

Minimum system requirements for PwC's Academy Online Portal and running e-learning content.

To be able to use the PwC's Academy Online Portal and run the e-learning contents the below described technical parameters are required. In case you want to access the system through your company computer, it is possible that additional client-side settings may restrict running the online portal and/ or e-learning contents.

Operating system

- Microsoft Windows (XP and later versions)
- Linux (Ubuntu, Debian, Red Hat, CentOS)
- MacOS (Mavericks and later versions)

Browser

- Microsoft Edge for Windows 10
- Internet Explorer (IE) 11 and greater
- Latest Apple Safari
- Latest Mozilla Firefox
- Latest Google Chrome

It is required to allow the cookies and pop-up windows.

In case of a 32 bit operating system the browser should be a 32 bit version. In case of a 64 bit operating system the browser should be also in 64 bit version.

Acrobat Reader

8.0 or higher version is required to be able to read the PDF documents.

Firewall settings

Some parts of the course are available in swf format, which contains images (jpeg, png), multimedia (mp3, mp4) and text files (xml, xsd). The firewall and the browser shouldn't block the access of these type of files.

Other

Broadband internet connection is required (recommended: min 1-2 Mbps)
1024x768, 32 bit display resolution
