Dear Partners

ElectroGas Malta Limited is a company set up to provide electricity and gas to Enemalta Corporation. An eighteen year contract has been signed with Enemalta which includes building a CCGT power plant and LNG to gas conversion facility, as well as provision of LNG storage facilities. The company was required to set up quickly, from scratch to meet tight deadlines.

During the past year or so, PwC have supported us by providing various accounting, tax and auditing services. The various PwC teams have always been technically proficient, friendly and responsive. They have been flexible and where necessary have adapted their services to our needs.

We look forward to continuing our relationship and are pleased to recommend PwC to other businesses.

Yours faithfully

Catherine Halpin
Commercial Director
ElectroGas Malta Limited
