PwC Fraud Operations Support

What
PwC can provide operational support along your path to operational efficiency (i.e., short-term ‘surge support’, or longer term proactive capacity management support).

Why
Given the evolving fraud landscape and customer needs, Fraud Operations teams are often challenged when having to respond to change or increased demand (e.g., new products / services, customer base expansion, regulatory requests)

How
Utilizing PwC’s diverse set of technology enabled assets, coupled with our right-sized operating model, we can supplement and support your Fraud Operations team, as follows:
- On-going, fully outsourced support,
- Selective outsourced support integrated into the BAU Fraud Operations, and
- Back-up support for overflow, holidays, nights and weekends
