- ✓ Easy- to- use interactive tool for benchmarking of company's salary data against the market
- ✓ Remuneration gender analysis by job families, hierarchy levels and industry

General information on PwC PayWell Salary and Benefits Survey Kazakhstan 2019 (2/2)

The Salary and Benefits Survey report will consist of 2 sections, in accordance with the rules of confidentiality and data calculation:

Compensation and Benefits Report

The compensation and benefits analysis covers the following sections:

- Salary review
- Grading systems
- Compensations
- Fixed bonuses
- Performance bonuses
- Long term incentive programmes
- Performance appraisal systems
- Work time policy and holiday/vacation policy
- Temporary sick leave
- Benefit policy (including individual benefits such as medical insurance, technical insurance, etc.)
- Others

Market Salary Report

In order to conduct the statistical analysis of remuneration by job positions, the following tools are used:

PwC job catalogue matching data

Questionnaire that covers:

Statistics on fixed payment (base salary);

Statistics on variable payment (guaranteed pay, performance bonuses and benefits)

Bonus - Interactive tool for easy comparison of company data with the market

Survey steps and dates

Registration of survey participants and distribution of questionnaires and information materials to the participants.

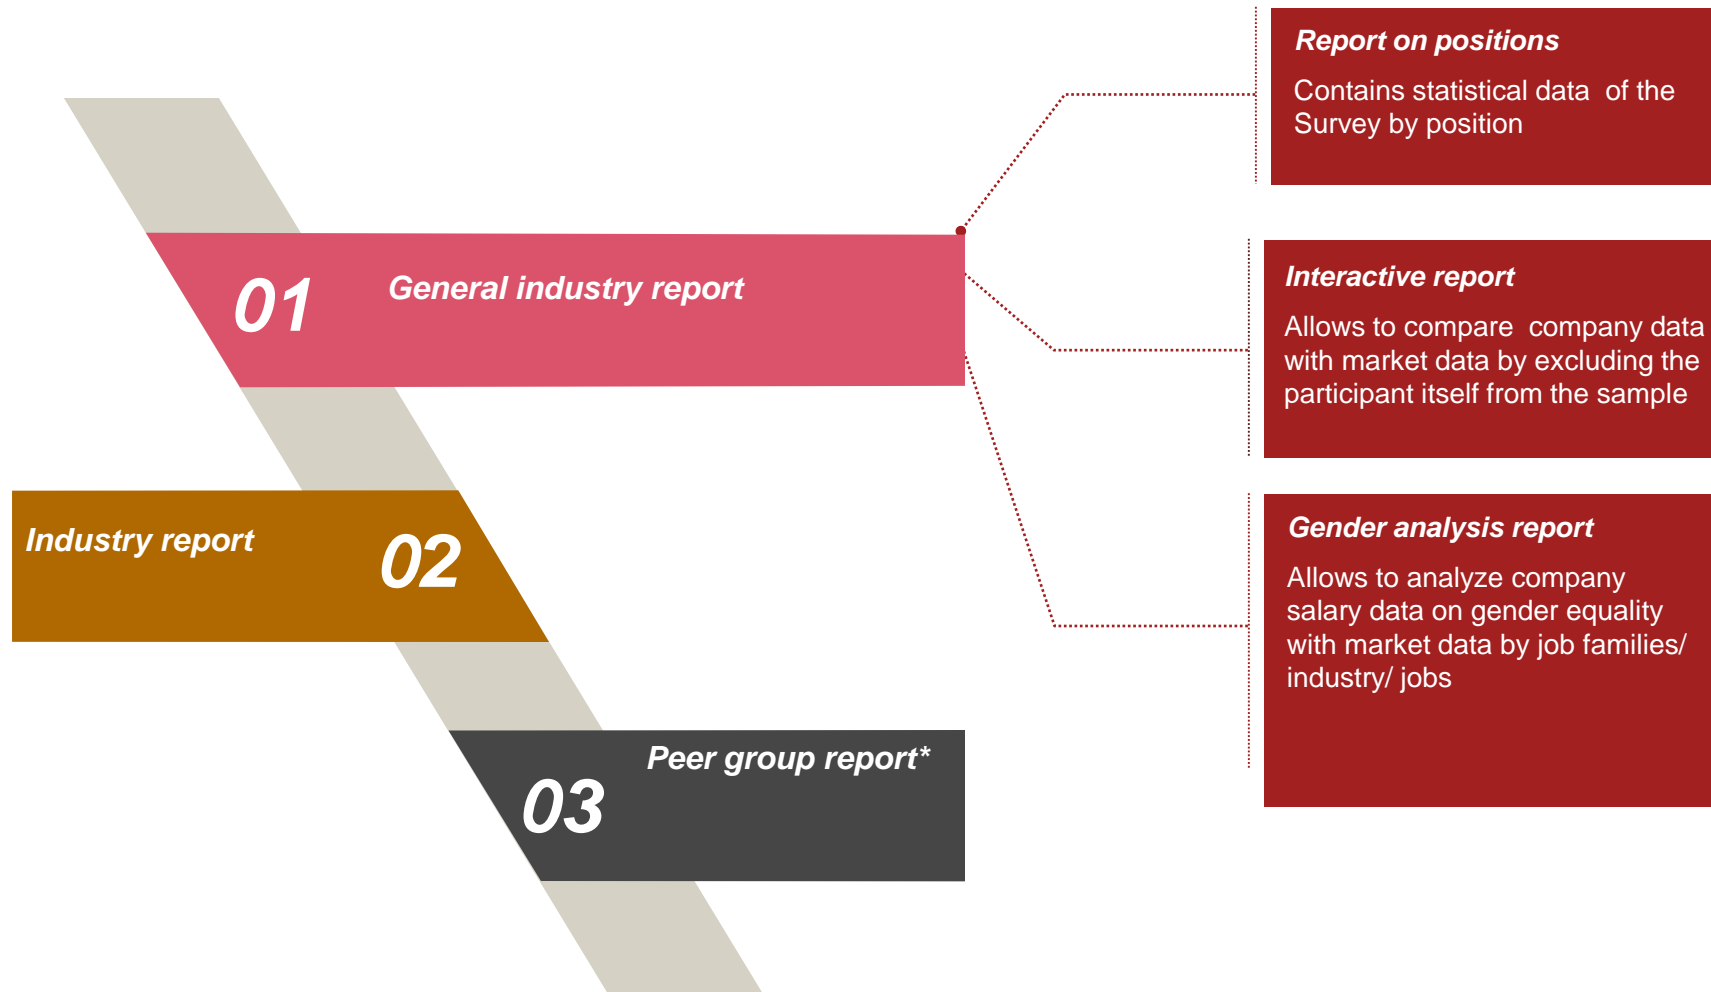

Individual meetings and consultations on the job matching and full support in completing the questionnaires.

Collection, and thorough verification of the original data and validation of the processed data.
Uploading the raw data to PayWell online platform for calculation of statistics of market data

Preparation and release of the report.

Note: The deadlines are set taking into account the average (in our experience) time required to collect and process data in the event of timely submission of data by participants.

PayWell report types

*Peer Group is a group of comparable companies among survey participants, selected by participants for the purpose of more accurate comparison.

Methodology PwC

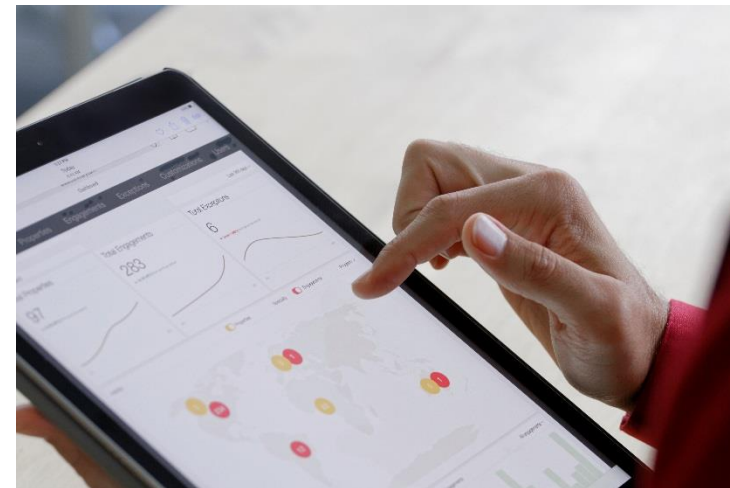

Consolidation of data

During the Survey, data was collected using HR policies, benefits and Salary data questionnaires. Salary data was collected based on the benchmarking catalogue of job descriptions and organisational charts specially developed for each sector.

The job matching process was conducted by PwC consultants together with representatives of each company. PwC consultants also assisted companies in filling in questionnaires via phone and personal meetings, when necessary.

The Survey data collection package included:

- ✓ **Job benchmarking catalogue** comprising 3000 benchmark jobs
- ✓ **Salary data collection sheet**, gathering information on gross monthly salary, fixed bonuses and performance bonuses.
- ✓ **Compensation and benefits questionnaire** contains organizational data: salary costs, headcount, staff turnover, legal structure etc.

Methodology PwC

Job matching with PwC job catalogue

In order to ensure a high level of data accuracy in the Survey, we have developed a job description in accordance with international standards and the specifics of various industries.

When comparing jobs, participants had the opportunity to indicate how the duties of individual employees of their companies corresponded to the general job descriptions prepared by PwC.

PwC Job Catalogue contains

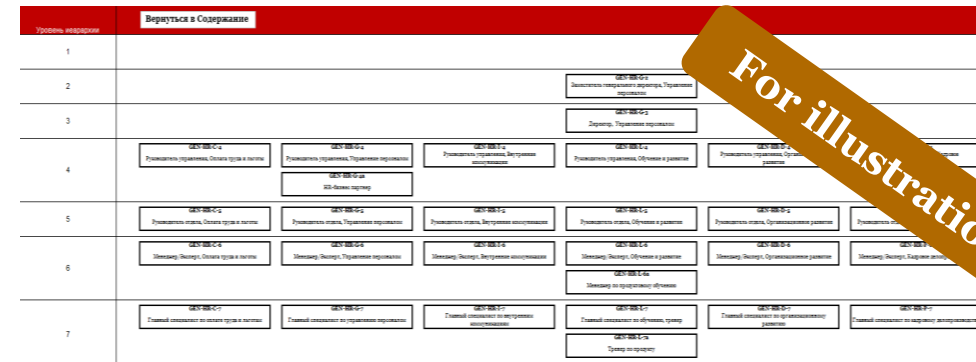

- **More than 2000 positions**
- **From 5 to 50** functional groups for different sectors
- **From 100 to 400** unique positions for different sectors

Combination of two approaches: functional job descriptions and hierarchical levels (grades)

Focus on sectors: sector specifics are taken into account

Individual consultations: for better job matching

Org. structure

For illustration only

Function	Code	Level	Title	Job description
Human Resources	SSC-HR-O-4	4. Managers	HR Operations Manager	Responsible for ensuring the efficient execution of the processes within one HR service group in the Shared Service Center. Responsible for ensuring that services are executed according to the SLAs for the specific HR service group and customers. Supervises, develops and coaches the Process Specialist team. Ensures consistent and efficient delivery of the operational services. Single point of contact for the Process Specialists and HR Operations Experts concerning personnel, professional, operational and organizational issues and for all escalations within the team. With a good knowledge of leadership skills, he/she can manage a team efficiently. Possesses a good knowledge of processes and policies of the respective HR service group.
Human Resources	SSC-HR-O-7	7. Experts	HR Operations Expert	Provides line managers, program/project managers, employees, HR Business Partners and Process Specialists guidance regarding processes, policies and procedures in the respective HR service group in general and consults on specific cases. The Expert is an escalation point for resolving special cases with regards to policy compliance. Depending on each HR service group, the Expert has specific tasks, e.g. in recruiting - selection of candidates. The Expert is aware of other HR functions' knowledge.
Human Resources	SSC-HR-O-8a	8. Specialist	HR Operations Senior Consultant	Handles moderately complex projects independently. Supports and provides back up for HR Operations Experts. Able to coordinate and evaluate activities of Associates and Consultants in their area. Performs administrative activities.

Methodology PwC

Sample weighting

In order to avoid market data being influenced by a company that provided a significantly greater amount of data than other companies, sample weighting was used when calculating statistical indicators for benchmark jobs. This weighting mathematically reduces the number of values from each company in order to prevent one participant from representing more than one third of the sample, based on which the results are calculated. This procedure does not apply if the company provided less than three data-points for the respective benchmark job. The original data is reduced by replacement with appropriate quartiles in such a way that the original variability of the sample is retained.

Company	Data points provided for the same benchmark job		Salary data included in statistics processing			Processing results	
Company 1 (15 data points for one benchmark job)	Accountant	3,500					
	Accountant	3,600					
	Accountant	3,700					
	Accountant	3,800					
	Accountant	3,900					
	Accountant	4,000	Percentile 10=	3,640			
	Accountant	4,100	Percentile 25=	3,850			
	Accountant	4,200	Average=	4,200			
	Accountant	4,300	Median=	4,200			
	Accountant	4,400	Percentile 75=	4,550			
	Accountant	4,500	Percentile 90=	4,760	Percentile 10=	3,596	
	Accountant	4,600				Percentile 25=	3,813
	Accountant	4,700				Average=	4,220
	Accountant	4,800				Median=	4,200
	Accountant	4,900				Percentile 75=	4,513
Accountant		Percentile 90=				4,844	
Company 2 (4 data points for one benchmark job)	Accountant	3,200	=	3,200			
	Accountant	3,800	=	3,800			
	Accountant	4,400	=	4,400			
	Accountant	5,600	=	5,600			

Methodology PwC

Confidentiality information

The data collected during the Survey is and will be treated as strictly confidential. Security measures include data coding, limiting the number of PwC Kazakhstan consultants who have access to the data of the organisations and presenting only summary findings which is not identifiable.

The rules of data disclosure should ensure an impossibility to identify individual salary data of a participant in the total statistics.

In order to ensure the biggest volume of statistical information is disclosed and highest confidentiality measures applied, within the PwC platform, the following approach is applied to determine the minimum size of statistical sample

Average	Minimum 3 data points from minimum 3 organisations
Median	Minimum 4 data points from minimum 3 organisations
25th/75th percentile	Minimum 6 data points from minimum 3 organisations
10th /90th percentile	Minimum 8 data points from minimum 3 organisations

Name	Calculation method
Average	The sum of all values in the sample divided by the number of these values.
10th percentile	The value dividing the sample in two parts - 10% of the values lie below this data point and 90% above.
25th percentile	The value dividing the sample in two parts - 25% of the values lie below this data point and 75% above.
Median	The value that is in the middle of the whole data sample: 50% of the values lie below this data point and 50% above.
75th percentile	The value dividing the sample in two parts - 75% of the values lie below this data point and 25% above.
90th percentile	The value dividing the sample in two parts - 90% of the values lie below this data point and 10% above.

Questionnaire filling in Compensation and Benefits Questionnaire

The questionnaire on policies and practices is filled out by participants in an online format via a secure PwC channel.

The image displays two screenshots of the PwC PayWell questionnaire interface. The left screenshot shows the introductory text, and the right screenshot shows the first three questions.

Данные об участниках Обзора Классификация участников (1/2)

Информация в данном разделе описывает участников Обзора с точки зрения правовой структуры, выручки, затрат и данных о составе персонала.

Участники Обзора в большинстве представлены компании с иностранным участием (49%), 34% компаний в Обзоре имеют 100% местное владение и 17% компаний со смешанным участием.

Рисунок 1: Классификация участников по правовой структуре

Формы владения

- 100% иностранное владение
- 100% местное владение
- Смешанное владение

Количество ответов: 49

Участники Обзора в большинстве (60%) представлены крупными компаниями с показателями по выручке свыше 10 млрд. тенге в год.

Рисунок 2: Классификация участников по выручке и затратам в 2017 году

Выручка в 2017 году

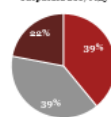

- От 10 млрд. тенге
- От 1 до 10 млрд. тенге
- До 1 млрд. тенге

Количество ответов: 49

PwC

Затраты в 2017 году

- От 10 млрд. тенге
- От 1 до 10 млрд. тенге
- До 1 млрд. тенге

Отчет по компенсациям и льготам Базовая оплата труда (2/4)

Основными факторами, влияющими на принятие решения по повышению заработных плат среди компаний-участниц Обзора, являются рыночные данные, результаты работы сотрудников, результаты работы компании, а также стоимость жизни/инфляция.

Рисунок 3: Факторы при определении заработной платы, % компаний, принявших данные факторы

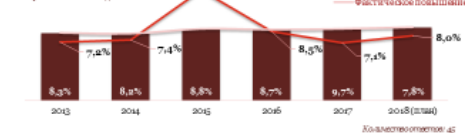

Количество ответов: 49

Тенденция пересмотра заработных плат

На протяжении последнего 5 лет с 2013 года средний процент пересмотра (повышения) заработных плат в среднем составил от 8,3% в 2013 до 9,7% в 2017. При этом официальный уровень инфляции в данный период варьировал от 7,1% до 13,6%. В целом, уровень пересмотра заработных плат был относительно стабильным на протяжении последних пяти лет и не зависел от уровня инфляции.

Рисунок 4: Общее тестирование по пересмотру заработных плат по годам

Количество ответов: 49

Системы грейдов

Система грейдов построена на оценке должностей и коррелирует заработных плат компании с рыночными данными и является основой систем для определения базовой заработной платы сотрудников компании. Не смотря на то, что более трети компаний-участниц Обзора используют данную систему в качестве установления вознаграждения.

Рисунок 5: Использование системы грейдов

Количество ответов: 49
