# Managing your business risk and protecting reputation and value

## Overview

Your reputation – with your customers and employees, the public, regulators and other companies – is what keeps you in business and underpins your success. But reputation can be lost with terrifying speed. An ‘attack’ can be either internal or external, causing great financial, operational or reputation impact.

You need to know the facts immediately. If there’s a problem, you need a speedy explanation and a credible plan to fix it.

Our team of specialists, one of the largest in Namibia and Southern Africa, can tackle any crisis or anxiety costing you sleep: corruption, fraud, cybercrime, contract disputes, litigation, intellectual property and licensing compliance, insurance claims, regulatory investigations, and so on. We’ll work with you to overcome complex challenges, with an uncompromising approach in the war against economic crime. We’re your trusted advisor, your expert witness, your investigator and your representative in mediation and arbitration.

## So, how can PwC Forensics' services help you?

### Anti-Bribery & Corruption

Corruption and bribery can expose companies to significant regulatory and reputational risk. We provide confidential advice to companies on their anti-bribery and corruption programmes – be that locally, regionally or globally.

### AML

PwC assists with assessing how vulnerable an organisation is to being used for money laundering and evaluating the effectiveness of their compliance programmes. Sanctions can be heavy for getting this wrong. We will reduce your risk and satisfy your regulatory requirements by developing and implementing tailor-made, robust and practical AML compliance controls and trainings.

### Forensic Investigations

If your organisation has been exposed to employee misconduct, vendor fraud or bid collusion, PwC will combine investigative techniques and advanced technology with deep industry and regulatory knowledge, to find out what went wrong, calculate how much damage was caused, and build a case against those responsible. We can also act as fact witnesses if a matter ends up in court.

## Fraud Risk Management

We'll assess your organisation's readiness to manage fraud, its exposure and then develop and help you implement a tailored anti-fraud programme to close the gaps. This will include practical and comprehensive policies supported by fraud response protocols, an ongoing risk monitoring framework, and communications and awareness training programmes.

## Cyber-attack & Breach Response

Cybercrime is one of the most disruptive forms of economic crime and increasingly one of the most prevalent. We will assess your vulnerability to cyber-attack, develop a cyber security programme and a cyber incidence response plan to prepare and respond to cybercrime, and set up and conduct cyber awareness training for all staff who are connected to the outside world.

## Global Intelligence

If you are looking to enter new markets, acquire or merge with other entities, or simply begin using the services of a new vendor, we can provide the on-the-ground intelligence you need to minimise your financial, regulatory and reputational risk.

## Dispute Analysis & Expert Testimony

We provide business and financial advice to lawyers and their clients for disputes; help companies determine the effect of accounting adjustments for a merger or acquisition post-closing disagreement; or quantify breach of contract damage, third-party liability, and intellectual property infringement. We can then back this up with expert testimony at depositions, trials, and arbitrations.

## Contact Us
