Message from leadership

Welcome to our 2024 Transparency report

Building an unique experience for our stakeholders

At PwC, our purpose is to build trust in society and solve important problems. We're a network of firms in 149 countries with more than 370,000 people who are committed to delivering quality in assurance, advisory and tax services. We are committed to driving a strong culture of quality and excellence that is core to our purpose.

Our approach to building trust is aligned with the growing demands for transparency, accountability, and stakeholder engagement. We combine our expertise in audit, tax, and compliance with a commitment to expanding capabilities in critical areas like cybersecurity, data privacy, ESG, and Al.

Our strategy is built on a foundation of quality, the value of our people, and our investments in innovation and technology.

Taking Action to Lead the Profession

As auditors, our role is to build trust in the capital markets by ensuring the accuracy, reliability, and consistency of information. To meet the evolving needs of independent audits and the growing complexity of information flows, PwC Vietnam is committed to bold actions that will further enhance confidence in the independent audit over the coming years:

- Accountability: Implementing tangible measures to demonstrate that our firm's leadership is accountable for audit quality, including leadership compensation at risk and public certifications on our system of quality management.
- Quality: Initiating efforts to enhance confidence in audit quality, focusing on fraud, going concern, and exploring enhancements to audit reports through more expressive content.
- Independence: Ceasing the provision of certain types of permitted "pure" consulting non-audit to organisations that we audit who are US listed (including Foreign Private Issuers).
- Transparency: Increasing transparency over audit quality performance, enhancing our audit quality report, and communicating policies on potential conflicts of interest.
- Engagement: Enhancing engagement with key stakeholders, including potential talent, audit committees, and investors, and raising awareness of careers in accounting.

These actions will be rolled out in phases, starting with accountability, and will evolve as we consider standard setting, regulatory developments, and emerging practices.

Through seamless integration of technology, we empower our clients to stay ahead. Our services are strategically designed to provide comprehensive solutions that drive success in the evolving digital landscape.

The New Equation is our strategy to help business leaders enhance trust with their stakeholders and achieve sustained outcomes amidst turbulent change. Today, leaders must build trust in more and more areas from sustainability to the responsible use of AI.

As part of The New Equation strategy, the PwC network is making an incremental US \$3bn investment in quality. This includes a \$1bn investment in a five-year programme to deliver a next generation audit ecosystem - human-led, tech-powered and data-driven. It will enable us to make continuous improvements to audit quality by further standardising, simplifying, centralising and automating our audit work, transforming the experience for our stakeholders and our people.

In addition to scaling up PwC's Marketplace in Vietnam to an Asia Pacific Marketplace site, we have also introduced PwC's Academy and PwC's Online Academy. PwC's Online Academy is an online learning subscription service for organisations, offering a wide range of professional development courses, including digital skills, data analytics, leadership, ESG, finance, risk, and governance.

At PwC, we are not just service providers. We act as strategic partners, aligning ourselves with our clients' goals and aspirations. With focused expertise and a strategic approach, we position ourselves as the partner of choice for businesses aiming to thrive in the digital age. We are committed to delivering high quality audits and innovative insights, while actively contributing to broader societal progress in this rapidly changing landscape.

Our approach to quality

International Standard on Quality Management 1 (ISQM 1)

In December 2020, the International Auditing and Assurance Standards Board (IAASB), approved and released three new and revised standards that strengthen and modernise a firm's approach to quality management, including ISQM 1. This standard which became effective 15 December 2022 required all firms to have designed and implement the requirements of the standard and evaluate their SoQM under the new standard by 15 December 2023.

ISQM 1 is an objectives-based approach that expects firms to have a system of quality management (SoQM) that operates in a continuous and iterative manner taking into consideration the conditions, events, circumstances, actions and inactions that impact a firm. It enhances the firm's responsibilities around monitoring and remediation, emphasising the need for more proactive, real time monitoring of the SoQM, a more effective, efficient, and timely root cause analysis process, and timely and effective remediation of deficiencies.

ISQM 1 states that the objective of the firm is to design, implement and operate an SoQM that provides the firm with reasonable assurance that:

- The firm and its personnel fulfil their responsibilities in accordance with professional standards and applicable legal and regulatory requirements, and conduct engagements in accordance with such standards and requirements; and
- Engagement reports issued by the firm or engagement partners are appropriate in the circumstances.

The standard goes on to say that the public interest is served by the consistent performance of quality engagements and that this is enabled by an effective system of quality management.

A specific focus on audit quality across the Network

The PwC Network's Assurance QMSE framework

Delivering high-quality work is at the heart of what we do at PwC; it is what our stakeholders rightly expect of us.

To deliver services in an effective and efficient manner that meets the expectations of our clients and other stakeholders, the PwC Network has established the Quality Management for Service Excellence (QMSE) framework which integrates quality management into how each firm runs its business and manages risk.

The QMSE framework is designed to align with the objectives and requirements of ISQM 1 and provides a model for quality management in PwC firms that integrates quality management into business processes and the firm-wide risk management process. Under QMSE, our overall quality objective is supported by a series of underlying quality management objectives and each firm's SoQM should be designed and operated so that the overall quality objective, which includes meeting the objectives and requirements of ISQM 1, is achieved with reasonable assurance.

"

Overall quality objective

To have the necessary capabilities in our organisation and to deploy our people to consistently use our methodologies, processes and technology to deliver services in an effective and efficient manner to fulfil the expectations of our clients and other stakeholders

"

Integrated and aligned in the right way

Our SoQM includes quality objectives are identified from the following components of ISQM 1 as well as any additional objectives the PwC Network has identified in the QMSE framework:

- Governance and leadership
- Relevant ethical requirements
- Acceptance and continuance of client relationships and specific engagements
- Engagement performance
- Resources
- Information and communication

To help us achieve these objectives, the PwC Network invests significant resources in the continuous enhancement of quality across our network. This includes having a strong quality infrastructure supported by the right people, underlying tools and technology at both the network level and within our firm, and a programme of continuous innovation and investment in our technology. The PwC Network's Global Assurance Quality (GAQ) organisation aims to support PwC firms in promoting, enabling, and continuously improving Assurance quality through effective policies, tools, guidance and systems used to further promote and monitor quality and to build an appropriate level of consistency in what we do.

Our approach to quality

These elements have been integrated and aligned by our network to create a comprehensive, holistic and interconnected quality management framework that each firm tailors to reflect our individual circumstances. Each firm is responsible for utilising the resources provided by the network as part of our efforts to deliver quality to meet the expectations of our stakeholders.

The Quality Management Process

The achievement of these objectives is supported by a **quality management process (QMP)** established by our firm and Assurance leadership, business process owners, and partners and staff. This quality management process includes:

- identifying risks to achieving the quality objectives
- designing and implementing responses to the assessed quality risks
- monitoring the design and operating effectiveness of the policies and procedures through the use of processintegrated monitoring activities such as real-time assurance as well as appropriate Assurance Quality Indicators
- continuously improving the SoQM when areas for improvement are identified by performing root cause analyses and implementing remedial actions; and
- establishing a quality-related recognition and accountability framework to both set clear expectations of expected quality behaviours and outcomes and reinforce those expectations through consistent and transparent use in appraisals, remuneration, and career progression decisions

This involves the integrated use of Assurance Quality Indicators to aim to predict quality issues, Real Time Assurance to aim to prevent quality issues, Root Cause Analysis to learn from quality issues and a Recognition and Accountability Framework to establish, communicate and reinforce quality behaviours, culture and actions.

Our approach to quality

Our firm's SoQM

Our system of quality management (SoQM) must be designed, implemented and operating on an ongoing basis to achieve the quality objectives. This ongoing process includes monitoring, assessing, evaluating, reporting, and being responsive to changes in quality risks, driven by the firm's internal and external environment. This is our Quality Management Process (QMP).

Our focus on quality management is therefore not to apply prescribed rules but rather to design and implement risk responses which are fit for purpose to manage the risks we identify in our own risk assessment and achieve the quality objective taking into consideration the conditions, events, circumstances, actions and/or inactions that may impact our SoQM.

Our risk assessment process

The past several years have seen unprecedented challenges and our firm's SoQM has helped us navigate and respond to the impact that identified factors had on our ability to achieve the overall assurance quality objective - to deliver quality audit engagements. Our SoQM includes the performance of a risk assessment over the quality objectives identified in the QMSE framework. We consider how and the degree to which a condition, event, circumstance, action or inaction may adversely affect the achievement of the quality objectives which may result in:

- New or changing quality risks to achieving one or more of the quality objectives
- Changes to the assessment of existing quality risks
- Changes to the design of the firm's SoQM, including the risk responses

A quality risk is one that has a reasonable possibility of occurring and individually, or in combination with other quality risks, could adversely affect the achievement of one or more quality objectives.

2024 key factors impacting our SoQM

This year, we have seen various factors impacting our SoQM but in particular, more meaningful conditions, events, circumstances actions and/or inactions that have necessitated changes to our SoQM include:

· Reliability of data and technology

Significant investment was put in place to improve the effectiveness of the firm's controls and monitoring to address quality risks arising from the use of IT resources and underlying data in supporting the firm's SoQM including training our people on adherence to data handling and confidentiality.

Direction, coaching, and supervision

Critical in ensuring quality at the engagement level, we have implemented various quality initiatives to ensure sufficient and robust direction, supervision, and review in our engagements.

· Ethics and culture

In addition to delivering high quality audit, we are also committed to drive high quality culture.

 We also recognise the increased regulatory focus on unethical behaviours and have implemented ongoing monitoring activities surrounding training integrity and continuously reinforce a speak up culture.

We continue to monitor factors that will impact our SoQM to ensure compliance with ISQM1 and other local regulatory requirements (i.e VSQC 1).

Our firm's system of quality management

Aim to Predict: Assurance Quality Indicators

We have identified a set of Assurance Quality Indicators (AQIs) that support our Assurance leadership team in the early identification of potential risks to quality, using metrics to aim to predict quality issues. This quality risk analysis is an essential part of our QMSE, and the AQIs, in addition to other performance measures, also provide a key tool in the ongoing monitoring and continuous improvement of our SoQM.

Our AQI monitoring by the Assurance leadership team is conducted on a timely basis through a combination of qualitative and quantitative analysis. The insights from our AQI together with our root cause analysis helps determine how we will continuously improve on certain aspects of the SoQM. The results of the AQI monitoring are used to help evaluate the robustness of our SoQM and also shared with all engagement leaders in the Assurance practice.

Throughout this transparency report, we have provided insight into the policies and procedures we have designed, implemented and are operating to reduce the quality risks we have identified to an acceptable level and help us achieve reasonable assurance over the firm's SoQM.

As mentioned above, some of our policies and procedures are provided by the PwC Network which we have assessed to determine that these resources are appropriate for use as part of our SoQM and in the performance of engagements. The following sections of the report cover the following ISQM 1 quality objectives:

- Cultures and values Governance and leadership, relevant ethical requirements, acceptance and continuance of client relationships and specific engagements
- · Our people Human resources
- Our approach Intellectual and technological resources, engagement performance, information and communication

Our monitoring and remediation process

In the section, Monitoring, found on page 32, we have described the types of ongoing and periodic monitoring our firm has designed, implemented and are operating to provide relevant and reliable information about our firm's SoQM and to help us take appropriate actions over any identified deficiencies so we can remediate those deficiencies effectively and on a timely basis. To support the timely and effective remediation of identified deficiencies, our firm has designed, implemented and are operating a root cause analysis program that is described further on page

The information gathered from our monitoring and remediation process along with other sources of information, such as external reviews, is used to help us evaluate our SoQM.

Statement on the effectiveness of the firm's SoQM

During the year, we completed our evaluation of the firm's SoQM under ISQM 1. On behalf of PwC Vietnam Limited, the Board of Directors has evaluated whether our firm's SoQM provides us with reasonable assurance that:

- The firm and its personnel fulfil their responsibilities in accordance with professional standards and applicable legal and regulatory requirements, and conduct engagements in accordance with such standards and requirements; and
- Engagement reports issued by the firm or engagement partners are appropriate in the circumstances.

Based on all the relevant information of the firm's SoQM, as at 31 March 2024, we believe our SoQM provides us with reasonable assurance that the quality objectives of ISQM 1 noted above have been achieved.

As at 30 June 2024, the Board of Directors are not aware of any subsequent changes to the firm's SoQM that may result in a change to our conclusion made on 31 March 2024.

Compliance of the firm's SoQM with local regulations

As at 30 June 2024, our SoQM is in compliance with the Vietnamese Standard on Quality Control (VSQC 1), issued by the Vietnamese Ministry of Finance ("MOF"), Circular No.157/2014/TT-BTC and other applicable regulations.

Our approach Cultures and to quality

values

Our people

PwC Network Legal and

governance structure

Our culture and values

Definition and culture

At PwC, we define quality service as consistently meeting the expectations of our stakeholders and complying with all applicable standards and policies. An important part of our ability to deliver against this quality definition is building a culture across a network of 370,000 people. This culture of quality emphasises that quality is the responsibility of everyone. Continuing to enhance this culture of quality is a significant area of focus for our global and local leadership teams and one which plays a key part in the measurement of their performance.

Quality is measured not just by adherence to systems and processes, but by how our people view our commitment to quality. During the year, we've appointed a Quality Culture Leader who is responsible to assess and develop a comprehensive quality culture action plan to drive the right behaviours in our people and ensure that the "culture" element remains a top priority.

Courage

Respect

Co-create

Measurement and transparency

For all our businesses, each PwC firm – as part of the agreement by which they are members of the PwC network – is required to have in place a comprehensive system of quality management (SoQM); to annually complete a SoQM performance assessment; and to communicate the results of these assessments to global leadership. These results are then discussed in detail with the leadership of each local firm and if they are not at the level expected, a remediation plan is agreed with local leadership taking personal responsibility for its successful implementation.

As the services that our network provides change and develop, and the needs and expectations of our stakeholders also change, the PwC network is continually reviewing and updating the scale, scope and operations of our PwC firms' systems of quality management and investing in programmes to enhance the quality of the services that the PwC network provides.

Our firm's commitment to quality

Leadership and tone at the top

Our purpose and values are the foundation of our success. Our purpose is to build trust in society and solve important problems, and our values help us deliver on that purpose. Our purpose reflects 'why' we do what we do, and our strategy provides us with the 'what' we do. 'How' we deliver our purpose and strategy is driven by our culture, values and behaviours. This forms the foundation of our SoQM and permeates how we operate, including guiding our leadership actions, and how we deliver 'trust in what matters'.

Trust in what matters

Today companies are judged on far more than financial outcomes. A company's performance in areas like ESG, cyber security, can affect its reputation, staff retention, access to capital, and ultimately enterprise value.

That's why we're evolving our assurance offering to provide confidence not just in companies' financial statements but in their broader impact.

We call this 'trust in what matters.' We apply rigorous standards to analyse companies' performance on issues such as climate and diversity. This helps companies demonstrate their progress, enabling these firms to build trust, enhance their corporate reputations, and grow enterprise value.

We encourage our clients to understand what matters to their stakeholders, and we deliver assured information about the company's performance on these measures. We believe that if it needs to be trusted, it needs to be assured. High-quality assurance heightens accountability and trust while giving companies a robust basis for tracking and working to improve their performance.

When working with our clients and our colleagues to build trust in society and solve important problems, we:

This culture is supported by appropriate tone at the top through regular communication from leadership to all partners and staff about the firm's commitment to quality. Key messages are communicated to our firm by our Senior Partner and our leadership team and are reinforced by engagement partners. These communications focus on what we do well and actions we can take to make enhancements. Leadership and engagement partners take the lead on these actions as they role model the expected behaviours in interactions with clients and teams. We measure whether our people believe that our leaders' messaging conveys the importance of quality to the success of our firm. Based on this tracking, we are confident our people understand our quality objectives. Delivering service of the highest quality is core to our purpose and our Assurance strategy, the focus of which is to strengthen trust and transparency in our clients, in the capital markets and wider society.

In driving quality culture beyond tone at the top and leadership role modelling, we have introduced new initiatives during the year such as:

- encouraging engagement team conversations on expected behaviours on quality, resourcing, ethics and data privacy and confidentiality.
- Introducing mandatory trainings and sharing sessions on focus areas such as data privacy and confidentiality, ethical conducts and quality culture.
- Collecting feedback from junior level staff on the audit quality and behaviours of managerial level staff.

Our firm's commitment to quality

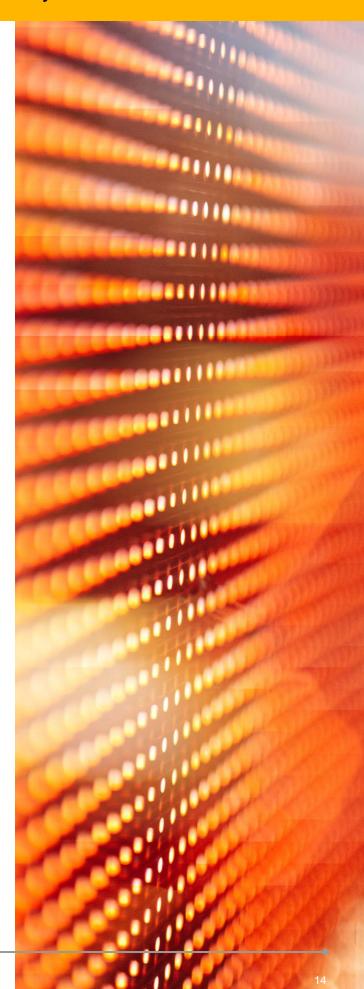

Reinforce: Recognition and Accountability Framework

Our Recognition and Accountability Framework (RAF) reinforces quality in everything our people do in delivering on our strategy, with a focus on the provision of services to our clients, how we work with our people and driving a high-quality culture. Our RAF has been designed to both set clear expectations of expected quality behaviours and outcomes and reinforce those expectations by holding Partners and all engagement staff levels accountable for quality behaviours and quality outcomes beyond compliance. Our RAF considers and addresses the following key elements:

- Quality outcomes: We provide transparent quality outcomes to measure the achievement of the quality objectives. Our quality outcomes take into account meeting professional standards and the PwC network and our firm's standards and policies
- Behaviours: We have set expectations of the right behaviours that support the right attitude to quality, the right tone from the top and a strong engagement with the quality objectives
- Interventions/recognition: We have put in place interventions and recognition that promote and reinforce positive behaviours and drives a culture of quality
- Consequences/reward: We have implemented financial and non-financial consequences and rewards that are commensurate to outcome and behaviour and sufficient to incentivise the right behaviours to achieve the quality objectives
- encourage "more recognition" for our people who lead by example and make an impact to our culture.
- includes an element of non-negotiable baselines, where impact of any non-compliances must be applied through the use of sanctions and penalties.

We believe these changes to our RAF would ensure that "accountability makes a difference" and help us drive exceptional and exemplary behaviour in our people.

Ethics

At PwC, we adhere to the fundamental principles of ethics set out in the International Ethics Standards Board for Accountants (IESBA) Code of Ethics for Professional Accountants (the Code), which are:

Integrity – to be straightforward and honest in all professional and business relationships.

Objectivity – to not allow bias, conflict of interest or undue influence of others to override professional or business judgements.

Professional Competence and Due Care – to maintain professional knowledge and skill at the level required to ensure that a client or employer receives competent professional service based on current developments in practice, legislation and techniques and act diligently and in accordance with applicable technical and professional standards.

Confidentiality – to respect the confidentiality of information acquired as a result of professional and business relationships and, therefore, not disclose any such information to third parties without proper and specific authority, unless there is a legal or professional right or duty to disclose, nor use the information for the personal advantage of the professional accountant or third parties.

Professional Behaviour – to comply with relevant laws and regulations and avoid any action that discredits the profession.

Our network standards applicable to all network firms cover a variety of areas including ethics and business conduct, independence, anti-money laundering, anti-trust/fair-competition, anti-corruption, information protection, firm's and partner's taxes, sanctions laws, internal audit and insider trading. We take compliance with these ethical requirements seriously and strive to embrace the spirit and not just the letter of those requirements. All partners and staff undertake annual mandatory training, as well as submitting annual compliance confirmations, as part of the system to support appropriate understanding of the ethical requirements under which we operate. Partners and staff comply with the standards developed by the PwC Network and leadership in PwC Vietnam monitors compliance with these obligations.

In addition to the PwC Values (Act with Integrity, Make a difference, Care, Work together, Reimagine the possible) and PwC Purpose, PwC Vietnam has adopted PwC's Global Code of Conduct, Network Standards and related policies that clearly describe the behaviours expected of our partners and other professionals - behaviours that will enable us to build public trust. Because of the wide variety of situations that our professionals may face, our standards provide guidance under a broad range of circumstances, but all with a common goal - to do the right thing.

Upon hiring or admittance, PwC Vietnam provides an overview of the PwC Global Code of Conduct and the expected behaviours for all partners and staff, who should follow these expectations throughout their professional careers at our firm. As part of the values and expectations in the Code, they also have a responsibility to report and express concerns, and to do so fairly, honestly, and professionally when dealing with a difficult situation or when observing conduct inconsistent with the Code. In addition, every partner and staff are required to complete new hire training, which covers the ethics and compliance network standards, including ethics and the Code of Conduct.

Ethics

PwC has implemented a network-wide confidential ethics helpline for the reporting of questions or concerns related to behaviours that are inconsistent with the Code of Conduct and related policies. Every PwC firm has a separate and secure tier of the ethics helpline for their confidential matters and investigations. The ethics helpline is also available for third parties, including clients. The ethics helpline allows our partners, staff and third parties to feel safe raising a question or concern without fear of retaliation.

The PwC Code of Conduct and the ethics helpline are available online for all internal and external stakeholders at https://www.pwc.com/ethics.

PwC Vietnam has adopted an accountability framework to facilitate remediation of behaviours that are inconsistent with the Code of Conduct.

Finally, the Organisation for Economic Cooperation and Development (OECD) provides guidance, including the OECD Guidelines for Multinational Enterprises (the OECD Guidelines), by way of non-binding principles and standards for responsible business conduct when operating globally. The OECD Guidelines provide a valuable framework for setting applicable compliance requirements and standards. Although the PwC network consists of firms that are separate legal entities which do not form a multinational corporation or enterprise, PwC's network standards and policies are informed by and meet the goals and objectives of the OECD Guidelines.

Our Global People Survey contains a few questions related to Ethics and the content in the above-mentioned paragraphs, for example:

81%

of the respondents believe that at PwC, they feel comfortable discussing or reporting ethical issues and concerns without fear of negative consequences. 82%

of the respondents believe that at PwC, they can speak openly, including voicing their opinions or raising any concerns, even when their views may be different from others 89%

of the respondents believe that at PwC, the people they work with demonstrate conduct consistent with PwC's Global Code of Conduct.

Objectivity and Independence

As auditors of financial statements and providers of other types of professional services, PwC firms and their partners and staff are expected to comply with the fundamental principles of objectivity, integrity and professional behaviour. In relation to assurance clients, independence underpins these requirements. Compliance with these principles is fundamental to serving the capital markets and our clients.

The PwC Global Independence Policy, which is based on the Code, including International Independence Standards, contains minimum standards with which PwC firms have agreed to comply, including processes that are to be followed to maintain independence from clients, when necessary.

The independence requirements of the United States Securities and Exchange Commission (SEC) are, in certain instances, more restrictive than the Global Independence Policy. Given the reach of these requirements and their impact on PwC firms in the network, the Policy identifies key areas where an SEC requirement is more restrictive. Provisions that are specifically identified as applicable to SEC restricted entities must be followed in addition to, or instead of, the Policy in the associated paragraph. PwC Vietnam in collaboration with PwC Malaysia (collectively "MYVN"), has a designated partner (known as the 'Partner Responsible for Independence' or 'PRI') with appropriate seniority and standing, who is responsible for implementation of the PwC Global Independence Policy including managing the related independence processes and providing support to the business. The MYVN PRI is supported by a team of independence specialists. The MYVN PRI reports directly to the MYVN Chief Strategic Risk & Network Officer.

In addition, there is a Network Risk Management Policy governing the independence requirements related to the rotation of key audit partners.

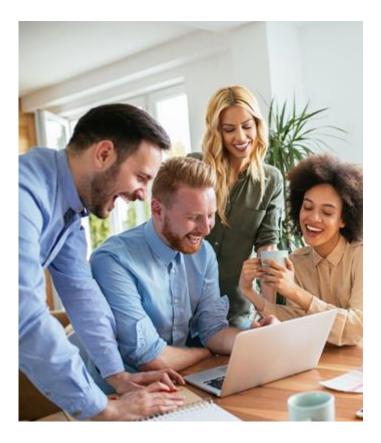

These policies and processes are designed to help PwC firms comply with relevant professional and regulatory standards of independence that apply to the provision of assurance services. Policies and supporting guidance are reviewed and revised when changes arise such as updates to laws and regulations, including any changes to the Code or in response to operational matters.

PwC Vietnam supplements the PwC Global Independence Policy as required by local Vietnam regulations such as the State Securities Commission of Vietnam ("SSC") and of the State Bank of Vietnam ("SBV"), that are specifically identified to be applicable to the audits of public interest entities ("PIE"), where they are more restrictive than the network's policy. These include the rotation policies for key audit partners, directors and practicing auditors, and the rotation rules for auditing credit institutions and branch of foreign banks.

Independence policies and practice.

The PwC Global Independence Policy covers, among others, the following areas:

- personal and firm independence, including policies and guidance on the holding of financial interests and other financial arrangements, e.g., bank accounts and loans by partners, staff, the firm and its pension schemes;
- non-audit services and fee arrangements. The policy is supported by Statements of Permitted Services (SOPS), which provide practical guidance on the application of the policy in respect of non-audit services to audit clients and related entities:
- business relationships, including policies and guidance on joint business relationships (such as joint ventures and joint marketing) and on purchasing of goods and services acquired in the normal course of business; and
- acceptance of new audit and assurance clients, and the subsequent acceptance of any nonassurance services to be provided to those clients.

Independence-related systems and tools

As a member of the PwC network, PwC Vietnam has access to a number of systems and tools which support PwC firms and their personnel in executing and complying with their independence policies and procedures. These include:

- The Central Entity Service (CES) which contains information about corporate entities including all PwC audit
 clients and their related entities (including all public interest audit clients and SEC restricted entities) as well as their
 related securities. CES assists in determining the independence restriction status of clients of the PwC firm and
 those of other PwC firms before entering into a new non-audit service or business relationship. This system also
 feeds Independence Checkpoint and the Authorisation for Services system;
- 'Independence Checkpoint' which facilitates the pre-clearance of publicly traded securities by all partners and managerial practice staff before acquisition and is used to record their subsequent purchases and disposals. Where a PwC firm wins a new audit client or there is a change in the restriction status of a security, this system automatically informs those holding relevant securities of the requirement to sell the security where required;
- Authorisation for Services (AFS) which is a global system that facilitates communication between a non-audit services engagement leader and the audit engagement leader, regarding a proposed non-audit service, documenting the analysis of any potential independence threats created by the service and proposed safeguards, where deemed necessary, and acts as a record of the audit partner's conclusion on the permissibility of the service:
- Joint Business Relationships (JBR) which is a global system used to clear joint (close) business relationships
 from an independence perspective. JBR is used to facilitate PwC firms' compliance with JBR requirements for new
 and existing joint business relationships. It assists independence specialists in gathering information to assess, from
 an independence perspective, the permissibility of proposed joint business relationships and in monitoring the
 continued permissibility of previously approved existing joint business relationships;
- My Compliance Dashboard (MCD) which is a global compliance system that facilitates annual compliance confirmations, engagement independence confirmations and reporting;
- Global Breaches Reporting System which is designed to be used to report any breaches of external auditor
 independence regulations (e.g., those set by regulation or professional requirements) where the breach has crossborder implications (e.g., where a breach occurs in one territory which affects an audit relationship in another
 territory). All breaches reported are evaluated and addressed in line with the Code or relevant independence
 regulations; and
- PwC Vietnam also has territory specific tools which includes a rotation tracking system which monitors compliance
 with the local regulatory audit rotation policies for the firm, engagement leaders, other key audit partners and senior
 staff involved in an audit.

Independence training and confirmations

PwC Vietnam provides all partners and staff with annual or ongoing training in independence matters. Training typically focuses on milestone training relevant to a change in position or role, changes in policy or external regulation and, as relevant, provision of services. Partners and staff receive computer-based training on PwC Vietnam independence policy and related topics. Additionally, face-to-face training is delivered to members of the practice on an as-needed basis by PwC Vietnam's independence specialists and risk and quality teams.

All partners and practice staff are required to complete an annual compliance confirmation, whereby they confirm their compliance with relevant aspects of the PwC firm's independence policy, including their own personal independence. In addition, all partners confirm that all non-audit services and business relationships for which they are responsible comply with policy and that the required processes have been followed in accepting these engagements and relationships. These annual confirmations are supplemented by periodic and ad-hoc engagement level confirmations for our PIE audit clients and/or their related entities.

Independence monitoring and disciplinary policy

PwC Vietnam is responsible for monitoring the effectiveness of its SoQM in managing compliance with independence requirements. In addition to the confirmations described above, as part of this monitoring, we perform:

- · Compliance testing of independence controls and processes;
- Personal independence compliance testing of a random selection of, at a minimum, partners and pratice managers as a means of monitoring compliance with independence policies; and
- An annual assessment of our firm's adherence with the PwC network's standard relating to independence.

The results of PwC Vietnam's monitoring and testing are reported to the firm's management on a regular basis with a summary reported to them on an annual basis.

PwC Vietnam has an Accountability Framework and supporting disciplinary policies and mechanisms in place that promote compliance with independence policies and processes, and that require any breaches of independence requirements to be reported and addressed.

This would include discussion with the client's audit committee regarding the nature of a breach, an evaluation of the impact of the breach on the independence of the PwC firm and the engagement team and the need for actions or safeguards to maintain objectivity. Although most breaches are minor and attributable to an oversight, all breaches are taken seriously and investigated as appropriate. The PwC firm also follows supplemental local requirements relating to the reporting of breaches. The investigations of any identified breaches of independence policies also serve to identify the need for improvements in PwC Vietnam's systems and processes and for additional guidance and training.

Considerations in undertaking the audit

Our principles for determining whether to accept a new client or continue serving an existing client are fundamental to delivering quality, which we believe goes hand-in-hand with our purpose to build trust in society. We have established policies and procedures for the acceptance of client relationships and audit engagements that consider whether we are competent to perform the engagement and have the necessary capabilities including time and resources, can comply with relevant ethical requirements, including independence, and have appropriately considered the integrity of the client. We reassess these considerations in determining whether we should continue with the client engagement and have in place policies and procedures related to withdrawing from an engagement or a client relationship when necessary. The policies and processes we have in place emphasise risk and quality considerations such that financial and operational priorities do not lead to inappropriate judgements about whether to accept or continue a client relationship.

Client and Engagement Acceptance and Continuance

PwC Vietnam has a process in place to identify acceptable clients based on the PwC network's proprietary decision support systems for audit client acceptance and retention called Acceptance. Acceptance facilitates a determination by the engagement team, business management and risk management specialists of whether the risks related to an existing client or a potential client are manageable, and whether or not PwC should be associated with the particular client and its management. More specifically, this system enables:

Engagement teams:

- To document their consideration of matters required by professional standards related to acceptance and continuance;
- To identify and document issues or risk factors and their resolution, for example through consultation, by adjusting the resource plan or audit approach or putting in place other safeguards to mitigate identified risks or by declining to perform the engagement; and
- To facilitate the evaluation of the risks associated with accepting or continuing with a client and engagement.

PwC firms (including PwC firm leadership and risk management):

- To facilitate the evaluation of the risks associated with accepting or continuing with clients and engagements;
- To provide an overview of the risks associated with accepting or continuing with clients and engagements across the client portfolio; and
- To understand the methodology, basis and minimum considerations all other PwC firms in the network have applied in assessing audit acceptance and continuance.

Our approach Cultures and to quality

<u>values</u>

Our people

Our approach Monitoring

<u>governance</u> structure

Our people

People strategy

Our people strategy was developed in support of our broader business strategy, The New Equation. We are focused on being the world's leading developer of talent and enabling our people with greater agility and confidence in a rapidly changing world. Specific focus areas include creating a resilient foundation for times of change through supporting the well-being of our people and enabling effective delivery; developing inclusive leaders for a shifting world; and enabling our workforce for today's realities and tomorrow's possibilities.

The PwC Professional

The PwC Professional is the set of behaviours we expect of all our people, at all levels, to demonstrate with each other and with our clients and other stakeholders. When we focus on the behaviours that guide our interactions, we create opportunities to build trust and empower our teams to deliver distinctive outcomes. This is how we build trust in society and solve important problems.

The PwC Professional supports the development and career progression of our staff by providing a single set of expectations across all lines of service, geographies, and roles; outlining the capabilities needed to thrive as purpose-led and values-driven leaders at every level.

This year, the Recognition and Accountability Framework (RAF) is applied for all levels, from Associate to Partner, fostering the compliance requirements. RAF has the impact on the final Career Round Table result and the corresponding rewards & sanction to drive the right behaviours in our people.

Audit Quality Measures

- 85% of our people agrees that "The leaders I work with provide me with regular feedback and coaching on my performance."
- 92% of our people agrees that "The people I work with challenge me and each other to deliver quality work."

Inclusion and diversity

At PwC, we're an organisation that fosters a culture of belonging and equity where our diverse workforce can thrive and feel like they belong. We do this by delivering on our Inclusion First strategy, which is centred on action, accountability and advocacy, in each of our member firms, across the PwC network.

We embrace and encourage differences and help our people actively develop the skills to work and lead inclusively with our focus on gender equity, disability inclusion, LGBT+ inclusion and social inclusion. Underpinning this is ensuring our systems and behaviours are inclusive.

Recruitment

PwC Vietnam aims to recruit, train, develop and retain the best and the brightest staff who share in the firm's strong sense of responsibility for delivering high-quality services. Our hiring standards include a structured interview process with behaviour-based questions built from The PwC Professional framework, assessment of academic records, and background checks. Across the Assurance practice in FY24, we recruited over 466 new people for both experience & fresh graduate from various education backgrounds from both local and foreign universities through our recruitment campaigns and career fairs.

Team selection, experience and supervision

Our audit engagements are staffed based on expertise, capabilities and years of experience.

Engagement leaders determine the extent of direction, supervision and review of junior staff.

Feedback and continuous development

Our team members obtain feedback on their overall performance, including factors related to audit quality, such as technical knowledge, auditing skills and professional scepticism. Audit quality is an important factor in performance evaluation and career progression decisions for both our partners and staff. Feedback on performance and progression is collected via our Snapshot tool, a simple, mobile-enabled technology. We also use Workday to give and receive upward and peer feedback. Ongoing feedback conversations help our people grow and learn faster, adapt to new and complex environments, and bring the best to our clients and firm

Career progression

PwC Vietnam uses The PwC Professional, our global career progression framework, which sets out clear expectations at all staff levels across five key dimensions. The framework underpins all elements of career development and helps our people develop into well-rounded professionals and leaders with the capabilities and confidence to produce high-quality work, deliver an efficient and effective experience for our clients, execute our strategy, and support our brand. Our annual performance cycle is supported by continuous feedback conversations and regular check-ins with the individual's Team Leader to discuss their development, progression and performance.

Retention

Turnover in the public accounting profession is often high because as accounting standards and regulations change, accountants are in demand and the development experience we provide makes our staff highly sought after in the external market. Our voluntary turnover rate fluctuates based on many factors, including the overall market demand for talent.

Global People Survey Each PwC firm participates in an annual Global People Survey (GPS), administered across the network to all of our partners and staff. PwC Vietnam is responsible for analysing and communicating results locally, along with clearly defined actions to address feedback.

Professional Development

We are committed to putting the right people in the right place at the right time. Throughout our people's careers, they are presented with career development opportunities, classroom, virtual classroom and on-demand learning, and on-the-job real time coaching/development. Our flexible training portfolio facilitates personalised learning with access to a variety of educational materials, including webcasts, podcasts, articles, videos, and courses.

Achieving a professional credential supports our firm's commitment to quality through consistent examination and certification standards. Our goal is to provide our staff with a more individualised path to promotion and support them in prioritising and managing their time more effectively when preparing for professional exams. Providing our people with the ability to meet their professional and personal commitments is a critical component of our people experience and retention strategy.

Learning and education

Continuing education

We, and other PwC firms, are committed to delivering quality assurance services around the world. To maximise consistency in the network, the formal curricula, developed at the Network level, provide access to training materials covering the PwC audit approach and tools, as well as areas of audit risk and areas of focus for quality improvement.

This formal learning is delivered using a blend of delivery approaches, which include remote access, classroom learning, virtual classroom, and on-the-job support. The curricula supports our primary training objective of quality, while providing practitioners with the opportunity to strengthen their technical and professional skills, including professional judgement while applying a sceptical mindset.

The design of the curricula allows us to select, based on local needs, when we will deliver the training.

In addition, according to the provisions of Circular No. 150/2012/TT-BTC dated 12 September 2012 issued by the Ministry of Finance (MOF) on guiding the update of annual knowledge for auditors registered for audit practice, PwC Vietnam has organized professional knowledge update courses on laws and regulations related to accounting, auditing, finance, tax and economics of Vietnam as well as Vietnamese Accounting and Auditing Standards and professional ethics.

Over the year, the status of continuous education and training for the approved practicing auditors is summarised as below:

 Each practicing auditor has completed at least 40 hours of training and update knowledge, which includes at least 20 hours for knowledge update on accounting and audit regulations of Vietnam, and 04 hours for knowledge update on professional ethics. Training programs that have been registered with MOF during the year:

- Improve Audit quality programme
- Update knowledge on Tax and Legal
- Update knowledge on VAS and compliance review results
- Update knowledge on Vietnamese Auditing Standards 2023
- Update knowledge on International Accounting Standards
- Update knowledge on Professional Ethics, Audit Risk and Quality
- Methodology, transformation and technology (MTT) Year-end reminders

Instructors for training courses are at the level of manager and up, who have many years of working experience relating to the content of the courses.

PwC Audit

As a member of the PwC network, PwC Vietnam has access to and uses PwC Audit, a common audit methodology and process. This methodology is based on the International Standards on Auditing (ISAs), with additional PwC policy and guidance provided where appropriate. PwC Audit policies and procedures are designed to facilitate audits conducted in compliance with all ISA requirements that are relevant to each individual audit engagement. Our common audit methodology provides the framework to enable PwC firms to consistently comply in all respects with applicable professional standards, regulations and legal requirements.

That aside, our methodology also takes into account the similarities and differences between ISAs, PwC Audit, and the applicable local regulations in Vietnam by incorporating the requirements of:

- · Vietnamese Standards on Auditing (VSAs);
- Vietnamese Standards on Review Engagements (VSRE)
- Vietnamese Standards on Related Services (VSRS)
- · Vietnamese Corporate Accounting System
- Other local requirements and guidance on the preparation and presentation of financial statements.

Tools and technologies to support our audit

Our technology

Aura

Aura, our global audit documentation platform, is used across the PwC network. Aura helps drive how we build and execute our audit plans by supporting teams in applying our methodology effectively, by creating transparent linkage between risks, required procedures, controls and the work performed to address those risks, as well as providing comprehensive guidance and project management capabilities. Targeted audit plans specify risk levels, controls reliance and substantive testing. Real time dashboards show teams audit progress and the impact of scoping decisions more quickly.

Connect

Connect is our collaborative platform that allows clients to quickly and securely share audit documents and deliverables. Connect also eases the burden of tracking the status of deliverables and resolving issues by automatically flagging and tracking outstanding items and issues identified through the audit for more immediate attention and resolution. Clients are also able to see audit adjustments, control deficiencies, and statutory audit progress for all locations- in real time.

Connect Audit Manager

Connect Audit Manager streamlines, standardises and automates group and component teams coordination for group and statutory/regulatory audits. It provides a single digital platform to see all outbound and inbound work and digitises the entire coordination process which facilitates greater transparency, compliance and quality for complex multi-location audits.

Halo

Halo, our data auditing tools, address large volumes of data, analysing whole populations to improve risk assessment, analysis and testing. For example, Halo for Journals enables the identification of relevant journals based on defined criteria making it easier for engagement teams to explore and visualise the data to identify client journal entries to analyse and start the testing process.

Halo Platform

Halo Platform enables our engagement teams to manage all data extractions, executions and storage for all applications through one central location, allowing our engagement teams to monitor the status of data uploads and use the acquired entity data for multiple applications during the audit.

Count

Count, which facilitates the end-to-end process for observing inventory counts, allows our engagement teams to create and manage count procedures, counters to record results directly onto their mobile device or tablet and engagement teams to export final results into Aura.

PwC Confirmation

PwC Confirmations, our global, secure, web-based confirmation platform providing a guided experience to preparing, sending, monitoring and receiving electronic and paper responses for our auditors and third-party confirmers as well as a dashboard view to assist in status updates. The Confirmer portal allows confirmers to easily navigate and provide responses.

Smart Audit Platform

Smart Audit Platform, is a secure web-based portal with a growing suite of integrated intelligent automation tools and solutions based on cutting-edge machine learning and automation technology. These advanced solutions reduce the risk of manual error and enhanced the delivery of a consistent and high quality audit.

Tools and technologies to support our audit

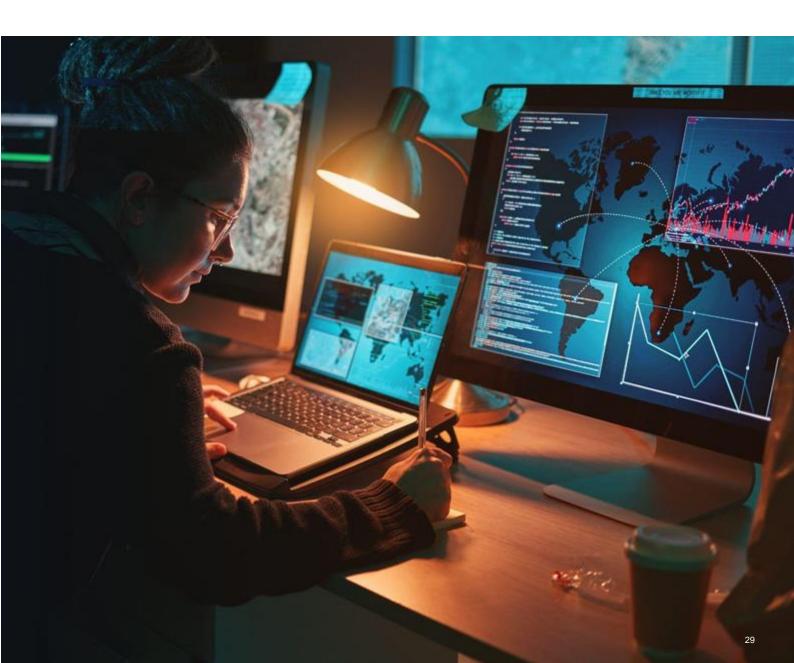

Our next generation audit

As part of our commitment to building trust and delivering sustained outcomes, the PwC network is investing in a multi-year effort to deliver a new global audit platform to power our next generation audit, ultimately replacing our legacy technologies such as Aura and Connect.

By exploring and investing in new technologies and redefining underlying audit processes, PwC will further standardise, simplify, centralise, and automate our audit work. PwC's investment will accelerate ongoing innovation and enable us to respond to changing stakeholders' needs while taking advantage of emerging technologies, including generative AI, providing a transformed audit experience focusing on continuous quality enhancement.

PwC's vision for NGA is to provide efficient, robust and independent assurance and audit insights across financial and non-financial information, helping to build trust in what matters to our stakeholders. As PwC gains momentum around the next generation audit programme, we will continue to release new capabilities on an ongoing basis to enhance quality and the overall audit experience.

There have been significant investments across the PwC network into Generative AI as we seek to reimagine how we further enable our people by leveraging the power of AI. We are focused on promoting a culture of responsible usage of AI while supporting ongoing interest and quickly evolving potential use cases for AI including Generative AI.

Tools and technologies to support our audit

Reliability and auditability of audit technologies

Our firm has designed and implemented processes and controls to underpin the reliability of these audit technologies. This includes clarification of the roles and responsibilities of audit technology owners and users. In addition, we have guidance focused on the sufficiency of audit documentation included in the workpapers related to the use of these audit technologies, including consideration of the reliability of the solution, and the documentation needed to assist the reviewer in meeting their direction, supervision and review responsibilities as part of the normal course of the audit.

Confidentiality and Information Security

Confidentiality and information security are key elements of our professional responsibilities. Misuse or loss of confidential client information or personal data may expose the firm to legal proceedings, and it may also adversely impact our reputation. We take the protection of confidential and personal data very seriously. Our focus on our clients requires a holistic and collaborative approach to reducing security, privacy and confidentiality risks with significant investment in appropriate controls and monitoring to embed an effective three lines of defence model. This model has enabled us to strengthen our information security organisation, align to industry good practice and improve our internal control frameworks.

Data Privacy

The firm maintains a robust and consistent approach to the management of all personal data, with everyone in our organisation having a role to play in safeguarding personal data. We are committed to embedding good data management practices across our business.

In Vietnam, we also comply with the requirements of Decree No. 13/2023/ND-CP on Personal Data Protection Act ("Decree 13"), which outlines the rights and responsibilities of individuals and organizations involved in data collection and processing, whether they are providing or requesting data including cyber security obligations with relation to personal data processing activities.

Information Security

Information Security is a high priority for the PwC Network. Our firm is accountable to our people, clients, suppliers, and other stakeholders to protect information that is entrusted to us. Failure to protect information could potentially harm the individuals whose information our firm holds, lead our firm to suffer regulatory sanctions or other financial losses, and impact the PwC reputation and brand. As such, our firm complies with the Information Security Policy which outlines the minimum security requirements for all PwC firms.

Supporting engagement performance

Evolving delivery model

Our evolved delivery model strategy supports us being more competitive and deliver distinctive services to clients though increasing standardisation and our Data Centres of Excellence.

Direction, coaching and supervision

Engagement leaders and senior engagement team members are responsible and accountable for providing quality coaching throughout the audit and supervising the work completed by junior members of the team, coaching the team and maintaining audit quality. Teams utilise Aura Platinum which has capabilities to effectively monitor the progress of the engagement to make sure that all work has been completed and reviewed by the relevant individuals, including the engagement leader.

Consultation culture

Consultation is key to maintaining high audit quality. While we have formal protocols about mandatory consultation, in the pursuit of quality, we regularly consult more than the minimum requirement.

For example, our engagement teams undergoes annual updates and training with other internal experts in areas such as taxation, risk, valuation, and other specialities as well as individuals within our internal accounting technical support functions.

National Technical function

Our technical support functions comprise technical accounting, auditing, and financial reporting specialists as well as risk and quality. These specialists play a vital role in keeping our policies and guidance in these areas current by tracking new developments in accounting and auditing and providing those updates to professional staff.

Quality Review Partners (QRP)

Specific audit engagements are assigned a QRP as part of the firm's system of quality management as required by professional standards. These partners, who have the necessary experience and technical knowledge, are involved in the most critical aspects of the audit. For example, they may advise on matters of firm independence, significant risks and team's responses to those risks, and specific accounting, auditing, and financial reporting and disclosure issues.

Differences of opinion

Protocols exist to resolve situations where a difference of opinion arises between the engagement leader and either the QRP, another Assurance partner or central functions such as the technical support functions. These include the use of technical panels consisting of partners independent of the engagement.

Our approach Monitoring

PwC Network Legal and <u>governance</u> structure

Monitoring

Monitoring of Assurance quality

We recognise that quality in the Assurance services we deliver to clients is key to maintaining the confidence of investors and other stakeholders in the integrity of our work. It is a key element to our Assurance strategy.

Responsibility for appropriate quality management lies with the leadership of PwC Vietnam. This includes the design and operation of an effective System of Quality Management (SoQM) that is responsive to our specific risks to delivering quality audit engagements, using the network's QMSE framework.

The overall quality objective under the QMSE framework is to have the necessary capabilities in our firm and to deploy our people to consistently use our methodologies, processes and technology in the delivery of Assurance services in an effective and efficient manner to fulfil the valid expectations of our clients and other stakeholders.

Our firm's monitoring includes an ongoing assessment aimed at evaluating whether the policies and procedures which constitute our SoQM are designed appropriately and operating effectively to provide reasonable assurance that our audit, non-audit assurance and related services engagements are performed in compliance with laws, regulations and professional standards (also referred to as our ongoing monitoring). This includes the use of Real-Time Assurance.

Aim to Prevent: Real-Time Assurance

We have developed a Real-Time Quality Assurance (RTA) programme designed to provide preventative monitoring that helps coach and support engagement teams get the 'right work' completed in real-time, during the audit.

All engagement partners and directors have at least one audit engagement or non-audit assurance engagement or agreed-upon procedures engagement selected for review once every two years.

Engagements with different year ends, complexity level and risk profiles are selected. The review programme is carried out by experienced reviewers including practice managers to provide coaching to engagement teams and identify shareable best practices.

We utilise technology to facilitate a scalable review in key focus areas on a periodic basis.

Monitoring

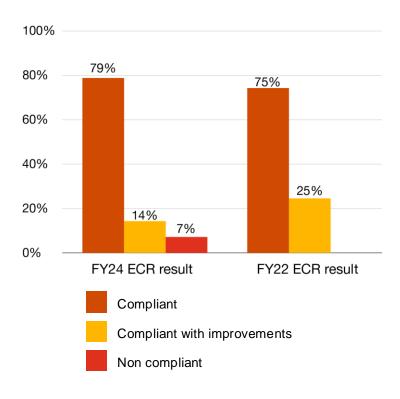

In addition to the ongoing monitoring noted above, our monitoring also encompasses periodic assessment of our SoQM which includes the review of completed engagements (Engagement Compliance Reviews - ECR), as well as periodic monitoring of our SoQM by an objective team within our firm. The results of these procedures, together with our ongoing monitoring, form the basis for the continuous improvement of our SoQM. ECRs are performed under a network-wide inspection programme based on professional standards and PwC audit methodology.

ECRs are risk-focused reviews of completed engagements covering, on a periodic basis, individuals in our firm who are authorised to sign audit, non-audit assurance or related services reports. The review assesses whether an engagement was performed in compliance with PwC Audit guidance, applicable professional standards and other applicable engagement-related policies and procedures. Each Assurance partner is reviewed at least once every five years, unless a more frequent review is required based on the profile of that Assurance partner's client engagements or due to local regulatory requirements.

Reviews are led by experienced Assurance partners, supported by objective teams of partners, directors, senior managers and other specialists. ECR reviewers may be sourced from other PwC firms if needed to provide appropriate expertise or objectivity. Review teams receive training to support them in fulfilling their responsibilities, and utilise a range of checklists and tools developed at the network level when conducting their inspection procedures. The network inspection team supports review teams by monitoring the consistent application of guidance on classification of engagement findings and engagement assessments across the network.

Audit quality reviews – Internal inspection

Monitoring

Additionally, the PwC network undertakes periodic reviews to evaluate certain elements of PwC firms' SoQMs. The network also looks at the PwC firm leadership's own assessment of the effectiveness of their system of quality management and their determination of whether the overall quality objective has been achieved.

The inspection results are reported to our firm's leadership who are responsible for analysing the results of the inspections along with quality findings identified from all sources of information, for performing timely root cause analysis, and for implementing remedial actions as necessary. In situations where adverse quality matters on engagements are identified, based on the nature and circumstances of the issues, the responsible engagement leader or our firm's Assurance leadership personnel may be subject to additional mentoring, training or further sanctions in accordance with our firm's Recognition and Accountability Framework.

Assurance engagement leaders of our firm receive information on the results of the network inspection program, designed for their use in assessing the scope of audit work they determine needs to be performed and their reliance on work performed by PwC firms in connection with their audit of a client's consolidated financial statements.

Learn: Root cause Analysis

Learn: Root cause analysis

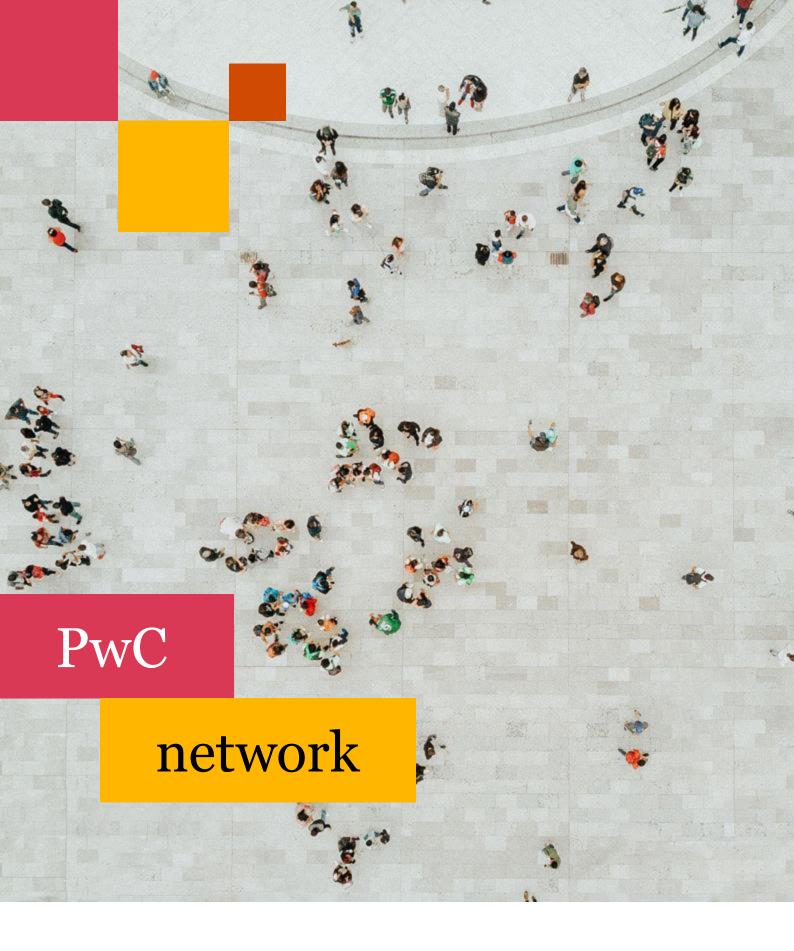

We perform analyses to identify potential factors contributing to our firm's audit quality so that we can take actions to continuously improve. Our primary objectives when conducting such analyses are to understand what our findings tell us about our SoQM and to identify how our firm can provide an effective environment for our engagement teams to deliver a quality audit. We look at quality findings from all sources including our own ongoing monitoring of our SoQM as well as Network inspection of our SoQM, audits both with and without deficiencies—whether identified through our own internal inspections process or through external inspections and other inputs such as our Global People Survey and financial statement restatements and accounting errors—to help identify possible distinctions and learning opportunities.

For individual audits, an objective team of root cause specialists identifies potential factors contributing to the overall quality of the audit. We consider factors relevant to technical knowledge, supervision and review, professional scepticism, engagement resources, and training, amongst others. Potential causal factors are identified by evaluating engagement information, performing interviews, and reviewing selected audit working papers to understand the factors that may have contributed to audit quality.

In addition, the data compiled for audits both with and without engagement-level findings is compared and contrasted to identify whether certain factors appear to correlate to audit quality. Examples of this data include the hours incurred on the audit by the key engagement team members, composition of the engagement teams and the timing of the audit work performed.

Our goal is to understand how quality audits may differ from those with engagement-level findings, and to evaluate how these learnings may be used to continuously improve all of our audits. We evaluate the results of these analyses to identify enhancements that may be useful to implement across the practice. We believe these analyses contribute significantly to the continuing effectiveness of our quality management.

In Vietnam, we have appointed a partner to lead the RCA programme which is performed on a continuous basis. The RCA leader provides a degree of objectivity in this process by ensuring that the RCA performed is sufficiently robust and appropriate using the involvement of independent resources to execute and challenge each RCA performed. Correspondingly. remediation plans are then designed around the identified ultimate root causes.

PwC Network Legal and <u>governance</u> structure

PwC network

PricewaterhouseCoopers International Limited

PricewaterhouseCoopers International Limited

PwC is the brand under which the member firms of PricewaterhouseCoopers International Limited (PwCIL) operate and provide professional services. Together, these firms form the PwC network. 'PwC' is often used to refer either to individual firms within the PwC network or to several or all of them collectively.

In many parts of the world, accounting firms are required by law to be locally owned and independent. Although regulatory attitudes on this issue are changing, PwC member firms do not and cannot currently operate as a corporate multinational. The PwC network is not a global partnership, a single firm, or a multinational corporation.

For these reasons, the PwC network consists of firms which are separate legal entities. The firms that make up the network are committed to working together to provide quality service offerings for clients throughout the world. Firms in the PwC network are members in, or have other connections to PricewaterhouseCoopers International Limited (PwCIL), an English private company limited by guarantee. PwCIL does not practise accountancy or provide services to clients. Rather its purpose is to faciltiate coordination between member firms in the PwC network. Focusing on key areas such as strategy, brand, and risk and quality, the Network Leadership Team and Board of PwCIL coordinates the development and implementation of policies and initiatives to achieve a common and coordinated approach amongst individual PwC firms where appropriate. Member firms of PwCIL can use the PwC name and the resources and methodologies of the PwC network. In addition, member firms may request the resources of other member firms and/or secure the provision of professional services by other member firms and/or other entities. In return, member firms are bound to abide by certain common policies and to maintain the standards of the PwC network as put forward by PwCIL.

The PwC network is not one international partnership and PwC member firms are not otherwise legal partners with each other. Many of the member firms have legally registered names which contain

"PricewaterhouseCoopers", however there is no ownership by PwCIL.. A member firm cannot act as agent of PwCIL or any other member firm, cannot obligate PwCIL or any other member firm, and is liable only for its own acts or omissions and not those of PwCIL or any other PwC firm. Similarly, PwCIL cannot act as an agent of any member firm, cannot obligate any member firm, and is liable only for its own acts or omissions.

The governance bodies of PwCIL are:

The governance bodies of PwCIL are:

- Global Board, which is responsible for the governance of PwCIL, the oversight of the Network Leadership Team and the approval of network standards. The Board does not have an external role. The Board is comprised of elected partners from PwC firms around the world and one or more external independent directors. Please refer to the following page on the PwC Global website for a list of the current members of the Global Board.
- Network Leadership Team, which is responsible for setting the overall strategy for the PwC network and the standards to which the PwC firms agree to adhere.
- Strategy Council, which is made up of the leaders of the largest PwC firms and regions of the network, agrees on the strategic direction of the network and facilitates alignment for the execution of strategy.
- Global Leadership Team, which is appointed by and reports to the Network Leadership Team and the Chairman of the PwC network. Its members are responsible for leading teams drawn from PwC firms to coordinate activities across all areas of our business.

PwC Network Legal and governance structure

Legal and governance structure

Legal structure and ownership of the PwC Vietnam

PwC (Vietnam) Limited is a limited liability company established in Vietnam operating in accordance with Vietnamese laws. It was converted from a single member (wholly owned by PricewaterhouseCoopers Indochina Holding Inc), into a multi-member limited liability company in March 2024. PwC (Vietnam) Limited is a member firm of PricewaterhouseCoopers International Limited.

During the financial year, PwC Vietnam has reorganised its business, where the tax and advisory services were transferred to another newly established entity namely PwC Tax and Advisory (Vietnam) Company Limited.

Further details of the legal structure are disclosed in page 40.

Governance structure of the PwC Vietnam

The firm's organisation structure includes the Members' Council chaired by the senior partner of the firm as the Chairwoman, and the Board of General Directors includes General Director and Deputy General Directors, who are responsible for execution and management of professional service delivery.
