PwC’s Spend Analytics tool is a part of the Model System Base+ solution. It integrates Oracle Supply Chain Cloud Services offerings with Oracle Apex UI to allow users to identify misclassification of purchasing categories and determine their drivers of cost savings.

Solution benefits

- This reporting integration provides insights into the effectiveness of existing spend analytics
- Easy to find discrepancies in spend classification based on Buyer, Supplier, Region and Project Expenditure Type
- Highly customizable rule engine allows for accurate determination of misclassified POs for each client
- Early insight to GL based misclassified spend

Oracle technology leveraged

- Oracle Procurement Cloud
- Oracle Apex UI
- Oracle DBCS
