Ovation Brands Reinvents Its Business

"Ovation Brands is a national restaurant chain with over 350 stores. We were grappling with disparate systems, data integrity issues, and declining sales. We needed to transform quickly, and the IT and business model needed to be flexible to quickly accommodate changes. PwC's Cloud delivery experience and Oracle's ERP and HCM Cloud provided a powerful combination that's helping Ovations successfully navigate our transformational journey. We've aligned our HR strategies, technologies, and business objectives and also simplified and automated processes. And, we can plan for future capabilities as we grow. It's exciting. We've got a reinvention underway."
