

Financial Reporting for IPO

What is the training about?

Going public is a major challenge for any company. A public company will need to meet additional requirements and continuing obligations, one of which is related to its financial reporting. Join this training to understand the financial reporting requirements of going public, how to meet them, and what else you need to consider. In addition, you will also learn about post-IPO reporting obligations and get to know the common questions asked by the regulators.

Who is it for?

Finance managers and staff dealing with the financial reporting of a company planning to go or in the process of going public. This training is suitable for any industry in general.
