

# *Improve your bottom line*

## Raising effectiveness of procurement function

We support the planning of optimization or value growth activities. We support their implementation. We help to ensure that the desired effects become reality.

### ***Benefits for our clients***

- Enhanced visibility of corporate-wide spend and clear understanding of total cost drivers
- Higher savings achieved by leveraging corporate-wide spend, category expertise and benchmarks
- Improved services and supplier base resulting from a more rigorous supplier selection process
- Reduced risk exposure through effective and transparent service agreements/contracts
- Policy, governance and reporting framework driving compliance to process and systems

---

## *Services we offer*

PwC offers innovative solutions to organizations, whether they are seeking to transform their entire procurement operation or address specific needs.

Our approach allows us to accelerate sourcing and supply management initiatives to realize greater savings and improve supplier relationships, whilst building your infrastructure and capability to ensure that the savings and benefits are sustainable in the long-term.

Project initiatives:

- Developing procurement strategy
- Building a procurement business model
- Modelling procurement and tendering processes
- Review and support in selecting IT systems
- Managing procurement costs and categories
- Developing a employee competence model for the procurement function
- Procurement contract assurance
