

# Articulate insights

With the power of data and AI

## AI-powered data for decisions that matter

Our strategic 'less-is-more' approach to data modernisation maximises the benefits of AI. We integrate AI into data solutions so you can:

Make faster decision—driving better response times

Focus on decisions that matter—because GenAI helps you do the thinking

Trust your data by having GenAI accelerate your data governance process

## Elevating your data function from steward to strategist

### A human-led, AI-powered solution

- Integrate industry specialists and data technologists to deliver tailored data solutions
- Establish a trusted data environment with effective governance for advanced analytics use cases
- Cultivate a data-driven culture with HRDF-certified training for organisational upskilling

### Scale your impact with our technology alliances and enablers

- Collaborate with AWS and Microsoft Azure for rapid scaling and partner with leading data solution providers to enhance data governance and analytics
- Offer advanced data governance tools for optimised data management operationalisation

# 82%

of Asia Pacific CEOs have adopted GenAI in the last five years
