

Seminar

“Project Management”

Who is it for?

Project management training is relevant for current project leaders and applicants for this position, project team members and key project stakeholders.

The seminar will help deliver on practical tasks

- Learn the comprehensive approach to organisation of project activities;
- Learn tools for identification and analysis of project stakeholders;
- Develop practical skills of initiation and launch of a new project;
- Understand planning of project resources, activities and outcomes;
- Analyse project implementation processes in detail;
- Develop a risk log and plan project risk management activities;
- Develop an effective project reporting system.

Why PwC Academy?

- Appropriate balance between project management theoretical background and practical tasks;
- International relevant experience and advanced knowledge of our tutors;
- Real-life situations based on experience of leading foreign and local companies;
- Customised case studies and practical assignments followed by discussions with tutors.
