## ***Technology Consulting***

At PwC, our vision is to create meaningful relationships with our clients by powering the next generation digital enterprise. To achieve this, we want to focus on becoming the most innovative and trusted digital advisory and transformation partner for our clients, while re-inventing ourselves into the leading emerging technology and cloud services business integrator in the region.

We engage with large-scale financial services institutions on some of the most advanced emerging technology and FinTech agendas. Our services in these areas span from “Strategy through to execution” and in some cases fully managed operations. Our approach is to engage with you and bring the best of our global technology capabilities to bear based on our deep industry expertise and understanding of your key business imperatives.

Our services include:

- Cloud Services
- Digital and Emerging Technology – Advisory & Enablement
- Software as a Service Transformation and Implementation
- Cyber Security Services
