

Connected Tax Compliance.

Accelerate outcomes with connected tax compliance

Finance and tax functions are **stretched to capacity** - balancing growing compliance obligations and increasing data requirements against resource constraints and cost reduction programmes.

PwC has reimagined what best-in-class compliance and reporting looks like; integrating and automating the process to deliver a faster, smarter compliance experience across taxes and territories.

Our end-to-end approach addresses the entirety of the compliance process, not **just** producing the returns. We handle everything from data capture to analysis and reporting, and build our team around your needs, meeting you where you are and to take you where you want to be.

Connected Teams

Get straight to the right people with the right answers. One connected and coordinated team across various taxes and territories that seamlessly integrates as an extension of your team.

Connected Data

Acquire data only once and reuse it across multiple processes. Consistent, connected and trusted data with inbuilt data validation controls ensures you meet your compliance requirements accurately and on time.

Connected Insights

Turn tax into a strategic driver by connecting data, people and outcomes across taxes and jurisdictions to surface deeper insights, discover unseen opportunities and create value beyond the return.

Tax Operating Models tailored for your business needs

Quality review and advising

Co-sourced compliance

Outsourced compliance

Tax Managed Services

Automated data extraction

Fewer data requests

Audit ready reports

Smarter standardisation to transform data in real time

Powerful analytics

Intuitive data visualisations and predictive AI

Highlight trends and anomalies

360-degree visibility across your organisation's tax landscape

Real-time governance and status reporting

Digital audit trail

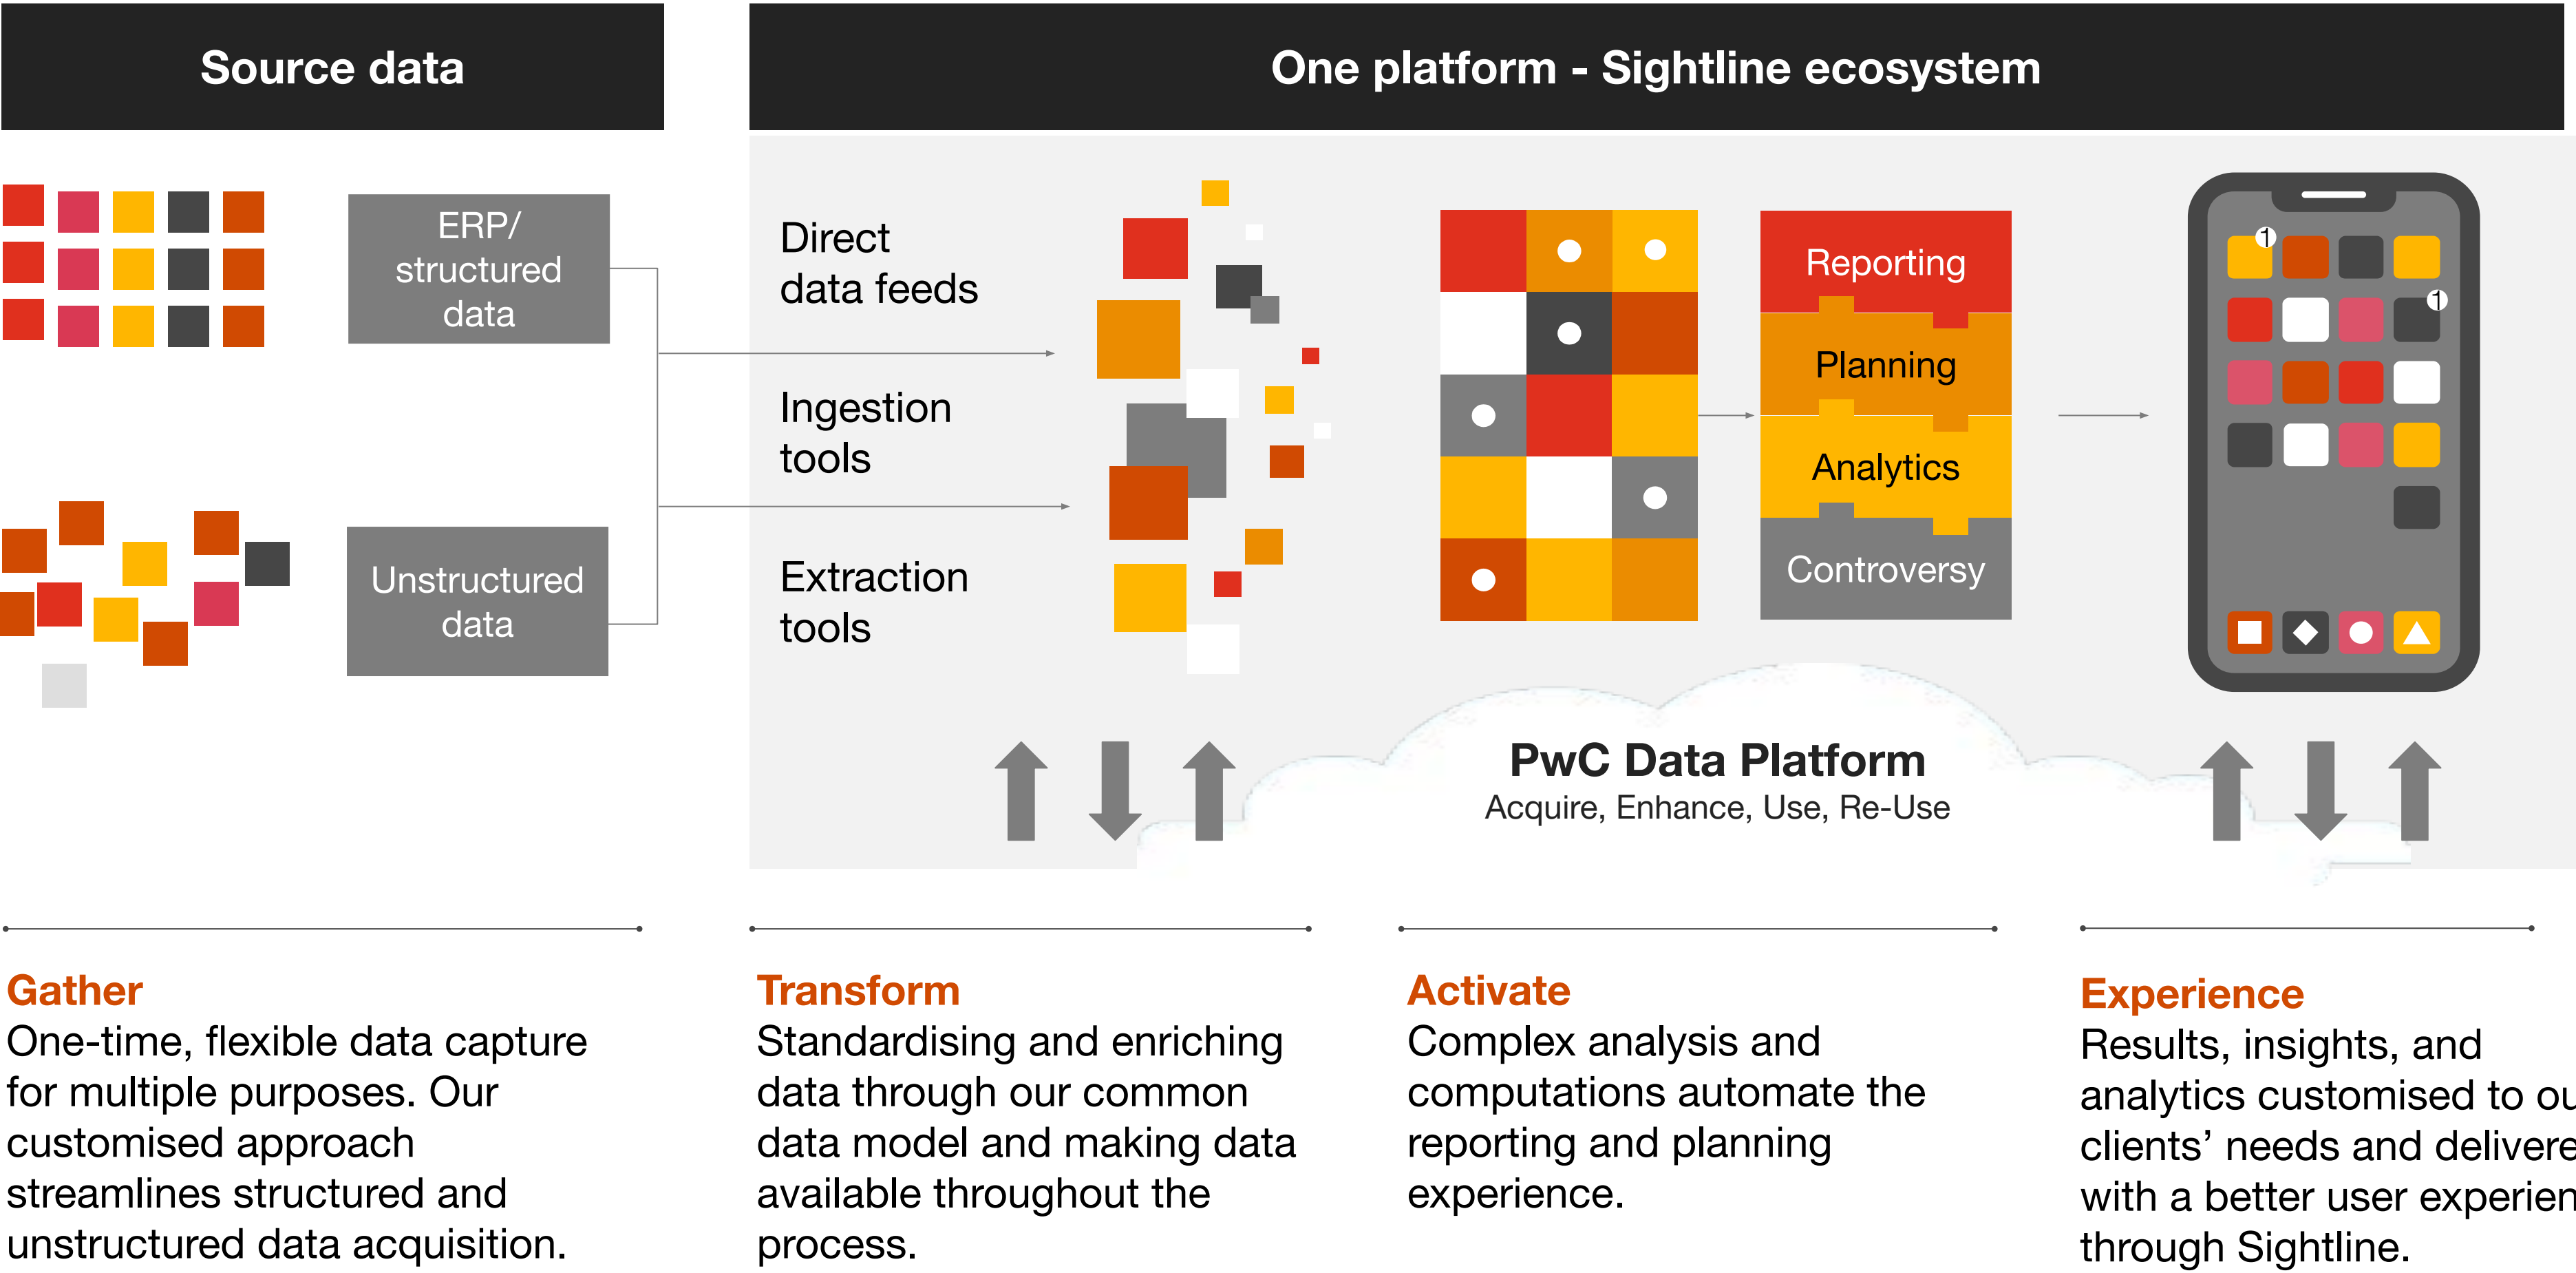

Connected tax compliance focussed on less for you to manage, **more for you to know.**

The PwC tax compliance experience is **centered on Sightline**, our collaborative technology platform which integrates **all of PwC’s industry-leading tax applications in one connected ecosystem**.

Sightline gives you real-time **360 visibility** across your organization's tax landscape, with clear and customisable **dashboards** to monitor progress across services, providing you with oversight and governance, and a digital audit trail, without coordination and project management effort on your part.

The Sightline platform also delivers detailed outputs and analysis on demand and real-time status updates enabling **rapid insights and business partnering**.

Sightline meets you where you work and is integrated with **Microsoft Teams**, allowing you to share files, respond to requests, see the status of deliverables (and much more!) directly in the Teams interface.

An intuitive, data-driven experience.

Fewer data requests, automated data extraction and smarter standardisation that **transforms your data** in real time, reducing the time required for data preparation and **extraction by up to 60%**

The answer to compliance complexity
