

Food and Beverage Catalogue

Kazakhstan Export Accelerator Programme

Ministry of trade and
integration of the
Republic of Kazakhstan

QAZTRADE
ACCELERATOR

Foreword

Dear colleagues,

The Ministry of Trade and Integration of the Republic of Kazakhstan welcome you to the Kazakhstan pavilion at the 3rd China International Import Expo (CIIE).

We wish we could welcome you in person, but we are happy that in these unprecedented times the CIIE organizers and our team were able to arrange our participation in the exhibition in the virtual format.

This catalogue includes food and beverage products manufactured by 35 Kazakh companies that are taking part in the first Export Accelerator program initiated by the Ministry of Trade and Integration of the Republic of Kazakhstan. The program has been developed and being implemented by the QazTrade Center for Trade Policy Development and PwC. This year the aim of the program is to help promising domestic food producers expand their presence in the Chinese market.

For many businesses, entering the international market is a long and complicated process. Lack of information, complex certification procedures, lack of export experience are among the reasons why businesses give up their export plans. Together with the PwC team, we are providing export consulting and intensive individual coaching sessions to the companies participating in the program to ensure their long-term presence in the Chinese market.

We believe that the products listed in this catalogue would be deservedly in demand in China because of their high quality and uniqueness. We would like to express our appreciation for you taking your time to stop by our pavilion.

Bakhyt Sultanov
Minister of Trade and Integration of
the Republic of Kazakhstan

Introduction

This year, the **food industry** was chosen for the first program, due to its enormous export potential with **China** being the main sales market for Kazakh producers to target new exports.

35 food and beverage companies listed in this catalogue have been selected to participate in the program based on their products' potential and companies' export capabilities.

The companies can be classified into the following 8 product categories:

- 10** Milling industry products, starch and starch products
- 7** Beverages
- 6** Meat, canned meat and fish
- 4** Dairy products
- 4** Confectionery and honey
- 2** Vegetable Oils
- 1** Sauces
- 1** Salt

The main component of the program is the business mission that includes participation in the **3rd China International Import Expo (CIIE)** and business communication with potential partners.

Aruana-2010 LLP

Milling industry products, starch and starch products

About the company

Headquarters: Kostanay city, Kostanay region

Year established: 2010

Turnover: \$16.8 mln

Annual capacity: 110,000 tonnes

Aruana-2010 produces all grades of wheat flour under the trademarks "Patsha" and "Tumar". Products made from premium flour rise well and have fine porosity. The flour's strong gluten allows it to be used as an improver. It exports its products to the CIS countries, China, and Afghanistan.

Product range

High grade wheat flour

First grade wheat flour
