International Tax Desk Program

Local Knowledge for a Successful Global Strategy

August, 2020*
International tax desk program

In today's dynamic business environment, US multinational companies should have real-time access to in-depth foreign tax intelligence in order to identify opportunities and manage global risks. Moreover, keeping abreast of legislative and regulatory tax changes as well as understanding tax trends in key jurisdictions, not only provides the necessary information for properly administering the tax function, but also can lead to a competitive advantage in the marketplace.

Local knowledge for a successful global strategy

PwC's International Tax Desks (ITD) are comprised of experienced tax professionals from Europe, Latin America, Asia and Africa with deep region-specific tax and business knowledge.

Our ITD professionals are an integrated part of our US International Tax practice as well as PwC's extensive global tax network, helping to provide coordinated service across borders. They can help provide companies with insight into tax and business developments around the world, including planning ideas that are tailored to the jurisdictions in which companies operate and to specific circumstances and needs. The ITD team also keeps companies up to date on tax developments through regular insights, webcasts and seminars.

By working with our ITD, companies can access our experience in advising on the multi-faceted aspects of cross-border and in-country international tax planning, including: corporate restructuring; acquisition and divesture planning; holding company strategies; financing arrangements; global supply chain and intellectual property planning; withholding tax reduction; and foreign tax management.

Business needs are constantly changing and so are foreign and US tax rules and practices. Planning to accommodate these changes requires fresh thinking and the latest insights into current tax developments. PwC's ITD can help companies address challenging tax and business complexities, enabling them to operate efficiently across different jurisdictions, expand into new markets and progress toward their overall business objectives.
