**Identity Platform as a Service (IdPaaS)**

The expected growth for the IAM cloud market size is estimated at $400M in 2017. Meanwhile, clients are having trouble finding and keeping technical resources to support and operate their IAM solutions. The Core IdPaaS Platform is an orchestration and management platform which can be used to instantiate virtual private IdPaaS management platforms and ForgeRock Identity Suite for our clients.

**Available Services**

<table>
<thead>
<tr>
<th>Identity Platform</th>
<th>Implementation</th>
<th>Operations</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Instantiation of Prod and non-prod cloud environments</td>
<td>• Support for multiple scale integrations and customizations for Access Management and Directory Services</td>
<td>• Daily care and feeding of the platform and supporting technologies</td>
</tr>
<tr>
<td>• Vendor patching of application server and platform tools</td>
<td></td>
<td>• Tier 2 and Tier 3 ticket handling</td>
</tr>
<tr>
<td>• Monitor network and connectivity</td>
<td></td>
<td>• Performance monitoring and scaling</td>
</tr>
<tr>
<td>• Execute disaster recovery exercise</td>
<td></td>
<td>• Quarterly vulnerability scans</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Support for day-to-day operations such as on-boarding, data cleanup, and reviewing inactive accounts</td>
</tr>
</tbody>
</table>

**PwC Differentiators**

- Faster time to market
- In-depth knowledge of IAM Implementation and Operations (over 15 years and 4 million hours)
- Cloud-agnostic solution with dynamic scaling capabilities
- Adheres to regulatory compliance requirements

**Customer Pricing Model**

<table>
<thead>
<tr>
<th>Service</th>
<th>Price</th>
</tr>
</thead>
<tbody>
<tr>
<td>Identity Platform:</td>
<td>TBD</td>
</tr>
<tr>
<td>Implementation:</td>
<td>Starting at $100K</td>
</tr>
<tr>
<td>Operations:</td>
<td>Starting at $10K/month</td>
</tr>
</tbody>
</table>

**Add Ons**

- DevOps
- Identity Management, Identity Gateway, or User Managed Access
- Pre-packaged Functionality or Products (including ENCAP)
- Premium SLA

**Purchasing Options**

**Option 1. Purchase Services from PwC Consulting - Channel 2**

- Client buys Identity Platform, implementation and operations from PwC Consulting who resells the platform from ForgeRock

**Option 2. Purchase Services from PwC Consulting - Channel 1**

- Client buys Identity Platform, implementation, and operations from PwC Consulting
- Client becomes Channel 1 and operations are taken over by a Non-PwC partner. The Platform contract is transferred to ForgeRock

**Option 3. Purchase Identity Platform from ForgeRock**

- Client uses an implementation partner and operations partner to run

**Option 4. No Direct PwC Consulting Purchase**

- Non-PwC partner resells Identity Platform from ForgeRock
- Non-PwC partner sells implementation and operations to the client
Identity Platform as a Service (IdPaaS)

PwC is providing a middleware platform on which clients and/or their integrators can quickly implement and operate Identity Solutions.

Current Capabilities

- Cloud based clustered deployment of Access management solution with OpenAM and OpenDJ
- Foundational authentication use cases - supporting policy based agent, Federation, and REST APIs
- Dynamic sizing and scaling as per client requirement and intelligent orchestration
- Docker-ready solution, ready to deploy any cloud provider
- Remote execution and configuration automation
- Security control and server hardening
- PKI

Upcoming Capabilities

- Load Balancing, High Availability, and DNS
- Monitoring
- Management Utilities and Interface
- Compliance - FICAM, ISO27017, and GDPR
- SIEM / Reporting, including SOC reports
