

Visibility and transparency over tax Encompass

With organisations under increased pressure with regulatory and compliance requirements becoming ever more complex, it is essential that organisational processes become more transparent and effective.

How do you monitor what needs to be done and when it needs to be completed? How do you keep track of who is responsible / accountable for each piece of the jigsaw?

How can PwC help you?

Encompass is the stand alone technology solution from PwC for monitoring, tracking and controlling your processes. Providing accuracy and visibility is an essential element for senior executives. Encompass can be applied to any process within your organisation and can be used as a way to oversee multiple activities that could have global reach.

Whether applying to corporate tax, GST, transfer pricing or any organisational processes, Encompass can improve efficiencies and provide visibility and access to reporting information. Encompass provides the mechanism for analysis efficiency and to track your key performance indicators over time. Encompass has been designed with ease of use in mind; business technology solutions fail where they are over engineered and complex to use. Encompass is easy to implement and capable of adapting to your needs as they change. Enabling real-time updates and ensuring collaboration is uncomplicated. At a time when tax professionals are finding themselves caught up with clerical processes and facing increasing regulatory burden, this tool enables a more focused, streamlined approach to risk management, providing valuable information and offering business intelligence.

The key features and benefits of Encompass are :

- Ease of use Designed around the needs of all users
- The ability to track and monitor any process
- Providing visibility and control across your entire operation for the processes you want to track
- Providing a workflow and document repository as standard
- Automated notifications and alerts, configured to your needs
- Powerful, flexible reporting
- Risk tracking and control
- Fully web based No additional software or hardware required
- Administration controlled by you
