

Finance for Non-Financial Professionals

2-day workshop, 20th – 21st April, Hanoi

Helping non-financial professionals raise their awareness of finance and use financial information in making better business decisions

Objective

To raise the level of financial awareness of participants and enable them to use the financial information provided to make better short-term or long-term decisions in managing their businesses.

Who should attend?

Directors, managers or anyone who uses financial information in the course of their work but does not have an accounting or finance qualification. Prior knowledge of accounting/finance is not required.

Benefits of attending

There is a greater need to understand financial information, particularly the balance sheet, income statement and cash flow statement as companies strive to enhance their shareholders' value. Decisions made without proper understanding of the financial implications may reduce profits and lead to a reduction in shareholder value.

By raising financial awareness, participants are better able to manage businesses' revenues, costs, profits and cashflow. Participants will also be able to use their new financial knowledge to make more effective decisions. This workshop will provide basic financial principles and cover generic financial management tools necessary for decision making. Learning is achieved via examples, which reinforce the theory and topic-related internationally acclaimed videos which successfully simplify the financial topic for the non-financial person.

Participants will also go through a highly interactive board game, (ProfitPlus™) which allows participants to experience how transactions affect the balance sheet and income statement over 2 trading years. Participants also prepare yearend financial statements. The ProfitPlus™ board game has proved to be participants' favourite part of the workshops as it enables practical application of the knowledge gained during the course. This highly successful and popular Finance Workshop has attracted more than 8,000 participants from various organisations.

Workshop agenda

Financial statements

- Understand the main components of a typical set of financial statements or annual report
- Appreciate the key underlying accounting concepts used in the preparation of financial statements

Business Analysis

- Know how to interpret financial statements and analyse businesses using the 7-step approach
