Gen Z: Risk or Rewards for businesses?
In recent years, technology has developed at breakneck speed. But technology and solutions, without the people with the skills needed for today’s ever-evolving workplace, cannot create transformation and business impact.

Gen Z (born from the late 1990s to 2010), the newest members of the workforce, will be at the heart of this tumultuous time. Is Gen Z equipped with necessary skills to keep up with the Industrial Revolution 4.0? At the same time, how is this latest set of employees going to reshape the talent management strategy for businesses? And are businesses ready to attract and retain the best of Gen Z?

Join our webinar, co-organised with ACCA Vietnam and ManpowerGroup Vietnam to have your questions answered. With our latest researches and surveys on Gen Z, either in the international or local market, we hope that the insights and recommendations from this webinar will be useful and applicable to your businesses.
