Tax Governance Services

Managing today's risks and beyond

In today's fast-changing global tax landscape—driven by new regulations, transparency demands, digital disruption and ESG—organisations face both challenges and opportunities.

PwC offers tailored tax governance solutions that go beyond compliance. We help you build a resilient, future-ready tax function aligned with your business strategy.

With a holistic view of your operations and culture, we deliver practical roadmaps to boost efficiency, manage risk and drive sustainable transformation.

How can PwC help?

- **Tax policy and governance preparation:** We support you in building a robust tax policy and tax governance. Our aim is to help you identify areas for improvement, reduce tax risks and enhance control to safeguard your organisation.
- **Tax function design:** We work with you to develop a tax operating model and strategy that complements your broader business goals. This includes reviewing tax policies and streamlining key tax processes for better alignment and efficiency.
- **Tax control framework:** We design and implement end-to-end processes to manage tax risk and compliance efficiently, providing actionable insights and recommendations tailored to your needs.
- **Tax control assurance:** We help you review and test your tax control framework using our proprietary **Tax Maturity Management Model (T3M)**, built on globally recognised standards including COSO and OECD principles. This approach ensures your tax governance remains effective, current and aligned with regulatory changes—enhancing risk detection, strengthening control and building confidence in your tax function.
