

Closing fast

Shortening financial closing times

When shareholders need financial information provided quickly and reliably, while using resources efficiently, the ideal solution is SmartClose, a methodology designed to accelerate financial closing processes and timeframes.

Benefits for our clients

- Complete transparency of the company's operations through use of uniform data
- Adherence to global best practices in the presentation of financial statements
- Improved report quality and investor confidence
- Cost reduction due to the use of standardised processes and procedures
- Increased staff motivation
- Fast management decision-making based on reliable financial information

Services we offer

Our SmartClose methodology helps isolate potential problems in reporting processes and focuses on achieving tangible results in a short time period.

The project scope typically includes developing a conceptual framework, and designing and implementing a detailed suite of initiatives covering all of the company's operations.

Project initiatives:

- Optimisation of business processes and methodological approaches
- Development of policies and procedures
- Performance improvement
- Support in implementation of IT solutions
- Streamlining organisational structures and HR processes
