

Occupational Health and Safety Policy

Established in the region for more than 40 years, we have more than 4000 people in 12 countries across the Middle East, working to add value to our clients through fulfilling their needs in the advisory, assurance, and tax sectors.

We are committed to the prevention of injury and ill health at our offices for our employees, contractors, and visitors, where we undertake several occupational health and safety measures in order to guarantee the continual improvement of our occupational health and safety management system, and development of a positive health and safety culture by engaging our stakeholders effectively.

In context of the above, we seek to:

- Provide a safe working environment that exercises controls over occupational health and safety hazards.
- Provide employees with proper trainings that are identified through our training procedure.
- Monitor, review, and continually improve occupational health and safety objectives and programs.
- Comply with the applicable local laws and regulations of occupational health and safety in each country we operate in, where if no standard was set by the country, we seek to apply our own internal standard so far as is reasonably practicable.

This policy represents our general intent towards occupational health and safety management, and shall be made available to all our stakeholders, internal and external, on our region's website, and upon request by any interested party.

This policy will be reviewed on regular basis in order to keep it in line with our intentions and mode of operations.
