An interactive dashboard, to access, visualize, and compare Federal and State guidance on workforce decisions

We have designed an interactive dashboard to help navigate the rapidly evolving regulatory landscape. We have gathered the latest Federal and State guidance for employers in response to COVID-19, which is changing day-by-day.

Questions being raised:

- Employees are currently working reduced hours, can they file for unemployment benefits?
- Can employees and employers benefit from a Work Share Program?
- Does an employer need to provide its employees with written notice in the event of a pay reduction?
- Can independent contractors receive unemployment?

The answer is, *it depends*, since the regulations vary state-by-state.

The Dashboard can help you find:

- The rules regarding state unemployment insurance benefits to which employees may be entitled
- The evolving policies related to paid sick leave and family leave
- What notification companies must give employees before furlough actions can be taken
- If any payroll-related changes have been instituted in response to COVID-19
What if you had a solution that accelerated and streamlined your workforce decisions?
What if it let you...

- Visualize regulatory guidance as it relates to: Paid Sick Leave, Paid Family and Medical Leave, and Unemployment Insurance
- Access the latest guidance to support your workforce decisions on a daily basis
- Compare guidance on a state-by-state basis

That's what we're building today. Ask us about it. We'd love to tell you more.
