CONFERENCE AGENDA

"STRENGTHENING INFORMATION SECURITY TO PROTECT PRIVACY & ENABLE TRUST IN TODAY'S RISK LANDSCAPE"

25 Mar 2015 | Melia Hotel, Hanoi

INTRODUCTION
SECURITY WORLD 2015

Information security has never been so challenging. Security threats are increasing in number and intensity every year.In the face of more sophisticated threats and a rising burden of compliance and privacy regulations, traditional security approaches and systems are no longer effective to protect organization data. IT needs tools and techniques to protect the interests of today's complex organizations, to remain secured, to regain control over applications and data, including sensitive information and intellectual property, while supporting flexible work styles and promoting business productivity, agility and growth.

Given the situations, **Security World 2015** will feature the theme "**Strengthening information security to protect privacy & enable trust in today's risk landscape".** The conference aims to measure information security threats in organizations and to put forward key initiatives that help businesses keep pace with constantly evolving threats and security requirements in today's interconnected business ecosystem.

OPENING CEREMONY
SECURITY WORLD 2015

08:30 – 09:00

08:00	**Delegate Registration**
08:30	**OPENING REMARK** *Leadership from Ministry of Public Security*
08:40	**WELCOME REMARK** *Leadership from Ministry of Information and Communications*
08:50	**INTRODUCTORY REMARK** *Mr. Le Thanh Tam, CEO, IDG ASEAN*

KEYNOTES

STRENGTHENING INFORMATION SECURITY TO PROTECT PRIVACY & ENABLE TRUST IN TODAY'S RISK LANDSCAPE

09:00 – 12:00

Chaired by: *Major General Nguyen Tat Loi, General Director, IT Department, General Department of Logistics & Technology - Ministry of Public Security*

09:00	**Key considerations to improve IT Security in recent years** *Representative from Ministry of Public Security*
09:20	**Intelligent Cyber Security for the Real World** *Mr. Richard Staynings, Security Principal, Director of Cybersecurity Solutions, Cisco Systems*
09:40	**Enhancing information security monitoring capabilities by extending information acquisition and early-warning system** *Mr. Vu Quoc Khanh, Director, Vietnam Computer Emergency Response Team (VNCERT), Ministry of Information and Communications*
10:00	**Next Generation Cyber Security Platform** *Mr. Philip Hung Cao, Solutions Architect, Palo Alto Networks*
10:20	**TEA BREAK & NETWORKING**
10:30	**Security Matters - The evolution of Samsung KNOX** *Mr. Pham Ha, Solution Consultant, Samsung Electronics Vietnam*
10:50	**Managing cyber risks in an interconnected world: PwC global survey findings** *Mr. Jimmy Sng, Partner, Technology Consulting, PwC Singapore*
11:10	**A Smart Way to Protect your Data Center from APT with Comprehensive Trend Micro Solution** *Mr. Khongsak Kortrakul, Senior Technical Consultant Manager, Trend Micro*
11:30	**END OF KEYNOTES**

SESSION 1

PROTECT AGAINST DATA SECURITY THREATS: STRATEGIES AND TECHNIQUES

13:30 – 17:00

Chaired by: *Mr. Tran Duc Su, Director, IT & Network Security Center, Vietnam Government Information Security Committee*

The consequences to a breach in security can severely damage the reputation and performance of even the strongest organizations as well as leave governments with heavy losses. Cybercriminals are increasingly targeting governments, seeking to steal essential strategic information. An IDC's research shows that Asia-Pacific governments raise widespread concerns over illegal access to national confidential information (57%), attack against critical infrastructure (56%), purloined trade secrets and competitive information. This research also points out that data center is the most important part but also the most vulnerable one. (According to IDC, less than 5% of the $27 billion *spent* on security products directly addressed data center security).In Vietnam, there few agencies, ministries, departments have a well-equipped security division, which easily lead to losses of data/ information in the era where

every organization could engage in economic espionage. Session 1 is specifically designed to give Information Professionals tools and measures to limit the threat of internal and external breaches in security while reducing the complexity and cost associated with securing information.

13:00	**Delegate Registration**
13:30	**How network security monitoring can mitigate APT attacks?** *Mr. Tran Duc Su, Director, IT & Network Security Center, Vietnam Government Information Security Committee*
13:50	**Cisco Data Center Security Accelerates Your Business** *Mr. Richard Staynings, Security Principal, Director of Cybersecurity Solutions, Cisco Systems*
14:10	**A company won't survive without database security** *Ms. Miyuki Miyashita, Director, Insight Technology Vina Co., Ltd*
14:30	**Risk and Compliance for Public Sector** *Mr. Stanley Eu, Regional Director, Parasoft Singapore (& ASEAN)*
14:50	**TEA BREAK & NETWORKING**
15:05	**A proactive approach to security and resiliency in the New Style of IT** *Mr. Duong Quoc Vuong, Consulting Specialist, Enterprise Business, HP Vietnam*
15:40	**How to enable BYOD (Bring Your Own Device) while securing work data?** *Mr. Yue Shing Tam, Senior Account Manager – Channel, BlackBerry*
16:00	**DISCUSSION**
17:00	**END OF SESSION 1**

SESSION 2

CYBER THREATS AND SOLUTIONS TO CREATE A SECURE ENVIRONMENT

13:30 – 16:30

Chaired by: *Mr. Ngo Viet Khoi, Country Director – Vietnam & Cambodia, Trend Micro*

Cyber threats will continue to multiply at a more pervasive, persistent and sophisticated level. Attackers have access to significant funding; they are more patient and sophisticated than ever before; and they are looking for vulnerabilities in the whole operating environment, including people and process. There is a clear and present danger, but organizations are not moving fast enough to mitigate the known vulnerabilities. As 2014 drew to a close, the hack against Sony dominated all cyber security conversations. The hacker group took over the corporate network, stole a treasure trove of sensitive data and dumped them online to expose plenty of private information such as email exchanges of executives, names and passwords, and personal information of involved parties. The recent attack reminds IT administrators to learn from such incidents and think ahead in terms of securing their network infrastructure. Given these challenges, this session will cover initiatives and solutions in addressing cyber risks to help organizations defend their own networks.

13:00	**Delegate Registration**
13:30	**Key considerations to strengthen Security and Privacy of Personal information and Financial data over online transactions** *Mr. Van Anh Tuan, Chief Information Security Officer, Techcombank*

13:50	**Juniper Networks Spotlight Secure threat intelligence platform** *Mr. Nguyen Tien Duc*, *ASEAN Security Specialist, Juniper Networks*
14:10	**Beyond Data Breach: Cyber Trend and Exposure** *Mr. Jason Charles Kelly*, *Head of Asia Financial Lines, AIG Asia Pacific*
14:30	**TWO-LEVEL Defense Solution on New APT Attack** *Mr. Nguyen Thanh Dong*, *System Engineer, NP Core*
14:50	**TEA BREAK & NETWORKING**
15:05	**Securing Your Internet of Things infrastructure with Dell's SonicWall solutions** *Mr. Allen Lai*, *Senior Solutions Architect, Dell OEM Solutions*
15:40	**Information Security - Quick Wins for Risk Reduction** *Mr. Ian Simpson*, *Governance, Risk and Compliance Consultant*
16:00	**DISCUSSION SESSION**
17:00	**END OF SESSION 2**

NETWORKING DINNER
SECURITY WORLD 2015 & 4G LTE INTERNATIONAL CONFERENCE
18:00 – 21:00

18:00	**Delegate Registration &Networking Cocktail**
18:30	**OPENING REMARK** *Representative from Ministry of Information and Communications*
18:40	**WELCOME REMARKS** *Representative from Ministry of Public Security* *Representative from Ministry of Defence*
19:00	**Dinner Reception**
21:00	**END OF DINNER**
