

Stakeholders demanding greater transparency than ever before – and over more than just finances.

The global economy is increasingly volatile and weakened by resource scarcity, ecosystem degradation, inefficiency and climate change.

Sustainability reporting can help a company to respond effectively to stakeholders whilst providing a platform to manage economic, environmental, social and governance performance.

# *Global Reporting Initiative (GRI) G4 Certified Training Course*

*2 day course, 24<sup>th</sup> and 25<sup>th</sup> February 2016, Ha Noi – deliver in English*

**Most organisations know that the sustainability issue can no longer be ignored. Whether driven by corporate conscience, stakeholder pressure or regulations, organisations recognise that action must be taken now. Sustainability has moved far beyond philanthropy and ethics. It's now at the heart of corporate strategy and competitive advantage.**

Companies are increasingly using sustainability to create business value or integrating financial and non-financial reporting to identify all value sources. Sustainability can spur product and service innovation, and disclosing shared values can support companies' license to operate.

This training course will enable participants to understand and coordinate the GRI sustainability reporting process, a global gold standard in Sustainability reporting. The course will provide a basis for working on the Sustainability report for your own organisation and will provide guidance on how to ensure a high quality report and maximise the benefits of GRI reporting.

In May 2013, GRI issued new guidelines "G4". G4 places the concept of materiality at the heart of sustainability reporting. This will result in reports that are strategic and focused. G4 is significantly different to the previous version as it places a greater focus on organization's economic, environmental and social impacts. Materiality becomes the threshold at which relevant topics are sufficiently important and therefore should be reported.

# Course Information

## Learning objectives

On completion of the course, participants will be able to:

- Identify and understand the main features of the G4 Guidelines
- Recognize the tasks and decisions to be made during the reporting process to prepare a G4-based report focused on material aspects
- Identify the content expected to be found in G4-based reports

## Who should attend?

The training is run in Vietnamese and of interest to controllers, investor relationship officers, communication specialists, internal auditors and sustainability coordinators or officers. Other interested parties are also welcome to attend.

## What is included?

- G4 guidelines
- GRI Implementation Manual (250 pages)
- Certificate of attendance from GRI

## Our GRI Certified Training Course Agenda

	Introduction: Sustainability reporting and the GRI Guidelines
<b>Day 1</b>	Prepare: Plan your GRI Sustainability Reporting Process
	Connect: Engage with stakeholders
<b>Day 2</b>	Define: Defining your material Aspects and Boundaries
	Monitor: Build your report
	Report: Communicate

*The course will cover all of the important changes in G4 such as:*

- Focus on materiality. Organisations should only report on their most material issues. They should also disclose their process to determine materiality
- New supply chain disclosure for each category (Economic, Environmental, Social): organizations should report in detail on their supply chain management when material
- New disclosures for Governance, Remuneration, Ethics and Integrity
- More focus on DMAs (disclosures on management approach) by means of a generic DMA format
- Updated indicators for Anti-corruption and GHG emissions (aligned with GHG Protocol, scope 1, 2 and 3)
- Application Levels replaced for two “In Accordance” reporting options: Core and Comprehensive
- New GRI Context Index with separate column for external assurance.
