

# Putting theory to practice: Getting the most from hedge accounting

## Benefits of attending

As more organisations enter into hedging relationships to manage risks, hedge accounting is being adopted to reduce the volatility on the financial statements. However, the complexity of hedge accounting is a challenge to many professionals across an array of industries.

This full day workshop provides insights and practical tools to increase the participant's understanding of hedging and hedge accounting. Learning is achieved via theory, examples and real-life case studies from our experience advising over 100 companies on hedge accounting. Additionally, participants will gain insights into real world examples, common issues and pitfalls from experienced professionals who are practicing in PwC. We will also share worksheets and templates to enable your company to achieve hedge accounting under FRS 39 for common hedges.

By the end of the course, participants should have an in-depth understanding of hedging and the impact of hedge accounting on the financial statements.

## Objective

Gain an understanding of hedge accounting and learn how to easily implement and comply with the hedge accounting rules for common hedges

## Who should attend?

Finance professionals  
(Accounting, Reporting),  
CFO, Treasurers
