

Enterprise System and Transformation Assurance

Manage risks and achieve strategic business objectives on your transformation journey.

We have navigated the **post-COVID-19** era, and businesses are accelerating their transformation programs. Currently, companies are diligently working to resume their transformation journeys that were impacted during the period of crisis. These transformation initiatives necessitate a well-defined roadmap, encompassing all stages of planning to implementation, to ensure effective acceleration of these programs.

Our Enterprise System and Transformation Assurance team excels in propelling your organization's system through our transformation assurance programs. Our services range from assessing program readiness, providing assurance, conducting

post-implementation reviews, to overseeing program and change management. Leveraging our independence, combined with experience and capability on both local and international scales, supported by our extensive global network, we are well equipped to assure successful implementation of your transformation program.

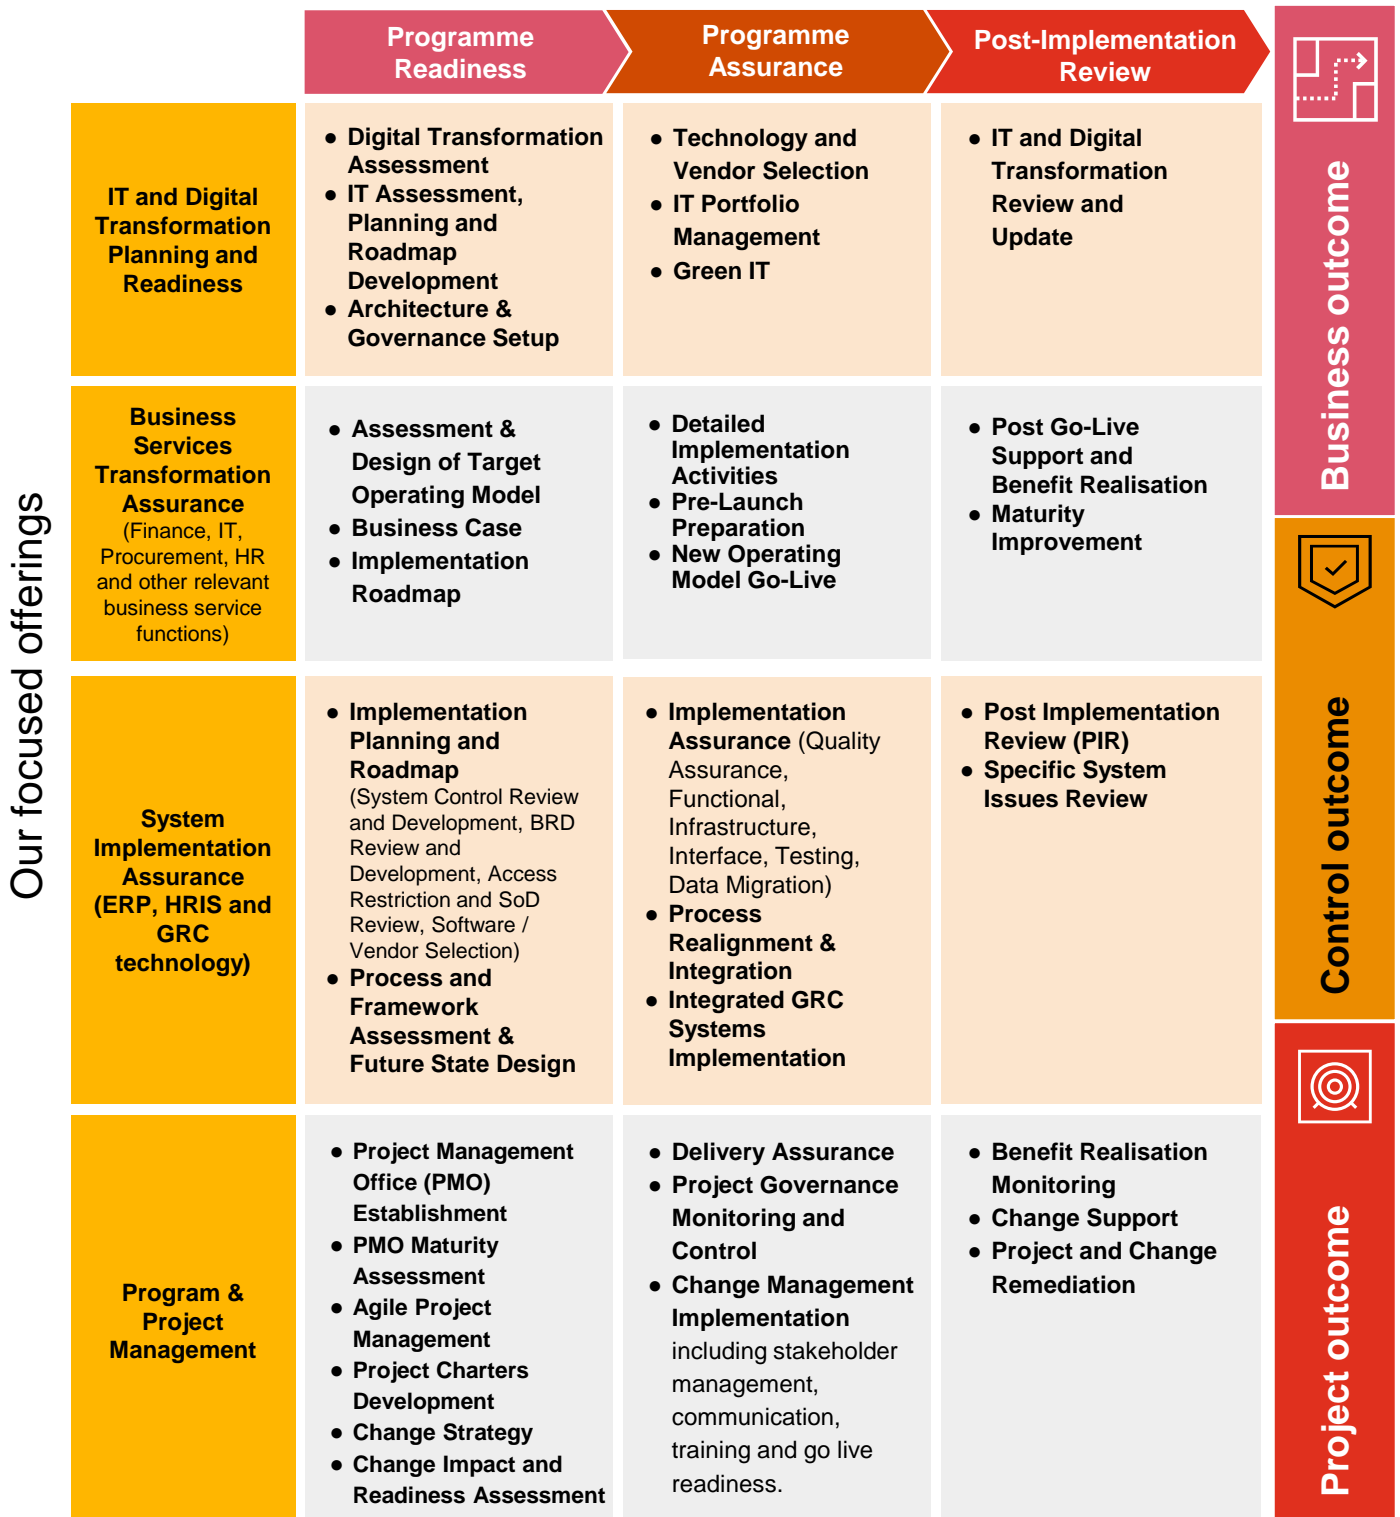

Your organisation can expect to achieve confidence in the foreseeable results, the progress of project implementation and integration, as well as in the fundamental data, processes, and controls. This will also contribute to an ideal operational model and innovative work methods crucial to ensuring a successful transformation.

We place an emphasis on four crucial building blocks of services:

 <p>IT and Digital Transformation Planning and Readiness</p> <p>Focuses on assisting our clients in building the right IT plan & roadmap to support their business.</p>	 <p>Business Services Transformation Assurance</p> <p>Focuses on supporting our clients in re-organising or restructuring the operating model of their business support functions, thus core business can focus on business growth.</p>	 <p>System Implementation Assurance</p> <p>Focuses on supporting our clients in their software or system development journey as part of their digital transformation trajectory, including GRC technology implementation.</p>	 <p>Program & Project Management</p> <p>Focuses on supporting our clients with program and project delivery assurance as well as change management and agile project management to ensure smooth transition of the transformation objectives.</p>

Our methodology

Crafting a Comprehensive Pathway for Transformation: Empowering Program Readiness, Ensuring Rigorous Program Assurance, and Gleaning Insights from Post-Implementation Reviews.

Value we deliver

Business outcome

Achieve strategic objectives through focused and well-planned initiatives and successful transformation delivery.

Control outcome

Ensure robust risk management and compliance through well-designed and effectively implemented control mechanisms.

Project outcome

Deliver transformation projects on time, within budget, and in alignment with pre-defined quality standards and business requirements.

We will work with you throughout your transformational journey so that you can make informed decisions and reap the intended benefits of your complex transformation.
