

When should I start worrying about a tax audit?

How do I prepare for it?

How can I handle it on my own?

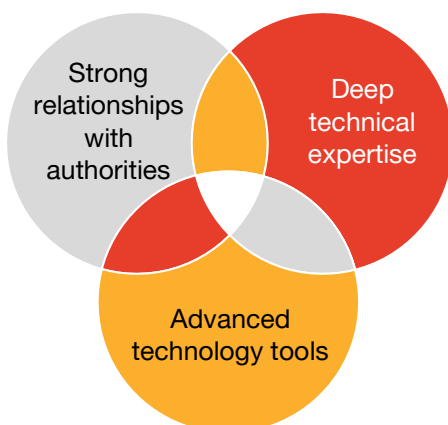

Tax audit

Is it over once it's over?

Whether you like it or not, tax audits are one of life's necessities and are a key part of the tax authorities' enforcement program.

After finalising the tax audit minutes, taxpayers commonly take time to revisit their policies and internal controls, and deal with the aftermath. The next thing you know, another tax audit comes along, with issues from the previous audit and a few new challenges thrown in. It is a lengthy and sometimes overwhelming process, especially in an ever changing compliance and regulatory environment.

Why choose PwC?

How can PwC help?

We can accompany you through every step.

BEFORE field work:

Assess existing documents, identify risks and plan defense strategy

DURING field work:

Meet the tax officials, discuss correct tax treatments and prepare formal explanations

AFTER field work:

Review tax audit minutes, recommend defense arguments and liaise with the tax authorities

AFTER it's all over:

Learn the lessons, revisit policies and processes, prepare for next time
