28% for company policyholder funds, and 28% for corporate funds (the company itself).

With effect from January 2016, a fifth fund was introduced, the Risk Policy Fund, to cater for changes to the taxation of the risk business of long-term insurance companies. The Risk Policy Fund is also taxed at a rate of 28%.

Local income taxes
No local government taxes on income apply to either SA-resident or non-resident companies.

Corporate residence
A company is resident in South Africa if it is incorporated, established, or formed in South Africa or has its place of effective management in South Africa. However, a company that is deemed to be exclusively resident in another country in terms of a double taxation agreement (DTA) is excluded from SA residency.

In terms of a recent Interpretation Note issued by the South African Revenue Service (SARS), the place of effective management is regarded as the place where key management and commercial decisions that are necessary for the conduct of its business as a whole are, in substance, made. This approach is consistent with internationally accepted principles.

Permanent establishment (PE)
South Africa does not, as a general rule, tax non-residents on the basis of having a PE in South Africa. Rather, non-residents are subject to income tax in South Africa on income derived from a South African source. The primary exception to this rule is in relation to capital gains, where non-residents are subject to tax on assets attributable to a PE in
South Africa

South Africa. A PE is defined by reference to the definition thereof in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Other taxes

Value-added tax (VAT)
VAT is an indirect tax that is largely directed at the domestic consumption of goods and services and at goods imported into South Africa. The tax is designed to be paid mainly by the ultimate consumer or purchaser in South Africa. It is levied at two rates, namely a standard 14% rate and a zero rate (0%).

Very few business transactions carried out in South Africa are not subject to VAT. The tax is collected by businesses that are registered as vendors with the SARS on all taxable supplies throughout the production and distribution chain. Sales or supplies by non-vendors are not subject to VAT.

VAT registration and administration
All suppliers of goods and services having an annual turnover exceeding ZAR 1 million are obligated to register as VAT vendors and to charge output VAT. Other vendors may elect to register as VAT vendors, provided their annual turnover exceeds ZAR 50,000. Two exceptions apply. Firstly, non-resident suppliers of electronic services are obligated to register after aggregate supplies of ZAR 50,000 have been made. Secondly, persons likely to make taxable supplies only after a period of time may register if the activities are of a nature set out in regulations. If they do not register, they are prohibited from charging VAT on goods or services they supply and claiming an input tax (rebate of VAT paid) on goods and services that they acquire.

Under the VAT system, vendors normally pay VAT on expenses (input tax) and charge VAT on supplies made (output tax). This mechanism, therefore, ensures that only the so-called ‘added-value’ is taxed. Due to VAT being a self-assessment system, the output tax collected may be reduced by input tax paid. Thereafter, the net amount is payable to, or refundable by, the SARS. The self-assessment returns are due regularly within prescribed periods (tax periods).

Taxable supplies
Standard rated and zero-rated supplies are known as taxable supplies. Other supplies are known as exempt and non-supplies.

Goods and services
For a liability for VAT to exist, there must be a supply or importation of goods or services. Goods are corporeal movable things, fixed property, and real rights in such things and property. The meaning of ‘services’ is very broad and includes the granting, assignment, cession, or surrender of any right or the making available of any facility or advantage.

Electronic services
Non-resident suppliers of electronic services are compelled to register for VAT on the payments basis and account for VAT on supplies of electronic services to SA residents.

Imports
Services imported by a vendor and utilised or consumed by the vendor for the making of taxable supplies are not subject to VAT. In addition, the VAT Act has a schedule that lists goods that are exempt from VAT on importation, whether by a vendor or an unregistered person.

Zero-rated supplies
The VAT Act contains a list of the supplies of goods or services that are taxed at the zero rate. Most of the items refer to exports and international transport, but other specified
goods utilised for farming purposes, the sale of an enterprise as a going concern, certain basic foodstuffs, fuel subject to the fuel levy, and deemed supplies by welfare organisations are also zero-rated.

A zero-rated supply made by a vendor is subject to VAT but at a rate of 0%. Under a zero-rated supply, a vendor does not charge VAT on the consideration for the supply and obtains a refund or credit for the VAT paid on taxable supplies utilised in the making of the zero-rated supplies.

**Exempt supplies**
In addition to zero-rated supplies, the VAT Act contains a list of the supplies of goods or services that are exempt from VAT. While all fee-based financial services are subject to VAT, the charging of interest is exempt. Other exempt supplies include residential rentals, non-international passenger transport by road or rail, and educational services.

Under exempt supplies by vendors, the vendors do not charge VAT on the supply, and they are not entitled to a deduction or credit for the VAT paid by them on goods and services supplied to them for the making of the exempt supply. Accordingly, vendors treat the VAT paid by them, and for which they do not obtain a deduction or credit, as another cost and recover it in the consideration they charge for the making of the exempt supply.

**Customs duties**
Customs duties are charged on importation of goods into South Africa at rates ranging between 3% and 45%. The import duties may also include anti-dumping and countervailing duties of up to 150%. No customs duties are charged on trade between South Africa and Botswana, Lesotho, Namibia, and Swaziland, as these five countries constitute the Southern African Customs Union.

**Excise duties**
Excise duty is levied on certain locally manufactured goods as well as their imported equivalents. A specific duty at a pre-determined amount is levied on tobacco and liquor, and an *ad valorem* duty (calculated as a percentage of price) on certain luxury goods and automobiles. Relief from excise duty is available for exported products and for certain products produced in the course of specified farming, forestry, and (limited) manufacturing activities.

**Property taxes**
Local municipalities levy rates on land. These rates are based on a percentage of the municipal valuation of land and improvements and vary from municipality to municipality. Generally, a higher rate is levied on properties zoned for business use.

**Transfer duty**
Transfer duty levied on the sale of immovable property is payable by the person acquiring the property within six months from the date of acquisition at the following rates:

<table>
<thead>
<tr>
<th>Purchase price (ZAR)</th>
<th>Transfer duty rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not exceeding 750,000</td>
<td>0%</td>
</tr>
<tr>
<td>750,001 to 1,250,000</td>
<td>3% on value above 750,000</td>
</tr>
<tr>
<td>1,250,001 to 1,750,000</td>
<td>15,000 plus 6% on value above 1,250,000</td>
</tr>
<tr>
<td>1,750,001 to 2,250,000</td>
<td>45,000 plus 8% on value above 1,750,000</td>
</tr>
<tr>
<td>2,250,001 to 10,000,000</td>
<td>85,000 plus 11% on value above 2,250,000</td>
</tr>
<tr>
<td>Exceeding 10,000,000</td>
<td>937,500 plus 13% on value above 10,000,000</td>
</tr>
</tbody>
</table>

Transfers of immovable property subject to VAT are exempt from transfer duty.
South Africa

**Securities transfer tax (STT)**
STT is levied at a rate of 0.25% of the taxable amount in respect of the transfer of a security. The taxable amount is usually the consideration for which the security is purchased or the market value of the security if the consideration declared is less than the market value or if no consideration was paid. STT is payable by the company that issued the securities in question. However, the company can recover the tax from the person acquiring the shares. Slightly different rules apply in the case of listed securities.

**Payroll taxes**
Employers are liable to withhold pay-as-you-earn (PAYE) on behalf of their employees. PAYE is payable to SARS on a monthly basis, calculated on the remuneration paid to an employee. The rates vary depending on the employee’s remuneration.

**Skills Development Levy (SDL)**
SDL is a compulsory levy to fund education and training. It is payable by an employer and cannot be deducted from the remuneration payable to an employee. Small employers with an annual payroll of less than ZAR 500,000 are exempt from the levy. SDL is levied at the rate of 1% of payroll. It is payable monthly, together with income tax that the employer has withheld on its employees’ salaries.

**Unemployment Insurance Fund (UIF) contributions**
Employers are required to contribute on behalf of their employees on a personalised basis to the UIF. The rate of contributions is 1% of gross remuneration payable to an employee; however, the monthly cap of ZAR 148.72 applies. Another 1%, subject to the same cap, is payable by the employee and withheld by the employer.

**Compensation for Occupational Injuries and Diseases Act (COIDA) fund**
Employers are liable for making annual contributions to the COIDA fund. COIDA contributions are a payroll cost that cannot be deducted from the employee’s salary, with a maximum salary cap of ZAR 355,752 per annum. The rates vary depending on the employer’s industry.

**Donations tax**
Disposals of assets below an adequate consideration are a deemed donation and subject to donations tax. Donations tax is payable by resident companies at a flat rate of 20% on donations made. An annual exemption of ZAR 10,000 is available.

Public companies, comprised of mostly listed companies, are exempt from donations tax. An exemption is also available for donations made to certain charities and other non-profit organisations.

**Vehicle emissions tax**
An environmental levy is levied on new passenger motor vehicles based on grams per kilometre of CO2 emissions of the vehicle over a stated level. From 1 April 2016, the levy is ZAR 100 to ZAR 140 per gram per kilometre over the CO2 threshold level.

**Fuel levy**
A fuel levy is included in the price of petroleum fuel sold. The general fuel levy for 2016/17 is 285 cents per litre of petrol and 270 cents per litre of diesel. A refund of the diesel fuel levy may be claimed in certain industries, such as agriculture, fishing, and mining.

**Electricity levy**
To support energy efficiency, the government has implemented a levy on electricity generated from non-renewable sources at 3.5 cents/kWh. The levy is paid at source by the electricity producer and recovered in the price to the consumer.
Tyre levy
A tyre levy will be implemented at a rate of ZAR 2.30/kg, effective 1 October 2016. The levy will replace the current fee arrangements for tyres, as regulated by the Department of Environmental Affairs.

Sugar tax
A tax on sugar-sweetened beverages is proposed to be introduced from 1 April 2017. The proposed tax rate is yet to be announced.

Air passenger tax
Passengers departing on international flights must pay air passenger tax at the rate of ZAR 100 on flights to Botswana, Lesotho, Namibia, and Swaziland, and ZAR 190 on other flights. The tax is added to the price of the ticket.

Branch income
SA branches of foreign companies are not considered to be separate legal entities for tax purposes, and no tax is withheld on transfers of profits to the head office. Branches of foreign companies are taxed at a rate of 28% and are not liable for dividends tax or any branch profits repatriation tax.

Note that a branch must register as a taxpayer and submit tax returns. Separate financial statements must be drawn up for the SA branch. For all practical purposes, the SARS will treat the branch as a separate entity. For example, inter-branch cost recoveries levied by the head office incurred in the production of SA income normally will be allowed as a deduction by the branch, although this treatment is not extended to interest on inter-branch loans.

In terms of DTAs, the taxation of branches is limited to cases where the branch constitutes a PE.

Income determination

Inventory valuation
Inventories generally are stated at the lower of cost or net realisable value. Write-downs of inventory for slow-moving and obsolete items must be justified, and a general policy on a percentage basis is not permitted. Last in first out (LIFO) is not accepted for tax purposes.

Capital gains
Although the capital gains tax forms part of income tax, the two taxes are not fully integrated. Gains realised by companies are taxed at the normal CIT rate. Previously, only 66.6% of gains were included in taxable income. Effective for years of assessment beginning on or after 1 March 2016, however, the inclusion rate increases from 66.6% to 80%, raising the effective capital gain tax rate from 18.6% to 22.4%.

Dividend income
Dividends are generally taxed in the hands of the beneficial owner at a rate of 15% (see Dividends tax in the Taxes on corporate income section). The amount is withheld by the company declaring the dividend on behalf of the shareholder receiving it. In specie dividends are subject to tax in the hands of the company and not the beneficial owner.

Foreign dividends received by or accrued to an SA-resident taxpayer are included in income based on a formula and taxed at the normal CIT rate, which results in an effective tax rate of 15%. Qualifying foreign dividends are also generally not subject to tax where they are received by resident shareholders holding in excess of 10% of
South Africa

the equity shares and voting rights of the company declaring the dividend. Dividends received by residents holding less than 10% of such shares will generally be taxable in South Africa, subject to a tax credit for foreign taxes payable by the recipient shareholder.

**Stock dividends**

Stock dividends (capitalisation issues of shares) are not subject to CIT or dividends tax.

**Interest income**

Interest income for resident companies is taxed at the normal CIT rate. Interest received by non-resident companies is only subject to CIT if it is from a source in South Africa and the company carried on business through a PE in South Africa during the tax year.

A 15% WHT on interest applies to interest paid on certain debt instruments to non-resident companies.

**Foreign income**

Foreign income of an SA-resident company is subject to tax in South Africa on an earliest of receipt or accrual basis. However, income that may not be remitted to South Africa in terms of the laws of the country where the amount arose is deferred until the income can be remitted. Double taxation may be avoided under certain DTAs or by way of unilateral credit or deduction for foreign tax payable on foreign income (see Foreign tax credit in the Tax credits and incentives section).

**Deductions**

**Depreciation and depletion**

A depreciation (wear and tear) allowance may be deducted on movable assets used for the purpose of trade. There are no statutory provisions relating to rates of wear and tear, but the SARS has published a table of periods over which the assets may be written off. The rates of wear and tear, based on the cash cost, are calculated either according to the straight-line or diminishing-balance method.

New and unused machinery used in a process of manufacture or in a similar process is depreciable at the rate of 40% in the first year of use and 20% in the three following years. If the machinery is not new and unused, an allowance of 20% per year over five years is available.

An accelerated depreciation allowance (50% in the first year of use, 30% in the second, and 20% in the third year) applies to the machinery and articles used in farming, production of biodiesel or bioethanol, and production of energy from certain renewable sources.

Specific allowances are also provided for pipelines, transmission lines, railway lines, rolling stock, airport property, ports, ships, mining operations, and other qualifying industrial assets.

Buildings and other permanent structures may not be depreciated, apart from an annual allowance for each of the following:

- Buildings used in a process of manufacture or a process similar to a process of manufacture: For buildings erected before 1 January 1989, a 2% rate applies per year. For buildings erected after 1 January 1989, a 5% rate applies.
- Hotel buildings: For buildings built prior to 4 June 1988, a 2% rate applies per year. For hotel buildings erected after 4 June 1988, a 5% rate applies. Improvements within the existing building framework that commenced on or after 17 March 1993 are depreciated at the rate of 20%.
• Agricultural cooperative storage buildings: For buildings built prior to 1 January 1989, a 2% rate applies per year. For buildings erected on or after 1 January 1989, a 5% rate applies.

• Housing projects of not less than five units: Housing projects of not less than five units of residential accommodation, which consist of more than one room and the erection of which commenced on or after 1 April 1982 and before 21 October 2008, are subject to a 2% rate of depreciation. After 21 October 2008, an allowance of 5% is available on this type of property. The 5% depreciation rate is available to the taxpayer provided that the unit is used by the taxpayer solely for trade purposes, the unit is situated in South Africa, and the taxpayer owns at least five units in South Africa used for the purposes of trade. An additional allowance is available for a low-cost residential unit. Additionally, from 21 October 2008, taxpayers are granted relief for the transfer of ownership on a contract for deed basis of employer provided low-cost residential units to employees.

• Buildings in urban development zones: Improvements to an existing building in an urban development zone, where the existing structural or exterior framework is preserved and brought into before 31 March 2014, qualify for an accelerated allowance of 20% per year. Buildings that are erected, extended, or added to in an urban development zone on or after 21 October 2008 and which are not covered by the first mentioned allowance qualify for a 20% allowance in the first year and an 8% allowance in the following ten years. As of 21 October 2008, new and unused low-income residential units located in urban development zone demarcations are subject to an additional annual depreciation allowance. The rate is 25% in the first year, 13% in the succeeding five years, and 10% in the year following the last year. Improvements are subject to a depreciation allowance of 25% over a period of four years.

• Commercial buildings: The cost to the taxpayer of any new and unused building owned by the taxpayer, or any new and unused improvement to any building owned by the taxpayer, if that building or improvement wholly or mainly is used by the taxpayer for trade purposes, other than the provision of residential accommodation, is subject to a 5% rate of depreciation. This allowance is applicable to any building or improvement contracted for on or after 1 April 2007 and the construction of which commenced on or after 1 April 2007.

An allowance for assets disposed of or scrapped during a year of assessment is determined by reference to the cost less allowances already granted and the proceeds on disposal (if any). Recoupments of allowances granted are taxable where disposal proceeds exceed the tax basis at the time of sale. Such recoupments cannot exceed the cost of the asset. Proceeds above cost will be taxed as a capital gain.

Book depreciation does not need to be consistent with tax depreciation.

No cost or percentage depletion is available for natural resources.

**Goodwill**

The sale and purchase of goodwill is generally a transaction on capital account, and the person paying for the goodwill will usually be unable to claim a deduction. No capital allowances are available for goodwill.

**Start-up expenses**

Special relief is provided for start-up (or pre-trade) expenditure to allow for a deduction in the year that trade commences. The expenses are only deductible if they would have been deductible had they been incurred after the commencement of trade. These expenses and any loss they create are ring-fenced and may only be deducted against income from the trade to which the start-up costs relate.
**Interest expenses**
Generally, interest expenditure incurred in the production of non-exempt income and for the purposes of trade is deductible. However, interest that is incurred to produce income that is exempt from tax will not be allowed as a tax deduction. A special dispensation applies to the deduction of interest on debt used to acquire shares in a company, provided certain requirements are met.

Special rules apply to determine the amount of interest and timing of any deductions taking into account all payments and receipts in respect of debt instruments with interest being determined on the basis of an internal rate of return.

Certain debt instruments that are convertible to shares or may be settled in shares or where repayment is subject to solvency or related to connected-party debt with a maturity of 30 years or more are treated as hybrid debt instruments and no interest deduction is allowed in respect thereof. Certain hybrid interest is also treated as a dividend.

In addition, the interest deduction for interest paid between related parties is limited where such interest is not subject to income tax or WHT on interest. In terms of these rules, interest deductions are limited to an amount determined with reference to a percentage of taxable income before interest and depreciation. The percentage is determined with reference to the repo rate with a ceiling of 60% of adjusted taxable income. Any excess interest may be carried forward to the following year for deduction. The transfer pricing and thin capitalisation rules continue to apply to such interest.

Further interest deduction limitations also apply to interest paid on debt used to fund acquisitions of shares or businesses under certain of the corporate rollover relief provisions (see the Group taxation section). In terms of these rules, with some amendments thereto only applying for years of assessment commencing on or after 1 January 2015, interest deductions on such transactions are limited to an amount determined with reference to a percentage of taxable income before interest and depreciation. The percentage is determined with reference to the repo rate with a ceiling of 60% of adjusted taxable income.

The deduction of cross-border interest paid to connected persons is subject to limitation under transfer pricing rules (see Transfer pricing and thin capitalisation in the Group taxation section).

**Bad debt**
Bad debts are tax deductible if the debt relates to an amount that has been included in the taxpayer’s taxable income in any tax year if it is due at the end of the year of assessment. A tax allowance is also provided for in respect of specifically identified doubtful debts.

Any bad debts arising on loaned money is deductible if it was lent in the course of a money-lending business.

**Charitable contributions**
Donations to certain charitable organisations approved as public benefit organisations are tax deductible, up to a maximum of 10% of taxable income.

**Cost of inventory**
The cost of inventory is, in principle, deductible as soon as the inventory is acquired. However, at the end of each year, the cost of the inventory still on hand has to be added to the company’s income. Then in the next year, it can be deducted again. This has the effect of timing the deduction of the cost of inventory to match the time of its realisation.
**Assets acquired for shares issued**
When assets are acquired by a company in return for shares issued to the seller, the purchaser of the assets is deemed to have incurred expenditure equal to the market value of the shares immediately after acquisition. Special rules apply in the case of a mismatch in the value of the shares and assets.

**Fines and penalties**
Any fine or penalty imposed in respect of an unlawful activity carried out in South Africa, or in any other country where it would be unlawful in South Africa, is not deductible for tax purposes.

**Taxes**
Most taxes (other than income taxes, donations tax, WHT on interest, and dividends tax) are deductible from taxable income for the corporation, provided they qualify for deduction under general rules.

**Net operating losses**
Losses may be carried forward indefinitely, provided an active trade or business of a similar nature is carried on without interruption. There is no loss carryback in South Africa.

**Payments to foreign affiliates**
Deductions may be claimed for royalties, managerial service fees, and interest charges paid to foreign affiliates, provided such amounts approximate those that would be paid to an unrelated party in an arm's-length transaction.

Interest deductions may be limited in certain circumstances (see Interest expenses above and Transfer pricing and thin capitalisation in the Group taxation section).

**Group taxation**
Group taxation is generally not permitted in South Africa. However, relief is given for transactions between group companies to allow for reorganisations, provided certain requirements are met.

In general, the relief will only apply to transactions between companies within the same group. A group of companies is defined as a controlling company and one or more controlled companies in relation to that controlling company. A controlling company means a company holding, directly or indirectly, at least 70% of the equity shares of any other company. Foreign-incorporated companies do not form part of a group of companies for the purposes of this relief unless effectively managed in South Africa, although relief is extended to controlled foreign companies (CFCs) in certain circumstances.

Corporate rollover relief is available for asset-for-share transactions, amalgamation transactions, intra-group transactions, unbundling transactions, and transactions relating to liquidation, winding-up, and deregistration.

The relief may cover the capital gains tax arising from the disposal of capital assets, income tax arising from the disposal of a depreciable asset, income tax arising from the disposal of trading stock, donations tax arising from the disposal of an asset, dividends tax, VAT, securities transfer tax, and transfer duty.

**Transfer pricing and thin capitalisation**
South Africa has transfer pricing legislation applying to cross-border transactions involving connected persons. The transfer pricing legislation applies the arm's-length standard.
South Africa

The transfer pricing legislation does not separately address transfer pricing and thin capitalisation. Rather, thin capitalisation is treated as simply a breach of the general arm's-length standard.

Where a transfer pricing adjustment is required to be made, that adjustment is subject to a secondary adjustment where it is deemed to be either a dividend or a donation.

**Controlled foreign companies (CFCs)**
If one or more residents together, directly or indirectly, hold more than 50% of the voting or participation rights in a foreign company, then it is a CFC in relation to those residents. The income of a CFC is imputed to the residents in proportion to their holdings, subject to certain exclusions and tax credits, where applicable. The most notable exclusions are for high-tax CFCs and income attributable to foreign business establishments.

---

**Tax credits and incentives**

**Foreign tax credit**
The South African Income Tax Act makes provision for a rebate against CIT in respect of foreign taxes paid on foreign-sourced income or a deduction against income of foreign taxes paid on SA-sourced income. In both instances, the taxpayer must be an SA resident, the income must be included in taxable income, and that income must have been subject to a foreign tax that is not recoverable. The rebate is limited to the total normal tax payable calculated by applying the ratio of the total taxable income attributable to the foreign tax to the total taxable income. The deduction, however, may not exceed the income on which the foreign tax was levied.

**Research and development (R&D)**
The current costs related to certain R&D activities carried on in South Africa are 150% deductible, subject to pre-approval by a government-appointed approval committee. The cost of machinery and other capital assets acquired for the purposes of R&D may be depreciated 40% in the first year of use, 20% in the second, 20% in the third year, and 20% in the fourth year. Buildings used in the process of R&D may be written-off over a 20-year period.

**Headquarter company regime**
A ‘headquarter company’ regime encourages the use of South Africa as a location for intermediate holding companies.

The main benefits offered to a headquarter company are:

- Exemption from South Africa's CFC rules.
- Exemptions on the headquarter company's dividend distributions.
- Exemption from the WHT on interest in certain circumstances.
- Exemption from South Africa's transfer pricing rules on back-to-back loans, outbound loans, back-to-back intellectual property (IP) licensing arrangements, and outbound IP licensing arrangements.
- Capital gains tax exemption upon the disposal of shares by the headquarter company.

The requirements for a headquarter company are as follows:

- The headquarter company must be SA resident.
- Each shareholder in the headquarter company must hold at least 10% of the headquarter company’s equity shares and voting rights. This means that a headquarter company can never have more than ten shareholders.
- At least 80% of the headquarter company’s assets (measured on a ‘cost’ basis and excluding cash and certain bank deposits) must be comprised of certain assets related...
to the foreign companies in which the headquarter company holds at least 10% of the equity shares and voting rights. Specifically, these assets must be:

- the equity shares in those companies
- loans to those companies, and
- IP licensed to those companies.

- At least 50% of the headquarter company’s gross income must be comprised of dividends, interest, royalties, rentals, service fees, or proceeds from the sale of equity shares or IP from its 10%-plus holdings, where the gross income exceeds ZAR 5 million.

**Industrial policy projects**

In 2008, a ZAR 20 billion incentive package for investors in energy efficient projects was announced. The incentive is available for industrial projects participating in the manufacturing sector (other than alcohol or alcohol-related products, tobacco or tobacco-related products, arms and ammunition, and biofuels, which have a negative impact on food security). Companies are divided into those with a qualifying status and those with a preferred status. The status is determined in terms of a point system.

The proposed project must either be a ‘brownfield project’ (expansion or upgrade of an existing industrial project) or a ‘greenfield project’ (a wholly new industrial project, which uses new and unused manufacturing assets). Approved projects may be granted a tax allowance known as an additional investment allowance equal to 55% (100% if located in an industrial development zone) of the cost of any manufacturing asset used in an industrial policy project with preferred status or 35% (75% if located in an industrial development zone) of the cost of any manufacturing asset used in any other approved industrial policy project.

The additional investment allowance may not exceed ZAR 900 million in the case of any greenfield project with a preferred status, ZAR 550 million in the case of any other greenfield project, ZAR 550 million in the case of any brownfield project with a preferred status, or ZAR 350 million in the case of any other brownfield project.

In addition to the above, a company may also claim a deduction known as an additional training allowance.

**Special Economic Zones (SEZs)**

An SEZ incentive has been introduced for companies carrying on business in an SEZ comprising of a reduced corporate tax rate of 15% as well as a 10% allowance in respect of the cost of new and unused buildings owned by a qualifying company or any new or unused improvements to any building owned by a qualifying company.

In addition, employment incentives have also been introduced for employers carrying on a trade in an SEZ that will allow for an employees’ tax reduction for the employer in respect of qualifying employees, up to a prescribed monthly amount.

**Energy efficiency savings**

The energy efficiency savings incentive provides an income tax deduction to qualifying taxpayers. The deduction equates to ZAR 0.95 for each kilowatt hour (or equivalent) saved by the taxpayer during the relevant year of assessment against a baseline from the beginning of the year.

**International shipping incentive**

Income from international shipping of a resident company that holds a share in a South African flagged ship is exempt from income tax. Qualifying shipping companies can also use a currency other than the rand as their functional currency.
Venture capital companies
In order to assist small and medium-sized businesses to raise capital to finance businesses, a tax incentive for investors in small and medium-sized enterprises through venture capital companies was introduced.

A deduction is allowed from the income of a taxpayer in respect of expenditures actually incurred by that person in respect of shares issued to that person by a venture capital company.

Withholding taxes

Payments to residents
The only payments to residents that are subject to WHT are in respect of dividends, although resident companies are exempt from the dividend WHT.

Royalties payable to non-residents
Royalties and know-how payments made to non-residents for the use of or right to use IP rights in South Africa are deemed to be from an SA source. The payer of the royalty or know-how payment is obligated to deduct a WHT of 15% of this payment, which is a final tax payable by the recipient of such income.

Dividends payable to non-residents
A dividend WHT of 15% applies to any dividend paid by a resident company or dividend paid to SA residents by a non-resident company in respect of shares listed on an SA exchange. The tax is imposed on the beneficial owner of the dividend and not on the company, with the exception of in specie dividends. The payer of the dividend or regulated intermediary is obligated to deduct the 15% WHT from the payment. The treaty rate is the maximum allowable rate to be charged by the treaty countries; where this rate is higher than the domestic tax rate, the latter will apply.

Interest payable to non-residents
A 15% WHT on interest applies to interest payable from an SA source to non-residents on certain debt instruments. The resident payer of the interest is obligated to deduct the 15% WHT from the payment.

Treaty rates for dividends, interest, and royalties
The WHT may be reduced by the terms of the relevant tax treaty, as follows:

### Notes

'D' refers to direct capital holding.

1. Recipient is the beneficial owner of the royalty.
2. Royalty is subject to tax in recipient country.
3. 15% is levied on royalties for cinematographic or television films.
4. The maximum rate for copyright royalties, royalties for use of computer software, and patents concerning industrial, commercial, and scientific experience is 6% of the royalties paid; otherwise, 10%.
5. Maximum rate of 10% on royalty of the adjusted amount (being 70% of the gross royalties) for use of industrial, commercial, or scientific equipment.
6. The 5% rate applies to royalties for the use of a copyright. A 7% rate applies to royalties for the use of patents, trademarks, designs, models, etc.
7. In respect of right to use industrial, commercial, or scientific equipment and transport vehicles, a 10% rate applies.
8. The lower rate of 5% applies to any cultural, dramatic, musical, or other artistic work (not including royalties in respect of motion picture films) as well as industrial, commercial, or scientific works. The rate of 10% applies in all other cases.
9. The 5% lower rate applies to use of literary, artistic, and scientific works. The 7% lower rate applies to right of use of patents, trademarks, designs, and models.
10. No right to tax dividends in payor state if the beneficial owner of the dividend is resident in the payee state.
11. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital, and the higher rate applies in other cases.
12. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of capital, and the higher rate applies in other cases.
13. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of voting shares, and the higher rate applies in other cases.
14. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital and a minimum 12-month holding period prior to the end of the accounting period prior to the dividend payment, and the higher rate applies in other cases.
15. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of voting shares and a minimum six-month holding period prior to the end of the accounting period prior to the dividend payment, and the higher rate applies in other cases.
16. SA resident payor to Maltese resident beneficial owner (Maltese resident payor to SA resident beneficial owner is limited to tax on profits).
17. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital and a minimum two-year uninterrupted holding period prior to the dividend payment, and the higher rate applies in other cases.
18. Lower rate applies to a beneficial owner who has a minimum holding of 30% of capital and a minimum direct investment of 100,000 United States dollars (USD) in the company declaring the dividend, and the higher rate applies in other cases.
19. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of capital, and the higher rate applies in other cases. However, a ‘most favoured nations’ clause applies, which will limit the above rates to the lowest treaty rate in terms of any other treaty.
20. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 20% of capital, and the higher rate applies in other cases.
21. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 15% of capital, and the higher rate applies in other cases.
22. Lower rate of 5% applies to a beneficial owner that is a company and has a minimum holding of 10% of capital. Lower rate of 10% applies in all other cases. 15% rate applies to all dividends from property investment companies.

304 South Africa PwC Worldwide Tax Summaries
23. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of voting power (directly), and the higher rate applies in other cases.
24. The treaty contains no provisions regarding dividends WHT, thus the domestic rate will apply.
25. The Netherlands Protocol has a ‘most favoured nations’ provision whereby the rate most favourable in any other treaty will apply over the default treaty rate. This, however, only applies to treaties concluded after this treaty.
26. No right to tax interest in payor state if the beneficial owner of the interest is resident in the payee state.
27. The 5% rate applies to interest derived by a bank or any other financial institution, and the 10% rate applies in other cases.
28. No right to tax interest in payor state if the beneficial owner of the interest is resident in the payee state and provided interest is taxable in that other state.
29. No specific provision is made for interest in the DTA.
30. The 10% rate applies to interest received by a financial institution (including an insurance company), and the 15% rate applies in other cases.
31. The 5% rate applies to interest on loans made by banks, and the 12% rate applies in other cases.
32. The 5% rate applies if the interest is paid to a bank; the 10% rate applies in other cases.
33. In Canada, a beneficial owner that is a company controls a minimum of 10% of the voting power (directly/indirectly), but excludes non-resident owned investment corporation resident in Canada.
34. In New Zealand, dividends are taxed at a flat rate of 15%.
35. No right to tax interest in payor state if the beneficial owner is the government of the other state or a government entity.
36. No specific provision is made for royalties in the DTA.
37. No right to tax interest on stocks and securities issued by any government other than South Africa, even if a business is carried on in South Africa, if taxed in residence state.
38. Lower rates for royalties do not apply if attributable to a PE in the payor state or the right or property on which royalty is paid is attributable to PE in payor state.
39. The 10% rate applies if the beneficial owner is resident in the payee state.
40. Lower rate of 5% applies to the dividend if beneficial owner is resident in payee state.
41. The interest exemption in the source country is only retained for interest paid or received by a government or central bank, or for interest on debt instruments listed on a recognised stock exchange.
42. The interest exemption applies if the beneficial owner of the interest is the Hong Kong Special Administrative Region (HKSAR) Government, the Hong Kong Monetary Authority, the SA Government, the SA Reserve Bank, or institutions wholly or mainly owned by them.

Non-resident entertainers and sportspersons
A WHT at the rate of 15% applies to all payments made to non-resident entertainers and sports persons in respect of their activities exercised in South Africa.

Disposal of immovable property by non-residents
Any person who pays an amount to a non-resident in respect of the sale of immovable property in South Africa must withhold from the amount payable an amount equal to:

- 5% if the non-resident seller is an individual
- 7.5% if the non-resident seller is a company, or
- 10% if the non-resident seller is a trust.

The amount so withheld is not a final tax for the non-resident seller. Instead, this amount is regarded as an advance payment of the non-resident seller’s normal tax liability for the year of assessment during which the property is disposed of. The non-resident seller is still obligated to submit an income tax return for that year.

Tax administration

Taxable period
The corporate tax year is the same as the company’s financial year. It may be changed upon application showing reasonable cause.

Tax returns
Annual income tax returns must be submitted within one year from the end of the company’s tax year. The annual tax return includes a supplementary reconciling return where requested. Furthermore, schedules apply for CFCs, short-term insurers, mining companies, headquarter companies, and learnership allowances.

‘Signed off’ financial statements are required to be submitted with the annual tax return.
Payment of tax
Payments are made with provisional returns filed at six-month intervals from the tax year-end based on an estimate of taxable income for the year. Interest is charged on any underpayment outstanding for more than six months after the tax year-end, except in the case of February year-ends, in which case it is seven months. Any balance (together with interest) is then paid following assessment.

Tax audit process
There is no prescribed audit process, and an audit can be initiated by any factor as determined by the SARS. The audit or inspection will commence with a request from the SARS for the taxpayer to make available any such records or information as may be required.

Statute of limitations
Tax debts to the state prescribe after a period of 15 years. Tax returns submitted that have been assessed may not be reopened after a period of three years from date of assessment by the SARS or five years if it is a self-assessment by the taxpayer, unless there has been fraud, misrepresentation, or non-disclosure by the taxpayer.

The prescription period may be extended by three years in the case of an assessment by the SARS or by two years in the case of self-assessment in respect of certain complex matters, such as transfer pricing and general anti-avoidance cases.

Topics of focus for tax authorities
The SARS, in their 2015/16 to 2019/20 Strategic Plan, stated that they will focus on the following areas:

- Large business and transfer pricing.
- The construction industry.
- Illicit cigarettes.
- Undervaluation of imports in the clothing and textile industry.
- Small business and cost of compliance.
- Collaboration with other jurisdictions on tax base erosion.

Other issues

Intergovernmental agreements (IGAs)
South Africa entered into an agreement with the United States to improve international tax compliance and to implement the Foreign Account Tax Compliance Act (FATCA). The date of entry into force is 28 October 2014.

South Africa is also a party to the Multilateral Convention on Mutual Administrative Assistance on Tax Matters as well as a number of bilateral tax information exchange agreements.
Significant developments

There have been no significant corporate tax developments in Swaziland during the past year.

Taxes on corporate income

Income tax is levied on all income derived from sources generated within or deemed to be generated within the country, irrespective of whether the recipient of the income is actually resident in Swaziland.

All companies generating income within Swaziland are taxed on that income at a flat rate of 27.5%.

Corporate residence

Permanent establishment (PE)

PE in Swaziland is determined according to physical presence.

Other taxes

Value-added tax (VAT)

VAT is charged at the standard rate of 14%.

Customs duties

Swaziland has a provision for customs duties for various goods imported into the country. Details are available in the Harmonized Tariff Schedule (HTS).

Excise duties

Swaziland has an excise duty provision for various goods manufactured in the country.

<table>

Swaziland

**Property taxes**
There are no property taxes in Swaziland.

**Transfer taxes**
Transfer taxes are applied on a variable rate basis to property transfers based on the fair market value of the property being transferred.

**Stamp taxes**
Swaziland has a provision for stamp taxes on various documents. The tax is determined either by way of a set fee or on a sliding scale percentage basis.

**Payroll taxes**
Pay-as-you-earn (PAYE) is to be deducted from employees on a monthly basis and according to the tax tables applicable to individuals, which are provided in the Taxes on personal income section of Swaziland's Individual tax summary at www.pwc.com/taxsummaries.

**Social security contributions**
There are no social security contributions in Swaziland.

---

**Branch income**

Income tax on registered branch profits is calculated as for a resident company, and a branch profits tax of 15% is assessed for deemed repatriated income. In practice, however, branches are rare since most foreign companies incorporate local subsidiary companies.

---

**Income determination**

**Inventory valuation**
Inventory valuation is not specific but is effectively at the lower of cost (i.e. first in first out [FIFO] or average cost) and net realisable value.

**Capital gains**
Capital gains are not subject to income tax, provided it can be demonstrated that the gains are of a capital and not an income nature (i.e. not recurring transactions).

**Dividend income**
Dividend income is taxable via withholding tax (WHT) for non-residents (see the Withholding taxes section). No tax is due if received from another local company.

**Inter-company dividends**
Inter-company dividends are not subject to income tax.

**Stock dividends**
Stock dividends are paid out of taxed profits. Such dividends are not subject to income tax when received by a local company, but they are subject to taxation in the hands of local individual taxpayers at the rate of 10%.
**Interest income**
Interest income sourced in Swaziland is taxable.

**Foreign income**
Foreign income is not subject to income tax unless it is deemed to be from a Swaziland source.

**Deductions**

**Depreciation**
Depreciation (wear-and-tear) allowances calculated by the net-reducing-balance method are available as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>

</table>

For the first year after the addition of an asset, the wear-and-tear allowance is calculated on a monthly basis. With respect to leased assets, the lessor’s claim for wear-and-tear allowance is usually spread over the lease period.

An initial allowance of 50% is granted for plant and machinery used in a manufacturing process, including hotel equipment. An initial allowance of 50% is granted for industrial buildings used for manufacturing purposes and hotels, together with a 4% annual allowance.

**Goodwill**
The write-off of any goodwill is not allowed for tax purposes.

**Start-up expenses**
It is departmental practice to not allow the deduction of any start-up expenses.

**Interest expenses**
Interest is deductible as long as it is incurred in the production of income.
Swaziland

Bad debt
Swaziland does allow a deduction for bad debts, subject to the Commissioner’s approval and provided that the debts were included in the taxpayer’s income in the year of assessment or in years past.

Charitable contributions
Subject to the Commissioner’s approval in regard to the amount allowable as a deduction in the year of grant and subsequent years, Swaziland allows a deduction for, among other things, grants made to the government for the building of schools and hospitals.

Fines and penalties
Fines and penalties resulting from late payment of any tax or levied as payable under any Act administered by the Commissioner will be a non-deductible expense.

Taxes
Taxes are not deductible.

Net operating losses
Losses may not be carried back but may be carried forward for as long as trading continues (i.e. indefinitely). If any break in trading occurs, however, the losses are forfeited.

Payments to foreign affiliates
Deductions may be claimed for payments of management service fees, interest, and royalties to foreign affiliates, provided the payments are made under a written agreement, are reasonable, and receive exchange control approval for transfers outside the rand monetary area. Note that this approval is routinely given without any significant delay for bona fide transactions.

Group taxation
Swaziland does not have group taxation legislation. All companies are assessed on their individual profits and losses.

Transfer pricing
Swaziland does not have transfer pricing legislation; however, under the anti-avoidance provision, the Revenue Authority will look for arm’s-length transactions.

Thin capitalisation
Swaziland does not have thin capitalisation rules.

Controlled foreign companies (CFCs)
Swaziland does not have any legislation regarding CFCs.

Tax credits and incentives

Foreign tax credit
Swaziland does not have a foreign tax credit regime.

Development Approval Order
The Minister of Finance, along set guidelines and with prior consent of the Cabinet, may nominate a business as a developmental enterprise (i.e. a business the Minister deems to be beneficial to the development of the economy) for a grant of a Development Approval Order. If approved, the business generally will be granted tax concessions, such as a lower corporate tax rate.
**Withholding taxes**

Non-resident WHTs are levied as follows.

**Dividends**

WHT for dividends is payable at the rate of 15% (12.5% for companies registered in Botswana, Lesotho, and the Republic of South Africa). The rate drops to 10% under the double taxation agreement (DTA) with South Africa where the holding company owns more than 25% of the shares. Non-resident shareholders’ WHT is payable within 30 days of the date on which the dividend is payable.

**Interest**

WHT for interest is payable at the rate of 10%. Non-resident WHT on interest is payable within 14 days of the date of the accrual of the interest.

**Royalties and management fees**

WHT for royalties and management fees is payable at the rate of 15%. Upon application, 5% may be refunded if there is a DTA in place.

**Entertainers and sportsmen**

WHT is payable at the rate of 15% on income earned in Swaziland by entertainers and sportsmen. This tax relates only to public entertainers and sportsmen not ordinarily resident in Swaziland. The payer is required to deduct the tax and pay it within 15 days.

**Contractors or professionals**

WHT is payable at the rate of 15% on services provided by contractors or professionals in Swaziland (materials are not taxed to the extent that materials are incidental to the overall charge). The Commissioner of Taxes must be notified of any agreement relating to construction operations or professional services under which payments are made to non-resident persons within 30 days after entering into the agreement. It is required that the tax be paid within 15 days from the date of payment.

**Tax administration**

**Taxable period**

The tax year runs from 1 July to 30 June. Companies are required to have a 30 June year-end unless another year-end date is approved by the Commissioner of Taxes; such approval is routinely given.

**Tax returns**

Income tax returns should be submitted within 120 days of 30 June, unless an extension of time for submission is granted, which also is routinely given if all tax requirements for the prior year are up to date and the provisional tax has been paid in accordance with the law. The extension of time is usually granted for a further 60 days, which effectively gives the taxpayer six months to submit their income tax return.

**Payment of tax**

Notice of the date of payment is usually given on the tax assessment.

**Provisional tax payments**

With respect to companies, provisional tax is payable in two instalments: one payment is due within six months of the company’s financial year-end, and the other payment is due no later than the last day of the company’s financial year.

The estimate of taxable income for provisional tax purposes should not be less than the taxable income assessed for the latest preceding year of assessment for which an assessment has been issued that is not less than 21 days before the date the estimate is
Swaziland

made. This rule does not apply if the taxpayer can convince the Commissioner of Taxes that the taxable income for the current year will be less than the taxable income for the preceding year.

A provisional taxpayer becomes liable to pay a penalty if the estimate for taxable income for the second payment of provisional tax is found to be both less than 90% of the taxable income as finally determined and less than the taxable income as assessed for the immediately preceding tax year.

**Tax audit process**
All assessments are subject to a tax audit. Current departmental practice is to perform tax audits going back four years.

**Statute of limitations**
There is no statute of limitations in Swaziland.

**Topics of focus for tax authorities**
Currently, the tax authorities are conducting full tax audits.
Significant developments

As introduced by the Finance Act 2015, the period for the change in control rule has been reduced to two years (from three years); consequently, realisation of assets and liabilities triggers when underlying ownership changes by more than 50% compared to ownership during the previous two years.

A new Value-added Tax (VAT) Act was passed by the Parliament in November 2014 and assented by the President in January 2015. It came into effect from 1 July 2015 and replaced the old VAT Act 1997. See the description of VAT in the Other taxes section for a summary of changes under the new Act.

A new Tax Administration Act 2015 (TAA 2015) was assented by the President in May 2015 and came into effect from 1 August 2015. The intention of the TAA 2015 was to consolidate provisions relating to tax administration with a view to ease tax enforcement and administration. Changes brought in by the TAA 2015 have been incorporated into this summary.

Please note that this summary is current as of 1 June 2016. There are changes in the tax legislation (the Finance Act 2016) announced in June 2016 that are effective 1 July 2016. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2016.

Taxes on corporate income

A Tanzanian resident is taxed on worldwide income, irrespective of source. Non-residents are taxable on income with a source in Tanzania.

Income tax is charged at a rate of 30% on income of a resident corporation and of a permanent establishment (PE) of a non-resident corporation or 5% of turnover for technical and management service providers to mining, oil, and gas entities (deducted by way of withholding tax [WHT]). Certain payments to non-residents are subject to tax at the relevant non-resident WHT rates (see the Withholding taxes section for the relevant rates).

Gain from the disposal of investments in Tanzania is subject to income tax where such investments fall within the source rules, and, in such a case, the gain will be taxed at a rate of 30%.

Reduced rate for newly listed companies

A reduced corporate tax rate of 25% applies for three consecutive years for companies newly listed on the Dar es Salaam Stock Exchange (DSE). To qualify, at least 30% of the company’s shares must be issued to the public.

Alternative minimum tax

Alternative minimum tax applies at a rate of 0.3% to the turnover of companies with perpetual unrelieved tax losses for the current and preceding two income years. Exemption
applies to (i) agricultural companies and (ii) companies engaged in provision of health or education.

Local income taxes
There are no local income taxes levied by local authorities. Please see Local taxes in the Other taxes section for a description of the local service levy based on turnover.

Corporate residence
A company is tax resident if it is incorporated or formed under the laws of Tanzania or if the management and control of its affairs is exercised in Tanzania.

Permanent establishment (PE)
A non-resident entity has a PE in Tanzania if it carries on business in Tanzania. This includes a place where a person (i) is carrying on business through a dependent agent; (ii) has used or installed, or is using or installing, substantial equipment or machinery; and (iii) is engaged in a construction, assembly, or installation project for six months or more, including a place where a person is conducting supervisory activities in relation to such a project.

Other taxes
Value-added tax (VAT)
VAT is chargeable on all taxable goods and services supplied in, or imported into, mainland Tanzania. The standard rate of VAT is 18%, but the export of goods and certain services is eligible for zero rating. Businesses with an annual taxable turnover of more than 100 million Tanzanian shillings (TZS) must register for VAT.

There is also mandatory registration for professional services providers (e.g. lawyers and accountants) and government entities/institutions carrying on economic activity. A non-resident who carries on economic activity in mainland Tanzania without a fixed place and makes taxable supplies in excess of the VAT registration threshold is required to appoint a VAT representative.

For imported goods, VAT is payable at the time of importation together with any customs and excise duties. VAT payable with respect to capital goods (as defined), which are imported or purchased in Tanzania, may be deferred, subject to certain procedures being followed. The Commissioner for VAT has the discretion to register (as intending traders) investors whose projects have not commenced production but who wish to be VAT-registered in order to reclaim the tax they incur on start-up costs.

For imported services, VAT is accounted for by registered businesses through a ‘reverse-charge’ mechanism, such accounting is only relevant where a taxpayer has exempt supplies of 10% or more of total supplies.

Depending on the industry, there are a number of exempt supplies. These include (this list is not exhaustive):

- Agricultural implements, agricultural inputs, livestock, basic agricultural products and foods for human consumption; implements for fisheries and bee-keeping; dairy equipment, maize flour, and wheat flour.
- Food, clothing, and shoes donated to non-profit organisations for free distribution to orphanages or schools for children with special needs in mainland Tanzania.
- Goods imported by non-profit organisations for the provision of emergency and disaster relief (conditional).
- Goods imported by religious organisations for the provision of health, education, water, and religious services (conditional).
Tanzania

- Educational services provided by a relevant approved educational institution; education materials.
- Laboratory equipment and reagents imported by a registered educational institution and to be used solely for educational purposes.
- Goods eligible for relief under the East African Customs Management Act (where imported by a registered and licensed explorer or prospector for exclusive use in oil, gas, or mineral exploration or prospecting activities).
- Various goods imported by a natural gas distributor (including compressed natural gas [CNG] plants equipment, natural gas pipes, transportation and distribution pipes, CNG storage cascades, CNG special transportation vehicles, natural gas metering equipment, CNG refuelling of filling, gas receiving units, flare gas system, condensate tanks and leading facility, system piping and pipe rack, and condensate stabiliser).
- Healthcare, medicine, or pharmaceuticals products, not including food supplements or vitamins; articles designed for people with special needs; funeral services.
- Firefighting vehicles imported by the government and firefighting equipment.
- Sale of vacant land.
- Lease, license, hire, or other form of supply, to the extent that it is a supply of the right to occupy and reside in residential premises.
- Water (except bottled or canned water or similarly presented water).
- Solar equipment (in particular, solar panels, modules, solar charger controllers, solar inverters, solar lights, vacuum tube solar collectors, and solar batteries). Wind generators and liquid elevators are no longer included in the list of exemptions (unlike the 1997 Act).

A business that only makes exempt supplies is unable to register for VAT and, consequently, unable to recover the VAT incurred on inputs.

Export of goods and certain services is zero-rated (i.e. taxable at a rate of 0%).

Registered businesses must submit VAT returns, and pay any tax due, on a monthly basis.

The new VAT Act has broadened restrictions on claiming input tax. For example, one cannot claim VAT paid on entertainment, sporting, social, or recreational clubs or associations, nor on spare parts and repair or maintenance costs in respect of passenger vehicles.

The input tax claim time limit is six months. However, this time limit starts to run not only by reference to the date of the tax invoice/fiscal receipt but also by reference to the date of the time of supply.

Input tax incurred in the six months prior to VAT registration can be claimed no later than in the third VAT return submitted following registration.

A company with taxable supplies of more than 90% of total supplies is entitled to full input tax credit.

A company with taxable supplies less than 10% of total supplies is not entitled to claim any input tax incurred.

A company with taxable supplies between 10% and 90% of total supplies is entitled to partial input tax recovery. Only one apportionment method, namely the average method can be used. Imported services are not taken into account as supplies when determining the allowance of input tax for partial exemption purposes.

Businesses entitled to VAT refunds can claim any remaining credit six months after a refund first became due, subject to all intervening returns being rendered. Any claim for a VAT refund must be supported by an auditor's certificate. Businesses in a consistent refund position (e.g. exporters) can apply for approval to lodge their refund claims on a monthly basis.
Zanzibar has its own VAT Act, but it is similar to the Mainland Tanzania Act.

**Customs duties**
Tanzania is a member of the East African Community, which became a Customs Union on 1 January 2005 on the implementation of the East African Customs Union Protocol. This protocol provides for a common external tariff (CET), elimination of internal tariffs, rules of origin, anti-dumping measures, a common customs law, and common export promotion schemes.

The import duty rates applicable under the CET are as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Raw materials, capital goods, agricultural inputs, pure-bred animals, medicines</td>
<td>0</td>
</tr>
<tr>
<td>Semi-finished goods</td>
<td>10</td>
</tr>
<tr>
<td>Finished final consumer goods</td>
<td>25</td>
</tr>
<tr>
<td>Machinery and spare parts imported by licensed mining companies and used in mining activities</td>
<td>0</td>
</tr>
<tr>
<td>Machinery, spares, and inputs imported by licensed company for direct use in oil, gas, and geothermal exploration</td>
<td>0</td>
</tr>
</tbody>
</table>

Tanzania is also a member of the Southern African Development Community (SADC). Where goods are subject to a lower rate of duty from another trade bloc, such as the SADC, the lower duty rate applies until such a time as the trading arrangements between the trading blocs are harmonised.

**Excise duties**
Excise duty rates apply as follows:

<table>

**Fuel levy**

Fuel levy is charged on petroleum and diesel at a rate of TZS 313 per litre.

**Petroleum levy**

Petroleum levy is charged on petrol and diesel at TZS 100 per litre and on kerosene at TZS 150 per litre.

**Stamp duty**

Examples of instruments giving rise to stamp duty obligations include conveyances, leases, share transfers, and issue and transfer of debentures. For most of these instruments, the applicable stamp duty rate is 1% of the consideration.

**Infrastructure levy**

A new tax called the ‘infrastructure levy’ was introduced with effect from 1 July 2015 (referred to as the ‘Railway Development Levy’ in Tanzania). The levy applies at the rate of 1.5% of the value of imported goods (cost, insurance, and freight [CIF]). The levy is not applicable to imported goods that have relief or exemption under the East African Community Customs Management Act 2004 (EACCMA 2004) and goods in transit.

**Payroll taxes and social security contribution**

Apart from individual income tax (deducted at source by the employer), payroll taxes include:

- Skills and development levy at 5% of payroll cash costs.
- 20% social security contribution, which is normally split equally between employer and employee (i.e. 10% each).
- Workers compensation fund tariff charged at 1% or 0.5% of cash sums paid to employees. The tariff is effective 1 July 2015 and payable on a monthly basis (1% for private sector and 0.5% for public sector).

**Gaming tax**

Under the recently introduced gaming tax, gaming prize winners are taxed at 18% of the prize offered.
Local taxes

Property taxes
The local government levies a property tax based on the value of a premises. The rates vary depending on the value and location of the property.

Service levy
The local government is entitled to charge a 0.3% service levy based on turnover generated in the relevant district.

Cess levy
For agricultural produce and livestock, there is a cess levy, currently capped at 5% of the producer price.

Branch income

The income tax liability of a person with a PE in Tanzania is calculated as if the person and the PE are independent but as if the PE is resident in Tanzania. The income of the PE is taxed at the normal income tax rate for entities, namely 30% on net income or 5% of turnover for technical and management service providers to mining, oil, and gas entities.

The PE is also subject to a tax on ‘repatriated income’, which applies at a rate of 10% (the same rate as a company would withhold on dividends).

In certain circumstances, business activities of the head office may be attributed to the branch. Arrangements between a PE and head office generally are not recognised, other than the transfer of an asset or liability between the two. Amounts derived (or payments received) and expenditures incurred (or payments made) that relate to assets held by, or liabilities owed by, the business of the PE are attributed to the PE.

Income determination

Subject to any provision to the contrary in the Income Tax Act, income is to be calculated in accordance with generally accepted accounting principles (GAAP). Local GAAP is in accordance with International Financial Reporting Standards (IFRS). Corporations must apply an accrual basis of accounting.

Inventory valuation
Trading stock is valued at the end of the year at the lower of cost and market value. No explicit method is stated for determining inventory cost, and, so far, for tax purposes, such cost will match the cost determined in accordance with GAAP. Special rules apply for the valuation of long-term work in progress.

Capital gains
There is no separate capital gains tax in Tanzania. Instead, income tax is charged on the taxable profit arising on a gain arising from the realisation of an ‘investment asset’ (a term that [subject to certain exceptions] includes shares, interests in land and buildings, and a beneficial interest in a non-resident trust). The gain is determined as the difference between costs incurred and sale proceeds.

Dividend income
Dividend payments are taxed by way of WHT, and this is a final tax. The normal rate of WHT on dividends is 10%.
Tanzania

Where a dividend is paid by a resident corporation to another resident corporation holding 25% or more of shares and voting rights in the corporation paying the dividend, the WHT rate is 5%.

Dividends paid by a company listed on the DSE are subject to 5% WHT (regardless of whether they are paid to a resident or non-resident).

In a case where the recipient itself then pays a dividend to a non-resident shareholder, the corporation paying the dividend is entitled to a proportionate deduction of WHT credit withheld on the dividends it had received.

Interest income
Interest income is treated as income from investment. The term ‘interest’ is defined as payment for the use of money and includes payment made or accrued under a debt obligation that is not a repayment of capital, as well as any gain realised by way of a discount, premium, swap payment, or similar payment.

Interest income is taxed by way of WHT at 10%.

Foreign income
A resident person’s foreign-source income or loss (from employment, business, and investment) is calculated as that person’s worldwide income or loss less any income sourced in Tanzania and plus any loss sourced in Tanzania.

A resident person may claim a foreign tax credit on any foreign tax paid by the person on foreign income. However, such credit should not exceed the Tanzanian tax rate applicable to that income. Any unrelieved amount of foreign tax credit may be carried forward (subject to ‘change in control’ provisions as detailed in the Group taxation section). An election may be made to relinquish foreign tax credit and claim a deduction for the amount of foreign income tax.

There are no provisions for the deferral of the taxation of foreign income.

Deductions
In calculating taxable profit, deductions are allowed for revenue expenditures incurred wholly and exclusively in the production of income, with some statutory exceptions. For capital expenditures, there are specific tax depreciation allowances.

There are special rules with regard to the valuation of trading stock and long-term contracts and in relation to the treatment of instalment sales and finance leases.

There is ring-fencing of mining or petroleum operations by reference to the relevant mining or petroleum licence area.

Depreciation
The categories of depreciable assets and their tax depreciation rates are set out in the table below.

Expenditures on plant and machinery are generally written off on a reducing-balance basis at rates of 37.5%, 25%, or 12.5%, depending on the category of the asset. Certain plant and machinery for manufacturing, fish farming, and tourist hotels benefit from a 50% allowance in the first year, with the normal rates applying to the remaining balance in subsequent years. There is an immediate write-off of expenditures on plant and machinery used in agriculture.
Expenditures on buildings qualify for a depreciation allowance of 5% per year on a straight-line basis. For intangible assets, the write-off is over the useful life of the asset.

Apart from the immediate write-off of plant and machinery, agricultural businesses also benefit from the immediate write-off of agricultural improvement expenditures (including the costs of clearing land, excavating irrigation channels, and planting perennial crops or tree bearing crops). Buildings, structures, dams, water reservoirs, fences, and similar works of a permanent nature used in agriculture, livestock, or fish farming are written off on a straight-line basis over five years.

A 100% capital deduction applies to capital expenditure (i) by mining companies on prospecting, exploration, and development and (ii) on petroleum prospecting and exploration.

</tbody>
</table>

**Interest in land**

Interest in land does not qualify for depreciation allowance as it is excluded from the definition of ‘depreciable asset’.

**Goodwill**

Goodwill does not qualify for depreciation allowance as it is excluded from the definition of ‘depreciable asset’.
Tanzania

**Start-up expenses**
Start-up expenses are deductible to the extent that they meet the general deduction criteria (i.e. they are revenue in nature and were incurred wholly and exclusively in the production of income). The definition of ‘business’ includes a prospective business.

**Interest expenses**
Interest expenses are deductible on an accrual basis, subject to thin capitalisation rules as detailed in the Group taxation section.

**Bad debt**
In order to claim relief for a bad debt, it is necessary to demonstrate that all reasonable steps have been taken to pursue payment and that there is a reasonable belief that the debt claim will not be satisfied.

**Charitable contributions**
The Income Tax Act allows deduction for contributions made:

i. to charitable institutions (approved by the Commissioner to operate as such) and social development projects
ii. under Section 12 of the Education Fund Act 2001, or
iii. to local government authorities under statutory obligations to support community developments projects.

The deduction available under item (i) above is restricted to 2% of the company's taxable income before such deduction.

**Fines and penalties**
Fines and similar penalties payable to a government or a political subdivision of any country for the breach of any law or subsidiary legislation are not deductible.

**Taxes**
Taxes payable under the Income Tax Act 2004 are not deductible.

**Net operating losses**
There is no limit on the carryforward period for tax losses. However, there is ring-fencing of tax losses as follows:

- Losses from agricultural business can only be offset against profits derived from agricultural business.
- Losses from one mining licence area can only be offset against profits from the same mining licence area.
- Losses from one petroleum licence area can only be offset against profits from the same petroleum licence area.
- Foreign-source losses can only be offset against foreign-source profits.
- Losses on investments can only be offset against investment income.
- Foreign-source losses on investments can only be offset against foreign-source investment income.

In certain circumstances, tax losses may be forfeited on a change in the underlying control of an entity.

Tax losses can be carried back only in long-term contracts in a case where a contract is completed and a person has unrelieved losses for that period or a previous period that is attributable to the long-term contract. These losses can then be carried back to a previous year of income and treated as unrelieved loss for that year.
**Payments to foreign affiliates**
Payments to foreign affiliates are deductible to the extent they are wholly and exclusively incurred in the production of the company's income. The deduction is subject to transfer pricing provisions as detailed in the Group taxation section.

---

**Group taxation**
There are no provisions for tax consolidation or group relief in Tanzania.

**Transfer pricing**
With respect to transactions between related parties, there is an obligation to 'quantify, apportion, and allocate amounts' for income tax purposes on an arm's-length basis. The Transfer Pricing Regulations and Guidelines require a taxpayer with related-party transactions to have transfer pricing documentation in place at the time of filing the tax return and provide this within 30 days from the date of request by the Tanzania Revenue Authority (TRA).

**Thin capitalisation**
There is a thin capitalisation restriction on the amount of deductible interest for what are termed 'exempt-controlled resident entities', where the debt-to-equity ratio exceeds 7:3. There are specific definitions of 'debt' and 'equity' for the purposes of thin capitalisation.

**Controlled foreign trusts and corporations**
There are provisions that relate to the treatment of unallocated income of controlled foreign trusts and corporations.

**Change in control provisions**
The change in control provisions are triggered at the moment the underlying ownership of an entity changes by more than 50% as compared to any time during the previous two years. Where there is such a change, the consequences are that:

- the accounting period of the entity is split at the point of such a change, so that the parts of the year of income before and after the change are treated as separate years of income, and
- there is deemed realisation of assets and liabilities at market values.

In certain cases, such a change can also result in the forfeiture of unutilised tax losses and tax credits.

The Commissioner has to be notified immediately before and after the change in control has occurred.

**Other anti-avoidance provisions**
Other anti-avoidance provisions exist to address the following:

- Income or dividend stripping arrangements.
- Income splitting.

---

**Tax credits and incentives**

**Foreign tax credit**
See Foreign income in the Income determination section for a description of the foreign tax credit regime.
Agriculture, manufacturing, mining, and tourism incentives
Tax incentives by way of generous capital deduction provisions are given for specific sectors, namely agriculture, manufacturing, mining, petroleum, and tourism. See the Deductions section for more information.

Export processing zones (EPZs) and special economic zones (SEZs)
There are special benefits for EPZs and SEZs. Included in the benefits available to a person licensed to carry on business in an EPZ, as well as to SEZ investors selling in export markets, are a ten-year income tax holiday and WHT holiday, subject to a requirement to export at least 80% of production.

Notes
1. The domestic WHT rate applies unless the DTT rate is lower, in which case the lower DTT rate applies.
2. The lower rate applies if the beneficial owner is a company that controls, directly or indirectly, at least
15% of the voting power in the company paying the dividends; otherwise, the higher rate applies.
3. The lower rate applies if the recipient is a company that owns at least 25% of the shares of the company
paying the dividends; otherwise, the higher rate applies.
4. The lower rate applies if the recipient is a company that owns at least 25% of the shares of the company
paying the dividends during the six month period immediately preceding the date of payment of the
 dividends; otherwise, the higher rate applies.
5. The domestic rate applies if income is exempt from tax in Zambia.
6. The domestic rate applies in the absence of a rate specified in the DTT.

---

**Tax administration**

**Taxable period**
While the year of income for tax purposes is the calendar year, an entity may apply to use its
own accounting period rather than the calendar year.

**Tax returns**
A statement of estimated tax payable, which contains an estimate of the chargeable income
and the tax payable thereon, is due for submission within three months from the beginning
of the accounting period. A final tax return must be furnished within six months from the
end of the accounting period.

WHT returns must be submitted every half year. The due date for filing the WHT return is
30 days after each six-month calendar period (e.g. the January to June return is due by 30
July).

A late filing penalty applies monthly at an amount equal to the higher of (i) TZS 225,000 or
(ii) 2.5% applied to unpaid tax. If estimated tax is significantly underestimated, a penalty
may also apply.

**Payment of tax**
Instalment tax is payable in four equal instalments not later than three months, six months,
nine months, and 12 months from the beginning of the accounting period. Final tax is
payable on the date on which the final return is due for submission, namely six months after
the end of the accounting period.

WHT is due seven days after the month of deduction.

Interest on late payment is charged at the Bank of Tanzania discount rate.

**Tax audit process**
The normal practice is for the TRA to carry out a review every two or three years.

**Statute of limitations**
There is a five-year time limit for the TRA to adjust an income tax return filed by a taxpayer.
The five years runs from the due date of filing the final tax return.

**Topics of focus for tax authorities**
Currently, the topics of particular focus for the TRA include transfer pricing, VAT
compliance, WHT on payments to both residents and non-residents, and compliance on
payroll taxes.

**Functional currency**
Taxable income and deductible expenditure is quantified in Tanzanian shillings. Upon
request by the taxpayer, the Commissioner has the power, by notice in writing, to permit
quantification in a foreign currency convertible to Tanzanian shillings.

**Significant developments**

The significant changes indicated in Tunisia’s 2016 finance law are as follows:

- Companies incorporated during fiscal year (FY) 2016 that realise a turnover of less than the following amounts are exempt from corporate tax for three years:
  - 600,000 Tunisian dinars (TND) for primary activities.
  - TND 300,000 for services.
- Non-resident companies considered as having a permanent establishment (PE) that does not register with the tax administration are subject to a discharge withholding tax (WHT) at the rate of 15%.

**Taxes on corporate income**

Tunisian-resident companies are subject to corporate tax in Tunisia on the basis of profits generated from PEs located in Tunisia and those attributable to Tunisia by virtue of a double tax treaty (DTT). Non-Tunisian-resident companies are subject to corporate tax on the basis of their Tunisian-sourced income.

PEs of non-Tunisian-resident companies are subject to corporate tax in the same way and under the same conditions as Tunisian-resident companies. However, certain particularities, related mainly to deductions, exist (see the Branch income section).

Corporate tax is also due by non-resident, non-PE companies on Tunisian-sourced income through WHTs.

Corporate tax is broadly levied on the total net income resulting from the statutory financial statements of the company, duly adjusted according to the specific tax rules.

Positive/negative items of income are taxed/deducted based on the accrual basis. Income items accruing in a tax period where the above principle is not met are not allowed for tax deduction nor taxed in that tax period. Tax deduction/taxation is correspondingly deferred to the future tax periods where the principle will be met.

Income items have to be certain in their occurrence and objectively determined or determinable in their amount.

**Corporate tax rates**

The general corporate tax rate is 25%. However, specific rates are foreseen for specific sectors of activity. Indeed, corporate tax is due at the rate of:

- 10% for:
  - companies carrying out craft activities, agricultural and fishing activities, and fitting out fishing boats
• trading groups of retail businesses organised as service cooperatives, governed by the general cooperation legislation
• service cooperatives formed between producers for the wholesale of their production
• consumer cooperatives governed by the general cooperation legislation, and
• wholly exporting companies created as of 1 January 2013 that entered into production no later than December 2014.
• 35% for:
  • certain domestic financial institutions
  • offshore financial institutions governed by the code related to financial services destined to non-residents, and this only for the benefits derived from services provided to non-resident persons
  • investment companies
  • insurance and reinsurance companies
  • debt collection companies
  • telecommunication companies
  • companies rendering services to companies operating in the oil and gas field
  • companies operating in the production and the transport of hydrocarbons and governed by particular conventions, as well as companies operating in the transfer of hydrocarbons via pipeline, and
  • companies operating in the oil refining sector and the wholesale of hydrocarbon products.

Minimum corporate tax
A minimum corporate tax is due at the rate of 0.2% of the local turnover, including value-added tax (VAT), in case:

• the company realises losses or
• the corporate tax due at the rate of 25% or 35% is less than the minimum corporate tax of 0.2% of the local turnover, including VAT.

However, the minimum corporate tax is reduced to 0.1% of the turnover of companies subject to corporate tax at the rate of 10% (e.g. exporting companies after expiry of the ten-year tax holiday period) and companies selling products subject to the government homologation of prices with a gross margin not exceeding 6%.

The minimum corporate tax is not due by companies benefiting from the whole exemption of profits deriving from exploitation (e.g. companies established in the regional development zones, companies operating in the agricultural sector) during the period of tax holidays. These latter are fixed by decree.

The minimum corporate tax is deductible against the corporate tax due during the following year, up to the fifth year, without resulting in a corporate tax less than the minimum mentioned above.

Example
A company realises the following:

<table>
<thead>
<tr>
<th></th>
<th>Fiscal year (N)</th>
<th>Fiscal year (N+1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total revenues</td>
<td>1,000,000</td>

</thead>
<tbody>
<tr>
<td>- 1,000 (the precedent minimum corporate tax is deductible in the limit of 1,000 = 4,000 - 3,000)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Corporate tax due: 2,000 3,000 (corresponding to the minimum corporate tax)

Local income taxes
For a description of local taxes, see Vocational training tax, Local authority tax (LAT), and Hotels tax in the Other taxes section.

Corporate residence
A company is tax resident in Tunisia if it is registered or has its effective place of management therein.

Permanent establishment (PE)
No definition of PE is given by the Tunisian domestic law. In practice, the Tunisian tax authorities refer to the definitions given by DTTs.

Other taxes
Value-added tax (VAT)

VAT scope and rates
VAT is levied under the Tunisian VAT Code and is due on all transactions taking place in Tunisia. The sale of goods is considered as taking place in Tunisia, and subject to VAT, if the goods sold are delivered in Tunisia. The sale of services is considered as taking place in Tunisia, and subject to VAT, if the services sold are exploited or used in Tunisia.

The standard rate of VAT is 18%. Lower rates of 6% and 12% apply to specifically designated operations.

Some operations, products, or services are out of the scope of VAT in Tunisia, and some others are expressly exempt from VAT.

Some goods and services may be acquired VAT free, based on a certificate delivered for the purpose by the relevant tax authorities. This exemption is granted mainly to wholly exporting companies, oil and gas companies, their contracts, and their subcontractors.

Registration for VAT purposes may be either obligatory or optional.

Voluntary registration is allowed where persons:

- carry out activities that are outside the scope of the Tunisian VAT, in which case the option has to be a full option, which means that all the activities carried out by these persons will be subject to VAT, or
- carry out operations that are exempt from VAT and that are destined for export, or supply products and services that are exempt from VAT to persons liable to VAT, in which case the option may be a partial or a full option.

Output VAT
Output VAT is calculated on the basis of the amount of the invoice excluding VAT.
Input VAT
Individuals and companies that are subject to VAT may deduct the input VAT incurred on the purchase of goods and services necessary to carry out activities subject to VAT.

VAT declaration
VAT is declared and paid on a monthly basis.

Refunds
If the input VAT exceeds the output VAT, the VAT credit resulting from the difference between the input VAT and the output VAT may be reimbursed on the basis of a written request made to the tax authorities.

The VAT credit is refundable if it arises from:

- exportation operations of goods and services, sales made to clients allowed to acquire goods and services VAT-free, and WHT made on the remunerations paid to companies that are neither resident nor established in Tunisia (such VAT credit is refundable if it is shown at least on one monthly tax return)
- investments destined for the carrying out of new projects as provided for in the Tunisian Incentives Investment Code (such VAT credit is refundable if it is shown on at least three successive monthly tax returns)
- suspension of activity (such VAT credit is refundable after a tax audit), or
- other operations (such VAT credit is refundable if it is shown on at least six successive monthly tax returns).

In order to benefit from the refund of VAT credits, the taxpayer has to file supporting documents, such as declarations relating to exportation of goods, documents proving that the service rendered by the Tunisian taxpayer was used or consumed outside Tunisia, authorisations to sell VAT-free, and WHT certificates.

To benefit from the refund of VAT credits, the taxpayer must already have submitted all tax returns and paid all taxes due at the time of submission of the request for the refund.

An advance payment of 15% of the VAT credit is to be paid to the taxpayer as soon as the taxpayer presents the request for refund if the VAT credit arises from operations other than export, suspension of activity, and operations of companies that are neither resident nor established in Tunisia. This rate is to be increased to 50% if the taxpayer is a company of which the financial statements are subject to legal audit, and to 100% if the VAT credit is originated from exports.

Time limits
The taxpayer may claim the VAT credit within three years starting from the date from which the VAT credit becomes refundable.

Customs duties/Import tariffs

Import VAT
Importation of goods and services are subject to import VAT unless:

- the imported good is expressly exempt, such as for:
  - fresh milk, uncondensed and unsweetened, whether skimmed or full-fat
  - milk flour
  - devices intended for use by physically disabled persons
  - pure-bred breeding animals
  - equipment with nothing similar manufactured locally, expressly designated, or
  - boats destined to maritime navigation and fishing, and other pleasure boats, or
- the importer benefits from the acquisition of goods necessary to its activity VAT-free (e.g. oil and gas companies).
Tunisia

**Customs duties**
Customs duties are due on importations other than those made from the European Union (EU).

Some equipment expressly designated by the Tunisian domestic law is exempt from customs duties, whether imported from EU countries or not.

Customs duties are not due in cases where the importer is expressly exempt, even if the goods are imported from outside the European Union.

For temporary importation of equipment, the customs duties due are to be calculated in proportion to the period spent in Tunisia. 1/60 of the total customs duties are due per month spent in Tunisia.

**Excise taxes**
There are no provisions for excise taxes in Tunisia.

**Property taxes**
A real estate tax (RET) is calculated by the relevant municipalities and is notified annually to the taxpayers at the beginning of the civil year.

For companies subject to the payment of the local authority tax (LAT) (see below) and in case the LAT paid over the year is less than the RET notified by the municipalities, then the differential is due and is payable as complementary LAT. In other words, the RET constitutes a minimum of due LAT per year.

**Transfer taxes**
The registration of some operations is compulsory. In these cases, the registration fees are expressly determined by the Registration and Stamp Fees Code.

Registration remains optional for certain operations. In case of optional registration, the registration fees due to be paid are equal to TND 20 per page and per copy.

In case of compulsory registration, the fees due depend on the nature of the transaction and the goods involved.

Some transactions are subject to proportional registration fees, for example:

- 5% on the transfer of immovable properties. However, this rate is reduced to 3% for the acquisition of social housing from real estate developers for the portion exceeding TND 150,000.
- 2.5% for the transfer of goodwill (fonds de commerce).

Transactions that are not subject to proportional registration fees, as well as transactions for which registration is optional, are subject to insignificant fixed registration fees (TND 20 per page).

**Stamp duties**
Stamp duties are due, in general, on certain contracts expressly designated, as well as invoices, unless the customer is expressly exempt.

In general, stamp duties range from TND 0.5 for invoices, to TND 2 per page for contracts, to TND 60 for passports.

Certain documents are expressly exempt from stamp duties, mainly judgments, checks, etc.
Payroll taxes
There are no payroll taxes applicable in Tunisia other than those mentioned below.

Social security contributions
The Tunisian social security system is financed by contributions from both employers (16.57%, reduced to 0.5% for wholly exporting companies) and employees (9.18%) based on salaries. Employers collect and pay the social security contributions from each wage-earner.

Contributions for Accident and Professional Insurance are collected in the same manner.

Social logging tax
Employers established in Tunisia, regardless of being liable or not to income tax, are subject to a social logging tax, calculated at 1% of the gross amount of salaries paid to its employees, including benefits in kind.

The social logging tax is filed on the monthly tax return through which VAT and other direct taxes, except corporate tax, are filed.

This tax is payable monthly before the 28th day of the following month.

Vocational training tax
Entities subject to corporate tax are subject to vocational training tax, calculated at 2% of the gross amount of salaries paid to its employees, including benefits in kind. The rate of this tax is 1% for industrial companies.

This tax is payable monthly before the 28th day of the following month.

Local authority tax (LAT)
LAT is payable by entities subject to corporate tax, except entities operating in the tourism sector. The tourism sector is defined as accommodation, entertainment, tourist transportation, thermals, congressional tourism, companies managing hotels and entertainment centres, and travel agencies.

If a company is engaged in several activities, some of which are subject to LAT and the remaining are not subject to LAT, the taxable base to be considered is constituted only by the turnover of the activities that are subject to LAT.

The LAT is paid to the local authority at the rate of:

- 0.2% of the total turnover of the entity, with a minimum calculated on the basis of the number of square metres of construction used by the entity.
- 0.1% of the turnover deriving from exportation as defined by the legislation in force.

LAT is payable monthly before the 28th day of each month.

Hotels tax
The hotels tax is due by entities that work with tourists; provide accommodation, food, and beverages; or organise leisure activities for clients. The tax is calculated at 2% of the gross turnover generated from the tourism and relating activities.

This tax is payable monthly before the 28th day of the following month.

Tourism Sector Development Fund (FDCST) tax
The FDCST tax is a tax that is paid by entities operating in the tourism sector. The tax is calculated at 1% of the turnover, excluding VAT, generated from tourism and relating activities.
Tunisia

**Branch income**

The income attributable to a PE corresponds to:

- the revenues generated directly by the PE further to the exercise of its activity
- the revenues corresponding to works carried out by it, even if invoiced by the head office, and
- the revenues that would have been realised by an independent company carrying out the same business, in case the activity of the PE is provided for free.

The following charges are deductible for the purpose of the determination of the taxable results of a PE:

- All the charges incurred directly by this PE and necessary for its proper functioning. These charges have to be supported by proper documentation.
- Direct charges incurred by the head office exclusively for the PE and supported by proper documentation.
- A proportion of the indirect charges (real central administration costs) incurred by the head office. The proportion admitted for deduction is most often calculated on the basis of the turnover of the Tunisian branch against the global turnover of the head office. The deduction is limited to 10% of the Tunisian turnover in case the head office is resident of a state that did not conclude a DTT with Tunisia.

**Income determination**

**Inventory valuation**

Inventory is valued at cost.

**Capital gains**

According to the provisions of article 11 of the Income and Corporate Tax Code, “the net income of a company is determined as the result of all the operations undertaken by the company, including mainly the transfer of assets…” Consequently, capital gains, if any, arising from the transfer of assets will be considered as taxable income and will be subject to corporate tax.

Capital gains are calculated as the difference between the sale price, which is supposed to be equal to the fair market value, and the net book value.

In the particular case of goodwill (fonds de commerce) generated internally, capital gains will be equal to the total sale price, as goodwill, other than derived from acquisitions, has no value on the books of the company.

All tangible and intangible transaction assets have to be valued at their fair market value.

The goodwill (fonds de commerce) generated internally, even if not booked as an asset of the company, also has to be valued at fair market value.

**Particular case of capital gains resulting from mergers**

Capital gains arising from the transfer of assets, other than inventories, on the occasion of a merger operation are deductible from the taxable income of the merged company and are to be added back to the taxable income of the absorbing company at up to 50% of their amount, spread out over five years.

**Dividend income**

Dividends distributed by Tunisian-resident companies to non-resident, non-establishment companies, to non-resident individuals, and to resident individuals are
subject to corporate tax paid through a discharging WHT at the rate of 5% of its total amount.

Dividends distributed by non-resident companies are subject to tax in Tunisia, unless otherwise provided for by the DTTs concluded by Tunisia.

**Interest income**
Interest income arising from Tunisia or outside is part of the taxable results of the company, unless expressly exempt by the law (e.g. interests on deposits in foreign currencies).

**Royalty income**
Royalty income, except that derived from exports, is part of the taxable results of the company.

**Foreign income**
Foreign income derived from services that are realised outside Tunisia are part of the taxable income (see the Tax credits and incentives section).

---

**Deductions**

**Depreciation**
Depreciation expenses of fixed assets that are owned by the company and within the limit of the depreciation expense calculated according to the straight-line method are deductible for the purpose of determination of taxable income at a maximum depreciation rate fixed by decree.

Buildings may be depreciated according to the accounting legislation. However, the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 5%, according to the straight-line method. Extra depreciation expenses are to be added back to the taxable base subject to corporate tax.

Equipment and machinery may be depreciated according to the accounting legislation. However, the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 15%, according to the straight-line method. Extra depreciation expenses are to be added back to the taxable base subject to corporate tax.

The equipment and machinery depreciation rate may be increased by 50% if the equipment is used at least 16 hours a day, or doubled if used 24 hours a day, but the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 15%, according to the straight-line method, multiplied by 1.5 or by 2, depending on whether the equipment will be used 16 or 24 hours a day.

Depreciation expenses of assets exploited under leasing contracts are also deductible for the purpose of determination of taxable income. In fact, even if assets exploited under leasing contracts are not owned by the company, they are booked as assets in the balance sheet and depreciated accordingly over a minimum period fixed by decree, as follows:

<table>
<thead>
<tr>

<tr>
<td>Transportation equipment</td>
<td>3</td>
</tr>
</tbody>
</table>
**Goodwill**

Goodwill (*fonds de commerce*) amortisation expenses are not tax deductible for the purpose of the determination of taxable income.

**Start-up expenses**

The maximum amortisation expense allowed for deduction is equal to 100% of the start-up expenses.

**Interest expenses**

Interest expenses (commissions, bank charges, interest loans, etc.) relating to loans contracted by the company and necessary for its proper functioning are tax deductible.

Interest expenses on shareholders current account are tax deductible within the limit of the maximum rate of 8%, provided that the capital is fully paid and the amount to be remunerated shall not exceed 50% of the capital; the rate of 8% is not applied to banks.

**Bad debt**

Provisions for bad debts are tax deductible within the limit of 50% of the taxable result (after deduction of non-taxable revenues and add-back of non-deductible charges).

The deduction of bad debts is subject to the presentation of a detailed statement of the concerned creditors while filing the annual corporate tax return, as well as court cases against the creditors in order to claim payment.

Provisions for bad debts that are initially constituted tax-free and become groundless during an exercise (e.g. by the covering of the debt totally or partially) are taxable.

**Charitable contributions**

Charitable contributions are either deductible:

- totally, in cases where they are granted to proprietary organisms, the list of which is fixed by decree, or
- within 0.2% of the revenue, in other cases.

The deduction of charitable contributions is subject to the presentation of a detailed statement of the beneficiaries while filing the annual corporate tax return of the year during which these charitable contributions were granted.

**Fines and penalties**

Transactions, fines, and any other penalties for violating legal provisions are not tax deductible. However, contractual penalties (for late payment for example) remain tax deductible.

**Taxes**

All taxes due by the company are considered as tax-deductible charges, except corporate tax.

Note that when the tax due by non-resident, non-PEs on royalties is borne by a Tunisian-established company (the debtor), then the correspondent charge is not tax deductible.

**Net operating losses**

Under the Tunisian tax legislation, tax losses are divided into two categories: operating losses and deferred depreciation.

Operating losses are to be carried forward for five years, starting from the year following the one during which they were booked.
Deferred depreciation is to be carried forward indefinitely, starting from the year following the one during which they were booked.

With regard to the Tunisian tax legislation, operating losses cannot be carried back.

**Payments to foreign affiliates**
See Transfer pricing in the Group taxation section.

---

**Group taxation**

Companies belonging to the same group have the possibility, if certain requirements are met, to opt for the tax consolidation regime.

The tax consolidation regime allows the determination of one taxable basis given by the algebraic sum of the taxable profits/losses determined by each of the companies participating in the scheme, with apportionment in relation to the corporate tax rate applicable to each company in comparison with the corporate tax rate applicable to the consolidating entity.

The tax consolidation regime is applicable for a minimum period of five years, renewable by tacit agreement for a five-year period each time.

The election to the tax consolidation scheme is subject to the prior authorisation of the Ministry of Finance if certain conditions are met:

- The mother company has to be listed on the Tunisian Stock Exchange. In case the mother company is not listed on the Tunisian Stock Exchange, it has to undertake to be listed by no later than the end of the year following the first year during which the tax consolidation regime comes into effect; this deadline may be extended by one additional year.
- Participations held by the mother company in the capital of the other group-companies electing to the tax consolidation regime, whether directly or indirectly, have to be equal to at least 75% of the capital of each company during the whole period of the tax consolidation scheme.
- Companies electing to the tax consolidation regime have to be resident in Tunisia.
- Companies electing to the tax consolidation regime have to be subject to corporate tax. According to the tax law in force, companies benefitting from tax holidays during a certain period of time may elect to the tax consolidation scheme even if no minimum tax is due.
- Companies electing to the tax consolidation scheme have to consider the same opening and closing dates for the fiscal years covered by the scheme.

The taxable result of each group-company participating in the tax consolidation scheme is determined according to the common law. However, and unlike the general rules applicable to the determination of the taxable result, interests generated by sums of money deposited in inter-company current accounts are not taken into consideration for the purpose of determination of the taxable base subject to corporate tax.

Deferred depreciation and operating losses generated by a group-company prior to the tax consolidation scheme entering into effect are to be carried forward at the level of the same company.

Taxable results of companies subject to the same corporate tax rate as the mother company are to be considered for their whole amount, whereas taxable results of companies subject to corporate tax rates different from the one applicable to the mother company are to be reprocessed. In fact, in this latter case, only a portion of the taxable
result is to be considered for the sake of computation of the consolidated tax. This portion is determined according to the following formula:

Taxable base * (corporate tax rate applicable to the company / corporate tax rate applicable to the mother company)

Once the taxable results of the group-companies are added together, they are to be reprocessed by the mother company as follows:

• Add back provisions for bad debts booked and deducted by a group-company, before the tax consolidation scheme enters into effect, for doubtful receivables from the other group-companies.
• Add back benefits reinvested by a group-company in the capital of another group-company after tax consolidation scheme enters into effect, unless they are reinvested lately within the receiving entity itself.
• Deduct remission of debts by a group-company to the benefit of another group-company, both of them participating in the tax consolidation scheme.

Corporate tax is calculated at the rate applicable to the consolidating entity on the basis of the consolidated taxable result calculated (as outlined previously). However, a minimum corporate tax equal to 0.2% of the total gross turnover (see the Taxes on corporate income section) of the group-companies participating in the tax consolidation scheme remains due in case the taxable results show a deficit or in case the minimum corporate tax is greater than the one calculated by applying the corporate tax rate applicable to the consolidating company to the consolidated taxable profit.

All pre-payments, WHTs, instalments, and tax surpluses generated by a group-company before the election to the tax consolidation scheme are creditable against the corporate tax to be paid by the consolidation entity. The surplus, if any, remains deductible from corporate tax due in the subsequent years.

**Transfer pricing**
According to the Tunisian tax legislation, where there is evidence for the tax authorities of the existence of commercial or financial business transactions between a company and other dependent companies, which, for the determination of their value, are based on rules that differ from those governing relations between independent companies and which result in the reduction of taxable benefits, the tax department is allowed to add back to the taxable result of the invoicing company the differential between the benefits that would have been realised if the practiced prices were in line with the arm’s-length principle and those actually accounted for by the company.

The burden of proof is on the tax department.

**Thin capitalisation**
Projects may be financed by shareholders’ equity, shareholders’ loans, or external debts.

Interest due on shareholders’ loans is tax deductible within the limit of an interest rate of 8%, provided that the following conditions are met:

• The capital is fully paid-up.
• The amount of the sums put at the disposal of the company must not exceed 50% of the capital.

In case shareholders’ loans exceed 50% of the share capital, then interests due in the part exceeding 50% are not tax deductible.

**Controlled foreign companies (CFCs)**
There is no provision in Tunisia for CFCs.
Tax credits and incentives

In order to harmonise investment legislation with general economic objectives, the Incentives Investment Code (IIC) has been promulgated.

The IIC provides a number of incentives applicable to all projects covered by the code and approved by the competent government institutions and specifically developed in the following sectors:

• Agriculture and fisheries.
• Manufacturing industries.
• Public works.
• Tourism.
• Handicrafts.
• Transport.
• Education and learning.
• Professional training.
• Cultural production and industries.
• Promotion of young people and children’s education.
• Healthcare.
• Environmental protection.
• Property promotion.
• Other non-financial activities and services.

The IIC foresees common and specific incentives.

The considered common incentives are detailed as follows:

• Deduction by an entity from the taxable base of profits reinvested by subscribing to initial capital or to capital increases in companies operating under the IIC, within the limit of 35% of its net taxable profits, and within the limit of the minimum corporate tax rate, which means that the corporate tax cannot be less than 20% of what it would have been without deducting the considered profits.

The main conditions for benefiting from the aforementioned incentives are that the:
• subscribing company keeps its accounts in accordance with Tunisian accounting standards
• new shares must be issued for the subscribed amount
• registered subscribed capital may not be reduced during the five years following 1 January of the year following the reinvestment, except for the purpose of absorbing losses
• subscribing company must join to its corporate tax return a certificate proving that the capital in which they subscribed is entirely paid
• subscribed shares must not be sold before the end of the two years following the payment of the capital, and
• reinvested profits have to be posted in a ‘special investment reserve account’ under the liabilities in the balance sheet before the final date for filing the corporate tax return relating to the year during which the benefits were reinvested and deducted.

• Deduction from the taxable base of profits reinvested in the company itself (activities extension), provided the respect of the minimum tax rate condition of 20% and the following other conditions:
  • The reinvested profits have to be posted in a ‘special investment reserve account’ under the liabilities in the balance sheet before the final date for filing the corporate tax return relating to the year during which the benefits were reinvested and deducted.
Tunisia

- The benefits posted in the ‘special investment reserve account’ have to be incorporated/included in the capital of the company before the end of the year during which the reserve was posted/booked.
- An investment plan is to be joined to the income tax return.
- The investment must be realised before the end of the year during which the reserve was posted/booked.
- The assets acquired must not be transferred during at least two years after the date of the start of production.
- The registered capital must not be reduced during the five years following the date of the incorporation of the reinvested benefits in the capital, except for the purpose of absorbing losses.

The IIC foresees specific advantages that apply to:

- Exportation activities.
- Investments in regional development zones.
- Agricultural development.
- Environmental protection.
- Research and development (R&D) and technological development.
- Small enterprise and trade development.
- Investments of support (learning, training, etc.).

**Wholly exporting activities**

The following are considered as wholly exporting companies:

- Companies with products totally destined to be sold outside Tunisia.
- Companies providing services totally utilised/exploited outside Tunisia.
- Companies working exclusively with wholly exporting companies as defined above.
- Companies working exclusively with financial and banking institutions working mainly with non-Tunisian resident persons.
- Companies set up in the Economical Free Zones in Tunisia.

Note that wholly exporting companies may commercialise locally, during a given year, up to 30% of the turnover of the previous year without losing the status of a wholly exporting company.

Profits derived from exportation by companies that have already obtained an investment certificate from the relevant authorities (the Agency of Promotion of the Investment in the particular case of industrial companies) before 1 January 2014 and that entered into production during 2014 may benefit from the deduction of the benefits derived from exportation operations during the first decade of activity, and this starting from the first exportation operation.

In addition to the above mentioned deduction, the company may also benefit from the deduction of other profits in connection with exportation during the first decade of activity.

The concerned profits are detailed as follows:

- Investment allowances granted under the legislation of investment incentives, allowances of upgrading granted under an approved upgrade program, and allowances granted within the frame of support to the export operations.
- Capital gains derived from the sale outside Tunisia or to other wholly exporting companies of tangible assets used to carry out the exportation activity, excluding constructions, lands, and goodwill (*fonds de commerce*).
- Realised exchange profits in connection with the exportation activity.
- Remission of debt for the benefit of the wholly exporting companies.
However, all the other profits (financial interests, rentals, etc.) remain subject to corporate tax at the rate of 25%.

After the expiry of this period, profits derived from the main activity are to be subject to corporate tax at the rate of 10% and all other revenues will be subject to corporate tax at the rate of 25%.

Wholly exporting companies that obtained the investment certificate as of 1 January 2013 and that entered into production no later than December 2014 are subject to corporate tax at the rate of:

- 10% of the basis of the benefits derived from exportation, and
- 25% on the basis of the benefits derived from local sales as well as the other profits (see the Taxes on corporate income section concerning the minimum corporate tax).

Wholly exporting companies also benefit from:

- Exemption from VAT on purchases based on a certificate delivered for the purpose by the relevant tax authorities, to be presented by the Tunisian entity to its suppliers, and the exemption from VAT on sales based on a certificate delivered for the purpose by the relevant tax authorities, to be presented by the client to the Tunisian entity.
- Exemption from other indirect taxes, including customs duties.
- Exemption from professional training tax, registration fees, stamp duties, and social logging tax.

However, they remain subject to the payment of the following insignificant taxes and duties only:

- Taxes and duties to passenger cars.
- The single compensation tax on road transport.
- Taxes on real estate: calculated on the number of square metres of construction used by the entity.
- Taxes and duties by virtue of services rendered directly in compliance with the current legislation.
- LAT (see the Other taxes section).

**Regional development zones activities**
The IIC provides that investments in certain activities (industry, tourism, handicraft, and certain other services) carried out by entities established in regional development zones benefit from a number of tax advantages, detailed as follows:

- Deduction from the taxable profits of the entity of the profits derived from the investments in the regional development zones during a period of:
  - Five years, in case the investments are realised in the development zones enumerated in category one.
  - Ten years, in case the investments are realised in the development zones enumerated in category two.
  - Ten years, in case the investments are realised in the development zones of priority. During the second decade of activity, the deduction is reduced to 50% of the profits generated on the investments.

In addition to the above mentioned deduction, companies carrying out investment in regional development zones may also benefit from the deduction of other profits in connection with the main activity during the first decade of activity.

The concerned profits are detailed as follows:
Tunisia

• Investment allowances granted under the legislation of investment incentives, allowances of upgrading granted under an approved upgrade program, and allowances granted within the frame of support to the export operations.
• Capital gains derived from the sale of tangible assets used to carry out the exportation activity, excluding constructions, lands, and goodwill (fonds de commerce).
• Realised exchange profits in connection with the exportation activity.
• Remission of debt for the benefit of the wholly exporting companies.

Other benefits include:

• Deduction from the taxable profits of the revenues reinvested in the subscription to initial capital or to capital increases in these companies, up to 100% of the taxable result and without any minimum tax. However, the deduction is subject to the remaining conditions listed under the common incentives section.
• Exemption from social logging tax and vocational training tax.

Support activities
The supporting investments activities are defined as being the following:

• Training of children.
• Education.
• Teaching.
• Scientific research.
• Professional training.
• Cultural production and co-ordination of young people.
• Healthcare services.

The investments made by institutions for these considered activities give entitlement to the following tax incentives:

• Exemption from customs duties and taxes with a similar effect.
• Suspension of VAT and consumption duty for imported equipment with no locally manufactured equivalent that is necessary for the realisation of the investments, as well as suspension of VAT on equipment manufactured locally.

Foreign tax credit
In the absence of DTTs, corporate tax (or any WHT in connection with) paid outside Tunisia is not deductible from the tax due in Tunisia.

However, in the presence of DTTs, in cases where profits derived from outside Tunisia were subject to corporate tax in Tunisia, the foreign tax, if any, is deductible, but only up to the corresponding Tunisian tax on these profits.

Withholding taxes
The payments of certain remunerations are subject to corporate WHT in Tunisia.

The WHT is an advance payment of corporate tax and is thus deductible from the corporate tax due by the invoicing entity. To this end, the paying entity shall withhold the tax at the appropriate rate. It shall then issue a WHT certificate to the invoicing company to enable the latter to use the certificate as proof of the payment at the moment of filing its corporate tax return. The paying entity subsequently pays the withheld amount to the tax authorities.

The withheld tax is to be declared and repaid by the paying entity each month before the 28th day of the following month.
The rates of the WHT differ according to the nature of the goods/services and the rates applicable within the framework of the DTTs.

Applicable WHT rates in Tunisia are as follows:

- 15% of the gross amount of the invoices related to fees, commissions, brokerage fees, rentals, payment of non-commercial activities (non-commercial activities include especially independent scientific, literary, artistic, educational, or teaching activities, such as independent activities of physicians, dentists, lawyers, consultants, architects, engineers, accountants, etc.).

This rate is reduced to 5% for fees (including those paid for non-commercial activities) and hotel rentals when these amounts are paid to entities subject to corporate tax and individuals who keep proper accounts in accordance with the Tunisian accounting principles.

- This rate is reduced to 2.5% for fees, commissions, rentals, and non-commercial remunerations deriving from exportation, in accordance with the legislation in force.
- 15% on performance bonus paid to distributors of goods.
- 20% on interest and director’s attendance allowance. This does not include interest on deposits and bonds in foreign currency or convertible dinars.
- 5% on bank loans extended by non-Tunisian resident banks.
- 2.5% on the sales price indicated in a real estate sale, in case the seller is an individual.
- 1.5% on payments exceeding TND 1,000 (including VAT) made for the acquisition of goods and services necessary to the activity and that are not subject to a specific WHT rate.
- 15% on other payments made to non-Tunisian tax resident persons.
- Dividends distributed by Tunisian-resident companies to non-resident, non-establishment companies, to non-resident individuals, and to resident individuals are subject to corporate tax paid through a discharging WHT at the rate of 5% of its total amount.
- 25% on payments made to persons resident in tax havens.
- 25% on lottery and gambling gain.

**DTT rates**

Note that the following interest WHT rates are applicable to interest payable to non-resident, non-PE companies and financial institutions according to DTTs concluded by Tunisia.

The DTT rate is applicable in case it is lower than the domestic law, provided that the beneficiary of the payment provides the corresponding tax residency certificate. In case of failure, the domestic law will be applied.

### Notes

1. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work. 15% of the gross amount of the royalties for cinematographic films and TV films, patents, trademarks, designs or models, plans, secret formulae, or processes; technical and economical studies; information concerning industrial, agricultural, commercial, or scientific experience; and the use of or the right to use industrial, commercial, or scientific equipment.

2. 11% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work, including cinematographic films and films for TV broadcasting, patents,
3. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, scientific equipment, or port facilities; and economical and technical studies, and technical assistance realised in the state of source.

4. 20% of the gross amount of the royalties for the use of, or the right to use, licences, cinematographic films, and films and discs for radio or television broadcasting and the use of, or the right to use, industrial, commercial, scientific equipment, or port facilities; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied. 15% of the gross amount of royalties for all the other cases, except: information in respect of industrial, commercial, or scientific experience; the use of, or the right to use copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes; and information concerning industrial, commercial, or scientific experience. However, royalties paid for the use of, or the right to use, copyrights of literary, dramatic, musical, or artistic work, except royalties in respect of cinematographic films and films and discs for TV broadcasting, are taxable in the state of residence and thus cannot be subject to tax nor to any WHT in connection with the state in which they arise.

5. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience. 5% of the gross amount of the royalties for technical and economical studies and technical assistance rendered in the state in which they arise.

6. 5% of the amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic and films for TV and radio broadcasting. 15% of the gross amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of or the right to use industrial, commercial, or scientific equipment; and technical and economical studies; the use of or the right to use, industrial, commercial, scientific equipment, or port facilities and licences, trademarks, cinematographic films, and films for TV and radio broadcasting. However, payments made to public entities for the use of cinematographic films or films for TV broadcasting are exempt from WHT; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied.

7. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of or the right to use, industrial, commercial, scientific equipment, or port facilities; and economical and technical studies, and technical and economical studies.

8. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; and technical and economical studies; the use of, or the right to use, industrial, commercial, or scientific equipment; and technical assistance realised in the state of source.

9. Royalties may be subject to tax in the contracting state in which they arise in cases where the legislation of that state allows such taxation, at a maximum rate of 12%.

10. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, scientific equipment, or port facilities and licences, trademarks, cinematographic films, and films for TV broadcasting. However, payments made to public entities for the use of cinematographic films or films for TV broadcasting are exempt from WHT; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied.

11. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work; information concerning agricultural, industrial, commercial, or scientific experience; and technical and economical studies. 15% of the gross amount of the royalties for patents, trademarks, designs or models, plans, secret formulae, or processes, and cinematographic films or films for television.

12. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities, except charters or leasing of vessels and aircraft; and technical and economical studies.

13. 8% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, scientific equipment; and technical services, such as technical and economical studies and technical assistance.
16. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work. 12% of the gross amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 16% of the gross amount of the royalties for the use of, or the right to use industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment. 18% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting; patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. However, since the 16% treaty rate is higher than the 15% common law rate, the latter will be applied.

17. Royalties may be subject to tax in the contracting state in which they arise in case the legislation of that state allows such taxation and according to its legislation for the use of, or the right to use, any copyright of literary, artistic, or scientific work, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 16% of the gross amount of the royalties for the use of, or the right to use, industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

18. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. Technical services, such as technical and economical studies and technical assistance, carried out in the state of source.

19. 5% of the gross amount of royalties for the use of, or the right to publish, any literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, a transmission by satellite or optical fibre transmission or similar means of transmission, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 20% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience, except remuneration for vessels and aircraft chartering in respect of international transport; the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment; and technical and economical studies and technical assistance, carried out in the state of source.

20. Royalties may be subject to tax in the contracting state in which they arise in case the legislation of that state allows such taxation and according to its legislation for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. Technical services, such as technical and economical studies and technical assistance, carried out in the state of source.

21. Royalties may be subject to tax in the contracting state in which they arise in case the legislation of that state allows such taxation and according to its legislation for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films recording for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. Technical services, such as technical and economical studies and technical assistance, carried out in the state of source.

22. 12% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. Technical services, such as technical and economical studies and technical assistance, carried out in the state of source.

23. 2.5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience. Technical services, such as technical and economical studies and technical assistance, carried out in the state of source.
28. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and technical and economical studies and technical assistance.

29. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, the equipments, rights, and information mentioned above.

30. Royalties are subject to tax in the state of residency of the beneficiary. However, the non-exclusive taxation right attributable to the state of residency does not prohibit the taxation of such royalties in the state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation. Remunerations paid for the following are considered royalties and thus are subject to tax in the state in which they arise: the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment that is not considered as an asset in the meaning of Article 6 of the present treaty.

31. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment, such as technical and economical studies and technical assistance.

32. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment; and economical and technical studies and technical assistance.

33. 10% of the gross amount of royalties for copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and cinematographic films and video tapes for TV broadcasting.

34. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

35. 5% of the gross amount of royalties for remunerations paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes.

36. 5% of the amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematographic and films for TV and radio broadcasting. 15% of the amount of the royalties for the use of, or the right to use, cinematographic films, films for TV and radio broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

37. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience, and technical and economical studies and technical assistance related to these information; and the use of, or the right to use, industrial, commercial, or scientific equipment.

38. 18% of the gross amount of royalties for the use of, or the right to use patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment; however, since the 18% treaty rate is higher than the 15% common law rate, the latter will be applied.

39. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

40. 7.5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

41. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of,
42. Royalties are only taxable in the contracting state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films for TV broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, scientific equipment or port facilities; and economical and technical studies and economical assistance.

43. 15% of the gross amount of the royalties for copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and profits from any ownership, depending from the productivity, the use, or the alienation of that ownership. 10% of the gross amount of the royalties for the use of, or the right to use, industrial, commercial, or scientific equipment other than vessels and aircraft used for international transport, and technical studies paid from public funds or political subdivisions or local authorities or technical assistance for the use of the ownership of the rights above mentioned, in case the technical assistance is realised in the state of source.

44. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and the use of, or the right to use, industrial, commercial, or scientific equipment and port facilities, except remunerations paid for vessels and aircraft used in international transport.

45. These rates are applicable, in certain cases, to the loans extended by the Central Bank.

46. 0% for loans extended by banks and not represented by bonds or other debt securities.

47. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the Chinese state.

48. 0% for loans granted by financial institutions, the capital of which is held at least up to 50% by the Israeli state, its political subdivisions, or local authorities.

49. 0% for loans granted by the Deutsche Bundesbank, Kreditanstalt für Wiederaufbau, and the Deutsche Gesellschaft für wirtschaftliche zusammenarbeit Gmbh. (Entwicklungsgesells).

50. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the state of Iran.

51. 0% for loans granted by financial institutions, the capital of which is totally held by the Italian state or its local authorities.

52. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the state of Kuwait.

53. 0% for loans granted by financial institutions, the capital of which is totally held by the state of Lebanon, its political subdivisions, or local authorities.

54. 0% for loans granted by companies, the capital of which is totally held by the state of Lebanon, its political subdivisions, or local authorities.

55. 7.5% for loans guaranteed or granted by financial institutions and the reimbursement period of which exceeds five years.

56. 7.5% as long as the tax legislation of the Netherlands provides that interest paid by a company resident in the Netherlands to a company resident in Tunisia is exempt from any WHT.

57. 0% for loans, the reimbursement period of which exceeds seven years.

58. 5% for loans, the reimbursement period of which exceeds seven years, and 10% in the other cases.

59. 2.5% for bank loans, as long as the Tunisian domestic tax legislation provides that interest on bank loans extended by non-established banks is subject to a 2.5% WHT rate, and 5% for the above mentioned bank loans in cases where an increase of the WHT rate is applicable to interest paid to non-established banks.

60. 0% for loans granted by financial institutions, provided that the reimbursement period exceeds seven years.

61. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematography and films for TV and radio broadcasting; the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

62. According to the DTTs concluded by Tunisia, dividends are subject to the listed WHT tax rates, knowing that the rate provide by the domestic law is fixed at 5%.

63. The lower rate applies in cases where the beneficiary has equity participation of 25%.

64. The lower rate applies in cases where the beneficiary has equity participation of 10%.

65. The lower rate applies in cases where the beneficiary has equity participation of 50%.

66. The lower rate applies in cases where the beneficiary has equity participation of 25%, except for investment companies and real estate investment companies.

67. Certain DTTs foresee that in case companies resident of a contracting state have a PE in the other contracting state (state of source), the latter may levy WHT on profits made by the PE as a taxation on dividend.
**Tax administration**

**Taxable period**
Under Tunisian law, both the accounting year and tax year follow the calendar year. However, derogation is possible if prior authorisation is obtained from the Ministry of Finance.

**Tax returns**
Tunisian-established companies have the obligation to file monthly tax returns, an annual corporate tax return, and an annual Employer’s Declaration.

Monthly tax returns include WHTs, VAT, LAT, social logging tax, and professional training tax, and must be filed each month before the 28th day of the following month. Filing and payment take place simultaneously.

The annual tax return is the corporate tax return, which must be filed before 25 March of the following year. The deadline for filing the corporate tax return is moved to 25 June for public liability companies and private liability companies subject to statutory audit. Filing and payment take place simultaneously.

The Employer’s Declaration has to be filed each year before 28/29 February of the following year. This declaration must list all fees and salaries paid or incurred, even if not yet paid, to service suppliers and employees during the concerned year. No payment is due in connection with this filing, but fees not listed on this declaration are not recognised as deductible costs.

**Payment of tax**
Corporate tax is paid through:

- WHTs applied on certain payments and operated by the debtor on behalf of the taxpaying entity.
- Beginning from the second year of activity, three provisional instalments, each calculated at 30% of the total corporate tax due for the previous year. The instalments fall due on 28 June, 28 September, and 28 December.
- An annual tax return.

Both WHTs and provisional payments of income tax are creditable against the annual/final tax due.

Filing and payment take place simultaneously.

The most common process is the filing in person at the tax office. In this case, payment is made in cash or by check.

However, companies with turnover exceeding TND 1 million are constrained to file their tax returns electronically. Electronic filing remains optional for other companies. In this case, payment is made through bank transfer.

**Tax audit process**
Tax controllers may proceed either with a preliminary tax audit or an in-depth tax audit.

**Preliminary tax audit**
In case of a preliminary tax audit, the taxpayer under control is not notified prior to starting the audit. However, the tax authority has the obligation to send an information request concerning the tax findings. The taxpayer has to reply within 20 days.
Tunisia

The tax audit is conducted in the offices of the tax administration and deals with the documents made available to them (tax returns, registered contracts, etc.). However, preliminary tax audits can never deal with the taxpayer’s accounts.

The results of the tax control are notified in writing to the taxpayer within a tax audit report, whereby the outcome of the audit activity must be detailed and the findings, if any, must be illustrated and motivated. The tax report is to be notified to the taxpayer within 90 days from the expiry date to reply to the information request (see above).

Indeed, the taxpayer has the possibility to answer to the tax audit report within 45 days starting from the day following the date of receipt of the report. Failing that, the taxpayer will receive a tax assessment notice that brings forth requests for payment of taxes and penalties to the taxpayer. In cases where the taxpayer answers to the notification of the results of the tax audit and brings additional explanations, clarifications, and documents to the tax auditors, they will be constrained to examine the evidence provided by the taxpayer and answer to the taxpayer’s opposition within six months from the day following the notification date.

Once the taxpayer receives the answer of the tax authorities to the taxpayer’s opposition, the taxpayer will have the possibility to file a second opposition within 15 days from the day after the notification day in cases where the taxpayer still disagrees with some or all the points raised by the tax controllers.

Once the second answer is filed by the taxpayer, there will be no other written correspondences with the tax auditors.

In cases where the tax administration agrees to the clarifications, explanations, arguments, and documents provided by the taxpayer, then the tax audit will be closed. However, in cases where the tax administration still disagrees with some or all the evidence provided by the taxpayer, then the taxpayer will receive a tax assessment notice and will have to pay the notified taxes. The tax assessment notice has to take into consideration the taxpayer’s observations enclosed in the first and the second opposition filed by the taxpayer.

Further to the receipt of the tax assessment notice, the taxpayer may make an appeal to the relevant court.

A preliminary tax audit does not prevent an in-depth tax audit of the same period and the same taxes.

In-depth tax audit
In case of an in-depth tax audit, the taxpayer under control is notified 15 days prior to starting the audit. This period may be extended to a maximum period of 60 days.

In-depth tax audits deal with the accounts of the taxpayer under control (in cases where the taxpayer has the obligation to maintain accounts according to the accounting legislation into force) as well as any other evidence (presumptions, registered contracts, etc.).

In-depth tax audits take place, as a general rule, on the business premises of the taxpayer. However, and upon the request of the taxpayer or the tax controllers, the tax audit can be conducted in the tax authorities’ office. In this case, books, records, and any other documentation deemed necessary to the tax auditors to complete the audit have to be moved to the tax auditors’ office.

In-depth tax audits last for:
• six months, in case the taxpayer under control is constrained by the law to maintain accounts, and
• one year, in the other cases.

At the end of this period, the tax audit must come to an end and the tax auditors must draw up a tax audit report to be sent to the taxpayer, whereby the outcome of the audit activity must be detailed and the findings, if any, must be illustrated and motivated.

Once the tax audit report is sent to the taxpayer, the procedure of response and deadlines are the same as for preliminary tax audits.

**Statute of limitations**
The period open for tax audit, unless it was subject to a previous in-depth tax audit, is:

• Four years in case of partial omission; an omission is considered as partial in cases where the tax return is filed but the taxable base is not determined properly or in cases where the WHT rates applied to payments made to third parties are lower than the rates provided by the law.
• Ten years in case of total omission; an omission is considered as total in cases where the tax return is not filed at the date when the company becomes under tax control.

The four-year period and the ten-year period begin to run from 1 January (in cases where the fiscal year coincides with the calendar year) of the year following the completion of sales, earnings, receipt, or disbursement of any sum to be taxed.

**Topics of focus for tax authorities**
The tax authorities primarily focus on extraordinary transactions (e.g. mergers, restructuring, suspension of business). After introducing a transfer pricing provision as a part of the 2009 law, the tax authorities are increasing their attention towards transactions concluded between affiliated companies.
Significant developments

Effective 1 July 2015, the following amendments were made to the Income Tax Act (ITA) and the Value-added Tax (VAT) Act.

**Income tax**

It is now mandatory for every local authority, government institution, or regulatory body to require a taxpayer identification number (TIN) from any person applying for a licence of any form of authorisation necessary for conducting business in Uganda.

The threshold for presumptive tax payable by small business taxpayers has increased from 50 million Ugandan shillings (UGX) to UGX 150 million while at the same time having the base tax rate decrease from 3% to 1.5%.

Taxpayers are now denied a deduction for any expenditure above UGX 5 million in one transaction on goods and services where the supplier does not have a TIN.

The definition of a branch now includes, from the perspective of petroleum and mining operations: “the furnishing of services, including consultancy services, through employees or personnel engaged by the person for such purpose, but only if activities of that nature continue for the same or a connected project for a period or periods aggregating more than 90 days in any 12-month period”.

A definition of immovable property has been included. Immovable property is now defined to include a mining right, petroleum right, mining information, or petroleum information.

Payments made to non-resident suppliers for the provision of services rendered, be it onshore or offshore, are subject to withholding tax (WHT) at a rate of 15%.

The debt-to-equity ratio for thin capitalisation purposes has been revised from 1:1 to 1.5:1. The thin capitalisation rules have been extended to apply to all interest-bearing debt of a foreign-controlled resident company. Further, the thin capitalisation restrictions now apply to branches of non-resident companies. These provisions do not apply if, at all times during the year, the amount of the debt does not exceed the arm’s-length debt amount. Arm’s-length debt amount is defined as the amount of debt that a financial institution that is not related to the company would be prepared to lend to the company having regard to all the circumstances of the company.

The exemption from the 6% WHT on the supply or importation of petroleum products, plant and machinery, human or animal drugs, scholastic materials, and raw materials was removed. These items are now subject to WHT at a rate of 6% unless the buyer is exempt from WHT.
Uganda

The WHT rate on the payment of re-insurance premiums to non-resident persons has decreased from 15% to 10%. Similarly, the WHT rate applicable to non-resident contractors for provision of services to licence in respect of mining or petroleum operations has decreased from 15% to 10%.

Taxpayers providing passenger transport services or freight transport services using vehicles with a load capacity of more than two tonnes are required to pay an advance tax before renewal of their operational licence.

The type of reorganisations that are entitled to roll-over relief for capital gains purposes are now defined in the ITA.

The provisions for taxation of petroleum operations in Uganda were amended, and special provisions for taxation of mining operations were introduced in the ITA.

Further, the income of Global Fund for AIDS, Malaria, and Tuberculosis is now exempt from income tax.

**Value-added tax (VAT)**

The annual turnover threshold for VAT registration has increased from UGX 50 million to UGX 150 million.

The threshold for cash basis accounting has increased from UGX 200 million to UGX 500 million.

The following organisations are now listed under the schedule of Public International Organisations who qualify for diplomatic benefits under the VAT Act:

- Global Fund for AIDS, Malaria, and Tuberculosis.
- Uganda Red Cross Society.

Compact bulbs with a power connecting cap at the end are now subject to VAT at a tax rate of 18%.

The supply of cereals grown and milled in Uganda are now zero-rated.

There are a number of significant VAT amendments for the mining and petroleum sector. These include the following:

- Definition of a licensee, contractor, mining operations, petroleum operations, and petroleum agreement.
- A licensee undertaking mining or petroleum operations or any other person undertaking the construction of a petroleum pipeline is now allowed to apply for voluntary VAT registration regardless of whether they are making any taxable supplies.
- A contractor or licensee is now allowed to claim input tax credit for the VAT on imported services.
- A licensee can now seek a refund when its input credit exceeds its output liability for a period.
- All VAT on supplies of goods or services to a licensee is deemed paid such that the licensee does not incur any VAT on its supplies.

**The Tax Procedures Code Act**

The Tax Procedures Code Act was published on 19 October 2014. The Act provides a Code to regulate the procedures for the administration of specified tax laws in Uganda. The main purpose of the Act is to:

- harmonise and consolidate the tax procedures under existing tax laws, and
to provide for related matters.

As to date, the Act has not yet been gazetted and is therefore not yet under operation.

**Proposed 2016 amendments**

There are various proposed amendments to income tax, VAT, excise duty, and other levies as continued in the respective amendments bills. The amendments, if adopted as law, will generally come into effect 1 July 2016. These include the following.

**Income tax**

The Bill proposes the following amendments:

- An amendment to make it clear that the ability to carry forward tax losses is subject to the change in control provisions.
- Introduction of WHT as the mode for collection of tax from a non-resident person who derives rent from sources in Uganda.
- An amendment to the limitation of benefit clause to introduce, among others, the concept of beneficial ownership in order for a non-resident person to benefit from a tax exemption or reduced tax rate under a double taxation agreement (DTA).
- A specific WHT requirement in relation to payments to non-residents who derive income from sources in Uganda from international carriage and telecommunications services.
- The inclusion of the International Centre for Research in Agroforestry (ICRAF) and the International Potato Centre as listed institutions in the First Schedule to the ITA. This means that the income of these entities will be exempt from income tax.
- The removal of clinics as a separate category of business subject to specific rates of presumptive tax on turnover below UGX 50 million.
- Various amendments affecting petroleum operation include an updated definition of the term ‘licensee’ to cover persons undertaking upstream and midstream petroleum activities by reference to the correct respective piece of legislation, repeal of the definition of ‘petroleum exploration information’, and limitation of deductions of expenditure for exploration licenses issued after 31 December 2015, among others.

**VAT**

In respect to VAT, persons undertaking midstream operations in the petroleum sector (such as refining, conversion, transmission, and storage) will be entitled to apply for voluntary VAT registration regardless of whether they are currently making taxable supplies.

LED lamps and bulbs, which are exempt from import duty in accordance with the Fifth Schedule of the EAC Customs Management Act, will be specifically excluded from the normal parallel exemption for import VAT. This means that the import of such items will be subject to the standard VAT at 18%.

The Bill introduces a special treatment for VAT on taxable supplies made by a supplier to a contractor executing an aid-funded project, whereby:

- the VAT on the supply is deemed to have been paid by the contractor to the supplier, and
- the supplier does not account for the deemed VAT payment as output tax.

A person providing business process outsourcing (BPO) services will be entitled to claim an input tax credit for VAT incurred on imported services.

The Bill proposes to remove the supply of solar power from the list of exempt supplies in the Second Schedule to the VAT Act.
The Bill extends the current exemption for supplies to the contractors and subcontractors of hydro power projects to now also encompass solar power and geothermal power projects.

The Bill proposes to add the following to the list of agricultural machinery, tools, and implements that are exempt from VAT: hullers, oil presses, grain dryers, manure spreaders, fertiliser distributions, transplanters, juice presses and crushers, among others.

**Excise duty**
The Bill proposes a number of excise duty amendments, including the following:

- Manufacturers will be able to claim a refund of excise duty that was previously paid on excisable goods that are converted into approved healthcare or medical products.
- Specialised hospital furniture will be exempted from the 10% excise duty on furniture as introduced in 2015. In addition, the existing .09 United States dollars (USD) per minute duty on incoming international calls will be removed.

The table below shows goods where excise duty will be amended:

</tbody>
</table>

**Finance Act**
The amendment proposes to impose import duty on lubricants, un-denatured alcohol, steel, steel products, electronics, paper, and paper products diapers. Further, the amendment proposes to increase the environmental levy on used clothes, shoes, and other articles from 15% to 20%.

In addition, the Bill proposes to waive all tax arrears owed by Savings and Credit Cooperative Organisations (SACCOs) as at 31 December 2015 and also repeal the fees under the Mining Act 2003 to the extent prescribed under the Finance Acts of 2013 and 2014. Presumably, this means that the fees that applied immediately prior to 1 July 2013 are still in effect.
Taxes on corporate income

A resident company is taxed on its income from all geographical sources. A non-resident company is only subject to Uganda income tax on income derived from sources in Uganda.

The income tax rate applicable to the chargeable income of companies is 30%, with the exception of:

- Mining companies.
- Non-resident air transport, shipping, and some telecommunication services.
- Resident companies whose turnover does not exceed UGX 150 million.

Chargeable income is gross income for the year less the total deductions allowed under the ITA.

Mining companies

The income tax rate applicable to mining companies is calculated according to the following specified formula:

Annual tax rate = 70 minus (1500/x), where x is the ratio of the company’s chargeable income to the gross revenue for the year.

Note that the derived tax rate is subject to a minimum tax rate of 25% and a maximum tax rate of 45%.

Non-resident air transport, shipping, and some telecommunications services

Non-resident ship operators, charterers, and air transport operators who derive income from carriage of passengers who embark, or cargo or mail that is embarked, in Uganda, as well as road transport operators who derive income from carriage of cargo or mail that is embarked in Uganda, are taxed at the rate of 2%.

A non-resident person who carries on the business of transmitting messages by cable, radio, optical fibre, or satellite communication and derives income through transmission of such messages by apparatus established in Uganda, whether or not such messages originated from Uganda, is taxed on one’s gross income at a rate of 5%. Similarly, a non-resident person who derives income from providing direct-to-home pay television services to subscribers in Uganda is taxed on one’s gross income at a rate of 5%.

Resident companies with turnover of less than UGX 150 million

A rate of 1.5% of turnover is used to determine income tax payable by a resident company whose turnover is between UGX 50 million and UGX 150 million, subject to certain thresholds.

However, on application to the Commissioner, a resident company with a turnover of less than UGX 150 million may be taxed at 30%.

This category excludes professionals, public entertainment services, public utility services, or construction services.

Local income taxes

There are no other income taxes in Uganda.
Corporate residence

A company is resident in Uganda for a year of income if it meets one of the following criteria:

- Is incorporated or formed under the laws of Uganda.
- Has its management and control exercised in Uganda at any time during the year of income.
- Undertakes the majority of its operations in Uganda during a year of income.

Permanent establishment (PE)

A PE (branch) means a place where a person carries on business, and includes:

- A place where a person is carrying on business through an agent, other than a general agent of independent status acting in the ordinary course of business as such.
- A place where a person has, is using, or is installing substantial equipment or substantial machinery.
- A place where a person is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to such a project.
- The furnishing of services, including consultancy services, by an enterprise of a contracting state through employees or other personnel engaged in the other contracting state, provided that such activities continue for the same or a connected project for a period or periods aggregating more than four months within any 12-month period.

Other taxes

Value-added tax (VAT)

VAT is governed by the VAT Act and administered by the Uganda Revenue Authority (URA). VAT is charged at the rate of 18% on the supply of most goods and services in the course of business in Uganda. Specified goods and services, as well as exports outside of Uganda, attract a zero rate of tax.

Some supplies are exempt from VAT, the main categories being government subsidies, some unprocessed foodstuffs, financial services, health and life insurance, re-insurance services, unimproved land, leases and sale of certain residential properties, betting and gaming, education, medical and health services, social welfare services, pesticides, petroleum products subject to excise duty, and power generated by solar.

Zero rating is preferable to exemption because the VAT on costs incurred in making a zero-rated supply can be recovered while those incurred in making an exempt supply cannot be recovered.

The zero-rated supplies include the supply of goods and services exported from Uganda; the supply of drugs and medicines; the supply of seeds, fertilisers, pesticides and hoes; the supply of leased aircraft, aircraft engines, spare engines, spare parts for aircraft, and aircraft maintenance equipment.

The annual threshold for VAT registration is UGX 150 million. Persons who make supplies that are VATable and whose turnover exceeds UGX 150 million are required to register for VAT with the URA. VAT-registered persons are required to:

- Charge VAT whenever they make supplies that are VATable.
- File monthly returns before the 15th day of the month following the reporting month.
Credit for input tax
A person making exempt, zero-rated, and standard supplies can recover all the input VAT if the exempt supplies are less than 5% of the total supplies. However, if the exempt supplies are more than 5% but less than 95%, the person is required to recover only a portion of the VAT input tax corresponding to the percentage of the taxable supplies. If the exempt supplies exceed 95%, the person cannot recover any input VAT.

Imported services
The VAT Act defines a supply of service to mean any supply that is not a supply of goods or money, including the performance of services for another person.

There is no definition of imported services in the local legislation. However, the tax authorities generally consider an imported service to be one provided by a person normally resident outside Uganda who is not required to register for VAT in Uganda. According to Regulation 14 of the VAT Regulations 1996, anyone who imports a service into the country must account for VAT on such a service. The Regulations require the person importing the service to account for the VAT at the time when performance of the service is completed, when payment for the service is made, or when the invoice is received from the foreign supplier, whichever is earliest.

The tax on such imported services is computed at the rate of 18% of the cost of the service. VAT-registered companies are no longer required to prepare self-billed tax invoices, thus they are unable to claim the VAT paid as input tax; however, a contractor or licensee in the petroleum and mining industry is able to claim an input tax credit for the reverse charge VAT paid on imported services. Further, if the importer of the services is not registered for VAT, the importer is required to calculate and pay the VAT to the URA.

Failure to pay VAT on non-exempt imported services is tantamount to lack of compliance with the law, and a penalty of 2% per month, compounded, may apply.

VAT representative for non-resident persons
The VAT Act provides for the appointment of a VAT representative by a non-resident person who may be required by the Commissioner to register for VAT in Uganda but has no fixed place of business. If the non-resident person does not appoint the VAT representative within 30 days after being required to register for VAT, the Commissioner may appoint the representative for the non-resident person. The VAT representative of the non-resident person shall be a person who is ordinarily residing in Uganda, may be an agent for more than one non-resident person, and will have the responsibility for doing all things required of the non-resident person under the VAT Act.

Customs duties
Many goods imported into Uganda are subject to customs duties. However, exemptions are available to various classes of plant and machinery imported into Uganda. The rates of duty are provided by the East African Community common external tariff code. Certain products imported from the East African Community and the Common Market for Eastern and Southern Africa (COMESA) region enjoy special custom duty rates. Imported items are classified according to the nomenclature established under the international convention on the harmonised commodity description and coding system. Duties range from 0% to 60%, depending on the item imported.

Excise duties
Excise duties are imposed on goods considered luxuriant. Examples include locally manufactured soft drinks, cigarettes, alcoholic drinks, and spirits. A schedule of some of the rates is provided below:
### Goods Excise Duty

### Property taxes

Property taxes are administered by the local authorities annually. They are based on the value of the property as assessed by the local authorities.

### Stamp duties

Stamp duty is charged on a number of transactions at varying rates. Stamp duty is charged at 1% of the total value for a number of instruments, including hire purchase agreements, composition deeds, leases, exchange of property, conveyance, transfers, share warrants, gifts, and agreements relating to deposit of title deeds.

Stamp duty of 0.5% is incurred on formation of a company, capital-raising activities (e.g. increase of share capital), debentures, equitable mortgages, and mortgage deeds.

Stamp duty of 1% applies on transfer of shares.

No stamp duty is charged on the increase of share capital where it is in fulfilment of a condition precedent for acquiring loan funds for a development project or where it is made on becoming public through the stock exchange.

Stamp duty of UGX 5,000 is also charged in a number of various other instruments.
**Turnover taxes**
Every promoter of gaming and pools promoted within Uganda and every principal agent of a promoter of gaming and pools promoted outside Uganda is liable to tax at 15% of the total amount of money received or the total amount of bets.

**Environmental levies**
Environmental levies are charged on every person who imports motor vehicles that are eight years old or older. Levies are also imposed on the importation of used household appliances. The levy on motor vehicles is 20% of the value of the vehicle as determined for customs duty purposes. Levies on electrical appliances range from UGX 20,000 to UGX 50,000 per item, depending on the nature of the item.

**Payroll taxes**
The employer is required to withhold tax on employment income from their employees and pay it to the tax authorities. The tax is normally borne by the employee. Where the employer fails to withhold tax as required, the employer becomes liable for the taxes but may recover the same from the employees.

**Social security contributions**
An employer is obligated to make contributions to the national social security fund for each employee, amounting to 10% of their gross pay.

---

**Branch income**
Tax is imposed on the income of a non-resident company derived from running a branch in Uganda. The chargeable income of a branch in Uganda is taxed at the corporation tax rate of 30% after deduction of allowable expenses.

In addition to corporation tax, branches are subject to extra tax at a rate of 15% on any repatriated income for a year of income. The repatriated income is calculated using the $A + (B - C) - D$ approach. Where $A$ is the net assets at the beginning of the year, $B$ is the net profit for the year, $C$ is the tax charge for the year, and $D$ is the net assets at the end of the year.

---

**Income determination**
In arriving at chargeable income (taxable income), one has to go through the process of adjusting profits by taking into account deductions allowed and deductions not allowed.

**Inventory valuation**
A taxpayer is allowed a deduction for the cost of trading stock disposed of during the year, which is determined by adding to the opening value of the trading stock the cost of trading stock acquired during the year and subtracting the closing value of stock. The opening value of the stock is the closing value for the previous year or, where the taxpayer commenced business during the year, the market value at the time of commencement of the business of the trading stock acquired prior to commencement. The closing stock valuation method is the lower of cost or market value. Trading stock is allowed to be valued using either the absorption costing or prime cost method. The stock valuation method chosen may not be changed, except with written permission of the Commissioner.

**Capital gains**
Capital gains are included in and taxed together with the business income at a rate of 30%. There is no separate capital gains tax. Capital gains arise on disposal of non-depreciable business assets as well as sale of shares.
Uganda

**Dividend income**
The general rule is that dividend income is taxable as part of business income at a rate of 30%. Dividend income is also subject to WHT at the rate of 15%. The WHT paid in respect of the dividend income is creditable where the income is subject to the corporation tax rate of 30%. The WHT rate for dividend payments to resident persons is 15%. For dividends paid out by companies listed on the stock exchange to individuals, the rate is 10%.

Dividend income is exempt from tax if the recipient company directly or indirectly controls the paying company through ownership of 25% or more of the voting power of the paying company.

**Interest income**
The general rule is that interest income is taxable as part of business income at a rate of 30%. Interest income is also subject to WHT at the rate of 15%. The WHT paid in respect of the interest income is creditable where the income is subject to the corporation tax rate of 30%. Also, interest income earned with respect to government securities is subject to tax at 20% as a final tax.

**Rental income**
Companies are required to disclose their rental income separately from other business income. Taxable rental income is the net income after allowing for any expenditures and losses in respect of the rental income derived. The rate of tax applicable is 30%.

**Foreign income**
Foreign income is taxable on resident recipients, and tax suffered in the country where it is sourced (if any) is creditable, subject to the provisions of any DTAs. This credit is limited to the amount of Ugandan tax payable on that income.

There are no provisions for deferring tax on income earned abroad by tax residents.

**Deductions**
The ITA sets out the following conditions for deductibility of an expense:

- There must be an expenditure or loss.
- The expenditure or loss must be incurred by a person during the year of income.
- The expenditure must be incurred in the production of income included in gross income.

A taxpayer who is accounting for tax purposes on an accrual basis derives income when it is receivable by the taxpayer and incurs expenditure when it is payable by the taxpayer.

An amount is treated as payable by the taxpayer when all the events that determine liability have occurred and the amount of the liability can be determined with reasonable accuracy, but not before economic performance with respect to the amount occurs. Economic performance occurs:

- with respect to the acquisition of services or property, at the time the services or property are provided
- with respect to the use of property, at the time the property is used, or
- in any other case, at the time the taxpayer makes payment in full satisfaction of the liability.

Contingent liabilities are not tax-deductible in Uganda.
Depreciation
A deduction is allowed for the depreciation of the person’s depreciable assets, other than minor assets, in accordance with the appropriate applicable rates. The ITA allows a taxpayer a deduction for the depreciation of their depreciable assets on a reducing-balance basis. Depreciable assets are classified in four classes as follows:

<table>
<thead>
<tr>
<th>Class</th>
<th>Assets included</th>
<th>Rate of tax depreciation (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Computers and data handling equipment.</td>
<td>40</td>
</tr>
<tr>
<td>2</td>

</tr>
<tr>
<td>4</td>
<td>Rail cars, locomotives, and equipment; vessels, barges, tugs, and similar water transportation equipment; aircraft; specialised public utility plant, equipment, and machinery; office furniture, fixtures, and equipment; and any depreciable asset not included in another class.</td>
<td>20</td>
</tr>
</tbody>
</table>

Industrial building allowance
A company is eligible for an industrial building allowance on its industrial and commercial buildings at a tax rate of 5% per annum on a straight-line basis. The industrial building allowance will be granted on the actual cost incurred in constructing the buildings.

An industrial building is defined to mean any building that is wholly or partly used, or held ready for use, by a person in manufacturing operations, research and development into improved or new methods of manufacture, mining operations, an approved hotel business, an approved hospital, or approved commercial buildings.

Goodwill
An intangible asset is amortisable over its useful life. To the extent that the useful life of the underlying asset that gives rise to goodwill can be determined, then the goodwill maybe deductible over the useful life of the asset.

Start-up expenses
A company setting up business for the first time or engaged in the initial public offer at the stock market will be entitled to a tax deduction for all its start-up costs that are of capital nature that would otherwise not be tax-deductible under the ordinary tax rules. The start-up costs will be allowed as tax-deductible costs over a period of four years on a straight-line basis at the rate of 25% per annum.

Interest expenses
Interest is deductible if the interest is incurred in respect of a debt obligation by the company in the production of income included in the company’s gross income. Interest arising from non-trade-related debt obligation is not deductible. Deferred interest is deductible when paid.

Interest charged before capital investment is put to use has to be capitalised. Interest incurred after capital investment is put to use is allowed as a deduction.

If the company is foreign controlled, then the interest arising from the loan in excess of one and a half times the company’s equity will not be allowed (see Thin capitalisation in the Group taxation section for more information).
**Bad debt**
A deduction is allowed for bad debt only if:

- the amount was included in the person’s income in the year of income
- it is in respect of money that was lent in the ordinary course of business by a financial institution in the production of income, or
- the amount of the debt claim was in respect of a loan granted to any person by a financial institution for the purpose of farming, forestry, fish farming, beekeeping, animal and poultry husbandry, or similar operations.

For the bad debt to be deductible, the taxpayer must demonstrate to the URA that reasonable steps to collect the debt were taken and that the taxpayer failed to recover the debt. In relation to a financial institution, it should be a debt in respect of which a loss reserve held against presently identified losses or potential losses, and which is therefore not available to meet losses that subsequently materialise, has been made.

**Charitable contributions**
Charitable donations are deductible if made to amateur sporting associations; religious, charitable, or educational institutions of public character; trade unions; and other similar associations that have been issued with a written ruling by the Commissioner currently in force stating that it is an exempt organisation. The donations should not exceed 5% of the person’s chargeable income.

**Meals, refreshments, and entertainment**
Expenses for meals, refreshments, and entertainment are deductible only where the value is included in the employment income of the employees or is excluded from employment income owing to the fact that it is provided on equal terms to all workers.

**Pension expenses**
Employers are allowed a deduction for the contributions made to pension schemes on behalf of their employees. Employees, on the other hand, do not get a deduction for the contributions they make to pension funds.

**Payment for directors**
Directors are treated as employees, so expenses incurred in respect of directors are deductible expenses.

**Bribes, kickbacks, illegal payments**
Non-business expenses are not tax-deductible, including those of a private nature.

**Fines and penalties**
No deduction is allowed for any fine or similar penalty paid to a government or its subdivision for breach of any law.

**Taxes**
No deduction is allowed for income tax payable in Uganda or in a foreign country.

**Other significant items**
No deduction is allowed for the following other expenditures:

- Any expenditure or loss of a domestic or private nature.
- Any expenditure or loss of a capital nature.
- Any expenditure or loss recoverable under insurance contract or indemnity.
- Any contribution or similar payment made to a retirement fund by the employee or for the benefit of any other person (e.g. National Social Security Fund [NSSF] contributions).
- Any premium or similar payment made in respect of a life insurance policy for the life of the person paying the premium or on the life of some other person.
• Any income appropriated to a reserve fund or capitalised in any way.
• The amount of pension paid to any person.

Net operating losses
A deduction is allowed for any assessed tax losses carried forward from previous years of income. Such tax losses are carried forward and deducted against future taxable profit of the business in the subsequent years of income. The losses can be carried forward indefinitely. There is no ring-fencing of losses except in the following circumstances:

• Where, during a year of income, there has been a change of 50% or more in the underlying ownership of a company, as compared with its ownership one year previously, the company is not permitted to deduct an assessed loss in the year of income or in subsequent years, unless the company, for a period of two years after the change or until the assessed loss has been exhausted if that occurs within two years after the change,
  • continues to carry on the same business after the change as it carried on before the change and
  • does not engage in any new business or investment after the change where the primary purpose of the company or the beneficial owners of the company is to utilise the assessed loss so as to reduce the tax payable on the income arising from the new business or investment.
• In cases where losses relate to farming, the assessed farming loss can only be deducted from farming income of the taxpayer in the following year and not from any other income.

There is no provision for carryback of losses in Uganda.

Payments to foreign affiliates
Payments to foreign affiliates are deductible as long as they are charged at an arm’s length and incurred in the production of income.

Group taxation
There are no specific provisions in the law covering groups, so companies in a group do not get any special treatment for tax purposes in Uganda.

Transfer pricing
The transfer pricing regulations apply to controlled transactions if a person who is a party to the transactions is located in and is subject to tax in Uganda and the other person who is a party to the transaction is located in or outside Uganda.

The URA Practice Note issued on 14 May 2012 gives details on the transfer pricing documentation to be maintained by the taxpayer. These include company details and transaction details, including agreements and the pricing methodology used in determining the arm’s-length price.

In addition, the anti-avoidance provisions contained in Sections 90 and 91 of the ITA require transactions between associates to be at an arm’s-length. These are the provisions that are often applied by the URA in instances where they are of the view that a non-resident person may be transferring profits from Uganda.

Thin capitalisation
Where a company intends to finance some of its Uganda operations by use of foreign debt, the ITA provides for thin capitalisation rules in Uganda, and the safe harbour debt-to-equity ratio is 1.5:1.
Uganda

The thin capitalisation rules are provided for in Section 89(1) of the ITA. According to this Section, where a foreign-controlled resident company, other than a financial institution, has a debt-to-equity ratio in excess of 1.5:1 at any time during the year of income, a deduction is disallowed for the interest paid by the company during that year on that part of the debt that exceeds the 1.5:1 ratio for the period the ratio was exceeded.

These provisions do not apply if, at all times during the year, the amount of the debt does not exceed the arm’s-length debt amount. Arm’s-length debt amount is defined as the amount of debt that a financial institution that is not related to the company would be prepared to lend to the company having regard to all the circumstances of the company.

Controlled foreign companies (CFCs)
Uganda does not have a CFC regime.

Tax credits and incentives

Foreign tax credit
A resident taxpayer is entitled to a foreign tax credit for any foreign income tax paid by the taxpayer in respect of foreign-source income included in the gross income of the taxpayer. The foreign tax credit allowed is subject to the income tax rate (i.e. 30%) in Uganda.

Tax holidays for exporters
A tax holiday of ten years is available to exporters who export at least 80% of their produce of finished goods, subject to certain conditions.

Scientific research expenditure, training expenditure, and mineral exploration expenditure
A 100% allowance is available for scientific research expenditure, training expenditure, and mineral exploration expenditure in the year of expenditure.

Incentives for the importation of plant and machinery
Plant and machinery is exempt from customs duty on importation. Additionally, a VAT deferral facility is available where VAT is deferred on importation of plant and machinery and subsequently waived upon approval by the relevant authorities.

Employment incentives
A deduction of 2% of income tax payable is granted to any employer who can prove to the URA that at least 5% of their employees on a full-time basis are people with disabilities.

Other incentives
Income derived from agro processing is exempt from income tax, subject to certain conditions.

Withholding taxes

Payments to non-resident persons
According to Section 83(1) of the ITA, a tax is imposed on every non-resident person who derives any dividend, interest, royalty, rent, natural resource payment, or management charge from sources in Uganda. WHT at a rate 15% therefore applies on gross dividend payments, interest, management fees, and royalty payments in respect of non-treaty countries.

However, Section 83(5) exempts interest paid by a resident company in respect of debentures that:
• were issued by the company outside Uganda for the purpose of raising a loan outside Uganda
• were widely issued for the purpose of raising funds for use by the company in a business carried on in Uganda or the interest is paid to a bank or a financial institution of a public character, and
• the interest is paid outside Uganda.

A ‘debenture’ is defined in the ITA as any form of debt, including debenture stock, mortgage stock, loan, loan stock, or any similar instrument acknowledging indebtedness, whether secured or unsecured. The term ‘widely issued’ is also specifically defined.

Also, the rate of WHT on interest derived by a non-resident person from government securities is 20%.

Payment of re-insurance premiums to non-resident persons is subject to WHT at a rate of 10%. The requirement to withhold tax does not apply to the African Reinsurance Corporation and PTA Reinsurance Company.

Payments to resident persons
The rate of 15% also generally applies to payments of dividends and interest to resident persons, except in the following circumstances, where different rates apply:

• Dividends paid to a company controlling 25% or more of the voting powers: 0%.
• Dividends paid by companies listed on the Ugandan Securities Exchange to individuals: 10%.
• Interest on government securities: 20%.
• Interest paid by a natural person, paid to a financial institution (other than from government securities), paid by a company to an associated company, and interest that is exempt in the hands of the recipient: 0%.

There is no WHT on royalty payments to resident persons unless the payments are made by a government institution, local authority, company controlled by the government, or a ‘designated payer’.

Double taxation agreements (DTAs)
A taxpayer may benefit from the provisions of a DTA that Uganda has with another country. Please find below a table showing the countries with which Uganda has DTAs and the applicable WHT rates on various categories of income.

According to Section 88(2) of the ITA, the terms of the international agreement to which Uganda is a party prevails over the provisions of ITA in case the terms of the international agreement are inconsistent with the provisions of the Act.

Uganda

Note

1. With respect to the Uganda/Netherland DTA, the rate applicable on dividends is 15%, except where the investment is new or is an expansion of the current investment made after the DTA entered into (10 September 2006).

For new investments and expansions of current investment, the rates are:
• 0% if the beneficiary holds at least 50% of the shares in the company paying the dividends.
• 5% if the beneficiary holds less than 50% of the shares in the company making the payment.

---

**Tax administration**

**Taxable period**
A normal period of 12 months is known as a year of income. This spans from 1 July to 30 June. On application, a taxpayer may be allowed to use a substituted year of income, which is a 12-month period other than the normal year of income.

**Tax returns**
The ITA provides for two provisional returns within a 12-month period (financial year). The first provisional return is due within the first six months of the accounting year while the second is due by the end of the 12th month of the accounting year.

The Self-Assessment Return (SAR) is due by the end of the sixth month after the end of the accounting year.

Electronic filing has been introduced for all tax returns.

**Payment of tax**
For all companies, a system of provisional payments on account, based on estimated profits, is in place. The first payment of 50% is due by the end of the sixth month of the accounting period and the second payment is due by the end of the 12th month. The balance is expected to be paid together with the SAR.

**Tax audit process**
In most cases, audits are initiated by the URA, which notifies the taxpayer of the records they need to prepare before commencement of the audit. The URA then reviews the records. This is normally done at the premises of the taxpayer, where the URA can obtain the necessary clarifications from the bookkeepers.

The audit findings are then communicated to the taxpayer subsequent to whom an assessment is raised. If the taxpayer does not agree with the objection decision, they may appeal to the Tax Appeals Tribunal or to the high court.

**Statute of limitations**
The ITA requires a taxpayer to maintain records for at least five years after the end of the year to which the records relate.

The VAT Act provides for records to be maintained for six years after the end of the tax period to which they relate.

**Topics of focus for tax authorities**
The focus of the URA keeps shifting but is generally based on the risk analysis of the information availed to them. Currently, the focus is on transfer pricing and the application of reduced tax rates in respect to DTAs.
Significant developments

Since the 2016 Budget, the following measures have been put in place:

- Capital allowances for implements, plant, and machinery used in the generation of electricity have been increased from 25% to 50% with effect from 1 January 2016.
- The carryover period of losses for entities involved in the generation of electricity using wind and solar power, excluding wood, has been extended from five years to ten years.
- A holder of a mining licence shall pay a mineral royalty at the rate of 9% for open cast mining operations and 6% for underground mining operations. For more information, see Mineral Royalty Tax in the Taxes on corporate income section.
- With effect from 1 July 2015, the corporate income tax (CIT) rate for mining operations has increased from 0% to 30%, with a variable profit tax of up to 15%. This effectively re-instates the CIT position applying before 1 January 2015.
- CIT applicable on mineral processing companies was revised from 30% to 35%, and variable profit tax on mineral processing was abolished.
- From 1 January 2016, Property Transfer Tax (PTT) will apply at the rate of 5% of the realised value in respect of land and shares. This was previously 10%.
- From 1 January 2016, withholding tax (WHT) will apply at 15% on management and consultancy services provided by resident consultants. This was previously 0%.

Taxes on corporate income

Under the Income Tax Act, Zambia has a source-based system for the taxation of income. Income deemed to be from a Zambian source is generally subject to Zambian income tax. Zambian residents are also subject to income tax on interest and dividends from a source outside Zambia.

A non-Zambian resident enterprise with a Zambian permanent establishment (PE) will be subject to CIT on its Zambian-source income. If there is no PE, Zambian-source income of the non-Zambian resident may still be subject to WHT (see the Withholding taxes section).

The standard CIT rate applicable to the income of companies (and other persons other than individuals) is 35%.

The following sources of income are subject to different CIT rates:

<table>
<thead>
<tr>
<th>Source of income</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Electronic communications networks or service licensees (income in excess of 250,000 Zambian kwacha [ZMW])</td>
<td>40</td>
</tr>
<tr>
<td>Farming</td>
<td>10</td>
</tr>
<tr>
<td>Export of non-traditional products</td>
<td>15</td>
</tr>
<tr>
<td>Production of organic fertiliser and chemical manufacture of fertiliser</td>
<td>15</td>
</tr>
</tbody>
</table>
The rates applicable for mining operations (excluding industrial minerals) are as follows:

<table>
<thead>
<tr>
<th>Tax on mining operations* (excluding industrial minerals**)</th>
<th>1 January 2015 to 30 June 2015</th>
<th>From 1 July 2015</th>
</tr>
</thead>
<tbody>
<tr>
<td>CIT rate</td>
<td>0%</td>
<td>30%</td>
</tr>
<tr>
<td>Additional variable profits rate</td>
<td>0%</td>
<td>a - (ab/c)*****</td>
</tr>
</tbody>
</table>

The rates applicable for mining operations for industrial minerals are as follows:

<table>
<thead>
<tr>
<th>Tax on mining operations* for industrial minerals</th>
<th>1 January 2015 to 30 June 2015</th>
<th>From 1 July 2015</th>
</tr>
</thead>
<tbody>
<tr>
<td>Additional variable profits rate</td>
<td>a - (ab/c)**</td>
<td>a - (ab/c)*****</td>
</tr>
</tbody>
</table>

The CIT rate of 35% is applicable on income from mineral processing****.

Notes

* Mining operations means an operation carried out under a mining right, excluding an operation carried out under a mineral processing licence only or an exploration licence.

** Industrial minerals include rocks or minerals other than gemstones, base metals, energy minerals, or precious metals used in their natural state or after physical or chemical transformation, including barites, dolomite, feldspar, fluor spar, graphite, gypsum, ironstone when used as a fluxing agent, kyanite, limestone, pyrophyllite, salt, sand, clay, talc, laterite, gravel, potash, potassium minerals, granite, marble, clay, silica, diatomite, kaolin, bentonite, or quartz.

*** a = 15%; b = 8%; and c = the percentage ratio of the assessable income to gross sales.

**** Mineral processing means the practice of beneficiating or liberating valuable minerals from their ores, which may combine a number of unit operations, such as crushing, grinding, sizing, screening, classification, washing, froth floatation, gravity concentration, electrostatic separation, magnetic separation, leaching, smelting, refining, calcining, and gasification or any other processes incidental thereto.

Reductions in CIT rates apply to a company operating under a priority sector declared under the Zambian Development Agency Act (ZDA Act), 2006.

Reduced CIT rates apply in some other cases, including certain companies listed on the Lusaka Stock Exchange.

Mineral Royalty Tax

From 1 January 2016, Mineral Royalty Tax applies to holders of mining licences as follows:

<table>
<thead>
<tr>
<th>Description</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>On norm value of minerals/precious metals under licence:</td>
<td></td>
</tr>
<tr>
<td>Underground mining operations</td>
<td>6</td>
</tr>
<tr>
<td>Open cast mining operations</td>
<td>9</td>
</tr>
<tr>
<td>On gross value of gemstones/energy minerals under licence:</td>
<td></td>
</tr>
<tr>
<td>Underground mining operations</td>
<td>6</td>
</tr>
<tr>
<td>Open cast mining operations</td>
<td>9</td>
</tr>
<tr>
<td>On norm value of industrial minerals</td>
<td>6</td>
</tr>
<tr>
<td>Underground mining operations</td>
<td>9</td>
</tr>
<tr>
<td>Open cast mining operations</td>
<td>9</td>
</tr>
<tr>
<td>On norm value of gemstones/energy minerals without licence:</td>
<td></td>
</tr>
<tr>
<td>Underground mining operations</td>
<td>9</td>
</tr>
<tr>
<td>Open cast mining operations</td>
<td>9</td>
</tr>
</tbody>
</table>
Local income taxes
There are no income taxes imposed by the local authorities on businesses.

Corporate residence
A person other than an individual will be resident in Zambia if it is incorporated or formed under the laws of Zambia or if the central management and control is exercised in Zambia.

Permanent establishment (PE)
Broadly, a non-Zambian resident may have a Zambian PE if it has a fixed place of business in Zambia or if it has a dependent agent that has and habitually exercises the authority to conclude contracts in Zambia.

The Zambian definition of a PE is generally similar to the Organisation for Economic Co-operation and Development (OECD) definition and contains a similar list of activities that are included and excluded from the definition of a fixed place of business.

The definition of a PE includes the furnishing of services, including consultancy services, by an enterprise through employees or other personnel present in Zambia for a period or periods exceeding, in aggregate, 90 days in any 12-month period commencing or ending in the fiscal year concerned.

Where a relevant double tax treaty (DTT) is in force, the definition of a PE in the treaty should take precedence over the Zambian domestic legislation in a case where the non-Zambian resident enterprise does not have a PE under the treaty definition.

Other taxes
Value-added tax (VAT)
The VAT rate is 16% and is applicable to supplies of standard-rated goods and services.

The export of goods from Zambia is zero rated. However, the supply of standard-rated services from a Zambian place of business is subject to VAT at 16% whether the customer is a Zambian resident or a non-Zambian resident.

Standard-rated goods imported to Zambia are subject to import VAT at 16%.

The supply of standard-rated services to customers in Zambia by a non-Zambian supplier is subject to VAT. The non-Zambian supplier can appoint a local tax agent to account for this as output VAT; this procedure enables the Zambian customer to reclaim the corresponding input VAT. Otherwise, the Zambian VAT-registered customer would be required to account for the output VAT referred to as ‘reverse charge VAT’; in this instance, however, there is no mechanism for the Zambian customer to recover reverse charge VAT.

Customs duties
Goods imported into Zambia are generally subject to customs duties.

Excise taxes
Certain goods and services, such as alcoholic drinks, tobacco, and mobile communications talk time, are subject to excise duty at the following rates.
Zambia

### Property taxes
Zambia does not have a property tax other than Property Transfer Tax (see below).

### Property Transfer Tax (PTT)
PTT applies to the value of the transfer of land and buildings in Zambia and transfer of shares issued by a company incorporated in Zambia.

The rate of PTT is 5% with effect from 1 January 2016 (previously 10%) and is payable on the open market value (or normal value of shares if greater). The PTT liability is payable by the vendor.

PTT also applies on the transfer of a mining right at the rate of 10%.

### Stamp taxes
Zambia does not have a stamp tax.

### Turnover taxes
Turnover tax applies to certain businesses where the turnover is less than ZMW 800,000 per annum. The applicable rate is 3% of turnover. Income that is subject to turnover tax will not be subject to income tax or VAT.

The definition of ‘turnover’ for turnover tax purposes has been amended to clearly exclude interest, rental income, dividends, and royalties.

### Registration taxes
The Patents and Companies Registration Agency (PACRA) applies a registration fee of 2.5% to increases and reductions in the authorised share capital of companies incorporated in Zambia.

### Payroll taxes
Employers are required to deduct income tax arising on any emoluments under the ‘Pay As You Earn’ (PAYE) regulations.

### Social security contributions
Both employers and employees are required to make contributions to the National Pension Scheme Authority (NAPSA). The contribution rate for 2016 is 5% of the employee’s total earnings (a total 10% contribution from both the employer and employee). This contribution is applicable to a maximum of ZMW 843.97 per employee per month (i.e. a total of ZMW 1,687.94 from both the employer and employee per month).

### Provincial/local taxes other than income taxes
Businesses are required to make contributions to local councils (e.g. Lusaka City Council).

### Branch income
There is no specific legislation concerning the calculation of branch income.
In general, both Zambian resident companies and Zambian branches are required to prepare financial statements under International Financial Reporting Standards (IFRS). The accounting profit is adjusted to determine taxable profits for each source of income according to the same rules used for determining taxable income of Zambian resident companies. The normal CIT rate applies as described in the Taxes on corporate income section.

WHT applies on profits distributed by branches of foreign companies at the rate of 15%.

**Income determination**

As noted below, Zambian CIT rules set out a number of sources of income that are subject to CIT. Income from each source is calculated separately, and a CIT liability arises on each source with no ability to offset a loss from one source against income from another source.

**Business income**

Business gains or profits from a Zambian source are taxable by reference to a charge year. This charge year runs from 1 January to 31 December; however, entities can apply to the Zambia Revenue Authority (ZRA) to have their accounts prepared for a different year end.

**Inventory valuation**

In calculating business income, IFRS should be followed for CIT purposes, including the determination of stock valuation.

**Capital gains**

Zambia does not have a capital gains tax, and, except where provided otherwise in the Income Tax Act, capital gains are not subject to tax.

**Dividend income**

All dividend income (from both Zambian and non-Zambian sources) of a Zambian resident company is subject to CIT as a separate source.

In the case of dividend income received from another Zambian resident company, the WHT deducted on the payment of the dividend should represent the ‘final tax’, and the Zambian resident company receiving the dividend is not subject to an additional CIT liability.

**Interest income**

All interest income (from both Zambian and non-Zambian sources) of a Zambian resident company is subject to CIT as a separate source.

In the case of interest income from a Zambian source, the taxable amount for the recipient company is inclusive of the WHT deducted on the payment of the interest. The WHT is available as a credit for offset against the final CIT liability of the recipient Zambian resident company.

**Rental income**

Zambian-source rental income of a Zambian resident company is subject to CIT as a separate source.

WHT arises at 10% on rental payments. This is the final tax for a landlord, which will not be subject to a further CIT liability.
Royalty income
Zambian-source royalty income (which is very widely defined for these tax purposes) of a Zambian resident company is subject to CIT as a separate source, together with premiums or any like consideration for the use of any Zambian property.

The taxable amount for the recipient company is inclusive of the WHT deducted on the payment of the royalty. The WHT is available as a credit for offset against the CIT liability of the Zambian resident recipient company.

Partnership income
Where a business is carried on in partnership, the income to which each partner is entitled in a period is ascertained under the Zambian income tax rules, and each partner is assessed and charged separately. Accordingly, a partnership is broadly transparent for Zambian income tax purposes.

Unrealised gains/losses
Unrealised gains are not taxable, and, similarly, unrealised losses are not tax deductible.

Foreign currency exchange gains/losses
Foreign exchange gains are only taxable to the extent that they are revenue rather than capital in nature, in which case they are not taxed until they are realised. Foreign exchange losses are only deductible to the extent that they are revenue in nature and realised. By exception, foreign exchange losses of a capital nature incurred on borrowings used for the building and construction of an industrial or commercial building are deductible.

Other significant items
Other sources of income that are taxed under separate source include annuities and hedging income.

Foreign income
As noted above, Zambia operates a source system of income tax. Zambian residents are only subject to income tax on non-Zambian source dividends and interest income.

There are no specific anti-avoidance rules preventing deferral of non-Zambian source income, although it should be noted that Zambia has a general anti-avoidance rule.

Deductions
Expenses are generally deductible against taxable income from the same source, provided that they are not of a capital nature and are incurred wholly and exclusively for the purposes of a business.

Provisions can only be deducted to the extent that they are specific. Even if a provision complies with IFRS, it will be disallowed (and any reversal of the provision will not be taxed) to the extent it is considered to be general in nature.

Depreciation and amortisation
Depreciation and amortisation are not deductible as they relate to capital expenditure.

Zambia has a system of capital allowances that provides for deductions in ascertaining business income. These are calculated at annual rates on qualifying capital expenditure, which currently apply as follows:
<table>
<thead>
<tr>
<th>Category of qualifying expenditure</th>
<th>Rate of allowance (calculated on a straight-line basis)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial buildings</td>
<td>Investment allowance of 10% *</td>
</tr>
<tr>
<td></td>
<td>Initial allowance of 10% *</td>
</tr>
<tr>
<td></td>
<td>Annual wear and tear allowance of 5% *</td>
</tr>
<tr>
<td>Other commercial buildings</td>
<td>Annual wear and tear allowance of 2%</td>
</tr>
<tr>
<td>Implements, machinery, and plant - farming, manufacturing, tourism, generation of electricity, and leasing</td>
<td>Annual wear and tear allowance of 50%</td>
</tr>
<tr>
<td>Commercial vehicles</td>
<td>Annual wear and tear allowance of 25%</td>
</tr>
<tr>
<td>Non-commercial vehicles</td>
<td>Annual wear and tear allowance of 20%</td>
</tr>
<tr>
<td>Patents, designs, trademarks, and copyrights</td>
<td>Premium allowance on straight-line basis over the life of period for which the right is granted</td>
</tr>
<tr>
<td>Mining expenditure</td>
<td>Mining deductions of 25%</td>
</tr>
<tr>
<td>Farm improvements</td>
<td>Farm improvement allowance of 100%</td>
</tr>
<tr>
<td>Construction and improvement of commercial and industrial buildings by person approved under the ZDA Act (see the Tax credits and incentives section)</td>
<td>Improvement allowance of 100%</td>
</tr>
</tbody>
</table>

* For industrial buildings, the investment allowance and the initial allowance can both be claimed in the year in which the building is put into use, together with the wear and tear allowance for that year.

**Goodwill**

Goodwill is not deductible as it is a capital expense.

**Start-up expenses**

A deduction is allowed for preliminary business expenses in the charge year in which that business commences, provided that the expenditure was incurred within 18 months before the commencement and provided that the expense would have been deductible if it had been incurred after the commencement.

There are special rules for prospecting expenditure in an area in Zambia over which a mining right has been granted. These enable the shareholders of the company undertaking the prospecting to claim a deduction for the prospecting expenditure, provided certain conditions are met.

**Interest expenses**

Interest expenses are deductible, provided that the loan or advance was obtained for capital employed wholly and exclusively for business purposes (or in the production of another source of income).

Note, however, that incidental costs of obtaining finance, such as commitment and guarantee fees and any other incidental costs of a similar nature, are not deductible.

**Bad debt**

A specific bad debt is deductible if it can be proved that it is bad or likely to become bad.

No deduction is allowed for impairment provisions/bad debt incurred by banks and financial institutions for debts that are secured against collateral.

**Charitable contributions**

A payment to a public benefit organisation that is approved by the Zambian government or owned by the Zambian government is deductible.
Zambia

**Pension expenses**
Payments made by an employer by way of a contribution to an approved fund established for the benefit of employees are deductible. Note that special rules apply for the deductibility of lump sum payments and payments in arrears. Payments to non-approved pension funds are not deductible.

**Payments to directors**
Payments to directors are deductible, provided they are incurred wholly and exclusively for the purposes of a business (or other source of income). A payment could, however, be disallowed if it is deemed to be merely a domestic or personal expense.

**Research and development (R&D) expenses**
All revenue expenditure on experiments or research relating to a business is deductible. A deduction against business income is also allowed for a contribution to a scientific or educational society or institution, which is required to be used solely for industrial research or scientific experimental work connected with the business. However, capital expenditure on research is disallowed unless it qualifies for capital allowances.

**Bribes, kickbacks, and illegal payments**
Bribes, kickbacks, and illegal payments would normally be disallowed on the basis that they are not wholly and exclusively for the purposes of a business.

**Fines and penalties**
A penalty arising under the Income Tax Act is specifically disallowed. Other fines and penalties may be disallowed on the basis that they are not wholly and exclusively for the purposes of a business.

**Taxes**
Zambian CIT is not deductible. Other tax liabilities suffered should be deductible, provided they are revenue expenses and wholly and exclusively incurred for the purposes of the business (or other source of income). See the Tax credits and incentives section regarding credits for non-Zambian tax suffered on non-Zambian source income.

**Other significant items**
Other specific rules concerning expenses considered to be allowable include the following:

- Deductions for costs of an employer to establish and administer an approved share option scheme.
- Deductions for technical education.
- Deductions for Mineral Royalty Tax payments.
- A fixed deduction of ZMW 100,000 for employing a person with a disability.

Other items specifically disallowed include the following:

- A loss or expense that is recoverable under an insurance contract or indemnity.
- Expenditure on the provision of entertainment, hospitality, or gifts.

Benefits provided that are incapable of being turned into money or money’s worth (e.g., the use of cars and accommodation provided by the employer) give rise to taxable business income of the employer.

Note that special rules apply for determining the gains or profits of an insurance business.

**Net operating losses**
Losses can be carried forward to set against profits of the same source. Normally, losses are available to carry forward for a period of five years after the charge year in which the
loss was incurred. In the case of a person carrying on a mining operation or hydro, wind, solar, and thermo power generation, the loss carryforward period is ten years.

A loss incurred by a person in a charge year from mining operations shall be deducted from 50% of the income of the person from the mining operation. This was previously allowed to be deducted against 100% of the income until 1 July 2015.

There is no ability to carry back losses.

Losses arising from one source cannot be set against income arising from another source.

**Payments to foreign affiliates**

Certain ‘loans to effective shareholders’ may give rise to CIT liabilities. Note that transfer pricing rules may also apply (see Transfer pricing in the Group taxation section).

**Group taxation**

There are no special CIT rules for groups of companies. Accordingly, CIT returns cannot be prepared on a consolidated basis for group purposes. Losses arising in one group company cannot be set against profits of another group company.

**Transfer pricing**

Transfer pricing rules apply to transactions between associated persons and require that transactions are undertaken on an arm’s-length basis. Otherwise, the associated person benefiting from a reduction in income as a consequence of any non-arm’s-length terms will have its CIT computation adjusted as if the transactions had been undertaken on an arm’s-length basis.

OECD transfer pricing guidelines are generally accepted as the appropriate basis to determine arm’s-length terms.

**Thin capitalisation**

There are specific thin capitalisation rules. These relate to the issue of securities to an associated person, which require that the transaction is undertaken at an arm’s-length rate by reference to:

- the appropriate level or extent of the issuing company’s overall indebtedness
- whether the amount issued would have been provided as a loan on an arm’s-length basis, and
- the rate of interest and other terms that would apply to such an arm’s-length loan.

The debt-to-equity ratio of the borrowing party is an important test to determine whether there should be a thin capitalisation restriction. However, there is no defined debt-to-equity ratio in legislation or published guidance. This should be determined by reference to normal practice that would be adopted by two independent parties on the open market with respect to the particular situation.

An exception applies to a company carrying on mining operations. In this case, the mining company’s interest expense is restricted to the extent that its loans, in aggregate, exceed a 3:1 debt-to-equity ratio. For mining companies only, this thin capitalisation restriction applies to interest payable to both connected and unconnected parties.

**Controlled foreign companies (CFCs)**

Zambia does not have a CFC regime.
**Tax credits and incentives**

The ZDA Act 2006 offers a range of tax incentives in the form of allowances, exemptions, and concessions for companies making investment in Zambia that meet certain criteria.

The fiscal benefits arising from qualifying investment licenses are as follows:

- **0% CIT for five years from the date of commencement of operations.**
- **0% tax on dividends for a period of five years starting from the date of commencement of operations.**

**Foreign tax credit**

Domestic legislation provides that, where a DTT is in force and the other territory has taxing rights to a source of foreign income, a tax credit will be available to reduce the Zambian tax liability by the amount of non-Zambian tax suffered.

Where income is received from a source where there is no applicable DTT, unilateral relief should be available to offset foreign tax against Zambian tax arising on the foreign income.

In the case of both treaty relief and unilateral relief, the tax credit cannot exceed the amount of Zambian tax arising on the foreign income before the reduction.

**Withholding taxes**

Payments of the following items of Zambian-source income may be subject to WHT. The relevant rates under domestic legislation are as follows:

<table>
<thead>
<tr>
<th>Category of payment</th>
<th>Rate on payment to Zambian resident (%)</th>
<th>Rate on payment to non-Zambian resident (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>
<td>15 (1)</td>
<td>15 (1)</td>
</tr>
<tr>
<td>Interest</td>
<td>15</td>
<td></td>
</tr>
<tr>
<td>Interest from a Lusaka Stock Exchange listed Property Loan Stock Company</td>

<tr>
<td>Construction and haulage contractors</td>
<td>0</td>
<td>20</td>
</tr>
<tr>
<td>Public entertainment fees to entertainers/sports persons</td>
<td>0</td>
<td>20</td>
</tr>
</tbody>
</table>

**Notes**

1. 0% if paid by a mining company.
2. 15% if paid by a mining company to its shareholders.
3. 0% rate only applies on dividends paid by companies listed on the Lusaka Stock Exchange to individual shareholders; otherwise, the normal 15% rate applies.

The WHT liability arises by reference to the date of payment or, if earlier, the date of accrual (i.e. the date the recipient has a legal right to claim the payment). WHT is due to be paid within 14 days of the month of this date.

Zambia has DTTs in force with the following territories, which generally provide reduced rates of WHT as follows:
<table>
<thead>
<tr>
<th>Recipient</th>
<th>Dividends (%)</th>
<th>Interest (%)</th>
<th>Royalties (%)</th>
</tr>

Notes

1. The non-resident recipient must own at least 25% of the share capital of the capital of the Zambian company.
2. The revised Zambia-Netherlands treaty was signed on 15 July 2015 but is not yet in force. This lower rate applies if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends, or if the beneficial owner is a pension fund.
3. These old treaties do not follow the OECD model, and, accordingly, their application to particular circumstances must be confirmed.
4. This lower rate applies to the treaty that was signed between the two states, which entered into force effective 1 January 2016.
5. The rate of 8% shall apply in the case of payment of royalties in respect of any copyright of scientific work, patent, trade mark, design or model, plan, secret formula or process, or information concerning industrial, commercial, or scientific experience.
6. The lower rate applies to the treaty that was signed between the two states in July 2015; the status of which is still pending.
7. The lower rate applies to the treaty that was signed between the two states in December 2015; the status of which is still pending.
8. This rate applies where the dividends are paid out of income (including gains) derived directly or indirectly from immovable property within the meaning of Article 6 of the treaty.

In all cases, advance clearance must be obtained to obtain the treaty benefit and take advantage of any reduced rate of WHT or tax exemption.

It may be possible to obtain confirmation that management and consultancy fees can be paid without deduction of WHT by reference to the provisions of the relevant treaty. For treaties following the OECD model, the article concerning 'Income Not Expressly Mentioned' is generally taken to be relevant.
Zambia

**Tax administration**

**Taxable period**

CIT is determined by reference to a charge year, being the period of 12 months ending on 31 December.

**Tax returns and payment of tax**

The CIT rules require the submission of a quarterly provisional tax return and the quarterly payments of tax for each tax charge year. The provisional returns and provisional tax payments must be based on an estimate of taxable income for the current charge year.

The quarterly returns and tax payments for the 2016 tax charge year are due as follows:

- 1st quarter return due 31 March 2016 (or 5 March 2016 if submitted manually).
- 2nd quarter return due on 30 June 2016.
- 3rd quarter return due on 30 September 2016.
- 4th quarter return due on 31 December 2016.

By concession, the ZRA allows a 14 day grace period for the payment of taxes. Accordingly, each quarterly payment can be made on the 14th of the month following the end of each quarter.

The final tax return needs to be submitted by 30 June following the end of the tax year in the case of an electronic return. This must be accompanied by any balance of tax that remains unpaid. For example, the final tax return for the 2015 tax charge year must be submitted by 30 June 2016.

In the case of a manually filed tax return, the tax return needs to be submitted by 5 June following the end of the tax year. For example, the final tax return for the 2015 charge year, if submitted manually, must be submitted by 5 June 2016.

**Tax audit process**

The Commissioner General of the ZRA has wide powers to require any person to attend to be examined at a time and place specified by notice, where it is determined that person is able to impart information necessary for the purposes of the Income Tax Act.

Furthermore, the Income Tax Act empowers the Commissioner General of the ZRA to access any type of information required for tax purposes held by legal practitioners, accountants, and financial institutions.

**Statute of limitations**

Save for cases of fraud or wilful deceit, no assessment can be made for any charge year after six years from the end of the charge year.

**Topics of focus for tax authorities**

The ZRA is devoting a significant amount of time to transfer pricing, and this is expected to be an increasing focus of scrutiny.

**Other issues**

**Advanced income tax**

Advanced income tax may apply at 6% on the value of commercial imports. This can be credited against the importer’s CIT liabilities on submission of the annual tax return.
Exchange controls
The exchange monitoring regulations and local currency regulations in Zambia were abolished in March 2014.

Previously, there had been regulations that were imposed by the Bank of Zambia requiring that transactions in foreign currency had to be monitored under an electronic reporting system.

Choice of business entity
A non-Zambian resident company can establish a Zambian business as either a branch or a foreign company subsidiary (i.e. a Zambian registered limited liability company).

Adoption of IFRS
Zambia has adopted IFRS and this forms the basis of CIT computations (subject to adjustment for tax rules as noted throughout this summary).
Significant developments

Nothing has as yet been published, but the government is seriously considering the introduction of Special Economic Zones in the near future (likely to be effective 1 January 2017).

The laws covering transfer pricing have been expanded to cater for the inclusion of Organisation for Economic Co-operation and Development (OECD), as well as United Nations (UN), guidelines.

Taxes on corporate income

The corporate income tax (CIT) rate for companies (other than mining companies with special mining leases, but including branches) continues unchanged at 25.75%. This rate includes a base rate of 25% plus a 3% AIDS levy.

Zimbabwe presently operates on a source-based tax system. This means that income from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe unless a specific exemption is available. The specific circumstances of a transaction should always be considered to determine whether the transaction gives rise to taxation in Zimbabwe.

Income earned by foreign companies from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe. In such a case, one should determine whether the foreign entity is obligated to register a local entity. A company is required to register a branch if it has established a place of business or is otherwise considered to be trading in Zimbabwe. A local subsidiary company may be registered as an alternative to a branch operation.

Non-residents who do not have a place of business in Zimbabwe may, however, be subject to withholding tax (WHT). See the Withholding taxes section for additional details.

Local income taxes

There are no local income taxes payable in Zimbabwe.

Corporate residence

Currently, the Zimbabwean tax system is based on source and not on residency. Zimbabwe is moving towards a residence-based taxation system, but the details are still to be announced. Income derived, or deemed to be derived, from sources within Zimbabwe is subject to tax. Under the proposed new legislation, the place of effective management concept may be used for a residence-based tax. Note that this new Income Tax Act is still being drafted, and there is no certainty as to when it will become law.
Source is the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Zimbabwe, the source of income is deemed to arise in Zimbabwe, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Zimbabwe may, in the hands of a domestic company, be deemed to arise in Zimbabwe and be taxed as such. Examples include interest and certain copyright royalties arising outside Zimbabwe. Where the income is deemed to be from Zimbabwe, relief of the foreign tax suffered, up to a maximum of the Zimbabwe tax, may be allowed as a tax credit.

**Permanent establishment (PE)**

In the event that Zimbabwe has entered into a double taxation agreement (DTA) with the country where the foreign company resides, the entity will only be taxable in Zimbabwe if it operates through a PE, which, in most cases, includes a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered. If a PE exists, only the portion of the income attributable to the PE will be subject to tax in Zimbabwe.

Otherwise, and except for the PE concept embodied in the tax treaties, corporate residence is of little tax significance (i.e. there is no legislation in the Zimbabwe Income Tax Act [Act] that deals with the term ‘permanent establishment’).

---

**Other taxes**

**Value-added tax (VAT)**

VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions. Advice on VAT implications of specific transactions related to corporate operations should be obtained prior to execution of transactions.

VAT is levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Zimbabwe that involves the supply of goods or services for consideration.

VAT is payable on all imports for local consumption into Zimbabwe, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state, goods of which the local supply is zero-rated). Import VAT is payable on the import value plus the applicable customs duty.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard-rated and zero-rated supplies) exceed 60,000 United States dollars (USD) in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may only be deducted as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

VAT returns are due by the 25th day following the month to which the VAT relates.

It is mandatory for all registered taxpayers (i.e. everyone that has a tax Business Partner Number) to use electronic fiscal registers (EFRs) that can be linked to the Zimbabwe
Zimbabwe

Revenue Authority (ZIMRA). Penalties of up to USD 25 per day per point of sale may be imposed.

**Customs duties**
Zimbabwe is a member of the Southern African Development Community (SADC) as well as the Common Market for Eastern and Southern Africa (COMESA). Customs duties are payable according to the general customs tariffs that are legislated for in Zimbabwe. Preferential duty rates apply on imports from SADC or COMESA countries, while goods may be imported free of customs duties from Namibia in terms of the Zimbabwe-Namibia Free Trade Agreement.

25% surtaxes have been imposed on a number of imported goods (including footwear, clothing, and certain foodstuffs) in order to protect the local manufacturing sector.

A security deposit is required by Customs on all temporary importations of equipment to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs’ bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

**Excise duties**
Excise duties are levied on local production of excisable products and are included on most excisable products imported from other countries. Examples of the excise products and applicable rates include the following:

- Cigarettes: 40% + USD 7 per 1,000 sticks.
- Spirits: USD 2 per litre.
- Wine: USD 0.50 per litre.

Excise and fuel levies are also levied on petrol, diesel, and illuminating kerosene.

**Property taxes**
Property taxes are levied by cities, towns, and rural councils. Each of these bodies conducts periodic valuations of the properties in their area and annually set out a ‘rates schedule’ based on a percentage of the valuations. These may alter each year depending upon the entities budgetary requirements for funds. Valuations of the properties are usually based on estimates as there are very few qualified property valuators operating in Zimbabwe at present.

**Transfer duty**
Transfer duty is payable on the acquisition value of property purchased at the following rates:

<table>
<thead>
<tr>
<th>Value of the property (USD)</th>
<th>Rate of transfer duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 5,000</td>
<td>USD 400</td>
</tr>
<tr>
<td>5,001 to 20,000</td>
<td>2% of the value above USD 5,000</td>
</tr>
<tr>
<td>20,001 to 50,000</td>
<td>3% of the value above USD 20,000</td>
</tr>
<tr>
<td>50,001 and above</td>
<td>4% of the value above USD 50,000</td>
</tr>
</tbody>
</table>

Transfer duty is normally payable by the buyer, but the agreement for the sale of the property will determine the person liable to pay these costs. In addition, conveyance costs of up to 4% (plus 15% VAT) must be added on.
Stamp duty
Certain transactions may attract stamp duty. The amount of stamp duty payable will differ and will be based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

<table>
<thead>
<tr>
<th>Transaction</th>
<th>Stamp duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bonds</td>
<td>0.4% (USD 0.40 for every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes - purchase of securities</td>
<td>0.25% (USD 0.25 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes - purchase/sale of any movable property other than a security</td>
<td>0.10% (USD 0.10 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes - purchase/sale of any immovable property</td>
<td>1% (USD 1.00 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Off market share transfer instruments</td>
<td>2% or USD 2</td>
</tr>
<tr>
<td>Cheques</td>
<td>0.05% (USD 0.05)</td>
</tr>
</tbody>
</table>

Tax advice should be obtained for major transactions in respect of the transactions mentioned above in order to ensure that the correct stamp duty implications are considered.

Capital gains tax
It should be noted that capital gains tax is payable in Zimbabwe on the disposal of immovable property or shares that are held in listed (on the Zimbabwean Stock Exchange) or unlisted companies at the following rates:

Acquired pre-February 2009

- Listed securities: 1% of proceeds.
- Property: 5% of proceeds.
- Unlisted securities: 5% of proceeds.

Acquired post-February 2009

- Listed securities: 1% of proceeds.
- Property: 20% of capital gain.
- Unlisted securities: 20% of capital gain.

Payroll taxes
Zimbabwe operates a pay-as-you-earn (PAYE) system that is called the ‘Final Deduction System’ (FDS). This is based on the presumption that all employers must register for PAYE (both local and foreign-based employers), and that they are responsible for calculating, collecting, and paying the correct amount of PAYE every month to ZIMRA. Tax audits are carried out periodically (every year or two) to test the payroll systems.

The full burden of collecting the correct tax is placed on the employer, and, because of this, there is no requirement for employees to file annual tax returns in respect of employment income.

Social security contributions
Zimbabwe has a limited social security system. The National Social Security Scheme (NSSS) contributions are payable at the same rate of 3.5% of basic salary by the employer and employee, with a salary cap set at USD 700 per month.

Manpower training levy
Subject to some exceptions, employers are required to pay a 1% monthly training levy (on the gross wage bill) to the Zimbabwe Manpower Development Authority.
Zimbabwe

**Workmen’s compensation**
Under the Workmen’s Compensation Act, employers are required to contribute to a fund that provides cash benefits for industrial injury, disability, and death. Contribution rates are supposed to vary according to inherent occupational risk, from less than 2% in most low-risk commercial/administrative occupations to 11% for high-risk sectors.

**Standards Development Fund**
With a few exceptions, employers are required to pay 0.5% of their quarterly gross wage bill to the Standards Development Fund. The amount is payable on all payments made by the employer on behalf of the employee, including medical aid and pension contributions.

**Branch income**
Branch income that is received or has accrued from a source within, or deemed to be within, Zimbabwe is taxable in Zimbabwe in terms of the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may therefore not deduct fees paid to its foreign head office (unless a tax treaty makes provision for such deduction) as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

A 15% WHT is imposed on any payments made in respect of head office charges.

The amount of fees charged by the head office to the Zimbabwe branch is also subject to a limitation, usually based on a maximum of 1% of total expenditure (excluding the charge itself and any capital allowances). Exchange control regulations also limit the remittability of administration and management fees to 2% of turnover.

Note that the move from a source-based system to a residence-based system may affect the level of profits that are attributed to Zimbabwe. These laws are still pending, and no date of implementation has been given.

**Income determination**
The Act tax base for CIT is taxable income rather than profits. The source and nature of the income determines whether the amount is taxable or not. In addition to amounts received or accrued from actual Zimbabwean sources, there are deeming provisions that bring income from foreign sources into Zimbabwean taxable income.

In general, all receipts from a Zimbabwe source are taxed, excluding amounts that are proven by the taxpayer as being capital receipts. Most expenditure items and some specified exemptions are deductible against income. Capital expenditure is generally not deductible, with amounts on specific items being deductible by way of annual allowances spread over a period.

**Inventory valuation**
The legislation permits three methods of inventory valuation: historic cost, cost of replacement, or net realisable value. Standard cost based on first in first out (FIFO) is normally used for accounts valuations and is an accepted basis for tax purposes. Last in first out (LIFO) is not permitted for tax or for accounting purposes. The tax valuation may differ from the accounting valuation; this is a rare occurrence in Zimbabwe but is acceptable.

**Capital gains**
See Capital gains tax in the Other taxes section.
Dividend income
Dividends received from Zimbabwe incorporated companies are tax exempt. When received from non-Zimbabwe companies, they are taxed at a flat rate of 20%; however, relief is granted by allowing any foreign tax suffered as a tax credit (up to a maximum of the 20% local rate of tax).

Interest income
Interest accruing to Zimbabwe resident companies from ‘financial institutions’ is subject to a 15% WHT and thereafter is exempt from CIT (the WHT becomes a final tax). Interest from other local or foreign sources is included in gross income and is taxed at the normal CIT rate. Relief will be granted for any foreign tax paid, up to the maximum Zimbabwe tax rate.

Partnership income
The partnership itself is not taxed directly; however, the taxable income of the partnership is calculated in the same way as corporate income and is then allocated amongst the partners in accordance to their agreed profit sharing ratios. This income is taxed in their hands at the basic CIT rate.

Rent/royalties income
Rents and royalties are generally treated as normal taxable income and are taxed at the basic CIT rate. Rent arising in respect of land and buildings situated outside of Zimbabwe, however, is exempt from local tax.

Foreign income
Where income (including business profits) is deemed to be from a Zimbabwe source, it will form a part of the local company’s taxable income and will be subject to tax at the basic CIT rate. Relief in respect of foreign taxes suffered will be granted unless it is clear that the true source of the income is, in fact, Zimbabwe.

Deductions
The Act makes provisions for specific deductions. Some of the deductions (e.g. the deduction of foreign exchange losses, development and exploration costs, hire purchase allowances, and manufacturing allowances) can be more complex.

Capital allowances
The cost (including finance charges) of machinery, implements, and other articles used by the taxpayer in the production of income is deductible in four equal annual allowances. No apportionment is required where the asset was held for less than 12 months.

Industrial buildings (including hotels) constructed and used by the taxpayer in the production of income qualify for an initial allowance of 25% of construction cost in the year they enter service. Thereafter, an annual allowance of 25% is deductible for each year following the year of construction. Additions to existing buildings (not alterations or repairs) qualify for the same deductions. It is important to note that the allowance is calculated on the cost of construction and not the cost of acquisition. In the latter case, the allowances are set at 5% of the cost.

A mining exploration expenditure incurred before commencement of production is deductible in full in the first year of production against income derived from the mine. Subsequent development expenditure is presently written off in the year expended.

Capital allowances may also be deducted with respect to leasehold improvements.

A recovery or recoupment of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recouped by way of disposal. The recoupment is calculated on the capital allowances previously granted.
Zimbabwe

**Goodwill**
Goodwill is currently not deductible for tax purposes in Zimbabwe.

**Start-up expenses**
Start-up expenses may be deducted if incurred within 18 months of commencement of business and not considered to be capital in nature.

**Interest expenses**
Zimbabwe has thin capitalisation rules based on a 3:1 debt-to-equity ratio. A portion of the overall interest may be disallowed if this ratio is exceeded.

**Bad debt**
Bad debts written off may be claimed, but not a provision for bad debts.

**Charitable contributions**
Donations (with varying maximum limits) made to specified charities and educational bodies may be claimed.

**Entertainment expenses**
Entertainment expenses are not deductible for tax purposes.

**Fines and penalties**
Fines and penalties are not deductible for tax purposes.

**Taxes**
Taxes are generally not allowed as a deduction against income unless they form a part of a cost of an allowable expense (e.g. VAT incurred on an expense line that may not be claimed as input tax).

**Net operating losses**
Assessed tax losses may be carried forward (but not backwards) for up to six years, provided the company continues to trade. This restriction does not apply to mining companies. Tax laws do not allow for losses to be transferred to other group companies, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

Assessed losses are reduced in the event of a compromise agreement with creditors.

**Payments to foreign affiliates**
The law prohibits the deduction of amounts incurred in excess of specified limits in respect of management and general administration expenses, as well as interest. This applies to branches or subsidiaries of both local and foreign companies.

The limit on management and general administration expenses is based on such expenses exceeding 1% and 0.75%, respectively, for a company already in production and prior to production of total tax-deductible expenses.

**Group taxation**
No taxation of combined operations is allowed in Zimbabwe, including where operations are conducted by more than one company.

**Transfer pricing**
Effective 1 January 2014, transfer pricing legislation was introduced under a provision titled 'tax avoidance'. This legislation does not detail any parameters or requirements that corporations should follow, nor has ZIMRA issued any practice notes.
This legislation was enhanced with effect from 1 January 2016 to enable the use of the OECD and UN guidelines in respect of cross-border transactions.

It is important to note that, in addition to cross-border transactions between connected persons being examined, the law also covers internal (domestic) transactions between connected persons.

**Thin capitalisation**
The limit on the deductibility of interest is based on a company incurring interest charged by a subsidiary, a fellow subsidiary, or a holding company when the debt-to-equity ratio exceeds 3:1.

**Controlled foreign companies (CFCs)**
Zimbabwe currently has no CFC rules.

---

**Tax credits and incentives**
It has been announced by the Minister of Finance that Zimbabwe is moving away from taxation incentives; however, the following are still available.

Note that this is a high-level summary, and certain conditions should be met in order to utilise these incentives.

<table>
<thead>
<tr>
<th>Person for whom incentive is available and duration of incentive</th>
<th>Tax incentive</th>
<th>Tax treatment for normal taxpayers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Taxpayers operating at designated growth point areas.</td>

<td>Taxed at 25%.</td>
</tr>
</tbody>
</table>

**Foreign tax credit**
Where foreign income is taxed in Zimbabwe, a tax credit (limited to the amount of local tax suffered) will be set off against the local tax liability.
**Withholding taxes**

WHTs are applicable where dividends and royalties or similar payments are declared or distributed to non-Zimbabwean residents (and Zimbabwean residents in some instances).

**Dividends**

Dividends declared by a Zimbabwean company to a non-resident holding company will be subject to non-resident shareholders tax (NRST), a WHT. NRST is payable at a rate of 15% unless treaty relief is available. Dividends from companies listed on the Zimbabwe Stock Exchange have a rate of 10%. NRST is payable within ten days after declaration of the dividend.

**Interest**

WHT of 15%, calculated on the gross amount of interest, is payable on interest accruing to any person resident in Zimbabwe. This applies to interest arising from a registered banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Non-resident investors, however, are currently exempt from any WHT on interest.

**Royalties or similar payments**

WHT on royalties are payable once a Zimbabwean company pays a royalty to a non-Zimbabwean resident. WHT is levied at a rate of 15% and is payable within ten days of the date of payment. The WHT falls due upon accrual (i.e. when payable), and actual payment is not a factor.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula or process, or any other property or right of a similar nature. It also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Zimbabwe. The nature of the amount payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty.

**Fees**

Fees are defined to include amounts that are technical, managerial, administrative, or consultative in nature; costs are paid externally. There are some exceptions, but the definition is broad and brings in most costs that may be charged to a Zimbabwean person.

WHT is levied at a rate of 15% and is payable within ten days of the date of payment.

**Summary of WHT payable**

The non-residents WHT rates and treaty relief for Zimbabwean DTAs can be summarised as follows. It should be noted that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, interest, and royalties in the various treaties should also be considered.

<table>

* Applies to unlisted companies. The rate for companies listed on the Zimbabwe Stock Exchange is reduced to 10%.

‘N/A’ means that the provisions of the tax treaty limited the rate to a rate that is higher than the local Zimbabwean rate. It should be noted that a treaty can only provide tax relief and cannot impose a higher tax rate.

These are payable within ten days of the date of distribution or accrual.

Zimbabwe has either negotiated, or is currently negotiating, tax treaties with the following countries:

- Botswana
- Democratic Republic of the Congo
- Indonesia
- Iran
- Jamaica
- Namibia
- Serbia and Montenegro
- Seychelles
- South Africa
- Tanzania
- Tunisia
- Zambia

**Tax administration**

**Taxable period**

The tax year-end is 31 December each year. Applications may be made for a different year-end if good reasons are given (e.g. to comply with the international group year-end). In the first year of trade, a longer or shorter period than 12 months may be accepted to tie in with a future year-end.

**Tax returns**

The CIT return is due by 30 April in the following tax year.

**Payment of tax**

Zimbabwe regulates the payment of CIT on four dates during the course of the current tax year; these are referred to as Quarterly Payment Dates (QPDs). The first payment of 10% is due by 25 March of the respective tax year. The second payment of 25% is due by 25 June of the respective tax year. The third payment of 30% is due by 25 September of the respective tax year. The fourth payment of 35% is due by 20 December of the respective tax year.

All taxes are expected to have been paid by the 25th day of December. If there is an adjustment after the year-end accounts have been finalised, a top-up payment must be made. There is no set date for this. However, in practice, this payment should not be more than 10% of the annual tax liability. ZIMRA often imposes a 10% per annum interest charge on any underpayments of QPDs.

WHT payments are due within ten days from the date of distribution or accrual.

**Tax audit process**

Tax audits do not, at present, have a set cycle; however, the aim is to establish a three-year cycle in the future.
Zimbabwe

Statute of limitations
The statute of limitations is generally three years unless ZIMRA considers that there is fraud or misrepresentation involved. In those circumstances, there is no set limit on how far back ZIMRA can go, but they usually do not go beyond six years in practice.

Topics of focus for tax authorities
ZIMRA is focused on ensuring that all compliance issues are in order and that VAT and payroll taxes have been correctly calculated.

Anti-avoidance
Current Zimbabwe legislation contains basic anti-avoidance sections that empower the Commissioner General to disregard the implications of a transaction or scheme if it can be proven that:

- such a transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Act
- it was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, or
- it has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question.

The Commissioner General may, at the Commissioner General’s sole discretion, impose this legislation on any transaction or scheme, which will place the burden of proof on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

Note that the anti-avoidance sections have been amended to include transfer pricing legislation effective from 1 January 2014 (see Transfer pricing in the Group taxation section).

Other issues
Exchange control
Zimbabwe has been operating a multi-currency system since February 2009. The Zimbabwe dollar (ZWD) was demonetarised effective April 2009. This has had a significant impact on the country’s exchange control regulations.

The Exchange Control Handbook in Zimbabwe is not available to the public; only banking institutions have access to these regulations.

Transactions that involve the transfer of funds to countries outside Zimbabwe are generally subject to bank approval.

The issue of shares in a Zimbabwe company to persons residing outside of Zimbabwe requires specific exchange control approvals. A limit of 49% is available for non-residents. A 51% local shareholding by indigenous persons is a requirement. Applications may be made for increased levels; each case will be decided on its own merits.

With offices in 157 countries and more than 41,000 people, we are the first choice tax provider globally. The strength of the PwC network, combined with the depth and breadth of our services, gives us a leading position in the professional services marketplace.

As tax codes become increasingly complex and the related risks become more challenging to manage, we help our clients to:

- understand and comply with their legal and regulatory obligations for taxation
- plan their affairs so as to be tax efficient in the business or other financial decisions they make
- understand the tax risks they face and the effectiveness of their organisation’s internal controls relating to tax, and
- resolve tax disputes through domestic law and/or treaty-based dispute resolution mechanisms.

1 Senior tax buyers name PwC as their first choice tax provider globally. These results are based on an independent survey of 4,335 primary buyers of tax services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).
The advice we provide to clients is based on our Global Tax Code of Conduct (www.pwc.com/taxcodeofconduct). In particular, we apply the following principles:

1. Tax advice that results in positions taken in a client’s tax return must be supported by a credible basis in tax law.

2. No tax advice relies for its effectiveness on any tax authority having less than the relevant facts. Advice that a PwC firm gives includes consideration of, and is based on the assumption that the client will make, relevant disclosures that both comply with the law and enable tax authorities to make further enquiries should they wish to do so.

3. Tax advice is given in the context of the specific facts and circumstances as provided by the client concerned and is appropriate to those facts and circumstances.

4. Tax advice involves discussion of the wider considerations involved, as appropriate in the circumstances, including economic, commercial, and reputational risks and consequences arising from the way stakeholders might view a particular course of action.

5. PwC firms advise clients of appropriate options available to them under the law having regard to all of the principles contained in this code.

We expect all of our people to apply these principles to the way they work, and we encourage them to consult whenever they are in doubt.

We take pride in our role as an essential and productive part of global tax administration and compliance. Our policy specialists advise regulators, governments, corporations, and supra-national bodies worldwide on the technical and practical aspects of developing and implementing tax policy initiatives.
To give the best advice on indirect taxation, we believe you need to work closely with the people devising it. At PwC, we do this. We have a thorough knowledge of indirect taxes from every perspective – we appreciate that indirect taxes can be very different depending on which industry sector you work in. Across the world, our indirect tax and customs specialists work closely with PwC industry specialists to really understand the specific issues in your sector, and give you advice with genuine insight. And because the implications of indirect taxes can be so important to your business, we customise the support we give you, and use the latest technology, to provide you with what you need, wherever you are and whenever you need us. We can assist you with strategy, risk, process, and margin improvement.

If you’re operating across borders or competing in multiple jurisdictions, complying with local tax laws, reporting requirements and statutory filings – not to mention staying on top of new legislative developments – is more than a full-time job for your tax department.

But compliance is only half of the equation. In a world of intensified global competition, the key to business success is keeping your tax strategy agile and aligned with your corporate strategy – while keeping an eye on your worldwide effective tax rate.

PwC’s leading international tax professionals have the resources, experience and local competencies to help companies like yours address your cross-border needs. With our legal, transfer pricing, tax controversy, and indirect tax teams, we are superbly qualified to assist you with all aspects of your international taxation needs. In addition, our geographic networks, such as our EU Direct Tax Group, Latin American Tax Group, and International Tax Desks, can provide you with the up-to-date analytical tax insight you need to achieve your business goals, both locally and globally.

We understand that one size doesn’t fit all when it comes to legal services. With over 2,600 corporate lawyers in 85 countries, we’re able to tackle problems in a way that is genuinely specific to your business. As well as specialist legal advice, we also offer day-to-day general counsel support. We support businesses with teams drawn from the range of skills within the PwC global network. Depending on your legal issues, we might include tax advisers, human capital consultants, corporate finance specialists, actuaries, management consultants, or accountants. We’ll put together whatever it takes to give you a creative solution in the least possible time.

Mergers and Acquisitions

An international network of almost 1,200 specialists, experienced in every type of transaction

Global Leader, Mergers and Acquisitions
Mark Boyer
PwC US
+1 202 414 1629
mark.boyer@us.pwc.com

Whether you’re buying, selling, or merging, it is important to manage risk with tax due diligence and to increase tax efficiencies with deal structuring, thereby maximising value associated with a transaction. With a leading international network of 1,200 Mergers and Acquisitions (M&A) specialists, experienced in every type of transaction, we know how to help you evaluate, structure, and finance the transaction to your best advantage. Our M&A Tax specialists support you through every stage of the deal continuum. They work closely with our transactions services, corporate finance, and legal teams, so that all aspects of the transaction are considered by experienced specialists.

3 Senior tax buyers name PwC as their first choice provider for mergers and acquisitions services globally. These results are based on an independent survey of 1,565 primary buyers of mergers and acquisitions tax services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

PwC’s Global People and Organisation practice brings together an unmatched combination of 10,000 people with industry, business, talent, strategy, HR, analytics, and technology expertise in one team across 138 countries. Together we build tailored people and organisation solutions to help our clients achieve their strategic ambitions - with a deep understanding of their uniqueness, and grounded in rigorous analysis and data-driven insight - to create lasting, differentiated value.

We help clients to implement organisational transformation, improve the effectiveness of their workforce, develop and move talent around their business, and manage their human capital risks. We work from people strategy through to organisational execution.

Tax Controversy and Dispute Resolution

We think being effective is about more than just knowledge; it’s about having an insight into what could happen next.

Global Leader, Tax Controversy and Dispute Resolution
David Swenson
PwC US
+1 202 414 4650
david.swenson@us.pwc.com

By giving you insight into your company’s risks and exposures across different territories and disciplines, we can be the effective option to help you deal with tax disputes, audits, and examinations, from prevention through to management and resolution. Our specialists also use their experience to help businesses put in place consistent and defensible practices and policies, so they know what to expect in the future. PwC’s leading Tax Controversy and Dispute Resolution network brings together former revenue authorities and government officials, accountants, economists, international tax litigators, and industry sector specialists, in all areas of direct and indirect tax, as well as customs duties, employment taxes, and tax fraud. We think being effective is about more than just knowledge; it’s about having an insight into what could happen next, so we build strong relationships with governments and policy makers worldwide. That way, we’re close to the people who are setting the dispute agenda, and know how to work with them to get the right results.

4 Senior tax buyers name PwC as their first choice provider for tax controversy and dispute resolution services globally. These results are based on an independent survey of 2,113 primary buyers of tax controversy and dispute resolution services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

Our leading Tax Policy and Administration network\(^5\) provides insight into today’s policy trends and issues worldwide. There are a number of elements to this, which include:

- helping our clients to understand and comply with their fiscal and regulatory obligations in relation to tax,
- helping our clients maximise value for all stakeholders over time on the basis of full disclosure and in compliance with our Global Tax Code of Conduct (www.pwc.com/taxcodeofconduct), being transparent about our role when dealing with stakeholders,
- using our knowledge and experience, without being paid by or representing clients, constructively to assist policy makers in both developed and developing countries improve the efficiency and effectiveness of their tax systems, and
- being seen as acting fairly, openly, and consistently with all stakeholders such that we are trusted by all parties.

For this purpose, ‘stakeholders’ include, as well as our clients, revenue authorities, governments, legislators, governmental departments and their officials, non-governmental organisations, supra-national bodies, regulators, the media, professional bodies, and trade associations.

Our specialist knowledge and expertise in these areas sits mainly with the members of our network and tax country leaders. For assistance in tax policy and administration matters, please do not hesitate to contact us.

---

\(^5\) Senior tax buyers name PwC as their first choice provider for tax strategy/policy advice globally. These results are based on an independent survey of 2,371 primary buyers of tax strategy/policy advice globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

www.pwc.com/taxsummaries  Global Tax Contacts  413
In a fast changing world, we’re helping clients build a tax function for the future. Our complete approach to tax management brings together tax function design, technology, and compliance delivery. By aligning your tax and tax technology strategies with your commercial goals, the tax function will become a strategic business asset, adding value across the organisation.

Understanding your organisation’s challenges, goals, and needs is just the start. Successful change will require re-engineering ‘end-to-end’ processes, not just the final outputs.

We can work with you to:

• Meet the challenges of complex multi-tax reporting and compliance obligations.
• Design and execute the right tax and tax technology strategies to manage tax risks in a rapidly changing and increasingly transparent global environment.
• Take full advantage of the opportunities presented by a technology and data-enabled world.

Transfer Pricing

Extensive experience in dealing with revenue authorities around the world

Global Leader, Transfer Pricing
Isabel Verlinden
PwC Belgium
+32 2 710 4422
isabel.verlinden@be.pwc.com

With over 3,100 transfer pricing professionals, including more than 300 partners, across 111 countries, we are the world’s leading transfer pricing adviser. Our professionals come from diverse backgrounds – including law, economics, business, accounting, engineering, and government – to provide balanced, interdisciplinary perspectives.

We adopt globally coordinated approaches with in-depth local knowledge to provide tailored transfer pricing solutions. From strategy to execution, we help you build up seamlessly compliant and sustainable transfer pricing infrastructure. Our technology solutions are proven to help you decrease the time spent on manual processes across the entire finance organization, mitigate enterprise risk, and enhance operational tax productivity.

With the international tax evolution around various global tax initiatives, we closely monitor tax developments around the world to provide practical insight to you.

Senior tax buyers name PwC as their first choice provider for transfer pricing services globally. These results are based on an independent survey of 2,561 primary buyers of transfer pricing tax services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

Companies need to transform how they operate, while creating the capacity to grow. PwC’s Value Chain Transformation (VCT) integrates our capabilities to evaluate company operating models to unlock levers that drive sustained performance. Effective and globally aligned operating, financial, legal, and tax platforms can result in sustainable benefits.

VCT helps you to align and optimise key elements to improve profitability, efficiency, controls, and visibility throughout the value chain. Our deep industry experience in key sectors and our international network of 500 cross-disciplinary VCT specialists allows us to manage the complexity involved in cross-border business transformation and help clients build the foundation for sustainable growth.

Worldwide Tax Summaries – Corporate Taxes 2016/17 represents the
combined efforts of more than 500 local PwC tax specialists in over 150
countries and territories. While too numerous to name individually, we thank
them for their efforts in preparing this guide.

To obtain regularly updated information on the corporate and individual
tax rules in operation in over 150 countries, please visit Worldwide Tax
Summaries Online at www.pwc.com/taxsummaries.

To download an eBook version of Worldwide Tax Summaries - Corporate Taxes
2016/17, please visit www.pwc.com/taxsummaries/ebook.

Prior-year editions of Worldwide Tax Summaries – Corporate Taxes (dating
back to 2010/11) are available in the Archives section on Worldwide Tax
Summaries Online.

To contact the editorial team, please email us at
worldwide.tax.summaries@us.pwc.com.
**Essential tax tools, on desktop and mobile**

**WWTS online**
The fully mobile online version of WWTS offers quick access to information about corporate and individual tax systems in over 150 countries, updated regularly by local PwC tax specialists.

- Fully responsive design that reshapes to fit any screen/device.
- Easy printing of an entire summary or printing of select topics across multiple countries.
- Real-time updates to the quick charts.
- Comparison of key data between two countries using the quick compare feature.

If you are responsible for managing taxes in a business that trades or operates across a number of different countries, you will recognise how much of a challenge it can be trying to keep on top of the corporate tax rates and rules in each of them, notwithstanding the fact that these frequently change.

Worldwide Tax Summaries – Corporate Taxes 2016/17 is a useful reference tool, to help you manage taxes around the world. It offers quick access to information about corporate tax systems in 155 countries worldwide, in an easily digestible format.

Written by local PwC1 tax specialists in each country, this guide covers recent changes in tax legislation as well as key information about income taxes, residency, income determination, deductions, group taxation, credits and incentives, withholding taxes, indirect taxes, and tax administration, up to date (unless otherwise stated) as of 1 June 2016. Also included is a global directory of PwC contacts organised by their tax speciality area.

Visit our mobile friendly online version, which is updated regularly throughout the year, at www.pwc.com/taxsummaries.

1 “PwC” is the brand under which member firms of PricewaterhouseCoopers International Limited (PwCIL) operate and provide services. Together, these firms form the PwC network. Each firm in the network is a separate legal entity and does not act as agent of PwCIL or any other member firm. PwCIL does not provide any services to clients. PwCIL is not responsible or liable for the acts or omissions of any of its member firms nor can it control the exercise of their professional judgment or bind them in any way.
