Briefly

Effective from 9 November 2026, foreign nationals can obtain an Individual Identification Number (IIN) remotely through the QazETA mobile application, without a mandatory in-person visit to a Public Service Centre.

In detail

This new procedure will remain in force for one year from 9 November 2026 and applies to foreign nationals temporarily residing in Kazakhstan.

For application submission, applicants are required to upload an identification document, complete biometric identification, confirm their geolocation, and provide the required personal information. Personal data will only be processed after the applicant's consent.

The system automatically verifies the applicant's entry into Kazakhstan and whether an IIN has already been assigned.

The processing time is one business day, excluding the day of submission. Once approved, the IIN and registration certificate will be available electronically in the QazETA application.
