Build trust in society and solve important problems

We help you turn vision into value so you can set the future in motion.

At PricewaterhouseCoopers Business Services Philippines Co. Ltd. (PwC BSP), we work with you to build trust and create measurable impact. Our people are focused on helping you grow, adapt and lead through change.

We bring the right blend of talent and technology to help you turn complexity into clear insights, and challenges into opportunities.

We take pride in the exceptional capabilities of our Assurance Offshore Services (AOS) and Business Operations Services (BOS) groups. Our AOS team provides offshore support for audit and assurance services, while our BOS team focuses on non-assurance and internal firm support services, both locally and internationally.

Together, we're committed to providing high-quality, cost-effective solutions by leveraging our deep expertise, proven best practices and shared resources.

Assurance Offshore Services

We provide the stability and continuity your organization needs to effectively manage financial performance and operations. Serving as an extension of your team, our offshore professionals bring in-depth expertise and collaborate seamlessly with your internal stakeholders. We ensure compliance with local audit and reporting standards, while delivering strategic support tailored to your business requirements.

- **Audit and assurance support**
 We support your audit needs through financial and statutory audits, group consolidation, review engagements and internal control assessments.
- **Internal control testing**
 We review control design and implementation, test operational effectiveness and apply audit technologies to help improve results.
- **Substantive audit procedures**
 We conduct detailed testing, such as Net Asset Value-based reconciliations, and use trend and ratio analysis to support asset valuation.
- **Specialized audit support**
 We review component auditor work and coordinate audit activities across industry-specific entities and complex reporting structures.

Business Operations Services

We help you take the complexity out of running your business. You gain reliable support across finance, compliance, workforce and operations, allowing you to focus on strategy and growth. We bring discipline to processes, reinforce governance and improve the way your teams work. With us, you operate with confidence, knowing you can protect what you’ve built and lead with value.

- **Financial management**
 We handle core finance tasks such as transaction processing, account reconciliation, financial statement preparation, tax filing assistance and fixed asset tracking.
- **Compliance and governance**
 We help you stay compliant by managing permit renewals, performing due diligence and sanctions screening, conducting risk assessments and supporting governance reviews.
- **Human resource and workforce solutions**
 We support workforce transformation, deliver learning programs, manage capacity planning and provide secondment solutions.
- **Operations and process optimization**
 We help improve business processes by reviewing controls, managing operational changes, supporting User-Acceptance Testing (UAT) and projects and overseeing procurement and vendor activities.
- **Admin and general support**
 We provide end-to-end admin support, manage documents and correspondence, deliver creative designs and automation and basic IT assistance.
