

# Tax Technology Solutions

# Data Preparation Automation

Do you work heavily on multiple spreadsheets and spend a lot of time consolidating and summarising data?

Streamline your data preparation processes to deliver your data outputs quickly and accurately

## Features and benefits

- Drag-and-drop tools – intuitive user interface
- Low code approach – no need to worry about Excel macros and advanced scripts
- Repeatable and auditable data workflows
- Reduce your data preparation time significantly

# Tax Data Visualisation

How are you reporting tax data in an impactful and interactive manner so that you can deliver insights to the business?

Visualise your data to facilitate business planning and opportunity discussions with your stakeholders

## Features and benefits

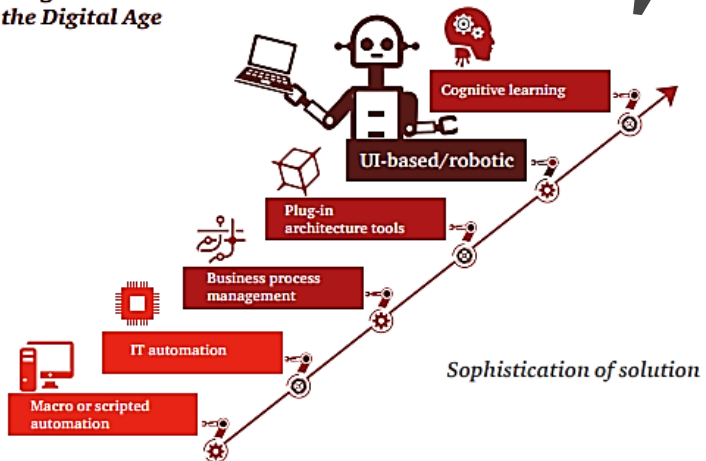

- Drag-and-drop charting capabilities – intuitive user interface to analytical visualisations
- Interactive analysis – Allows interaction with measures and dimensions to vary the analytics
- Simply smarter analytics – innovative visualisations to put your data in the right context

# Robotic Process Automation

Are you spending a significant amount of time on routine low value tasks? Is there a better way of doing it?

Use Robotic Process Automation to perform manual, time-consuming and rules-based tasks more efficiently by reducing cycle time and at lower costs than other automation solutions

## Intelligent Automation in the Digital Age

## Robotic Process Automation (RPA)

is a feature of intelligent process automation (IPA) that takes productivity optimization to the next level by redefining work and reassigning employees to execute higher-value activities. Process bots are capable of independently performing simple human-like functions such as interpreting, deciding, acting, and learning.

## Features and benefits

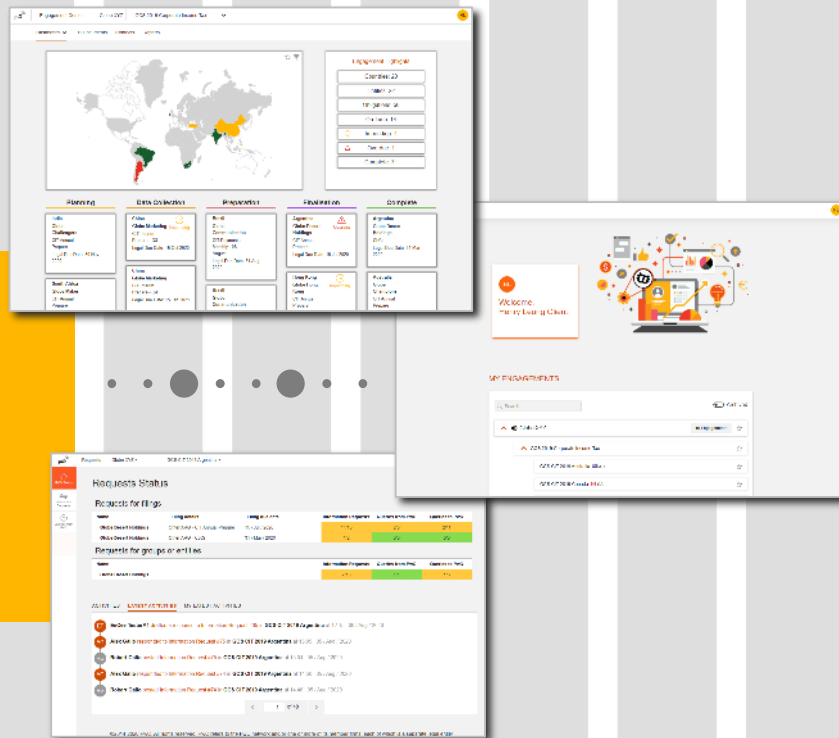

- Economic Value – reduce operational costs and attain ROI goals faster than a traditional ERP deployment
- Workforce Advantage – a digital workforce is capable of working 24x7 and required limited to no oversight, and can scale in response to business growth with speed, agility and resiliency
- Quality and Control Improvements – digitizes expensive and error prone manual processes. Every step in the process, every activity performed, and all sources of data have a digital audit trail

# Engagement Center

Are you looking for a more efficient way to manage your tax engagements with PwC?

A platform PwC uses to collaborate and communicate with clients through our tax engagements

**Engagement Center** facilitates the delivery of engagements at PwC. A central location for our clients and PwC teams to work during the engagement in a manner that is Transparent, Collaborative and Secure.

It also enables the efficient exchange of documents, monitoring engagement progress, and access to all queries and responses which removes the need to search through emails for information retrieval.

## Features and benefits

- Live monitoring of engagement progress
- Raising and responding to information requests and queries eliminating the need for email
- Secure exchange of documents for all engagement deliverables: letter, workpaper, reports and filings
- The ability to share reporting and insights with you

Talk to us to discover how you can  
enhance your value to the business  
through tax technology
