Project Manager Professional (PMP)® certification

pwc

The Project Management Institute's Project Management Professional (PMP)® is the most important industry-recognised certification for project managers. You can find PMPs leading projects in nearly every country and, unlike other certifications that focus on a particular geography or domain, the PMP® is truly global. As a PMP, you can work in virtually any industry and in any location. Currently there are over 750,000 certified project manager professionals globally.

The course is designed to:

• Prepare for the exam - it is our main common objective

• Learn various project management tools recognised as international best practices.

• Enhance your knowledge if you are just beginning your project management journey

• Improve your knowledge of English in this area - all the terminology is given in English with translation and explanations in Ukrainian/Russian*

• Meet professionals in this area and share experience and knowledge in preparing for and sitting the exam

* while students can opt for the Russian-language version of the exam during registration, we highly recommend selecting the original English-language version.

What we will use during the course:

• PMBOK (Project Management Body of Knowledge) v.6.

• PMBOK-based presentation materials that you will be able to keep in a book format

• Various mind maps to improve understanding of each knowledge area and formulas

• Double-sided flashcards to improve memorisation of terms and definitions

• Question banks similar in style and content to exam questions*

• Games that will help learn PMBOK in an accessible, fear- and chaos-free manner

*real certification exam questions cannot be found anywhere as they are kept secret by PMI and not sold on the market

Course curriculum

(i) The course comprises 48 hours delivered in 6 days: 1 – 2 days with 1 – 2 week intervals.
