PwC’s Patient Digital Care Solution

Helping providers enhance patient care

PwC Patient Digital Care, powered by Salesforce, is an intuitive, easy-to-use portal that enables providers to extend care beyond the office visit to easily deliver personalized information, services, and support to patients throughout the treatment cycle.

Solution benefits

- Personalized care plans to easily communicate critical information to patients
- Patient request management, including faster response times to patients’ questions
- Real-time surveys to easily track patient feedback and improve patient experience
- Connected community that lets patients and healthcare professionals share their experiences
- Resource repository with health-related information, products, and local services
- Integration of wearable and mobile devices
