Central America, Panama and the Dominican Republic is an attractive region for investment, where its countries have for years excelled in various sectors such as financial services, information and communications technology, manufacturing and logistics, tourism, among others.

In recent years, the promotion of foreign investment has been one of the main objectives for the governments of Central America, Panama and the Dominican Republic. One of the policies that has seemed to be effective is tax benefits, which many countries in the region have extended in order to attract investment, making us a promising destination for foreign investment to be considered post-COVID-19.

While the U.S. has been the main source of foreign direct investment inflows to the region, other countries are increasing their attention to our region, investing in infrastructure projects that generate new jobs and create optimal conditions to accelerate an economic recovery after the global health crisis.

Our countries are becoming aware and unlocking their potential for sustainable growth and present opportunities for investment in the environment by taking responsibility for better and more efficient use and management of the region’s resources.

This guide is designed to provide the necessary information and direction on regulatory compliance issues and considerations for opening a new business, establishing a branch of a multinational company, or any other type of investment in the region.

We hope this Doing Business gives you the stimulus to build a successful business in this region filled with opportunities.

This publication is for general guidance only and should not be construed as professional advice. Should you require further information, our advisors will be happy to assist you on an individual basis.
Thank you very much for thinking of PwC Interaméricas and allowing us to guide your journey through Central America and the Dominican Republic.

It should be noted that this document was prepared as a general guide and that its content is subject to constant changes given the legal and economic environment of the different countries, so due to the complexity of some specific issues, we recommend you rely on the assistance and accompaniment of professionals from our team specialized in tax, legal and regulatory matters, who will gladly support you taking into consideration the specific circumstances and situations of the matter under study.
Guatemala

The former site of the ancient Mayan civilization, whose ruins may be seen in the jungles of Petén and the neighboring Yucatán peninsula of Mexico; Guatemala was conquered by Spaniards in 1524, under whose rule the capital city was eventually established at Antigua Guatemala.

It achieved a certain magnificence, and the major towns acquired some aspects of the Spanish culture, but the outlying areas were only slightly affected. When Antigua was razed by an earthquake in 1773, the capital was moved by royal order to the site of modern Guatemala City.

Guatemala became independent from Spain in 1821, as a republic. Following its independence, Guatemala was the political center of the Central American federation, comprising Costa Rica, El Salvador, Honduras, and Nicaragua which were united with Mexico for the following two years.
¿Why invest in Guatemala?
Why invest in Guatemala? (local development)
(source: Bank of Guatemala Ministry of Economy of Guatemala)

Several factors favor Guatemala as a destination for investors. The country contributes 40% of the region’s economic performance and, with 17 million inhabitants, stands out as the most important market in Central America. Entrepreneurial activity is a very important part of Guatemalan society and economy, where 50% of companies are founded by people under 35 years of age. The country also has a very young population, with half of all Guatemalans under the age of 25. Guatemala’s strategic geography also offers logistical access to the Pacific and Atlantic oceans, as well as free trade with the U.S. and Mexican economies. Guatemala is distinguished by its macroeconomic stability and very low public debt. The country has high international monetary reserves and a sound financial system. In addition, the country’s GDP has been growing steadily at around 3% over the last few years.

INVESTMENT DATA
According to BANGUAT data, foreign direct investment in Guatemala in 2019 totaled US$1.032 billion.

Attracting foreign investment and reinvestment is part of the Government’s strategy to reactivate Guatemala’s economy, which was affected by the coronavirus pandemic (COVID-19).

In this regard, the Ministry of Economy (Mineco) pointed out that foreign investment and reinvestment also translates into more jobs for Guatemalans.

For this reason, the portfolio has undertaken the task of promoting the country as a business attraction for foreign companies.

Advantages of investing in Guatemala
For the promotion of the country, Mineco has highlighted at least four advantages that the country offers to foreign investments. These are:

- geographic position with direct access to both the Pacific and Atlantic coasts of the United States
- proximity to the main U.S. logistics hub (two hours by air)
- The country ranks second in Central America in maritime cargo operations.
- Guatemala represents an alternative in protecting companies’ supply chains in light of the trade war between the United States and China.

These advantages are attractive for sectors with high growth potential such as pharmaceuticals, medical devices, electronics, and Business Processing Outsourcing (BPO).

In addition, the competitive advantages that Guatemala offers to investors looking for locations to expand their operations include:

- investment-friendly administration
- stable macroeconomy
- regionally competitive structure to access markets such as the United States, Mexico and South America
- young human talent
- region’s greater installed energy production capacity

According to Mineco, the goal for 2021 is to attract investment and reinvestment projects valued at at least US$1.2 billion.

Of this amount, in the first quarter of the year Guatemala materialized more than 250 million dollars in this type of projects, which translates into the generation of 2,405 jobs.

Guatemala’s Ministry of Economy reports that the investment and reinvestment projects are in the transportation and logistics, textile, contact center, light manufacturing, agribusiness and energy sectors. Also, services, pharmaceuticals and medical devices, logistics, and food and beverages.
Climate

Guatemala is located in the Tropics zone, but temperate seas and an irregular terrain provide a diversity of climates. At sea level, annual temperatures range between 25º and 30ºC. In temperate zones, located at an altitude of 610 and 1,830 meters, temperatures are 17ºC in the higher altitudes. At altitudes over 1,830 meters, temperatures may be as low as 13ºC.

There are two climate seasons throughout the year. The rainy season lasts from about the middle of May through October; the rest of the year is the dry season. On the Atlantic (Caribbean) coast, however, where the winds blow during the whole year from warm Caribbean waters, there is hardly any dry season.

Education

The Guatemalan educational system consists of the following levels:

- Initial level (for children up to 6 years of age).
- Basic level – Elementary (starts after initial level is finished and lasts 9 years).
- Middle level – High School (starts after basic level is finished and lasts 2-3 years).
- Superior level (starts after the middle level is finished and lasts 4-5 years).

For initial and basic levels, there are free government Official Schools, apart from private paid schools. The initial and the basic levels are mandatory.

Superior Level (College) is not mandatory but people can apply for admission into the National University of Guatemala “San Carlos of Guatemala University” or in any of the private universities available:

- Francisco Marroquin
- Del Istmo
- San Pablo de Guatemala
- Galileo
- Mesaoamericana
- Rural de Guatemala
- De Occidente
- Rafael Landivar
- Panamericana
- Da Vinci de Guatemala
- Mariano Gálvez
- Del Valle de Guatemala
- Inter Naciones
- Regional de Guatemala

Notice: Other universities are currently in the process of incorporation

- **Partido Unionista (PU).**
- **Frente de Convergencia Nacional**
  - Vamos
  - Valor
  - Semilla
  - Vision con Valores

The next Presidential and Congressional elections will be held in 2023.
The Economy

Guatemala is the most populous of the Central American countries with a Gross Domestic Product (GDP) per capita of roughly one-half that of Brazil, Argentina and Chile. The agricultural sector accounts for about one-fourth of GDP, two-fifths of exports, and half of the labor force. Coffee, sugar, and bananas are the main products.

The 1996 signing of peace accords, which ended 36 years of civil war, removed a major obstacle to foreign investments and Guatemala since then has pursued important reforms and macroeconomic stabilization. The Central American Free Trade Agreement (CAFTA) entered into force in July 2006 and has since spurred increased investment in the export sector. The distribution of income remains highly unequal with more than half of the population below the national poverty line. Other ongoing challenges include increasing government expenses, negotiating further assistance from international donors and narrowing the trade deficit. Given Guatemala’s large expatriate community in the United States, it is the top remittance recipient in Central America, with inflows serving as a primary source of foreign income equivalent to nearly two-thirds of exports. Economic growth slowed down in 2009 as export demand from US and other Central American markets dropped and foreign investments slowed amid the global slowdown.

Guatemala has the largest economic market in Central America, with a US$77 billion GDP, representing 30.6% of the region’s total GDP. The latest studies on investment banking highlights Guatemala’s great economic stability throughout its history.

According to the estimates of Bank of Guatemala for 2018, the growth of the national economic activity, measured by the Gross Domestic Product (GDP) in real terms, is estimated to close between 3.0% and 3.8%, slightly higher than that observed in the previous year (2.8%).

Regarding the measurement of GDP by the origin of production, highlights the behavior registered by the activities of wholesale and retail trade stands out; financial intermediation, insurance and auxiliary activities; agriculture, livestock, hunting, forestry and fishing; and manufacturing industries.

Doing Business in Guatemala

The official attitude of the government has been friendly towards foreign investments, particularly well-received are those participating with local capital. As for foreign interest activities, the law does not restricts operation of foreigners.

**Free trade agreement and other agreements**
Guatemala has been a member of the World Trade Organization since July 21, 1995. DR-CAFTA (FTA between the US, Central American Countries and Dominican Republic) was signed and implemented in March 1, 2007. As of 2011 Guatemala has specific Free Trade Agreements with: Chile, Colombia, Mexico, Panama, Dominican Republic and Taiwan.

The coverage of these agreements sheltered 82.0% of exports and 67.5% of imports. Except for trade with the United States, for the rest of the countries mentioned above, the amount of exports during the first half of 2010 was 1,639.9 million, higher at 16.9% than in the same period of 2009.

As of December 01, 2013, section 77 through 351 of the Free Trade Agreement with the European Union, on external Commerce, is in force in Guatemala; all other sections are still under negotiation.

**Government views toward foreign investment**

The Free Trade Agreement with Canada is still under negotiation.

**Foreign investment**
In accordance with the Constitution of the Republic of Guatemala, the State has the basic obligation to protect the formation of capital, savings and investment, and to establish satisfactory conditions for promoting the investment of both Guatemalan and foreign capital.

In 1998, Guatemala passed the Foreign Investment Law, reducing the barriers to foreign investment; but investment was still restricted to a minority ownership of domestic airlines and ground transport. Incentives are available for the forestry, mining, tourism, and petroleum sectors. There are also thirteen free trade zones.

Foreign investment must be developed and promoted so that it becomes a source for the transfer of technology, the creation of jobs, and the promotion of the country’s economic growth and diversification, with a view to developing all of Guatemala’s productive sectors and reinforcing national investment.

Guatemala stimulates and promotes foreign investment. Foreign investors and their investment are mainly regulated by the stipulations of Foreign Investment Law. When foreign investment occurs in a sector of the economy governed by a law of a special nature, the investor must also be guided by the precepts of the latter. Likewise, the foreign investor is subject to all the precepts of general application in the territory of the republic and can enjoy the same rights and the same means of application of the law that are given to domestic investors.

**Forms of foreign investment**
In accordance to Article 1, numeral 2 of the Investment Law of the Decree 9-98 of the Congress of the Republic, a “foreign investment” is: “Any kind of investment that involves all sorts of capital transfer to the Republic of Guatemala made by a foreign investors. Also within this concept is the foreign reinvestment in Guatemalan territory of any income or capital generated in Guatemala through its investment”.

**Restrictions on foreign investment**
As to foreign interest activities, the law does not restrict operation of foreigners.
Establishing a business in Guatemala. Commercial entities. Commercial companies in Guatemala are governed by the Commercial Code. Accordingly, the following forms of business organizations are the most frequent:

**General partnership**
An entity that exists under a given social name and in which all partners are liable in a subsidiary, unlimited and severally form of social obligations.

**Limited partnership**
Limited partnership is composed of one or more general partners who respond subsidiary, unlimited and joint social obligations, and one or more limited partners who have limited responsibility to the amount of their contribution. Contributions cannot be represented by securities or shares.

**Limited liability company**
A limited liability company is comprised of several partners (20 max.) who are only required to pay their contributions. For the social obligations, only the assets of the company respond and where appropriate, the sum over the contributions agreed upon by the charter. The capital is divided into contributions that cannot be joined with any titles or called shares.

**Joint-stock partnership**
It is composed of two types of shareholders, the partners who respond subsidiary, jointly and severally and the limited partners who are responsible for their contribution. The partners must be the shareholders and the name of the entity shall be the full name of one of the partners or the surname of two or more partners plus the legend “and Joint-stock partnership” or “and Company S.C.A.”

**Entrepreneurship company**
With the approval of Decree Number 20-2018 of the Congress of the Republic, as of January 28, 2019, Entrepreneurship Companies may be constituted, which is formed with one or more physical persons that are only required to pay their contributions represented in shares, forming a legal entity distinct from that of its shareholders. The total annual income of an entrepreneurial company may not exceed five million Quetzals (Q.5,000,000.00 = USD 670,000.00).

The denomination will be formed freely, but different from those of any other company and always followed by the words “Entrepreneurship Company” or its abbreviation “S.E.”. They will be constituted by means of an own procedure, exempting it from the obligation to be constituted...
by means of public deed, in the same way its modifications consisting in the increase or reduction of capital, extension and change of denomination.

**Stock company or corporation**
A corporation is the entity with its capital divided and represented by shares. The liability of each shareholder is limited to the payment of the shares that each of them have signed.

As of February 2018, the companies may be constituted with a minimum paid capital of Q. 200.00 (USD 30.00) which will not require the opening of a bank account. If the initial paid-in capital is greater than Q. 2,000.00 (USD 275.00 approx.), this amount must be deposited in a bank account in the name of the entity.

The differences between the various types of business organizations relate mainly to registration procedures and financial liability of the participants. Generally, financial liability is limited to capital contributions except in the case of partners of general or limited liability partnerships. As of June 2011, no bearer shares are permitted.

**Formation procedure**
Business organizations must execute an Article of Incorporation (except the entrepreneurship company) which is registered in the Commercial Registry of Guatemala. In addition, notice of formation of the entity must be published electronically by the means that the Commercial Registry implements. Any change or extension of the original Article of Incorporation must also be effected by public instrument and be registered.

**Closing procedure**
Liquidation or dissolution of a company in Guatemala is ruled by the Commerce Law, Congress Decree number 2-70 of the Congress of the Republic, which states in sections 237 to 255 the procedure to close the entity in the Commercial Registry and before the Tax Administration.

**Branch and/or permanent establishment**
The requirements for establishing a branch do not substantially differ from those for establishing a local company, but requires the parent company to guarantee branch operations with its worldwide assets and a USD50,000 guarantee bond is required as well.

**Joint venture**
This atypical commercial contract is held by a group of people either individuals or corporations, domestic or foreign, which made up of contributions of diverse species, which does not imply loss of identity and individuality as a legal entity for a business in common; be it from creation of goods to the provision of services. In Guatemala as in any country, this contract has been used to combine efforts for various projects, such as, real estate development and renewable energy projects, amongst others.

</table>
Guatemala has a very solid financial system, excellent international reserve levels and the lowest foreign debt in the region. The Guatemalan financial system is integrated by 18 banks, 13 financial institutions, 14 bonded warehouses, 28 insurance companies, 3 foreign exchange entities, 4 off shore entities, 10 stock brokers, among other institutions supervised by the Office of the Banks Superintendent (OBS). These institutions offer the investor a variety of financial services with the highest standards of quality and security.

Both companies and the population, in general, have for many years, benefited from a highly competitive sector with different participants in the market. In recent years, strong mergers and acquisitions have led to the creation of much larger banks, capable of satisfying the demands of larger clients.

Parallel to the consolidation of the sector, small and medium size banks have specialized in tending to specific market niches. Actually, Guatemala has financial entities that provide world-class services in specialized areas such as factoring, international commerce, specialized investments, and microcredits, among others.
Most of the banks and financial institutions operate with several correspondents in the USA, Panamá, México, Switzerland, among other countries. In addition, some foreign banks operate directly in Guatemala such as Citibank, BAC, Banco Azteca, among others.

The law for the free Negotiation of Foreign Exchange allows the legal use of foreign currency, therefore in many cases the dollar is used as a basis for contracts and international transactions. Any individual can open accounts in Quetzales, Dollars or Euros.

Banking secrecy
In accordance with Decree 37-2016, of the Congress of the Republic “Law for the Strengthening Fiscal Transparency and Governance of the Tax Administration “, which entered into force on February 22, 2017, establishes that the Tax Authority may have access to the banking information of taxpayers by means of a resolution of the competent Judge; in addition to the foregoing, the obligation to record all bank accounts and investments in the accounting books is established, regardless of whether they are opened or carried out inside or outside of Guatemala.

The non-observance of the provisions related to banking secrecy can be considered by the Tax Authority as Resistance to the audit action, which can lead from an administrative penalty or fine to a criminal action.

1 Administrative Penalty:
Fine equivalent to one percent (1%) of the gross income obtained by the taxpayer during the last monthly, quarterly or annual period declared in the tax regime to be audited. When the resistance is of those that constitute immediately, the sanction will double.

2. Criminal action:
Offense of resistance to the tax inspection action of the Tax Administration, which is regulated in the Criminal Code as follows:

Commits the offense of resistance to the tax inspection action of the Tax Administration who, after having been required by said Administration, with the intervention of a competent judge, prevents the actions and diligences necessary for the inspection and determination of its obligation, refuses to provide books, records or other accounting documents necessary to establish the tax base of taxes; or prevent access to the computer system in relation to the recording of its accounting operations. contables.

Labor law requirements
Employer-employee relations are governed by the Labor Code of Guatemala.

Collective Labor Conditions Treaty is specifically recognized by the Labor Code; however, unions are not organized on a national, regional or industry basis, but rather are generally limited to the employees of an individual company. Although the union movement has received greater attention in recent years, it is not strong and where unions have been established, membership is not obligatory. Collective labor agreements are normally negotiated in the presence of, or with the assistance of a representative of the Ministry of Labor and extend for two to three years.
The following is a summary of Guatemala’s Labor Code requirements:

**Wages and salaries**
De conformidad con el Acuerdo Gubernativo No. 278-2021 publicado en el Diario de Centroamérica el 17 de diciembre de 2021, se establece el salario mínimo que regirá a partir del uno de enero de 2022.

<table>

<tr>
<td>Non agricultural</td>
<td>Q.97.29</td>
<td>Q.2,959.24</td>
<td>Q.250.00</td>
<td>Q.3,209.24</td>
</tr>
</tbody>
</table>

**Profit sharing**
In Guatemala there is no regulation that states an obligation for paying shares or participations to employees, although this practice is not prohibited and could be set up between both parties of the work relationship.

**Annual bonus**
In Guatemala it is mandatory to pay an annual bonus (bono 14) equal to a month’s salary and it is payable in the month of July.
**Labor and Social Security**

**Christmas bonus**
The employer is obliged to pay the worker a Christmas bonus in the month of December, consisting of one month’s salary, (one twelfth of the ordinary salary earned by the worker in the calendar year).

**Hours worked**
Maximum Labor hours are eight (8) hours daily, and should not exceed 44 hours a week.

**Paid holidays and vacation**
Legal holidays established by law add up to 10 days per year. Vacation are granted for a period of fifteen (15) labor days, after a year of uninterrupted service.

**Labor union**
The Labor Code provides that unions may be established. Although the union movement is increasing, at present, it is still limited in comparison to the total labor force.

**Termination of employment**
The termination of employment contracts occur when one or both parts of the employment relationship will conclude it, either by the will of one of them, mutual consent, reasons attributable to the other, or disposal of the law, in which circumstances, cancelling the rights and obligations under such contracts.

If the employment contract concluded for an indefinite period after the probationary period because of unjustified dismissal of workers, or one of the causes under Article 79, the employer must pay the employee compensation for time served equivalent to one month’s salary for each year of continuous service or the services do not reach a year, in proportion to time worked.

**Severance payment**
The severance payment is generally payable in case of unjustified dismissal (or to the employee’s family in the event of death) at one month’s salary per year of uninterrupted service. The law specifies causes of “just” dismissal.

**Foreign personnel**
Normally at least 90% of the labor force must be Guatemalan and collect 85% of the total payroll. Managers or administrators should be excluded from the calculations. The limitations can be modified by the Ministry of Labor only by a justified cause.
Labor and Social Security

Foreign personnel must have a work permit and a temporary residence in Guatemala.

Social security
Generally the system is designed to cover the total labor force gainfully employed. All contributions are withheld by the employer from the monthly payrolls.

The Guatemalan social security plan is designed to include all inhabitants of the country who take an active part in industry, commerce and agriculture, and to cover work accidents, occupational illness, maternity, sickness, disability, orphanage, widowhood, old age and death and burial expenses. Participation is mandatory for employers with three or more employees. However, at present, the plan operates only for work accidents and occupational diseases in most parts of the country, and as to disability, old age and survival.

Maternity benefits are extended to wives of covered employees.
Premiums for this coverage are paid by employers, employees (both male and female) and the Government at the following percentage of each employee’s wages (with no upper limits or maximum salaries for the purposes of applying these percentages):

<table>
<thead>
<tr>
<th>Porcentaje contribuido por</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Employer</td>
<td>12.67% (*)</td>
</tr>
<tr>
<td>Employee</td>
<td>4.83%</td>
</tr>
</tbody>
</table>

(*) Employers 12.67% contribution includes 1% to fund the activities of the Worker’s Recreational Institute (IRTRA) and 1% for the Professional Training Institute (INTECAP).
Accounting and Audit Requirements and Practices

On June 29, 2010, an Extraordinary General Association of Accountants and Auditors of Guatemala, resolved to adopt the “IFRS for SMEs” as part of the Generally Accepted Accounting Principles referred to the Code of Commerce of Guatemala.

Books and records
The Commercial code prescribes the principal books of account to be maintained by companies. The books required by law are:

- General ledger.
- Inventory book (merchandise, fixed assets and bank accounts).
- Financial statements.
- Monthly register of purchase and sales.

Generally, these books are bound and each must be authorized by the local tax authorities and approved by the Commerce Registry.

Loose-pages and computerized systems shall also be authorized.

Accounting profession
To practice in Guatemala the profession of Certified Public Accountant and Auditor, professionals must obtain a degree in one of the country’s universities or submit to approval certificate obtained abroad before the University of San Carlos of Guatemala.

Professionals must also register at the College of Public Accountants and Auditors and obtain a registration number before the Tax Administration.

Auditing standards
Guatemala follows the International Auditing Standards issued by the International Auditing and Assurance Standards Board.
Tax System

Guatemala has a territorial taxation system and the Tax Administration Office (SAT) has overall responsibility for tax administration. The municipalities of the Republic of Guatemala are autonomous agencies and some of them are in charge of the collection of real estate taxes.

The Customs Bureau (Dirección General de Aduanas) agency, supervised by the Tax Administration Office (SAT), controls the customs offices which assigns and collects duties, fees and VAT on imports.

Tax on corporate income

There are two tax regimes in Guatemala are:

- Simplified Optional Regime on Income from Lucrative Activities
- Regime on Earnings from Lucrative Activities

Simplified Optional Regime on Income from Lucrative Activities

Onwards a rate of 5% on gross revenue is applicable to juridical entities and individuals performing mercantile and non-mercantile activities, domiciled in Guatemala on the first GTQ 30,000.00 and 7% on the excess.

The tax is payable under flat tax withholdings (the tax is to be retained by either the customer or the recipient of services) or by direct remittances to the tax office made monthly within the first 10 working days of the month following the invoice date.

Regime on Earnings from Lucrative Activities

A rate of 25% is applicable to a company’s taxable income from Guatemala sources. The rate is applicable on net income of individuals or juridical entities domiciled in Guatemala.
The annual final tax liquidation period begins on January 1st and ends December 31st of each year.

Under this system, the tax is payable with advanced quarterly payments that must be made immediately after the end of that month. The tax is determined and paid upon presentation of the corresponding tax return, not later than March 31 of the year following the end of the fiscal period. The advanced quarterly payments are applied to the tax that is determined at the end of the final period.

The Income Tax return shall be accompanied by the documents required by the regulations, which might include:
- A balance sheet.
- A profit and loss statement.
- A statement of cash flow.
- A statement of cost of production (manufacturing companies)
The income tax return and exhibits thereto shall be signed by the taxpayers, their agent or their legal representative or by any other responsible person so determined by law.

**Tax on interest income**
Interest income earned by domiciled persons other than banks is subject to a flat withholding tax rate of 10%. The interest taxed must be included by taxpayers in their income tax returns as non-taxable income.

**Corporate residence**
The place where it is established determines the residence of the company. Any entity that is organized in accordance with the laws of Guatemala is obliged to establish its fiscal and business domicile in Guatemalan territory.

As of January 2013, the Income Tax Law of Guatemala incorporated regulations on the permanent establishment figure.

**Value-added tax (VAT)**
A 12% (VAT) is levied on the sale or transfer of merchandise and on non-personal services rendered or executed in Guatemala. The tax is payable to the government by way of invoice method, whereby the tax charged to the customers is offset with the VAT paid over purchases, and the government collects the net resulting amount.

The circulation of credit titles is VAT-exempt.
- **Sale of goods**
The taxable amount on the sale of goods includes the sales price minus any discounts provided under commercial practices plus other charges shown on the invoice. The VAT rate is applicable to the first sale of the real estate and the subsequent sales are subject to the Tax Stamp Tax with a 3% rate.
- **Services**
The taxable amount of services includes the price of the services, minus any discounts provided under commercial practices, plus financial charges and products used to render the services.
- **Other issues**

**Imports:** The tax base is the value declared for VAT and import duties’ computation purposes.

**Leases of movable or immovable property:**
The tax base is the value of the lease.

**Exempted sale and services:**

**Incorporation made by:**
1 Cooperatives legally constituted as registered on imported machinery, equipment, and other goods relating to the activity or services of the cooperative; and
2 Diplomatic and consular missions accredited before the Guatemalan government.
   Banking institutions services and their agents.
   The issuance, circulations and transfer of credit bonds, value bond and stock of any kind.
   Interest accrued by credit bonds and other obligations issued by mercantile partnership, negotiated through an authorized stock exchange.
   Exports of goods and services.
   Contributions and donations to educational, cultural, assistance or security service partnership, constituted as not-for-profit entities.

Real estate taxes
Real estate taxed are assessed annually at GTQ 2 per thousand on declared property values from GTQ 2,000 to GTQ 20,000, at GTQ 6 per thousand on values from GTQ 20,000 to GTQ 70,000, and at GTQ 9 per thousand on value in excess of GTQ 70,000 (e.g., property valued at GTQ 1,000,000 will pay real estate taxes of GTQ 9,000).

VAT rate is applicable to the first sale of a real estate property; subsequent sales are subject to a 3% stamp tax.

Stamp tax
Other than sales invoices, contracts and documents subject to VAT and other minor exemptions, a stamp tax must be paid on all documents covering commercial and legal transactions.
This tax is also assessed on documents issued abroad, other than drafts or credit bonds involving international transfers of funds are generally exempt from stamp taxes. The current tax rate is 3% and is calculated on the face value of the documents or on the gross value of the related transaction.

Inheritance and Donation Tax
Recipients of inheritance, legacies and gifts of personal property, real estate or other rights in Guatemala are subject to inheritance taxes. Inheritance, legacies, or gifts of personal property located abroad, but publicly deeded in Guatemala, and debt waivers executed in Guatemala, are also taxable. The tax is levied at progressively higher rates on amounts up to GTQ 50,000 at 1% to 9% when the recipients are related to the donor (at least 12%) and at 6% to 14% on amounts of excess of GTQ 500,000 (up to 25% for nonrelated recipients).

Solidarity tax (ISO)
An ISO tax rate of 1% should be paid on the fourth quarter of net assets of a corporation, or on the fourth quarter of gross income, whichever is higher, and there is no limit on the amount to be paid.

Tax paid may be credited against the corporation’s income tax. If the annual business tax exceeds the income tax, no reimbursement is possible.

The tax that is paid can be credited to the income tax of the company and is applied only to the taxpayers that are governed by the regime on profits of lucrative activities and it is paid each quarter on the basis of the Income Tax annual tax return of the immediately previous period.

Deductions

Allowed deductions
Deductions are only permitted under Regime on Earnings from Lucrative Activities.

Interest
The deduction for this concept cannot exceed the result of multiplying the interest rate referred to in the following paragraphs by three times the average net total assets reported by the taxpayer in the corresponding annual tax returns.

The interest rate over quetzales-expressed credits or loans may not exceed the maximum simple annual rate determined by the Monetary Board for tax purposes within the first 15 days of January and July of each year for the respective semester, taking as a basis thereof the weighted banking rate charged during the preceding semester. As for loans obtained abroad, the related contracts shall be executed with banking or financial entities registered and monitored by the respective State surveillance body and authorized for intermediation purposes in the country where the loan is provided. In this case, the interest rate over foreign currency loans may not exceed the maximum simple annual rate determined by the Monetary Board, as described in the preceding paragraph, minus any interannual variation of the quetzales exchange rate vis-a-vis the currency in which the loan contract is expressed during the period the annual income tax return may pertain to.

For purposes of this section, the average net total assets shall be understood to be the sum of closing net total assets of the preceding year and the closing net total assets of the current year, as reported in the income tax returns pertaining to each tax period divided by two. Total net assets shall reflect the carrying value of all assets effectively owned by the taxpayer.
Tax System

The limitation provided by this section shall not apply to banking and financial entities subject to surveillance and inspection by the Superintendence of Banks, neither to legally authorized cooperatives.

Taxes
All taxes other than income tax and VAT are deductible.

Depreciation and depletion
Depreciation is generally computed on a straight-line basis. Upon request by the taxpayer, the tax authorities may authorize other depreciation methods.

<table>

</tr>
</tbody>
</table>

Tax depreciation must be based on book value.

Payments to foreign affiliates
Deduction for royalties, professional fees and technical services are allowed up to 5% of gross income.

Employee pension/retirement funds
The deduction of royalties is allowed up to 5% of the gross income. Charges for fees, commissions and advice are deductible up to 5% of gross income.

Severance compensation payments
Severance compensation payments are allowed as deductible expenses according to the provisions of the Labor Code or the corresponding collective agreement or limited allocations (not to exceed 8.33% of total annual salaries) to a reserve, for severance compensation.

Donations
Duly proven donations made to the government, the municipalities and their agencies, as well as to duly authorized not-for-profit welfare, social service and scientific associations foundations, universities, political parties, and guild entities, are deductible. The maximum deductible amount for income tax purposes of each period shall not exceed 5% of the donor’s gross income up to the maximum of GTQ 500,000 per year.

Net operating losses
Operating losses may not be carried forward for deduction from otherwise taxable profits.

Group taxation
No consolidation for tax purposes is permitted as each group entity is treated as an independent taxpayer, which shall file its own tax return of Income Tax.

Transfer pricing ruling
As of January 2013, the new Income Tax Law is in force, which introduces Arm’s Length ruling within related parties domiciled abroad (Transfer Pricing ruling).

Transfer pricing ruling is based on OECD guides.
Tax System

Withholding tax (WHT)
On payments to non-domiciled foreign corporations or individuals:

<table>

</tbody>
</table>

End of year date provided by the Income Tax Law
The annual tax settlement period begins on January 1 and ends on December 31 of each year and must be equal to the taxpayer’s accounting period.

In the case of taxpayers who carry out temporary activities in less than one year, the Tax Authority, at the request of those, may authorize special dates for the tax to be paid, which begins and ends on the dates on which those activities are initiated and ceased.
Individual tax summary

All individuals can deduct from their net income:

- Up to Q.60,000.00, out of which Q.48,000.00 are to be used by way of personal deductions with no further proof to the contrary, and Q.12,000.00 by way of VAT tax credits over personal purchases or services made during the period. These credits shall be supported by a listing of the pertinent vouchers, which shall be subject to Tax Administration Office (SAT) audit. This listing shall be presented to Tax Administration Office (SAT) within the first 10 working days of January of each year, and the employer shall reconcile any income tax withheld during the period to the final income tax return.

- Donations demonstrably given to the Government, the Municipalities and their agencies, to universities and cultural and scientific entities. Donations given to not-for-profit social service associations and foundations, as well as to churches, and to political parties, which in any event shall be duly organized, authorized, and enrolled as provided by law, and are provided by the Tax Administration Office (SAT) with tax solvency certificated for the period the donations may pertain to. The donations maximum deductible amount for each period shall not exceed 5% of the donor’s net income.

- Contributions paid to both the Social Security Institute and the Military Welfare Institute to account for pensions and retirement plans, and Government pension plans.

- Life insurance premiums that cover only the death of employees, provided that the insurance contract does not accrue any amount for the concept of return.

Individuals, who obtain income from personal services as an employee, must calculate the tax on their taxable income, according to the following sliding scale of rates:

Tax rates on taxable income for individuals on an employee relationship shall be taxed with a 5% and 7% as the taxable income tier might be.

The year 2015 marked the beginning of a new era on the international scene in the quest to unify the development goals of nations. 193 member countries of the United Nations signed the 2030 Agenda that gave life to the Sustainable Development Goals (SDGs). The 2030 Agenda represents a roadmap towards sustainable development that puts people at the center, from the perspective of inclusion. Implementing the 2030 Agenda brings challenges that vary in each region and country, however, there are megatrends such as population growth and population aging, growth of cities, technological innovations, weakening of the credibility of institutions, geopolitics, among others that have a global impact. As a region, Central America and the Dominican Republic present structural challenges to be solved, despite the efforts led by the Central American Integration System (SICA), there is still no unified strategy for SDG implementation and each country presents different levels of progress, with different approaches, institutions and legislation, which adds complexity. According to the SDG compliance index included in the Sustainable Development Report 2021 (1), Costa Rica is the best-ranked country in the region, occupying 50th position out of a total of 165 nations considered and achieving a score of 73.6 out of a possible 100 points. The first place in the ranking is occupied by Finland with a score of 85.9 and in the last place appears the Central African Republic with a score of 38.3.

The style of development that countries have adopted in recent decades is no longer sustainable (ECLAC, 2016), this leads to the need to consider a different style of development.

Source: Sustainable Development Report 2021, Tabla 2.1, pag. 10-11

But the 2030 Agenda also represents an important opportunity for the region as it includes priority issues such as the eradication of extreme poverty, the reduction of inequality in all its dimensions, inclusive economic growth with decent work for all, sustainable cities and climate change, among others (ECLAC).
After the end of the armed conflicts in most of the countries of the region, there was an economic improvement due to the implementation of strategies aimed at greater insertion in the world market and strengthening of the service sector. However, social progress is still needed and it is difficult to turn economic progress into wellbeing for everyone, which still maintains high rates of migration of inhabitants, mainly to northern countries. Environmentally, it has a great diversity of environmental resources in its territory, with a forest cover of 39% of the surface area (greater than the world average), has a great biodiversity potential of 12% of the planet’s total (ERCA, 2016) and has other resources such as water (2). The latter provides the region with global relevance, gives visibility to it at a very important moment in history, where a level of attention and awareness of the importance of the fight against climate change has been achieved. Embracing the green agenda and installing the necessary mechanisms and institutional infrastructure to receive sustainable investments has become a priority for our region. According to a report issued by Climate Bonds Initiative in March 2021 and sponsored by CABEI, the green bond market is still very incipient, only 6 issues have been made so far (including CABEI’s), however there is potential for more growth in green bonds in key sectors such as sustainable infrastructure, agriculture and blue economy. Diversifying projects and investing in climate compatible infrastructure to meet the emission reduction targets of the Paris Agreement are other opportunities identified in the report, in this regard there are key sectors such as renewable energy, low carbon transport, water cycle management and waste management.

Climate change is perhaps the greatest challenge humanity has ever faced, we are currently experiencing a global momentum where business owners and governments are increasingly aware, in our region each country has addressed this issue in different ways and has introduced policies and initiatives aimed at supporting the fight against climate change. The following is a summary:

(Disposition in the order of the SDGs Compliance Index presented above)
Source: Report published by Climate Bonds Initiative, March 2021

Costa Rica
As part of its Nationally Determined Contributions (hereafter NDCs) under the Paris Agreement, Costa Rica has defined a mitigation target of
44% reduction in emissions versus business as usual operations by 2030. Costa Rica issued the National Decarbonization Plan, launched by the Ministry of Environment and Energy in February 2019, this plan includes goals such as:

- Achieve and maintain a 100% renewable energy grid.
- 70% of buses and taxi cabs will be zero-emission and passenger trains will be 100% electric.
- 100% of new commercial, residential, and institutional buildings designed and built with low-emission, climate-resilient systems.

Dominican Republic
The Dominican Republic has defined a mitigation target of a 25% reduction in base year GHG emissions by 2030 under its NDCs. While the government does not have specific targets for the sector, it has several climate policies and initiatives in place, such as:

- Carbon tax, introduced in 2012
- Increased hydroelectric biodiesel capacity.
- Established a forestry working group to improve sustainability in the forestry sector.

The Dominican Republic’s government is also seeking to phase out fossil fuel-generated electricity, which currently accounts for 90.5% of the country’s installed capacity.

Panama
Under its NDCs, Panama has specific sectoral climate targets, which focus primarily on increasing carbon sinks, renewable energy, and sustainable forestry: 38 • Increase renewable energy capacity by 15% by 2030 and 30% by 2050 compared to the base year of 2014 • Increase reforested areas by 1 million hectares by 2030. In addition to these targets, Panama plans to continue implementing the following climate policies: • Participate in international emissions trade • Boost investment in renewable energy sources such as solar, wind and biomass.

El Salvador
El Salvador aims to establish a National Climate Change Policy Plan, which includes several regulatory framework goals within its NDCs:

- Strengthening the institutional and legal framework of the National Climate Plan by 2019.
- Establish a sectoral climate plan at the national level, including agriculture, water and infrastructure.

El Salvador’s climate goals included in its Five-Year Development Plan (2014-2019) include the following:

- Reduce economic losses caused by climate variability in the agricultural sector by one percentage point of GDP.
Sustainable Development Goals in Central America and the Dominican Republic

• Increase the number of municipalities at risk from early warning systems by 20%.
• Restore 10,000 hectares of salty forest and surrounding ecosystems
• Renew 30% of coffee plantations, thus ensuring their resilience to climate change.
• Reduce the number of threatened or endangered species by 10%.
• Reduce the consumption of ozone-depleting substances by 25%.

Nicaragua
Nicaragua has defined the following goals in its NDCs:
• Achieve 60% renewable energy by 2030.
• Increase forest absorption capacity by 20% by 2030.
Nicaragua’s National Climate Change Policy is currently in the discussion stage. It will outline the country’s plans and will include the following aspects:
• Increasing agricultural resilience.
• Creating a low-carbon development strategy
• Solutions for human resettlement due to climate change
• Developing green infrastructure
• Achieving forest conservation and restoration
• Promoting knowledge, research and funding for climate change mitigation and adaptation.

Honduras
Honduras has the following climate targets as part of its NDCs:
• Reduce national GHG emissions by 15% by 2030.
• Achieve 80% of electricity supply from renewable sources by 2038.
In the context of the country’s NDC commitments, the Honduran government aims to continue its progress towards the creation of a climate policy framework, which includes:
• Developing a national climate change investment plan.
• Focusing on water resources, risk management, agriculture, forestry and biodiversity, and infrastructure and renewable energy projects, which are core priorities of the National Climate Change Agency.

Guatemala
As part of its NDCs, Guatemala has defined targets of 11.2% (unconditional) to 22.6% (conditional) reduction in GHG emissions by 2030 compared to the usual scenario. These targets are incorporated into Guatemala’s national development plan known as the K’atun 2032 National Development Plan.
The specific objectives included in the plan are:
• Achieve 80% of electricity from renewable energy by 2027.
Sustainable Development Goals in Central America and the Dominican Republic

- Improve energy savings by 25% in the industrial and commercial sectors by 2027 compared to the 2013 baseline
- Reduce industrial wood fuel use by 15% by 2027 compared to 2013 baseline

Finally, COVID-19 came to delay the SDG implementation process, yet globally the climate, biodiversity and pollution crisis persisted, despite the pandemic (as highlighted by Mr. Liu Zhenmin in the 2021 Sustainable Development Goals report). Concentrations of key greenhouse gases continued to rise despite temporary emission reductions in 2020 linked to confinements and other measures in response to COVID-19. The effects of the pandemic include increases in unemployment rates impacting poverty rates, in addition to the anticipated significant impact on the educational deficiencies of a generation and the long-term impact on the productive capacity of countries. But it is also important to highlight that COVID-19 tested the capacity for adaptation, collaboration, innovation and resilience of human beings and this adds optimism that we will be able to face the challenges of the 2030 Agenda successfully.
