Internal Audit

A career within Internal Audit (IA) services will provide you with an opportunity to gain an understanding of an organisation's objectives, regulatory and risk management environment, and the diverse needs of their critical stakeholders. We focus on helping organisations look deeper and consider areas like culture and behaviours to help improve and embed controls. In short, we seek to address the right risks and ultimately add value to their organisation.

We perform IA support across 4 areas:

IA Co-source

Working alongside an organisation's in-house function to deliver internal audit's remit tailored to the organisation's needs. Working with large government and public sector, private sector, family business organisations and multinationals

IA outsource

Establish IA function and provide IA services aligned to the organisation's strategy and key risks it's facing. Often within government and public sector organisations/and emerging markets, family businesses.

IA Tech Audit

Any Technology Risk, Data Analytics and/or Cyber Security work delivered against an Internal Audit contract, as part of an Internal Audit plan or directly for the Head of Audit or Head of IT Audit. Increasing trend for IT co-source contracts.

IA Advisory

Providing advice and support to help organisations design, establish and enhance their Internal Audit function.

Governance, Risk and Compliance (GRC)

Being a member of the GRC team in Risk will see you working on a variety of challenging and career-advancing engagements. We help build resilience in organisations through excellence in governance, risk management, compliance and internal controls over financial reporting (ICFR).

Some of the areas we provide risk management for include:

Process intelligence

PwC can offer an end-to-end overview for any process across the organisation, giving our clients total transparency, as well as identification of current levels of standardisation and control efficiency. Closing the gap between how processes are intended to work, and how they work in reality is integral to business success.

Supply chain

We focus on helping clients assess business processes by identifying loops, manual intervention, roadblocks and weaknesses using technology. We enable our clients to enhance their control environment, improve automation and reduce inefficiencies as a result of remediating the gaps.

Policies and procedures

At PwC, we build tailored solutions to help our clients achieve their strategic ambitions. Robust policies and procedures can ensure an organisation is in compliance with laws and regulations, profitable and enables sound decision making.

Consulting

Can you think big picture, and get into the details? Do you enjoy brainstorming to test different ideas?

In Consulting, you'll get to work on a variety of clients, bringing fresh insights to the problems facing the public and private sector, as we help them optimise, transform and improve their business models and deliver better products and services.

Foundation for the Future

During your time in the FftF programme, you will have the opportunity to work closely with the best across industry and functional advisory services. In Consulting, you'll build core skills in a 20 month market-leading rotational programme. You'll have the opportunity to learn about what we do across our different consulting business areas and work with clients to drive innovation and growth. This will help you decide where you might specialise within Consulting once you complete the programme. We focus on helping solve client problems by offering deep industry and functional expertise on both the strategic and operational levels.

Teams you could rotate in:

Consumer and Industrial Products & Services (CIPS)

Our CIPS team works across a number of industries that are capital intensive and are currently undergoing large scale restructuring, transformation and privatization - These include power & utilities; industrial products; real estate & construction as well as transport & logistics. We deliver services such as supply chain management, spending efficiency, operational improvement and restructuring. We play a vital role in supporting these organisations on their growth and transformation agenda.

Financial Services

Financial Services effectively works with clients as they shape their businesses and execute their strategies. They advise on key issues such as the impact of risk and regulation, financial crime, innovations in mobile and digital technologies, the disruptive impact of FinTech, as well as the changing face of the customer.
